

There are 2 WIC clinics in Weslaco located within a 2-mile radius. Participants will be transferred to the Weslaco I WIC clinic, which is co-located with the health department, or they will be transferred to their clinic of preference (there are clinics in the neighboring cities – Mercedes, Progreso, Donna, Elsa). Staff will be reassigned to nearby clinics.

Funding is based on participation; the WIC Program is 100% funded in accordance with participation. Decreased participation has been consistent with statewide and nationwide trends, and the decreased birth rate and improving economy are likely factors. We want to assure staff positions are secured and optimal client services continue to be provided.
