Financial Policies

FINANCIAL POLICIES

A key component of the FY25-26 budget is the adoption of the Council's financial policies. This budget document includes the Council's amended financial policies to be considered for approval as part of the in the FY25-26 budget adoption process.

Council's financial policies serve as the foundation for establishing a strong, sustainable financial plan. The policies provide broad policy guidance related to *Fiscal Planning and Budgeting*, *Cash and Budget Appropriation Transfers, Expenditure Control*, *Capital Asset and Debt Management*, and *Fund Reserves and Structure*.

These five key financial policy areas are discussed on the following pages. For the purpose of these policies, a department is defined as a separate departmental unit presented in the City's most recent organizational chart. A fund is defined as a balanced set of accounts which appears as a column for reporting purposes in either the "Basic Financial Statements" or the "Combining Financial Statements" section of the City's Annual Comprehensive Financial Report (ACFR).

Fiscal Planning and Budgeting

Fiscal planning is the process of identifying resources and allocating them among numerous and complex competing purposes. The primary vehicle for this planning is the preparation, monitoring and analysis of the budget. It is essential to incorporate a long-term perspective and to monitor the performance of the programs that are competing to receive funding.

The City Manager will submit to the Council a proposed annual budget, based on Council's established goals, and will execute the budget as finally adopted, pursuant to Title 42, Chapter 17, Article 3, Section 17105 of the Arizona Revised Statutes, as amended.

1. Revenue and expenditure forecasts will be prepared annually and will include a Five-Year Forecast for each major operating fund (General Fund, Enterprise Funds, and certain Special Revenue Funds). These Five-Year Forecasts will be prepared at the beginning of the operating budget process and 1) provide a long-term view of current year budget decisions affecting the City and 2) provide an estimate of the fund balance and sensitivity to revenue and expenditures changes over the forecast period.

    a. The budget will be balanced, by fund, when all projected ongoing revenue sources exceed all ongoing expenses proposed for the current fiscal year and for the upcoming fiscal year. Use of the unassigned fund balance will occur only as authorized by Council and to address one-time costs, not ongoing costs or planned utilization of fund balance.

b. Revenues will not be dedicated for specific purposes unless approved by Council or required by law. All non-restricted revenues will be deposited in the General Fund and appropriated through the annual budget process.

2. To ensure ongoing General Fund stability, the primary property tax levy will be evaluated each year to determine where it should be set.

3. Any proposed new service or program initiative will be developed to reflect current Council policy directives and shall be considered in the context of balancing ongoing anticipated revenues against ongoing anticipated expenses. Proposals will follow all related Council Financial Policies.

4. To ensure compliance with existing policy, all grant programs and any programs supplemented by outside funding will include a sunset provision consistent with the projected end of funding. Personnel paid with these funds will be considered temporary with no certainty of continued employment beyond the life of the funding unless otherwise approved by Council. Equipment and technology purchases with these kinds of funds are subject to the policies for the replacement funds.

5. The City Manager's recommended budget presented to Council will contain, at a minimum, the following elements:

a. Revenue projections by major category, by fund;
b. Expenditure projections by program levels and major expenditure category, by fund, including support provided to or received from other funds;
c. Debt service principal and interest amounts;
d. Proposed inter-fund transfers;
e. Projected fund balance by fund;
f. Proposed personnel staffing levels;
g. Detailed schedule of capital projects;
h. Any additional information, data, or analysis requested by Council.

6. The operating budget will be based on the principle that current ongoing operating expenditures, including debt service and support for other funds, will be funded with current ongoing revenues. The enterprise funds (water/sewer, solid waste and landfill) and the transportation sales tax fund will pay the indirect cost charges for services provided by other funds. Additional funds may be added upon Council approval.

7. The budget will not use one-time (non-recurring) sources to fund continuing (recurring) expenditures.

8. Addition of personnel will be requested only to meet existing program initiatives and policy directives after service needs have been thoroughly examined and only if increased net ongoing revenue is substantiated.

9. The Budget and Finance Department and Human Resources Department will work together to manage position control. The number of full-time and regular part-time employees on the payroll will not exceed the total number of full-time equivalent positions that Council authorizes and adopts with the annual budget.

10. Benefits and compensation will be administered in accordance with Council policy direction.

a. Total compensation will be evaluated periodically for competitiveness.

b. A cost containment strategy means total costs for health insurance premiums will be shared between the employer, employees and retirees. Total premiums will be evaluated on an annual basis to ensure they are reasonable, competitive and expected to address anticipated claims plus the maintenance of an adequate reserve for the Employee Benefits Fund. Funding will be based on an annual actuarial report and its 75% confidence funding level recommendation.

c. A policy will be developed regarding the continuation of retiree health insurance after the completion of a comprehensive evaluation of the impact of GASB 67 and the presentation of results to Council.

11. Ideas for improving the efficiency and effectiveness of the city's programs and the productivity of its employees will be considered during the budget process.

12. Carryover of unspent appropriation from one fiscal year to the next is not automatic. The Budget and Finance Department staff will evaluate carryover requests and make recommendations to the City Manager. Recommended requests will be included in the City Manager’s budget presented to Council.

13. Salary savings will be retained to the greatest extent possible to build fund balance. Salary savings may be used for expenses upon the City Manager or their designee’s, approval if within the same fund/department. Salary savings may be used for expenses between funds/departments upon Council approval within the last three months of the fiscal year.

14. Total fund appropriation changes must be approved by the Council. These changes must also comply with the city's Alternative Expenditure Limitation in accordance with Article IX, Section 20, Constitution of Arizona and A.R.S. § 41-563 where final budget adoption sets the maximum allowable appropriation for the upcoming fiscal year.

15. The replacement of General Fund capital equipment and related support for technology, vehicles and telephonic equipment [except cell phones] will be

accomplished through the use of a “rental rate structure” that is revised annually as part of the annual budget process.

a. Any equipment purchased with grant funding will be considered for ongoing replacement and ongoing replacement premium funding only if specifically authorized by the City Manager and noted in the budget submittal.

b. The ongoing replacement costs for new technology and new vehicle purchases will be incorporated into the upcoming fiscal year’s rental rate structure regardless of whether they are initially purchased through a lease or pay-as-you-go funding.

c. Replacements will be based on equipment lifecycle analyses by the Public Works Department for City vehicles, or the Budget and Finance Department for technology and telephonic systems.

16. The City Council supports economic development objectives that support the creation and retention of quality jobs (25% greater than the median average wage in Maricopa County), add revenue, and enhance the quality of life in Glendale. City Council will consider incentives when the circumstances of the economic development opportunity warrant them necessary and appropriate for the opportunity and in the best interest of the city.

Cash and Budget Appropriation Transfers

1. Purpose & Restrictions

The following policy is established to implement an effective and efficient process by which the adopted City budget may be amended.

Throughout the course of the fiscal year, amendments to the budget are necessary to address new issues, increased prices, changes in scope of existing projects, and unforeseen issues affecting City operations. This policy applies to all cash and budget appropriation transfers initiated by the Mayor and City Council, the City Manager's Office, and/or departments. The City's Budget and Finance Department will process budget amendments in the financial management system, following appropriate authorization by the Mayor and City Council, the City Manager, and a Department Director.

For non-departmental operations, it may be necessary to transfer certain unanticipated amounts during the course of a fiscal year for unforeseen expenditures. These contingency appropriation transfers are not specific to any particular department and are established each fiscal year to cover unforeseen operation expenses, revenue shortages, or capital project acceleration as approved by Council. These funds can only be directed by Council during the fiscal year. Similar to

contingency, the Council approves appropriations for Miscellaneous Grants which are not specific to any particular department and are established to cover unanticipated grants received during the fiscal year. The policy covering these types of transfers is covered in the Contingency & Miscellaneous Grant Appropriation Transfers section below.

Article VI, Section 11 of the City Charter establishes the legal restriction for budget appropriation transfers and reads as follows:

> *The city manager may at any time transfer any unencumbered appropriation balance or portion thereof between general classifications of expenditures within an office, department or agency. At the request of the city manager and within the last three months of the fiscal year, the council may by ordinance transfer any unencumbered appropriation balance or portion thereof from one office, department or agency to another.*

2. Policy

Based on the purpose and restrictions surrounding cash and budget transfers, the following policy sets forth the restrictions surrounding cash and budgetary appropriation transfers.

a. Cash Transfers · Cash transfers between funds can only be authorized by Council in the last three months of the fiscal year.

b. Cash & Appropriation Transfers Between Funds · Cash and associated budget appropriation transfers between funds can only be authorized by Council in the last three months of the fiscal year.

c. Appropriation Transfers

   i. Between Funds· Budget appropriation transfers between funds can only be authorized by Council approval in the last three months of the fiscal year.

   ii. Between Departments· Budget appropriation transfers between departments can only be authorized by Council approval in the last three months of the fiscal year.

   iii. Within the Same Fund, Within the Same Department· Budget appropriation transfers within the same fund and within the same department can be authorized by City Manager approval throughout the fiscal year.

iv. Between Capital Improvement Projects

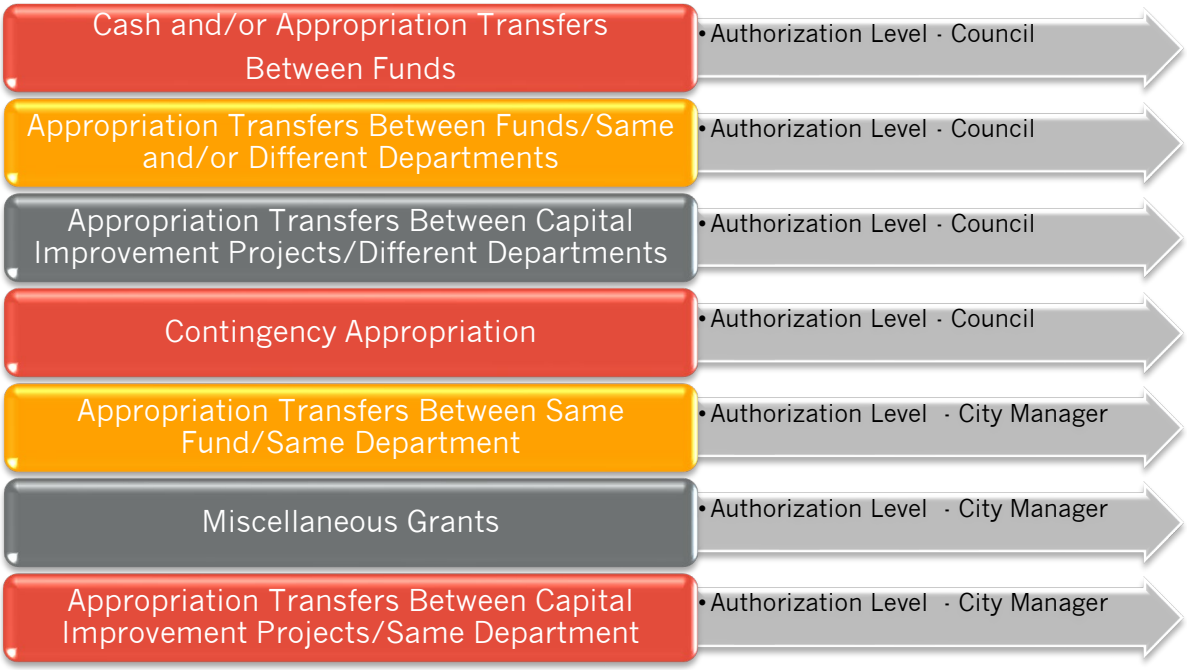

(1) Between Departments - Capital improvement project budget appropriation transfers for projects managed between departments can be only authorized by Council approval in the last three months of the fiscal year.

(2) Within Departments - Capital improvement project budget appropriation transfers within the same department, and the same fund, can be authorized by City Manager approval throughout the fiscal year.

d. Restricted Fund Transfers - Cash and/or appropriation transfers into, and out of, restricted funds can only be authorized by Council approval. Only transfers within the intent of the restricted funds will be approved by Council. For restricted fund transfers, the Council shall be provided with
   i. justification that such transfers are consistent with restricted fund purposes,
   ii. assurance that the transfer has been legally reviewed by the City Attorney, and
   iii. assurance that the transfer meets the restrictions set out in this transfer policy.

e. Contingency & Miscellaneous Grant Appropriation Transfers- These types of transfers are not specific to any particular department:
   i. Contingency- Contingency budget appropriation transfers can be authorized by Council throughout the fiscal year.
   ii. Miscellaneous Grants- Miscellaneous Grant appropriation transfers can be authorized by the City Manager throughout the fiscal year.

f. Approval of Expenditures in Excess of Budget Appropriations - There may be emergency situations where a transfer is required before it is possible to obtain formal Council approval. In such cases, the Budget and Finance Department will advise the City Manager of the emergency condition and request approval. Upon approval, the Budget and Finance Department will seek Council ratification at the first possible Council meeting.

EXPENDITURE CONTROL

Management will ensure compliance with the City Council adopted budget.

1. Expenditures will be controlled by an annual appropriated budget. Council will establish appropriations through the budget process. Council may transfer these appropriations as necessary through the budget amendment process as previously described.

2. The purchasing system will provide commodities and services in a timely manner to avoid interruptions in the delivery of services. All purchases will be made in accordance with the procurement code, purchasing policies, guidelines and procedures and applicable state and federal laws. The city may join various cooperative purchasing agreements to obtain supplies, equipment and services at the best value.

3. A system of internal controls and procedures using best practices will be maintained for the procurement and payment processes.

4. The State of Arizona sets a limit on the expenditures of local jurisdictions. Compliance with these expenditure limitations is required. The city will submit an audited expenditure limitation report as defined by the Uniform Expenditure Reporting System (A.R.S. Section 41-1279.07) along with audited financial statements to the State Auditor General within the required timeframe.

CAPITAL ASSET AND DEBT MANAGEMENT

Long term debt is used to finance capital projects with long useful lives. Financing capital projects with debt provides for an “intergenerational equity” because the actual users of the capital asset pay for its cost over time, rather than one group of users paying in advance for the costs of the asset.

The city will not give or loan its credit in aid of, nor make any donation, grant, or payment of any public funds, by subsidy or otherwise, to any individual, association, or corporation, except where there is a clearly identified public purpose and the city either receives direct consideration substantially equal to its expenditure or provides direct assistance to those in need. Long-term debt will not be used to fund current operations or smaller projects that can be financed from current revenues or resources.

1. A 10-year Capital Improvement Plan (CIP) will be updated annually as part of the budget process. It will include projected life cycle costing. Only the first year of the plan will be appropriated. The remainder will be projections to be addressed in subsequent years.

a. Life cycle costing is a method of calculating the total cost of a physical asset throughout its life. It is concerned with all costs of ownership and takes into account all of the costs incurred by an asset from its acquisition to its disposal, including design, installation, operating, and maintenance costs.

2. The 10-year CIP will address capital needs in the following order:

a. to improve existing assets;
b. to replace existing assets;
c. to construct new assets.

3. All projects will be evaluated annually by a multi-departmental team regarding

a. accuracy of the projected costs;
b. consistency with the General Plan and Council policy goals;
c. long-range master plans;
d. ability to finance initial capital costs;
e. ability to finance life cycle costs;
f. ability to cover the associated additional ongoing operating costs.

4. All projects funded with general obligation bonds will be undertaken only with voter approval as required through a bond election.

a. General Obligation debt is supported by secondary property tax revenues. The secondary property tax revenues assessed are based upon the ability to finance the City's debt service obligations and the rate is dependent upon the revenue requirements and the assessed valuation of taxable property. At a minimum, the general obligation debt service fund balance will be at least 10% of the next fiscal year's property tax supported debt service.

5. Non-voter approved debt supported by General Fund revenues such as Municipal Property Corporation (MPC) bonds, excise tax bonds, and lease obligations will be used only when a dedicated ongoing revenue source is identified to pay the associated debt service obligations. This type of debt service will not exceed 10% of the 5-year average of the General Fund's operating revenue available to support the debt service obligations.

a. For FY25-26, debt service is 16.7% of the General Fund operating revenue as defined above.

6. For non-voter approved debt, the following considerations will be made prior to the pledging of projected revenues for the ongoing payment of associated ongoing debt service obligations:

a. The project requires ongoing revenue not available from other sources.
b. Matching monies are available that may be lost if not applied for in a timely manner.
c. Catastrophic conditions.

7. Short-term borrowing or lease/purchase contracts should be considered for financing major operating capital equipment only when:

a. The repayment term does not exceed the expected useful life of the equipment to be purchased;
b. An ongoing revenue source is identified to pay the annual debt service; and
c. The Budget and Finance Director, along with the city's financial advisors, determine that this is in the city's best financial interest.

8. These policies are in addition to the policies incorporated in the Debt Management Plan.

FUND RESERVES AND STRUCTURE

Fund balance is an important indicator of the City's financial position. Adequate fund balances are maintained to allow the City to continue to providing services to the community in case of economic downturns and/or unexpected emergencies or requirements. To ensure the continuance of sound financial management of public resources, committed, assigned, or unassigned General Fund, fund balance will be maintained to provide resources to address emergencies, sudden loss of revenue, or unexpected downturns in the economy. Use of fund balances will be limited to address unanticipated, non-recurring needs and planned future one-time or non-recurring obligations. Unassigned balances may, however, be used to allow time to restructure operations and must be approved by the City Council.

1. The minimum fund balance in the General Fund, which is defined as the unassigned amount, shall total 25% of the total budgeted ongoing expenditures for the upcoming fiscal year. Any usage of the unassigned fund balance category must be approved by a majority of the City Council. The unassigned fund balance should only be used in the event of unexpected revenue shortfalls, unforeseen circumstances, and emergencies. Any usage of this reserve should be replenished within the subsequent fiscal year if possible. The replenishment period may be extended, based on circumstances, for as long as five years.

2. For the Water and Sewer Enterprise Fund;
a. The target for fund balance will be 50% of operating expenses.
b. The Senior Lien Debt Service Coverage Ratio target will be 1.85.
c. The target for Days Cash on Hand will be 250 days.

3. The minimum fund balance in the Solid Waste Enterprise Fund will be maintained at 10% of operating revenues.

4. The minimum fund balance in the Landfill Enterprise Fund will be maintained at 15% of operating revenues.

5. For the other major governmental operating funds, the minimum unassigned fund balance shall be as follows:

    a. PSST 5% of operating revenue
    b. HURF 15% of operating revenue
    c. Others: 10% of operating revenue

6. If a situation arises where fund balance at the end of the current fiscal year is less than the Council approved fund balance level, the deficiency should be replenished in the coming fiscal years, not to exceed a total of five consecutive years.

7. The City Manager may establish additional assigned fund balance reserves for certain anticipated obligations or other purposes.

8. Any balance in excess of the fund balance reserves may be used to support one-time expenditures. Council approval is required to use these funds to supplement "pay as you go" capital outlay, one-time operating expenditures, or to prepay existing debt.

9. The fund balance for the various Trust Funds will be based on annual actuarial reports and the target funding level must be at the 75% confidence funding level.

10. Separate fund balance operating reserves may be required by bond issuance documents for those funds with outstanding bonded debt. These requirements will not be viewed as additional fund balance needs unless they are greater than those established by these goals.

LP15 HEART MONITOR REPLACEMENT

Package Number	Project Type	Project Number
FY26-35CIP	Public Safety	CIPPS23002

Project Number: CIPPS23002

Description

Purchase of 37-40 cardiac monitors. Life span is anywhere between 8-10 years.

Justification

These monitors are used multiple times daily. Emergency medical incidents account for over 80% of all calls for service. New technology also plays a part in how long we can continue to use older equipment. Currently, the department's heart monitors are adequate as they were recently replaced in FY25. Heart monitors are considered a capital expenditure due to the type of equipment requiring to be updated all at the same time. This type of equipment cannot be phased in when replaced due to the need for standardization throughout all of our fire stations and personnel. Personnel must all be able to train and work on the same type, make and model of equipment.

Radios were recently replaced in FY23. Radios are on a replacement schedule for every eight years. Radios are necessary in order to properly respond to all fire and medical responses. It is also imperative that we maintain communication with all other public safety agencies responding to emergency situations.

Project Number: CIPPS24005

Description

Replace 10 training fire hydrants at GRPSTC and improve equipment reliability, to continue to train fire recruits and active duty personnel.

Justification

These hydrants are used nearly every day, decreasing their projected service time as compared to a hydrant's normal use throughout the City. Repairs are made periodically to replace threads, caps, and valve stems, but a full replacement of the hydrant will be required approximately every five (5) years to ensure continuous availability. Cost includes the hydrants, sidewalk removal and replacement (as necessary).

Project Number: CIPPS24054

Description

Replace the current GRPSTC Class A burn building.

Project Number: CIPPS25002

Description

Driving simulator to enhance training and reduce accidents.

Justification

Adding an inhouse fire and police driving simulator provides hands-on practical training for our public safety personnel, offering experience without risks to people or equipment. The compact, ergonomic design driving simulator replicates emergency vehicle driving compartments. Project Number: CIPPS25027

Description

These structures will have movable walls that can create a multitude of room simulations for all of our fire fighters as well as a prop that the police department can utilize as well. This will differ from the current Class A props as it will not utilize active smoke or fire. This will decrease the amount of carcinogens that fire fighters come in contact with during training exercises.

Justification

Due to the demands placed on the GRPSTC Fire Academy by the increased number of fire fighter recruits receiving initial fire fighter training, the current number of fire fighting props are insufficient at providing real life structures that simulate modern day fire fighting. The intent is to provide connex box containers that will simulate a small to medium size strip mall, which would provide for the ability to train in real life forceable entry, breeching and breaking and other skills not associated with the props currently at GRPSTC.

GRPSTC FACILITY UPGRADES

Package Number	Project Type	Project Number
FY26-35CIP	Public Safety	CIPPS25083

Project Number: CIPPS25083

Description

This project is for various facility upgrades at the Glendale Regional Public Safety Training Center (GRPSTC). This includes but is not limited to audio/visual upgrades to various classrooms, replacement of broken classroom and office chairs, and research and application fees for the aquifer protection permit modification.

Justification

GRPSTC was constructed in 2006 and opened to employees and partnering agencies in 2007. A lot of the technology and equipment throughout the facility has reached its end of useful life. In the last 18 years, technology has changed and improved, and we have not kept up with those changes. Our office and classroom equipment also gets used by approximately 50,000 employees, students, and visitors per year. We work with other city departments who provide us guidance and assistance in making repairs and improvements to our facility.

Project Type: Transit

Project Number: CIPTR22069

Project Number: CIPTR22069

Description

The Glendale Bus Stop Enhancement Project is a multi-year program that will improve the passenger experience at Glendale bus stops throughout the city. This project will also bring current non-ADA compliant stops into compliance. These improvements may include shelters, benches, trash cans, concrete pads, and other related ADA improvements. There have been 196 total stops identified for improvements, with 31 earmarked for FY23, leaving 165 locations. This funding will also supplement bus stop advertising revenue to add kiosks, panels, and pad space at additional bus stop locations as the program is expanded.
