Rocio,

See below for Comiskey's last response.

This was HDR's last response to this:

Lerch Bates' carrier is unable to attain the ISO AI endorsement CG2010 10 01. As such, they use their own form which is an equivalent to the CG2010 form. According to our insurance manager, Matt Peterson, it contains the exact wording. Would you please encourage Mr. Comiskey to read the form content instead of just looking at the form number? I've been assured by the carrier and by Matt that they've incorporated the same qualities that are covered by the CG2010 form.

If a conference call with the insurance carrier is required to bridge this impasse, they are willing to make this happen.

Thank you,

Colleen Daniel | **JACOBS** | Activation Project Manager | Buildings & Infrastructure |

Ms. Daniel, as previously pointed out the GL additional insured endorsement should be on form CG 2010 1001. To my knowledge, all others have provided this.

Charles
