This was estimated based on current and past listings located within the market area which were reviewed during our sales search for comparables similar to the subject property.

### Statement of Highest & Best Use

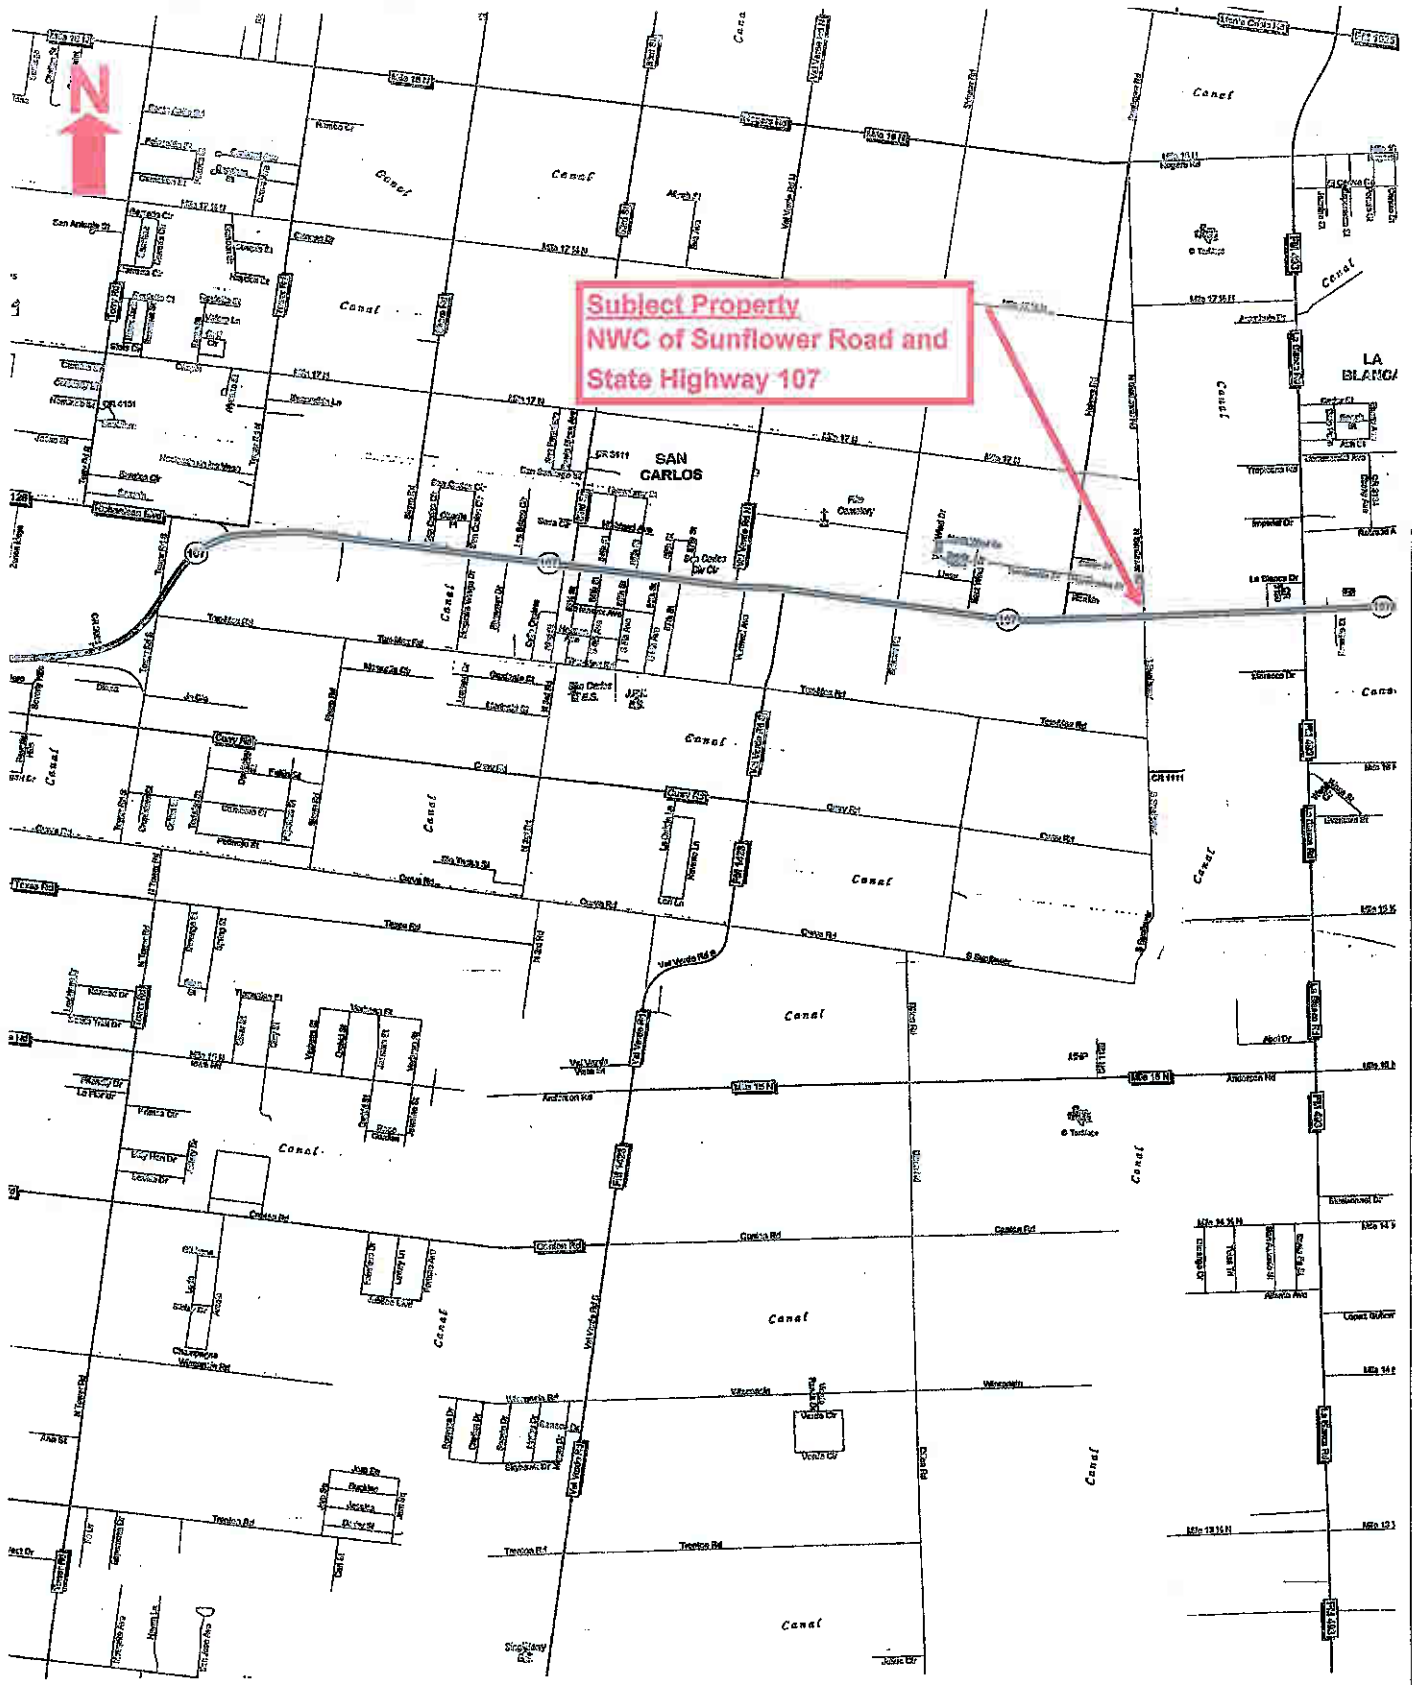

The subjects highest and best use as if vacant and as improved is indicated for mixed use, with commercial use along the frontage of SH 107 and residential usage along the remainder. This type of use is concurrent with the recent trends located along State Highway 107 within the Cities of San Carlos and La Blanca, Texas. This highest and best use is based on the determined economic unit of the subject property as whole.

When a property is evaluated the highest and best use must always be considered. In the current case the highest and best use of the whole is determined to be for mixed use based on several factors. These factors that are taken into consideration are defined by The Dictionary of Real Estate Appraisal, Fourth Edition, copyright 2002, page 135, by the Appraisal Institute as being: "The reasonably probable and legal use of vacant land or an improved property, which is physically possible, appropriately supported, financially feasible, and there results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum productivity."

The scope of the assignment is to evaluate the subject property as a whole excluding project influence as required by Standards Rule 1-4(f) under the Jurisdictional Exception provision as defined by the Uniform Standards of Professional Appraisal Practice (USPAP). In order to determine the highest and best use, research was performed within the Cities of San Carlos and La Blanca to determine the legal permissibility of land use along State Highway 107 and neighboring thoroughfares within the County of Hidalgo. This office shall evaluate the subject property based on the continuing trend along State Highway 107 for the legal permissibility of a mixed use type development. The County of Hidalgo does not contain municipal zoning restriction in the area. Therefore a mixed type development shall be permissible and is subject to the approval of the model subdivision rules for applicability of utilizing the subject property for both commercial and or residential use.

The financial feasibility and maximally productivity use of the subject property is based on the continued growth along State Highway 107 and neighboring thoroughfares which includes single family residential, commercial retail, light to heavy industrial use, and general agricultural. Based on the continued growth along State Highway 107, it is estimated that the subject can be financially feasible to contain a mixed use "as if vacant". After careful review of the four approaches to the highest and best use test, it is concluded that the subject property "as if vacant" shall be for mixed use development.

# COMPARABLE SALES MAP

**Explanation of Adjustments with Reconciliation:**

During the analysis of the part to be acquired, the value for the subject property as a whole was determined. This determination of market value is utilized for the valuation of the part to be acquired which is a pro-rata part of the whole. The local market was searched for comparable sales of which contained similar frontage along State Highway 107 and other nearby thoroughfares. Several sales were located within this parameter had occurred within the past two years. Three sales were selected which were the most comparable to the subject property and required the least number of adjustments. The following three comparable sales were reviewed for location, available utilities, financing, site utility, topography and other factors of which the real estate market shall recognized for the purchase of said tracts.

Sale No. 1 is located at the northwest corner of State Highway 107 and Val Verde Road in San Carlos, Texas. The property was purchased for \$375,000 for 21.63 acres which equates to a unit rate of \$17,337 per acre. Due to the sales superior location as compared to the subject property a downward adjustment of -10% was indicated. Further adjustment was required for the level topography of the sale as the subject is located in a Flood Zone AE and is below street grade of which the subject property does hold water during severe storms. The adjustment for topography is indicated to be -20% based on the estimated land area required to excavate and fill the southern portion of property to grade. Based on these adjustments, a unit value for the subject property is indicated to be \$12,136 per acre.

Sale No. 2 is located at the along the southern side of State Highway 107, East of FM 493 in Hidalgo County in La Blanca, Texas. The property was purchased for \$150,000 for 4.00 acres which equates to a unit rate of \$37,500 per acre. Due to the sales superior location as compared to the subject property, a downward adjustment of -20% was indicated. Further adjustment was required for the level topography of the sale as the subject is located in a Flood Zone AE and is below street grade of which the subject property does hold water during severe storms. The adjustment for topography is indicated to be -20%, as this is based on the estimated land area required to excavate and fill the southern portion of property to grade. However, an upward adjustment of +5% for this line item is also indicated for the limited frontage as compared to the subject property, leaving a net -15% adjustment. A final adjustment of -20% for the difference in size is also indicated for the sale. Based on these adjustments, a unit value for the subject property is indicated to be \$18,750 per acre.

Sale No. 3 is located at the northeast corner of Chapin Road and Tower Road in Hidalgo County. The property was purchased for \$110,000 for 9.00 acres which equates to a unit rate of \$12,222 per acre. Due to the sales inferior location as compared to the subject property an upward adjustment of +20% was indicated. Further adjustment was required for the level topography of the sale as the subject is located in a Flood Zone AE and is below street grade of which the subject property does hold water during severe storms. The adjustment for topography is indicated to be -20% based on the estimated land area required to excavate and fill the southern portion of property to grade. A final adjustment of -5% for the difference in size is also indicated for the sale. Based on these adjustments, a unit value for the subject property is indicated to be \$12,833 per acre.

Reviewing the comparable sales selected, an unadjusted unit range of market value of \$17,337 per acre to \$37,500 per acre is indicated by the sales data. After applicable adjustments were made in a paired sales analysis of the comparables to the subject property, an adjusted range of market value of \$12,136 per acre to \$18,750 per acre was determined. Based on the subject property location along State Highway 107 and the knowledge of the subject site holding substantial amounts of water during a severe storm a value near the lower end of the adjusted range is selected for the subject property, \$13,000 per acre. This unit rate multiplied by the net land area of 18.75 acres equates to an overall market value of \$243,698.

### *This appraisal report has been made with the following general limiting conditions:*

1. Any allocation of the total value of the total valuation in this report between land and improvements applies only under the stated program of utilization. The separate allocations for land and buildings must not be used in conjunction with any other appraisal and are invalid if so used.
2. Possession of this report, or a copy thereof, does not carry with it the right of publication without the written permission of Leonel Garza Jr. & Associates LLC.
3. The appraiser, by reason of this appraisal, is not required to give further consultation, testimony, or be in attendance in court with reference to the property in question unless arrangements have been previously made.
4. Neither all nor any part of the contents of this report (especially any conclusions as to value, the identity of the appraiser, or the firm with which the appraiser is connected) shall be disseminated to the public through advertising, public relations, news, sales, or other media without the prior written consent and approval of the appraiser and or the client of this report.
5. If the property rights appraised are the "Leased Fee Estate", then the final indicated market value estimate is based on the continued performance under the lease terms.
6. All original appraisal reports have been signed in blue. Any other copy, which is not signed in blue, may have been altered, and this appraiser is not responsible for its contents or values indicated.

### *Assumptions and Interpretations Made of the Marketing Period*

1. **Marketing Time Period:** Begins with the date of value estimate and with the indicated exposure time.
2. **Exposure to the open market:** listing the property on the market for sale with a Realtor, member of Multiple Listing Service, or a licensed Real Estate Broker, that will properly expose the property to the market. This appraiser does not consider a sign placed by a property owner on the property as proper marketing. If the property is presently listed for sale on the market, this appraiser must be notified prior to the completion of the appraisal.
3. **Exposure Time:** The length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.
