Subject: Surplus Vehicle for Fire Prevention

Dear Constable Gaitan,

We at the Alton Fire Department are proud to announce the recent opening of our Fire Marshal's Office, intended to provide more efficient and dedicated service to our community and surrounding areas. Our department currently covers over 100 square miles of service within the county, and while we remain committed to delivering quality emergency response, our resources are limited.

I am reaching out to kindly inquire about the availability of any surplus vehicles your agency may have. We would be incredibly grateful for any support you could extend to our department. Recently, we received a unit transfer from Hidalgo County Emergency Management; however, the vehicle has developed issues with the transmission or possibly an electrical short, which has proven difficult to diagnose. This has unfortunately left us short on operational vehicles, directly affecting our emergency response capabilities.

We sincerely appreciate your time and consideration. If a surplus vehicle is available, we would be honored if you could consider donating or transferring it to the Alton Fire Department to help us continue safeguarding our community.

Sincerely,

Gustavo Ramirez
Fire Chief
Alton Fire Department
