This Ebola preparedness and response supplemental funding seeks to support accelerated local public health preparedness planning and operational readiness for responding to Ebola virus disease. For the Ebola Supplemental Funds, there is not a match requirement.

B. Contractor shall collaborate with the healthcare sector through contractor participation in regional healthcare coalitions. Contractor activities should be fully coordinated with the healthcare sector in awardee jurisdictions, as well as with other state-funded public health programs and those of other agencies to promote cross-cutting and coordinated activities while limiting duplication.

C. Contractor shall address public health preparedness capabilities including, but not limited to the contractor's work plan submitted to DSHS as provided for in Section I(L)(2):

Capability 12 – Public Health Laboratory Testing is the ability to conduct rapid and conventional detection, characterization, confirmatory testing, data reporting, investigative support, and laboratory networking to address actual or potential exposure to all-hazards. Hazards include chemical, radiological, and biological, and biological agents in multiple matrices that may include clinical samples, food, and environmental samples (e.g., water, air, and soil). This capability supports routine surveillance, including pre-event incident and post-exposure activities.

7. Capability 13 – Public Health Surveillance and Epidemiological Investigations is the ability to create, maintain, support and strengthen routine surveillance and detection systems and epidemiological investigation processes, as well as to expand these systems and processes in response to incidents of public health significance.
