RE: Sole Source Designation—Thomson Reuters Westlaw Edge

To whom it may concern:

Thomson Reuters is pleased to provide you with information concerning Westlaw. The purpose of this letter is to confirm that Thomson Reuters is the sole source provider for the exclusive content, features, and services listed herein.

West Publishing Corporation, a Thomson Reuters business, is the foremost provider of integrated information solutions to the U.S. legal market and has been providing research materials to the legal and professional community for more than 150 years.

Our newest offering, Westlaw Edge, provides the next generation of legal search, the most advanced citator service, the easiest way to see statutory changes, and integrated litigation analytics, all powered by state-of-the-art artificial intelligence and built upon more than 100 years of editorial enhancements.

Westlaw Edge provides access to the following exclusive features:

- **Quick Check** – Upload up to six documents, and Quick Check will produce a report that includes recommendations for highly relevant authority that was not cited, a list of cited authority from within the document(s), and a side-by-side comparison between case quotes and the cited case language on Westlaw Edge. When analyzing an opponent's brief, in addition to identifying highly relevant cases your opponent failed to cite, only Quick Check will surface and identify highly-relevant authority that contradicts your opponent's cited authority.
- **WestSearch Plus**—Find immediate answers to thousands of types of legal questions and dynamically filter your results to only the most relevant resources. Only WestSearch Plus has sophisticated typeahead functionality that produces suggested questions across thousands of legal topics. Westlaw Edge is the only legal research solution that includes a legal search engine built upon editorial assets such as the West Key Number System, Westlaw Headnotes, Notes of Decisions and more to present responsive text at the top of a result list rather than simply presenting a list with highlighted search terms.

- **KeyCite Overruling Risk**—Instantly know whether a case contains an implicitly invalidated statement of law. Westlaw Edge warns researchers of implicitly overruled or abrogated cases even where the case does not cite to overruled authority. Westlaw Edge leverages state-of-the-art artificial intelligence, built upon more than 100 years of editorial enhancements, to provide significantly more accurate warnings on more bad law than any other legal research solution.
- **Compare Capabilities**—Quickly understand how a statute or regulation has changed over time to easily see the most recent changes and compare any two versions instantly. Statutes Compare provides coverage for all statutory content with versions. In addition, Regulations Compare provides coverage for federal regulations as well as state regulations in 49 states plus District of Columbia. Users can download, print, or email the comparison. Only Compare Text enables you to compare text across many different content sets.
- **Litigation Analytics**—View detailed data-driven insights on judges, courts, attorneys, law firms, and case types across most practice areas to develop the best-case strategy possible. Superior granularity to filter results by 28 different motion types and even more subtypes, as well as our exclusive, customizable “search within” option to enter your own filter within a filter. Litigation Analytics on Westlaw Edge provides more docket coverage, both federal and state, than any other provider, for the most reliable and targeted insights.
- **Concurring and Dissenting Opinion Shading**—Instantly know if your search language is in the cases’ main opinion, or rather in the concurrence or dissent.
- **Procedural Posture**—Our attorney editors identify the procedural motions, requests, and objections made in a case, along with the appellate posture of the case, so you can filter and see opinions at your desired stage of litigation.

Westlaw also provides legal researchers with access to exclusive resources, proprietary tools, and technology that no other research provider can offer, including:
