

## PRODUCT DESCRIPTION

**Optec® 5500P Vision Tester**

- A simple test sequence that requires less than five minutes to administer.
- Standard test packages with vision testing devices and accessories that are designed to apply to multiple specialty areas, including optometry, ophthalmology, public health, schools, pediatrics, clinical trials, general medicine, driver licensing, industry, and military.
- Test slides that are manufactured on high-quality photographic film and then sealed between two glass plates, ensuring that the images will last for years.
- Scratch-resistant, washable surface made of Acrylonitrile Butadiene Styrene (ABS) plastic.
- Two independent viewing ports for precise distance and near visual screening. The distance lens system tests at 20 feet and the near lens system tests at 18 inches. Testing between near and distance is also available from 20 inches to 40 inches.
- Standard slide packages include: Ophthalmic Prescreening, Driver Rehabilitation, Medical with H.O.T.V., Medical with Michigan Preschool, Industrial with Purdue Job Standards Book, and the International with Job Standards Book.
