The following is a brief summary of the measures that we have taken as your broker to review and report to you objectively on the financial security of your insuring companies. Information is included on A.M. Best Company, our primary security rating source, and the internal policies and standards which we have established to address this important issue for our customers.

**HISTORY**

A.M. Best Company was incorporated in 1899 as the first rating agency in the world to offer reliable information on the financial condition of U.S. insurance companies. The Best's Rating Guide was first published in 1900, and has since become a cornerstone of the security review process by continuously evaluating the financial integrity of over 4,100 insurance companies. In 1984, the first edition of the Best's International Rating Guide was published, reporting on the claims-paying ability of over 950 international insurers.

The information used by Best to rate insurance carriers is provided by the companies themselves as a part of their normal filings with the National Association of Insurance Commissioners, those states in which the company is licensed, the SEC and/or with its shareholders. Rating reviews are performed annually on each insurance company, and on an interim basis as conditions dictate.

**RATING SYSTEM**

The Best's rating system is designed to evaluate a wide range of objective and subjective factors which affect the overall performance of an insurance company (not applicable to associations or intermediaries). These factors deal with the companies' financial strength, its operating performance and its ability to meet its financial obligations to policyholders, as follows:

- Profitability - Spread of risk
- Quality of reinsurance program - Leverage/capitalization
- Quality and diversification of assets - Liquidity
- Adequacy of policy loss reserves - Adequacy of policyholder's surplus
- Capital structure - Management experience and objectives

**RATING SYMBOLS**

A typical Best's rating is composed of two parts. The "Security" portion provides an alphabetical indication of the quality of the security provided by a company to its policyholders. This rating is further defined in three categories, "Secure," "Vulnerable" or "Not Assigned." The "Financial Size" (FSC) portion of the Best's rating uses Roman numerals to rank companies based on the dollar amounts of their policyholders' surplus and contingent reserve funds.

While comparative rankings for security or financial size by themselves may not adequately portray the complete financial health of a company, the combination of the two has proven to be reliable in predicting the ability of a company to meet its claims obligations in a timely manner, both now and in the near future. The actual rating symbols used by Best and their meanings are:

|                             |           |                   |
|-----------------------------|-----------|-------------------|
| <b>"Secure" Ratings</b>     | A++ or A+ | Superior          |
|                             | A or A-   | Excellent         |
|                             | B++ or B+ | Very Good         |
| <b>"Vulnerable" Ratings</b> | B or B-   | Adequate          |
|                             | C++ or C+ | Fair              |
|                             | C or C-   | Marginal          |
|                             | D         | Very Vulnerable   |
|                             | E         | Under Supervision |
|                             | F         | In Liquidation    |

**"Not Assigned" Ratings** NA-1 through NA-11, indicating conditions such as inadequacy of size (to justify a rating), inapplicable rating procedure, incomplete
