DM2000 LED for transmitted light

[See Online](#)

Leica DM2000 LED for transmitted light

Ergonomic system microscope Leica DM2000 LED with long-life, bright, similar to daylight LED illumination (transmitted light) for comfortable work in many applications delivers excellent optical performance for reliable results. The LED illumination features constant color temperature independent from light intensities and magnifications.

Extremely versatile microscope system, can be optionally equipped for dark field, phase contrast, polarization contrast, fluorescence, and DIC to suit the needs of modern laboratories.

The ergonomic features like height adjustable focus knobs, symmetrical operation of focus and coaxial drive, optional ergotubes and a wide range of ergonomic accessories help to ensure fatigue-free work at the microscope.

Choice between 6- and 7fold objective nosepiece offers plenty of positions for different objectives to feature efficient work. The reliable 2- or the optional 3step focusing mechanism allows adaptation of the focusing to the properties of the specimen.
