SUBJECT: Evaluation of Canine "Flash"

Canine "Flash" was brought to our facility for evaluation on July 21, 2021. We conducted both a Green Dog Evaluation and Narcotics Evaluation. During the Green Dog Evaluation, it was determined that "Flash" had extremely low reward drive, hunt, and became very distracted during independence, drive and hunt testing. During the Narcotics evaluation "Flash" failed to detect the presence of all the narcotics IAW GTA certification standards.

Overall, it was determined that due to easily becoming distracted, low drive & hunt that "Flash" wasn't a good canine prospect for narcotics detection.

A handwritten signature in black ink that reads 'Daniel G. Hayter'.
