Subject: Surplus Vehicle for Fire Prevention and Operations

Dear Constable Gallardo,

We at the Alton Fire Department are proud to announce the recent opening of our Fire Marshal's Office, intended to provide more efficient and dedicated service to our community and surrounding areas. Our department currently covers over 100 square miles of service within the county, and while we remain committed to delivering quality emergency response, our resources are limited.

I am reaching out to kindly inquire about the availability of any surplus vehicles your agency may have. It is my understanding that your agency might be sending some cars, including Unit 312, a 2015 Chevy Tahoe, and Unit 338, a 2020 Ford F-150 Super Crew, to surplus. We would be incredibly grateful for any support you could extend to our department by allowing us to have those vehicles. Recently, we received a unit transfer from Hidalgo County Emergency Management, and we are putting that unit to the service of the community and the rural area we serve.

We sincerely appreciate your time and consideration. If a surplus vehicle is available, we would be honored if you could consider donating or transferring it to the Alton Fire Department to help us continue safeguarding our community.

Sincerely,

Gustavo Ramirez
Fire Chief
Alton Fire Department
