The Company recommends that all Clients utilize a cellular/radio (GSM) signal transmission as their primary signal transmission method, or minimally install the GSM service as a back-up to their 'standard' (analog) phone service (which is at an additional installation and monthly cost if added after the original installation) which allows for signal transmission in the event of a 'standard' phone line failure/outage.

The Company further notifies the Client that if the installed system is set-up to operate over a standard (non-internet-based) phone line, and the Client discontinues their standard phone service or changes their phone service after the monitoring service has been established, the Client's monitoring service may be disrupted (no communication will be received by the Company) and the Company will not be aware of this service disruption. Non-standard phone services include but are not limited to, DSL, cable modem, VOIP ('Vonage', 'U-Verse', 'Bongo'), 'Magic Jack' or similar digital/internet based technology). It is the responsibility of the Client to notify the Company of any phone line changes. Any additional equipment required to re-establish signal monitoring communication is at the Client's sole expense and will result in additional monthly monitoring charges.
