Request for Applications: Advancing Evidence-Based Strategies to Strengthen Vaccine Uptake and Confidence in High-Risk Communities

Sep 08, 2026

In partnership with the Centers for Disease Control and Prevention (CDC), NACCHO is pleased to offer a funding opportunity *Advancing Evidence-Based Strategies to Strengthen Vaccine Uptake and Confidence in High-Risk Communities*. Selected local health departments (LHDs) will identify, implement and evaluate an evidence-based intervention to improve vaccine uptake, access, and confidence within high-risk populations. With support from NACCHO, awardees will document lessons learned, develop communication materials, and participate in shared learning experiences.

Through this funding opportunity, NACCHO will issue up to eight awards in fixed priced contracts equaling \$40,000 each to LHDs selected to participate. The project period is expected to begin on November 9, 2026, and will end on July 31, 2027. Applications must be submitted through the online submission form no later than **October 9, 2026, at 11:59 pm ET**. In fairness to all applicants, NACCHO will not accept late submissions.

Eligibility Requirements

This opportunity is open to LHDs with an identified need or interest in evaluating and strengthening vaccine uptake with high-risk communities in their jurisdiction.

Expectations

All awardees will be required to conduct the following activities throughout the project period:

- Create a project work plan outlining specific activities the LHD will complete to meet the project objectives and
