- **1 response received**

Action

The Board of Adjustment shall make their analysis of the requirements based on the evidence in the record prior to granting a variance:

Analysis

- The property's location and surroundings are not self-imposed.
- Property abutting lake and park creates safety concerns.

Analysis

- The property is deprived of privilege of privacy that other property owners have.
- The request is appropriate for the high traffic areas it is abutting.
- Rezoning is not appropriate as it is within a subdivision which requires all lots to be uniform with the same zoning.

Analysis

- The wall height increase is the minimum necessary to alleviate the hardship
- Additional buffering along wall with additional landscape is not possible.

Analysis

- The request is not expected to have a detrimental effect as it is abutting a park and not a residence.
- Abutting residential property and lake to the site are not affected.

Recommendation

If the Board decides to grant the variance, it should be subject to the following stipulation:

Development shall be in conformance with applicable narrative, dated June 19, 2024, and site plan dated July 2, 2024.
