Design Plans for each intersection will be prepared for the IFB. Each intersection will utilize aerials for the topo basemap and show the following design details:

1. Removal of existing detection system and cabling
2. Installation of new vehicle presence detection system and proposed cabling in existing conduit
3. Proposed equipment to be installed in the existing traffic signal cabinet.

The Consultant will prepare an estimate of probable costs for the contractor to furnish, install, and testing of the vehicle presence detection systems.

It is assumed that a Categorical Exclusion 1 (CE1) document will be developed by ADOT for this project with input from the Consultant.

Due to the nature of this project it is assumed that R/W clearance will be provided by ADOT.

Task No. 6 – Bidding Phase Assistance

Kimley-Horn will provide bidding phase assistance to the City and ADOT answering pre-bid questions or reviewing bid pricing.

Exclusions

The following items and services are not included in this scope of work and fee proposal.
