WHEREAS, Knox County Schools desires to enter into a K12 Terms of Service agreement with Scoir, Inc. for the provision of a college and career planning management system and services to educate and assist students in their post-secondary pursuits at a cost of $23,728.96; and

WHEREAS, the proposed agreement sets forth the terms and conditions for access to and use of the subscription services; and

WHEREAS, at its regularly scheduled meeting on August 7, 2025, the Knox County Board of Education approved the agreement with Scoir, Inc. for said purpose.

NOW THEREFORE BE IT RESOLVED BY THE COMMISSION OF KNOX COUNTY AS FOLLOWS:

The K12 Terms of Service agreement with Scoir, Inc. for the provision of a college and career planning management system and services to educate and assist students in their post-secondary pursuits is hereby adopted and approved in substantive form as presented this date, a copy of which is attached to this Resolution and incorporated herein by reference.

BE IT FURTHER RESOLVED, the K12 Terms of Service agreement with Scoir, Inc. for the provision of a college and career planning management system and services to educate and assist students in their post-secondary pursuits shall be executed subject to such amendment or action not affecting the substantive provisions of the contract as may be required and approved by the Knox County Law Director.

BE IT FURTHER RESOLVED, that if any notifications are to be made to effectuate this Resolution, then the County Clerk is hereby requested to forward a copy of this Resolution to the proper authority.

BE IT FURTHER RESOLVED, that this Resolution is to take effect from and after its passage, as provided by the Charter of Knox County, Tennessee, the public welfare requiring it.

Note: As a cloud-based platform provider, Scoir is unable to negotiate bespoke terms and conditions with individual customers. We created these standard terms of service in consultation with our customers to be consistent with industry best practices, inclusive of a Data Privacy Addendum modeled after the Student Data Privacy Consortium's *National Data Privacy Agreement*. While we remain open to receiving suggestions that would improve our terms of service for all customers, we do not customize these terms of service for any individual customer.

SCOIR, INC.

K12 TERMS OF SERVICE

Effective Date: January 15, 2025

These Terms of Service (the "**Agreement**") contains the legal terms and conditions of your access to and use of the Services (as defined herein) provided by Scoir, Inc., a Delaware corporation, ("**Scoir**"). The term "**Customer**" as used herein means the educational institution, local educational agency, school administrative unit, education industry association, company, or other legal or professional entity that utilizes or intends to utilize the Services. By your accepting this Agreement, either by your online digital indication of acceptance or by your execution of an Order Form (as defined herein) that references this Agreement, you acknowledge that you have read, understand, and agree to the terms of this Agreement and you represent that you have the authority to bind your institution to this Agreement.

1. DEFINITIONS. Capitalized terms defined herein shall have the meanings ascribed to them, including the following terms, which shall have the following meanings:

"**Content**" means any information inputted into the Website by Scoir or by a User and which may be accessible by other Users.

"**Customer Data**" means any information inputted into the Website by Customer, at Customer's direction, or with Customer's permission, including, without limitation, information inputted by Invitees, and for which access is restricted to Customer, Invitees, and other Users that Customer or Invitees may permit.

"**Intellectual Property Rights**" means any patent, trademark, trade secret, service mark, copyright, moral right, right in design, know-how, and any other intellectual or industrial property rights anywhere in the world whether or not registered.

"**Invitee**" means any User who is authorized by Customer to use the Services, or any portion thereof, and for whom Customer has provisioned the Services. Invitees may include, without limitation, Customer's students and their parents or guardians, teachers, school counselors, and administrators.

"**Order Form**" means an ordering document entered into between Customer and Scoir that identifies Customer and specifies (i) the Products to which Customer is subscribing and which Scoir will provide to Customer pursuant to this Agreement, (ii) the Subscription Term, and (iii) the fees payable by Customer for the Services.

"**Products**" means Scoir's cloud-based software applications, tools, features, and utilities that are separately packaged, marketed, and priced by Scoir, each of which constitutes a portion of the Services and which collectively constitute the entirety of the Services.

"**Services**" means the cloud-based college and career planning and counseling platform, as further described in Section 2.1, provided or made available by Scoir through the Website.

"**Subscription Term**" means the period of time further defined in Section 7.1 during which this Agreement governs the relationship between Scoir and Customer with respect to the Services.

"**User**" means any person who creates an account on the Website. Users include, but are not limited to, Invitees.

"**Website**" means the public Internet site available at the domain **https://app.scoir.com**, including any subdomain thereof, and all associated mobile applications.

2. USE OF THE SERVICES

2.1. Description of Services. The Services include information and functionality intended to educate and assist students in their post-secondary pursuits. More specifically and without limitation, the Services enable students to search for and learn about careers, career pathways, and related post-secondary educational opportunities; to communicate with their school faculty and administrators; to receive, complete, and submit assignments related to their college and career planning; to engage with representatives from post-secondary educational institutions; to create, manage, and submit their applications for admission to institutions of higher education; and to solicit from school faculty and administrators the creation and delivery of documents related to the post-secondary education admissions and enrollment process. The Services include a guidance management system that enables school counselors and administrators to monitor and assist students in their post-secondary planning; to engage and collaborate with students, parents and guardians, and representatives of post-

secondary educational institutions; to manage the creation and delivery of documents related to applications for admission to institutions of higher education; and to collect, analyze, and report on student engagement, academic achievements, and post-secondary enrollment outcomes.

2.2. Additional Products. During the Subscription Term, Customer may add Products to the Services by executing one or more additional Order Form(s). Unless stated otherwise on an additional Order Form, this Agreement will apply to all Products and Services that Scoir provides Customer during the Subscription Term.

2.3. Customer's Use. Subject to the terms and conditions of this Agreement, Scoir grants Customer the non-exclusive, non-transferrable, non-sublicensable, worldwide right to access and use, and to grant Invitees access to use, the Services for Customer's own lawful and legitimate business or organizational purposes.

2.4. Use by Invitees. Customer acknowledges and agrees that it is solely responsible for (i) determining who is an Invitee; (ii) informing each Invitee that their use of the Services is subject to this Agreement; and (iii) controlling each Invitee's level of access to relevant portions of the Services.

2.5. Account Ownership. Customer shall, at all times during the Subscription Term, designate and have designated: (i) one Invitee as an "account owner" authorized to serve as primary liaison to Scoir for account-related communications; and (ii) no less than one Invitee as "account administrator" authorized to create accounts for and manage permissions of other Invitees.

2.6. Access Control. Customer shall take reasonable precautions to require its Invitees to secure usernames, passwords, and any other means of gaining access to the Services. Without limiting the foregoing, Customer agrees to not require Invitees to disclose their passwords and will promptly revoke any Invitee's access to the Services following the termination of such Invitee's employment or engagement by Customer. Customer will promptly notify Scoir of any suspected unauthorized access to, or use of, the Services known to Customer.

2.7. Restrictions of Use. When using the Services, Customer shall not knowingly (and shall use commercially reasonable efforts to prohibit any Invitee to):

(a) attempt to gain unauthorized access to any Personally Identifiable Information of a User;

(b) attempt to undermine the security or integrity of the Website and the Services, and, where the Services are hosted by a third party, that third party's computing systems and networks;

(c) use, or misuse, the Services in any way which would reasonably be expected to impair or degrade the functionality of the Services or Website, or other systems used to deliver the Services, or impair or degrade the ability of any other User to use the Services or Website;

(d) attempt to gain unauthorized access to any portions of the Services other than those expressly provisioned pursuant to a valid Order Form;

(e) transmit via, or input into, the Website, anything that directly or indirectly (i) knowingly contains any viruses, worms or other malicious computer programming codes intended or likely to damage Scoir's or any User's system or data; (ii) may reasonably be deemed to be offensive to a preponderance of Users; (iii) is deceptive, defamatory, obscene, pornographic, or unlawful; or (iv) knowingly infringes or misappropriates any Intellectual Property Rights of a third party;

(f) sublicense, lease, sell, resell, rent, loan, distribute, transfer or otherwise allow the use of the Services for the benefit of any unauthorized third party;

(g) access or use the Services to build a similar or competitive product or service; or

(h) attempt to modify, copy, adapt, create derivative works of, reproduce, disassemble, decompile or reverse engineer the Services or any computer programs used to deliver the Services or to operate the Website.

3. SCOIR'S RESPONSIBILITIES.

3.1. Provision of Services. During the Subscription Term, Scoir will provide Customer and its Invitees access to use the Services as described in this Agreement and all applicable Order Forms. Scoir reserves the right to provide some or all elements of the Services through third-party service providers. Scoir shall be responsible for the acts or omissions of any third-party service providers as if they were the acts or omissions of Scoir.

3.2. User-Generated Content. Scoir may, but is not obligated to, monitor or review Content uploaded by Users to ensure that it is not inappropriate, erroneous, defamatory, libelous, slanderous, obscene, or profane. Scoir, in its sole discretion, may remove any Content from the Website. Notwithstanding the foregoing, Scoir will not be liable for the accuracy or appropriateness of any Content. In addition, certain portions of the Services may contain functionality by which Users may post reviews, make recommendations, or give ratings of Content. No review, recommendation, or rating provided within the Services shall be deemed to be either an endorsement by Scoir or an accurate statement of quality, competency, experience, or qualification pertaining to the subject matter thereof.

3.3. Data Privacy and Data Security. Scoir will safeguard the confidentiality of Customer Data in accordance with the Data Processing Addendum attached hereto as "**Appendix A**".

3.4. Accessibility. Scoir shall use reasonable efforts to ensure that the Services maintain, at all times during the Subscription Term, compliance with all applicable federal and state laws and regulations providing for equally effective and substantially equivalent ease of use for persons with disabilities, including but not limited to those set forth in the Americans with Disabilities Act (ADA). The Web Content Accessibility Guidelines (WCAG) 2.1 Level AA shall be used to evaluate conformance of the Services with this Section 3.4.

3.5. Service Reliability. Subject to the terms and conditions of this Agreement, Scoir will use commercially reasonable efforts to make the Services generally available for use by Customer and its Invitees at any time, excluding planned downtime and any unavailability caused by circumstances beyond our reasonable control, including without limitation, acts of God, acts of government, floods, fires, earthquakes, civil unrest, acts of terror, strikes or other labor problems (other than those involving Scoir's own employees), Internet service provider failures or delays, denial of service attacks, or any other force majeure event or factors. Scoir acknowledges that Customer may consider a failure to reasonably meet its service reliability commitments to be a material breach of this Agreement. Accordingly, and notwithstanding anything to the contrary in this Agreement, Customer's sole remedy for Scoir's failure to reasonably meet its service reliability commitments shall be to terminate this Agreement for cause pursuant to Section 7.3.

3.6. Support Services. During the Subscription Term, Scoir will provide Customer and its Invitees with "help desk support" of the Products via email to **support@scoir.com** during customary business hours and via access to Scoir's online self-service support portal available at **https://scoir.helpdocs.io**. Scoir will use reasonable practices to respond to email support queries within one business day. Scoir reserves the right, in its sole discretion, to limit or deny access to support services to any Invitee who acts or who has acted in a way that might reasonably be determined to be harassing or abusive of Scoir's support representatives.

4. THIRD PARTY SERVICES. Through the Services, Customer and Invitees may be able to elect to receive services from partners of Scoir (each such service, a "**Third-Party Service**", and each such partner, a "**Partner**"). Third-Party Services are not provided on the Website and they are not considered part of the Services covered by this Agreement. Scoir is not responsible for Third-Party Services or any material, information or results available through Third-Party Services. Partners may require Customer and Invitees to agree to terms and conditions or agreements with respect to their provision of the Third-Party Services. Customer or Invitees are solely responsible for, and assume all risk arising from, Customer's or Invitees' election and receipt of any Third-Party Service. If Customer or Invitees elect to receive a Third-Party Service, Customer or Invitees, as the case may be, authorize Scoir to submit to the applicable Partner certain information about Customer or Invitees that such Partner may reasonably request in order to provide the Third-Party Service to Customer or Invitees, provided that Scoir's sharing of such information is (i) authorized by Customer or Invitees, as the case may be, and (ii) not otherwise prohibited by applicable law or regulation (the "**Shared Information**"). Customer is responsible for the accuracy of all Shared Information provided to Scoir and approved to be submitted to Partners. Customer represents and warrants that Customer have all the rights in and to any Shared Information necessary to provide Shared Information, and that Scoir's use of Shared Information as contemplated hereunder will not violate any rights of privacy or other proprietary rights, or any applicable local, state or federal laws, regulations, orders or rules. Customer and Invitees agree that, by electing to receive a Third-Party Service and consenting and authorizing Scoir to submit your Shared Information to a Partner, Customer and Invitees have waived and released any claim against Scoir arising out of a Partner's use of Shared Information. The foregoing will not apply to the extent prohibited by law.

5. FEES AND PAYMENTS.

5.1. Subscription Fees. In consideration for the access rights granted to Customer and the Services made available by Scoir under this Agreement, Customer will pay to Scoir the fees set forth in the Order Form(s) in accordance with the fee schedule(s) specified therein. Unless otherwise provided for in an Order Form, all undisputed fees are due and payable within thirty (30) days of the Customer's receipt date of the invoice. All fees paid are non-refundable except as otherwise provided for herein. Customer agrees to provide Scoir with complete, accurate, and current billing and contact information at all times. Customer and Scoir agree to work together in good faith to resolve any disputed fees in a timely manner.

5.2. Non-Payment. If Customer fails to pay undisputed amounts due under this Section 5, then Scoir's sole recourse is to suspend Services pursuant to Section 6.2 and to terminate this Agreement pursuant to Section 7.3 Notwithstanding the foregoing, if any Customer payment is dishonored or returned because it cannot be processed by a bank, Scoir reserves the right to charge Customer any bank fees or charges for return items that Scoir incurs.

5.3. Taxes. Scoir may charge, and Customer agrees to pay, any applicable sales, use, or value-added taxes applicable to the provision of the Services. Customer shall have no liability for any taxes based upon Scoir's gross revenues or net income.

(a) If Customer is a tax-exempt organization, Customer agrees to provide Scoir with a valid and accurate certificate of sales tax exemption within seven (7) days of submitting an Order Form.

(b) Scoir is solely responsible for timely remittance to state and/or local authorities of any sales and use taxes it collects from Customer related to the sale of goods and services under this Agreement.

5.4. Payment by Credit Card. If paying by credit card, Customer authorizes Scoir to charge its credit card or bank account for all fees payable. Customer further authorize Scoir to use a third party to process payments for fees payable, and consent to the disclosure of payment information to such third party as required to process such payments.

6. SERVICE SUSPENSIONS

6.1. Suspension for Prohibited Acts. Scoir may suspend any User's access to any or all Services without notice for use of the Services in a manner that Scoir deems, at its reasonable and sole discretion, to: (i) violate applicable local, state, or federal laws or regulations; or (ii) violate any restrictions of use contained in Section 2.7. If Scoir suspends an Invitee's access pursuant to this Section6.1, Scoir shall, as soon as commercially practical, provide Customer prior written notice describing the violation and, for violations capable of being resolved, Scoir shall provide Customer a thirty-day period to cure such violation and restore said Invitee's access promptly after the cause of the violation has been resolved.

6.2. Suspension for Non-Payment. In the event that any undisputed fees due and payable hereunder remain unpaid for a period of thirty (30) days or more after the due date specified on the corresponding invoice, Scoir may suspend Customer's (and its Invitees') access to any or all of the Services until such amounts are paid in full. Scoir will notify Customer at least fourteen (14) days before suspension.

6.3. Suspension for Present Harm. If Customer's website or use of the Service is (i) being subjected to denial-of-service attacks or other disruptive activity; (ii) being used to engage in denial-of-service attacks or other disruptive activity; (iii) creating a security vulnerability for the Services or others; or (iv) causing harm to Scoir or any Users, then Scoir may, with written electronic and telephonic notice to Customer, suspend all or any access to the Service. Scoir will try to limit the suspension to the affected portion of the Services and promptly resolve the issues causing the suspension.

7. SUBSCRIPTION TERM; TERMINATION.

7.1. Subscription Term. This Agreement shall commence on the date of Customer's first acceptance of an Order Form and shall continue, unless lawfully terminated sooner as permitted herein, until the latest subscription period end date set forth in an Order Form.

7.2. Termination for Convenience. Customer may terminate this Agreement at any time for any reason, or for no reason, by providing Scoir with 30 days' advance written notice. No prepaid fees shall be or become refundable upon termination pursuant to this Section 7.2.

7.3. Termination for Cause. Either party may terminate this Agreement for cause if the other party materially breaches any provision of this Agreement and such breach, if capable of being cured, is not cured within thirty (30) days of receiving written notice of such breach from the other party.

7.4. Post-Termination Rights. Upon any termination of this Agreement, all licenses, rights, and permissions granted to Customer hereunder will immediately terminate. If this Agreement is terminated by Customer pursuant to Section 7.3, Scoir will promptly refund Customer any prepaid fees relating to Customer's access and use of the Services after the effective date of termination. Upon request by Customer made within 30 days of the effective date of termination of this Agreement, Scoir will make the Customer Data available to Customer for export or download. After such 30-day period, Scoir will have no obligation to retain or make available to Customer any Customer Data, unless legally required, and Scoir will dispose of such Customer Data as provided in Appendix A. Except as provided in Section 9 of this Agreement, and to the extent permitted by law, Scoir shall not be liable for any costs, losses, damages, or liabilities arising out of or related to a lawful termination of this Agreement.

7.5. Surviving Provisions. Section 5 (Fees and Payments), Section 7.4 (Post-Termination Rights), Section 7.5 (Surviving Provisions), Section 8 (Proprietary Rights), Section 9 (Indemnification), Section 10 (Disclaimers; Limitation of Liability), and Section 11 (General Provisions) will survive any terminated of this Agreement.

8. PROPRIETARY RIGHTS

8.1. Scoir Ownership. Scoir, or its licensors, owns all worldwide right, title, and interest (including all Intellectual Property Rights) in and to the Website, Services, Content, and software applications used to provide the Services. This Agreement does not convey any proprietary interest in or to any of Scoir's Intellectual Property Rights or rights of entitlement to the use thereof except as expressly set forth herein.

8.2. Customer Ownership. Customer owns all worldwide right, title, and interest (including all Intellectual Property Rights) in and to the Customer Data. Customer hereby grants Scoir a non-exclusive, limited right to use, copy, transmit, store, and back-up Customer Data for the sole purpose of providing the Services to Customer.

8.3. User Feedback. Any feedback, comments and suggestions Customer or its Invitees may provide for improvements to the Services shall be deemed to have been given voluntarily and Scoir will be free to use, disclose, reproduce, license or otherwise distribute, and exploit such feedback as Scoir sees fit, entirely without obligation or restriction of any kind.

9. INDEMNIFICATION

9.1. Indemnification. Scoir shall indemnify, defend, protect, and hold harmless Customer, its Affiliates, trustees, officers, directors, and employees, from and against any and all damages awarded by a court, arbitration, or settlement, including associated penalties, fines, and expenses arising out of or incurred by the Customer as a result of (A) the gross negligence or willful misconduct of Scoir, its employees, or agents; (B) Scoir's breach of this Agreement or applicable law; or (C) any actual or threatened claim alleging that the licensing, use, or other exploitation of the Services by Customer in accordance with the rights granted hereunder constitutes, under applicable laws of any jurisdiction within the United States of America, an infringement, dilution, or unauthorized use of any patent, copyright, trademark, or trade secret of any third-party. In the event that (i) some or all of the Services is held by a court of competent jurisdiction to infringe; (ii) an injunction is obtained against use of any material portion of the Services; or (iii) Customer believes in its good faith judgment that the Services is infringing, then Scoir shall promptly, at its sole option and expense, (a) procure for Customer the right to continue to use the infringing Services; (b) replace or modify the infringing Services to make its use non-infringing while being capable of performing essentially the same functions; or (c) require Customer to return or remove the infringing Services and cancel all rights thereto. If Scoir implements option (iii) above, then Customer may, at its option, terminate this Agreement, with immediate effect upon written notice to Scoir, and Scoir shall promptly refund Customer all prepaid fees relating to Customer's access to and use of the Services after the effective date of termination. Notwithstanding the foregoing, Customer may participate at its own expense in any claim to which it is a party.

9.2. Exclusions. Notwithstanding the foregoing, Scoir will have no obligation under this Section 9 or otherwise with respect to any infringement claim based upon (i) any use of the Services not in accordance with this Agreement; (ii) any use of the Services in combination with other products, equipment, software, or data not supplied by Scoir where the cause of the infringement is the use of the Services in combination with any such products, equipment, software or data; or (iii) any modification of the Services by any person other than Scoir or its authorized agents.

9.3. Obligations. Scoir's indemnifying obligations set forth above are expressly conditioned upon each of the following: (i) Customer will promptly notify Scoir in writing of any threatened or actual claim; (ii) Scoir will have sole control of the defense and settlement, if any, of any claim giving rise to the indemnity obligations herein; provided, however, that no settlement will be binding against Customer without Customer's prior written consent; and (iii) Customer will cooperate with Scoir to facilitate the defense and settlement, if any, of any claim.

9.4. Exclusive Remedy. This Section 9 states the entire liability of Scoir and the sole and exclusive remedy of Customer and any of its affiliates, officers, directors, and employees for infringement claims and actions related hereto.

10. DISCLAIMERS; LIMITATION OF LIABILITY.

10.1. Disclaimer of Warranties. Customer's use of the Services is entirely at Customer's own risk. Scoir is not in the business of providing student counseling, college guidance, or any other professional advisory services. The Services are provided "AS IS" and on an "AS AVAILABLE" basis. EXCEPT AS OTHERWISE SPECIFIED HEREIN AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, SCOIR DISCLAIMS ALL REPRESENTATIONS, WARRANTIES, AND CONDITIONS, WHETHER STATUTORY, EXPRESS OR IMPLIED, INCLUDING THOSE OF FITNESS FOR A PARTICULAR PURPOSE, MERCHANTABILITY, NON-INFRINGEMENT, OR THE ACCURACY, RELIABILITY, QUALITY OF ANY CONTENT, DATA, OR INFORMATION MADE AVAILABLE VIA THE SUBSCRIPTION SERVICES. EACH PARTY DISCLAIMS ALL LIABILITY AND INDEMNIFICATION OBLIGATIONS FOR ANY HARM OR DAMAGES CAUSED BY ANY THIRD-PARTY HOSTING PROVIDERS. SCOIR DOES NOT WARRANT THAT THE SUBSCRIPTION SERVICES WILL BE COMPLETELY SECURE, FREE FROM BUGS, VIRUSES, INTERRUPTION, ERRORS, THEFT OR DESTRUCTION.

10.2. No Indirect Damages. TO THE EXTENT PERMITTED BY LAW, IN NO EVENT SHALL EITHER PARTY OR ITS AFFILIATES HAVE ANY LIABILITY ARISING OUT OF OR RELATED TO THIS AGREEMENT FOR ANY LOSS OF PROFITS, REVENUE, GOODWILL, OR BUSINESS OPPORTUNITY, OR FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL, COVER, OR PUNITIVE DAMAGES, WHETHER AN ACTION IS IN CONTRACT OR TORT AND REGARDLESS OF THE THEORY OF LIABILITY, EVEN IF A PARTY OR ITS AFFILIATES HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR IF A PARTY'S OR ITS AFFILIATES' REMEDY OTHERWISE FAILS OF ITS ESSENTIAL PURPOSE.

10.3. Limitation of Liability. EXCEPT FOR CUSTOMER'S LIABILITY FOR THE PAYMENT OF FEES, SCOIR'S INDEMNIFICATION OBLIGATIONS IN SECTION 9, AND EITHER PARTY'S GROSS NEGLIGENCE, WILLFUL MISCONDUCT, OR VIOLATION OF INTELLECTUAL PROPERTY RIGHTS, IF, NOTWITHSTANDING THE OTHER TERMS OF THIS AGREEMENT, EITHER PARTY OR ITS AFFILIATES IS DETERMINED TO HAVE ANY LIABILITY TO THE OTHER PARTY, ITS AFFILIATES OR ANY THIRD PARTY, THE PARTIES AGREE THAT, TO THE EXTENT PERMITTED BY LAW, THE AGGREGATE LIABILITY OF A PARTY AND ITS AFFILIATES WILL BE LIMITED TO A SUM EQUAL TO THE GREATER OF (A) TOTAL AMOUNTS PAID OR PAYABLE BY CUSTOMER FOR THE SUBSCRIPTION SERVICES IN THE TWELVE-MONTH PERIOD PRECEDING THE EVENT GIVING RISE TO A CLAIM AND (B) ONE HUNDRED U.S. DOLLARS.

10.4. Third Party Products. TO THE EXTENT PERMITTED BY LAW, SCOIR AND ITS AFFILIATES DISCLAIM ALL LIABILITY WITH RESPECT TO THIRD-PARTY PRODUCTS MADE AVAILABLE THROUGH THE SUBSCRIPTION SERVICES. OUR LICENSORS SHALL HAVE NO LIABILITY OF ANY KIND UNDER THIS AGREEMENT.

10.5. Agreement to Liability Limit. CUSTOMER UNDERSTANDS AND AGREES THAT ABSENT ITS AGREEMENT TO THIS LIMITATION OF LIABILITY, SCOIR WOULD NOT PROVIDE THE SUBSCRIPTION SERVICES TO CUSTOMER.

10.6. Exceptions. EXCLUSIONS AND LIMITATIONS SET FORTH IN THIS SECTION 10 WILL NOT APPLY TO CLAIMS AND DAMAGES RESULTING FROM SCOIR'S UNAUTHORIZED DISCLOSURE OF DATA IN VIOLATION OF THE DATA PRIVACY ADDENDUM (APPENDIX A), AND DAMAGES RESULTING FROM A PARTY'S GROSS NEGLIGENCE OR WILLFUL MISCONDUCT.

11. GENERAL PROVISIONS

11.1. Publicity. Customer hereby grants Scoir the limited right to display, in accordance with Customer's published trademark usage guidelines (if any), Customer's name and logo on Scoir's digital properties. Customer may limit or withdraw this permission at any time by completing and submitting a "Publicity Restrictions" form located at **https://www.scoir.com/publicity-restrictions**. Scoir hereby grants Customer permission to display, in accordance with Scoir's published trademark usage guidelines, Scoir's name, logo, and links to the Website on Customer websites and other materials as Customer may reasonably deem appropriate to promote the Services. The rights granted under this Section 11.1 shall expire upon termination of this Agreement.

11.2. Governing Law and Jurisdiction. This Agreement shall be interpreted, governed, and construed in accordance with the laws of the state where Customer is principally located; provided, however, that, if Customer is principally located outside the United States of America, then this Agreement shall be interpreted, governed, and construed in accordance with the laws of the State of Delaware. The parties hereby agree, to the extent not barred by immunity, that any dispute must be heard by any state court located within the capital city or principal city of such state, and the Parties hereby consent to the personal jurisdiction and exclusive venue of such courts.

11.3. Relationship of the Parties. Scoir is an independent contractor to Customer. This Agreement does not create a partnership, franchise, joint venture, agency, fiduciary, or employment relationship between the parties.

11.4. No Agency. For the avoidance of doubt, each of Scoir and Customer are entering into this Agreement as principals and not as an agent for any other company. Subject to any permitted assignment under Section 11.6, the obligations owed by Scoir under this Agreement shall be owed to Customer solely by Scoir and the obligations owed by Customer under this Agreement shall be owed solely to Scoir.

11.5. No Third-Party Beneficiaries. There are no third-party beneficiaries under this Agreement.

11.6. Assignment. Neither party may assign any of its rights or obligations hereunder, whether by operation of law or otherwise, without the other party's prior written consent (not to be unreasonably withheld); provided, however, either party may assign this Agreement in its entirety (together with all Order Forms) without the other party's consent in connection with a merger, acquisition, corporate reorganization, or sale of all or substantially all of its assets. Subject to the foregoing, this Agreement will bind and inure to the benefit of the parties, their respective successors and permitted assigns.

11.7. Notice. Except for the service of legal documents required to be delivered in physical form, the parties agree to use email to satisfy required or permitted written approvals, notices, and consents under this Agreement. Scoir will provide all notices to Customer by sending an email to Customer's identified account owner. Customer shall provide all notices to Scoir by sending an email to **legal-notices@scoir.com**. Email notices will be treated as received when sent.

11.8. Waiver. No delay or omission of a party to exercise any right hereunder shall be construed as a waiver of any such. Each party may exercise its rights granted herein at any time.

11.9. Severability. Any provision of this Agreement that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions of this Agreement, and any such prohibition or unenforceability in any jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction. Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this Agreement or affecting the validity or enforceability of such provision in any other jurisdiction.

11.10. Entire Agreement. This Agreement, including all schedules and Order Forms and lawful modifications hereto, constitutes the entire agreement between Customer and Scoir regarding Customer's use of Services and it supersedes all prior and contemporaneous agreements, proposals or representations, written or oral, concerning its subject matter. Any provision of this Agreement may be waived only with the signed written consent of both parties. Neither failure nor delay on the part of any party in exercising any right, power, or privilege hereunder shall operate as a waiver of such right, nor shall any single or partial exercise of any such right, power, or privilege preclude any further exercise thereof or the exercise of any other right, power, or privilege.

11.11. Public Inspection of Agreement. Scoir acknowledges and agrees that this Agreement and all documents Scoir provides Customer as required herein, may, if and to the extent deemed public records under applicable law, be public records and may at all times be subject to public inspection.

11.12. Electronic Signatures. Each of the parties consents to the use of electronic signatures as valid execution and delivery of this Agreement and any other document relating thereto.

11.13. Counterparts. This Agreement may be executed in any number of identical counterparts. If so executed, each of such counterparts shall constitute this Agreement. In proving this Agreement, it shall not be necessary to produce or account for more than one such counterpart. Execution and delivery of this Agreement by electronic format shall constitute valid execution and delivery and shall be effective for all purposes.

11.14. Authority. Each party represents to the other that it has full power and authority to enter into this Agreement and that it is binding upon such party and enforceable in accordance with its terms. Customer further represents that it has the authority to procure its Affiliates' compliance with the terms of this Agreement.

APPENDIX A
TO
K12 TERMS OF SERVICE

DATA PRIVACY ADDENDUM

This Data Privacy Addendum ("**DPA**") forms a part of and is incorporated into the K12 Terms of Service agreement between Scoir, Inc. and Customer. All capitalized terms not defined herein shall have the meaning set forth in the Agreement. The parties agree as follows:

ARTICLE I: DEFINITIONS

"Applicable Law" means the federal and state statutes and regulations applicable to Customer Data and Student Data including the following, to the extent applicable: Family Educational Rights and Privacy Act, 20 U.S.C. § 1232g ("**FERPA**"); Children's Online Privacy Protection Act, 15 U.S.C. § 6501-6502 ("**COPPA**"); Protection of Pupil Rights Amendment, 20 U.S.C. 1232h ("**PPRA**"); Individuals with Disabilities Education Act, 20 U.S.C. § 1400 *et seq.* ("**IDEA**"); and each specifically applicable state regulation, as provided in **Exhibit A** hereto.

"Data Breach" means an unauthorized release, access to, disclosure, or acquisition of Student Data that compromises the security, confidentiality, or integrity of the Student Data maintained by Scoir in violation of Applicable Law.

"De-Identified Information" means data from which all Personally Identifiable Information has been removed or obscured in a way that reasonably removes the risk of disclosure of the identity of the individual and information about them (e.g., by blurring, masking, or perturbation). De-identification should ensure that any information when put together cannot reasonably indirectly identify the student, not only from the viewpoint of the public, but also from the vantage of those who are familiar with the individual. Information cannot be de-identified if there are fewer than twenty (20) students in the samples of a particular field or category, e.g., fewer than twenty students in a particular grade or fewer than twenty students of a particular ethnicity.

"Personally Identifiable Information" means any Student Data and metadata obtained by reason of the use of the Services, whether gathered by Scoir or provided by Customer or its Invitees. Personally Identifiable Information includes, without limitation, indirect identifiers that, either alone or in aggregate, would allow a reasonable person to be able to identify a student to a reasonable certainty. For purposes of this DPA, Personally Identifiable Information shall include the categories of information listed in the definition of Student Data.

"School Official" means, consistent with 34 CFR 99.31(a)(1)(i)(B), a contractor that: (1) performs an institutional service or function for which the agency or institution would otherwise use employees; (2) is under the direct control of the agency or institution with respect to the use and maintenance of education records; and (3) is subject to 34 CFR 99.33 governing the use and re-disclosure of Personally Identifiable Information from student records.

"Student Data" means any Personally Identifiable Information, whether gathered by Scoir or provided by Customer or its Invitees, that is descriptive of Customer's student Invitees, including, but not limited to, information in the student's educational record or email, first and last name, home address, telephone number, email address, or other information allowing online contact, discipline records, videos, test results, special education data, juvenile dependency records, grades, evaluations, criminal records, medical records, health records, social security numbers, biometric information, disabilities, socioeconomic information, food purchases, political affiliations, religious information, text messages, documents student identifies, search activity, photos, voice recordings or geolocation information. Student Data includes Student Records and Student-Generated Content (to the extent identifiable to a User) for the purposes of this DPA and for the purposes of Applicable Law. De-Identified Information or anonymous usage data regarding a User's use of the Services shall not be considered Student Data.

"Student-Generated Content" means materials or content created by a student during and for the purpose of education including, but not limited to, essays, research reports, portfolios, creative writing, music or other audio files, photographs, videos, and account information that enables ongoing ownership of student content.

"Student Records" means (1) any information that directly relates to a student that is maintained by Customer; and (2) any information acquired directly from a student through the use of instructional software or applications assigned to the student by Customer or its Invitees.

"Subprocessor" means a Third Party that Scoir uses for data collection, analytics, storage, or other service to operate and/or improve its software, and who has access to Personally Identifiable Information, a list of which is publicly available at www.scoir.com/terms-of-service.

"Targeted Advertising" means presenting an advertisement to a student where the selection of the advertisement is based on Student Data or inferred over time from the usage of the Services by such student or the retention of such student's online activities or requests over time. "Targeted advertising" does not include any advertising to a student on an Internet web site based on the content of the web page or in response to a student's response or request for information or feedback.

"Third Party" means an entity that is not Scoir or Customer.

ARTICLE II: PURPOSE AND SCOPE

1. Purpose of DPA. The purpose of this DPA is to describe the duties and responsibilities to protect Student Data transmitted to Scoir from the Customer pursuant to the Agreement, including compliance with Applicable Law. In performing the Services, to the extent Personally Identifiable Information from Student Data is transmitted to Scoir from Customer, Scoir shall be considered a School Official with a legitimate educational interest, and performing services otherwise provided by the Customer. Scoir shall be under the direct control and supervision of the Customer, with respect to its use of Student Data.

2. Nature of Services Provided. Scoir has agreed to provide the Services described in the Agreement.

3. Student Data to Be Provided. In order to perform the Services described in this Article and the Agreement, Customer or Invitees may provide some or all of the data described in the Schedule of Data, attached hereto as **Exhibit B**.

4. Governing Terms. In the event of a conflict with the Agreement, the terms and conditions of this DPA shall prevail with regards to the subject matter hereof.

ARTICLE III: DATA OWNERSHIP AND AUTHORIZED ACCESS

1. Student Data Property of Customer. All Student Data transmitted to Scoir pursuant to this DPA is and will continue to be the property of and under the control of the Customer or the party who provided such data (such as the Invitee). Scoir further acknowledges and agrees that all copies of such Student Data transmitted to Scoir, including any modifications or additions or any portion thereof from any source, are also subject to the provisions of this DPA in the same manner as the original Student Data. The parties agree that as between them, all rights, including all Intellectual Property Rights in and to Student Data contemplated pursuant to this DPA shall remain the exclusive property of the Customer. For the purposes of Applicable Law, Scoir shall be considered a School Official, under the control and direction of Customer as it pertains to the use of Student Data notwithstanding the above. Scoir may transfer certain Student Data to a separate account according to the procedures set forth below.

2. Parent, Legal Guardian, and Student Access. To the extent required by law, Customer shall establish reasonable procedures by which a parent, legal guardian, or eligible student (as defined in FERPA) may review Student Data maintained by Scoir, correct erroneous information, and procedures for the transfer of Student-Generated Content to a personal account, consistent with the functionality of the Services. Scoir will cooperate and respond within five (5) days to Customer's request to view or correct Student Data maintained by Scoir. In the event that a parent of a student or other individual contacts Scoir to review any of the Student Records or Student Data accessed pursuant to the Services, Scoir shall refer the parent or individual to the Customer, and Customer will follow the necessary and proper procedures regarding the requested information.

3. Separate Account. Scoir shall transfer Student Data transmitted to Scoir by a student to a separate User account for each student Invitee upon termination of the Agreement or a student's earlier graduation from Customer; provided, however, that such transfer shall only apply to such Student Data that is severable from the Services.

4. Third Party Request. Should a Third Party, including, but not limited to law enforcement, former employees of the Customer, current employees of the Customer, and government entities, contact Scoir with a request for Student Data held by Scoir pursuant to the Services, Scoir shall, to the extent permitted by Applicable Law, redirect the Third Party to request the Student Data directly from the Customer and shall cooperate with the Customer to collect the required information. Scoir shall notify the Customer in advance of a compelled disclosure to a Third Party, unless legally prohibited. Scoir will not disclose, lend, lease, transfer, or sell the Student Data or any portion thereof to any Third Party or allow any Third Party to use the Student Data and/or any portion thereof, without the express written consent of the Customer or without a court order or lawfully issued subpoena. Student Data shall not include De-Identified Information or anonymous usage data regarding a student's use of the Services.

5. No Unauthorized Use. Scoir shall not use Student Data for any purpose other than as explicitly specified in this DPA.

6. Subprocessors. Scoir shall enter into written agreements with all Subprocessors performing functions pursuant to this DPA, whereby the Subprocessors agree to protect Student Data in manner consistent with the terms of this DPA.

ARTICLE IV: DUTIES OF CLIENT

1. Privacy Compliance. Customer shall provide Student Data for the purposes of the DPA in compliance with Applicable Law.

2. Annual Notification of Rights. If Customer is subject to FERPA, then Customer shall ensure that its annual FERPA notice designates Scoir as a "School Official" pursuant to 34 CFR § 99.31(a)(1)(i)(B) and that, in providing the Services, Scoir has a "legitimate educational interest" pursuant to 34 CFR §99.7(a)(3)(iii).

3. Reasonable Precautions. Customer shall employ administrative, physical, and technical safeguards designed to protect usernames, passwords, and any other means of gaining access to the Services and hosted Student Data from unauthorized access, disclosure, or acquisition by an unauthorized person.

4. Unauthorized Access Notification. Customer shall notify Scoir within seventy-two (72) hours of any known or suspected Data Breach or compromise of any Invitee's account that poses a privacy or security risk to the Services. Customer will provide reasonable assistance to Scoir in any efforts by Scoir to investigate and respond to such actual or suspected Data Breach.

ARTICLE V: DUTIES OF PROVIDER

1. Privacy Compliance. Scoir shall comply with all Applicable Law with respect to the privacy and security of Student Data and, at the direction of Customer, shall cooperate with any state or federal government-initiated audit of Customer's use of the Services.

2. Authorized Use. Student Data shared pursuant to this DPA, including persistent unique identifiers, shall be used for no purpose other than the Services stated in this DPA, as authorized by Customer, or as authorized by the applicable student or parent. Scoir also acknowledges and agrees that it shall not make any re-disclosure of any Student Data or any portion thereof, including without limitation, any meta data, user content or other non-public information and/or Personally Identifiable Information contained in the Student Data, unless the Customer has given express written consent, it is De-Identified Information, or this DPA otherwise allows its disclosure.

3. Employee Obligation. Scoir shall require all employees and agents who have access to Student Data to comply with all applicable provisions of this DPA with respect to the data shared under this DPA. Scoir agrees to require and maintain an appropriate confidentiality agreement from each employee or agent with access to Student Data pursuant to the DPA.

4. No Disclosure. Provider acknowledges and agrees that it shall not make any re-disclosure of any Student Data or any portion thereof, including without limitation, user content or other non-public information and/or Personally Identifiable Information contained in the Student Data, other than as directed or permitted by Customer or this DPA. This prohibition against disclosure shall not apply to De-Identified Information, Student Data disclosed pursuant to a lawfully issued subpoena or other legal process, or to Subprocessors performing services on behalf of Scoir pursuant to this DPA.

5. De-Identified Data. Scoir agrees not to attempt to re-identify De-Identified Information. De-Identified Information may be used by Scoir for those purposes allowed under FERPA and the following purposes: (a) assisting Customer or other governmental agencies in conducting research and other studies; (b) research and development of Scoir's educational sites, services, or applications, and to demonstrate the effectiveness of the Services; and (c) for adaptive learning purposes and for customized student learning. Scoir's use of De-Identified Information shall survive termination of this DPA or any request by Customer to return or destroy Student Data. Except for Subprocessors, Scoir agrees not to transfer De-Identified Information to any party unless (i) that party agrees in writing not to attempt re-identification, and (ii) prior written notice has been given to Customer who has provided prior written consent for such transfer. Prior to publishing any document that names Customer explicitly or indirectly, Scoir shall obtain Customer's written approval of the manner in which De-Identified Information is presented.

6. Disposition of Data. Scoir shall dispose, delete, or de-identify, in accordance with NIST Special Publication 800-88, all Personally Identifiable Information obtained under the DPA when it is no longer needed for the purpose for which it was obtained. If requested by Customer in writing prior to the termination of the Agreement, Scoir shall first transfer a copy of said data to Customer, or Customer's designee, according to a schedule and procedure reasonable agreed between the parties. Nothing in the DPA authorizes Scoir to maintain Personally Identifiable Information beyond the time period reasonably needed to complete the disposition. Scoir shall provide written notification to Customer when the data has been disposed. The duty to dispose of Student Data shall not extend to De-Identified Information or data placed in a separate User account, pursuant to the other terms of the DPA.

7. Advertising Prohibition. Scoir is prohibited from using, disclosing, or selling Student Data (a) to inform, influence, or enable Targeted Advertising; (b) to develop a profile of a student, family member/guardian or group, for any commercial purpose other than providing the Services; or (c) for any commercial purpose other than to provide the Services provided to Customer, or as authorized by the Customer or the parent/guardian.

ARTICLE VI: DATA SECURITY AND BREACH PROVISIONS

1. Data Security. Scoir agrees to maintain and abide by a comprehensive information security program that includes appropriate administrative, technological, and physical safeguards consistent with industry best practices to protect the security, privacy, confidentiality, and integrity of Student Data. General security duties of Scoir are as follows:

(a) Passwords and Employee Access. Scoir shall secure usernames, passwords, and any other means of gaining access to the Services or to Student Data, at a level suggested by Draft National Institute of Standards and Technology ("NIST") Special Publication 800-63-3 Digital Authentication Guideline. Scoir shall only provide access to Student Data to employees or contractors that are performing the

Services. Employees with access to Student Data shall have signed confidentiality agreements regarding said Student Data. All employees with access to Student Records shall, where permissible by law, be subject to criminal background checks.

(b) Security Protocols. Each party agrees to maintain security protocols that meet industry practices regarding the transfer or transmission of any data, including ensuring that data may only be viewed or accessed by parties legally allowed to do so. Scoir shall not copy, reproduce, or transmit data obtained pursuant to the DPA, except as necessary to fulfill the purpose of data requests by Customer. The foregoing does not limit the ability of Scoir to allow any necessary service providers to view or access data as provided in this Agreement.

(c) Employee Training. Scoir shall provide periodic security training to those of its employees who operate or have access to the system. Further, Scoir shall provide Customer with contact information of an employee who Customer may contact if there are any security concerns or questions.

(d) Security Technology. When the Services are accessed using a supported web browser, Secure Socket Layer or equivalent technology shall be employed to protect data from unauthorized access. The Services security measures shall include server authentication and data encryption. All data shall be encrypted in transmission and at rest in accordance with NIST Special Publication 800-57, as amended. Scoir shall host all Services data in SOC 2 compliant environments located within the United States of America.

(e) Subprocessors Bound. Scoir shall enter into written agreements whereby Subprocessors agree to secure and protect Student Data in a manner consistent with the terms of this Article VI and in accordance with Applicable Law. Scoir shall periodically conduct or review compliance monitoring and assessments of Subprocessors to determine their compliance with this Article.

(f) Periodic Risk Assessment. Scoir further acknowledges and agrees to conduct periodic risk assessments and remediate any identified security and privacy vulnerabilities in a timely manner.

(g) Backups. Scoir agrees to maintain backup copies, backed up at least daily, of Student Data in case of Scoir's system failure or any other unforeseen event resulting in loss of Student Data or any portion thereof.

(h) Audits. Upon receipt of a reasonable request from the Customer, Scoir will allow the Customer to audit, at Customer's expense, the security and privacy measures that are in place to ensure protection of the Student Record or any portion thereof. Scoir will cooperate fully with the Customer and any local, state, or federal agency with oversight authority/jurisdiction in connection with any audit or investigation of Scoir and/or delivery of Services to students and/or Customer, and shall provide full access to Scoir's facilities, staff, agents and Customer's Student Data and all records pertaining to Scoir, Customer and delivery of Services to Scoir.

2. Data Breach. In the event of a confirmed Data Breach, Scoir shall notify Customer within forty-eight (48) hours of its discovery of the Data Breach, unless notification within these time limits would disrupt investigation of the Data Breach by law enforcement. Scoir shall follow the following process:

(a) The Data Breach notification described above shall be written in plain language, shall be titled "Notice of Data Breach," and shall present the information described herein under the following headings: "What Happened," "What Information Was Involved," "What Scoir Are Doing," "What Customer Can Do," and "For More Information." Additional information may be provided as a supplement to the notice.

(b) The security breach notification described above in section 2(a) shall include, at a minimum to the extent known by Scoir, the following information:

(i) The name and contact information of the reporting customer subject to this section.

(ii) A description of the Student Data reasonably believed to have been the subject of the Data Breach.

(iii) If the information is possible to determine at the time the notice is provided, then either (1) the date of the breach, (2) the estimated date of the breach, or (3) the date range within which the breach occurred. The notification shall also include the date of the notice.

(iv) Whether the notification was delayed as a result of a law enforcement investigation, if that information is possible to determine at the time the notice is provided.

(v) A general description of the Data Breach, if that information is possible to determine at the time the notice is provided.

(vi) Information about what Scoir has done to protect individuals whose information has been breached.

(vii) identification of the Invitees whose Student Data was subject of the Data Breach.

(c) Scoir further acknowledges and agrees to have a written incident response plan that reflects best practices and is consistent with industry standards and federal and state law for responding to a data breach, breach of security, privacy incident or unauthorized acquisition or use of Student Data or any portion thereof, including Personally Identifiable Information and agrees to provide Customer, upon request, with a copy of said written incident response plan.

(d) Only upon the written request of, and with the assistance of, Customer shall Scoir notify the affected Invitee of the unauthorized access, which notice shall include the information listed in subsection (b) above.

(e) In the event of a Data Breach originating from Customer's use of the Services or otherwise a result of Customer's actions or inactions, Scoir shall reasonably cooperate with Customer to the extent necessary to expeditiously secure Student Data and Customer shall reimburse Scoir for costs incurred as a result of such Data Breach.

Notes

1. This Order Form, together with Scoir's standard Terms of Service dated January 15, 2025 which is publicly available on the webpage www.scoir.com/k12-terms-of-service, forms the contract governing your access to and use of Scoir's products and services identified above for the duration of the Subscription Term.

2. The quantity presented above is based on customer's good faith estimate of the number of enrolled students. Scoir acknowledges that actual quantities may vary. Customers' use of Scoir's products and services will not be limited if actual quantities differ from those listed above. Adjustments for quantity variances of ± 10% may be reflected on future contract renewals.

3. If this Order Form includes a Discount, you hereby certify that the Discount rate is based on your good faith estimate of the percentage of enrolled students who are (A) eligible for Free and Reduced Price Lunch under the U.S. Department of Education's National School Lunch Program, or (B) for private schools when FRPL data is not available, receiving a need-based full-tuition scholarship.

4. Unless otherwise agreed, Scoir will invoice Customer annually in equal 12-month installments. If the subscription period specified above is not for a number of whole years, then the first invoice issued pursuant to this Order Form will be prorated accordingly.

5. By your execution of this Order Form, you represent that you have read, understand, and accept, as a duly authorized representative of Knox County Public Schools, this binding contract (including the Terms of Service) in its entirety. Upon your acceptance, Scoir will issue you an invoice in the amount specified above.

Customer Acceptance

PROGRAM AGREEMENT

This Program Agreement (the "Agreement") is by and between Knox County Schools ("Customer") and Array Education, Inc. and its Teach Like a Champion program ("TLAC"), collectively the "Parties" and each individually a "Party," effective July 1, 2025 (the "Effective Date") through December 31, 2025 (the "Termination Date").

The purpose of this Agreement is to formalize the partnership between Customer and TLAC, to further the Parties' shared goals and to outline the responsibilities of each Party.

1. **Program Overview.**

   a) TLAC will provide services outlined in the Scope of Work attached to this document in **Appendix A** ("Program") for Maynard Elementary School teachers and leaders ("Program Participants").

   b) The following designated representatives will serve as the partnership coordinators and contact persons for the Program for the purposes of maintaining a strong partnership. Any questions about the details of the Agreement should be directed to the Program Contact.

   For Customer ("Customer Program Contact"):

   Name: William Smith
   Title: Principal
   Email: william.smith@knoxschools.org
   Phone: 865-594-1333

   For TLAC ("TLAC Program Contact"):

   Name: Sadie McCleary
   Title: Senior Associate Director of Content, TLAC
   Email: smccleary@teachlikeachampion.org
   Phone: 336-671-5527

   c) For training and workshops, the Customer Program Contact is responsible for the items below. The TLAC Program Contact will reach out to the Customer Program Contact to coordinate.
      i. For in-person training, provide necessary audio-visual equipment, Wi-Fi, and other logistical requests from TLAC. See Workshop Prep Checklist for reference. Also included in **Appendix B.**
      ii. Send a participant list with names, email addresses, and roles in an Excel spreadsheet to TLAC Program Contact no later than 5 calendar days prior to the training.
      iii. Share training expectations and all logistical information from TLAC Program Contact with all participants of the training.
      iv. Share Media Consent and Release Agreements with all participants and return completed forms to TLAC Program Contact no later than 1 day prior to the training. Forms should be compiled into a single email or shared cloud folder.

2. **Fees and Payment.**

   a) **Program Fee**: Upon issuance of a signed purchase order Array Education shall render the services outlined within the Scope of Work. Upon completion of services Array Education shall

invoice Knox County Schools for a fixed fee of thirty-two thousand, five hundred dollars ($32,500).

b) **Payment Terms**: Services shall only be rendered upon issuance of a signed purchase order. Customer will be invoiced for the contract total upon completion of services of this Agreement, with payments made via electronic funds transfer (preferred) or check in U.S. dollars unless otherwise noted in the invoice due within 30 days of the invoice. If a Purchase Order is required or if TLAC needs to register formally as a vendor in your procurement process, please notify Array at finance@arrayeducation.org.

Invoices and invoice communications will be sent to:

Primary Billing Contact:
Name: William Smith
Title: Principal
Email: william.smith@knoxschools.org

c) **Cancellation/Reschedule**: By signing this Agreement, TLAC will reserve the dates and trainers needed for the Customer. If the Customer needs to cancel less than 30 calendar days prior to the scheduled date of services, Customer will be invoiced a late cancellation fee of $500. Alternatively, Customers can request a reschedule of services up to 2 times in lieu of the cancellation fee.

3. **Intellectual Property.**

a) **"Intellectual Property"** means any and all worldwide rights in, arising from or associated with the following, whether protected, created or arising under the laws of the United States or any other jurisdiction or under any international convention: (1) all patents and applications therefor and all reissues, divisions, re-examinations, renewals, extensions, provisionals, substitutions, continuations and continuations-in-part thereof, and equivalent or similar rights anywhere in the world in inventions and discoveries including, without limitation, invention disclosures ("Patents"); (2) all trade secrets and other proprietary information which derives independent economic value from not being generally known to the public (collectively, "Trade Secrets"); (3) all copyrights, copyrights registrations and applications therefor ("Copyrights"); (4) all uniform resource locators, e-mail and other internet addresses and domain names and applications and registrations therefor ("Domain Names"); (5) all trade names, corporate names, logos, slogans, trade dress, trademarks, service marks, and trademark and service mark registrations and applications therefor and all goodwill associated therewith ("Trademarks"); (6) rights of publicity; (7) moral rights and rights of attribution; (8) software, databases, compilations and data, technology supporting the foregoing, and all documentation, including user manuals and training materials relating to the foregoing; [(9) websites; and (10) any similar, corresponding or equivalent rights to any of the foregoing anywhere in the world.

b) The Parties acknowledge that TLAC owns all right, title and interest in and to the Program materials, including but not limited to lessons, slides, teaching instructions, videos and handouts (collectively, the "TLAC Program Curriculum"), together with all modifications, enhancements, revisions, changes, copies, partial copies, translations, compilations, and derivative works thereto, including all Intellectual Property rights thereto ("TLAC IP"). Customer

will have no rights with respect to the TLAC IP other than those expressly granted under this Section 3

c) Subject to the terms and conditions of this Agreement, TLAC hereby grants to Customer during the Term, a limited, non-exclusive, non-transferable, non-sublicensable license to use the TLAC Program Curriculum solely for Customer's noncommercial use. The foregoing license allows Customer to permit the Program Participants to use the TLAC Program Curriculum for the Program Participants personal noncommercial use. Customer and the Program Participants shall not use the TLAC Program Curriculum beyond the scope of the license granted hereunder. Customer acknowledges and agrees that the TLAC Program Curriculum is licensed, not sold, to the Customer for use only under the terms and conditions of this Agreement. Customer shall retain all branding, trademark and copyright notices, attributions, and identification of authors that appear on the TLAC Program Curriculum delivered to Customer by TLAC.

d) Customer shall not (and shall not permit any third party to) make any use of the TLAC Program Curriculum that is not expressly permitted under this Agreement. Without limiting the foregoing, Customer shall not (and shall not permit any third party to): (i) modify, adapt, translate, or delete the contents of or create derivative works based on the TLAC Program Curriculum; (ii) sell, rent, lease, resell, distribute, or sublicense the TLAC Program Curriculum; (iii) remove or modify any proprietary marking or restrictive legends placed on the TLAC Program Curriculum; (iv) use the TLAC Program Curriculum, directly or indirectly, to create, implement, or enhance a curriculum that is similar to the TLAC Program Curriculum; and/or (v) engage or participate in any activity or course of action that could diminish or tarnish the image or reputation of the TLAC Program Curriculum or TLAC, or cause confusion as to the ownership of the TLAC Program Curriculum.

4. Use of Brands and Logos.

Signing of this Agreement does not grant use of TLAC brands and logos by the Customer and Customer brands and logos by TLAC. This includes posting TLAC's logo on Customer's website and posting Customer's logo on TLAC's website. Each Party must get permission from the other Party prior to using the other Party's logo.

5. Confidentiality.

For the purposes of this Agreement, "Confidential Information" means any confidential or other proprietary information that is disclosed by or on behalf of TLAC to Customer and/or Program Participants, whether disclosed orally or in writing, whether disclosed before or after the Effective Date, and whether or not marked or otherwise designated as confidential, including, without limitation, information relating to TLAC's customers, potential customers, suppliers, financial and business information, technological information, specifications, business and product plans, TLAC Program Curriculum; and the terms and conditions of this Agreement. Notwithstanding the foregoing, Confidential Information does not include information which: (i) is or becomes public knowledge without any action by, or involvement of, Customer; (ii) is publicly disclosed by Customer with the prior, written approval of TLAC; or (iii) is independently developed by Customer without use of or access to Confidential Information. Customer shall: (i) observe complete confidentiality with respect to, and not to disclose, or permit any third party or entity access to, any Confidential Information without prior written permission of TLAC; (ii) not utilize, except as required to perform its obligations under this Agreement, any Confidential Information; (iii) ensure that its employees shall only be given access to Confidential Information to the extent necessary for such employees

to perform their duties under this Agreement; and (iv) ensure that any of its employees who receive access to any Confidential Information are advised of the confidential and proprietary nature thereof and are bound by confidentiality terms at least as protective of the Confidential Information as those contained herein. Customer shall remain at all times responsible for any breach of this Agreement by any of its employees. Without limiting the foregoing, Customer agrees to employ, with regard to the Confidential Information, procedures that are no less restrictive than the procedures used by it to protect its own confidential and proprietary information of similar sensitivity (and that in no event are less restrictive than reasonable procedures). If Customer is requested to disclose any of the Confidential Information pursuant to any judicial or governmental order, Customer will not disclose the Confidential Information without first giving TLAC written notice of the request. Array Education, Inc. shall maintain all books, documents, accounting records and other evidence pertaining to the service under this Contract and make such materials available at their offices at all reasonable times during the contract period and for five (5) years from the date of the final payment under the Contract for inspection by the County or by any other governmental entity or agency participating in the funding of this Contract, or any authorized agents thereof; copies of said records to be furnished if requested. Such records shall not include those books, documents and accounting records that represent the Contractor's costs of manufacturing, acquiring or delivering the products and services governed by this Contract. Knox County is subject to the Tennessee Open Records Act 10-7-503 et seq. Knox County will comply with all legitimate requests.

6. **Term and Termination.**

a) This Agreement shall commence as of the Effective Date and will continue in effect until the Termination Date (the "Term"), except that either party may terminate the Agreement at any time on thirty (30) calendar days prior written notice to the other party with or without cause.

b) Upon termination or expiration of this Agreement, Customer shall: (i) promptly pay all applicable Program Fees due to TLAC for the services provided by TLAC until the date of such termination or expiration; and (ii) immediately cease all use of the TLAC Program Curriculum and ensure the Program Participant's do the same.

c) Sections 2, 3, 5, 6c, 7b, 7c, 7d, and 8 shall survive the termination or expiration of this Agreement.

7. **Representations and Warranties, Limitation of Liability and Indemnification.**

a) **Mutual Representations and Warranties:** Each Party represents and warrants that as of the Effective Date and at all times thereafter: (a) this Agreement constitutes its valid and binding obligation and is enforceable against it in accordance with the terms of this Agreement; and (b) the execution and delivery of this Agreement by it and the performance of its obligations hereunder: (i) are not in violation or breach of, and will not conflict with or constitute a default under, any material contract, agreement or commitment binding upon it; and (ii) will not conflict with or violate in any material manner, any applicable law, rule, regulation, judgment, order or decree of any government, governmental instrumentality or court having jurisdiction over such party. Except for the express warranties stated in this section, each party disclaims all other warranties, whether implied by operation of law or otherwise, including, without limitation, any implied warranties of merchantability and fitness for a particular purpose, and any warranties arising from a course of performance, course of dealing or usage of trade.

b) **Array Education Disclaimers**: EXCEPT AS EXPRESSLY SET FORTH IN SECTION 6A, THE TLAC PROGRAM CURRICULUM, AND ANY OTHER MATERIALS PROVIDED HEREUNDER BY ARRAY EDUCATION ARE PROVIDED "AS IS" AND "AS AVAILABLE," AND ARRAY EDUCATION MAKES NO WARRANTIES WITH RESPECT TO THE SAME OR OTHERWISE IN CONNECTION WITH THIS AGREEMENT AND ARRAY EDUCATION HEREBY DISCLAIMS ANY AND ALL EXPRESS, IMPLIED, OR STATUTORY WARRANTIES, INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AVAILABILITY, ERROR-FREE OR UNINTERRUPTED OPERATION, AND ANY WARRANTIES ARISING FROM A COURSE OF DEALING, COURSE OF PERFORMANCE, OR USAGE OF TRADE. TO THE EXTENT THAT ARRAY EDUCATION MAY NOT AS A MATTER OF APPLICABLE LAW DISCLAIM ANY IMPLIED WARRANTY, THE SCOPE AND DURATION OF SUCH WARRANTY WILL BE THE MINIMUM PERMITTED UNDER SUCH LAW.

c) In no event shall Knox County be liable for indirect, incidental, consequential, special or exemplary damages or lost profits, even if the County has been advised of the possibility of such damages. No provision of this Agreement shall act or be deemed to be a waiver by Knox County or the County/School System of any immunity or of any provision of the TENNESSEE GOVERNMENTAL TORT LIABILITY ACT. Tenn. Code Ann 29-20- 101 et seq. Any liability to the Array Education, Inc. or third parties for any claims, damages, losses, or costs arising out of, or related to acts performed by the County/School System under this Agreement will be governed and limited by the provisions of the Tennessee Governmental Tort Liability Act, Tenn. Code Ann. 29-20-101 et seq.

d) Array Education, Inc. shall indemnify, defend, save and hold harmless Knox County, its officers, agents and employees from all third-party suits, claims, actions or physical damages of any nature brought because of, arising out of, or due to any alleged breach of the agreement by Contractor, its subcontractors, suppliers, agents, or employees or due to any grossly negligent act or occurrence or any intentional omission or commission of Contractor, its subcontractors, suppliers, agents or employees. Knox County has not been given authority under the laws of the State of Tennessee to indemnify a contractor under any circumstances. This includes, but is not limited to, Third Party Claims. The inclusion of any language requiring indemnification by the County in this Contract or any supplemental documents, will not be accepted.

8. Miscellaneous.

a) This Agreement does not intend to create any binding obligations on the parties other than those stated in this Agreement, and the parties shall commit their best efforts to obtain all necessary corporate approvals to execute the appropriate definitive agreements that shall be necessary for the purpose of this Agreement.

b) Failure to exercise or enforce or a delay in exercising or enforcing or the partial exercise or enforcement of any right, power or remedy provided by law or under this letter by any party will not in any way preclude, or operate as a waiver of, any exercise or enforcement, or further exercise or enforcement of that or any other right, power or remedy provided by law or under this Agreement. Any waiver or consent given by any party under this document will only be effective and binding on that party if it is given or confirmed in writing by that party. No waiver of a breach of any term of this document will operate as a waiver of another breach of that term or of a breach of any other term of this letter.

c) This Contract shall be exclusively construed, governed, and controlled by the Laws of the State of Tennessee without regard to principles of law, including conflicts of law, of any other jurisdiction,

territory, country, and/or province. Any dispute arising out of or relating to this agreement shall exclusively be brought in the Chancery Court or the Circuit Court of Knox County, Tennessee. Each party consents to personal jurisdiction thereto and waives any defenses based on personal jurisdiction, venue and inconvenient form.

d) The parties acknowledge and agree that in the event of a breach or threatened violation of the intellectual property rights or breach of Section 5, TLAC will suffer irreparable harm and will therefore be entitled to injunctive relief to enforce this Agreement. Any dispute arising out of or relating to this agreement shall exclusively be brought in the Chancery Court or the Circuit Court of Knox County, Tennessee. Each party consents to personal jurisdiction thereto and waives any defenses based on personal jurisdiction, venue and inconvenient form.

e) This Agreement may not be assigned by Customer without the prior written consent of TLAC.

f) Neither Party shall be liable for any failure or delay in the performance of its obligations under this Agreement to the extent such failure or delay or both is caused, directly or indirectly, without fault by such Party, by any reason beyond its reasonable control, including but not limited to, fire, flood, earthquake, elements of nature or acts of God, acts of state, acts of war, terrorism, riots, civil disorders, rebellions, revolutions, quarantines, embargoes, failure or termination of Third-Party Items, and other similar governmental action (each a "Force Majeure Event"). Any Party so delayed in its performance will promptly notify the other by telephone or by the most timely means otherwise available (to be confirmed in writing within two (2) business days of the inception of such delay) and describe in reasonable detail the circumstances causing such delay. In such event, the performance times shall be extended for a period of time equivalent to the time lost because of the excusable delay; provided, however, if the delay or failure continues for more than thirty (30) days, the Party not relying on the excusable delay may terminate this Agreement upon written notice to the other Party. In order to avail itself of the relief provided in this Section, a Party must use commercially reasonable efforts to remedy the cause of, or to mitigate or overcome, such delay or failure.

g) Array Education, Inc. agrees to comply with Tennessee Code Annotated Section 49-5-413. As required under the statute, Contractor will provide fingerprinting and a criminal history records check, conducted by the Tennessee Bureau of Investigation and the Federal Bureau of Investigation, for any employee or subcontractor personnel that will enter the grounds of any schools in performance of the Services in this Contract before permitting the employee or subcontractor personnel to enter school grounds when students are present. Criminal background checks are at the expense of the Contractor. If the employee or subcontractor personnel has previously had criminal history records check in accordance with Tennessee Code Annotated Section 49-5-413, Contractor shall provide a copy of the criminal background check to the County, and this will serve as compliance with said requirement.

h) Array Education, Inc. and each person signing on behalf of the company certifies, and in the case of a joint proposal, each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief that each proposer is not on the list created pursuant to Tennessee Code Annotated § 12-12-106. Pursuant to Tennessee Code Annotated Title 12, Chapter 4, Part 1, Array Education, Inc. and each person signing on behalf of the company certifies, and in the case of a joint response each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief that each proposer is not currently engaged in, and will not for the duration of the contract engage

in, a boycott of Israel. Array Education, Inc. must submit the completed Iran Divestment Act/ No Boycott of Israel.

i) Array Education, Inc. will be required to submit a Certificate of Insurance (COI) including any corresponding endorsement page(s) with the specified coverage and listing Knox County as an additional insured. It shall be Array Education's responsibility to keep a current COI and endorsement page(s) on file with Knox County Procurement for as long as the Service Contract is in effect. (See Insurance Checklist)

j) The services being procured under this Service Contract are being funding by Federal Grant money. Array Education, Inc. will be required to adhere to Appendix C if this agreement in the performance of the services. (See Appendix C)

k) All modifications or amendments under this Service Contract must be routed through Knox County Procurement. No modification of or amendment to this Agreement shall be effective unless in writing signed by authorized representatives of both Parties.

l) This Agreement contains the entire understanding of the Parties with respect to the subject matter hereof and supersede all prior agreements and commitments with respect thereto. There are no other oral or written understandings, terms, or conditions, and neither Party has relied upon any representation, express or implied, not contained in this Agreement.

m) If any clause or subclause of this document is held to be invalid or unenforceable by any court of competent jurisdiction the other clauses and subclauses of this document remain in full force and effect.

n) Any communication or notice to the parties hereunder must be given by certified mail or e-mail and shall be effective 5 calendar days after the certified letter is deposited in the mails or, in case of e-mail, when actually received, and shall be sent as follows:

i. If to Customer, addressed to:

Lonsdale Elementary School
ATTN: William Smith, Principal
1505 Louisiana Avenue
Knoxville, TN 37921
William.smith@knoxschools.org

ii. If to TLAC, addressed to:

Array Education, Inc.
ATTN: Yvonne Chao, Partner
25 Broadway, 3rd Floor
New York, NY 10004
ychao@arrayeducation.org

It is agreed that this Contract, represents the **entire Contract** between the parties and no prior representations, promises, and agreements, oral or otherwise, not embodied herein, shall be of any force or effect.

In witness whereof, the parties hereto have caused this Contract to be executed in one original copy on the day and year last written.

WHEREAS, the Knox County Board of Education has determined the need for additions and renovations to Halls Middle School; and

WHEREAS, the Knox County Procurement Division conducted a competitive bid process for the construction of additions and renovations to Halls Middle School and it has been determined that Jenkins & Stiles, LLC submitted the lowest responsible and responsive bid to perform the work; and

WHEREAS, the proposed agreement with Jenkins & Stiles, LLC for the additions and renovations is in the amount of $13,122,000.00; and

WHEREAS, at its regularly scheduled meeting on August 7, 2025, the Knox County Board of Education approved the contract with Jenkins & Stiles, LLC for the construction of additions and renovations to Halls Middle School.

NOW THEREFORE BE IT RESOLVED BY THE COMMISSION OF KNOX COUNTY AS FOLLOWS:

The agreement with Jenkins & Stiles, LLC for the construction of additions and renovations to Halls Middle School is hereby adopted and approved in substantive form as presented this date, a copy of which is attached to this Resolution and incorporated herein by reference.

BE IT FURTHER RESOLVED, the agreement with Jenkins & Stiles, LLC for the construction of additions and renovations to Halls Middle School shall be executed subject to such amendment or action not affecting the substantive provisions of the contract as may be required and approved by the Knox County Law Director.

BE IT FURTHER RESOLVED, that if any notifications are to be made to effectuate this Resolution, then the County Clerk is hereby requested to forward a copy of this Resolution to the proper authority.

BE IT FURTHER RESOLVED, that this Resolution is to take effect from and after its passage, as provided by the Charter of Knox County, Tennessee, the public welfare requiring it.

EXHIBIT A INSURANCE AND BONDS

ARTICLE 1 THE CONTRACT DOCUMENTS

The Contract Documents consist of this Agreement, Conditions of the Contract (General, Supplementary, and other Conditions), Drawings, Specifications, Addenda issued prior to execution of this Agreement, other documents listed in this Agreement, and Modifications issued after execution of this Agreement, all of which form the Contract, and are as fully a part of the Contract as if attached to this Agreement or repeated herein. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations, or agreements, either written or oral. An enumeration of the Contract Documents, other than a Modification, appears in Article 9.

ARTICLE 2 THE WORK OF THIS CONTRACT

The Contractor shall fully execute the Work described in the Contract Documents, except as specifically indicated in the Contract Documents to be the responsibility of others.

ARTICLE 3 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION

§ 3.1 The date of commencement of the Work shall be:
(Check one of the following boxes.)

[ ] The date of this Agreement.

[X] A date set forth in a notice to proceed issued by the Owner.

[ ] Established as follows:
(Insert a date or a means to determine the date of commencement of the Work.)

If a date of commencement of the Work is not selected, then the date of commencement shall be the date of this Agreement.

§ 3.2 The Contract Time shall be measured from the date of commencement of the Work.

§ 3.3 Substantial Completion

§ 3.3.1 Subject to adjustments of the Contract Time as provided in the Contract Documents, the Contractor shall achieve Substantial Completion of the entire Work:
(Check one of the following boxes and complete the necessary information.)

[X] Not later than Six Hundred Sixty (660) calendar days from the date of commencement of the Work.

[ ] By the following date:

User Notes: (6876469072472a093a87f433)

§ 3.3.2 Subject to adjustments of the Contract Time as provided in the Contract Documents, if portions of the Work are to be completed prior to Substantial Completion of the entire Work, the Contractor shall achieve Substantial Completion of such portions by the following dates:

Portion of Work	Substantial Completion Date

§ 3.3.3 If the Contractor fails to achieve Substantial Completion as provided in this Section 3.3, liquidated damages, if any, shall be assessed as set forth in Section 4.5.

ARTICLE 4 CONTRACT SUM

§ 4.1 The Owner shall pay the Contractor the Contract Sum in current funds for the Contractor's performance of the Contract. The Contract Sum shall be Thirteen Million One Hundred and Twenty-Two Thousand Dollars and Zero Cents ($ 13,122,000.00), subject to additions and deductions as provided in the Contract Documents.

§ 4.2 Alternates

§ 4.2.1 Alternates, if any, included in the Contract Sum:

Item	Price
Alternate 1	$37,000.00
Alternate 3	$0.00

§ 4.2.2 Subject to the conditions noted below, the following alternates may be accepted by the Owner following execution of this Agreement. Upon acceptance, the Owner shall issue a Modification to this Agreement.
(Insert below each alternate and the conditions that must be met for the Owner to accept the alternate.)

Item	Price	Conditions for Acceptance
Not applicable		

§ 4.3 Allowances, if any, included in the Contract Sum:
(Identify each allowance.)

Item	Price
Allowance No. 1-Project Contingency	Lump sum of $500,000 to be used at the discretion of the Architect and Owner.
Allowance No. 2-Aid to Construction	Lump sum of $60,000 to be used for electrical aid-to-construction for the temporary and permanent power service provisions for the school. This does not include any fees from data service providers.

§ 4.4 Unit prices, if any:
(Identify the item and state the unit price and quantity limitations, if any, to which the unit price will be applicable.)

Item	Units and Limitations	Price per Unit ($0.00)
No. 1: Solid rock removal-open excavation		$150/cy ($37,500.00)
No. 2: Solid rock removal-trench excavation		$350/cy ($87,500.00)
No. 3: Mass excavation		$24/cy ($1,200.00)
No. 4: Geogrid		$4,500.00 /sy
No. 5: Flowable fill		$300/cy ($6,000.00)
No. 6: Structural soil fill		$38/cy ($7,600.00)
No. 7: Asphalt pavement		$80/cy
No. 8: Bi-directional amplifier system (BDA)		$2.28/sf ($63,280.00)

No. 9: Brick veneer	$1,200 per thousand brick

§ 4.5 Liquidated damages, if any:
(Insert terms and conditions for liquidated damages, if any.)

One thousand dollars and zero cents ($1,000.00) per calendar day.

§ 4.6 Other:
(Insert provisions for bonus or other incentives, if any, that might result in a change to the Contract Sum.)

Not applicable

ARTICLE 5 PAYMENTS

§ 5.1 Progress Payments

§ 5.1.1 Based upon Applications for Payment submitted to the Architect by the Contractor and Certificates for Payment issued by the Architect, the Owner shall make progress payments on account of the Contract Sum to the Contractor as provided below and elsewhere in the Contract Documents.

§ 5.1.2 The period covered by each Application for Payment shall be one calendar month ending on the last day of the month, or as follows:

Not applicable

§ 5.1.3 Provided that an Application for Payment is received by the Architect not later than the First day of a month, the Owner shall make payment of the amount certified to the Contractor not later than the Fifteenth day of the following month. If an Application for Payment is received by the Architect after the application date fixed above, payment of the amount certified shall be made by the Owner not later than Sixty (60) days after the Architect receives the Application for Payment.
(Federal, state or local laws may require payment within a certain period of time.)

§ 5.1.4 Each Application for Payment shall be based on the most recent schedule of values submitted by the Contractor in accordance with the Contract Documents. The schedule of values shall allocate the entire Contract Sum among the various portions of the Work. The schedule of values shall be prepared in such form, and supported by such data to substantiate its accuracy, as the Architect may require. This schedule of values shall be used as a basis for reviewing the Contractor's Applications for Payment.

§ 5.1.5 Applications for Payment shall show the percentage of completion of each portion of the Work as of the end of the period covered by the Application for Payment.

§ 5.1.6 In accordance with AIA Document A201™–2017, General Conditions of the Contract for Construction, and subject to other provisions of the Contract Documents, the amount of each progress payment shall be computed as follows:

§ 5.1.6.1 The amount of each progress payment shall first include:

.1 That portion of the Contract Sum properly allocable to completed Work;

.2 That portion of the Contract Sum properly allocable to materials and equipment delivered and suitably stored at the site for subsequent incorporation in the completed construction, or, if approved in advance by the Owner, suitably stored off the site at a location agreed upon in writing; and

.3 That portion of Construction Change Directives that the Architect determines, in the Architect's professional judgment, to be reasonably justified.

§ 5.1.6.2 The amount of each progress payment shall then be reduced by:

.1 The aggregate of any amounts previously paid by the Owner;

.2 The amount, if any, for Work that remains uncorrected and for which the Architect has previously withheld a Certificate for Payment as provided in Article 9 of AIA Document A201–2017;

.3 Any amount for which the Contractor does not intend to pay a Subcontractor or material supplier, unless the Work has been performed by others the Contractor intends to pay;

.4 For Work performed or defects discovered since the last payment application, any amount for which the

Architect may withhold payment, or nullify a Certificate of Payment in whole or in part, as provided in Article 9 of AIA Document A201–2017; and

.5 Retainage withheld pursuant to Section 5.1.7.

§ 5.1.7 Retainage

§ 5.1.7.1 For each progress payment made prior to Substantial Completion of the Work, the Owner may withhold the following amount, as retainage, from the payment otherwise due:
(Insert a percentage or amount to be withheld as retainage from each Application for Payment. The amount of retainage may be limited by governing law.)

Five percent (5%)

§ 5.1.7.1.1 The following items are not subject to retainage:
(Insert any items not subject to the withholding of retainage, such as general conditions, insurance, etc.)

Not applicable

§ 5.1.7.2 Reduction or limitation of retainage, if any, shall be as follows:
(If the retainage established in Section 5.1.7.1 is to be modified prior to Substantial Completion of the entire Work, including modifications for Substantial Completion of portions of the Work as provided in Section 3.3.2, insert provisions for such modifications.)

Not applicable

§ 5.1.7.3 Except as set forth in this Section 5.1.7.3, upon Substantial Completion of the Work, the Contractor may submit an Application for Payment that includes the retainage withheld from prior Applications for Payment pursuant to this Section 5.1.7. The Application for Payment submitted at Substantial Completion shall not include retainage as follows:
(Insert any other conditions for release of retainage upon Substantial Completion.)

Not applicable

§ 5.1.8 If final completion of the Work is materially delayed through no fault of the Contractor, the Owner shall pay the Contractor any additional amounts in accordance with Article 9 of AIA Document A201–2017.

§ 5.1.9 Except with the Owner's prior approval, the Contractor shall not make advance payments to suppliers for materials or equipment which have not been delivered and stored at the site.

§ 5.2 Final Payment

§ 5.2.1 Final payment, constituting the entire unpaid balance of the Contract Sum, shall be made by the Owner to the Contractor when

.1 the Contractor has fully performed the Contract except for the Contractor's responsibility to correct Work as provided in Article 12 of AIA Document A201–2017, and to satisfy other requirements, if any, which extend beyond final payment; and

.2 a final Certificate for Payment has been issued by the Architect.

§ 5.2.2 The Owner's final payment to the Contractor shall be made no later than 30 days after the issuance of the Architect's final Certificate for Payment, or as follows:

Not applicable

§ 5.3 Interest

Payments due and unpaid under the Contract shall bear interest from the date payment is due at the rate stated below, or in the absence thereof, at the legal rate prevailing from time to time at the place where the Project is located.
(Insert rate of interest agreed upon, if any.)

% per annum

ARTICLE 6 DISPUTE RESOLUTION

§ 6.1 Initial Decision Maker

The Architect will serve as the Initial Decision Maker pursuant to Article 15 of AIA Document A201–2017, unless the parties appoint below another individual, not a party to this Agreement, to serve as the Initial Decision Maker.
(If the parties mutually agree, insert the name, address and other contact information of the Initial Decision Maker, if other than the Architect.)

Not applicable

§ 6.2 Binding Dispute Resolution
For any Claim subject to, but not resolved by, mediation pursuant to Article 15 of AIA Document A201–2017, the method of binding dispute resolution shall be as follows:
(Check the appropriate box.)

[ ] Arbitration pursuant to Section 15.4 of AIA Document A201–2017

[X] Litigation in a court of competent jurisdiction

[ ] Other *(Specify)*

If the Owner and Contractor do not select a method of binding dispute resolution, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, Claims will be resolved by litigation in a court of competent jurisdiction.

ARTICLE 7 TERMINATION OR SUSPENSION
§ 7.1 The Contract may be terminated by the Owner or the Contractor as provided in Article 14 of AIA Document A201–2017.

§ 7.1.1 If the Contract is terminated for the Owner's convenience in accordance with Article 14 of AIA Document A201–2017, then the Owner shall pay the Contractor a termination fee as follows:
(Insert the amount of, or method for determining, the fee, if any, payable to the Contractor following a termination for the Owner's convenience.)

Not applicable

§ 7.2 The Work may be suspended by the Owner as provided in Article 14 of AIA Document A201–2017.

ARTICLE 8 MISCELLANEOUS PROVISIONS
§ 8.1 Where reference is made in this Agreement to a provision of AIA Document A201–2017 or another Contract Document, the reference refers to that provision as amended or supplemented by other provisions of the Contract Documents.

§ 8.2 The Owner's representative:
(Name, address, email address, and other information)

Douglas Shover, Executive Director
Facilities and New Construction Department
505 Summer Plance - UTT 2nd floor, Room 281H
Knoxville, TN 37902
douglas.shover@knoxschools.org

§ 8.3 The Contractor's representative:
(Name, address, email address, and other information)

W. Bart Jenkins
Jenkins & Stiles LLC
10617 Deerbrook Drive
Knoxville, TN 37922

WHEREAS, Knox County Schools desires to enter into a Voice Terms and Conditions with United Data Technologies, Inc. through a TIPS Cooperative Contract for the provision of voice-over-IP telephone services; and

WHEREAS, the agreement with United Data Technologies, Inc. sets forth the terms and conditions under which the voice-over-IP telephone services will be provided; and

WHEREAS, at its regularly scheduled meeting on August 7, 2025, the Knox County Board of Education approved the Voice Terms and Conditions with United Data Technologies, Inc. at an approximate annual cost of $415,000.00.

NOW THEREFORE BE IT RESOLVED BY THE COMMISSION OF KNOX COUNTY AS FOLLOWS:

The Voice Terms and Conditions with United Data Technologies, Inc. for the provision of voice-over-IP telephone services is hereby adopted and approved in substantive form as presented this date, a copy of which is attached to this Resolution and incorporated herein by reference.

BE IT FURTHER RESOLVED, the Voice Terms and Conditions with United Data Technologies, Inc. for the provision of voice-over-IP telephone services shall be executed subject to such amendment or action not affecting the substantive provisions of the agreement as may be required and approved by the Knox County Law Director.

BE IT FURTHER RESOLVED, that if any notifications are to be made to effectuate this Resolution, then the County Clerk is hereby requested to forward a copy of this Resolution to the proper authority.

BE IT FURTHER RESOLVED, that this Resolution is to take effect from and after its passage, as provided by the Charter of Knox County, Tennessee, the public welfare requiring it.

Voice Terms and Conditions

Customer Name: Knox County Schools **("Customer")**

These Voice Terms and Conditions ("Voice Terms") apply to any voice service offering (the "Voice Service(s)") ordered by Customer from United Data Technologies, Inc. ("UDT") in accordance with the TIPS 230105 Contract Technology Solutions Products Services ("MSA") between the parties, and are effective as of the date of the last signature hereto (the "Effective Date"). Customer's purchase and/or use of the Voice Services constitutes acceptance and agreement to these Voice Terms. In the event of conflict between the MSA and these Voice Terms, these Voice Terms shall govern.

1. Voice Services. Following acceptance by UDT of customer's written order for the Voice Service(s) (the "Voice Service Order(s)") UDT shall provide Customer with the Voice Services specifically identified in the Voice Service Order(s) for the term identified therein (the "Voice Service Term"). Customer is responsible for all use of the Voice Services throughout the Voice Service Term, whether or not authorized by Customer.

2. Pricing. Pricing for the Voice Service(s) shall be as stated in the Customer's order at the time the order is placed. Any such pricing is exclusive of taxes, surcharges, assessments, or other governmental or regulatory fees. Offered pricing may not be combined with any other offer except as provided herein. Discounts, if applicable, shall not apply to taxes, surcharges, assessments, or other fees (including, but not limited to promotional credits, installation charges, nonrecurring charges, special construction or CPE charges, pass-through charges, access and port charges, municipal and franchise fees, governmental and regulatory surcharges and assessments, line recovery charges, interexchange access charges, or E-911 fees). Unless otherwise expressly stated in writing by UDT, any new Voice Services added by Customer under the MSA and these Voice Terms following the initial Voice Service Order will reflect UDT's rates that are in effect at the time the new Voice Services are ordered. The new rates will only apply to newly-added Voice Services unless Customer executes a new Voice Service Order for all Voice Services or is otherwise indicated by UDT in a revised sales quote. UDT reserves the right to adjust Customer pricing following upon thirty (30) days' written notice to Customer.

In the event that Customer terminates the Voices Service(s) prior to the end of the Voice Service Term, Customer may be required to pay UDT an early termination charge equal to the remaining monthly recurring charges for the Voice Service(s) for the duration of the Voice Service Term.

The following services have a per usage charge and/or may be restricted/blocked as described below and in more complete detail in UDT's quote, the MSA, or official pricing catalogs:

- 900/976 numbers – Customer acknowledges by signing this agreement that UDT has informed Customer that the Voice Services do not permit calls to 900/976 numbers or other pay-per-call services.
- Directory Assistance – Customer acknowledges that UDT has informed Customer that calls to Directory Assistance (411, 1-XXX-555-1212 or similar) will incur a charge of $2.00 per call or as otherwise indicated in UDT's pricing, as updated. Customer may request that access to Directory Assistance numbers be blocked.
- International calls – Customer acknowledges that UDT has informed Customer that international calls and calls outside the continental United States are not included in the Voice Services and will incur a per call charge based on UDT's then applicable per country rates. International calling is blocked by default. Customer may request that international calling be enabled on a per extension basis and Customer agrees to pay per-call charges for each international call.
- Operator-Assisted calls – Customer acknowledges that UDT has informed Customer that Operator-Assisted calls, such as Operator-Assisted Person-to-Person calls, Operator-Assisted Collect calls, Third Party Billed Calls, and Operator-Assisted Dialing, are not supported on UDT's Voice services.

3. Maintenance and Location. Voice Services may be temporarily unavailable or limited because of capacity limitations and may be temporarily interrupted because of equipment modifications, routine maintenance, upgrades, relocations, repairs, and similar activities. UDT will use commercially reasonable efforts to notify Customer of any scheduled maintenance, but may need to interrupt Voice Services without notice or compensation to Customer. UDT operates and maintains Voice Services up to the demarcation point at the Customer premises only.

4. Disconnection.

At the end of a Voice Service Term, UDT may, in its sole discretion, release to Customer's new service provider the telephone number used in connection with Customer's Voice Service if:

- Such new service provider is able to accept such number;
- Customer's account has been properly disconnected;
- Customer requests the transfer upon disconnecting Customer's account.

5. Installation. Once UDT schedules installation and agrees upon an installation time with Customer, Customer must be present with facilities available and fully accessible. If UDT's technician arrives at the location and Customer is not present or facilities are not available or accessible by UDT's technician or Customer otherwise cancels or postpones installation without a 24-hour notice to UDT, UDT reserves the right to assess a "Customer Missed Call" trip charge of one hundred dollars ($100) per missed site visit.

Customer is responsible for any local area network upgrades necessary to establish and continue service. Customer may have to increase the amount of Internet connectivity purchased to accommodate increasing voice, data and other IP traffic.

Customer's first invoice from UDT may include charges for a partial month of Voice Service. After the initial billing cycle, Customer's invoice will include charges for one month of Voice Service for all requested Voice Services, including any usage charges. Customer should receive a final invoice from its existing local, long distance, and/or data service provider(s) that UDT is replacing. Customer will be responsible for paying any charges resulting from the early termination of a service contract with Customer's existing provider(s), if applicable. Customer may have a refund coming from existing providers, so Customer should open all correspondence received. UDT will handle communication with Customer's existing provider(s) regarding the porting of some or all of your existing telephone numbers to UDT, based on the scope of services UDT is to deliver; however, Customer is responsible for requesting that existing services be disconnected from your current provider once service has been migrated to UDT. UDT can provide sample disconnect language, upon request.

UDT Voice Services are capable of being deployed across various vendor specific LAN switching infrastructure. UDT offers consulting hours to assist with any initial configuration of that LAN switching hardware for UDT Voice Services should Customer need assistance. Any such consulting will be in accordance with the terms set forth in the applicable order form. UDT does not offer long-term support for LAN switching infrastructure, and recommends Customer secure long-term support contracts with vendors who are knowledgeable about Customer's particular LAN equipment.

7. 9-1-1 Dialing Feature. Included in the Voice Services provided to Customer by UDT is a 9-1-1 Dialing Feature that has certain limitations as compared to a traditional telephonic 9-1-1 dialing. Customer acknowledges that the Customer has certain obligations in connection with the provisioning of the 9-1-1 Dialing Feature. Customer acknowledges and agrees that it is Customer's responsibility and obligation, prior to initiating any of the Voice Services, to comply with the following:

i. Registered Location. Customer is required to provide to UDT, prior to initiation of the service, the physical location at which the service will be utilized ("Registered Location"). UDT relies on your Registered Location to route your 9-1-1 call to the closest emergency responders; and
ii. Acknowledgement of 911 service. Customer is required to sign and acknowledge 911 service included as part of this agreement.

Customer is required to update Registered Location(s) each time you move a device to a different location. Updates can be made via the Administrative/User Portal, directly on your app (where available), or by calling support. Customer may also contact via phone (800-882-9919) or email (UDTNOCSupport@udtonline.com) if Customer needs to update one or more Registered Locations. Your 9-1-1 call may not be routed to the closest emergency response center (PSAP) if UDT does not know your current location. Emergency response centers may not be able to transfer your call to a center in a different region.

Certain events beyond our control may prevent you from reaching emergency services. These include:

- If you have an Internet or power outage.
- If your broadband, ISP, or IP telephony services are suspended or terminated.

- If you are located in a country other than the one in which your VoIP service is provided. For example, if you have a US line and travel to the UK, you will not be able to reach the UK emergency services number.
- If there is network congestion that may delay or prevent completion of any call to emergency services.

Disclaimer of Liability

Your use, and use by your employees, guests and other third parties of our 9-1-1 Dialing Feature are subject to the limitations described herein. The availability of certain features, such as transmission of your location or a call back number, depends on whether local emergency response centers support those features and other factors outside of UDT's control. UDT relies on qualified third parties to assist us in routing emergency service calls. UDT does not have control over local emergency response centers, emergency calling centers, emergency responders, or other third parties.

UDT disclaims all responsibility for the conduct of emergency response centers and all third parties involved in the provision of emergency response services. To the extent permitted by applicable law, you hereby release, discharge, and hold us harmless from and against any and all liability relating to or arising from any acts or omissions of such third parties or other third parties involved in the handling of or response to any emergency or emergency call.

You agree to indemnify and hold us and any of our third-party provider(s) harmless from any and all third-party claims, losses, damages, fines, or penalties arising out of: (i) you or your users' provision of incorrect information, including incorrect addresses, or failure to update your or users' locations consistent with this policy and applicable law; (ii) your failure to properly notify any person who may place calls using the emergency calling services of the emergency calling limitations; (iii) the absence, failure, or outage of emergency service dialing using the Voice Services for any reason; and (iv) the inability of any user to be able to dial emergency services or to access emergency service personnel for any reason.

8. Voice Recording and Music Content.

UDT may provide Customer with the ability to record voice calls placed via the Voice Services. Customer is solely responsible for notifying those using the Services that the calls may be recorded and complying with all applicable laws and regulations regarding notifications required for the recording of any voice conversations. . Customer will indemnify, defend, and hold harmless UDT for any claims, damages, liabilities or costs (including reasonable attorneys' fees) arising from a claim resulting from the recording by Customer of any voice conversations on the Voice Services.

Customer is responsible for any legal obligations and costs, including without limitation, any royalties, related to music content or similar content they upload for use with the music on hold feature as part of the Voice Services.

9. Protection of Customer Premises Equipment Provided By UDT ("CPE"). The Customer shall be solely responsible and liable for any and all damage caused to CPE provided by UDT, including, without limitation, any damage due to misuse, vandalism, and power surges, for the duration of the contract. At the expiration of the term of the contract or upon its early termination by either party, the Customer shall continue to be solely responsible and liable for any and all damage caused to the CPE while such equipment remains at the Customer location. Customer will provide reasonable space and environmental conditions for any CPE, will do nothing to change the space or conditions without notice to UDT and will at no time, move, adjust, alter or otherwise operate the CPE without prior consent of UDT. Customer will not attach any equipment to any CPE without express consent of UDT or utilize the CPE in anyway inconsistent with the service purchased from UDT.

10. Applicable Law. Customer may not use the Voice Services in violation of any applicable law or regulation applicable to the Voice Services. These services are intended for regular business use between individuals and not for high-volume commercial call center calling. The Voice Services may not be used to perform auto-dialing or predictive dialing, or to forward your phone number to other phone numbers that handle multiple simultaneous calls. These Voice Terms and any Voice Service Orders are subject to applicable law. In the event a governmental agency determines these Voice Terms or a Voice Service Order or any portion hereof violates any law, rule or regulation, UDT shall have the option of terminating the Voice Service Order without further obligation or revising these Voice Terms or a Voice Service Order to comply with such law, rule or regulation. If any portion of these Voice Terms or a Voice Service Order is determined to be invalid or unenforceable, the remainder of these Voice Terms and the Voice Service Order shall remain in full force and effect.

11. Changes in Laws and Government Regulations. These Voice Terms are based on the laws and government regulations in effect at the Effective Date. Subsequent changes in any applicable laws or regulations may result in pricing changes or service changes that will automatically become a part of this Agreement.

12. Customer Proprietary Network Information ("CPNI"). CPNI is information made available to us solely by virtue of our relationship with you that relates to the type, quantity, destination, technical configuration, location, and amount of use of the telecommunications and interconnected VoIP services you purchase from us, as well as related billing information. The protection of your information is important to us, and you have a right, and we have a duty, under federal law, to protect the confidentiality of your CPNI.

13. Entire Agreement. The MSA, these Voice Terms, and any Voice Service Orders, and their Attachments, including any incorporated terms and rates, constitute the entire agreement of UDT and Customer for the provision of Voice Services and shall be a binding contract between them. These Voice Terms hereby incorporate the LOA, terms of service and policies, including Acceptable Use and Privacy policies, listed on UDT's website at www.udtonline.com (collectively referred to as the "Voice Terms of Voice Service"). The Voice Terms of Voice Service, as such documents may be updated from time to time, are an integral part of UDT's agreement with Customer. These Voice Terms supersede all prior discussions and agreements, whether oral or written, regarding the subject matter herein. By signing below, the signer certifies that he or she is at least 18 years of age and authorized to execute these Voice Terms on behalf of Customer for the Voice Services requested.

TIPS VENDOR AGREEMENT

TIPS RFP 230105 Technology Solutions, Products, and Services

The following Vendor Agreement ("Agreement") creates a legal agreement between The Interlocal Purchasing System ("TIPS"), a government purchasing cooperative and Department of Texas Region 8 Education Service Center and (INSERT ENTITY NAME):

United Data Technologies, Inc. dba UDT

(ENTER ENTITY NAME]

its owners, agents, subsidiaries, and affiliates (together, "Vendor") (individually, "Party", and collectively the "Parties") and this agreement shall exclusively govern the contractual relationship ("Agreement") between the Parties.

TIPS, a governmental entity and a national purchasing cooperative seeks to provide a valuable and necessary solution to public entities and qualifying non-profits by performing the public procurement solicitation process and awarding compliant contracts to qualified vendors. Then, where the law of a customer's jurisdiction allows, instead of public entities and qualifying non-profits expending time, money, and resources on the extensive public procurement process, the use of TIPS allows public entities to quickly select and purchase their preferred products or services from qualified, competitively evaluated vendors through cooperative purchasing.

1. **Purpose.** The purpose of this Agreement is to identify the terms and conditions of the relationship between TIPS and Vendor. Public entities and qualifying non-profits that properly join or utilize TIPS "(TIPS Members") may elect to "piggyback" off of TIPS' procurements and agreements where the laws of their jurisdiction allow. TIPS Members are not contractual parties to this Agreement although terms and conditions of this Agreement may ensure benefits to TIPS Members.

2. **Authority.** The Parties agree that the signatories below are individual authorized to enter into this Agreement on behalf of their entity and that they are acting under due and proper authority under applicable law.

3. **Definitions.**

    a. **TIPS Pricing:** The specific pricing, discounts, and other pricing terms and incentives which Vendor submitted and TIPS approved for each respective TIPS Contract awarded to Vendor and all permissible, subsequent pricing updates submitted by Vendor and accepted by TIPS, if any.

    b. **Authorized Reseller:** A reseller or dealer authorized and added by a Vendor through their online TIPS Vendor Portal to make TIPS sales according to the terms and conditions herein.

4. **Entire Agreement.** This Agreement resulted from TIPS posting a "TIPS Solicitation" (RFP, RCSP, RFQ, or other) and Vendor submitting a proposal in response to that posted TIPS Solicitation for evaluation and award. The Parties agree that this Agreement consists of the provisions set forth herein and: (1) The TIPS solicitation document resulting in this Agreement; (2) Any addenda or clarifications issued in relation to the TIPS solicitation; (3) All solicitation information provided to Vendor by TIPS through the TIPS eBid System; (3) Vendor's entire proposal response to the TIPS solicitation including all accepted required attachments, acknowledged notices and certifications, accepted negotiated terms, pricing, accepted responses to questions, and accepted written clarifications of Vendor's proposal, and; any properly included attachments to this Agreement. All documentation and information listed is hereby incorporated by reference as if set forth herein verbatim. In the event of conflict between the terms herein and one of the incorporated documents the terms and conditions herein shall control.

5. **Vendor's Specific Warranties, Terms, and License Agreements.** Because TIPS serves public entities and non-profits throughout the nation all of which are subject to specific laws and policies of their jurisdiction, as a matter of standard practice, TIPS does not typically accept a Vendor's specific "Sale Terms" (warranties, license agreements, master agreements, terms and conditions, etc.) on behalf of all TIPS Members. TIPS may permit Vendor to attach those to this Agreement to display to interested customers what terms may apply to their Supplemental Agreement with Vendor (if submitted by Vendor for that purpose). However, unless this term of the Agreement is negotiated and modified to state otherwise, those specific Sale Terms are not accepted by TIPS on behalf of all TIPS Members and each Member may choose whether to accept, negotiate, or reject those specific Sale Terms, which must be reflected in a separate agreement between Vendor and the Member in order to be effective.

6. **Vendor Identity and Contact Information.** It is Vendor's sole responsibility to ensure that all identifying vendor information (name, EIN, d/b/a's, etc.) and contact information is updated and current at all times within the TIPS eBid System and the TIPS Vendor Portal. It is Vendor's sole responsibility to confirm that all e-correspondence issued from tips-usa.com, ionwave.net, and tipsconstruction.com to Vendor's contacts are received and are not blocked by firewall or other technology security. Failure to permit receipt of correspondence from these domains and failure to keep vendor identity and contact information current at all times during the life of the contract may cause loss of TIPS Sales, accumulating TIPS fees, missed rebid opportunities, lapse of TIPS Contract(s), and unnecessary collection or legal actions against Vendor. It is no defense to any of the foregoing or any breach of this Agreement that Vendor was not receiving TIPS' electronic communications issued by TIPS to Vendor's listed contacts.

7. **Initiation of TIPS Sales.** When a public entity initiates a purchase with Vendor, if the Member inquires verbally or in writing whether Vendor holds a TIPS Contract, it is the duty of the Vendor to verify whether the Member is seeking a TIPS purchase. Once verified, Vendor must include the TIPS Contract Number on all purchase communications and sales documents exchanged with the TIPS Member.

8. **TIPS Sales and Supplemental Agreements.** The terms of the specific TIPS order, including but not limited to: shipping, freight, insurance, delivery, fees, bonding, cost, delivery expectations and location, returns, refunds, terms, conditions, cancellations, order assistance, etc., shall be controlled by the purchase agreement (Purchase Order, Contract, Invoice, etc.) (hereinafter "Supplemental Agreement") entered into between the TIPS Member Customer and Vendor only. TIPS is not a party to any Supplemental Agreement. All Supplemental Agreements shall include Vendor's Name, as known to TIPS, and TIPS Contract Name and Number. Vendor accepts and understands that TIPS is not a legal party to TIPS Sales and Vendor is solely responsible for identifying fraud, mistakes, unacceptable terms, or misrepresentations for the specific order prior to accepting. Vendor agrees that any order issued from a customer to Vendor, even when processed through TIPS, constitutes a legal contract between the customer and Vendor only. When Vendor accepts or fulfills an order, even when processed through TIPS, Vendor is representing that Vendor has carefully reviewed the order for legality, authenticity, and accuracy and TIPS shall not be liable or responsible for the same. In the event of a conflict between the terms of this TIPS Vendor Agreement and those contained in any Supplemental Agreement, the provisions set forth herein shall control unless otherwise agreed to and authorized by the Parties in writing within the Supplemental Agreement.

9. **Right of Refusal.** Vendor has the right not to sell to a TIPS Member under the awarded agreement at Vendor's discretion unless otherwise required by law.

10. **Reporting TIPS Sales**. Vendor must report all TIPS Sales to TIPS. If a TIPS sale is initiated by Vendor receiving a TIPS Member's purchase order from TIPS directly, Vendor may consider that specific TIPS Sale reported. Otherwise, with the exception of TIPS Automated Vendors, who have signed an exclusive agreement with TIPS regarding reporting, all TIPS Sales must be reported to TIPS by either: (1) Emailing the purchase order or similar purchase document (with Vendor's Name, as known to TIPS, and the TIPS Contract Name and Number included) to TIPS at tipspo@tips-usa.com with "Confirmation Only" in the subject line of the email within three business days of Vendor's acceptance of the order, or; (2) Within 3 business days of the order being accepted by Vendor, Vendor must login to the TIPS Vendor Portal and successfully self-report all necessary sale information within the Vendor Portal and confirm that it shows up accurately on your current Vendor Portal statement. No other method of reporting is acceptable unless agreed to by the Parties in writing. Failure to report all sales pursuant to this provision may result in immediate cancellation of Vendor's TIPS Contract(s) for cause at TIPS' sole discretion. Please refer to the TIPS Accounting FAQ's for more information about reporting sales and if you have further questions, contact the Accounting Team at accounting@tips-usa.com.

11. **TIPS Administration Fees.** The collection of administrative fees by TIPS, a government entity, for performance of these procurement services is required pursuant to Texas Government Code Section 791.011 et. seq. The administration fee ("TIPS Administration Fee") is the amount legally owed by Vendor to TIPS for TIPS Sales made by Vendor. The TIPS Administration Fee amount is typically a set percentage of the amount paid by the TIPS Member for each TIPS Sale, less shipping cost, bond cost, and taxes if applicable and identifiable, which is legally due to TIPS, but the exact TIPS Administration Fee for this Contract is published in the corresponding solicitation and is incorporated herein by reference. TIPS Administration Fees are due to TIPS immediately upon Vendor's receipt of payment, including partial payment, for a TIPS Sale. The TIPS Administration Fee is assessed on the amount paid by the TIPS Member, not on the Vendor's cost or on the amount for which the Vendor sold the item to a dealer or Authorized Reseller. Upon receipt of payment for a TIPS Sale, including partial payment (which renders TIPS Administration Fees immediately due), Vendor shall issue to TIPS the corresponding TIPS Administration Fee payment as soon as possible but not later than thirty-one calendar days following Vendor's receipt of payment. Vendor shall pay TIPS via check unless otherwise agreed to by the Parties in writing. Vendor shall include clear documentation with the issued payment dictating to which sale(s) the amount should be applied. Vendor may create a payment report within their TIPS Vendor Portal which is the preferred documentation dictating to which TIPS Sale(s) the amount should be applied. Failure to pay all TIPS Administration Fees pursuant to this provision may result in immediate cancellation of Vendor's TIPS Contract(s) for cause at TIPS' sole discretion as well as the initiation of collection and legal actions by TIPS against Vendor to the extent permitted by law. Any overpayment of participation fees to TIPS by Vendor will be refunded to the Vendor

within ninety (90) days of receipt of notification if TIPS receives written notification of the overpayment not later than the expiration of six (6) months from the date of overpayment and TIPS determines that the amount was not legally due to TIPS pursuant to this agreement and applicable law. Any notification of overpayment received by TIPS after the expiration of six (6) months from the date that TIPS received the payment will render the overpayment non-refundable. Region 8 ESC and TIPS reserve the right to extend the six (6) month deadline if approved by the Region 8 ESC Board of Directors. TIPS reserves all rights under the law to collect TIPS Administration Fees due to TIPS pursuant to this Agreement.

12. **Term of the Agreement.** This Agreement with TIPS is for approximately five years with a one-year, consecutive option for renewal as described herein. Renewal options are not automatic and shall only be effective if offered by TIPS at its sole discretion. If TIPS offers a renewal option, the Vendor will be notified via email issued to Vendor's then-listed Primary Contact. The renewal option shall be deemed accepted by Vendor unless Vendor notifies TIPS of its objection to the renewal option in writing and confirms receipt by TIPS.

    Actual Effective Date: Agreement is effective upon signature by authorized representatives of both Parties. The Effective Date does not affect the "Term Calculation Start Date."

    Term Calculation Start Date: To keep the contract term consistent for all vendors awarded under a single TIPS contract, Vendor shall calculate the foregoing term as starting on the last day of the month that "Award Notifications" are anticipated as published in the Solicitation, regardless of the actual Effective Date.

    Example of Term Calculation Start Date: If the anticipated "Award Date" published in the Solicitation is May 22, 2023, but extended negotiations delay award until June 27, 2023 (Actual Effective Date), the Term Calculation Start Date shall be May 31, 2023 in this example.

    Contract Expiration Date: To keep the contract term consistent for all vendors awarded under a single TIPS contract, the term expiration date shall be five-years from the Term Calculation Start Date.

    Example of Contract Expiration Date: If the anticipated "Award Date" published in the Solicitation is May 22, 2023, but extended negotiations delay award until June 27, 2023 (Actual Effective Date), the Term Calculation Start Date shall be May 31, 2023 and the Contract Expiration Date of the resulting initial "five-year" term, (which is subject to an extension(s)) will be May 31, 2028 in this example.

    Option(s) for Renewal: Any option(s) for renewal shall begin on the Contract Expiration Date, or the date of the expiration of the prior renewal term where applicable, and continue for the duration specified for the renewal option herein.

    Example of Option(s) for Renewal: In this example, if TIPS offers a one-year renewal and the Contract Expiration Date is May 31, 2028, then the one-year renewal is effective from May 31, 2028 to May 31, 2029.

    TIPS may offer to extend Vendor Agreements to the fullest extent the TIPS Solicitation resulting in this Agreement permits.

13. **TIPS Pricing.** Vendor agrees and understands that for each TIPS Contract that it holds, Vendor submitted, agreed to, and received TIPS' approval for specific pricing, discounts, and other pricing terms and incentives which make up Vendor's TIPS Pricing for that TIPS Contract ("TIPS Pricing"). Vendor confirms that Vendor will not add the TIPS Administration Fee as a charge or line-item in a TIPS Sale. Vendor hereby certifies that Vendor shall only offer goods and services through this TIPS Contract if those goods and services are included in or added to Vendor's TIPS Pricing and approved by TIPS. TIPS reserves the right to review Vendor's pricing update requests as specifically as line-item by line-item to determine compliance. However, Vendor contractually agrees that all submitted pricing updates shall be within the original terms of the Vendor's TIPS Pricing (scope, proposed discounts, price increase limitations, and other pricing terms and incentives originally proposed by Vendor) such that TIPS may accept Vendors price increase requests as submitted without additional vetting at TIPS discretion. Any pricing quoted by Vendor to a TIPS Member or on a TIPS Quote shall never exceed Vendor's TIPS Pricing for any good or service offered through TIPS. Vendor certifies by signing this agreement that Vendor's TIPS Pricing for all goods and services included in Vendor's TIPS Pricing shall either be equal to or less than Vendor's current pricing for that good or service for any other customer. TIPS Pricing price increases and modifications, if permitted, will be honored according to the terms of the solicitation and Vendor's proposal, incorporated herein by reference.

14. **Indemnification of TIPS.** **VENDOR AGREES TO INDEMNIFY, HOLD HARMLESS, AND DEFEND TIPS, TIPS MEMBERS, TIPS OFFICERS, TIPS EMPLOYEES, TIPS DIRECTORS, AND TIPS TRUSTEES (THE "TIPS INDEMNITEES") FROM AND AGAINST ALL CLAIMS AND SUITS BY THIRD-PARTIES FOR DAMAGES, INJURIES TO PERSONS (INCLUDING DEATH), PROPERTY DAMAGES, LOSSES, EXPENSES, FEES, INCLUDING COURT COSTS, ATTORNEY'S FEES, AND EXPERT FEES, ARISING OUT OF OR RELATING TO VENDOR'S PERFORMANCE UNDER THIS AGREEMENT (INCLUDING THE PERFORMANCE OF VENDOR'S OFFICERS, EMPLOYEES, AGENTS, AUTHORIZED RESELLERS, SUBCONTRACTORS, LICENSEES, OR INVITEES), REGARDLESS OF THE NATURE OF THE CAUSE OF ACTION,**

INCLUDING WITHOUT LIMITATION CAUSES OF ACTION BASED UPON COMMON, CONSTITUTIONAL, OR STATUTORY LAW OR BASED IN WHOLE OR IN PART UPON ALLEGATIONS OF NEGLIGENT OR INTENTIONAL ACTS OR OMISSIONS ON THE PART OF VENDOR, ITS OFFICERS, EMPLOYEES, AGENTS, AUTHORIZED RESELLERS, SUBCONTRACTORS, LICENSEES, OR INVITEES. NO LIMITATION OF LIABILITY FOR DAMAGES FOR PERSONAL INJURY OR PROPERTY DAMAGE ARE PERMITTED OR AGREED TO BY TIPS. APART FROM THIS INDEMNIFICATION PROVISION REQUIRING INDEMNIFICATION OF THE TIPS INDEMNITEES' ATTORNEY'S FEES AS SET FORTH ABOVE, RECOVERY OF ATTORNEYS' FEES BY THE PREVAILING PARTY IS AUTHORIZED ONLY IF AUTHORIZED BY TEX. EDUC. CODE § 44.032(F).

15. **Indemnification and Assumption of Risk – Vendor Data.** VENDOR AGREES THAT IT IS VOLUNTARILY PROVIDING DATA (INCLUDING BUT NOT LIMITED TO: VENDOR INFORMATION, VENDOR DOCUMENTATION, VENDOR'S PROPOSALS, VENDOR PRICING SUBMITTED OR PROVIDED TO TIPS, TIPS CONTRACT DOCUMENTS, TIPS CORRESPONDENCE, VENDOR LOGOS AND IMAGES, VENDOR'S CONTACT INFORMATION, VENDOR'S BROCHURES AND COMMERCIAL INFORMATION, VENDOR'S FINANCIAL INFORMATION, VENDOR'S CERTIFICATIONS, AND ANY OTHER VENDOR INFORMATION OR DOCUMENTATION, INCLUDING WITHOUT LIMITATION SOFTWARE AND SOURCE CODE UTILIZED BY VENDOR, SUBMITTED TO TIPS BY VENDOR AND ITS AGENTS) ("VENDOR DATA") TO TIPS. FOR THE SAKE OF CLARITY, AND WITHOUT LIMITING THE BREADTH OF THE INDEMNITY OBLIGATIONS IN SECTION 13 ABOVE, VENDOR AGREES TO PROTECT, INDEMNIFY, AND HOLD THE TIPS INDEMNITEES HARMLESS FROM AND AGAINST ANY AND ALL LOSSES, CLAIMS, ACTIONS, DEMANDS, ALLEGATIONS, SUITS, JUDGMENTS, COSTS, EXPENSES, FEES, INCLUDING COURT COSTS, ATTORNEY'S FEES, AND EXPERT FEES AND ALL OTHER LIABILITY OF ANY NATURE WHATSOEVER ARISING OUT OF OR RELATING TO: (I) ANY UNAUTHORIZED, NEGLIGENT OR WRONGFUL USE OF, OR CYBER DATA BREACH INCIDENT AND VIRUSES OR OTHER CORRUPTING AGENTS INVOLVING, VENDOR'S DATA, PRICING, AND INFORMATION, COMPUTERS, OR OTHER HARDWARE OR SOFTWARE SYSTEMS, AND; (II) ALLEGATIONS OR CLAIMS THAT ANY VENDOR DATA INFRINGES ON THE INTELLECTUAL PROPERTY RIGHTS OF A THIRD-PARTY OR VENDOR.

16. **Procedures Related to Indemnification.** In the event that an indemnity obligation arises, Vendor shall pay all amounts set forth in Section 13 and 14 above (including any settlements) and – if it has accepted its indemnity obligation without qualification – control the legal defense to such claim or cause of action, including without limitation attorney selection, strategy, discovery, trial, appeal, and settlement, and TIPS shall, at Vendor's cost and expense (with respect to reasonable out of pocket costs and expenses incurred by TIPS which shall be reimbursed to TIPS by Vendor), provide all commercially reasonable assistance requested by Vendor. In controlling any defense, Vendor shall ensure that all assertions of governmental immunity and all applicable pleas and defenses shall be promptly asserted.

17. **Indemnity for Underlying Sales and Supplemental Agreements.** Vendor shall be solely responsible for any customer claims or any disputes arising out of TIPS Sales or any Supplemental Agreement as if sold in the open-market. The Parties agree that TIPS shall not be liable for any claims arising out of Vendor's TIPS Sales or Supplemental Agreements, including but not limited to: allegations of product defect or insufficiency, allegations of service defect or insufficiency, allegations regarding delivery defect or insufficiency, allegations of fraud or misrepresentation, allegations regarding pricing or amounts owed for TIPS sales, and/or allegations regarding payment, over-payment, under-payment, or non-payment for TIPS Sales. Payment/Drafting, overpayment/over-drafting, under-payment/under-drafting, or non-payment for TIPS Sales between customer and Vendor and inspections, rejections, or acceptance of such purchases shall be the exclusive respective obligations of Vendor/Customer, and disputes shall be handled in accordance with the terms of the underlying Supplemental Agreement(s) entered into between Vendor and Customer. Vendor acknowledges that TIPS is not a dealer, subcontractor, agent, or reseller of Vendor's goods and services and shall not be responsible for any claims arising out of alleged insufficiencies or defects in Vendor's goods and services, should any arise.

18. **Confidentiality of Vendor Data.** Vendor understands and agrees that by signing this Agreement, all Vendor Data is hereby released to TIPS, TIPS Members, and TIPS third-party administrators to effectuate Vendor's TIPS Contract except as provided for herein. The Parties agree that Vendor Data is accessible by all TIPS Members as if submitted directly to that TIPS Member Customer for purchase consideration. If Vendor otherwise considers any portion of Vendor's Data to be confidential and not subject to public disclosure pursuant to Chapter 552 Texas Gov't Code (the "Public Information Act") or other law(s) and orders, Vendor must have identified the claimed confidential materials through proper execution of the Confidentiality Claim Form which is required to be submitted as part of Vendor's proposal resulting in this Agreement and incorporated by reference. The Confidentiality Claim Form included in Vendor's proposal and incorporated herein by reference is the sole indicator of whether Vendor considers any Vendor Data confidential in the event TIPS receives a Public Information Request. If TIPS receives a request, any responsive documentation not deemed confidential by you in this manner will be automatically released. For Vendor Data deemed confidential by you in this manner, TIPS will follow procedures of controlling statute(s) regarding any claim of confidentiality and shall not be liable for any release of information required by law, including Attorney General determination and opinion. In the event that TIPS receives a written request for information pursuant to the Public Information Act that affects Vendor's interest in any information or data furnished to TIPS by Vendor, and TIPS requests an opinion from the Attorney General, Vendor may, at its own option and expense, prepare comments and submit information directly to the Attorney General stating why the requested information is exempt from disclosure pursuant to the requirements of the

Public Information Act. Vendor is solely responsible for submitting the memorandum brief and information to the Attorney General within the time period prescribed by the Public Information Act. Notwithstanding any other information provided in this solicitation or Vendor designation of certain Vendor Data as confidential or proprietary, Vendor's acceptance of this TIPS Vendor Agreement constitutes Vendor's consent to the disclosure of Vendor's Data, including any information deemed confidential or proprietary, to TIPS Members or as ordered by a Court or government agency, including without limitation the Texas Attorney General. Vendor agrees that TIPS shall not be responsible or liable for any use or distribution of information or documentation by TIPS Members or as required by law.

19. **Vendor's Authorized Resellers.** TIPS recognizes that many vendors operate in the open market through the use of resellers or dealers. For that reason, TIPS permits Vendor to authorize Authorized Resellers within its Vendor Portal and make TIPS Sales through the Authorized Reseller(s). Once authorized by Vendor in the Vendor Portal, the Authorized Reseller(s) may make TIPS sales to TIPS Members. However, all purchase documents must include: (1) Authorized Reseller's Name; (2) Vendor's Name, as known to TIPS, and; (3) Vendor's TIPS Contract Name and Number under which it is making the TIPS Sale. Either Vendor or Reseller may report the sale pursuant to the terms herein. However, Vendor agrees that it is legally responsible for all reporting and fee payment as described herein for TIPS Sales made by Authorized Resellers. The TIPS Administration Fee is assessed on the amount paid by the TIPS Member, not on the Vendor's cost or on the amount for which the Vendor sold the item to a dealer or Authorized Reseller. The Parties intend that Vendor shall be responsible and liable for TIPS Sales made by Vendor's Authorized Resellers. Vendor agrees that it is voluntarily authorizing this Authorized Reseller and in doing so, Vendor agrees that it is doing so at its own risk and agrees to protect, indemnify, and hold TIPS harmless in accordance with Sections 14-17 above related to Authorized Reseller TIPS Sales made pursuant to this Agreement or purporting to be made pursuant to this Agreement that may be asserted against Vendor whether rightfully brought or otherwise. The Parties further agree that it is no defense to Vendor's breach of this Agreement that an Authorized Reseller caused Vendor of breach this Agreement.

20. **Circumvention of TIPS Sales**. When a public entity initiates a purchase with Vendor, if the Member inquires verbally or in writing whether Vendor holds a TIPS Contract, it is the duty of the Vendor to verify whether the Member is seeking a TIPS purchase. Any request for quote, customer communication, or customer purchase initiated through or referencing a TIPS Contract shall be completed through TIPS pursuant to this Agreement. Any encouragement or participation by Vendor in circumventing a TIPS sale being completed may result in immediate termination of Vendor's TIPS Contract(s) for cause as well as preclusion from future TIPS opportunities at TIPS sole discretion.

21. **State of Texas Franchise Tax.** By signature hereon, Vendor hereby certifies that Vendor is not currently delinquent in the payment of any franchise taxes owed to the State of Texas under Chapter 171 of the Texas Tax Code.

22. **Termination.**

A) Termination for Convenience. TIPS may, by written notice to Vendor, terminate this Agreement for convenience, in whole or in part, at any time by giving thirty (30) days' written notice to Vendor of such termination, and specifying the effective date thereof.

B) Termination for Cause. If Vendor fails to materially perform pursuant to the terms of this Agreement, TIPS shall provide written notice to Vendor specifying the default. If Vendor does not cure such default within thirty (30) days, TIPS may terminate this Agreement, in whole or in part, for cause. If TIPS terminates this Agreement for cause, and it is later determined that the termination for cause was wrongful, the termination shall automatically be converted to and treated as a termination for convenience.

C) Vendor's Termination. If TIPS fails to materially perform pursuant to the terms of this Agreement, Vendor shall provide written notice to TIPS specifying the default ("Notice of Default"). If TIPS does not cure such default within thirty (30) days, Vendor may terminate this Agreement, in whole or in part, for cause. If TIPS terminates this Agreement for cause, and it is later determined that the termination for cause was wrongful, the termination shall automatically be converted to and treated as a termination for convenience.

D) Upon termination, all TIPS Sale orders previously accepted by Vendor shall be fulfilled and Vendor shall be paid for all TIPS Sales executed pursuant to the applicable terms. All TIPS Sale orders presented to Vendor but not fulfilled by Vendor, prior to the actual termination of this agreement shall be honored at the option of the TIPS Member. TIPS shall submit to Vendor an invoice for any outstanding TIPS Administration Fees and approved expenses and Vendor shall pay such fees and expenses within 30 calendar days of receipt of such valid TIPS invoice. Vendor acknowledges and agrees that continued participation in TIPS is subject to TIPS' sole

discretion and that any Vendor may be removed from the TIPS program at any time with or without cause. This termination clause does not affect TIPS Sales Supplemental Agreements pursuant to this term regarding termination and the Survival Clause term

E) Vendor hereby waives any and all claims for damages, including, but not limited, to consequential damages or lost profits, that might arise from TIPS' act of terminating this Agreement.

23. **Survival Clause.** It is the intent of the Parties that this Agreement and procurement method applies to any TIPS Sale made during the life of this Agreement even if made on or near the Contract Expiration Date as defined herein. Thus, all TIPS Sales, including but not limited to: leases, service agreements, license agreements, open purchase orders, warranties, and contracts, even if they extend months or years past the TIPS Contract Expiration Date, shall survive the expiration or termination of this Agreement subject to the terms and conditions of the Supplemental Agreement between Customer and Vendor or unless otherwise specified herein.

24. **Audit Rights.** Due to transparency statutes and public accountability requirements of TIPS and TIPS Members, Vendor shall at their sole expense, maintain documentation of all TIPS Sales for a period of three years from the time of the TIPS Sale. In order to ensure and confirm compliance with this agreement, TIPS shall have authority to conduct audits of Vendor's TIPS Pricing or TIPS Sales with thirty-days' notice unless the audit is ordered by a Court Order or by a Government Agency with authority to do so without said notice. Notwithstanding the foregoing, in the event that TIPS is made aware of any pricing being offered to eligible entities that is materially inconsistent with Vendor's TIPS Pricing, TIPS shall have the ability to conduct the audit internally or may engage a third- party auditing firm to investigate any possible non-compliant conduct or may terminate the Agreement according to the terms of this Agreement. In the event of an audit, the requested materials shall be reasonably provided in the time, format, and at the location acceptable to TIPS. TIPS agrees not to perform a random audit the TIPS transaction documentation more than once per calendar year, but reserves the right to audit for just cause or as required by any governmental agency or court with regulatory authority over TIPS or the TIPS Member. These audit rights shall survive termination of this Agreement for a period of one (1) year from the effective date of termination.

25. **Conflicts of Interest.** The Parties confirm that they have not offered, given, or accepted, nor intend to give at any time hereafter any economic opportunity, future employment, gift, loan, gratuity, special discount, trip, favor, service to the other in connection with this Agreement. Vendor affirms that, to the best of Vendor's knowledge, this Agreement has been arrived at independently, and is awarded without collusion with anyone to obtain information or gain any favoritism that would in any way limit competition or give an unfair advantage over other vendors in the award of this Agreement. Vendor agrees that it has disclosed any necessary affiliations with Region 8 Education Service Center and the TIPS Department, if any, through the Conflict of Interest attachment provided in the solicitation resulting in this Agreement.

26. **Volume of TIPS Sales.** Nothing in this Agreement or any TIPS communication may be construed as a guarantee that TIPS or TIPS Members will submit any TIPS orders to Vendor at any time.

27. **Compliance with the Law.** The Parties agree to comply fully with all applicable federal, state, and local statutes, ordinances, rules, and regulations applicable to their entity in connection with the programs contemplated under this Agreement.

28. **Severability.** If any term(s) or provision(s) of this Agreement are held by a court of competent jurisdiction to be invalid, void, or unenforceable, then such term(s) or provision(s) shall be deemed restated to reflect the original intention of the Parties as nearly as possible in accordance with applicable law and the remainder of this Agreement, and the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated, unless such holding causes the obligations of the Parties hereto to be impossible to perform or shall render the terms of this Agreement to be inconsistent with the intent of the Parties hereto.

29. **Force Majeure.** If by reason of Force Majeure, either party hereto shall be rendered unable wholly or in part to carry out its obligations under this Agreement through no fault of its own then such party shall give notice and full particulars of Force Majeure in writing to the other party within a reasonable time after occurrence of the event or cause relied upon. Upon delivering such notice, the obligation of the affected party, so far as it is affected by such Force Majeure as described, shall be suspended during the continuance of the inability then claimed but for no longer period, and such party shall endeavor to remove or overcome such inability with all reasonable dispatch. In the event that Vendor's obligations are suspended by reason of Force Majeure, all TIPS Sales accepted prior to the Force Majeure event shall be the legal responsibility of Vendor and the terms of the TIPS Sale Supplemental Agreement shall control Vendor's failure to fulfill for a Force Majeure event.

30. **Immunity.** Vendor agrees that nothing in this Agreement shall be construed as a waiver of sovereign or government immunity; nor constitute or be construed as a waiver of any of the privileges, rights, defenses, remedies, or immunities available to Region 8 Education

Service Center or its TIPS Department. The failure to enforce, or any delay in the enforcement of, any privileges, rights, defenses, remedies, or immunities available to Region 8 Education Service Center or its TIPS Department under this Agreement or under applicable law shall not constitute a waiver of such privileges, rights, defenses, remedies, or immunities or be considered as a basis for estoppel.

31. **Insurance Requirements.** Vendor agrees to maintain the following minimum insurance requirements for the duration of this Agreement. All policies held by Vendor to adhere to this term shall be written by a carrier with a financial size category of VII and at least a rating of "A-" by A.M. Best Key Rating Guide. The coverages and limits are to be considered minimum requirements and in no way limit the liability of the Vendor(s). Any immunity available to TIPS or TIPS Members shall not be used as a defense by the contractor's insurance policy. Only deductibles applicable to property damage are acceptable, unless proof of retention funds to cover said deductibles is provided. "Claims made" policies will not be accepted. Vendor's required minimum coverage shall not be suspended, voided, cancelled, non-renewed or reduced in coverage or in limits unless replaced by a policy that provides the minimum required coverage except after thirty (30) days prior written notice by certified mail, return receipt requested has been given to TIPS or the TIPS Member if a project or pending delivery of an order is ongoing. Upon request, certified copies of all insurance policies shall be furnished to the TIPS or the TIPS Member. Vendor agrees that when Vendor or its subcontractors are liable for any damages or claims, Vendor's policy, shall be primary over any other valid and collectible insurance carried by the Member or TIPS.

General Liability:	$1,000,000 each Occurrence/Aggregate
Automobile Liability:	$300,000 Includes owned, hired & non-owned
Workers' Compensation:	Statutory limits for the jurisdiction in which the Vendor performs under this Agreement. If Vendor performs in multiple jurisdictions, Vendor shall maintain the statutory limits for the jurisdiction with the greatest dollar policy limit requirement.
Umbrella Liability:	$1,000,000 each Occurrence/Aggregate

32. **Waiver.** No waiver of any single breach or multiple breaches of any provision of this Agreement shall be construed to be a waiver of any breach of any other provision. No delay in acting regarding any breach of any provision shall be construed to be a waiver of such breach.

33. **Binding Agreement.** This Agreement shall be binding and inure to the benefit of the Parties hereto and their respective heirs, legal successors, and assigns.

34. **Headings.** The paragraph headings contained in this Agreement are included solely for convenience of reference and shall not in any way affect the meaning or interpretation of any of the provisions of this Agreement.

35. **Choice of Law and Venue.** This Agreement shall be governed by, construed, and enforced in accordance with the laws of the State of Texas. Any proceeding, claim, action, or alternative dispute resolution arising out of or relating to this Agreement or involving TIPS shall be brought in a State Court of competent jurisdiction in Camp County, Texas, or if Federal Court is legally required, a Federal Court of competent jurisdiction in the Eastern District of Texas, and each of the Parties irrevocably submits to the exclusive jurisdiction of said court in any such proceeding, waives any objection it may now or hereafter have to venue or to convenience of forum, agrees that all claims in respect of the proceeding shall be heard and determined only in any such court, and agrees not to bring any proceeding arising out of or relating to this procurement process or any contract resulting from or and contemplated transaction in any other court. The Parties agree that either or both of them may file a copy of this paragraph with any court as written evidence of the knowing, voluntary and freely bargained for agreement between the Parties irrevocably to waive any objections to venue or to convenience of forum.

36. **Relationship of the Parties.** Nothing contained in this Agreement shall be construed to make one Party an agent of the other Party nor shall either party have any authority to bind the other in any respect, unless expressly authorized by the other party in writing. The Parties are independent contractors and nothing in this Agreement creates a relationship of employment, trust, agency or partnership between them.

37. **Assignment.** No assignment of this Agreement or of any duty or obligation of performance hereunder, shall be made in whole or in part by a Party hereto without the prior written consent of the other Party. Written consent of TIPS shall not be unreasonably withheld.

38. **Minimum Condition and Warranty Requirements for TIPS Sales.** All goods quoted or sold through a TIPS Sale shall be new unless clearly stated otherwise in writing. All new goods and services shall include the applicable manufacturers minimum standard warranty unless otherwise agreed to in the Supplemental Agreement.

39. **Minimum Customer Support Requirements for TIPS Sales.** Vendor shall provide timely and commercially reasonable support for TIPS Sales or as agreed to in the applicable Supplemental Agreement.

40. **Minimum Shipping Requirements for TIPS Sales.** Vendor shall ship, deliver, or provide ordered goods and services within a commercially reasonable time after acceptance of the order. If a delay in delivery is anticipated, Vendor shall notify the TIPS Member as to why delivery is delayed and provide an updated estimated time for completion. The TIPS Member may cancel the order if the delay is not commercially acceptable or not consistent with the Supplemental Agreement applicable to the order.

41. **Minimum Vendor License Requirements.** Vendor shall maintain, in current status, all federal, state, and local licenses, bonds and permits required for the operation of the business conducted by Vendor. Vendor shall remain fully informed of and in compliance with all ordinances and regulations pertaining to the lawful provision of goods or services under the TIPS Agreement. TIPS and TIPS Members reserve the right to stop work and/or cancel a TIPS Sale or terminate this or any TIPS Sale Supplemental Agreement involving Vendor if Vendor's license(s) required to perform under this Agreement or under the specific TIPS Sale have expired, lapsed, are suspended or terminated subject to a 30-day cure period unless prohibited by applicable statue or regulation.

42. **Minimum Vendor Legal Requirements.** Vendor shall remain aware of and comply with this Agreement and all local, state, and federal laws governing the sale of products/services offered by Vendor under this contract. Such applicable laws, ordinances, and policies must be complied with even if not specified herein.

43. **Minimum Site Requirements for TIPS Sales (*when applicable to TIPS Sale*).**

Cleanup: When performing work on site at a TIPS Member's property, Vendor shall clean up and remove all debris and rubbish resulting from their work as required or directed by the TIPS Member or as agreed by the parties. Upon completion of work, the premises shall be left in good repair and an orderly, neat, clean and unobstructed condition.

Preparation: Vendor shall not begin a project for which a TIPS Member has not prepared the site, unless Vendor does the preparation work at no cost, or until TIPS Member includes the cost of site preparation in the TIPS Sale Site preparation includes, but is not limited to: moving furniture, installing wiring for networks or power, and similar pre-installation requirements.

Registered Sex Offender Restrictions: For work to be performed at schools, Vendor agrees that no employee of Vendor or a subcontractor who has been adjudicated to be a registered sex offender will perform work at any time when students are, or reasonably expected to be, present unless otherwise agreed by the TIPS Member. Vendor agrees that a violation of this condition shall be considered a material breach and may result in the cancellation of the TIPS Sale at the TIPS Member's discretion. Vendor must identify any additional costs associated with compliance of this term. If no costs are specified, compliance with this term will be provided at no additional charge.

Safety Measures: Vendor shall take all reasonable precautions for the safety of employees on the worksite, and shall erect and properly maintain all necessary safeguards for protection of workers and the public. Vendor shall post warning signs against all hazards created by the operation and work in progress. Proper precautions shall be taken pursuant to state law and standard practices to protect workers, general public and existing structures from injury or damage.

Smoking: Persons working under Agreement shall adhere to the TIPS Member's or local smoking statutes, codes, ordinances, and policies.

44. **Payment for TIPS Sales.** TIPS Members may make payments for TIPS Sales directly to Vendor, Vendor's Authorized Reseller, or as otherwise agreed to in the applicable Supplemental Agreement after receipt of the invoice and in compliance with applicable payment statutes. Regardless of how payment is issued or received for a TIPS Sale, Vendor is responsible for all reporting and TIPS Administration Fee payment requirements as stated herein.

45. **Marketing.** Vendor agrees to allow TIPS to use their name and logo within the TIPS website, database, marketing materials, and advertisements unless Vendor negotiates this term to include a specific acceptable-use directive. Any use of TIPS' name and logo or any form of publicity, inclusive of press release, regarding this Agreement by Vendor must have prior approval from TIPS which will not be unreasonably withheld. Request may be made by email to tips@tips-usa.com. For marketing efforts directed to TIPS Members, Vendor must request and execute a separate Joint Marketing Disclaimer, at marketing@tips-usa.com, before TIPS can release contact information for TIPS Member entities for the purpose of marketing your TIPS contract(s). Vendor must adhere to strict Marketing Requirements once a disclaimer is executed. The Joint Marketing Disclaimer is a supplemental agreement specific to joint marketing efforts and has no effect on the terms of the TIPS Vendor Agreement. Vendor agrees that any images, photos, writing, audio, clip art,

music, or any other intellectual property ("Property") or Vendor Data utilized, provided, or approved by Vendor during the course of the joint marketing efforts are either the exclusive property of Vendor, or Vendor has all necessary rights, license, and permissions to utilize said Property in the joint marketing efforts. Vendor agrees that they shall indemnify and hold harmless TIPS and its employees, officers, agents, representatives, contractors, assignees, designees, and TIPS Members from any and all claims, damages, and judgments involving infringement of patent, copyright, trade secrets, trade or services marks, and any other intellectual or intangible property rights and/or claims arising from the Vendor's (including Vendor's officers', employees', agents', Authorized Resellers', subcontractors', licensees', or invitees') unauthorized use or distribution of Vendor Data and Property.

46. **Tax Exempt Status of TIPS Members.** Most TIPS Members are tax exempt entities and the laws and regulations applicable to the specific TIPS Member customer shall control.

47. **Automatic Renewal Limitation for TIPS Sales.** No TIPS Sale may incorporate an automatic renewal clause that exceeds month to month terms with which the TIPS Member must comply. All renewal terms incorporated into a TIPS Sale Supplemental Agreement shall only be valid and enforceable when Vendor received written confirmation of acceptance of the renewal term from the TIPS Member for the specific renewal term. The purpose of this clause is to avoid a TIPS Member inadvertently renewing an Agreement during a period in which the governing body of the TIPS Member has not properly appropriated and budgeted the funds to satisfy the Agreement renewal. Any TIPS Sale Supplemental Agreement containing an "Automatic Renewal" clause that conflicts with these terms is rendered void and unenforceable.

48. **Choice of Law Limitation for TIPS Sales.** Vendor agrees that if any "Choice of Law" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause must provide that the "Choice of Law" applicable to the TIPS Sale agreement/contract between Vendor and TIPS Member shall be the state where the TIPS Member operates unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Choice of Law" clause that conflicts with these terms is rendered void and unenforceable.

49. **Venue Limitation for TIPS Sales.** Vendor agrees that if any "Venue" provision is included in any TIPS Sale Agreement/contract between Vendor and a TIPS Member, that clause must provide that the "Venue" for any litigation or alternative dispute resolution shall be in the state and county where the TIPS Member operates unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Venue" clause that conflicts with these terms is rendered void and unenforceable.

50. **Indemnity Limitation for TIPS Sales.** Texas and other jurisdictions restrict the ability of governmental entities to indemnify others. Vendor agrees that if any "Indemnity" provision which requires the TIPS Member to indemnify Vendor is included in any TIPS sales agreement/contract between Vendor and a TIPS Member, that clause must either be stricken or qualified by including that such indemnity is only permitted, "to the extent permitted by the laws and constitution of [TIPS Member's State]" unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing an "Indemnity" clause that conflicts with these terms is rendered void and unenforceable.

51. **Arbitration Limitation for TIPS Sales.** Vendor agrees that if any "Arbitration" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause may not require that the arbitration is mandatory or binding. Vendor agrees that if any "Arbitration" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause provides for only voluntary and non-binding arbitration unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Arbitration" clause that conflicts with these terms is rendered void and unenforceable.

In Witness Whereof, the parties hereto, each acting under due and proper authority, have signed this Agreement.

TIPS VENDOR AGREEMENT SIGNATURE FORM

TIPS RFP 230105 Technology Solutions, Products, and Services

Vendor Name: United Data Technologies, Inc. dba UDT

Event Information

Number: 230105
Title: Technology Solutions, Products, and Services
Type: Request for Proposal
Issue Date: 1/5/2023
Deadline: 2/17/2023 03:00 PM (CT)
Notes: This is a solicitation issued by The Interlocal Purchasing System (TIPS), a department of Texas Region 8 Education Service Center. It is an Indefinite Delivery, Indefinite Quantity ("IDIQ") solicitation. It will result in contracts that provide, through adoption/"piggyback" an indefinite quantity of supplies/services, during a fixed period of time, to TIPS public entity and qualifying non-profit "TIPS Members" throughout the nation. Thus, there is no specific project or scope of work to review. Rather this solicitation is issued as a prospective award for utilization when any TIPS Member needs the goods or services offered during the life of the agreement.

IF YOU CURRENTLY HOLDS TIPS CONTRACT 200105 TECHNOLOGY SOLUTIONS, PRODUCTS, AND SERVICES ("200105"), YOU MUST RESPOND TO THIS SOLICITATION TO PREVENT LAPSE OF CONTRACT UNLESS YOU HOLD ANOTHER CURRENT TIPS CONTRACT THAT COVERS ALL OF YOUR TECHNOLOGY OFFERINGS. THIS AWARDED CONTRACT WILL REPLACE YOUR EXPIRING TIPS CONTRACT 200105.

IF YOU HOLD A TIPS "TECHNOLOGY SOLUTIONS, PRODUCTS, AND SERVICES" CONTRACT OTHER THAN 200105 AND YOU CHOOSE TO RESPOND HEREIN, YOUR EXISTING TIPS

"TECHNOLOGY SOLUTIONS, PRODUCTS, AND SERVICES" CONTRACT WILL BE TERMINATED AND REPLACED BY THIS CONTRACT.

IF YOU HOLD ANOTHER TIPS CONTRACT OTHER THAN 200105 WHICH COVERS ALL OF YOUR TECHNOLOGY OFFERINGS AND YOU ARE SATISFIED WITH IT, THERE IS NO NEED TO RESPOND TO THIS SOLICITATION UNLESS YOU PREFER TO HOLD BOTH CONTRACTS OR REPLACE YOUR EXISTING TIPS "TECHNOLOGY SOLUTIONS, PRODUCTS, AND SERVICES" CONTRACT.

Requested Attachments

Pricing Form 1

UDT TIPS 230105 Pricing Form 1.xlsx

Pricing Form 1 must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed as instructed, and uploaded to this location.

Pricing Form 2

UDT TIPS 230105 Pricing Form 2.xlsx

Pricing Form 2 must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed as instructed, and uploaded to this location.

Alternate or Supplemental Pricing Documents

No response

Optional. If when completing Pricing Form 1 & Pricing Form 2 you direct TIPS to view additional, alternate, or supplemental pricing documentation, you may upload that documentation.

Vendor Agreement

230105 Vendor Agreement complete v1.2.pdf

The Vendor Agreement must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, Vendor Name placed in the line provided at the top, and uploaded to this location. If Vendor has proposed deviations to the Vendor Agreement, Vendor may assert so in the Attribute Questions and those shall be addressed during evaluation.

Vendor Agreement Signature Form

230105 Vendor Agreement Signature Form Complete DW.pdf

The Vendor Agreement Signature Form must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location. If Vendor has proposed deviations to the Vendor Agreement, Vendor may leave the signature line of this page blank and assert so in the Attribute Questions and those shall be addressed during evaluation.

Reference Form

230105 Reference Form Completed.xls

The Reference Form must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location. The Reference Form must be uploaded in Excel format.

Required Confidentiality Claim Form

230105 Required Confidentiality Claim Form Completed v1.2 DW.pdf

The Required Confidentiality Claim Form must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location. This is the only way for Vendor to assert confidentiality of any information submitted.

Conflict of Interest Questionnaire - Form CIQ

230105 Vendor Agreement Signature Form Complete.pdf

Do not upload this form unless you have a reportable conflict with TIPS. There is an Attribute entitled "Conflict of Interest Questionnaire Requirement" immediately followed by an Attribute entitled "Conflict of Interest Questionnaire Requirement – Form CIQ – Continued." Properly respond to those Attributes and only upload this form if applicable/instructed. If upload is required based on your response to those Attributes, the Conflict of Interest Questionnaire – Form CIQ must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded at this location.

Disclosure of Lobbying Activities - Standard Form - LLL

No response

Do not upload this form unless Vendor has reportable lobbying activities. There are Attributes entitled, "2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment – Continued." Properly respond to those Attributes and only upload this form if applicable/instructed. If upload is required based on your response to those Attributes, the Disclosure of Lobbying Activities – Standard Form - LLL must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location.

Current Form W-9

W-9 2022 UDT signed - Copy.pdf

Vendor must upload their current IRS Tax Form W-9. The legal name, EIN, and d/b/a's listed should match the information provided herein exactly. This form will be utilized by TIPS to properly identify your entity.

Certificates & Licenses (Supplemental Vendor Information Only)

No response

Optional. If Vendor would like to display any applicable certificates or licenses (including HUB certificates) for TIPS and TIPS Member Customer consideration, Vendor may upload those at this location. These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Vendor's Warranties, Terms, and Conditions (Supplemental Vendor Information Only)

No response

Optional. If Vendor would like to display any standard warranties, terms, or conditions which are often applicable to their offerings for TIPS and TIPS Member Customer consideration, Vendor may upload those at this location. These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Supplemental Vendor Information (Supplemental Vendor Information Only)

No response

Optional. If Vendor would like to display or include any brochures, promotional documents, marketing materials, or other Vendor Information for TIPS and TIPS Member Customer consideration, Vendor may upload those at this location.
These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Vendor Logo (Supplemental Vendor Information Only)

No response

Optional. If Vendor desires that their logo be displayed on their public TIPS profile for TIPS and TIPS Member viewing, Vendor may upload that logo at this location. These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

2 Historically Underutilized Business (HUB)

Some participating public entities are required to seek Historically Underutilized Business (HUB) vendors as defined by the Texas Comptroller of Public Accounts Statewide HUB Program. Does Vendor certify that their entity is a HUB vendor?

If you respond "Yes," you must upload current certification proof in the appropriate "Response Attachments" location.

No

3 National Coverage

Can the Vendor provide its proposed goods and services to all 50 US States?

No

4 States Served

If Vendor answered "No" to the question entitled "National Coverage," please list all states where vendor can provide the goods and services proposed directly below. Your response may dictate which potential TIPS Member customers consider purchasing your offerings.

Florida, Tennessee, Oklahoma, Texas, New Mexico, Louisiana, and Mississippi, Georgia.

5 Description of Vendor Entity and Vendor's Goods & Services

If awarded, this description of Vendor and Vendor's goods and services will appear on the TIPS website for customer/public viewing.

UDT is an industry-leading education solutions provider in the US. Primarily focused on enhancing educational and instructional technologies within K-12 districts across the nation, UDT delivers solutions focused on device deployments, hybrid in-classroom and remote learning instructional technology, delivering secure learning solutions, product procurement, audio visual solutions, communications, support services, security services, managed services, and managed smart cloud services

6 Primary Contact Name

Please identify the individual who will be primarily responsible for all TIPS matters and inquiries for the duration of the contract.

Al Zayed

30 **Search Words Identifying Vendor**

Please list all search words and phrases to be included in the TIPS database related to your entity. ***Do not*** list words which are not associated with the bid category/scope (See bid title for general scope). This will help users find you through the TIPS website search function. You may include product names, manufacturers, specialized services, and other words associated with the scope of this solicitation.

Displays, Monitors, Speakers, Microphones, Presentation Systems, Video Conferencing, Projectors, Interactive Whiteboards, IWB, Carts, Extron, Samsung, Cisco, Sony, Vbrick, WebEx, HPE, HP, HPI, Lenovo, Dell, Polycom, Shure, Sennheiser, Kaltura, Encoders, Decoders, Apple, Miracast, Screen Sharing, Wireless, Wifi, Webinar, Instructional, Technology, Solutions, Chromebooks, ipad, C2G, Peerless, Chief, Digital Signage, Appspace, Singlewire, players, Audio Visual, Controllers, Programming, Liberty AV, Crestron, Harman, Bosch, Barco, NEC, QSC, LG Cisco, Dell, Planar, Polycom, TVOne, Newline Interactive, Promethean, Boxlight, Listen Technologies, Avteq, Yealink, Hitachi, UDT, Valcom, Zoom, Microsoft, Microsoft, Cloud, Azure, AWS

31 **Certification of Vendor Residency (Required by the State of Texas)**

Does Vendor's parent company or majority owner:

(A) have its principal place of business in Texas; ***or*** (B) employ at least 500 persons in Texas?

Texas Education Code Section 44.031 requires that this information be considered in evaluation for certain contracts. However, Vendor response does not affect points, scoring, or potential award.

No

32 **Vendor's Principal Place of Business (City)**

In what city is Vendor's principal place of business located?

Miramar

33 **Vendor's Principal Place of Business (State)**

In what state is Vendor's principal place of business located?

Florida

34 **Vendor's Years in Business**

How many years has the business submitting this proposal been operating in its current capacity and field of work?

28

35 **Certification Regarding Entire TIPS Agreement**

Vendor agrees that, if awarded, Vendor's final TIPS Contract will consist of the provisions set forth in the finalized TIPS Vendor Agreement, Vendor's responses to these attribute questions, and: (1) The TIPS solicitation document resulting in this Agreement; (2) Any addenda or clarifications issued in relation to the TIPS solicitation; (3) All solicitation information provided to Vendor by TIPS through the TIPS eBid System; (3) Vendor's entire proposal response to the TIPS solicitation including all accepted required attachments, acknowledged notices and certifications, accepted negotiated terms, accepted pricing, accepted responses to questions, and accepted written clarifications of Vendor's proposal, and; any properly included attachments to the TIPS Contract.

Does Vendor agree?

Yes

36 **Minimum Percentage Discount Offered to TIPS Members on all Goods and Services (READ CAREFULLY)**

Please read thoroughly and carefully as an error on your response can render your contract award unusable.

TIPS Members often turn to TIPS Contracts for ease of use and to receive discounted pricing.

What is the minimum percentage discount that you can offer TIPS Members off of all goods and service pricing that you offer?

Vendor must respond with a percentage from 0%-100%. The percentage discount that you input below will be applied to your "Catalog Pricing", as defined in the solicitation, for all TIPS Sales made during the life of the contract. You cannot alter this percentage discount once the solicitation legally closes. You will always be required to discount every TIPS Sale by the percentage included below. If you add goods or services to your "Catalog Pricing" during the life of the contract, you will be required to sell those new items with this discount applied.

Example: In this example, you enter a 10% minimum percentage discount below. In year-one of your TIPS Contract, your published "Catalog Pricing" (website/store/published pricing) for "Tablet A" is $100 and for "Tablet Set-Up Service" is $100. In this example, you must sell those items under the TIPS Contract at the proposed 10% discounted price of: "Tablet A" - $90, "Tablet Set-Up Service" - $90. In year two of your TIPS Contract, you update your "Catalog Pricing" with the market. You add "Tablet B" to your "Catalog Pricing" for $200 and have increased the price of "Tablet A" to $110 and the price of "Tablet Set-Up Service" to $110. In this example, after the "Catalog Pricing" update, you must still sell those items under the TIPS Contract at the proposed 10% discounted price of: "Tablet A" - $99, "Tablet Set-Up Service" - $99, and "Tablet B" - $180.00.

If you cannot honor the discount on all goods and items now included or which may be added in the future with certainty, then you should offer a lesser discount percentage below.

What is the minimum percentage discount that you can offer TIPS Members off of all goods and service pricing that you offer?

1%

37 **Honoring Vendor's Minimum Percentage Discount**

Vendor is asked in these Attribute Questions to provide a Minimum Percentage Discount offered to TIPS Members on all goods and services sold under the TIPS Contract. Points will be assigned for your response and scoring of your proposal will be affected. A "YES" answer will be awarded the maximum 10 points and a "NO" answer will be awarded 0 points.

Does Vendor agree to honor the Minimum Percentage Discount off of their TIPS "Catalog Pricing" that Vendor proposed for all TIPS Sales made for the duration of the TIPS Contract?

Yes

38 **Volume and Additional Discounts**

In addition to the Minimum Percentage Discount proposed herein, does Vendor ever expect and intend to offer additional, greater, or volume discounts to TIPS Members?

Point(s) may be assigned for your response in the category of "Pricing" during scoring and evaluation.

Yes

39 **"Catalog Pricing" and Pricing Requirements**

This is a requirement of the TIPS Contract and is non-negotiable.

In this solicitation and resulting contract, "Catalog Pricing" shall be defined as:

"The then available list of goods or services, in the most current listing regardless of date, that takes the form of a catalog, price list, price schedule, shelf-price or other viewable format that:

A. is regularly maintained by the manufacturer or Vendor of an item; and

B. is either published or otherwise available for review by TIPS or a customer during the purchase process;

C. to which the Minimum Percentage Discount proposed by the proposing Vendor may be applied.

If awarded on this TIPS Contract, for the duration of the contract, Vendor agrees to provide, upon request, their then current "Catalog Pricing." Or, in limited circumstances where Vendor has proposed the Percentage Mark-Up method of pricing in this proposal, proof of Vendor's "cost" may be accepted by TIPS in place of catalog pricing.

YES

40 **EXCEPTIONS & DEVIATIONS TO TIPS STANDARD TERMS AND CONDITIONS**

Vendor agrees that, if awarded, Vendor's final TIPS Contract will consist of the provisions set forth in the finalized TIPS Vendor Agreement, Vendor's responses to these attribute questions, and: (1) The TIPS solicitation document resulting in this Agreement; (2) Any addenda or clarifications issued in relation to the TIPS solicitation; (3) All solicitation information provided to Vendor by TIPS through the TIPS eBid System; (3) Vendor's entire proposal response to the TIPS solicitation including all accepted required attachments, acknowledged notices and certifications, accepted negotiated terms, accepted pricing, accepted responses to questions, and accepted written clarifications of Vendor's proposal, and; any properly included attachments to the TIPS Contract. In the event of conflict between the terms of the finalized Vendor Agreement and one of the incorporated documents the terms and conditions which are in the best interest of governmental/qualifying non-profit TIPS Members shall control at TIPS sole discretion.

If Vendor responds, "No, Vendor does not agree" to this Attribute, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration. This is the only proper way to submit proposed deviations for TIPS consideration. TIPS reserves the right to accept, decline, or modify Vendor's requested negotiated terms. For this reason, answering "No, Vendor does not agree" may ultimately delay or prevent award.

Does Vendor agree with TIPS standard terms and conditions as presented in the TIPS solicitation document (RFP, RCSP, RFQ, or other) and the TIPS Vendor Agreement document?

Yes

41 **TIPS Sales Reporting Requirements**

This is a requirement of the TIPS Contract and is non-negotiable.

By submitting this proposal, Vendor certifies that Vendor will properly report all TIPS sales. With the exception of TIPS Automated Vendors, who have signed an exclusive agreement with TIPS regarding reporting, all TIPS Sales must be reported to TIPS by either:

(1) Emailing the purchase order or similar purchase document (with Vendor's Name, as known to TIPS, and the TIPS Contract Name and Number included) to TIPS at tipspo@tips-usa.com with "Confirmation Only" in the subject line of the email within three business days of Vendor's acceptance of the order, or;

(2) Within 3 business days of the order being accepted by Vendor, Vendor must login to the TIPS Vendor Portal and successfully self-report all necessary sale information within the Vendor Portal and confirm that it shows up accurately on your current Vendor Portal statement.

No other method of reporting is acceptable unless agreed to by the Parties in writing. Failure to report all sales pursuant to this provision may result in immediate cancellation of Vendor's TIPS Contract(s) for cause at TIPS' sole discretion.

4.2 TIPS Administration Fee Requirement and Acknowledgment

This is a requirement of the TIPS Contract and is non-negotiable.

The collection of fees by TIPS, a government entity, for performance of these procurement services is required pursuant to Texas Government Code Section 791.011 et. seq. The TIPS Administration Fee is the amount legally owed by Vendor to TIPS for TIPS Sales made by Vendor. The TIPS Administration Fee amount is typically a set percentage of each TIPS Sale legally due to TIPS, but the exact TIPS Administration Fee for this Contract is published in the corresponding RFP or RCSP document. TIPS Administration Fees are due to TIPS immediately upon Vendor's receipt of payment, including partial payment, for a TIPS Sale.

By submitting a proposal, Vendor agrees that it has read, understands, and agrees to the published TIPS Administration Fee amount, calculation, and payment requirements. By submitting a proposal Vendor further confirms that all TIPS Pricing includes the TIPS Administration Fee and Vendor will not show adding the TIPS Administration Fee as a charge or line-item in any TIPS Sale.

4.3 TIPS Member Access to Vendor Proposal & Documentation

This is a requirement of the TIPS Contract and is non-negotiable.

Notwithstanding any other information provided in this solicitation or Vendor designation of certain documentation as confidential or proprietary, Vendor's submission of this proposal constitutes Vendor's express consent to the disclosure of Vendor's comprehensive proposal, including any information deemed confidential or proprietary, **to TIPS Members**. The proposing Vendor agrees that TIPS shall not be responsible or liable for any use or distribution of information or documentation to TIPS Members or by TIPS Members. By submitting this proposal, Vendor certifies the foregoing.

4.4 Non-Collusive Bidding Certificate

This is a requirement of the TIPS Contract and is non-negotiable.

By submission of this proposal, the Vendor certifies that:

1) This proposal has been independently arrived at without collusion with any other entity, bidder, or with any competitor;

2) This proposal has not been knowingly disclosed and will not be knowingly disclosed, prior to the opening of bids, or proposals for this project, to any other bidder, competitor or potential competitor:

3) No attempt has been or will be made to induce any other person, partnership or corporation to modify, submit, or not to submit a bid or proposal; and

4) The person signing this bid or proposal certifies that they are duly authorized to execute this proposal/contract on behalf of Vendor and they have fully informed themselves regarding the accuracy of the statements contained in this certification, and under the penalties being applicable to the bidder as well as to the person signing in its behalf;

45 **Antitrust Certification Statements (Tex. Government Code § 2155.005)**

This is a requirement of the TIPS Contract and is non-negotiable.

By submission of this bid or proposal, Vendor certifies under penalty of perjury of the laws of the State of Texas that:

(1) I am duly authorized to execute this proposal/contract on my own behalf or on behalf of the company, corporation, firm, partnership or individual (Vendor) identified herein;

(2) In connection with this proposal, neither I nor any representative of Vendor has violated any provision of the Texas Free Enterprise and Antitrust Act, Tex. Bus. & Comm. Code Chapter 15;

(3) In connection with this proposal, neither I nor any representative of the Vendor has violated any federal antitrust law;

(4) Neither I nor any representative of Vendor has directly or indirectly communicated any of the contents of this bid to a competitor of the Company or any other company, corporation, firm, partnership or individual engaged in the same line of business as the Company.

46 **Limitation on Out-of-State Litigation - Texas Business and Commerce Code § 272**

This is a requirement of the TIPS Contract and is non-negotiable.

Texas Business and Commerce Code § 272 prohibits a construction contract, or an agreement collateral to or affecting the construction contract, from containing a provision making the contract or agreement, or any conflict arising under the contract or agreement, subject to another state's law, litigation in the courts of another state, or arbitration in another state. If included in Texas construction contracts, such provisions are voidable by a party obligated by the contract or agreement to perform the work.

By submission of this proposal, Vendor acknowledges this law and ***if Vendor enters into a construction contract with a Texas TIPS Member*** under this procurement, Vendor certifies compliance.

47 **Required Confidentiality Claim Form**

This is a requirement of the TIPS Contract and is non-negotiable.

TIPS provides the required TIPS Confidentiality Claim Form in the "Attachments" section of this solicitation. Vendor must execute this form by either signing and waiving any confidentiality claim, or designating portions of Vendor's proposal confidential. If Vendor considers any portion of Vendor's proposal to be confidential and not subject to public disclosure pursuant to Chapter 552 Texas Gov't Code or other law(s) and orders, Vendor must have identified the claimed confidential materials through proper execution of the Confidentiality Claim Form.

If TIPS receives a public information act or similar request, any responsive documentation not deemed confidential by you in this manner will be automatically released. For Vendor documents deemed confidential by you in this manner, TIPS will follow procedures of controlling statute(s) regarding any claim of confidentiality and shall not be liable for any release of information required by law, including Attorney General determination and opinion.

Notwithstanding any other Vendor designation of Vendor's proposal as confidential or proprietary, Vendor's submission of this proposal constitutes Vendor's agreement that proper execution of the required TIPS Confidentiality Claim Form is the only way to assert any portion of Vendor's proposal as confidential.

48 **Non-Discrimination Statement and Certification**

This is a requirement of the TIPS Contract and is non-negotiable.

In accordance with Federal civil rights law, all U.S. Departments, including but not limited to the USDA, USDE, FEMA, are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by federal funds (not all bases apply to all programs).

Vendor certifies that Vendor will comply with applicable Non-Discrimination and Equal Opportunity provisions set forth in TIPS Member Customers' policies and other regulations at the local, state, and federal levels of governments.

☑ Yes, I certify (Yes)

49 **Limitation of Vendor Indemnification and Similar Clauses**

This is a requirement of the TIPS Contract and is non-negotiable.

TIPS, a department of Region 8 Education Service Center, a political subdivision, and local government entity of the State of Texas, is prohibited from indemnifying third-parties (pursuant to the Article 3, Section 52 of the Texas Constitution) except as otherwise specifically provided for by law or as ordered by a court of competent jurisdiction. Article 3, Section 52 of the Texas Constitution states that "no debt shall be created by or on behalf of the State ... " and the Texas Attorney General has opined that a contractually imposed obligation of indemnity creates a "debt" in the constitutional sense. Tex. Att'y Gen. Op. No. MW-475 (1982). Thus, contract clauses which require TIPS to indemnify Vendor, pay liquidated damages, pay attorney's fees, waive Vendor's liability, or waive any applicable statute of limitations must be deleted or qualified with "to the extent permitted by the Constitution and Laws of the State of Texas."

Does Vendor agree?

☑ Yes, I Agree (Yes)

50 **Alternative Dispute Resolution Limitations**

This is a requirement of the TIPS Contract and is non-negotiable.

TIPS, a department of Region 8 Education Service Center, a political subdivision, and local government entity of the State of Texas, does not agree to binding arbitration as a remedy to dispute and no such provision shall be permitted in this Agreement with TIPS. Vendor agrees that any claim arising out of or related to this Agreement, except those specifically and expressly waived or negotiated within this Agreement, may be subject to non-binding mediation at the request of either party to be conducted by a mutually agreed upon mediator as prerequisite to the filing of any lawsuit arising out of or related to this Agreement. Mediation shall be held in either Camp or Titus County, Texas. Agreements reached in mediation will be subject to the approval by the Region 8 ESC's Board of Directors, authorized signature of the Parties if approved by the Board of Directors, and, once approved by the Board of Directors and properly signed, shall thereafter be enforceable as provided by the laws of the State of Texas.

Does Vendor agree?

Yes

5 1 No Waiver of TIPS Immunity

This is a requirement of the TIPS Contract and is non-negotiable.

Vendor agrees that nothing in this Agreement shall be construed as a waiver of sovereign or government immunity; nor constitute or be construed as a waiver of any of the privileges, rights, defenses, remedies, or immunities available to Region 8 Education Service Center or its TIPS Department. The failure to enforce, or any delay in the enforcement, of any privileges, rights, defenses, remedies, or immunities available to Region 8 Education Service Center or its TIPS Department under this Agreement or under applicable law shall not constitute a waiver of such privileges, rights, defenses, remedies, or immunities or be considered as a basis for estoppel.

Does Vendor agree?

☑ Yes, Vendor agrees (Yes)

5 2 Payment Terms and Funding Out Clause

This is a requirement of the TIPS Contract and is non-negotiable.

Vendor agrees that TIPS and TIPS Members shall not be liable for interest or late-payment fees on past-due balances at a rate higher than permitted by the laws or regulations of the jurisdiction of the TIPS Member.

Funding-Out Clause: Vendor agrees to abide by the applicable laws and regulations, including but not limited to Texas Local Government Code § 271.903, or any other statutory or regulatory limitation of the jurisdiction of any TIPS Member, which requires that contracts approved by TIPS or a TIPS Member are subject to the budgeting and appropriation of currently available funds by the entity or its governing body.

Does Vendor agree?

☑ Yes, Vendor agrees (Yes)

5 3 Certification Regarding Prohibition of Certain Terrorist Organizations (Tex. Gov. Code 2270)

Vendor certifies that Vendor is not a company identified on the Texas Comptroller's list of companies known to have contracts with, or provide supplies or services to, a foreign organization designated as a Foreign Terrorist Organization by the U.S. Secretary of State.

Does Vendor certify?

Yes

5 4 Certification Regarding Prohibition of Boycotting Israel (Tex. Gov. Code 2271)

If (a) Vendor is not a sole proprietorship; (b) Vendor has ten (10) or more full-time employees; and (c) this Agreement or any agreement with a TIPS Member under this procurement has value of $100,000 or more, the following certification shall apply; otherwise, this certification is not required. Vendor certifies, where applicable, that neither the Vendor, nor any affiliate, subsidiary, or parent company of Vendor, if any, boycotts Israel, and Vendor agrees that Vendor and Vendor Companies will not boycott Israel during the term of this Agreement. For purposes of this Agreement, the term "boycott" shall mean and include refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory but does not include an action made for ordinary business purposes.

When applicable, does Vendor certify?

Yes

55 Certification Regarding Prohibition of Contracts with Certain Foreign-Owned Companies (Tex. Gov. Code 2274)

Certain public entities are prohibited from entering into a contract or other agreement relating to critical infrastructure that would grant Vendor direct or remote access to or control of critical infrastructure in this state, excluding access specifically allowed by a customer for product warranty and support purposes.

Vendor certifies that neither it nor its parent company nor any affiliate of Vendor or its parent company, is (1) owned by or the majority of stock or other ownership interest of the company is held or controlled by individuals who are citizens of China, Iran, North Korea, Russia, or a designated country; (2) a company or other entity, including governmental entity, that is owned or controlled by citizens of or is directly controlled by the government of China, Iran, North Korea, Russia, or a designated country; or (3) headquartered in China, Iran, North Korea, Russia, or a designated country.

For purposes of this certification, "critical infrastructure" means "a communication infrastructure system, cybersecurity system, electric grid, hazardous waste treatment system, or water treatment facility." Vendor certifies that Vendor will not grant direct or remote access to or control of critical infrastructure, except for product warranty and support purposes, to prohibited individuals, companies, or entities, including governmental entities, owned, controlled, or headquartered in China, Iran, North Korea, Russia, or a designated country, as determined by the Governor.

When applicable, does Vendor certify?

Yes

56 Certification Regarding Prohibition of Discrimination Against Firearm and Ammunition Industries (Tex. Gov. Code 2274)

If (a) Vendor is not a sole proprietorship; (b) Vendor has at least ten (10) full-time employees; and (c) this Agreement or any Supplemental Agreement with certain public entities have a value of at least $100,000 that is paid wholly or partly from public funds; (d) the Agreement is not excepted under Tex. Gov. Code 2274 and (e) the purchasing public entity has determined that Vendor is not a sole-source provider or the purchasing public entity has not received any bids from a company that is able to provide this written verification, the following certification shall apply; otherwise, this certification is not required.

Vendor certifies that Vendor, or association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary parent company, or affiliate of these entities or associations, that exists to make a profit, does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association and will not discriminate during the term of this contract against a firearm entity or firearm trade association.

For purposes of this Agreement, "discriminate against a firearm entity or firearm trade association" shall mean, with respect to the entity or association, to: "(1) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association; (2) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or (3) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association."

"Discrimination against a firearm entity or firearm trade association" does not include: "(1) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and (2) a company's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship to comply with federal, state, or local law, policy, or regulations or a directive by a regulatory agency, or for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity's or association's status as a firearm entity or firearm trade association."

When applicable, does Vendor certify?

Yes

57 Certification Regarding Termination of Contract for Non-Compliance (Tex. Gov. Code 552.374)

If Vendor is not a governmental body and (a) this Agreement or any Supplemental Agreement with a public entity has a stated expenditure of at least $1 million in public funds for the purchase of goods or services by certain public entities; or (b) this Agreement or any Supplemental Agreement results in the expenditure of at least $1 million in public funds for the purchase of goods or services by certain public entities in their fiscal year, the following certification shall apply; otherwise, this certification is not required.

As required by Tex. Gov. Code 552.374, the following statement is included in the RFP and the Agreement (unless the Agreement is (1) related to the purchase or underwriting of a public security; (2) is or may be used as collateral on a loan; or (3) proceeds from which are used to pay debt service of a public security of loan): "The requirements of Subchapter J, Chapter 552, Government Code, may apply to this solicitation and Agreement and the Vendor agrees that this Agreement and any applicable Supplemental Agreement can be terminated if Vendor knowingly or intentionally fails to comply with a requirement of that subchapter."

Pursuant to Chapter 552 of the Texas Government Code, Vendor certifies that Vendor shall: (1) preserve all contracting information related to this Agreement as provided by the records retention requirements applicable to TIPS or the purchasing TIPS Member for the duration of the Agreement; (2) promptly provide to TIPS or the purchasing TIPS Member any contracting information related to the Agreement that is in the custody or possession of Vendor on request of TIPS or the purchasing TIPS Member; and (3) on completion of the Agreement, either (a) provide at no cost to TIPS or the purchasing TIPS Member all contracting information related to the Agreement that is in the custody or possession of Vendor, or (b) preserve the contracting information related to the Agreement as provided by the records retention requirements applicable to TIPS or the purchasing TIPS Member.

When applicable, does Vendor certify?

Yes

58 **Certification Regarding Prohibition of Boycotting Certain Energy Companies (Tex. Gov. Code 2274)**

If (a) Vendor is not a sole proprietorship; (b) Vendor has ten (10) or more full-time employees; and (c) this Agreement or any Supplemental Agreement with certain public entities has a value of $100,000 or more that is to be paid wholly or partly from public funds, the following certification shall apply; otherwise, this certification is not required.

Vendor certifies that Vendor, or any wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of these entities or business associations, if any, do not boycott energy companies and will not boycott energy companies during the term of the Agreement or any applicable Supplemental Agreement.

For purposes of this certification the term "company" shall mean an organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, that exists to make a profit.

The term "boycott energy company" shall mean "without an ordinary business purpose, refusing to deal with, terminating business activities with, or otherwise taking any action intended to penalize, inflict economic harm on, or limit commercial relations with a company because the company (a) engages in the exploration, production, utilization, transportation, sale, or manufacturing of fossil fuel-based energy and does not commit or pledge to meet environmental standards beyond applicable federal and state law, or (b) does business with a company described by paragraph (a)." (See Tex. Gov. Code 809.001).

When applicable, does Vendor certify?

Yes

59 **Felony Conviction Notice - Texas Education Code 44.034**

Texas Education Code, Section 44.034, Notification of Criminal History, Subsection (a), states, "a person or business entity that enters into a contract with a school district must give advance notice to the district if the person or an owner or operator of the business entity has been convicted of a felony. The notice must include a general description of the conduct resulting in the conviction of a felony."

Subsection (b) states, "a school district may terminate a contract with a person or business entity if the district determines that the person or business entity failed to give notice as required by Subsection (a) or misrepresented the conduct resulting in the conviction. The district must compensate the person or business entity for services performed before the termination of the contract."

Subsection (c) states, "This section does not apply to a publicly held corporation.

Vendor certifies one of the following:

A. My firm is a publicly held corporation; therefore, this reporting requirement is not applicable, or;

B. My firm is not owned nor operated by anyone who has been convicted of a felony, or;

C. My firm is owned or operated by the following individual(s) who has/have been convicted of a felony.

If Vendor responds with Option (C), Vendor is required to provide information in the next attribute.

B. My firm is not owned nor operated by felon.

60 **Felony Conviction Notice - Texas Education Code 44.034 - Continued**

If Vendor selected Option (C) in the previous attribute, Vendor must provide the following information herein:

1. Name of Felon(s)

2. The Felon(s) title/role in Vendor's entity, and

3. Details of Felon(s) Conviction(s).

No response

61 **Conflict of Interest Questionnaire Requirement**

Vendor agrees that it has looked up, read, and understood the current version of Texas Local Government Code Chapter 176 which generally requires disclosures of conflicts of interests by Vendor hereunder if Vendor:

(1) has an employment or other business relationship with a local government officer of our local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of our local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of our local governmental entity.

(4) Any other financial, commercial, or familial relationship with our local government that may warrant reporting under this statute.

Does Vendor certify that it has NO reportable conflict of interest?

Yes

62 **Conflict of Interest Questionnaire Requirement - Form CIQ - Continued**

If you responded "No, Vendor does not certify - VENDOR HAS CONFLICT" to the Conflict of Interest Questionnaire question above, you are required by law to fully execute and upload the form attachment entitled "Conflict of Interest Questionnaire - Form CIQ." If you accurately claimed no conflict above, you may disregard the form attachment entitled "Conflict of Interest Questionnaire - Form CIQ."

Have you uploaded this form if applicable?

Not Applicable

63 **Upload of Current W-9 Required**

Vendors are required by TIPS to upload a current, accurate W-9 Internal Revenue Service (IRS) Tax Form for your entity. This form will be utilized by TIPS to properly identify your entity.

You must confirm that you are responding to this solicitation under your legal entity name. Go now to your Supplier Profile in this eBid System and confirm that your profile reflects your "Legal Name" as it is listed on your W9.

64 **Regulatory Good Standing Certification**

Does Vendor certify that its entity is in good standing will all government entities and agencies, whether local, state, or federal, that regulate any aspect of Vendor's field of work or business operations?

If Vendor selects "No", Vendor must provide explanation on the following attribute question.

Yes

65 **Regulatory Good Standing Certification - Explanation - Continued**

If Vendor responded to the prior attribute that "No", Vendor is not in good standing, Vendor must provide an explanation of that lack of good standing here for TIPS consideration.

No response

66 **Instructions Only - Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion**

Instructions for Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion

1. By answering yes to the next Attribute question below, the vendor and prospective lower tier participant is providing the certification set out herein in accordance with these instructions.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and / or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms “covered transaction,” “debarred,” “suspended,” “ineligible,” “lower tier covered transaction,” “participants,” “person,” “primary covered transaction,” “principal,” “proposal” and “voluntarily excluded,” as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this form that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this form that it will include this clause titled “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction” without modification in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible or voluntarily excluded from participation in this transaction, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and / or debarment.

67 **Suspension or Debarment Certification**

Read the instructions in the attribute above and then answer the following accurately.

Vendor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

Does Vendor certify?

Yes

68 **Vendor Certification of Criminal History - Texas Education Code Chapter 22**

Texas Education Code Chapter 22 requires entities that contract with school districts to provide services to obtain criminal history record information regarding covered employees. Contractors must certify to the district that they have complied. Covered employees with disqualifying criminal histories are prohibited from serving at a school district pursuant to this law.

DEFINITIONS

Covered employees: Employees of a contractor or subcontractor who have or will have continuing duties related to the service to be performed at the District and have or will have direct contact with students. The District will be the final arbiter of what constitutes direct contact with students.

Disqualifying criminal history: Any conviction or other criminal history information designated by the District, or one of the following offenses, if at the time of the offense, the victim was under 18 or enrolled in a public school: (a) a felony offense under Title 5, Texas Penal Code; (b) an offense for which a defendant is required to register as a sex offender under Chapter 62, Texas Code of Criminal Procedure; or (c) an equivalent offense under federal law or the laws of another state.

Vendor certifies:

NONE (Section A): None of the employees of Vendor and any subcontractors are covered employees, as defined above. If this box is checked, I further certify that Contractor has taken precautions or imposed conditions to ensure that the employees of Vendor and any subcontractor will not become covered employees. Contractor will maintain these precautions or conditions throughout the time the contracted services are provided under this procurement.

OR

SOME (Section B): Some or all of the employees of Vendor and any subcontractor are covered employees. If this box is checked, I further certify that: (1) Vendor has obtained all required criminal history record information regarding its covered employees. None of the covered employees has a disqualifying criminal history; (2) If Vendor receives information that a covered employee subsequently has a reported criminal history, Vendor will immediately remove the covered employee from contract duties and notify the purchasing entity in writing within 3 business days; (3) Upon request, Vendor will provide the purchasing entity with the name and any other requested information of covered employees so that the purchasing entity may obtain criminal history record information on the covered employees; (4) If the purchasing entity objects to the assignment of a covered employee on the basis of the covered employee's criminal history record information, Vendor agrees to discontinue using that covered employee to provide services at the purchasing entity.

Which option does Vendor certify?

None

69 **Certification Regarding "Choice of Law" Terms with TIPS Members**

Vendor agrees that if any "Choice of Law" provision is included in any sales agreement/contract between Vendor and a TIPS Member, that clause must provide that the "Choice of Law" applicable to the sales agreement/contract between Vendor and TIPS Member shall be the state where the TIPS Member operates unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Choice of Law" clause that conflicts with these terms is rendered void and unenforceable.

If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration.

Does Vendor agree?

Yes

70 **Certification Regarding "Venue" Terms with TIPS Members**

Vendor agrees that if any "Venue" provision is included in any sales agreement/contract between Vendor and a TIPS Member, that clause must provide that the "Venue" for any litigation or alternative dispute resolution is shall be in the state and county where the TIPS Member operates unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Venue" clause that conflicts with these terms is rendered void and unenforceable.

If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration.

Does Vendor agree?

Yes

71 **Certification Regarding "Automatic Renewal" Terms with TIPS Members**

Vendor agrees that no TIPS Sale may incorporate an "Automatic Renewal" clause that exceeds month to month terms with which the TIPS Member must comply. All renewal terms incorporated into a TIPS Sale Supplemental Agreement shall only be valid and enforceable when Vendor received written confirmation of acceptance of the renewal term from the TIPS Member for the specific renewal term. The purpose of this clause is to avoid a TIPS Member inadvertently renewing a Supplemental Agreement during a period in which the governing body of the TIPS Member has not properly appropriated and budgeted the funds to satisfy the Agreement renewal. Any TIPS Sale Supplemental Agreement containing an "Automatic Renewal" clause that conflicts with these terms is rendered void and unenforceable.

If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration.

Does Vendor agree?

Yes

72	**Certification Regarding "Indemnity" Terms with TIPS Members** Texas and other jurisdictions restrict the ability of governmental entities to indemnify others. Vendor agrees that if any "Indemnity" provision which requires the TIPS Member to indemnify Vendor is included in any sales agreement/contract between Vendor and a TIPS Member, that clause must either be stricken or qualified by including that such indemnity is only permitted, "to the extent permitted by the laws and constitution of [TIPS Member's State]" unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing an "Indemnity" clause that conflicts with these terms is rendered void and unenforceable. If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration. Does Vendor agree? Yes
73	**Certification Regarding "Arbitration" Terms with TIPS Members** Vendor agrees that if any "Arbitration" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause may ***not*** require that the arbitration is mandatory or binding. Vendor agrees that if any "Arbitration" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause provides for only voluntary and non-binding arbitration unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Arbitration" clause that conflicts with these terms is rendered void and unenforceable. If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration. Does Vendor agree? Yes
74	**2 CFR PART 200 AND FEDERAL CONTRACT PROVISIONS EXPLANATION** TIPS and TIPS Members will sometimes seek to make purchases with federal funds. In accordance with 2 C.F.R. Part 200 of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (sometimes referred to as "EDGAR"),Vendor's response to the following questions labeled "2 CFR Part 200 or Federal Provision" will indicate Vendor's willingness and ability to comply with certain requirements which may be applicable to TIPS purchases paid for with federal funds, if accepted by Vendor. Your responses to the following questions labeled "2 CFR Part 200 or Federal Provision" will dictate whether TIPS can list this awarded contract as viable to be considered for a federal fund purchase. **Failure to certify all requirements labeled "2 CFR Part 200 or Federal Provision" will mean that your contract is listed as not viable for the receipt of federal funds. However, it will not prevent award.** If you do enter into a TIPS Sale when you are accepting federal funds, the contract between you and the TIPS Member will likely require these same certifications.

75 **2 CFR Part 200 or Federal Provision - Vendor Willingness to Accept Federal Funds**

This certification is not required by federal law. However, TIPS Members are public entities and qualifying non-profits which often receive federal funding and grants (ESSER, CARES Act, EDGAR, etc.) ***Accepting such funds often requires additional required certifications and responsibilities for Vendor.*** The following attribute questions include these required certifications. Your response to this questions, the following certifications, and other factors will determine whether your contract award will be deemed as eligible for federal fund expenditures by TIPS Members.

If awarded, is Vendor willing to accept payment for goods and services offered under this contract paid for by a TIPS Member with federal funds?

Yes

76 **2 CFR Part 200 or Federal Provision - Contracts**

Contracts for more than the simplified acquisition threshold currently set at $250,000 (2 CFR § 200.320), which is the inflation adjusted amount determined by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) as authorized by 41 U.S.C. 1908, must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate.

Notice: Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members reserve all rights and privileges under the applicable laws and regulations with respect to this procurement in the event of breach of contract by either party.

Does vendor agree?

Yes

77 **2 CFR Part 200 or Federal Provision - Termination**

Termination for cause and for convenience by the grantee or subgrantee including the manner by which it will be effected and the basis for settlement. (All contracts in excess of $10,000)

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members reserve the right to terminate any agreement in excess of $10,000 resulting from this procurement process for cause after giving the vendor an appropriate opportunity and up to 30 days, to cure the causal breach of terms and conditions. ESC Region 8 and TIPS Members reserve the right to terminate any agreement in excess of $10,000 resulting from this procurement process for convenience with 30 days notice in writing to the awarded vendor. The Vendor would be compensated for work performed and goods procured as of the termination date if for convenience of the ESC Region 8 and TIPS Members. Any award under this procurement process is not exclusive and the ESC Region 8 and TIPS reserves the right to purchase goods and services from other vendors when it is in the best interest of the ESC Region 8 and TIPS.

Does vendor agree?

Yes

78

2 CFR Part 200 or Federal Provision - Clean Air Act

Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended—Contracts and subgrants of amounts in excess of $150,000 must contain a provision that requires the non-Federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

Pursuant to the Clean Air Act, et al above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members require that the proposer certify that during the term of an award by the ESC Region 8 and TIPS Members resulting from this procurement process the vendor agrees to comply with all of the above regulations, including all of the terms listed and referenced therein.

Does vendor agree?

Yes

79

2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment

Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)—Contractors that apply or bid for an award exceeding $100,000 must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award.

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members require the proposer certify that during the term and during the life of any contract with ESC Region 8 and TIPS Members resulting from this procurement process the vendor certifies that it is in compliance with all applicable provisions of the Byrd Anti-Lobbying Amendment (31 U.S.C. 1352).

Does Vendor agree?

Yes

80 **2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment - Continued**

Applicable to Grants, Subgrants, Cooperative Agreements, and Contracts Exceeding $100,000 in Federal Funds

Submission of this certification is a prerequisite for making or entering into this transaction and is imposed by the Byrd Anti-Lobbying Amendment (31 U.S.C. 1352). This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of congress, or an employee of a Member of Congress in connection with the awarding of a Federal contract, the making of a Federal grant, the making of a Federal loan, the entering into a cooperative agreement, and the extension, continuation, renewal, amendment, or modification of a Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all covered subawards exceeding $100,000 in Federal funds at all appropriate tiers and that all subrecipients shall certify and disclose accordingly.

Does Vendor certify that it has NOT lobbied as described herein?

Yes

81 **2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment - Continued**

If you answered "No, Vendor does not certify - Lobbying to Report" to the above attribute question, you must download, read, execute, and upload the attachment entitled "Disclosure of Lobbying Activities - Standard Form - LLL", as instructed, to report the lobbying activities you performed or paid others to perform.

82 **2 CFR Part 200 or Federal Provision - Federal Rule**

Compliance with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15). (Contracts, subcontracts, and subgrants of amounts in excess of $100,000)

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members requires the proposer certify that in performance of the contracts, subcontracts, and subgrants of amounts in excess of $250,000, the vendor will be in compliance with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15).

Does vendor certify compliance?

Yes

83	**2 CFR Part 200 or Federal Provision - Procurement of Recovered Materials** A non-Federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include: (1) procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; (2) procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines. Does vendor certify that it is in compliance with these provisions? Yes
84	**2 CFR Part 200 or Federal Provision - Rights to Inventions** If the Federal award meets the definition of "funding agreement" under 37 CFR §401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency. Pursuant to the above, when the foregoing applies to ESC Region 8 and TIPS Members, Vendor certifies that during the term of an award resulting from this procurement process, Vendor agrees to comply with all applicable requirements as referenced in the Federal rule above. Does vendor certify? Yes

85	**2 CFR Part 200 or Federal Provision - Domestic Preferences for Procurements and Compliance with Buy America Provisions** As appropriate and to the extent consistent with law, TIPS Member Customers, to the greatest extent practicable under a Federal award, may provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). Vendor agrees that the requirements of this section will be included in all subawards including all contracts and purchase orders for work or products under this award, to the greatest extent practicable under a Federal award. For purposes of 2 CFR Part 200.322, "Produced in the United States" means, for iron and steel products, that all manufacturing processes, from the initial melting stag through the application of coatings, occurred in the United States. Moreover, for purposes of 2 CFR Part 200.322, "Manufactured products" means items and construction materials composed in whole or in part of non-ferrous metals such as aluminum, plastics and polymer-based products such as polyvinyl chloride pipe, aggregates such as concrete, glass, including optical fiber, and lumber. Vendor certifies that it is in compliance with all applicable provisions of the Buy America Act. Purchases made in accordance with the Buy America Act must still follow the applicable procurement rules calling for free and open competition. For purposes of 2 CFR Part 200.322, "Produced in the United States" means, for iron and steel products, that all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States. "Manufactured products" means items and construction materials composed in whole or in part of non-ferrous metals such as aluminum; plastics and polymer-based products such as polyvinyl chloride pipe; aggregates such as concrete; glass, including optical fiber; and lumber. Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, Vendor certifies that to the greatest extent practicable Vendor will provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). Does Vendor Certify? Yes

86 **2 CFR Part 200 or Federal Provision - Ban on Foreign Telecommunications**

ESC 8 and TIPS Members are prohibited from obligating or expending Federal financial assistance, to include loan or grant funds, to: (1) procure or obtain, (2) extend or renew a contract to procure or obtain, or (3) enter into a contract (or extend or renew a contract) to procure or obtain, equipment, services, or systems that use "covered telecommunications" equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. "Covered telecommunications" equipment is telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities), and physical security surveillance of critical infrastructure and other national security purposes, and video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities) for the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes detailed in 2 CFR § 200.216.

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, Vendor certifies that Vendor will not purchase equipment, services, or systems that use "covered telecommunications", as defined by 2 CFR §200.216 equipment or services as a substantial or essential component of any system, or as critical technology as part of any system.

Does vendor certify?

Yes

87 **2 CFR Part 200 or Federal Provision - Contract Cost & Price**

For contracts more than the simplified acquisition threshold currently set at $250,000, a TIPS Member may, in very rare circumstances, be required to negotiate profit as a separate element of the price pursuant to 2 C.F.R. 200.324(b). Under those circumstances, Vendor agrees to provide information and negotiate with the TIPS Member regarding profit as a separate element of the price. However, Vendor certifies that the total price charged by the Vendor shall not exceed the Vendor's TIPS pricing and pricing terms proposed.

Does Vendor certify?

Yes

88 **2 CFR Part 200 or Federal Provision - Equal Employment Opportunity**

Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members on any federally assisted construction contract, the equal

opportunity clause is incorporated by reference here.

Does Vendor Certify?

Yes

89

2 CFR Part 200 or Federal Provision - Davis Bacon Act Compliance

Texas Statute requires compliance with Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146- 3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non- Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

Pursuant to state and federal requirements, Vendor certifies that it will be in compliance with all applicable Davis-Bacon Act provisions if/when applicable.

Does Vendor certify?

Yes

90

2 CFR Part 200 or Federal Provision - Contract Work Hours and Safety Standards

Where applicable, all contracts awarded by ESC 8 and TIPS Members in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, Vendor certifies that during the term of an award for all contracts resulting from this procurement process, Vendor will be in compliance with all applicable provisions of the Contract Work Hours and Safety Standards Act.

Does Vendor certify?

Yes

91 **2 CFR Part 200 or Federal Provision - FEMA Fund Certification & Certification of Access to Records**

If and when Vendor accepts a TIPS purchase paid for in full or part with FEMA funds, Vendor certifies that:

(1) Vendor agrees to provide the TIPS Member, the FEMA Administrator, the Comptroller General of the United States, or any of their authorized representatives access to and rights to reproduce any books, documents, papers, and records of the Contractor which are directly pertinent to this contract, or any contract resulting from this procurement, for the purposes of making audits, examinations, excerpts, and transcriptions. This right also includes timely and reasonable access to Vendor's personnel for the purpose of interview and discussion relating to such documents. Vendor agrees to provide the FEMA Administrator or an authorized representatives access to construction or other work sites pertaining to the work being completed under the contract. Vendor acknowledges and agrees that no language in this contract or the contract with the TIPS Member is intended to prohibit audits or internal reviews by the FEMA Administrator or the Comptroller General of the United States.

(2) The Vendor shall not use the Department of Homeland Security's seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre-approval.

(3) The Vendor will comply with all applicable Federal law, regulations, executive orders, FEMA policies, procedures, and directives.

(4) The Federal Government is not a party to this contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract.

(5) The Vendor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to the Vendor's actions pertaining to this contract.

Does Vendor certify?

Yes, Vendor certifies

92 **2 CFR Part 200 or Federal Provision - Certification of Compliance with the Energy Policy and Conservation Act**

When appropriate and to the extent consistent with the law, Vendor certifies that it will comply with the Energy Policy and Conservation Act (42 U.S.C. 6321 et seq; 49 C.F.R. Part 18) and any state mandatory standards and policies relating to energy efficiency which are contained in applicable state energy conservation plans issued in compliance with the Act.

Does Vendor certify?

Yes

93	**2 CFR Part 200 or Federal Provision - Certification of Compliance with Never Contract with the Enemy** Where applicable, all contracts awarded by ESC 8 and TIPS Members in excess of $50,000.00, within the period of performance, and which are performed outside of the United States, including U.S. territories, are subject to the regulations implementing Never Contract with the Enemy in 2 CFR part 183. Per 2 CFR part 183, in the situation specified, ESC 8 and TIPS Members shall terminate any contract or agreement resulting from this procurement which violates the Never Contract with the Enemy regulation in 2 CFR part 183, including if Vendor is actively opposing the United States or coalition forces involved in a contingency operation in which members of the the Armed Forces are actively engaged in hostilities. Vendor certifies that it is neither an excluded entity under the System for Award Management (SAM) nor Federal Awardee Performance and Integrity Information System (FAPIIS) for any contract terminated due to Never Contract with the Enemy as a Termination for Material Failure to Comply. Does Vendor certify? Yes
94	**2 CFR Part 200 or Federal Provision - Certification of Compliance with EPA Regulations** For contracts resulting from this procurement, in excess of $100,000.00 and paid for with federal funds, Vendor certifies that Vendor will comply with all applicable standards, orders, regulations, and/or requirements issued pursuant to the Clean Air Act of 1970, as amended (42 U.S.C. 1857(h)), Section 508 of the Clean Water Act, as amended (33 U.S.C. 1368), Executive Order 117389 and Environmental Protection Agency Regulation, 40 CFR Part 15. Does Vendor certify? Yes
95	**2 CFR Part 200 or Federal Provision - Record Retention Requirements** For contracts resulting from this procurement, paid for by ESC 8 or TIPS Members with federal funds, Vendor certifies that Vendor will comply with the record retention requirements detailed in 2 CFR § 200.334. Vendor certifies that Vendor will retain all records as required by 2 CFR § 200.334 for a period of three years after final expenditure or financial reports, as applicable, and all other pending matters are closed. Does Vendor certify? Yes
96	**2 CFR Part 200 or Federal Provision - Subcontracting and Affirmative Steps for Small and Minority Businesses, Women's Business Enterprises, and Labor Surplus Area Firms.** Do you ever anticipate the possibility of subcontracting any of your work under this award if you are successful? If you respond "Yes", you must respond to the following attribute question accurately. If you respond "No", you may skip the following attribute question. Yes

97 **2 CFR Part 200 or Federal Provision - If "Yes" Response to Above Attribute - Continued - Subcontracting and Affirmative Steps for Small and Minority Businesses, Women's Business Enterprises, and Labor Surplus Area Firms.**

Only respond to this question if you responded "Yes" to the attribute question directly above. Skip this question if you responded "No" to the attribute question directly above.

Does Vendor certify that it will follow the following affirmative steps? Federal Regulation 2 CFR §200.321 Contracting with small and minority businesses, women's business enterprises, and labor surplus area firms. (a)The non-Federal entity must take all necessary affirmative steps to assure that minority businesses, women's business enterprises, and labor surplus area firms are used when possible.

(b) Affirmative steps must include:

(1) Placing qualified small and minority businesses and women's business enterprises on solicitation lists;

(2) Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;

(3) Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;

(4) Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises;

(5) Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce ; and

(6) Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs(1) through (5) of this section.

Does Vendor certify?

Yes

98 **ACKNOWLEDGMENT & BINDING CORPORATE AUTHORITY**

By submitting this proposal, the individual(s) submitting on behalf of the Vendor certify that they are authorized by Vendor to complete and submit this proposal on behalf of Vendor and that this proposal was duly submitted on behalf of Vendor by authority of its governing body, if any, and within the scope of its corporate powers.

Vendor further certifies that it has read, examined, and understands all portions of this solicitation including but not limited to all attribute questions, attachments, solicitation documents, bid notes, and the Vendor Agreement(s). Vendor certifies that, if necessary, Vendor has consulted with counsel in understanding all portions of this solicitation.

TIPS CONTRACT 230105

REQUIRED CONFIDENTIALITY CLAIM FORM

(VENDOR MUST COMPLETE THE FOLLOWING VENDOR INFORMATION)

Vendor Entity Name: United Data Technologies, Inc. dba UDT

Vendor Authorized Signatory Name: David Wiese

Vendor Authorized Signatory Title: VP / SLED Texas

Vendor Authorized Signatory Email: Dwiese@udtonline.com

Vendor Address: 2900 Monarch Lakes Blvd, Suite 300

City: Miramar State: Florida Zip Code: 33027

Vendor agrees that it is voluntarily providing its data (including but not limited to: Vendor information, Vendor documentation, Vendor's proposal, Vendor pricing submitted or provided to TIPS, TIPS contract documents, TIPS correspondence, Vendor logos and images, Vendor's contact information, Vendor's brochures and commercial information, Vendor's financial information, Vendor's certifications, and any other Vendor information or documentation submitted to TIPS by Vendor and its agents) (Hereinafter, "Vendor Data") to TIPS. Vendor understands and agrees that TIPS is a government entity subject to public information laws including but not limited to Texas Government Code (TGC) Chapter 552. Vendor agrees that regardless of confidentiality designations herein, Vendor's submission of a proposal constitutes Vendor's consent to the disclosure and release of Vendor's Data and comprehensive proposal, including any information deemed confidential or proprietary herein, to and by TIPS Members.

Notwithstanding the foregoing permissible release to TIPS Members, if Vendor considers any portion of Vendor's proposal to be otherwise confidential and not subject to public disclosure pursuant to public information laws, including but not limited to TGC Chapter 552, Vendor must properly execute ***Option 1 only*** below, attach to this PDF all documents and information that Vendor deems confidential, and upload the consolidated documentation. Regardless of the Option selected below, this form must be completed and uploaded to the "Response Attachments" section of the eBid System entitled "Required Confidentiality Claim Form." Execution and submission of this form is the sole indicator of whether Vendor considers any Vendor Data confidential in the event TIPS receives a request, a Public Information Request, or subpoena. If TIPS receives a request, any responsive documentation not deemed confidential by you through proper execution of Option 1 of this form will be automatically released. For information deemed confidential by you through proper execution of Option 1 of this form, TIPS will follow procedures of controlling statute(s) regarding withholding that documentation and shall not be liable for any release of information required by law, including Attorney General opinion or court order.

(VENDOR MUST COMPLETE ONE OF THE TWO OPTIONS AND UPLOAD IN THE EBID SYSTEM)

OPTION 1 – DESIGNATING CONFIDENTIAL MATERIALS – YES, VENDOR HAS ATTACHED CONFIDENTIAL MATERIALS

(*Confirm each bullet point and sign below*)

- Vendor claims some Vendor Data confidential to the extent permitted by TGC Chapter 552 and other applicable law.
- Vendor attached to this PDF all potentially confidential Vendor Data and listed the number of attached pages below.
- Vendor's authorized signatory has signed below and shall upload this document in the proper location in the eBid System.
- Vendor agrees that TIPS shall not be liable for any release of confidential information required by law.

Number of pages attached deemed confidential: _____

Authorized Signature: _____

OPTION 2 – WAIVER OF CONFIDENTIALITY – NO, VENDOR HAS NOT ATTACHED CONFIDENTIAL MATERIALS

(*Confirm each bullet point and sign below*)

By signing for Option 2 below, Vendor expressly waives any confidentiality claim for all Vendor Data submitted in relation to this proposal and resulting contract. Vendor confirms that TIPS may freely release Vendor Data submitted in relation to this proposal or resulting contract to any requestor. Vendor agrees that TIPS shall not be responsible or liable for any use or distribution of Vendor Data by TIPS or TIPS Members.

- Vendor's authorized signatory has signed below and shall upload this document in the proper location in the eBid System.
- Vendor agrees that TIPS shall not be liable for any release of confidential information required by law.

Knox County, TN

and

Carahsoft Technology Corporation

This Contract, by and between **Knox County, TN** through its governing body and authorized representative, hereinafter referred to as "**County,**" and **Carahsoft Technology Corporation,** hereinafter referred to as "**Contractor**".

Whereas, Knox County has agreed to enter into this Contract with Carahsoft Technology Corporation pursuant to the provisions of the Cooperative Purchasing Agreement (From the NASPO ValuePoint Contract #AR2472) for Cloud Solutions, as amended by this contract and;

Whereas, Contractor agrees and undertakes to provide County with Cloud Solutions. Further, in accordance with the lawful directions of the County, the Contractor agrees in all respects to be governed by this document and the attachments hereto.

Now, therefore, in consideration of mutual covenants and promises contained herein, the County agrees to enter into this Contract with the Contractor and hereby incorporates by reference the solicitation, terms, conditions, and pricing of the NASPO ValuePoint Contract, except as herein provided.

Witnesseth:

1. Term of this Contract. This Contract commences on 1st day of August 2025 and ends 31st day of July 2028 unless terminated in conformity with the terms of this Contract as contained in paragraphs 3 and 19. This will result in a total of three (3) years.

2. Additions or Deletions. Knox County reserves the right to add or delete goods and/or services as the need arises. If goods and/or services are to be added, County and the Contractor will arrive at a mutually agreed price. Any additions must be for goods and/or services that are included in the NASPO ValuePoint Contract.

3. Appropriations. In the event no funds are appropriated by County for the Cloud Solutions in any fiscal year or insufficient funds exist to provide the services, then the Contract shall expire upon the expenditure of previously appropriated funds or the end of the current fiscal year, whichever occurs first, with no further obligations owed to or by either party.

4. Books and records. Contractor shall maintain all books, documents, accounting records and other evidence pertaining to the services provided under this Contract and make such materials available at their offices at all reasonable times during the Contract period and for three (3) years from the date of the final payment under the Contract for inspection by County or by any other

governmental entity or agency participating in the funding of this Contract, or any authorized agents thereof; copies of said records to be furnished if requested.

Such records shall not include those books, documents and accounting records that represent the Contractor's costs of manufacturing, acquiring or delivering the products and services governed by this Contract.

5. Compliance with all federal, state, and municipal laws. Contractor is assumed to be familiar with and agrees to observe and comply with all federal, state, and local laws, statutes, ordinances, and regulations in any manner affecting the provision of Cloud Solutions, and all instructions and prohibitive orders issued regarding this work and shall obtain all necessary permits.

6. Contractor shall indemnify**,** defend, save and hold harmless County, its officers, agents and employees from all suits, claims, actions or damages of any nature brought because of, arising out of, or due to breach of the Contract by Contractor, its subcontractors, suppliers, agents or employees or due to any negligent act or occurrence or any omission or commission of Contractor, its subcontractors, suppliers, agents, or employees.

7. Delivery. Contractor shall render the Cloud Solutions in accordance with th**e** Contractor's schedule and coordinated with the County or their designees.

8. Governing Law and Venue. The law of the State of Tennessee shall govern this Contract. The Chancery Court and/or the Circuit Court of Knox County Tennessee, shall have exclusive and concurrent jurisdiction of any disputes which arise hereunder.

9. Independent Contractor. Contractor acknowledges that Contractor and its employees serve as independent Contractors and that County shall not be in any manner responsible for any payment, insurance, or incurred liability.

10. Indemnification – Hold Harmless. Contractor shall indemnify, defend, save and hold harmless Knox County, its officers, agents and employees from all suits, claims, actions or damages of any nature brought because of, arising out of, or due to breach of the Contract by Contractor, its subcontractors, suppliers, agents, or employees or due to any negligent act or occurrence or any omission or commission of Contractor, its subcontractors, suppliers, agents or employees. In any event, in respect of any claim, demand or action arising out of this agreement, Knox County shall be limited to receiving actual and direct damages in a maximum aggregate amount equal to one million dollars ($1,000,000).

11. Invoicing and reporting requirements. Contractor shall invoice County for the annual charge for users.

Invoices shall be mailed in duplicate to:

Knox County Schools
912 Gay Street, 12th
Floor Suite 1421 A
Knoxville, TN 379902

12. Limitations of liability. In no event shall County be liable for any indirect, incidental, consequential, special or exemplary damages or lost profits, even if County has been advised of the possibility of such damages.

13. Nondiscrimination statement. Contractor agrees that no person on the grounds of handicap, age, race, color, religion, sex or national origin shall be excluded from participation in, or be denied benefits of, or be otherwise subjected to discrimination in the performance of this Contract, or in the employment practices of Contractor. Contractor shall upon request show proof of such non-discrimination, and shall post in conspicuous places available to all employees and applicants notices of non-discrimination.

14. Payment. The County shall pay Contractor per the rates and discounts as stated in the NASPO ValuePoint Contract, as complete payment for Cloud Solutions.

15. Prohibition against assignment. Contractor shall not assign this Contract to any party, company, partnership, incorporation, or person without prior specific written consent of County.

16. Right to inspect. County reserves the right to make periodic inspections of the manner and means the services are performed.

17. Severability clause. If any provision of this Contract is declared illegal, void, or unenforceable, the remaining provisions shall not be affected but shall remain in force and in effect.

18. Tax Compliance. Pursuant to Resolution R-07-1-903 passed by the Commission of Knox County, Tennessee, Contractor hereby acknowledges, by submission of its bid and signature, that it is current in its respective Federal, State, County, and City taxes of whatever kind or nature and is not delinquent in any way. Delinquent status must be disclosed or Contractor risks debarment by the Knox County Procurement Division.

19. Tennessee Open Records Act. Contractor understands and agrees that County is a governmental agency subject to the Tennessee Public Records Act, Title 10, Chapter 7, Tennessee Code Annotated. Under the provisions of this Act, any and all county contracts, documents etc., are open to public review, except as otherwise provided by law. County will comply with any request pursuant to this Act and shall have no liability for documents requested and released under this Act.

20. Termination. County may terminate this Contract with or without cause upon written notice of not less than sixty (60) days. Upon termination, County will pay for services satisfactorily

completed but not yet invoiced. Contractor shall not perform additional work without the prior written permission of County.

Should the Contractor fail to provide the Cloud Solutions detailed herein, the County will communicate the problem(s) to the Contractor both verbally and in writing and keep a written record as to what the problem(s) are and when the Contractor was contacted.

The Contractor shall rectify the problem within the time frame established by Tennessee State Law. If the same or other problems persist or reoccur, the County may terminate the Contract.

In the event Contractor intends to interrupt or discontinue service under this Contract, Contractor agrees to give the County at least one hundred twenty (120) day advance written notice of said interruption or discontinuance of service prior to interrupting or discontinuing same. Any interruption or discontinuance of service without said advance notice shall constitute a material breach of this Contract.

21. Contractor shall not sell, disburse, disseminate or in any other way provide information to any outside party without the expressed written consent of County.

22. No Arbitration. The parties agree that this Contract and any disputes which arise here under **shall not** be subject to arbitration.

23. Contract documents. It is mutually agreed by both parties that the following documents are made part of this Contract and are incorporated herein by reference:

A. This Contract
B. Contract between NASPO ValuePoint and Contractor
C. Contractor's Certificate of Insurance
D. Contractor's Quote

In the event of inconsistent or conflicting provisions of this contract and the Attachments B-E referenced above, the following descending order of precedence shall prevail: 1. This contract, 2. Attachment B, 3. Attachment C, 4. Attachment D.

It is agreed that this Contract represents the entire Contract between the parties and no prior representations, promises, and agreements, oral or otherwise, not embodied herein shall be of any force or effect.

SEE NEXT PAGE FOR SIGNATURES

In witness whereof, the parties hereto have caused this Contract to be executed in one original as of the latest date written below.

(Revision 16 June 2016)

This document includes salient or non-standard provisions extracted from NASPO/ValuePoint Model Contract for Cloud Services.

February 17, 2016.

Attachment A: NASPO ValuePoint Master Agreement Terms and Conditions

1. Master Agreement Order of Precedence

a. Any Order placed under this Master Agreement shall consist of the following documents:

(1) A Participating Entity's Participating Addendum[1] ("PA");
(2) NASPO ValuePoint Master Agreement Terms & Conditions, including the applicable Exhibits[2] to the Master Agreement;
(3) The Solicitation;
(4) Contractor's response to the Solicitation, as revised (if permitted) and accepted by the Lead State; and
(5) A Service Level Agreement issued against the Participating Addendum.

b. These documents shall be read to be consistent and complementary. Any conflict among these documents shall be resolved by giving priority to these documents in the order listed above. Contractor terms and conditions that apply to this Master Agreement are only those that are expressly accepted by the Lead State and must be in writing and attached to this Master Agreement as an Exhibit or Attachment.

2. Definitions - Unless otherwise provided in this Master Agreement, capitalized terms will have the meanings given to those terms in this Section.

Confidential Information means any and all information of any form that is marked as confidential or would by its nature be deemed confidential obtained by Contractor or its employees or agents in the performance of this Master Agreement, including, but not necessarily limited to (1) any Purchasing Entity's records, (2) personnel records, and (3) information concerning individuals, is confidential information of Purchasing Entity.

Contractor means the person or entity providing solutions under the terms and conditions set forth in this Master Agreement. Contractor also includes its employees, subcontractors, agents and affiliates who are providing the services agreed to under the

[1] A Sample Participating Addendum will be published after the contracts have been awarded.
[2] The Exhibits comprise the terms and conditions for the service models: PaaS, IaaS, and PaaS.

This document includes salient or non-standard provisions extracted from NASPO/ValuePoint Model Contract for Cloud Services.

February 17, 2016.

Master Agreement.

Data means all information, whether in oral or written (including electronic) form, created by or in any way originating with a Participating Entity or Purchasing Entity, and all information that is the output of any computer processing, or other electronic manipulation, of any information that was created by or in any way originating with a Participating Entity or Purchasing Entity, in the course of using and configuring the Services provided under this Agreement.

Data Breach means any actual or reasonably suspected non-authorized access to or acquisition of computerized Non-Public Data or Personal Data that compromises the security, confidentiality, or integrity of the Non-Public Data or Personal Data, or the ability of Purchasing Entity to access the Non-Public Data or Personal Data.

Data Categorization means the process of risk assessment of Data. See also “High Risk Data”, “Moderate Risk Data” and “Low Risk Data”.

Disabling Code means computer instructions or programs, subroutines, code, instructions, data or functions, (including but not limited to viruses, worms, date bombs or time bombs), including but not limited to other programs, data storage, computer libraries and programs that self-replicate without manual intervention, instructions programmed to activate at a predetermined time or upon a specified event, and/or programs purporting to do a meaningful function but designed for a different function, that alter, destroy, inhibit, damage, interrupt, interfere with or hinder the operation of the Purchasing Entity’s’ software, applications and/or its end users processing environment, the system in which it resides, or any other software or data on such system or any other system with which it is capable of communicating.

Fulfillment Partner means a third-party contractor qualified and authorized by Contractor, and approved by the Participating State under a Participating Addendum, who may, to the extent authorized by Contractor, fulfill any of the requirements of this Master Agreement including but not limited to providing Services under this Master Agreement and billing Customers directly for such Services. Contractor may, upon written notice to the Participating State, add or delete authorized Fulfillment Partners as necessary at any time during the contract term. Fulfillment Partner has no authority to amend this Master Agreement or to bind Contractor to any additional terms and conditions.

High Risk Data is as defined in FIPS PUB 199, Standards for Security Categorization of Federal Information and Information Systems (“High Impact Data”).

Infrastructure as a Service (IaaS) as used in this Master Agreement is defined the capability provided to the consumer to provision processing, storage, networks, and other fundamental computing resources where the consumer is able to deploy and run

arbitrary software, which can include operating systems and applications. The consumer does not manage or control the underlying cloud infrastructure but has control over operating systems, storage, deployed applications; and possibly limited control of select networking components (e.g., host firewalls).

Intellectual Property means any and all patents, copyrights, service marks, trademarks, trade secrets, trade names, patentable inventions, or other similar proprietary rights, in tangible or intangible form, and all rights, title, and interest therein.

Lead State means the State centrally administering the solicitation and any resulting Master Agreement(s).

Low Risk Data is as defined in FIPS PUB 199, Standards for Security Categorization of Federal Information and Information Systems ("Low Impact Data").

Master Agreement means this agreement executed by and between the Lead State, acting on behalf of NASPO ValuePoint, and the Contractor, as now or hereafter amended.

Moderate Risk Data is as defined in FIPS PUB 199, Standards for Security Categorization of Federal Information and Information Systems ("Moderate Impact Data").

NASPO ValuePoint is the NASPO ValuePoint Cooperative Purchasing Program, facilitated by the NASPO Cooperative Purchasing Organization LLC, a 501(c)(3) limited liability company (doing business as NASPO ValuePoint) is a subsidiary organization the National Association of State Procurement Officials (NASPO), the sole member of NASPO ValuePoint. The NASPO ValuePoint Cooperative Purchasing Organization facilitates administration of the cooperative group contracting consortium of state chief procurement officials for the benefit of state departments, institutions, agencies, and political subdivisions and other eligible entities (i.e., colleges, school districts, counties, cities, some nonprofit organizations, etc.) for all states and the District of Columbia. The NASPO ValuePoint Cooperative Development Team is identified in the Master Agreement as the recipient of reports and may be performing contract administration functions as assigned by the Lead State.

Non-Public Data means High Risk Data and Moderate Risk Data that is not subject to distribution to the public as public information. It is deemed to be sensitive and confidential by the Purchasing Entity because it contains information that is exempt by statute, ordinance or administrative rule from access by the general public as public information.

Participating Addendum means a bilateral agreement executed by a Contractor and a Participating Entity incorporating this Master Agreement and any other additional Participating Entity specific language or other requirements, e.g. ordering procedures

specific to the Participating Entity, other terms and conditions.

Participating Entity means a state, or other legal entity, properly authorized to enter into a Participating Addendum.

Participating State means a state, the District of Columbia, or one of the territories of the United States that is listed in the Request for Proposal as intending to participate. Upon execution of the Participating Addendum, a Participating State becomes a Participating Entity.

Personal Data means data alone or in combination that includes information relating to an individual that identifies the individual by name, identifying number, mark or description can be readily associated with a particular individual and which is not a public record. Personal Information may include the following personally identifiable information (PII): government-issued identification numbers (e.g., Social Security, driver's license, passport); financial account information, including account number, credit or debit card numbers; or Protected Health Information (PHI) relating to a person.

Platform as a Service (PaaS) as used in this Master Agreement is defined as the capability provided to the consumer to deploy onto the cloud infrastructure consumer-created or -acquired applications created using programming languages and tools supported by the provider. This capability does not necessarily preclude the use of compatible programming languages, libraries, services, and tools from other sources. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, or storage, but has control over the deployed applications and possibly application hosting environment configurations.

Product means any deliverable under this Master Agreement, including Services, software, and any incidental tangible goods.

Protected Health Information (PHI) means individually identifiable health information transmitted by electronic media, maintained in electronic media, or transmitted or maintained in any other form or medium. PHI excludes education records covered by the Family Educational Rights and Privacy Act (FERPA), as amended, 20 U.S.C. 1232g, records described at 20 U.S.C. 1232g(a)(4)(B)(iv) and employment records held by a covered entity in its role as employer. PHI may also include information that is a subset of health information, including demographic information collected from an individual, and (1) is created or received by a health care provider, health plan, employer or health care clearinghouse; and (2) relates to the past, present or future physical or mental health or condition of an individual; the provision of health care to an individual; or the past, present or future payment for the provision of health care to an individual; and (a) that identifies the individual; or (b) with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

This document includes salient or non-standard provisions extracted from NASPO/ValuePoint Model Contract for Cloud Services.

February 17, 2016.

Purchasing Entity means a state, city, county, district, other political subdivision of a State, and a nonprofit organization under the laws of some states if authorized by a Participating Addendum, who issues a Purchase Order against the Master Agreement and becomes financially committed to the purchase.

Services mean any of the specifications described in the Scope of Services that are supplied or created by the Contractor pursuant to this Master Agreement.

Security Incident means the possible or actual unauthorized access to a Purchasing Entity's Non-Public Data and Personal Data the Contractor believes could reasonably result in the use, disclosure or theft of a Purchasing Entity's Non-Public Data within the possession or control of the Contractor. A Security Incident also includes a major security breach to the Contractor's system, regardless if Contractor is aware of unauthorized access to a Purchasing Entity's Non-Public Data. A Security Incident may or may not turn into a Data Breach.

Service Level Agreement (SLA) means a written agreement between both the Purchasing Entity and the Contractor that is subject to the terms and conditions in this Master Agreement and relevant Participating Addendum unless otherwise expressly agreed in writing between the Purchasing Entity and the Contractor. SLAs should include: (1) the technical service level performance promises, (i.e. metrics for performance and intervals for measure), (2) description of service quality, (3) identification of roles and responsibilities, (4) remedies, such as credits, and (5) an explanation of how remedies or credits are calculated and issued.

Software as a Service (SaaS) as used in this Master Agreement is defined as the capability provided to the consumer to use the Contractor's applications running on a Contractor's infrastructure (commonly referred to as 'cloud infrastructure). The applications are accessible from various client devices through a thin client interface such as a Web browser (e.g., Web-based email), or a program interface. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, storage, or even individual application capabilities, with the possible exception of limited user-specific application configuration settings.

Solicitation means the documents used by the State of Utah, as the Lead State, to obtain Contractor's Proposal.

Statement of Work means a written statement in a solicitation document or contract that describes the Purchasing Entity's service needs and expectations.

6. Discount Guarantee Period: All discounts must be guaranteed for the entire term of the Master Agreement. Participating Entities and Purchasing Entities shall receive the immediate benefit of price or rate reduction of the services provided under this Master Agreement. A price or rate reduction will apply automatically to the Master Agreement

and an amendment is not necessary.

8. Confidentiality, Non-Disclosure, and Injunctive Relief

a. Confidentiality. Contractor acknowledges that it and its employees or agents may, in the course of providing a Product under this Master Agreement, be exposed to or acquire information that is confidential to Purchasing Entity's or Purchasing Entity's clients. Any reports or other documents or items (including software) that result from the use of the Confidential Information by Contractor shall be treated in the same manner as the Confidential Information. Confidential Information does not include information that (1) is or becomes (other than by disclosure by Contractor) publicly known; (2) is furnished by Purchasing Entity to others without restrictions similar to those imposed by this Master Agreement; (3) is rightfully in Contractor's possession without the obligation of nondisclosure prior to the time of its disclosure under this Master Agreement; (4) is obtained from a source other than Purchasing Entity without the obligation of confidentiality, (5) is disclosed with the written consent of Purchasing Entity or; (6) is independently developed by employees, agents or subcontractors of Contractor who can be shown to have had no access to the Confidential Information.

b. Non-Disclosure. Contractor shall hold Confidential Information in confidence, using at least the industry standard of confidentiality, and shall not copy, reproduce, sell, assign, license, market, transfer or otherwise dispose of, give, or disclose Confidential Information to third parties or use Confidential Information for any purposes whatsoever other than what is necessary to the performance of Orders placed under this Master Agreement. Contractor shall advise each of its employees and agents of their obligations to keep Confidential Information confidential. Contractor shall use commercially reasonable efforts to assist Purchasing Entity in identifying and preventing any unauthorized use or disclosure of any Confidential Information. Without limiting the generality of the foregoing, Contractor shall advise Purchasing Entity, applicable Participating Entity, and the Lead State immediately if Contractor learns or has reason to believe that any person who has had access to Confidential Information has violated or intends to violate the terms of this Master Agreement, and Contractor shall at its expense cooperate with Purchasing Entity in seeking injunctive or other equitable relief in the name of Purchasing Entity or Contractor against any such person. Except as directed by Purchasing Entity, Contractor will not at any time during or after the term of this Master Agreement disclose, directly or indirectly, any Confidential Information to any person, except in accordance with this Master Agreement, and that upon termination of this Master Agreement or at Purchasing Entity's request, Contractor shall turn over to Purchasing Entity all documents, papers, and other matter in Contractor's possession that embody Confidential Information. Notwithstanding the foregoing, Contractor may keep one copy of such Confidential Information necessary for quality assurance, audits and evidence of the performance of this Master Agreement.

c. Injunctive Relief. Contractor acknowledges that breach of this section, including disclosure of any Confidential Information, will cause irreparable injury to Purchasing

Entity that is inadequately compensable in damages. Accordingly, Purchasing Entity may seek and obtain injunctive relief against the breach or threatened breach of the foregoing undertakings, in addition to any other legal remedies that may be available. Contractor acknowledges and agrees that the covenants contained herein are necessary for the protection of the legitimate business interests of Purchasing Entity and are reasonable in scope and content.

d. Purchasing Entity Law. These provisions shall be applicable only to extent they are not in conflict with the applicable public disclosure laws of any Purchasing Entity.

9. Right to Publish: Throughout the duration of this Master Agreement, Contractor must secure prior approval from the Lead State or Participating Entity for the release of any information that pertains to the potential work or activities covered by the Master Agreement , including but not limited to reference to or use of the Lead State or a Participating Entity's name, Great Seal of the State, Coat of Arms, any Agency or other subunits of the State government, or any State official or employee, for commercial promotion which is strictly prohibited. News releases or release of broadcast e-mails pertaining to this Master Agreement or Participating Addendum shall not be made without prior written approval of the Lead State or a Participating Entity.

The Contractor shall not make any representations of NASPO ValuePoint's opinion or position as to the quality or effectiveness of the services that are the subject of this Master Agreement without prior written consent. Failure to adhere to this requirement may result in termination of the Master Agreement for cause.

11. Changes in Contractor Representation: The Contractor must notify the Lead State of changes in the Contractor's key administrative personnel, in writing within 10 calendar days of the change. The Lead State reserves the right to approve changes in key personnel, as identified in the Contractor's proposal. The Contractor agrees to propose replacement key personnel having substantially equal or better education, training, and experience as was possessed by the key person proposed and evaluated in the Contractor's proposal.

13. Indemnification and Limitation of Liability

a. The Contractor shall defend, indemnify and hold harmless NASPO, NASPO ValuePoint, the Lead State, Participating Entities, and Purchasing Entities, along with their officers, agents, and employees as well as any person or entity for which they may be liable, from and against claims, damages or causes of action including reasonable attorneys' fees and related costs for any death, bodily injury, or damage to real or tangible property arising directly or indirectly from the negligent or wrongful act(s), error(s), or omission(s) of the Contractor, its employees or subcontractors or volunteers, at any tier, relating to the performance under the Master Agreement.

b. Indemnification – Intellectual Property. The Contractor shall defend, indemnify and hold harmless NASPO, NASPO ValuePoint, the Lead State, Participating Entities, Purchasing Entities, along with their officers, agents, and employees as well as any

person or entity for which they may be liable ("Indemnified Party"), from and against claims, damages or causes of action including reasonable attorneys' fees and related costs arising out of the claim that the Product or its use, infringes Intellectual Property rights ("Intellectual Property Claim") of another person or entity.

(1) The Contractor's obligations under this section shall not extend to:

a. Any use of the Services provided hereunder not contemplated in the product documentation.
b. Any use of the Services provided hereunder in combination with other products not contemplated hereunder or in the documentation, any use of modification of the Services provided hereunder except as permitted by this Agreement.

(2) The Indemnified Party shall notify the Contractor within a reasonable time after receiving notice of an Intellectual Property Claim. Even if the Indemnified Party fails to provide reasonable notice, the Contractor shall not be relieved from its obligations unless the Contractor can demonstrate that it was prejudiced in defending the Intellectual Property Claim resulting in increased expenses or loss to the Contractor and then only to the extent of the prejudice or expenses. If the Contractor promptly and reasonably investigates and defends any Intellectual Property Claim, it shall have control over the defense and settlement of it. However, the Indemnified Party must consent in writing for any money damages or obligations for which it may be responsible. The Indemnified Party shall furnish, at the Contractor's reasonable request and expense, information and assistance necessary for such defense. If the Contractor fails to vigorously pursue the defense or settlement of the Intellectual Property Claim, the Indemnified Party may assume the defense or settlement of it and the Contractor shall be liable for all costs and expenses, including reasonable attorneys' fees and related costs, incurred by the Indemnified Party in the pursuit of the Intellectual Property Claim. Unless otherwise agreed in writing, this section is not subject to any limitations of liability in this Master Agreement or in any other document executed in conjunction with this Master Agreement.

b. Except as otherwise set forth in the Indemnification Paragraphs above, the limit of liability shall be as follows:

i. Contractor's liability for any claim, loss or liability arising out of, or connected with the Services provided, and whether based upon default, or other liability such as breach of contract, warranty, negligence, misrepresentation or otherwise, shall in no case exceed direct damages in: (i) an amount equal to two (2) times the charges specified in the Purchase Order for the Services, or parts thereof forming the basis of the Purchasing Entity's claim, (said amount not to exceed a total of twelve (12) months charges payable under the applicable

Purchase Order) or (ii) two million dollars ($2,000,000), whichever is greater.
ii. The Purchasing Entity may retain such monies from any amount due Contractor as may be necessary to satisfy any claim for damages, costs and the like asserted against the Purchasing Entity unless Contractor at the time of the presentation of claim shall demonstrate to the Purchasing Entity's satisfaction that sufficient monies are set aside by the Contractor in the form of a bond or through insurance coverage to cover associated damages and other costs.
iii. Notwithstanding the above, neither the Contractor nor the Purchasing Entity shall be liable for any consequential, indirect or special damages of any kind which may result directly or indirectly from such performance, including, without limitation, damages resulting from loss of use or loss of profit by the Purchasing Entity, the Contractor, or by others.

iv. The limitations of liability in Section 43 will not apply to claims for bodily injury or death as set forth in Section 13, and Section 30 when made applicable under a specific purchase order.

16. Insurance

a. Unless otherwise agreed in a Participating Addendum, Contractor shall, during the term of this Master Agreement, maintain in full force and effect, the insurance described in this section. Contractor shall acquire such insurance from an insurance carrier or carriers licensed to conduct business in each Participating Entity's state and having a rating of A-, Class VII or better, in the most recently published edition of Best's Reports. Failure to buy and maintain the required insurance may result in this Master Agreement's termination or, at a Participating Entity's option, result in termination of its Participating Addendum.

b. Coverage shall be written on an occurrence basis. The minimum acceptable limits shall be as indicated below, with no deductible for each of the following categories:

(1) Commercial General Liability covering premises operations, independent contractors, products and completed operations, blanket contractual liability, personal injury (including death), advertising liability, and property damage, with a limit of not less than $1 million per occurrence/$3 million general aggregate;

(2) CLOUD MINIMUM INSURANCE COVERAGE:

Level of Risk	**Data Breach and Privacy/Cyber Liability including Technology Errors and Omissions** Minimum Insurance Coverage	**Crime Insurance** Minimum Insurance Coverage
Low	$2,000,000	$2,000,000

Moderate	$5,000,000	$5,000,000
High	$10,000,000	$10,000,000

(3) Contractor must comply with any applicable State Workers Compensation or Employers Liability Insurance requirements.

(4) Professional Liability. As applicable, Professional Liability Insurance Policy in the minimum amount of $1,000,000 per occurrence and $1,000,000 in the aggregate, written on an occurrence form that provides coverage for its work undertaken pursuant to each Participating Addendum.

c. Contractor shall pay premiums on all insurance policies. Such policies shall also reference this Master Agreement and shall have a condition that they not be revoked by the insurer until thirty (30) calendar days after notice of intended revocation thereof shall have been given to Purchasing Entity and Participating Entity by the Contractor.

d. Prior to commencement of performance, Contractor shall provide to the Lead State a written endorsement to the Contractor's general liability insurance policy or other documentary evidence acceptable to the Lead State that (1) names the Participating States identified in the Request for Proposal as additional insureds, (2) provides that no material alteration, cancellation, non-renewal, or expiration of the coverage contained in such policy shall have effect unless the named Participating State has been given at least thirty (30) days prior written notice, and (3) provides that the Contractor's liability insurance policy shall be primary, with any liability insurance of any Participating State as secondary and noncontributory. Unless otherwise agreed in any Participating Addendum, the Participating Entity's rights and Contractor's obligations are the same as those specified in the first sentence of this subsection. Before performance of any Purchase Order issued after execution of a Participating Addendum authorizing it, the Contractor shall provide to a Purchasing Entity or Participating Entity who requests it the same information described in this subsection.

e. Contractor shall furnish to the Lead State, Participating Entity, and, on request, the Purchasing Entity copies of certificates of all required insurance within thirty (30) calendar days of the execution of this Master Agreement, the execution of a Participating Addendum, or the Purchase Order's effective date and prior to performing any work. The insurance certificate shall provide the following information: the name and address of the insured; name, address, telephone number and signature of the authorized agent; name of the insurance company (authorized to operate in all states); a description of coverage in detailed standard terminology (including policy period, policy number, limits of liability, exclusions and endorsements); and an acknowledgment of the requirement for notice of cancellation. Copies of renewal certificates of all required insurance shall be furnished within thirty (30) days after any renewal date. These certificates of insurance must expressly indicate compliance with each and every insurance requirement specified in this section. Failure to provide evidence of coverage

may, at sole option of the Lead State, or any Participating Entity, result in this Master Agreement's termination or the termination of any Participating Addendum.

f. Coverage and limits shall not limit Contractor's liability and obligations under this Master Agreement, any Participating Addendum, or any Purchase Order.

17. Laws and Regulations: Any and all Services offered and furnished shall comply fully with all applicable Federal and State laws and regulations.

The federal and state laws, regulations, policies, standards, and guidelines that Contractors doing business with the Participating Entities must be aware of, include, but not limited to: Criminal Justice Information Services (CJIS) Security Policy; Federal Educational Rights and Privacy Act (FERPA); Federal Information Security Management Act (FISMA); National Institute of Technology Standards; Gramm-Leach-Bliley Act (GLB) Act; Health Insurance Portability and Accountability Act (HIPAA); Health Information Technology for Economic and Clinical Health Act (HITECH); IRS Publication 1075; Payment Card Industry Data Security Standard (PCI DSS); Sarbanes-Oxley Act (SOX); Electronic Communications Privacy Act, Stored Communications Act and the PATRIOT Act. The list is intentionally United States-centric, and is not intended to be all-inclusive. Further, since laws, regulations, requirements and industry guidelines change, consulting definitive sources to assure a clear understanding of compliance requirements is critical. Many State Entities have additional program compliance requirements that must be considered in addressing compliance. (e.g., DMV Privacy Act, Public Service Law, etc.).

20. Participants and Scope

a. Contractor may not deliver Services under this Master Agreement until a Participating Addendum acceptable to the Participating Entity and Contractor is executed. The NASPO ValuePoint Master Agreement Terms and Conditions are applicable to any Order by a Participating Entity (and other Purchasing Entities covered by their Participating Addendum), except to the extent altered, modified, supplemented or amended by a Participating Addendum. By way of illustration and not limitation, this authority may apply to unique delivery and invoicing requirements, confidentiality requirements, defaults on Orders, governing law and venue relating to Orders by a Participating Entity, indemnification, and insurance requirements. Statutory or constitutional requirements relating to availability of funds may require specific language in some Participating Addenda in order to comply with applicable law. The expectation is that these alterations, modifications, supplements, or amendments will be addressed in the Participating Addendum or, with the consent of the Purchasing Entity and Contractor, may be included in the ordering document (e.g. purchase order or contract) used by the Purchasing Entity to place the Order.

b. Subject to subsection 20c and a Participating Entity's Participating Addendum, the use of specific NASPO ValuePoint cooperative Master Agreements by state agencies, political subdivisions and other Participating Entities (including cooperatives) authorized

by individual state's statutes to use state contracts is subject to the approval of the respective State Chief Procurement Official.

c. Unless otherwise stipulated in a Participating Entity's Participating Addendum, specific services accessed through the NASPO ValuePoint cooperative Master Agreements for Cloud Services by state executive branch agencies, as required by a Participating Entity's statutes, are subject to the authority and approval of the Participating Entity's Chief Information Officer's Office[3].

d. Obligations under this Master Agreement are limited to those Participating Entities who have signed a Participating Addendum and Purchasing Entities within the scope of those Participating Addenda. Financial obligations of Participating States are limited to the orders placed by the departments or other state agencies and institutions having available funds. Participating States incur no financial obligations on behalf of political subdivisions.

e. NASPO ValuePoint is not a party to the Master Agreement. It is a nonprofit cooperative purchasing organization assisting states in administering the NASPO ValuePoint cooperative purchasing program for state government departments, institutions, agencies and political subdivisions (e.g., colleges, school districts, counties, cities, etc.) for all 50 states, the District of Columbia and the territories of the United States.

f. Participating Addenda shall not be construed to amend the terms of this Master Agreement between the Lead State and Contractor.

g. Participating Entities who are not states may under some circumstances sign their own Participating Addendum, subject to the approval of participation by the Chief Procurement Official of the state where the Participating Entity is located. Coordinate requests for such participation through NASPO ValuePoint. Any permission to participate through execution of a Participating Addendum is not a determination that procurement authority exists in the Participating Entity; they must ensure that they have the requisite procurement authority to execute a Participating Addendum.

h. Resale. Subject to any explicit permission in a Participating Addendum, Purchasing Entities may not resell goods, software, or Services obtained under this Master Agreement. This limitation does not prohibit: payments by employees of a Purchasing Entity as explicitly permitted under this agreement; sales of goods to the general public as surplus property; and fees associated with inventory transactions with other governmental or nonprofit entities under cooperative agreements and consistent with a Purchasing Entity's laws and regulations. Any sale or transfer permitted by this

[3] Chief Information Officer means the individual designated by the Governor with Executive Branch, enterprise-wide responsibility for the leadership and management of information technology resources of a state.

subsection must be consistent with license rights granted for use of intellectual property.

22. Data Access Controls: Contractor will provide access to Purchasing Entity's Data only to those Contractor employees, contractors and subcontractors ("Contractor Staff") who need to access the Data to fulfill Contractor's obligations under this Agreement. Contractor shall not access a Purchasing Entity's user accounts or Data, except on the course of data center operations, response to service or technical issues, as required by the express terms of this Master Agreement, or at a Purchasing Entity's written request.

Contractor may not share a Purchasing Entity's Data with its parent corporation, other affiliates, or any other third party without the Purchasing Entity's express written consent.

Contractor will ensure that, prior to being granted access to the Data, Contractor Staff who perform work under this Agreement have successfully completed annual instruction of a nature sufficient to enable them to effectively comply with all Data protection provisions of this Agreement; and possess all qualifications appropriate to the nature of the employees' duties and the sensitivity of the Data they will be handling.

23. Operations Management: Contractor shall maintain the administrative, physical, technical, and procedural infrastructure associated with the provision of the Product in a manner that is, at all times during the term of this Master Agreement, at a level equal to or more stringent than those specified in the Solicitation. Contractor must maintain any certifications required under the Solicitation.

24. Public Information: This Master Agreement and all related documents are subject to disclosure pursuant to the Purchasing Entity's public information laws.

26. Records Administration and Audit.

a. The Contractor shall maintain books, records, documents, and other evidence pertaining to this Master Agreement and orders placed by Purchasing Entities under it to the extent and in such detail as shall adequately reflect performance and administration of payments and fees. Contractor shall permit the Lead State, a Participating Entity, a Purchasing Entity, the federal government (including its grant awarding entities and the U.S. Comptroller General), and any other duly authorized agent of a governmental agency, to audit, inspect, examine, copy and/or transcribe Contractor's books, documents, papers and records directly pertinent to this Master Agreement or orders placed by a Purchasing Entity under it for the purpose of making audits, examinations, excerpts, and transcriptions. This right shall survive for a period of six (6) years following termination of this Agreement or final payment for any order placed by a Purchasing Entity against this Agreement, whichever is later, to assure compliance with the terms hereof or to evaluate performance hereunder.

b. Without limiting any other remedy available to any governmental entity, the

Contractor shall reimburse the applicable Lead State, Participating Entity, or Purchasing Entity for any overpayments inconsistent with the terms of the Master Agreement or orders or underpayment of fees found as a result of the examination of the Contractor's records.

c. The rights and obligations herein exist in addition to any quality assurance obligation in the Master Agreement requiring the Contractor to self-audit contract obligations and that permits the Lead State to review compliance with those obligations.

d. The Contractor shall allow the Purchasing Entity to audit conformance to the Master Agreement and applicable Participating Addendum terms. The purchasing entity may perform this audit or contract with a third party at its discretion and at the purchasing entity's expense.

27. Administrative Fees: The Contractor shall pay to NASPO ValuePoint, or its assignee, a NASPO ValuePoint Administrative Fee of one-quarter of one percent (0.25% or 0.0025) no later than 60 days following the end of each calendar quarter. The NASPO ValuePoint Administrative Fee shall be submitted quarterly and is based on sales of the Services. The NASPO ValuePoint Administrative Fee is not negotiable. This fee is to be included as part of the pricing submitted with proposal.

Additionally, some states may require an additional administrative fee be paid directly to the state on purchases made by Purchasing Entities within that state. For all such requests, the fee level, payment method and schedule for such reports and payments will be incorporated into the Participating Addendum that is made a part of the Master Agreement. The Contractor may adjust the Master Agreement pricing accordingly for purchases made by Purchasing Entities within the jurisdiction of the state. All such agreements shall not affect the NASPO ValuePoint Administrative Fee percentage or the prices paid by the Purchasing Entities outside the jurisdiction of the state requesting the additional fee. The NASPO ValuePoint Administrative Fee shall be based on the gross amount of all sales at the adjusted prices (if any) in Participating Addenda.

28. System Failure or Damage: In the event of system failure or damage caused by Contractor or its Services, the Contractor agrees to use its best efforts to restore or assist in restoring the system to operational capacity.

29. Title to Product: If access to the Product requires an application program interface (API), Contractor shall convey to Purchasing Entity an irrevocable and perpetual license to use the API.

30. Data Privacy: When required by a specific purchase order issued under this Agreement or a Participating Addendum and accepted by the Contractor, the Contractor must comply with all applicable laws related to data privacy and security, including IRS Pub 1075. Prior to entering into a SLA with a Purchasing Entity, the Contractor and

Purchasing Entity must cooperate and hold a meeting to determine the Data Categorization to determine whether the Contractor will hold, store, or process High Risk Data, Moderate Risk Data and Low Risk Data. The Contractor must document the Data Categorization in the SLA or Statement of Work.

31. Warranty: At a minimum the Contractor must warrant the following:

a. Contractor has acquired any and all rights, grants, assignments, conveyances, licenses, permissions, and authorization for the Contractor to provide the Services described in this Master Agreement.

b. Contractor will perform materially as described in this Master Agreement, SLA, Statement of Work, including any performance representations contained in the Contractor's response to the Solicitation by the Lead State.

c. Contractor represents and warrants that the representations contained in its response to the Solicitation by the Lead State.

d. The Contractor will not interfere with a Purchasing Entity's access to and use of the Services it acquires from this Master Agreement.

e. The Services provided by the Contractor are compatible with and will operate successfully with any environment (including web browser and operating system) specified by the Contractor in its response to the Solicitation by the Lead State.

f. The Contractor warrants that the Products it provides under this Master Agreement are free of malware. The Contractor must use industry-leading technology to detect and remove worms, Trojans, rootkits, rogues, dialers, spyware, etc.

32. Transition Assistance:

a. The Contractor shall reasonably cooperate with other parties in connection with all Services to be delivered under this Master Agreement, including without limitation any successor service provider to whom a Purchasing Entity's Data is transferred in connection with the termination or expiration of this Master Agreement. The Contractor shall assist a Purchasing Entity in exporting and extracting a Purchasing Entity's Data, in a format usable without the use of the Services and as agreed by a Purchasing Entity, at no additional cost to the Purchasing Entity. Any transition services requested by a Purchasing Entity involving additional knowledge transfer and support may be subject to a separate transition Statement of Work.

b. A Purchasing Entity and the Contractor shall, when reasonable, create a Transition Plan Document identifying the transition services to be provided and including a Statement of Work if applicable.

c. The Contractor must maintain the confidentiality and security of a Purchasing Entity's Data during the transition services and thereafter as required by the Purchasing Entity.

35. Debarment : The Contractor certifies, to the best of its knowledge, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction (contract) by any governmental department or agency. This certification represents a recurring certification made at the time any Order is placed under this Master Agreement. If the Contractor cannot certify this statement, attach a written explanation for review by the Lead State.

37. Governing Law and Venue

a. The procurement, evaluation, and award of the Master Agreement shall be governed by and construed in accordance with the laws of the Lead State sponsoring and administering the procurement. The construction and effect of the Master Agreement after award shall be governed by the law of the state serving as Lead State (in most cases also the Lead State). The construction and effect of any Participating Addendum or Order against the Master Agreement shall be governed by and construed in accordance with the laws of the Participating Entity's or Purchasing Entity's State.

b. Unless otherwise specified in the RFP, the venue for any protest, claim, dispute or action relating to the procurement, evaluation, and award is in the Lead State. Venue for any claim, dispute or action concerning the terms of the Master Agreement shall be in the state serving as Lead State. Venue for any claim, dispute, or action concerning any Order placed against the Master Agreement or the effect of a Participating Addendum shall be in the Purchasing Entity's State.

c. If a claim is brought in a federal forum, then it must be brought and adjudicated solely and exclusively within the United States District Court for (in decreasing order of priority): the Lead State for claims relating to the procurement, evaluation, award, or contract performance or administration if the Lead State is a party; the Participating State if a named party; the Participating Entity state if a named party; or the Purchasing Entity state if a named party.

d. This section is also not a waiver by the Participating State of any form of immunity, including but not limited to sovereign immunity and immunity based on the Eleventh Amendment to the Constitution of the United States.

40. Contract Provisions for Orders Utilizing Federal Funds: Pursuant to Appendix II to 2 Code of Federal Regulations (CFR) Part 200, Contract Provisions for Non-Federal Entity Contracts Under Federal Awards, Orders funded with federal funds may have

additional contractual requirements or certifications that must be satisfied at the time the Order is placed or upon delivery. These federal requirements may be proposed by Participating Entities in Participating Addenda and Purchasing Entities for incorporation in Orders placed under this master agreement.

42. NASPO ValuePoint Summary and Detailed Usage Reports: In addition to other reports that may be required by this solicitation, the Contractor shall provide the following NASPO ValuePoint reports.

a. Summary Sales Data. The Contractor shall submit quarterly sales reports directly to NASPO ValuePoint using the NASPO ValuePoint Quarterly Sales/Administrative Fee Reporting Tool found at http://www.naspo.org/WNCPO/Calculator.aspx. Any/all sales made under the contract shall be reported as cumulative totals by state. Even if Contractor experiences zero sales during a calendar quarter, a report is still required. Reports shall be due no later than 30 day following the end of the calendar quarter (as specified in the reporting tool).

b. Detailed Sales Data. Contractor shall also report detailed sales data by: (1) state; (2) entity/customer type, e.g. local government, higher education, K12, non-profit; (3) Purchasing Entity name; (4) Purchasing Entity bill-to and ship-to locations; (4) Purchasing Entity and Contractor Purchase Order identifier/number(s); (5) Purchase Order Type (e.g. sales order, credit, return, upgrade, determined by industry practices); (6) Purchase Order date; (7) Ship Date; (8) and line item description, including product number if used. The report shall be submitted in any form required by the solicitation. Reports are due on a quarterly basis and must be received by the Lead State and NASPO ValuePoint Cooperative Development Team no later than thirty (30) days after the end of the reporting period. Reports shall be delivered to the Lead State and to the NASPO ValuePoint Cooperative Development Team electronically through a designated portal, email, CD-Rom, flash drive or other method as determined by the Lead State and NASPO ValuePoint. Detailed sales data reports shall include sales information for all sales under Participating Addenda executed under this Master Agreement. The format for the detailed sales data report is in shown in Attachment F.

c. Reportable sales for the summary sales data report and detailed sales data report includes sales to employees for personal use where authorized by the solicitation and the Participating Addendum. Report data for employees should be limited to ONLY the state and entity they are participating under the authority of (state and agency, city, county, school district, etc.) and the amount of sales. No personal identification numbers, e.g. names, addresses, social security numbers or any other numerical identifier, may be submitted with any report.

d. Contractor shall provide the NASPO ValuePoint Cooperative Development Coordinator with an executive summary each quarter that includes, at a minimum, a list

of states with an active Participating Addendum, states that Contractor is in negotiations with and any PA roll out or implementation activities and issues. NASPO ValuePoint Cooperative Development Coordinator and Contractor will determine the format and content of the executive summary. The executive summary is due 30 days after the conclusion of each calendar quarter.

e. Timely submission of these reports is a material requirement of the Master Agreement. The recipient of the reports shall have exclusive ownership of the media containing the reports. The Lead State and NASPO ValuePoint shall have a perpetual, irrevocable, non-exclusive, royalty free, transferable right to display, modify, copy, and otherwise use reports, data and information provided under this section.

f. If requested by a Participating Entity, the Contractor must provide detailed sales data within the Participating State.

43. Entire Agreement: This Master Agreement, along with any attachment, contains the entire understanding of the parties hereto with respect to the Master Agreement unless a term is modified in a Participating Addendum with a Participating Entity. No click-through, or other end user terms and conditions or agreements required by the Contractor ("Additional Terms") provided with any Services hereunder shall be binding on Participating Entities or Purchasing Entities, even if use of such Services requires an affirmative "acceptance" of those Additional Terms before access is permitted.

Exhibit 1 to the Master Agreement: Software-as-a-Service

1. **Data Ownership:** The Purchasing Entity will own all right, title and interest in its data that is related to the Services provided by this Master Agreement. The Contractor shall not access Purchasing Entity user accounts or Purchasing Entity data, except (1) in the course of data center operations, (2) in response to service or technical issues, (3) as required by the express terms of this Master Agreement, Participating Addendum, SLA, and/or other contract documents, or (4) at the Purchasing Entity's written request.

Contractor shall not collect, access, or use user-specific Purchasing Entity Data except as strictly necessary to provide Service to the Purchasing Entity. No information regarding a Purchasing Entity's use of the Service may be disclosed, provided, rented or sold to any third party for any reason unless required by law or regulation or by an order of a court of competent jurisdiction. This obligation shall survive and extend beyond the term of this Master Agreement.

2. **Data Protection:** Protection of personal privacy and data shall be an integral part of the business activities of the Contractor to ensure there is no inappropriate or unauthorized use of Purchasing Entity information at any time. To this end, the Contractor shall safeguard the confidentiality, integrity and availability of Purchasing Entity information and comply with the following conditions:

    a. The Contractor shall implement and maintain appropriate administrative, technical and organizational security measures to safeguard against unauthorized access, disclosure or theft of Personal Data and Non-Public Data. Such security measures shall be in accordance with recognized industry practice and not less stringent than the measures the Contractor applies to its own Personal Data and Non-Public Data of similar kind.

    b. All data obtained by the Contractor in the performance of the Master Agreement shall become and remain the property of the Purchasing Entity.

    c. All Personal Data shall be encrypted at rest and in transit with controlled access. Unless otherwise stipulated, the Contractor is responsible for encryption of the Personal Data. Any stipulation of responsibilities will identify specific roles and responsibilities and shall be included in the service level agreement (SLA), or otherwise made a part of the Master Agreement.

    d. Unless otherwise stipulated, the Contractor shall encrypt all Non-Public Data at rest and in transit. The Purchasing Entity shall identify data it deems as Non-Public Data to the Contractor. The level of protection and encryption for all Non-Public Data shall be identified in the SLA.

    e. At no time shall any data or processes — that either belong to or are intended for the use of a Purchasing Entity or its officers, agents or employees — be copied, disclosed or retained by the Contractor or any party related to the Contractor for subsequent use in any transaction that does not include the Purchasing Entity.

f. The Contractor shall not use any information collected in connection with the Services issued from this Master Agreement for any purpose other than fulfilling the Services.

3. **Data Location:** The Contractor shall provide its services to the Purchasing Entity and its end users solely from data centers in the U.S. Storage of Purchasing Entity data at rest shall be located solely in data centers in the U.S. The Contractor shall not allow its personnel or contractors to store Purchasing Entity data on portable devices, including personal computers, except for devices that are used and kept only at its U.S. data centers. The Contractor shall permit its personnel and contractors to access Purchasing Entity data remotely only as required to provide technical support. The Contractor may provide technical user support on a 24/7 basis using a Follow the Sun model, unless otherwise prohibited in a Participating Addendum.

4. **Security Incident or Data Breach Notification:**

   a. Incident Response: Contractor may need to communicate with outside parties regarding a security incident, which may include contacting law enforcement, fielding media inquiries and seeking external expertise as mutually agreed upon, defined by law or contained in the contract. Discussing security incidents with the Purchasing Entity should be handled on an urgent as needed basis, as part of Contractor's communication and mitigation processes as mutually agreed upon, defined by law or contained in the Master Agreement.

   b. Security Incident Reporting Requirements: The Contractor shall report a security incident to the Purchasing Entity identified contact immediately as soon as possible or promptly without out reasonable delay, or as defined in the SLA.

   c. Breach Reporting Requirements: If the Contractor has actual knowledge of a confirmed data breach that affects the security of any purchasing entity's content that is subject to applicable data breach notification law, the Contractor shall (1) as soon as possible or promptly without out reasonable delay notify the Purchasing Entity, unless shorter time is required by applicable law, and (2) take commercially reasonable measures to address the data breach in a timely manner.

5. **Personal Data Breach Responsibilities:** This section only applies when a Data Breach occurs with respect to Personal Data within the possession or control of the Contractor.

   a. The Contractor, unless stipulated otherwise, shall immediately notify the appropriate Purchasing Entity identified contact by telephone in accordance with the agreed upon security plan or security procedures if it reasonably believes there has been a security incident.

   b. The Contractor, unless stipulated otherwise, shall promptly notify the appropriate Purchasing Entity identified contact within 48 hours or sooner by telephone, unless shorter time is required by applicable law, if it has confirmed that there is, or reasonably believes that there has been a Data Breach. The Contractor shall (1) cooperate with the Purchasing Entity as reasonably requested by the Purchasing Entity to investigate and resolve the Data Breach, (2) promptly implement necessary remedial measures, if necessary, and (3)

document responsive actions taken related to the Data Breach, including any post-incident review of events and actions taken to make changes in business practices in providing the services, if necessary.

6. **Notification of Legal Requests**: If legally permissible, the Contractor shall contact the Purchasing Entity upon receipt of any electronic discovery, litigation holds, discovery searches and expert testimonies related to the Purchasing Entity's data under the Master Agreement, or which in any way might reasonably require access to the data of the Purchasing Entity. The Contractor shall not respond to subpoenas, service of process and other legal requests related to the Purchasing Entity without first notifying and obtaining the approval of the Purchasing Entity, unless prohibited by law. .

7. **Termination and Suspension of Service**:

a. In the event of a termination of the Master Agreement or applicable Participating Addendum, the Contractor shall implement an orderly return of purchasing entity's data in a CSV or another mutually agreeable format at a time agreed to by the parties or allow the Purchasing Entity to extract it's data and the subsequent secure disposal of purchasing entity's data.

b. During any period of service suspension, the Contractor shall not take any action to intentionally erase or otherwise dispose of any of the Purchasing Entity's data.

c. In the event of termination of any services or agreement in entirety, the Contractor shall not take any action to intentionally erase purchasing entity's data for a period of:

- 10 days after the effective date of termination, if the termination is in accordance with the contract period
- 30 days after the effective date of termination, if the termination is for convenience
- • 60 days after the effective date of termination, if the termination is for cause

After such period, the Contractor shall have no obligation to maintain or provide any purchasing entity's data and shall thereafter, unless legally prohibited, delete all purchasing entity's data in its systems or otherwise in its possession or under its control.

d. The purchasing entity shall be entitled to any post termination assistance generally made available with respect to the services, unless a unique data retrieval arrangement has been established as part of an SLA.

e. Upon termination of the Services or the Agreement in its entirety, Contractor shall securely dispose of all Purchasing Entity's data in all of its forms, such as disk, CD/ DVD,

backup tape and paper, unless stipulated otherwise by the Purchasing Entity. Data shall be permanently deleted and shall not be recoverable, according to National Institute of Standards and Technology (NIST)-approved methods. Certificates of destruction shall be provided to the Purchasing Entity.

8. **Background Checks:** Upon the request of the Purchasing Entity, the Contractor shall conduct criminal background checks and not utilize any staff, including subcontractors, to fulfill the obligations of the Master Agreement who have been convicted of any crime of dishonesty, including but not limited to criminal fraud, or otherwise convicted of any felony or misdemeanor offense for which incarceration for up to 1 year is an authorized penalty. The Contractor shall promote and maintain an awareness of the importance of securing the Purchasing Entity's information among the Contractor's employees and agents. If any of the stated personnel providing services under a Participating Addendum is not acceptable to the Purchasing Entity in its sole opinion as a result of the background or criminal history investigation, the Purchasing Entity, in its' sole option shall have the right to either (1) request immediate replacement of the person, or (2) immediately terminate the Participating Addendum and any related service agreement.

9. **Access to Security Logs and Reports:** The Contractor shall provide reports on a schedule specified in the SLA to the Purchasing Entity in a format as specified in the SLA agreed to by both the Contractor and the Purchasing Entity. Reports shall include latency statistics, user access, user access IP address, user access history and security logs for all public jurisdiction files related to this Master Agreement and applicable Participating Addendum.

10. **Contract Audit:** The Contractor shall allow the Purchasing Entity to audit conformance to the Master Agreement terms. The Purchasing Entity may perform this audit or contract with a third party at its discretion and at the Purchasing Entity's expense.

11. **Data Center Audit**: The Contractor shall perform an independent audit of its data centers at least annually at its expense, and provide an unredacted version of the audit report upon request to a Purchasing Entity. The Contractor may remove its proprietary information from the unredacted version. A Service Organization Control (SOC) 2 audit report or approved equivalent sets the minimum level of a third-party audit.

12. **Change Control and Advance Notice:** The Contractor shall give a minimum forty eight (48) hour advance notice (or as determined by a Purchasing Entity and included in the SLA) to the Purchasing Entity of any upgrades (e.g., major upgrades, minor upgrades, system changes) that may impact service availability and performance. A major upgrade is a replacement of hardware, software or firmware with a newer or better version in order to bring the system up to date or to improve its characteristics. It usually includes a new version number.

Contractor will make updates and upgrades available to Purchasing Entity at no additional costs when Contractor makes such updates and upgrades generally available to its users.

No update, upgrade or other charge to the Service may decrease the Service's functionality, adversely affect Purchasing Entity's use of or access to the Service, or increase the cost of the Service to the Purchasing Entity.

Contractor will notify the Purchasing Entity at least sixty (60) days in advance prior to any major update or upgrade.

13. **Security:** As requested by a Purchasing Entity, the Contractor shall disclose its non-proprietary system security plans (SSP) or security processes and technical limitations to the Purchasing Entity such that adequate protection and flexibility can be attained between the Purchasing Entity and the Contractor. For example: virus checking and port sniffing — the Purchasing Entity and the Contractor shall understand each other's roles and responsibilities.

14. **Non-disclosure and Separation of Duties:** The Contractor shall enforce separation of job duties, require commercially reasonable non-disclosure agreements, and limit staff knowledge of Purchasing Entity data to that which is absolutely necessary to perform job duties.

15. **Import and Export of Data:** The Purchasing Entity shall have the ability to import or export data in piecemeal or in entirety at its discretion without interference from the Contractor at any time during the term of Contractor's contract with the Purchasing Entity. This includes the ability for the Purchasing Entity to import or export data to/from other Contractors. Contractor shall specify if Purchasing Entity is required to provide its' own tools for this purpose, including the optional purchase of Contractors tools if Contractors applications are not able to provide this functionality directly.

16. **Responsibilities and Uptime Guarantee**: The Contractor shall be responsible for the acquisition and operation of all hardware, software and network support related to the services being provided. The technical and professional activities required for establishing, managing and maintaining the environments are the responsibilities of the Contractor. The system shall be available 24/7/365 (with agreed-upon maintenance downtime), and provide service to customers as defined in the SLA.

17. **Subcontractor Disclosure**: Contractor shall identify all of its strategic business partners related to services provided under this Master Agreement, including but not limited to all subcontractors or other entities or individuals who may be a party to a joint venture or similar agreement with the Contractor, and who shall be involved in any application development and/or operations.

18. **Right to Remove Individuals:** The Purchasing Entity shall have the right at any time to require that the Contractor remove from interaction with Purchasing Entity any Contractor representative who the Purchasing Entity believes is detrimental to its working relationship with the Contractor. The Purchasing Entity shall provide the Contractor with notice of its determination, and the reasons it requests the removal. If the Purchasing Entity signifies that a potential security violation exists with respect to the request, the Contractor shall immediately

remove such individual. The Contractor shall not assign the person to any aspect of the Master Agreement or future work orders without the Purchasing Entity's consent.

19. **Business Continuity and Disaster Recovery:** The Contractor shall provide a business continuity and disaster recovery plan upon request and ensure that the Purchasing Entity's recovery time objective (RTO) of XXX hours/days is met. (XXX hour/days shall be provided to Contractor by the Purchasing Entity.) Contractor must work with the Purchasing Entity to perform an annual Disaster Recovery test and take action to correct any issues detected during the test in a time frame mutually agreed between the Contractor and the Purchasing Entity.

20. **Compliance with Accessibility Standards**: The Contractor shall comply with and adhere to Accessibility Standards of Section 508 Amendment to the Rehabilitation Act of 1973, or any other state laws or administrative regulations identified by the Participating Entity.

21. **Web Services:** The Contractor shall use Web services exclusively to interface with the Purchasing Entity's data in near real time.

22. **Encryption of Data at Rest:** The Contractor shall ensure hard drive encryption consistent with validated cryptography standards as referenced in FIPS 140-2, Security Requirements for Cryptographic Modules for all Personal Data, unless the Purchasing Entity approves in writing for the storage of Personal Data on a Contractor portable device in order to accomplish work as defined in the statement of work.

23. Subscription Terms: Contractor grants to a Purchasing Entity a license to: (i) access and use the Service for its business purposes; (ii) for SaaS, use underlying software as embodied or used in the Service; and (iii) view, copy, upload and download (where applicable), and use Contractor's documentation.

No Contractor terms, including standard click through license or website terms or use of privacy policy, shall apply to Purchasing Entities unless such terms are included in this Master Agreement.

Exhibit 2 to the Master Agreement: Platform-as-a-Service

1. **Data Ownership:** The Purchasing Entity will own all right, title and interest in its data that is related to the Services provided by this Master Agreement. The Contractor shall not access Purchasing Entity user accounts or Purchasing Entity data, except (1) in the course of data center operations, (2) in response to service or technical issues, (3) as required by the express terms of this Master Agreement, Participating Addendum, SLA, and/or other contract documents, or (4) at the Purchasing Entity's written request.

Contractor shall not collect, access, or use user-specific Purchasing Entity Data except as strictly necessary to provide Service to the Purchasing Entity. No information regarding a Purchasing Entity's use of the Service may be disclosed, provided, rented or sold to any third party for any reason unless required by law or regulation or by an order of a court of competent jurisdiction. This obligation shall survive and extend beyond the term of this Master Agreement.

2. **Data Protection:** Protection of personal privacy and data shall be an integral part of the business activities of the Contractor to ensure there is no inappropriate or unauthorized use of Purchasing Entity information at any time. To this end, the Contractor shall safeguard the confidentiality, integrity and availability of Purchasing Entity information and comply with the following conditions:

    a. The Contractor shall implement and maintain appropriate administrative, technical and organizational security measures to safeguard against unauthorized access, disclosure or theft of Personal Data and Non-Public Data. Such security measures shall be in accordance with recognized industry practice and not less stringent than the measures the Contractor applies to its own Personal Data and Non-Public Data of similar kind.

    b. All data obtained by the Contractor in the performance of the Master Agreement shall become and remain the property of the Purchasing Entity.

    c. All Personal Data shall be encrypted at rest and in transit with controlled access. Unless otherwise stipulated, the Contractor is responsible for encryption of the Personal Data. Any stipulation of responsibilities will identify specific roles and responsibilities and shall be included in the service level agreement (SLA), or otherwise made a part of the Master Agreement.

    d. Unless otherwise stipulated, the Contractor shall encrypt all Non-Public Data at rest and in transit. The Purchasing Entity shall identify data it deems as Non-Public Data to the Contractor. The level of protection and encryption for all Non-Public Data shall be identified in the SLA.

    e. At no time shall any data or processes — that either belong to or are intended for the use of a Purchasing Entity or its officers, agents or employees — be copied, disclosed or retained by the Contractor or any party related to the Contractor for subsequent use in any transaction that does not include the Purchasing Entity.

f. The Contractor shall not use any information collected in connection with the Services issued from this Master Agreement for any purpose other than fulfilling the Services.

3. **Data Location:** The Contractor shall provide its services to the Purchasing Entity and its end users solely from data centers in the U.S. Storage of Purchasing Entity data at rest shall be located solely in data centers in the U.S. The Contractor shall not allow its personnel or contractors to store Purchasing Entity data on portable devices, including personal computers, except for devices that are used and kept only at its U.S. data centers. The Contractor shall permit its personnel and contractors to access Purchasing Entity data remotely only as required to provide technical support. The Contractor may provide technical user support on a 24/7 basis using a Follow the Sun model, unless otherwise prohibited in a Participating Addendum.

4. **Security Incident or Data Breach Notification:** The Contractor shall inform the Purchasing Entity of any security incident or data breach within the possession and control of the Contractor and related to the service provided under the Master Agreement, Participating Addendum, or SLA. Such notice shall include, to the best of Contractor's knowledge at that time, the persons affected, their identities, and the Confidential Information and Data disclosed, or shall include if this information is unknown.

    a. Incident Response: The Contractor may need to communicate with outside parties regarding a security incident, which may include contacting law enforcement, fielding media inquiries and seeking external expertise as mutually agreed upon, defined by law or contained in the Master Agreement, Participating Addendum, or SLA. Discussing security incidents with the Purchasing Entity should be handled on an urgent as-needed basis, as part of Contractor's communication and mitigation processes as mutually agreed, defined by law or contained in the Master Agreement, Participating Addendum, or SLA.

    b. Security Incident Reporting Requirements: Unless otherwise stipulated, the Contractor shall immediately report a security incident related to its service under the Master Agreement, Participating Addendum, or SLA to the appropriate Purchasing Entity.

    c. Breach Reporting Requirements: If the Contractor has actual knowledge of a confirmed data breach that affects the security of any Purchasing Entity data that is subject to applicable data breach notification law, the Contractor shall (1) promptly notify the appropriate Purchasing Entity within 48 hours or sooner, unless shorter time is required by applicable law, and (2) take commercially reasonable measures to address the data breach in a timely manner

5. **Breach Responsibilities:** This section only applies when a Data Breach occurs with respect to Personal Data within the possession or control of the Contractor.

    a. The Contractor, unless stipulated otherwise, shall immediately notify the appropriate Purchasing Entity identified contact by telephone in accordance with the agreed upon security plan or security procedures if it reasonably believes there has been a security incident.

b. The Contractor, unless stipulated otherwise, shall promptly notify the appropriate Purchasing Entity identified contact within 24 hours or sooner by telephone, unless shorter time is required by applicable law, if it has confirmed that there is, or reasonably believes that there has been a data breach. The Contractor shall (1) cooperate with the Purchasing Entity as reasonably requested by the Purchasing Entity to investigate and resolve the data breach, (2) promptly implement necessary remedial measures, if necessary, and (3) document responsive actions taken related to the data breach, including any post-incident review of events and actions taken to make changes in business practices in providing the services, if necessary.

6. **Notification of Legal Requests**: If legally permissible, the Contractor shall contact the Purchasing Entity upon receipt of any electronic discovery, litigation holds, discovery searches and expert testimonies related to the Purchasing Entity's data under the Master Agreement, or which in any way might reasonably require access to the data of the Purchasing Entity. The Contractor shall not respond to subpoenas, service of process and other legal requests related to the Purchasing Entity without first notifying and obtaining the approval of the Purchasing Entity, unless prohibited by law.

7. **Termination and Suspension of Service**:

a. In the event of an early termination of the Master Agreement, Participating or SLA, Contractor shall allow for the Purchasing Entity to retrieve its digital content and provide for the subsequent secure disposal of the Purchasing Entity's digital content.

b. During any period of service suspension, the Contractor shall not take any action to intentionally erase or otherwise dispose of any of the Purchasing Entity's data.

c. In the event of early termination of any Services or agreement in entirety, the Contractor shall not take any action to intentionally erase any Purchasing Entity's data for a period of 1) 45 days after the effective date of termination, if the termination is for convenience; or 2) 60 days after the effective date of termination, if the termination is for cause. After such day period, the Contractor shall have no obligation to maintain or provide any Purchasing Entity data and shall thereafter, unless legally prohibited, delete all Purchasing Entity data in its systems or otherwise in its possession or under its control. In the event of either termination for cause, the Contractor will impose no fees for access and retrieval of digital content to the Purchasing Entity.

d. The Purchasing Entity shall be entitled to any post termination assistance generally made available with respect to the services, unless a unique data retrieval arrangement has been established as part of an SLA.

e. Upon termination of the Services or the Agreement in its entirety, Contractor shall securely dispose of all Purchasing Entity's data in all of its forms, such as disk, CD/ DVD, backup tape and paper, unless stipulated otherwise by the Purchasing Entity. Data shall be permanently deleted and shall not be recoverable, according to National Institute of

Standards and Technology (NIST)-approved methods. Certificates of destruction shall be provided to the Purchasing Entity.

8. **Background Checks:**

    a. Upon the request of the Purchasing Entity, the Contractor shall conduct criminal background checks and not utilize any staff, including subcontractors, to fulfill the obligations of the Master Agreement who have been convicted of any crime of dishonesty, including but not limited to criminal fraud, or otherwise convicted of any felony or misdemeanor offense for which incarceration for up to 1 year is an authorized penalty. The Contractor shall promote and maintain an awareness of the importance of securing the Purchasing Entity's information among the Contractor's employees and agents.

    b. The Contractor and the Purchasing Entity recognize that security responsibilities are shared. The Contractor is responsible for providing a secure infrastructure. The Purchasing Entity is responsible for its secure guest operating system, firewalls and other logs captured within the guest operating system. Specific shared responsibilities are identified within the SLA.

    c. If any of the stated personnel providing services under a Participating Addendum is not acceptable to the Purchasing Entity in its sole opinion as a result of the background or criminal history investigation, the Purchasing Entity, in its' sole option shall have the right to either (1) request immediate replacement of the person, or (2) immediately terminate the Participating Addendum and any related service agreement.

9. **Access to Security Logs and Reports:**

    a. The Contractor shall provide reports on a schedule specified in the SLA to the Purchasing Entity in a format as specified in the SLA and agreed to by both the Contractor and the Purchasing Entity. Reports will include latency statistics, user access, user access IP address, user access history and security logs for all Purchasing Entity files related to the Master Agreement, Participating Addendum, or SLA.

    b. The Contractor and the Purchasing Entity recognize that security responsibilities are shared. The Contractor is responsible for providing a secure infrastructure. The Purchasing Entity is responsible for its secure guest operating system, firewalls and other logs captured within the guest operating system. Specific shared responsibilities are identified within the SLA.

10. **Contract Audit:** The Contractor shall allow the Purchasing Entity to audit conformance to the Master Agreement terms. The Purchasing Entity may perform this audit or contract with a third party at its discretion and at the Purchasing Entity's expense.

11. **Data Center Audit**: The Contractor shall perform an independent audit of its data centers at least annually at its expense, and provide an unredacted version of the audit report upon

request to a Purchasing Entity. The Contractor may remove its proprietary information from the unredacted version. A Service Organization Control (SOC) 2 audit report or approved equivalent sets the minimum level of a third-party audit.

12. **Change Control and Advance Notice:** The Contractor shall give a minimum forty eight (48) hour advance notice (or as determined by a Purchasing Entity and included in the SLA) to the Purchasing Entity of any upgrades (e.g., major upgrades, minor upgrades, system changes) that may impact service availability and performance. A major upgrade is a replacement of hardware, software or firmware with a newer or better version in order to bring the system up to date or to improve its characteristics. It usually includes a new version number.

Contractor will make updates and upgrades available to Purchasing Entity at no additional costs when Contractor makes such updates and upgrades generally available to its users.

No update, upgrade or other charge to the Service may decrease the Service's functionality, adversely affect Purchasing Entity's use of or access to the Service, or increase the cost of the Service to the Purchasing Entity.

Contractor will notify the Purchasing Entity at least sixty (60) days in advance prior to any major update or upgrade.

13. **Security:** As requested by a Purchasing Entity, the Contractor shall disclose its non-proprietary system security plans (SSP) or security processes and technical limitations to the Purchasing Entity such that adequate protection and flexibility can be attained between the Purchasing Entity and the Contractor. For example: virus checking and port sniffing — the Purchasing Entity and the Contractor shall understand each other's roles and responsibilities.

14. **Non-disclosure and Separation of Duties:** The Contractor shall enforce separation of job duties, require commercially reasonable non-disclosure agreements, and limit staff knowledge of Purchasing Entity data to that which is absolutely necessary to perform job duties.

15. **Import and Export of Data:** The Purchasing Entity shall have the ability to import or export data in piecemeal or in entirety at its discretion without interference from the Contractor at any time during the term of Contractor's contract with the Purchasing Entity. This includes the ability for the Purchasing Entity to import or export data to/from other Contractors. Contractor shall specify if Purchasing Entity is required to provide its' own tools for this purpose, including the optional purchase of Contractors tools if Contractors applications are not able to provide this functionality directly.
16. **Responsibilities and Uptime Guarantee**: The Contractor shall be responsible for the acquisition and operation of all hardware, software and network support related to the services being provided. The technical and professional activities required for establishing, managing and maintaining the environments are the responsibilities of the Contractor. The system shall be available 24/7/365 (with agreed-upon maintenance downtime), and provide service to customers as defined in the SLA.

17. **Subcontractor Disclosure**: Contractor shall identify all of its strategic business partners related to services provided under this Master Agreement, including but not limited to all subcontractors or other entities or individuals who may be a party to a joint venture or similar agreement with the Contractor, and who shall be involved in any application development and/or operations.

18. **Business Continuity and Disaster Recovery:** The Contractor shall provide a business continuity and disaster recovery plan upon request and ensure that the Purchasing Entity's recovery time objective (RTO) of XXX hours/days is met. (XXX hour/days shall be provided to Contractor by the Purchasing Entity.) Contractor must work with the Purchasing Entity to perform an annual Disaster Recovery test and take action to correct any issues detected during the test in a time frame mutually agreed between the Contractor and the Purchasing Entity.

19. **Compliance with Accessibility Standards**: The Contractor shall comply with and adhere to Accessibility Standards of Section 508 Amendment to the Rehabilitation Act of 1973 or any other state laws or administrative regulations identified by the Participating Entity..

20. **Web Services:** The Contractor shall use Web services exclusively to interface with the Purchasing Entity's data in near real time.

21. **Encryption of Data at Rest:** The Contractor shall ensure hard drive encryption consistent with validated cryptography standards as referenced in FIPS 140-2, Security Requirements for Cryptographic Modules for all Personal Data as identified in the SLA, unless the Contractor presents a justifiable position that is approved by the Purchasing Entity that Personal Data, is required to be stored on a Contractor portable device in order to accomplish work as defined in the scope of work.

22. Subscription Terms: Contractor grants to a Purchasing Entity a license to: (i) access and use the Service for its business purposes; (ii) for PaaS, use underlying software as embodied or used in the Service; and (iii) view, copy, upload and download (where applicable), and use Contractor's documentation.

No Contractor terms, including standard click through license or website terms or use of privacy policy, shall apply to Purchasing Entities unless such terms are included in this Master Agreement.

Exhibit 3 to the Master Agreement: Infrastructure-as-a-Service

1. **Data Ownership:** The Purchasing Entity will own all right, title and interest in its data that is related to the Services provided by this Master Agreement. The Contractor shall not access Purchasing Entity user accounts or Purchasing Entity data, except (1) in the course of data center operations, (2) in response to service or technical issues, (3) as required by the express terms of this Master Agreement, Participating Addendum, SLA, and/or other contract documents, or (4) at the Purchasing Entity's written request.

Contractor shall not collect, access, or use user-specific Purchasing Entity Data except as strictly necessary to provide Service to the Purchasing Entity. No information regarding a Purchasing Entity's use of the Service may be disclosed, provided, rented or sold to any third party for any reason unless required by law or regulation or by an order of a court of competent jurisdiction. This obligation shall survive and extend beyond the term of this Master Agreement.

2. **Data Protection:** Protection of personal privacy and data shall be an integral part of the business activities of the Contractor to ensure there is no inappropriate or unauthorized use of Purchasing Entity information at any time. To this end, the Contractor shall safeguard the confidentiality, integrity and availability of Purchasing Entity information and comply with the following conditions:

    a. The Contractor shall implement and maintain appropriate administrative, technical and organizational security measures to safeguard against unauthorized access, disclosure or theft of Personal Data and Non-Public Data. Such security measures shall be in accordance with recognized industry practice and not less stringent than the measures the Contractor applies to its own Personal Data and Non-Public Data of similar kind.

    b. All data obtained by the Contractor in the performance of the Master Agreement shall become and remain the property of the Purchasing Entity.

    c. All Personal Data shall be encrypted at rest and in transit with controlled access. Unless otherwise stipulated, the Contractor is responsible for encryption of the Personal Data. Any stipulation of responsibilities will identify specific roles and responsibilities and shall be included in the service level agreement (SLA), or otherwise made a part of the Master Agreement.

    d. Unless otherwise stipulated, the Contractor shall encrypt all Non-Public Data at rest and in transit. The Purchasing Entity shall identify data it deems as Non-Public Data to the Contractor. The level of protection and encryption for all Non-Public Data shall be identified in the SLA.

    e. At no time shall any data or processes — that either belong to or are intended for the use of a Purchasing Entity or its officers, agents or employees — be copied, disclosed or retained by the Contractor or any party related to the Contractor for subsequent use in any transaction that does not include the Purchasing Entity.

f. The Contractor shall not use any information collected in connection with the Services issued from this Master Agreement for any purpose other than fulfilling the Services.

3. **Data Location:** The Contractor shall provide its services to the Purchasing Entity and its end users solely from data centers in the U.S. Storage of Purchasing Entity data at rest shall be located solely in data centers in the U.S. The Contractor shall not allow its personnel or contractors to store Purchasing Entity data on portable devices, including personal computers, except for devices that are used and kept only at its U.S. data centers. The Contractor shall permit its personnel and contractors to access Purchasing Entity data remotely only as required to provide technical support. The Contractor may provide technical user support on a 24/7 basis using a Follow the Sun model, unless otherwise prohibited in a Participating Addendum.

4. **Security Incident or Data Breach Notification:** The Contractor shall inform the Purchasing Entity of any security incident or data breach related to Purchasing Entity's Data within the possession or control of the Contractor and related to the service provided under the Master Agreement, Participating Addendum, or SLA. Such notice shall include, to the best of Contractor's knowledge at that time, the persons affected, their identities, and the Confidential Information and Data disclosed, or shall include if this information is unknown.

   a. Security Incident Reporting Requirements: The Contractor shall report a security incident to the Purchasing Entity identified contact immediately as soon as possible or promptly without out reasonable delay, or as defined in the SLA.

   b. Breach Reporting Requirements: If the Contractor has actual knowledge of a confirmed data breach that affects the security of any purchasing entity's content that is subject to applicable data breach notification law, the Contractor shall (1) as soon as possible or promptly without out reasonable delay notify the Purchasing Entity, unless shorter time is required by applicable law, and (2) take commercially reasonable measures to address the data breach in a timely manner.

5. **Breach Responsibilities:** This section only applies when a Data Breach occurs with respect to Personal Data within the possession or control of the Contractor and related to the service provided under the Master Agreement, Participating Addendum, or SLA.

   a. The Contractor, unless stipulated otherwise, shall immediately notify the appropriate Purchasing Entity identified contact by telephone in accordance with the agreed upon security plan or security procedures if it reasonably believes there has been a security incident.

   b. The Contractor, unless stipulated otherwise, shall promptly notify the appropriate Purchasing Entity identified contact within 48 hours or sooner by telephone, unless shorter time is required by applicable law, if it has confirmed that there is, or reasonably believes that there has been a data breach. The Contractor shall (1) cooperate with the Purchasing Entity as reasonably requested by the Purchasing Entity to investigate and resolve the Data Breach, (2) promptly implement necessary remedial measures, if necessary, and (3) document responsive actions taken related to the Data Breach, including any post-incident

review of events and actions taken to make changes in business practices in providing the services, if necessary.

6. **Notification of Legal Requests**: If legally permissible, the Contractor shall contact the Purchasing Entity upon receipt of any electronic discovery, litigation holds, discovery searches and expert testimonies related to the Purchasing Entity's data under the Master Agreement, or which in any way might reasonably require access to the data of the Purchasing Entity. The Contractor shall not respond to subpoenas, service of process and other legal requests related to the Purchasing Entity without first notifying and obtaining the approval of the Purchasing Entity, unless prohibited by law.

7. **Termination and Suspension of Service**:

   a. In the event of an early termination of the Master Agreement, Participating or SLA, Contractor shall allow for the Purchasing Entity to retrieve its digital content and provide for the subsequent secure disposal of the Purchasing Entity's digital content.

   b. During any period of service suspension, the Contractor shall not take any action to intentionally erase or otherwise dispose of any of the Purchasing Entity's data.

   c. In the event of early termination of any Services or agreement in entirety, the Contractor shall not take any action to intentionally erase any Purchasing Entity's data for a period of 1) 45 days after the effective date of termination, if the termination is for convenience; or 2) 60 days after the effective date of termination, if the termination is for cause. After such day period, the Contractor shall have no obligation to maintain or provide any Purchasing Entity data and shall thereafter, unless legally prohibited, delete all Purchasing Entity data in its systems or otherwise in its possession or under its control. In the event of either termination for cause, the Contractor will impose no fees for access and retrieval of digital content to the Purchasing Entity.

   d. The Purchasing Entity shall be entitled to any post termination assistance generally made available with respect to the services, unless a unique data retrieval arrangement has been established as part of an SLA.

   e. Upon termination of the Services or the Agreement in its entirety, Contractor shall securely dispose of all Purchasing Entity's data in all of its forms, such as disk, CD/ DVD, backup tape and paper, unless stipulated otherwise by the Purchasing Entity. Data shall be permanently deleted and shall not be recoverable, according to National Institute of Standards and Technology (NIST)-approved methods. Certificates of destruction shall be provided to the Purchasing Entity.

8. **Background Checks:**

   a. Upon the request of the Purchasing Entity, the Contractor shall conduct criminal background checks and not utilize any staff, including subcontractors, to fulfill the obligations of the Master Agreement who have been convicted of any crime of dishonesty,

including but not limited to criminal fraud, or otherwise convicted of any felony or misdemeanor offense for which incarceration for up to 1 year is an authorized penalty. The Contractor shall promote and maintain an awareness of the importance of securing the Purchasing Entity's information among the Contractor's employees and agents.

b. The Contractor and the Purchasing Entity recognize that security responsibilities are shared. The Contractor is responsible for providing a secure infrastructure. The Purchasing Entity is responsible for its secure guest operating system, firewalls and other logs captured within the guest operating system. Specific shared responsibilities are identified within the SLA.

c. If any of the stated personnel providing services under a Participating Addendum is not acceptable to the Purchasing Entity in its sole opinion as a result of the background or criminal history investigation, the Purchasing Entity, in its' sole option shall have the right to either (1) request immediate replacement of the person, or (2) immediately terminate the Participating Addendum and any related service agreement.

9. **Access to Security Logs and Reports:**

   a. The Contractor shall provide reports on a schedule specified in the SLA to the Contractor directly related to the infrastructure that the Contractor controls upon which the Purchasing Entity's account resides. Unless otherwise agreed to in the SLA, the Contractor shall provide the public jurisdiction a history or all API calls for the Purchasing Entity account that includes the identity of the API caller, the time of the API call, the source IP address of the API caller, the request parameters and the response elements returned by the Contractor. The report will be sufficient to enable the Purchasing Entity to perform security analysis, resource change tracking and compliance auditing

   b. The Contractor and the Purchasing Entity recognize that security responsibilities are shared. The Contractor is responsible for providing a secure infrastructure. The Purchasing Entity is responsible for its secure guest operating system, firewalls and other logs captured within the guest operating system. Specific shared responsibilities are identified within the SLA.

10. **Contract Audit:** The Contractor shall allow the Purchasing Entity to audit conformance to the Master Agreement terms. The Purchasing Entity may perform this audit or contract with a third party at its discretion and at the Purchasing Entity's expense.
11. **Data Center Audit**: The Contractor shall perform an independent audit of its data centers at least annually and at its own expense, and provide an unredacted version of the audit report upon request. The Contractor may remove its proprietary information from the unredacted version. For example, a Service Organization Control (SOC) 2 audit report would be sufficient.

12. **Change Control and Advance Notice:** The Contractor shall give a minimum forty eight (48) hour advance notice (or as determined by a Purchasing Entity and included in the SLA) to the Purchasing Entity of any upgrades (e.g., major upgrades, minor upgrades, system changes) that

may impact service availability and performance. A major upgrade is a replacement of hardware, software or firmware with a newer or better version in order to bring the system up to date or to improve its characteristics. It usually includes a new version number.

Contractor will make updates and upgrades available to Purchasing Entity at no additional costs when Contractor makes such updates and upgrades generally available to its users.

No update, upgrade or other charge to the Service may decrease the Service's functionality, adversely affect Purchasing Entity's use of or access to the Service, or increase the cost of the Service to the Purchasing Entity.

Contractor will notify the Purchasing Entity at least sixty (60) days in advance prior to any major update or upgrade.

13. **Security:** As requested by a Purchasing Entity, the Contractor shall disclose its non-proprietary system security plans (SSP) or security processes and technical limitations to the Purchasing Entity such that adequate protection and flexibility can be attained between the Purchasing Entity and the Contractor. For example: virus checking and port sniffing — the Purchasing Entity and the Contractor shall understand each other's roles and responsibilities.

14. **Non-disclosure and Separation of Duties:** The Contractor shall enforce separation of job duties, require commercially reasonable non-disclosure agreements, and limit staff knowledge of Purchasing Entity data to that which is absolutely necessary to perform job duties.

15. **Import and Export of Data:** The Purchasing Entity shall have the ability to import or export data in piecemeal or in entirety at its discretion without interference from the Contractor at any time during the term of Contractor's contract with the Purchasing Entity. This includes the ability for the Purchasing Entity to import or export data to/from other Contractors. Contractor shall specify if Purchasing Entity is required to provide its' own tools for this purpose, including the optional purchase of Contractors tools if Contractors applications are not able to provide this functionality directly.

16. **Responsibilities and Uptime Guarantee**: The Contractor shall be responsible for the acquisition and operation of all hardware, software and network support related to the services being provided. The technical and professional activities required for establishing, managing and maintaining the environments are the responsibilities of the Contractor. The system shall be available 24/7/365 (with agreed-upon maintenance downtime), and provide service to customers as defined in the SLA.
17. **Subcontractor Disclosure**: Contractor shall identify all of its strategic business partners related to services provided under this Master Agreement, including but not limited to all subcontractors or other entities or individuals who may be a party to a joint venture or similar agreement with the Contractor, and who shall be involved in any application development and/or operations.

18. **Business Continuity and Disaster Recovery:** The Contractor shall provide a business continuity and disaster recovery plan upon request and ensure that the Purchasing Entity's recovery time objective (RTO) of XXX hours/days is met. (XXX hour/days shall be provided to Contractor by the Purchasing Entity.) Contractor must work with the Purchasing Entity to perform an annual Disaster Recovery test and take action to correct any issues detected during the test in a time frame mutually agreed between the Contractor and the Purchasing Entity.

19. **Subscription Terms:** Contractor grants to a Purchasing Entity a license to: (i) access and use the Service for its business purposes; (ii) for IaaS, use underlying software as embodied or used in the Service; and (iii) view, copy, upload and download (where applicable), and use Contractor's documentation.

No Contractor terms, including standard click through license or website terms or use of privacy policy, shall apply to Purchasing Entities unless such terms are included in this Master Agreement via amendment.

Attachment B – Identification of Service Models Matrix

Offerors must complete the following form to identify the service models your firm offers under this RFP. You may provide a list of the different SaaS, IaaS, and/or PaaS services that you offer, including the Categorization of Risk that you have the ability to store and secure. This document is to provide purchasing entities and eligible users a quick snap shot of the cloud solutions your firm provides.

Service Model:	**Low Risk Data**	**Moderate Risk Data**	**High Risk Data**	**Deployment Models Offered:**
Saas	Varies by Manufacturer Offer	Varies by Manufacturer Offer	Varies by Manufacturer Offer	AODocs, CA Technologies, DocuSign, FireEye, Google, QTS, Salesforce, SAP, ServiceNow, Virtru, VMware
IaaS	Varies by Manufacturer Offer	Varies by Manufacturer Offer	Varies by Manufacturer Offer	FireEye, Google, QTS, Virtustream, VMware
PaaS	Varies by Manufacturer Offer	Varies by Manufacturer Offer	Varies by Manufacturer Offer	Google, QTS, Salesforce, SAP, ServiceNow, Virtustream

Carahsoft's solution providers each have different forms and procedures for providing solutions and services with varying levels of data management for each solution. Please see Carahsoft's Technical Response for additional information regarding risk data management of low, moderate, and high risk data.

CARAHSOFT'S RESPONSE TO THE

State of Utah
NASPO ValuePoint

REQUEST FOR PROPOSAL

NASPO ValuePoint Master Agreement for Cloud Solutions

SOLICITATION NO. CH16012

Technical Proposal

Thursday
March 10, 2015

CARAHSOFT TECHNOLOGY CORP.

Re: Carahsoft's Response to the State of Utah's Request for Proposal for NASPO ValuePoint Master Agreement for Cloud Solutions, Solicitation # CH16012.

Dear Mr. Hughes,

Carahsoft Technology Corp. appreciates the opportunity to respond to the State of Utah's Request for Proposals/Q/Information for Project Description.

5.2.1	Carahsoft Technology Corporation understands that they may be required to negotiate additional terms and conditions, including additional administrative fees, with Participating Entities when executing a Participating Addendum.
5.2.2	When writing this response Carahsoft utilized the OEMs being proposed as a part of this response to assist in preparing this response. Staff responsible for creating this proposal include Robert R. Moore – Vice President, Jack Dixon – Contract Specialist, & David Holl – Proposal Coordinator.
5.2.3	Carahsoft Technology Corporation is not currently suspended, debarred or otherwise excluded from federal or state procurement and non-procurement programs.
5.2.4	Carahsoft Technology Corporation acknowledges that a 0.25% NASPO ValuePoint Administrative Fee and any Participating Entity Administrative fee will apply to total sales for the Master Agreement(s) awarded from the RFP.
5.2.5	Carahsoft Technology Corporation is including an all-encompassing list of solutions in this response which covers the SaaS, PaaS, & IaaS categories. Services completion/deployment will vary based on manufacturer but will utilize either the manufacturers own integration policies and procedures or a third party subcontractor specializing in servicing the manufacturers' specific solution.
5.2.6	Carahsoft can provide varying levels of data risk support based on customer requirements, manufacturer, and solution type. Please see our response to Attachment H for further detail.

Please feel free to contact me directly at 703.871.8504/Robert.Moore@carahsoft.com or Jack Dixon at 703.230.7545/Jack.Dixon@carahsoft.com with any questions or communications that will assist the Agency in the evaluation of our response. This proposal is valid for 90 days from the date of submission.

Thank you for your time and consideration.

Sincerely,

Robert R. Moore
Vice President

EXECUTIVE SUMMARY

The one or two page executive summary is to briefly describe the Offeror's Proposal. This summary should highlight the major features of the Proposal. It must indicate any requirements that cannot be met by the Offeror. The Lead State should be able to determine the essence of the Proposal by reading the executive summary. See Section 5.4 of the RFP.

Prime Contractor: Carahsoft Technology Corp.

Carahsoft Technology Corporation understands that the State of Utah & NASPO ValuePoint is seeking a Master Agreement for Cloud Solutions.

Carahsoft has assembled a team from our vast portfolio of over 200 hundred vendors that includes our premiere network of cloud solutions, resellers, and subcontractors as the best solution to meet the State of Utah's requirements. The intent of our proposal is to deliver the highest value proposition at the lowest possible cost to the State of Utah, NASPO ValuePoint, & all participating entities for the acquisition of cloud solutions. Carahsoft understands the need for high quality cloud based service providers that have the ability to provide a menu of cloud solution offerings. Carahsoft's superior contract management and network of Cloud Solution Providers will ultimately increase the State & Participating Entities overall efficiency, reduce costs, improve operational scalability, provide business continuity, increase collaboration efficiencies, and all for expanded flexibility.

Carahsoft Technology Corp. is an IT solutions provider delivering best-of-breed hardware, software, and support solutions to federal, state and local government agencies since 2004. Carahsoft has built a reputation as a customer-centric real-time organization with unparalleled experience and depth in government sales, marketing, and contract program management. This experience has enabled Carahsoft to achieve the top spot in leading software license GSA resellers.

VENDOR RELATIONSHIPS – Just as each state, territory, and participating entity is unique in how they employ cloud solutions, Carahsoft's cloud offering follows a unique business model focusing on providing superior sales and marketing execution, a track record of success, high integrity, and a focus on strategic vendor relationships.

PROVEN EXECUTION (Growth and Experience of Sales) – Carahsoft has been supporting the IT needs of Government and Education Customers for more than 12 years. Our Public Sector Sales Team supports the Government, Education, and Healthcare vertical markets and is an enormous component of Carahsoft's ongoing and continued growth. In 2014, Carahsoft had revenues of over $2B in the public sector market. Our State & Local Government Sales Force is solely dedicated to supporting the unique needs of Higher Education, K- 12 Schools, State Government, and Local Government customers.

CONTRACT VEHICLES – Over the past ten years Carahsoft has acquired and maintained a wide variety of purchasing contract vehicles for agencies at the state, local, and federal levels. Carahsoft holds statewide contracts in many states across the country, and we have a great deal of experience with contract transitions. Associated with all contracts are dedicated and experienced contract management resources.

Carahsoft has leveraged its vast contracting experience and extended it to quoting and order management. Carahsoft seamlessly generates quotes within 30 minutes or less and processed over 56,000 orders in 2014 that were each completed the same day received.

GROWTH & STABILITY – Carahsoft has continued to show impressive growth year after year, turning annual revenue from $3.4 million in our first year in 2004 to $1.065 billion in 2011, $1.465 billion in 2012, $1.8 billion in 2013, and $2.45 billion in 2014. In September of 2014, 7,501 orders were processed worth over $626 million. We are a stable, conservative, and profitable company and have received numerous accolades including the 2013 GovCon Government Contractor of the Year Award in the greater than $300M revenue category. Carahsoft was also recognized in the following areas:

- Largest GSA Schedule 70 Contract holder for software
- 7th of the Washington Business Journal's 100 Largest Private Companies List for 2014
- 2012 Federal 100 Winner, Craig P. Abod, President and CEO
- 2013 Federal 100 Winner, John Lee, Vice President of Cloud Services

As a part of this response Carahsoft has utilized multiple Cloud Solution Vendors, covering all of the Cloud Solution Categories; SaaS, IaaS, PaaS. Carahsoft's strong vendor relationships and partner ecosystem have created an efficient and cost effective response which encompasses all vendor solutions into a single, easy to utilize vehicle. While the technical requirements of each solution vary, Carahsoft strives to consolidate these specifications and responses into a cohesive unit.

MANDATORY MINIMUMS

This section should constitute the Offeror's point-by-point response to each item described in Section 5 of the RFP, except 5.1 (Signature Page) and 5.4 (Executive Summary). An Offeror's response must be a specific point-by-point response, in the order listed, to each requirement in the Section 5 of the RFP.

5.1 – Signature Page

Proposals must be submitted with a vendor information form, located on Bidsync as an attachment to the RFP, which must contain an ORIGINAL HANDWRITTEN signature executed in INK OR AN ELECTRONIC SIGNATURE, and be returned with the Offeror's proposal.

Please find Carahsoft's Signature Page completed above.

5.2 – Cover Letter

Proposals must include a cover letter on official letterhead of the Offeror. The cover letter must identify the RFP Title and number, and must be signed by an individual authorized to commit the Offeror to the work proposed. In addition, the cover letter must include:

5.2.1 A statement indicating the Offeror's understanding that they may be required to negotiate additional terms and conditions, including additional administrative fees, with Participating Entities when executing a Participating Addendum.

5.2.2 A statement naming the firms and/or staff responsible for writing the proposal.

5.2.3 A statement that Offeror is not currently suspended, debarred or otherwise excluded from federal or state procurement and non-procurement programs.

5.2.4 A statement acknowledging that a 0.25% NASPO ValuePoint Administrative Fee and any Participating Entity Administrative fee will apply to total sales for the Master Agreement(s) awarded from the RFP.

5.2.5 A statement identifying the service model(s) (SaaS, IaaS, and/or PaaS) and deployment model(s) that it is capable of providing under the terms of the RFP. See Attachment C for a determination of each service model subcategory. The services models, deployment models and risk categories can be found in the Scope of Services, Attachment D. Note: Multiple service and/or deployment model selection is permitted, and at least one service model must be identified. See Attachment H.

5.2.6 A statement identifying the data risk categories that the Offeror is capable of storing and securing. See Attachment D and Attachment H.

Please find above Carahsoft's Cover Letter addressing these requirements.

5.3 – Acknowledgement of Amendments

If the RFP is amended, the Offeror must acknowledge each amendment with a signature on the acknowledgement form provided with each amendment. Failure to return a signed copy of each amendment acknowledgement form with the proposal may result in the proposal being found non-responsive.

Carahsoft acknowledges all amendments. Also please find below Carahsoft's Acknowledgement of Amendments form completed.

5.4 – Executive Summary

Offerors must provide an Executive Summary of its proposal. An Executive Summary should highlight the major features of an Offeror's proposal. Briefly describe the proposal in no more than three (3) pages. The evaluation committee should be able to determine the essence of the proposal by reading the Executive Summary. Any requirements that cannot be met by the Offeror must be included.

Please find above Carahsoft's Executive Summary addressing these requirements.

5.5 – General Requirements

5.5.1 Offeror must agree that if awarded a contract it will provide a Usage Report Administrator responsible for the quarterly sales reporting described the Master Agreement Terms and Conditions, and if applicable Participating Addendums.

Carahsoft agrees that if awarded a contract they will provide a Usage Report Administrator responsible for quarterly sales reporting described in the Master Agreement Terms and Conditions, and if applicable Participating Addendums.

5.5.2 Offeror must provide a statement that it agrees to cooperate with NASPO ValuePoint and SciQuest (and any authorized agent or successor entity to SciQuest) with uploading an Offeror's ordering instructions, if awarded a contract.

Carahsoft agrees to cooperate with NASPO ValuePoint and SciQuest (and any authorized agent or successor entity to SciQuest) with uploading Carahsoft's ordering instructions, if awarded a contract.

5.5.3 Offeror must at a minimum complete, provide, and maintain a completed CSA STAR Registry Self-Assessment. Offeror must either submit a completed The Consensus Assessments Initiative Questionnaire (CAIQ), Exhibit 1 to Attachment B, or submit a report documenting compliance with Cloud Controls Matrix (CCM), Exhibit 2 to Attachment B. Offeror must also represent and warrant the accuracy and currency of the information on the completed. Offerors are encouraged to complete and submit both exhibits to Attachment B.

For ease of access and evaluation, Carahsoft has provided these Assessment documents under separate cover. All copies have been submitted electronically per the instructions of the RFP. Please note that specific assessments have been labeled as confidential- additional information is provided in the Confidential, Protected, or Proprietary Information section.

5.5.4 Offeror, as part of its proposal, must provide a sample of its Service Level Agreement, which should define the performance and other operating parameters within which the infrastructure must operate to meet IT System and Purchasing Entity's requirements.

SERVICE LEVEL FRAMEWORK

The service levels ("Service Levels") applicable to the Services specified in Sections 1 and 2 are set forth in Schedule B to this SD ("Service Levels for Cloud Platform Services"). The framework that governs all Service Levels is set forth in this Section.

Commencement of Service Levels

Commencing thirty (30) days from the Service Start Date (as set forth in the applicable Order Form), Virtustream's performance of the Services will meet each applicable Service Level. If Virtustream's performance of the Services does not meet the applicable Service Level, then Virtustream will use commercially reasonable efforts to restore its performance to meet such Service Level.

Service Level Reports

Service Levels will be calculated and measured monthly by Virtustream on a calendar month basis and reported each month for the previous month. The reports will be provided to Customer by the tenth (10th) working day of the month following that to which such report relates, commencing on the second (2nd) month following the Service Start Date and each month thereafter. The monthly service level report will contain at least the following items: (i) Uptime statistics for the month concerned; (ii) an analysis of reported incidents over the previous month, broken down by type for discussion; (iii) action plans for items giving rise to concern; (iv) comments and observations on any issues arising from Virtustream's performance monitoring activities; (v) recommendations on service delivery strategies to maintain or enhance the service level; and (vi) review of general business requirements ("Service Level Report"). Cloud Platform Services (CPS) has its own specific service levels as described in this document. Cloud Cover Services (CCS) has service levels that pertain to the CCS offerings and are reported separately. Not all Virtustream customers have CCS but all Virtustream customers use CPS.

Service Level Review Meetings

Monthly Service Level review meetings will be conducted by Virtustream with Customer where the monthly Service Level report specified above will be discussed. If any of the Service Levels measured over the previous calendar month period is not achieved in that month, then Virtustream will include the steps taken to rectify the problem in the next monthly Service Level Report. In addition, the issue shall be an agenda topic for discussion at the next monthly service review meeting. Additionally, after restoring service or otherwise resolving any immediate problem as specified in this SD, if Virtustream fails to provide Services in accordance with the Service Levels, Virtustream shall:

a. Promptly investigate and report on the causes of such problem;

b. Provide a Root Cause Analysis of such failure as soon as practical after such failure or at Customer's request;

c. Correct such problem that is Virtustream's fault or responsibility, as soon as reasonably practicable and coordinate the correction of such problem if Virtustream does not have responsibility for the cause of such problem.

d. Advise Customer of the status of remedial efforts being undertaken with respect to such problem;

e. Demonstrate to Customer's reasonable satisfaction that the causes of such problem (that is Virtustream's fault or responsibility) have been or shall be corrected on a permanent basis; and

f. Take corrective actions to prevent any recurrence of such problem (that is Virtustream's fault or responsibility).

Root Cause Analysis

Promptly following Virtustream's failure to meet a Service Level, Virtustream will perform a root cause analysis to determine the reason for that failure. Upon Virtustream's determination of the cause of such failure, it will provide to Customer a preliminary report citing the cause of such failure. If Virtustream determines that the failure was due to Virtustream, an additional report will be provided that details the root causes of the failure, and which details any measures that should be taken to minimize the possibility that such failures will re-occur. Virtustream will correct the problem and use reasonable commercial efforts to minimize the re-occurrence of such failures.

Service Level Exceptions

Virtustream shall not be liable for any failure to meet the Service Levels, to the extent such failure was caused by one or more of the following:

a. A failure of Customer or any of its employees, agents or contractors (including any of Customer's third party service providers) to perform any of its responsibilities under this SD;

b. Any act or omission of Customer or any of its employees, agents or contractors (including Customer's third party service providers or other third parties acting on behalf of Customer);
c. Any hardware, software or other product of a third-party or Customer equipment;
d. Any failure of Customer to secure the proper access rights or maintenance and support services with respect to any component of the Services (e.g., hardware, software, network, maintenance) for which Virtustream does not bear operational responsibility;
e. Downtimes resulting from a Virtustream's scheduled maintenance windows;
f. Customer's reprioritization of the tasks to be performed by Virtustream where such reprioritization causes Virtustream to miss a Service Level;
g. Viruses; provided that the infected Virtustream-provided system had virus protection for which the virus protection software updates were up to date;
h. An election by Customer to purchase a base commitment that is not sufficient to run Customer's system (e.g., If a customer elects to size a µVM pool that is insufficient to run the designated workload);
i. Issues occurring outside of standard working hours (as defined for business level customers) — for which the Service Level Objectives (SLOs) do not apply;
j. Cloud Cover Services (CCS) offerings — for which the Service Level Objectives (SLOs) do not apply;
k. Resolution delays due to lack of client response and/or Customer provided credential based information;
l. Priority levels not agreed upon by both customer and supplier;
m. Claims of performance degradation not substantiated through Customer provided diagnostic testing results.

5.7 Recertification of Mandatory Minimums and Technical Specifications

Offeror must acknowledge that if it is awarded a contract under the RFP that it will annually certify to the Lead State that it still meets or exceeds the technical capabilities discussed in its proposal.

Carahsoft acknowledges that if awarded a contract under the RFP that it will annually certify to the Lead State that it still meets or exceeds the technical capabilities discussed in this proposal.

BUSINESS PROFILE

This section should constitute the Offeror's response to the items described in Section 6 of the RFP. An Offeror's response must be a specific point-by-point response, in the order listed, to each requirement in the Section 6 of the RFP.

6.1 – Business Profile Provide a profile of your business including: year started, organizational structure, client base (including any focus by region, market sector, etc.), growth over the last three (3) years, number of employees, employee retention rates (specific for employees that may be associated with the services related to the RFP) over the last two (2) years, etc. Businesses must demonstrate a minimum of three (3) years of experience providing cloud solutions for large scale projects, including government experience, to be eligible for award.

Carahsoft Technology Corp. was started in Reston, Virginia in 2004. Carahsoft remains headquartered in Reston Virginia employing over 500 people that specifically support the Public Sector (Federal, State, Local, and Public Funded Educational Entities Nationwide within the United States.) Carahsoft has built a reputation as a customer focused organization with depth of experience in government sales, marketing, and contract program management. Carahsoft is one of the largest sellers of Cloud (including SaaS, PaaS, and IaaS) to U.S. the Public Sector.

Carahsoft's organizational structure allows for very focused and individualized support of any customer. The Executive Management team at Carahsoft is responsible for all aspects of day to day running of the organization. Reporting to the Executive Management Team are Directors. It is the Director's primary responsibility to oversee a particular technology area(s) and to monitor and manage all aspects of the staff, customers, and business within that area. An example of a Technology Area at Carahsoft is the VMware Virtualization practice. A host of technology offerings that use VMware at their core are supported by a single business unit overseen by a single Director that has reach back and access to the Executive Management staff. The Director's are then supported by a group of Team Leads. Each Team Lead Oversees a business area (typically defined by customer type (i.e. State Customers) or technology type (i.e. Virtual Desktop). Each team lead oversees a staff that is responsible for executing and managing the activities within that business unit.

At its' core, this organizational structure is lean and efficient, lacking layers of middle management, and empowering individuals with decision making capability in order to support all customers quickly an efficiently.

Carahsoft boasts an excellent employee retention rate. Specific benchmarks that we track include employee retention at 2 years of employment and 4 years of employment with rates of 65% and 90% respectively.

Carahsoft has been providing cloud solutions since opening its doors in 2004. US Public Sector entities have relied on Carahsoft to provide a wide variety of cloud technologies. Carahsoft serves as the cloud distributor and provides access to the core cloud technology with the core technology being supported by companies such as SalesForce, Google, ServiceNow, etc. Carahsoft currently support a state-wide implementation of Service Now's cloud technology within the Commonwealth of Pennsylvania. This implementation is known as the Enterprise Information Help Desk and manages all incident requests. Additionally, in 2013, Carahsoft has contracted with the State of Ohio to provide a cloud solution built around the technology from Salesforce. Ohios' Department of Administrative Services has contracted for Carahsoft to provide a variety of services including Service Cloud, Radian6 and Marketing Cloud as well as others. Both the Ohio and Pennsylvania cloud solutions are still being provided to these organizations.

Contracts similar in scope and size of this NASPO Cloud RFP:

California Multiple Award Schedule	California CMAS 3-12-70-2247E
Delaware Salesforce Contract	Delaware SE-CLD-001

VITA Desktop Productivity Software Contract	VITA VA-140401-CARA

6.2 – Scope of Experience Describe in detail the business' experience with government or large consortium contracts similar to the Master Agreements sought through this RFP. Provide the approximate dollar value of the business' five (5) largest contracts in the last two (2) years, under which the Offeror provided Solutions identical or very similar to those required by this RFP. Government experience is preferred.

CONTRACT VEHICLES – Over the past ten years Carahsoft has acquired and maintained a wide variety of purchasing contract vehicles for agencies at the state, local, and federal levels. Carahsoft holds statewide contracts in many states across the country, and we have a great deal of experience with IT Master contracts accessible to numerous public agencies. Carahsoft has extensive experience in successfully launching, maintaining, and managing these contracts and projects over a wide range of government customers. The range of government projects include agency/ county/ city wide project, state-wide efforts, and multi-state contracts, as well as supporting projects that cross a wide range of Federal government customers. Examples of some of these projects include:

TEXServe Multi-jurisdictional Purchasing Program: Carahsoft promoted and managed the Texserve Contract-allowing the full VMware Products & Services portfolio to be procured by Texas K-12 Users at a discounted price.

> **TEXserve services including**: VMware Technical Support, Pre-sales licensing configuration & design, contract promotion, ad hoc revenue reporting, and customer nurturing/ upsell campaigns. Carahsoft worked with Texserve, K-12 customers, to partner with a select number of VMware Premier and Enterprise Authorized Resellers utilizing their expertise under the Texserve contract.

ONENET Purchasing Consolidation: Carahsoft serves as the prime contractor and program manager for the ONENET contract serving the entire ONENET community providing the ability to procure VMware software (licensing/support) through a trusted network of strategic partners at a discounted rate. Carahsoft has a proven track record of providing the highest level of technical support while ensuring that members receive the proper software products and services conveniently under the ONENET Contract.

TX DIR Contract Sales: Carahsoft maintains a number of purchasing vehicles with the State of Texas Department of Information Resources (DIR.) 2014 DIR sales accounted for greater than $50M in revenues. Carahsoft actively markets these contracts and has grown revenues at greater than 10% annually for the past 5 years.

Total GSA State & Local Sales: Carahsoft holds a US General Services Administration (GSA) Schedule 70 Technology Contract. This contract is open to State and Local agencies to purchase as a form of Cooperative

Purchasing. Carahsoft markets the availability of this contract to eligible users and maintains sales revenues to eligible State and Local entities at greater than $50M annually.

As a whole, Carahsoft's five largest public sector contracts have totaled approximately $211,571,007 in sales in the past 2 years.

Carahsoft GSA Schedule	GS-35F-0119Y	$127,242,948.95
Texas DIR Emergency Preparedness Contract	TX-DIR-SDD-2035	$ 39,007,058.19
Texas DIR BMC Contract	TXDIR-SDD-1727	$ 15,734,306.68
Texas DIR Salesforce Contract	TXDIR-SDD-1793	$ 14,876,679.26
Texas DIR Adobe Contract	TX-DIR-SDD-2504	$ 14,710,013.43

Total Sales: $211,571,006.51

These contracts make up close to 2/3 of the total sales on contract that Carahsoft completed in that span. All of these contracts are currently in place with government entities.

6.3 – Financials Offeror must provide audited financial statements, of the last two years, to the State that demonstrate that an Offeror meets at a minimum Dun and Bradstreet (D&B) credit rating of 3A2 or better, or a recognized equivalent rating. Please provide the Respondent's D&B Number and the composite credit rating. The State reserves the right to verify this information. If a branch or wholly owned subsidiary is bidding on this RFP, please provide the D&B Number and score for the parent company that will be financially responsible for performance of the agreement.

Carahsoft has deemed its audited financials to be considered confidential. Additional information is provided in the Confidential, Protected, or Proprietary Information section. For D&B report along with additional clarification, please see page 360 in the Supplemental Information Section.

6.4 – General Information

6.4.1 Provide any pertinent general information about the depth and breadth of your Solutions and their overall use and acceptance in the cloud marketplace.

Carahsoft has assembled a team from our vast portfolio of vendors that includes our leading premiere network of cloud solutions, resellers, and subcontractors as the best solution to meet the State of Utah's requirements. They include:

AODocs, CA, DocuSign, FireEye, Google, QTS, Salesforce, SAP, ServiceNow, Virtru, Virtustream, VMware

Carahsoft is submitting as the exclusive offeror for all Google, Salesforce, and ServiceNow solutions and services for the NASPO Cloud solicitation. These manufacturers have deemed Carahsoft as the prime contractor who can effectively and efficiently manage the NASPO cloud contract on their behalf.

As a part of this response Carahsoft has utilized multiple Cloud Solution Vendors, covering all of the Cloud delivery models; SaaS, IaaS, PaaS. Carahsoft's strong vendor relationships and partner ecosystem have created an efficient and cost effective response which encompasses all vendor solutions into a single, easy

to utilize vehicle. While the technical requirements of each solution vary, Carahsoft strives to consolidate these specifications and responses into a cohesive unit. For example:

CA Technologies is a leader in IT Management Solutions in the industry. CA has be steadily moving its premier on premise management solutions to the cloud. CA Clarity Project and Portfolio Management (PPM) is one of the leading solutions used by state governments today.

Google's SaaS offering, Google Apps, has been commercially available since 2006 and presently has ~5.3 million paying customers covering 26m+ end user licenses. Google Apps represents a combination of the most popular consumer products that have been prepared for Enterprise use through the means of adding Administrative and Compliance Controls to the suite.

Gmail is the anchor product in the SaaS offering. Google has over 1B consumer users of Gmail and from that success designed a means by which customers could bring their own email-enabled domain name(s) into this managed service to replace legacy on-premises systems at a significantly reduced price. The straightforward means of migrating data as well as configuring the service and the knowledge that a majority of these business users may already be familiar with Gmail via personal use has made the adoption of Google Apps a logical choice.

Examples of the evolution of this SaaS offering include:
● Acquisition in 2007 of one of the leading email security and compliance vendors and the integration of those services to the Gmail Advanced Settings options. These features include the ability for customer System Administrators to set Spam, Content, Attachment and TLS policies to meet their specific requirements.
● In 2011 Google launches the Google Apps Status Dashboard, a publicly accessible website with RSS feeds to keep the world apprise of current system status.
● In 2012 Google increases the Gmail storage allocation from 10gb to 25gb, no change in price
● In 2013 Google modifies the storage space to unify email and Drive storage and increase the allocation to 30Gb, no change in price
● In 2014 Google offers a new premium SKU that offers unlimited unified Storage
● In 2015 Google enhances the Gmail Advanced Settings features to include pre-defined lexicons to support Data Loss Prevention scanning in email.

The above list is a short list of the variety of services, support offerings, features and best practices that Google has adopted into the service delivery of the SaaS offering. In addition to the wide use of GMail, Google has six other products with over a Billion active users. Those are Google Search, Chrome, Android, Google Maps, YouTube and Google Play.

Chrome as a browser and an operating system are further evidence of strong usage and market acceptance. In a report released by Net Applications in April of 2015, Chrome browser held 25.68% market share while IE11 had 25.04, followed by IE8 at 16.0. The increase in adoption by Enterprise customers is attributed to the real time updates against emerging threats and the Chrome for Enterprise browser controls.

Chromebooks, the laptops that run Google Chrome as the OS, are seeing a rapid increase in sales in the K-12 market worldwide. This is attributed to the low-cost and the easy-to-manage machines.

Google's PaaS/IaaS offerings entitled Google Cloud Platform was first announces in 2008 with Google App Engine, a platform to develop and host web applications. Early success on this platform included The Royal Wedding Website and BestBuy moving their online Gift Card/Registry service to the platform. Over the years, and based on market demand, Google began to externalize off PaaS/IaaS service offerings that Google developed originally for their own infrastructure and platform utilization.

Google continues to expose the benefits of Google's infrastructure to outside entities.

Or, put differently, Google lets customers use the same infrastructure that allows Google to return billions of search results in milliseconds, serve 6 billion hours of YouTube video per month and provide storage for 1Billion Gmail users.

Salesforce is the enterprise cloud computing leader dedicated to helping companies and government agencies transform into connected organizations through social and mobile technologies. Since launching its first service in 2000, Salesforce's list of over 150,000 customers span nearly every industry worldwide. The company's trusted cloud platform is creating a connected government experience for over 1000 government agencies including all federal cabinet government agencies and the majority of US States. With the world's leading cloud platform, Salesforce is freeing government data from legacy systems, empowering citizens and connecting agencies to administer government in powerful new ways. Government agencies are using Salesforce solutions for a multitude of government functions including grants management, constituent communications and correspondence management, incident and case management, call/contact center management, outreach programs, learning management, volunteer management, project management, and even donor management, among numerous others.

SAP is the fastest growing company at scale in the cloud with a user base of over 95 million subscribers. We also have the largest cloud portfolio of over 30 solutions for all lines of business as well as business suites. We also have 41 data centers in 21 locations in 11 countries.

6.4.2 Offeror must describe whether or not its auditing capabilities and reports are consistent with SAS 70 or later versions including, SSAE 16 6/2011, or greater.

Security is a multidimensional business imperative that demands consideration at multiple levels, from security for applications to physical facilities and network security. In addition to the latest technologies, world-class security requires ongoing adherence to best-practice policies. To ensure this adherence, our various cloud providers continually seek relevant third-party certification, including ISO 27001, the SysTrust audit (the recognized standard for system security), and SSAE 16 SOC 1 audit (an examination and assessment of internal corporate controls, previously known as SAS 70 Type II). SOC1, SOC2 and SOC3 audits are performed by third party auditor annually at a minimum. Additional audits and certifications include: CSA 'Consensus Assessments Initiative', JIPDC (Japan Privacy Seal), Tuv (Germany Privacy Mark), and TRUSTe.

Some examples include:

ServiceNow's security framework is based on ISO/IEC 27002 and has been ISO 27001 certified since 2012. Annually, ServiceNow undergoes ISO 27001 Surveillance audits and well as SSAE 16 attestations for both SOC 1 Type 2 and SOC 2 Type 2. Customers under an NDA can request these reports annually in assisting with both their vendor management and regulatory or compliance programs. ServiceNow provides Security Event Logs using Application Level Audit Logs and Infrastructure Monitoring,

Application Level Audit Logs. The ServiceNow application writes detailed audit log information that is stored in tables within a customer's instance. Since this is considered customer data and is stored within a customer's instance, ServiceNow does not attempt to monitor or view this data unless specifically requested by a customer. As a result the customer is responsible for monitoring the contents of these logs files and, at the customer's choosing, exporting the logs through the capabilities provided within the platform.

Infrastructure Monitoring. All components of the infrastructure supporting the private cloud feed alerts and logs into the SIEM. In addition, ServiceNow has deployed an Intrusion Detection System (IDS), positioned to listen to all inbound network traffic, with all events going to the SIEM as well. The SIEM is configured to automatically send alerts for common attacks. ServiceNow is responsible for managing the SIEM environment and securing the logs. ServiceNow retains all infrastructure logs for at least 90 days. The Security Operations Center (SOC) is also responsible for completing a daily checklist across a range of security domains, including privilege account usage, IDS alerts, file integrity monitoring (FIM), and database access. The daily checklists and captured events are managed through an instance of ServiceNow. Any variances that are discovered are raised as incidents for tracking, notifications, and investigation.

CA SaaS environment is compliant with SSAE16 for services where infrastructure and application are managed and maintained by CA. CA Agile Management currently does not hold SSAE16 certification. For SaaS offerings where infrastructure is managed by a third party, provider's SSAE16 reports are available upon request.

6.5 – Billing and Pricing Practices

6.5.1 Describe your billing and pricing practices, including how your billing practices are transparent and easy to understand for Purchasing Entity's.

Carahsoft's Order Management team works to ensure that billing and payment are completed in an efficient and simple manner. Purchase Orders and Invoices are provided to the customer early to ensure that payment can be completed whenever the customer is ready and within the confines of the agreed upon deal. Our OM team is available to answer any questions a Purchasing Entity has in order to assist with the process and confirm that they have everything needed for payment.

Carahsoft's pricing is dictated by the manufacturers- Carahsoft ensures that the Purchasing Entity's receive the best possible price by working directly with the manufacturer and ensuring that pricing meets or exceeds the contract being used. In addition, Carahsoft works with the manufacturer to ensure that all pricing changes are accounted for within the contract, as applicable.

6.5.2 Identify any typical cost impacts that a Purchasing Entity might need to consider, if any, to implement your cloud solutions.

When a purchasing entity determines they need implementation services to their cloud solutions, the Carahsoft offering provides these additional services. For Example:

ServiceNow Response: Customers typically engage ServiceNow for the initial implementation and training services and then for any major new future application implementations to get the best-of-breed expertise

for good standard solution support. ServiceNow developed the platform and applications so anyone could support changes to the configuration without having to hire outside consultants. The customer is empowered as they gain experience either by shadowing ServiceNow consultants during initial implementations, as they talking to other customers through the Community website, or by asking for technical support through the portal. So initial costs typically occur for ServiceNow when it is first implemented and there might be requested services as customers add new application support but there are no ongoing costs typically.

CA Cloud SaaS solutions are fully operational multi-tenant solution that are fully ready to use at outset. These Solutions are typically complex management solutions that do require setup and training. For example many customer will purchase a limited time block of consulting to help with loading data, and configuring reports. Training is also available for all applications to either augment start-up packs or walk customers through basic tasks.

In addition to the licensing fees there are optional Google services that a Purchasing Entity may find meet additional mandatory requirements. Examples would include adding on other SaaS solutions like Virtru for end to end encryption or AODocs for Document Management. The key benefit to moving to Cloud based vendors is a new set of transformative tools that are more productive and most cost effective than traditional client server solutions. Other additional costs may come into play of the Purchasing Entity wants to outsource all of the configuration and migration work to the selected reseller leading to additional time and materials expenses.

The Salesforce solution is available immediately for use via the internet after a Purchasing Entity makes a purchase of the solution. Other additional costs would include any implementation fees to be performed by a certified Salesforce implementation partner. These fees vary based on the type of project and length and complexity of implementation.

6.5.3 Offeror must describe how its Solutions are NIST compliant, as defined in NIST Special Publication 800-145, with the service models it offers.

Carahsoft's cloud solution offerings all fit within the guidelines listed in NIST publication 800-145 and repeated in Attachment D of this response. Please see response 8.1.5 for a more detailed explanation.

6.6 – Scope and Variety of Cloud Solutions

6.6 Specify the scope and variety of the service models you offer under this solicitation. You may provide a list of the different SaaS, IaaS, and/or PaaS services that you offer.

Carahsoft proudly offers a number of SaaS, PaaS, and IaaS supported by the cloud technologies as listed below. Many of our top tier cloud vendors also provide subscription and utility based pricing models which would be available to the State. Below is a list of each manufacturer being proposed in this response, along with the specific type of solution (SaaS, IaaS, and PaaS) they fit into:

SaaS – AODocs, CA Technologies, DocuSign, FireEye, Google, QTS, Salesforce, SAP, ServiceNow, Virtru, VMware
PaaS – Google, QTS, Salesforce, SAP, ServiceNow, Virtustream
IaaS – FireEye, Google, QTS, Virtustream, VMware

6.7 – Best Practices

6.7 Specify your policies and procedures in ensuring visibility, compliance, data security and threat protection for cloud-delivered services; include any implementations of encryption or tokenization to control access to sensitive data.

Carahsoft utilizes varying procedures for ensuring visibility, compliance, data security and threat protection for cloud-delivered services. Please see the below examples of potential options for meeting the State's expectations:

ServiceNow Response: ServiceNow applications have the advantage of being built on a single cloud platform that consists of one user interface, one code base and one data model; delivering holistic visibility into processes, creating a single source of truth, irrespective of whether the processes and systems are within the customer's environment or hosted in the cloud. ServiceNow invests significant resources in providing its services in a secure manner. This includes global teams delivering 24x7 operations and technical support from ServiceNow staff. ServiceNow currently has offices with staff focused on the management of the private cloud in Australia, the Netherlands, the U.K, North America, and Asia. The ServiceNow environment is a private cloud, fully owned and operated by ServiceNow, which supports a logically single tenant architecture. Customer data is isolated from other customer data by leveraging an enterprise-grade cloud architecture and a dedicated database and application set per instance. This gives ServiceNow customers cost reduction through shared infrastructure, while having the security benefits of customer-specific isolation at the application and data layers. In addition to the security features that come standard within the platform and each customer instance, customers can leverage the additional security features within ServiceNow to augment the security configuration of their instances based on their own needs and risk profile.

CA Response: This is addressed throughout all of our policies and procedures. CA SaaS Operations and Delivery runs an Information Security Management Framework (ISMS), which includes security organization, documentation, monitoring, and continuous improvement cycle. The security documentation comprises of CA SaaS Operations information security policies, procedures, guidelines and checklists. ISMS documentation is reviewed along with applicable controls annually. CA offers a variety of SaaS solutions, details for each offering has been provided in Exhibit 1 and 2 of this proposal.

Salesforce Response: Salesforce has many customers that are subject to laws pertaining to the processing of personally identifiable information (PII) or personal data. Salesforce offers its customers a broad spectrum of functionalities and customer-controlled security features that its customers may implement in their respective uses of the Salesforce services. Salesforce believes that these provide its customers the flexibility to comply with laws with stringent privacy and security requirements. Encryption options vary based on Salesforce Commercial Cloud or Salesforce Government Cloud offering.

Government Cloud Encryption:
As part of the Salesforce Government Cloud, Salesforce is capable of responding to FIPS 140-2 cryptographic implementations for data being transferred between the State's web browser and Salesforce. Data that resides within Salesforce's protected boundary does not use FIPS 140-2 validated encryption as compensating/mitigating controls are in place to protect data. Additional information is provided below.

Data In Motion:

Salesforce employs cryptographic mechanisms to protect information during transmission. All transmissions between the user and Salesforce are encrypted by default with a 2048- bit Public Key. Our service uses International/Global Step Up certificates. We support one- way TLS, in which customers create secure connections before sharing private data.
Secure routing and traffic flow policies ensure that customer traffic is encrypted entering Salesforce until the load balancer decrypts the traffic. The load balancers decrypting the traffic are FIPS 140-2 compliant and are located inside of the Salesforce Government Cloud isolation boundary.

Data At Rest:
NIST SP 800-53 Rev. 4 states in SC-28, “Information at rest refers to the state of information when it is located on a secondary storage device (e.g., disk drive, tape drive) within an organizational information system.” SC-28 also states, “Organizations may choose to employ different mechanisms to achieve confidentiality and integrity protections, as appropriate.” All secondary storage media (hard drives, disk drives, and tapes) containing customer data are maintained within Salesforce’s secure production data centers until the media has been sanitized and destroyed. Salesforce relies on physical access controls as a compensating control to protect the data.

ORGANIZATIONS PROFILE

This section should constitute the Offeror's response to the items described in Section 7 of the RFP. An Offeror's response must be a specific point-by-point response, in the order listed, to each requirement in the Section 7 of the RFP.

7.1 – Contract Manager

The Offeror must provide a Contract Manager as the single point of contact for management of the NASPO ValuePoint Master Agreement, administered by the State of Utah. The Contract Manager must have a minimum of three (3) years' experience managing contracts for cloud solutions.

7.1.1 Provide the name, phone number, email address, and work hours of the person who will act as Contract Manager if you are awarded a Master Agreement.

Bethany Blackwell
Senior Manager
703-230-7435 (office)
703-501-1134 (cell)
Bethany.blackwell@carahsoft.com
Working hours: 7am-7pm EST M-F

7.1.2 Describe in detail the Contract Manager's experience managing contracts of similar size and scope to the one that will be awarded from this RFP. Provide a detailed resume for the Contract Manager.

The proposed contract manager, Bethany Blackwell, has over 5 years of experience in managing SaaS contracts in both the State and Local and Federal markets.

Bethany developed and manages contracts and associated terms for cloud contracts in more than 10 states. The combination of the State and Federal contract vehicles and BPAs being managed is valued at over $300M. Annually, she oversees 1000+ SaaS transactions off of these contract vehicles which include licensing and implementation that provide end to end cloud solutions to public sector customers.

Name	Position
Bethany Blackwell	**Carahsoft Senior Account Manager – Will serve as the NASPO ValuePoint Contract Manager**
Background	
• Senior Manager for cloud solutions products, including Salesforce.com, DocuSign, BMC Software • Vendor/Partner manager for 20+ complimentary solution vendors and 25+ implementation partners and system integrators • Graduated Virginia Tech in 2010 - dual degree with concentrations in Psychology and Political Science • 5+ years of experience at Carahsoft	
Skills	

• Expertise in negotiating SaaS contract vehicles and terms at State level • Knowledge of contract vehicles, BPAs, multi-year deals, multi-vendor deals • Management of enterprise size product contracts • Establish and maintain positive customer relationships through proactive communication • Maintained interactions with customers to ensure quick, accurate quotes; facilitated easy ordering process for customers
Relevant Experience
• Oversees the management and execution of 900+ individual SaaS contracts, valued at 85M+ annually • Maintain the annual recurring subscription renewal bases to ensure no customer's lapse in service • Oversees the ordering and distribution of licenses on statewide enterprise licenses agreements and various BPAs • Established vendor specific terms and conditions for 10 different statewide contracts • Assist customers in shifting buying strategy from perpetual to subscription licensing model

7.1.3 Describe in detail the roles and responsibilities of the Contract Manager as they apply to the NASPO ValuePoint Master Agreement that will be awarded from this RFP.

The Contract Manager assigned to this contract will be in charge of all coordination and organization efforts between Carahsoft and NASPO ValuePoint. This includes, but is not limited to:

- contract negotiation
- roll-out plan
- amendments completion
- renewal execution
- reseller/subcontractor additions
- contract pricelist updates and upkeep
- contract compliance
- marketing coordination

TECHNICAL RESPONSE

This section should constitute the Technical response of the proposal and must contain at least the following information:

A. A complete narrative of the Offeror's assessment of the Cloud Solutions to be provided, the Offerors ability and approach, and the resources necessary to fulfill the requirements. This should demonstrate the Offeror's understanding of the desired overall performance expectations and clearly indicate any options or alternatives proposed.

In response to the State of Utah request for Cloud Solution Proposals, Carahsoft has assembled a response that includes a number of Cloud Solution Offerings from within the Carahsoft Cloud framework. These offerings are all supported in part or wholly by twelve leading cloud technology providers. Each provider's technology is an integral part of Carahsoft's proposal. Within this framework, Carahsoft will orchestrate, assemble, and execute on all activities necessary to support this contract, engaging each cloud technology provider as needed in the delivery of a particular service or solution offering.

The Carahsoft Cloud framework will provide for all requirements of the State of Utah Request for Proposal to be fulfilled. Carahsoft will be able to provide Cloud Solution Offerings to the State of Utah as well as to those entities that may participate via the cooperative purchasing program. The Carahsoft Cloud proposal provides for the provision of PaaS, IaaS, and SaaS offerings that are compliant with all requirements as outlined by the State. Carahsoft will provide dedicated resources to supporting this agreement. Carahsoft will insure that adequate resources are supplied to fully support this agreement during all phases from contract launch through termination. Usage requirements and demand resources fluctuate over time and Carahsoft's Cloud offering has been constructed in a manner that provides for the ability to scale without interruption, disruption, or any other similar interruption of customer service and solution availability.

B. A specific point-by-point response, in the order listed, to each requirement in the Section 8 of the RFP. Offerors should not provide links to a website as part of its response.

Offeror's should focus their proposals on the technical qualifications and capabilities described in the RFP. Offerors should not include sales brochures as part of their response.

For the purposes of Carahsoft's response to the technical requirements (section 8) of this RFP, please note that any response provided related to a specific manufacturer should be treated as a response to the following categories:

SaaS – AODocs, CA Technologies, DocuSign, FireEye, Google, QTS, Salesforce, SAP, ServiceNow, Virtru, VMware
PaaS – Google, QTS, Salesforce, SAP, ServiceNow, Virtustream
IaaS – FireEye, Google, QTS, Virtustream, VMware

8.1 – Technical Requirements

8.1.1 Offeror must identify the cloud service model(s) and deployment model(s) it intends to provide to Eligible Users. See Attachment D.

CA	APM	CA APIM SaaS offering helps accelerate, secure and manage APIs. CA is responsible for development and management of application. AWS provides IaaS services to CA for management of the underlying cloud infrastructure.
	MAA	CA Mobile App Analytics stimulates collaboration between business analysts, developers, operations and support in order to accelerate mobile app delivery and improve end-user experience. This service is hosted at CenturyLink Data center and the infrastructure is managed and maintained by CA SaaS Ops and Delivery team.
	CA Agile	CA Agile Central is a SaaS offering that is generally used to document and manage work within the SDLC.
	ASM	CA App Synthetic Monitor (ASM) provides end-to-end transaction response-time visibility into cloud, mobile and Web applications. Application utilizes Rack Space IaaS services.
Google	The Cloud Service Models that we intend to provide include SaaS, PaaS, and IaaS. In our response we will describe the various options for using Google Apps under the SaaS model and the functions of Google Cloud Platform under Paas and Iaas.	
AODocs	The Cloud Service Models that we intend to provide is SaaS.	
Virtru	All Virtru services are cloud-based and accessed via browser or downloadable browser extensions and plugins.	
Salesforce	Salesforce's deployment model is a "public" cloud infrastructure, as defined by NIST 800-145	
ServiceNow	Cloud service model: Software as a Service (SaaS) Deployment model: Private Cloud	
QTS	"QTS is a leading national provider of Infrastructure as a Service (IaaS) data center solutions and fully managed cloud services and a leader in security and compliance. The company offers a complete, unique portfolio of core data center products, including custom data center (C1), colocation (C2) and cloud and managed services (C3), providing the flexibility, scale and security needed to support the rapidly evolving hybrid infrastructure demands of web and IT applications. With 12 data centers in eight states, QTS owns, operates and manages approximately 4.7 million square feet of secure, state-of-the-art data center infrastructure and supports more than 850 customers. QTS' Critical Facility Management (CFM) can provide increased efficiency and greater performance for third-party data center owners and operators. QTS offers a number of IaaS solutions.	
SAP	Ariba	Our solutions are offered and delivered in a true subscription-based model and shared service (multi-tenant) offering. There is no software to install, no hardware to buy, no maintenance or support costs and no need to hire consultants or tech specialists to run the system. We deploy and manage the infrastructure. Customers only need a web browser for access. Subscriptions include system maintenance, automatic upgrades, enhancements and application of service packs, Level 1– 3 help desk support, professional services and best practices built directly into the application.
	Fieldglass	The SAP Fieldglass application is exclusively offered in a software as a service (SaaS) model.
	Hanna	SAP HANA Enterprise Cloud (HEC) is a private managed isolated & dedicated ladnscape (single tenant) offering end-to-end cloud-based infrastructure and managed services for SAP applications powered by SAP HANA. It is a fully scalable, enterprise-ready, mission-critical, secure and high-availability cloud service.
	Hybris	The SAP Hybris Commerce, Cloud Edition offering are all single tenent hosted VM environments. Customers have their own VM's with SAP Hybris instances deployed to those VM's. The SAP Hybris Commerce, Cloud Edition currently

		has Development, Staging, Testing, and Production environment. More environments can be added as required.
	SuccessFactors	Our solutions are delivered through a private cloud using a multi-tenant architecture. We refer to this as a Controlled Cloud. It includes a contractual framework reflecting applicable data privacy regulations, implementation and maintenance in accordance with Technical and Organizational Measures (TOMS) and regular audits by an independent third party for industry compliance and transparency.
VMware	vCloud Air	IaaS – Public, Hybrid, Community
	Horizon Air Desktop & Apps	IaaS – Public
	vCloud Suite	IaaS – Private, Hybrid, Community
	Airwatch	IaaS – Private SaaS – Public
	Horizon 6	IaaS – Private
	Realize Air Complaince	SaaS – Public
	SocialCast	SaaS – Public
FireEye	All FireEye cloud offerings included in this response fit the SaaS cloud service model and private cloud deployment model.	
VirtueStream	Virtustream solution is fully NIST compliant for Essential Characteristics, as the Infrastructure as a Service (IaaS) Service Model, with all deployment options – Private Cloud, Community Cloud, Public and Hybrid Cloud.	

8.1.2 For the purposes of the RFP, meeting the NIST essential characteristics is a primary concern. As such, describe how your proposed solution(s) meet the following characteristics, as defined in NIST Special Publication 800-145:
8.1.2.1 NIST Characteristic – On Demand Self-Service: Provide a brief written description of how the cloud solutions proposed satisfies this individual essential NIST Characteristic. Attest capability and briefly describe how self-service technical capability is met.

CA	APM	N/A. This is a SaaS service and clients do not have direct access to the underlying infrastructure in order to provision computing capabilities. CA is responsible for the management and maintenance of the infrastructure and will make any necessary adjustments as part of providing this service to its clients.
	MAA	This is a SaaS offering and On-Demand service is not available, however, MAA customers are enabled to manage their accounts and carry out configuration changes required to manage mobile applications.
	CA Agile	We are a fully multi-tenant environment and do not provide the On-Demand Self-Service capability.
	ASM	This does not apply as this is a SaaS service. ASM customers are able to manage all aspects of their accounts, create sub-accounts, and make any configuration changes necessary for their monitors.
Google	SaaS, Google Apps administrators have access to an Admin Panel that allows them to perform user administration, service configurations, reporting on demand. Paas/IaaS, Google Cloud Platform is an integrated set of Compute tools, Storage Tools, Networking Tools, Big Data analytic tools, Management tools and Services APIs. A customer can use any of these services on demand via the Developer's Console.	
AODocs	SaaS, AODocs administrators have access to an Admin Panel that allows them to perform user administration, product configurations,reporting on demand.	

Virtru	All required services can be provisioned immediately when required. Users only need to install application to get single-user capability, or login to administrative dashboard for administrative features.	
Salesforce	Salesforce PaaS and SaaS solutions are delivered on-demand via the web and can be accessed with a browser and internet connection or mobile device. No additional software or infrastructure is required. Salesforce hosts the entire solution, thus freeing up customers to manage their mission, not manage an infrastructure solution. Additionally, Salesforce is browser agnostic and supports all major browsers (Firefox, Chrome, Safari, IE). No installations on users' laptops or desktops are required and thus the solution is accessible from anywhere an internet connection and supported browser are available, including mobile devices.	
ServiceNow	Customer instances are provisioned automatically after an agreement between a customer and ServiceNow is executed. ServiceNow actively monitors customer instance performance and can automatically scale its application servers out horizontally by adding them to the load balancer pools for a particular instance.	
Docusign	DocuSign's DTM® solution is ISO 27001:2013 certified and many of the ISO 27001:2013 controls are mapped to the NIST 800-53 requirements; we can provide additional information upon request.	
QTS	On-demand self-service. A consumer can unilaterally provision computing capabilities, such as server time and network storage, as needed automatically without requiring human interaction with each service provider.	
SAP	Ariba	The solution provides self-service user profile management. Users profit from the intuitive, minimal-step nature of the user interface with little or no training. Changes to user profile includes workflow capability for profile changes.
	Fieldglass	All system resources are available to all customers without limitation. The system is highly configurable with most configurations being available to the customer's administrators.
	Hanna	HANA Enterprise Cloud is a private managed cloud therefore infra & services could be requested (added or decommisioned) on demand by placing change requests with SAP HEC teams. HEC roles & responsibilties document clearly articulates what is included in the monthly HEC pricing and what is available on-demand in addition to scaling up or down on the infra/compute.
	Hybris	N/A
	SuccessFactors	All self-service is in one place, including benefits and payroll if those products are in scope. Self-service is an intuitive experience. We provide the ability for employees to have configured permissions to take action in the tool such as field or data updates for personal information, benefits changes, payroll actions, completing workflow for assigned activities in the tool, etc. Self-service for both employees and managers is configurable to fit your business rules and organizational requirements.
VMware	VMware's IaaS and SaaS offerings complies with the On-Demand Self-Service characteristic, because once purchased, a user can unilaterally provision compute resources with no human interaction with VMware. The subscription includes access to two self service consoles: My VMware for account management, and the VMware vCloud Air Console which is the primary interface for access consumption and management of cloud resources purchased from VMware. (See doc for a complete list of products/ features that comply)	
FireEye	FireEye is offering 4 distinct SaaS cloud solutions each featuring self-service features specific to the unique capabilities of the offerings: 1.Email Threat Prevention (ETP) Email Provisioning	

	Once the ETP infrastructure is provisioned, customers can self-service the acceptance of up-stream mail and delivery to user mailboxes by configuring their own domain settings. No user mailbox provisioning is required as ETP will automatically check the validity of the email recipient with the downstream service. 2.Mobile Threat Prevention (MTP) User Provisioning Once the MTP infrastructure is provisioned, customers can self-service the creation of service users by integrating with an LDAP service or manually adding the users via the user interface. Device Provisioning Once the MTP infrastructure is provisioned, customers can self-service the creation of managed devices by instructing users to install the FireEye MTP Application on their mobile device and having a valid user account provisioned. 3.Threat Analytics Platform (TAP) User Provisioning Once the TAP infrastructure is provisioned, customers can create and assign role-based access control to user accounts. The enrollment process includes the ability to create two-factor authentication for newly provisioned users. Data Sources Once the TAP infrastructure is provisioned, customers can configure new data sources to feed the TAP instance without the assistance of FireEye. The TAP communications broker accepts data feeds in the following formats: syslog, flat files, TCP/UDP streams, and JDBC connections. 4.FireEye as a Service with Continuous Vigilance (FaaS CV) User Provisioning Once the FaaS infrastructure is provisioned, customers can create and assign role-based access control to user accounts via the on premise FireEye sensors.
VirtueStream	Virtustream IaaS provides a self-service portal called xStream, where users can access, view, edit, provision, and modify compute, storage, network and application services based on granular Role Based Access Control, which can be integrated with Active Directory or LDAP. Virtustream portal that enables the user to provision VMs, order services through a catalog, add storage, upload service templates, and run various reports all through the same portal.

8.1.2.2 NIST Characteristic – Broad Network Access: Provide a brief written description of how the cloud solutions proposed satisfies this individual essential NIST Characteristic. Attest capability and briefly describe how network access is provided.

CA	APM	The APIM service is accessed via HTTPS on a supported browser with no requirements for a workstation client install ; mobile friendly and optimized for use with iOS and Android tablets
	MAA	Upon native authentication, MAA dashboard is accessible by any host over public internet. Also, mobile devices connect to the service using REST API.
	CA Agile	All access to the application is through a browser.
	ASM	The ASM dashboard and API are accessible from any host connected to the public Internet. The API and dashboard require authentication, and each account is only accessible by the account owner (customer).
Google	SaaS, Google Apps is device, platform and network agnostic. As a pure play cloud-based solution the services can be accessed via any modern browser from any network access point. Customers that have requirements to limit access to trusted devices or trusted access points have access to Device Management tools via the Admin Panel at no additional cost. PaaS/IaaS, Google Cloud Platform management services can be accessed via any modern browser from any network access point. End-users can accesses services through one or more	

	appropriate tools (browser, CLI, APIs, etc.). Administrators can also monitor and manage services through a mobile app.
AODocs	SaaS, AODocs is service, platform and network agnostic. As a pure play cloud-based solution the services can be accessed via any modern browser from any network access point.
Virtru	All Virtru services are available on the publically available internet.
Salesforce	Salesforce PaaS and SaaS solutions are delivered on-demand via the web and can be accessed with a browser and internet connection or mobile device. No additional software or infrastructure is required. Salesforce hosts the entire solution, thus freeing up customers to manage their mission, not manage an infrastructure solution. Additionally, Salesforce is browser agnostic and supports all major browsers (Firefox, Chrome, Safari, IE). No installations on users' laptops or desktops are required and thus the solution is accessible from anywhere an internet connection and supported browser are available, including mobile devices.
ServiceNow	ServiceNow's physical architecture is deployed into ServiceNow's managed dedicated colocation cage space. Multiple diverse Internet connections terminate within the dedicated cage space providing redundant access from the Internet to the ServiceNow environment. All users, administrators and developers connect to the ServiceNow private cloud over HTTPS, leveraging TLS, for communication to and from a ServiceNow instance with all normal interactions via a web browser. There is no requirement to install any client software on any desktop, laptop, tablet, or smart phone used to access a ServiceNow instance.
Docusign	Please see above.
QTS	Broad network access. Capabilities are available over the network and accessed through standard mechanisms that promote use by heterogeneous thin or thick client platforms (e.g., mobile phones, tablets, laptops, and workstations). QTS recognizes that the connectivity challenges of today are largely driven by consolidation, virtualization and adaptive architectures. Our agile connectivity solutions provide you with both unification across your communication infrastructure and with built-in network scale, reliability, and high-performance. QTS metroConnect is a fast, reliable, high bandwidth connection to hundreds of network and service providers inside the local Carrier Hotel. With access to the numerous networks at the carrier hotel, QTS delivers the interconnection necessary to support your connectivity, business continuity and application collaboration needs. metroConnect offers redundancy and diversity options that ensure your content is always available. •High availability •Backed by a 99.999% SLA •24x7x365 monitoring and management •Carrier-neutral model •Convenient access to an array of Carriers and Internet providers •Dedicated, secure, and highly resilient connectivity with speeds of 100Mbps, 1Gbps or 10Gbps* •Supports all connectivity redundancy, business continuity, and collaborative application needs QTS data centerConnect Service Data centerConnect is a secure, scalable, cost-effective way to connect your primary and secondary sites between two or more client environments located in different QTS data centers providing a reliable interconnection option for any size business. QTS data centerConnect enables data replication and recovery through its resilient and redundant network. This ensures your business operates successfully with seamless, day-to-day transactions over a high-performance, low latency connection that supports business continuity, data replication and other IT business application needs. With QTS data centerConnect you get: •High Availability – Resilient network architecture provides high availability and reliability

	•Dedicated and Secure – Dedicated bandwidth with secure MPLS encapsulation •Scalable Bandwidth – Easily scale your bandwidth (from 10Mb up to 1Gb) •Flexible Network Configurations – Supports multiple network topologies •Cost-effective, Bundled Solution – All inclusive, bundled offer •Fully Managed, End-to-End – End-to-end, proactive monitoring and management, 24x7x365 QTS internetConnect Service internetConnect provides a multi-homed, high performance, dual access, multi-carrier network that meets all your Internet service needs. We ensure maximum uptime, guaranteed availability, and various bandwidth speeds through our flexible, high performance, carrier-neutral offer. For enterprises and government agencies conducting business over the Internet, QTS internetConnect Service provides a highly reliable, secure connectivity solution for production environments. •Direct access to multiple ISP backbones gives unmatched reliability and guarantees maximum uptime ◦Dual connections with direct access to multiple ISP backbones ◦Diverse, redundant paths to multiple backbone providers ◦Dual paths, with diverse entry points into the QTS Data Center •Anti-DDoS Mitigation Services provide an additional level of protection and security •Dedicated with burstable bandwidth options provides resiliency and flexibility •Backed by an industry leading 100% SLA •Optional service plans to meet your needs QTS ethernetConnect Service You need to be able to connect your employees and customers to your applications and to the outside world. Whether hybrid cloud, disaster recovery/disaster recovery as a service, data replication, data migration or other applications, you need the ability to seamlessly and conveniently connect your business together and to the outside world as if there is no distance between you. QTS ethernetConnect offers a variety of connectivity options. You can centralize your services with a single provider. And since QTS can handle everything from ordering to billing you have a single provider for a complete solution – “One Stop Shopping”. QTS understands your needs and will tailor your end-to-end solution for your business. •High Bandwidth – Speeds are available in select increments of 100Mb to 10Gb •Data Privacy – Data is separated from IP traffic as it traverses the carrier backbone •High Performance Options – Solutions can be developed to fit your specific performance or reliability requirements •Consistency – Ethernet circuits travel over a single carrier’s infrastructure and data follows a consistent path.
SAP	Ariba	Ariba uses Cisco Routers and Catalysts (high-speed switches) for ensuring maximum network connection performance. They deliver enterprise-class versatility, integration, and power to Ariba. Together, these routers provide the required support for Internet/intranet access with firewall security.
	Fieldglass	Customers are only required to use a standard web browser with default settings to access and use the Fieldglass solution.
	Hanna	Cloud Capabilities are available over the network (via secure MPLS or VPN network connectivity) and accessed through standard mechanisms that promote use by heterogeneous thin or thick client platforms such as mobile phones, laptops. HEC is an extension of customers existing netwerk and uses customes IP range and /24 range.
	Hybris	All capabilities of SAP Hybris are available over the network. Furthermore, they are accessible by standard mechanism including heterogenous thin or

		thick client platforms through either standard web technologies or through the hybris OCC REST web service API's.
	SuccessFactors	Our solution was designed from the outset for high availability. We provide a system availability SLA of 99.5%. Every component (hardware and software) is completely redundant. There is a redundant piece of equipment or software for every hardware or software component for every layer of the infrastructure stack (server, software and network). We load balance at every tier in the infrastructure, from the network to the database servers. F5 load balancers are used to route traffic to an available web server to process the request. Application server clusters are enabled so that servers can fail without interrupting the user experience. We maintain an N+1 approach for all equipment in the hosted cloud environment, so that there is never a single point of failure. All customer database backups are encrypted and streamed in a secure manner from the customer's "primary" data center to their "alternate" data center, allowing for a timely restoration of service in the event of disaster. Based on the terms of the agreement, we will designate one of the data centers as the customer's "primary" data center, with an additional data center designated as the "alternate" for data redundancy and disaster recovery purposes. Load balancers will automatically detect a software or hardware error and take the servers out of service if needed without interrupting the user experience or application. They also allow capacity addition or reduction without interrupting service. All of the JBOSS application servers are clustered. Each is designated as a primary and a secondary, so any application server can fail without any loss of service or interruption of the application or user experience. The database servers are also clustered using a Veritas high availability cluster. The Veritas suite will detect any hardware or software errors in the database machines and automatically fail them over to a standby server
VMware	VMware's IaaS offerings complies with the Broad Network Access characteristic. All fo these products' capabilities are available over the public internet and can be used by heterogeneous thin or thick client platforms. Consumers only need internet access to access these resources. Additional capabilities exist including the ability to secure communications over the public internet including IPSEC VPN, SSL Client VPN, and the ability to consume via WAN connectivity. VMware's SaaS offering AirWatch can be accessed over the internet or private network through standard mechanisms.	
FireEye	All FireEye cloud offerings included in this response meet the definition of broad network access. Each of the solutions performs its designed functionality over standard internet-facing services and is accessible via a web browser from any internet connected device when valid credentials are provided.	
VirtueStream	Virtustream IaaS provides Broad Network Access, where it can provide landing zone for any private network (Point-to-Point, Virtual Private Label Switching, Multi-Protocol Label Switching, or Direct Connect), public network (Internet, Trusted Internet Connectivity as landing zone, IPSEC VPN and SSL VPN) and also extranet connectivity (shared network, i.e, Cloud Connect, Cloud Exchange, etc.) which is growing rapidly as option for connecting cloud resources.	

8.1.2.3 NIST Characteristic - Resource Pooling: Provide a brief written description of how the cloud solutions proposed satisfies this individual essential NIST Characteristic. Attest capability and briefly describe how resource pooling technical capability is met.

Carahsoft's multiple Cloud Service Provider's solution provides for Resource Pooling, as defined by NIST, in a variety of methods. Each method optimizes the cloud subscriber's experience while optimizing the availability of compute, network, and data resources. Each service provider provides Resource Pooling, see below for details.

CA	APM	CA API Management SaaS (SaaS APIM) has been built from the ground up to be a multi-tenanted, SaaS-based offering that leverages Amazon's infrastructure to scale appropriately; utilize a continuous integration model to provide for frequent updates; and fail over across multiple availability zones.
	MAA	MAA core service utilizes dedicated infrastructure layered with virtualization capabilities. It doesn't share computing resources with other services. Tenants are segregated using application containerization capabilities.
	CA Agile	We monitor all system resources and have alerting mechanisms when resource constraints have reached a defined threshold. We can easily scale our systems to accommodate any additional capacity. If we determine a single user is using a significant amount of resources we will proactively reach out to them to understand what they are trying to accomplish and help them to formulate more performant queries.
	ASM	All ASM core servers are dedicated physical servers. ASM Public Status Pages are served from dedicated web servers (used only by CA ASM) in the Amazon Cloud, on shared tenancy virtualization. Amazon Cloud virtual machines used by ASM are managed by and provisioned by CA ASM systems administrators.
Google	SaaS, Google's global infrastructure is a shared pool of resources that dynamically serve each end user with a primary data center access point that may rotate throughout the session without the end user being aware while at the same time replicating any data across at least two additional geographically dispersed data centers which also may rotate through the session. PaaS/IaaS, Google Cloud Platform also operates across the global Google infrastruture. The elements of this service can be defined within the Developer's console to run within a higher level of abstraction which covers four regions; Central US, Eastern US, Western Europe, East Asia where each region has three or four zones.	
AODocs	AODocs infrastructure is hosted in Google App Engine and data of our customers on Google Drive. This protection is insured by Google.	
Virtru	Virtru Services are offered in a fully multi-tenant mode if the customer requests.	
Salesforce	Salesforce is a multitenant cloud-based subscription service. Multi-tenant cloud solutions provide a single, shared infrastructure, one code base, one platform that is all centrally managed, with platform-based API to support all integration traffic, and multiple release upgrades included as part of the subscription service. Multi-tenancy and the Cloud Computing model remove unneeded tasks from the process of delivering, managing, and integrating software. Salesforce customers will not need to maintain any hardware or software. Without multiple versions to support, integrations don't break during updates; they are simply updated automatically. As a result, both the initial integration and its continued maintenance are simplified. More resources can be focused on creating a better product, with a faster cycle of innovation, instead of having to manage the complexity of many different versions to support a vast installed base. Salesforce's position as an online service enables us to roll out all levels of improvement, from patch releases to major upgrades that are largely transparent to the end users. When a bug is fixed and tested, it is rolled out to the application as part of regular maintenance; the nature of the service prevents special patches and code branches for individual customers, so all fixes can potentially benefit all customers.	
ServiceNow	The ServiceNow environment is a private cloud, fully owned and operated by ServiceNow, which supports a logically single tenant architecture. Customer data is isolated from other customer data	

	by leveraging an enterprise-grade cloud architecture and a dedicated database and application set per instance. This gives ServiceNow customers cost reduction through shared infrastructure, while having the security benefits of customer-specific isolation at the application and data layers. In addition to the security features that come standard within the platform and each customer instance, customers can leverage the additional security features within ServiceNow to augment the security configuration of their instances based on their own needs and risk profile. Customers share a hardware platform (no virtualization), but access entirely separate individual instances of the ServiceNow platform.	
Docusign		
QTS	Resource pooling. The provider's computing resources are pooled to serve multiple consumers using a multi-tenant model, with different physical and virtual resources dynamically assigned and reassigned according to consumer demand. There is a sense of location independence in that the customer generally has no control or knowledge over the exact location of the provided resources but may be able to specify location at a higher level of abstraction (e.g., country, state, or datacenter). Examples of resources include storage, processing, memory, and network bandwidth.	
SAP	Ariba	Ariba recognizes that customers need the highest-possible availability and reliability. To that end, Ariba infrastructure is scalable and redundant at all tiers. To provide high availability and reliability, Ariba has extensive error handling and fail-over capabilities. In order to ensure the highest availability, Ariba uses such best practices as frequent systems backup and maintenance, redundant systems, proactive customer notification of unplanned down-time and international support coverage.
	Fieldglass	Fieldglass is offered in a SaaS model. All customers access the same Fieldglass application version in a multi-tenancy database. The system is hosted in a secure hosting facility. All system resources are available to all customers without limitation.
	Hanna	SAP HEC does not pool resources for critical business systems as it's a managed private cloud, which is dedicated to one particular customer. However, network routers, availability reporting & monitoring could be shared. Details can be provided during HEC technical assessment workshop.
	Hybris	All computing resources of the data centers are pooled to serve multiple customers. Each customer gets their own separate VM's and their own instances of hybris deployed to those VM's.
	SuccessFactors	Load Balancing & Server Clustering – We load balance at every tier in the infrastructure, from the network to the database servers. Application server clusters are enabled so that servers can fail without interrupting the user experience. Database servers are clustered for failover. We maintain an N+1 approach for all equipment in its hosted environment, so that there is never a single point of failure. Complete Redundancy - Every infrastructure component is redundant. There are at least two of each hardware component that processes the flow and storage of data. Backup & Restore - the Data center runs full data backups weekly and incremental data backups nightly.
VMware	All VMware's IaaS products comply with the Resource Pooling characteristic (except for the Hybrid Cloud Manager which is Not Applicable). vCloud Air provides a pool of vCPU, vRAM, Network and storage on the shared physical infrastructure. vCloud Air provides the required location independence and requires that the customer directly specify location of the datacenter that will host their cloud at time of instantiation. Note VMware's SaaS is also Not Applicable.	
FireEye	The FireEye cloud infrastructures consists of web and application servers, operating systems, and databases in a hosted environment and are comprised of both physical and virtual devices.	

	Computing power and resources are load-balanced across infrastructure and replicated to redundant datacenters in the event of a disaster. Client-specific data stored in databases are logically separated from other clients' data providing segmentation and isolation.
VirtueStream	Key to Virtustream solution is its proprietary and patented solution of uVM technology, which is effectively a granular solution for resource pooling, providing application performance, pay for consumption only and segregate resources for security and compliance, but aggregate for cost efficiency. In addition, Virtustream is currently one of very few Cloud Service Provider with capabilities for Geo-Fencing and Geo-Tagging of the virtual machines to a specific data center, and getting down to cluster and host machine level. The resources are pooled based on two specific criteria: •ONLY Accessible Using Private Network – We call this pool "Enterprise" which most of Virtustream's IaaS workload is residing. There is no direct access from Internet into this pool. This is protected via a pair of routing and firewall from any other zones.

8.1.2.4 NIST Characteristic - Rapid Elasticity: Provide a brief written description of how the cloud solutions proposed satisfies this NIST Characteristic. Attest capability and briefly describe how rapid elasticity technical capability is met.

CA	APM	CA API Management SaaS (SaaS APIM) has been built from the ground up to be a multi-tenanted, SaaS-based offering that leverages Amazon's infrastructure to scale appropriately; utilize a continuous integration model to provide for frequent updates; and fail over across multiple availability zones.
	MAA	The pool of web and application servers can be grown or shrunk when necessary. Any changes to the size of the pool remains transparent to end-users and customers, and would only be done by CA MAA systems administrators.
	CA Agile	This is a SaaS service, therefore, CA monitors all system resources and have alerting mechanisms when resource constraints have reached a defined threshold. Data storage and network capacity are monitored and scaled to meet current client demands. Compute resources are scaled to meet client processing requirements
	ASM	All ASM core servers are dedicated physical servers; there is no elasticity. The ASM Public Status Pages are served from web servers in the Amazon Cloud, and the pool of web servers can be grown or shrunk if necessary. Any changes to the size of the pool would be transparent to end-users and customers, and would only be done by CA ASM systems administrators. Since this is a SaaS environment the CA SaaS Operations and delivery along with RackSpace are responsible for management of the capacity and monitoring.
Google	Saas, Google Apps can scale from 1 user to tens of thousand users. The usage of the services included are designed to horizontal scale within the confines of the per user storage allocation. Google Apps can be purchased with a 30gb per user allocation or with unlimited storage. Paas/IaaS, Google Cloud Platform was designed to scale on demand both in terms of available resources for applications designed and running on Google App Engine but also Compute Engine resources and more.	
AODocs	AODocs can scale from one user to tens of thousand users. The storage is based on the Google Apps storage which could be from 30Gb to unlimited storage depending on the Google Apps subscription.	
Virtru	Presently we over-provision services by 2.5x peak traffic in order to handle spikes. We are in the process of implementing horizontal scaling of all services and expect to have that work completed in the second half of 2016.	
Salesforce	User AuthenticationLogon is form-based. When users log into the Salesforce application, they submit a username and password, which are sent to Salesforce via an TLS-encrypted session.	

	Security features are developed by Salesforce and built into the application. Third-party packages are not used for development or implementation of security internal to the application. In addition, single sign-on and two-factor authentication may be used to authenticate users. Some organizations prefer to use an existing single sign-on capability to simplify and standardize their user authentication. You have two options to implement single sign-on—federated authentication using Security Assertion Markup Language (SAML) or delegated authentication. Federated authentication using Security Assertion Markup Language (SAML) allows you to send authentication and authorization data between affiliated but unrelated Web services. This enables you to sign-on to Salesforce from a client application. Federated authentication using SAML is enabled by default for your organization. Delegated authentication single sign-on enables you to integrate Salesforce with an authentication method that you choose. This enables you to integrate authentication with your LDAP (Lightweight Directory Access Protocol) server, or perform single sign-on by authenticating using a token instead of a password. You manage delegated authentication at the profile level, allowing some users to use delegated authentication, while other users continue to use their Salesforce-managed password. Delegated authentication is set by profile, not organization wide. You must request that this feature be enabled by Salesforce. Salesforce can be configured to utilize Active Directory directly via Delegated Authentication, or indirectly via Federated Identity using either SAML 1.1, or SAML 2.0. Additionally your users can be loaded from information drawn from your Active Directory servers and modifications made in Active Directory can be propagated into Salesforce. Customers can use their own SAML Identity Provider, or license one directly from Salesforce with our Identity Connect product.User ProvisioningUser provisioning and management is performed through the Salesforce Administrative Setup environment and is performed by Salesforce customers. Users, their profiles, permissions and passwords may be managed, edited, activated and deactivated as needed by those with appropriate permissions. An administrator (appointed by the customer and not by Salesforce) with appropriate privileges can manage session timeout, password policies, IP range login restrictions, delegated authentication/SSO, and requirements as part of this process. On first time login or password reset request, users are required to change their passwords to gain access. Salesforce also offers delegated authentication, enabling customers to provision and deactivate users from an external directory service.User Access ProfilesSalesforce enables administrators to manage roles and relationships between roles from within the application, in a single easy to read page depicting the role hierarchy. All users and application-level security are defined and maintained by the organization administrator and not by Salesforce. The organization administrator is appointed by CSBS. An organization's sharing model sets the default access that users have to each other's data. There are four sharing models: Private, Public Read Only, Public Read/Write, and Public Read/Write/Transfer. There are also several sharing model elements: Profiles, Roles, Hierarchy, Record Types, Page Layouts, and Field Level security. Details about sharing models and sharing model elements are provided below: Private Only the record owner, and users above that role in the hierarchy, can view, edit, and report on those records.

	Public Read Only All users can view and report on records but not edit them. Only the owner, and users above that role in the hierarchy, can edit those records. Public Read/Write All users can view, edit, and report on all records. Public Read/Write/Transfer All users can view, edit, transfer, and report on all records. Only available for cases or leads. Profiles A profile contains the settings and permissions that control what users with that profile can do within Salesforce. Profiles control: Standard and custom apps the user can view (depending on user license) Service providers the user can access Tabs the user can view (depending on user license and other factors, such as access to Salesforce CRM Content) Administrative and general permissions the user has for managing the organization and apps within it Object permissions the user is granted to create, read, edit, and delete records Page layouts a user sees Field-level security access that the user has to view and edit specific fields Record types are available to the user Desktop clients users can access and related options Hours during which and IP addresses from which the user can log in Apex classes a user can execute Visualforce pages a user can access User Roles Every user must be assigned to a role, or their data will not display in opportunity reports, forecast rollups, and other displays based on roles. All users that require visibility to the entire organization should be assigned the highest level in the hierarchy. It is not necessary to create individual roles for each title at the company, rather a hierarchy of roles should be defined to control access of information entered by users in lower level roles. When a user's role is changed, any relevant sharing rules are reevaluated to add or remove access as necessary. Record Types If the customer's organization uses record types, edit the record type to modify which pick list values are visible for the record type. A default pick list values can be set based upon the record type for various divisions. Field Level Security Field-level security settings let administrators restrict user's access to view and edit specific fields on detail and edit pages and in related lists, list views, reports, Offline Edition, search results, email and mail merge templates, Custom Links, and when synchronizing data.

	The fields that users see in detail and edit pages are a combination of page layouts and field-level security settings. The most restrictive field access settings of the two always apply. For example, if a field is required in the page layout and read-only in the field-level security settings, the field-level security overrides the page layout and the field will be read-only for the user.	
ServiceNow	ServiceNow is a multi-instance architecture that gives every customer its own unique database, which means that it is impossible for your data to be commingled with any other customer. The multi-instance architecture is not built on large centralized database software and infrastructure. Instead, we deploy instances on a per-customer basis, allowing the multi-instance cloud to scale horizontally and infinitely. For our multi-instance cloud, we deploy separate application logic (Apache Tomcat Java Virtual Machines) and database processes (MySQL) for every customer. This allows ServiceNow to scale its application servers out horizontally by adding them to the load balancer pools for a particular instance.	
QTS	Rapid elasticity. Capabilities can be elastically provisioned and released, in some cases automatically, to scale rapidly out ward and in ward commensurate with demand. To the consumer, the capabilities available for provisioning often appear to be unlimited and can be appropriated in any quantity at any time. Delivering scalable, secure, high-performing, virtual data centers for government applications QTS is committed to not only giving your cloud the most secure home, but also the ability to utilize best-of-breed technologies. Flexible, high-performing, future proof infrastructure: Built upon the VMware vCloud® Suite, you'll benefit from reliable, high-performing infrastructure using a platform that includes VMware, EMC and Cisco. This compatible solution easily integrates with private VMware environments and provides a pathway to a hybrid cloud.Our scalability increases agility, efficiency and productivity: Your technologists can focus more time on your business and customers, and less time on your infrastructure. Rapid provisioning and improvements in utilization enhances your speed to market, delivers applications faster, and gets projects out the door. Virtually unlimited bandwidth and communications diversity QTS operates carrier-neutral data center facilities. This means that customers can select their communications service providers from hundreds of carriers, Internet Service Providers, dark fiber and satellite companies to meet their transport requirements. Selecting a provider from such a broad list of options gives customers exceptional route diversity and pricing options, as well as different Service Level Agreements and installation schedules. Customers who need very high amounts of bandwidth to conduct their business efficiently will never have to worry about running out of capacity at a QTS facility. Similarly, customers who require exceedingly high communications security have the benefits of selecting from physically diverse routes between their ends points and dark fiber that is not shared with any other users. In short, there are virtually no limitations to the type, amount, or security of communications available at each QTS data center facility.	
SAP	Ariba	There are no scalability limits with our products. We can scale accordingly to fit any data amount or user volume scenario.
	Fieldglass	The hosted Fieldglass solution can be horizontally and vertically scaled very quickly as the web server farm is fully virtualized. Only the SQL server is bare metal by design.
	Hanna	SAP HEC can be rapidly scaled to provision infrastructure & services on demand per customer requests.
	SuccessFactors	Our solution was designed and developed, from the outset, to be a highly scalable application. We also use the concept of "PODS," from a hardware perspective. A POD is a fault tolerant cluster of application & DB servers

		designed, as a scalable unit, to provide core processing and data storage services for fixed increment of customers. Attributes include: A POD is designed to support millions of subscribers. Our current 2nd Generation POD is scaled to 5M+ Multi-Vendor High Performance Blade Servers with 40GBps backplane fabric interconnects Multiple redundant Application Engines Clustering for availability and performance Hardware load balancers to route each new incoming session to the most available web and application processor Designed to support a high rate of concurrent connections while maintaining sufficient redundant capacity to meet SLA requirements New production PODs undergo a verification process before being brought into service Excess capacity PODs are always available on standby (scalability-on-demand) We will increase capacity if data center utilization surpasses the 70% threshold
VMware	All vCloud Air offerings partially comply with Rapid Elasticity. vCloud Air can be purchased as a pool of vCPU, vRAM, Network and Storage on shared or dedicated physical infrastructures that can be elastically provisioned and released. VMware's vCloud Air On Demand is fully compliant because capabilities can be elastically provisioned and released. VMware's SaaS Products i.e. AirWatch, does comply but the NIST requirement is not relevant to SaaS offerings. Note the vCloud Air Hybrid Cloud Manager is not Applicable.	
FireEye	FireEye cloud environments are continuously monitored by cloud service operations (CSO) personnel to help ensure secure operation and available of the system. Capacity is actively monitored and pro-active upscaling is conducted to ensure resources are always available to end-users. Procedures are in-place for rapidly adding resources in the event the infrastructure approaches capacity.	
VirtueStream	Virtustream's self-service portal, ticketing system and also the Technical Account Manager, who is the single point of contact for State of Utah allows for provisioning and deprovisioning of resources and services. In addition, Virtustream is uniquely positioned to provide application level provisioning as part of its standard automation and orchestration tool. Resources can be scaled based on application size, memory, storage, network requirements. xStream utilizes a supply chain to define resource profiles, attributes and offerings than can be provisioned.	

8.1.2.5 NIST Characteristic - Measured Service: Provide a brief written description of how the cloud solutions proposed satisfies this NIST Characteristic. Attest capability and briefly describe how measured service technical capability is met.

CA	APM	Continuous monitoring of all service components (infrastructure and application) is deployed to proactively identify any component or service trending towards failure or approaching capacity. This portion is handled for the underlying cloud infrastructure by AWS with active participation by CA including escalations of issues.
	MAA	CA MAA systems administrators track the resource consumption of each virtual machine in use. ITIL flows are utilized to ensure service delivery. MAA customers do not need this information in order to use the service, nor do they have access to view it.

	CA Agile	Continuous monitoring of all service components (infrastructure and application) is deployed to proactively identify any component or service trending towards failure or approaching capacity CA's best-of-breed monitoring solutions are deployed and supplemented with vendor specific diagnostic tools where appropriate 24x7 staffed network operation center (NOC) to analyze and respond to automated monitoring alerts
	ASM	CA ASM systems administrators track the resource consumption of each virtual machine in the cloud. Since this is a SaaS service, ASM customers do not need this information in order to use the service, nor do they have access to view it.
Google	Saas, Google Apps is already optimized for unlimited use by all end users. Google ensures high availability, low latency and fault tolerance as a part of the contracted services. No metering or rate limiting would be required as Google does not charge based on bandwidth use. Paas/IaaS, Google Cloud Platform includes application development tools, Google App Engine, compute resources, Compute Engine and Container Engine, data storage solutions and networking solutions. The pricing model is based on actual usage and that usage can be monitored with Google's Cloud Monitoring Service which also includes options to autoscale a project.	
AODocs	AODocs is already optimized for unlimited use by all end users. AODocs ensures high availability, low latency and fault tolerance as a part of the contracted services. No metering or rate limiting would be required as AODocs does not charge based on bandwidth use.	
Virtru	All services in our system monitored for availability, stabiity, security, and intrusion using a combination of tools, such as Dtrace, LogTrail, CloudWatch, DataDog, ElasticSearch and AlienVault.	
Salesforce	Subscription-based Service The Salesforce PaaS and SaaS offerings are subscription based and in a per user/month or user/year format billed annually with some of our products offered as total logins per month or by defined number of members billed annually. Bandwidth Salesforce is designed to use as little bandwidth as possible so that the site performs adequately over high-speed, dial-up, and wireless Internet connections. While average page size is on the order of 90KB, Salesforce uses compression as defined in the HTTP 1.1 standard to compress the HTML content before it is transmitted as data across the Internet to a user's computer. The compression often reduces the amount of transmitted data to as little as 10KB per page viewed due to the lack of image content. The site was designed with minimum bandwidth requirements in mind, hence are extensive use of color coding instead of images. Our average user also is known to view roughly 120 pages from our site per day. Our application is stateless; therefore, there are no communication requirements in the background once the page loads, like traditional client server applications, e.g., Outlook. Therefore, once the page loads, there are no additional bandwidth requirements until a user queries or writes information to Salesforce. System Overview In addition to our Trust site (http://trust.salesforce.com/trust/status), you will also have access to a System Overview, which will help Salesforce customers monitor performance and usage of their own Salesforce org. This overview includes: Schema - # and % of custom objects and data storage Business Logic - # and % of Rules, Apex triggers and classes, as well as % of code used Licenses API Usage - # and % of requests in the last 24 hours User Interface - # and % of custom apps, sites, flows, custom tabs and pages	

	Portal The above list is of all the possible metrics that Salesforce customers may have in their system overview.	
ServiceNow	ServiceNow is a subscription service measured by number of user accounts or number of managed nodes. ServiceNow has a documented capacity-planning model, which is used to determine sizing requirements and scaling options. The need to address capacity and horizontal system scaling is in the background, transparent to our customers.	
Docusign		
QTS	Measured service. Cloud systems automatically control and optimize resource use by leveraging a metering capability 1 at some level of abstraction appropriate to the type of service (e.g., storage, processing, bandwidth, and active user accounts). Resource usage can be monitored, controlled, and reported, providing transparency for both the provider and consumer of the utilized service.	
SAP	Ariba	We have an Internal Tools Development Team which has established active monitoring systems with alerting and automated escalation. This includes log monitoring from the backend of the systems and this is tied to established internal processes related to security incident management. The environment, policies, tickets and reports are reviewed under ISAE 3402 assurance audit every six months.
	Fieldglass	Fieldglass utilizes various methods to ensure the system is available and is operating as expected. • Our network performance monitor ensures that all servers and devices are available and performing as expected. • All devices and servers on our network log into our enterprise SIEM tool. All activity is monitored by the Fieldglass security team to ensure activity does not vary from our known baseline. • An Active Performance Monitor has been built into the Fieldglass system. This monitor logs all system activity and enables Fieldglass engineers to drill into data such as concurrent user count, thread count, memory, CPU, SQL duration, server duration, client duration, page hits, etc. This data can be drilled into by day, hour, minute, server, and user. • Customer SLAs are tracked and communicated on a monthly basis. For 2015 we have a 99.4% success rate in meeting all customer page response time SLAs.
	Hanna	SAP HEC services are measured via SAP solution manager and reports are shared with the customer on a monthly basis as well as via self-service reports. SAP HEC operations team monitors the customer landscape and any disruption is addressed after reaching out to the customer and associated approval.
	SuccessFactors	Our hosting sites are designed to accommodate customers desiring a high level of managed service performance. In order to achieve such a level of performance, proactive monitoring is available through a variety of on-line tools that are implemented and managed by Cloud Operations. At a customer management level, the Cloud Operations monitors a series of “key metrics” that measure the results of various processes involved in supporting the business operations and service reliability. These metrics include reports of transaction volumes, latency, system availability, capacity, change management, and help incident response times as compared with established service level goals and standards. To facilitate required system performance, we monitor and tune the use of resources, and makes projections of future capacity requirements. We employ

		a variety of services to monitor and enhance application performance. The network makes extensive use of high availability architecture, and is monitored on a 24x7 basis at multiple levels. We utilize real time web applications performance monitoring software to do the following: Sample web traffic in real time via performance analysis software Track web application errors, (e.g. http 4xx-5xx errors) Monitor end-to-end user performance trends Detailed session analysis for session troubleshooting This data is reviewed on a daily and weekly basis by Operations Support, and is further supported with automated alerts. We proactively gather performance statistics, set triggers to alert on capacity thresholds, and regularly review utilization trends for capacity planning.
VMware	VMware's provides automatic monitoring and metering services to their IaaS and SaaS offerings. Note the vCloud Hybrid Manager is not applicable as it is not metered, because it is for management.	
FireEye	FireEye cloud environments are continuously monitored by cloud service operations (CSO) personnel to help ensure secure operation and availability of the system. An internal monitoring system operates 24 hours per day to assess system availability and performance. The system is configured to send email alert notifications to FireEye operations personnel on a real-time basis communicating potential issues with the production systems.	
VirtueStream	The fundamental of Virtustream solution is based on uVM Technology, which is very unique in terms of billing. Virtustream solution takes average consumption of compute resources, and State of Utah would only pay for actual resources based on a monthly average. This is in comparison with traditional cloud solution, where the billing is based on allocation of resources in T-Shirt size (Micro, S, M, L, XL, XXL), and if the server is up, consumer of the cloud pays, but when it is down, they don't. In case of the Virtustream solution, customer only pays based on the average of vCPU, RAM, IOPS and Network I/O; the key is average, not aggregate and based on consumption not allocation. In addition, all storage, security, application management services are offered as a monthly fee, based on the VMs; also, Virtustream can provide consultative and project support based on time and materials. The µVM brings significant benefits: enabling application level performance SLAs – which an average VM cannot. µVMs eliminate wasted headroom in fixed size VMs, generating significant efficiency improvements (up to 40% beyond traditional virtualization) and Virtustream only charges by the µVM so you only pay for the resources you actually consume not what you might need. Using µVMs also enables applications to be used across multiple hypervisors, across multiple clouds and between different locations – enabling true hybrid clouds. µVM technology allows Virtustream to offer enterprise class clouds capable of running both mission-critical enterprise applications and web-scale applications, delivering the full benefits of cloud to the enterprise.	

8.1.3 Offeror must identify for each Solution the subcategories that it offers for each service model. For example if an Offeror provides a SaaS offering then it should be divided into education SaaS offerings, e-procurement SaaS offerings, information SaaS offering, etc.

CA	APM	In addition to the APIM SaaS offering CA Technologies also offers educational services and consultancy services. CA provides education and training services to its clients.
	MAA	CA MAA helps app developers visualize, investigate, manage, and support user interactions with their mobile apps. It provides deep insights into the performance, user experience, crash, and log analytics of mobile apps. CA MAA is aimed to help

		enterprises understand the experience of mobile app users across the DevOps application lifecycle. Enterprises can accelerate the delivery of user-experience-focused mobile applications and can achieve faster time to market by continuous application delivery while ensuring robust security.
	CA Agile	We provide a SaaS offering that is generally used to document and manage work within the SDLC. In addition to the CA Agile offering CA Technologies also offers educational services and consultancy services
	ASM	CA ASM is a SaaS offering that provides customers with the ability to monitor the availability, health, and performance of network services (web sites, email servers, etc.).
Google	Education SaaS offering - Google Apps for Education Messaging SaaS offering - Google Apps for Work, Google Apps Unlimited Collaboration SaaS offering - Google Apps Unlimited Identity Management SaaS offering - Google Apps SSO eDiscovery/Archving SaaS offering - Google Apps Vault Application Development PaaS - Storage IaaS offering -	
AODocs	AODocs Team Folders AODocs Document Management AODocs Retention Application AODocs Email Connector	
Virtru	SaaS email encryption and SaaS file encryption.	
Salesforce	Salesforce is the enterprise cloud computing leader dedicated to helping companies and government agencies transform into connected organizations through social and mobile technologies. Over 150,000 Salesforce customers across nearly every industry have successfully transformed their operations including over 1000 government agencies, representing all federal cabinet level agencies and the majority of the United States. Customer examples include: State of Texas, State of Colorado, State of California, GSA, USDA, USAID, and others. Salesforce was named one of the World's Most Innovative Companies by Forbes for the last five years in a row. Salesforce is #1 in Enterprise Cloud Computing and #1 in CRM according to IDC. Salesforce ranks as the Leader in the Gartner Magic Quadrant for "CRM Customer Engagement Centers" (SaaS), "Sales Force Automation" (SaaS), and "Enterprise Platform as a Service" (PaaS). Government agencies are using Salesforce PaaS and SaaS solutions for a multitude of government functions including grants management, constituent communications and correspondence management, incident and case management, call/contact center management, outreach programs, learning management, volunteer management, project management, and even donor management, among numerous others.	
ServiceNow	SaaS Offerings: •Cloud and Infrastructure Management Tools •Customer Relationship Management •Project and Portfolio Management (PPM) Tools •Security •Workflow and Electronic Signature •Proposed new category: Information Technology Service Management Tools	

QTS	QTS has built some of the world's largest, most robust, and redundant data centers. The company's innovative 3C product set of custom data center, colocation, and cloud and managed services provides a fully integrated platform and a flexible, scalable level of service that is difficult to match. Our service categories include: IaaS Custom Data Center IaaS Enterprise Cloud IaaS Managed Cloud IaaS vCGS Cloud IaaS Federal Solutions IaaS Healthcare Solutions IaaS Financial Service Solutions Colocation Connectivity Critical Facilities Management Hybrid IT Solutions Disaster Recovery as a Service (DRaaS) Managed Services: Managed Hosting, Managed Network, Managed Systems, Managed Security, Managed Storage & Backup, Managed Disaster Recovery, Data Security	
SAP	Ariba	We provide solutions that allow enterprises to efficiently manage the purchasing of non-payroll goods and services required to run their business. We refer to these non-payroll expenses as "spend."" Our solutions include software, network access, and expertise. They are designed to provide enterprises with technology and business process improvements to better manage spend and, in turn, save money. Our solutions streamline the business processes related to the identification of suppliers of goods and services, the negotiation of the terms of purchases, and ultimately the management of ongoing purchasing and settlement activities. Our solutions allow enterprises to take a systematic approach with products and services that work together. By combining software, network access and professional services into a comprehensive solution, we help customers to address six key areas of spend management: Visibility - enhance spend visibility and control across spend categories, disparate systems and corporate divisions Sourcing - identify top suppliers, negotiate procurement terms, leverage aggregate spend, and manage procurement contracts Contract Management - streamline and automate from contract creation to compliance Procurement – streamline requisitioning and procurement across all types of spend Invoice and Payment - automate invoicing and payment processes Supplier Management - optimize buyer-supplier interactions throughout the spend lifecycle
	Fieldglass	The SAP Fieldglass Vendor Management System (VMS) application is a workforce management SaaS offering.
	Hanna	HANA Enterprise Cloud is a private managed cloud primarily for all SAP enterprise-wide SAP applications such as: ERP, CRM, SRM, BW, etc. All SAP applications can be hosted in HANA Enterprise Cloud (via BYOL or Subscription Licensing model)
	SuccessFactors	Our original product release dates are as follows:

		Performance Management – 2001 Goal Management – 2002 360/Multi-Rater Reviews - 2002 Succession Management - 2004 Compensation Management – 2004 Analytics & Reporting – 2005 Learning & Development – 2006 Recruiting Management – 2006 Variable Pay Compensation – 2007 Employee Profile – 2007 Stack Ranker – 2008 Employee Central – 2009 Metrics Navigator – 2009 Goal Execution – 2010 Calibration – 2010 Workforce Planning (Acquisition) – 2010 Workforce Analytics (Acquisition) - 2010 Plateau LMS (Acquisition) – 2011 JAM – 2011 Employee Central Payroll – March 2012 Onboarding (acquisition of KMS) – May 2013
FireEye	FireEye is offering 4 distinct cloud solutions that can be classified into the following service categories and sub-categories: 1.Email Threat Prevention (ETP) Security – SaaS 2.Mobile Threat Prevention (ETP) Security – SaaS 3.Threat Analytics Platform (TAP) Threat Intelligence – SaaS 4.FireEye as a Service with Continuous Vigilance (FaaS CV) Managed Security Service – SaaS	
VirtueStream	Virtustream is an Infrastructure as a Service (IaaS) offering focused on mission critical workloads and applications. The solution provides as part of the response is IaaS only. Virtustream's IaaS is targeted for all virtualized, x86 based cloud solution. While we have secured and segmented infrastructure for FedRAMP, FISMA, PCI and other regulated workload, it is best suited for any and all enterprise workload as long as the workload can be virtualized and run on x86 platform. For non x 86 environments, Virtustream provides Collocated areas, which is cross connected with the cloud.	

8.1.4 As applicable to an Offeror's proposal, Offeror must describe its willingness to comply with, the requirements of Attachments C & D.

Carahsoft complies with the requirements in attachment C & D. Cloud service models by vendor are broken out in section 6.6 of this response per the request in attachment C.

8.1.5 As applicable to an Offeror's proposal, Offeror must describe how its offerings adhere to the services, definitions, and deployment models identified in the Scope of Services, in Attachment D.

Carahsoft's cloud vendors fit into multiple categories as listed out in Attachment D. Many of our vendors fit a hybrid cloud deployment method with ability to silo off a private cloud if security needs dictate such. Our cloud vendors are broken out by service model in section 6.6 of this response. Carahsoft's cloud vendors

also fit into many categories as listed in section 1.1.3 of Attachment D. Depending on the type of data and service requested our vendors can support everything from on demand self service delivery to a completely managed and measured service option.

8.2 Subcontractors

8.2.1 Offerors must explain whether they intend to provide all cloud solutions directly or through the use of Subcontractors. Higher points may be earned by providing all services directly or by providing details of highly qualified Subcontractors; lower scores may be earned for failure to provide detailed plans for providing services or failure to provide detail regarding specific Subcontractors. Any Subcontractor that an Offeror chooses to use in fulfilling the requirements of the RFP must also meet all Administrative, Business and Technical Requirements of the RFP, as applicable to the Solutions provided. Subcontractors do not need to comply with Section 6.3.

Carahsoft will be utilizing Subcontractors to provide services and solutions for specific manufacturers within this response. In other cases, Carahsoft will work with the manufacturers to provide these services and solutions to all Participating Entities. All Subcontractors shall be vetted to ensure they have the necessary qualifications to do business within the State of Utah and any applicable Participating States. All Subcontractors will also comply with the applicable terms and conditions of the RFP and subsequent contract, as well as all Participating Addendums for the States they are subcontracting in.

8.2.2 Offeror must describe the extent to which it intends to use subcontractors to perform contract requirements. Include each position providing service and provide a detailed description of how the subcontractors are anticipated to be involved under the Master Agreement.

Carahsoft will use subcontractors as a third party company to provide services in relation to the solutions provided by the manufacturer. No other functions of contract management or execution will be performed by the subcontractor. While Carahsoft cannot determine all roles and responsibilities of the positions for each subcontractor, there are multiple different standards which subcontractors utilize for these types of contracts. Here is an example set of the traditional roles a subcontractor would play on behalf of Carahsoft for this RFP:

Job Title: Consulting Engineer
Functional Responsibility: Working under close supervision, person provides technical or scientific and project support for multiple large-scale projects that cross-cut multiple specialization and product development areas. Applies advanced business and/or technical expertise to assist others with defining, analyzing, validating and documenting complex customer operating environments, states of technology and current engineering processes. Provides advanced technical support to others involved in applying specialized knowledge to complex customer processes and requirements. Supports complex technical investigations through advanced research techniques, analysis or development phases of engineering projects. Works with other engineering disciplines in the development and application of processes to improve quality, reliability, cost customer appeal, and satisfaction.

Job Title: Project Manager

Functional Responsibility: Possesses a thorough understanding of the process requirements and provide both technical and management oversight of the project. Responsible for customer satisfaction, serves as the single point of contact, compliance with the Statement of Work, project planning and management, resource allocation, and reporting.

Job Title: Senior Information Architect
Functional Responsibility: Provides supervision, person designs Intranet/Internet/Extranet architectures and develops implementations plans; administration activity; i.e., hardware, security, firewalls. Implements security architecture using LDAP, SSL and firewalls. Installs, configures and maintains all Intranet/Internet/Extranet tools, databases and features; provides support to e-commerce and other systems. Implements server design, development, and operation as well as analyze and develop requirements for hardware sizing/capacity, data validation, security and integration points to other applications.

Job Title: Information Architect
Functional Responsibility: Designs Intranet/Internet/Extranet architectures and develops implementations plans; administration activity; i.e., hardware, security, firewalls. Implements security architecture using LDAP, SSL and firewalls. Installs, configures and maintains all Intranet/Internet/Extranet tools, databases and features; provides support to e-commerce and other systems. Implements server design, development, and operation as well as analyze and develop requirements for hardware sizing/capacity, data validation, security and integration points to other applications.

Job Title: Senior Consulting Engineer
Functional Responsibility: Provides supervision, person provides technical or scientific and project support for multiple large-scale projects that cross-cut multiple specialization and product development areas. Applies advanced business and/or technical expertise to assist others with defining, analyzing, validating and documenting complex customer operating environments, states of technology and current engineering processes. Provides advanced technical support to others involved in applying specialized knowledge to complex customer processes and requirements. Supports complex technical investigations through advanced research techniques, analysis or development phases of engineering projects. Works with other engineering disciplines in the development and application of processes to improve quality, reliability, cost customer appeal, and satisfaction.

8.2.3 If the subcontractor is known, provide the qualifications of the subcontractor to provide the services; if not, describe how you will guarantee selection of a subcontractor that meets the experience requirements of the RFP. Include a description of how the Offeror will ensure that all subcontractors and their employees will meet all Statement of Work requirements.

Carahsoft will be making the determination of what subcontractors to include on the NASPO ValuePoint Cloud contract upon time of award. Carahsoft will ensure a subcontractor has all of the necessary certifications to do business in the State before adding them to the contract as a subcontractor. In addition, Carahsoft will do credit checks and meet with the subcontractor on multiple occasions to confirm that they are reliable and exceed expectations as a services and solutions provider. Finally, an agreement will be put in place between Carahsoft and the subcontractor to ensure optimal efficiency with the subcontractor's responsibilities.

A subcontractor will be actively involved in understanding and shaping any Statements of Work created for the services of a deal in order to make sure that they have the capacity to meet all of the necessary requirements. These Statements of Work will dictate the terms upon which the subcontractor is deployed for services, so Carahsoft will work specifically with subcontractors that are active in the public sector and understand the nuances of selling to government entities.

8.3 Working with Purchasing Entities

8.3.1 Offeror must describe how it will work with Purchasing Entities before, during, and after a Data Breach, as defined in the Attachments and Exhibits. Include information such as:

- Personnel who will be involved at various stages, include detail on how the Contract Manager in Section 7 will be involved;
- Response times;
- Processes and timelines;
- Methods of communication and assistance; and
- Other information vital to understanding the service you provide.

Security is of the uptmost importance to all of the Service providers that Carahsoft is submitting. Should and actual breach occur, it is the first priority of Carahsoft and the service provider to identify the source of the breach and implement safe guards to prevent one from happening in the future. The Service Provider will promptly notify the Purchasing Entity of the incident. Notification of the breach will be provided by the service directly to the security or customer contact that is identified by the Purchasing Entity. Methods of communication could include phone or email notification.

8.3.2 Offeror must describe how it will not engage in nor permit its agents to push adware, software, or marketing not explicitly authorized by the Participating Entity or the Master Agreement.

Carahsoft ensures that no unwanted marketing efforts are made to customers through an easy to manage opt out system in our database. Carahsoft can also limit communications by vendor to ensure that only those vendors approved by the customer reach out with marketing materials or product updates. Carahsoft will never support or assist in the pushing of adware or unwanted software to participating customers.

8.3.3 Offeror must describe whether its application-hosting environments support a user test/staging environment that is identical to production.

For applicable cloud offerings, user test/ staging environments are available that are identical to real-time production environments.

8.3.4 Offeror must describe whether or not its computer applications and Web sites are be accessible to people with disabilities, and must comply with Participating entity accessibility policies and the Americans with Disability Act, as applicable.

The user interfaces provided for within this proposal are accessible to people with disabilities using assistive technologies.

8.3.5 Offeror must describe whether or not its applications and content delivered through Web browsers are be accessible using current released versions of multiple browser platforms (such as Internet Explorer, Firefox, Chrome, and Safari) at minimum.

All cloud solution offerings within this proposal that are delivered via web browsers are accessible using current releases of common internet browsers such as Internet Explorer, Firefox, Chrome, Safari, and more.

8.3.6 Offeror must describe how it will, prior to the execution of a Service Level Agreement, meet with the Purchasing Entity and cooperate and hold a meeting to determine whether any sensitive or personal information will be stored or used by the Offeror that is subject to any law, rule or regulation providing for specific compliance obligations.

Upon request of the customer, Carahsoft can host meetings via Adobe Connect web conferencing software or travel in person if the need presents itself. Carahsoft is happy to support and comply with any regulations or sensitive data compliance needs that the customer identifies. Carahsoft has the ability to limit customer information to a secure and isolated database if needed.

8.3.7 Offeror must describe any project schedule plans or work plans that Offerors use in implementing their Solutions with customers. Offerors should include timelines for developing, testing, and implementing Solutions for customers.

Project scheduling and work planning documents are developed in conjunction with customer requirements. Project planning activities are conducted with a focus on developing a statement of work that defines deliverables, customer and contractor areas of responsibility, as well as project benchmarks, and deadlines. Project complexity and customer requirements determine the overall timelines for development, testing, and solution implementation.

8.4 Customer Service

8.4.1 Offeror must describe how it ensure excellent customer service is provided to Purchasing Entities. Include:

- Quality assurance measures;
- Escalation plan for addressing problems and/or complaints; and
- Service Level Agreement (SLA).

The core of Carahsoft's business is to provide the best customer service to our government customers and vendor partners. We are an IT solutions provider delivering best-of-breed hardware, software, and support solutions to federal, state and local government agencies since 2004. Carahsoft has built a reputation as a customer-centric real-time organization with unparalleled experience and depth in government sales, marketing, and contract program management. This experience has enabled Carahsoft to achieve the top spot in leading software license GSA resellers. Carahsoft has leveraged its vast contracting experience and extended it to quoting and order management. Carahsoft seamlessly generates quotes within 30 minutes or less and processed over 56,000 orders in 2014 that were each completed the same day received. Over the past ten years Carahsoft has acquired and maintained a wide variety of purchasing contract vehicles for agencies at the state, local, and federal levels. Associated with all contracts are dedicated and experienced contract management resources. Quality and accuracy is the driving factor behind Carahsoft's successin the government market. All solutions proposals and price quotes that are sent to our customers go through a three step review process for quality. The first is a pricing review that is automatically run against the pricing database to ensure pricing accuracy for the proper contract. The second review is at the certified Account Representative level who will check pricing and configurations for accuary and also review any SOWs that are included. Finally, mangagement review confirms the quality and accuracy of the proposal that will be sent to the Purchasing Entity. Carahsoft has instituted an escalation procedure for any problems or complaints that may arise. There are four levels of escalation and include review by the Account Representative assigned to the

Purchasing Entity, followed by the Regional Manager of the territory, next to the Vice President of State and Local and finally to the President/CEO. Each stage of escalation shall have a response SLA of no more than 24 hours.

8.4.2 Offeror must describe its ability to comply with the following customer service requirements:

a. You must have one lead representative for each entity that executes a Participating Addendum. Contact information shall be kept current.
b. Customer Service Representative(s) must be available by phone or email at a minimum, from 7AM to 6PM on Monday through Sunday for the applicable time zones.
c. Customer Service Representative will respond to inquiries within one business day.
d. You must provide design services for the applicable categories.
e. You must provide Installation Services for the applicable categories.

Carahsoft confirms and agrees that we will name a lead representative for each Participating Addendum. The contact information will be listed on the Carahsoft website and kept current. Carahsoft confirms it will have a representative available by phone and email available 7am-6pm on Monday through Sunday in the applicable time zones. Carahsoft confirms that it will respond to all inquiries within one business day or sooner. Carahsoft will engage with our service providers to provide design services in the applicable categories Carahsoft will engage with our service providers to provide installation services in the applicable categories.

8.5 Security of Information

8.5.1 Offeror must describe the measures it takes to protect data. Include a description of the method by which you will hold, protect, and dispose of data following completion of any contract services.

Security is of the utmost importance to Carahsoft and our service providers. As an example of our Service Provider's security standards, please see the government security response for Salesforce: Government Trusted Security and Infrastructure
Salesforce understands that the confidentiality, integrity, and availability of our customers' information are vital to their business operations and our own success. We use a multi-layered approach to protect that key information, constantly monitoring and improving our application, systems, and processes to meet the growing demands and challenges of security.

Independent audits confirm that our security goes far beyond what most companies have been able to achieve on their own. Using the latest firewall protection, intrusion detection systems, and TLS encryption, Salesforce Force.com gives you the peace of mind only a world-class security infrastructure can provide.

Third-party validation
Security is a multidimensional business imperative that demands consideration at multiple levels, from security for applications to physical facilities and network security. In addition to the latest technologies, world-class security requires ongoing adherence to best-practice policies. To ensure this adherence, we continually seek relevant third-party certification, including ISO 27001, the SysTrust audit (the recognized standard for system security), and SSAE 16 SOC 1 audit (an examination and assessment of internal corporate controls, previously known as SAS 70 Type II). SOC1, SOC2 and SOC3 audits are performed by third party auditor annually at a minimum. Additional audits and certifications include: CSA 'Consensus Assessments Initiative', JIPDC (Japan Privacy Seal), Tuv (Germany Privacy Mark), and TRUSTe.

Protection at the application level

Salesforce protects customer data by ensuring that only authorized users can access it. Administrators assign data security rules that determine which data users can access. Sharing models define company-wide defaults and data access based on a role hierarchy. All data is encrypted in transfer. All access is governed by strict password security policies. All passwords are stored in SHA 256 one-way hash format. Applications are continually monitored for security violation attempts.

Protection at the facilities level
Salesforce security standards are stringent and designed with demanding customers in mind, including the world's most security-conscious financial institutions. Authorized personnel must pass through five levels of biometric scanning to reach the Salesforce system cages. All buildings are completely anonymous, with bullet-resistant exterior walls and embassy-grade concrete posts and planters around the perimeter. All exterior entrances feature silent alarm systems that notify law enforcement in the event of suspicion or intrusion. Data is backed up to disk or tape. These backups provide a second level of physical protection. Neither disks nor tapes ever leave the data center.

Protection at the network level
Multilevel security products from leading security vendors and proven security practices ensure network security. To prevent malicious attacks through unmonitored ports, external firewalls allow only http and https traffic on ports 80 and 443, along with ICMP traffic. Switches ensure that the network complies with the RFC 1918 standard, and address translation technologies further enhance network security. IDS sensors protect all network segments. Internal software systems are protected by two-factor authentication, along with the extensive use of technology that controls points of entry. All networks are certified through third-party vulnerability assessment programs.

Trust.salesforce.com is the Salesforce community's home for real-time information on system performance and security. On this site you'll find:

- Live and historical data on system performance
- Up-to-the minute information on planned maintenance
- Phishing, malicious software, and social engineering threats
- Best security practices for your organization
- Information on how we safeguard your data

8.5.2 Offeror must describe how it intends to comply with all applicable laws and related to data privacy and security.

Carahsoft is happy to support and comply with any regulations or sensitive data compliance needs that the customer identifies. Carahsoft has the ability to limit customer information to a secure and isolated database if needed. Under no circumstances will Carahsoft ever publish or release secure customer data. Carahsoft's cloud vendors are all FIPS certified or have equivalent security standards in place to ensure no customer data is released outside of the secure cloud.

8.5.3 Offeror must describe how it will not access a Purchasing Entity's user accounts or data, except in the course of data center operations, response to service or technical issues, as required by the express terms of the Master Agreement, the applicable Participating Addendum, and/or the applicable Service Level Agreement.

Carahsoft will use customer accounts and data only in the processing of an order and management of the customer's service entitlements. Carahsoft's vendors, as outlined in their specific Master Agreements, only us customer account data for the express purpose of providing the service to the customer. Included in that service is implementation, technical support, and training efforts. Under no circumstances will Carahsoft or its cloud partners use customer information outside of normal operating procedures.

8.6 Privacy and Security

8.6.1 Offeror must describe its commitment for its Solutions to comply with NIST, as defined in NIST Special Publication 800-145, and any other relevant industry standards, as it relates to the Scope of Services described in Attachment D, including supporting the different types of data that you may receive.

CA	APM	CA technologies understands that security is a top concern when evaluating cloud-based applications, which is why CA technologies operations worldwide conform to rigorous certification, compliance and security programs and processes. In addition, we contract with independent auditors to regularly evaluate and validate the security of our service. High risks are identified, validated and remediated before production systems are made available. Medium risks are evaluated and resolved on a priority basis.
	MAA	
	CA Agile	We use CIS and NIST standards as baselines for hardening our systems. We are currently working towards a NIST 800-53r4 certification however this is not yet complete. We are continuously reviewing our compliance with these standards. We perform monthly scans against our Production Infrastructure based on CIS standards. We scan for both vulnerabilites and compliance best practices bases on NIST 800-53v4 standards. Vulnerabilites are tracked and remidiated based on severity and risk.
	ASM	Please see our response to APM/MAA
Google	Google's currently maintains a FedRAMP Authorization to Operate. FedRAMP incorporates the relevant NIST SP and FIPS security requirements. Further, Google contractually commits to maintaining SOC2 and ISO27001 certifications.	
AODocs	AODocs is committed to comply SOC2 type 2.	
Virtru	Virtru's business depends on its ability to support healthcare and criminal justice markets, which requires us to maintain compliance with HIPAA and CJIS standards which both make extensive use of NIST standards	
Salesforce	On May 23, 2014 Salesforce achieved a FedRAMP Agency Authority to Operate at the moderate impact level (as described in FIPS 199 and 200) issued by Health and Human Services (HHS) for the Salesforce Government Cloud. Additionally, on May 15, 2015, HHS, as the FedRAMP authorizing agency, approved the Salesforce Government Cloud authorization package that was updated based on annual attestation requirements and updates to the FedRAMP baseline which is FISMA compliant and based on the current release of NIST SP 800-53 Rev. 4. Salesforce provides contractual assurance to its customers that the Customer Data hosted in Salesforce's services will be kept confidential and not accessed by third parties except under narrow circumstances (such as a customer support issue or as required by law). In the case of customer support, the company's personnel will access a customer's Org only with prior approval and subject to confidentiality obligations.	
ServiceNow	ServiceNow is a cloud service provider offering a SaaS solution deployed from a private cloud that meets the five essential characteristics of cloud computing as described in 8.1. ServiceNow applies the same data classification for all hosted customer data. ServiceNow does not inspect or monitor its customers' information and therefore has no ability to sub-classify	

	customer data. The overriding requirement of the assigned classification is that customer data remains hosted in the private cloud until the customer terminates their subscription. It is never stored anywhere apart from the private cloud. Customers remain the data owner and data controller for all data placed into their instance. ServiceNow does not examine, inspect, monitor or analyze customers' data. Customers apply access controls to restrict access to data within their instances based on their own requirements and needs, including their own data classification.	
QTS	QTS understands the growing number of requirements along with the complexity of managing the high cost-risk if you are not in compliance, and makes compliance a top priority. Our dedicated QTS Internal Audit team is focused on helping you define controls and processes to meet your ever-expanding compliance requirements. We are steadfast in protecting your data with the commitment to allocate required resources, technology and controls to not only help you achieve and maintain compliance today, but to expertly support your needs as they inevitably grow and change in the future. QTS tackles compliance differently. We provide a flexible, integrated approach to meet the IT compliance and regulatory needs across a wide variety of industries – from Payment Card Industry Data Security Standard (PCI DSS) and the Health Insurance Portability and Accountability Act (HIPAA) to U.S.–EU Safe Harbor. Our approach reduces the complexity and workload to effectively support their compliance efforts.	
SAP	Ariba	Our security framework, which consists of semi-annual independent third party AICPA audit under the Trusted Services Principles of security, confidentiality, process integrity and availability as well as annual certification by an independent Qualified Security Assessor for PCI DSS, is highly aligned with the NIST controls. Our security framework and cloud services are designed to receive process and store data sets of a commercial business-to-business nature and are multi-tenant and international in scope. FISMA/NIST is designed to protect US government data that can include classified information as well as sensitive PII such as ePHI and SSN's or government identifiers. We practice data avoidance where these data sets are concerned primarily to reduce the risk to us and to our customers but also to avoid additional regulatory compliance which has onerous reporting and high costs which would have to be passed on to our customers. Where FISMA regulated entities can take advantage of our solutions, the data sets they expect to store must be validated to avoid being under regulatory requirements beyond what we can provide in terms of both security as well as reporting.
	Fieldglass	Fieldglass has based its security program on the ISO 27002 security standard and has maintained its ISO 27001 certification since February 2011. However, to ensure that a robust security framework was developed, additional controls were added and/or modified based on COBIT DS5 Ensure Systems Security, specific NIST special publications, and vendor specified best practices. Fieldglass uses a SSAE 16 audit with a twelve-month audit cycle to validate that the controls defined within the security framework are operating effectively.
	Hanna	SAP will show the compliance with the SAP Cloud Security Framework by the compliance audits and/or certification audits only as it pertains to the HANA Enterprise Cloud. SAP Cloud and Infrastructure Delivery's Security, Risk & Compliance Office has developed the Integrated

		Information Security Management System (IISMS) Framework. The IISMS Framework is based on SAP's corporate quality and security policy as well as the corporate security standards and guidelines relating to information security and business continuity. This IISMS Framework was adapted to SAP Cloud Security Services as SAP Cloud Security Framework (Cloud SFW). SAP's security, process and compliance team conducts technical security audits to validate that security concepts have been implemented successfully and to safeguard the usage of newly developed tools. Compliance Audits Cloud solutions from SAP have passed ISAE3402/SSAE16-SOC 1 Type II and/or SOC 2 Type II audits (in the following referred to as SOC audits) and can provide the related audit reports on request. Certification Audits The SAP HANA Enterprise Cloud has attained certifications according to the following ISO standards are available (related audits are in the following referred to as ISO audits): • ISO 27001:2013 • ISO 22301:2012 • ISO 9001:2008
	SuccessFactors	Our IT architecture is aligned with ISO 27002. We are Safe Harbor certified and in alignment with BS10012 and ISO 20000 for Service Delivery. We demonstrate an on-going commitment to protecting the confidentiality, integrity and availability ("CIA") of data from internal and external threats, making us a reliable and secure system provider. Our secure multi-tenant Software as a Service (SaaS) platform is designed for availability, security, scalability, and performance. Industry best practices and standards are adopted and incorporated. Our Network also complies with the Authority to Operate as a Moderate Risk Federal Information System by the Office of Personnel Management and Department of Homeland Security; NIST SP800-53 Security Controls; EU Privacy Directive 95/46/EC for EU and non-EU customer data; Payment Card Industry (PCI) Data Security Standard (DSS) v 2.0; Safe Harbor. We provide privacy compliant data center facilities not only in the United States but also as a Member State of the European Union (EU) or a state of the European Economic Area (EEA). Currently, such data centers are certified for ISO27001, ISO9001 and PCI-DSS compliance. Our security services provide complete and thorough monitoring of all traffic on the network on a 24x7x365 basis, and include security technology, alert services and incident management support. We are audited twice annually to SSAE16 (US) or ISAE 3402 (international) accounting standards.
VMware	VMware is fully committed to complying with NIST and all other relevant industry standards including FedRAMP, FISMA, PCI, CSA CAIQ, etc. This is demonstrated by VMware's track record of pursuing and obtaining certifications such as those listed above. vCloud Government Service has been certified to store and secure Low Risk Level and Moderate Risk Level data as defined by FIPS PUB 199. In addition, VMware is capable of enhancing the vCloud Government Service to meet participating State's requirements to be able to store data that is defined by FIPS Pub 199 as High Risk Data. VMware is committed to maintaining compliance with all of our existing and future compliance certifications. Our ability to remain competitive as a software and services provider in the public sector depends upon it. Thus we have established a comprehensive security and compliance team to ensure that we maintain compliance as well as a strong security posture.	

	VMWare supports regular internal and external audits to ensure compliance with its certifications as required. The AirWatch Information Security Program is built on the security framework laid out in NIST 800-53. Although AirWatch is not required to register with any regulatory agencies, we provide a suite of tools for our customer's to maintain industry-relevant compliance guidelines within their mobile device fleets. AirWatch has recently been awarded the HP-IAPP Privacy Innovation Award for Most Innovative Privacy Technology by the International Association of Privacy Professionals (IAPP) for our commitment to delivering an EMM platform focused on end-user privacy. To help ensure the confidentiality, integrity, and availability of our cloud offering, we comply with the European Data Protection Directive (95/46/EC) and our top-tier data center partners have undergone SSAE16 SOC2 Type II audits and have ISO 27001 certifications.
FireEye	FireEye has mature and well documented security and privacy programs. The programs include third party certifications for SSAE 16 SOC 2, FedRAMP certifications, Model clauses, Privacy and security standards among others. The data that FireEye receives is only in conjunction with the malware analysis.
VirtueStream	The Virtustream Federal Cloud (IaaS) has met the requirements for a FedRAMP moderate P-ATO. The IAAS is assessed annually by a FedRAMP certified 3rd Party Assessment Organization (3PAO). The annual assessment will review a subset of the NIST 800-53 Revision 4 controls as designated by FedRAMP. Virtustream's 3PAO shall demonstrate impartiality throughout the assessment to accurately assess the status of all security controls in place.

8.6.2 Offeror must list all government or standards organization security certifications it currently holds that apply specifically to the Offeror's proposal, as well as those in process at time of response. Specifically include HIPAA, FERPA, CJIS Security Policy, PCI Data Security Standards (DSS), IRS Publication 1075, FISMA, NIST 800-53, NIST SP 800-171, and FIPS 200 if they apply.

CA	APM	AWS EC2 datacenters annually undergo SOC 3 audits. The application currently does not hold a Soc 2 attestation.
	MAA	CA MAA is certified for SOC 2 Type 1 Security Audit.
	CA Agile	Our data center provider has a SOC 2 audit report that can be provided upon request. Our application does not currently have such certifications.
	ASM	Rackspace datacenters annually undergo various certification including SOC 3 audits. The application currently does not hold a Soc 2 attestation.
Google	Google has a FedRAMP ATO at the Moderate impact baseline. FedRAMP incorporates many NIST SPs and FIPS including 800-53, FIPS 199, FIPS 200), and has a specific offering. Google Apps for Education that is FERPA and COPPA compliant. Other compliance standards such as HIPAA and CJIS don't offer certification per se, but are commonly accommodated (i.e. Google will sign a BAA to meet HiTECH/HIPAA requirements, and has numerous customers who bear responsibility for meeting CJI processing requirements). PCI DSS is generally not applicable to SaaS systems (though we can do email hygiene processing to protect against incidental usage), but Google IaaS/PaaS does meet PCI DSS v3 standards. Google also holds and is committed to maintaining SOC2 and ISO27001 certifications.	
AODocs	AODocs doens't hold an HIPAA certifications per se, but are commonly accommodated to meet HIPAA requirements signing a BAA.	
Virtru	HIPAA, FERPA, CJIS, NIST 800-53, NIST SP-800	
Salesforce	Salesforce and the Salesforce Force platform is ISO 27001 certified and PCI-DSS compliant. SOC1, SOC2 and SOC3 audits are performed by third party auditor annually at a minimum. Additional audits and certifications include:	

	FedRAMP Authority to Operate from Department of Health and Human Services CSA 'Consensus Assessments Initiative' JIPDC (Japan Privacy Seal) Tuv (Germany Privacy Mark) TRUSTe HIPAA In provisioning and operating the services, Salesforce complies with the provisions of HIPAA's Privacy Rule and Security and the HITECH Act that are applicable to business associates. Salesforce's customers are still responsible for complying with the same in their capacity as a covered entity or business associate using the Salesforce services. The services' features permit customers to customize use as per a compliance program for HIPAA (including the HITECH Act) and many customers store protected health information (PHI) on our service. From a legal standpoint, some of our customers have asked Salesforce to assist them in meeting their compliance obligations; for example, by entering into business associate agreements (BAA) to address formal legal requirements pertaining to use and disclosure of protected health information (PHI). FERPA Salesforce maintains appropriate administrative, physical, and technical safeguards to help protect the security, confidentiality, and integrity of data our customers submit to the Salesforce Services as Customer Data. Salesforce's customers are responsible for ensuring the security of their Customer Data in their use of the service and implementing any necessary customer-controlled settings. To aid, Salesforce offers robust security functionality that provides our customers the flexibility to use the application in a configuration that furthers compliance with local data protection laws and regulations. While Salesforce complies with applicable law in provisioning and operating the Salesforce services, it is the sole responsibility of Salesforce's customers to ensure compliance with applicable laws in their respective uses of the Salesforce services.PCI-DSSSalesforce is PCI Level 1 compliant and has received a signed Attestation of Compliance (AoC) for the Payment Card Industry Data Security Standard (PCI-DSS). Salesforce customers who must adhere to PCI compliance may store personal account numbers ("PAN" or "credit card numbers") in Salesforce, with the following caveats: - PANs may only be stored in a custom field encrypted via Classic Encryption or supported field types via the Platform Encryption functionality. PANs must not be stored in clear text fields, attached files, or any other location. - Customer administrators must configure Salesforce features to support their organization's PCI controls.NIST SP 800-171NIST Special Publication 800-171 is intended for use by federal agencies when agencies are providing CUI to nonfederal organizations (or when CUI is developed by those organizations for federal agencies) for purposes unrelated to information processing. In other words, the nonfederal organizations are not operating their information systems to process agency data, including CUI, on behalf of the agency but rather for other purposes (e.g., when designing or producing an aircraft, performing a study, or conducting background investigations for security clearances). Salesforce recommends that its customers use the classifications as detailed in FIPS 199. FIPS 140-2, FIPS 197, FIPS 199, and FIPS 200 On May 23, 2014 Salesforce achieved a FedRAMP Agency Authority to Operate at the moderate impact level (as described in FIPS 199 and 200) issued by Health and Human Services (HHS) for the Salesforce Government Cloud. Additionally, on May 15, 2015, HHS, as the FedRAMP authorizing agency, approved the Salesforce Government Cloud authorization package that was updated based on annual attestation requirements and updates to the FedRAMP baseline which is FISMA compliant and based on the current release of NIST SP 800-53 Rev. 4.

	As part of the Salesforce Government Cloud, Salesforce is capable of responding to FIPS 140-2/3 cryptographic implementations for data being transferred between the customer's web browser and Salesforce. Data that resides within Salesforce's protected boundary does not use FIPS 140-2 validated encryption as compensating/mitigating controls are in place to protect data. Additional information is provided below. Data Transmission between the customer's web browser and Salesforce: Salesforce employs cryptographic mechanisms to protect information during transmission. All transmissions between the user and Salesforce are encrypted by default with a 2048-bit Public Key. Our service uses International/Global Step Up certificates. We support one-way TLS, in which customers create secure connections before sharing private data. Secure routing and traffic flow policies ensure that customer traffic is encrypted entering Salesforce until the load balancer decrypts the traffic. The load balancers decrypting the traffic are FIPS 140-2 compliant and are located inside of the Salesforce Government Cloud isolation boundary. Data Transmission for Backup Media: Media containing customer data is not transported outside of controlled salesforce.com areas and therefore relies on physical access controls to protect the data. Data at Rest: NIST 800-53 Rev. 3 states in SC-28, "Information at rest refers to the state of information when it is located on a secondary storage device (e.g., disk drive, tape drive) within an organizational information system." SC-28 also states, "Organizations may choose to employ different mechanisms to achieve confidentiality and integrity protections, as appropriate." All secondary storage media (hard drives, disk drives, and tapes) containing customer data are maintained within Salesforce's secure production data centers until the media has been sanitized and destroyed. Salesforce relies on physical access controls as a compensating control to protect the data. Primary Data Storage: User passwords are stored in the RDBMS encrypted via the SHA algorithm with a 256-bit hash. This is a one way hash. The passwords are encrypted by the application. For primary data storage, Salesforce provides customers with a built-in capability to apply field-level encryption, using 128-bit keys with Advanced Encryption Standard (AES) encryption (as defined by FIPS 197), for a selection of custom fields included in the Salesforce Platform and CRM applications. Field-level encryption ensures the data associated with designated fields is encrypted in storage.
ServiceNow	ServiceNow's security policy is based on ISO27001:2013 and has been since 2012. ServiceNow also has annual SSAE 16 SOC 1 Type 2 and SOC2 Type 2 attestations with controls being based off NIST 800-53. The ServiceNow Service Automation Government Cloud Suite is a FedRAMP Compliant Cloud System with a JAB Provisional Authorization. This cloud offering has regulatory restrictions to the types of tenants that can use it. ServiceNow's FedRAMP compliant and standard commercial datacenter environments are virtually identical. The differences that do exist, such as only allowing access to specially adjudicated US citizens, exist for regulatory reasons not because the environment is superior in some way.
QTS	QTS assists with mapping between DOD IT RMF/DIACAP and NIST as well as International Standards Organization (ISO) standards and many others. QTS maintains control mappings that include: • NIST 800-53/FedRAMP (Low/Moderate/High)

	• DOD IT RMF/DIACAP (MAC I/II/III Sensitive & Public) • HIPAA-HITECH-Omnibus • PCI-DSS • ISO/NATO • CNSS/ICD/DCID/NISPOM	
SAP	Ariba	We are audited and certified by independent third-party auditor PricewaterhouseCoopers (PwC) for compliance with ISAE 3402 SOC1 Type II, SOC2 and SOC3 every six months. Upon completion of the audit, an attestation letter is issued, stating our compliance. In addition, our primary hosting facility (Equinix) infrastructure is audited for compliance with SSAE 16 SOC1 Type II. The Service Organization Controls report (SOC) is aimed at three different audiences. SOC1 (aimed at financial auditors) is the same type of report as the SAS70 but also includes an attestation letter signed by both our company and the auditor. SOC2 is aimed at IT and security practitioners. The SOC3 is the publicly viewable web seal to show that we have been audited. In addition, we have attained PCI (Payment Card Industry) - DSS (Data Security Standard) certification as a Level 1 Service Provider and compliance with the Visa USA Cardholder Information Security Program (CISP) and MasterCard Site Data Protection (SDP) program. These programs were created specifically for merchants and service providers who process, store, or transmit cardholder data. The PCI DSS is a set of comprehensive requirements for enhancing payment account data security which was developed by the founding payment brands of the PCI Security Standards Council, including American Express, Discover Financial Services, JCB International, MasterCard Worldwide and Visa Inc. It was developed to help facilitate the broad adoption of consistent data security measures on a global basis. The PCI DSS is a multifaceted security standard that includes requirements for security management, policies, procedures, network architecture, software design, and other critical protective measures. This comprehensive standard is intended to help organizations proactively protect customer account data. CISP and SDP reflect Visa's and MasterCard's respective longstanding commitment to information security.
	Fieldglass	SAP Fieldglass has achieved the following certifications: • ISO 27001 • SSAE 16 SOC 1 and SOC 2 HIPPA Fieldglass does not store Protected Health Information (PHI) on its system and is not required to comply with the Health Insurance Portability and Accountability Act. PCI The Fieldglass application does not process credit card information. We are not (and are not required to be) PCI compliant.
	Hanna	Please see response to 8.6.1
	Hybris	The Savvis datacenter located in Boston, MA is SSAE16 Type II SOC I Compliant. This replaces the older SAS70 Type II audit standard.
	SuccessFactors	We have been audited to the SOC 2 Trust Services Criteria. This signifies that our control objectives and control activities have been examined by an independent accounting and auditing firm, and that these controls fairly presented the controls in operation as of a specific date and were suitably designed to achieve the control objectives. Our SOC 2 audits are conducted semi-annually (May, November) by PricewaterhouseCoopers (PwC). We also hold US Federal FISMA Moderate

		Authority to Operate with both OPM and NTIS. We are compliant with EU Privacy Directive 95/46/EC and are Safe Harbor self-certified. https://safeharbor.export.gov/companyinfo.aspx?id=26196We are aligned with ISO 27001 for Information Security, BS 10012 for Data Protection, and ISO 20000 for Service Delivery to create an Integrated Compliance Framework ("ICF"). Where these standards overlap in subject matter, Information Security ISO 27001 takes precedence. Our Network also complies with Authority to Operate as a Moderate Risk Federal Information System by the Office of Personnel Management and Department of Homeland Security; NIST SP800-53 Security Controls; EU Privacy Directive 95/46/EC for EU and non-EU customer data; Payment Card Industry (PCI) Data Security Standard (DSS) v 2.0; Safe Harbor. We are aligned with ISO 27001 for Information Security, BS 10012 for Data Protection, and ISO 20000 for Service Delivery to create an Integrated Compliance Framework ("ICF"). Where these standards overlap in subject matter, Information Security ISO 27001 takes precedence. Our Network also complies with Authority to Operate as a Moderate Risk Federal Information System by the Office of Personnel Management and Department of Homeland Security; NIST SP800-53 Security Controls; EU Privacy Directive 95/46/EC for EU and non-EU customer data; Payment Card Industry (PCI) Data Security Standard (DSS) v 2.0; Safe Harbor.
VMware	VMware IaaS Services ISO/IEC 27001: ISO/IEC 27001 is a globally recognized standard for the establishment and certification of an information security management system (ISMS). vCloud Air continues to maintain a current ISO/IEC 27001 Certification and has recently issued updated certification for ISO/IEC 27001:2013. Achieving certification means that VMware has implemented a holistic security program that conforms with the ISO 27001 standard requirements, both in the security management system and control activities. The audit of the ISMS was completed by Brightline CPAs and Associates - an ANAB accredited certification body. HIPAA: The Health Insurance Portability and Accountability Act of 1996(HIPAA), which has incorporated requirements from the Health Information Technology for Economic and Clinical Health Act (HITECH) of 2009, established national standards for the security and privacy of Protected Health Information (PHI) in the United States. To help customers comply with HIPAA, VMware offers a Business Associate Agreement (BAA) to all interested customers using our US-based data centers. The BAA was designed in conjunction with a leading law firm with expertise in HIPAA and provides fair and reasonable terms for healthcare providers, insurers, and other organizations. VMware has completed an independent third party examination of vCloud Air against applicable controls of HIPAA. SOC 1 (SSAE16/ISAE 3402): Service Organization Control (SOC) 1 reports are conducted in accordance with Statement on Standards for Attestation Engagements (SSAE) No. 16 put forth by the Auditing Standards Board (ASB) of the American Institute of Certified Public Accountants (AICPS). The SOC 1 framework reports on internal controls over financial reporting for any service organization such as VMware vCloud Air. SOC 1 aligns to the International Standard on Assurance Engagements (ISAE) 3402 international reporting standards. SOC 1 examinations are specifically intended to meet the needs of the managements of vCloud Air's customers and vCloud Air's customers' auditors, as they evaluate the effect of the controls at vCloud Air on the clients' financial statement assertions. VMware has completed an independent third-party examination of vCloud Air which spans a twelve (12) month review period. SOC 2: The Service Organization Control 2 (SOC 2) report is composed of a comprehensive set of criteria on security, availability, processing integrity, confidentiality, and privacy and is similarly set forth by the America Institute of Certified Public Accountants (AICPA). The SOC 2 reports are	

	intended for use by stakeholders (e.g. customers, regulators, business partners, suppliers, directors) of the service organization that have a thorough understanding of the service organization and its internal controls. VMware has completed an independent third-party examination of vCloud Air that also spans a twelve (12) month review period. SOC 3: Trust Services Report for Service Organizations Control 3 (SOC 3) reports are designed to meet the needs of customers who want assurance on the controls at a service organization related to security, availability, processing integrity, confidentiality, or privacy. vCloud Air has completed an independent third-party SOC 3 examination of VMware vCloud Air. SOC 3 is composed of a comprehensive set of trust principles including security, availability, processing integrity, confidentiality and privacy. Cloud Security Alliance: VMware vCloud Air has completed the Cloud Security Alliance (CSA) Consensus Assessments Initiative Questionnaire (CAIQ). CAIQ provides industry-accepted ways to document what security controls exist in IaaS, PaaS and SaaS offerings. FedRAMP Provisional Authority: VMware vCloud Government Service, provided by Carpathian, now has FedRAMP Provisional Authority to Operate issued by the Joint Authorization Board (JAB). FedRAMP is a government-wide program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. This approach uses a ""do once, use many times"" framework that can reduce government organizations' costs, time, and staff required to conduct redundant agency security assessments. U.S. government agencies can now leverage vCloud Government Service to meet the stringent security and privacy requirements of FedRAMP. FIPS 140-2: VMware vCloud Government Service is fully FIPS 140-2 compliant including hardware which provides its 2-Factor Authentication capabilities. FIPS Pub 199: As discussed previously, vCloud Government Services is certified to store and secure Low Risk Data and Moderate Risk Data as defined by FIPS Pub 199. VMware is willing to work with participating States that require High Risk Data Storage to enhance vCloud Government Services to store and secure this data. FIPS Pub 199: As discussed previously, vCloud Government Services is certified to store and secure Low Risk Data and Moderate Risk Data as defined by FIPS Pub 199. VMware is willing to work with participating States that require High Risk Data Storage to enhance vCloud Government Services to store and secure this data. CJIS: vCGS recently underwent a CJIS assessment by CoalFire, Inc. CJIS is not a certification, it is a policy that must be followed and accredited for each deployment which requires it. The goal of VMware's CoalFire assessment was to create a baseline configuration that can be reused across any CJIS opportunity to accelerate the implementation and accreditation timeframes. FERPA: Like CJIS, FERPA compliance is assessed and confirmed for each deployment that requires it. VMware's vCloud Government Service FedRamp certification and others provide evidence that the underlying infrastructure is capable of meeting rigorous information security and availability requirements. VMware will work with Participating Entities to meet FERPA requirements on a task order basis. PCI Data Security Standards (DSS): Neither vCloud Air nor vCGS are currently PCI certified at this time. VMware will work with Participating Entities to meet PCI requirements on a task order basis. IRS Publication 1075: Because both IRS 1075 and FedRAMP are based on NIST 800-53, the compliance boundary for IRS 1075 is the same as the FedRAMP authorization. This, vCGS complies with IRS Publication 1075 on the basis that it is FedRAMP certified. FISMA: vCGS is FISMA Low and Moderate compliant.

	NIST 800-53: NIST 800-53 provides the core controls that must be met to achieve FedRAMP compliance. VMware vCloud Government Service has FedRAMP Provisional Authority to Operate issued by the Joint Authorization Board (JAB), thus we are compliant with NIST 800-53. NIST SP 800-171: VMware vCloud Government Service has FedRAMP Provisional Authority to Operate issued by the Joint Authorization Board (JAB). NIST 800-171 outlines a subset of the NIST 800-53 requirements, and as stated above, VMware vCloud Government Service is compliant with these guidelines. Since NIST 800-171 outlines a subset of the NIST 800-53 requirements, VMware vCloud Government Service is compliant with NIST SP 800-171. FIPS 200: Neither vCloud Air nor vCGS are currently FIPS 200 certified at this time. VMware will work with Participating Entities to meet PCI requirements on a task order basis. VMWare AirWatch The AirWatch Information Security Program is built on the security framework laid out in NIST 800-53. Although AirWatch is not required to register with any regulatory agencies, we provide a suite of tools for our customer's to maintain industry-relevant compliance guidelines within their mobile device fleets. AirWatch has recently been awarded the HP-IAPP Privacy Innovation Award for Most Innovative Privacy Technology by the International Association of Privacy Professionals (IAPP) for our commitment to delivering an EMM platform focused on end-user privacy. To help ensure the confidentiality, integrity, and availability of our cloud offering, we comply with the European Data Protection Directive (95/46/EC) and our top-tier data center partners have undergone SSAE16 SOC2 Type II audits.
FireEye	Currently the standards that apply are SSAE 16 SOC 2 Type 2, with a FedRAMP ATO in place and full FedRAMP certification in process. We are also in the process of becoming FedRAMP ISO 2700x certified.
VirtueStream	Security is the foundation of our business. Virtustream's xStream™ cloud software assists our customers to meet mandatory Legislative requirements, and achieve and maintain SSAE16, ISAE3402, PCI-DSS 3.0, FISMA, IS0 27001-2005/2013, ISO 9001-2008, HIPAA, CSA STAR and other leading cloud certifications and compliance frameworks in the customer's own environment (when coupled with identified operational and management controls).

8.6.3 Offeror must describe its security practices in place to secure data and applications, including threats from outside the service center as well as other customers co-located within the same service center.

CA	APM	CA technologies understands that security is a top concern when evaluating cloud-based applications, which is why CA technologies operations worldwide conform to rigorous certification, compliance and security programs and processes. In addition, we contract with independent auditors to regularly evaluate and validate the security of our service. High risks are identified, validated and remediated before production systems are made available. Medium risks are evaluated and resolved on a priority basis.
	MAA	All MAA core servers are behind firewalls; only systems administrators have access to the servers; all data is encrypted when transmitted between data centers. The MAA dashboard and API are protected with HTTPS/TLS encryption, and users are required to authenticate in order to access these.
	CA Agile	We use a co-located data center provider and within that environment we have a dedicated cage to which only our Operations Team has access. We also monitor all traffic across our systems using HIDS (OSSEC) and NIDS (Snort) to notify of any suspicious activity.
	ASM	All ASM core servers are behind firewalls; only systems administrators have access to the servers; all data is encrypted when transmitted between data centers. The ASM dashboard and API are protected with HTTPS/TLS encryption, and users are required to use a username and password to login to their accounts.

Google	In this DPA the obligations of Google to hold all customer data as confidential and wholly owned by the customer is detailed. Google's internal data access processes and policies are designed to prevent unauthorized persons and/or systems from gaining access to systems used to process personal data. Google aims to design its systems to: (i) only allow authorized persons to access data they are authorized to access; and (ii) ensure that personal data cannot be read, copied, altered or removed without authorization during processing, use and after recording. The systems are designed to detect any inappropriate access. Google employs a centralized access management system to control personnel access to production servers, and only provides access to a limited number of authorized personnel. LDAP, Kerberos and a proprietary system utilizing RSA keys are designed to provide Google with secure and flexible access mechanisms. These mechanisms are designed to grant only approved access rights to site hosts, logs, data and configuration information. Google requires the use of unique user IDs, strong passwords; two factor authentication and carefully monitored access lists to minimize the potential for unauthorized account use. The granting or modification of access rights is based on: the authorized personnel's job responsibilities; job duty requirements necessary to perform authorized tasks; a need to know basis; and must be in accordance with Google's internal data access policies and training. Approvals are managed by workflow tools that maintain audit records of all changes. Access to systems is logged to create an audit trail for accountability. Where passwords are employed for authentication (e.g., login to workstations), password policies that follow at least industry standard practices are implemented. These standards include password expiry, restrictions on password reuse and sufficient password strength. For access to extremely sensitive information (e.g., credit card data), Google uses hardware tokens.
AODocs	AODocs being built in Google AppEngine and Google Drive.
Virtru	Please see the Virtru Security Policies and Procedures and the Virtru Privacy Policies and Procedures provided in the Supplemental Information section of this response.
Salesforce	Government Trusted Security and Infrastructure Salesforce understands that the confidentiality, integrity, and availability of our customers' information are vital to their business operations and our own success. We use a multi-layered approach to protect that key information, constantly monitoring and improving our application, systems, and processes to meet the growing demands and challenges of security. Independent audits confirm that our security goes far beyond what most companies have been able to achieve on their own. Using the latest firewall protection, intrusion detection systems, and TLS encryption, Salesforce Force.com gives you the peace of mind only a world-class security infrastructure can provide. Third-party validation Security is a multidimensional business imperative that demands consideration at multiple levels, from security for applications to physical facilities and network security. In addition to the latest technologies, world-class security requires ongoing adherence to best-practice policies. To ensure this adherence, we continually seek relevant third-party certification, including ISO 27001, the SysTrust audit (the recognized standard for system security), and SSAE 16 SOC 1 audit (an examination and assessment of internal corporate controls, previously known as SAS 70 Type II). SOC1, SOC2 and SOC3 audits are performed by third party auditor annually at a minimum. Additional audits and certifications include: CSA 'Consensus Assessments Initiative', JIPDC (Japan Privacy Seal), Tuv (Germany Privacy Mark), and TRUSTe. Protection at the application level

	Salesforce protects customer data by ensuring that only authorized users can access it. Administrators assign data security rules that determine which data users can access. Sharing models define company-wide defaults and data access based on a role hierarchy. All data is encrypted in transfer. All access is governed by strict password security policies. All passwords are stored in SHA 256 one-way hash format. Applications are continually monitored for security violation attempts. Protection at the facilities level Salesforce security standards are stringent and designed with demanding customers in mind, including the world's most security-conscious financial institutions. Authorized personnel must pass through five levels of biometric scanning to reach the Salesforce system cages. All buildings are completely anonymous, with bullet-resistant exterior walls and embassy-grade concrete posts and planters around the perimeter. All exterior entrances feature silent alarm systems that notify law enforcement in the event of suspicion or intrusion. Data is backed up to disk or tape. These backups provide a second level of physical protection. Neither disks nor tapes ever leave the data center. Protection at the network level Multilevel security products from leading security vendors and proven security practices ensure network security. To prevent malicious attacks through unmonitored ports, external firewalls allow only http and https traffic on ports 80 and 443, along with ICMP traffic. Switches ensure that the network complies with the RFC 1918 standard, and address translation technologies further enhance network security. IDS sensors protect all network segments. Internal software systems are protected by two-factor authentication, along with the extensive use of technology that controls points of entry. All networks are certified through third-party vulnerability assessment programs. Secure Data Centers Data centers provide only power, environmental controls, and physical security. Salesforce employees manage all other aspects of the service at the data centers. Colocation data center personnel do not have network or logon access to the Salesforce systems. Colocation personnel have physical access to the Salesforce secure server room in the event of an emergency, but do not have keys to the individual racks containing hardware. Data centers maintain a common baseline of physical and environmental controls across data centers. The exterior perimeter of each anonymous data center building is bullet resistant, has concrete vehicle barriers, closed-circuit television coverage, alarm systems, and manned 24/7 guard stations that together help defend against non-entrance attack points. Inside each building, multiple biometric scans and guards limit access through interior doors and to the Salesforce secure rooms at all times. Access to Salesforce's secure server rooms in the datacenter is authorized based on position or role. Additional access controls enforced by an electronic key box are implemented for the dedicated Salesforce Government Cloud racks to ensure that access is limited to Qualified U.S. Citizens. Salesforce has an established process to review data center access logs to the server room. Additionally, an at least annual assessment of the data center is performed to ensure the data centers are meeting Salesforce's security control requirements. In addition to securing the data center locations, it is critical that the data center facilities maintain robust critical infrastructure to support Salesforce through the following services:

	Temperature and Humidity Controls • Humidity and temperature control • Redundant (N+1) cooling system Power • Underground utility power feed • Redundant (N+1) CPS/UPS systems • Redundant power distribution units (PDUs) • Redundant (N+1) diesel generators with on-site diesel fuel storage Secure Network Logistics • Concrete vaults for fiber entry • Redundant internal networks • Network neutral; connects to all major carriers and located near major Internet hubs • High bandwidth capacity Fire Detection and Suppression • VESDA (very early smoke detection apparatus) • Dual-alarmed, dual-interlock, multi-zone, pre-action dry pipe water-based fire suppression
ServiceNow	The ServiceNow cloud is built for the enterprise customer with every aspect aimed towards meeting the customer's demand for reliability, availability and security. ServiceNow's comprehensive approach to address this demand is enabled by the following: (a) ServiceNow's robust cloud infrastructure runs on its own applications and utilizes industry best-of-breed technology to automate mission critical functionalities in the cloud service with around-the-clock and around-the-world delivery; (b) ServiceNow achieves flexibility and control in its ability to deliver a stable user experience to the customer by having a logical single tenant architecture; (c) ServiceNow's application development which has a paramount focus on quality, security, and the user experience is closely connected to the operations of delivering those applications in a reliable and secure cloud environment; (d) ServiceNow invests in a comprehensive compliance strategy that allows its customers to attain their own compliance to applicable laws by obtaining attestations and certifications and running its subscription service from paired data centers situated close to where its customers are located; and (e) ServiceNow's homogeneous environment where all applications are on a single platform offers ServiceNow a competitive advantage in being able to concentrate its efforts to make the customer's user experience the best possible. The "Data Security Guide" contained within the "Subscription Service Guide" included with this response describes the measures ServiceNow takes to protect Customer Data when it resides in the ServiceNow cloud.
QTS	The QTS Information System Security Officer (ISSO) develops, disseminates, annually reviews and updates a formal, documented access control policy; System and Communications Protection and addresses the following: •Purpose and scope •Roles, responsibilities •Compliance QTS develops, disseminates, and annually reviews/updates a formal, documented security policy executive summary, SP Executive Summary - Information System Security Program Policies, which addresses: •management commitment •coordination among customer entities

	QTS cloud's Policies are maintained within a biometric secure office located in the Suwanee facility at 300 Satellite Blvd, Suwanee, GA 30024. It is disseminated to all individuals, including but not limited to employees, contractors, consultants, temporaries, and other personnel affiliated with third parties, who use any QTS Information Resource that is owned or leased by QTS. This policy is consistent with QTS's mission and functions and with applicable laws, directives, policies, regulations, standards, and guidance. The previously mentioned artifacts are disseminated via a centralized secure document repository among all QTS cloud's personnel who have any service operations or service delivery role for QTS cloud's IaaS offerings system environments, and is to be individually or by group reviewed semi-annually, especially by any personnel who have administrative access. QTS can provide its Information Security Policies as required: • IT_POL_03_System_and_Communications_Protection_Policy (v1.2 – 1/17/14)	
SAP	Ariba	We are committed to the security and integrity of customer information. We utilize security measures to protect against the loss, misuse or alteration of the information under our control. To prevent unauthorized access, maintain data accuracy, and facilitate the correct use of information, we have put in place appropriate physical, electronic, and managerial procedures to safeguard and secure the information we collect within the solution.
	Fieldglass	Please see the Fieldglass Security and Hosting Overview provided in the Supplemental Information section of this response.
	Hanna	Communication between data centers is via VPN or MPLS; VPN is encrypted by default and MPLS can be encrypted as well. Internet facing customer systems are protected by perimeter protection systems using technologies such as web application firewall (WAF) or intrusion prevention systems (IPS). Perimeter protection systems operate by monitoring traffic and blocking attaches towards SAP HANA Enterprise Cloud customer systems.
	Hybris	Both IDS and IPS are included the SAP Hybris Commerce, Cloud Edition The security infrastructure includes firewall security and hardened security policies on all servers. Log management procedures are in-place for log review for firewall, applications, network devices, including file-integrity management. SAP Hybris utilizes technologies from leading security firms for Log Management and File Integrity Management. SAP Hybris employs two-factor authentication across its network. SAP Hybris undergoes vulnerability and penetration testing. SAP Hybris validates against requirements for PCI DSS 2.0. The infrastructure also includes Web Application Firewalls and DDoS Mitigation Services. In addition, security policies and change management policies are in-place ensuring that all access and changes to customer systems and information is accessible only by SAP Hybris staff with access authorization. Security of the software application which is controlled by the Customer (or its implementation partner) remains the responsibility of the Customer.
	SuccessFactors	Technologies and measures used to help protect the security of customer data include: Redundant firewalls in a dedicated environment Network intrusion detection to help guard against attacks by monitoring all data center traffic around-the-clock and notifying operations and security teams in the event of an imminent threat Vulnerability scanning to proactively test internet-connected web servers by searching for weaknesses in the same way that a hacker would

		Penetration testing at least annually Security teams monitoring the infrastructure 24x7x365 Any security issues discovered are reported in real time to information security staff and IT management, entered into our ticketing system for follow-up investigation, and tracked to resolution. All actions taken to resolve the problem are documented, allowing all problems to be tracked to completion. We provide application level memory separation between each client instance as well as data level segmentation and separation with each customer's data residing in its own schema and table space at the database tier. The database tier provides isolation and security of data, and the use of application clustering provides availability, reliability and scalability. Each customer's data is maintained in a separate database schema with its own discrete set of tables, facilitating a high degree of data isolation thus preventing potential for data segmentation breaches Flexibility to backup individual customer table spaces without affecting adjacent customers Each schema has separate authentication credentials and assigned resource profile to restrict access rights and resource consumption
VMware	The VMWare Approach to Compliance Many organizations have initiatives to virtualize their Information Technology (IT) infrastructure, or to move to a Cloud Computing model. However, these initiatives are often complicated by the increasing number of regulatory compliance requirements, which require protection of data such as PCI, HIPAA, FISMA, DIACAP, FedRAMP, GLBA, and other State and Federal requirements. Organizations are increasingly concerned with the complexity, risk, and impact that a new technology can bring to their existing environments. VMware addresses these challenges by establishing a Compliance Reference Architecture Framework (RAF) that provides a consistent method for VMware, its partners, and customers to assess and evaluate the impact of regulations on virtual and cloud environments. The intent of the RAF is to provide a single framework for VMware, its partners, and organizations to address a variety of compliance requirements across an IT infrastructure. We designed our security architecture using a defense-in-depth approach to implement multiple layers of security throughout the SaaS environment and to mitigate any potential attacks through multiple safeguards, including: • Access control mechanisms, firewalls, anti-virus/malware software, auditing mechanisms, network controls, maintaining defined configuration settings, etc. We perform regular internal scans to assess the vulnerability of our internal network.	
FireEye	All data is stored within locked and monitored cages in secure data centers. Customer data is restricted to a need to know basis. Data is logically tagged and virtually segregated in our cloud services. Access is managed and only given to those with need to know including internal employees and customers.	
VirtueStream	All data for this environment will remain in the United States. Customers can elect Intel's TxT technology to demonstrate geo-fencing of data to specific data centers. Virtustream data centers are physically accessible by designated employees and approved employees only. Virtustream employees who are assigned to the data center are issued a proximity card which is required to access the data center. Once inside, physical access to the data processing areas is further restricted to specific employees. Physical access to the data processing areas is protected by biometric locks on the doors. Data center personnel maintain a list of all approved personnel who have access to the data center offices and who have access to the data processing areas. Virtustream offers security solutions which customers can select to protect their data while in transit and at rest. Customers are responsible for the protection of their data within their customer	

	zone. Virtustream does not process, store, or disseminate customer data within the Virtustream-controlled management zone. Virtustream invokes a defense-in-depth model for monitoring the management zone with tools such as Splunk, Trend Micro, Fortinet, and Tenable. These tools are available for customers to select as a managed service.

8.6.4 Offeror must describe its data confidentiality standards and practices that are in place to ensure data confidentiality. This must include not only prevention of exposure to unauthorized personnel, but also managing and reviewing access that administrators have to stored data. Include information on your hardware policies (laptops, mobile etc).

CA	APM	All personnel with access to client data undergo annual, mandatory security training and are covered under the CA Technologies NDA. Violations of security policies are grounds for termination. All access to data and other resources used to deliver the service are granted under the least principle.
	MAA	Customer accounts are password protected, and users can only access their data in their accounts. System administrators have access to MAA servers, and database administrators have access to database servers. Account access is reviewed periodically.
	CA Agile	All customer data is treated as confidental and as a policy we do not access customer data without explicit written consent. Access to systems containing customer data is restricted to our Operations Team according to our Elevated Permissions Policy.
	ASM	Customer accounts are password protected, and users can only access their data in their accounts. System administrators have access to ASM servers, and database administrators have access to database servers. Account access is reviewed periodically. All data on CA laptops are encrypted and a PIN is required to boot.
AODocs	The data stored in Google AppEngine are backed up every day. The application is hosted on Google Cloud Platform infrastructure and benefits from the network security.	
Virtru	See 'Virtru Security Policies and Procedures' and 'Virtru Privacy Policies and Procedures'	
Salesforce	Logical Access Control Salesforce provides contractual assurance to its customers that the data hosted in the Salesforce Services will be kept confidential and not accessed except under narrow circumstances (such as a support issue) and only for a set amount of time chosen by customer. In such circumstances, we will access your org only with prior approval and subject to a Non-Disclosure Agreement (NDA). To protect against access through the application, Salesforce employees don't have access at the application level for any customers, unless the customer grants access through the “login as” feature. Access to the production environment infrastructure is restricted to a very limited number of full-time Salesforce employees required to manage the service. Salesforce's Technical Operations team and Release Managers have logical access to servers. These employees must authenticate to the production environment via a secure server (Secure Global Desktop) using 2 points of RSA two-factor authentication. This tool provides pixel data only to these administrators. Systems access is role-based and controlled and logged. DBAs do not have login access to customer's instances (org) and do not see customer data in an assembled manner. They manage the system in aggregate-performance tuning, allocating space, building indices, etc. The Oracle tables and rows in our infrastructure do not reflect the view of a single customer instance (org) since we are multi-tenant and the data is spread across multiple disk arrays.	

	Database administrator account activity is logged. These logs are sent to the security information and event management (SIEM) system. These database activities logs are reviewed for appropriateness by the Computer Security Incident Response Team (CSIRT) team on a regular basis. This log data is also available as a forensic audit trail to support CSIRT during incident investigations. A customer's instance (org) of Salesforce is an aggregate of the raw data. The data model is very complicated, normalized, and the rows are identified by base62 encoded keys (primary and foreign). Re-establishing data ownership and a business context for the data would be very difficult to do at the database level. In order to reassemble any given customer's application (org), someone would need access to our source code in order to reassemble the raw data in a manner that could be interpreted and understood, and would need the entire set of tapes or disks/arrays supporting a given Instance, as the data for any one customer is spread across several tapes/disks. Data center engineers with physical access to the servers do not have logical access to the production environment and administrators with logical access to the systems do not have physical access to the data centers.	
ServiceNow	ServiceNow applies the same data classification for all hosted customer data. ServiceNow does not inspect or monitor its customers' information and therefore has no ability to sub-classify customer data. The overriding requirement of the assigned classification is that customer data remains hosted in the private cloud until the customer terminates their subscription. It is never stored anywhere apart from the private cloud. Customers remain the data owner and data controller for all data placed into their instance. ServiceNow does not examine, inspect, monitor or analyze customers' data. Customers apply access controls to restrict access to data within their instances based on their own requirements and needs, including their own data classification.	
QTS	The customer will be assigned one or more Org Administrators. All users will be configured with RSA AD two-factor Risk Based authentication as a requirement for cloud portal access.	
SAP	Ariba	We participate in the following national and international standards committees: WebTrust: (2001 - current) The Security, Availability, Processing Integrity and Confidentiality of our applications are based on the Trust Services Principles now incorporated into the SSAE16/ISAE 3000 SOC 2 standards SSAE16: (formerly SAS 70) certification: (Since 2011) ISAE 3402: (The International Standard on Assurance Engagements since 2014) every six months we undergo a rigorous ISAE 3402 audit by independent auditor PricewaterhouseCoopers (PwC) Payment Card Industry (PCI) Data Security Standard (DSS): (Since 2008) we have adopted and adhere to the PCI-DSS). PCI certification and compliance with the Visa USA Cardholder Information Security Program (CISP) and MasterCard Site Data Protection (SDP) program Safe Harbor: (Since 2007) Current on the Safe Harbor list for ""Online Data"" for the ASN and Cloud Solutions/Services A firewall separates the Ariba corporate network from Ariba infrastructure computers. Therefore, unauthorized Ariba employees cannot access Ariba data from the Ariba corporate network infrastructure. Access is limited to specific roles or functions within Ariba Operations. Additionally, access is managed on an "exception" basis whereby personnel need clearance to be

		authorized. Access is time-limited, after which time re-authentication is required. Internally, we have deployed an active monitoring system tied back to Human Resources. Logical access management reports are rolled up monthly and are part of the monthly Privacy & Security board review. All logical access management is subject to review and audit under ISAE 3402 assurance every six months and annually under PCI DSS certification. Wireless technology is not allowed within the production operations infrastructure where customer data is received, processed and stored. All corporate laptops are whole disk encrypted. All approved portable devices are encrypted and have a phone home capability which allows them to be wiped remotely.
	Fieldglass	Fieldglass has the following categories for classifying information: Confidential - This is the information that Fieldglass and end users have a legal, regulatory and/or contractual obligation to protect or information that unauthorized disclosure, compromise, or destruction that results in severe damage, provides significant advantage to a competitor, or incurs serious financial impact to Fieldglass and/or our customers. Fieldglass will not disclose to a third party without signing a nondisclosure agreement requiring the third party to protect such information. Internal Use - This is information that, due to a technical or business sensitivity, requires special precautions to ensure the confidentiality and integrity of data by protecting it from unauthorized access, modification or deletion. This information is intended for use only within the company and must be limited to end users who are employed by Fieldglass or individuals that have a business requirement to access the data and have signed a non-disclosure agreement. Public - This information has been made available for public distribution through authorized company channels. Public information does not require special protection. It is information that can be disclosed to anyone without violating an individual's right of privacy. Knowledge of this information does not expose Fieldglass to financial loss, embarrassment, or jeopardize the security assets. Laptops Every Fieldglass laptop issued to employees and contractors have a DLP agent installed that cannot be modified. This agent detects whether customer data or the Fieldglass source code is being copied externally. Monthly access reviews are conducted by product and file share owners to ensure access is limited to a need-to-know basis. Privileged user account access is also monitored on a weekly basis.
	Hanna	SAP treats all customer data stored in cloud solutions from SAP as "Confidential" according to SAP's data classification standard. Personal Data is subject to strict security and legal requirements in the legislation of several countries, for example handling of Personal Data is regulated in the European Union (EU) Data Protection Directive and

		corresponding national laws. At SAP intercompany agreements exist, to ensure that these requirements are met in all SAP companies and branch offices throughout the world. Similar data protection agreements were executed with all subprocessors. Personal data must be classified as equally confidential regardless of whether it relates to employees, customers or third parties.
	Hybris	The security infrastructure includes firewall security and hardened security policies on all servers. Log management procedures are in-place for log review for firewall, applications, network devices, including file-integrity management. SAP Hybris utilizes technologies from leading security firms for Log Management and File Integrity Management. SAP Hybris employs two-factor authentication across its network. SAP Hybris undergoes vulnerability and penetration testing. SAP Hybris validates against requirements for PCI DSS 2.0. The infrastructure also includes Web Application Firewalls and DDoS Mitigation Services. In addition, security policies and change management policies are in-place ensuring that all access and changes to customer systems and information is accessible only by SAP Hybris staff with access authorization. Security of the software application which is controlled by the Customer (or its implementation partner) remains the responsibility of the Customer.
	SuccessFactors	We are aligned with ISO 27001 for Information Security, BS 10012 for Data Protection, and ISO 20000 for Service Delivery to create an Integrated Compliance Framework ("ICF"). Where these standards overlap in subject matter, Information Security ISO 27001 takes precedence. Our Network also complies with Authority to Operate as a Moderate Risk Federal Information System by the Office of Personnel Management and Department of Homeland Security; NIST SP800-53 Security Controls; EU Privacy Directive 95/46/EC for EU and non-EU customer data; Payment Card Industry (PCI) Data Security Standard (DSS) v 2.0; Safe Harbor.
VMware	VMware monitors for security events involving the underlying infrastructure servers, storage, networks, and information systems used in the delivery of vCloud Air over which VMware have sole administrative level control. The goal of this process is to identify security incidents and respond to them proactively. This responsibility stops at any point where customers have control, permission, or access to modify any aspect of the service offering. The customer is responsible for the security of the networks over which they have administrative level control. This includes, but is not limited to, maintaining effective firewall rules, exposing communication ports that are only necessary to conduct business, locking down promiscuous access, and other such capabilities. Proactive Security Monitoring over Internet and Social Media (e.g. searching filesharing sites for customer data, seeding data with honey tokens) VMware security teams perform OSINT monitoring on the Internet for all VMware products and services. This includes harvesting data from search engines, le sharing, and social networking sites. This data is analyzed for keywords and other specific indicators. With regards to potential data leaks, the customer is solely responsible for protecting the security of his or her content, including any access provided to employees, customers or third parties. vCloud Air provides certain software and functionality to help protect content from unauthorized access such as firewalls, load balancers, and IPsec VPNs. Customers are encouraged to deploy additional security mechanisms similar to what exists in their current data center to address other security controls such as data encryption, intrusion detection, le integrity monitoring, and other such concerns relevant to the sector and regulatory requirements that apply to the specific business of a customer.	

FireEye	FireEye has mature and well documented security and privacy programs. The programs include third party certifications for SSAE 16 SOC 2, and FedRAMP certifications, Model clauses, Privacy and Security Standards among others. The data that FireEye receives is only in conjunction with the malware analysis. Our data protection standards includes prevention of exposure to unauthorized personnel and managing and reviewing all access to systems (not just for admin) quarterly or when employees have a role change. FireEye has standards for hardware and software such as gold images for all operating systems and hardened systems, these are managed and distributed centrally. It also includes supported and managed configurations of hardware and software on mobile devices and acceptable use policy for all FireEye resources.
VirtueStream	Customers are responsible for the protection and confidentiality of data within their application and/or system which resides on the Virtustream IaaS. Virtustream customers are logically separated via VLAN and VRF technologies which ensure that different customers' data is not accessible and cannot be altered. Customers are responsible for controlling access to their data. Virtustream does not have direct access to customer data within their customer zone. Virtustream employees who are assigned to IaaS must pass a Virtustream background investigation. In addition, Virtustream employees assigned to the IAAS must adhere to any requirement by customers to pass federal, state, or local background investigations if they are to provide managed services to the customer zone. Virtustream offers an encryption at rest and encryption in transit managed service. This provides an additional level of protection for customer's data within their VLAN, All Virtustream employees with access to the IaaS are required to have hard drive encryption on their laptops. Virtustream performs quarterly privileged user access reviews.

8.6.5 Offeror must provide a detailed list of the third-party attestations, reports, security credentials (e.g., FedRamp), and certifications relating to data security, integrity, and other controls.

CA	APM	AWS EC2 datacenters annually undergo SOC 3 audits.
	MAA	CA MAA is certified for SOC 2 Type 1 Security Audit.
	CA Agile	N/A - we are working towards a NIST 800-53r4 certification but that is not yet complete.
	ASM	Rackspace datacenters annually undergo various certification including SOC 3 audits. The application currently does not hold a Soc 2 attestation.
Google	SOC 1 (SSAE 16) SOC 2 SOC 3 ISO 27001 ISO 27018 FedRAMP	
AODocs	AODocs is certified SOC2 Type 2	
Virtru	Vulnerability Scan and Penetration Testing by Cigital and FedRamp In Process sponsored by US Department of Interior	
Salesforce	Salesforce has comprehensive privacy and security assessments and certifications performed by multiple third parties. The following audits and their frequencies are performed: ISO 27001 - Annually (3 year certification) PCI-DSS - Annually FedRAMP - Annually SOC 1 (SSAE16/ISAE 3402, previously SAS 70) - Twice a year SOC 2 & SOC 3 - Twice a year Copies of our SOC reports can be provided to your Agency upon request and under NDA.	

	Under NDA, your Agency can also be provided Salesforce's complete FedRAMP Authority to Operate (ATO) package, which contains the following security assessment documentation: 01 - Salesforce Government Cloud System Security Plan 02 - Salesforce Government Cloud System Security Plan - Tracked Changes 03 - Salesforce Government Cloud Attachment 1 - Control Tailoring Workbook (CTW) 04 - Salesforce Government Cloud Attachment 2 - Control Implementation Summary (CIS) 05 - Salesforce Government Cloud Attachment 3 - PTA and PIA 06 - Salesforce Government Cloud Attachment 4 - E-Authentication 07 - Salesforce Government Cloud Attachment 5 - FIPS 199 Categorization 08 - Salesforce Government Cloud Attachment 6 - User Guide - Customer Configurations 09 - Salesforce Government Cloud Attachment 7 - Hardware, Network, and Software System Inventory 10 - Salesforce Government Cloud Attachment 8 - Customer Responsibilities 11 - Salesforce Government Cloud Rules of Behavior - Ground Rules for Security Success 12 - Salesforce Government Cloud Disaster Recovery Plan 13 - Salesforce Government Cloud Incident Response Plan 14 - Salesforce Government Cloud Configuration Guide 15 - Salesforce Government Cloud Continuous Monitoring Plan 16 - Salesforce Government Cloud Security Assessment Plan 17 - Salesforce Government Cloud Security Assessment Report (SAR) 18 - Salesforce Government Cloud Table 4.1 SAR 19 - Salesforce Government Cloud Test Cases (SRTM) 20 - Salesforce Government Cloud POA&M	
ServiceNow	•ISO/IEC 27001:2013 BrightLine Certificate Number 1980700-4 (see supplemental information section for official certificate) •SSAE 16 SOC 1 Type 2 (available under NDA) •SSAE 16 SOC 2 Type 2 (available under NDA) •FedRAMP Compliant	
QTS	QTS maintains control mappings that include: • NIST 800-53/FedRAMP (Low/Moderate/High) • DOD IT RMF/DIACAP (MAC I/II/III Sensitive & Public) • HIPAA-HITECH-Omnibus • PCI-DSS • ISO/NATO • CNSS/ICD/DCID/NISPOM	
SAP	Ariba	As assurance collateral, we can provide the BITS SIG and CSA Cloud Service Provider Questionnaire, Our ISAE 3402 SOC 1 Type II, SOC 2 and SOC 3 reports as well as the Attestation of Compliance for PCI DSS are signed by our qualified security assessor and management.
	Fieldglass	Independent third-party auditors conduct annual audits for the following: • ISO 27001 • SSAE 16 SOC 1 and SOC 2
	Hanna	Please see response 8.6.1
	Hybris	
	SuccessFactors	We have various third party certifications including ISO 27001 and BS10012.

VMware	VMware IaaS Services The International Organization for Standardization (ISO) has developed he ISO 27001 standard which defines an information security management system (“ISMS”) as a systematic approach to managing sensitive company information so that it remains secure. It includes an organization’s people, processes and IT systems and the application of a risk management process. vCloud Air has established and implemented an Information Security Management System (ISMS) based on ISO 27001 standards to manage risks relating to confidentiality, integrity, and availability of information. vCloud Air engages an independent third party auditing firm on an on-going basis to validate vCloud's air adherence to the ISO 27001 standard. An ISO 27001 certificate is issued if the auditing firm has validated adherence to the standard. VMware IaaS Services The International Organization for Standardization (ISO) has developed he ISO 27001 standard which defines an information security management system (“ISMS”) as a systematic approach to managing sensitive company information so that it remains secure. It includes an organization’s people, processes and IT systems and the application of a risk management process. vCloud Air has established and implemented an Information Security Management System (ISMS) based on ISO 27001 standards to manage risks relating to confidentiality, integrity, and availability of information. vCloud Air engages an independent third party auditing firm on an on-going basis to validate vCloud's air adherence to the ISO 27001 standard. An ISO 27001 certificate is issued if the auditing firm has validated adherence to the standard. VMware IaaS Services The International Organization for Standardization (ISO) has developed he ISO 27001 standard which defines an information security management system (“ISMS”) as a systematic approach to managing sensitive company information so that it remains secure. It includes an organization’s people, processes and IT systems and the application of a risk management process. vCloud Air has established and implemented an Information Security Management System (ISMS) based on ISO 27001 standards to manage risks relating to confidentiality, integrity, and availability of information. vCloud Air engages an independent third party auditing firm on an on-going basis to validate vCloud's air adherence to the ISO 27001 standard. An ISO 27001 certificate is issued if the auditing firm has validated adherence to the standard. vCloud Government Service (IaaS): FedRAMP Provisional Authority: VMware vCloud Government Service, provided by Carpathian, now has FedRAMP Provisional Authority to Operate issued by the Joint Authorization Board (JAB). FedRAMP is a government-wide program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. This approach uses a ""do once, use many times"" framework that can reduce government organizations' costs, time, and staff required to conduct redundant agency security assessments. U.S. government agencies can now leverage vCloud Government Service to meet the stringent security and privacy requirements of FedRAMP.
FireEye	We have SSAE 16 SOC 2 Type 2 certification for specific cloud services, and associated datacenters. FireEye currently has a FedRAMP ATO for ETP and are in process for full FedRAMP, and ISO 27001 certification.
VirtueStream	Security is the foundation of our business. Virtustream's xStream™ cloud software assists our customers to meet mandatory Legislative requirements, and achieve and maintain FedRAMP, FISMA Moderate, PCI-DSS, SSAE16/SOC2/SOC3, ISO 27001/9001/22301, HIPAA, NIST 800-53, CSA STAR and other leading cloud certifications and compliance frameworks in the customer's own environment (when coupled with identified operational and management controls).

8.6.6 Offeror must describe its logging process including the types of services and devices logged; the event types logged; and the information fields. You should include detailed response on how you plan to maintain security certifications.

CA	APM	CA has various log monitoring tools that help us keep track of live production systems in order to understand load vs. resource utilization vs. performance. CA along with AWS monitors the service and provides real time alerting when systems suddenly die, or when system loads or response times approach critical thresholds. Logs are kept for forensic examination and identification of trends in order to proactively ensure stability.
	MAA	CA MAA servers log all activity, and data retention is anywhere from 14 to 180 days depending on the component and volume of logs generated
	CA Agile	All systems are required to send logs to a centralized log server. At a minimum log data must contain timestamps, usernames, IP Addresses, and query parameters.
	ASM	ASM servers log all activity, and data retention is anywhere from 30 days to 1 year depending on the application and volume of logs generated.
Google	This is largely the responsibility of the customer. Google's obligations, as described in 8.6.4, are to ensure there is no unauthorized access of Customer data. Customers are responsibility for ensuring their end users use the service according to the Customer's acceptable use policies. During the onboard process, Customers will be assisted in the configuration controls that are included to enforce acceptable use and security policies and trained in how to maintain oversight on the ongoing usage of the services in scope.	
AODocs	AODocs does not manage the authentification. The authentification is managed by Google.	
Virtru	See 'Virtru Security Policies and Procedures'	
Salesforce	Salesforce Infrastructure Logs Salesforce internal infrastructure logs are collected by various monitoring tools for activities on the systems that host Salesforce, and include: Server access Network access Firewall management events Network intrusion detection systems traffic Cache Database File integrity Network device configuration Anti-virus detection Log events are correlated to generate alerts. Alerts are configured to notify the Technical Operations and Computer Security Incident Response Team (CSIRT) teams. Security alerts require acknowledgement and follow up, if appropriate by the CSIRT. Firewalls and IDS systems are configured with automated syslog notifications for key events. Logs are archived and are currently stored for a minimum of (1) one year. NOTE: These logs are not available to customers. Customer Auditing Capabilities Within Salesforce, the creator and last updater, as well as timestamps, are recorded for every record. Additionally, the Salesforce Platform and Salesforce Applications have a multitude of history tracking and auditing features that provide valuable information about the use of an	

	organization's applications and data, which in turn can be a critical tool in diagnosing potential or real security issues. Auditing features include: Record Modification Fields - All objects include fields to store the name of the user who created the record and who last modified the record. This provides some basic auditing information. Login History - You can review a list of successful and failed login attempts to your organization for the past six months within Salesforce. Field History Tracking - You can also enable auditing for individual fields, which will automatically track any changes in the values of selected fields. Although auditing is available for all custom objects, only some standard objects allow field-level auditing. Setup Audit Trail - Administrators can also view a Setup Audit Trail for the past six months within Salesforce, which logs when modifications are made to your organization's configuration. This trail can be downloaded into Excel or as a csv file. While the Login History and Setup Audit Trail are available for six months within Salesforce, audit trails can be downloaded and stored locally to meet longer audit log retention requirements. Detailed application logs can be used for forensics investigations by customers. These logs are stored for 12 months and are available for a fee. Event Monitoring (Additional License Option) In addition to Salesforce's core auditing capabilities, Salesforce also offers Event Monitoring as an additional license option. Your Agency can use event monitoring to discover how often and at what times your users are logging in to and out of your organization. This includes insight into what Salesforce applications are being adopted by users, who is logging in and from where, what pages users are viewing, what reports users are running and exporting and other aspects of application usage. This capability helps you discriminate between valid and invalid login requests and also track user login patterns for future reference. Not only can your Agency now better understand how your apps are being utilized, you can also monitor if users download large amounts of data that might put your agency at risk. In addition, your Agency can also determine if an employee is unnecessarily downloading sensitive customer/citizen information, pinpointing the exact time and location of that event. Event Monitoring is delivered as an API-first feature and there are Salesforce partners with visualization tools available. Use the SOAP API and REST API resources to retrieve event log files that contain information useful for assessing organizational usage trends and user behavior. Because event log files are accessed through the Force.com SOAP API and REST API, you can integrate log data with your own back-end storage and data marts so that you can correlate data from multiple organizations and across disparate systems easily. When using event monitoring, keep the following in mind: - In the unlikely case where no log files are generated for 24 hours, contact Salesforce. - Log data is read-only. You can't insert, update, or delete log data. - Use the EventType field to determine which files were generated for your organization - LogDate tracks usage activity for a 24-hour period, from 12:00 a.m. to 11:59 p.m. UTC time. - An event generates log data in real time. However, log files are generated the day after an event takes place, during nonpeak hours. Therefore, log file data is unavailable for at least one day after an event. - CreatedDate tracks when the log file was generated.

	- Log files, represented by the EventType field, are only generated if there is at least one event of that type for the day. If no events took place, the file won't be generated for that day - Log files are available based on CreatedDate for the last 30 days when organizations purchase User Event Monitoring or one day for Developer Edition organizations. Businesses desire certainty that their data is accurate, complete and reliable, enabling them to meet stringent industry regulations. With Field Audit Trail, customers can track changes at the field level for up to ten years and set different policies for each Salesforce object to ensure data is purged when no longer needed. Life sciences companies running clinical trials in Salesforce, for example, can now maintain a complete audit trail of patient data so they can safeguard the integrity of clinical trial results and comply with FDA regulations. - All event monitoring logs are exposed to the API through the EventLogFile object, however there is no access through the user interface. Event monitoring can be used with 28 different file types: Apex Callout, Apex Execution, Apex SOAP, Apex Trigger, API, Async Report, Bulk API, Change Set Operation, Content Distribution, Content Document Link, Content Transfer, Dashboard, Document Attachment Downloads, Login, Login As, Logout, MDAPI Operation, Multiblock Report, Package Install, Report, Report Export, REST API, Salesforce1, Adoption (UI Tracking), Sandbox, Sites, Time-Based Workflow, URI, Visualforce. Event Monitoring Transaction Security Transaction Security policies give your Agency a way to look through events in your organization and specify actions to take when certain combinations occur. A transaction security policy consists of events, notifications, and actions. Transaction Security monitors events according to the policies that your Agency sets up. When a policy is triggered, you can receive a notification and have an optional action taken. For example, suppose that you activate a policy to limit the number of concurrent sessions per user to three. A user with three login sessions tries to create a fourth session. Your Agency can require a user to end one of their existing sessions before proceeding with the new session. At the same time, you are notified that the policy was triggered.
ServiceNow	The ServiceNow application writes detailed log information that is stored in tables within a customer's instance. As this is customer data in a customer's instance, ServiceNow does not attempt to monitor or view this data unless specifically requested by a customer. As a result the customer is responsible for monitoring the contents of these logs files. The log data is protected in the same manner as all other customer data. Event logs can also be configured to feed into a customer's environment via ServiceNow's Syslog probe allowing the logs to be stored within the customer's environment in a syslog repository or SIEM and retained according to the customer's requirements. ServiceNow's application logging includes verbose transaction logs, these logs are retained within the instance for 30 days. Event logs are stored for seven days and audit histories are retained indefinitely in the instance. Transaction logs represent every click, view, and system event that occurs in an instance and as a result, will grow very large, quickly. They provide a level of detail that is frequently used for troubleshooting issues with an instance. They can also provide detailed intelligence on the behaviors within an instance. These logs can be downloaded to customers' environments, if they need to be retained for longer than 30 days. The event logs on the other hand are less granular; they will include the creation of an incident, or deletion of problem, or any one of the 250 standard events. They may also contain customer

	created events. There are a number of security events as well, including successful login, failed login, security privilege escalation, and viewing of a table. These events can either be monitored manually, generate an Incident based on a parameter or when metric is reached; such as failed logins per minute. The final aspect of logging is the audit history. Audit history may be turned on for any particular table or field. The audit log table then maintains a record of who made changes when to a table or field and what they changed.
QTS	All account activities are logged including account creation, modification, disabling and termination. Logs are monitored and notifications are sent for abnormal activity. Splunk Enterprise is used as the centralized audit log monitoring tool to centrally collect, analyze and reduce the amount of audit logs. As referenced in IT_PRO_07_Audit_and_Accountability_Procedure (v1.0 – 1/20/14), on-site network and security operations monitoring coverage and audit management process; to include analysis, reporting, and alerting into a central repository provided by a highly available Splunk logging service. Splunk logging service supports QTS cloud information systems for organizational–wide situation awareness. Splunk provides built-in capabilities to filter, normalize, and correlate the large amounts of data produced by QTS cloud, and then allows QTS's support staff to use Splunk's built-in capabilities to data mine, log mine, and run pre-developed and ad-hoc reports against the result sets obtained during the data and log mining sessions. Logs are centrally correlated and reviewed from devices across QTS cloud Hosting Environment by QTS's Systems Engineer or designee. Specific report categories include: •Authentication and Authorization Reports • Systems and Data Change Reports •Network Activity Reports •Resource Access Reports •Malware Activity Reports •Failure and Critical Error Reports • Vulnerability Correlations Reports •Anti-Port Correlations Reports •Watch List Correlations Reports
VMware	VMware IaaS Services In accordance with our ISO and SOC commitments, change-related activity, including administrative actions, performed on the management infrastructure layers supporting vCloud Air are monitored and logged to a centralized logging server for a minimum of 1 year. Infrastructure logging is in place for customer interactions with the vCloud Air management and administrative consoles. These logs are only for the management and administrative interfaces. These are not in place for monitoring of individual customer VMs installed within the customer tenant org. Limited logging and activity reporting are available from customer tenant environments, with more detailed reporting, auditing and logging capabilities introduced Q4-2014. VMware AirWatch To enable user accountability, we have full auditing capabilities on all environments in the AirWatch Cloud. Customers can use the built-in event log, customizable dashboards, integrated reporting engine and AirWatch Hub to audit the web console and end-user actions. For the SaaS environment logs, our Information Security Team helps ensure that systems generate audit records containing information that establishes what type of event occurred, when the event occurred, where the event occurred, the source of the event, the outcome of the event, and the identity of any individuals or subjects associated with the event.
FireEye	FireEye auditing and log review procedures are based on industry best practices and in accordance with regulatory, statutory, contractual and business requirements. Detailed audit

	records (User ID, date, time, type of event, successful/unsuccessful attempts or access secured files and protect the contents of audit trails against unauthorized access, modification or deletion.
VirtueStream	Virtustream offers logging as a managed service to customers as optional solution. The types of services and devices are specified by the customer and a monthly report is delivered to the customer.

8.6.7 Offeror must describe whether it can restrict visibility of cloud hosted data and documents to specific users or groups.

CA	APM	Users of the Portal are divided into two types: Internal users (for publishers of the API) and External users (for developers). There are a number of pre-defined roles for both Internal and External users that inherit functionality in a hierarchical manner. Portal has RBAC built in that allows you to grant access to different functionality for different users. For example, you can assign a user to role that only allows them access to update content, or access apps but not create them.
	MAA	CA utilizes IaaS vendor to host the service with strict access controls in place. CA SaaS InfoSec team manages users and their associations with groups within LDAP Directory and conducts periodic access reviews to conform to governance requirements.
	CA Agile	Our databases are shared but logically segregated. We ensure logical security of access to customer data by implementing access restrictions between subscriptions and roles within those subscriptions to assure adequate segregation of data. There is a plugin available in the unlimited edition that allows the administrator to limit access to the application based on IP address.
	ASM	Only Public Status Page (PSP) data is stored in the cloud, and PSP web pages are accessible by anyone. PSP data is only sent to the cloud if the customer enables this feature, and they can decide which data is made public.
Google	If Google becomes aware of a Data Incident, Google will promptly notify Customer of the Data Incident, and take reasonable steps to minimize harm and secure Customer Data. Notification(s) of any Data Incident(s) will be delivered to the Notification Email Address provided by Customer in connection with the Agreement or, at Google's discretion, by direct communication (e.g., by phone call or an in-person meeting). Customer acknowledges that it is solely responsible for ensuring the contact information given for purposes of the Notification Email Address is current and valid, and for fulfilling any third party notification obligations. Customer agrees that "Data Incidents" do not include: (i) unsuccessful access attempts or similar events that do not compromise the security or privacy of Customer Data, including pings, port scans, denial of service attacks and other network attacks on firewalls or networked systems; or (ii) accidental loss or disclosure of Customer Data caused by Customer's use of the Services or Customer's loss of account authentication credentials. Google's obligation to report or respond to a Data Incident under this Section will not be construed as an acknowledgement by Google of any fault or liability with respect to the Data Incident.	
AODocs	The AODocs-specific data stored in the Google App Engine Datastore relies on a built-in multi-tenancy feature named "namespace", which define virtual "silos" within the AODocs database. Each customer is assigned a specific namespace (which is in fact the customer's primary Google Apps domain name), and all the customer's data is stored within this namespace.	
Virtru	Key material is encrypted prior to storage, and those keys are backed by HSM. Decryption occurs only for authenticated users	
Salesforce	The multitenant architecture and secure logical controls address separation of customer data. There are no dedicated servers used for individual customers. The Salesforce Services infrastructure is divided into a modular architecture based on "Instance". Each Instance is capable	

	of supporting several thousand customers in a secure and efficient manner. Services are grouped within each Instance; with app, search, and database elements contained. There are appropriate controls in place to ensure that any given customer's org (application) is not compromised. The service has been designed to accomplish this and is robustly tested on an ongoing basis by both Salesforce and its customers.	
ServiceNow	ServiceNow includes built in Role Based Access Control (RBAC) that is based on users, groups and roles. The entitlements granted to users are built from fine grained Access Control Lists (ACLs). ACLs can be built from individual entitlements that include read, write, create, execute and delete as well as a number of other individual attributes. The attributes that are available also vary, depending on the type of object being secured. Customers have full control of the entitlements granted to each of their users and integration with customer side directory service is possible through the use of users, groups and group memberships.	
SAP	Ariba	Within our solution, specific logging takes place that is viewable by the customer administrator or their designee. Audit logs produced through use of the solution are considered customer data and are maintained within the customer's instance of the database. These logs are retained so long as the customer has an active contract with us. As a user control consideration, customers are responsible for monitoring the proper entry of data to the solution and reviewing reports generated by the system.
	Fieldglass	The Fieldglass Audit Trail tracks a date/time stamp for each user as they log in and out of the application. Likewise, Fieldglass tracks a date/time stamp and owner of every transaction that is created, submitted and approved through the application. Similarly, actions that occur within the reporting tool are also tracked, including when reports are created and run and by whom. The audit trail log is visible by the State of Utah program office. Audit trail reports can be created with Fieldglass' ad hoc reporting.
	Hanna	SAP has Security Information and Event Management systems (SIEM) for analysis, reporting and alerting. All critical systems and infrastructure components within the SAP Cloud need to log relevant data, which is stored for a minimum of six (6) months. This is ensured via the security configuration compliance checks and event monitoring. General security monitoring is performed 24x7 for all activities. Resulting warnings and alerts are processed via ticketing system and critical events are handled according to the Incident Management Process.
	Hybris	Log management procedures are in-place for log review for firewall, applications, network devices, including file-integrity management. hybris utilizes technologies from leading security firms for Log Management and File Integrity Management.
	SuccessFactors	The application logs the following for every transaction: Event/transaction Time, Transaction ID, Event/transaction Type, Event/transaction Status (Result of the event; if failure, includes reason), Object Attributes (Describes the object affected by the event), Originator User ID (ID of the user who initiated the event or action), Subject ID, Process User ID, Account Number, Transaction Specific Elements. The application audits changes to the major components. Examples of this are goal auditing and document auditing. The audit trail includes who made the

		change, the date of the change and the ability to see the data as it existed at that point in time. The data in the audit log can be viewed with appropriate permissions. We also provide an optional Audit Framework for additional audit logging capabilities. All audit logs within the application are accessible only by customers. Therefore, the review of application audit logs as well as retention periods for the application audit logs are the customer's responsibility, and can be determined as per requirements. To detect unauthorized information processing activities, systems are monitored and all information security events are recorded. Operator logs and fault logging are used to information system problems are identified. We comply with all relevant legal requirements applicable to its monitoring and logging activities. All system logs are created with "write-once" technology so that they cannot be altered or overwritten. All system logs are maintained for a minimum of 90 days on-line and a minimum of 13 months near-line. Inter host communications are secured by multiple layers of defense including segmented separate VLANS, restricted protocol sharing, multiple levels of stateful firewalls, HOST and NETWORK IDS/IPS and constant vigilant monitoring and testing. In addition, our Operations Team maintains detailed system logs. Our internal system logs successful and unsuccessful requests for access, and our team monitors all system logs for any errors or unusual activity. Activities are logged and reviewed by various mechanisms such as: RSA, SysLog, NIDS, HIDS, OSSIM and database logging. The system logs are not made available to customers but are used to monitor the health of the application and facilitate a high level of performance. Alerts are responded to immediately and logs are analyzed daily for any issues or anomalies. The system level logs are written to servers in the data center then copied to our operations team on an as needed basis. Various logging mechanisms are used to monitor database administration activities. Logging mechanisms include: syslog, alert log and database auditing for the privileged role SYSDBA. All activities are logged under the SYSDBA role which including: start-up and shutdown of the data base, configuration changes to init.ora and also any queries/data extraction. We would be able to identify dba activities by manual review of the logs and database auditing to detect if client data querying has occurred. All audit logs are created with "write-once" technology so that they cannot be altered or overwritten. Controls aim to protect against unauthorized changes and operational problems with the logging facility including: Alterations to the message types that are recorded. Log files being edited or deleted. Storage capacity of the log file media being exceeded, resulting in either the failure to record events or over-writing of past recorded events.
VMware	The vCloud Air Terms of Service and Data Privacy Addendum's establish the line of demarcation between the responsibility of VMware and the customer as it pertains to data protection. In addition, security whitepapers are made available to customers to further illustrate these points or to establish transparency regarding the separation of responsibility between VMware and the customer for compliance programs such as HIPAA or PCI. Subscribers are able to use a VPN connection at multiple layers to maintain data security. For traffic in motion, VPNs can be created for a particular application and also for an entire virtual data	

	center. A site-to-site IPsec-VPN can also be established to securely tunnel the entire virtual data center back to the private data center. For data ""at rest"", subscribers are provided a role-based access control, whereby specified users are not exposed to the entire infrastructure and can be limited to a single or multiple virtual data centers. Further details of the controls in place to limit exposure of these groups to customer data is documented within the ATA 101 and SOC reports, available under NDA. vCloud Air has logically separated networks that restrict Tenant access to only their own private networks. The vCloud Hybrid Service has two offerings: The Dedicated Cloud option provides physically isolated and reserved compute resources from all other vCloud Hybrid Service tenants, as well as a private cloud instance. The Virtual Private Cloud option has a multitenant compute resource mode. Both services have logically isolated networking and storage that ensures secure resource separation. Customers have complete control over the file systems and databases they deploy within the service. Access is technologically enforced and employees are only authorized the level of access to information assets that is required to meet an approved business need or perform prescribed job responsibilities. • Administrative access is limited to only those users that explicitly require privileged access. Customers do not have direct access to the SaaS environment; rather, customers administer the solution via the Web console.
FireEye	Each of the FireEye offerings include strong access controls including role-based access. Only properly authorized individuals on a need to know basis are granted access to data.
VirtueStream	Virtustream does not have access to customer hosted data. Customers control access to their application or system which sits upon the IaaS. Customer would need to create the user in their own Active Directory to allow access by named users of Virtustream for specific system.

8.6.8 Offeror must describe its notification process in the event of a security incident, including relating to timing, incident levels. Offeror should take into consideration that Purchasing Entities may have different notification requirements based on applicable laws and the categorization type of the data being processed or stored.

CA	APM	CA Technologies documents a plan and associated procedures in case of an information security incident. The incident response plan clearly articulates the responsibilities of personnel and identifies relevant parties for notification. All security incidents will be investigated and triaged to understand where the vulnerability exists. Software vulnerabilities will be investigated by CA engineering teams; other vulnerabilities will be addressed by the SaaS Ops team in conjunction with AWS. Affected customers will be notified and given a remediation plan
	MAA	Clients are notified via email of any security incident that resulted in a data breach for that client promptly and no later than 5 days. A root cause analysis is then sent within 30 days. Meeting can be setup upon request.
	CA Agile	We have a defined Incident Handling Guide which outlines the process and responsibilities during breach investigation. Clients are notified via email of any security incident that resulted in a data breach for that client promoptly and no later than 5 days. A root cause analysis is then sent within 30 days. Meeting can be seutp upon request.
	ASM	Clients are notified via email of any security incident that resulted in a data breach for that client promptly and no later than 5 days. A root cause analysis is then sent within 30 days. Meeting can be setup upon request.
Google	Google's focus on security and protection of data is among our primary design criteria. Google data center physical security features a layered security model, including safeguards like custom-	

	designed electronic access cards, alarms, vehicle access barriers, perimeter fencing, metal detectors, and biometrics, and the data center floor features laser beam intrusion detection. Our data centers are monitored 24/7 by high-resolution interior and exterior cameras that can detect and track intruders. Access logs, activity records, and camera footage are available in case an incident occurs. Data centers are also routinely patrolled by experienced security guards who have undergone rigorous background checks and training. As you get closer to the data center floor, security measures also increase. Access to the data center floor is only possible via a security corridor which implements multifactor access control using security badges and biometrics. Only approved employees with specific roles may enter. Less than one percent of Googlers will ever step foot in one of our data centers. Google operates a global, multi-tenant environment running the world's second largest IP data network providing customers with a low latency, high performing platform that runs 24x7. Hard Disks are assets that are tracked throughout its lifecycle at Google from arrival to final destruction. These disks are component parts that Google uses to build its own servers from other component parts including motherboards and a harden, highly customized version of Linux. Google uses a proprietary storage and processing mechanism that isolates processing of data in chrooted jails within a physical server. Access permissions restrict the ability for processes to interact between jails. In addition, tenant data is striped in chunks across many different drives with each chunk having its own access control list. This helps ensure that data is logically isolated between customers in storage and during processing. In addition to the inherent processing and storage mechanisms described above, Google's security controls including least privilege rights, logging and auditing have been implemented consistent with FedRAMP requirements
AODocs	Altirnao can use multiple notification channels to communicate incident updates to its customers: the AODocs status page (https://status.aodocs.com) provide status updates on all the AODocs services the AODocs customer mailing list, which can be used to send emails to the technical contacts of all AODocs customers the AODocs support platform, i.e. ZenDesk, which can be used to communicate with specific customers who have opened tickets.
Salesforce	Incident Response If negotiated into a final contract, Salesforce can promptly notify the Customer in the event Salesforce becomes aware of an actual or reasonably suspected unauthorized disclosure of Customer Data. Notification may include phone contact by Salesforce support, email to customer's administrator and Security Contact (if submitted by customer), and public posting on trust.salesforce.com. Salesforce maintains an Incident Response Plan and has an established Security Incident Response Process. During a security incident, the process guides Salesforce personnel in management, communication, and resolution activities. Government customers can report security incidents related to their Salesforce products and offerings via security_gov@salesforce.com. Salesforce will respond in accordance with the incident response process described above. Our incident response plan/process was created in accordance with FedRAMP moderate control requirements which include incident response requirements derived from NIST SP 800-53, NIST SP 800-61, and the FedRAMP Incident Communications Procedure.
ServiceNow	Unless notification is delayed by the actions or demands of a law enforcement agency, ServiceNow shall report to Customer the unauthorized acquisition, access, use, disclosure or destruction of Customer Data (a "Breach") promptly following determination by ServiceNow that a Breach occurred. The initial report shall be made to Customer security contact(s) designated in

	ServiceNow's customer support portal. ServiceNow shall take reasonable measures to promptly mitigate the cause of the Breach and shall take reasonable corrective measures to prevent future Breaches. As information is collected or otherwise becomes available to ServiceNow and unless prohibited by law, ServiceNow shall provide information regarding the nature and consequences of the Breach that are reasonably requested to allow Customer to notify affected individuals, government agencies and/or credit bureaus. Customer is solely responsible for determining whether to notify impacted Data Subjects and for providing such notice, and for determining if regulatory bodies or enforcement commissions applicable to Customer or Customer Data need to be notified of a Breach. See the "Data Security Guide" contained within the "Subscription Service Guide" included with this response for additional information.	
QTS	Security Incident handling capability and process is outlined in the following Incident Response related procedures and plans: •FED_PLN_01_Incident_Response_Plan (v1.2 – 4/09/14) •IT_PRO_29_QTS-FC_Incident_Response_Procedure (v1.0 – 1/17/14) •IT_PRO_18_ISSO_IRT_Incident_Response_Guidelines_Procedure (v1.2 – 12/11/13) •OPS_PRO_77_OSC_New_Incident_Creation_Procedure (v1.0 -1/23/14) •OPS_PRO_62_Best_Practices_for_Incident_Handling_Procedure (v1.0 – 12/10/13) •OPS_PRO_72_BPG_OSC_Working_and_Resolving_Incidents_Procedure (v1.0 – 1/22/14) •OPS_PRO_84_BPG_OSC_Major_Incident_Management_Procedure (v1.0 – 1/27/14) As outlined in QTS's IT_PRO_29_QTS-FC_Incident_Response_Procedure (v1.0 -1/17/14) and FED_PLN_01_Incident_Response_Plan (v1.2 – 4/09/14): •Preparation activities, to include: -Ensuring the security of systems, networks, and applications through periodic risk assessments of systems and applications to prevent incidents. -Increasing user awareness of policies and procedures regarding appropriate use of networks, systems, and applications. -Sharing applicable lessons learned from previous incidents (particularly those involving malicious code and violations of acceptable use policies) with users so they can see how their actions could affect the organization. -Training Federal Cloud System Administrators to maintain their networks, systems, and applications in accordance with the organization's security standards. •Detecting activities, to include: -As referenced in QTS's IT_PRO_29_QTS-FC_Incident_Response_Procedure (v1.0 -1/17/14), review and analysis of continuous monitoring tools and related log file(s). -3rd Party monitoring services (Alert Logic): help detect and alert on changes in certain resources (e.g., Web pages) or publicly accessible services, such as Web, Domain Name System (DNS) and FTP servers. -File Integrity Checking Software: help detect any changes to important files caused by incident -IDS are set up for scanning and detection. Detection is achieved either by log analysis, packet capture review or image acquisition and analysis. •Analysis Activities, to include: -QTS IR Team is activated and incident identification is performed -Continued and targeted review and analysis of continuous monitoring tools, related log file, and corresponding applications would be performed. -If an Incident Response Team is required then at least one member of IT Security along with one or more members of QTS's IT Operations organization responsible for the affected system, as well as any necessary representatives from Network	
SAP	Ariba	We can provide a general overview but our full documentation is confidential. All of our security processes and procedures are audited by a third party every six months for ISAE 3402 assurance. We also hold PCI DSS certification. The

		intent of the following is to describe in a broad manner the actions we take in regard to security incidents, their management, tracking and communications in regard to internal policies and procedures. We have an established security incident plan based on internally-developed policies and procedures where documented results of all security incidents occurring during the six month audit period are reviewed and evaluated against the Trust Services Principles of ISAE 3402 and the PCI DSS standards as appropriate. Upon notification of a security incident, a documentation trail is begun by the InfoSec department and an internal ticket is created as the record of reference. The lead security manger calls a meeting including all personnel required to contain and reduce risk and impact appropriate to the nature of the incident. Tasks are assigned with milestones to be met to validate and determine extent of the incident. Communication is made to the Privacy & Security Board to alert principal membership and foster internal cooperation and awareness. An appropriate communication channel to affected customer(s) is determined based on how we were notified of the incident, i.e. from a customer, from an internal report or from a third party report. Communication is made to affected customer(s) to include the nature of the incident, actions taken to contain the incident and potential effects of actions if any, in regard to sustained business process and availability of the system. Any workarounds or hot fixes necessary in the solutions are communicated and scheduled reporting to the customer(s) is established with an identified single point of contact within our company. Based on the nature of the incident, if required, legal counsel present at initial risk & impact meeting, will assist in communicating with law enforcement contacts. The customer is kept informed of the milestones met and at scheduled intervals until the incident is fully contained and no further risk and impact perceived. All incidents are required to be internally managed by InfoSec to include tracking and review on a weekly basis and evaluation of the actions taken in regard to our security concept. All incident reports are presented to and reviewed by the Privacy & Security Board and are formally closed with discussion and evaluation to determine what actions can be taken to prevent similar incidents. Depending on the nature of the incident and impact to customer(s), security incidents are not formally closed by the board until all affected customers are made aware of the incident and appropriate measures to remediate the initial threat are formally communicated.
	Fieldglass	Fieldglass' security team is responsible for managing security incidents and all communication is conducted via the respective account managers to ensure timeliness. The process is defined within the Incident Response Management Standard. Customers are notified of an incident within 48 hours.
	Hanna	SAP will notify via defined communication channels within 36 hours of a confirmed data security breaches to the affected customers. The report will detail the following information: • Details relating to the security incident that has occurred, known at the time of notification. • IT infrastructure and/or application affected by the security incident. • Overview of the performed mitigation actions to restore the security, documented within the incident report form. • All further applicable requirements by country regulations "on obligation to notify" will be met.

	Hybris	Upon a breach that directly affects a customer's environment, hybris would notify the customer as quickly as reasonably possible. Furthermore, hybris follows its information security incident management policy as well as Visa's standard process for responding to a breach. The policy includes procedures such as disclosure of sensitive information, disclosure of system vulnerability, public release of vulnerability information, system vulnerability exploitation as well as incident reporting, contacting of law enforcement and forensic investigation.
	SuccessFactors	We have a comprehensive and approved Incident Management Policy and process. Upon the occurrence of a security incident, initial communication is distributed to the appropriate individuals and an escalation process is followed. Upon becoming aware of the incident, measures are promptly taken by the team to resolve the situation. All affected customers should be informed within at most 36 hours of confirming a potential breach in the privacy of their data. Following incident resolution, follow-up is required to ensure that the incident has been resolved effectively and that the threat is no longer present. We are aligned with ISO 27k standards for event and incident management and have formal incident management policies and processes in place. These policies and procedures are tested in the ISO 27k and SOC 2 audits.
VMware	VMware IaaS Services If VMware determines that there has been unauthorized access to, or use or disclosure of, Your Content, or other incident VMware will use commercially reasonable efforts to notify You, taking into account any applicable law, regulation, or governmental request. VMware will provide security incident response (e.g., detection, severity/threat classification, forensics, and resolution) pertaining to management infrastructure over which VMware has direct, administrative, and/or physical access and control, such as the vCloud Hybrid Service servers, storage, applications, and network devices. Documented escalation procedures and a ticketing system are in place to guide employees in identifying, reporting, and responding to system availability issues and related security incidents. This includes an incident response policy to determine severity of an incident and a breach notification process. All alerting and monitoring at the guest OS\VM level is the responsibility of the customer. In the event of a data breach customers will be notified by VMware vCloud Air Global Support Services via their preferred contact means. VMware will provide security incident response (e.g., detection, severity/threat classification, forensics, and resolution) pertaining to management infrastructure over which VMware has direct, administrative, and/or physical access and control, such as the vCloud Air service servers, storage, applications, and network devices. Notification timeframes are agreed upon between VMware and the customer in standard agreements and contracts. Incidents are handled on a case-by-case basis, but typically occur between 24-48 hours after a breach has been confirmed. VMware will provide security incident response (e.g., detection, severity/threat classification, forensics, and resolution) pertaining to management infrastructure over which VMware has direct, administrative, and/or physical access and control, such as the vCloud Air service servers, storage, applications, and network devices.	
FireEye	FireEye has a developed documented process for reporting client notification for regulatory, legal and contractual issues once a breach has been confirmed.	
VirtueStream	Virtustream shall contact customers in accordance with Service Level Agreements (SLA) and contractual obligations. There are two primary Incident types; Security Incidents, where there is a possible breach in systems or data integrity, and Services, where there is in impacted or affected service. Although there is some overlap, generally any security-related incident should be classified as a Security	

	Incident and the response must be managed using the 'Virtustream Information Security Procedure – Security Incident Response Plan'. The purpose of this security incident response plan is to provide general guidance to Virtustream staff- both technical and managerial – to enable quick and efficient recovery from security incidents; respond in a systematic manner to incidents and carry out all necessary steps to correctly handle an incident; prevent or minimize disruption of critical computing services; and minimize loss or theft of sensitive or mission critical information including sensitive credit card data. The plan is also a guide to sharing information with other stakeholder organizations who might be impacted by such security incidents such as the credit card associations and law enforcement. The Security Incident Response Plan (SIRP) provides guidance to prepare for, respond to, and recover from potential incidents. Policy statements surrounding the IR-Plan are provided to ensure continued upkeep and standardized use. The SIRP guidance at the procedural level defines the roles, responsibilities, communication methods and flows, contact information, types of potential incidents, and immediate actions that are to be taken upon an incident's identification, and elaborates with subsequent recovery steps. Virtustream's Incident Response Policy requires the implementation and testing of a generalized plan that adheres to the International Standards Organization 27002 guidance for incident management and response, but meets specific requirements for compliance such as PCI-DSS. The Plan covers the corporate environment associated with Virtustream's IT assets, the local IT resources and the IT resources at Virtustream's Data Center. It consists of a series of guidelines (Incident Response Guidelines or "IRG") that should generally be followed as appropriate for the circumstances as when a security incident occurs or as part of the ongoing maintenance of this plan. As the incident progresses and has more impact (i.e. severity level increases), the escalation process will be used to engage appropriate resources. Incidents should be handled at the lowest escalation level that is capable of responding to the incident with as few resources as possible in order to reduce the total impact, and to keep tight control. The Table below defines the escalation levels with the associated team involvement.

8.6.9 Offeror must describe and identify whether or not it has any security controls, both physical and virtual Zones of Control Architectures (ZOCA), used to isolate hosted servers.

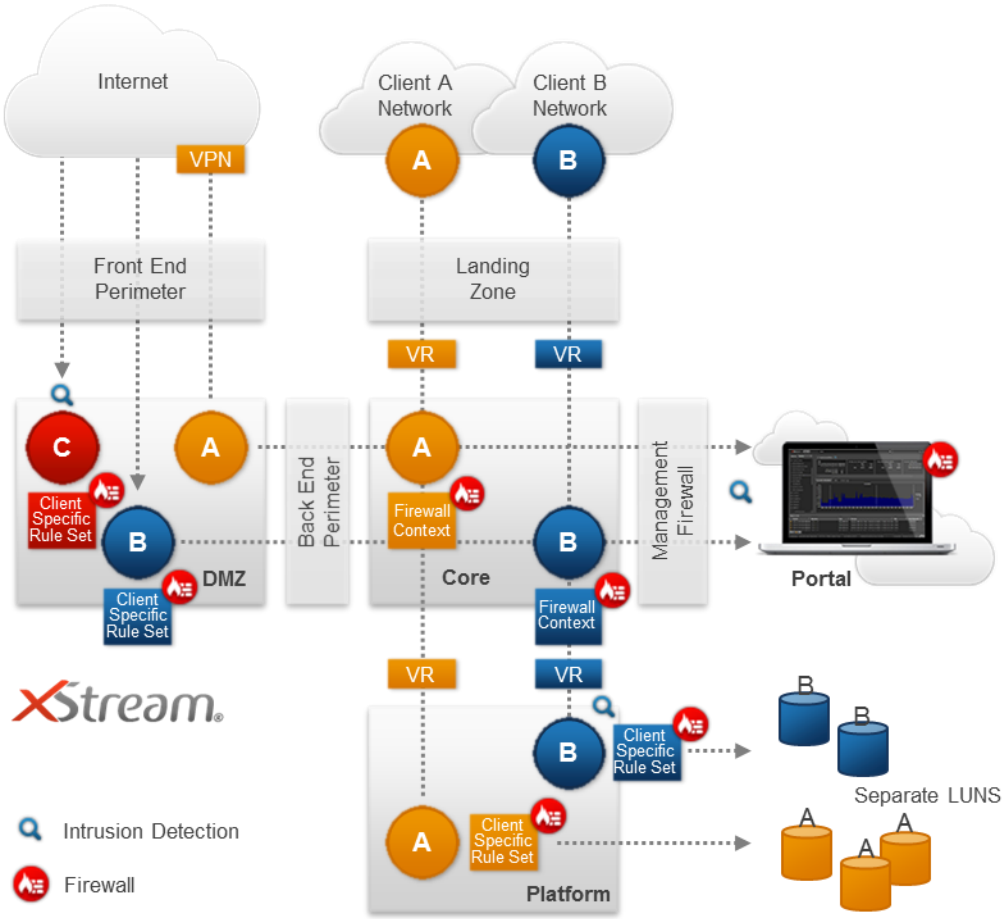
CA	APM	AWS EC2 datacenters annually undergo SOC 3 audits.
	MAA	Physical access mechanisms (e.g., access cards, biometric devices, mantraps and portals) have been implemented and are administered by local operations staff to help ensure that only authorized individuals have the ability to access the data centers. Portals and mantraps have been installed as anti-tailgating measures in most of data center lobbies. Entry to and exit from the data centers is through either a portal or mantrap where present. In data centers without portals or mantraps, the security officer monitors the entrance to prevent tailgating. Where present, the portal/mantrap bypass doors are only used in the event an individual is unable to use the portal or mantrap in case of emergency. Examples include handicap, phobia, or other restrictions on a case-by-case basis. Tours and emergency data center security operations crews will be permitted to use the portal bypass door, when necessary.
	CA Agile	Physical access mechanisms (e.g., access cards, biometric devices, mantraps and portals) have been implemented and are administered by local operations staff to help ensure that only authorized individuals have the ability to access the data centers. Portals and mantraps have been installed as anti-tailgating measures in most of data center lobbies. Entry to and exit from the data centers is through either a portal or mantrap where present. In data centers without portals or mantraps, the security

		officer monitors the entrance to prevent tailgating. Where present, the portal/mantrap bypass doors are only used in the event an individual is unable to use the portal or mantrap in case of emergency. Examples include handicap, phobia, or other restrictions on a case-by-case basis. Tours and emergency data center security operations crews will be permitted to use the portal bypass door, when necessary.
	ASM	Physical access mechanisms (e.g., access cards, biometric devices, mantraps and portals) have been implemented and are administered by local operations staff to help ensure that only authorized individuals have the ability to access the data centers. Portals and mantraps have been installed as anti-tailgating measures in most of data center lobbies. Entry to and exit from the data centers is through either a portal or mantrap where present. In data centers without portals or mantraps, the security officer monitors the entrance to prevent tailgating. Where present, the portal/mantrap bypass doors are only used in the event an individual is unable to use the portal or mantrap in case of emergency. Examples include handicap, phobia, or other restrictions on a case-by-case basis. Tours and emergency data center security operations crews will be permitted to use the portal bypass door, when necessary.
AODocs	N/A because all our data is hosted on the Google Cloud Platform infrastructure.	
Virtru	We require 2 Factor and Private Keys to authenticate and Virtrual Private Clouds for purposes of Inter-machine communication	
Salesforce	A customer's instance (org) of Salesforce is an aggregate of the raw data. The data model is very complicated, normalized, and the rows are identified by base62 encoded keys (primary and foreign). Re-establishing data ownership and a business context for the data would be very difficult to do at the database level. In order to reassemble any given customer's application (org), someone would need access to our source code in order to reassemble the raw data in a manner that could be interpreted and understood, and would need the entire set of tapes or disks/arrays supporting a given Instance, as the data for any one customer is spread across several tapes/disks. Data center engineers with physical access to the servers do not have logical access to the production environment and administrators with logical access to the systems do not have physical access to the data centers.	
ServiceNow	ServiceNow's architecture is built on a ServiceNow fully owned operated private cloud. This private cloud hosts the ServiceNow platform and applications that are offered to its customers under a subscription service model. The ServiceNow private cloud operates out of colocation data centers that provide robust physical and environmental controls, with ServiceNow staff exclusively providing the logical management. Access to the private cloud where customer data is hosted is only granted to ServiceNow staff based on their roles and job requirements. ServiceNow does not outsource any function that would give a third party access to customer data. ServiceNow's private cloud is a highly standardized environment from the identically configured cages in the data centers through to the consistent logical infrastructure. This private cloud is home to just ServiceNow, limiting the private cloud's footprint to only those technologies required to support this service. This allows for highly restricted networking rule sets regarding ingress and egress requirements and facilitates the ability for hardened systems, only allowing for the small number of necessary services, protocols and ports to be enabled. A ServiceNow instance represents an isolated logical environment consisting of application nodes in the web application tier and a dedicated database. Each customer will receive at least two instances, a production High Availability (HA) instance and a sub-production instance without HA. Each instance is accessed via a unique Domain name in the form of 'customername.service-now.com' (for a production instance) and 'customername-dev.service-now.com' as a sub-production example.	

	There is no comingling of any customer data between instances and there is no single shared multi-tenant databases, with data from multiple customers stored therein.	
QTS	QTS cloud employs security controls as needed to protect the confidentiality and integrity of the information being transmitted by utilizing Cisco AnyConnect VPN Client with SSL (TLS and DTLS) and IPSec (Internet Key Exchange Version 2 [IKEv2]). DTLS provides an optimized connection for latency-sensitive traffic, such as VoIP traffic or TCPbased application access, TLS (HTTP over TLS/SSL) ensures availability of network connectivity through locked down environments, including those using web proxy servers. IPSec/IKEv2 provides an optimized connection for latency-sensitive traffic when security policies require use of IPSec and complies with applicable federal laws, executive orders, directives, policies, regulations, standards, and guidance. The QTS Federal Cloud Infrastructure (QTS cloud) is divided into two separate, isolated firewalled environments, each having its own security boundaries, which are physically and logically separated. These are the QTS cloud Hypervisor Management Layer and the QTS cloud Service Delivery Layer. QTS cloud's Hypervisor Management Layer management is made available through dynamic FIPS 140-2 validated L2TP/IPSEC or SSL 3. 0/TLS 1. 0 encrypted VPN tunnels, which are authenticated against the RSA SecurID multi-factor authentication security appliances. Once fully authenticated, only a limited RDP session to the physical bastion host (which is also protected by the RSA SecurID multi-factor authentication security appliances) via jump domains is allowed, which prevents the presentation of information systems management related functionality at an interface for general users. QTS cloud's Service Delivery Layer management is also made available through FIPS 140-2 validated L2TP/IPSEC or SSL 3.0/TLS 1. 0 encrypted VPN tunnels, which are authenticated against the RSA SecurID multi-factor authentication security appliances. Connection to the QTS cloud Service Delivery Layer is only available through dedicated site-to-site 140-2 validated L2TP/IPSEC or SSL 3. 0/TLS 1. 0 encrypted VPN tunnels or Trusted Internet Connection (TIC) monitored dedicated datelines to federal customer datacenters, which prevents the presentation of information systems management related functionality at an interface for general users. QTS cloud's Hypervisor Management Layer management is made available through dynamic FIPS 140-2 validated L2TP/IPSEC or SSL 3. 0/TLS 1. 0 encrypted VPN tunnels, which are authenticated against the RSA SecurID multi-factor authentication security appliances.	
SAP	Ariba	The Cisco Secure ASA5555 Firewall is a dedicated firewall appliance that delivers strong security and performance and creates almost no network performance impact. The product enforces secure access between an internal network and Internet, extranet, or intranet links. Ariba uses Cisco Secure ASA5555 Firewall hardware and Cisco Router access lists to control the traffic to and from the Internet, between Ariba Corporate and the Ariba system, and between servers in Ariba. The firewall servers are configured for Fail-Over/Hot Standby Setup. Additionally, Ariba uses internally developed Ariba SafeGuard software to protect customer data from unauthorized Ariba Corporate users, allowing only Ariba Operations personnel access for limited periods of time. Specifically, firewall servers are used in each level of data communication within Ariba: Between the Internet and web servers Between the web servers and the application servers Between the application servers and the database servers

		These ASA5555 Firewall servers allow Ariba Operations to rigorously protect Ariba from unauthorized access, providing full firewall security protection. The Equinix Data Center utilizes an array of security equipment, techniques, and procedures to control, monitor, and record access to the facility, including customer cage areas. All areas of the center are monitored and recorded using CCTV, and all access points are controlled. The Data Center is staffed with 24-hour security officers. Visitors are screened upon entry to verify identity, and escorted to appropriate locations. Access history is recorded for audit purposes.
	Fieldglass	Please see the Fieldglass Security and Hosting Overview provided in the Supplemental Information section of this response.
	Hanna	The fundamental security architecture of the SAP Cloud infrastructure is the principal of a private cloud. Customers receive an isolated, logical grouping of several virtual machines and physical systems in dedicated customer private networks. Customer private networks are segregated from each other using virtual local area networks (VLAN) technology. Customer systems are deployed in the respective customer private network. Though customers are only able to view or access systems within their assigned customer private network. Design of customer private networks has to be defined in a workshop between SAP and the customer. Multiple customer private networks might be required to separate different tier levels or to implement customer data flow restrictions. SAP HANA Enterprise Cloud administrative tasks will be done using management networks. Administrative access to the management networks from the SAP internal networks is only possible using dedicated jump hosts with strong authentication. Security of the SAP internal network including SAP end user equipment is ensured using solutions like network admission control, Intrusion Prevention Systems, network filtering, strong authentication for remote access, internet content filtering, anti-virus scanner.
	SuccessFactors	We serve our customers and end users from secure data centers around the world. Physical security features at these facilities include a 24x7x365 manned security station and biometric and man-trap access controls. The systems at these facilities are protected by firewalls and encryption technology. Operational redundancy features include redundant power, on-site backup generators, and environmental controls and monitoring. We employ a wide range of security features, including two factor authentication, data encryption, encoded session identifications and passwords. Our hosting providers conduct regular security audits of our infrastructure. We also employ outside vendors for 24x7x365 managed network security and monitoring. Every page we serve is delivered encrypted to the end user via a Transport Layer Security or TLS. We also use encryption technology in our storage systems. We continuously monitor the performance of our cloud offerings using a variety of automated tools. The architecture is designed with built-in redundancy for key components. We load balance at each tier in the network infrastructure. We also designed our application server clusters so that

		servers can fail without interrupting the user experience, and our database servers are clustered for failover. We regularly back up customer data. We have implemented a multi-tiered architecture leveraging a strategy of "defense in depth" with 6 tiers of virtual networks (VLAN) for separation at each delivery layer. Network traffic is logged and monitored with live monitoring through an Intrusion Detection System (NIDS), and controlled through a series of switches and routers whereas data must pass through each tier in order to get to the next tier. In addition to Physical (site) security, the logical network stratification includes the following: Tier 1 (External VLAN/firewall) - The first tier consists of the external network and perimeter firewalls. These provide an initial layer of defense and protect the following layers from unauthorized access. Note that port 443 (HTTPS for web traffic) is the only port open. Tier 2 (Internal VLAN/firewall) - A de-militarized zone (DMZ) exists with load balancers. The DMZ provides a second line of defense while the load balancers are the first layer of scalability for the service delivery. The DMZ functions as a ""neutral zone"" between the network and the outside public network. Tier 3 (Web VLAN) - The Web tier presents the User Interface to the application, and separates the application, reporting and utility servers from the other tiers. Tier 4 (Application VLAN) - The Application tier contains the business logic and transaction servers, and is managed through clustered, high availability (HA) servers. Pre-configured as "Pods", additional servers can be added as needed to provide scalability and performance. Tier 5 (Database VLAN) - The database tier is protected by an additional set of perimeter firewalls. The database processing is executed on database servers leveraging a multi-tenant, fully qualified database schema. Tier 6 (Storage VLAN) - Data is persisted to disks with include a Storage Area Network (SAN). Prior to store, data is encrypted by way of data appliance with AES-256 bit encryption.
VMware	VMware IaaS Services At the tenant level firewall services are provided via the vCloud Networking & Security Edge Gateways for customers to configure and maintain. Firewall policies can be used to restrict and manage public/Internet-based traffic and create DMZ zones for multi-tier applications. Firewall policies can also be used to configure access policies between internal IP networks and VxLAN segments. Stateful inspection firewalling can be applied on the external interface of the vCNS Edge Gateway. VMware architects, provisions, monitors and manages the vCloud Hybrid Service infrastructure and surrounding components. As described in the AT 101 (ISO 27001) report, access points such as delivery and loading areas and other points where unauthorized persons may enter the premises are controlled and, if possible, isolated from information processing facilities to avoid unauthorized access. The details of this control are not disclosed publicly. VMware AirWatch We implement multiple security measures to protect hosted servers, including physical and logical controls. Due to FOIA requirements and the competitive EMM marketplace, we cannot provide specific architecture details at this time.	



FireEye	High-level architecture diagrams following industry best practices utilizing both virtual and physical controls are available and contained in the SOC 2 report.
VirtueStream	Virtustream utilized a virtual local area network (VLAN) and virtual route forwarding (VRF) to logically segregate all customers in the IaaS environment. Every customer chooses their own IP Address range, as there is no ability to overlap IP Addresses between customers. In addition, every customer is logically separated with Firewall Context with their own rule, where by default everything is denied except specific rule.

8.6.10 Provide Security Technical Reference Architectures that support Infrastructure as a Service (IaaS), Software as a Service (SaaS) & Platform as a Service (PaaS).

CA	APM	Only SaaS is provided, network diagram can be provided upon signing NDA
	MAA	Only SaaS is provided, network diagram can be provided upon signing NDA
	CA Agile	These can be provided when a NDA is in place.
	ASM	Only SaaS is provided, network diagram can be provided upon signing NDA
Salesforce	Salesforce offers market leading PaaS and market leading SaaS solutions. Salesforce does not provide IaaS as a direct service offering to our customers, it is an underlying part of our PaaS and SaaS offerings. The Salesforce Platform is built for cloud computing, with multitenancy inherent in its design. To meet the high demands of its large user population, Force.com's foundation is a metadata-driven software architecture that enables multi-tenant applications. Force.com combines several different persistence technologies, including a custom-designed relational database schema, which are innately designed for clouds and multitenancy—no virtualization required. Force.com's core technology uses a runtime engine that materializes all application data from metadata—data about the data itself. In Force.com's well-defined metadata-driven architecture, there is a clear separation of the compiled runtime database engine (kernel), tenant data, and the metadata that describes each application. These distinct boundaries make it possible to independently update the system kernel and tenant-specific applications and schemas, with virtually no risk of one affecting the others. Every logical database object that Force.com exposes is internally managed using metadata. Objects, (tables in traditional relational database parlance), fields, stored procedures, and database triggers are all abstract constructs that exist merely as metadata in Force.com's Universal Data Dictionary (UDD). For example, when you define a new application object or write some procedural code, Force.com does not create an actual table in a database or compile any code. Instead, Force.com simply stores metadata that the system's engine can use to generate the virtual application components at runtime. When you need to modify or customize something about the application schema, like modify an existing field in an object, all that's required is a simple non-blocking update to the corresponding metadata. Because metadata is a key ingredient of Force.com applications, the system's runtime engine must optimize access to metadata; otherwise, frequent metadata access would prevent the service from scaling. With this potential bottleneck in mind, Force.com uses massive and sophisticated metadata caches to maintain the most recently used metadata in memory, avoid performance-sapping disk I/O and code recompilations, and improve application response times.	

	The multitenant architecture and secure logical controls address separation of Customer Data. The Salesforce infrastructure is divided into a modular architecture based on "instances". Each instance is capable of supporting several thousand customers in a secure and efficient manner. Salesforce uses the instance architecture to continue to scale and meet the demands of our customers. There are appropriate controls in place designed to prevent any given customer's Salesforce instance from being compromised. This functionality has been designed and undergoes robust testing through an on-going process by both Salesforce and its customers.	
QTS	The QTS cloud makes use of unique managed service provider architecture layer(s). Information systems, particularly those based on cloud architecture models, are made up of different service layers. The layers of the QTS cloud that are defined in its System Security Plan, and are not leveraged by any other Provisional Authorizations, are: Infrastructure as a Service (IaaS). Note: Please refer to NIST SP 800-145 for information on cloud computing architecture models.	
SAP	Ariba	Ariba recognizes that security is a critical component of effective electronic commerce architecture and takes necessary security measures to protect any information passed between buyers and suppliers. Ariba implements security using a variety of hardware, software, and procedural best practices. Full details about our security mechanisms and procedures are available in Chapter 3 of the Ariba Cloud Technical Infrastructure Whitepaper.
	Hanna	N/A, HANA Enterprise Cloud is a private managed cloud
	SuccessFactors	We understand the critical importance of information protection and recognize the contribution that information security makes to an organization's strategic initiatives and overall risk management. We have implemented security controls and practices designed to protect the confidentiality, integrity, and availability of customer information. We continually work to strengthen and improve those security controls and practices as well. The current best practices associated with information security involve a layered approach, what the industry calls "defense in depth." Regardless of the software delivery model, security cannot be implemented at a single "make or break" point. For a SaaS provider to facilitate data security for sensitive information, it must have a comprehensive, multifaceted security program in place. We take a holistic approach to information security, implementing a multilayered defense at all the touch points in the information flow—both the physical and logical, applied across the database, middleware, application, and network and communication layers—to offer complete data privacy, transparency, and audit controls.
VMware	Compliance Reference Architecture Framework (RAF) that provides a consistent method for VMware, its partners, and customers to assess and evaluate the impact of regulations on virtual and cloud environments. The intent of the RAF is to provide a single framework for VMware, its partners, and organizations to address a variety of compliance requirements across an IT infrastructure. This includes: Product Applicability Guide (PAG), Architecture Design Guide (ADG), and a Validated Reference Architecture (VRA).	
FireEye	High-level architecture diagrams following industry best practices utilizing both virtual and physical controls are available and contained in the SOC 2 Type 2 report.	
VirtueStream	Virtustream Cloud Platform Security (for the Infrastructure-as-a-Service environment) is designed, built, and operated to provide highest level of infrastructure security available. **Proposed State of Utah Security Architecture**	

Figure 1. xStream Enterprise Architecture

State of Utah end users would access the hosted SAP environments via a MPLS connection (Provided by State of Utah). Additionally a VPN connection has been sized at 100Mbps however this can be decreased or increased depending on the exact requirements.

State of Utah end users accessing our enterprise platform would first hit the landing zone in a dedicated virtual local area network (VLAN) and dedicated virtual route forwarding (VRF). The next hop into the enterprise platform is a dedicated firewall (FW) context on a Cisco Firewall services module. After traversing the core, traffic hits another dedicated VRF and drops into the platform network and compute (CPU and Memory essentially a blade server) layer. All traffic is VLAN separated. At each compute host, a hypervisor based firewall and intrusion protection system (IPS) provides a dedicated client rule set to further ensure network security. All traffic transitioning from one zone to another are monitored by Intrusion Detection and Intrusion Prevention systems.

Traffic coming in via the internet hits the front-end perimeter with load balancing modules and multi-context Cisco firewalls. All traffic then passes through intrusion detection system and intrusion protection systems. As in the enterprise compute layer, every host in our demilitarized zone (DMZ) has a hypervisor-based firewall and IPS with dedicated client rule sets. Again, all traffic is VLAN separated as well.

Traffic that needs to traverse from DMZ to the enterprise runs through another dedicated FW context and IDS/IPS.

All of the State of Utah environments and data will be hosted in Virtustream's data centers within the continental United States.

Standard Services used in Virtustream's management environment and in all client environments including the following:

	• All Virtustream employees use Mandatory Strong 2 factor authentication (2FA OTP) Administrative Access to all systems. • Dedicated VLAN network segmentation and dedicated Virtual Route Forwarding (VRF) are used extensively to segregate environments and zones. • Perimeter Firewalls are used to segment internal and external environments as well as segregate security zones. Configuration, monitoring, auditing and logging are included. • Virtual Machine-based Firewall and Intrusion Prevention System (IDS) is installed on every virtual machine in the environment and is protected with Juniper's Security Gateway virtual firewall application and monitored service. Security Services that are standard components for Virtustream's management environment and are Optional Services for client environments including the following: • Managed Two-Factor Authentication ("2FA") is in use for all application systems. • Intel TxT Enabled Servers and Trusted Boot/Bios monitoring with Attestation Server and OS and VM support, including Geolocation and Geofencing according to NIST 7904 guidelines. • Secure operating system (OS) builds based on DoD Secure Technology Implementation Guide (STIG) guidelines are used to build Virtustream's Management and Administration Servers. • Server/File Integrity Monitoring (FIM) is installed in the PCI and VFC clouds. • Patching Regimen: Virtustream patches host servers, network devices, security devices, servers and related services in the Management Network on a specified routine (monthly or quarterly, depending on release schedules), or when there is a CERT or other authorized source of patch that requires immediate attention. Based on urgency and risk of the issue we will schedule the patch as appropriate and use change control. • Scanning regimen: vulnerability scanning is done on a monthly basis with additional 3rd party vulnerability scans done monthly. Additional scans are done when made aware of new vulnerabilities. Issues are classified and addressed according to Risk Classifications and are addressed with ITIL v3 change control processes. • Managed IDS signatures are routinely updated and the logs are monitored. • Anti-Virus is managed on all Management servers in Enterprise, PCI and, VFC clouds. • Logging Service of all servers, network devices, and security devices to a centralized log server system. • Governance Risk Compliance: We use a complete Enterprise Risk Management toolset to manage compliance reporting and continuous monitoring to all of our supported compliance frameworks. Virtustream's facility monitoring systems are complete as per specifications in NIST 800-53r3/4. We use site assessment methodologies and checklists as detailed in NIST 800-42. Our systems and facilities are monitored 24/7 for any exceptions or trends. Our tools, processes and CONUS (Continental USA) personnel monitor network, power, cooling, humidity, water leakage, fire suppression, power systems (utility power, UPS systems and generators) and site access. Virtustream's Physical Access Control Security is designed to protect the confidentiality, integrity, and availability ("CIA") of the cloud platform system and its data with the following security components: • Limited and controlled room access. • Logged and monitored access of all access control events. • Video surveillance and review of all access control events. • Biometric access control required to gain access to the Data Center. • US Data Center staff is limited only to US Citizens.

	• Locked racks and rooms with key log out/in process. • Data destruction policies and procedures. • Asset in/out policy and procedures. Physical access by authorized staff is controlled by badge systems and biometric access systems. All access of any kind is recorded and logged. Access lists are reviewed every 90 days. Employees that do not have a reason to have physical access are removed from our access management systems. Multiple high resolution and IR enhanced CCTV Cameras monitor our datacenters at all egress and ingress points as well as other sensitive areas. Security video footage is stored in a secure area for 90 days. Approved Visitor Access requires VISITOR Badges and bright lanyards that are specifically different from employee badges. Visitors are required to produce and surrender a state or government issued photo ID during the visit, have a pre-approved reason for the visit, and have the escort witness the sign in and out procedure. Visitors are escorted continuously through approved areas of the facility. Visitors are not allowed access to following areas of the data center under any circumstances: • Cloud hosting areas. • Networking and telecommunication areas. • Guard areas. • Power vaults.

8.6.11 Describe security procedures (background checks, foot printing logging, etc.) which are in place regarding Offeror's employees who have access to sensitive data.

FireEye	Background verification for employment candidates is a mandatory component of FireEye's hiring process. All personnel are required to sign a confidentiality and non-disclosure agreement agreeing not to disclose proprietary or confidential information including client information to unauthorized parties. Security awareness training program is in place to maintain the skill level of personnel regarding security and privacy expectations and best practices. All FireEye personnel at all levels are trained and notified of information security and privacy requirements and personnel responsibilities.
VirtueStream	Virtustream employees who are assigned to IaaS must pass a Virtustream background investigation. In addition, Virtustream employees assigned to the IaaS must adhere to any requirement by customers to pass federal, state, or local background investigations if they are to provide managed services to the customer zone which includes access to sensitive data.

8.6.12 Describe the security measures and standards (i.e. NIST) which the Offeror has in place to secure the confidentiality of data at rest and in transit.

CA	At CA Technologies, we comply with a multifaceted security standard that includes requirements for security management, policies, procedures, network architecture, software design and other critical protective measures. We ensure the maintenance of vulnerability management programs, implement strong access control measures, regularly monitor and test networks and adhere to the highest industry compliance and security policies. CA offers a variety of SaaS solutions, details for each offering has been provided in Exhibit 1 and 2 of this proposal.
Google	All connections from customer end point devices to Google's Front End Servers are encrypted with enforced HTTPS sessions using Forward Secrecy. Google websites and properties use robust public key technologies: 2048-bit RSA or P-256 ECDSA SSL certificates issued by a trusted authority (currently the Google Internet Authority G2).

	All data in transit between Google's Data Centers traverses across Google's private fiber network using a customized, proprietary encryption technology. Google hard drives leverage technologies like FDE (full disk encryption) and drive locking, to protect data at rest. These methods of encryption are fully managed by Google and Google's Key Management Servers based on 128-bit or stronger Advanced Encryption Standard (AES). Encryption Keys and Ciphers Supported by Google Protocols TLS 1.2 TLS 1.1 TLS 1.0 SSL 3.04 QUIC Cipher suites ECDHE_RSA with AES ECDHE_RSA with 3DES ECDHE_ECDSA RSA with AES RSA with 3DES Signing keys RSA 2048 ECDSA P-256 Hash functions SHA384 SHA256 SHA1 MD5
Salesforce	Government Cloud Encryption Capabilities: As part of the Salesforce Government Cloud, Salesforce is capable of responding to FIPS 140-2 cryptographic implementations for data being transferred between the State's web browser and Salesforce. Data that resides within Salesforce's protected boundary does not use FIPS 140-2 validated encryption as compensating/mitigating controls are in place to protect data. Additional information is provided below. Data In Motion: Salesforce employs cryptographic mechanisms to protect information during transmission. All transmissions between the user and Salesforce are encrypted by default with a 2048- bit Public Key. Our service uses International/Global Step Up certificates. We support one- way TLS, in which customers create secure connections before sharing private data. Secure routing and traffic flow policies ensure that customer traffic is encrypted entering Salesforce until the load balancer decrypts the traffic. The load balancers decrypting the traffic are FIPS 140-2 compliant and are located inside of the Salesforce Government Cloud isolation boundary. Data At Rest: NIST SP 800-53 Rev. 4 states in SC-28, "Information at rest refers to the state of information when it is located on a secondary storage device (e.g., disk drive, tape drive) within an organizational information system." SC-28 also states, "Organizations may choose to employ different

	mechanisms to achieve confidentiality and integrity protections, as appropriate." All secondary storage media (hard drives, disk drives, and tapes) containing customer data are maintained within Salesforce's secure production data centers until the media has been sanitized and destroyed. Salesforce relies on physical access controls as a compensating control to protect the data. For primary data storage, Salesforce provides customers with a built-in capability to apply field-level encryption, using 128-bit keys with AES encryption, for a selection of custom fields included in the Force.com Platform and Salesforce Services. Field-level encryption ensures the data associated with designated fields is encrypted in storage.	
SAP	Ariba	Sensitive data elements, including PCI Primary Account Numbers and system account parameters for internal application communications, are stored in Ariba databases encrypted by the AES (Advanced Encryption Standard) and Triple DES (Data Encryption Standard) encryption algorithms with a minimum key length of 128 bits. Encryption technology is also applied for the client connection to the Web site and to the hosted application passwords in storage. Customer user passwords are one way hashed using SHA256 and salted with random data. Limited Ariba Operations personnel have data query access and monitoring rights for the Ariba Hosting program.
	Fieldglass	
	Hanna	SAP provides for enterprise-grade and industry-standard security. SAP HANA Enterprise Cloud datacenters are enterprise-class security with enterprise-class protection including data encryption, network encryption, firewalling, network isolation, and intrusion detection. HANA data is protected in multiple different ways. SAP HANA Enterprise Cloud is a managed cloud service that employs either a VPN or MPLS connection for transit. By default VPN is encrypted and MPLS can be encrypted. The customer procures the method of connection. At installation, HANA data can be encrypted using a feature called Data Volume Encryption. This encryption protects data in the persistence layer. Storage volume access is restricted to the customer account that created the volume, thus denying all other customer accounts the permission to view or access the volume that includes data isolation, masking, zoning and Logical Unit (LUN) binding. Strict user and access management, authorization management according to the need-to-know principle for administrative accounts, and security logging and security monitoring for critical activities or access, also protect data stored in HANA.
	Hybris	The Hybris platform uses SSL (https) for both the web application tier (browsers and WebService APIs) as well as communicating with back office systems. Data at rest is something that has to be taken into consideration in the application requirements by the partner/customer or PS teams. If encryption is required the application teams need to work on implementing the methods to encrypt and secure the data, for example encrypting data fields in the database.
	SuccessFactors	Each customer's data is maintained in a separate database schema eliminating data segmentation breaches. Each schema has separate authentication credentials and assigned resource profile to restrict access rights and resource consumption. Encryption for data at rest uses the AES256 cipher. All application access is encrypted-in-transit over HTTPS with 128-bit TLS encryption.

FireEye	At rest: Data are collected using automated batch and real-time processes and by manual personnel-driven actions via an Analyst facing Portal. Any information that is collected may be stored temporarily within appliances attached to our customers' networks and may subsequently be transmitted back to one or more FireEye datacenters. Data transmitted from a customer's network to a datacenter travels over a strong encryption Virtual Private Network ("VPN") established by the appliances. At transit: FireEye's network sensors are configured to collect full packet capture of customer network streams, including those originating from or destined to potentially malicious IP addresses, matching signature-based network indicators of compromise, results of domain name lookups, and full e-mail messages including headers, content and attachments. This information is primarily stored on-site on the appliances and only meta data matching FireEye / Mandiant indicators of compromise are sent to FaaS.
VirtueStream	Virtustream's use of Intel® Trusted Execution Technology (Intel® TXT), a hardware-root of trust security feature, and Intel® AES-NI encryption acceleration helps secure and protect virtualized environments against malware and provides more of the critical infrastructure and data protection assurances needed to enable trusted multi-tenancy in the cloud. Virtustream offers solution for data-at-rest and data-in-transit encryption solution for our customers as optional service, as most of our customer environment is only accessible via private network and only to the internal users of the customer. Solutions available to our customer as follows. 1. IPSEC VPN Tunnel for data-in-transit and 2. VM level encryption for files and databases 3. Encrypted Backup (all backups are encrypted by default) The technologies of encryption available throughout the entire data lifecycle and all are FIPS 140-2 compliant. a) DB and File System Encryption b) Encrypts file system and volume data transparently to: i) Applications ii) Databases iii) Storage Infrastructure c) Integrated Key Management d) High Efficiency Encryption i) Centralized Key Management ii) Policy Management iii) Detailed Auditing iv) Highly Available v) FIPS 140-2 Certified Hardware Appliance vi) Very Low Encryption Penalty due to Intel AES-NI enabled chip sets used e) Encryption of Virtual Machine, OS and App i) Integration of SafeNET Protect-V ii) Logging of all image access f) Encryption in Archive g) Implements Encryption, Access Control, Auditing on Host (LUW) h) Kernel Level Driver – Win i) File System – Unix/Linux j) Support for file systems and raw partitions k) Highly efficient block encryption

8.6.13 Describe policies and procedures regarding notification to both the State and the Cardholders of a data breach, as defined in this RFP, and the mitigation of such a breach.

CA	CA Technologies abides to contractual requirements for notification, in addition to working with legal to ensure compliance with regulatory requirements. There may be cases where incident analysis completion is a requirement for confirming the breach, and / or its impact and data leakage boundary. Prior to completion of this activity, CA may not have the needed conclusions for customer communication. Once subscriber data has been identified as part of the investigation, said subscribers will be notified as soon as possible and not longer than 5 days. A report of the incident will be available and distributed to clients within 30 days. Please note that none of the offerings proposed as considered payment products and are not intended for use of storage of cardholder data.	
Google	Google will take and implement appropriate technical and organizational measures to protect Customer Data against accidental or unlawful destruction or accidental loss or alteration or unauthorized disclosure or access or other unauthorized processing. If Google becomes aware of a Data Incident, Google will promptly notify Customer as permitted by law of the Data Incident, and take reasonable steps to minimize harm and secure Customer Data. Notification(s) of any Data Incident(s) will be delivered to the Notification Email Address provided by the Purchasing Entity in connection with the Agreement or, at Google's discretion, by direct communication (e.g., by phone call or an in-person meeting).	
Salesforce	Salesforce will promptly notify the State (within 48 hours, reflected in a negotiated agreement between the parties) in the event Salesforce becomes aware of an actual or reasonably suspected unauthorized disclosure of Customer Data. Notification may include phone contact by Salesforce support, email to the State's administrator and Security Contact (if contact is submitted by State and contact information is kept up to date), and public posting on trust.salesforce.com.	
SAP	Ariba	Ariba has developed a computer security incident response team. Following policies and procedures, this team responds to suspected security incidents to mitigate risks and damage. The team conducts response and forensic analysis of systems and network traffic. This information can be used to assist with prosecution if a security breach is detected and the offender caught.
	Fieldglass	SAP Fieldglass' security team is responsible for managing security incidents and all communication is conducted via the respective account managers to ensure timeliness. The process is defined within the Incident Response Management Standard. Customers are notified of an incident within 48 hours.
	Hanna	SAP will notify via defined communication channels within 36 hours of a confirmed data security breaches to the affected customers. The report will detail the following information: • Details relating to the security incident that has occurred, known at the time of notification. • IT infrastructure and/or application affected by the security incident. • Overview of the performed mitigation actions to restore the security, documented within the incident report form. • All further applicable requirements by country regulations "on obligation to notify" will be met.
	Hybris	Since we do not allow for CC data to be transmitted, stored or processed in our environment, we regularly scan the customer environment in case this is done without our consent. However, we do have a CSIRP in place, in which we would notify the customer and our internal Forensics team in the event that a customer environment should be breached.
	SuccessFactors	Upon the occurrence of a data breach, initial communication is distributed to the appropriate individuals and an escalation process is followed. Upon

		becoming aware of the incident, measures are promptly taken by the team to resolve the situation. All affected customers should be informed within at most 36 hours of confirming a potential breach in the privacy of their data. Following incident resolution, follow-up is required to ensure that the incident has been resolved effectively and that the threat is no longer present. We are aligned with ISO 27k standards for event and incident management and have formal incident management policies and processes in place. These policies and procedures are tested in the ISO 27k and SOC 2 audits.
FireEye	FireEye has a documented policy for incident management that has been approved by management and communicated to appropriate constituents and owners. It is continuously maintain and reviewed annually. The plan has a reporting structure and escalation path. An incident response team with defined roles and response related qualifications are available 24x7x365. The team maintains chain of custody for evidence during the incident investigation. There is a process for reporting client notification for regulatory, legal and contractual issues after a breach if a breach were to be confirmed. If a confirmed breach were to occur a management team would review all the factors and develop a remediation plan to mitigate.	
VirtueStream	There are two primary Incident types; Security Incidents, where there is a possible breach in systems or data integrity, and Services, where there is in impacted or affected service. Although there is some overlap, generally any security-related incident should be classified as a Security Incident and the response must be managed using the 'Virtustream Information Security Procedure – Security Incident Response Plan'. The purpose of this security incident response plan is to provide general guidance to Virtustream staff- both technical and managerial – to enable quick and efficient recovery from security incidents; respond in a systematic manner to incidents and carry out all necessary steps to correctly handle an incident; prevent or minimize disruption of critical computing services; and minimize loss or theft of sensitive or mission critical information including sensitive credit card data. The plan is also a guide to sharing information with other stakeholder organizations who might be impacted by such security incidents such as the credit card associations and law enforcement. The Security Incident Response Plan (SIRP) provides guidance to prepare for, respond to, and recover from potential incidents. Policy statements surrounding the IR-Plan are provided to ensure continued upkeep and standardized use. The SIRP guidance at the procedural level defines the roles, responsibilities, communication methods and flows, contact information, types of potential incidents, and immediate actions that are to be taken upon an incident's identification, and elaborates with subsequent recovery steps. Virtustream's Incident Response Policy requires the implementation and testing of a generalized plan that adheres to the International Standards Organization 27002 guidance for incident management and response, but meets specific requirements for compliance such as PCI-DSS. The Plan covers the corporate environment associated with Virtustream's IT assets, the local IT resources and the IT resources at Virtustream's Data Center. It consists of a series of guidelines (Incident Response Guidelines or "IRG") that should generally be followed as appropriate for the circumstances as when a security incident occurs or as part of the ongoing maintenance of this plan. As the incident progresses and has more impact (i.e. severity level increases), the escalation process will be used to engage appropriate resources. Incidents should be handled at the lowest escalation level that is capable of responding to the incident with as few resources as possible in order to reduce the total impact, and to keep tight control. The Table below defines the escalation levels with the associated team involvement.	

8.7 Migration and Redeployment Plan

8.7.1 Offeror must describe how it manages the end of life activities of closing down a service to a Purchasing Entity and safely deprovisioning it before the Offeror is no longer contractually obligated to maintain the service, include planned and unplanned activities. An Offeror's response should include detail on how an Offeror maintains security of the data during this phase of an SLA, if the Offeror provides for redundancy during migration, and how portable the data is during migration.

The end of life activities for each Purchasing Entity will vary based on the type of service they are currently using and the service that they will be moving too. All Purchasing Entities will be notified in advance of any end of life service so that the Purchasing Entity can work with Carahsoft and the service providers to develop a plan exporting and transitioning data.

8.7.2 Offeror must describe how it intends to provide an orderly return of data back to the Purchasing Entity, include any description in your SLA that describes the return of data to a customer.

At all times during the course of the Service, the Purchasing Entities will have access and ownership of their data. The Purchasing Entity is free to download or access the data through a variety of means based on the service at any time during their service period.

8.8 Service or Data Recovery

8.8.1 Describe how you would respond to the following situations; include any contingency plan or policy.

a. Extended downtime.

CA	APM	If unable to resolve in a timely manner, all customers will be notified via email to the registered admin
	MAA	Customers are kept abreast with progress during incidents, including outages. CA utilizes best-of-breed notification system which enables customer contacts to self-subscribe to different types of notifications that they would be interested in. A DR plan has been created should the extended down time result in DR declaration.
	CA Agile	We would failover to our warm data center in order to restore access to the application as quickly as possible. This is done according to our Disaster Recovery Plan
	ASM	If unable to resolve in a timely manner, all customers will be notified via email to the registered admin. Failover from the primary to DR site may be utilized if the extended amount of time warrants declaration of DR.
Google	Due the redundant nature of the Google infrastruture there is no expectation of any extended downtime. If a data center in use by any of your end users suffers a catatrophic failure, Google's dynamic health monitoring would just reroute the session to a different data center.	
AODocs	All the AODocs data is hosted on the Google Cloud Platform infrastructure. AODocs does not manage any physical infrastructure. Due the redundant nature of the Google infrastruture there is no expectation of any extended downtime. If a data center in use by any of your end users suffers a catatrophic failure, Google's dynamic health monitoring would just reroute the session to a different data center.	
Virtru	Notify users that Virtru service is unavailable, and recommend that they use their offline encryption tools and backups to perform emergency functions.	
Salesforce	Salesforce has maintained high levels of availability across all Salesforce instances since inception. As the only on-demand vendor to provide daily service-quality data on a public Web site (http://trust.salesforce.com), Salesforce proves that we are the leader in availability. And by making its track record completely transparent, Salesforce proves we are worthy of our customers' trust. To ensure maximum uptime and continuous availability, Salesforce provides the best	

	redundant data protection and most advanced facilities protection available, along with a complete data recovery plan—all without affecting performance. Salesforce uses commercially reasonable efforts to make its on-demand services available to its customers 24/7, except for planned downtime, for which Salesforce gives customers prior notice, and force majeure events. Excellent availability statistics are critical to Salesforce's customers' success and to the success of Salesforce as a company. Live and historical statistics on the Salesforce system performance are publicly published at http://trust.salesforce.com/trust/status. The persistence layer underlying Salesforce Platform is proven database technology that powers all of Salesforce's products today, serving more than 150,000 organizations and over 4 billion transactions per day with an average request response time of less than .25 seconds, all with an average up time of 99.9+ percent.
ServiceNow	ServiceNow's data centers and cloud-based infrastructure have been designed to be highly available. All servers and network devices have redundant components and multiple network paths to avoid single points of failure. At the heart of this architecture, each customer application instance is supported by a multi-homed network configuration with multiple connections to the Internet. Production application servers are load balanced within each data center. Production database servers are replicated in near-real time to a peer data center within the same geographic region. ServiceNow leverages this Advanced High Availability (AHA) architecture for customer production instances in several ways: •In the event of the failure of one or more infrastructure components, service is restored by transferring the operation of customer instances associated with the failed components to the peer data center. •Before executing required maintenance, ServiceNow can proactively transfer operation of customer instances impacted by the maintenance to the peer data center. The maintenance can then proceed without impacting service availability. This approach means that the transfer between active and standby data centers is being regularly executed as part of standard operating procedures – ensuring that when it is needed to address a failure, the transfer will be successful and service disruption minimized. RTO is 2 hours. RPO is 1 hour. See the "ServiceNow Security, Operations, and Compliance White Paper" included with this response for more information.
QTS	In the rare instance of failure of the commercially-delivered electrical power, back-up systems at each QTS data center start instantaneously. Batteries provide power for the first 12-15 seconds while on-site diesel generators spin up to synchronize their output with the battery-supplied feed. Once on-line, the generators can supply power indefinitely, and the IT equipment on the data floor as well as critical infrastructure components are all unaffected. While the basics of reliable power seem simple, none of this is taken for granted. Battery banks are sized to provide 15 minutes of power, well beyond the 15 seconds that it typically takes generators to come on line. Inspections are conducted daily and quarterly to ensure that the battery banks are prepared at all times. The diesel generators are inspected by running them each month to circulate and condition the fuel, then running them annually under the full simulated load of the current IT equipment on the data center floor. Factory technicians inspect and maintain the generators semi-annually. Quantities of fuel sufficient to support 48-72 hours of

	operation without resupply are stored on-site, and re-supply contracts are in place with multiple providers to have fuel delivered as soon as the generators come on line.	
SAP	Ariba	Ariba has implemented two sites within each region. In North America the sites are currently located in San Jose, California and Sterling, VA. In Europe the sites are located in St. Leon-Rot, Germany and Amsterdam, Netherlands. The act of failing over from one site to another has a design goal for its Recovery Time Objective (RTO) of no more than four hours. The design goal for the Recovery Point Objective (RPO) is five minutes. Disaster recovery options are included for all Ariba Cloud Services. In the event of a fail-over to the disaster recovery site, no customer changes are required as all URLs that customers use to reach the applications will continue to work. Ariba will notify customers via their email addresses in the event of unplanned downtime. Internally, Ariba uses a documented system recovery plan that outlines the approach and steps for recovering the applications. This document defines roles and responsibilities in the event of disaster: Local Ariba staff maintains the hardware remotely. Ariba maintains the application software. Processes are in place to keep database and fileservers in sync between primary and backup data centers. The failover process of all parts of the infrastructure is automated. In the event of a catastrophe, Ariba will declare the primary data center "down" and locally the script will be run to switchover and start the applications at the remote data center. Ariba tests power outage backup scenarios and the Disaster Recovery Plan on a periodic basis to ensure it is up-to-date, successful, and effective.
	Fieldglass	Customers are notified of unscheduled downtime immediately via email. Updates are frequently emailed out until the issue has been resolved. Customers are notified of scheduled downtime 5 days prior via email.
	Hanna	In case of a disaster depending on the infra & technical architecture defined during HEC technical assessment workshop, systems could fail over to HA node. If DR (optional offering) is selected, the systems could move to secondary DC that where contracted with a DR option & HEC declaring DR. Regular system downtime for patching etc. is planned in advance with the customer and typically follows customers maintenance schedules.
	Hybris	SAP Hybris offers continuous 24/7 systems monitoring in-place, which automatically notifies you, SAP Hybris support and optionally your designated implementation partner in the event of any monitored system problem. Tools used for monitoring include HP Sitescope and Nagios. This service ensures quick response times to emergency problems. Standard monitors are in place for basic site availability. Customer can utilize additional 3rd party monitoring services should it wish to add additional monitoring. Upon request, monthly or quarterly reviews are offered to review performance over the period. When a system problem occurs, in addition to monitor alerts sent to the customer, SAP Hybris support may send emails to a designated customer notification email address to provide status, updates or further detailed information. In addition, a support ticket would be created which would include such information.
	SuccessFactors	Our infrastructure architecture is designed with high availability in mind, and engineered for resiliency. All major components are redundant, including power, HVAC, fire suppression, and the physical components of our network. Production data centers have strict access controls, and are continuously

		staffed and monitored to help prevent acts of sabotage or vandalism. All production data centers are ANSI/EIA/TIA-942Tier III/IV facilities, and are ISO 27001 certified. Production data centers are also geographically dispersed to help prevent a single event from affecting more than one data center. In the event a production data center has an outage we failover to an alternate data center in the same geographic region to minimize impact to customers. Our Cloud Operations teams are also geographically dispersed, working in offices in the US, Europe, South America, and India. Should an office be impacted by an environmental event or pandemic, other offices can continue operations. Aspects of the plan are described in the SOC reports, Disaster Recovery Plan ("DRP") and Business Continuity Plan ("BCP") solutions are dependent on several factors. The customer may be responsible for parts of the recovery/continuity activities.
VMware	VMware vCloud Air leverages proven VMware High Availability technology to minimize the risk of extended downtime. In the unlikely event that an extended outage does occur, VMware will support guide the customer's efforts to restore services to an alternative vCloud Air or vCGS datacenter. We will also provide remedies in the form of service credits as outlined in the following VMware vCloud Air, vCGS, Vmware AirWatch and VMware Identity Manager SLAs.	
FireEye	FireEye has a mature and documented Business Continuity Plan and Disaster Recovery Plan that follows industry best practices that is reviewed and tested annually. The BCP/DRP plan has RPO/RTO timing criteria and other critical business requirements that is available for review if requested in the future.	
VirtueStream	In the event of extended downtime affecting production systems, Virtustream and customer would jointly evaluate the situation and mutually decide on failover declaration, whereby Virtustream would then execute the failover plan to restore customer operations to the secondary data center.	

b. Suffers an unrecoverable loss of data.

CA	APM	Customer data is isolated within dedicated schemas with nightly backups. The maximum data loss would be the previous 24hrs.
	MAA	MAA data is backed up fully daily. The maximum data loss would be the previous 24hrs.
	CA Agile	We have implemented a physical standby database in both hot/Live site as well as warm/standby sites using Oracle Data Guard with real-time apply to achieve the stated recovery objectives.
	ASM	Customer data is isolated within dedicated schemas with nightly backups. The maximum data loss would be the previous 24hrs.
Google	Google performs real time data replication to avoid unrecoverable data loss. Customers that configure the retention policies in Google Apps Vault can ensure that end users can not inadvertently or maliciously delete email in advance of any defined retention schedules.	
AODocs	AODocs data are stored in Google AppEngine and Google Drive: - The data stored in Google AppEngine are backed up every day. The application is hosted on Google Cloud Platform infrastructure and benefits from the network security described in this whitepaper: https://cloud.google.com/files/Google-CommonSecurity-WhitePaper-v1.4.pdf - Data stored in Google Drive is managed by Google within its multiple servers location. Altirnao does not manage this infrastructure. Google Drive can be backed up by third party tool such as Backupify.	

Virtru	Notify users that data within Virtru is unavailable, and recommend that they use their offline encryption tools and backups to perform emergency functions.	
Salesforce	To maximize availability, the service is delivered using multiple world-class data centers supporting primary and replicated disaster recovery instance, plus a separate production-class lab. The infrastructure utilizes carrier-class components designed to support millions of users. Extensive use of high-availability servers and network technologies, and a carrier-neutral network strategy, help to minimize the risk of single points of failure, and provide a highly resilient environment with maximum uptime and performance. The Salesforce services are configured to be N+1 redundant at a minimum, where N is the number of components of a given type needed for the service to operate, and +1 is the redundancy. In many cases, Salesforce has more than one piece of redundant equipment for a given function.	
ServiceNow	Please see our response for 8.8.1a	
QTS	QTS cloud developed a OPS_POL_54_QTS-FC_Contingency_Planning_Policy (v1.2 – 2/6/14), detailing the policies, procedures, roles and responsibilities of key personnel in the event of an emergency and/or disaster.	
SAP	Ariba	Our SLA provides tenant remuneration for losses they may incur due to outages within the infrastructure.
	Fieldglass	The maximum data loss timeframe is guaranteed to be less than three hours; however, offsite backups are performed every 15 minutes so the timeframe is actually much shorter.
	Hanna	Data loss is defined by RPO & RTO. HEC has a maximum RPO of 30 mins & RTO of 12 hours.
	Hybris	For a cloud solution, data backup and restore is handled by SAP. SAP shall follow its archiving procedures for Customer Data as set out in the SAP Hybris Commerce, cloud edition Services Description. In the event of any loss or damage to Customer Data, SAP shall use commercially reasonable efforts to restore the lost or damaged Customer Data from the latest back- up of such Customer Data maintained by SAP in accordance with the archiving procedure described in its SAP Hybris Commerce, cloud edition Services Description. SAP shall not be responsible for any loss, destruction, alteration or disclosure of Customer Data caused by any third party, (except those third parties sub- contracted by SAP to perform services related to Customer Data maintenance and back-up).
	SuccessFactors	Our SLA provides tenant remuneration for losses they may incur due to outages within the infrastructure.
VMware	VMWare IaaS Services As discussed in detail in section 8.8.2.1.a below, VMware IaaS services are architected to minimize the risk of unrecoverable data loss. In addition option services such as vCloud Air Data Protection can be leveraged to further mitigate any risk. VMware's vCloud Air policy regarding data loss can be found in the vCloud Air Terms of use. VMware's vCloud Government Service policy regarding data loss can be found in the vCloud Government Service Terms of Service AirWatch Hosted Services AirWatch Business Continuity and Disaster Recovery strategies include data and hardware redundancy, network configuration redundancy and backups, and robust, regular testing exercises. AirWatch features active-passive configurations for high availability and redundancy with all components made to failover with minimal downtime. Load balancing capabilities are deployed across multiple data centers to ensure timely server recovery. AirWatch also incorporates replication technology featuring SQL log shipping or network SAN byte replication to prevent data loss.	

	• Due to FOIA restrictions and the competitive nature of the EMM marketplace, we cannot provide specific details regarding recovery strategies or timelines.
FireEye	FireEye has a mature and documented Business Continuity Plan and Disaster Recovery Plan that follows industry best practices that is reviewed and tested annually. The BCP/DRP plan has RPO/RTO timing criteria and other critical business requirements that is available for review if requested in the future.
VirtueStream	Multiple copies of customer data exist in multiple datacenters – in the primary datacenter, there is the production copy and a local backup. The local backup is replicated to a secondary datacenter and the production datastores associated with coreVM's are also replicated at regular intervals to the secondary datacenter. If NASPO feels that additional steps/redundancy are required to maintain recoverability, Virtustream is open to discussion.

c. Offeror experiences a system failure.

CA	APM	Disaster to the CA Technologies corporate network in New York will not affect customers' service. Secondary services, such as domain name services will be routed through the secondary CA Technologies network in Illinois. CA has a BCP plan in place to direct its services. The SaaS environment is separate from the CA corporate network and a service specific disaster recovery plan is in place.
	MAA	Customers would be notified in advance, and given ample time to retrieve their data.
	CA Agile	We enable all of our employees with the ability to be able to work remotely and provide remote network access to ensure business functions can continue. All corporate infrastructure has redundate systems that can be utilized in the event of failure.
	ASM	Customers would be notified in advance, and given ample time to retrieve their data manually or via the ASM API.
Google	Google's corporate network is separate from it's production infrastructure. Google is a global organization that has support personnel located at key office installations and tests our business continuity programs annually. These tests are to validate that if corporate headquarters is off the grid that criticial business functions can be picked up by other staff.	
AODocs	AODocs runs 100% over Google's Cloud Platform infrastructure that is naturally redundant, and all AODocs internal systems such as technical support, email, collaboration, source code hosting, etc are run on cloud based services. AODocs personnel can work from any physical location without any business disruption and they do work from remote locations on a regular basis. If one of the AODocs facilities were to be temporarily unavailable due to a natural disaster, AODocs personnel would be able to perform their work without significant interruption.	
Virtru	Notify users that Virtru is or will be permanently unavailable, and recommend that they use their offline encryption tools and backups to perform emergency functions.	
Salesforce	Please see response to items a. and b. above and d. and e. below. Salesforce has documented Disaster Recovery and Business Continuity plans for critical business functions. The Disaster Recovery and Business Continuity plans are tested at least annually. A post mortem documenting the results of the disaster recovery tests can be provided to customers with a signed NDA in place. Business continuity plans are updated each year, including the list of business processes, recovery time objectives, and key resources. Senior management is included in this process. Business continuity plans are exercised on an annual basis. Action items and lessons learned are tracked from each incident and exercise conducted. Action items are prioritized and tracked until	

	closed. Salesforce has developed additional procedures, processes and plans, including a Pandemic plan. Salesforce also recommends customers also devise their own backup strategy for their data, as there is a fee for customers to request for restoration from Salesforce backups. Salesforce provides multiple ways for our customers to obtain periodic backups of its data. We offer a weekly export service (WES) for those customers requiring a local backup copy of their data or a data set for import into other applications (such as an ERP system). Salesforce also supports data replication, which allows customers to store and maintain a local, separate copy of their organization's Salesforce data including the META data (logins, etc.) for specialized uses, such as data warehousing, data mining, custom reporting, analytics, and integration with other applications. Data replication provides customers with local control and the ability to run large or ad hoc analytical queries across the entire data set.	
ServiceNow	Please see our response for 8.8.1a	
QTS	QTS has established an alternate processing site including necessary agreements to permit the resumption of information system operations for essential missions and business functions within [Assignment: organization-defined time period consistent with recovery time objectives] when the primary processing capabilities are unavailable. The QTS cloud hosting facilities in Richmond, VA (RIC1) and Atlanta, GA (ATL1) have agreements with each other to restore services in the event that one of the sites becomes unavailable. Both facilities are QTS managed facilities and are always available to meet the recovery time and recovery point objectives for the system. Agreements are in place to allow QTS to access resources at the alternate processing site physically and via the QTS client network. Richmond and Atlanta Datacenters are independently operated datacenters that offers disaster recovery services to customers. The contingency approach ensures that hardware and software components needed for recovery efforts are already at the alternate facility. QTS ensures that equipment and supplies required to resume operations are available at the alternate site or contracts are in place to support delivery to the site in time to support the organization-defined time period for resumption. Network circuits, networking infrastructure, storage, virtual servers, and management components required to resume operations are available and configured at the alternate site.	
SAP	Ariba	"Ariba modules automatically persist object state to the underlying relational database as users work. When a user performs a significant action, for example, adding an item to an order, performing an approval, etc., the Ariba application tier is aware of the change and automatically saves the relevant object state to the database. This provides transparent persistence of the user's work without the user having to “save” or “submit” changes to avoid losing work in the event of failure or session timeout. This in turn means that the loss of any connections between the tiers or failure of one of the tiers will not leave data in an inconsistent state. While object data is cached in the middle tier for performance, the official record is stored in the database to avoid any potential data loss or corruption. This means that recovery for Ariba modules is implicit and automatic. When the modules start, they retrieve the state of the various business objects from the underlying database as needed for user sessions. If an Ariba module fails, there is no special application recovery process other than restarting the module. The Ariba module will automatically connect to the database and as clients login and commence working, all required business object data will be retrieved from the database."

	Fieldglass	Fieldglass' business continuity program (BC Program) was established to ensure that, after a complete disruption of its Chicago and/or Naperville, Illinois offices, all employees and the functions for which they are responsible, are capable of continued operations in less than one business day. This includes office space as well as all equipment and supplies needed to continue its operations without an interruption in customer services. Fieldglass' BC Program is integrated into all facets of the company due to the criticality of the product that it sells and supports. As such, representatives from all areas of the company are responsible for ensuring that they are familiar with their duties and responsibilities during a disruption and how to recover their areas after the disruption occurs.
	Hanna	Service Level Credits Where SAP fails to meet a Service Level, SAP will be liable to Customer for the corresponding Service Level Credit as set out in this section. The Service Level Credit is calculated as the sum of the Service Level Credits for both DEV/QAS and PRD for the TA Service Level defined in section 5.1 above. SAP will deduct the amount of any Service Level Credits owed to Customer from the next invoice (or, if there is no such invoice, by bank transfer to such bank account as Customer may specify in writing). Customer agrees that under no circumstances will the total maximum Service Level Credits: (i) for any one month, exceed 100% of the Service Fee for that month; and, (ii) for any given contract year, exceed in the aggregate an amount equal to one- third of the annual Service Fee charged for the contract year (or one third of the total Service Fee charged if the Term as defined in the applicable Order Form is less than one (1) year). Customer acknowledges that the Service Level Credits defined hereunder are the sole remedy for SAP's failure to meet the specified Service Level. 5.6 Termination for Service Level Failure Customer may terminate the applicable Order Form with thirty (30) day's termination notice in writing to SAP, if SAP misses a Service Level as specified in this Supplement for three (3) months in sequence. Customer may exercise this termination right only within thirty (30) days after receipt of the respective Service Level report that documents the applicable Service Level failure that would cause such termination right to accrue in Customer.
	Hybris	SAP isn't likely to go out of business in the near future. However, our contract states the following: Upon expiration or termination of the Agreement, SAP may destroy or otherwise dispose of any of Customer Data in its possession unless SAP (i) is requested by Customer to extend the term of the Order Form as permitted in the Order Form to allow Customer to retrieve Customer Data, or (ii) receives, no later than thirty (30) days after the effective date of the termination of this Agreement, a written request for the delivery to Customer of the then most recent back-up of the Customer Data. SAP shall use reasonable commercial efforts to deliver the back-up to Customer within thirty (30) days of its receipt of such a written request, provided that Customer has, at that time, paid all fees and charges outstanding and owed at termination. Customer shall pay all reasonable fees and expenses incurred by SAP in returning or disposing of the Customer Data.

VMware	AirWatch Hosted Services AirWatch Business Continuity (BC) strategies include clear policies and procedures as well as robust, regular testing exercises. Our BC recovery strategies for support and maintenance include provisions for workforce mobility, secondary support locations, and defined leadership roles and responsibilities for all recovery staff. • Multiple Support Locations – AirWatch maintains a Global Support Team, which spans multiple offices around the world. This ensures that if a disaster occurs at one of our offices, our remaining Support Team members can provide assistance to our customers. • Mobile Workforce – Should an AirWatch office become inaccessible, all AirWatch employees are equipped with laptops and can access necessary internal resources. • Defined Leadership – During a disaster, roles and responsibilities are assigned to key personnel, and a recovery manager provides leadership and documents the continuity process. Additionally, emergency contact numbers for key personnel are provided for all vendors and support staff.
FireEye	FireEye has a mature and documented Business Continuity Plan and Disaster Recovery Plan that follows industry best practices that is reviewed and tested annually. The BCP/DRP plan has RPO/RTO timing criteria and other critical business requirements that is available for review if requested in the future.
VirtueStream	Virtustream has built redundancy into all layers of the physical infrastructure in order to deliver SLAs up to 99.999% and mitigate the risks of a system failure. Additional levels of protection include regular system backups (stored locally and replicated offsite) as well as automatic storage replication to a secondary data center to facilitate the ability to restore operations in the event of a system failure.

d. Ability to recover and restore data within 4 business hours in the event of a severe system outage.

CA	APM	CA provides an SLA of 99.8% uptime, which can result in unforeseen outages of ~1.5 hours per month. In the event of a failure to meet a SLA threshold , Customer is entitled to a number of days of credit.
	MAA	Using DB clustering technologies, multiple copies of data are maintained helping in recovery of the data.
	CA Agile	We can meet this requirement.
	ASM	Data is replicated from the primary (production) to secondary (DR) continuously. In the event of catastrophic loss of live data a failover to the DR site would be necessary.
Google	Google's RTO is zero.	
Virtru	See 'Virtru Incident & Breach Policy'	
Salesforce	Customer data, up to the last committed transaction, is replicated to disk in near-real time at the designated disaster recovery data center, and backed up at the primary data center. Backups are performed daily at primary data center facility without stopping access to the application. For business continuity purposes, Salesforce supports disaster recovery with a dedicated team and a 4 hour recovery point objective (RPO) and 12 hour recovery time objective (RTO). Additional details can be provided with the execution of an NDA between Salesforce and your Agency.	
ServiceNow	Please see our response for 8.8.1a	
QTS	As defined in QTS OPS_POL_54_QTS-FC_Contingency_Planning_Policy (v1.2 – 2/6/14), QTS cloud has identified the following potential accessibility problems: • Network Outage – Short Term • Network Outage – Long Term • Facility Power or Environmental Outage – Short Term	

	• Facility Power or Environmental Outage – Long Term • Serious Facility Damage – Short Term • Serious Facility Damage – Long Term or Permanent Both the RIC2 and ATL1 QTS cloud Infrastructure is an Active/Active system and can operate independently of each other indefinitely. If QTS cloud determines that any single event (network, power, facility damage) presents a long-term threat, QTS immediately conducts an emergency meeting and plan to remedy or relocate infrastructure to a viable facility."	
SAP	Ariba	Ariba has implemented two sites within each region. In North America the sites are currently located in San Jose, California and Sterling, VA. In Europe the sites are located in St. Leon-Rot, Germany and Amsterdam, Netherlands. The act of failing over from one site to another has a design goal for its Recovery Time Objective (RTO) of no more than four hours. The design goal for the Recovery Point Objective (RPO) is five minutes.
	Fieldglass	Fieldglass offers the following: • RTO = No more than 48 hours • RPO = No more than 6 hours. Warm site replica with 100% processing power of original site. Disaster recovery site can run without need from resumption.
	Hanna	See our RTO and RPO info below
	Hybris	For a cloud solution, data backup and restore is handled by SAP.SAP shall follow its archiving procedures for Customer Data as set out in the SAP Hybris Commerce, cloud edition Services Description. In the event of any loss or damage to Customer Data, SAP shall use commercially reasonable efforts to restore the lost or damaged Customer Data from the latest back- up of such Customer Data maintained by SAP in accordance with the archiving procedure described in its SAP Hybris Commerce, cloud edition Services Description. SAP shall not be responsible for any loss, destruction, alteration or disclosure of Customer Data caused by any third party, (except those third parties sub- contracted by SAP to perform services related to Customer Data maintenance and back-up). Both IDS and IPS are included the SAP Hybris Commerce, Cloud Edition The security infrastructure includes firewall security and hardened security policies on all servers. Log management procedures are in-place for log review for firewall, applications, network devices, including file-integrity management. SAP Hybris utilizes technologies from leading security firms for Log Management and File Integrity Management. SAP Hybris employs two-factor authentication across its network. SAP Hybris undergoes vulnerability and penetration testing. SAP Hybris validates against requirements for PCI DSS 2.0. The infrastructure also includes Web Application Firewalls and DDoS Mitigation Services. In addition, security policies and change management policies are in-place ensuring that all access and changes to customer systems and information is accessible only by SAP Hybris staff with access authorization. Security of the software application which is controlled by the Customer (or its implementation partner) remains the responsibility of the Customer. Upon expiration or termination of the Agreement, SAP may destroy or otherwise dispose of any of Customer Data in its possession unless SAP (i) is requested by Customer to extend the term of the Order Form as permitted in

		the Order Form to allow Customer to retrieve Customer Data, or (ii) receives, no later than thirty (30) days after the effective date of the termination of this Agreement, a written request for the delivery to Customer of the then most recent back-up of the Customer Data. SAP shall use reasonable commercial efforts to deliver the back-up to Customer within thirty (30) days of its receipt of such a written request, provided that Customer has, at that time, paid all fees and charges outstanding and owed at termination. Customer shall pay all reasonable fees and expenses incurred by SAP in returning or disposing of the Customer Data.
	SuccessFactors	RPO and RTO are defined in the general terms and conditions
VMware	VMware Response: VMware IaaS Services VMware DR service. We can discuss specific recovery information under NDA to participating entities during task order negotiations as required. AirWatch Hosted Services We can discuss specific recovery information under NDA to participating entities during task order negotiations as required.	
FireEye	FireEye has a mature and documented Business Continuity Plan and Disaster Recovery Plan that follows industry best practices that is reviewed and tested annually. The BCP/DRP plan has RPO/RTO timing criteria and other critical business requirements that is available for review if requested in the future.	
VirtueStream	Basic Plus microVM's are designed for mission-critical workloads and for systems that require DR, addition of reserved compute capacity in a secondary datacenter (i.e. Reserve uVM) and automatic storage replication to facilitate the ability to restore operations in the event of an outage at the primary data center. RPO and RTO for core microVM's are 15 minutes and 2 hours respectively.	

e. Describe your Recovery Point Objective (RPO) and Recovery Time Objective (RTO).

CA	APM	Recovery Point Objective (RPO): Maximum data loss: 24 hours Data that is uploaded, but not backed up within the 24 hours may have to be re-entered Recovery Time Objective (RTO): 72 hours
	MAA	Recovery Point Objective (RPO): Maximum data loss: 24 hours Data that is uploaded, but not backed up within the 24 hours may have to be re-entered Recovery Time Objective (RTO): 72 hours
	CA Agile	RTO: 2 hours RPO: 12 hours
	ASM	Recovery Point Objective (RPO): Maximum data loss: 24 hours Data that is uploaded, but not backed up within the 24 hours may have to be re-entered Recovery Time Objective (RTO): 24 hours
Google	RPO/RTO objectives are zero hours.	
AODocs	AODocs is hosted on Google App Engine which is designed to be highly available. Our standard SLA is 99.5% . Specific financial penalties can be discussed as part of the AODocs license contract. Google App Engine is running in multiple datacenters on multiple continents.	

	AODocs data is backed up on a daily basis, and backups are stored on the highly redundant Google Cloud Storage. Backups are retained for at least 90 days	
Virtru	See 'Virtru Incident & Breach Policy'	
Salesforce	For business continuity purposes, Salesforce supports disaster recovery with a dedicated team and a 4 hour recovery point objective (RPO) and 12 hour recovery time objective (RTO). Additional details can be provided with the execution of an NDA between Salesforce and your Agency.	
ServiceNow	Please see our response for 8.8.1a	
QTS	QTS DRaaS will support all of your mission-critical application needs and enables you to achieve a RTO within minutes and RPO of just seconds.	
SAP	Ariba	See above
	Fieldglass	Fieldglass offers the following: • RTO = No more than 48 hours • RPO = No more than 6 hours. Warm site replica with 100% processing power of original site. Disaster recovery site can run without need from resumption.
	Hanna	For disaster Recovery, SAP HEC offers the following RTO & RPO 1. HANA Database RTO - 12 hours, RPO - 30 minutes 2. Sybase ASE Database RTO - 12 hours, RPO - 30 minutes
	Hybris	In the case of catastrophic failure to your primary production data center, we offer anywhere from best efforts to enhanced DR solutions. Enhanced DR options translates to either RTO of 8 hours and RPO of 1 hour for a warm standby solution, or RTO of 30 minutes to RPO of 30 minutes for a hot-site. Customers have 3 choices in DR sites: • as part of our base offering, best effort DR, we would bring your site back up in an alternate datacenter which is a minimum of 500 miles away from the primary datacenter. We would actually push your project server images to the alternate datacenter, but we would still need to set up your various interfaces, 3rd party services, etc, which could day a few days. • 2nd would be to have your DR site managed by hybris Managed Services. • 3rd would be to use your own DC as a DR site, We would need to set up a technical call with our combined teams to synch up on the replication strategies. • Our DR services utilizes VMware Site Recovery Manager with storage-based replication. • For enhanced DR, we would include one annual DR test, but more can be added if required. It also includes a customer specific DR and Business Continuity plan.
	SuccessFactors	Within the contract/subscription agreement, there are provisions for data recovery in the event of disaster. SLA's for RTO (Recovery Time Objective) and RPO (Recovery Point Objective) are defined in the contract. We will prioritize data recovery based upon our contractual obligations for each customer, concerning RTO and RPO.

VMware	VMware IaaS Services Provide the RPO and RTO for DR, point to SLAs for others. RTO – 4 hours or less RPO – 15 minutes to 24 hours – time is configurable by user but there is a bandwidth consideration for shorter replication times. VMWare AirWatch AirWatch Business Continuity (BC) and Disaster Recovery (DR) strategies include data and hardware redundancy, network configuration redundancy and backups, and robust, regular testing exercises. • Business Continuity – Our BC recovery strategies for support and maintenance include provisions for workforce mobility, secondary support locations, and defined leadership roles and responsibilities for all recovery staff. o Multiple Support Locations – AirWatch maintains a Global Support Team, which spans multiple offices around the world. This ensures that if a disaster occurs at one of our offices, our remaining Support Team members can provide assistance to our customers. o Mobile Workforce – Should an AirWatch office become inaccessible, all AirWatch employees are equipped with laptops and can access necessary internal resources. o Defined Leadership – During a disaster, roles and responsibilities are assigned to key personnel, and a recovery manager provides leadership and documents the continuity process. Additionally, emergency contact numbers for key personnel are provided for all vendors and support staff. • High Availability and Disaster Recovery – AirWatch features active-passive configurations for high availability and redundancy with all components made to failover with minimal downtime. Load balancing capabilities are deployed across multiple data centers to ensure immediate server pick up, ensuring zero end user downtime. AirWatch also incorporates replication technology featuring SQL log shipping or network SAN byte replication to prevent data loss. Due to FOIA restrictions and the competitive nature of the EMM marketplace, we cannot provide specific details regarding recovery strategies or timelines.
FireEye	FireEye has a mature and documented Business Continuity Plan and Disaster Recovery Plan that follows industry best practices that is reviewed and tested annually. The BCP/DRP plan has RPO/RTO timing criteria and other critical business requirements that is available for review if requested in the future.
VirtueStream	Virtustream's solution will have a Recovery Point Objective (RPO) of 2 Hours and Recovery Time Objective (RTO) of 30 Minutes for all disaster recovery enabled workloads. The Virtustream Cloud has been designed to deliver continuous operations. The platform is architected to be highly available, with SLAs as up to 99.99%. All infrastructure systems are run in at least an N+1 model and have been designed with no single points of failure. All of the data center facilities and infrastructure has redundant power supplies connected to separate circuits from separate power feeds. Every device is connected via redundant pathways at a LAN/SAN/WAN layer. State of Utah can choose any of our FedRAMP Data Centers to host their applications and the DR location. For illustrative purposes, we have assumed the primary data center will be USDC02 and DR data center would be USDC01. The State of Utah solution has been designed with all workloads running in our San Francisco (USDC02) data center. In the unlikely event of a disaster at the USDC02 facility, State of Utah's production services will be brought back online in the secondary data center located in Northern Virginia (USDC01). The target RPO is 30 minutes for virtual machines with a 2 hour RTO. All production workloads in the primary node will have reserved compute capacity in the secondary node when deployed using Reserve µVMs and replicated storage. All virtual machine disaster recovery services are based on storage replication. The primary and secondary data centers are interconnected by diverse private 10 Gbps Sonet rings from separate Tier 1 providers – AboveNet and Level 3. Data is replicated asynchronously and continuously between the two data centers.

	Virtustream also performs backups on a nightly basis and replicated offsite for further protection. The retention policies are determined by State of Utah per landscape and will be documented during the on-boarding process. **Figure 2. Integrated Disaster Recovery** Virtustream's cloud platform includes integrated disaster recovery (30 Min RPO & 2 Hr RTO) and backup. 

8.8.2 Describe your methodologies for the following backup and restore services:

a. Method of data backups

CA	APM	Backups are stored on disk only
	MAA	Backups are stored on disk only, sync'd between data centers for DR purposes.
	CA Agile	Full database backups are taken once per week, both to onsite and offsite (our warm data center, not a separate 3rd party) systems. Incremental backups are run nightly. Backups are retained for 21 days after which time they are simply aged out and over-written. In addition, snapshots of database transactions are taken every hour to an disaster recovery site allowing for emergency disaster recovery with maximum of 1.5 hours of data loss due to catastrophic onsite failure (fire in cage, natural disaster, etc. at data center). Backups are tested monthly and a full disaster recovery process to the offsite application cluster is tested semi-annually.
	ASM	Backups are stored on disk only, sync'd between data centers for DR purposes.
Google	Keeping in mind that Google stores customer data in encrypted chunks or shards on several servers at several data centers backups should not be considered customer specific. Daily backups of each server are performed to encrypted tapes at each data center.	
Virtru	We perform live database replication to a separate redundant database in Oregon and offline as well in a separate Amazon AWS Region	
Salesforce	Customer data, up to the last committed transaction, is replicated to disk in near-real time at the designated disaster recovery data center, backed up at the primary data center, and then cloned to the disaster recovery data center. Disaster recovery tests verify our projected recovery times and the integrity of the customer data.	

	Backups are performed daily at each data center facility without stopping access to the application. Backup cloning is transmitted over an encrypted network (our MPLS network across all data centers). Tapes never leave our secure data center facilities, unless they are to be retired and destroyed through a secure destruction process. The backup retention policy is 90 days (30 days for sandboxes). Deleted / modified data cannot be recovered after 90 days (30 days for sandboxes). If customers want a longer retention, they can use the weekly export feature available in the system.	
ServiceNow	While Advanced High Availability as described in 8.8.1 is the primary means to recover data and restore service in the case of a service disruption, in certain cases it is desirable to use ServiceNow's more traditional data backup and recovery mechanism. This data backup and recovery system works in concert with AHA and acts as a secondary recovery mechanism. ServiceNow stores production instances in two geographically separate regional data centers, with sub-production instances hosted in a single data center. Backups of the two production databases and the single sub-production database are taken everyday for all instances throughout the private cloud infrastructure. The backup cycle consists of four weekly full backups and the past 6 days of daily differential backups that provide 28 days of backups. All backups are written to disk, no tapes are used and no backups are sent off site. All the controls that apply to live customer data also apply to backups. If data is encrypted in the live database then it will also be encrypted in the backups. Regular, automated tests are run to ensure the quality of backups. Any failures are reported for remediation within ServiceNow.	
QTS	QTS operates and manages high-performance, multi-tenant platforms on which customer system and data file backups can be created and retained for rapid restore of files/volumes. Data can be stored on tape or disk, depending on QTS location, and can reside locally in a QTS data center or off-site. If there is a need for off-site data retention, the backup medium is tape. QTS can also replicate the backed up data from the primary site to a secondary (remote) site to address geographically remote storage and DR requirements. Secure: QTS utilizes a separate, secure gigabit backup network with private VLAN security. Physical security is monitored using a priority badge access system to limit access to the tape libraries, disk arrays, servers, and network infrastructure. From the application, the backup software controls access to the data stored on tape, and access security is limited to QTS staff only. Scalable: QTS backup systems are highly scalable, and capacity can be quickly added as needed.	
SAP	Ariba	Our primary data center is Equinix, in San Jose; CA. Ariba's backup data center is CenturyLink in Sterling, VA. We make many copies of our data to insure no data loss happens: Data is stored in databases on high-availability storage disk-based system in primary datacenter Data is copied as backup to high-availability disk storage in the primary datacenter Data is copied to tape and kept in the primary data center Data is copied to tape and kept in an off-site tape storage facility (Iron Mountain) in Union City Data is replicated to databases high-availability storage disk-based system in the backup datacenter Data is copied as backup to high-availability disk storage in the backup datacenter Data is copied to tape and kept in the backup datacenter

		Data replication to the remote datacenter happens in near-real time. Data is backed up to the backup disks multiple times a day (in each location) Data is written to tape once a day (in each location) These processes and procedures are audited against the ISAE 3402 standard. Our auditor verifies we can restore from these backup methods.
	Fieldglass	All data in the Fieldglass system is stored within our clustered databases. Full backups daily, 15 minute incremental backups, and replication from center to center of backup data continuously.
	Hanna	The backup of SAP systems in HEC is executed on EMC DataDomain deduplication storage. This is done using EMC Networker for backup and administration. The backups on Site A are also replicated to remote Site B.
	SuccessFactors	Data backup is undertaken as follows: storage system snapshots every 24 hours, nightly incremental database backups, and weekly full database backups. These are all standard and provided as part of our hosted service. All backups are stored on disk in the primary and backup data center facilities for 30 days. Database backups are encrypted and stored at a customer's "primary" location, as well as the "alternate" warm-site location for redundancy and disaster recovery purposes. If the customer's primary location is defined as the data center in Amsterdam, NL, then copies of their database would be encrypted and streamed in a secure manner to the data center based in St Leon-Rot, DE, and vice versa. The backup is stored on Storage Area Network systems encrypted with AES-256 bit by encryption appliance. Backups are retained for 30 days. Our Log File Retention Policy is designed to meet or exceed the most stringent industry standards. Archiving of data is the customer's responsibility.
VMware	VMware will provide the following services to participating entities with respect to Data Recovery: •Data protection, such as routine backups, for the vCloud Air infrastructure, including top-layer management and user-management interfaces owned and operated by VMware. •Data and infrastructure restoration for the vCloud Air infrastructure, including top-layer management and user-management interfaces owned and operated by VMware. Participating entities will be responsible for the following services with respect to Data Recovery: •Data protection, such as routine backups, for the data and content accessed or stored on vCloud Air virtual machine's or storage devices, configuration settings, etc. •Data, content, virtual machine and configuration restorations for assets accessed or stored on your vCloud Air account. Data Protection is an optional service that provides secure, image-based backup and recovery capabilities that enable you to protect important virtual machine data and content hosted in your vCloud Air IaaS environment. Through the Data Protection administration interface available in the vCloud Air Console, vApps and their virtual machine members can be selected for policy-based backup and recovery operations. Data Protection feature subscription and activation may be requested via My VMware and is subject to additional service fees based on the amount of backup data capacity. Backup data capacity for the service is measured in front end terabytes (FETB). Once activated, vApps and their virtual machine members may be registered and unregistered with Data Protection features on a self-service basis through the vCloud Air Console. As part of this service, VMware will: •Implement and maintain central service components (backup software appliances, backup and archival storage media and associated network topologies) needed to support Data Protection features. •Perform routine configuration, maintenance and optimization services on behalf of the Data Protection environment and in conformance with industry best practices.	

	•Allocate requisite backup storage based on capacity selections made at the time of subscription enrollment. •Guarantee storage locality per geographical region for all backup data. •Provide necessary Data Protection service reporting as it is requested. Participating entities will be responsible for: •Subscribing to Data Protection as an add-on feature via My VMware and selecting an amount of backup storage capacity commensurate with your requirements. •Creating custom backup protection policies that may include, but are not limited to: affinity settings per VDC, scheduling, and retention periods. •Registering and unregistering individual vApps and their virtual machine members for scheduled backups using Data Protection. •Performing any on-demand backups per vApp and its virtual machine members. •Performing in-place or out-of-place restores per vApp and/or individual virtual machine. •Managing any in-guest recovery tasks, including restore operations at the operating system, file systems and/or any application level. •Managing backup storage capacity and consumption that may include, but is not limited to: activity reporting, ordering additional storage capacity via My VMwareTM and deleting any backup data in inventory to free up space.
FireEye	All backup and restore procedures are in compliance with SOC 2 specifications. Data and server images are backed up digitally and replicated to datacenters in geographically different locations.
VirtueStream	Virtustream performs backups on a nightly basis and replicated offsite for further protection. The retention policies are determined by State of Utah per landscape and will be documented during the on-boarding process. Virtustream provides OS level files are protected with a File System backup and then protect the application with an integrated solution. Some of the databases would dump to a flat file format and those files would be protected with the standard file system backup.

b. Method of server image backups

CA	APM	N/A
	MAA	Automation tools are used to manage the configuration of MAA internal servers, and can be used for recovery.
	CA Agile	Systems are not backed up as we have determined rebuilding is faster than restoring. We manage systems through Chef and the configuration cookbooks are backed up.
	ASM	Automation tools are used to manage the configuration of ASM internal servers, and can be used for recovery.
Virtru	All images are backed up onto cloud storage on two separate provider systems	
Salesforce	Each server has been allocated a different volume group so it can fail over to its backup server within the instance independently of the others.	
ServiceNow	Please see our response to 8.8.2a	
QTS	Your data storage requirements are growing exponentially and a scalable comprehensive solution for storage and data protection is absolutely necessary in today's marketplace. Implementing and managing this necessary storage infrastructure to meet both your application and compliance requirements can be extremely time consuming and costly. Outsource your storage needs to QTS. With our portfolio of high-performance and cost-effective managed storage services, your data will be secure and guaranteed to be available when you need it. By leveraging market leading hardware and software, coupled with certified processes and personnel, QTS delivers dependable, auditable solutions.	

<table>
<tr><td></td><td colspan="2">Managed SAN (Shared and Dedicated)- a fast, reliable Fibre Channel (FC) and iSCSI SAN attached storage solution that easily scales to meet your business requirements.

SAN-to-SAN Replication - provides block level asynchronous replication of your Managed SAN FC service between two of our state-of-the-art data centers for your disaster recovery needs.</td></tr>
<tr><td rowspan="3">SAP</td><td>Ariba</td><td>See above</td></tr>
<tr><td>Fieldglass</td><td>Fieldglass does not run server image backups. All systems are designed to be created through a series of templates and scripts.</td></tr>
<tr><td>Hanna</td><td>The defined backup package includes a file system, operating system files, and the database backup. The frequency in which the backup is executed varies for each of the components mentioned above. This depends on the standard HEC service schedules and the service levels agreed on with the customer.</td></tr>
<tr><td>VMware</td><td colspan="2">VMware will provide the following services to participating entities with respect to Data Recovery:
•Data protection, such as routine backups, for the vCloud Air infrastructure, including top-layer management and user-management interfaces owned and operated by VMware.
•Data and infrastructure restoration for the vCloud Air infrastructure, including top-layer management and user-management interfaces owned and operated by VMware.
Participating entities will be responsible for the following services with respect to Data Recovery:
•Data protection, such as routine backups, for the data and content accessed or stored on vCloud Air virtual machine's or storage devices, configuration settings, etc.
•Data, content, virtual machine and configuration restorations for assets accessed or stored on your vCloud Air account.
Data Protection is an optional service that provides secure, image-based backup and recovery capabilities that enable you to protect important virtual machine data and content hosted in your vCloud Air IaaS environment. Through the Data Protection administration interface available in the vCloud Air Console, vApps and their virtual machine members can be selected for policy-based backup and recovery operations.
Data Protection feature subscription and activation may be requested via My VMware and is subject to additional service fees based on the amount of backup data capacity. Backup data capacity for the service is measured in front end terabytes (FETB). Once activated, vApps and their virtual machine members may be registered and unregistered with Data Protection features on a self-service basis through the vCloud Air Console.
As part of this service, VMware will:
•Implement and maintain central service components (backup software appliances, backup and archival storage media and associated network topologies) needed to support Data Protection features.
•Perform routine configuration, maintenance and optimization services on behalf of the Data Protection environment and in conformance with industry best practices.
•Allocate requisite backup storage based on capacity selections made at the time of subscription enrollment.
•Guarantee storage locality per geographical region for all backup data.
•Provide necessary Data Protection service reporting as it is requested.

Participating entities will be responsible for:
•Subscribing to Data Protection as an add-on feature via My VMware and selecting an amount of backup storage capacity commensurate with your requirements.
•Creating custom backup protection policies that may include, but are not limited to: affinity settings per VDC, scheduling, and retention periods.
•Registering and unregistering individual vApps and their virtual machine members for scheduled backups using Data Protection.</td></tr>
</table>

	•Performing any on-demand backups per vApp and its virtual machine members. •Performing in-place or out-of-place restores per vApp and/or individual virtual machine. •Managing any in-guest recovery tasks, including restore operations at the operating system, file systems and/or any application level. •Managing backup storage capacity and consumption that may include, but is not limited to: activity reporting, ordering additional storage capacity via My VMwareTM and deleting any backup data in inventory to free up space.
FireEye	All backup and restore procedures are in compliance with SOC 2 specifications. Data and server images are backed up digitally and replicated to datacenters in geographically different locations.
VirtueStream	OS level files are protected with a File System backup and then protect the application with an integrated solution where available. Otherwise databases would dump to a flat file format and those files would be protected with the standard file system backup. Additionally, core microVM's are automatically replicated to a secondary datacenter for DR purposes.

c. Digital location of backup storage (secondary storage, tape, etc.)

CA	APM	Backups are securely replicated to an alternate location (within the same geographic location (e.g. N. America))
	MAA	Daily differential and full backups reside in the primacy site with weekly data backups residing offsite.
	CA Agile	Backups are stored in our warm data center.
	ASM	CA has an alternate site approximately 900 miles from our primary site.
Google	Tape	
Virtru	All backup storage is hosten in two separate cloud storage regions	
Salesforce	Backups are performed daily at each data center facility without stopping access to the application. Backup cloning is transmitted over an encrypted network (our MPLS network across all data centers). Tapes never leave our secure data center facilities, unless they are to be retired and destroyed through a secure destruction process.	
ServiceNow	Please see our response to 8.8.2a	
QTS	Managed Tape Rotation and Off-site Storage This service provides off-site storage for data backup, and helps many customers who must store data separately from a primary IT site to comply with various laws and regulations. QTS has contracted Iron Mountain — a nationally recognized leader in off-site data storage services — to move the data storage media (tapes) to and from a secure, off-site location. The service enables data security, integrity, and restoration in the event of an outage. Off-site data storage via tape ensures that a customer's information is securely stored in multiple locations. In the event of an emergency, QTS and Iron Mountain deliver the customer's media back to their IT environment or wherever they request delivery. Secure: QTS staff adheres to storage-industry best practices and security procedures. QTS facilities have earned SSAE16-SOC1 accreditations. All media is maintained in a secure environment and locked in secure media containers during transition from the QTS environment to the off-site storage location. Compliance and Tracking: QTS's partnership with Iron Mountain provides the ability to offer logging and tracking information about the customer's off-site media via the SecureSync Web portal.	
SAP	Ariba	See above

	Fieldglass	Fieldglass houses all backup data vaults within its production data centers. Replicas of the vault are performed continuously across data centers more than 1,000 miles apart.
	SuccessFactors	All data is backed up to the secondary site and can be restored from there in the event of a disaster recovery event at the primary site.
VMware	VMware vCloud Air Data Protection provides backup storage to disk	
FireEye	All backup and restore procedures are in compliance with SOC 2 specifications. Data and server images are backed up digitally and replicated to datacenters in geographically different locations.	
VirtueStream	Virtustream performs backups on a nightly basis and replicated offsite for further protection. The retention policies are determined by State of Utah per landscape and will be documented during the on-boarding process. Backup data is stored on local enterprise class disk storage systems and can be replicated to systems in a secondary Virtustream datacenter. All of Virtustream backup is disk based solution. Encryption keys are generated at the time of backup application install on the Client VM(s). Encryption keys are at least AES-128 but can be AES-256. Keys are stored on the backup system databases using the encryption key management tool, the data about the keys on the database is in a unreadable format and cannot be decrypted	

d. Alternate data center strategies for primary data centers within the continental United States.

CA	APM	The location where data is stored is generally in the country where the contract is executed.
	MAA	The MAA service is currently available from one data center only.
	CA Agile	We have a hot/warm data configuration with both data centers located within the US but ~1300 miles apart.
	ASM	ASM has a warm standby with near time data replication between the data centers.
Google	Google does not use the N+1 data center assignment due to the risk of cascading failures. Google's infrastructure makes a dynamic decision for each unique login session which data center is the closest, most highly available data center and which data centers will be used as secondary and tertiary. This assignment would shift for that session throughout the day based on availability and is done completely seamless to the end user.	
Virtru	We utilize multiple availability zones in AWS, and backup all data stored in our database to separate datacenters	
Salesforce	Customer Data for customers in Salesforce's Government Cloud is stored in two of our U.S. data center locations. The Salesforce service performs near real-time replication at each data center and annual disaster recovery tests for the service verify the projected recovery times and data replication between the production data center and the disaster recovery center. The disaster recovery site is a 100% replica of the primary production site of capacity (host, network, storage, data). Data is transmitted between the primary and disaster recovery data centers across encrypted links. Additionally, back-ups of data are performed and data is retained on backups at the geographically separated disaster recovery data center location.	
ServiceNow	Please see our response to 8.8.2a	
QTS	The QTS cloud alternate storage sites are located at the following data centers: Richmond, VA, Atlanta, GA, and Suwanee, GA. The entire QTS cloud is a unified standalone Active cloud architecture and is backed up in both Atlanta and Richmond to include: Customer data in the Service Delivery Hypervisor Cluster, and; Cloud Hypervisor Management Infrastructure and Configuration backups.	

	The QTS cloud Security documentation is backed up in alternate site located Suwanee, GA to include: Software/operating Systems, Configuration Data and Security Documentation QTS cloud Management Infrastructure and Configuration Data: Richmond, VA: The Richmond Cloud Management Layer (Cloud Hypervisor Management Cluster) and Customer data in the Service Delivery Hypervisor Cluster, and Configuration data is backed and staged locally in Richmond on the management layer then backed up across the Site-to-Site Management VPN to Atlanta, GA. This process is separate and independent of the Customers Service Delivery Layer. Atlanta, GA: The Atlanta Cloud Management Layer (Cloud Hypervisor Management Cluster) and Configuration data is backed and staged locally in Atlanta on the management layer then backed up across the Site-to-Site Management VPN to Richmond, VA. This process is separate and independent of the Customers Service Delivery Layer. This process maintains both local and remote management layer data and configuration backup for both locations. Suwanee, GA: software/operating systems, configuration data and security documentation at Rocstor Rocsecure Amphibious X7s with Secure-Encrypted Two-Factor Authentication, Utilizing AES-256 CBC Real-Time Hardware Encryption, with NIST and FIPS 140-2 Certified Cryptographic Modules, in a firerated safe located at Suwanee, GA.	
SAP	Ariba	We have a warm site for failover. Equinix (Our primary data center) is located in San Jose, California and our disaster recovery site is located at CenturyLink Data Center in Sterling, Virginia. The act of failing over from the main data center to the recovery site data center has a design goal recovery time objective (RTO) of four hours. The design goal Recovery Point Objective (RPO) is five minutes. In the event of a fail-over to the disaster recovery site location, all URLs that customers use to reach the San Jose data center will continue to work. We will notify customers via their email addresses in the event of unplanned downtime. Internally, we use a documented system recovery plan that outlines the approach and steps for recovering the applications. The document defines roles and responsibilities in the event of disaster: Local staff maintains the hardware remotely We maintain the application software Processes are in place to keep database and fileservers in sync between primary and backup data centers In the event of a catastrophe, we will declare the primary data center ""down"" and our local staff will follow a script to start the applications at the remote data center We test power outage backup scenarios and the Disaster Recovery Plan on a periodic basis.
	Fieldglass	Please see the answer to Question 8.8.2A. above. Fieldglass' backup data center is located in San Jose, CA.
	Hanna	The backup of SAP systems in HEC is executed on EMC DataDomain deduplication storage. This is done using EMC Networker for backup and administration. The backups on Site A are also replicated to remote Site B. For example, site A &B may be Santa Clara, CA and Sterling, VA, respectively.
	Hybris	In the case of catastrophic failure to your primary production data center, we offer anywhere from best efforts to enhanced DR solutions. Enhanced DR

		options translates to either RTO of 8 hours and RPO of 1 hour for a warm standby solution, or RTO of 30 minutes to RPO of 30 minutes for a hot-site. Customers have 3 choices in DR sites: • as part of our base offering, best effort DR, we would bring your site back up in an alternate datacenter which is a minimum of 500 miles away from the primary datacenter. We would actually push your project server images to the alternate datacenter, but we would still need to set up your various interfaces, 3rd party services, etc, which could day a few days. • 2nd would be to have your DR site managed by hybris Managed Services. • 3rd would be to use your own DC as a DR site, We would need to set up a technical call with our combined teams to synch up on the replication strategies. • Our DR services utilizes VMware Site Recovery Manager with storage-based replication. • For enhanced DR, we would include one annual DR test, but more can be added if required. It also includes a customer specific DR and Business Continuity plan.
	SuccessFactors	Each client has a designated primary and backup data center which is geographically separated as well as existing on different power and telecommunications grids.
VMware	Customers can purchase Rackware to provide geographical HA and COOP, but this service is not provided as a core capability of vCA or vCGS. VMware AirWatch AirWatch backs up the production environment from the primary US data center to the secondary US data center. Due to FOIA restrictions and the competitive nature of the EMM landscape, we cannot provide additional backup scheduling or image security procedures.	
FireEye	All backup and restore procedures are in compliance with SOC 2 specifications. Data and server images are backed up digitally and replicated to datacenters in geographically different locations.	
VirtueStream	State of Utah can choose any of our FedRAMP Data Centers to host their applications and the DR location. For illustrative purposes, we have assumed the primary data center will be USDC02 and DR data center would be USDC01. The State of Utah solution has been designed with all workloads running in our San Francisco (USDC02) data center. In the unlikely event of a disaster at the USDC02 facility, State of Utah's production services will be brought back online in the secondary data center located in Northern Virginia (USDC01). The target Recovery Point Objective (RPO) is 30 minutes for virtual machines with a 2 hour Recovery Time Objective (RTO). All production workloads in the primary node will have reserved compute capacity in the secondary node when deployed using Enterprise Reserve µVMs and replicated storage. All virtual machine disaster recovery services are based on storage replication. The primary and secondary data centers are interconnected by diverse private 10 Gbps Sonet rings from separate Tier 1 providers – AboveNet and Level 3. Data is replicated asynchronously and continuously between the two data centers. Virtustream also performs backups on a nightly basis and replicated offsite for further protection. The retention policies are determined by State of Utah per landscape and will be documented during the on-boarding process.	

8.9 Data Protection

8.9.1 Specify standard encryption technologies and options to protect sensitive data, depending on the particular service model that you intend to provide under this Master Agreement, while in transit or at rest.

CA	APM	All data is encrypted via TLS Mutual Auth during transit

	MAA	HTTPS/TLS encrypts the data in-transit. Sensitive data rest is encrypted using native encryption of SQL and NoSQL vendors.
	CA Agile	All data in transit is encrypted - we support TLS 1+. For data at rest we have both database and disk level encryption. DB encryption utilizes Oracle TDE w/ AES-256.
	ASM	All data transmitted between data centers is encrypted in-transit. HTTPS/TLS is used by the ASM dashboard and API.
Google	All connections from customer end point devices to Google's Front End Servers are encrypted with enforced HTTPS sessions using Forward Secrecy. Google websites and properties use robust public key technologies: 2048-bit RSA or P-256 ECDSA SSL certificates issued by a trusted authority (currently the Google Internet Authority G2). All data in transit between Google's Data Centers traverses across Google's private fiber network using a customized, proprietary encryption technology. Google hard drives leverage technologies like FDE (full disk encryption) and drive locking, to protect data at rest. These methods of encryption are fully managed by Google and Google's Key Management Servers based on 128-bit or stronger Advanced Encryption Standard (AES). Encryption Keys and Ciphers Supported by Google Protocols TLS 1.2 TLS 1.1 TLS 1.0 SSL 3.04 QUIC Cipher suites ECDHE_RSA with AES ECDHE_RSA with 3DES ECDHE_ECDSA RSA with AES RSA with 3DES Signing keys RSA 2048 ECDSA P-256 Hash functions SHA384 SHA256 SHA1 MD5	
AODocs	All data in transit is encrypted via SSL/TLS Vendor interfaces are available only via HTTPS Email is exchanged via SMTP/TLS All AODocs data are stored in Google AppEngine.	
Virtru	AES-256 in CBC mode, TLS 1.2 ECDHE	
Salesforce	Encryption Capabilities Salesforce has many customers that are subject to laws pertaining to the processing of personally identifiable information (PII) or personal data. Salesforce offers its customers a broad spectrum of functionalities and customer-controlled security features that its customers may implement in their	

	respective uses of the Salesforce services. Salesforce believes that these provide its customers the flexibility to comply with laws with stringent privacy and security requirements. Data In Motion All transmissions between the user and the Salesforce Services are TLS encrypted with a 2048-bit Public Key. The Services use International/Global Step Up TLS certificates, with AES 256-bit encryption by default. Data At Rest Salesforce includes a feature to encrypt custom text fields (ECF): The fields can be masked appropriately for specific data types (i.e., credit card number, Social Security Number, National Insurance Number, Social Insurance Number). Access to read the masked parts of the fields is limited by the ""View Encrypted Data"" permission, which is not enabled by default. Customers can manage their encryption key based on their organization's security needs and regulatory requirements. Encrypted fields are encrypted with 128-bit keys and use the AES (Advanced Encryption Standard) algorithm. Additional Salesforce Encryption Capabilities Apex Code extends the powerful and proven success of the Force.com platform by introducing the ability to write code that runs on Salesforce servers. This language makes possible the development of a new class of application and features deployed entirely on demand. Using Apex, your Agency can create user interface classes that utilize the Apex crypto class to encrypt field level data up to AES 256-bit encryption. Third Party Encryption Solutions (Additional License Option) Should additional encryption be required, third party solutions such as CipherCloud, Skyhigh, and PerspecSys are available on the Salesforce AppExchange. These solutions offer data loss prevention, user activity and monitoring, malware protection, as well as data protection with encryption and tokenization. Data can be encrypted and masked at rest, keys managed and stored in Salesforce, and compliance controls to prevent unauthorized access to data and keys.
ServiceNow	ServiceNow makes use of encryption for both data in transit and data at rest. ServiceNow provides optional capabilities with regard to the encryption of data at rest within the system, which customers can apply at their own discretion. Encryption in Transit ServiceNow customers access their instances over the Internet using forced Transport Layer Security (TLS) encryption (AES128/256) for all user access. The level of encryption is based on the browser and must be configured by the customer as ServiceNow does not modify any browser settings. All attempts to access ServiceNow over HTTP are redirected to HTTPS. Integration Encryption For integrations such as LDAP and Web Services, ServiceNow provides customers with the ability to encrypt traffic. LDAP can be configured to run over SSL, this requires customers to provide a certificate for the specific LDAP server. Certificates may also be stored within an instance to allow encrypted transmission for Web Services integrations. FTPS and SCP can be used as file transfer methods to securely transfer files to ServiceNow. Email Encryption Customers may configure their instance to generate emails to their users from the instance. ServiceNow provides the capability to receive email over TLS. Customers are able to configure their

	email system to send email to ServiceNow over TLS and ServiceNow will receive that email over TLS. Encryption at Rest ServiceNow can provide three types of encryption for data at rest that are implemented by the customer or by customer request in the case of edge encryption and dedicated hardware. •Column encryption of customer added fields and attachments: Provides data encryption using AES128/256 or 3DES symmetric key encryption. The customer provides the keys for this encryption. Data stored in these fields cannot be searched or reported on and this does not support out of the box fields. •Edge Encryption Proxy: With optional additional cost Edge Encryption, the customers create and control their encryption keys within their own network. Edge Encryption includes a proxy application that resides in a customer's network. This encrypts data before it is sent (also encrypted in transit) from the customer's environment to the ServiceNow instance. The data always remains encrypted whilst stored in the instance and the data along with the keys and the encryption configuration is never accessible by ServiceNow. Requests for encrypted data must also be made through the proxy application and is therefore decrypted only within the customer's network before being sent to their end users client browser. Please note that data encrypted with Edge encryption cannot be used by back-end scripts or processes and searching and reporting behavior is also modified through its use. •Full disk encryption: Provides via self-encrypting hard drives with AES256 bit encryption. This encryption capability is only available through the purchase of dedicated ServiceNow hardware at an additional cost. This delivers "at-rest" protection only and is focused solely on preventing data exposure through the loss or theft of hard disks holding customer data. Wherever possible, ServiceNow leverages existing FIPS 140-2 certified technologies.	
Docusign	Secure, private SSL 256 bit viewing session Anti-tampering controls Signature verification of signing events Unalterable, systematic capture of signing data Digital certificate technology Customer configurable data retention program	
SAP	Ariba	We enforce minimum AES 128-bit encryption using Transport Layer Security (TLS) for all sessions. We encrypt only PCI-DSS data in the database where appropriate and in support of PCI-DSS compliance. All backup media is encrypted using AES 256-bit cipher prior to transporting to off-site storage
	Fieldglass	Our application provides a high level of application-level security through a combination of encryption, page-level access checking, document envelopes, and activity logging. Application security is handled through a combination of programming checks, application server configuration, and database server configuration. Fieldglass uses 2048-bit SSL (HTTPS) encryption for all data transmissions over the public Internet, including data shared between the product and end users and data shared between the product and back-end systems. Data is decrypted on the internal VLAN to allow IDS monitoring. Passwords are hashed using a one-way hash based on the SHA-256 encryption algorithm. The hash value is saved within the database; not the password. The base Fieldglass application does not require data that would require breach notifications if compromised. While customers should not store sensitive personal data, custom fields may be defined by the customer that can be encrypted with AES-256 to capture any pertinent and permissible data points. These fields can also be optionally masked from view while entering and viewing the fields in the application.

	Hanna	Initial encrypted data load - physical encrypted data transfer possible Encrypted connection to HEC DC - SAP solutions support various VPN-device vendors and specifications that can be used to setup a secure and encrypted tunnel between cloud solutions from SAP on the customer network segment and the customer site. Optional Data at Rest encryption - HANA encryption at Rest activated during system build upon request. Moreover data at rest is properly protected against unauthorized access, these controls include •Physical security controls in SAP HEC Datacenters in place •Physical separation of "online" storage and backup (physically separated DC sections) •Strict User and Access Management (segregation of duties) •Authorization Management according to the need to know principle also for administrative accounts, e.g. DBAs have limited authorizations to perform DB operation only •Security Logging and Security Monitoring for critical activities / access Optional encryption in transit can be configured on customer request which requires a different subset of DC's from delivery perspective.
	Hybris	Encryption is provided through SSL connectivity at the web application layer as well as VPN secure encrypted tunnel for back-office integration connectivity. Further encryption capabilities are available through the hybris Advanced Security Module (optional).
	SuccessFactors	All data in the system is treated as highly sensitive information. The application and infrastructure offers Strong Encryption, Encryption in Transit and Encryption at Rest, including the following (some of these are options that are not included in the base services): Transport Layer Security (TLS) technology, consisting of a public key and a private key, to protect sensitive information. The public key is used to encrypt information and the private key is used to decipher it. When a Web browser points to a secured domain, a handshake authenticates the server (website) and the client (browser). An encryption method is established with a unique session key. Customers may then begin a secure session that facilitates message privacy and integrity. Hitachi SAN storage arrays provide a reliable safe, secure data storage environment. We use AES-256 bit encryption to secure data at the block level of our storage systems. Backups are performed ""disk to disk"". Data is transported over 3DES VPN and stored on encrypted disk using Data Domain replication technology
VMware	VMWare IaaS Services Data in transit will be encrypted based upon the customers selected method of transport (SSL or IPSEC VPN). Data at rest encryption is the responsibility of the customer. By example HyTrust is an endpoint encryption choice for many vCloud Air customers. VMWare AirWatch AirWatch leverages strong, non-proprietary encryption algorithms to protect applicable data at rest and in transit. Due to FOIA restrictions and the competitive nature of the EMM landscape, we cannot provide specific encryption algorithms and protocols.	
FireEye	Each of the FireEye offered solutions have their own implementations and practices concerning encryption:	

	1.Email Threat Prevention (ETP) ETP offers TLS encryption support for data in transmission. ETP only stores email found to contain malware or malicious content and does not encrypt this data. 2.Mobile Threat Prevention (MTP) All data in transit is protected using standard TLS encryption. The database itself is not encrypted. However, all systems are under strict security and access control rules, in compliant with SOC 2 regulations. 3.Threat Analytics Platform (TAP) All data in-transit between a customer environment and TAP instance in Amazon AWS is encrypted with a 256-bit Twofish key. No customer data is stored on disk, however data stores leverage Amazon AWS S3 encryption settings. 4.FireEye as a Service (FaaS CV) FireEye appliance communications, and FireEye as a Service (FaaS) non-person entity (NPE) secured inter-process communications employs industry standard HTTPS encrypted web interfaces, and multifactor SSH management access for the end-to-end protection of sensitive customer data. In addition, FaaS communicates with FireEye appliances with additional layers of protected symmetric key exchanges protecting and establishing encrypted channels for inter-device information.
VirtueStream	Encryption keys are generated at the time of backup application install on the Client VM(s). Encryption keys are at least AES-128 but can be AES-256. Keys are stored on the backup system databases using the encryption key management tool. The data about the keys on the database is in an unreadable format and cannot be decrypted.

8.9.2 Describe whether or not it is willing to sign relevant and applicable Business Associate Agreement or any other agreement that may be necessary to protect data with a Purchasing Entity.

Carahsoft would be willing to sign Business Associate Agreements or similar agreements that are set forth with a purpose of protecting customer data.

8.9.3 Offeror must describe how it will only use data for purposes defined in the Master Agreement, participating addendum, or related service level agreement. Offeror shall not use the government data or government related data for any other purpose including but not limited to data mining. Offeror or its subcontractors shall not resell nor otherwise redistribute information gained from its access to the data received as a result of this RFP.

Agreed and understood. Carahsoft and its' subcontractors will not use any government data for purposes other than those outlined within the frameworks of this contract.

8.10 Service Level Agreements

8.10.1 Offeror must describe whether your sample Service Level Agreement is negotiable. If not describe how it benefits purchasing entity's not to negotiate your Service Level Agreement.

CA	APM	The target availability SLA of 99.8% is standard and not negotiable
	MAA	The target availability SLA of 99.8% is standard and not negotiable
	CA Agile	The target availability SLA of 99.8% is standard and not negotiable
	ASM	The target availability SLA of 99.8% is standard and not negotiable
Google	Google maintains a single SLA for all customers.	
AODocs	AODocs maintains a single SLA for all customers.	
Virtru	Agreement can be negotiated for certain large customers.	

Salesforce	Salesforce does not typically offer Service Level Agreements as part of the base service offering. Our approach is to offer a service with high availability and fast resolution of problems. If a customer requires an SLA it will be negotiated separately. The persistence layer underlying Salesforce Platform is proven database technology that powers all of Salesforce's products today, serving more than 150,000 organizations and over 4 billion transactions per day with an average request response time of less than .25 seconds all with an average up time of 99.9+ percent. Salesforce uses commercially reasonable efforts to make its on-demand services available to its customers 24/7, except for planned downtime, for which Salesforce gives customers prior notice, and force majeure events. Excellent availability statistics are critical to Salesforce's customers' success and to the success of Salesforce as a company. Live and historical statistics on the Salesforce system performance are publicly published at http://trust.salesforce.com/trust/status. Salesforce has maintained high levels of availability across all Salesforce instances since inception. As the only on-demand vendor to provide daily service-quality data on a public Web site (http://trust.salesforce.com), Salesforce proves that we are the leader in availability. And by making its track record completely transparent, Salesforce proves we are worthy of our customers' trust. To ensure maximum uptime and continuous availability, Salesforce provides the best redundant data protection and most advanced facilities protection available, along with a complete data recovery plan—all without affecting performance.	
ServiceNow	ServiceNow's SLA is not negotiable. ServiceNow delivers the same level of world-class support to all customers as described in the "Subscription Service Guide" included with this response. ServiceNow's homogeneous private cloud environment where all applications are on a single platform offers ServiceNow a competitive advantage in being able to concentrate its efforts to make the customer's user experience the best possible. The ServiceNow environment is a private cloud, fully owned and operated by ServiceNow. ServiceNow's experience & understanding of its private cloud and the benefits provided by a consistent infrastructure and standardized processes allow it to provide a high level of security, availability, and performance in a cost effective and reliable manner.	
Docusign	Yes SLA's can be modified per contractual agreement.	
SAP	Ariba	Our SLAs are not negotiable. As mentioned above, the SAP Ariba Cloud Service Level Agreement includes a 99.5% uptime.
	Fieldglass	Our SLA is designed to (i) meet the expectations of our customers and (ii) fit with our operational protocols and capabilities. Because of this our ability to make significant changes to the SLA is limited. However, we are always willing to work with a customer to try and determine how our SLA can address a particular business.
	Hanna	Our SLAs are not negotiable for Support. Under our SLA, System Availability is 99.5% during each month for productive systems. Customers may claim a credit of 2% of Monthly Subscription Fees for each 1% below SLA (not to exceed 100% of Monthly Subscription Fees). This credit may be applied to a future invoice relating to Cloud Service that did not meet the System Availability SLA.
	Hybris	Our SLAs are not negotiable for Support. Under our SLA, System Availability is 99.5% during each month for productive systems. Customers may claim a credit of 2% of Monthly Subscription Fees for each 1% below SLA (not to exceed 100% of Monthly Subscription Fees). This credit may be applied to a

		future invoice relating to Cloud Service that did not meet the System Availability SLA.
	SuccessFactors	Our SLAs are not negotiable for Support. Under our SLA, System Availability is 99.5% during each month for productive systems. Customers may claim a credit of 2% of Monthly Subscription Fees for each 1% below SLA (not to exceed 100% of Monthly Subscription Fees). This credit may be applied to a future invoice relating to Cloud Service that did not meet the System Availability SLA.
VMware	VMware's SLAs are specific to the product or service, and are subject to the product's Terms of Service (which are also provided). The SLA is specific to the product rather than to the customer, to define the expected availability and recourse should the product not meet the stated availability levels. VMware's existing customers include Federal, State and Local government customers as well as commercial customers, who successfully utilize our products in accordance with the current SLA and Terms of Service and their applicable, mandatory laws and regulations. Accordingly, VMware is confident that the existing SLA meets the state and local government requirements, as it is being utilized currently. VMware IaaS Services To best work with our customers and improve our terms in alignment with market requirements, VMware is willing to review the terms of its SLA during negotiations of the Participating Addendum to identify how the existing SLA meets the state's applicable and mandatory laws and regulations. If it becomes apparent to the parties that it is necessary to revise VMware's SLA to comply with the state's applicable and mandatory laws, VMware will enter into discussions about how to best address these requirements Vmware SaaS Services VMware AirWatch AirWatch Service Level Agreements are non-negotiable. AirWatch has a guaranteed uptime SLA of 99.9%. Please refer to the AirWatch Hosted Services Policy for additional information. VMware AirWatch acknowledges that if it is awarded a contract under the RFP that it will annually certify to the Lead State that it still meets or exceeds the mandatory minimum requirements and technical specifications of the RFP.	
FireEye	SLAs are negotiable.	
VirtueStream	Virtustream's Service Level Agreement is generally not negotiable. Our SLAs are one of the strictest in the market place. To change the SLA would mean either changing the design or create operational disruption and higher cost by engaging in non-standard processes and practices. For example, Virtustream's SLA for Tier 1 storage is 10 ms latency. For Virtustream to change this latency means changing the design for Tier 1 storage.	

8.10.2 Offeror, as part of its proposal, must provide a sample of its Service Level Agreement, which should define the performance and other operating parameters within which the infrastructure must operate to meet IT System and Purchasing Entity's requirements.

Below is a sample of Virtustream's Service Level Agreement:

SERVICE LEVEL FRAMEWORK
The service levels ("Service Levels") applicable to the Services specified in Sections 1 and 2 are set forth in Schedule B to this SD ("Service Levels for Cloud Platform Services"). The framework that governs all Service Levels is set forth in this Section.
Commencement of Service Levels
Commencing thirty (30) days from the Service Start Date (as set forth in the applicable Order Form), Virtustream's performance of the Services will meet each applicable Service Level. If Virtustream's performance of the Services

does not meet the applicable Service Level, then Virtustream will use commercially reasonable efforts to restore its performance to meet such Service Level.

Service Level Reports

Service Levels will be calculated and measured monthly by Virtustream on a calendar month basis and reported each month for the previous month. The reports will be provided to Customer by the tenth (10th) working day of the month following that to which such report relates, commencing on the second (2nd) month following the Service Start Date and each month thereafter. The monthly service level report will contain at least the following items: (i) Uptime statistics for the month concerned; (ii) an analysis of reported incidents over the previous month, broken down by type for discussion; (iii) action plans for items giving rise to concern; (iv) comments and observations on any issues arising from Virtustream's performance monitoring activities; (v) recommendations on service delivery strategies to maintain or enhance the service level; and (vi) review of general business requirements ("Service Level Report"). Cloud Platform Services (CPS) has its own specific service levels as described in this document. Cloud Cover Services (CCS) has service levels that pertain to the CCS offerings and are reported separately. Not all Virtustream customers have CCS but all Virtustream customers use CPS.

Service Level Review Meetings

Monthly Service Level review meetings will be conducted by Virtustream with Customer where the monthly Service Level report specified above will be discussed. If any of the Service Levels measured over the previous calendar month period is not achieved in that month, then Virtustream will include the steps taken to rectify the problem in the next monthly Service Level Report. In addition, the issue shall be an agenda topic for discussion at the next monthly service review meeting. Additionally, after restoring service or otherwise resolving any immediate problem as specified in this SD, if Virtustream fails to provide Services in accordance with the Service Levels, Virtustream shall:

a.Promptly investigate and report on the causes of such problem;

b.Provide a Root Cause Analysis of such failure as soon as practical after such failure or at Customer's request;

c.Correct such problem that is Virtustream's fault or responsibility, as soon as reasonably practicable and coordinate the correction of such problem if Virtustream does not have responsibility for the cause of such problem.

d.Advise Customer of the status of remedial efforts being undertaken with respect to such problem;

e.Demonstrate to Customer's reasonable satisfaction that the causes of such problem (that is Virtustream's fault or responsibility) have been or shall be corrected on a permanent basis; and

f.Take corrective actions to prevent any recurrence of such problem (that is Virtustream's fault or responsibility).

Root Cause Analysis

Promptly following Virtustream's failure to meet a Service Level, Virtustream will perform a root cause analysis to determine the reason for that failure. Upon Virtustream's determination of the cause of such failure, it will provide to Customer a preliminary report citing the cause of such failure. If Virtustream determines that the failure was due to Virtustream, an additional report will be provided that details the root causes of the failure, and which details any measures that should be taken to minimize the possibility that such failures will re-occur. Virtustream will correct the problem and use reasonable commercial efforts to minimize the re-occurrence of such failures.

Service Level Exceptions

Virtustream shall not be liable for any failure to meet the Service Levels, to the extent such failure was caused by one or more of the following:

a.A failure of Customer or any of its employees, agents or contractors (including any of Customer's third party service providers) to perform any of its responsibilities under this SD;

b.Any act or omission of Customer or any of its employees, agents or contractors (including Customer's third party service providers or other third parties acting on behalf of Customer);

c.Any hardware, software or other product of a third-party or Customer equipment;

d.Any failure of Customer to secure the proper access rights or maintenance and support services with respect to any component of the Services (e.g., hardware, software, network, maintenance) for which Virtustream does not bear operational responsibility;

e.Downtimes resulting from a Virtustream's scheduled maintenance windows;

f.Customer's reprioritization of the tasks to be performed by Virtustream where such reprioritization causes Virtustream to miss a Service Level;

g.Viruses; provided that the infected Virtustream-provided system had virus protection for which the virus protection software updates were up to date;

h.An election by Customer to purchase a base commitment that is not sufficient to run Customer's system (e.g., If a customer elects to size a µVM pool that is insufficient to run the designated workload);
i.Issues occurring outside of standard working hours (as defined for business level customers) — for which the Service Level Objectives (SLOs) do not apply;
j.Cloud Cover Services (CCS) offerings — for which the Service Level Objectives (SLOs) do not apply;
k.Resolution delays due to lack of client response and/or Customer provided credential based information;
l.Priority levels not agreed upon by both customer and supplier;
m.Claims of performance degradation not substantiated through Customer provided diagnostic testing results.

8.11 Data Disposal

Specify your data disposal procedures and policies and destruction confirmation process.

The disposal of data will vary based on the type of service that is being provided to the Purchasing Entity by Salesforce. As an example, please see Salesforce response for disposal of government data: Data Disposal and Destruction
In the event of termination of the Salesforce service, requests by your Agency made within 30 days after the effective date of termination or expiration of the Subscription Agreement, Salesforce will make your data available to you for export or download. Once the export has been completed, an email will be sent to you containing a link where you can download a .zip file that contains multiple .csv (spreadsheets) files, each representing your Salesforce objects. Your data on disk is flagged within the database and set to inactive status or what can be referred to as a ""soft delete."" This data is no longer available or accessible to the application but is backed up in the full database backup process. The data remains in this state for 180 days; this is done in the event that the customer decides to resume services or needs the data for a legal reason. At 180 days, the data is marked for deletion (""hard delete"") and will be deleted after 30 more days. Once this ""hard delete"" is executed the customer data is physically deleted and non-recoverable from the database. Following the purge, the data will remain on backup for an additional 90 days prior to being overwritten and unrecoverable.

Media Sanitization
Salesforce has an established process for sanitizing media consistent with industry guidelines and consistent with NIST SP 800-88 Guidelines for Media Sanitization [MP-6].

8.12 Performance Measures and Reporting

8.12.1 Describe your ability to guarantee reliability and uptime greater than 99.5%. Additional points will be awarded for 99.9% or greater availability.

CA	APM	CA SaaS production environments have an SLA at 99.8% uptime calculated arrear monthly. 1hr response for P1 issues.
	MAA	CA MAA SaaS production environments have an SLA at 99.8% uptime calculated arrear monthly. 1hr response for P1 issues.
	CA Agile	For Rally SaaS Unlimited Edition customers, our goal is to provide 99.9% up-time during each calendar quarter. If in any calendar quarter an up-time of 99.5% is not met and our customers were negatively impacted (for example, were unable to login to Rally), we will provide a service credit equal to one month of fees for use of the Rally Service.
	ASM	CA SaaS production environments have an SLA at 99.8% uptime calculated arrear monthly. 1hr response for P1 issues.

Google	Google Apps services will be operational and available to the customer at least 99.9% of the time in any calendar month. If Google does not meet the Google Apps SLA, the customer will be eligible to receive service credits.	
AODocs	Altirnao agrees to use commercially reasonable efforts to meet or exceed the Availability Service Level. The Availability Service Level means the Service is available for use by Users for not less than 99.5% of the time excluding the Exclusion Events (as defined below).	
Virtru	Virtru provides the same SLA as Gmail	
Salesforce	Salesforce has maintained high levels of availability across all Salesforce instances since inception. As the only on-demand vendor to provide daily service-quality data on a public Web site (http://trust.salesforce.com), Salesforce proves that we are the leader in availability. And by making its track record completely transparent, Salesforce proves we are worthy of our customers' trust. To ensure maximum uptime and continuous availability, Salesforce provides the best redundant data protection and most advanced facilities protection available, along with a complete data recovery plan—all without affecting performance. Salesforce uses commercially reasonable efforts to make its on-demand services available to its customers 24/7, except for planned downtime, for which Salesforce gives customers prior notice, and force majeure events. Excellent availability statistics are critical to Salesforce's customers' success and to the success of Salesforce as a company. The persistence layer underlying Salesforce Platform is proven database technology that powers all of Salesforce's products today, serving more than 150,000 organizations and over 4 billion transactions per day with an average request response time of less than .25 seconds all with an average up time of 99.9+ percent. Salesforce does not typically offer Service Level Agreements as part of the base service offering. Our approach is to offer a service with high availability and fast resolution of problems. If a customer requires an SLA it will be negotiated separately.	
ServiceNow	ServiceNow's Availablity SLA Is 99.8%, excluding Excused Downtime of up to two hours per month. This is achievable through the use of the Advanced High Availability (AHA) architecture described in 8.8.1 that provides failover capabilities for maintenance and service disruptions to minimize downtime.	
Docusign	DocuSign offers carrier class bank grade, "always on" availability. This means DocuSign has eliminated monthly maintenance (taking 0 minutes of planned downtime per year). We are a multi-year 99.99% operation. Please view the DocuSign Trust site (trust.docusign.com) for additional information.	
QTS	TIA 942 requirements for the design, construction, and management of Tier III facilities is the design basis for all QTS data centers. Using best-of-breed technologies, QTS's highly trained, certified data center professionals tailor efficient and reliable solutions to meet individual customer requirements. Primary commercial power is delivered to facilities through diverse, redundant paths to eliminate single points of failure between the nearest electrical substation (usually on-site) and each piece of customer IT equipment. QTS allows users to inspect the engineering drawings to validate that truly redundant N+1 architectures are in place and that the 99.999% uptime guarantee is supported by sound engineering and operational policies. Meaningful Service Level Agreements are backed by financial penalties spelled out in tailored Master Service Agreements with each customer.	
SAP	Ariba	Our data centers have 99.99% uptime. Our application maintains a 99.% official SLA with the last 12 months seeing 99.98% uptime.
	Fieldglass	For customers hosted in US data centers, we commit to a 99% availability standard. For customers who choose to be hosted in EU data centers, our availability standard is 96.7%. If we fail to meet the availability standard, the

		customer may be entitled to receive a credit equal to two percent (2%) of its transaction fees for the service for that month for each one percent (1%) (or portion thereof) by which we fail to achieve such level, up to one hundred percent (100%) of the fees for such month.
	Hanna	The SAP HEC offers a 99.5% uptime availability SLA for production (PRD) instances and a 95% uptime availability for quality assurance (QAS) and development (DEV) instances. This means that after taking in to account the monthly maintenance window, the TOTAL solution will be available 99.5% of the time - not that we expect it, but this equates to about 3 hours of unscheduled downtime per month. The concept of "total solution" is important because the HEC provides Holistic Solution Availability - our single SLA covers the FULL SOLUTION STACK which means it covers the Infrastructure, Operating System, local DB, the HANA in-Memory DB, and the Application layers. We do not offer individual SLAs on individual layers because if one layer fails, the entire solution is down
	Hybris	The environment is completely redundant and based on a high availability architecture. The hybris private cloud is based on VMWare virtualization and is fully load-balanced. Customer systems reside on a redundant server infrastructure ensuring that if one server (or part of the server infrastructure) fails, a backup is in place to ensure that systems remain operational. The infrastructure is load-balanced ensuring high availability of the system during peak usage periods. The load-balancing allows the systems to support large volumes of simultaneous users balancing the load of activity across multiple servers ensuring peak performance of all systems. Redundancy of Infrastructure Components: • Multihome connectivity to the Internet backbone. Multiple connections to the internet, allows optimizing the best route as well as redundancy. • At an individual component level, all devices have dual physical power connections to protect against any individual power supply failure • Redundant Firewalls • Redundant Routers, • Redundant Load balancers • Virtualized Application and Web servers • Clustered Database - active active cluster mode for enhanced redundancy • High performance SAN storage- from Netapp, with built in redundancy at the disk level (NetApp proprietary RAID technology, similar to a RAID 5) • The data centers provide diverse power (Uninterruptible Power Supply), backup generators and air conditioning systems required to ensure equipment remain online with optimal performance 24/7/365. • SLA: contractually we provide a guarantee on the performance of your application at 99.9% availability.
	SuccessFactors	We contractually guarantee a minimum of 99.5% system uptime, with the exception of regularly scheduled and emergency maintenance.

VMware	VMware's SLAs for vCloud Air. Our Availability Commitment ranges from 99.99% - 99.95 based on the Class of Service. The SLAs are subject to the terms of the applicable Terms of Service for the VMware vCloud Air Service Offerings. Dedicated Cloud 99.99%, Virtual Private Cloud 99.95%, Data Protection 99.95%, Disaster Recovery 99.95%, Virtual Private Cloud On-Demand 99.95% Availability Commitment. IaaS Object Storage: Object Storage powered by Google CLoud Platform (standard) 99.9%, Object Storage powered by Google (durable reduced availability) 99.0% and Object Storage (nearline storage) 99%. vCloud Government Service Dedicated Cloud 99.95% and Virtual Private Cloud 99.9% Availability Commitment.
FireEye	FireEye undertakes all reasonable efforts to ensure the availability for 99.9% of the time during each calendar month. In the event the solution does not meet the monthly service availability, FireEye will provide a credit as outlined in the SLA.
VirtueStream	Virtustream solution for VM workload includes the uptime of 99.99%.

8.12.2 Provide your standard uptime service and related Service Level Agreement (SLA) criteria.

CA	APM	Uptime SLA target is 99.8% CA runs test scripts using application monitoring tools on the Production system to verify that the CA SaaS service is available. Test scripts are run approximately once every ten (10) minutes, twenty-four (24) hours per day, seven days per week, throughout the contracted term of the service.
	MAA	Uptime SLA target is 99.8% CA runs test scripts using application monitoring tools on the Production system to verify that the CA SaaS service is available. Test scripts are run approximately once every ten (10) minutes, twenty-four (24) hours per day, seven days per week, throughout the contracted term of the service.
	CA Agile	See above.
	ASM	Uptime SLA target is 99.8% CA runs test scripts using application monitoring tools on the Production system to verify that the CA SaaS service is available. Test scripts are run approximately once every ten (10) minutes, twenty-four (24) hours per day, seven days per week, throughout the contracted term of the service.
Google	Google Cloud Platform SLA: Google's Cloud platform has SLAs ranging from 99.9 - 99.95% uptime.	
Salesforce	Please see response to 8.12.1 above. Salesforce does not typically offer Service Level Agreements as part of the base service offering. Our approach is to offer a service with high availability and fast resolution of problems. If a customer requires an SLA it will be negotiated separately. Salesforce uses commercially reasonable efforts to make its on-demand services available to its customers 24/7, except for planned downtime, for which Salesforce gives customers prior notice, and force majeure events. Excellent availability statistics are critical to Salesforce's customers' success and to the success of Salesforce as a company. Live and historical statistics on the Salesforce system performance are publicly published.	
ServiceNow	DEFINITIONS (a) "Available" means that the Subscription Service can be accessed by authorized users.	

	(b) “Excused Downtime” means: (i) Maintenance Time of up to two (2) hours per month; and (ii) any time the Subscription Service is not Available due to circumstances beyond ServiceNow’s control, including without limitation modifications of the Subscription Service by any person other than ServiceNow or a person acting at ServiceNow’s direction, a Force Majeure Event, general Internet outages, failure of Customer’s infrastructure or connectivity (including without limitation, direct connectivity and virtual private network (VPN) connectivity to the Subscription Service), computer and telecommunications failures and delays, and network intrusions or denial-of-service or other criminal attacks. (c) “Maintenance Time” means the time the Subscription Service is not Available due to service maintenance. (d) “Availability SLA” means the percentage of total time during which Customer’s production instances of the Subscription Service are Available during a calendar month, excluding Excused Downtime. AVAILABILITY If Customer’s production instances of the Subscription Service fall below the Availability SLA of ninety-nine and eight-tenths percent (99.8%) during a calendar month, Customer’s exclusive remedy for failure of the Subscription Service to meet the Availability SLAs is either: (1) to request that the affected Subscription Term be extended for the number of minutes the Subscription Service was not Available in the month in accordance with the Availability SLA; or (2) to request that ServiceNow issue a service credit to Customer for the dollar value of the number of minutes the Subscription Service was not Available in the month in accordance with the Availability SLA (determined at the deemed per minute rate ServiceNow charges to Customer for Customer’s use of the affected Subscription Service), which Customer may request ServiceNow apply to the next invoice for subscription fees. REQUESTS Customer must request all service credits or extensions in writing to ServiceNow within thirty (30) days of the end of the month in which the Availability SLA was not met, identifying the support requests relating to the period Customer’s production instances of the Subscription Service was not Available. The total amount of service credits for any month may not exceed the subscription fee for the affected Subscription Service for the month, and has no cash value. ServiceNow may delay issuing service credits until such amounts reach one thousand U.S. dollars ($1,000) or equivalent currency specified in the applicable Order Form.	
Docusign	Our industry-leading, global support model is there to back you up, no matter where you do your business. We provide you access to the expertise you want, whether through our communities, our knowledge base and on-demand training, or our team of experienced technical support professionals, who know you and your solutions.	
QTS	99.999% uptime guarantee. Meaningful Service Level Agreements are backed by financial penalties spelled out in tailored Master Service Agreements with each customer.	
SAP	Ariba	We guarantee a 99.5% system availability percentage during each month for production versions, with the exception of regularly scheduled and emergency maintenance.
	Hanna	Technical Availability for PRD systems - 99.5% Technical Availability for non PRD systems - 95% SAP shall track and report to Customer the “Technical Availability” in a monthly summary report. SAP HEC can offer a contractual SLA of 99.7 on a case by case basis.
	Hybris	SLA: contractually we provide a guarantee on the performance of your application at 99.9% availability.

	SuccessFactors	We guarantee a 99.5% system availability percentage during each month for production versions, with the exception of regularly scheduled and emergency maintenance.
VMware	AirWatch Service Level Agreements are non-negotiable. AirWatch has a guaranteed uptime SLA of 99.9%. Please refer to the AirWatch Hosted Services Policy for additional information. VMware AirWatch acknowledges that if it is awarded a contract under the RFP that it will annually certify to the Lead State that it still meets or exceeds the mandatory minimum requirements and technical specifications of the RFP.	
FireEye	FireEye cloud solutions are available 99.9% of the time in any calendar month, other than mutually agreed upon and scheduled downtime.	
VirtueStream	Virtustream IaaS Compute is comprised of computing resources hosted in secure data centers that replace the physical computing hardware traditionally housed on Customer site. These resources include physical servers which are logically divided into VMs (virtual machines), each with an allocation of CPU and memory, and linked to storage. Terms used in the detailed descriptions below: •µVM. Pronounced "micro VM," this is Virtustream's fine-grained unit of measurement designed to accurately measure the actual consumption of cloud resources. A µVM is a unit of computing resources, comprised of CPU, memory, storage IOPS, and associated local network bandwidth. The usage of each µVM resource component (CPU, memory, storage input/output, and network bandwidth) is measured at five minute intervals — one unit each for 200MHz of CPU, 768MiB of memory, 40 storage fabric input/output operations per second (IOPS), and 2Mbps of local network bandwidth. The highest of the four is averaged per hour, and the hour values averaged across the month to determine the overall µVM usage for the month. Note: The measurement is performed at the aggregate level — across Customer's entire µVM resource pool. Bandwidth usage is only within the data center. •Basic Plus uVM. These terms differentiate the two ways Virtustream offers µVMs services. "Basic Plus" µVM services are limited to a single Virtustream data center and have 99.99% availability for the Customer's committed level. "Reserve" µVM service is an equivalent quantity of Basic Plus µVMs reserved at Customer-designated secondary Virtustream data center for on-going operation during disaster events and during scheduled disaster recovery (DR) exercises. In both cases, overage resources required ("surges") up to 20% above the committed level from the contract /order form are provided at the same availability level. If Customer experiences consistent overage above this level, then Customer should reset the committed level. •High Memory. Virtustream offers competitive pricing on compute services for applications that require large amounts of memory (64GiB or more). •Enterprise These terms identify the "zones" within which µVMs are made available for consumption. The "Enterprise" zone is for use by non-Internet facing workloads. Systems deployed into the Enterprise zone are not directly accessible from the Internet. Enterprise Basic Plus µVM (IC-uVM-BASP-ENT) Enterprise Basic Plus µVMs reside in a single Virtustream data center, in the Enterprise zone. Resource availability is 99.99%, and only at the designated data center. Overage resources required ("surges") up to 20% above the committed level from the contract /order form is provided at the same availability level. If Customer experiences consistent overage above this level, then Customer should reset the committed level. Service Level. 99.99% availability for the Customer's committed level. Billing. Monthly, based on resource usage. Tier 0 Block Storage - Local Only (IC-STO-TOA-LOC) Block storage with a Latency Service Level of 3ms that is maintained in a single data center with no replication capability. Billing. Monthly fee, based per GB of storage allocated. Allocated storage is measured every 30 minutes, averaged across the month.	

	Tier I Block Storage - Local Only (IC-STO-T1A-LOC) Block storage with a Latency Service Level of 10ms that is maintained in a single data center with no replication capability. Billing. Monthly fee, based per GB of storage allocated. Allocated storage is measured every 30 minutes, averaged across the month. Tier II Block Storage - Local Only (IC-STO-T2A-LOC) Block storage with a Latency Service Level of 20ms that is maintained in a single data center with no replication capability. Billing. Monthly fee, based per GB of storage allocated. Allocated storage is measured every 30 minutes, averaged across the month. Tier III Block Storage - Local Only (IC-STO-T3A-LOC) Block storage with a Latency Service Level Objective of 40ms that is maintained in a single data center with no replication capability. Billing. Monthly fee, based per GB of storage allocated. Allocated storage is measured every 30 minutes, averaged across the month. Tier 0 Block Storage - Replicated (IC-STO-TOA-REP) Data storage with a Latency Service Level of 3ms that is persisted in Customer's primary Virtustream data center, and replicated to a second data center with an interval to provide a Recovery Point Objective (RPO) of 15 minutes. Service Level. Recovery Time Objective (RTO) of one (1) hour, and a Recovery Point Objective (RPO) of fifteen (15) minutes. Billing. Monthly fee, based per GB of storage allocated. Tier I Block Storage - Replicated (IC-STO-T1A-REP) Data storage with a Latency Service Level of 10ms that is persisted in Customer's primary Virtustream data center, and replicated to a second data center with an interval to provide a Recovery Point Objective (RPO) of 15 minutes. Service Level. Recovery Time Objective (RTO) of one (1) hour, and a Recovery Point Objective (RPO) of fifteen (15) minutes. Billing. Monthly fee, based per GB of storage allocated. Tier II Block Storage - Replicated (IC-STO-T2A-REP) Data storage with a Latency Service Level of 20ms that is persisted in Customer's primary Virtustream data center, and replicated to a second data center with an interval to provide a Recovery Point Objective (RPO) of 15 minutes. Service Level. Recovery Time Objective (RTO) of one (1) hour, and a Recovery Point Objective (RPO) of fifteen (15) minutes. Billing. Monthly fee, based per GB of storage allocated. Tier III Block Storage - Replicated (IC-STO-T3A-REP) Data storage with a Latency Service Level Objective of 40ms that is persisted in Customer's primary Virtustream data center, and replicated to a second data center with an interval to provide a Recovery Point Objective (RPO) of 15 minutes. Service Level. Recovery Time Objective (RTO) of one (1) hour, and a Recovery Point Objective (RPO) of fifteen (15) minutes. Billing. Monthly fee, based per GB of storage allocated.

8.12.3 Specify and provide the process to be used for the participating entity to call/contact you for support, who will be providing the support, and describe the basis of availability.

CA	APM	CA Support can be engaged by telephone or online via CA Support Online at http://www.support.ca.com. CA Support is available 24x7x365. Technical support will be delivered in accordance with customer preference, and will likely include both telephone and email communications. CA Support Online is available 24 hours per

		day and allows customers to manage their cases (i.e. log, view, set severity level, update and close cases). CA Support Online also provides various other useful features, for example: a knowledge base search; product and documentation downloads; fixes, service pack and patch downloads; support utilities; automated notifications; access to communities, beta programs; subscriptions for hyper notifications, etc. While working with CA Support engineers on cases, email communications and a remote access capability can also be used to deliver support services. Secure File Transfer Protocol (FTP) and a secure FTP web client allow for the protected transfer of case file attachments to CA Support, with the web client additionally providing case file transfer protection from CA Support. Files are encrypted and stored securely while on CA systems. Optionally unsecure FTP transfers also are supported."
	MAA	CA Support can be engaged by telephone or online via CA Support Online at http://www.support.ca.com. CA Support is available 24x7x365. Technical support will be delivered in accordance with customer preference, and will likely include both telephone and email communications. CA Support Online is available 24 hours per day and allows customers to manage their cases (i.e. log, view, set severity level, update and close cases). CA Support Online also provides various other useful features, for example: a knowledge base search; product and documentation downloads; fixes, service pack and patch downloads; support utilities; automated notifications; access to communities, beta programs; subscriptions for hyper notifications, etc. While working with CA Support engineers on cases, email communications and a remote access capability can also be used to deliver support services. Secure File Transfer Protocol (FTP) and a secure FTP web client allow for the protected transfer of case file attachments to CA Support, with the web client additionally providing case file transfer protection from CA Support. Files are encrypted and stored securely while on CA systems. Optionally unsecure FTP transfers also are supported."
	CA Agile	Support is available 24/7 and a contact number will be provided upon completion of the contract.
	ASM	CA Support can be engaged by telephone or online via CA Support Online at http://www.support.ca.com. CA Support is available 24x7x365. Technical support will be delivered in accordance with customer preference, and will likely include both telephone and email communications. CA Support Online is available 24 hours per day and allows customers to manage their cases (i.e. log, view, set severity level, update and close cases). CA Support Online also provides various other useful features, for example: a knowledge base search; product and documentation downloads; fixes, service pack and patch downloads; support utilities; automated notifications; access to communities, beta programs; subscriptions for hyper notifications, etc. While working with CA Support engineers on cases, email communications and a remote access capability can also be used to deliver support services. Secure File Transfer Protocol (FTP) and a secure FTP web client allow for the protected transfer of case file attachments to CA Support, with the web client additionally providing case file transfer protection from CA Support. Files are encrypted and stored securely while on CA systems. Optionally unsecure FTP transfers also are supported."
Google	Customers are entitled to direct Google support in additional to whatever Support Services the reseller has to offer. Google has a published Technical Services Support Guide for both Google Apps and Google Cloud Platform that describe the hours of operation, how to get after hours	

	support, how to set the priority on a case, how to contact Google, and what the target response times are.
AODocs	Customers are entitled to direct AODocs support in additional to whatever Support Services the reseller has to offer.
Salesforce	Salesforce is proposing the Premier+Success Plan. Your Agency can cover all of its bases with this plan: support, training, and administration. It's what the + is all about. The Premier+ Success Plan gives you all the benefits of our Premier success plan, including a support rep assigned to your organization, priority case routing, 1-hour response time, 24x7 phone support, unlimited usage of our entire online course library, plus one very helpful addition: access to your own team of expert Salesforce administrators. This lets you focus on design and management while we support your configuration. The Premier+ Success Plan includes: ● Unlimited access to our entire online course catalog of 100+ courses ● 24x7 toll-free phone support ● Priority case queuing and routing ● Quick 1-hour response time ● An assigned support account rep ● Force.com code troubleshooting ● Customizable end-user course templates ● Premier Success Review to measure usage and trends ● Access to our pool of Salesforce Certified Administrators who can configure and maintain your Salesforce edition ● Premier Success Review to measure usage and trends ● Includes administration services: Get configuration help. Request 100+ routine configuration updates like creating users, reports, workflow, and dashboards. You take online administration training to learn the basics, then you tell us your business requirements. Our team of certified administrators updates your Salesforce system. Subject to the Government Cloud Premier+ Success Plan outlined above, access to systems and permissions which could permit access to Customer Data inside of the Salesforce Government Cloud storing U.S. government, U.S. government contractors, and FFRDC Customer Data will be restricted to Qualified U.S. Citizens. Qualified US Citizens are individuals who are United States citizens, and are physically located within the United States when accessing the Salesforce Government Cloud systems; and have completed a background check as a condition of their employment with Salesforce.Severity Levels & Response TimesIssues will be categorized and handled according to an assigned severity level, as follows: Level 1 - Critical Response time: 1 Hour* Critical production issue affecting all users, including system unavailability and data integrity issues with no workaround available. Level 2 - Urgent Response time: 2 Hours* Major functionality is impacted or significant performance degradation is experienced. Issue is persistent and affects many users and/or major functionality. No reasonable workaround available. Also includes time-sensitive requests such as requests for feature activation or a data export. Level 3 - High Response time: 4 Hours**

	System performance issue or bug affecting some but not all users. Short-term workaround is available, but not scalable. Level 4 - Medium Response time: 8 Hours** Inquiry regarding a routine technical issue; information requested on application capabilities, navigation, installation or configuration; bug affecting a small number of users. Reasonable workaround available. Resolution required as soon as reasonably practicable. *24/7 Severity 1 and 2 coverage includes weekends and holidays **Severity 3 and 4 target response times include local business hours only and exclude weekends and holidaysOverview of Support Escalation PathAn issue is received by Tier 1 Support Rep who will document details and attempt to resolve. In the event that the problem cannot be resolved at this level, case will be escalated to a Tier 2 Support Rep for further analysis. Occasionally, a Case may be received for which technical understanding or indicated fix exceeds the responsibility of Support. These issues are quickly brought to the attention of R&D through the Tier 3/QA channel. Throughout the lifecycle of the case, customer will receive regular updates from the case owner at regular intervals based on case severity. Customers can work with their Support Account Specialist (SAS) if assigned through the purchase of Premier Support as a point of escalation should the need arise. Step-by-step escalation path: •Case is logged via Help Portal, Phone or through Live Chat •Depending on the functional area of the case a Tier 1 Support Rep from the appropriate skill group responds to the user confirming that the issue has been received and is in process. •Tier 1 analyzes the issue from the perspective of customer provided information in the case. •Tier 1 makes contact (phone or email) with the customer and gathers more information including any access needed to reproduce the problem. •With all necessary information gathered, Tier 1 will attempt to resolve the issue with the customer. •When resolution cannot be immediately achieved, Tier 1 Support Rep will escalate to a Tier 2 Support Rep in the same skill group. Tier 2 Support Rep will take all steps necessary to reproduce, understand and resolve the issue. •Technical Issues that cannot be resolved by the Tier 2 Support Rep are escalated to Tier 3. This escalation will provide a deeper layer of analysis with the possibility of escalation to QA/Development for Application issues and Escalation to Operation Services for Infrastructure issues as needed. •Functional Issues that cannot be resolved by Tier 3 are escalated to Product Management. •If it is an application Issue, necessary Development work will be performed, tested and a patch created. •Issue Fix Submitted to Operations for Infrastructure issues. •Issue Fix deployed. •Tier 2 Support Rep confirms success of Bug Fix in addressing the problem. •Tier 2 Support Rep contacts customer and confirms that the issue is Resolved. •Case is closed"
ServiceNow	Customer Support is provided by ServiceNow 24 hours a day, 7 days a week, including all holidays. Customer may contact ServiceNow using one of the following means: •Support Portal at https://hi.service-now.com/. Customer may get login access to this self-service portal by contacting its ServiceNow administrator. •Phone using one of the numbers at http://www.servicenow.com/support/contact-support.html. Customer shall contact ServiceNow's authorized reseller in accordance with its agreement with the reseller.

	See the "Customer Support Policy" contained within the "Subscription Service Guide" included with this response for more information.
Docusign	Enterprise Premier support provides 24x7 Live Phone Support.
QTS	Dedicated support staff is available 24x7x365 to generate and track incidents to resolution QTS Customer Portal provides round-the clock visibility into your environment
VMware	Global Support Services
FireEye	FireEye offers 24/7 technical support and its technical support centers around the globe in a follow-the-sun model. •Milpitas, CA, USA (UTC -7 hours) •Reston, VA, USA (UTC -4 hours) •Dublin, Ireland (UTC) •Singapore (UTC +8 hours) •Sydney, Australia (UTC +10 hours) FireEye Support is available via telephone, email, live chat, and web. Phone: U.S: +1 877-347-3393 (877 FIREEYE) Email: Support@FireEye.com Web Support: https://www.fireeye.com/support/get-support.html Support Programs: https://www.fireeye.com/support/support-programs.html
VirtueStream	Virtustream will work collaboratively with State of Utah to develop / maintain a relationship structure that leads to quick resolution, regularly scheduled status meetings, and quarterly business reviews. Virtustream will assign multiple key personnel to State of Utah including an Executive level sponsor. The primary point of contact will be Virtustream's Technical Account Manager (TAM). The TAM is responsible for daily activities/interaction and understanding/ensuring State of Utah's objectives are met at a minimum. Optimizations and other improvements to processes/standard operating procedures are delivered by the TAM in coordination with other Virtustream staff working behind the scenes. The TAM will coordinate day-to-day operation, service level management and SL reporting. The following outlines Virtustream's approach to service desk escalation and issue resolution. Escalations within Virtustream Virtustream will provide Level 0 and Level I support and first call resolution where possible, as determined by Virtustream. Where first call resolution is not possible, the Virtustream Service Desk provides incident management for Incidents and Urgent Service Requests escalated to Level II and Level III resources as defined below. In the event that Virtustream's Response to an Incident is not acceptable to the Customer, Customer can contact the Virtustream Service Desk and request escalation to the head of the Service Desk. Virtustream shall, upon receipt of any such request, immediately escalate the issue to the head of the Service Desk or technical team as appropriate. Service Request Prioritization Service Requests are assigned a priority of either 'Urgent' or 'Standard' and are queued for fulfillment with the corresponding priority. All Service Requests will be reviewed by the Virtustream Service Desk, who will determine the appropriate priority to assign with collaboration of Customer. Incident Prioritization All Incidents that are reported to the Virtustream Service Desk, or that Virtustream otherwise becomes aware of, will be initially assigned a priority by the Virtustream Service Desk as set forth below. Internal escalation for Incidents to Level II and Level III resources are based on the priority level assigned to the Incident.

Incident Prioritization			
Priority/ Severity	**Definition**	**Response Time Service Level**	
1	Major part of the system is unavailable/not operating correctly, affecting multiple users. No workarounds in place and business operations are not possible. **Or** Incident has a critical impact on the business (e.g., loss of the Exchange Production server impacting all users).	**30 minutes**	Response time will be within indicated time beginning from when the customer creates a ticket or a monitoring event is validated. Additional resources are engaged via Virtustream's on Call Process.
2	Part of the system is unavailable/not operating correctly, affecting users in a single function. No workarounds in place and business operations in this function are not possible/severely impacted. **Or** Incident has a serious impact on part of the business (e.g., a configuration change is impacting a small subset of users).	**60 minutes**	
3	Part of the system is unavailable/not operating correctly, affecting users in a single function. Workarounds in place, but business operations are impacted, although not severely. **Or** Incident has a temporary impact on users and is non critical or is a development issue (e.g., email is slow to deliver)	**4 hours**	
4	Incident that is causing inconvenience to the business, but not impacting operations. **Or** Incident has a minor impact on users or business, or issue is a request for further information	**1 business day**	

Virtustream will assign a Technical Account Manager starting on day 1 of the contract. The Cloud Platform, Cloud Cover (managed services), and Cloud Security team's will also be assigned to State of Utah upon execution of the contract. All of the individuals assigned to the State of Utah account have significant years of experience in their fields.

The TAM assigned to State of Utah will provide reports ad hoc but also on a quarterly basis. The quarterly business reviews include but are not limited to performance measurements, service requests. On a monthly basis, the TAM will provide a consumption report detailing the items consumed by each virtual machine. This delivers a very granular cost breakdown to State of Utah which will allow the data to be carved multiple ways. Also, information can be gathered by the State of Utah team any time they want from the xStream portal. State of Utah can also issue a ticket to Virtustream operations center to request information as well. The TAM will conduct scheduled meetings and be in constant contact with State of Utah. The TAM is an extension of the State of Utah team.

Virtustream defines a Root cause analysis (RCA) as the formal process, documented in writing by Virtustream and approved by Customer, to be used by Virtustream to diagnose problems at the lowest reasonable level which includes a report of the corrective action to be taken and defined timelines for corrective actions, which shall eliminate, to the extent reasonably possible, repeat failures. The following details the RASCI for RCA's:

	Role/Function	Customer	Virtustream
	Request Root Cause Analysis tickets by contacting the Virtustream TAM (Customer requests Incident report/Problem record)	R/A	S
	Document, track and manage all Problem tickets using ITSM system	S	R/A
	Provide Problem management review and Root Cause Analysis (RCA) for all in-scope P 1 Incidents (preliminary report within 48 hours; final within 15 calendar days)	S	R/A
	Provide Problem management and RCA of identified Problems (e.g., reoccurring events, alerts) - investigate and diagnose	S	R/A

8.12.4 Describe the consequences/SLA remedies if the Respondent fails to meet incident response time and incident fix time.

CA	APM	In the event that the Service Level Availability committed decreases below the Threshold for Service Availability Default, Minor or Major, Customer may be entitled to take action as outlined in the contract.
	MAA	In the event that the Service Level Availability committed decreases below the Threshold for Service Availability Default, Minor or Major, Customer may be entitled to take action as outlined in the SaaS Listing.
	CA Agile	In the event that the Service Level Availability committed decreases below the Threshold for Service Availability Default, Minor or Major, Customer may be entitled to take action as outlined in the contract.
	ASM	In the event that the Service Level Availability committed decreases below the Threshold for Service Availability Default, Minor or Major, Customer may be entitled to take action as outlined in the SaaS Listing.
AODocs	If AODocs does not meet the SLAs, the customer will be eligible to receive a service credit.	
Virtru	Email support@virtru.com	
ServiceNow	ServiceNow or its authorized reseller, as applicable, will use reasonable efforts to meet the target response times and target level of effort stated in the "Customer Support Policy" contained within the "Subscription Service Guide" included with this response for more information.	
SAP	Ariba	As part of the Cloud subscription, Ariba provides Customer Support services to help diagnose, troubleshoot and resolve functional and technical problems for all users. Ariba's award winning customer service staff can be contacted via phone (toll free), email or Web form Monday-Friday, 24/5 in multiple time zones and languages. Ariba Connect, our online support portal provides 24/7 support for service and enhancement requests. Customers may also choose to purchase ExpertCare. ExpertCare provides each customer with a named contact within Ariba that acts as an ExpertCare Manager for the customer and is knowledgeable about customer specific business process, configurations and customizations.
	Fieldglass	Our best practice is that the program office (managed by the State of Utah or your chosen MSP) provides first-level support for end users including hiring managers, approvers, suppliers, etc. Fieldglass' multi-lingual helpdesk is available by phone, email or web form 24x7x365. Our English language helpdesk is located at our corporate headquarters in Chicago. Merlin Information Systems Ltd., a UK entity, provides helpdesk service in French, German and Japanese from its Manila,

		Philippines and Debrecen, Hungary locations. We are prepared to assist with technical, functional or administrative questions about the Fieldglass application.
	Hanna	Customer key users have several options to communicate incidents into SAP Managed Cloud Delivery. Primary entry point: The best and easiest way to get an incident resolved is by creating and sending incidents directly to SAP Managed Cloud Delivery Service Teams via the SAP Support Portal. This communication channel ensures that all support teams are notified and therefore is the most preferred way to contact SAP on support/service related issues. Alternative option to the primary entry point: Customer key user can also communicate incidents by telephone via the SAP Customer Interaction Center (CIC) (e.g. in case of facing challenges in submitting an incident via the SAP Support Portal). Exceptional option: During business hours, customer key user may also communicate urgent incidents by contacting designated SAP Managed Cloud Delivery service contacts like Customer Engagement Service Manager (CESM) to create an incident on behalf of the customer. However – as already mentioned - this is not the preferred way of communication, but only should be applied in exceptional cases. Support times are contractually agreed upon with each individual customer organization. The SAP Managed Cloud Delivery (MCD) Service Desk and the Service Teams are spread across Europe, Americas and Asia.As a result of the global set-up across several time zones, SAP MCD Service Desk is able to provide worldwide 24/7 support to customers, throughout the entire year and according to the “Follow-The-Sun-Principle”.
	Hybris	Key service levels are delivered through service level objectives, which provide for uptime of 99.9 for the hosted environment. Furthermore, monitoring is in place to report and alert upon uptime and response times of the environment to ensure best possible performance. The following support is specifically for the SAP Hybris Commerce, Cloud Edition. Customers can contact SAP Hybris Commerce, Cloud Edition technical support by toll-free telephone number or e-mail 24 hours per day, seven days per week. Based on the priority level, SAP Hybris’s support personnel will attempt to provide Customer with remote assistance for reported issues. Contact information for technical support is as follows: Toll-Free Telephone Number: 888-944-2664 ext 6 In the event that Customer contacts SAP Hybris support, SAP Hybris shall respond to such reports as follows: Priority Level : Characteristics Response Time Resolution Time Objective

		Priority Level 1 Fatal Issue: Problem causing the Customer Website to cease from operating. This situation is generally described as a total failure. 25 Minutes (7x24) 2 hours Priority Level 2 Major Issue: Problem causing the Customer Website to experience major problems with it ability to operate. This situation exists when the Customer Website is partially failing however it is still able to function. 25 minutes (7x24) 12 hours Priority Level 3 Degradation of Performance: Problem affecting only certain non-critical functions of the Customer Website. This situation is occurring when the Customer Website is usable but has certain limited functions. 2 hours 1 business day Priority Level 4 Minor Issue: This situation includes all other non-critical problems. It is present when the Customer Website is usable however the problem results in a minor issue affecting it. 2 hours 3 business days Upon receipt of a service call classifying the priority level, SAP Hybris will deploy commercially reasonable efforts to respond and assist in the resolution of the problem. Application support for code developed by Customer or its implementation partner will be provided by Customer or Customer's implementation partner. If SAP hybris provides SAP Hybris Commerce, Cloud Edition support to a Customer as requested by Customer, and it is subsequently revealed that SAP Hybris was not responsible for the problem or the problem was not classified correctly by the customer, Customer will pay SAP Hybris on a time and materials basis for such support and assistance.
	SuccessFactors	
VMware	Our Availability Commitment for VMware AirWatch is 99.9%. The SLAs are subject to the terms of the applicable Terms of Service for VMware AirWatch. If the Availability of a class of service that you purchase is less than the associated Availability Commitment, then you may request Service Credits for that affected class of service. Availability in a given month is calculated according to the following formula: "Availability" = ((total minutes in a calendar month – total minutes Unavailable) / total minutes in a calendar month) x 100 A class of service will be considered "Unavailable," subject to the Service Level Agreement Limitations set forth below, if VMware's monitoring tools determine one of the following events has occurred ("SLA Event"). The total minutes that a class of service is Unavailable for a particular SLA Event is measured from the time that VMware validates the SLA Event has occurred, as defined below, until the time that VMware resolves the SLA Event such that the Service Offering is Available to you. If two or more SLA Event occurs simultaneously, the SLA Event with the longest duration will be used to determine the total minutes Unavailable.	

	1. Each of the following will be considered an SLA Event for the Dedicated Cloud, Virtual Private Cloud, or Virtual Private Cloud OnDemand Services: a) Any of the network interfaces of the Service Offering Network are unavailable for more than three (3) consecutive minutes. The "Service Offering Network" means the network that extends from the network interfaces of physical host servers for a class of service to the outside network interfaces providing the Service Offering's public internet connectivity. b) The data store(s) associated with your block level storage for a class of service are unavailable for more than three (3) consecutive minutes. c) The self-service console, available at https://vchs.vmware.com, cannot successfully authenticate a simulated user for more than five (5) consecutive minutes. d) Your running virtual machines for a class of service become inaccessible for more than five (5) consecutive minutes due to physical host server failures. 2. Each of the following will be considered an SLA Event for the Data Protection Service: a) The backup storage repository associated with your Data Protection service is unavailable for more than three (3) consecutive minutes. b) The start time associated with your backup scheduling window is missed for longer than thirty (30) consecutive minutes. c) The standard 24-hour recovery point objective (RPO) is missed for any virtual machines actively enrolled in the service. d) Any restore operation for a virtual machine fails to complete due to backup infrastructure failures. 3. Each of the following will be considered an SLA Event for the Disaster Recovery Service: a) Any of the network interfaces of the Service Offering Network are unavailable for more than three (3) consecutive minutes. b) The data store(s) associated with your block level storage for replication is unavailable for more than three (3) consecutive minutes. c) The self-service console, available at https://vchs.vmware.com, cannot successfully authenticate a simulated user for more than five (5) consecutive minutes. d) Your failed-over virtual machines for a class of service become inaccessible for more than five (5) consecutive minutes due to physical host server failures. e) Any built-in service functions for failover testing, planned migration, or live failover and recovery result in virtual machine replicas not powering on in less than 4 consecutive hours from the time a request is acknowledged and approved by VMware. 4. The following will be considered an SLA Event for the Object Storage service: a) A more than five (5) percent Error Rate for more than ten (10) consecutive minutes – where "Error Rate" means the number of valid requests that result in a response with HTTP Status 500 and Code "Internal Error" divided by the total number of valid requests during each five-minute period.
FireEye	FireEye shall use commercially reasonable efforts to correct any reproducible programming error in the Software attributable to FireEye, employing a level of effort commensurate with the severity of the error, provided, however, that FireEye shall have no obligation to correct all errors in the Software.

8.12.5 Describe the firm's procedures and schedules for any planned downtime.

CA	APM	Planned downtime is scheduled, and customers are notified
	MAA	Customers are notified at least two weeks in advance for planned downtime.
	CA Agile	Regularly scheduled maintenance (planned downtime for upgrades and maintenance) where the customer has been given at least eight (8) hours notice does not count as downtime. Unscheduled maintenance, in which the Rally Service is unavailable and

		advance notice was not provided to customers, will be counted against the up-time SLA.
	ASM	Customers are notified at least two weeks in advance for planned downtime.
Google	Google's maintenance routines are done in a manner that ensures there is no need to schedule any downtime.	
AODocs	AODocs's maintenance routines are done in a manner that ensures there is no need to schedule any downtime.	
Salesforce	There are two types of maintenance at Salesforce: System Maintenance and Release Maintenance. System Maintenance is for sustaining the performance, reliability, security, and stability of the infrastructure supporting our services. When maintenance is scheduled, the specific timing and availability to be expected during that time will be communicated to all customers approximately one week in advance of the maintenance window upon login to Salesforce and via a posting to http://trust.salesforce.com/trust/maintenance. In the event of planned maintenance where the services will be unavailable for more than four hours, or that requires customer action in advance, Salesforce endeavors to communicate via email several months in advance. Please Note: If emergency system maintenance is required, customers may be notified less than one (1) week in advance. Major Release Maintenance is for upgrading the services to the latest product version to deliver enhanced features and functionality. Major release dates and times are posted on http://trust.salesforce.com/trust/maintenance approximately one month before release to Sandbox instances. An email notification and blog post regarding Sandbox preview instructions is also sent approximately one month prior to upgrading Sandbox instances. Email notification of major release dates is sent one month prior to upgrading non-Sandbox instances. The Release Notes document describing the new features and functionality is posted in Help & Training one month prior to upgrading non-Sandbox instances. Final release reminders are communicated to all customers approximately one week prior via email and upon logging into Salesforce. Major release maintenance occurs three times per year. The instance will be unavailable for up to five minutes during the release window. Patch Releases and Emergency Releases are used to deliver scheduled and ad hoc application fixes. Patch releases are scheduled weekly and are usually deployed to instances on Tuesday, Wednesday or Thursday, with release to Asia-Pacific instances the following day. Emergency releases are conducted on an as-needed basis and can occur any day of the week. Whenever possible, patches and emergency releases are deployed during off-peak hours and without downtime.	
ServiceNow	ServiceNow notifies customers at least 10 days prior to scheduled maintenance for infrastructure network, hardware or software that might impact service. ServiceNow targets no more than two hours of downtime due to scheduled maintenance per month.	
Docusign	Continuous availability is a necessity for mission-critical business applications in a global world. It's also a key component of the xDTM standard. Zero maintenance downtime means that DocuSign is always available, regardless of the time-of-year, day-of-week, time zone or country. DocuSign's Carrier Grade System Architecture, a first in SaaS, eliminates maintenance downtime, and ensures the highest level of performance resiliency and data integrity. This is accomplished through a combination of advanced high availability architecture, native DocuSign engineering, and both specialized and commodity hardware and software components.	
SAP	Ariba	Scheduled downtime windows for maintenance, upgrades or new releases are provided in the Service Level Agreement. Our uptime percentage takes scheduled maintenance into account.

	Fieldglass	Fieldglass' maintenance windows are as follows: • Friday maintenance window of 11:00 p.m. – 2:00 a.m. Central (Daylight Savings Observed) • Extended maintenance windows are taken with five days advance notice and are typically as follows: - Second Friday of each of the following months: March, July, and November - Critical service packs, security issues, and other emergencies will still be taken if needed with communication as reasonable
	Hanna	SAP performs periodic scheduled maintenance activities to maintain security patching levels, application transports, fixes, network maintenance, and other scheduled proactive activities during scheduled maintenance window (agreed to by the customer). The predefined maintenance window is 4 hours per month (for example first friday of every month) SAP may perform additional maintenance services on the Customer's Computing Environment in agreement with Customer, with at least ten (10) Business Days prior notice (which notice may be by email to Customer's nominated contact or posting) of the date and anticipated length of the maintenance window, and provided that SAP adheres to Customer's reasonable requirements as to the timing and duration of any such maintenance. SAP reserves the right to apply critical application and operating system security patches in compliance with the SAP Global Security Team's reasonable recommendations. SAP will use reasonable endeavours to provide Customer with forty-eight (48) hours advance notice regarding the critical patch deployment unless a shorter notice period is required in order to address a critical security issue. Non critical security issues shall be dealt with by Scheduled Maintenance
	Hybris	Typically they are two-hour maintenance windows, with no downtime or on occasion maintenance periods require between 2 to 10 minutes of downtime. Other rare periods which may require further maintenance could have downtime between 30 min to 4 hours.
	SuccessFactors	To address issues such as security patches, hot fixes, updates, equipment upgrades, etc., we has established maintenance windows to perform scheduled maintenance. Scheduled maintenance events typically occur during only one of these windows, roughly every 6-8 weeks. A 14-hour/week window will be used for all critical / most emergency patches and all bug fixes (will include tech stack and application patch sets). We define scheduled downtime maintenance windows as: Midnight to 7 a.m. Fri-Sat local time + midnight to 7 a.m. Sat-Sun local time (dependent upon the data center where the customer data is hosted) We will provide customers with at least a 2 days' notice if a larger maintenance window is needed. Typically, for HCM / LMS products, customers receive a 3-5 day notification (via popup on login). When the system is not available during the maintenance there is a notification page displayed for the outage timing. We plan maintenance events conservatively, and use them sparingly.
VMware	VMware IaaS Services Customers are notified in advance of any expected downtime with vCloud Air services. In the event of an unexpected outages or disruption to the service, customers will be notified via their preferred contact means as soon as possible as per the terms outlined in the Service Level Agreement. VMWare AirWatch	

	We maintain standard SLAs with our customers to provide for downtime • SLAs are defined within the AirWatch Hosted Services Policy Per our Hosted Services Policy, we provide outage credits in the event of a service interruption: • ""AirWatch warrants it will provide Availability of the Hosted Services 99.9% of the calendar month (the "Service Level"). To the extent that the Hosted Services fail to conform to the Service Level, Customer may request service credits ("Outage Credits") as provided herein. A failure or lack of Availability for any period of time of at least one minute during which Customer is unable to utilize the Hosted Services due to AirWatch's failure to provide Customer with the specified services constitutes an "Outage". All Outage measurements will be rounded up or down to the nearest one minute increment, with increments equal to or greater than 30 seconds being rounded up to the next minute. Outage Credits are based on cumulative periods of Outage over a calendar month. Final determinations of the length of the cumulative periods of Outage over a calendar month shall be based on AirWatch's internal monitoring equipment and records. Outage Credits will be taken against only the Hosted Service fees for the month in which the Outage occurred.""
FireEye	FireEye undertakes reasonable efforts to ensure that the service availability maintains a minimum of 99.9% availability. However there are circumstances where the system will be down due to the following: a) "Scheduled Maintenance Period" is the period during which weekly scheduled maintenance may be performed, or a maintenance window otherwise mutually agreed upon by FireEye and Customer. Customers receive notification and announcements for any scheduled maintenance period. b)"Emergency Maintenance" means any time outside of Scheduled Maintenance that FireEye is required to apply critical patches or fixes or undertake other urgent maintenance. If Emergency Maintenance is required, FireEye will contact Customer and provide the expected time frame of the Emergency Maintenance.
VirtueStream	Virtustream planned downtimes start with the weekly change board meeting by the Platform Operations group. All requested changes whether requested by customers or by the operations staff are reviewed, if approved then scheduled. Depending on the nature of the change, routine and planned, the affected customers are notified as early as possible and adjusted based on customer needs. For example, if the scheduled downtime falls on a weekend that a customer plans to do their quarterly close, Virtustream will reschedule. An emergency/urgent change may have less notice for the customers. But in all cases, customers will be notified of the upcoming downtime multiple times, start of the downtime will be specified and the expected duration. Once the downtime is complete, another notification will go out to the affected

8.12.6 Describe the consequences/SLA remedies if disaster recovery metrics are not met.

CA	APM	In the event that the Service Level Availability committed decreases below the Threshold for Service Availability Default, Minor or Major, Customer may be entitled to take action as outlined in contract. Defined, monetary penalties are provided in the SaaS Listing document.
	MAA	Defined monetary penalties are provided in the SaaS Listing document
	CA Agile	See 8.12.4
	ASM	Defined, monetary penalties are provided in the SaaS Listing document
Google	Customers will be eligible to receive a service credit.	
AODocs	Customers will be eligible to receive a service credit.	
Salesforce	Customer data, up to the last committed transaction, is replicated to disk in near-real time at the designated disaster recovery data center, and backed up at the primary data center. Backups are performed daily at primary data center facility without stopping access to the application.	

	For business continuity purposes, Salesforce supports disaster recovery with a dedicated team and a 4 hour recovery point objective (RPO) and 12 hour recovery time objective (RTO). Additional details can be provided with the execution of an NDA between Salesforce and your Agency. In terms of remedies, the Salesforce Service Terms incorporated as part of the End User Licensing Agreement indicate the following regarding Termination allowing customers to terminate the contract at time of renewal: ""User subscriptions will automatically renew for additional periods of one (1) year at the list price in effect at the time of renewal unless You give Your Reseller notice of termination at least 30 days prior to the end of the relevant subscription term.""	
ServiceNow	See 8.12.2 for the Availability SLA.	
Docusign	See 8.12.4.	
SAP	Ariba	Please see the details provided in 8.12.4 response.
	Fieldglass	Please see the answer to Question 8.12.4, above.
	Hanna	Penalties and remediation for SLA violations are detailed in the Statement of Work.
	Hybris	Our SLA provides tenant remuneration for losses they may incur due to outages within the infrastructure.
VMware	For VMware there is a service credit reimbursement structure outlined above. We have detailed recovery procedures that include defined steps, roles and responsibilities and accountable personnel to help ensure streamlined disaster recovery. As conversations progress, AirWatch can provide specific details regarding our disaster recovery timelines and strategies.	
FireEye	FireEye has established formal Business Continuity and Disaster Recovery plan, as well as Incident Response and Recovery Plans to help maximize availability of critical customer-impacting services.	

8.12.7 Provide a sample of performance reports and specify if they are available over the Web and if they are real-time statistics or batch statistics.

CA	APM	A report of the Service's measured monthly SLA is available to Customer upon request
	MAA	Reports are generated periodically and ad hoc. Customers can use their support.ca.com credentials to access private trust site which contains SLA details for the subscribed service.
	CA Agile	Realtime and historical system status can be viewed at https://status.rallydev.com
	ASM	Reports are generated periodically and ad hoc.
Google	Google does not produce customer specific performance reports. The web based Apps Status Dashboard displays real time System Availability Details. Customers can works with their Google reseller to design a reporting system using Google Sheets based on which incident actually impacts their end users. Service availability issues are isolated to specific applications and specific geographically locations and thus would not impact all of your users or your account at all.	
AODocs	AODocs does not produce customer specific performance reports. Customers can visit the AODocs status page: status.aodocs.com. AODocs provides a set a usage reports and AODocs team can also work with the customer to build specific reports	
Virtru	We have realtime monitoring of both server side operations and client side interactions.	
Salesforce	System Performance ReportsOur track record speaks for itself—Salesforce has maintained high levels of availability across all Salesforce instances since inception. As an on-demand vendor	

	providing daily service-quality data on a public website (http://trust.salesforce.com), Salesforce proves that it is a leader in availability. And by making its track record completely transparent, salesforce.com proves it is worthy of customers' trust. A few metrics that we maintain (and publish publicly via our trust.salesforce.com website) are: -Daily Transaction Counts -Daily Transaction Speeds Salesforce is hitting almost 4 billion transactions a day. These transactions are a mix of user interacting with the system and API calls where other systems are bi-directionally interacting with Salesforce. Our Average Transaction Time hovers between 150 and low 200 milliseconds. Some additional published metrics are uptime & availability, planned maintenance windows, and any performance degradation. The Purchasing Entity can view all of this information and more by going to trust.salesforce.com. Customers can also log a case to request system uptime reports for the last 6 months and last 12 months, however, system reports are not automatically distributed.	
ServiceNow	Administrators can view a wide range of performance metrics for their instance and for the machine on which the instance is running, displayed in a graphical format. Add these graphs and their controls to a home page to monitor the performance of instances. Some of these graphs are intended for use by ServiceNow Technical Support to troubleshoot performance issues or help tune your system for maximum efficiency. Each graph enables admins to filter the data by using different measurements, such as maximum and minimum values, means, and medians. The available graphs reflect performance in eight functional areas of ServiceNow. •Database •Discovery •Disk Partitions •Linux Stats •Logging •MySQL Overview •Node Metrics •Replication •ServiceNow Servlet	
Docusign	For real-time data, please visit the DocuSign Trust site (trust.docusign.com) for additional information.	
SAP	Ariba	We provide a monthly report to customers describing the system availability percentage. Depending on the cloud service, these reports are made available either by email, through the cloud service or through an online portal.
	Fieldglass	Fieldglass executes comprehensive performance testing prior to each release to production. Performance testing is executed in accordance with the Fieldglass Performance Testing Standards document. Types of testing performed include regression, load, stress, and endurance. Results are reviewed and approved by senior members of development, QA, IT, and the Chief Architect. Our standards document can be shared upon request while under NDA. During peak periods, Fieldglass will see 12,000 concurrent users with page response times averaging 400-700ms. Across all of 2015, we have a 99.4% success rate in meeting or exceeding all monthly customer SLAs for page response times.
	Hanna	Performance reports on HEC are available to the customer via the SAP One Portal page. It provides the customer among other things: operational info about systems being managed, incident management, security management, user specific settings, planned downtime, etc.

	SuccessFactors	Customers can view hosting performance and availability information real-time at the following link: https://support.successfactors.com/Service_Status.
VMware	VMware IaaS Services VMware vCloud Air provides Web-based capacity reporting via the MyVMware portal. For detailed performance reporting, participating entities may wish to acquire VMware vRealize Operations suite, which is a non-Web based software product which provides real-time and historic performance statistics for vCloud Air. VMWare AirWatch We can provide sample performance testing documents that validate our ability to handle anticipated workload under real-world conditions as conversations progress. We have a dedicated team for scalability and performance testing. They work with both internal teams and customers to conduct testing.	
FireEye	This is not applicable as each of the FireEye offerings are classified as SaaS. The performance of the FireEye cloud environments are continuously monitored and managed by the cloud service operations (CSO) team to ensure secure operation and availability.	
VirtueStream	Service Levels will be calculated and measured monthly by Virtustream on a calendar month basis and reported each month for the previous month. The reports will be provided to Customer by the tenth (10th) working day of the month following that to which such report relates, commencing on the second (2nd) month following the Service Start Date and each month thereafter. The monthly service level report will contain at least the following items: (i) Uptime statistics for the month concerned; (ii) an analysis of reported incidents over the previous month, broken down by type for discussion; (iii) action plans for items giving rise to concern; (iv) comments and observations on any issues arising from Virtustream's performance monitoring activities; (v) recommendations on service delivery strategies to maintain or enhance the service level; and (vi) review of general business requirements ("Service Level Report"). Cloud Platform Services (CPS) has its own specific service levels as described in this document. Cloud Cover Services (CCS) has service levels that pertain to the CCS offerings and are reported separately. Not all Virtustream customers have CCS but all Virtustream customers use CPS.	

8.12.8 Ability to print historical, statistical, and usage reports locally.

CA	APM	A report of the Service's measured monthly SLA is available to Customer upon request
	MAA	Same as above.
	CA Agile	This is available upon request.
	ASM	Customers are sent monthly SLA reports.
Google	See 8.12.7	
AODocs	See 8.12.7	
Virtru	We may be able to publish reports locally for customers.	
Salesforce	Trust.salesforce.com is the Salesforce community's home for real-time information on system performance and security. On this site you'll find: ● Live and historical data on system performance ● Up-to-the minute information on planned maintenance ● Phishing, malicious software, and social engineering threats ● Best security practices for your organization ● Information on how we safeguard your data	

	In addition to the Salesforce Trust site (http://trust.salesforce.com/trust/status) to monitor uptime and performance, your Agency will also have access to a System Overview, which will help you monitor performance and usage of your own Salesforce org. This overview includes: Schema - # and % of custom objects and data storage Business Logic - # and % of Rules, Apex triggers and classes, as well as % of code used License Usage API Usage - # and % of requests in the last 24 hours User Interface - # and % of custom apps, sites, flows, custom tabs and pages Portal Usage The above list is of all the possible metrics that you may have in your system overview.	
ServiceNow	Yes. Instance performance can be viewed locally. Customers can use the Customer Support Portal to obtain information about the real availability of all their instances. Real availability is the percentage of production time that an instance is up and available for use.	
Docusign	Yes. DocuSign offers a number of pre-defined reports to provide detail and summary information on DocuSign usage in the account, such as by Envelope, Recipients, Velocity of signing, and User Access among many other reports. Users can modify report criteria such as data ranges and reports can be scheduled to execute. All reports can be downloaded or Printed locally.	
QTS	Yes	
SAP	Ariba	User access is browser-based, so printing is enabled via the printers that are setup on the user's workstation. There are several "Print" buttons throughout the applications that will open an additional browser window with a printer-friendly format of the screen.
	Fieldglass	Any user with the correct permissions in the system, as specified by the State of Utah, may locally print historical, statistical, and usage reports.
	Hanna	Yes, available
VMware	VMware IaaS Services At the present time, VMware does not provide end user customers with specific reports for SLA performance. VMware tracks the overall health of the environment and will report to customers in the event of an outage. However, specific SLA performance is not delivered as a report, but as an alert. It is currently the customer's responsibility to track downtime within their environments and report to VMware when they believe SLA has been violated. VMWare AirWatch Customers can export and print solution data using interactive dashboards (CSV), reports (PDF, XLS, and CSV), the AirWatch Hub (PDF), and event log (CSV)	
FireEye	Each of the offerings in this response have reporting capabilities local to the system and users with the appropriate access rights.	

8.12.9 Offeror must describe whether or not its on-demand deployment is supported 24x365.

CA	N/A. CA only offers SaaS solutions and manages all aspects of the service. Clients do not have direct access to the environment.
Google	Purchasing entities will subscribe to an initial set of user licenses and can provision new user accounts at their convenience within that range of licenses.
Salesforce	The Salesforce service can be deployed rapidly since our customers do not have to spend time procuring, installing or maintaining the servers, storage, networking equipment, security products,

	or other infrastructure hardware and software necessary. The service is always available and the customer can deploy 24x365 at their own pace.
ServiceNow	ServiceNow is supported 24x365.
FireEye	The FireEye offerings in this response are SaaS service models. Once the application or service is set up there are no further deployment steps necessary. On-demand Self-service options referenced in section 8.1.2.1 are available 24x365.
VirtueStream	Virtustream's self-service portal allows authorized users to deploy resources on-demand 24x365.

8.12.10 Offeror must describe its scale-up and scale-down, and whether it is available 24x365.

CA	N/A. CA only offers SaaS solutions and manages all aspects of the service; monitoring and capacity planning is included as part of the service.
Google	Purchasing entities will subscribe to an initial set of user licenses and can provision new user accounts at their convenience within that range of licenses. If the purchasing entity has exceeded or is about to exceed their user count they can place an order for additional licenses at any time. Scale-down procedures will be handled on the renewal anniversary.
