- Whereas* nearly 1.5 million high school students nationwide experience physical abuse from a dating partner in a single year and approximately 50% of students experience dating violence on school grounds; and
- Whereas* high school students who experience physical violence in a dating relationship are more likely to use drugs and alcohol, more likely to engage in risky sexual behavior, more likely to develop self-esteem and body image issues, are at greater risk of suicide, and are much more likely to carry patterns of abuse into future relationships; and
