PRIMARY VALUE ADDS

Great experience with this app type. Web based, back office, electronic paper applications are our specialty. We have many systems to cut corners and reduce development time with these types of applications

Application Framework. Over the past 10 years developing web based .net apps we have created an application framework. It is a thin layer to sit on top of the MS.NET platform. Our framework handles common features like: log in/log out; menu navigation; user accounts, groups, roles, grids, input forms, forgot password. We can demo this framework over Go-to-Meeting easier than explaining.

Maintenance Phase. The maintenance phase of this application could be our strongest area. We are stable, having been in business for over 10 years. We can leverage our offshore teams to have dedicated bug engineers for this project over the lifetime of the project. This would be one my greatest concerns if utilizing contractors to build the app, as there is no way to know what will happen to them long term.

QUOTE FOR PROPOSAL

<u>Description:</u>	Technician Pricing	<u>Price</u>
bigWebApps HelpDesk		\$10,500
Email Parser		\$1,050
Remote Assistance		\$1,050
Asset Manager		\$3,150
