Noah, Elena,

The construction plans are designed to facilitate the infrastructure needs of the originally provided basis of design equipment. If the equipment list quoted and then provided to us as reference is the same as the technical information provided to us at the onset of the project, then the design supports the quoted equipment and it should be approved.

Trey

Trey,

The specifications that were sent to you by Elena are the same as the original ones that supplied to Halff during the initial design phase. Can you reply back with approval that the room design will support this? If you have any additional questions please let me know.

Sincerely,

7/15/2019
