

Glendale City Code Observation Points

Presented by Rick St. John, Deputy City Manager

Observation Points

We are seeking Council consensus amending various sections of Chapter 25 to all enforcement officers to take fixed, elevated positions to view violations.

Observation Points

Code currently states an enforcement officer must view a violation from ground level beyond the boundaries of the lot.

This was a change made in March 2021 from previous language that required the violation be viewed from a public street or sidewalk.

Observation Points

Allowing enforcement officers to use fixed, elevated positions to view violations must consider a few factors;

- Identifying the complaining party in reports and court proceedings
- Privacy expectations
- Identifying the types of violations allowed to be viewed from a fixed, elevated position

Observation Points

We are seeking Council consensus amending various sections of Chapter 25 to all enforcement officers to take fixed, elevated positions to view violations.
