To Whom It May Concern:

In reference to the MPH364, Serial #101596011007, please be advised that this machine was produced in late 2015 in Boppard, Germany, but was not received by the selling dealer, Anderson Machinery, until February of 2016. This is not unusual of units shipping from overseas, as they can take months to arrive in the United States before they are distributed to our retail dealers.

Please also note that BOMAG does not classify units under a particular "model year", as automotive manufacturers, but instead refers to such units based on their production dates, as represented on the MSO's.

Hopefully this will clear up any confusion regarding the age of the equipment.

As always, if you have any further additional questions feel free to contact me anytime.

Best regards,

Kevin Caldwell
