Monica,

Good morning. Can we get on the Agenda for the next Commissioner Court meeting to lift the current 90 day burn ban. I have been in contact with James DeGrazia from the Texas A&M Forest Service, and we both agree that the humidity levels have been in our favor. The ranchlands to the north and west of Hidalgo County would be of concern because of some of the remaining dry fuels. I don't anticipate that any fireworks will be utilized in the ranchlands since generally fireworks are generally utilized in populated communities. I'm attaching two flyers from the Texas A&M Forest Service regarding fireworks safety. These are both in English and Spanish, I would recommend having these posted on the Hidalgo County website and Social Media Platforms.

Respectfully,

--

Homero Garza
Hidalgo County Fire Marshal
