Powerful, versatile, high quality
MFP Repro solutions

NEW

New IQ stand to fit
even more large-
format printers

Context MFP Repro:

Add a Context scanner and turn your printers into copiers

An MFP Repro solution from Context can turn any new or existing printer into a copier, giving you the small footprint you need without compromising on performance and versatility. We have solutions for any environment—from occasional walk-up copying, printing and scanning in the office, to high-volume operator-driven services in reprographics departments, copy shops and printing and scanning service centers.

Context offers full-featured MFP Repro solutions for scanning, copying, sharing and enhancing. You get outstanding image quality, with real-time view of enhancements and automatic cleanup of faded, dirty, or poorly shaded documents. Built-in workgroup collaboration capabilities mean anyone can scan to email, scan to folder, and share the scanner with others on your LAN or with some models via Gigabit Ethernet.

The Context MFP Repro bundles include a scanner, intuitive Nextimage Repro software for scan + copy and a new IQ stand to fit even more printers.

Turn all your printers into copiers

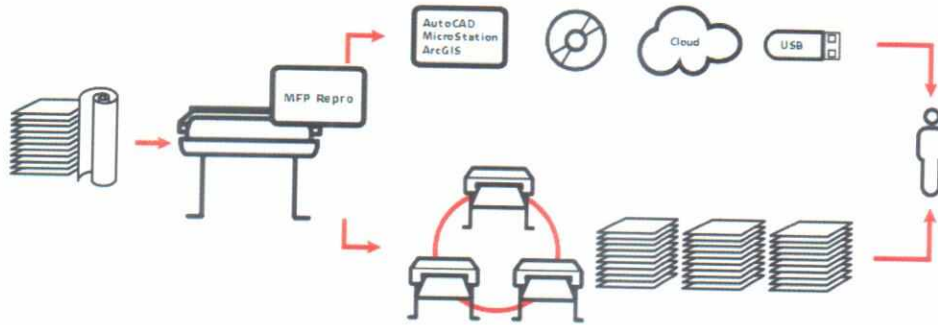

MFP Repro

Key features

- Full-featured scanning and copying touch screen solution
- Preview, crop and adjust scans with professional image controls
- Copy to unlimited number of printers via network or USB
- SnapCrop: Easy image cropping
- SnapScan: Scan - Enhance - Save
- Programmable One-Touch buttons: Common tasks can be assigned to 3 simple buttons

Cortex MFP Repro provides a good ergonomic environment for left- as well as right-handed operation.

Fit all leading large-format printers.
 See HP7500, HP7500 and some
 Epson printers come as a special
 500 MFP solution.

Contex IQ technology

Contex IQ scanners use the latest in High Quality CIS modules with Contex Dual Diffusion. This combined with xDTR, OFR and Sigma provides the best quality CIS scans in the market. Our IQ models are designed for fine drawings, maps and other technical documents.

Contex SD technology

The SD scanners' body is an extension from a single aluminium block. This unique and accurate design combined with xDTR, OFR and SIGMA ensures high quality CIS scanners.

Our SD models are designed for fine drawings and other technical documents.

Nextimage⁴ Repro Edition

Full-featured scanning and copying software included in the MFP Repro.

Features	Scan to Email / Copy / File		

¹ Not all supported printers will fit under the high stand.

² Signal Intensity Matching (SIGMA) is a Contex Patent. Sensor heating during a scan can cause inhomogeneous images. Thanks to Contex innovative thinking Contex IQ 4400 and SD 3600 series scanners will minimize sensor differences UVB during a scan.

³ Color Fringe Remove (OFR) is a Contex Patent. Color Fringing is a natural consequence of CIS technology: sequentially fetching R-G-B. Thanks to Contex innovative thinking OFR will remove this problem with advanced filter technology.

All trademarks remain the property of their respective holders, and are used only to correctly describe the product being provided. Their use in no way indicates any relationship between Contex A/S and the holders of the said trademarks.
