To whom it may concern:

CURIS System is the sole source provider of the CURIS 3 whole space biodecontamination system, CURoxide whole space hydrogen peroxide solution, CURIS Hand Sprayer, and CURIS System Data Management System (CSDM). The CURIS 3, CURoxide, Hand Sprayer and CSDM are all manufactured in the USA solely by CURIS System in Florida. Furthermore, the CURIS 3, CURoxide, Hand Sprayer and CSDM bundling has multiple unique attributes and capabilities that set it apart from other commercially available systems:

- Portable whole room decontamination system weighs less than 40 lbs.
- Validatable with *Geobacillus stearothermophilus* biological indicators in a Tyvek pouch per EPA regulations.
- Patented ability to maintain an active dwell phase through the use of Pulse™ technology (Patent no. US10092668B2). This is a key technology that allows the CURIS 3 to achieve such high levels of disinfection with a low concentration hydrogen peroxide.
- Uses CURoxide 7% H₂O₂ solution which is below the US hazmat shipping threshold of less than 8% concentration.
- Can remotely port into rooms via extension nozzle.
- Hand Sprayer attachment can be used for locations where air is not able to be shut off, such as waiting rooms, patient rooms, etc.
- CE, UL, RoHS, and WEEE compliant.
- Does not require injection nozzle calibration after each use.
- Does not use electric arc to charge H₂O₂ particles.
- Treats up to 11,000 cubic feet per room decontamination device.
- Patented ability to operate and monitor one or more room decontamination units remotely with an apple or android tablet (patent no. US10092668B2).
- Does not leave any heavy metal residues, such as silver.
- Proprietary EPA Registered 7% H₂O₂ solution (EPA registration number 93324-1) – proprietary blend of peroxide + federal approvals for whole-room sporicidal disinfection through a tri-part soil load.
- CSDM allows for data retention of cycle parameters and reporting.

Please contact me should you have any questions.
