ATTACHMENT "A"

Services to be Provided by the Surveyor

Services and Capabilities of Dos Land Surveying:

Boundary Surveys

A survey performed for the purpose of locating and marking property corners, boundary lines and/or easements of a given parcel of land. This involves record and field research, measurements, and computations to establish boundary lines in conformance with the rules and regulations of the Texas Board of Professional Land Surveying.

Parcel Plats for Right-of-Way Acquisitions

A boundary survey prepared that creates a new parcel of land for the purpose of acquiring new right-of-way for roadways or utility easements. The survey is usually taken from a larger parent tract of land. A metes and bounds description is prepared along with the survey plat.

Control Surveys

A survey performed for determining precise locations of horizontal and vertical control points for use in boundary determination, aerial photographs, topographical surveys, construction staking and related purposes. Horizontal coordinates are derived using the latest in GPS equipment. Vertical locations are derived using state of the art digital levels and are based on existing published benchmarks.

Construction Surveys

Construction staking to establish the correct location of proposed structures as shown on improvement plans for construction of roads, parking lots, pipelines, buildings, etc.

Topographical Surveys

A survey locating topographic features - natural and man-made - such as buildings, improvements, fences, elevations, trees, streams, roadways, contours of the land, etc. This type of survey may be required by a governmental agency, or may be used by engineers and/or architects for design of improvements or developments on a site and also may include a boundary survey.

As-Built Surveys

A post-construction topographical survey which will include all structures and features of the property as well as all improvements that have been constructed.
