Vendor may submit manufacturer price increases that occur during the Contract term to the Cooperative, with such supporting manufacturer documentation as the Cooperative may require. The Cooperative will determine whether Vendor may pass any or all of an increase on to Cooperative members and notify Vendor of its determination in writing. The Cooperative reserves the right to accept or reject any or all of the requested price recalculation as it deems to be in the best interest of and to provide best value to Cooperative members.

In the event Vendor decreases the price of awarded products or services for any or all of its other customers in similar market circumstances below the Contract price, Vendor must offer such decreased pricing to Cooperative members.

During the Contract term, Cooperative members may negotiate with Vendor, through the BuyBoard request for quotes (RFQ) function or otherwise, to obtain lower prices for awarded products or services based on volume or other factors.

Unless specified otherwise in this Proposal Invitation, the service fee due pursuant to section E.12 (Service Fee) of these Terms and Conditions is included in the awarded pricing.

5. Packaging, Transportation, and Delivery

Unless otherwise provided for in this Proposal Invitation, all products must be packaged in containers that are new, appropriately designed for the product, and sturdy enough to protect the product during loading, transit, unloading, and storage, and be suitably packed to secure the lowest transportation costs. Products for which palletizing is appropriate must be delivered on standard 48" 4-way pallets in good, serviceable condition.

Vendor is responsible for paying all freight, delivery, handling and other charges incurred in transporting and delivering products to a Cooperative member, and for the risk of loss until the product is delivered to and accepted by the Cooperative member. Freight, delivery, handling and other charges incurred in transporting and delivering products to a Cooperative member are to be prepaid by Vendor. Vendor may collect the actual amount of such charges after delivery and acceptance, provided that the charges (a) were disclosed to the Cooperative member, if requested, and in all instances in which the charges exceed ten percent (10%) of the total cost of the order, prior to shipment; (b) are itemized and shown separately on the member's invoice; and (c) are supported by appropriate documentation submitted with the invoice.

Except for items that have hidden defects or that do not meet specifications, title and risk of loss to products pass to a Cooperative member upon the member's actual receipt and acceptance of the product at the point and time of delivery.

Unless otherwise noted in the proposal (as a deviation) or the purchase order, Vendor must deliver or provide awarded products or services within ten (10) business days after receipt of a Cooperative member's purchase order. Vendor must immediately notify the Cooperative member's primary contact of any anticipated or actual delay and document the notice in writing, and the member may extend the delivery time or cancel the order if the delay is unacceptable. If the Cooperative member has not received notice of the delay as required by this section, the member may, at its discretion, return to Vendor any items received after the due date, at Vendor's expense and without liability or penalty to the member.
