

February 2, 2023

Dear Valued Customer,

We recently went to evaluate the problem of the water softeners located in the mechanical room at the Sheriff's department. Due to the severity of the water breakage line on your recirculation pump, the control valves, electrical solenoids along with the controller were damaged. In order to provide the most cost-effective solution and still utilize your softener tanks, we have attached an estimate that describes the parts needed to repair the existing water softeners. Our company is the only manufacturing dealer who provides these parts for this brand, therefore the replacement parts quoted are the only compatible valves that can be purchased through us in order for your water softener tanks to properly function and increase longevity.

Please review your attached estimate and call me with any questions. You can reach me at (956) 212-5903.

Sincerely,

Mike Aguirre
