### Description

The Double Dutch commercial play structure is designed for children ages 2-12. This structure offers a big bang for the buck with 9 play activities. Play elements include a vertical access ladder, 2 slides, 3 climbers, a leg lift, and a 2 play-wheels. This play structure is ADA accessible.

The components of this playground are commercial grade and quality engineered to resist corrosion, fading and mildew. In addition, it is also designed in compliance with the public playground safety standards, ASTM and CPSC.

The posts are 3.5" in diameter, 12 gauge galvanized steel, powder coated for a superior high gloss finish, and backed by a limited 50 year warranty.

Plastic components are rotationally molded for superior strength and are UV stabilized to prevent fading. We offer an industry leading 15 year limited warranty on our plastic components.

You can rest assured your children are playing safely on our PVC-free play decks. Our revolutionary polyethylene coating is lead free and even more durable than traditional plastisol coatings. Our decks carry a 15 year limited warranty.

Hundreds of color combinations are available to turn any playground into a one of a kind exciting play environment.

### Description

This product is manufactured from engineered, non-toxic, crushed wood fiber (comprised of softwoods or hardwoods), consisting of randomly sized wood fibers, the majority of which do not exceed 1.5"-3" in length, containing 10%-20% fine pieces to aid in compaction. (It is generally understood that the manufacturing process allows a few oversized pieces.)

Once the newly installed product has settled, it forms a "knitted" or compacted layer that will support a wheelchair, crutches, walkers, etc. It does not utilize any wood containing paint, chemicals or additives. The product has minimal bark and is free of twigs, leaf debris and other organic materials.

Wood fiber can be installed by volunteer labor, as well as by an installer. It gives your playground an attractive, natural look.
