City of Edcouch
2013 Street Improvement Project
Scope of Services

The scope involves restoration of deteriorated asphalt pavement caused by weathering and aging and structural failure caused by traffic loading. The following restoration measures are being proposed for the treatment of these City streets: thin non-structural overlay (less than 2"), structural overlay (2" or more), and milling and removal of deterioration.

With the assistance of City personnel, an inventory of all City streets has been compiled in order to evaluate the condition of existing City street pavements. A priority list has been developed based on the severity of the asphalt pavement deterioration.

A comprehensive evaluation using data collected and an assessment completed based on road characteristics such as; roughness (ride), surface distress (condition), surface skid characteristics, and structure (pavement strength and deflection). Using the assessment, a cost effective strategy for street restoration was developed.

Our office proposes to convey these strategies into a set of contract documents for the following streets and intersections:

1. Victoria Street – From FM 1015 to Angelita Street
2. Angelita Street – From Victoria Street to Gonzalez Street
3. Salazar Street – From SH 107 to Avenida Del Sur Street
4. Sgt. Cervantes Street – From SH 107 to Avenida Del Sur
5. Southern Street – From Cochran Street to Ester Street
6. Adkins Street – From Montgomery Ave. to Wista Street (overlays)
7. Mid-Section (corner) Homer De Leon St. & Gonzalez Street Valley Gutter Location (concrete) City of Edcouch, Hidalgo County, Texas
