Comments:

Our Commitment to You & Cost Increases

Due to transportation delays and global supply issues on many components, lead times are very volatile. We will communicate with you as your orders are being processed and manufactured regarding expected shipping dates. Manufacturers are also experiencing cost increases due to these issues and are implementing price increases and/or adding surcharges to their products. For this reason, our quotes are only valid for 10 days from the created date on the quote. We appreciate your business and patience during these unprecedented times.
