Statement Covering Contract Work

Lump Sum Bid Practice:

Competitive lump sum bidding is defined as the process of inviting bids from multiple suppliers, acting independently, and awarding the work to the supplier who submits the lowest price. Lump sum bidding is the preferred method of contracting because it normally results in obtaining the most value for the Company, and is mandatory when the cost estimate for a project is above the locally established bid thresholds.

All specifications and instructions (written or verbal) provided to suppliers **MUST** be identical. Individual suppliers should never be provided information that has not been shared with all bidders.

STATEMENT COVERING UTILITY CONSTRUCTION CONTRACT WORK
(AS APPEARING IN ESTIMATE)

U-Number: U13671

ROW CSJ Number: 0862-01-046/0669-01-052 District: Pharr
County: Hidalgo Highway No.: FM681/FM2221
Federal Project No.: N/A

I, Lucy I Salinas, a duly authorized and qualified representative of Southwestern Bell Telephone Company d/b/a AT&T Texas, hereinafter referred to as **Owner**, am fully cognizant of the facts and make the following statements in respect to work which will or may be done on a contract basis as appears in the estimate to which this statement is attached.

It is more economical and/or expedient for **Owner** to contract this adjustment, or **Owner** is not adequately staffed or equipped to perform the necessary work on this project with its own forces to the extent as indicate on the estimate.

Procedure to be Used in Contracting Work

- A. Solicitation for bids is to be accomplished through open advertising and contract is to be awarded to the lowest qualified bidder who submits a proposal in conformity with the requirements and specifications for the work to be performed.
- B. Solicitation for bids is to be accomplished by circulating to a list of pre-qualified contractors or known qualified contractors and such contract is to be awarded to the lowest qualified bidder who submits a proposal in conformity with the requirements and specifications for the work to be performed. Such presently known contractors are listed below:
 - 1. See attachment
 - 2.
 - 3.
 - 4.
 - 5.
- C. The work is to be performed under an existing continuing contract under which certain work is regularly performed for **Owner** and under which the lowest available costs are developed. (If only part of the contract work is to be done under an existing contract, give detailed information by attachment hereto.)
- D. The utility proposes to contract outside the foregoing requirements and therefore evidence in support of its proposal is attached to the estimate in order to obtain the concurrence of the State, and the Federal Highway Administration Division Engineer where applicable, prior to taking action thereon (approval of the agreement shall be considered as approval of such proposal).
- E. The utility plans and specifications, with the consent of the State, will be included in the construction contract awarded by the State.
