Shipping & Mailing

SendPro® C200

Make the smart sending choice every time.

Eliminate guesswork with our all-in-one solution.

The SendPro C200 is the simplest, all-in-one technology for office mailing and package shipping. It's a complete sending solution that makes it easy to process mail and send packages all from one place. You'll be able to:

- Process daily mail and print postage quickly and accurately.
- Access USPS® shipping rates which offer discounts of up to 39% off retail rates*.
- Compare options from three major carriers, like USPS and UPS®.
- Print shipping labels for three carriers right from the system.
- Track packages and costs across three major carriers in one consolidated report.

Plus, with the integrated scale you can accurately calculate postage and shipping charges for all of your letters, flats and packages. The C200 makes it easy for your office to consistently choose the ideal mailing or shipping option.

Save money and eliminate overspend.

Using a color touchscreen display, the C200 makes your selections of carrier, class and services simple and accurate. For letter mail, simply select the postal class and services you want, then seal and print postage in one easy step. For larger items, you can compare each carrier's shipping options and print a shipping label. Plus, the C200 is digitally connected so you'll always be up-to-date with automatic postal and carrier updates, low ink alerts, service warnings and diagnostic notifications.

*Actual savings may vary depending on weight, zone and services requested.

For more information, visit us online: pitneybowes.com/us/sendpro-c-series

Make the confident choice, no matter what you send.

With the SendPro® C200, you can consistently choose the ideal carrier, class or service to get your items delivered—all at the best price for your needs. Just weigh the item to see your carrier's options with a cost and estimated delivery time. A common address book works across all three carriers and verifies the recipient addresses to ensure accurate delivery. Then, after selecting the ideal choice for your unique business needs, the C200 will print a shipping label from the attached label printer.

Ship and track from anywhere.

Access C200's shipping and tracking capabilities away from your mail area with secure access from your desktop computer. You'll always have a consolidated view of your cost history and tracking information for carrier shipments. By having multiple information on a single platform, the C200 eliminates having to use multiple carriers' websites to process a package or track a shipment.

Maximize savings every time you send.

The C200 is designed to save you and your office staff time and money in many ways. You can get automatic ink replenishments at savings of 20% off the retail price when you enroll in the AutoInk™ program. When shipping, you immediately save with USPS® shipping discounts for Priority Mail and other package services. As a certified Ready Provider of UPS®, Pitney Bowes offers savings of 18% on UPS Next Day Air® and 9% off UPS Ground Commercial and Residential.

A lease is a contract made for the use of an asset. It is made between a lessor (the owner of the asset) and a lessee (the person who wants to use the asset). Leasing is often associated with houses, apartments, and cars, but mostly anything that can be owned can be leased. Other examples of leasable items include storage, conveyor belts, lighting, furnishings, software, server hardware, aircraft, and cleaning equipment. Although they are often used interchangeably regarding their respective definitions, lease and rent mean different things. By definition, a lease refers to the contractual agreement or contract itself, while rent is the periodic payment for the use of an asset.

Residual Value

Residual value, sometimes called salvage value, is an estimate of how much an asset will be worth at the end of its lease. As an example, a car worth \$20,000 being leased for 3 years can have a residual value of \$10,000 when the lease ends. For most assets, the longer the lease period, the lower the residual value. Residual value is also often used to refer to the value of an asset after depreciation. For more information or to do calculations involving depreciation, use the [Depreciation Calculator](#).

Leasing a Car

Auto leases enable people to drive new cars while under warranty for short term without the financial burden associated with new car purchases. However, it generally costs more to lease a new car for a specific time period rather than owning it (assuming the cost of ownership is prorated over its expected life). Leasing used cars is possible, but not as prevalent. There are many factors to consider in an auto lease, such as the initial down payment, the amount of the monthly payment, the term of the lease (this is usually three years in the U.S., but it is possible to lease longer), and the average accumulated miles in a year.

Monthly payments are based on the difference between the cost of the new automobile (transaction price or capitalized cost), and what the car is forecasted to be worth at the end of the leasing period (residual value). This difference is financed at a particular rate of interest which is called the leasing rate. Security deposits will most likely be required at signing. Additional charges may be imposed by dealers, so discuss all financing carefully before agreeing to a car leasing contract. For more information or to do calculations regarding auto leases, use the [Auto Lease Calculator](#).
