tables

Specification guide for IQ Electrical on Motivate³⁰ tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feet which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

▶ Interlink IQ Electrical is a plug table, single circuit electrical system

▶ All electrical models include wire management options and hardware

▶ Interlink IQ Electrical is an optional table and section

▶ Interlink IQ Electrical is UL Recognized as a Powered Table System and meets the requirements of UL 552 when paired with Motivate® or Huddle tables

▶ 40' maximum run, or no more than 8 units. Maximum run is based upon electrical harness width, not table width.

Specification guide for IQ Electrical on Motivate® tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.
