Subtotal in USD:				1,993.20
Total in USD:				1,993.20

Final coverage dates for new license, Software Subscription and Support reinstatement, and Software Subscription and Support renewal part numbers will be based upon IBM's acceptance of the order, and as specified in the applicable agreements, irrespective of the dates which may appear in this quote.

Quotation Terms and Conditions

1. The prices listed above are based on the Program(s) being licensed under the terms of the IBM International Program License Agreement ("IPLA") and the License Information ("LI") that can be viewed at <http://www-306.ibm.com/software/sla/sladb.nsl/> and are included with the shipment of the Program, or for electronic delivery included with the product download instructions. Software Subscription and Support (Software Maintenance) is governed by the IBM International Agreement for the Acquisition of Software Subscription and Support ("IAASSS"), which is available upon request. This quotation is expressly conditional on acceptance of such terms. No additional terms will apply without IBM's prior, express written consent.
2. More detailed information about Support can be found in the IBM Software Support Guide, located at <http://techsupport.services.ibm.com/guides/handbook.html>.
3. Price quoted does not include any VAT/GST/sales tax. Applicable sales tax/VAT/GST will be added upon invoicing. If any authority imposes a duty, tax, levy or fee, excluding those based on IBM's net income, upon the Programs and/or Software Subscription and Support, then the End User agrees to pay the amount specified or supply exemption documentation. The End User is responsible for any personal property taxes for the Programs, and/or Software Subscription and Support from the delivery date.**
4. Changes to the terms of this Quote or the documents referred to herein shall not be valid unless agreed in writing by the End User and IBM. Additional or different terms in any order or written communication from the End User will be void. Please submit your Purchase Order or sign this quotation form to confirm your acceptance of these terms.**
5. Prices set forth in this Quote are valid only through the "Quote Expires" date above. Any discounts offered herein are subject to change if item(s) or quantity ordered do not match those listed in this Quote.
6. Net Payment of the Total Fees is due upon receipt of invoice from IBM. ***
7. Shipping is FOB Origin.
8. You acknowledge and agree that this transaction is to be conducted in the language of this quote, and agree that the terms of the agreement (including this form and the IPLA, LI and IAASSS) as written are valid and enforceable. ***
9. IBM shall have the right to verify your compliance with the license terms on your premises during your normal business hours and in a manner that minimizes disruption to your business. IBM may use an independent auditor for this with your prior approval, which you will not unreasonably withhold. If you are a Business Partner you will procure that IBM has the right to verify the End User's compliance with the license terms in accordance with this paragraph.
10. Unless otherwise agreed, IBM may make partial shipment of Programs making up one order.
11. This quotation is conditional on satisfactory credit checks being performed and a sufficient credit limit being in place at the time of placing the purchase order ("PO"). In the absence of this, IBM reserves the right to reject the PO, to require up-front payment or require that a satisfactory payment guarantee be put in place prior to processing the PO.
12. This Quote, and the documents referenced herein, including but not limited to the IPLA, LI and IAASSS in Item 1 above, constitute the entire agreement between the parties (and where relevant the End User) in connection with the subject matter includes, and supersedes, merges and voids all prior and contemporaneous agreements, understandings, negotiations and discussions, whether oral or written, of the parties with respect thereto.

* For Customers in Brunei, Indonesia, Philippines, Vietnam, Malaysia, Thailand, Hong Kong, Taiwan, or Macau Item 3 is replaced as follows:

3. Price quoted does not include any VAT/GST/sales tax or other local tax. Applicable sales or local tax/VAT/GST will be added upon invoicing. Should you be required under any law or regulation of any government entity or authority, domestic or foreign, to withhold or deduct any portion of the payments due to IBM, then the sum payable to IBM shall be increased by the amount necessary to yield to IBM an amount equal to the sum it would have received had no withholdings or deductions been made. The End User is responsible for any personal property taxes for the Programs, and/or Software Maintenance from the

delivery date.

* For Customers in Europe, Middle East or Africa Item 3 is replaced as follows:

3. Price quoted does not include any VAT/GST/sales tax. If any authority imposes a duty, tax, levy or fee, excluding those based on IBM's net income, upon the Programs and/or Software Subscription and Support, then you agree to pay the amount specified on the invoice or supply exemption documentation. The end user of the Programs ("End User") is responsible for any personal property taxes for the Programs, and/or Software Subscription and Support from the delivery date.

* For Customers in Australia Item 3 is replaced as follows:

3. If any authority imposes a duty, tax, levy or fee, excluding those based on IBM's net income, upon the Programs and/or Software Subscription and Support, then the End User agrees to pay the amount specified or supply exemption documentation. The End User is responsible for any personal property taxes for the Programs, and/or Software Subscription and Support from the delivery date. If the rate of GST or other indirect taxes changes, IBM may adjust the charge or other payable to take into account that change from the date the change becomes effective.

* For Customers in Japan Item 3 is replaced as follows:

3. Price quoted does not include any consumption tax. Applicable consumption tax will be added upon invoicing. If any authority imposes a duty, tax, levy or fee, excluding those based on IBM's net income, upon the Programs and/or Software Subscription and Support, then the End User agrees to pay the amount specified or supply exemption documentation. The End User is responsible for any personal property taxes for the Programs, and/or Software Subscription and Support from the delivery date.

** For Customers in Europe, Middle East or Africa Item 4 is replaced as follows:

4. Changes to the terms of this Quote or the documents referred to herein shall not be valid unless agreed in writing by the End User and IBM. Additional or different terms in any order or written communication from the End User will be void. Please submit your Purchase Order to confirm your acceptance of these terms.

*** For Business Partner Item 6 is replaced as follows:

6. Net payment due upon receipt or per your Partner Agreement

*** For Business Partner Item 8 add the following:

Added to 8. Prior to providing any Program(s) to the End user, you will ensure that the terms of each end-user license agreement satisfies the requirements of your Partner Agreement.

For customers in the following countries, please sign below for your acceptance of this quote and return with your order.

Afghanistan, Albania, Algeria, Andorra, Angola, Bahrain, Belgium, Benin, Botswana, Bulgaria, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African republic, Chad, The Democratic Republic of Congo, Cote D'Ivoire, Czech Republic, Djibouti, Egypt, Equatorial Guinea, Eritrea, Ethiopia, France, French Guiana, French Polynesia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Iran, Iraq, Italy, Japan, Jordan, Kenya, Kuwait, Lesotho, Liberia, Libya, Macedonia, Malawi, Mali, Malta, Mauritania, Morocco, Mozambique, Namibia, Netherlands, Niger, Nigeria, Oman, Pakistan, Palestinian Territory, Poland, Qatar, Rwanda, San Marino, Sudan, Swaziland, Syria, United Republic of Tanzania, Togo, Tunisia, Turkey, Uganda, United Arab Emirates, Western Sahara, Yemen, Zambia, and Zimbabwe.

For customers in the following countries, please sign below for your acceptance of this quote and return with your order. An IBM delegate will need to countersign.

IBM i2 Analyst's Notebook Premium

Rich analysis environment underpinned by a local repository helps reduce the cost associated in multi-dimensional analysis across your knowledge and information

Highlights

- Speed up the intelligence analysis cycle with a rich data-centric analysis environment
 - Reduce the overhead of local data management with optimized local analysis repository
 - Increase the assuredness and security of locally stored information
 - Improve the discovery rate of key information across both new and historical data
 - Provide network, temporal, statistical and geospatial analysis from within a single environment
 - Support detailed analysis through operational decision-making
 - Leverage ongoing IBM i2 solution investments
-

IBM® i2® Analyst's Notebook® Premium builds on the powerful visual analysis capabilities of IBM® i2® Analyst's Notebook® by providing a rich data-centric analysis environment that includes the key elements required to collate, manage, explore and analyze intelligence data. Comprised of a local analysis repository and dedicated interfaces for ease of data management and detailed visual analysis, Analyst's Notebook Premium is designed to help analysts and investigators discover key information hidden in the mass of disparate data that is commonplace in the fight against modern day, sophisticated criminal and terrorist organizations.

At the core of Analyst's Notebook Premium is a local analysis repository that is optimized for data management, information discovery and analysis, so that users can more effectively manage a wide range of intelligence by collating it into a single source.

The data management interface is designed to enable rapid data entry and management, as well as powerful search and discovery capabilities. These features allow users to quickly explore their collated data and identify key information within the local analysis repository. Data of interest can also be exported in a commonly supported structured data format so that key information can be quickly disseminated across organizations.

Near seamless integration with the powerful capabilities of the rich visual analysis environment helps to empower users to quickly build multi-dimensional views of the identified data of interest and create multiple hypotheses that can ultimately help to drive more timely and accurate operational decision making.

Analyst's Notebook Premium is built upon a lineage that can be traced back to over 20 years of real-world usage across the global intelligence community, law enforcement, defense, national security and commercial organizations. The experience and knowledge gained from helping to deliver successful operational results to over 2,500 organizations across 149 countries worldwide, lie at the heart of Analyst's Notebook Premium.

Optimized local analysis repository providing improved local data management and storage

The local analysis repository allows users to store structured, entity, link and property information as well as unstructured data, including Analyst's Notebook charts. This single source of information for individual users includes a storage system that is optimized for larger volumes of data and analysis.

Enhanced data management features help ensure that the provenance of data is retained. User notes about an item's evolution over time also helps ensure that virtually all working knowledge is captured so it can be used to assist operations in more timely and accurate decision-making.

Integrated data management interface speeds data entry, management and discovery of key information

The data management interface is a user-friendly environment for users to enter and manage data within the analysis repository. Larger sets of structured data can also be quickly ingested via a wizard-style visual importer, which closely mimics the user experience of the existing Analyst's Notebook importer.

Data held in the analysis repository can then be located through the powerful, search and discovery tools designed to enable users to quickly drill down and identify key information of interest.

Data of interest can also be shared with others via the ability to export to a commonly supported structured data format so it can be ingested in other third party applications, such as Microsoft Excel, to complement almost any organizations workflow.

Create a multi-dimensional view of key knowledge and information

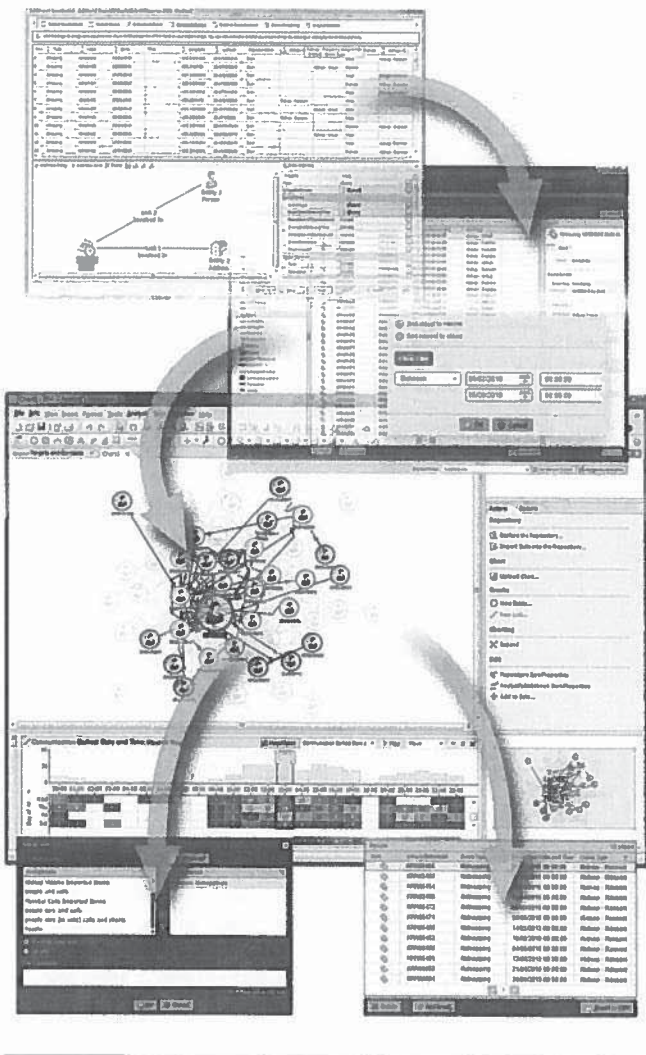

The near seamless integration with the rich visual analysis environment helps users to visualize the same information of interest across various operational charts. Data can be visually represented for network, temporal, statistical, or geospatial analysis. Rather than having to visualize all available data, this targeted and focused approach to analysis simplifies the analysis phase of operations, thus helping to reduce the time needed to create different hypotheses.

Enhanced discovery of connections across existing intelligence

With a repository optimized for analysis underpinning Analyst's Notebook Premium, exact and fuzzy searching techniques can be employed across structured and unstructured data simultaneously to accelerate information discovery and uncover intelligence that may have ordinarily been missed. In addition, because as the analysis repository can store historic Analyst's Notebook charts, key information from previous operations can be included in potential results so that virtually no information source is left untapped.

Flexible data model supporting the challenges analysts face today - and tomorrow

To help ensure that key information is retained from the growing number of disparate data sources, the analysis repository offers a flexible data model that can be tailored to match specific needs.

Leverage on-going IBM i2 solution investments

Analyst's Notebook Premium is a comprehensive solution designed to help single analysts to collate, manage, explore and analyze intelligence data. Other IBM i2 solutions can be integrated to further increase the value of Analyst's Notebook Premium, such as the IBM® i2® Intelligence Analysis Platform for intra/inter organizational collaboration or IBM® i2® Analyst's Notebook® Connector for Esri for enhanced geospatial analysis.

Analyst's Notebook Premium helps existing users maximize on their previous IBM i2 solution investments in Analyst's Notebook by enhancing rather than replacing existing capabilities. This provides minimum retraining costs and helps ensure productivity gains are close to immediate.

Analyst's Notebook Premium can help users by:

- Providing dedicated capabilities for data management, information discovery, charting and chart management
- Importing data via the wizard-style visual importer which includes integrated duplicate checking capabilities
- Sharing information of interest to suit organizational needs, via exporting to a commonly supported data format
- Delivering rich visual analysis capabilities underpinned by a local optimized analysis repository
- Accelerating the creation of network, temporal, statistical, or geospatial views from collated knowledge and information
- Helping to present results in a clear, quick, easier to understand format to help support live operations and investigations
- Improving an organization's ability to identify, prevent and disrupt criminal and terrorist activities.

IBM i2 Analyst's Notebook Premium

Rich visual analysis environment underpinned by a local repository supporting discovery of information across disparate data sources.

IBM® i2® Analyst's Notebook® Premium is a [More information](#) visual analysis environment designed for a single user. A combination of data storage, analysis tools, visualization and dissemination capabilities, Analyst's Notebook Premium addresses the analyst's and investigator's multi-tiered challenge of discovering networks, patterns and trends across [Download Datasheet](#) [Contact Us](#) [Request a Demo](#) [Research](#) volumes of structured and unstructured data.

Analyst's Notebook Premium provides:

- **Dedicated data and chart management** in a single data-centric analysis environment.
- **Rich visualization and analysis underpinned by a local repository** improving the detection rate of key information across all existing data.
- **Search and discovery across collated data** supporting identification of connections across seemingly unrelated data.
- **Integrated data management interface** to speed data ingestion and sharing.
- **Simplify the communication of complex data** to enable timely and accurate operational decision-making.

Optimised Analytical Repository

Data Management and Discovery

Powerful Visual Analysis

More information:

Dedicated data and chart management in a single data-centric analysis environment

- Single user environment enabling effective data management of a wide range of information and intelligence from disparate sources
- Store structured, unstructured, entity, link and property information including Analyst's Notebook charts
- Optimized repository that ensures the source and history of data is retained
- Flexible data model that can be tailored to match specific needs

Rich visualization and analysis underpinned by a local repository improving the detection rate of key information across all existing data

- Undertake network, temporal, statistical and geospatial analysis from a single source of truth

- Visually represent data according to need, for example as a network chart or a combination view of temporal and statistical data
- Focus analysis and filter out irrelevant information without losing the underlying data

[Contact Us](#) | [IBM Corporation](#)

Search and discovery across collated data supporting identification of connections across seemingly unrelated data

- Explore structured and unstructured data simultaneously
- Employ exact and fuzzy searching to accelerate information discovery
- Search historic Analyst's Notebook charts to uncover information from previous operations

Integrated data management interface to speed data ingestion and sharing

- User-friendly data management interface to support data input into the analysis repository
- Upload large sets of structured data via a wizard-style visual importer
- Share data with others using export tools that compliment any organizations workflow

Simplify the communication of complex data to enable timely and accurate operational decision-making

- Create intuitive and easy-to-follow visual briefing charts that capture and organize supporting data for briefing and presentation purposes
- Easily integrate information and visualizations into other intelligence reports
