In May 2024, Joette joined Cambridge as a School Development Manager, representing the organization across six southeastern states: Alabama, Arkansas, Georgia, Louisiana, Mississippi, and Tennessee. Her work focuses on supporting schools in implementing Cambridge programs and ensuring students have engaging, globally recognized educational experiences.

In this role, she leads strategic outreach and engagement efforts, including presenting at local and national conferences. Joette actively researches how Cambridge programs can make a meaningful impact in schools and districts, with a focus on expanding college and career pathways for students. Her work is driven by a deep commitment to creating engaging, inclusive, and globally relevant educational experiences. Joette is proud to support schools in implementing Cambridge programs that empower students and prepare them for success in an ever-evolving world.

Jeff Brewer, Senior School Implementation Manager

Jeff Brewer is a seasoned educator and school improvement leader with more than 25 years of experience in K–12 education, assessment, and curriculum implementation. He currently serves as School Implementation Manager for Cambridge, where he supports more than 300 schools across multiple states. In this role, he partners with district and school leaders to expand student equity and access, strengthen curriculum fidelity, promote professional development aligned with both the Danielson and Marzano teacher evaluation models. His efforts have directly contributed to measurable KPI growth in program success, while also enhancing alignment with Florida Department of Education initiatives such as Bright Futures.

Previously, Mr. Brewer served Marion County Public Schools for over two decades as an Assistant Principal, Cambridge Coordinator, Activities Director, Counselor, Dean, and Teacher. During his tenure, he spearheaded the launch and growth of Cambridge programs at multiple schools, coordinated AP and Cambridge examinations, managed magnet program development, and led his school to recognition as a Cambridge National Demonstration Center and Magnet Schools of America School of Excellence. His experience spans strategic planning, curriculum development, teacher coaching, student support, and large-scale program and budget management. He has also presented at national conferences including High Schools that Work, Model Schools, and Cambridge professional forums.

Mr. Brewer holds advanced degrees in School Counseling and Educational Leadership from the University of Florida and St. Leo University. He is certified in Educational Leadership and School Counseling, bringing both academic expertise and practical leadership to his work with schools and districts.

Tab VII: Other Information

Cambridge provides additional information in this Tab to exemplify, illustrate or explain key processes, resources, and philosophies described in Tabs III, IV and IV. Documents are provided alphabetically. Those in bold are found in the print copy of the RFP. All others are included in the electronic version only.

Tab VIII: Exceptions

1.15 Payment Method

Cambridge will accept Knox County's Credit Card (Visa) as a form of payment. Upon awarding of the contract, we will need to clarify if any merchant fees are assessed if this form of payment is used.

2.7 Criminal History Records Check:

Cambridge International agrees to have employees working with Knox County schools submit to a criminal history record check at their expense, conducted by the Tennessee Bureau of Investigation and the Federal Bureau of Investigation prior to permitting the employees to enter school grounds when students are present pursuant to Tennessee Code Annotated Section 49-5-413. However, due to Covid-19 and Addendum II, we will submit the Criminal History Affidavit of Compliance upon contract award.

2.12 Independent Contractor:

Cambridge International acknowledges that its employees serve as independent contractors and that Knox County shall not be responsible for any payment, insurance or incurred liability. If Knox County needs further clarification about our current coverage, Cambridge agrees to review insurance coverage upon awarding of the contract.

2.19 Right to Inspect:

Cambridge International agrees to Knox County's right to make periodic inspections of the manner and means the service is performed or the goods are supplied and warehoused with the exclusion of DC10, a secure warehouse location in the UK, where our examinations are printed and stored. This request is made to ensure and maintain the integrity of our assessments.

3.5 Award Length:

Knox County reserves the right to purchase other advanced academic products and/or services from other vendors if the need arises. However, the products and services referred to in this solicitation are solely provided through Cambridge International and are copyright and therefore, not provided through any other vendor.

3.9 Contract Execution:

Cambridge International understands and accepts that Knox County will draft a Contract upon award of this proposal. However, Cambridge also requires Letters of Agreement (LOA) with each individual school. The LOA is a binding agreement between Cambridge International and each school registering with us. The LOA sets out the conditions of registration as briefly outlined in Tab IV: Delivery of Services (Table 2: School Registration Process). A copy of the LOA can be provided for review by your legal team upon awarding of the contract.

3.17 Insurance:

Cambridge International understand that upon the notification of Intent to Award, the successful vendor will be required to submit a Certificate of Insurance (COI). Cambridge International requests that upon awarding of the contract that additional information be provided regarding listing Knox County as an additional insured.

3.18.2 Invoice Detail / 3.19 Invoicing Procedures:

Upon awarding of the contract, Cambridge International will work with Knox County to make sure invoices are detailed sufficiently for purposes of payment. Explanation of what supporting documentation might need to be included with invoice will be required as outlined in Tab VI.

3.26 Pricing:

Pricing has been outlined in Tab VI (Proposed Cost) in detail. Cambridge International has estimated an average 3-year price for the 36 month period of this contract as outlined in Tab VI.

VICTOR, NY 14564-0000

Policy Period

From: JULY 31, 2025 To: JULY 31, 2026
12:01 A.M. standard time at the Named Insured's mailing address shown above.

Premium Payment

The First Named Insured shown in the Declarations is responsible for the payment of all premiums and will be the payee for any return premiums we pay.

Premium Audit

Certain classifications within our rates and rules indicate that premiums calculated therefrom can be significantly affected by large increases or decreases in your business results. Based upon our underwriting review of information provided by you, we may at our discretion perform a premium audit. You may also request such an audit.

If an audit is conducted and additional premiums are due, they are payable upon notice to the First Named Insured. If as a result of an audit the premium paid is greater than the earned premium, we will return the excess to the First Named Insured. The First Named Insured must keep records of the information we need to perform the audit and send us copies at such times as we may request.

CHUBB®

Liability Insurance

Endorsement

Policy Period	JULY 31, 2025 TO JULY 31, 2026
Effective Date	SEPTEMBER 30, 2025
Policy Number	9950-96-26 GAB
Insured	CAMBRIDGE UNIVERSITY PRESS AND ASSESSMENT
Name of Company	GREAT NORTHERN INSURANCE COMPANY
Date Issued	SEPTEMBER 30, 2025

This Endorsement applies to the following forms:

GENERAL LIABILITY

Under Who Is An Insured, the following provision is added.

Who Is An Insured

Additional Insured - Scheduled Person Or Organization

Persons or organizations shown in the Schedule are **insureds**; but they are **insureds** only if you are obligated pursuant to a contract or agreement to provide them with such insurance as is afforded by this policy.

However, the person or organization is an **insured** only:

- if and then only to the extent the person or organization is described in the Schedule;
- to the extent such contract or agreement requires the person or organization to be afforded status as an **insured**;
- for activities that did not occur, in whole or in part, before the execution of the contract or agreement; and
- with respect to damages, loss, cost or expense for injury or damage to which this insurance applies.

No person or organization is an **insured** under this provision:

- that is more specifically identified under any other provision of the Who Is An Insured section (regardless of any limitation applicable thereto).
- with respect to any assumption of liability (of another person or organization) by them in a contract or agreement. This limitation does not apply to the liability for damages, loss, cost or expense for injury or damage, to which this insurance applies, that the person or organization would have in the absence of such contract or agreement.

CHUBB®

Liability Endorsement
(continued)

Under Conditions, the following provision is added to the condition titled Other Insurance.

Conditions

Other Insurance – Primary, Noncontributory Insurance – Scheduled Person Or Organization

If you are obligated, pursuant to a contract or agreement, to provide the person or organization shown in the Schedule with primary insurance such as is afforded by this policy, then in such case this insurance is primary and we will not seek contribution from insurance available to such person or organization.

Schedule

Title: Finance Director Date: 03 October 2025

Equal Employment Opportunity

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:
Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

(3) The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.

(4) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(5) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(8) The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance:

Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

Clean Air Act and Federal Water Pollution Control Act

Contractors and subcontractors will comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations

will be reported to the U.S. Department of Education (DOE) and the Regional office of the Environmental Protection Agency (EPA).

Debarment and Suspension
A contract award will not be made to a party listed on the governmentwide exclusions in the System for Award Management (SAM).

Lobbying
The Contractor certifies, to the best of its knowledge and belief, that:

a. No federally appropriated funds have been paid or will be paid, by or on behalf of the Contractor, to any person for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

b. If any funds other than federally appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with any contract, grant, loan, or cooperative agreement, the Contractor shall complete and submit Standard Form-LLL, “Disclosure Form to Report Lobbying," in accordance with its instructions.

c. The Contractor shall require that the language of this certification be included in the award documents for all contractors and that all subcontractors shall certify and disclose accordingly.
This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into and is a prerequisite for making or entering into this transaction imposed by 31 U.S.C. § 1352.

Procurement of recovered materials.
Contractors must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

Preferences for Products Produced or Manufactured in the U.S.
(a) This contract award prefers the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products).

(b) For purposes of this section:

(1) “Produced in the United States” means, for iron and steel products, that all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.

(2) “Manufactured products” means items and construction materials composed in whole or in part of non-ferrous metals such as aluminum; plastics and polymer-based products such as polyvinyl chloride pipe; aggregates such as concrete; glass, including optical fiber; and lumber.

Exhibit B

Knox County Government

and

(Contractor)

This Contract, made and entered into between the Knox County Government, hereinafter referred to as the "County" and (Contractor), hereinafter referred to as "Contractor."

Whereas, the County requested proposals for Advanced Academic Programs for Knox County Government (Request for Proposal #3688) and;

Whereas, Contractor submitted a proposal in accordance with said requested specifications, the response of which is the most responsible and responsive proposal meeting specifications accepted by the County;

Whereas, Contractor agrees and undertakes to provide said services for the County, as set forth in the Request for Proposal, and at the price quoted for said services by Contractor. Further, in accordance with the lawful directions of the County, the Contractor agrees in all respects, to be governed by the Request for Proposal specifications and the Contractor's proposal and response.

Now, therefore in consideration of mutual covenants and promises contained herein, the parties hereto wish to enter into this Contract to set forth their respective rights and obligations and do mutually agree that;

Witnesseth:

1. Terms of this Contract. This Contract commences on the 1st day of December 2025 and ends the 30th day of November 2026 unless terminated in conformity with the terms of this Contract as contained in paragraphs 5 and 6. The County intends to issue a one-year (1) award. Upon the mutual agreement of the vendor and the County, the award may be extended for four (4) additional years, one (1) year at a time. This may result in a total of five (5) years. The County reserves the right to purchase these goods/services from other sources if the need arises. The County reserves the right to revoke the award if a pattern of unavailability arises with the vendor.

2. Subcontracting/partnerships: Any subcontracting/partnerships must be approved, in advance, by both Knox County and Knox County Schools. Knox County and Knox County Schools may terminate the Contract if subcontracting/partnership is done without approval. All subcontractors/partners shall adhere to the same terms and conditions and will be required to sign the Criminal History Records Check and provide a current Certificate of Insurance, with all endorsement pages naming Knox County as additionally insured. This clause is only for those subcontractors that will be directly servicing the County account. It does not include a Contractor's cloud hosting services or other ancillary services not directly related to the services provided to the County.

3. Payment. Contractor warrants that the pricing shall remain firm for the initial one (1) year period. At the end of the first one (1) year period, and pursuant to the renewal terms in Paragraph 1, the Contractor may request price increases for each subsequent renewal. Price increases will only be given at the renewal time and must remain in effect for the next one (1) year term. No price increases will be given during the term of a

SAMPLE

Contract. The County shall pay the Contractor the amount as agreed upon in the County's Request for Proposal for Advanced Academic Programs per the Contractor's response to Request for Proposal #3688 and negotiations;

[TBD]

pursuant to all payments being subject to the County's review and approval. The Contractor shall receive, upon the need of the County, written notification to proceed. The Contractor shall pursue all work diligently until completion as directed by the County.

Contractors are advised that Knox County requires a minimum of thirty (30) days is required to process invoices for payment after receipt of a properly submitted invoice. If an invoice has not been paid within thirty (30) days, vendor shall contact the using department. The County will not agree to any late payment fees, penalties, etc. Any provision requiring late payment fees, penalties, etc., in a response to this solicitation or any other supplemental agreement(s) will not be accepted.

4. Inspection and acceptance: Warranty periods shall not commence until Knox County inspects and formally accepts the goods and/or services. Such acceptance shall occur within a minimum of 60 days of receipt of materials and/or services. The terms, conditions and timing of acceptance shall be determined by Knox County. Knox County reserves the right to reject any or all items or services not in conformance with applicable specifications, and Contractor assumes the costs associated with such nonconformance. Acceptance of goods or services does not constitute a waiver of latent or hidden defects or defects not readily detectable by a reasonable person under the circumstances.

Final acceptance shall occur upon written notification by the County to proceed or by the issuance of a Purchase Order.

5. Termination. Notwithstanding any other provision of this Contract to the contrary, either party may terminate this Contract with or without cause at any time. The County may terminate this Contract upon written notice of not less than thirty (30) days. Upon termination, County will pay for services satisfactorily completed but not yet invoiced. Contractor shall not perform additional work without the expressed permission of County.

In the event Contractor intends to interrupt or discontinue service under this Contract, and due to the timeframe required by the County to solicit and contract for goods and services, Contractor agrees to give Knox County at least one hundred twenty (120) day advance written notice of said interruption or discontinuance of service prior to interrupting or discontinuing same. Any interruption or discontinuance of service without said advance notice shall constitute a material breach of this Contract.

Should the Contractor fail to provide the Services detailed herein, the County will communicate the problem(s) to the Contractor both verbally and in writing and keep a written record as to what the problem(s) are and when the Contractor was contacted. The Contractor shall rectify the problem as soon as possible. Failure to correct the problem(s) in a timely manner or repeated issues occurring with the service(s) to be provided, may lead to the termination of the Contract by the County.

6. Appropriations. In the event no funds are appropriated by the County for Advanced Academic Programs in any fiscal year or insufficient funds exist to provide the services, then the Contract shall expire upon the expenditure of previously appropriated funds or the end of the current fiscal year, whichever occurs first, with no further obligations owed to or by either party.

7. Contractor Default: Knox County reserves the right, in case of vendor default, to procure the goods or services from other sources. Should vendor default be due to a failure to perform or because of a request for a price increase, Knox County reserves the right to remove the vendor from the County's bidders list for twenty-four (24) months.

8. Independent contractor. Contractor acknowledges that Contractor and employees serve as independent contractors and that the County shall not be in any manner responsible for any payment, insurance, or incurred liability resulting from actions of the Contractor or Contractor's employees.

9. Compliance with all federal, state, and municipal laws. Contractor is assumed to be familiar with and agrees to observe and comply with all federal, state, and local laws, statutes, ordinances, and regulations in any manner affecting the provision of Advanced Academic Programs, and all instructions and prohibitive orders issued regarding this work and shall obtain all necessary permits.

10. Criminal history records check: Any and all successful vendors, vendor employees, and any vendor sub-contractors and its employees that perform any services at Knox County Schools must submit to a Criminal History Records Check at vendor's expense. This is conducted by the Tennessee Bureau of Investigation and the Federal Bureau of Investigation prior to permitting the employee to have contact with students or enter school grounds when students are present. Reference Tennessee Code Annotated Section 49-5-413.

11. Severability clause. If any provision of this Contract is declared illegal, void, or unenforceable the remaining provisions shall not be affected but shall remain in force and in effect.

12. Prohibition against assignment. Neither party shall transfer or assign any of its rights or obligations under this Agreement to any other person or entity without the express written permission of both parties, which permission shall not be unreasonably withheld. If Contractor assigns this contract to another party, an Assignment of Contract must be executed between the County and the new party. Knox County will draft this "Assignment of Contract" document. Any assignment without such express written permission may result in the automatic termination of this Agreement.

13. This Contract shall be governed by the laws of the State of Tennessee both as to interpretation and performance. The Chancery Court and/or the Circuit Court of Knox County, Tennessee, shall have exclusive and concurrent jurisdiction of any disputes, which arise hereunder.

14. Right to inspect. Pursuant to Paragraph 7 of this agreement, Section 2.4 of the RFP and Part 6 of the Federal Funding Requirement, the County reserves the right to make periodic inspections of the manner and means the services are performed.

15. Nondiscrimination and non-conflict statements. Contractor agrees that no person on the grounds of handicap, age, race, color, religion, sex, national origin, or any individual trait or characteristic found to be an illegal consideration shall be excluded from participation in, or be denied benefits of, or be otherwise subjected to discrimination in the performance of this Contract, or in the employment practices of Contractor. Contractor shall upon request show proof of such non-discrimination and shall post in conspicuous places available to all employees and applicants notices of non-discrimination.

16. Books and records. Pursuant to Paragraph 7 of this agreement, Section 2.4 of the RFP, and Part 6 of the Federal Funding Requirements, Contractor shall maintain all books, documents, accounting records and other evidence pertaining to the service under this Contract and make such materials available at their offices at all reasonable times during the contract period and for five (5) years from the date of the final payment under the Contract for inspection by the County or by any other governmental entity or agency participating in the funding

of this Contract, or any authorized agents thereof; copies of said records to be furnished if requested. Such records shall not include those books, documents and accounting records that represent the Contractor's costs of manufacturing, acquiring or delivering the products and services governed by this Contract.

17. **Contractor** shall indemnify, defend, save and hold harmless Knox County, its officers, agents and employees from all third-party suits, claims, actions or physical damages of any nature brought because of, arising out of, or due to any alleged breach of the agreement by Contractor, its subcontractors, suppliers, agents, or employees or due to any grossly negligent act or occurrence or any intentional omission or commission of Contractor, its subcontractors, suppliers, agents or employees. Notice of any claim will provided to the Contractor. Neither party shall be liable for consequential or incidental damages, and to the extent permitted by applicable law, except for a party's indemnification obligations or breach of confidentiality, each party's maximum liability for direct damages under this contract shall not exceed the amount paid by District to Contractor hereunder.

18. **Delivery.** Contractor shall render the Advanced Academic Programs for the County in accordance with Request for Proposal #3688.

19. **Tax Compliance.** Pursuant to Resolution R-07-1-903 passed by the Commission of Knox County, Tennessee, Contractor hereby acknowledges, by submission of its proposal and signature that it is current in its respective Federal, State, County, and City taxes of whatever kind or nature and is not delinquent in any way. Delinquent status must be disclosed or risk debarment by the Knox County Purchasing Division.

20 **News releases by vendors:** As a matter of policy, Knox County does not endorse the services of a Contractor. Pursuant to Knox County Board of Education Policy C-180, a Contractor will not make any posts or news releases concerning any resultant contract from this solicitation without the prior written approval of Knox County and the Knox County Board of Education.

21. **Limitations of liability.** No provision of this Agreement shall act or be deemed to be a waiver by Knox County or the County/School System of any immunity or of any provision of the TENNESSEE GOVERNMENTAL TORT LIABILITY ACT. Tenn. Code Ann 29-20-101 et seq. Any liability to the Vendor or third parties for any claims, damages, losses, or costs arising out of, or related to acts performed by the County/School System under this Agreement will be governed and limited by the provisions of the Tennessee Governmental Tort Liability Act, Tenn. Code Ann. 29-20-101 et seq."

22. **Warranty and Remedies:** Contractor warrants to Knox County that all items delivered, and all services rendered, will be fit for the particular purpose purchased, of merchantable quality, and of good workmanship. Knox County shall have all rights and remedies afforded under the U.C.C. and Tennessee law in contract and in tort, including but not limited to, rejection of goods, rescission, right offset and right of set-off, refund, incidental, consequential and compensatory damages and reasonable attorney's fees.

23. **Technology Restrictions on Use of Confidential Information**

23.1 Any and all personally identifiable student or employee information including but not limited to name, address, telephone number, teachers, classes, grades, digital media and any other student or employee information of any kind is deemed confidential and shall not be released or disclosed in any form or manner unless authorized by District in writing, or as needed to provide services under this Agreement, including for rostering students. This restriction against release or disclosure also precludes sharing of data by Contractor with any affiliate of Contractor unless such sharing is expressly permitted under the contract or is expressly granted in writing by District. In addition, all information the release of which is prohibited by state or federal law or regulation, including but not limited to the protections of the

Family Educational Rights and Privacy Act (referred to herein as "FERPA") and all applicable laws of the State of Tennessee which is obtained by Contractor from District, its students, faculty, or staff in the performance of this Agreement constitutes Confidential Information. Contractor agrees to hold the Confidential Information in strictest confidence. Contractor shall not use or disclose Confidential Information received from or on behalf of District or any of its students, faculty, or staff except as permitted or required by this Agreement, or otherwise as agreed in writing by District.

23.2 Contractor agrees that any personally identifiable student data it obtains from the District shall only be used for the purpose of providing the contracted product or service to the District according to the terms of the contract. Contractor may not sell student data. (This does not prevent transfer of student data by purchase or merger of the Contractor, so long as the successor entity remains bound by and in compliance with the terms of this agreement.)

23.3 Contractor may not use personally identified student data for any secondary purpose including targeted advertising. Contractor may (a) use student data for adaptive learning or customized student learning processes; (b) market an educational application to a student's parent or guardian if Contractor did not use student data shared by or collected on behalf of the District to do so; (c) use a recommendation engine within Contractor's internal application to recommend learning or employment related content or services to the student, but only if the recommendation is not motivated by consideration from another party; (d) respond to a student request for information or feedback, but only if the response is not motivated by consideration from another party; (e) use student data to allow or improve functionality of Contractor's internal application; and (f) identify for the student nonprofit institutions of higher education or scholarship providers that are seeking students who meet specific criteria, but only if Contractor obtains, through the District, the written consent of the student's parent or guardian (or the student if age 18 or older or emancipated). (Written consent may not be required in certain instances for a Contractor which is a national assessment provider.) Data that does not identify or provide a reasonable basis to identify an individual ("De-Identified Data") is not deemed Confidential Information and Vendor may use De-Identified Data in accordance with all applicable laws.

23.4 Contractor agrees that it will protect the Confidential Information it receives according to commercially acceptable standards and no less rigorously than it protects its own Confidential Information. Specifically, Contractor shall implement, maintain, and use appropriate administrative, technical, and physical security measures to preserve the confidentially, integrity, and availability of all electronically maintained or transmitted Confidential Information. Any data that is transmitted to/from District will be secure. Any electronic data stored by the vendor must be secure and backed up with a tested data recovery strategy in place as approved by District.

23.5 Within 30 days of termination, cancellation, expiration, or other conclusion of the contract, or within 30 days of a request by District with regard to any portion of the data, Independent Contractor Vendor shall return to District or if return is not feasible, destroy delete and not retain any copies of any and all Confidential Information that is in possession of Contractor and certify in writing that all copies of the confidential information in its possession have been destroyed deleted. This requirement shall not apply, and Contractor may retain, personally identifiable student data if Contractor has obtained written consent of the student's parent or guardian (or from the student if 18 or older or emancipated) and provides documentation of that consent to the District,

23.6 These obligations shall not apply to any information which (a) is already in the public domain through no breach of this Agreement, including but not limited to information available through schools' web site(s); (b) was lawfully in Independent Contractor's Vendor's possession prior to receipt from an District school, its faculty staff or students; or (c) is received by Independent Contractor Vendor independently from a person or entity free to lawfully disclose such information other than an District school, its faculty, staff, or students.

23.7 Contractor warrants and represents that it shall, at all times, comply with the terms of this Agreement and with FERPA, COPPA, and all applicable laws of the state of Tennessee and further agrees not to disclose or re-disclose to any person or entity for any purpose whatsoever any personally identifiable student information as that term is defined by this agreement, FERPA, COPPA, or applicable laws of the state of Tennessee.

23.8 Contractor agrees that District or its designee may, upon request, audit Contractor to verify compliance with the applicable requirements of law.

24. Contract documents. It is mutually agreed by both parties that the following documents are made part of this Contract and are incorporated herein by reference:

A. Request for Proposal #3688, for Advanced Academic Programs and Addendum I
B. Contractor's Response to Request for Proposal #3688, to include any supplemental agreements, Terms and Conditions, etc., for Advanced Academic Programs and Addendum I

It is agreed that this Contract, represents the **entire Contract** between the parties and no prior representations, promises, and agreements, oral or otherwise, not embodied herein, shall be of any force or effect.

In witness whereof, the parties hereto have caused this Contract to be executed in one original copy on the day and year last written below.

COST
REQUEST FOR PROPOSAL NUMBER 3688

It is the intent of Knox County and Knox County Schools to use the following scenario to fairly evaluate each proposer's cost to fully implement an advanced academic program. The total cost provided should be inclusive of any and all costs associated with full implementation of the advanced program.

Scenario: To fully implement and demonstrate mastery of an English or World Language advanced academic program for one school year. In this scenario there are five middle school teachers and one hundred twenty-five middle school students participating in the advanced program. Additionally, there are seven high school teachers and two hundred fifty high school students participating in the program. The minimum requirement for training and professional development for all teachers implementing the program is a two-day on-site training, seven hours per day and three days of virtual training, seven hours per day. The vendor is to determine the number of consultants required to carry out the minimum expectations, and the cost should be inclusive of all travel charges for the on-site professional development.

Proposers must thoroughly address all costs associated with the implementation of the English or World Language advanced academic program. In addition to providing a total cost for all charges that would be associated with the advanced academic program, proposers must provide a complete breakdown of those charges. The costs may include, but not be limited to the following:

- Any and all fees associated with the program which may include, but not be limited to application, annual and/or system fees for the students, classrooms, schools and/or courses.
- Training/ Professional Development charges for full implementation of the advanced academic program meeting the minimum requirement. The proposal should encompass the number of consultants believed necessary to carry out the work required in the scenario. All travel charges for the consultants should be included in the cost.
- Digital resources that the teachers and/or students would need to fully implement the program.
- Print resources that the teachers and/or students would need to fully implement the program (Shipping Charges are to be included in the cost).
- Exams or Essay costs for students to show mastery of the advanced program (Shipping Charges are to be included in the cost).
- Software Services

Total cost for the scenario: $_____

Note: Proposers must also include an itemized list of all products and services offered to Knox County and Knox County Schools with a description and unit price. For professional development services the description should specify the number of participants allowed per consultant. Should the proposal result in a contract the pricing proposed on the itemized list must remain firm for the first year of the contract. Anything not listed on the itemized list of products and services will not be considered part of the contract. The unit price must include all shipping charges for products and travel charges for on-site trainings and professional development. Everything listed on the scenario breakdown should be found on the complete itemized list. While this scenario will only be used for evaluation purposes, the cost should be accurate and include all costs associated with full implementation of the advanced academic program proposed. The County will not pay any hidden costs, shipping charges, or additional travel charges for consultants should the proposal result in a contract. Knox County and Knox County Schools does not guarantee any quantity of products or services will be purchased. Services will be utilized on an as needed basis. Knox County reserves the right to award this proposal on an all-or-none basis, schedule basis or by multiple awards. Knox County reserves the right not to award this proposal.

Failure to provide this cost sheet in your response will be considered during the evaluation process and may be just cause to deem your submittal non-responsive.

TAB VI Proposed Costs

In response to the updated requirements outlined in Addendum I, our cost proposal has been developed using a scenario-based approach that ensures transparency, accuracy, and full alignment with Knox County's expectations. The scenario provided by the County outlines a one-year implementation of an English or World Language advanced academic program involving five middle school teachers and 125 students, as well as seven high school teachers and 250 students. The professional development component includes two days of on-site training and three days of virtual training, each consisting of seven instructional hours per day.

To meet these expectations, we have calculated a comprehensive total cost that includes all necessary components for full program implementation. This includes application and system fees, training and professional development (inclusive of trainer travel), digital and print instructional resources, assessment materials, and any required software services. Our pricing reflects the number of trainers we believe are necessary to deliver the required training effectively, and all associated travel and shipping costs are included in the total.

In addition to the total cost scenario, we have provided a detailed itemized list of all products and services offered to Knox County and Knox County Schools. Each item includes a description, unit price, and—where applicable—the number of participants included. This list is intended to serve as the definitive reference for all pricing under the contract. Any item not included in this list will not be considered part of the agreement.

All pricing is fixed for the first twelve (12) months of the contract term, as required by the amended Section 3.29. No cost increases will be permitted during this period. Any future price adjustments must be submitted in writing at the time of renewal and must include a clear justification and supporting documentation. The County reserves the right to accept, negotiate, or reject such requests.

This methodology ensures that our proposal is both fiscally responsible and fully compliant with the County's procurement standards. It also reflects our commitment to providing a high-quality, turnkey solution with no hidden costs or unanticipated charges.

Cambridge will work with Knox County to make sure invoices are detailed sufficiently for purposes of payment. Explanation of supporting documentation might be included with an invoice upon awarding of contract as outlined in Tab VIII: Exceptions.Table 1.

Table 1. Cambridge Price List Attachment A

Attachment A: Scenario Price List Alignment				
Category	**Description**	**Quantity**	**Unit Cost**	**Total Cost**
Application Fee	One-time per school	1	$3,822.00	$3,822.00
HS Annual Program Fee	Annual program fee per high school	1	$11,302.00	$11,302.00
MS Annual Program Fee	Annual program fee per middle school	1	$5,515.00	$5,515.00
AS/A Level Exams (including shipping)	250 students × 2 exams	500	$128.30 (includes estimated $3.50/exam shipping)	$64,150.00
Lower Secondary Checkpoint	Per candidate per subject (English only)	125	$48.50 (includes estimated $3.50/exam shipping)	$6,062.50
On-site Training (2 days)	**Focus on Assessment (IGCSE and Advanced) or Progress (PLS)** Face-to-face private course (Max 30 participants)	1 (flat fee)	$13,085.00 (travel is included in price)	$13,085.00
Virtual Training (3 days)	Virtual private course (Max 30 participants) *note additional training options are available and itemized in this document. We recommend KCS budgets for at least one virtual and one in-person training in alignment with the scenario provided and standard implementation best practices.	1 (flat fee)	$3,865.00	$3,865.00
Print/Digital Resources	3 sets per high school (30 books/set)	90	$75.00	$6,750.00
Total Estimated Cost				**$114,551.50**
*Note: Additional training options are available and itemized in this document. We recommend KCS budgets for at least one virtual and one in person training in alignment with the scenario provided and standard implementation best practices				

Pricing for Annual Fees and Assessments

School Application Fee

Before a school can offer our programs and qualifications, they must complete our registration process, which includes an approval visit.

Annual Secondary and Advanced School Fee

Cambridge operates on a fiscal year from October 1 to September 30. Schools that exceed an annual spend of $19,013.00 in the preceding fiscal year are eligible for a waiver of the annual programming fee. This spend includes diploma entry fees, exam fees for AS/A Level and IGCSE, and Cambridge training fees. For context, ordering more than 144 exams typically qualifies a school for the waiver. Most mid-size to large secondary schools meet this threshold once they begin administering Cambridge exams.

Assessment Fees

The first KCS students would sit for assessments at the end of 2026 school year. Costs related to assessment include:

- AS/A Level Exam Fee, assessed per student taking each AS/A Level exam (except for GP&R)
- AS/A Level GP&R Exam Fee, assessed per student taking each AS Level exam
- AICE Diploma Fee, assessed per student entering for the AICE diploma

Training and Professional Development Fees

Fees listed in Table 2 apply to the 2025–26 calendar year. Cambridge will review the fee structure annually to ensure it continues to support high-quality training. Professional development is optional but strongly recommended, as it is associated with improved implementation and student outcomes. The number of teachers requiring training may vary annually, and pricing is subject to change based on course format and delivery.

At this time, any Cambridge school or district that we work with can host a training within their district, if they meet the minimum participant thresholds (minimum participant thresholds vary but can be set as low as 5-7 attendees per training course). This is accommodated based on need, timing, and availability of trainers for the specific subject areas requested. We believe in our teacher support model, and we try to remain flexible and do what works best for schools by bringing training to the district to take pressure off of travel and substitute teacher costs.

Although we try and accommodate as many requests as feasible, in the event we cannot accommodate a specific request, we will provide alternate locations for face-to-face or on-line professional development opportunities to meet the needs of the school/district.

Courses are available in face-to-face, virtual, and online formats. Each course has early bird and regular pricing, as well as private course options for up to 30 participants. Examples include:

- *What a Cambridge Classroom Looks Like*: A 4-hour course introducing active learning, assessment for learning, metacognition, and inclusion. Explore what these approaches look like in practice and start building a practical toolkit of strategies.
- *Introduction Course*: Designed for teachers new to Cambridge or a specific syllabus. More information can be found on our website.
- *Focus on Teaching*: Explores specific areas of pedagogy within a subject-specific syllabus. More information can be found on our website.
- *Focus on Assessment (IGCSE and Advanced) or Progress (PLS):* Deepens understanding of assessment practices.

- *Marking Workshops*: Builds confidence in assessing student work.
- *Improving Speaking*: Supports language teachers in enhancing speaking instruction.
- *Enrichment Courses*: Helps educators and leaders transform their teaching approach. We design our Enrichment courses to be dynamic and engaging. Our experienced trainers encourage teachers and leaders to reflect on their professional practice and help them to develop practical strategies they can use in their schools. Participants are also encouraged to share ideas and learn from other members of the Cambridge International community. Each course focuses on a specific skill or concept in teaching and learning. For example:
    - Active Learning and Assessment for Learning
    - Metacognition: Boosting Students' Learning
    - Effective Talk and Questioning
    - Responsive Education for All Learners

Some courses also concentrate on a particular subject or syllabus. More information can be found on our website.

Table 2. Optional Training and Professional Development Fees

Costs associated with each optional training are as follows:

What a Cambridge Classroom Looks Like			
Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$518.00	$576.00	$11,915.00
Virtual	$168.00	$210.00	$3,865.00
Online	$168.00	$210.00	$3,865.00
Introduction Course			
Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$284.00	$316.00	$6,540.00
Virtual	$96.00	$120.00	$2,210.00
Online	$112.00	$140.00	$2,575.00
Focus on Teaching			
Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$284.00	$316.00	$6,540.00
Virtual	$96.00	$120.00	$2,210.00

Online	$112.00	$140.00	$2,575.00
Focus on Assessment (IGCSE and Advanced) or Progress (PLS)			
Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$569.00	$632.00	$13,085.00
Virtual	$136.00	$170.00	$3,130.00
Online	$112.00	$140.00	$2,575.00
Marking Workshops			
Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Virtual *per component	$80.00	$100.00	$3,195.00
Online	$112.00	$140.00	$2,575.00
Improving Speaking			
Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Online	$168.00	$210.00	$3,865.00
Enrichment Courses			
Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$548.00	$609.00	$12,605.00
Virtual	$168.00	$210.00	$3,865.00
Online	$168.00	$210.00	$3,865.00

Print and Digital Resources

The purchase of our print and digital resources is not a requirement of Cambridge programming and is considered optional. Evidence from our current schools suggests that schools that use resources have a greater fidelity of implementation, so while not required, they are recommended. Many of our schools like to have at least one classroom set of resources to support student learning. For this reason, Cambridge has provided a list of approved resources on our website www.cambridgeinternational.org for

districts/schools to peruse. For the purpose of this solicitation, it was estimated that each class would have 30 students. Cambridge print and digital resources are bundled with each print/digital resource bundle having the unit price of $75.00. The initial implementation year budgeted for 3 complete sets of print resources per high school. Each subsequent year budgeted for 3 more complete sets of print/digital bundled resources per high school to support the additional courses that will be added by each school.

Optional Additional Services Provided by Cambridge International

Cambridge offers additional optional resources for schools that we have not included in the scenario above. These are listed in Attachment A but are not included in Table 4.

Digital Mocks Exams are practice digital exams for Pre-Advanced and Advanced courses that are typically offered in January. They are marked by Cambridge and provide feedback for instructional preparation for the actual exam.

Cambridge Insights are curriculum-independent assessments built on data from over 650,000 learners annually. These tools help KCS educators: identify student potential and learning needs; provide actionable insights for personalized instruction; and predict future academic performance. Specifically MidYIS identifies middle school students' readiness for our Pre-Advanced (IGCSE) exams and is typically offered in 8th grade to assist with placement in high school. For high school students, Yellis identifies learning needs and supports achievement on Pre-Advanced IGCSE performance, and Alis identifies needs and predicts performance on AS/A Level exams. The current fees for these assessments are listed below.

Table 3. Cambridge Insight (Optional Resource)

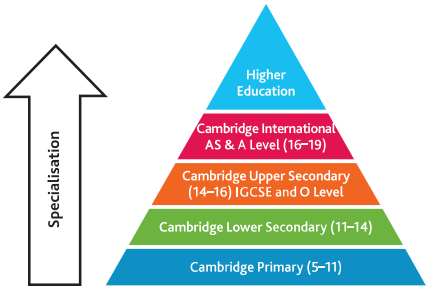
Product	Price per student
MidYis & Yellis	
Product fee	$202.00
1-100 students	$15.00 per student
Next 101-175	$11.40 per student
Next 175+	$7.80 per student
ALIS	
Product fee	$265.00
1-60 students	$12.10 per student
Next 61-120	$7.80 per student
Next 121+	$5.40 per student

Cambridge Assessment International Education

Cambridge International AS & A Level
A guide for universities

Cambridge International AS & A Levels are recognised as a passport to success in education, university and employment.

What are Cambridge International AS & A Levels?



Cambridge International Advanced Subsidiary Levels (AS Levels) and Cambridge International Advanced Levels (A Levels) are subject-based qualifications usually taken in the final two years of high school. Cambridge International AS Level is typically a one-year programme of study, while Cambridge International A Level typically takes two years. Assessment takes place at the end of each programme.

Most subjects can be started as a Cambridge International AS Level and extended to a Cambridge International A Level. The syllabuses are international in outlook but retain local relevance. They have been created specifically for an international student body with content to suit a wide variety of schools and avoid cultural bias. The contexts or examples used in syllabuses and exam question papers are culturally sensitive in an international context.

Offered since 1951, these qualifications are administered by Cambridge Assessment International Education, a part of the University of Cambridge.

Who takes Cambridge International AS & A Levels?

Aimed at 16–19 year old students before university study, Cambridge International AS & A Levels are taken by over 175 000 students in more than 125 countries every year. In the UK these are taken in years 12 and 13 of the secondary school curriculum.

Why choose Cambridge International AS & A Levels?

Develop unique skills

The qualifications aim to develop students' knowledge, understanding and skills through:

- in-depth subject content
- learning to work independently
- applying knowledge and understanding to new as well as familiar situations
- handling and evaluating different types of information sources
- thinking logically and presenting ordered and coherent arguments and explanations
- studying and communicating in English.

Flexible subject choices

A wide choice of over 50 subjects is available and schools have the freedom to offer them in almost any combination. There are no compulsory subjects and students are free to specialise or study a range of subjects.

Giving students the power to choose helps to motivate them throughout their studies. Students typically study four subjects at AS Level and three subjects at A Level. The standard admission requirement for UK universities is three A Levels.

Cambridge International AS & A Level subject groups		
English	Mathematics	Science
Languages	Humanities	Technology
Social Sciences	The Arts	General Studies

“Students we have who have taken Cambridge International A Levels do very well at our campus. They are very well-prepared for our curriculum and we find that they have a lot of confidence, but also that they have a good, deep subject knowledge, [and] the ability to think critically and well.”

Stuart Schmill, Dean of Admissions, Massachusetts Institute of Technology (MIT), USA

Global Perspectives & Research

A pioneering skills-based qualification, Global Perspectives & Research (GPR), has been added to complement the existing suite of Cambridge International A Levels. GPR uses a cross-curricular approach to learning the skills needed for success in higher education and at work. By studying global issues, students explore different and often opposing perspectives to develop their ability to deconstruct, reconstruct and reflect on how this impacts their own perspectives. The programme of study is comprised of a taught skills course in the first year and in the second year, a year-long research report called the Cambridge Research Report. The Research Report promotes the application and development of the skills taught in Global Perspectives and helps prepare students to cope with the demands of university study. For more information visit **www.cambridgeinternational.org/gp**

In-depth preparation for universities

Findings from a number of research studies suggest that the Cambridge curriculum prepares students well for university. For more information visit **http://files.eric.ed.gov/fulltext/EJ962510.pdf**

Grading and assessment

Cambridge's internationally recognised grades are reported with clear guidelines to explain the standards of achievement. The Cambridge International A Level is reported on a grade scale from A* (highest) to E (minimum required performance). There is no A* grade for Cambridge International AS Levels, which are reported from grade A to E. Each subject is graded separately and no Grade Point Average is calculated. Separate certificates are issued for each examination series. Grades are awarded only for subjects that candidates pass.

Percentage Uniform Mark

The Percentage Uniform Mark (PUM) is a numerical mark provided for some countries alongside grades for each subject. It transfers a candidate's results to a common scale which reports how well they performed within that grade. For example if a candidate achieves a Percentage Uniform Mark of 79 then they are at the top end of a B grade.

AS Level grade	PUM range
a	80–100
b	70–79
c	60–69
d	50–59
e	40–49

A Level grade	PUM range
A*	90–100
A	80–89
B	70–79
C	60–69
D	50–59
E	40–49

Staged and linear assessment

Option one

Cambridge International AS Level (standalone AS)

Students take the Cambridge International AS Level only. The syllabus content for Cambridge International AS Level is half of a Cambridge International A Level programme.

Option two

Cambridge International AS Level (AS is first half of A Level)

Cambridge International A Level (remainder of A Level)

Students take the Cambridge International AS Level in Year 1 and in Year 2 complete the Cambridge International A Level.

Option three

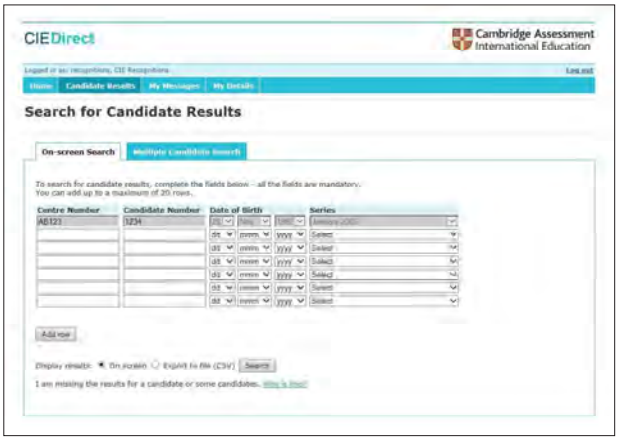
Cambridge International A Level

Students take all papers of the Cambridge International A Level course in the same examination series, usually at the end of the second year of study.

Cambridge AICE Diploma

A group certificate is awarded for passing examinations in subjects drawn from three curriculum areas within Cambridge International AS & A Level. Curriculum areas include mathematics and science, languages, and arts and humanities. Each AS Level is awarded 1 credit and a full A Level is awarded 2 credits. From 2017, students are required to achieve a minimum of 7 credits, including the AS in Global Perspectives & Research as a compulsory subject. The AICE Diploma is taken primarily in the USA. For more information visit **www.cambridgeinternational.org/aice**

> **"We have been impressed by the depth and breadth of knowledge exhibited by Cambridge students. They arrive on campus well-prepared and excited about learning, regardless of where they come from in the world."**
>
> **Greg Roberts**, Dean of Admissions, University of Virginia, USA



Assessment methods – Sample certificate and statement of results

Both the certificate and statement of results are evidence of official results from Cambridge. Other hidden security features are also present on official Cambridge documentation.

Cambridge International Direct

Direct allows universities and institutions to verify applicants' Cambridge results online. To apply for access please email **recognitions@cambridgeinternational.org**

Who recognises Cambridge International A Levels?

Cambridge qualifications are recognised by universities and employers worldwide. Cambridge International AS & A Levels are recognised by UCAS, UK universities and institutions overseas as equivalent in standard and grade to the AS and A Levels taken by students in the UK.

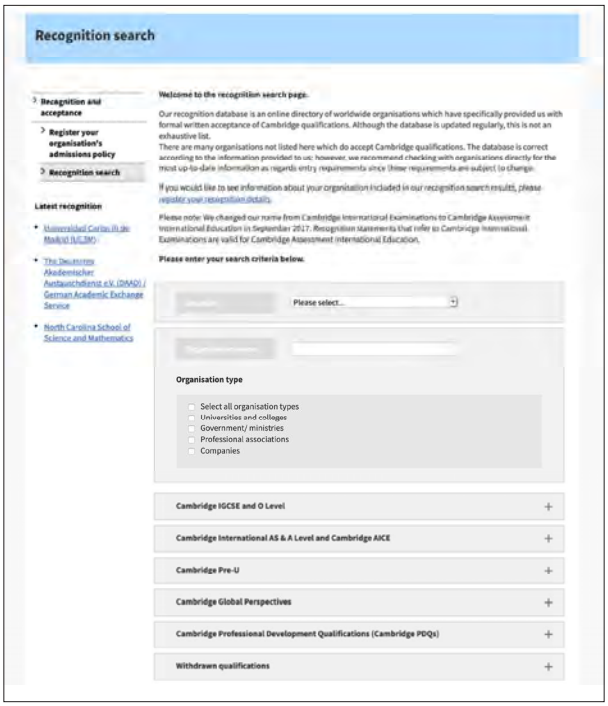
Students use Cambridge International AS & A Levels to gain places at leading universities worldwide including the UK, Ireland, USA, Canada, Australia, New Zealand, India, Singapore, Egypt, Jordan, South Africa, the Netherlands, Germany and Spain. In countries such as the United States and Canada, good grades in carefully chosen Cambridge International A Level subjects can result in up to one year of university course credit.

Examples of worldwide recognition

Yale University recognises Cambridge International A Levels for matriculation purposes. Credit is awarded for grades A or B. Students enrolled in A Level programmes may use completed A Level results as a substitute for the SAT II Subject Tests on a one-for-one basis. Yale gives credit for A Levels once they are approved by the student's academic advisor.

University of Oxford welcomes students with Cambridge International A Levels. Oxford has for many years accepted the Cambridge International A Level as a suitable qualification to meet the conditions for entry to the collegiate university. The qualifications provide students with suitable subject knowledge, although the competitive nature of applications means that success in A Levels alone does not automatically result in an offer.

National University of Singapore welcomes applications from students holding a good pass in at least three Cambridge International A Levels. Many applicants submit good passes in four or more A Levels. A total of all subject grades in two sittings taken within 12 months of each other is allowed.



University of Sydney welcomes applicants who achieve a minimum of three full A Level subjects in one academic year. Very competitive courses may need four subjects for admission. AS subjects will not be accepted in place of A Level subjects, but results in AS subjects may improve the competitiveness of qualified applicants.

> **"We welcome applications from candidates with Cambridge International qualifications. Our experience is that Cambridge Advanced qualifications such as Cambridge International AS & A Levels are consistently robust and reliable, and prepare students very well for higher education."**

Katherine Hind, Senior Undergraduate Admissions Manager, Newcastle University, UK

The recognition database

The recognition database is an online directory of worldwide institutions that have given formal written acceptance of Cambridge qualifications. It is regularly updated with new recognition statements allowing Cambridge students to see where their Cambridge qualifications are accepted. It is the first place for students, parents and schools to check whether a particular institution would consider an application from a student holding Cambridge qualifications. Students then visit the university's own website for further details.

Cambridge International A Level policies are listed on our database. Add yours by following the link from **www.cambridgeinternational.org/recognitionsearch**

An informative recognition policy on our database can really set your university apart.

Learn more! Full details of all entrance requirements for Cambridge International AS & A Level can be found on our website at **www.cambridgeinternational.org/recognition**

University recognition worldwide

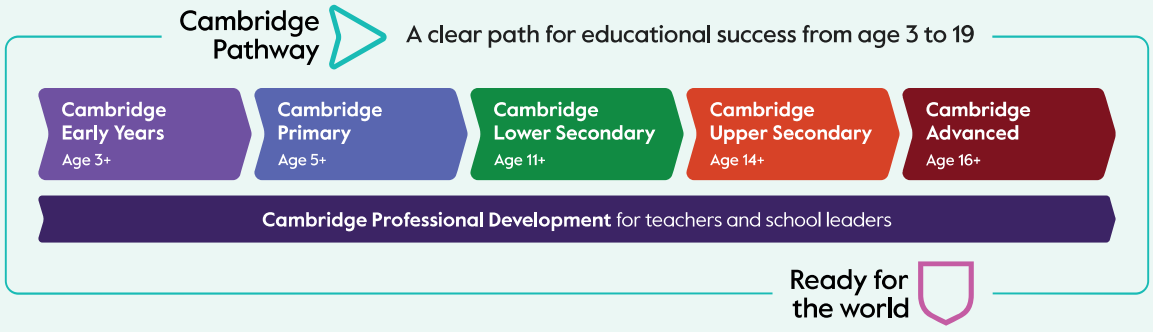
Cambridge qualifications are accepted by universities all around the world. Many universities have sent us official statements confirming their entry policies, and you can find examples from some of the most popular destination countries for Cambridge students on the following pages. For full details of all the official statements listed and many others, check our recognition database at cambridgeinternational.org/recognition-search



Many more universities than just those listed on the database will also be happy to accept Cambridge qualifications upon application as proof of your academic ability. However, before you apply to any institution, it is essential that you check the exact entry requirements for your selected course(s) on the university website and then check with the university's admissions office if you still have any queries. You will also need to be aware of any language requirements in addition to the academic entry standards. It is very important to remember that university entry is always competitive so achieving the minimum entry requirements is not a guarantee of admission; the higher your grades and the stronger your application documents, the better your chance of being accepted on your chosen course.

About us

We prepare school students for life, helping them develop an informed curiosity and a lasting passion for learning. We are part of the University of Cambridge.

Our Cambridge Pathway gives students a clear path for educational success from age 5 to 19. Schools can shape the curriculum around how they want students to learn – with a wide range of subjects and flexible ways to offer them. It helps students discover new abilities and a wider world, and gives them the skills they need for life, so they can achieve at school, university and work.

Cambridge programmes and qualifications follow a student-centred approach and are a global passport to success in education, university and the workplace. Subject content is multicultural and a wide range of subjects is available, including many country-specific courses. Our global learning community of Cambridge schools, teachers and students brings people closer together to share best practice and ideas and drive excellence in education. Together with schools, we aim to develop Cambridge students who are confident, responsible, reflective, innovative and engaged.

Recognition in Asia

Recognition of Cambridge qualifications is growing fast throughout Asia, where they are well known. It is important to carefully check the entry requirements and admissions processes well ahead of making an application, as university admission procedures and entry tests can vary widely across countries or states in this region. This section gives some examples of countries that welcome students holding Cambridge qualifications.

India

Cambridge qualifications have long been recognised by the Association of Indian Universities (AIU) www.aiu.ac.in and this information is available in the 'Equivalence of Foreign Degrees' document published by AIU. Universities and colleges in India follow the equivalence requirements laid down by AIU.

For courses in humanities, liberal arts and sciences, typical eligibility requirements are three Cambridge International A Levels. However, for some courses two Cambridge International A Levels are sufficient. For engineering and medicine, subject-specific requirements are decided by regulatory councils and common entrance exam bodies, and generally require more than three Cambridge International A Levels. You need to meet the same eligibility requirements as students applying with national qualifications.

Institutions are free to set separate eligibility conditions that are over and above equivalence requirements. Admission to courses can be competitive where institutions have limited numbers of places available.

You should ensure that your choice of Cambridge International A Level subjects is suitable for your intended degree course, especially if you have a specific career path in mind and plan to apply to a wide range of universities to maximise chances of acceptance.

'Destination India: Using Your Cambridge Qualifications to Study in India' is available on our website.

Association of Indian Universities

Minimum two or three passes at Cambridge International A Level has been equated with Grade 12 of an Indian exam board.

- Students need to complete a minimum of 12 years of schooling.
- Subject-specific eligibility is decided by admitting universities as per their existing rules, and in case of professional examinations as per the conditions laid down by the respective councils.
- For entry to medicine, students are required to have studied the subject of English at AS Level.
- No other subjects at AS Level are acceptable.

This recognition statement and others from India can be found on the recognition database.

Pakistan

The Inter Board Committee of Chairmen (IBCC), Ministry of Education, decides and grants equivalence to foreign qualifications with corresponding Pakistani certificates.

It is absolutely essential to check information on admission criteria with the admissions office of the university you are applying to, as advertised entry requirements can change. For further information, please refer to Destination Pakistan: 'Where Will a Cambridge Qualification Take You? Guide to the Recognition and Acceptance of Cambridge Qualifications in Pakistan' (available on our website) or see the IBCC website: www.ibcc.edu.pk

Inter Board Committee of Chairmen

The Inter Board Committee of Chairmen (IBCC), Ministry of Education, states that Cambridge O Level /IGCSE and International A Level and 12/13 years of schooling is considered equivalent to Higher Secondary School Certificate (HSSC/Intermediate), subject to meeting the specified requirements of the four individual groups: Pre-Medical Group, Pre-Engineering Group, General Science Group or Humanities Group. Further information is available on the IBCC website at www.ibcc.edu.pk or from one of the four offices: Lahore, Karachi, Peshawar, Quetta.

This recognition statement and others from Pakistan can be found on the recognition database.

Hong Kong

Cambridge qualifications are well known by universities in Hong Kong. Minimum requirements for application are often three A Level passes or two A Level plus two AS Level passes (Grade E and above). Some universities may accept five or six Cambridge IGCSE grades as equivalent to one A Level or two AS Level results.

Universities will also require proof of English language or Chinese language ability; Cambridge IGCSE English Language or English Literature are accepted as proof of ability at some universities. Cambridge International A Levels may be awarded advanced credit at most universities in Hong Kong.

Application processes and deadlines for each type of application – advance/fast track, main or late – can vary, so you are advised to check deadline dates for the individual universities you wish to apply to. Different departments consider applications on a rolling basis, so you are encouraged to submit your applications at the earliest opportunity.

University of Hong Kong

For applicants who have completed the entire GCE A Level curriculum: Grade E in three GCE Advanced Level subjects, not including any language subjects in English/Chinese. For applicants who have completed GCE AS Level only: Grade B in three GCE Advanced Subsidiary Level subjects, not including any language subjects in English/Chinese.

Advanced Standing:

- Students who have passed the HKU University Entrance Requirements (UER) for Cambridge International A Levels following a seven-year secondary curriculum may be granted Advanced Standing up to a maximum of 60 credit units (a full academic year). Within these 60 credit units, students may be granted 12 credit units from the Common Core (provided that students still take at least one Common Core course in each of the four Areas of Inquiry), plus six credit units from Core University English, plus six credit units from Chinese. Advanced Standing for discipline-based courses are at the discretion of the Faculty.
- Students who have similarly passed the UER for Cambridge International A Levels but following a six-year secondary curriculum will not be granted Advanced Standing under this blanket waiver, but will be dealt with on a case-by-case basis by the Faculty. Advanced Standing granted on a case-by-case basis should not exceed the limit of 60 credits as spelled out above.
- Details of the Advanced Standing to be granted will be determined by the University on a case-by-case basis, depending on the student's background and achievements, the degree to which they have been admitted, and the courses that may be selected within that degree curriculum.

This recognition statement and others from Hong Kong can be found on the recognition database.

China

In mainland China, universities offering English-taught programmes will accept Cambridge International A Level as equivalent to UK A Level for international application use (non-Chinese passport holder). Two to three A Level subjects are normally required with different subjects specified. In some universities, two AS Levels or three IGCSEs could be seen as equivalent to one A Level. For Chinese-taught programmes, HSK or A Level in Chinese will be required in application documents or interview sessions to prove language ability in Chinese.

University of International Business and Economics (UIBE)

The University of International Business and Economics (UIBE) accepts Cambridge International A Levels, AS Levels and GCSE/IGCSE/O Levels for entry purposes.

The University will take two AS Levels or three IGCSEs as equivalent to one A Level grade but not for all three A Level subjects for admission use. For minimum admission entry use, two A Levels plus two AS Levels or six IGCSEs plus one A Level plus two AS Levels will be considered.

Students from English-speaking countries do not need to prove language proficiency with an English A Level grade. For minimum admission entry use, one A Level plus two AS Levels or one A Level plus three IGCSEs will be considered. Scholarship application and credit transfer requires that applicants provide A Level grades.

This recognition statement and others from China can be found on the recognition database.

Singapore

Singapore remains an important destination for higher education, particularly with students from the Asia-Pacific region. Cambridge qualifications are widely accepted in Singapore but university entrance to the autonomous universities is highly competitive as places are extremely limited. International students (i.e. students not holding Singapore–Cambridge A Levels) usually make up a maximum of 15 per cent of the cohort.

Due to the volume of applications, a good pass in at least three A Level subjects is required for you to submit an application. Many applicants submit good passes for four or more A Level subjects for the universities' consideration. For some universities, you may also need to present SAT scores. As all the programmes are delivered in English, IELTS/TOEFL may also be required, depending on the courses applied for.

You must apply directly to the university of your choice. University applications open in October but deadlines vary (late February–April). Limited scholarships may be available for international students.

Due to the fact that Singapore–Cambridge A Levels are the national examinations, Cambridge International A Levels are not commonly offered by private schools in Singapore, meaning that local progression rarely occurs. However, Singapore is an important destination market, particularly given the expansion in the number of public universities and their rising status in the global university rankings. The Times Higher Education 2017 ranking confirmed the National University of Singapore (NUS) as the number one university in Asia and Nanyang Technological University (NTU) as number four. These two universities offer courses in a wide range of subjects to their student populations of over 30,000 each.

Polytechnic universities and Junior colleges generally accept Cambridge IGCSEs but this is dependent on availability and demand. The entry route to the three-year polytechnic courses is generally with the Singapore–Cambridge GCE O Level/IGCSE qualifications (secondary education). Polytechnics seek to train students with relevant and specific skills for the workplace.

National University of Singapore

The National University of Singapore welcomes applications from students holding a good pass in at least three Cambridge International A Levels. Many applicants submit good passes in four or more A Levels for their consideration. A total of all subject grades in two sittings taken within 12 months of each other will be allowed.

Please refer to their website for further details:
nus.edu.sg/oam/admissions/international-qualifications/international-qualifications/international-a-level

This recognition statement and others from Singapore can be found on the recognition database.

Japan

In April 2016 the Ministry of Education, Culture, Sports, Science and Technology – Japan (MEXT) published a new policy confirming that Cambridge International AS & A Levels are equivalent to the national high school graduation certificates for admission to universities in Japan. This applies to Japanese and international students aged over 18. Following the publication of this new policy, more Japanese universities recognise Cambridge qualifications including IGCSE/ AS/A Levels for admission use.

For English-taught degree programmes in particular, two or three A Level subjects with passing Grade E or above will usually be accepted as a minimum entry requirement. In some universities, two AS Levels are considered equivalent to one A Level. For language ability, applicants with IGCSE English grade C or A Level do not always need to submit further documents to prove their English language level. However, you may be required to attend online or face-to-face interviews to prove that your English language ability is sufficient for degree study. Outstanding A Level applicants will also have good scholarship opportunities in some Japanese universities. Please always refer to the details on individual university websites.

Nagoya University

Nagoya University welcomes students with Cambridge International A Levels. Cambridge International A Level is accepted as equivalent to UK A Level on a grade-for-grade basis. Cambridge International A Levels are linear and therefore retakes are only allowed for the whole subject. They are seen to provide a reliable measure of a student's knowledge and skills in the subject studied, are a reliable test of a student's problem-solving and critical thinking abilities and are reliable indicators of a student's performance.

Nagoya University welcomes all applicants from the Cambridge A Level curriculum to apply for their G30 International Program (English-taught programmes). Furthermore, students who have taken one of the following subjects will be exempt from submitting additional English standardised test scores:

- IGCSE English First Language (Grade C or above) or English Second Language (Grade B or above)
- GCE AS or A Level English (Grade E or above).

There are no minimum A Level subjects required, but three A Level subjects are highly preferred. For more details on the programmes, visit: https://admissions.g30.nagoya-u.ac.jp/undergraduate/

This recognition statement and others from Japan can be found on the recognition database.

Recognition in Europe

Formal recognition of Cambridge qualifications is fast gaining ground across this large and diverse region. **Please note**: admission policies and procedures can vary significantly depending on the country so be sure to research carefully before submitting an application.

Set out below are the general entry requirements for some of the most popular European study destinations. Policies for other European countries can be found on our recognition database.

Germany

The Central Office for Foreign Education (ZAB), on behalf of the Standing Conference of the Ministers of Education and Cultural Affairs of the Länder in the Federal Republic of Germany, recommends International A Level qualifications as acceptable for entry to undergraduate degree programmes, in accordance with specified requirements, as follows:

- three independent* academic subjects at A Level with a minimum grade C.
- Subject-specific requirements apply, depending on the chosen field of study, as well as by reference to three subject lists A, B, and C. Lists A and B include academic subjects, while List C specifies vocational subjects. Selecting a subject from List C will narrow the choice of degree programmes that the applicant is eligible for. The subject lists can be found on the anabin database of the Central Office for Foreign Education (ZAB) at www.anabin.kmk.org (German only).

*A Level subjects are independent of each other if they are not in the same field, with the exception of language subjects. For example, Economics and Business are not independent.

Within the recommendations of the Central Office, German universities decide on specific subject choices, combinations, and language requirements. Candidates should address any questions about entrance requirements, including language proficiency requirements (English, German) directly to their chosen institutions before applying.

The Central Office for Foreign Education (ZAB) also issues recommendations for Cambridge Pre-U Principal Subjects, Cambridge Pre-U Global Perspectives and Research (GPR) and the Cambridge Pre-U Diploma and meeting entrance requirements for Bachelor (undergraduate) degree programmes. The following equivalencies were agreed upon:

- A Cambridge Pre-U Principal Subject is the equivalent of a GCE Advanced Level.
- A Cambridge Pre-U Short Course is the equivalent of a GCE Advanced Subsidiary Level

The Cambridge Pre-U requirements are aligned to the AS & A Level requirements as described above. In particular, three Principal Subjects (or an equivalent combination of A Levels and Cambridge Pre-U Principal Subjects) with minimum grade M3 are required. Global Perspectives and Research is not accepted as a stand-alone qualification but may be valued by universities alongside the required A Levels / Cambridge Pre-U Principal Subjects.

Read more on our recognition page for Germany. Full details can be found on the anabin database of the Central Office for Foreign Education (ZAB) at www.anabin.kmk.org (German only).

Freie Universität Berlin

Freie Universität Berlin welcomes applicants with Cambridge International AS & A Levels and Cambridge Pre-U qualifications, provided all general and subject-specific requirements as determined by the Central Office for Foreign Education ('Zentralstelle für ausländisches Bildungswesen'), an institution of the Ministries of Education and Cultural Affairs, and the University itself have been met.

Details of general and subject-specific requirements can be found on the website of the Central Office for Foreign Education (ZAB of the KMK) here: http://anabin.kmk.org as well as on Cambridge International's recognition database under Germany, KMK – Conference of Ministers of Education and Cultural Affairs in the Federal Republic of Germany. Additional programme-specific admissions criteria as defined by Freie Universität Berlin might also apply.

Full details of courses offered by Freie Universität Berlin and their respective admissions criteria can be found on the University's website at www.fu-berlin.de/en/studium/international/index.html

One other useful source is uni-assist, the service point for international student applications, supported by approximately 170 German universities, which processes and evaluates credentials. The uni-assist website, at www.uni-assist.de/en is available in English, provides a wealth of guidance, tools and FAQs regarding the application process and the access requirements in Germany.

The Netherlands

Nuffic, the expertise and service centre for internationalisation in Dutch education, has issued the following recommendations regarding IGCSE, AS & A Level qualifications and entrance to higher education in the Netherlands:

- Admission to an undergraduate degree programme at a research university ('wetenschappelijk onderwijs', WO) requires a Dutch VWO diploma or its equivalent. Three IGCSE subjects at Grade C or above plus three GCE Advanced Level (A Level) subjects at Grade E or above (a total of six **different** subjects) is considered comparable to a VWO diploma.
- Admission to higher professional education ('hogerberoepsonderwijs', HBO) requires the minimum of a HAVO diploma or its equivalent. Four IGCSE subjects at Grade C or above plus two GCE Advanced Subsidiary Level (AS Level) subjects at Grade E or above (a total of six **different** subjects) is considered comparable to a HAVO diploma.

You can find full details regarding the acceptance of IGCSEs and A Levels on the Nuffic website at www.nuffic.nl/en/subjects/education-and-diplomas-united-kingdom

Your chosen higher education institution (HEI) verifies whether you meet its educational and language requirements. Information on the selection criteria will be available through your chosen institution and/or selected study programme, so do check these carefully.

'Studielink' is the official registration and application portal for programmes at Dutch higher education institutions. The 'Studielink' website, available at www.studielink.nl, provides step-by-step instructions on how to enrol.

Please note: you must check with your chosen institution whether you are required to register via 'Studielink' as some institutions use a different method to register students from abroad.

The website 'Study in Holland' at www.studyinholland.nl is also worth a visit. It provides useful information on admission requirements, study programmes, tuition fees and much more.

Our recognition database holds information on the Dutch universities which have formally recognised Cambridge qualifications. Certain courses may have higher entry requirements, depending on the university. You are strongly advised to check all requirements before submitting an application. Any questions, contact the university concerned.

For more information on applying to universities in the Netherlands, see our brochure, 'Destination Netherlands' and go to: cambridgeinternational.org/programmes-and-qualifications/recognition-and-acceptance/country/netherlands

University of Groningen

The University of Groningen welcomes applications from students holding Cambridge International A Levels and Cambridge IGCSEs. Students generally require three Cambridge IGCSEs at Grade C or above plus three Cambridge International A Levels (that is, six **different** subjects in total) to be considered for admission to undergraduate degree programmes. These requirements are comparable to the Dutch VWO diploma.

Meeting the minimum entry requirements does not automatically guarantee a place on your chosen degree programme. Entry requirements and selection procedures vary according to the programme, so it is important to check specific entry requirements. In addition, you must satisfy any specific subject or language requirements that may be prescribed for your selected programme.

Full details of minimum grade requirements, prerequisite subjects and specific language requirements can be found by checking the University website at www.rug.nl/education/application-enrolment-tuition-fees/admission. Alternatively, please contact the Admissions office directly.

Recognition in Latin America

The recognition of Cambridge qualifications is growing in Latin America, where the AICE Diploma is a popular school-leaving qualification. Universities across the region are increasing their acceptance and recognition of Cambridge qualifications.

Argentina

Cambridge qualifications are recognised at more than five higher education institutes, including Universidad de San Andrés, Universidad Argentina de la Empresa (UADE) and Universidad Austral.

A number of universities will accept applications if you possess the Cambridge AICE Diploma or Cambridge International AS & A Levels.

The minimum requirement for application to a university for students applying from Argentina is that you hold a Bachillerato (national school-leaving certificate). You must apply directly to the individual university through the admissions department.

If you are an international student applying to universities in Argentina, you must provide proof that you have completed your studies. Some universities may offer exemption from certain entry conditions if you can provide proof of Cambridge AICE Diploma completion.

Some universities give preferential entry requirements if you possess Cambridge qualifications, such as exemption from a subject in the entrance courses (taken between finishing school and starting university) and exemption from proof of English language ability. However, entry requirements vary between universities, and are made at the university's discretion, so you are advised to check directly with the admissions department of each individual university you wish to apply to. For example, ITBA recognises individual Cambridge International A Levels (Maths, Chemistry or Physics only), with Grade C or above to exempt students from taking that subject in the entrance course; and a shorter course if you have achieved a Cambridge International AS Level with Grade C or above.

Universidad Austral

Universidad Austral welcomes students who hold the Cambridge AICE Diploma. Additional requirements for admission, such as minimum points score, undertaking a research project and/or an interview may be requested.

A pass in Cambridge International AS or A Level Mathematics with a minimum of 80 points will exempt students from the Maths Foundation course, provided the student has obtained a general average of 7 in secondary school. A pass in Physics at Cambridge International AS or A Level will exempt students from the Introduction to Engineering course.

This recognition statement and others from Argentina can be found on the recogntion database.

Brazil

Recognition of Cambridge qualifications is starting to increase in Brazil. Currently, Fundação Instituto de Administração (FIA) is the only private university that formally states that they accept Cambridge qualifications. Brazilian students can apply to study in higher education institutions in Brazil, providing that they have a Certificado de Conclusão do Ensino Médio, which is proof that they have finished their compulsory primary and secondary education.

Higher education institutions in Brazil can specify their own selection process – two of the most popular admissions methods currently in place are the ENEM and the Vestibular.

The ENEM (National Examination of Secondary Education) is the test devised by the Ministry of Education, Brazil to grant school students access to the public or federal universities of the country and to private universities. The ENEM has become the most important examination offered in Brazil and can be taken by any student about to graduate from high school or who has already completed their secondary school education.

The Vestibular examination is still used by many institutions in Brazil as an alternative to ENEM. This examination is used to evaluate the knowledge acquired by the student in their primary and secondary school education.

You have the opportunity to take the ENEM examination once a year in November. The following website provides more information and details of how to register: http://enem.inep.gov.br. You should contact individual institutions directly to check the arrangements for Vestibular examinations.

All prospective international undergraduate students applying to study in Brazil must be able to prove their proficiency in Portuguese, to be able to study in the language and take the admissions examinations. This is assessed by the Certificado de Proficiência em Língua Portuguesa para Estrangeiros (CELPE-Bras). The CELPE-Bras is offered in Brazil and countries such as the US, Germany, Chile and Japan with the support of the Brazilian Ministry of International Relations (MRE). You can register for the CELPE-Bras online in February, March, August or September at http://enem.inep.gov.br.

You will also need to submit their academic transcripts to the Conselho Estadual de Educação, the educational institution located in each Brazilian state, which will authorise recognition of foreign education certificates.

You will need to obtain a visa to study in Brazil. You can do so through the Consulate General of Brazil (Consulado Geral Do Brazil) in your home country. Student visas are issued for one year and can be renewed. Visas usually take around two to three months to be processed.

Fundação Instituto de Administração (FIA)

Fundação Instituto de Administração welcomes candidates who present three or more Cambridge International AS or A Levels with any grade. Applicants with these qualifications are exempt from the admission test and also automatically from the need to prove proficiency in English in any other way (TOEFL, for example).

This recognition statement can be found at: www.cambridgeinternational.org/recognition-search

Recognition in the Middle East

Formal university recognition in the Middle East and North Africa (MENA) region is on the rise as the popularity of Cambridge qualifications continues to steadily grow. Examples of the recognition policies which we currently hold for key countries within the MENA region can be found below.

Egypt

The Supreme Council of Universities is presided over by the Minister of Higher Education and is responsible for establishing the entrance requirements for both government and private universities. Admission requirements to first-cycle study programmes will vary depending on your choice of degree:

- Admission to an undergraduate degree programme generally requires:
  - **Eight IGCSEs** at minimum Grade C or Grade 4 or above plus one A Level at Grade D or above. An A level can be substituted by two AS Levels so eight IGCSEs and two AS Levels would also be acceptable.
- Admission to a medical or mathematical programme such as medicine, pharmacology, engineering or computer science (this is not an exhaustive list) requires:
  - **Seven IGCSEs** at minimum Grade C or Grade 4 or above plus two A levels at minimum Grade D or above.

Please note: An A level can be substituted by two AS Levels. Four AS Levels OR one A Level & two AS Levels (alongside the required 7 IGCSEs) are considered acceptable alternatives.

- Specific subjects may also be required for entry to faculties such as the Faculty of Medicine, Dentistry, Pharmacy, Physiotherapy, Engineering or Computer Science & Information. For Engineering, for example, mathematics plus either physics or chemistry are required; for Pharmacology, the required subjects are biology plus either chemistry or mathematics. You are advised to check with your chosen university before submitting an application.

All applicants must have successfully passed the Ministry of Education's examinations in Arabic, Religious Studies and Social Studies. More details about these three examinations can be found at www.moe.gov.eg You must also provide proof of 12 years of full-time schooling.

American University in Cairo (AUC)

The American University in Cairo (AUC) requires eight subjects for admission consideration. The following grades will satisfy the eight-subject requirement: Grade C or above at O Level, IGCSE or AS Level; Grade D or above at A Level. Subjects completed at both AS Level and A Level will not be double-counted; the highest grade only will be considered.

Please note:

- Preference will be given to applicants with excellent A Level and/or AS Level grades
- An O Level or IGCSE in Arabic as a foreign language will not be accepted as one of the eight eligible subjects

Applicants must submit all certificates to AUC. The University calculates eligibility using the highest eight scores. Copies with a fresh stamp (from the applicant's school or the British Council) are considered as official documents.

Applicants must also have completed a minimum of 12 years of schooling. Admission of IGCSE applicants who have completed less than 12 years of schooling is not guaranteed and is subject to University approval and available slots.

Full details of undergraduate programmes and applications procedures can be found at **www.aucegypt.edu/** Questions concerning programs of study, entry requirements and application procedures should be addressed to the Office of Recruitment and Student Service Center at **enrolauc@aucegypt.edu**

Transfer credits

The University grants transfer credits for A Level subjects with a minimum of a Grade B. The University does not grant transfer credit for subjects completed at AS, IGCSE or O Level. Full details of transfer credits can be found at http://catalog.aucegypt.edu/content.php?catoid=29&navoid=1459

This recognition statement and others from Egypt can be found on the recognition database.

Saudi Arabia

The Ministry of Education of the Kingdom of Saudi Arabia has set the following university entrance requirements:

The British GCSE certificate is equivalent to the General Secondary Education certificate of the Kingdom of Saudi Arabia, in accordance with the following options:

- eight GCSEs

  or

- five GCSEs plus one A Level

  or

- five GCSEs plus two AS Levels.

You must have achieved Grade C or above in each GCSE subject, and Grade D or above in each AS and/or A Level subject.

You must have completed the equivalent of 12 years of secondary schooling. Full-time attendance at school is required in all cases; correspondence learning will not be accepted in lieu.

The University of Business and Technology (UBT)

The University of Business and Technology (UBT) values Cambridge qualifications for entry to higher education studies.

All candidates applying with Cambridge IGCSEs or AS/A Levels must meet one of the Ministry of Education's requirements for equivalency listed below:

- eight IGCSE (O Level) subjects with minimum of Grade C
- five IGCSE (O Level) subjects with a minimum of Grade C plus two AS subjects with a minimum of Grade D
- five IGCSE (O Level) subjects with a minimum of Grade C plus one A Level subject with a minimum of Grade D.

In addition, candidates applying with Cambridge qualifications must have completed a minimum of 12 years of education and provide a certificate/letter from their school as evidence. All other requirements for entry to the UBT must also be fulfilled.

Full details of UBT's undergraduate programmes and how to apply can be found at: www.ubt.edu.sa

This recognition statement and others from Saudi Arabia can be found on the recognition database.

United Arab Emirates

The United Arab Emirates Ministry of Education has set the following university entrance requirements:

1. You must have completed 12 years of schooling if you wish to be considered for admission to UAE institutions of higher education.
2. You must have achieved **a Grade C or above** in a minimum of **five** subjects at IGCSE or O Level **plus two** subjects at GCE Advanced Subsidiary (AS) Level.
3. Subject-specific requirements for certain courses may also apply. You are strongly advised to check with your chosen university before submitting an application.

Middlesex University Dubai

Middlesex University Dubai welcomes applicants with Cambridge qualifications. The University has over 3000 students from more than 100 different nationalities and offers the International Foundation Programme (IFP) along with a wide variety of degree programmes, including Business, HR, Marketing, Psychology, International Tourism Management, Law, Computer Systems Engineering and Accounting & Finance.

Entry requirements for undergraduate study vary depending on the individual programme. Students can check the entry requirements for their selected course(s) at www.mdx.ac.ae/courses. Alternatively, students can contact the University's Admissions Department at admissions@mdx.ac.ae, who will be able to answer any questions students may have.

A certificate with Cambridge IGCSE First Language English or Cambridge IGCSE English as a Second Language or Cambridge GCE O Level in English Language, at Grade C or above, will meet the University's proficiency requirements.

To find out more about Middlesex University Dubai, visit the University's website at www.mdx.ac.ae. You can also follow Middlesex University Dubai on social media. Please check our recognition database for full details.

This recognition statement and others from the United Arab Emirates can be found on our recognition database.

4. Certificates with foreign qualifications must be attested by either the UAE Ministry of Education, or by the relevant regional education zone (for example, KHDA in Dubai) before they will be accepted. Universities will instruct you as to the correct procedures to follow to meet this requirement. If you have any questions regarding your application, contact the university concerned.

   Please note: for Cambridge certificates issued outside the UAE, we can provide a certifying statement of results which has been authenticated by the Foreign and Commonwealth Office as set out in the Hague Agreement. The application form to obtain this certificate can be found on our website at https://certstat.cambridgeinternational.org, or by searching for 'Certifying Statement of Results' on our website.

5. **Please note:**

- The above grades are the minimum admission requirements; institutions can set higher standards at their own discretion.
- Arabic and Islamic Studies are compulsory for entrance for undergraduate studies in the UAE. Achievements at IGCSE/O Level or AS or A Level will not be accepted in lieu. You must sit the Ministry of Education's examinations in these two subjects. You can find further information at www.moe.gov.ae
- UAE high school graduates wishing to pursue an undergraduate degree programme at UAE University, Zayed University or the Higher Colleges of Technology (HCT), and higher diploma programmes at HCT must provide evidence of their proficiency in English. Details of the approved English language tests can be found on the universities' websites. You should check with your chosen institutions if you have any questions regarding language or subject-specific requirements.

American University of Sharjah

To be considered for admission to an undergraduate degree programme with Cambridge qualifications at the American University of Sharjah, applicants must present:

- a minimum of eight different subjects chosen from Cambridge IGCSE, Cambridge O Level and/or Cambridge International AS & A Level.
- Four of these subjects must be offered at Grade B or above; the four remaining must be at Grade C or above.
- Subjects studied must be from at least four different subject groups (mathematics, the sciences, the humanities etc.).

Only subjects classified as academic by AUS (including arts and the creativity subject group) will be considered for admission. Mathematics is compulsory to major in science and should be offered with other science subjects. Please note: If students have any questions regarding the eligibility of their chosen subjects, they should contact AUS directly.

Priority regarding acceptance and the selection of majors will be given to applicants who:

- have completed at least 12 years of schooling
- provide an official letter from their school giving the final year of completed study
- have achievements in Cambridge International AS Levels and/or Cambridge International A Levels
- have achieved the highest grades in their exams.

Please note:

- All applicants are required to present proof of their English proficiency (iBT 80, iTP 550, IELTS 6.5). Further information on AUS's English proficiency requirements can be found at www.aus.edu/academic-requirements
- Various placement tests are also required by the different majors. Placement tests are compulsory and vary, depending on the student's chosen major.

Full details of AUS's undergraduate degree programmes, entry requirements (including those for English language) and placement tests for majors can be found on the University's website at www.aus.edu. Students who have questions regarding their application, or selected courses, should contact AUS directly.

This recognition statement and others from the United Arab Emirates can be found on the recognition database.

Recognition in North America

USA

Universities and colleges across the USA, including all Ivy League universities, welcome students with Cambridge qualifications.

Colleges and universities generally require a minimum of AS or A Levels for admission, but some colleges will accept Cambridge IGCSEs and O Levels as meeting entry requirements. Some institutions and credential evaluators may consider five Cambridge IGCSE or O Level qualifications with passes at Grade C or higher to be equivalent to a high school diploma.

Some colleges and universities accept applications through the Common Application (www.commonapp.org). Others, primarily public universities and university systems, have their own application process which requires you to submit applications to the university directly. There is no limit to the number of institutions you can apply to. In addition to the application form, an academic transcript, one or two teacher recommendation letters, a personal statement essay, a college counsellor or a secondary school report, a list of extracurricular activities, and standardised testing scores – either SAT or ACT – are required. Some universities may additionally require essays, recommendations, or portfolios. Some colleges and universities may consider academic achievement or standardised testing scores for scholarships, some of which are available to overseas students.

Cambridge International AS & A Level qualifications may be eligible for advanced standing or credit at universities that accept them. We recommend you check your eligibility with the university directly.

There are a number of admissions dates and paths:

- **Rolling admissions** – applications open around October and close in May. Universities receive and make application decisions throughout the year. Many public universities have rolling admissions and close applications after 1 May.
- **Early decision** – typically October and November deadlines, decision by mid-December and is binding. If you are accepted for this round, you must withdraw all other applications and commit to this college or university. You and the school sign an Early Decision agreement at the time of application.
- **Early action** – typically October or November deadlines, decision by mid-December and is not binding. You can apply to other universities for later deadlines and make a decision later in the year.
- **Regular decision** – typically early January to February deadlines, decision by the end of March and is not binding. You have the month of April to decide between offers and commit to a university by 1 May.
- **Waitlist** – you are placed on a waitlist and may hear a decision on admission after 1 May. Admission from the waitlist to a desired university is not guaranteed.
- **Transfer** – if you are transferring between universities or from community college to university you must check individual transfer deadlines.
- **Community college enrolment** is typically more flexible and rolling throughout the year.

For more information on applying to university in the USA, please see our brochure 'Destination USA: Using Your Cambridge Qualifications to Study in the US'.

Arizona State University

Arizona State University recognises Cambridge International AS & A Levels for matriculation purposes. A maximum of 6 to 10 credits can be awarded for grades ranging from E or above, depending on the subject. AS Levels at Grade E or above will receive a maximum of 3 or 4 credits (with the exception of Chinese which receives 5 credits). All AS Level English courses are now recognised for placement into ENG 105 and 3 elective credits. All A Level English courses are recognised for placement into ENG 105 and 6 elective credits.

This recognition statement and others from the USA can be found on the recognition database.

Canada

Universities and colleges across Canada welcome students with Cambridge qualifications. There is no federal ministry of education responsible for admissions; instead, each of the 10 provinces and three territories holds responsibility for their own universities and admissions procedures. If you are applying to universities in Alberta, Ontario and British Columbia, you may apply through a common electronic application for the province. Applications to universities in other provinces are made to the university admissions office directly.

If you possess at least four AS Levels and/or at least two A Level qualifications you are eligible to apply to Canadian universities. More competitive courses may require additional qualifications at higher grades. Colleges may accept Cambridge IGCSE/Cambridge O Level as meeting entry requirements. You may be eligible for advanced standing credit. All Canadian universities have language proficiency requirements in English or French. In addition to language requirements, you need to consult requirements for international student entry by institution. We strongly recommend that you check the entry and language requirements of your chosen course of study before submitting an application.

Canadian universities will typically offer a Conditional Letter of Admission with certain conditions to meet in order to be awarded a place. These conditions usually include maintaining the academic average and successfully completing and graduating from high school.

International students can also use these Conditional Letters of Admission to start the application process for a study permit. All non-Canadian citizens or permanent residents are required to have a valid study permit to pursue studies that are longer than four months.

Application deadlines vary by province and institution. Most application deadlines are in January or February. Many universities have 'rolling admission', whereby a decision is made within weeks of receiving the application. In general, it is recommended that you apply 10 to 12 months before your desired entry date.

University of Toronto

The University of Toronto will accept AS Levels, A Levels and Cambridge AICE as a basis for admission. Applicants may be considered with grades of A and B on at least four different AS examinations or three different A Levels or the Cambridge AICE Certificate. Students are advised to take AS/A Level subjects that will provide them with strong academic preparation.

Subjects with a more vocational focus are not advised. Applicants seeking admission to the Faculty of Applied Science and Engineering are required to present Chemistry, Mathematics and Physics at A Level with grades of A. Transfer credit may be granted for some academic Advanced Level examinations. No credit is given for Advanced Subsidiary level exams. No credit is given by the Faculty of Applied Science and Engineering.

This recognition statement and others from Canada can be found on the recognition database.

Recognition in Oceania

Recognition of Cambridge qualifications is growing fast throughout Oceania. In a region whose universities increasingly claim high places in the world rankings, there are numerous opportunities for you to enter and succeed in top-class degree programmes. This page gives some examples.

Australia

Universities across Australia welcome applications from Cambridge students. Cambridge International A Levels are widely accepted for direct entry to undergraduate degree courses, and a growing number of universities now also accept Cambridge Pre-U. For academic courses at established universities, typical Australian university entrance requirements are three A Level passes at minimum Grade C or above, although some courses may have lower entry requirements. Two AS Level subjects can be counted in place of one A Level subject for some universities.

Tertiary Admissions Centres across Australia process applications for Cambridge students from Australia and New Zealand; international students apply directly to the university.

All Universities Admissions Centre (UAC) participating institutions consider GCE Advanced Levels (or comparable qualifications) equivalent to an Australian Year 12 qualification. UAC also considers the Cambridge Pre-U Diploma as comparable to the Australian Year 12 standard. If you did not complete the Cambridge Pre-U Diploma, Cambridge Pre-U Principal Subjects and GPR will be assessed in lieu of A Levels.

More details about applying to university in Australia can be found in our 'Destination Australia' brochure.

University of Melbourne

A minimum of three A Levels at Grades BBC are required for application. Requirements differ and some courses require significantly higher grades. Admission is guaranteed to students who achieve certain grades. Cambridge Pre-U is recognised for direct entry. The University of Melbourne will also accept a combination of Cambridge Pre-U and GCE A Levels to meet the entry requirements.

This recognition statement and others from Australia can be found on the recognition database.

New Zealand

All universities in New Zealand accept Cambridge International A Levels for admission. Cambridge Pre-U is also widely accepted. The minimum entry requirements are agreed by Universities New Zealand – Te Pōkai Tara, which represents all universities in New Zealand.

For students in New Zealand: In response to changes in the UK Universities and Colleges Admissions Service (UCAS) tariff system as of September 2017, Universities New Zealand has instituted the NZ Cambridge International Exams University Entrance tariff system. Do check the Universities New Zealand website: www.universitiesnz.ac.nz for details of changes made.

We would advise you to check your chosen university's website for any specific entry requirements. Minimum grades must also be achieved in literacy and numeracy subjects. Since 2016, the University of Auckland has also required domestic students to obtain a minimum of a Grade D in an English subject at AS or A Level in order to satisfy the Academic English Language Requirement.

Typical entry requirements for international students are three A Levels including at least one Grade C or better. A result in General Studies cannot be included among the three on which the application is based.

Universities New Zealand – Te Pōkai Tara

For students (domestic and international) Cambridge International examinations, the minimum university entry standard is as follows:

Part A
A minimum of 120 points on the NZ Cambridge International Exams University Entrance tariff at A or AS level from subjects other than the General Paper, including at least three subjects (other than Thinking Skills) in which no grade is lower than D.

Part B
Literacy and numeracy must be satisfied as follows:

- LITERACY: A Grade E or better in any one of AS English Language, Language and Literature in English, Literature in English. A Grade D or better will satisfy one of the subject requirements of Part A, or as prescribed for university entrance with NCEA.
- NUMERACY: Either (i) A Grade D or better in IGCSE or GCSE mathematics, or (ii) Any mathematics passed at AS level.

A Grade D or better will satisfy one of the subject requirements of Part A, or as prescribed for university entrance with NCEA.

This recognition statement and others from New Zealand can be found on the recognition database.

Recognition in Sub-Saharan Africa

Formal university recognition in the African continent is on the rise as increasing numbers of Cambridge students look to study in the region. Listed below are the recognition policies for some universities in the region – other policies can be found on our recognition database.

South Africa

If you did not follow the formal secondary school route in the South African schooling system and want to apply to study a Bachelor's degree at a South African university you will need to qualify for a certificate of complete or conditional exemption from Universities South Africa (USAf), a membership organisation representing South Africa's 26 public universities.

A certificate of exemption will be granted to holders of Cambridge International AS & A Levels and the AICE Diploma, provided you meet the minimum qualification combinations and the subject group requirements. The granting of a conditional exemption is solely at the discretion of USAf. USAf's recognition of Cambridge qualifications applies to all universities in South Africa.

A certificate of exemption is required to pursue first degree studies at a South African university but it does not guarantee acceptance at a university. Universities in South Africa are autonomous and may set their own entry requirements, which are usually much higher than the minimum requirements to obtain a certificate of exemption. Entry requirements differ from university to university, faculty to faculty and programme to programme. We recommend you confirm the entry requirements of the specific programme you wish to apply for well in advance of applying, and ensure you have chosen the correct subjects and will achieve the required grades.

For further information please see our brochure 'Conditions and Requirements to Gain Exemption for Entry to South African Public Universities' on our website.

Universities South Africa

Universities South Africa (formerly HESA) will grant matriculation exemption certificates to holders of Cambridge International AS & A Levels, provided they meet the subject group requirements and the following criteria:

- three subjects at A Level (A–E) plus one subject at IGCSE (A*–C)
- two subjects at A Level (A–E) plus three subjects at IGCSE (A*–C)
- four subjects passed at AS Level (A–D) plus one subject at IGCSE (A*–C).

Complete subject grouping lists can be found on the Cambridge website at:
www.cambridgeinternational.org/Images/523166-university-recognition-south-africa.pdf

For further information, please visit www.usaf.ac.za

This recognition statement and others from South Africa can be found on the recognition database.

Kenya

Cambridge International Advanced (A) Levels are accepted for entry to undergraduate degree courses in Kenya. Applications can be made directly to the universities, often via an online application form. Universities generally require two principal passes and one subsidiary pass at A Level in relevant subjects. However, as entry requirements differ from university to university and from programme to programme, you are advised to check the minimum entry requirements for your chosen course at your preferred institution.

Institutions list the entry requirements for each of their courses on their websites alongside other requirements, such as an admissions test, an interview or an English proficiency requirement. Meeting the minimum entry requirements in no way guarantees admission to a programme.

University of Nairobi

General admissions criteria:

Admission to Certificate Courses will be based on any of the following minimum qualifications:

- a A Level qualification with a minimum of two subsidiary passes or equivalent.

Admission to Diploma Courses will be based on any of the following minimum qualifications:

- a A Level qualification with a minimum of two subsidiary passes or equivalent.

Admission to Bachelor's Degree Programmes will be based on any one of the following minimum qualifications:

- an A Level with two principal passes or equivalent in relevant subjects.

Only applicants whose results are available at the time of application will be considered.

www.uonbi.ac.ke/admission/undergraduate

This recognition statement and others from Kenya can be found on the recognition database.

Recognition in the UK

Cambridge qualifications are valued by UK universities as academically rigorous qualifications. Cambridge International AS & A Levels are recognised by UK higher education institutions as equivalent to UK GCE AS and A Levels. The Cambridge Pre-U, offered in the UK, is also widely recognised by universities. Most UK universities require a minimum of three A Levels for admission, however some courses will admit students with two A Levels. Check the entry requirements for your chosen course with the university directly.

United Kingdom

In the UK, you must apply for undergraduate courses through the Universities and Colleges Admissions Service (UCAS), not to individual universities. According to the UCAS 'International Qualifications' handbook entry, Cambridge International AS & A Levels are 'accepted at grades A*–E in lieu of the UK GCE A and AS Level on a subject for subject and grade for grade basis' ('UCAS International qualifications 2015', p75).

Many courses require certain grades and particular subjects in order for students to apply. It is important you check that your choice of Cambridge International AS & A Level subjects is suitable for your intended degree course, especially if you have a specific career path in mind such as medicine, engineering or law. For medicine, for example, two sciences or one science and a maths qualification is often expected.

UK applicants typically hold at least five GCSEs at Grade C/4 in academic subjects. However, for competitive courses such as medicine, a range of good GCSEs – mostly A* and A grades (numeric grade 7–9) – may be expected. Since Cambridge IGCSE and Cambridge O Level qualifications are equivalent in standard to the UK GCSE, universities will expect the same grades in Cambridge IGCSE or Cambridge O Level examinations as they would from other applicants holding equivalent qualifications. Most university courses require at least a Grade C (or numeric grade 4) in GCSE English and Mathematics, and sometimes a science depending on the course (for example, medicine, nursing and primary school teaching). Some less competitive courses may require lower grades and may admit students who hold a mix of Cambridge International AS or A Level grades.

UK universities accept Cambridge Pre-U as equivalent to other Level 3 qualifications such as A Levels. The UK's most prestigious group of universities, the UK Russell Group (which includes Oxford and Cambridge), has welcomed the academic rigour of the qualification.

For more information on applying to university in the UK, including key dates, please see our brochure: 'Destination UK – Using your Cambridge Qualifications to Study in the UK' and the UCAS website www.ucas.com.

Imperial College London

Imperial College London welcomes students with Cambridge International A Levels and considers them to be equivalent to UK A Levels on a grade-for-grade basis.

When making an offer, Imperial takes into account that Cambridge International A Levels are linear and therefore re-takes are only allowed for the whole subject. Cambridge International A Levels provide a reliable measure of a student's knowledge and skills in the subject studied and are a reliable indicator of students' performance. They demonstrate a student's abilities for problem-solving and critical thinking.

For more information about Imperial College London and how to apply please visit www.imperial.ac.uk

This recognition statement and others from the UK can be found on the recognition database.

Demonstrating your English language ability

If English is not your first language, or you come from a country where English is not an official language or one of several official languages, you may be required to provide proof of your English language skills.

Cambridge IGCSE First Language English, Cambridge IGCSE English as a Second Language and Cambridge O Level English Language are accepted by many universities around the world towards meeting English language proficiency requirements. Some universities may exempt you from further proof of your English language ability if you show you have been educated in English for a certain number of years. All Cambridge courses and qualifications, with the exception of modern foreign languages, are taught in English.

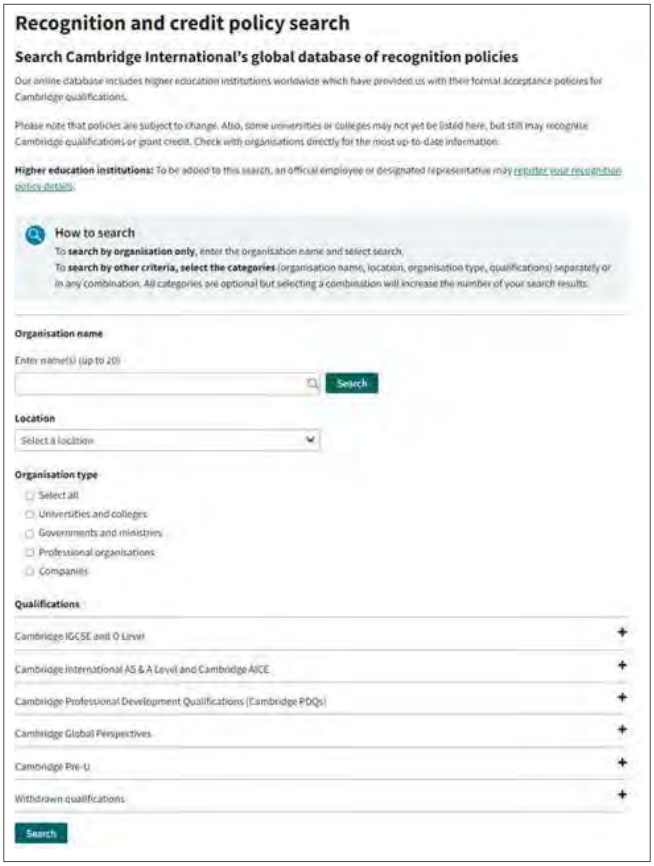
We strongly advise you to check the English language requirements of each university and course you are interested in applying to before making any applications.

Please be aware that the English language skills you may be asked to provide evidence of may be linked to visa requirements for the country in which you wish to study.

Universities may also require students to take another specific English language proficiency test such as TOEFL or IELTS if you are not an English native speaker. Requests to take a specific test may be linked to your visa application. Cambridge International cannot exempt you from taking an additional English language test if you are asked to take one.

The recognition database

Our recognition database allows you to search by qualification for universities in specific countries. To access the database, go to cambridgeinternational.org/recognition-search



Select the country you wish to search for, the type of organisation you wish to search for and the qualification type you hold. Alternatively, use the search box to search by name for a particular organisation.

For each organisation, contact details are viewable by clicking on 'Details' under each entry. If the university of your choice is not included in our database, please let us know by registering your institution's admissions policy. Visit cambridgeinternational.org/recognition-search.

There are many organisations not listed on our database which do accept Cambridge qualifications. The database is correct according to the information provided to us; however, we recommend checking with organisations directly for the most up-to-date information on entry requirements as they are subject to change.

CAMBRIDGE

An international education from Cambridge

What lies at the heart of our approach

cambridge.org/internationaleducation

Welcome to our guide: An international education from Cambridge.

This short guide provides an introduction for learners, parents and schools to the Cambridge approach to an international education. It sets out the five key elements to providing a truly international education.

These are:

- an international curriculum
- our approach to teaching and learning
- assessment with Cambridge
- international recognition and university acceptance around the world
- our global community of learners, teachers and schools.

At any one time, around one million learners in 10 000 schools, across over 160 countries are learning with a Cambridge curriculum. We are the largest exam board in the world and one of the oldest – we have been providing international exams for over 150 years. We are also not-for-profit and wholly owned by the University of Cambridge, meaning that all our focus goes into providing the best possible education for our international learners, wherever they may be.

An international education from Cambridge represents an international standard and a truly global approach. It also equips students whose first language is not English to function competently and confidently in the English language – the principal language of international exchange and business. That is why Cambridge programmes are recognised all over the world as preparing students for their higher education, careers and future lives.

Research shows that the most important factor in improving learner outcomes is improving teacher practice. At Cambridge, we are providing an ever-greater range of training events for our teaching community – over 2000 per year face-to-face and hundreds more online.

We are always delighted by the interest of our international community of schools in engaging deeply with us and with one another. We have striven to respond to that demand through more conferences, online communities and social media channels. We are also helping Cambridge schools to create their own local communities, run by schools for schools.

The world changes rapidly, bringing with it an ever-shifting array of opportunities, as well as challenges. At Cambridge, we are fully committed to giving all our learners the skills and knowledge to navigate the 21st century world with passion and curiosity.

Rod Smith, Group Managing Director,
International Education,
Cambridge University Press & Assessment.

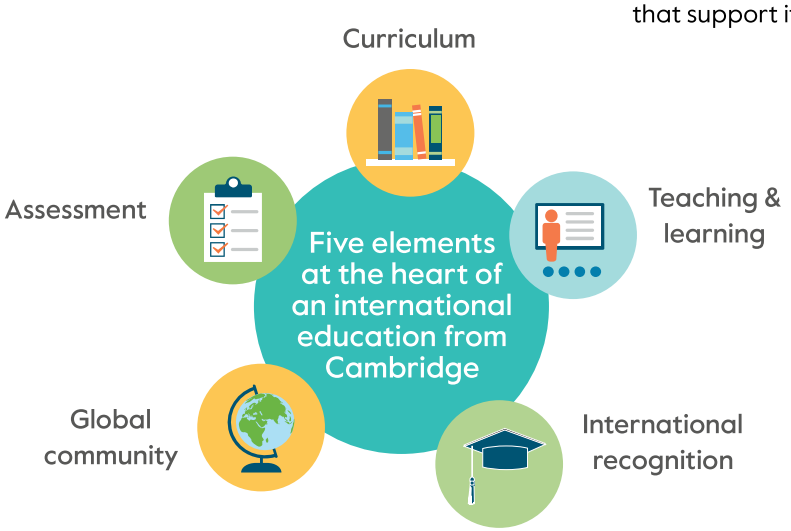
Introduction

The aim of this document is to communicate clearly to school leaders, teachers, students and parents what lies at the heart of a Cambridge education.

We prepare school students for life, helping them develop an informed curiosity and a lasting passion for learning.

Schools can shape a Cambridge curriculum around how they want students to **learn**, with a wide choice of subjects and flexible ways to offer them. Cambridge programmes inspire students to love learning, helping them **discover** new abilities and a wider world. And we help students develop the skills they need for life, and to **achieve** at school, university and work.

Our work is informed by research and underpinned by over 150 years of practical experience working with schools and governments worldwide. We are the only exam board that is wholly owned by a world-leading university, the University of Cambridge.



Our global community of nearly a million students in over 10 000 Cambridge schools in 160 countries benefits from qualifications internationally recognised by universities and employers worldwide.

We are a not-for-profit organisation, so we devote our resources to unlocking learners' potential, and contributing to society through the pursuit of education, learning and research at the highest level.

An aligned system of education

We believe education works best when **curriculum, teaching, learning** and **assessment** are closely aligned. That belief inspires the design of each aspect of Cambridge programmes.

Alignment stems from knowing what we want students to learn, understanding how we will know that learning has happened, and encouraging teaching and learning approaches that support it.

1

International curriculum

We believe in giving Cambridge schools the power to shape their curriculum around how they want students to learn.

What are schools bringing into their curriculum with Cambridge? We set out three important things we want students to develop – deep subject knowledge, conceptual understanding and higher order thinking skills. Our Cambridge Pathway is a clear framework for progression from one stage to the next.

Deep subject knowledge, conceptual understanding and higher order thinking skills

Cambridge programmes combine an emphasis on mastering subjects in depth, at the same time as developing skills for study and work in the future.

We believe in the intrinsic value of studying a subject in depth. In the words of Andreas Schleicher (2017), Director for Education and Skills, OECD: 'In top performing education systems the curriculum is not mile-wide and inch-deep, but tends to be rigorous – that is, provides a high level of cognitive demand. It's also more focused – with a few things that are taught well and in great depth and in a way that is coherent.'

Deep subject knowledge is important in order to develop the ability to solve problems, to apply understanding to new situations and to enable learners to progress to the next stage. It is especially important at Cambridge International A Level because most learners aspire to go to university, where deep subject understanding is so vital.

Regular consultation with leading higher education institutions (including Harvard, Stanford and Cambridge) has informed our work to make sure our syllabuses for learners aged 16 to 19 develop their **conceptual understanding**: a firm grasp of the subject's key concepts (see Meyer and Land 2003) and developing the skills they need to succeed at university.

We see key concepts as essential ideas that help learners develop a deep understanding of their subject and make links between different aspects. Key concepts can often transform a student's grasp of their subject, and open up new ways of thinking about, understanding or interpreting the important things to be learned. Good teaching and learning incorporate and reinforce a subject's key concepts to help learners gain:

- greater depth and breadth of subject knowledge
- confidence, especially in applying knowledge and skills in new situations
- fluency to talk about their subject conceptually and show how different aspects link together
- a level of mastery of their subject to help them enter higher education.

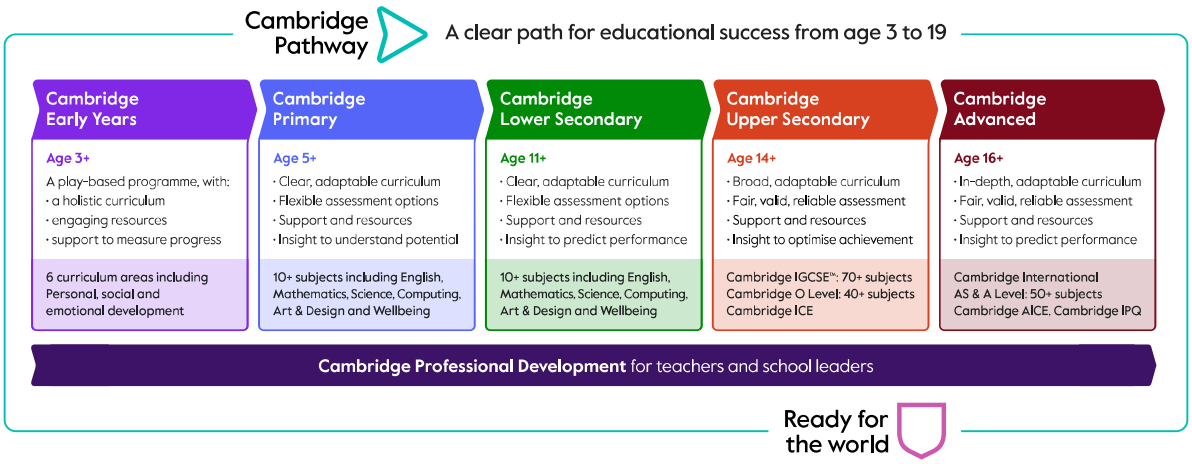
As well as encouraging students to develop **higher order thinking skills** within subject disciplines – problem solving, critical thinking, independent research, collaboration, presenting arguments – we believe students need to work effectively across disciplines.

Of course this ability is important not only for getting into university but for getting on in life. What's more, it makes learning and teaching enjoyable and rewarding. And the transferable skills students develop in interdisciplinary programmes like Cambridge Global Perspectives™ reinforce their understanding and skills within subject disciplines.

Progression

We offer a coherent curriculum with clear progression at each stage, for students aged 3 to 19. We identify clearly what we want students to learn at each stage. At each stage, students build on their previous learning – a 'spiral approach' that reinforces what students have learned, while at the same time taking them forward. We design each syllabus with this spiral approach in mind.

Choice and flexibility



We believe that empowering students by allowing them to personalise their learning programme helps build motivation throughout their studies and nurtures their love of learning.

In a recent survey, 100% of university admissions tutors told us that Cambridge programmes are an excellent preparation for university and help students succeed when they get to university. They also told us Cambridge students:

- think logically and are able to form ordered and coherent arguments
- are able to think critically
- are able to present reasoned explanations, understand implications and communicate them logically
- have in-depth knowledge of their subject.

We see our role as supporting schools to develop a curriculum that suits their context, culture and ethos, and that they can tailor to their students' needs. This is why we offer such a wide range of subjects: over 70 at the Cambridge Upper Secondary stage (Cambridge IGCSE™ and Cambridge O Level) and over 55 at Cambridge Advanced (Cambridge International AS & A Level).

The structure and breadth of our programmes, therefore, makes sure that schools can offer students the choices and combinations of subjects that match their strengths and interests, rather than imposing a narrow or broad range of subjects.

Multilingual education

We value multilingualism and believe that there are many benefits to being bilingual or multilingual – for students, society and schools. We see every learner as a language learner. Language plays an important role in the school curriculum, either as a subject or as a medium of teaching and learning. Similarly, every teacher is a language teacher, and helps students learn the language they need to succeed in their non-language subjects.

At Cambridge, we support schools and partners to implement bilingual education. Cambridge programmes are often used for the English medium strand of a bilingual programme, and we offer curriculum and assessment for English as a second language for students aged 5 to 16.

Our wide subject range includes a large number of languages – currently, Cambridge IGCSEs are available in more than 30 languages.

We provide professional development in multilingual education to support our curriculum and assessment offer. We offer courses on teaching bilingual learners, language awareness, as well as training around specific language syllabuses. We have a dedicated section on our website called 'Bilingual education'.

The wider Cambridge University Press & Assessment Group offers many options to support bilingual learners. The English group provides the world's leading range of qualifications and tests for learners and teachers of English, including IELTS. More than 5.5 million people take Cambridge English Qualifications and tests every year.

2

Teaching and learning

We design Cambridge programmes to support the development of learners who are confident, responsible, reflective, innovative and engaged – the attributes of the Cambridge learner.

What are our aspirations for students when they leave school? This question was the starting point for the development of the Cambridge learner attributes, introduced in 2011. The purpose of these attributes is to support the development of five powerful and highly desirable habits that will inspire students to love learning. This in turn helps them to achieve success in school, higher education, the workplace and life in general.

Learning habits describe how students approach situations, environments and challenges. They include a combination of values, attitudes, knowledge, skills and strategies. They also assume competence, which is the skilled and appropriate application of the attribute.

We know that, in isolation, these attributes are not new. Most education professionals see developing them as part of their job. But in setting out the Cambridge learner attributes, we have created a list of desirable outcomes intended to encourage schools to support these habits. They also help us to design challenging and relevant qualifications and professional development programmes.

Learning to learn

Put simply, learning happens when students think hard (see Husbands 2014), mobilising a number of different mental processes and resources that are both cognitive (such as reasoning and memory) and affective (emotional resources that include habits in learning).

Learning habits matter. 'Non-cognitive skills' (see Kautz et al 2014) include personal qualities such as perseverance, self-control, attentiveness, resilience to adversity, openness to experience, empathy and tolerance of diverse opinions. They:

- predict life outcomes at least as well as or better than traditional measures of cognition
- have positive and strong effects on educational attainment and also additional significant beneficial effects on important workplace and life outcomes
- can be enhanced, and there are proven and effective ways to do so.

Research shows that engaging students in their own learning – for example, via **metacognition** and **active learning** – improves outcomes. As the Cambridge learner attributes suggest, we encourage students to reflect on their learning, so they can articulate where they are in the learning process, and plan and control their learning strategies. The Cambridge learner

attributes also provide a cross-curricular language and set of expectations for all students and teachers to engage with.

Metacognition describes the processes involved when learners plan, monitor, evaluate and make changes to their own learning behaviours. The 'meta' refers to higher order cognition about cognition, or 'thinking about thinking'. Metacognition helps students become independent learners. It has a positive impact on learning, over and above the influence of intellectual ability.

Cambridge helps schools develop students' metacognition. Syllabus design is informed by research evidence about metacognition. Cambridge Global Perspectives programmes support learners in the process towards metacognition. Cambridge Professional Development Qualifications encourage and support metacognitive practices in teachers and school leaders.

For Cambridge, **active learning** fosters understanding, rather than rote learning facts. Students can apply this understanding to diverse contexts and problems. Active learning fosters students' learning and their autonomy, giving them great involvement and control over their learning and giving them skills for lifelong learning.

Also, learners are better able to revise for exams, because they already understand the ideas. Cambridge programmes not only develop and assess retention of knowledge, but also ask learners to draw on their understanding so they can analyse, evaluate and synthesise ideas. Active learning is also a key part of the professional development we offer, both via our Professional Development Qualifications and shorter courses.

Cambridge learner attributes

Confident in working with information and ideas – their own and those of others

Cambridge students are confident, secure in their knowledge, unwilling to take things for granted and ready to take intellectual risks. They are keen to explore and evaluate ideas and arguments in a structured, critical and analytical way. They are able to communicate and defend views and opinions as well as respect those of others.

Responsible for themselves, responsive to and respectful of others

Cambridge students take ownership of their learning, set targets and insist on intellectual integrity. They are collaborative and supportive. They understand that their actions have impacts on others and on the environment. They appreciate the importance of culture, context and community.

Reflective as learners, developing their ability to learn

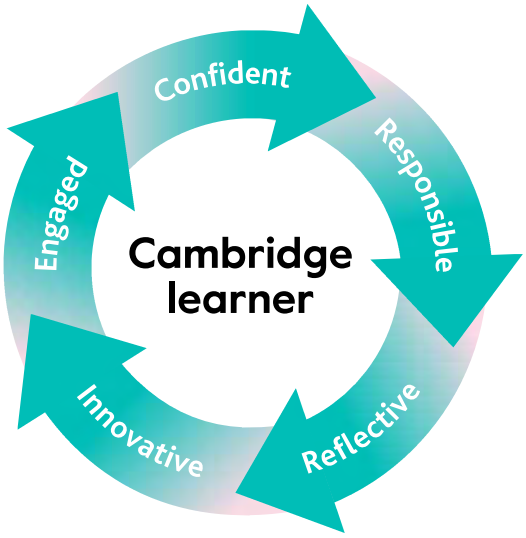
Cambridge students understand themselves as learners. They are concerned with the processes as well as the products of their learning and develop the awareness and strategies to be lifelong learners.

Innovative and equipped for new and future challenges

Cambridge students welcome new challenges and meet them resourcefully, creatively and imaginatively. They are capable of applying their knowledge and understanding to solve new and unfamiliar problems. They can adapt flexibly to new situations requiring new ways of thinking.

Engaged intellectually and socially, ready to make a difference

Cambridge students are alive with curiosity, embody a spirit of enquiry and want to dig more deeply. They are keen to learn new skills and are receptive to new ideas. They work well independently but also with others. They are equipped to participate constructively in society and the economy – locally, nationally and globally.



Helping teachers improve

Cambridge supports teachers to become:

- **confident** in teaching their subject and engaging each student in learning
- **responsible** for themselves, responsive to and respectful of others
- **reflective** as learners themselves, developing their practice
- **innovative** and equipped for new and future challenges
- **engaged** intellectually, professionally and socially, ready to make a difference.

The overwhelming body of research finds that the most important factor in improving student outcomes is good teaching. Teaching, and matching the teaching approach to the needs of students, is clearly the responsibility of each school. Different schools work in different contexts, and they know what is best for their students and teachers. An important part of our mission, therefore, is to help schools develop their teachers' classroom practice.

We believe effective teaching and learning can encompass a variety of approaches. Our professional development is designed to reflect that, so that it can help teachers in a variety of educational contexts improve their performance and practice – and therefore improve student outcomes – throughout their careers.

Teachers and school leaders need to develop their professional thinking and practice continually. That is why we invest heavily in providing a variety of high-quality, affordable routes for professional development.

We hold over 2000 training events worldwide every year, both face-to-face and online. Some of these training events focus on exams taken by our students. Other events focus on enriching teachers' own professional practice. Our popular Cambridge Schools Conferences give teachers a chance to learn from expert educators, test out their ideas with others and build their own professional network.

Through our network of Cambridge Professional Development Centres, we provide schools, leaders and teachers with local access to high-quality and affordable Cambridge Professional Development Qualification programmes (Cambridge PDQs). Our suite of Cambridge PDQs creates a professional learning and improvement pathway for teachers and school leaders at different stages in their career. They are based on international best practice and research evidence about the kinds of professional development that have real impact and value.

3

Assessment

We recognise that assessment has two important roles: to prove and improve – to prove what students are learning, and to suggest how they can improve their understanding and skills.

Good assessment is at the heart of a good education. When we design our assessments, our starting point is what we want students to develop: deep subject knowledge, conceptual understanding, and higher level thinking skills.

For assessment to work well, the questions used to test students' understanding need to have been designed well, too. This is as true for formative assessment and 'assessment **for** learning' (the questions that teachers ask every day in the classroom) as it is for summative assessment and 'assessment **of** learning' (end-of-year tests and public exams).

Fair, valid and reliable

Our assessments enable effective differentiation of student performance, across cohorts and over time. We design our assessments to be fair, valid, reliable and practicable:

- **Fair**: all students sit exams in the same conditions, as far as possible.
- **Valid**: an assessment assesses what it is intended to assess, and avoids irrelevant matters.
- **Reliable**: if you had taken the exam on a different day, and it was marked by a different examiner, you would get the same outcome.
- **Practicable**: an exam that schools can reasonably stage without excessive arrangements; and students can reasonably sit – for example, the exam is not too long.

We follow our own Code of Practice (2017), which sets out our commitments to quality in major public exams.

Assessment of learning

Assessment of learning at the end of a programme of study can provide valuable evidence of a student's achievement. It also provides focus, pace, motivation and challenge to learners during a one- or two-year course.

Such assessment also plays a significant role both in selection for next steps in education, university and employment (and therefore in students' lives) and in accountability (and therefore in the lives of teaching professionals). We take very seriously, therefore, our responsibility in making sure all our assessments are fair, valid, reliable and practicable.

We recognise that the way we design summative assessment of learning can strongly influence what happens in the classroom. That is why we use a flexible assessment structure, allowing a 'linear' approach (all exams at the end of the course for Cambridge IGCSE and Cambridge International A Level) or a 'staged' approach (with some Cambridge International AS Level exams halfway through a two-year course).

We believe using a linear and staged approach, rather than a modular one, brings the biggest educational benefits. It maximises time for teaching and learning, so teachers have more time to engage students' interests and support their

development through assessment for learning rather than through multiple modular assessments of learning.

It also helps students develop a strong grasp of each subject as a whole, which universities value highly. We draw on research by Andrea Greve (2016) at the Cognition and Brain Sciences Unit at the University of Cambridge, which supports the view that returning to topics over a period of time supports learning better. Students have more time to revisit and understand topics and concepts, so they can go beyond cramming for a test, and really retain what they have learned. Retaining learning is essential not just for generating new ideas and solutions, but also for making connections across subject disciplines.

We believe that putting students' learning first leads to improved performance in final exams. And by taking exams when their understanding is deepest, at the end of the course, students do not face assessment before they are ready.

Assessment for learning

For Cambridge, 'assessment for learning' (AfL) is an approach integrated into teaching and learning that creates feedback for students to improve learning. We see AfL as a vital part of effective teaching practice.

By following well-designed approaches to AfL, teachers can understand better how their students are learning and use it to plan what they will do next with a class or individual students. AfL also helps the learner to see what they are aiming for and understand what they need to do to achieve those aims. AfL therefore focuses on the teacher and the learner understanding.

What are the **benefits of AfL**? AfL connects assessment and teaching objectives – clarifying assessment objectives provides a clear focus for teaching and learning strategies. AfL, effectively implemented, can support students to become confident, reflective, innovative and engaged (at least four of the Cambridge learner attributes). Research by John Hattie (2009) shows that feedback improves learner achievement (ranked 10th out of 150 factors), particularly if it involves feedback from learner to teacher about their own learning.

Cambridge supports AfL in different ways. Our clear curriculum frameworks and syllabuses, with clear learning and assessment objectives, help teachers, at varying levels of experience, point learners to what they need to focus on. Assessment for our Cambridge Primary and Lower Secondary programmes helps learners and teachers assess progress and provide feedback on strengths and weaknesses in the core subjects of English, maths and science. We support teachers' own learning about AfL via our online course, subject-based training and all Cambridge Professional Development Qualifications.

Supporting speakers of English as a second or foreign language

Our assessments are in the medium of English. We design those assessments very carefully to make sure they are accessible to speakers of English as a second or foreign language – both in terms of language and cultural references. Our questions use clear language.

For example, questions in Cambridge International AS & A Level Mathematics use fewer command words than any other international A Level. Command words explain what students need to do, such as 'calculate', 'define', 'evaluate'. We make sure that each command word relates directly to the relevant assessment objectives and is used consistently within and across syllabuses. More and more of our syllabuses give definitions for each command word we use, so students and teachers can understand the scope, nature and depth of treatment examiners are looking for in a response.

Command	General definition
Calculate	work out from given facts, figures or information
Define	give precise meaning
Evaluate	judge or calculate the quality, importance, amount, or value of something

A list of command words and their definitions is available on our website.

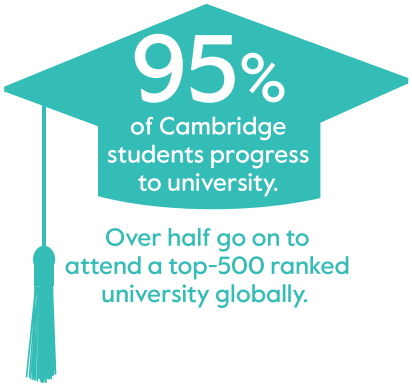
4

International recognition

It is vital that Cambridge students can be confident that their qualifications will be understood and valued throughout their education and career, in their home country and internationally.

We understand that, as an organisation, we have an important role to play in helping universities worldwide understand our curriculum and assessments, and what the grades that educators and students work so hard to achieve really mean.

Cambridge qualifications are accepted by universities all around the world. Our global team of recognitions managers works with universities worldwide to help them understand our curriculum and assessments. We also communicate regularly with government authorities to understand their national context and needs.



Working closely with universities and governments ensures a smooth progression for all our students, whether they wish to study in their home country or abroad.

Universities understand the demand of our curricula and the rigour of our assessments. Over 2350 universities in 90 countries formally recognise Cambridge qualifications, including all UK universities and over 1000 in the US (including all the Ivy League), plus key universities in other major higher education destinations such as Canada, Australia, Singapore, South Africa, Germany and the Netherlands.

In the UK, all universities accept Cambridge International AS & A Levels in exactly the same way as the UK AS and A Levels. We are continually building relationships with universities and other higher education institutions so that we can create yet more opportunities for students.

For example, because the US is one of the main destinations for internationally mobile students, we founded a US Higher Education Advisory Council (HEAC) to advise us on expanding recognition of Cambridge programmes in US universities, and to feed into development of our Cambridge Advanced programmes.

The current membership includes representatives from top US universities, including Brown University, Columbia University, Duke University, Florida State University, Massachusetts Institute of Technology, Rice University, University of Arizona, University of California, University of Maryland, University of Southern California, University of Virginia, University of Washington and Vanderbilt University.

5

Global community

We believe one of the benefits of being a Cambridge school is belonging to a worldwide education community. Nearly a million learners from 10 000 schools in 160 countries are currently preparing for their future with our programmes and qualifications.

We listen to and involve our global community of schools to make sure our programmes are rigorous, relevant and world class. We use feedback from our school community to help us improve what we do.

We support professional learning communities which connect teachers around the world so they can share views, information and resources, and learn from one another. Some of these communities are online. For example, subject communities use our popular discussion forums on our support site for teachers.

Our Cambridge Global Perspectives community uses a secure online learning area to share approaches with teachers in other countries, and it is a safe space for students to share perspectives with students in another school, in another country, as part of the programme.

We organise a range of community events for Cambridge school leaders and teachers, including local, regional and global conferences every year, where schools are encouraged to take part and lead discussions.

We organise over 2000 training events every year globally, and the number is growing in response to demand from schools. These events can either be online or face to face, and encourage teachers and school leaders to learn from experts and each other. Face-to-face events usually take place within a Cambridge school.

We support Cambridge schools to set up their own local community of schools, run by schools for schools. They work together to exchange ideas, and to share knowledge and best practice in areas such as school leadership, curriculum planning, professional development and teaching. Working together the community may:

- improve the quality of member schools through exchanging ideas and sharing knowledge and best practice
- support schools new to Cambridge or experiencing change – for example, when they introduce a new Cambridge programme
- form a collective voice to feed back issues to us, including the views of parents and students; or to influence local governing bodies and higher education about the value of international education and Cambridge programmes
- organise shared training opportunities or events for students – for example, sports days or debating societies.

CAMBRIDGE

Cambridge International AS & A Level
Opening doors to a world of opportunities

Cambridge International AS & A Level opens doors to a world of opportunities, helping your child develop the knowledge and skills they need to achieve at school, university and work. Typically for students aged 16 to 19, it is perfect for learners who need advanced study to prepare for higher education.

We have built Cambridge International AS & A Level around what matters most to your child as they progress through their education.

A love of learning

Your child can choose from a range of 55 subjects, meaning they can study what they enjoy and are good at. As well as a deep understanding of the subjects they study, they will develop independent learning and critical thinking skills – abilities that universities value highly.

Cambridge International AS & A Level is a two-year course, though students can complete AS Level in one year. Your school can choose to offer Cambridge International AS Level qualifications in their own right, or as a way to progress to Cambridge International A Level.

An aligned programme based on the latest research

We believe education works best when curriculum, teaching and learning, resources and assessment are closely aligned and encourage personal growth and wellbeing.

With this approach, teachers can support your child – by providing additional guidance to build understanding and confidence, or offering stretch and challenge, helping them to reach their potential and thrive.

Cambridge Pathway — A clear path for educational success from age 3 to 19

Cambridge Early Years	Cambridge Primary	Cambridge Lower Secondary	Cambridge Upper Secondary	Cambridge Advanced

Ready for the world

Continued ▶

Cambridge International AS & A Level
Opening doors to a world of opportunities continued

An international education

We design Cambridge International AS & A Levels for an international audience, making them ideal for learners whose first language is not English.

Fair and meaningful assessments for every student

We work hard to make sure that our assessments are fair for all students in every country – especially as many of our learners are non-native English speakers. This means using simple language and layouts, as well as clear command words.

Assessment takes place at the end of the course. Your child will be assessed in different ways, including written, oral, coursework and practical options, giving them the best opportunity to demonstrate their knowledge and skills, especially if English is not their first language.

Cambridge International A Level is graded A* to E. Cambridge International AS Level is graded A to E. We offer a linear assessment model, with exams at the end of the course. This gives your child more time to develop a deeper understanding of their subject.

Your school can also use our Cambridge Alis assessments, designed to help teachers gain deeper understanding of your child's strengths, weaknesses and potential, and the support they might need to prepare for their Cambridge International AS & A Levels.

Recognised and valued worldwide

Every year Cambridge International AS & A Levels help thousands of learners to gain places at leading universities around the world. From the world's top-ranked universities to local higher education institutions, Cambridge qualifications open doors to a world of opportunities, helping to prepare your child with the skills they need to thrive at university and beyond.

The world's best higher education institutions recognise our qualifications and value the critical thinking skills, independent research abilities and deep subject knowledge that Cambridge learners bring and help them to succeed at university.

A global learning community

With the Cambridge Pathway, your child is joining a global community of learners from more than 10 000 schools in over 160 countries. By working with our wider community, your teachers can connect with other schools from around the world to share best practice.

Learning with lasting impact

We recognise that meaningful education is more than just building subject knowledge and conceptual understanding. To thrive in life, learners must also develop a broad range of skills, values, attitudes and behaviours.

When developing our Cambridge International AS & A Level programmes, assessments and resources, we build in plenty of opportunities to help schools develop reflective and innovative learners with the confidence to embrace new information, ideas and challenges. Responsible and respectful of others, they are engaged intellectually and socially – ready to make a positive impact.

With these attributes, we are helping your child be ready for the world.

AICE Planning Sheet
Course Progression Options

Student Name: _____ Class of: _____

High School Credits Earned in Middle School: _____ Course(s): _____

The AICE curriculum requires a total of **SEVEN** AICE courses between grades 9-11 or grades 10-12 with at least one course and one exam from each of the three subject groupings, as well as one in the core group. Students may take as many AICE courses as desired, if there is a teacher recommendation and the minimum requirement (7) is met. AS exams count as one point toward the diploma. AL exams count as two points toward the diploma. You must earn the seven required credits during a 25-month period. Required courses are in bold.

First Year Schedule:		**Second Year Schedule:**	
	AICE English General Paper		**AICE English Language**
	AICE Thinking Skills (Academic Elective)		**AICE International History**
	Pre-AICE Math 1 (Algebra I), 2 (Geometry) or Algebra 2 Honors		Pre-AICE Math 2 (Geometry), Algebra 2 Honors, or Other Math
	Pre-AICE Biology, Chemistry Honors, or Marine Science Honors (Magnet)		Chemistry Honors, **AICE Biology**, **AICE Marine Science AS**, or **AICE Environmental Management**
	Pre-AICE World Language (Spanish, French or Chinese)		Pre-AICE World Language 2 (Spanish, French or Chinese)
	AP Human Geography		Academic Elective _____
	Elective _____		Elective _____

Third Year Schedule:

	AICE Global Perspectives
	AICE English Literature
	AICE U.S. History
	AICE Math, AP Statistics, AP Calculus AB or BC
	AICE Marine Science AL, **AICE Biology**, **AICE Environmental Science**, or AP Physics

Introduction

This handbook explains all the administrative tasks you need to carry out during each exam series. It also sets out the regulations for running our exams and assessments. It details the responsibilities of centres and Cambridge Associates, and forms part of the legal contract between Cambridge and the centre/Cambridge Associate.

Our regulations exist to make sure Cambridge candidates all over the world have the same exam experience and are treated equally and fairly. It is essential that you follow them carefully. Exams officers should use the handbook to make sure they are running our exams and assessments according to our regulations. Principals and heads of Cambridge Associates should use it to make sure their organisation complies with our regulations. A breach of these regulations may lead us to terminate your Agreement.

This handbook covers the following qualification groups.

Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint

Regulations for conducting Cambridge Primary Checkpoint and Lower Secondary Checkpoint, and guidance on administering the tests, are in this handbook.

Cambridge Upper Secondary

- Cambridge International General Certificate of Secondary Education (Cambridge IGCSE).
- Cambridge International General Certificate of Secondary Education (Cambridge IGCSE (9–1)).
- Cambridge International General Certificate of Secondary Education (Cambridge IGCSE (Core)).
- Cambridge General Certificate of Education (Cambridge O Level).
- Cambridge International Certificate of Education (Cambridge ICE).

Cambridge Advanced

- Cambridge International General Certificate of Education (Cambridge International AS Level).
- Cambridge International General Certificate of Education (Cambridge International A Level).
- Cambridge Advanced International Certificate of Education Diploma (Cambridge AICE Diploma).
- Cambridge International Project Qualification (CIPQ). Guidance for administering CIPQ is in the Administrative Guide: Using Submit for Assessment available from www.cambridgeinternational.org/eoguide

Cambridge Professional Development Qualifications

Regulations for conducting Cambridge Professional Development Qualifications (PDQs) (for teachers and trainers) are in this handbook. Guidance for administering the qualifications is in the Cambridge Professional Development Qualifications Administrative Guide available from www.cambridgeinternational.org/eoguide

This handbook is divided into the following sections:

- an overview of the Cambridge Exams Cycle
- the responsibilities of centres and Cambridge Associates
- a section for each phase of the Cambridge Exams Cycle detailing the regulations and administrative tasks that apply
- A to Z of terms to clearly explain the meaning of the key words and phrases we use throughout the handbook
- an index so you can quickly find the page you need.

Important information

If you are a centre in India or Romania, see the Cambridge Handbook Supplement (March 2025 series) for information about our March series: www.cambridgeinternational.org/march

NEW If you are a Cambridge Early Years Centre, you should refer to the Cambridge Early Years Handbook, which is available on the School Support Hub: www.cambridgeinternational.org/support

A If you work in an Associate Centre you need to comply with any extra local arrangements required by your Cambridge Associate.

We reserve the right to amend or vary the arrangements detailed in this handbook at any time. We will notify you of any changes. Please make sure we have your up-to-date contact details. The changes will take immediate effect unless otherwise stated.

UK If you are a UK centre, see the Cambridge Handbook (UK Supplement) 2025 for information about the Joint Council for Qualifications (JCQ).

Important information

We are withdrawing Cambridge ICT Starters. The last entry submission date for all modules will be 25 February 2025 for results release on 30 April 2025. We have replaced Cambridge ICT Starters with our Computing and Digital Literacy curricula, which are already available to registered Cambridge centres.

Key to icons

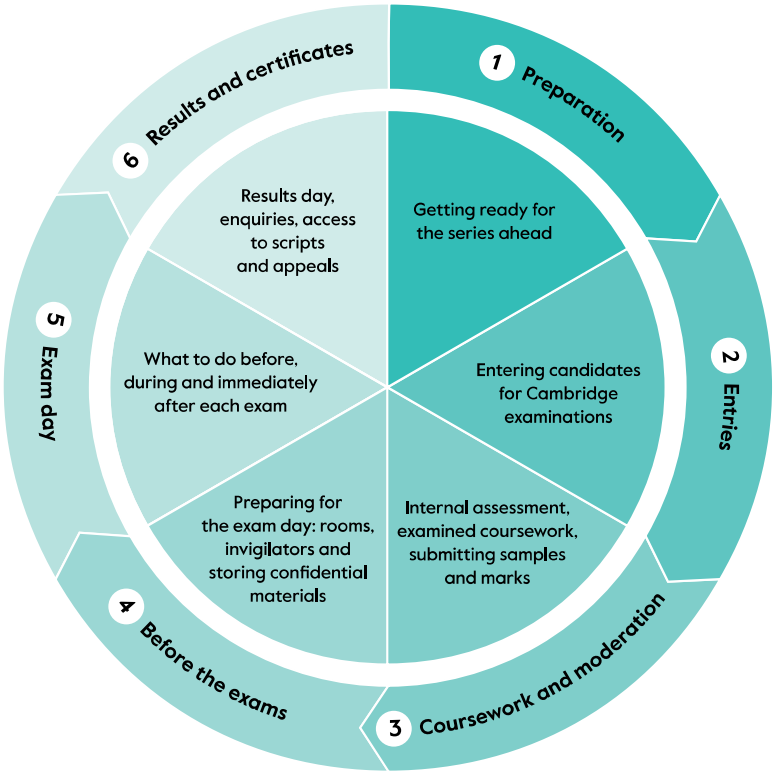
To make it easier for you to find the information you need quickly we have developed a set of icons.

- **Administrative forms:** Appears next to the administrative forms referenced on the page
- **Cambridge Checkpoint:** Appears next to regulations and procedures for Cambridge Primary Checkpoint and Lower Secondary Checkpoint
- **Check UK supplement:** Highlights where a UK centre needs to check the UK supplement
- **Check PDQ Administrative Guide:** Highlights where a PDQ centre needs to check the PDQ Administrative Guide
- **Extra guidance:** Highlights extra support available, for example online tutorials or 'how to' guides
- **For Cambridge Associates and their Associate Centres:** Differences to processes for Cambridge Associates and their Associate Centres
- **Important dates:** Highlights key dates and deadlines
- **Important information:** Highlights key pieces of information
- **New or updated information:** Highlights information that has changed from last year
- **Regulations:** Highlights regulations that you must follow

Economic Operators Registration and Identification (EORI) number for centres in the EU

If you are a centre in the EU, it is very important that you apply for an EORI number so that we can still send exam materials you need and issue your results on time. This is an identification number used in all customs procedures when exchanging information with customs administrations. For guidance, visit www.cambridgeinternational.org/eori and the European Commission website www.ec.europa.eu

NEW VAT ID numbers for centres in the EU



If you are a centre in the EU, it is very important that you provide us with a VAT ID number so that we can send exam materials you need and issue your results on time.

You can look up the format of your country's VAT ID number in the 'Example of EU VAT identification numbers' table on this EU website: https://shorturl.at/oUGkn

If your centre is exempt from VAT, you must also tell us.

The Cambridge Exams Cycle

There are many different activities that need to take place to successfully deliver an exam. Sometimes, it can be challenging to remember what needs to happen when. We run several exam series a year so many of our exams officers are managing different processes for different series at the same time. Our processes are grouped into six phases to help you keep track of what you need to do when. We call this the 'Cambridge Exams Cycle'.

The cycle includes every phase of the process from the planning and preparation that takes place before you enter your candidates, to giving your candidates their certificates. The cycle has six phases:

1 Preparation

2 Entries

3 Coursework and moderation

4 Before the exams

5 Exam day

6 Results and certificates

All our support for exams officers is structured around this exams cycle, so at a glance you can see which phase of the cycle the communication relates to – helping you prioritise and manage your workload.

In this section

Centre responsibilities 8
Cambridge Associate responsibilities 14
Associate Centres 15

Introduction

1 Cambridge International Education is an awarding body and a part of Cambridge University Press & Assessment, which is a department of the University of Cambridge.

2 This Cambridge Handbook is written in the English language; the English language text is the definitive version regardless of whether the Cambridge Handbook is translated into any other language.

3 The regulations and procedures detailed in this Cambridge Handbook apply to the examinations, assessments and qualifications provided by Cambridge International Education.

4 Throughout this Cambridge Handbook 'You' and 'Your' refer to the centre and, in the case of a Cambridge Associate, the Cambridge Associate or the Associate Centre. 'Centre' refers to the centre approved by Cambridge International Education (including Cambridge International Schools registered online and Cambridge International Schools – approved to offer Cambridge programmes online) or, in the case of a Cambridge Associate, the Cambridge Associate or the Associate Centre. 'Cambridge' and 'We' and 'Our' refer to Cambridge International Education. 'Agreement' refers to any contracts you have entered into with us for the provision of Cambridge qualifications and programmes and all subsidiary contracts incorporating the Cambridge Handbook.

5 Under the terms of your Agreement with us, you must keep to the terms and conditions set out in this Cambridge Handbook, along with the documents detailed in paragraphs 6 and 7 below.

6 By registering with us and submitting entries, you agree to be bound by the terms and conditions, processes and procedures set out in this Cambridge Handbook and all the centre registration documents and Agreements we issue.

7 We may issue:

(i) extra administrative or procedural documents, or

(ii) instructions for the conduct of specific assessments (for example, written papers, coursework, orals and practicals).

Such documents also form part of the Agreement.

8 We reserve the right to alter the Cambridge Handbook and any of our other documentation, with any changes taking immediate effect unless otherwise stated. We will let you know about any changes. You must make sure you are using the most recent version of the Cambridge Handbook, which is available on our website: www.cambridgeinternational.org/eoguide

9 All services we provide are conditional on the payment of all fees due, in accordance with our payment terms and the Agreement.

10 This Cambridge Handbook is interpreted in accordance with the jurisdiction and governing law provisions as set out in our Agreement with you.

11 Where you are providing approved programmes as a registered fully online school, references in this handbook to assessments and examinations, or results, will not apply as you are not approved to run any assessments or examinations. **NEW** The exception to this is if you are a Cambridge International School – registered as online (with exam venues). See page 167 for our definition of an online school, or schools approved to offer qualifications online.

UK If you are a UK centre, see the Cambridge Handbook (UK Supplement) 2025 for information about the Joint Council for Qualifications (JCQ).

Important information

Any fees referred to in this Cambridge Handbook are in our fees list, which is published in the 'My Messages' section of Direct, or listed as paid-for services available through any password-protected Cambridge websites. Fees may be updated from time to time. You should always refer to the updated fees list on Direct. **NEW** If you are a Cambridge Early Years Centre or Cambridge International School – registered as online, we send the fees list to you.

A Centre responsibilities

A1 You are responsible for the administration and conduct of our assessments. For online schools see section 2.1.2.

A2 The Responsible Person must tell us the name of the Head of Centre and any restrictions to the Head of Centre's powers to carry out their centre's responsibilities.

A3 The Responsible Person, acting through the Head of Centre, is responsible for appointing an appropriately qualified exams officer to effectively and securely administer our exams.

A4 Every member of a centre's staff who has contact with candidates must be a suitable person to be working with children and, if relevant, vulnerable adults. You must make any checks you can to make sure of this, which must include complying with local laws and employment regulations.

A5 You must provide a safe environment for your candidates. This includes while they are on your premises, as well as promoting online safety and wellbeing where applicable. You can find more guidance on our website: www.cambridgeinternational.org/about-us/our-standards/safeguarding

A6 You must not offer courses leading to any Cambridge qualification without first obtaining our written approval.

A7 You must have:

A7.1 a workforce of the appropriate size and competence to undertake the delivery of courses leading up to any programme or qualification as described in the syllabus or otherwise required by us, or by the law where you are located, and

A7.2 sufficient managerial and other resources to enable you to effectively and efficiently undertake the delivery of the assessments, including providing for the professional development of the exams officer.

A8 If you want to offer a type of qualification beyond those initially approved by us, for example you are approved to offer Cambridge IGCSEs and now want to offer Cambridge International A Levels, or where you wish to offer online programmes in addition to the programmes you have been approved to offer at your premises (or vice versa), you must request our approval by completing and submitting our Additional Qualification Types: Preparation – Form 5.

If you want to offer a science syllabus with a practical component in any of your approved qualification types you must complete and submit Additional Qualification Types: Preparation – Form 5.

Administrative forms

NEW Forms available on Direct.

- Additional Qualification Types: Preparation – Form 5
- Add Eligibility to Deliver Cambridge Programmes Online: Preparation – Form 9

A9 If you want to offer Cambridge programmes online to students who would not normally attend your school's physical premises, you must apply to extend your eligibility. All your students studying fully online must still be registered with your school and sit their exams at your centre.

NEW To extend your eligibility, complete our form: Add Eligibility to Deliver Cambridge Programmes Online: Preparation – Form 9.

See page 167 for our definition of a Cambridge International School that is also approved to offer Cambridge programmes fully online.

You do not need to request approval if you are teaching your existing students online, who would otherwise attend your school in person, for a temporary period or as part of a blended approach to the curriculum.

A10 You must tell us immediately if the location of your premises or secure storage facilities changes. NEW You should do this by completing the relevant form on Direct. We will not accept notification of changes by telephone or email.

A11 You must tell us immediately about changes to contact details, including email addresses and telephone numbers, for your centre and any individual members of staff listed on the School Details Form. You can do this by completing the School Details Form on Direct. We will not accept notification of changes by telephone.

A12 NEW You must tell us immediately if the ownership or legal identity for your centre changes. You should do this by completing the relevant form on Direct. We will not accept notification of changes by telephone or email.

A13 You must make sure that:

A13.1 the correct version, including the year and series, of the syllabus is administered for each series, and

A13.2 all teachers and tutors involved in the delivery of qualifications understand the subject area concerned.

A14 If you do not keep to the processes and procedures set out in this Cambridge Handbook, we will be entitled to take appropriate action, which may include:

A14.1 requiring you to take remedial action

A14.2 requiring you to undergo further inspection and quality assurance visits

A14.3 removing your centre's eligibility to enter for some or all of our qualifications, or

A14.4 removing your centre status and terminating any Agreement we have with you.

Important information

If you do not meet our registration standards, regulations and guidelines, it may be appropriate for us to terminate our Agreement with you.

If this happens, you must immediately:

- tell parents or guardians, students and other awarding bodies
- remove all Cambridge branding from your website, social media accounts, marketing materials, any other documentation, and your premises
- make no further entries for students
- cooperate with us to minimise disruption to candidates.

See the Consequences of Termination clause of the Cambridge Standard Terms of School Registration (we share these with you once you are an approved Cambridge International School).

A15 UK It is your responsibility to pay for any outstanding customs duties, brokers' fees, local taxes, courier handling charges and other amounts payable in connection with the importation of materials when you receive them from us. You can choose to allocate a broker to handle such imports or nominate UPS/DHL to act on your behalf, but you will be responsible for these costs and for liaising with any such brokers or couriers. It will not be our responsibility to pay for, or communicate with, any such brokers or couriers on your behalf. We will not upload question papers via Digital File Despatch if your question papers are delayed in customs because you have not put the correct process in place with brokers or couriers. We will ask for evidence of your engagement with, and completion of, all necessary processes in your country before we upload any question papers to Digital File Despatch. We will not send you any materials via Digital File Despatch without this evidence.

NEW However, in some territories where you nominate UPS/DHL to act on your behalf, we will pay customs duties, brokers' fees, local taxes, courier handling charges and other amounts payable in connection with the importation of materials on your behalf and recharge these to you via an invoice payable under the usual terms. For more information on whether this approach is used in your territory, please refer to our website, which is updated from time to time.

It is not possible for us to pay for these charges on your behalf:

- if you choose to allocate a broker that is not UPS / DHL
- if your country is not listed on our website, or UPS / DHL does not offer that service to us.

It is also not possible to opt in or opt out of Cambridge paying these charges, although you may nominate a broker that is not UPS / DHL and pay the charges directly to them.

This approach is entirely at the discretion of Cambridge and may be withdrawn at any time without notice, although we will endeavour to give as much notice as possible.

At all times, even where Cambridge will pay these charges on your behalf, it remains your responsibility to pay for any charges and for liaising with any brokers or couriers.

A16 If you are a centre within the EU, you must obtain a European Operators Registration and Identification (EORI) number at your own cost, and provide us with that number promptly. If you do not provide your EORI number, we will not be able to send you the necessary exam materials, and we are not responsible for any loss or damage you suffer as a result.
NEW You must also provide us with a VAT ID number. If you do not provide this number (or tell us that your centre is exempt from VAT), it may delay your exam materials in customs.

You can look up the format of your country's VAT ID number in the 'Example of EU VAT identification numbers' table on this EU website: https://shorturl.at/oUGkn

A17 We are entitled to ask you to pay for inspections, other quality assurance checks and activities where these are deemed necessary as a result of your actions or inaction.

A18 Where we suffer loss or damage by your actions or inaction, particularly where such action or inaction relates to malpractice, whether negligent or otherwise, we are entitled to ask you to pay our costs and to reimburse us in accordance with the terms of our Agreement.

A19 You must establish, maintain, publish and at all times comply with a written complaints procedure. Your complaints procedure must include procedures for your candidates and timescales for responding to complaints, and dealing with the subject matter of complaints.

A20 You must establish and maintain an internal process that allows candidates to challenge your decisions regarding enquiries about results or any appeals you submit to us.

A21 If any of your teaching staff are also examiners for Cambridge University Press & Assessment you must not, and make sure your staff do not:

A21.1 communicate this externally / to any candidates or third parties, or

A21.2 make any reference to this fact in any digital or printed promotional materials.

A22 You must comply at all times with all our instructions and any country-specific requirements.

A23 You must not do anything which could bring the name, reputation or interests of our organisation, our employees, our products or our services into disrepute in any way.

A24 You are responsible for the accuracy, quality and integrity of any marks or data submitted to us and agree to pay our costs in correcting any errors you tell us need correcting. By submitting any marks or data you are confirming you have carried out all accuracy, quality or integrity checks necessary and you are solely responsible for any direct or indirect consequences of us using those marks or data. Revised marks may not be accepted after the release of results.

A25 You must make sure you are aware of the deadlines we publish and follow these deadlines on behalf of your candidates.

A26 If we remove your centre's eligibility to enter any qualification, or remove your status, you must take reasonable steps to protect your candidates from the effects of these measures. This includes making sure your candidates can complete their course(s) by entering them with a registered centre offering the relevant Cambridge qualifications as soon as possible. We shall cooperate in good faith.

A27 UK See the Cambridge Handbook (UK Supplement) 2025.

B Inspections and quality assurance

B1 You must cooperate with and facilitate any visit or inspection we make, either arranged or unannounced, including giving our inspectors access to the centre's secure storage area, and examination area, even if exams are taking place when the visit or inspection takes place.

B2 You must cooperate with any quality assurance activities we may request. You must respond within the specified time frame and your answers must accurately describe the centre's premises, systems and procedures. We reserve the right to photograph the premises and material relating to assessments, including candidate work, as part of the inspection process. We may use any photographs we take to subsequently train our inspectors.

B3 We may carry out a re-inspection if a centre changes premises or facilities, or requests to be approved to offer an additional qualification type or science syllabus with a practical component. If we do carry out a re-inspection, you will have to pay another inspection charge.

B4 Usually our inspections are unannounced and take place during a series. However, we may inspect a centre outside the main exam period. We may inspect any part of a centre's premises or systems and procedures connected with the delivery of our assessments. Additional information regarding our standard security inspection process can be found on our website: www.cambridgeinternational.org/security-inspections

B5 We may withdraw your centre status and terminate our Agreement with you if an inspection shows that you are not meeting our standards or regulations. (See section A14.)

B6 Inspectors must be accompanied by a member of centre staff at all times during their visit.

B7 Where exams are taking place on a day when your centre is otherwise closed (for example at a weekend or on a public holiday), you must make sure that unannounced inspections can still take place and that visiting inspectors can access your centre. This may include making sure that reception staff are on-site and/or providing clear signage so that inspectors can find the exam room.

B8 UK In addition to inspections you must assist us in carrying out any reasonable monitoring activities necessary for the secure and effective delivery of the assessments.

B9 Inspection Report Forms and outcomes are confidential between centres and Cambridge and must not be shared outside of the centre, e.g. on local news forums or social media.

C Candidates

C1 We do not communicate directly with candidates or their parents/guardians about our programmes, qualifications or the administration of exams. You must communicate with candidates on every aspect of our programmes, qualifications and assessments.

C2 You must provide your candidates with:

- C2.1 access to your Privacy Notice and make them aware of ours, if required
- C2.2 the dates and times of their assessments including periods of Full Centre Supervision
- C2.3 confirmation and details of their entry for each assessment
- C2.4 confirmation and details of their results for each assessment, and
- C2.5 every result and every certificate we issue for them.

C3 You must not enter any candidate for any of our assessments before you receive full payment of their entry fee (if this applies to your centre). If you do not take payment before entering a candidate, you must still pay the entry fee to us. We will not stop the candidate sitting the exam or receiving their qualification, or otherwise communicate with either party about the non-payment.

C4 You must make sure your candidates have access to suitable room(s) and specified equipment and materials for their assessments, including for assessments that involve practical tests.

C5 Before the start of any of our assessments you must confirm the identity of all the candidates present, including private candidates. You must make sure no candidate is allowed to sit any of our assessments unless they have been correctly entered as per the processes in this Cambridge Handbook.

C6 We require Cambridge International Schools registered as online, or approved to offer Cambridge programmes online, to submit specific student data to us every year. If you are approved as an online school or to offer our programmes online we will contact you with details of how and by when you need to submit this data. See page 167 for our definition of an online school, or schools approved to offer qualifications online.

C7 You are responsible for submitting your candidates' work. As part of this responsibility you must make sure that:

- C7.1 the work in every candidate's assessment submission meets the criteria in the syllabus for the series
- C7.2 candidates' work is produced, and, where appropriate, marked internally, moderated and despatched according to our instructions, and
- C7.3 every piece of work you submit is the candidates' own work and is clearly identified as such.

C8 We take the protection of personal data seriously. In this section, 'processing', 'personal data' and special categories of personal data (sensitive data) have the meanings given to them in the UK General Data Protection Regulation (GDPR) and Data Protection Act 2018. 'Personal data' and 'sensitive personal data' are referred to as Candidate Data.

C8.1 **NEW** You must make sure that all your candidates (if they are at or above the age threshold for having capacity to give consent in their country) or their parent/guardian (as appropriate) understand that we will use their personal data (for example, their name, candidate number and where relevant audio or video evidence of a candidate's performance) for the purposes of delivering our qualifications through your centre. This includes processing exam entries and results, marking exam scripts, issuing certificates, processing enquiries about results and investigating cases of malpractice. You must also make sure that, when applications for access arrangements, special consideration or the withdrawal of entries are made, candidates (if they are at or above the age threshold for having capacity to give consent in their country) or their parent/guardian (as appropriate) understand that we will use their special categories (sensitive) of personal data for the purposes of processing these applications, and you must obtain their consent for such use. You must make sure that you keep a written record of the consent given. It is up to you to determine the format of that record; however, it must be made available to us if we ask for it.

C8.2 **NEW** You must make sure that all your: (i) candidates (if they are at or above the age threshold for having capacity to give consent in their country) or their parent/guardian (as appropriate); and (ii) teachers, exams officer, Head of Centre, invigilators, School Support coordinator or anyone else involved in the administration and conduct of our assessments, understand that we will process their personal data for the following legitimate business purposes:

C8.2.1 to carry out research, standards setting and other activities that are related to the business of delivering qualifications (including assessments), all of which are aimed at ensuring the delivery, as well as integrity and improvement, of our qualifications and the protection of candidates

C8.2.2 to understand the needs of candidates and other users of our qualifications and carry out marketing (although we will not contact candidates/parents/guardians by email without first seeking their consent)

C8.2.3 to provide training to those involved in providing educational services in relation to our qualifications, for example, teachers and examiners

C8.2.4 for internal business purposes, including managing our risks, protecting the security of personal data in our possession and carrying out internal record-keeping, audits and investigations, including into malpractice

C8.2.5 to share the personal data with other parts of our organisation, including the University of Cambridge, Cambridge University Press & Assessment, and agents and representatives (for example, examiners, consultants and sub-contractors), which process the personal data on our behalf for the purposes described in this Cambridge Handbook

C8.2.6 to share the personal data with the Universities and Colleges Admissions Service (UCAS), other universities and, where appropriate, potential employers in order to facilitate the candidate's relevant applications

C8.2.7 **NEW** to share the personal data with government or regulatory authorities for the purpose of evidencing outcomes, progression and participation in relation to Cambridge's products and services

C8.2.8 to comply with applicable law or a court order or governmental regulation or for the purpose of any criminal or other legal investigation or proceeding here or abroad.

C8.3 **NEW** You must make sure that: (i) candidates or their parent/guardian, as appropriate; and (ii) teachers, exams officer, Head of Centre, invigilators, School Support coordinator or anyone else involved in the administration and conduct of our assessments, understand that we may use anonymised data (that is, data that does not identify a candidate) and pseudonymised data (that is, data that is anonymous to the people who receive it) for research purposes, and may share that data with third parties, also for research purposes. The third-party recipients of such anonymised or pseudonymised data are required to abide by strict data protection principles in their handling of the data and are also bound by a duty of confidentiality.

C8.4 **NEW** You must make sure that: (i) all candidates or their parent/guardian, as appropriate; and (ii) teachers, exams officer, Head of Centre, invigilators, School Support coordinator or anyone else involved in the administration and conduct of our assessments, understand that we may transfer Candidate Data outside the United Kingdom and/or European Economic Area (EEA), for example for the processing of entries and results, and to provide Customer Services support. Such transfers of data are conducted in accordance with the Standard Contractual Clauses approved by the European Commission or in accordance with the UK's equivalent Standard Contractual Clauses.

D Exam administration

D1 We do not have to make any entries, or comply with any requests made under this section D, where you have failed to meet a specific deadline. To make sure exams are administered effectively you must, by the deadlines set out in this Cambridge Handbook, or otherwise communicated by us, send us:

- D1.1 details of estimated and actual entries
- D1.2 marks for internally assessed components and any required moderation samples, and
- D1.3 any other information that we have asked for in our instructions, for example forecast grades.

D2 If you want to make any application for access arrangements or special consideration you must follow the regulations set out in sections 1.3 and 5.5 of this Cambridge Handbook.

D3 If you want to make changes to the venue or timetable you must follow the regulations set out in sections 1.2 and 2.6 of this Cambridge Handbook.

D4 UK If your centre is in administrative zone 4 or 5, we may specify that some exams must be taken during an evening session. The Key Time for that evening session will be specified at www.cambridgeinternational.org/keytimes

D5 You must comply with any request from us to reschedule assessments from the times previously published to ensure the integrity and security of assessments. If you cannot comply with the request, you must apply for a timetable deviation ensuring that Full Centre Supervision is guaranteed. Any arrangement must be approved by us in advance.

D6 You must make sure that you limit access to My Cambridge to appropriate members of staff in your centre. You must also make sure that all staff accessing My Cambridge have read and comply with any relevant guidance produced for the action they wish to perform (for example, a relevant administrative guide or supplementary regulations). See section 1.1.15 for more information about My Cambridge.

D7 You must keep the exam materials secure at all times after you have received them. You must check that you have received the correct versions of materials for your administrative zone. You must carry out the following in accordance with our regulations:

- D7.1 secure storage of all exam materials
- D7.2 distribution of exam papers to candidates
- D7.3 collection of scripts, question papers and any other exam material at the end of each exam, and
- D7.4 secure return of scripts.

D8 You must appoint suitable invigilators and must make sure exams are carried out in accordance with this Cambridge Handbook. You are responsible for any costs associated with this.

D9 You must make sure all staff directly involved with the administration of exams understand Key Time and Full Centre Supervision regulations. Candidates must be constantly and effectively supervised during any exam, or period of Full Centre Supervision, to ensure compliance with Key Time regulations.

D10 You will work with us to prevent malpractice and, in particular, you must:

- D10.1 make sure candidates and centre staff are aware of the actions that would constitute malpractice; see section 5.6
- D10.2 make sure centre staff understand the security window for confidential exam material; see section 5.3.2
- D10.3 immediately report any established, suspected or alleged cases of malpractice
- D10.4 assist in any investigation into suspected malpractice
- D10.5 promptly provide information and advice we may require to assist with any investigation. This applies equally to all centres offering online programmes where the malpractice takes place before the exam (see section 5.6).

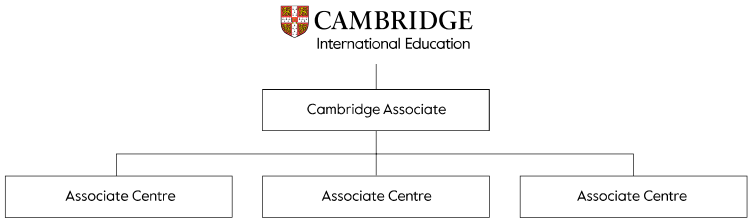
D11 You must submit and process any enquiries about results or appeals in accordance with the regulations set out in this handbook (see sections 6.3 and 7.2).

D12 You must keep unclaimed certificates under secure conditions for a minimum of 12 months from the date of issue and not destroy them (see section 6.4).



E A Cambridge Associate responsibilities

E1 A Cambridge Associate has a very important quality assurance role when it comes to working with their Associate Centres and you must make sure you carry out that role diligently.

E2 Cambridge Associates must carry out all the obligations of both centres and of Cambridge Associates which are specified in this Cambridge Handbook or in any supplementary documentation, including the Associate Agreement. The Cambridge Associate has full responsibility for the administration of all assessments in the centres associated with it.

E3 As a Cambridge Associate you may have agreed slightly different operating arrangements with us in your Associate Agreement to take account of local circumstances. Please remember these differences as you read through the Cambridge Handbook. No changes to the operating arrangements apply unless they are agreed by us in writing in accordance with the Associate Agreement.

E4 Unless otherwise specified in your Associate Agreement, we will send all information, data and materials to you to distribute to your Associate Centres. The same is true for information, data and materials that come back to us from your Associate Centres – they must go through you unless otherwise specified in your Associate Agreement.

E5 Cambridge Associates must apply to register their Associate Centres with us and must not establish, designate or treat any organisation as an Associate Centre without written approval from Cambridge. We can refuse such applications.

E6 As well as complying with all the duties of a centre (see sections A to D), Cambridge Associates will do the following and agree to do so on behalf of their Associate Centres unless otherwise agreed in the Associate Agreement:

E6.1 inspect their Associate Centres in accordance with the regulations stated in this Cambridge Handbook, and

E6.2 fill in Preparation – Form 5 and return it to our Customer Services team if the Cambridge Associate or one of their Associate Centres want to change qualification or syllabus eligibilities.

E7 We will inspect Cambridge Associates and their Associate Centres to make sure they comply with the regulations in this Cambridge Handbook.

E8 We must approve in advance, and in writing, any extra obligations a Cambridge Associate wants to impose on its Associate Centres.

E9 The Cambridge Associate is responsible for paying its fees and the fees of its Associate Centres as set out in the fees list and the Associate Agreement.

E10 The Cambridge Associate will give its Associate Centres reasonable notice of fees and of any changes to those fees.

E11 You cannot:

E11.1 have a new Associate Centre approved by us; or

E11.2 make any changes to an Associate Centre's details

between the final date for entries for an exam series for which the new Associate Centre intends to make entries, and the date of the final exam for the series.

E12 You must inform us in writing of any changes to the details of your Associate Centres which are held by us as soon as possible after the details have changed.

E13 We may reject an organisation's application to be an Associate Centre or not approve of any change to an Associate Centre's details where, at our sole discretion, we decide the organisation would not be suitable as an Associate Centre or that the proposed changes would make the Associate Centre unsuitable.

E14 If, in our sole opinion, an Associate Centre is failing to comply with any part of this Cambridge Handbook, is underperforming or inadequately

providing exams or assessments, or where we believe that changes to an Associate Centre's details are likely to affect its ability to provide exams or assessments, then we may at our sole discretion and without notice:

E14.1 suspend the Associate Centre's status, with any reinstatement being subject to any conditions we may require; or

E14.2 terminate the Associate Centre's status; see section A14.

E15 The Cambridge Associate must make sure we have the right to enter the Associate Centre's premises to make any inspections we may require of a centre.

E16 The Cambridge Associate may not approach or invite any Cambridge International School to be an Associate Centre at any time.

E17 The Cambridge Associate is responsible for making sure their Associate Centres follow the guidelines for the use of the customer logo, available at www.cambridgeinternational.org/logos, and that they do not misuse or damage our intellectual property.

E18 The Cambridge Associate is responsible for all actions or inactions of their Associate Centres and for making sure they act in accordance with this Cambridge Handbook. **NEW** We are not responsible for Associate Centres and we will not usually contact Associate Centres directly about operational matters, even if we suspend an Associate Centre or it is in breach of their obligation. However, Cambridge reserves the right to contact Associate Centres where necessary. If Cambridge revokes approval of an Associate Centre, the Cambridge Associate must make all arrangements with that Associate Centre.

Administrative forms

Form available on Direct.

- Additional Qualification Types: Preparation – Form 5

F (A) Inspections and quality assurance of Associate Centres

F1 The Associate Agreement may require a Cambridge Associate to carry out an initial registration approval inspection of each of its Associate Centres. If so, you must comply.

F2 A Cambridge Associate is required to carry out re-inspections of its Associate Centres if any of them change premises or request to be approved to offer an additional qualification type or a science syllabus with a practical component. You must comply.

F3 A Cambridge Associate must regularly inspect its Associate Centres to make sure that each Associate Centre has the right facilities, equipment and teaching resources to deliver the curriculum and to prepare candidates for entry to Cambridge programmes and qualifications.

F4 Cambridge Associates must cover all the costs of inspecting their Associate Centres, whether by the Associate or by Cambridge.

F5 A Cambridge Associate must make their inspection reports available to us on demand and provide us with an inspection schedule at the beginning of each year.

F6 Where there is a conflict between inspection requirements as set out in the Cambridge Associate's contract with an Associate Centre and this Cambridge Handbook, the Cambridge Handbook must be followed. Cambridge Associates must tell us if they think there is a conflict and take all necessary steps to make the contract comply with this Cambridge Handbook. No conflict shall allow either the Cambridge Associate or the Associate Centre to breach any regulation in this Cambridge Handbook or reduce any of Cambridge's rights or remedies.

G (A) Associate Centres

G1 Associate Centres must keep to the terms and conditions for centres in this Cambridge Handbook where applicable. Where it says 'centres' or 'You' in this Cambridge Handbook this should be read to include Associate Centres.

G2 Associate Centres must also keep to any specific terms agreed with their Cambridge Associate in relation to the subject matter of this Cambridge Handbook. If there is a conflict they must keep to the terms of this Cambridge Handbook.

G3 Associate Centres must communicate with us through their Cambridge Associate, unless otherwise agreed with us.

H Communicating with us

H1 For general administrative queries we prefer you to use email (info@cambridgeinternational.org). You can also contact us by filling in the online feedback form at www.cambridgeinternational.org/help

H2 Where possible please supply and communicate with us using a specific email address that is connected to a particular role at your centre, for example, examsofficer@school.com rather than a generic one (info@school.com) or a web-based email (lsmith@gmail.com).

H3 (A) Associate Centres must communicate with us via their Cambridge Associate rather than directly with us, unless otherwise agreed in the Associate Agreement or otherwise stated in writing by Cambridge.

H4 All correspondence between you and us must be in English. This applies even when assessments are offered in a language other than English.

H5 The Head of Centre, or exams officer, may sign letters from the centre to Cambridge. Legal notices must be signed by the Responsible Person.

H6 Unless instructed otherwise, you should send any written correspondence, but not exam materials, to:

Customer Support
Cambridge University Press & Assessment
Cambridge International Education
Shaftesbury Road
Cambridge
CB2 8EA
United Kingdom

If another address is specified on an administrative form or accompanying instructions, you should send the form to the address specified on the form or instructions.

H7 You must make sure:

H7.1 the centre is contactable during working hours (including during school holidays and school closures) via the communication lines (including email, telephone and post) you have provided to Cambridge

H7.2 that when you receive a communication or an email from Cambridge which requires a response, you respond within the specified time frame.

H8 You must include the following in all your messages with us:

H8.1 centre name and number

H8.2 name, position and title of the member of staff sending the message, and

H8.3 for continuing email correspondence, the reference number included in our initial response.

H9 Do not attach files larger than 20 MB to emails.

H10 Do not make any payments using a credit card by email because the security of credit card details cannot be guaranteed if you send them by email. We shall not be responsible for any loss you suffer if you send your financial details to us by an unsecured method.

H11 We send a monthly eNewsletter for exams officers to our centres and Cambridge Associates. This eNewsletter contains important new information, reminders about key dates and activities, guidance on changes to key processes and updates on new services. It is essential reading for all exams officers. If you do not receive this eNewsletter please contact our Customer Services team and we will add you to the distribution list.

I Telephone communication

I1 To telephone us, contact Customer Services on +44 1223 553554.

I2 If you telephone us about our regulations we will respond in writing. For complex issues, we may ask you to send us details in writing before responding. We do not accept responsibility for any misinterpretation of information, advice or guidance given by telephone.

J Software and online services

J1 By using any of our software or online services you agree to the terms of use for that software or service, as provided on our website.

J2 You must comply with the terms of use of Cambridge online services and software as well as any other Agreement with Cambridge.

J3 You must make sure that the usernames and passwords we issue are only given to staff authorised to access the relevant online services or software. You must not give login information to candidates (with the exception of login details for the Candidate Results Service) or to any other unauthorised person or person outside your centre, including any agent of Cambridge. If you do not comply we may suspend all services with you or withdraw your centre status and terminate our Agreement with you; see section A14.

J4 You must not use third-party websites, such as file-sharing websites, to send information or data to us.

J5 Any purchases made through our online services will be charged in accordance with your contract with Cambridge as an additional service. If an Associate Centre makes any purchases through our online services, we shall assume the Associate Centre is acting on behalf of the Cambridge Associate and we will charge the Cambridge Associate in accordance with this section.

K Ownership of question papers

K1 All Cambridge exam question papers remain our property. You can use the paper after the exam, in accordance with either:

- K1.1 the 24-hour secure storage regulation (see section 5.3.2), or
- K1.2 regulations specific to the conduct of a particular component.

K2 We retain all intellectual property rights to the papers. For our conditions governing reproduction see section L.

L Copyright in exam material

L1 We assert our ownership in the copyright and all other intellectual property rights in the materials we deliver to you under your Agreement. This includes syllabuses, question papers, and other material relating to the programmes and qualifications, except where we have attributed work to a third party.

L2 You may distribute copies of past question papers and other materials, including electronically, as well as provide access to digital content and resources for which we hold copyright, for your internal educational purposes only, provided that copies and/or access is:

- L2.1 limited to one copy and/or single access per candidate entered for the syllabus
- L2.2 used exclusively by candidates at the centre in connection with their class work or internal assessments
- L2.3 not offered for sale or distribution under any circumstances
- L2.4 reproduced with all Cambridge copyright symbols, trade marks, acknowledgements and notices intact
- L2.5 not subject to approval from Cambridge
- L2.6 not passed to any other third party, and
- L2.7 not uploaded or allowed to be uploaded to any external website or platform.

L3 We cannot give permission to reproduce any third-party assets we do not own, even where such assets (e.g. musical scores, maps, excerpts, photographs) are incorporated within Cambridge materials. **NEW** It is your responsibility to make sure all texts and materials you use and provide to candidates are lawfully acquired and used in accordance with the relevant intellectual property laws.

L4 If staff at your centre want to use any Cambridge materials in any publications they are developing, they must ask for our permission to do so.

M Copyright and candidates' work

M1 The copyright in a candidate's work remains with the candidate, subject to clause M2.

M2 By submitting work to us a candidate grants a perpetual, irrevocable and royalty-free licence to us to use any answer scripts, coursework or extracts (providing the candidate remains anonymous and their personal data is not shared) for:

- M2.1 educational presentations, materials or products that we may publish
- M2.2 educational purposes, for example, standards setting, training or to demonstrate standards in the recognition of our qualifications by universities or other organisations, and
- M2.3 maintaining the integrity of assessments or to identify plagiarism.

M3 You warrant that you will:

(i) inform candidates of the copyright provisions set out in this handbook, and

(ii) ensure candidates' compliance with such provisions.

You will indemnify Cambridge against any loss, harm or damage incurred by Cambridge as a result of any breach of the above warranty.

N Ownership of assessed material

N1 All material submitted for assessment will become our physical property.

N2 We do not return exam answer scripts to you, except for:

N2.1 UK copies of answer scripts as part of enquiries about results services.

N3 UK To request copies of answer scripts as part of enquiries about results services, see section 6.3.

N4 If you would like us to return Cambridge IGCSE, Cambridge O Level and Cambridge International AS & A Level work which you have submitted for moderation, you must complete Coursework and Moderation – Form 6 and return this to us when you submit your coursework. We may keep copies of some items for awarding and archive purposes.

N5 For other qualifications, we will not normally return to you assessments submitted for external marking or external moderation.

O Referring to Cambridge International Education

O1 You must refer to us as 'Cambridge' or 'Cambridge International Education'. You must not refer to us as the 'University of Cambridge', 'Cambridge University', 'UCIE' or 'CIE'.

Cambridge International Education ✓

Cambridge ✓

University of Cambridge International Examinations ✗

University of Cambridge ✗

Cambridge University ✗

CIE ✗

UCIE ✗

O2 When translating 'Cambridge International Education' into another language, the most appropriate wording is Cambridge International Education, a provider of international school examinations and curricula that is part of the University of Cambridge (England).

- Return of Moderated Coursework: Coursework and Moderation – Form 6

P Cambridge Identity

P1 The 'Cambridge Identity' refers to the Cambridge Marks (see P4) and associated text.

Centres, Cambridge Associates, Associate Centres and Professional Development centres are issued with official customer logos, descriptive text and customer logo guidelines when they register with us. We also send a plaque showing the relevant customer logo for display in or outside the centre.

P2 Cambridge grants you a non-exclusive, non-transferable, worldwide, royalty-free licence, without the right to sublicense, to use a Cambridge Identity during the period of your Agreement with us, on the terms set out in this Cambridge Handbook and the relevant customer logo guidelines. Your centre status dictates which Cambridge Identity you should use. You can download your customer Cambridge Identity, and find additional guidelines about how to use it, at www.cambridgeinternational.org/logos. The Cambridge Identity provided for use by centres is different from our standard organisation logo used on our exams officer materials. You must make sure you are using the correct Cambridge Identity for your centre and not our standard organisation logo.

P3 You may:

P3.1 reproduce your customer Cambridge Identity in full colour or in a single colour, subject to sections Q and R

P3.2 NEW use your customer Cambridge Identity on printed and digital marketing materials, including leaflets and brochures, advertisements, posters, webpages, videos and social media posts, subject to sections Q and R, and

P3.3 communicate your centre status in the text of information or publicity material.

P4 We have a number of trade marks, known in this *Cambridge Handbook* as the **Cambridge Marks**. Cambridge Marks includes any trade mark (registered or unregistered), registered mark or design, or any other identifier that is identified with Cambridge, Cambridge University Press & Assessment or the University of Cambridge.

P5 During the term of your Agreement with us, you agree not to register or attempt to register any trade mark which includes the word 'Cambridge' or which is similar or identical to any trade mark owned by the University of Cambridge (for example, 'IGCSE'). Cambridge will make such determination at its sole discretion.

P6 During the term of your Agreement with us, you agree to promptly follow our requests and withdraw any pending trade mark applications which contain the word 'Cambridge' or which contain any element similar or identical to Cambridge Marks.

Q Regulations governing the use of the Cambridge Identity

Q1 If you do not follow the regulations in this Cambridge Handbook or misuse the Cambridge Identity or Cambridge Marks, your centre status may be withdrawn and the Agreement terminated; see section A14.

Q2 You must only use the Cambridge Identity appropriate to your status.

Q3 You must email logoapproval@cambridgeinternational.org with proof copies of all your planned uses of your Cambridge Identity and gain approval before use.

A If you are an Associate Centre you should email copies of your planned uses of your Cambridge Identity to your Cambridge Associate.

Q4 If you use the Cambridge Identity you must always:

- Q4.1 reproduce the Cambridge Identity in the format we have provided
- Q4.2 use the Cambridge Identity along with your own logo and name
- Q4.3 place the Cambridge Identity at the bottom of any document, and
- Q4.4 follow the guidelines for use of the customer logo available at www.cambridgeinternational.org/logos

Q5 You must:

- Q5.1 make sure that where the Cambridge Identity is used, it is no more than 75% of the size of the logo and name of your centre, and lower than the logo and name of your centre and any other associated logo
- Q5.2 make sure there is no confusion regarding your identity as an organisation independent of us
- Q5.3 not let other people use the Cambridge Identity or Cambridge Marks
- Q5.4 not use parts of the Cambridge Identity separately
- Q5.5 not use the Cambridge Identity or Cambridge Marks in certification or financial documentation that you issue, for example, attendance certificates, receipts or invoices, and
- Q5.6 not use the Cambridge Identity or Cambridge Marks as part of your email or web address, or social media handle, avatar and account name.

Q6 This Cambridge Handbook does not transfer any copyright in the Cambridge Identity and does not assign any rights in the Cambridge Marks from us to you or any Associate Centre.

Q7 The name 'Cambridge' is synonymous with high standards of quality and integrity in education. To make sure we are able to maintain the integrity of the Cambridge name, we pay particular attention to those centres that already have it within the title of their school. Any centre that uses the Cambridge name must make sure they use it appropriately in order that we may continue to agree to its use by that centre.

Q8 We reserve the right to take action against any use of the Cambridge name which we do not consider suitable, or use of the Cambridge Identity by an organisation that may bring it, Cambridge or any part of the University of Cambridge into disrepute.

Q9 We will not accept any new registrations from any school or Associate using 'Cambridge', 'Cambridge International' or the name of any of our programmes or qualifications, such as IGCSE, in its name and/or brand unless it is located in a city or town called Cambridge and is only serving students in that location. We reserve the right to assess each registration on a case-by-case basis.

Q10 A registered school or Associate may not change its name to include the word 'Cambridge' or any of our trade marks. You must not use any part-form or derivative of 'Cambridge' in your centre name or centre description.

Q11 Permission to use the Cambridge Identity is dependent upon your continued status as an approved centre. If your centre status is withdrawn, use of the Cambridge Identity must stop immediately; see section A14.

Q12 For detailed instructions about how to use our logo, refer to the guidelines in the logos section of the Communications toolkit (www.cambridgeinternational.org/toolkit).

Q13 **NEW** We appreciate that schools going through the approval process will want to keep their community, including parents, informed of their progress and plans to offer Cambridge programmes and qualifications. Please be aware that, until your registration is complete and we confirm you are an approved school, you must not use any element of the Cambridge identity or say that you are already offering our programmes and qualifications and are registered with us.

R Approval for the use of the Cambridge Identity

R1 We are the sole interpreter of the conditions for use of the Cambridge Identity and Cambridge Marks. We will make all decisions about interpretation of the conditions of use.

R2 We investigate all reports of improper use of the Cambridge Identity, and will require that any use that does not comply with these guidelines ceases immediately.

S Access to assessments – equal opportunities

S1 We are committed to equality of opportunity for candidates with protected characteristics including, but not limited to, disability, gender, ethnic origin and religion.

S2 We aim to overcome inequality in relation to protected characteristics for all our qualifications in all areas of assessment activity. These activities include:

- S2.1 the assessment development process
- S2.2 the arrangements made for candidates who require reasonable adjustments (access arrangements or modified papers) in order to access our qualifications.

T Access and private candidates

T1 Specific regulations govern the access of private candidates to our assessments. See section 2.1.2 for details.

U Fees, invoices and payment

U1 We publish our fees list in the 'My Messages' section of Direct. **NEW** If you are a Cambridge Early Years Centre or Cambridge International School – registered as online, we send the fees list to you. Fees for paid-for services are available through the relevant password-protected Cambridge website.

U2 We send all invoices and statements by email or post to the finance contact details you supply. Please let us know immediately if these contact details change.

U3 Please make your payments in the same currency as stated on the invoice.

U4 Payment terms are shown on your invoice as 'Payment Due Date'. You must adhere to them at all times.

U5 (A) The Cambridge Associate is responsible for paying their fees and those of their Associate Centres.

U6 Cambridge International Schools registered as online or approved to offer Cambridge programmes online must also pay a learner registration fee per student. We will invoice you for this fee based on the data you provide to us. If you do not provide this data by the date we specify, we will charge you an additional fee.

Key Times and Full Centre Supervision

This section is about Key Times and Full Centre Supervision and why it is essential they are followed to maintain the integrity of our assessments.

What are Key Times?

Key Times are a defined point in a timetabled session when candidates must be in the exam or under Full Centre Supervision. Candidates must take their exams in the correct timetabled session. You can start the exam any time within the session, but you must follow our Key Time and Full Centre Supervision regulations. Key Times do not apply for windowed exams, for example, speaking tests, art & design exams and Cambridge Checkpoint tests.

Why are Key Times important?

Key Times are important because they prevent confidential exam information being shared with your candidates before their exam. Key Times also prevent your candidates from sharing confidential exam information with other candidates.

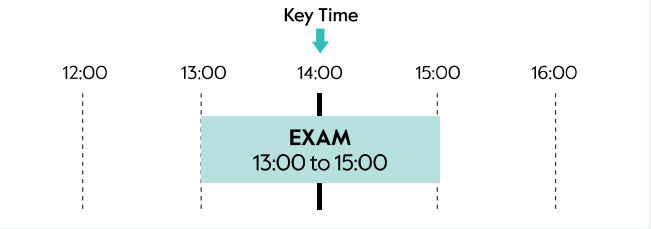
What are my Key Times?

Your Key Times are based on your centre's location. You must visit our website before each exam series (www.cambridgeinternational.org/keytimes) so that you know your Key Times.

Who is responsible for implementing Key Times?

The Head of Centre must make sure that all staff involved in the administration of our exams understand and can correctly implement Key Times and Full Centre Supervision. You must keep records of your exam timetable, including any periods of Full Centre Supervision. We may ask to see these at any time until we have issued certificates.

How do I use Key Times?

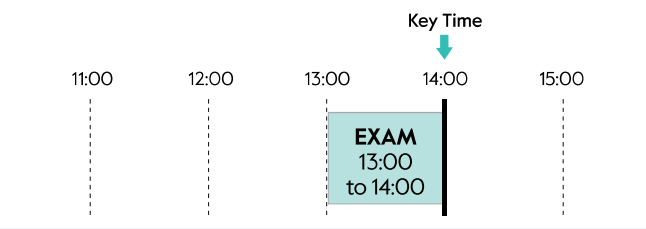


You can choose when your exams start within the timetabled session; however, you must make sure your candidates are in the exam or under Full Centre Supervision at the Key Time.

- We timetable all our exams in morning and afternoon sessions (and an evening session for administrative zones 4 and 5).
- You have a Key Time for each session.

Examples

These are examples only, and are not necessarily the same as the Key Times for your centre. We have used the same Key Time in each example to show the different ways you can structure your exams around your Key Times.



Example 1: The Key Time is in the middle of the exam. The exam starts at 13:00 and finishes at 15:00.

Candidates are in the exam at the Key Time, therefore they do not need to be under Full Centre Supervision before or after the exam. When the exam finishes, candidates can leave the exam room.

7 **Section 7:** Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

Example 2: The Key Time is at the end of the exam. The exam starts at 13:00 and finishes at 14:00.

Candidates must not leave the exam before the Key Time. If an exam ends at the Key Time, candidates can leave the exam room shortly after, as soon as the Key Time has passed. They do not need to be under Full Centre Supervision before or after the exam.

Example 3: The Key Time is at the start of the exam. The exam starts at 14:00 and finishes at 15:30.

Candidates are in the exam at the Key Time and do not need to be under Full Centre Supervision either before or after the exam. When the exam finishes, candidates can leave the exam room.

In any session, you can also choose to start your exam after the Key Time, or finish your exam before the Key Time. If you do this, you must make sure candidates are under Full Centre Supervision until the Key Time has passed.

What is Full Centre Supervision?

Full Centre Supervision is a defined type of supervision for candidates that is conducted by trained members of staff at your centre. If candidates are not in their exam at the Key Time, they must be in a room under Full Centre Supervision until the Key Time has passed, or until the exam starts.

You must supervise candidates in Full Centre Supervision. A supervisor can also be an exam invigilator, although Full Centre Supervision is different from exam invigilation. Supervisors must be suitably trained, and there must be at least one supervisor for every 30 candidates.

During Full Centre Supervision, candidates must not:

- be in the same room as any other people except candidates taking the same exam, and their supervisor(s)
- have access to telephones, mobile phones, laptops/computers, smart watches, or any electronic device with or without internet access
- have access to any other means of communication outside of the supervised group
- be allowed to communicate in any way with anyone who is not under Full Centre Supervision at the centre or outside the centre.

During Full Centre Supervision candidates can:

- have access to their printed books and notes. Candidates must not look at books and notes on an electronic device
- talk to each other
- leave the room accompanied by a supervisor. Where there is only one supervisor, you must make sure the supervisor can get help without leaving the candidates unattended. You must also make sure you have supervisors available to accompany any candidate, if required.

Other Full Centre Supervision regulations:

- Candidates under Full Centre Supervision who have already taken an exam that others in the group are due to take, for example an ICT practical test, must be kept separate from those candidates who have not yet taken the test. See section 5.7.4.
- If a candidate arrives late for a period of Full Centre Supervision, either before or after an exam, see section 5.1.10.

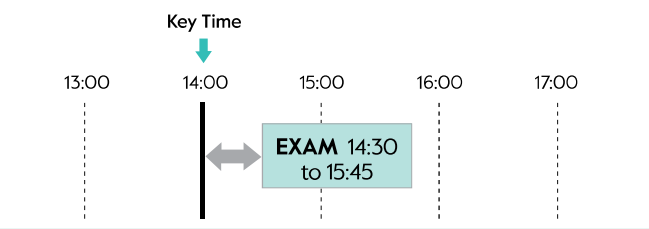
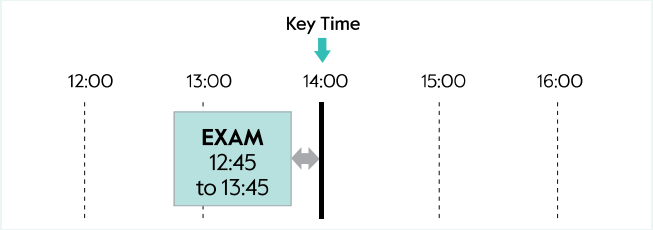
Index



- Candidates who do not attend a period of Full Centre Supervision after an exam must be reported to us immediately as suspected malpractice. See section 5.6.
- You must keep signed records of all Full Centre Supervision arrangements for candidates. These records must show candidates who were supervised, the start and end times of supervision, and who conducted the supervision. We may ask to see these records at any time until certificates are issued.

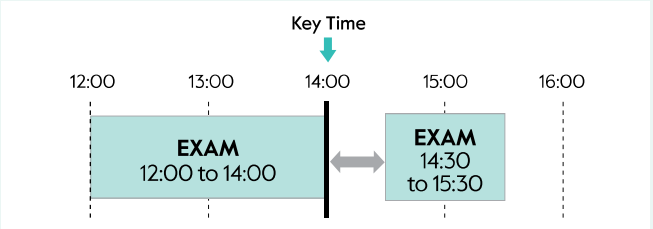
You must arrange necessary periods of Full Centre Supervision. If you do not, we will consider this a breach of our regulations, and will treat it as possible centre staff malpractice. See section 5.6.

Examples



These are examples only, and are not necessarily the same as the Key Times for your centre.

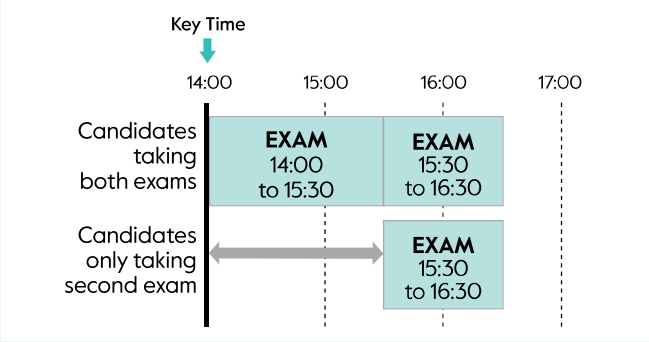
Example 4: The Key Time is before the start of the exam. The exam starts at 14:30 and finishes at 15:45.



Candidates are not in the exam at the Key Time. They need to be under Full Centre Supervision from the Key Time until the exam begins. When the exam finishes, candidates can leave the exam room.

Example 5: The Key Time is after the end of the exam. The exam starts at 12:45 and finishes at 13:45.

Candidates must be under Full Centre Supervision from the end of the exam until the Key Time. Once the Key Time has passed, candidates can leave the exam room.



Example 6: The Key Time is at the end of one exam, but before the start of another exam timetabled for the same day. The first exam starts at 12:00 and finishes at 14:00, and the second exam starts at 14:30 and finishes at 15:30.

Candidates are in the exam at the Key Time. However, candidates taking the second exam must be under Full Centre Supervision from the Key Time until the start of their second exam.

Example 7: The Key Time is at the start of an exam. There are two exams timetabled for the afternoon session, with no spare time in between.

Candidates taking the first exam are in the exam at the Key Time. When the exam finishes at 15:30, candidates can leave the exam room and Full Centre Supervision is not needed. There is no gap between the exams, therefore any candidates who are taking both exams do not need to be under Full Centre Supervision. Any candidates who are only taking the second exam must be under Full Centre Supervision from the Key Time until the start of the exam. When the second exam finishes, candidates can leave the exam room.

Section 1: Preparation

In this section

1.1 Support from Cambridge 25
1.2 Preparing your exams timetable 28
1.3 Access arrangements 32

Cambridge Professional Development Qualifications

There are differences in this section for Cambridge Professional Development Qualifications (PDQs). Please see the PDQ Administrative Guide, available from www.cambridgeinternational.org/eoguide

1.1 Support from Cambridge

We provide a wide range of support for exams officers. This section tells you about the support we offer and how to access it.

Website: www.cambridgeinternational.org

Address: Customer Support, Cambridge International Education
Shaftesbury Road, Cambridge, CB2 8EA, UK

Email: info@cambridgeinternational.org

Telephone: +44 1223 553554

Webchat: www.cambridgeinternational.org/help

Please tell us your centre name and number when you contact us. (A) Associate Centres should contact their Cambridge Associate.

1.1.1 Our website

Visit our website for information about:

- administering our exams
- our programmes and qualifications
- syllabuses and specimen papers
- latest news and events
- professional development
- our blog.

Go to www.cambridgeinternational.org

1.1.2 Cambridge Exams Officers' Guide

This is our step-by-step guide to delivering Cambridge exams. Here you can access administrative documents and forms, Direct, a wide range of support materials and monthly calendars showing all your key dates and activities. Visit the guide at www.cambridgeinternational.org/eoguide

1.1.3 Cambridge Exams Officer eNewsletter

The newsletter delivers updates straight to your inbox at the beginning of every month. It includes:

- reminders about key dates and activities
- guidance on key processes
- updates on new services
- a look ahead to the next month.

If you work in a Cambridge International School or for a Cambridge Associate and you do not receive the newsletter, please contact us: info@cambridgeinternational.org

Read the latest newsletter at www.cambridgeinternational.org/eoguide

(A) We send the Cambridge Exams Officer eNewsletter to our Cambridge Associates in a Word document so that it can be adapted and the relevant information sent to their Associate Centres.

Important information

If you do not read the newsletter, or if you unsubscribe, you will miss important information about administering our exams. To subscribe or resubscribe to the Cambridge Exams Officer eNewsletter, please email info@cambridgeinternational.org

1.1.4 The 'Help' section of our website

The 'Help' section of our website contains answers to questions about our exams and services. Simply type your question into the search box or use the menu to guide you. The 'FAQs and Important Announcements' section highlights key information.

Our 'Help' section:

- saves you time
- contains more than 1200 answers
- is reviewed and updated daily.

Visit www.cambridgeinternational.org/help

1.1.5 Direct

Direct is a secure online tool for our exams officers. It allows you to:

- make and submit final entries
- submit internally assessed marks and forecast grades
- download files, such as provisional and final timetables and results files
- submit enquiries about results
- see our fees list in the 'My Messages' section.

The site is password protected. After we have registered your centre we email you login details. Keep these details secure. If you forget your password contact Customer Services (info@cambridgeinternational.org). If your exams officer changes complete the School Details Form, available from Direct.

After 20 minutes of inactivity you will be automatically logged out of Direct.

Cambridge Associates / Associate Centres

Cambridge Associates can contact Customer Services to ask for access to Direct for their Associate Centres. Once the account has been set up, we will email login details to the Cambridge Associate, who must pass them securely to their Associate Centre(s).

1.1.6 Digital File Despatch

Digital File Despatch is where we upload confidential materials as digital files instead of sending printed copies. It is for specific centres and exams only. We also upload non-confidential and pre-release materials for some syllabuses. If you need access we will send you instructions. See sections 2.2.3, 4.2.3 and 4.3.1.

1.1.7 Submit for Assessment and Secure Exchange

Submit for Assessment allows you to submit work online for some internally assessed and/or externally assessed components, instead of sending them to us on CD or USB, or using Secure Exchange. There is more information about Submit for Assessment on our website: www.cambridgeinternational.org/submit-for-assessment. You access Submit for Assessment via My Cambridge (see section 1.1.15).

1.1.8 NEW Global Listening

Global Listening allows you to access and download audio files for listening exams. You can find details of which syllabuses and components are available on Global Listening at: www.cambridgeinternational.org/global-listening

You access Global Listening via My Cambridge (see section 1.1.15).

1.1.9 NEW Apply for Access Arrangements

Apply for Access Arrangements allows you to apply for any access arrangements your candidates need. See section 1.3.1 for types of access arrangements. We are launching Apply for Access Arrangements in phases throughout 2025 to better support you. When it is available for you to use, we will contact you by email.

1.1.10 School Support Hub

The School Support Hub is a valuable resource for teachers. We send login details to your School Support coordinator when your centre registers with us. Visit the School Support Hub for:

- syllabuses – they give teachers all the information they need to deliver the subject and prepare candidates for the exam
- specimen papers showing examples of what question papers will look like and specimen mark schemes showing how marks would be assigned. We produce these for new or revised syllabuses and we only update them when the syllabus booklet changes a lot
- past question papers
- mark schemes and grade thresholds

Administrative forms
Index

- schemes of work – suggested teaching programmes and teaching activities
- online discussion forums – a place for teachers to share ideas, resources, questions and answers
- Principal Examiner and Moderator Reports – Principal Examiners and Principal Moderators write these for some subjects at the end of each series. They give an overview of how candidates performed
- early question papers and pre-release material for some qualifications.

The member of staff at your centre with access to the School Support Hub is called the 'School Support coordinator'. They create logins for teachers and authorise training bookings. If the coordinator forgets their password they should contact Customer Services by emailing info@cambridgeinternational.org

Access the School Support Hub at www.cambridgeinternational.org/support

1.1.11 Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint

We will give you access to the relevant secure websites depending on what qualifications you offer. These websites contain a range of materials to help teachers plan and deliver the programmes, including:

- curriculum frameworks
- teacher guides
- schemes of work
- planning templates
- past question papers and mark schemes
- recommended published resources
- end of series reports.

For more information visit: https://primary.cambridgeinternational.org
https://lowersecondary.cambridgeinternational.org

Contact Customer Services if you do not have login details for these sites.

1.1.12 Communications toolkit

The Communications toolkit is the place to go if you are planning an open day or evening for parents/guardians, or if you want to announce your status as a Cambridge International School. You will find presentations, videos, posters, event banners, press releases and more.

Everything is free to access. If you want to download your customer logo you will be asked to log in using your centre number.

Access the Communications toolkit at www.cambridgeinternational.org/toolkit

1.1.13 Syllabus updates

Sign up for syllabus updates at www.cambridgeinternational.org/syllabusupdates We will then email you details of any new syllabuses, syllabus changes and those we are withdrawing.

1.1.14 Exams officer training

We offer free training to all our exams officers to make sure you are supported throughout the Cambridge Exams Cycle.

Our training includes regular 'How to' webinars which focus on making entries, running exams and preparing for results release for each exam series, including Cambridge Checkpoint. We also run regular focus webinars about a particular process and give you the latest information about administering exams. We send you all webinar dates and registration information each month in the Cambridge Exams Officer eNewsletter. You can sign up via our Professional Development Calendar at www.cambridgeinternational.org/eo-training

NEW In 2025, we are launching a self-study course for exams officers who have less than one year's experience in their role. The course focuses on all the key concepts, regulations and processes you have to follow as a Cambridge exams officer, and checks your understanding throughout. The course is modular with an interactive webinar to answer your questions at the end. For more details and to sign up to this course, see the Cambridge Exams Officer eNewsletter.

The self-study course, and our webinar recordings, are accessible through our Online Learning Area, and exams officers can easily set up their own account. Visit the Online Learning Area: www.cambridgeinternational.org/learningarea

All our training comes with a certificate of participation.

1.1.15 My Cambridge

My Cambridge is a 'single sign-on' service, which allows you to access services provided by Cambridge using one set of login details. You can access the services directly or via links on the My Cambridge 'landing page': https://sso.cambridge.org. There is more information on the My Cambridge page of our website: www.cambridgeinternational.org/my-cambridge

1.2 UK Preparing your exams timetable

To keep our exams secure we have six administrative zones. Each zone has a specific timetable and you must use the correct version for your centre.

You can check which administrative zone your centre is in at www.cambridgeinternational.org/preparation

The timetable shows the date, session and length of each exam, including the range of dates for practical and oral exams. You must also follow our Key Time regulations when timetabling your exams.

For timetabled exams, all candidates must be in the exam or under Full Centre Supervision at the Key Time. See the 'Key Times and Full Centre Supervision' section and section 1.2.2 for more information.

As soon as the final timetable is available, work out how many exam rooms you need and book them. Decide how you are going to make sure your candidates know where and when their exams will take place. You should also create a timetable for your centre and display it where all your candidates can see it. We recommend you use our 'Create your centre's exam timetable' template to prepare for the exam series: www.cambridgeinternational.org/timetablingexams

1.2.1 Provisional and final timetables

When we create our timetables, we avoid setting exams that will cause major logistical problems and timetable clashes for centres and candidates. However, we cannot always produce timetables that suit all the countries we work with.

In May, we publish a provisional version of the timetable for the following June series. In October we publish a provisional version of the timetable for the following November series. Provisional timetables are available from the 'Support Materials' section of Direct.

When they are published, you have four weeks to let us know if you have any major concerns. Email any comments to info@cambridgeinternational.org with 'June/November series provisional timetable' and your centre number in the subject line. As the timetables take into account a wide range of interests and constraints, we only make changes if absolutely necessary.

Once we have considered any comments we publish the final version of the timetable to the 'Support Materials' section of Direct and our public website (www.cambridgeinternational.org/timetables). After the final timetable has been published exam dates would only change in exceptional circumstances.

Some subjects, e.g. art & design, do not have a timetabled date. Instead, teachers have a window in which to schedule the assessment.

Regulations

(a) You must use the final version of the timetable when you plan your exams and tell candidates the dates and times of their exams.

(b) To keep our question papers secure, sometimes we may need centres to take an exam component at a different time to the one on the final timetable. If this happens we will write to you to let you know the new timetable arrangements.

Important dates

Final timetable published:

- June series: end of October 2024
- November series: end of March 2025

1.2.2 UK Timetabling exams

(a) The timetable will show test date windows and which session timetabled exams must be taken in:

- Morning (AM)
- Afternoon (PM)
- Evening (EV) for a limited number of exams in administrative zones 4 and 5. See section D4 of the 'Responsibilities' section of this Cambridge Handbook.

(b) Candidates must take timetabled exams in the exam window or session shown on the final timetable.

(c) Exams must follow our Key Time and Full Centre Supervision regulations. See the 'Key Times and Full Centre Supervision' section. Find your Key Times at www.cambridgeinternational.org/keytimes

Extra guidance

Watch our video to find out how to prepare your exams timetable using Key Times. It is available at www.cambridgeinternational.org/timetablingexams

1.2.2.1 Creating your exam timetable

When the final timetable is available, you need to create your own exam timetable for your centre, regardless of the number of exams your centre is taking. This timetable must be completed by a staff member who understands our Key Time regulations. When you have created your own timetable, it must be checked by a second experienced staff member to make sure all exam details are correct. You need to keep a copy of your timetable as it could be sampled as part of our quality assurance processes or required if we need to investigate a malpractice allegation.

Your exam timetable must include every exam you are entered for in the exam series, including any windowed exams. Your centre's timetable must also include the following information:

- syllabus
- component
- exam date
- exam session
- scheduled start and finish time
- exam duration
- any periods of Full Centre Supervision
- your centre's Key Times.

You must include your invigilator details and we also recommend you include the number of candidates.

For help timetabling your exams, there are guidance notes on page 3 of the timetable we publish. We also have a video that you may find useful, along with a 'Create your centre's exam timetable' template available on our website: www.cambridgeinternational.org/timetablingexams

There is also a timetable generator on Direct which can be used to generate a downloadable file containing useful information based on your entries. You can refer to this file when you create your own timetable. To find it, log into Direct, then go to the 'Timetables' link on the relevant series dashboard.

The downloadable file is not a replacement for your centre's exam timetable, and it is your responsibility to make sure that all necessary details are recorded in accordance with our guidelines on your final exams timetable.

1.2.3 UK Timetable deviations

(a) If you have a timetable clash you may apply for a timetable deviation using Preparation – Form 2. You may only carry out a timetable deviation if we have approved it in writing.

(b) We will reject your application if a timetable deviation could put the security of the assessment at risk. This means you must not move an exam:

(i) to an earlier date

(ii) so it finishes in an earlier session on the timetabled date, even if a period of Full Centre Supervision is planned to meet the exam's Key Time

(iii) more than 24 hours after the Key Time of the timetabled session.

(c) The following are examples where you may consider applying for a timetable deviation:

- A clash of exams in the same session where they would last a total of more than three hours and 45 minutes in a session, or more than six hours in a day. Candidates can sit exams for up to six hours in one day. The Head of Centre can allow candidates to sit exams that total more than this but you should consider the candidate's well-being.
- A single period of Full Centre Supervision that is more than four hours long.

Index

(d) The following are unacceptable reasons for a timetable deviation:

- national or public holidays
- taking part in national, local or centre events
- centre closure
- school holidays
- weddings
- work experience
- field trips.

1.2.3.1 Supervising timetable deviations

Candidates must be under Full Centre Supervision from the Key Time of the original timetable session until the new start time. See the 'Key Times and Full Centre Supervision' section.

1.2.3.1.1 Transporting candidates

(a) If you need to transport a candidate from one centre to another, this must be under Full Centre Supervision.

(b) You must report any known or suspected breaches of any agreed supervision arrangements using Exam Day – Form 9c.

(c) A responsible adult must supervise the candidate:

(i) The candidate must not access any information about the exam.

(ii) The responsible adult must fill in and sign Preparation – Form 7 beforehand. Keep this form until the end of the enquiries about results period. We may ask you to provide a copy.

1.2.3.1.2 Supervising candidates overnight

When no other options are available, we may approve the overnight supervision of candidates as part of your application. You must follow the regulations in section 1.2.3.1.

Administrative forms

Forms available from www.cambridgeinternational.org/forms

- Candidate Supervision Declaration: Preparation – Form 7
- Suspected Candidate Malpractice Report: Exam Day – Form 9c

1.2.3.2 UK Applying for a timetable deviation

(a) To apply for a timetable deviation, send us Preparation – Form 2 by the deadline. We may not be able to accept late applications. A Associate Centres should send their forms to their Cambridge Associate.

(b) You must fill in a separate form for each exam.

1.2.3.3 UK Our decision

We will write to you with our decision about the timetable deviation. A If you are an Associate Centre we will write to your Cambridge Associate.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Timetable Deviation: Preparation – Form 2

Important dates

- Apply for timetable deviations at least four weeks before the exam.

1.2.4 Additional sittings for large numbers of candidates (see section 5.7)

(a) You can only run additional sittings if we have approved them in writing.

(b) There must be no contact between groups until all groups have finished the exam.

(c) You must prepare detailed plans of the additional sittings including:

- timings of additional sittings
- seating plans for each sitting
- how you will apply Full Centre Supervision to prevent groups of candidates from communicating with each other
- staff involved in invigilating the exams and periods of Full Centre Supervision
- how you will keep confidential material secure between sittings.

7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

Keep these records until the end of the enquiries about results period. For practical exams you must supply copies of the seating plan and attendance registers with the supervisor's report.

(d) To apply for additional sittings send Preparation – Form 8 to info@cambridgeinternational.org with 'Additional Sittings – Compliance' in the subject line.

(e) Apply for additional sittings at least four weeks before the exam.

(f) You must report any known or suspected breaches of agreed supervision arrangements using Exam Day – Form 9c.

1.2.4.1 Our decision

We will write to you with our decision about additional sittings. A If you are an Associate Centre we will write to your Cambridge Associate.

Administrative forms

Forms available from www.cambridgeinternational.org/forms

- Additional Sittings: Preparation – Form 8
- Suspected Candidate Malpractice Report: Exam Day – Form 9c

1.2.5 Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint

(a) You must run Cambridge Primary Checkpoint and Lower Secondary Checkpoint tests within the window; see the 'Important dates' box opposite.

(b) Work out when your candidates will take the test and how many rooms you need.

(c) If you do not have enough space for all your candidates to take a test at the same time, you may arrange one or more additional sittings on the same day. If you want to do this send us Preparation – Form 8 as soon as possible and at least four weeks before the day of the affected test. Make sure you note the times of the additional sittings on the form and how your centre will supervise groups of candidates. You do not need to list all candidates affected when you send the form. However, you must make accurate attendance registers for each sitting and keep them until after we release the results.

(d) Several groups may take the tests in different sessions. Staff must supervise the candidates to keep the test secure. There must be no contact between groups taking exams in different sessions until all groups have finished the test. All conduct must follow our regulations for Full Centre Supervision.

(e) Create a timetable for your centre and display it so candidates can see it.

(f) You must return your scripts to us by the deadline given in our key dates. See section 5.4.2.

(g) We will publish results information on the date given in our key dates. See section 6.8.

Important dates

Chk **Cambridge Primary Checkpoint and Lower Secondary Checkpoint test periods:**

- May series: 7 to 25 April 2025
- October series: 6 to 17 October 2025

Administrative forms

1.3 Access arrangements

Access arrangements are pre-exam arrangements that minimise access barriers for candidates with special educational needs, disabilities or temporary injuries/illnesses. Used appropriately, access arrangements can enable candidates with specific needs to demonstrate their knowledge, skills and understanding without changing the demands of the assessment.

There are two groups of arrangement:

Group 1: Access arrangements.
Group 2: Modified question papers.

1.3.1 Types of access arrangement

Access arrangements	Section	Modified question papers	Section
Colour naming and labelling	1.3.5.1	Braille paper	1.3.6.1
Computer reader	1.3.5.2	Coloured paper	1.3.6.2
Exemptions	1.3.5.3	A4 18 point bold	1.3.6.3
Extra time	1.3.5.4	A4 24 point bold	1.3.6.3
Human reader	1.3.5.5	A3 24 point bold	1.3.6.3
Practical assistant	1.3.5.6	A3 36 point bold	1.3.6.3
Prompter	1.3.5.7	A4 18 point bold enlarged to A3	1.3.6.3
Reading aloud (candidate)	1.3.5.8	A3 unmodified	1.3.6.4
Reading pens	1.3.5.9	Modified carrier language	1.3.6.5
Scribe	1.3.5.10	Tactile diagrams	1.3.6.6
Supervised rest breaks	1.3.5.11	Live speaker (Transcript of audio files)	1.3.6.7
Supplementary aids	1.3.5.12		
Transcript	1.3.5.13		
Voice-activated software	1.3.5.14		
Word processor	1.3.5.15		

1.3.2 Principles of access arrangements

(a) Access arrangements must not give the candidate an unfair advantage over others.

(b) We will not allow access arrangements if they affect the assessment objectives. Before applying for your access arrangements, refer to the assessment objectives in the relevant syllabus.

(c) We assess all candidates according to the same assessment objectives, so their grades and certificates have the same validity and are a true reflection of each candidate's attainment.

(d) If English is not the candidate's first language this is not a valid reason for an access arrangement.

(e) You are responsible for any costs for access arrangements except for modified question papers that we provide.

(f) A candidate may need an access arrangement in one type of assessment but not in another. You must decide whether the candidate needs to use the arrangements in all the assessments. They may not need the same access arrangements in every assessment.

(g) If the candidate's needs change after we have approved an access arrangement, you are responsible for making sure this does not affect the integrity of the exam. The candidate must not use an unnecessary arrangement.

(h) Any member of staff who helps candidates with access arrangements, for example, scribes or human readers, must follow our Key Time and Full Centre Supervision regulations.

(i) The following roles may be performed by the same person, if required. The syllabus must allow the use of all the relevant access arrangements. The person performing these roles should not usually be the candidate's own subject teacher and must not be a relative, friend or peer, and should not have an 'interest' in the candidate (see section 2.1.5).

7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

The Head of Centre appoints and manages the person(s) performing these roles. The person appointed must be a responsible adult who understands and follows our regulations. They must be fully capable of performing the role. The candidate must know and accept the person(s) performing these roles. The person performing these roles cannot also act as an invigilator:

- a colour naming assistant who sits with a single candidate (see section 1.3.5.1)
- human reader
- practical assistant
- scribe
- live speaker.

See section 1.3.5.7 for information about prompters.

(j) Contact us if you need advice about implementing any access arrangement.

(k) Our access arrangement regulations apply to both school candidates and private candidates.

You may need to complete an Access Arrangements Cover Sheet (Exam Day – Form 4) for some access arrangements. We will tell you which arrangements need this when we respond to your notification. You must make sure the cover sheet is attached to the candidate's answer script before despatching it.

Do not send the cover sheets by email.

1.3.3 Evidence of candidate's need

Access arrangements must be based on evidence of the candidate's barrier to assessment and evidence of the candidate's need for the requested arrangements. The evidence of need will vary depending on the disability and the access arrangements you are applying for. Evidence must meet the following criteria:

(a) Evidence of need should clearly outline how the disability, illness or learning difficulty presents a barrier to the assessment.

(b) Evidence must be dated within four years of the exam and verified by a suitable professional, for example, a medical professional, an educational psychologist, a clinical psychologist, an occupational psychologist or an appropriately qualified specialist teacher.

(c) The professional must sign and date the evidence and include details of their relevant qualifications. We may accept a report written by a teacher with no formal special needs qualifications, as long as they have evidence of at least five years' work experience in special educational needs.

(d) Supporting evidence must be in English. Any translated evidence must be signed by the author of the translation, a legal representative, or by the Head of Centre and one other member of staff.

(e) Where relevant, the supporting evidence must contain scores from psychometric assessments for the candidate.

- These tests should provide standardised scores for candidates showing them to be 'below average'. 'Below average' is represented by a standardised score of 84 or below on a test/tests taken within four years of the exam series. It does not mean 'below average standard' in a centre.
- We will accept below average standardised scores and we may accept below average scaled scores. We will not accept other types of scores from psychometric assessments, for example, age equivalent, percentile rank, composite scores, or raw scores.
- When you use the Detailed Assessment of Speed of Handwriting (DASH) to assess a candidate's writing speed please provide the Total Standard Score, which is calculated from the sum of the following four subtests: Copy Best, Copy Fast, Alphabet Writing and Free Writing. We may accept 'below average' standardised scores on individual subtests. Contact us if you have any questions.

(f) Where an exemption is needed you must hold evidence showing the candidate has covered the content of the whole syllabus, including the component from which they are exempt. This may include evidence of their classwork, coursework, mock exams or assignments. You should still have evidence of need that meets the criteria within this section. See section 1.3.5.3.

(g) Where a word processor is needed solely due to illegible handwriting, or a transcript of a candidate's illegible handwriting is needed, you should keep samples of the candidate's handwritten classwork as evidence.

(h) We may ask to review your evidence as part of our quality assurance process. We may ask you to provide us with the evidence you have used to support your access arrangement applications and/or modified paper requests. The evidence must meet the criteria listed in this section, as well as the corresponding regulations for the relevant access arrangement. We may ask for this at any time, so you must keep the evidence on file until we issue certificates. Please provide electronic evidence only and make sure each file is clearly labelled with the relevant candidate number. See section C8 for information regarding data protection.

1.3.4 How to apply for access arrangements and modified papers

(a) You must decide whether access arrangements and/or modified papers are needed, and if so, which type each candidate needs. See section 1.3.1 for types of access arrangement. Other arrangements that are not listed may be available. If you think a candidate needs an arrangement that has not been listed, contact us at the start of the course to ask if we are able to approve this arrangement.

(b) For candidates with a permanent or long-term disability, illness, or learning difficulty, access arrangements should reflect their normal way of working and be based on any difficulties they have had when taking exams.

(c) Access arrangements must be based on evidence of the candidate's barrier to assessment and evidence of the candidate's need for the requested arrangements. See section 1.3.3.

(d) NEW You must tell us about any access arrangements your candidates need by submitting an application using either Preparation – Form 1 or our Apply for Access Arrangements service by the deadlines in this section. We will write to you about each application. So that we can support all our centres, we are launching Apply for Access Arrangements in phases throughout 2025. When it is available for you to use, we will contact you by email. Until you hear from us, continue to submit applications using Preparation – Form 1.

You must ask for modified question papers by sending us Preparation – Form 3 by the deadlines in this section. We will write to you about each application. A Cambridge Associates should agree earlier deadline dates with their Associate Centres so there is enough time to process the applications and send them to us.

(e) You must keep the evidence of your candidate's need until we issue certificates. We may ask you for this at any time, so you must have the correct evidence on file when we ask for it. We may ask to review your evidence as part of our quality assurance process. If you are unable to support your use of access arrangements or modified papers with appropriate evidence, it may be considered malpractice, or we may refuse the requested access arrangement.

(f) You must submit an application for each exam series. We cannot carry over approval from an earlier exam series.

(g) For emergency access arrangements for candidates with temporary illnesses, injuries or disabilities see section 1.3.10.

(h) The Head of Centre must make sure you follow the regulations for using access arrangements. If you do not do this, it may be considered malpractice.

	Form	May test series (Checkpoint) and June exam series application deadline	October test series (Checkpoint) and November exam series application deadline

1.3.5 Access arrangements

1.3.5.1 NEW Colour naming and labelling

Most visuals used in our assessment materials are presented in black and white; however, a very small number of task types may require candidates to perceive colour, for example, certain maps in geography, or certain science tasks. We offer two access arrangements to support candidates with colour vision deficiency (colour blindness).

- Colour naming: We allow candidates to ask for colours to be named. An invigilator or a designated colour naming assistant may do this. A colour naming assistant may sit with the candidate throughout the exam. The colour naming assistant or invigilator can only name the colour and must not provide the candidate with any other information. If a candidate needs to have a colour identified at a particular moment (for example, during a practical exam), they should use colour naming. A dedicated colour naming assistant cannot act as an invigilator.
- Colour labelling: We allow an appropriate member of staff to annotate the question paper with the names of any colours used. Colour labels should be in English. Labels can only state the colour and must not provide any other information. Where candidates respond in separate answer booklets or on paper, you must make sure you return the annotated question paper to us, along with the candidate's answer script. The member of staff should annotate the question paper with colour labels in a secure location, supervised by another member of staff. The question paper packet should be opened no more than 90 minutes before the start of the exam, and question papers must always remain supervised. You must follow our Key Times and Full Centre Supervision regulations.

You must attach an Access Arrangements Cover Sheet (Exam Day – Form 4) to each script. Use this to inform us when colour labelling has been used and give any other relevant information. The colour labeller must sign the sheet and the Head of Centre or exams officer must countersign it.

We also allow candidates with colour vision deficiency to use labelled colour charts alongside colour naming and/or colour labelling. We allow this in both written and practical exams.

Colour naming and colour labelling may need to be used at the same time in certain exams. For example, in a chemistry practical exam, a candidate may need to compare a solution to a coloured pH scale. The candidate may use a combination of a colour labelled pH scale and have an invigilator name the colour of their solution. The candidate can then independently compare the colours based upon the information provided.

1.3.5.2 Computer reader

We will allow a computer reader if the candidate is allowed to have a human reader. Depending on the assessment objectives of the syllabus, a computer reader may be allowed for papers testing reading. A computer reader can be used in language exams as it allows the candidate to independently meet the requirements of the reading standards. The software must not decode or interpret the paper in any way. You must make sure the PDF question paper we provide is compatible with the software you will be using. Download a non-interactive PDF past question paper from www.cambridgeinternational.org to test it with your software. There must be enough time and training to make sure the candidate knows how the software works. When you ask for a computer reader you must tell us which syllabus and components the candidate is taking so we can upload the correct PDF. NEW You will be asked to provide this information when completing your application. Where a candidate is working with a computer reader for the entire duration of an exam, they are permitted to use 25% extra time. You must apply for this.

1.3.5.3 Exemptions

An exemption is where we agree a candidate can miss a component, or components, within a syllabus:

(a) We will only consider exemption in the very rare circumstance that no other access arrangement is suitable.

(b) The candidate must still cover the content of the whole syllabus, even if they are exempt from a component.

(c) We will not allow exemptions if they affect the integrity of the qualification.

(d) We will not allow exemptions from components which are the key objectives of the syllabus.

(e) If we approve an exemption you must mark the candidate as absent on the attendance register for the exam. We will only award a mark if the candidate completes at least 50% of the total assessment for each qualification, by component weighting, in the exam series for the award. Carry-forward marks do not count towards this.

1.3.5.4 Extra time

(a) There are two different types of extra time:
- extra time up to 25% (this should meet the needs of most candidates)
- extra time over 25% (we only allow this for candidates who have very significant and persistent difficulties and where there is a strong justification).

(b) The amount of extra time being requested must be suitable for the candidate's needs and be in line with their normal way of working.

(c) If you are applying for extra time over 25% you must hold evidence that gives a strong justification. We only allow this for candidates who have very significant and persistent difficulties. This may include a candidate who:
- is affected by multiple disabilities
- has a very severe disability or illness
- is visually impaired and needs to use Braille papers
- cannot use another type of access arrangement because of specific syllabus restrictions
- requires a significant amount of extra time to dictate the words letter by letter, as well as all punctuation, to a scribe in language writing tests. See section 1.3.5.10 (f).

(d) Extra time is not appropriate for candidates who only require a break during the exam. You should apply for supervised rest breaks. You can apply for both extra time and supervised rest breaks as long as the reasons for applying for both arrangements are different (for example, extra time for processing difficulties and a supervised rest break for a medical need). We recommend you allow candidates to take supervised rest breaks if they have extra time over 25%.

(e) Candidates who need extra time because of below average reading and writing speed will typically have results measured in tests of speed. See section 1.3.3(e) for information.

(f) It is important to remember that if the exam is too long, it could affect the candidate's condition and/or mental wellbeing. You may need to ask for medical advice to make sure the access arrangement is suitable.

(g) For listening exams, apply extra time to the pauses already built into the recording. You will need to manually pause the recording. Contact us to ask for our guidance document.

For candidates using a Braille paper or answering in Braille, extra time may be applied as a percentage of the whole listening exam. We recommend extra time is applied during the pauses of the exam so as not to interrupt the flow of the exam. The candidate should be invigilated separately.

(h) For speaking tests, there are two options for extra time:
- For candidates with speaking difficulties, you should give them enough time to answer. You do not need to apply for this arrangement before the exam.
- For candidates with processing difficulties, you may apply for a percentage of extra time (for example, 25%). You must apply for this arrangement in the normal way.

You must complete an Access Arrangements Cover Sheet (Exam Day – Form 4) and keep it with the recording. You should record how much extra time the candidate was given on the cover sheet. You must also keep the evidence of need on file. If a candidate with extra time is included in your centre sample, send us the completed cover sheet along with the work.

(i) **NEW** Where a candidate is working with a computer reader, human reader, scribe or practical assistant for the entire duration of the exam, they are permitted to use 25% extra time. You must apply for this.

1.3.5.5 Human reader

A human reader reads the questions to the candidate. This may involve reading the whole question paper or only the words that the candidate asks them to read.

(a) We usually allow human readers:
- for visually impaired candidates who cannot read a Braille/enlarged paper independently or quickly enough even with extra time
- where the candidate's reading skills (accuracy, speed, comprehension) have been measured as below average through a psychometric assessment. See section 1.3.3(e) for more information.

5 Section 5: Exam day
6 Section 6: Results and certificates
7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

(b) Human readers are not allowed for language papers or syllabuses that test reading. Instead, you may apply for extra time up to 25%, or to use a computer reader, or reading pen. See sections 1.3.5.2, 1.3.5.4 and 1.3.5.9.

(c) The human reader may read numbers printed in figures as words. For example, they should read 252 as 'two hundred and fifty-two' but at the point of reading the number they should also point to it on the paper. An exception would be when the question is asking for a number to be written in words (for example, 'write the number 3675 in words').

(d) If the candidate asks them to, the human reader may repeat a question or read back what the candidate has written in the answer. They must not point out any errors.

(e) If the candidate asks them to, the human reader may spell a word on the question paper. Apart from this they must not give spellings.

(f) The human reader may help a visually impaired candidate to identify diagrams, graphs and tables. They must not give factual information or offer any suggestions, other than to give information that would be available to candidates who can see.

(g) The human reader must only read the instructions and questions on the question paper(s) and must not explain or clarify the meaning of the words. In some cases, understanding the written word may be the skill that is examined.

(h) The human reader must not tell the candidate which questions to answer, when to move on to the next question, or the order to answer them in.

(i) The human reader must not decode symbols and unit abbreviations. For example, they should not read 2^2 as 'two squared' but simply point to the function. Part of the assessment is recognising what the superscript '2' means. Similarly, if the symbol > is printed, they should not read it as 'greater than' but simply point to it.

(j) You must make sure other candidates cannot overhear or be disturbed by the human reader. If you put the candidate and reader in a separate exam room, they will need a separate invigilator. See section 1.3.9.

(k) A reader may be a dedicated member of staff who sits next to the candidate. If you have multiple candidates who require a reader, but they only need a small number of words or sentences to be read, a reader may perform this role for up to four candidates. The candidates should be seated near to each other, however the reader must not read to more than one candidate at the same time. If you choose to allow a reader to read to more than one candidate during an exam, the Head of Centre is responsible for making sure it is appropriate to the candidates' needs. The candidates would need to signal to the reader when they require a word or sentence to be read, for example, by raising their hand.

(l) Human readers for the visually impaired:
- must also tell the candidate how much time has passed and how much time is left if they ask
- are allowed to help a candidate retrieve information found in tactile maps, diagrams, graphs and tables so that they have access to the same visual information found in a standard print or modified print question paper
- must immediately tell the invigilator about any communication problems.

(m) A sign language interpreter can help the candidate to understand the rubric only. When signing the rubric, the interpreter must sign exactly what is written without changing the meaning, adding any information, or explaining what the rubric is asking the candidate to do. Where a sign is a symbol that gives the meaning of a technical or subject-specific word that is being tested, the interpreter should point to it on the question paper, or spell it using their fingers. The interpreter must know the sign language the candidate uses, and the candidate must have used the signs throughout their studies. The Head of Centre is responsible for appointing a suitable sign language interpreter.

(n) You may consider applying for modified carrier language papers and a reader for any candidate who meets the criteria for a reader, and who is usually supported through sign language.

(o) We do not allow oral language modifiers for any exams.

(p) **NEW** Where a candidate is working with a human reader for the entire duration of an exam, they are permitted to use 25% extra time. You must apply for this.

1.3.5.6 Practical assistant

(a) A practical assistant is a responsible adult who, in coursework and/or in an exam, carries out practical tasks the candidate asks them to do. They:

- allow the candidate to show their knowledge, understanding and skills
- make sure candidates are safe
- carry out accurately some or all of the manual practical tasks the candidate asks them to, unless it is dangerous
- say what they can see if the candidate asks them
- must immediately tell the invigilator or exams officer about any communication problems
- may ask the candidate to repeat instructions if they are not clear
- must not comment on any of the candidate's answers, help with the answers to questions or help to analyse data
- must not tell the candidate when a task is finished
- must not advise the candidate about which practical questions to answer, when to move on to the next question, or the order they should answer questions in
- must not advantage or disadvantage the candidate
- must follow these regulations as if they do not the candidate could be disqualified.

(b) Candidates may be allowed to use a practical assistant if they have disabilities, illnesses or injuries that prevent them from carrying out parts of the assessment themselves.

(c) At the beginning of the course, you must ask us if we will allow a practical assistant.

(d) A practical assistant should reflect the candidate's usual way of working, unless there is a temporary disability caused by injury.

(e) We will not allow a practical assistant in subjects testing design or artistic skills (for example, music, art or design & technology), where the practical skill is the focus of the assessment. If the candidate only needs minimal help, contact us about their needs.

(f) Make sure that other candidates are not disturbed. If you put the candidate and practical assistant in a separate exam room, they will need a separate invigilator. See section 1.3.9.

(g) **NEW** Where a candidate is working with a practical assistant for the entire duration of an exam, they are permitted to use 25% extra time. You must apply for this.

1.3.5.7 Prompter

(a) A prompter helps to keep a candidate focused on the task, and on the need to answer a question and then move on to the next. You may allow a prompter for candidates who have:

- significant attention difficulties
- a neurological or cognitive disability affecting attention
- little or no sense of time
- an obsessive-compulsive disorder which causes them to keep revising a question rather than moving on to other questions.

(b) The prompter needs to be familiar enough with the candidate to recognise when their attention is no longer on the task in hand.

(c) A prompter may be a dedicated member of staff who sits with one candidate who requires a lot of prompting. In this instance, they should not also act as an invigilator. If you have a candidate, or a small number of candidates who are seated near to each other, who only require infrequent prompting, then the prompter may also act as an invigilator. This task must not distract the prompter/invigilator from other responsibilities in the exam room and should not distract other candidates. You must be confident that the invigilator is able to appropriately prompt the candidate(s) in a timely manner, otherwise they should not act as an invigilator as well.

(d) A prompter must not speak to the candidate, give factual help or offer suggestions. They may be able to say the candidate's name or use instructions on prompt cards. Instructions must not help candidates with exam questions. Send any prompt cards you are planning to use to info@cambridgeinternational.org before the exam so we can make sure they are acceptable.

(e) **NEW** If a candidate who is visually impaired needs a prompter, we may allow them to give verbal prompts. Verbal prompts must not help candidates with exam questions, give factual help or offer suggestions. Verbal prompts must be agreed with Cambridge. Send any verbal prompts you are planning to use to info@cambridgeinternational.org before the exam so we can make sure they are acceptable.

Index

(f) A prompter must not advise the candidate about which questions to answer, when to move on to the next question (unless they have finished the previous answer and their attention has wandered), or the order to answer questions in.

(g) A prompter can attract the candidate's attention by tapping on the desk or on the candidate's arm, depending on what they usually do, to remind the candidate that they must pay attention to the question.

(h) A prompter may not be busy during the whole exam, but they must be vigilant and tell the invigilator about any problems.

1.3.5.8 Reading aloud (candidate)

If needed, a candidate can take their exam in a separate room so they can read aloud, if this is their normal way of working. You are responsible for making sure that the candidate takes the exam in a suitable room where they cannot be overheard by other candidates. In these cases, you must provide a separate invigilator. See section 1.3.9.

Reading aloud by the candidate may be permitted in instances where a candidate is not allowed a reader, for example, where the candidate's reading skills (accuracy, speed, comprehension) have been measured through a psychometric assessment and are not below average.

1.3.5.9 Reading pens

We will allow a reading pen in papers testing reading. They must not have an in-built dictionary or thesaurus, or data-storage facility. All pens must be checked before the exam.

1.3.5.10 Scribe

A scribe writes down or word processes a candidate's dictated answers.

(a) A scribe can be used in coursework and/or in exams, but not in speaking tests. If an exam involves word processing, we will not allow a scribe.

(b) We will allow a scribe in certain subjects for candidates who cannot produce written responses in any other way, for example, word processing or Braille input. For exam purposes, this means:
- candidates whose writing speed or spelling accuracy have been measured through a psychometric assessment. Please see section 1.3.3(e) for more information
- candidates whose free writing cannot be read or understood by others, or is produced so slowly that answers cannot be fully recorded even with the extra time allowed
- candidates with a permanent physical disability or recent injury who cannot write.

(c) Candidates must respond in English unless the syllabus says otherwise.

(d) We recommend that a candidate using a scribe takes the exam in a separate room. However, if the candidate and scribe are in the same room as other candidates, you must make sure other candidates cannot overhear and are not disturbed. If the candidate and scribe are in a separate exam room, they will need a separate invigilator. See section 1.3.9.

(e) A scribe:
- must write down or word process accurately what the candidate says
- may read back what has been written if the candidate asks them to. They must not comment on any part of the answer
- must draw or add to maps, diagrams and graphs exactly as the candidate asks them to. If the candidate is taking a design paper, we will only allow a scribe to help with written parts of the paper
- must write or word process a correction on a typescript or Braille sheet only if the candidate asks them to
- must immediately tell the invigilator about any communication problems
- must not give factual help to the candidate or show when the answer is finished
- must not advise the candidate about which questions to answer, when to move on to the next question, or about the order to answer questions in. If the scribe is also acting as a prompter, they should refer to section 1.3.5.7
- must follow these regulations as if they do not the candidate could be disqualified.

(f) In exams testing spelling, punctuation, grammar and language, where candidates receive marks for the quality of their language, we allow the choice of two options:
- Opt-out: The candidate does not dictate all words letter by letter, but must dictate punctuation to the scribe. We will assess the candidate's language skills based on the quality of language used in their dictated

Index

answers, for example, grammar, syntax and word choice. The total marks available for the paper do not change; however, marks corresponding to spelling cannot be awarded because the candidate would not demonstrate the spelling skills being tested when they are using this access arrangement.

The number of spelling marks varies for each component, but in all cases, this is a small proportion of the overall mark for a syllabus. Please contact us if you would like the marks allocation for a specific syllabus and component.

This arrangement is the default process and will be applied to all language syllabuses your candidate is entered and uses a scribe for, unless you take the option to 'opt-in', as outlined below.

For this arrangement, you need to complete an Access Arrangements Cover Sheet (Exam Day – Form 4) and attach it to the candidate's script. Use this to confirm that the candidate did not dictate spelling. See section 1.3.5.10 (g) and (h).

- Opt-in: The candidate dictates all words letter by letter, as well as all punctuation, to the scribe. This means marks corresponding to spelling will be awarded.
- Your candidate would be permitted to use up to 100% extra time to allow them to dictate spelling and punctuation in language syllabuses only. You would not need to tell us about the use of this additional time; however, you must still apply for any extra time required for other reasons. If a candidate dictates answers onto a recording device, you must produce a transcript.

  For this arrangement, you need to complete an Access Arrangements Cover Sheet (Exam Day – Form 4) and attach it to the candidate's script. Use this to confirm that the candidate dictated spelling.
- For all non-language syllabuses, candidates are not required to dictate spelling and punctuation to a scribe. If you are unsure if a syllabus is a language syllabus, please contact us.
- A candidate must decide to 'opt-in' or 'opt-out' before each language exam. They must not change option during the exam. If a candidate 'opts-out' for any part of the exam, then the full proportion of marks will be forfeited. Marks cannot be proportionally forfeited.

(g) If opting out, candidates should clarify their word choice where the word is a homophone. This is important where this information is key to the grammatical accuracy of a response. For example, where the homophone is a verb, candidates should specify a tense, verb ending or indicate where a diacritic (such as an accent, umlaut or vowel mark) should be placed. **NEW** The scribe may ask the candidate for clarification using an open question, for example, 'Which "there" do you mean?'; however, they may not provide any information to aid the candidate's selection.

Below are examples of where a candidate may need to provide clarification:

- In French language, the following verbs are pronounced similarly: 'jouer' (to play, the infinitive form), 'joué' (played, past participle), 'jouais' (used to play – imperfect, 1st or 2nd person singular), 'jouait' (used to play – 3rd person singular). As they function differently in a sentence, they would require clarification from the candidate.
- In Spanish language, the words 'a' and 'ha' are pronounced identically but have different grammatical functions in a sentence. The word 'a' means 'to' (preposition), whereas the word 'ha' means 'has' (verb in auxiliary form). The following past tense verb forms have very similar pronunciations but have different meanings: 'calló' (he was quiet) vs 'cayó' (he fell).
- In English language, three commonly confused homophones are 'there', 'their' and 'they're'. Although they are pronounced identically, they have different grammatical functions and may need clarification from the candidate. The word 'there' is an adverb of place, the word 'their' is a possessive pronoun and the word 'they're' is a contraction of the words 'they' and 'are'.

(h) If opting out, candidates should pay particular attention to their pronunciation when working with a scribe. This is because when a mispronunciation changes the meaning, their marks may be affected. This reflects the accuracy requirements stated in some mark schemes; for example, the Cambridge IGCSE foreign language mark scheme states: 'Reject misspelt words which suggest a word with a quite different meaning.' Below are some examples of where a candidate would need to pay particular attention to their pronunciation and may need to provide clarification:

Contents
Introduction
The Cambridge Exams Cycle

4 Section 4: Before the exams
5 Section 5: Exam day
6 Section 6: Results and certificates
7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

- In French language, candidates often mix up the pronunciation of 'vie' (life) with 'ville' (town). In the mark scheme, they would not get credit if they misspelt it in this way and so they would not get credit if the wrong words were scribed.
- In Spanish language, candidates often mix up the pronunciation 'haber' (to have – auxiliary) with 'a ver' (let's see), and also mix up 'vez' (time) with 'ves' (you see). In the mark scheme, they would not receive marks if they misspelt these words in this way and so they would not get marks if the wrong words were scribed.
- In English language, some words sound similar but have entirely different meanings. For example, 'assure', 'ensure' and 'insure'. The candidate should be clear which word was appropriate within the sentence, as no marks would be given if the correct word was misspelt.

(i) Candidates must not answer written questions using sign language in any syllabus, including using sign language to 'dictate' answers to a scribe.

(j) You must attach an Access Arrangements Cover Sheet (Exam Day – Form 4) to each script. Use this to explain whether the candidate or scribe produced graphs and diagrams and give any other relevant information. The scribe must sign the sheet and the Head of Centre or exams officer must countersign it.

(k) NEW Where a candidate is working with a scribe for the entire duration of an exam, they are permitted to use 25% extra time. You must apply for this.

1.3.5.11 Supervised rest breaks

(a) You may allow supervised rest breaks in most timed exams.

(b) You must always consider supervised rest breaks before you apply for extra time.

(c) You may give supervised rest breaks either in or outside the exam room. If the supervised rest break is in the exam room, you must make sure the candidate does not have access to the question paper and answer booklet.

(d) You must not include the length of the break in the time allowed for the exam component, including any extra time allowance. You should stop the clock when the candidate starts their rest break and start it again when the rest break is over.

(e) If appropriate, you can apply for both extra time and supervised rest breaks if the reasons for applying for both arrangements are different (for example, extra time for processing difficulties and a supervised rest break for a medical need).

(f) Other candidates must not be distracted by the candidate's supervised rest breaks.

(g) Contact us if you need advice about scheduling rest breaks.

1.3.5.12 Supplementary aids

A candidate may need supplementary equipment when taking the exam. For example:

- Visual aids: if a candidate has a visual impairment you may allow them to use visual aids, for example, a magnifying glass, tinted glasses, coloured overlays, tactile rulers or reading rulers.
- Headphones: if a candidate has a hearing impairment, sensory difficulties or tinnitus you may allow them to use noise-cancelling headphones or ear defenders. You must make sure any headphones comply with our regulations in section 5.1.8.2.
- Sit/stand desks or writing slopes.
- You must tell us if a candidate needs medical monitoring devices in the exam room, for example, a glucose monitor.

1.3.5.13 UK Transcript

(a) NEW If a candidate has illegible handwriting, it may help an examiner to have a transcript of the candidate's work to refer to. You must tell us if you will be submitting transcripts of a candidate's illegible work.

It is also a requirement for centres to supply transcripts of Braille scripts. See also section 1.3.6.1.

For information about transcripts of an audio file that we provide when a candidate is supported by a live speaker, see section 1.3.6.7 (Live speaker) if you need this. The regulations below (b to g) do not apply to this access arrangement.

(b) A member of your centre's staff who is familiar with the candidate's handwriting or is fully competent in Braille code for the subject must produce the transcript. This must not be the candidate's subject teacher. Contact us if this is not possible.

5 Section 5: Exam day
6 Section 6: Results and certificates
7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

(c) You must produce the transcript immediately after the exam under secure conditions. The candidate must not be involved in producing the transcript.

(d) The transcript may be handwritten or word processed.

(e) A transcript may be a full copy written in a spare answer booklet, for example, if a candidate answers in Braille. Or it may be a partial copy if only certain words need to be clarified. In this case, you must photocopy the original script and write the words clearly above the candidate's writing in blue or black (but not in red, green or purple ink, or pencil).

(f) You must attach an Access Arrangements Cover Sheet (Exam Day – Form 4) to the candidate's script. The teacher preparing the transcript must sign the cover sheet and the Head of Centre, or person acting on their behalf, must countersign it. You must also attach a copy of an Access Arrangements Cover Sheet to any coursework/portfolio transcript or scan in and then upload the Access Arrangements Cover Sheet as part of any online submission of work, if applicable.

(g) The transcript must be an exact word-for-word copy of the candidate's script.
- The transcriber must not add or remove any words and must not change their order. The transcriber must not correct spellings, punctuation, grammar and technical terms.
- If you think that some interpretation might be needed, contact us as soon as possible before the exam. You should be prepared to send us samples of the candidate's usual written work.
- Producing the transcript must not delay you sending us scripts. You must not send any extra information with the scripts.
- If a candidate's difficulties are so major that you cannot produce a transcript, see the regulations for using a scribe (section 1.3.5.10) or word processor (section 1.3.5.15).

1.3.5.14 Voice-activated software

Voice-activated software allows a candidate to dictate their answers using speech recognition technology. Voice-activated software includes:

- speech recognition technology with predictive text when the candidate dictates into a word processor. The software may be used to read back and correct the candidate's dictated answers
- assistive technology combined with computer software that produces speech and is used to dictate to a scribe, for example sip-and-puff combined with computer software.

Voice-activated software is not permitted in any language exam. We will allow voice-activated software in certain subjects:

- when the candidate cannot produce written responses in any other way, for example, handwriting or word processing
- for a candidate whose free writing is produced at a speed where answers cannot be fully recorded even with extra time.

Where voice-activated software is being used, attach an Access Arrangements Cover Sheet (Exam Day – Form 4) to each candidate's script.

1.3.5.15 Word processor

A word processor is a typewriter, electronic typewriter or word-processing software on a computer or tablet.

(a) Candidates who may need a word processor are those with:
- a learning difficulty that affects their ability to write
- a physical disability
- a health condition
- visual impairment
- a cognitive disability
- illegible handwriting
- **NEW** approval for a scribe.

(b) A word processor cannot be used by a candidate just because:
- they want to type rather than write in exams
- they work faster on a keyboard
- they use a word processor at home.

(c) A word processor with spellcheck may be used, except for syllabuses testing spelling, punctuation and grammar, or quality of written work. In these syllabuses, you must make sure spellcheck is turned off.

(d) Candidates can usually produce coursework using a word processor if the syllabus allows this. When you mark internally assessed coursework, you must give credit in line with the assessment criteria in the syllabus. You cannot give the candidate credit if they cannot show certain skills because they have used a word processor. We may ask you to send us coursework produced on a computer so that a moderator can inspect it.

7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

(e) We award marks based on the achievement the candidate has shown. To make sure mark schemes are applied fairly, we may ask you to supply extra information about how the candidate wrote their answers.

(f) Before you choose a syllabus for a candidate who uses a word processor, you must consider whether the candidate can fully meet the assessment objectives. Some syllabuses test skills (for example, drawing by hand) that the candidate cannot show if they use a word processor. Contact us as early as possible if you are not sure.

(g) A word processor must be used as a typewriter, not as a database, although standard formatting software is acceptable. Word processors must not have grammar check, predictive typing, phonetic conversion from English, or thesaurus features enabled in any assessment unless we have approved this. They must not give the candidate access to other applications such as calculators or spreadsheets.

(h) They must not include graphics packages or computer-aided design software unless we have allowed this.

(i) A candidate may use a combination of both word processing and handwriting during the exam.

(j) In language syllabuses, keyboard shortcut software is allowed. A keyboard containing specific language keys is acceptable.

(k) If you want to use a specific piece of software for a candidate, you must ask for our permission first. We will decide whether we will be able to assess the candidate fairly in each subject. We may ask for independent advice about computers and software to decide which are suitable.

(l) The word processor must not be connected to the centre's network, the internet, or any other means of communication.

(m) You must be sure that any word processor used in an exam is clear of any stored data.

(n) The word processor must be in good working order and must be connected to mains electricity, not run on a battery. It must also be connected to a printer so a script can be printed. Printing may be done after the exam, but the candidate must make sure the work printed is their own. The candidate should save their work regularly, using autosave if this is available. If the work has been saved onto a USB stick for printing, check that you can retrieve the work before you delete it.

(o) If a candidate uses a word processor you must make sure the other candidates are not disturbed and cannot read the screen. If the candidate using the word processor is in a separate room, they will need a separate invigilator. See section 1.3.9.

(p) Scripts must be double spaced and in font size 10 to 14. The candidate must include the following on each page of their work:

- centre number
- candidate number
- candidate name
- date of exam
- syllabus and component
- number of pages in the script, for example, '1 of 7', '2 of 7', etc.

NEW Candidates must clearly indicate the corresponding question number next to each answer.

(q) Word-processed scripts must be attached to the relevant answer booklet or question paper (if other candidates are answering directly on the question paper) using treasury tags or string.

(r) Word processors must not include voice-activated software unless the candidate has our permission to use a scribe and/or relevant software.

(s) A third party must not use a word processor for the candidate unless they have our permission to use a scribe, and where the syllabus allows this.

(t) You must attach an Access Arrangements Cover Sheet (Exam Day – Form 4) to each script where a word processor has been used.

(u) We may need to contact you about your candidate's word-processed script(s). Save them securely at the end of each exam and store them securely until the end of the enquiry about results period.

1.3.6 Modified question papers

NEW A modified question paper is an adapted version of a standard question paper which helps candidates with specific needs access an assessment. The questions are not made easier; instead, the modifications make sure the content is accessible to candidates with specific needs without altering the standard or level of difficulty of the paper. A modified question paper allows candidates to access an assessment using their normal way of working wherever possible.

1.3.6.1 Braille paper

NEW The text in the paper will be presented as Unified English Braille (UEB). Some visual information will be removed and presented as verbal information and some will be simplified and may be presented in a tactile form. Remember to tell us whether you need contracted or uncontracted Braille on the application form.

- Braille papers are only available in the Roman alphabet. We cannot provide Braille papers in languages which use other alphabets or which are character based. If you think this affects your candidate, contact us.
- If candidates answer in Braille, you must provide a transcript for the examiner. Follow the regulations for producing transcripts in section 1.3.5.13. Attach an Access Arrangements Cover Sheet (Exam Day – Form 4) to the transcript. We can only accept Braille responses which use the Roman alphabet; we are unable to accept responses which use other Braille conventions. If you think this affects your candidate, contact us.

1.3.6.2 Coloured paper

Unmodified content is printed on coloured paper. See section 1.3.6.8(g).

1.3.6.3 Modified large print

NEW In these papers, the format of the text is modified as per the modification type, and, where relevant, visual information is simplified. We offer modified large print papers on both A4 and A3 paper, as follows:

- A4 18 point bold: the font is modified so that visual information is simplified and printed in 18 point bold onto A4 sheets.
- A4 24 point bold.
- A3 24 point bold. The question paper is printed in 24 point bold onto A3 sheets. (This modification is the same as 18 point bold enlarged to A3.)
- A3 36 point bold.
- A4 18 point bold enlarged to A3. (This modification is the same as 24 point bold on A3 sheets.)

1.3.6.4 A3 unmodified

The standard paper is enlarged to A3 size. NEW No modifications are made to the text or visuals. This option is not suitable where scaled diagrams have been used.

1.3.6.5 Modified carrier language

Complex sentences are broken down into simpler ones. The questions and difficulty stay the same as for any other candidate, and technical vocabulary is not changed. Modified carrier language papers are only available for certain syllabuses and are not available in language or literature exams. We make sure that the language used in our exam papers is as accessible as possible, so this modification may not be needed for all exams.

1.3.6.6 NEW Tactile diagrams

- Tactile diagrams translate a visual image into a tactile one so a visually impaired candidate can feel them.
- Tactile diagrams are not exact replicas of the print version as details will be simplified.
- Some diagrams are better transcribed with a description rather than in tactile form.

1.3.6.7 Transcript of audio files

NEW You must request transcripts of audio material for use with a live speaker. See section 1.3.6.8(e) for live speaker guidance.

1.3.6.8 NEW Guidance for centres

(a) You must apply for modified question papers using Preparation – Form 3. The Head of Centre, exams officer or Cambridge Associate, in the case of Associate Centres, needs to sign the form before you send it to us.
A Associate Centres must send their forms to their Cambridge Associate.

(b) We will only send modified question papers if you make a final entry for the relevant candidate, syllabus and component. See section 2 for relevant entry deadlines.

(c) You must apply for modified question papers by no later than the deadline, otherwise we may not have time to produce them. We recommend you make final entries for candidates requiring modified papers at the time you request modified papers. Late requests may not be accepted.
A Cambridge Associates should agree earlier deadline dates with their Associate Centres. This will give them time to process the applications and send them on to us.

(d) If retake candidates need modified question papers, contact us as soon as possible to make sure we can provide what you need.

(e) Live speakers:

- The live speaker must read aloud the contents of the listening exam in the language being assessed.
- If a hearing-impaired candidate needs a live speaker for pre-recorded listening exam components, it should reflect their usual way of working.
- The Head of Centre appoints and manages the live speakers presenting the listening component. The live speakers must be fluent in the relevant language.
- Live speakers should ideally be teachers of the language being assessed and the candidate should know them. Live speakers must not be the candidate's own subject teacher, relative, friend, or peer. The live speakers must be fully aware of these regulations.
- To use a live speaker for pre-recorded exam components, you must also ask for a transcript of the audio file by sending us Preparation – Form 3 by the modified question paper application deadline.
- Ideally live speakers should work with only one or two candidates. If this is not possible there should never be more than six candidates to one live speaker. Candidates must sit down so they can all clearly see the live speaker.
- You should give the live speaker access to the audio files on the day of the exam, at the Key Time. They can then prepare their role from the transcript and hear the speed of delivery. They must not interpret the text in any way. During this time, you must keep the candidates under Full Centre Supervision. Our Key Time regulations apply before and after the exam.
- If the recording involves two or more characters, you can use a separate live speaker for each role, or the live speaker must make it clear which character is speaking.
- Candidates using a live speaker must be invigilated separately and all our invigilation regulations must be followed. Live speakers must not act as invigilators. Other candidates in the exam room must not be disturbed.

(f) UK If a candidate has a visual impairment or processing difficulties and finds reading black text on white paper challenging, you can print a question paper on appropriate coloured paper at your centre. You must tell us if you plan to do this by completing and returning Preparation – Form 3 by the dates in section 1.3.4.

- We may need to print some question papers on coloured paper for you. We will tell you which ones we need to print and which ones you can print.
- Your Head of Centre is responsible for making sure the security and integrity of the question paper is maintained during the printing process.
- We will make a copy of the question paper available for you to download from Digital File Despatch at the Key Time for the exam. We only provide the question paper(s) you include on Preparation – Form 3, that we approved, and only if the candidate has the appropriate entry. Make sure you have asked for all syllabuses and components that you need. If you amend your entries, you must tell us so that we can make the correct question paper(s) available to you on Digital File Despatch.
- We will email guidance about how to securely print question papers to you. You must follow the guidance outlined in this email.
- You must not modify the content of the question paper, for example, changing the font size. You must print question papers on A4 paper unless you have permission from us to make enlargements.
- You must keep signed records of the printing process. These should include:
  - the start time of the exam
  - the syllabus, component, candidate number and print produced
  - the names and job titles of the two staff members who carried out the printing process.

  Record this information on your exam timetable. You may be asked to show these records to an inspector. You must keep these records until we have released certificates.

(g) If a candidate requires an enlarged copy of an answer booklet or an answer booklet on coloured paper, you must produce this. To produce this, you may photocopy a copy of the standard answer booklet onto the appropriate coloured and/or sized paper. You will receive copies of the standard answer booklet in your non-confidential despatch before the exam series. You do not need to tell us if you plan to do this.

1.3.7 Mental health

A candidate who experiences mental health problems (for example, generalised anxiety disorder, obsessive compulsive disorder, depression) may be eligible for access arrangements. When deciding if access arrangements are appropriate, you must follow our regulations. You must hold evidence of need, which includes a formal diagnosis, to support your application. If a formal diagnosis has not been made, you may wish to review section 1.3.9. Please note, exam- or test-related nerves or anxiety are generally not considered to be reasonable grounds for access arrangements.

1.3.8 NEW Significant illness or hospitalisation during a course of study

If you have a candidate who is experiencing significant disruption to their studies, but will still cover the content of the whole syllabus, email us as soon as possible: info@cambridgeinternational.org

This is different from when something unexpected and adverse happens at the time of the exam. In such cases, see section 5.5 Special consideration.

For candidates who are in a hospital at the time of the exam, please also see section 2.6 for information about alternative venues.

1.3.9 Separate and small room invigilation

(a) You may want a candidate with access arrangements to take the exam separately or in a room with fewer candidates (small room invigilation). Candidates who may need separate or small room invigilation are those with:

- a medical condition
- mental health problems
- a condition which includes hyperactivity, or vocal or motor tics meaning that they may distract other candidates, and/or be anxious about distracting others
- a colour naming assistant, human reader, practical assistant, prompter or scribe, and their answers or conversations may be overheard by other candidates.

For both separate invigilation and small room invigilation you must comply with our invigilation regulations. See section 4.6.

(b) You may want a candidate who is experiencing mental health problems, but does not need any other access arrangements, to take the exam separately with a separate invigilator, for example, if the candidate experiences generalised anxiety and may benefit from being in an environment with fewer people.

(c) If you allow separate invigilation, you are responsible for making sure the candidate takes the exam in a suitable venue. You must provide a trained invigilator. If the candidate also has other access arrangements such as a reader or a scribe, the reader or scribe must not act as the invigilator and there must be a separate invigilator.

(d) You do not need to tell us if you use separate invigilation.

(e) You must follow our regulations at all times.

1.3.10 Emergency access arrangements

If a candidate requires emergency access arrangements, you must try to tell us before you use them. For example, if a candidate breaks their arm before an exam, email or phone us straight away. If you cannot contact us before the exam, the Head of Centre should decide on the day whether to use access arrangements. NEW Send us an application using either Preparation – Form 1 or the Apply for Access Arrangements service as soon as possible. See section 1.3.4(d).

1.3.11 Appeals

To appeal against the outcome of an access arrangement application, see section 7.4 Appeals against access arrangement, special consideration and late arrival decisions.

Important dates

June series

Application deadline for candidates who need modified papers: 21 January 2025

November series

Application deadline for candidates who need modified papers: 1 July 2025

2.7 NEW Not meeting qualification regulations 62

PDQ Cambridge Professional Development Qualifications

There are differences in this section for Cambridge Professional Development Qualifications (PDQs). Please see the PDQ Administrative Guide, available from www.cambridgeinternational.org/eoguide

2.1 Candidates

2.1.1 Eligibility

(a) Centres must enter each candidate for their exams.

(b) Candidates may not enter for:

- the same syllabus at two different centres in the same exam series
- restricted syllabuses as outlined in the Cambridge Guide to Making Entries, at two different centres in the same exam series.

(c) Candidates must meet all assessment requirements.

(d) There are no age restrictions.

(e) You must authenticate and, where relevant, mark and moderate all work you send us.

2.1.2 Private candidates

Our assessments are mainly designed for candidates studying at schools and colleges registered with us as centres. However, some candidates who do not attend our centres or who are studying at a Cambridge International School – registered as online may want to enter for assessments. These are known as 'private candidates'.

Important information

Chk You cannot enter private candidates for Cambridge Primary Checkpoint and Lower Secondary Checkpoint.

(a) You must check syllabuses or the Cambridge Guide to Making Entries to make sure they are available for private candidates before you make any entries. You can download syllabuses from www.cambridgeinternational.org. The Cambridge Guide to Making Entries is in the 'Support Materials' section of Direct.

(b) UK Private candidates must be able to meet all assessment requirements. Some options, including those with coursework, are not available to private candidates.

(c) Private candidates must arrange for a centre to enter them for exams. Cambridge International Schools registered as online cannot make entries (unless they have been approved to run their own exam venues) and must make sure the necessary arrangements are in place for their students to be entered as private candidates at an approved Cambridge exam venue.

(d) If you decide to make an entry on behalf of a private candidate, you must pay our fees.

(e) Candidates studying at Cambridge International Schools registered as online must be entered as private candidates. This means some syllabuses, including those with coursework, will not be available to them. This does not apply to Cambridge International Schools registered as online that are entering candidates directly through their own approved exam venues.

(f) Candidates studying at Cambridge International Schools also approved to offer Cambridge programmes online must be entered as school candidates and not private candidates. This is because these candidates will be registered with the school and sit their exams at the school's physical premises.

2.1.3 Transferred candidates

(a) Candidates who need to move to another centre can only continue with the exams if they move to a centre registered with us.

(b) You can change the entry details for these candidates.

(c) You cannot ask to transfer a candidate to another Cambridge centre less than 10 working days before the candidate's first exam in the series.

(d) Candidates cannot transfer to another centre for specific syllabuses or components. They can only transfer for all their assessments in an exam series.

(e) To transfer a candidate:

- The original centre must send us Entries – Form 3.
- The receiving centre must send us Entries – Form 4.

A Associate Centres should send forms to their Cambridge Associate.

(f) Once we receive both forms, we will move the entry from the original centre to the receiving centre. Do not enter or withdraw a candidate who is being transferred. We will do it for you, and we will confirm to you once the transfer is complete.

(g) A candidate who transfers to another Cambridge centre after final entries are made becomes the responsibility of the receiving centre. This centre should allocate its own candidate number to the candidate.

(h) If necessary, the original and receiving centres must make sure internal assessments are completed. Once the transfer is complete, the exams officer at the receiving centre must submit any internally assessed marks and samples.

(i) We will credit the account of the original centre with the entry fees and charge entry fees to the receiving centre for the transferred candidate. We will not charge late entry fees to centres for receiving a transferred candidate.

(j) **NEW** If a candidate needs to take their exams at a venue that is not their registered centre, but you do not wish to transfer their entry, see section 2.6 Alternative venues.

Administrative forms

Forms available from www.cambridgeinternational.org/forms

- Candidate Transfer Request: Entries – Form 3
- Candidate Transfer Confirmation: Entries – Form 4

2.1.4 Communicating about candidates

Only the Head of Centre, exams officer / centre coordinator or their nominated deputy responsible for the candidate's entry should contact us.

2.1.5 Declaration of interest

(a) A declaration of interest must be made for each exam series where centre staff, or a person associated with the centre:

- is taking a Cambridge assessment themselves
- is involved in administering an exam that is being taken by a person they have an interest in
- has an interest in a person taking a Cambridge assessment at their own centre or at another centre.

Examples of who should make a declaration include, but are not limited to:

- Head of Centre
- exams officer
- invigilators/supervisors
- those involved in the administration and running of exams
- secure storage key holders.

(b) By 'interest', we refer to any relationship which could be perceived to compromise the integrity of:

- your centre
- your centre staff, or a person associated with the centre
- our assessments.

Examples of relationships include, but are not limited to:

- a close relative (including a spouse or partner)
- a relative who you have regular contact with
- a close friend
- a colleague.

It is your responsibility to manage any 'interests' that have been declared. You should do this by putting the appropriate controls in place to make sure that the integrity of Cambridge assessments is maintained and to protect all those involved.

(c) To notify us, complete and send Entries – Form 1 as soon as you know that the person concerned will be, or has been, entered for a Cambridge exam.
A Associate Centres must submit forms through their Cambridge Associate.

(d) If you have a concern that the integrity of Cambridge assessments has been compromised, see section 5.6 and report your concern to us immediately.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Declaration of Interest: Entries – Form 1

2.2 Estimated entries

Estimated entries are your calculation of how many candidates you will enter for exams. We use estimated entries to work out which materials and question papers you need for exams that take place before the main exam period. Some early exam materials are despatched based on estimated entries, so it is important that you make the estimated entries by the deadline to receive your early materials before the main exam period.

You do not give any candidate details with your estimated entries, so you still need to make final entries (see section 2.3). The fees we charge are based on your final entries only.

2.2.1 Working out your estimated entries

Work out your estimated entries based on the number of candidates studying the subject or the number you are expecting to have. If you are unsure whether you are going to enter any candidates for an exam, make at least one estimated entry. This will make sure you receive one set of early exam materials.

2.2.2 Estimated Entry Form

The Estimated Entry Form lists the syllabuses and components for exams timetabled before the main series.

You must give estimated entry information for these syllabuses. The form will be available from the 'Support Materials' section of Direct:

- in September 2024 for the June 2025 series
- in April 2025 for the November 2025 series
- in September 2025 for the June 2026 series.

We will let you know when the forms are available in the Cambridge Exams Officer eNewsletter.

Send the Estimated Entry Form to info@cambridgeinternational.org by the deadlines.

Important dates

Deadlines for estimated entries:

- June 2025 series: 10 October 2024
- November 2025 series: 10 May 2025
- June 2026 series: 10 October 2025

If you make major changes to the number of candidates you are entering after you have sent the form, please email us.

Important information

Chk You do not need to send us estimated entries for Cambridge Primary Checkpoint and Lower Secondary Checkpoint syllabuses.

Cambridge Associates / Associate Centres

We will upload the Estimated Entry Form to the 'Support Materials' section of the Cambridge Associate's Direct account. They should email a copy of the form to each of their Associate Centres and ask them to return it by a set date. Cambridge Associates should check the completed forms and send them to us by the deadlines listed above.

2.2.3 Digital File Despatch

We do not upload any confidential materials, pre-release material or early question papers, e.g. art & design, to Digital File Despatch based on your estimated entries. **Confidential materials are only available once you have made final entries.** See sections 1.1.6, 4.2.3 and 4.3.1.

2.3 Final entries

You need to make a syllabus entry for every candidate. We use your entries to work out the number of question papers and exam materials we need to send you. Check your entries carefully before you submit them. Do not send entry files by email. If you have not made estimated entries, you will still receive early exam materials if you make your final entries, but you may not receive materials before the start of the test date window.

We charge late entry fees for any new entries you make, as well as for any entry amendments or syllabus changes after the final entry deadline (see section 2.4). If you make entries or changes after the deadline, this can cause disruption to carefully scheduled processes and create significant extra work. Therefore, we apply late entry fees to recover the costs of this extra work, and to encourage you to make entries by the final entry deadline.

UK The Cambridge Guide to Making Entries contains syllabus and option codes, as well as detailed instructions for making entries. Make sure you use the correct version of the guide for your series and administrative zone. You can find out which administrative zone you are in at www.cambridgeinternational.org/adminzone

All centres in administrative zone 3 can make entries for our 9–1 Cambridge IGCSEs.

Chk See section 2.3.2.4 for Cambridge Primary Checkpoint and Lower Secondary Checkpoint.

2.3.1 Making final entries

UK Make your final entries using Direct. Instructions are in the Cambridge Guide to Making Entries, which is in the 'Support Materials' section of Direct.

- **Candidate details:** You must enter candidate names in full as shown on their identity documents. If you are entering candidates for multiple series, make sure their details are the same for all entries and each series.

Contents
Introduction

5 **Section 5:** Exam day
6 **Section 6:** Results and certificates
7 **Section 7:** Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

- **Previous entry details:** A candidate's previous entry details are their centre number and their candidate number from the previous series. You need to give them if:
  - you enter them for retake exams in the November series (see section 2.4)
  - you enter them for a group award over more than one exam series (see section 2.5.1)
  - they have taken the AS part of a Cambridge International A Level in a previous series and you enter them for the full A Level (see section 2.5.2)
  - you make an entry that carries forward their marks from a previous exam series (see section 2.5.3).
- **Submitting entries:** Submit your entries once you have checked all your entry information. Log into Direct, go to the 'Submit Entries' section and click 'Submit Entries'. If you do not submit your entries, we will not be able to process them and you will not receive the materials and question papers you need for the exams. **Submit your entries at least two weeks before the entries deadline.** This gives you time to check them and correct any mistakes before the deadline, avoiding any late entry fees.

  For syllabuses with early exam and pre-release materials, you should make your entries earlier than this to make sure your materials are despatched in time.
- Once you have made an entry for either Cambridge IGCSEs graded A*–G or 9–1, you will not be able to move to the other grading scale after the late entries deadline. If you accidentally make an entry for an A*–G syllabus you must withdraw the entry, and re-enter the candidate for the corresponding 9–1 syllabus. You must do this before the entries deadline. The same applies for any 9–1 syllabuses.
- If you identify any errors in your entries after the late entries deadline, contact us immediately. Any changes that we are able to make after the entries deadline will incur our standard late entry fees.

UK If you are a UK centre, see the Cambridge Handbook (UK Supplement) 2025 for information about MIS packages and A2C.

Important information

After 20 minutes of inactivity you will be automatically logged out of Direct.

2.3.1.1 UK Unique Learner Numbers (ULNs)

If you are a UK centre, see the Cambridge Handbook (UK Supplement) 2025.

Extra guidance

Watch our online tutorials on making entries using Direct at www.cambridgeinternational.org/entries

Cambridge Associates / Associate Centres

We recommend Cambridge Associates make entries for their Associate Centres at least two weeks before the closing date. This allows time to check the entries and resolve any problems before our deadline, avoiding late entry fees. Remember, Cambridge Associates should set earlier deadlines for their Associate Centres.

2.3.2 Confirming entries

Direct allows you to generate statements of entry, candidate entry lists and reports at any point, to confirm the entry status for each of your candidates and to check your entry information is correct. Click the 'Check Entries' tab to access the reports. You can also view possible timetable clashes for any of your candidates in the 'Timetables' tab in Direct.

7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

2.3.2.1 Entries confirmation despatch

We will send your final entries confirmation despatch within two weeks of receiving your final entries. This includes:

- a candidate entry list showing all your entries by candidate
- a centre summary of entries showing the total number of entries you made for each syllabus and option
- a candidate entry warning list showing any potential timetable clashes for individual candidates.

If you do not receive your entries confirmation despatch, email info@cambridgeinternational.org. If you find errors in your entries documents or on Direct, follow the instructions in section 2.4.

Important information

You will no longer receive printed statements of entry that were included in the entries confirmation despatch in previous exam series. If your region has told us that it is critical for you to receive printed statements of entry, we will continue to send them to you. Download your statements of entry from Direct, from the 'Reports' tab.

2.3.2.2 Statements of entry

Statements of entry are your record of entries, both before and during the assessment. They show the candidate's details, their syllabuses and entry options, and the dates and sessions of each of their timetabled exams. Download your statements of entry from Direct, from the 'Reports' tab.

Share statements of entry with your candidates, including private candidates, so they can check their details. The name shown is the name that will be printed on statements of results and certificates, so it is important to tell us if there are any errors by following the instructions in section 2.4. The candidate should write their name on scripts as it appears on the statement of entry.

Cambridge Associates / Associate Centres

We send statements of entry to Cambridge Associates, who send them to their Associate Centres to check. Associate Centres should let their Cambridge Associate know if they need to make any changes as soon as possible.

UK Regulations

(a) You must make final entries through Direct.

(b) The Head of Centre or Cambridge Associate is responsible for making sure entry data is accurate, complete and submitted on time.

(c) You must check that your entry data is correct and complete on Direct.

(d) Between the entries deadline and the late entries deadline you can make late entries or changes, but we will charge late entry fees.

(e) You can only apply for modified question papers if you have already made a final entry for the relevant candidate, syllabus and component. The final entries deadline and application deadline for candidates who need modified papers is the same date. It is always earlier than the final entries deadline for all other candidates who do not need modified papers. See section 2.3 for relevant entry deadlines and section 1.3.6 for more information about modified papers.

(f) You must assign one four-digit candidate number to every candidate. You cannot change this number after you have made your entries. Do not assign the same number to more than one candidate in the same series. Do not assign duplicate or multiple numbers to the same candidate in the same series.

2.3.2.3 Entry change requests

NEW Entry changes are not generally accepted after the issue of results.

We do **not** allow an entry change from a full Cambridge International A Level entry (both AS and A2 components) to a Cambridge International AS Level entry. This applies whether the Cambridge International AS Level and Cambridge International A Level have the same or different syllabus codes.

Entry changes are only accepted after the issue of Cambridge International A Level results when the change is:

- from a linear (both AS and A2 components in the same exam series), March carry-forward, June carry-forward or November carry-forward entry option to a best of both entry option
- from one carry-forward entry option (e.g. June carry-forward) to a different carry-forward entry option (e.g. November carry-forward) within the 13-month rule.

PDQ Important dates

Please make your entries at least two weeks before the final entries deadline. This will give you time to check your entries and make any changes before the deadline.

June series

- Cambridge Guide to Making Entries available: end of October 2024
- Entries can be made from: mid-November 2024
- Final entries deadline and application deadline for candidates who need modified papers: 21 January 2025
- Final entries deadline for other candidates: 21 February 2025
- Late entries deadline: 17 April 2025

UK November series

- Cambridge Guide to Making Entries available: end of March 2025
- Entries can be made from: mid-May 2025
- Final entries deadline and application deadline for candidates who need modified papers: 1 July 2025
- Final entries deadline for first-time entries: 16 August 2025
- Entries deadline for retake entries from the June 2025 series only: 21 September 2025
- Late entries deadline: 21 September 2025

2.3.2.4 Chk Entries for Cambridge Primary Checkpoint and Lower Secondary Checkpoint

Submitting teaching group information

You need to enter a teaching group code for each syllabus entry when Direct asks you to do this. We use this information in the diagnostic feedback we give at the end of the series. Assign the same teaching group code to all candidates who are in the same class (teaching group). For example, if your candidates for English are taught in two separate classes, you should enter 'E1' as the teaching group

Contents

Administrative forms
Index

code for all candidates in the first class and 'E2' for all candidates in the second class. The teaching group codes for each subject are listed in the table below.

There is only one teaching group code for Cambridge Primary Checkpoint and Lower Secondary Checkpoint Global Perspectives. We do not give diagnostic feedback for Global Perspectives syllabuses.

English as a Second Language								
E1	E2	E3	E4	E5	E6	E7	E8	E9
English								
E1	E2	E3	E4	E5	E6	E7	E8	E9
Mathematics								
M1	M2	M3	M4	M5	M6	M7	M8	M9
Science								
S1	S2	S3	S4	S5	S6	S7	S8	S9
Global Perspectives (for first tests in October 2025)								
G1								

Teaching group codes for both English and English as a Second Language start with the letter E and need to be entered like this on Direct. For diagnostic feedback, teaching group codes for English as a Second Language will appear as L1, L2, L3, etc. The teaching group codes for English will appear as E1, E2, E3, etc.

If you want a teaching group name (class name) to appear on your diagnostic feedback alongside the teaching group code, send us Entries – Form 2.
A teaching group name can be anything that will help you to identify the class more easily – for example, you could use your own class name.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Cambridge Primary Checkpoint and Lower Secondary Checkpoint Teaching Groups Information: Entries – Form 2

Important information

Chk You cannot enter private candidates for Cambridge Primary Checkpoint and Lower Secondary Checkpoint.

Important dates

Chk Make your entries at least two weeks before the deadline. This will give you time to check your entries and make any changes before the deadline.

Deadlines for submitting teaching group information with Entries – Form 2:

- May series: 11 March 2025
- October series: 16 September 2025

May series

- Cambridge Guide to Making Entries sent: end of October 2024
- Entries can be made from: mid-November 2024

- Submission deadline for Cambridge Global Perspectives (Checkpoint): 6 October 2025

2.4 UK PDQ Entry fees, late entries, entry changes and retake entries

Details of the fees for all our exams and how to pay are in our fees list. We publish the fees list in the 'My Messages' section of Direct. **NEW** If you are a Cambridge Early Years Centre or Cambridge International School – registered as online, we send the fees list to you.

We have the right to change the fees list. Please check you are using the latest version.

If you want to change or add entries, do this as quickly as possible. Use Direct online entries to make the changes and send them to us.

Find out more about retake entries at www.cambridgeinternational.org/retakes

Regulations

(a) We charge an entry fee per syllabus per candidate.

(b) There is a fee per candidate for Cambridge ICE and the Cambridge AICE Diploma. You must use the Cambridge Guide to Making Entries to check that your candidates qualify before you enter them. We do not credit a centre's account with entry fees for candidates who do not qualify.

(c) We charge late entry fees for any syllabus and group award entries you make after the final entries deadline.

(d) We charge late entry fees for any changes you make to entry options after the final entries deadline. We charge a late fee for each change. If you change an entry option twice we will charge two sets of late fees.

(e) If a candidate changes their syllabus entry to another syllabus code after the final entries deadline, we charge a new syllabus entry fee and a late entry fee. We do not credit a centre's account with the original entry or transfer the fees to the new syllabus entry.

Regulations (continued)

(f) You can change candidate information on Direct without incurring late entry fees until the late entries deadline. This means you can change any of the following:

- names
- dates of birth
- gender
- status
- unique candidate identifier
- national identity number
- Chk first language English indicators (Cambridge Primary and Lower Secondary Checkpoint only)
- Chk teaching groups (Cambridge Primary and Lower Secondary Checkpoint only).

(g) When making late entries for candidates who need modified papers, you must contact us as soon as possible. Late requests may not be accepted. If retake candidates need modified papers, please contact us as soon as possible. The earlier you contact us, the more likely we will be able to provide what they need. See section 1.3.6.

(h) If you make an entry for either Cambridge IGCSEs graded A*–G or 9–1, you will not be able to move to the other grading scale after the late entries deadline. If you accidentally make an entry for an A*–G syllabus you must withdraw the entry, and re-enter the candidate for the corresponding 9–1 syllabus. You must do this before the final entries deadline. The same applies for accidental entries for any 9–1 syllabuses.

(i) We cannot change an entry once the candidate has taken the first component of an exam.

(j) We do not accept entries for exams outside the timetabled exam series where the test date window has closed.

Regulations (continued)

(k) UK We accept November 2025 retake entries until 21 September 2025 without charging late entry fees, as long as:

- the candidate sat the same syllabus, with any option code, in the June 2025 series
- you give the correct previous entry details
- you tick the 'retake' box next to the entry. This cannot be added at a later date.

You must only tick the 'retake' box for retake entries from the June 2025 series.

(l) There is not a syllabus entry fee for Cambridge IGCSE staged assessment entry options. However, we still charge late entry fees for any entries we receive after the final entries deadline.

(m) UK After the late entries deadline the Direct online entries page will close and you will not be able to make any changes on Direct.

(n) In some cases you can ask to make or change entries after the late entries deadline by following these instructions:

- If a candidate arrives for an exam they have not been entered for, this is known as an unauthorised entry. They can take the exam as long as they can take all the components for the syllabus option. This means you must have enough spare question papers so the candidate can sit all the components at the right time, not just the specific exam.
- **You must not photocopy question papers.** If you allow a candidate to sit an exam they have not been entered for, you must send us Exam Day – Form 12 once they have completed all the components needed for the entry. See section 5.1.6.
- If you do not have enough spare question papers for each of the relevant components, email info@cambridgeinternational.org

immediately and we may be able to send you extra question papers. If we cannot send them in time you must tell the candidate that they cannot sit the exam.

(o) We charge a very late entry fee for any entry or change you make after the late entries deadline, even if we do not need to send you extra materials. This also applies to unauthorised entries and changes we accept after the late entries deadline. We may not be able to release results for late entries at the same time as other results.

(p) Fee rates and payment information are in the fees list in the 'My Messages' section of Direct. **NEW** If you are a Cambridge Early Years Centre or Cambridge International School – registered as online, we send the fees list to you.

(q) We invoice you for any late fees or other priced services you have used.

Administrative forms

- Reporting an Unauthorised Entry: Exam Day – Form 12

2.4.1 UK Withdrawing a candidate

To withdraw a candidate on Direct, find their details in the 'Administer Exams' dashboard and click the 'Remove Candidate' button.

Regulations

(a) We usually only credit a centre's account with entry fees if you tell us you want to withdraw a candidate before the final entries deadline.

(b) If you withdraw a candidate after the entries deadline for medical reasons, we may credit your centre's account with the entry fee. Email info@cambridgeinternational.org

You do not need to include a medical certificate or statement from a doctor confirming that the candidate was unable to sit the exam(s). However, you must keep a record of these documents and of the candidate's consent to use them. You must show us these documents if we ask to see them. A Associate Centres should contact their Cambridge Associate.

(c) If you have asked us to credit your centre's account with the entry fees on medical grounds after the final entries deadline, please do not withdraw the candidate.

(d) If we approve your request to credit your centre's account with the entry fees on medical grounds, we will withdraw the candidate.

(e) To withdraw a candidate on medical grounds after the late entries deadline, email info@cambridgeinternational.org

2.5 Group awards, staged assessment and carrying forward marks for internally assessed components

2.5.1 Entries for group awards

For group awards candidates study subjects from specific parts of the curriculum. Group award entries should be made in the series you expect candidates to complete all the group award requirements.

Enter candidates for group awards at the same time as you make your other entries. Use the relevant group award entry.

We offer the following group awards:

- **Cambridge International Certificate of Education (Cambridge ICE)** – for Cambridge IGCSE candidates who satisfy the Cambridge ICE group award rules, using Cambridge IGCSEs graded A*–G. Candidates can also use some Cambridge O Levels towards Cambridge ICE. Cambridge IGCSE (9–1) syllabuses do not count towards Cambridge ICE. To enter a candidate for the award, you must include the entry code '**ICE**' as well as the syllabus and option codes. You can enter candidates in one series or over two series within a 13-month period.
- **Cambridge Advanced International Certificate of Education Diploma (Cambridge AICE Diploma)** – for Cambridge International AS & A Level candidates who satisfy the Cambridge AICE Diploma group award rules. To enter a candidate for the award, you must include the entry code '**ADIP**' as well as the syllabus and option codes. You can enter candidates in one series or over a maximum of five series within a 25-month period.

We do not automatically check group award entries. You are responsible for checking your candidates qualify for the group award before you enter them for it. We will charge the entry fee for the group award even if your candidate does not qualify for it. We will only credit your centre's account with the entry fee if you withdraw entries before the deadline.

Important information

The entry code for a group award should only be entered in the exam series where the candidate is completing the award, i.e. when they are taking the last of their qualifying subjects.

You must enter candidates for each syllabus. We cannot accept entries for the group award only.

Candidates' syllabus entries made during the 13-month period before the exam series that they enter Cambridge ICE count towards the group award. We do not accept entries for any disallowed combination of syllabuses. You should check the syllabus document for disallowed combinations of syllabuses. Retakes do not count towards the group award.

For candidates entering Cambridge ICE in June 2025, syllabus entries made in a maximum of two of the following series can count:

- June 2024
- November 2024
- June 2025.

Candidates' syllabus entries made during the 25-month period before the exam series that they enter the Cambridge AICE Diploma count towards the group award.

For candidates entering Cambridge AICE in June 2025, syllabus entries made in the following series can count:

- June 2023
- November 2023
- June 2024
- November 2024
- June 2025.

Candidates' syllabus entries made during the 13-month period for ICE or 25-month period for AICE, before the exam series in which they enter the group award, **will only count** towards the award if the entries are linked correctly throughout the series. To do this, you must provide the correct previous entry details for the candidate. This makes sure that the relevant syllabus entries made during the 13- or 25-month period are correctly linked.

Administrative forms
Index

More information about group awards is in the Cambridge Guide to Making Entries.

2.5.2 Entries for staged assessment (Cambridge International AS & A Level)

Cambridge International A Level is typically a two-year course, and Cambridge International AS Level is typically one year. Candidates can start some subjects as a Cambridge International AS Level and extend them to a Cambridge International A Level. There are three possible assessment approaches for Cambridge International AS & A Level:

- Candidates take the Cambridge International AS Level only. The syllabus content for Cambridge International AS Level is half of a Cambridge International A Level programme.
- Candidates take the Cambridge International AS Level in Year 1 and complete the Cambridge International A Level in Year 2.
- Candidates take all papers of the Cambridge International A Level course in the same series, usually at the end of the second year of study.

Regulations

(a) If the Cambridge International A Level syllabus allows it, candidates can use their Cambridge International AS Level results towards a Cambridge International A Level in the same subject in a later exam series. AS Level results can be carried forward twice within 13 months of the series when the candidate took the AS Level. If the AS Level includes an internally assessed component, regulation 2.5.3(c) also applies.

Examples:

Candidates can use their Cambridge International AS Level results achieved in the June 2025 series towards a Cambridge International A Level in the November 2025 and/or June 2026 series.

Candidates can use their Cambridge International AS Level results achieved in the November 2025 series towards a Cambridge International A Level in the June 2026 series and/or November 2026 series.

(b) You must give the correct carry-forward option code when you enter a candidate who wants to carry forward a Cambridge International AS Level result. Option codes are in the Cambridge Guide to Making Entries. You must give the candidate's previous centre number and candidate number so we can find their marks. We do not automatically check carry-forward entries.

2.5.3 Carrying forward marks for internally assessed components

Candidates who want to retake a syllabus in a future exam series can retake the written components and carry forward the moderated marks from their internally assessed components. Check if the syllabus allows this in the Cambridge Guide to Making Entries.

5 **Section 5:** Exam day
6 **Section 6:** Results and certificates
7 **Section 7:** Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

Regulations

(a) If the syllabus allows it you can carry forward Cambridge IGCSE and Cambridge O Level marks once in a 13-month period.

Examples:

A coursework mark for the June 2025 series may be carried forward to the November 2025 series or the June 2026 series only.

A coursework mark for the November 2025 series may be carried forward to the June 2026 series or the November 2026 series only.

(b) You must give the correct carry-forward option code when you enter a candidate who wants to carry forward the mark for an internally assessed component. Option codes are in the Cambridge Guide to Making Entries. You must give the candidate's previous centre number and candidate number so we can find their marks. We do not automatically check carry-forward entries.

(c) Depending on what is allowed by the syllabus (see the Cambridge Guide to Making Entries), marks for internally assessed components can be carried forward towards a Cambridge International AS Level or a Cambridge International A Level. This is only allowed if all the other components of the AS Level or A Level are taken in the current series. This means that a Cambridge International AS Level result that includes carried-forward marks for an internally assessed component cannot itself be used to complete a full A Level. There is more information about carrying forward AS & A Level coursework on our website: www.cambridgeinternational.org/carry-forward-entry-rules

Examples:

Candidates can carry forward their internally assessed component marks achieved in the June 2024 series to complete a Cambridge International AS Level in the November 2024 series. This AS Level cannot be carried forward towards a Cambridge International A Level in the June 2025 series.

Regulations (continued)

Candidates can carry forward their internally assessed component marks achieved in the November 2024 series to complete a Cambridge International AS Level in the June 2025 series. This AS Level cannot be carried forward towards a Cambridge International A Level in the November 2025 series.

2.6 Alternative venues

Candidates should normally take their exams on your centre premises. This is because your centre premises have passed the school's approval process.

For the reasons below, you can apply for your candidates to sit timetabled exams at a venue other than their registered centre.

To request the use of an alternative venue, you must send us Entries – Form 5.
A Associate Centres must send the form to their Cambridge Associate.

NEW We will not transfer a candidate's entry to another registered centre if they are acting as an alternative venue. We will send results and certificates to the entering centre and not the alternative centre. The entering centre remains responsible for any costs incurred.

If you wish to transfer all of a candidate's entries to another registered centre, see section 2.1.3 Transferred candidates.

We may reject your application if we think the security of the exam will be at risk.

2.6.1 Reasons to apply

(a) You unexpectedly do not have enough space or facilities to conduct the exam in this series.

(b) A candidate needs to take the exam at another location for medical or pastoral reasons, for example, in hospital.

(c) There is essential/urgent building work at the centre which would cause disruption during an exam.

(d) Where the alternative venue you have asked for is a Cambridge International School and you are asking to use this because of national and/or international events.

2.6.2 Reasons an application may not be approved

(a) Where the alternative venue you have asked for is not a Cambridge International School and you are asking to use this because of national and/or international events.

(b) Candidates want to take the exam closer to their home.

(c) Your centre has had previous exam security issues.

(d) Where additional sittings might help if you do not have enough space in your centre. See section 1.2.4.

(e) Ongoing lack of space or facilities at your centre.

(f) NEW Candidates want to make an entry for a syllabus not available in their administrative zone.

(g) NEW Non-essential travel.

This is not a complete list.

2.6.3 Transporting question papers

The way in which question papers are transported to the alternative venue depends on your circumstances:

(a) Candidates should use spare copies of the question paper available at the alternative venue, where possible, if the alternative venue is another Cambridge International School.

(b) If the alternative venue is close to your centre two members of staff (one of which is a senior member of staff) can transport the question papers to the alternative venue in a secure briefcase or other hard case or lockable container. We will advise you when this can be transported before the exam.

(c) If the alternative venue is another Cambridge International School, we may be able to send additional question papers to that centre or electronically upload the question paper to that centre.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Using an Alternative Venue: Entries – Form 5

Important dates

Apply for alternative venues at least four weeks before the exam.

Chk **Cambridge Primary Checkpoint and Lower Secondary Checkpoint**

You can ask to use an alternative venue until:

- May series: 11 March 2025
- October series: 16 September 2025

Regulations

(a) It is your responsibility to contact the proposed alternative venue before applying.

(b) The proposed security arrangements you give on the form must meet our regulations in section 4.4.

(c) You cannot use an alternative venue unless you have our permission in writing.

(d) You should not split groups of candidates entered for the same subject between your centre and the alternative venue. If a candidate needs to take an exam in an alternative venue, for example they are in hospital, please tell us about this on Entries – Form 5.

(e) You must never send question papers by courier or send them electronically to the alternative venue. We are unable to send confidential exam materials to addresses other than registered Cambridge International Schools.

(f) You must tell the exams officer at the alternative venue if we approve the application and share with them any additional information we give you.

(g) We may consider a breach of these regulations as malpractice. See section 5.6.

(h) UK If you are a UK centre, see the Cambridge Handbook (UK Supplement) 2025.

2.7 NEW Not meeting qualification regulations

If exceptional and unforeseen circumstances that are beyond a candidate's control make it impossible for them to meet the regulations for their qualification, please contact us for further information.

3.5 Submitting marks for internally assessed coursework and non-coursework tests 75
3.6 Submitting internally assessed coursework and non-coursework tests 76
3.7 Submitting Cambridge Global Perspectives™ work 81

Cambridge Professional Development Qualifications

There are differences in this section for Cambridge Professional Development Qualifications (PDQs). Please see the PDQ Administrative Guide, available from www.cambridgeinternational.org/eoguide

The table below shows the meaning of the key terms used in this section of the Cambridge Handbook.

Key term	Definition
Examined work including practical examined components (excludes speaking tests)	All components that are examined in your centre on a timetabled date/session. This includes practical exams (ICT, IT and computer science and science practicals) and listening exams. You send us the work of all your candidates.
Examined coursework/ examined component (you may also see this called externally assessed)	A syllabus coursework component that we assess. You send the work of all candidates to us to be marked by a Cambridge examiner. The samples database tells you how to send the work to us and by when.
Internally assessed coursework (you may also see this called externally moderated coursework)	A syllabus coursework component that you assess and that we moderate. You send us some or all of the work – the samples database tells you what you need to send and by when.
Internal moderation	If more than one teacher at your centre is involved in the marking of coursework for a component, you internally moderate the marking across teachers and teaching groups. This makes sure there is a consistent standard and rank order across all candidates in the centre. You may need to internally moderate internally assessed coursework and/or non-coursework tests.
Non-coursework tests	Your teachers run and assess non-coursework tests, then we moderate them. Non-coursework tests take the form of an exam within a time period that we set. You send us the marks for all candidates entered for non-coursework tests. You also send us evidence for some or all of your candidates, such as recordings or photographs – the samples database tells you what you need to send and by when.

3.1 The samples database and Submit for Assessment

3.1.1 The samples database

The samples database explains how to administer internally assessed (also known as moderated) coursework, non-coursework tests, examined coursework and some practical examined components.

Use the database to find out:

- when and how to submit your marks for internally assessed coursework, non-coursework tests and some practical examined components
- when and how to submit your candidates' work
- which forms to complete and return with your candidates' work.

For internally assessed coursework and non-coursework tests, you submit all the marks and a sample of your candidates' work to us for moderation. For examined coursework and some practical components, you submit the work of all your candidates to us and we mark it.

Visit the samples database at www.cambridgeinternational.org/samples

3.1.2 Submit for Assessment

Submit for Assessment allows you to submit work online for some internally assessed and/or externally assessed components (such as examined coursework and non-coursework tests), instead of sending them to us on CD or USB, or using Secure Exchange. There is more information about Submit for Assessment on our website:
www.cambridgeinternational.org/submit-for-assessment
You access Submit for Assessment via My Cambridge (see section 1.1.15).

To find out how to submit your marks and sample(s) for a particular component, visit the samples database at www.cambridgeinternational.org/samples

We will not accept any work in hardcopy for components that the samples database indicates you must submit via Submit for Assessment.

Important information

We have withdrawn Outline Proposal Forms (OPFs) from all syllabuses where they were used. Teachers should supervise their candidates' work and have the flexibility to choose when they teach the component. For guidance on developing suitable titles for coursework, essays or projects, go to the School Support Hub: www.cambridgeinternational.org/support

For Cambridge International AS & A Level Global Perspectives (9239) and Cambridge International Project Qualification (9980), additional support materials are available to help teachers supervise their candidates' task setting. You can find these materials on the School Support Hub: www.cambridgeinternational.org/support

Administrative forms
Index

3.2 Internally assessed coursework

Internally assessed coursework is a syllabus coursework component that you assess and that we moderate.

- You must submit marks to us for all candidates entered for coursework components that you assess.
- You must also submit a sample of work for some or all of the candidates – the samples database tells you what to submit (www.cambridgeinternational.org/samples).
- Make sure we receive your marks and sample(s) by the deadline in the samples database. Your candidates' results may be delayed if we do not receive your marks and samples by the deadline.
- Coursework options are not available to private candidates.

See sections 3.5 and 3.6 for more information about how to submit internally assessed marks and samples, and sections 1.1.7 and 3.1.2 for more information about Submit for Assessment.

3.2.1 Authenticating coursework

We need to be confident that the work we assess is the candidate's own before we can award a grade. You are responsible for supervising candidates when they are completing coursework. You must also authenticate their work before you submit the marks.

NEW If you discover plagiarism and/or inappropriate use of generative artificial intelligence (AI) in a candidate's work during the course, you should resolve this internally.

If you discover plagiarism and/or inappropriate use of generative AI when you come to submit work to us, you must not submit it. For help on preventing and identifying plagiarism, see www.cambridgeinternational.org/courseworkandmoderation

We strongly advise you to review our policy about the use of generative AI in student work submitted for assessment as coursework: www.cambridgeinternational.org/generative-ai-in-coursework

Submitting work that contains plagiarised material and/or inappropriate use of generative AI may be considered malpractice. You should contact us if you are unsure whether to submit work or not.

3.2.2 Supervising coursework

(a) Teachers may:

(i) help to choose subjects for investigations, models and topics

(ii) give sources of information, for example, materials, places to visit and references, organisations, or people who might be able to help

(iii) advise whether candidates' ideas will work

(iv) advise on length, approach and treatment

(v) treat coursework as an integral part of the course and give candidates regular class work and/or homework relating to it, as appropriate.

(b) Teachers must also:

(i) supervise work to monitor progress

(ii) make sure candidates avoid plagiarism by stating their sources and advise them how to reference published materials

(iii) make sure work is completed in line with the syllabus and can be assessed against the criteria.

For more guidance on the use of sources in written work, see www.cambridgeinternational.org/courseworkandmoderation

(c) Coursework must be a candidate's own, unaided work. Unless there is subject-specific guidance in syllabus documents and coursework training handbooks that says otherwise, teachers can review candidates' work before it is handed in for final assessment. They can do this orally or in writing. Their advice should be kept at a general level so the candidate leads the discussion and suggests any changes. Teachers must not give detailed advice to individuals or groups on how they can improve their work to meet the assessment criteria. Teachers must not change candidates' work.

(d) Candidates must not use online tools which act as writing assistants in the production of their coursework. Online writing assistant tools identify specific sections of the candidate's work where a correction or improvement to style or tone should be made and may propose specific words that should be used instead.

Index

(e) Teachers must record full details of any other help they give to individual candidates, or any evidence that the candidate has received specific or detailed advice and correction to their work. They should record this information on their Individual Candidate Record Card, which can be found, where available, in the samples database (www.cambridgeinternational.org/samples). Teachers must consider this help when they give marks for the work.

3.2.3 Presenting coursework

(a) Each candidate must present written coursework on A4 paper, unless the syllabus says otherwise.

(b) Candidates may produce their coursework on a word processor, unless the syllabus says otherwise.

3.2.4 Marking coursework

(a) The teacher must give marks for coursework in line with the criteria in the syllabus. They must give evidence of how they have awarded marks, using the documents we have provided for that syllabus.

(b) Teachers must apply the marking criteria to all pieces of work submitted to us. It does not matter at which stage of the course the candidate produced the work.

(c) You can tell candidates their marks before you submit them to us, but you must tell them that these marks may change after moderation. Candidates can ask you for a review of their marks, and you must manage any review in your centre before you submit the marks to us. **NEW** However, you should not tell candidates their marks for the non-coursework tests listed in section 3.4, and a review of marks is not available for these tests. The rank order of the marks you submit must be your final opinion of the relative merits of all candidates. You can request a re-moderation of coursework with report (Service 5) on behalf of all your candidates at the enquiries about results stage. See section 6.

3.2.5 Internally moderating your marks

(a) If more than one teacher is involved in the marking of coursework for a component, you must internally moderate the marking across teachers and teaching groups. This makes sure all candidates have been assessed against the same standards for a particular syllabus.

(b) To complete internal moderation, each centre must select one teacher per component to act as an internal moderator. The internal moderator is usually a head of department (but can be a subject teacher). Their responsibility is to check that all teachers for each coursework component are marking consistently to the same standard. The internal moderator may move marks for some teaching groups up or down to make sure they are consistent for the whole centre.

(c) For each moderated coursework component, the internal moderator must make sure that a valid set of marks is produced for candidates from your centre. You must produce a list of all candidates in descending order of marks – we call this a rank order. Record these marks on the Working Mark Sheet or Coursework Assessment Summary Form in the internally moderated mark column, and then submit these marks to us.

(d) If only one teacher is involved in the marking of a coursework component, you do not need to internally moderate your candidates' marks before you submit them to us.

(e) For more information go to www.cambridgeinternational.org/courseworkandmoderation

Important information

If you have candidates who are taking an A*–G syllabus, and candidates who are taking the 9–1 equivalent, you must complete a separate Coursework Assessment Summary Form for each group and submit the work and forms to us separately. Do not combine them onto one form.

3.2.6 UK Absent candidates and not submitting coursework

If a candidate is entered for a coursework component but does not submit any coursework, we cannot give them a grade in that syllabus. They will receive a 'NO RESULT' outcome. The teacher must mark them as absent (with an 'A', not '0') when they submit marks through Direct or Submit for Assessment. When they fill in the Coursework Assessment Summary Form, the teacher must list the candidate's number and name and tick the 'absent' box against that candidate's row on the form.

3.2.7 Incomplete or extra coursework

(a) Some coursework components need candidates to produce several pieces of work (for example, three essays). If a candidate does not complete all parts of the coursework, only give them marks for the work they have submitted.

(b) If a candidate supplies more pieces of coursework than they need to, use the best piece(s) for the candidate's mark, as long as they meet the syllabus requirements.

3.2.8 Not meeting our requirements

If individual teachers or centres do not meet our requirements for coursework, we will tell you what to do. If we believe there is a major problem, we may ask you to find another person to assess coursework components in future exam series.

3.2.9 Submitting coursework for more than one syllabus

(a) You can submit the same coursework for more than one syllabus, unless the syllabus says you cannot do this. Coursework samples must be separated for each component when sending them to us. However, coursework must be relevant, and must be assessed separately for each syllabus according to its criteria.

(b) More than one moderator may check the coursework. You are responsible for making sure a separate copy is available for them and is submitted for each syllabus for which the coursework is being used.

3.2.10 Resubmitting coursework in a later series

A candidate cannot re-use moderated coursework from a previous exam series. They must submit a new piece of work if needed. The work cannot be a reworked version of the work they submitted in a previous exam series. Check the Cambridge Guide to Making Entries to find out whether there is an option for a candidate to carry forward their moderated coursework mark to a future series for the syllabus.

3.2.11 Submitting coursework for external competitions

You may submit your coursework for external competitions, but if you do this you must not state that the work is also being submitted as coursework for a Cambridge syllabus. It will be judged against different criteria, and the outcomes may not be the same.

PDQ 3.3 Examined coursework

Examined coursework is marked by a Cambridge examiner. These components are not available to private candidates.

- For examined coursework you submit the coursework of all your candidates. As we assess the coursework you do not mark it.
- Make sure we receive your examined coursework by the deadline in the samples database (www.cambridgeinternational.org/samples). If it is late we will not accept it.

See sections 1.1.7 and 3.1.2 for more information about Submit for Assessment.

Important information

NEW You will submit work for Art & Design (0400, 0989, 6090 and 9479) via Submit for Assessment. You will no longer be able to submit hardcopy work for Art & Design. Return of Art and Design Work: Coursework and Moderation – Form 5 is no longer available to use. Check the samples database for the submission and completion deadlines for Art & Design.

3.3.1 Authenticating examined coursework

We need to be confident that the work we assess is the candidate's own before we can award a grade. You are responsible for supervising candidates when they are completing coursework. By submitting coursework you are confirming that it is the candidate's own original work.

NEW If you discover plagiarism and/or inappropriate use of generative artificial intelligence (AI) in a candidate's work during the course, you should resolve this internally before you submit the work.

If you discover plagiarism and/or inappropriate use of generative AI when you come to submit work to us, you must not submit it.
For help on preventing and identifying plagiarism, see www.cambridgeinternational.org/support-and-training-for-schools/support-for-teachers/teaching-and-assessment/plagiarism

NEW Once you submit coursework to us, we may use plagiarism detection software to screen it. Our subject experts will review any coursework we suspect may contain plagiarism. If we find plagiarised work, we may consider it candidate malpractice and therefore not accept the work. The candidate may then receive no marks for that component. See section 5.6.4.

NEW We strongly advise you to review our policy about the use of generative AI in student work submitted for assessment as coursework: www.cambridgeinternational.org/generative-ai-in-coursework. Submitting work that contains plagiarised material and/or inappropriate use of generative AI may be considered malpractice.

3.3.2 Supervising examined coursework

(a) Teachers may:

- (i) help to choose subjects for investigations, models and topics
- (ii) give sources of information, for example, materials, places to visit and references, organisations, or people who might be able to help
- (iii) advise whether the candidates' ideas will work
- (iv) advise on length, approach and treatment
- (v) treat coursework as an integral part of the course and give candidates regular class work and/or homework relating to it, as appropriate.

(b) Teachers must also:

- (i) continually supervise work to monitor progress
- (ii) make sure candidates avoid plagiarism by stating their sources and advise them how to reference published materials
- (iii) make sure work is completed in line with the syllabus and can be assessed against the criteria.

(c) Coursework must be a candidate's own, unaided work. Unless there is subject-specific guidance in syllabus documents and coursework training handbooks that says otherwise, teachers can review candidates' work before it is handed in for final assessment. They can give feedback verbally or in writing. Their advice should be kept at a general level so the candidate leads the discussion and suggests any changes. Teachers must not give detailed advice to individuals or groups on how they can improve their work to meet the assessment criteria. Teachers must not change candidates' work.

(d) Candidates must not use online tools which act as writing assistants in the production of their coursework. Online writing assistant tools identify specific sections of the candidate's work where a correction or improvement to style or tone should be made and may propose specific words that should be used instead.

(e) Teachers must record full details of any other help they give to individual candidates, or any evidence that the candidate has received specific or detailed advice and correction to their work.

Extra guidance

For more guidance on the use of sources in written work, see www.cambridgeinternational.org/courseworkandmoderation

3.3.3 How to submit examined coursework

What to include

Before you submit your examined coursework to us, check the samples database: www.cambridgeinternational.org/samples. It tells you how to submit your examined coursework.

When you send us your examined coursework, you must do the following:

- Include the forms specified in the samples database. If forms are missing, incomplete or inaccurate this could delay the marking process and the release of results.
- If a candidate has used an access arrangement for their examined coursework, please fill in the Access Arrangements Cover Sheet (Exam Day – Form 4) and include this with your examined coursework. You can download the cover sheet from: www.cambridgeinternational.org/forms

Preparing hardcopy examined coursework

If the samples database asks you to submit hardcopy examined coursework, follow the instructions below. Make sure each piece of work is clearly labelled with your centre number, the candidate number, the syllabus and component. We recommend you use the 'Coursework identification labels' we send in the pre-exam despatch. Download extra labels from www.cambridgeinternational.org/forms (Coursework & Moderation – Label 3).

Send written coursework in plain, thin covers, not in bulky ring binders. Please make sure any tied written coursework is securely fastened.

Do not send valuable materials or large, bulky or fragile items.

Packing and sending hardcopy examined coursework

We send most of the materials you need to return your hardcopy **examined coursework** in the pre-exam despatch.

1 Pack the **examined coursework** for each component in separate script packets.

2 Attach the correct bar-coded label showing your centre number, the syllabus number and component number to the front of each packet.

3 Place the packets in a secure outer package to make sure your examined coursework is not damaged. We do not supply the outer package. You can put a number of packets, for a variety of components, into one outer package. You can use more than one outer package. See section 5.4.1.

4 Stick the coursework address label showing our address onto this package. You can download extra labels from www.cambridgeinternational.org/forms

5 Send your **examined coursework** to the following address. Use a service with a tracking facility and keep a record of your tracking number.

Cambridge International Education
Cambridge University Press & Assessment
DC10
Hill Farm Road
Whittlesford
Cambridge CB22 4FZ
United Kingdom

6 Your **examined coursework** must reach us no later than the deadlines in the samples database (www.cambridgeinternational.org/samples).

7 You must complete our Script Return Form each time you send us hardcopy examined coursework: www.cambridgeinternational.org/script-return-form

Important information

Please pack hardcopy examined coursework carefully. If coursework is damaged, this could delay the marking process and your candidates' results.

Extra guidance

To help you submit your hardcopy examined coursework correctly, watch our online tutorials at www.cambridgeinternational.org/courseworkandmoderation

Contents

Administrative forms

If you are preparing hardcopy examined coursework, the labels are available from www.cambridgeinternational.org/courseworkandmoderation and www.cambridgeinternational.org/forms

- Coursework Address Labels: Coursework & Moderation – Label 2
- Coursework Identification Labels: Coursework & Moderation – Label 3

Important information

Do not wait to send your candidates' work at the same time as your scripts for timetabled exams.

3.3.4 Submitting examined coursework for more than one syllabus

You can submit the same coursework for more than one syllabus, unless the syllabus says you cannot do this. However, coursework must be relevant, and will be assessed separately for each syllabus according to its criteria. More than one examiner may mark the coursework. You are responsible for making sure it is available for them.

3.3.5 Resubmitting examined coursework in a later series

A candidate cannot re-use examined coursework from a previous exam series. They must submit a new piece of work if needed. The work cannot be a reworked version of the work they submitted in a previous exam series. Check the Cambridge Guide to Making Entries to find out whether there is an option for a candidate to carry forward their coursework mark to a future series for the syllabus.

3.4 Non-coursework tests

Your teachers conduct and assess non-coursework tests, then we moderate them. They take the form of an exam within a time period that we set.

- You submit marks for all candidates entered for non-coursework tests. You must also send us any samples of evidence we ask to see for some or all of your candidates, such as recordings or photographs. See sections 3.5 and 3.6.
- The samples database tells you how, and by when, to submit marks and samples: www.cambridgeinternational.org/samples. Check it before each series as we update it throughout the year.

The following are non-coursework tests that you assess:

- Cambridge IGCSE foreign language speaking tests
- Cambridge IGCSE first language speaking tests
- Cambridge IGCSE second language speaking tests
- Cambridge IGCSE English as an additional language speaking tests
- Cambridge IGCSE Bahasa Indonesia Speaking (0538/03)
- Cambridge IGCSE Food & Nutrition (0648)
- Cambridge O Level Food & Nutrition (6065)
- Cambridge International AS & A Level language speaking tests.

3.4.1 Timetabling

(a) Some non-coursework tests take place before the main exam period. You must conduct them within the timetabled period (www.cambridgeinternational.org/timetables).

(b) Once you start the non-coursework tests, all candidates must take them as soon as possible to help keep them secure. See section 3.4.6.

(c) Candidates must only take their non-coursework test once. Tests cannot be repeated during the same exam series.

(d) In speaking tests, each candidate must be tested on their own, without other candidates present. See section 3.4.9(g).

Index

3.4.2 Speaking test materials

For some components, you will receive instructions for teachers/examiners and speaking test cards based on your estimated entries. If your centre has not made estimated entries, we will send you the materials when we receive your final entries. The instructions for teachers/examiners provide instructions for the conduct and assessment of speaking tests. The speaking test cards and the instructions for teachers/examiners are for use in the speaking tests.

Follow the instructions in section 4.3 when you receive the despatch containing these materials.

3.4.3 Estimated entries

We use your estimated entries to work out how many sets of materials you will need for non-coursework tests and other exams that take place before the main exam series. If you do not make estimated entries, you may not have the materials you need to carry out the tests at the right time.* See section 2.2.

Important dates

Deadlines for estimated entries:

- June 2025 series: 10 October 2024
- November 2025 series: 10 May 2025
- June 2026 series: 10 October 2025

3.4.4 Appointing teacher-examiners

(a) You must choose a teacher-examiner to assess non-coursework tests. This would normally be a teacher from the relevant department at your centre, but could be another suitably qualified person. You can choose a teacher who has taught those particular candidates. See section A4 of 'Centre and Cambridge Associate responsibilities'.

(b) A Cambridge Associates are responsible for choosing teacher-examiners for Associate Centres.

3.4.5 Support for teacher-examiners

The School Support Hub (www.cambridgeinternational.org/support) has a range of Cambridge IGCSE speaking test handbooks.

These help you prepare for and deliver the non-coursework tests. They also have marked recordings of candidate work with examiner comments.

Practise marking with online marking workshops at www.cambridgeinternational.org/coursework-training

3.4.6 Special instructions for non-coursework tests where we send confidential materials*

(a) (i) For Cambridge IGCSE English as a Second Language (0510, 0511 and (9–1) 0991, 0993) speaking tests, you can only open the role play cards and instructions for teachers/examiners booklets one working day before the test. Once these confidential exam materials have been opened, the Head of Centre or exams officer should give the material to the head of department or teacher-examiner. Teacher-examiners must give themselves enough time to read the materials and procedures.

(ii) For all other Cambridge IGCSE speaking tests, you can open speaking test cards and instructions for teachers/examiners booklets four working days before the test. Once these confidential exam materials have been opened, the Head of Centre or exams officer should give the material to the head of department or teacher-examiner. Teacher-examiners must give themselves enough time to read the materials and procedures.

(iii) For Cambridge IGCSE and Cambridge O Level Food & Nutrition practical exams (0648 and 6065), you can open the confidential instructions at any point before the test. However, you can only open the question paper packets one working day before the tests take place.

(iv) **NEW** For Cambridge International AS Level Spanish Language (8022), Chinese Language (8238), French Language (8028) and German Language (8027) speaking tests, you can only open the Conversation task cards and instructions for teachers/examiners booklets one working day before the test. Once these confidential exam materials have been opened, the Head of Centre or exams officer should give the material to the head of department or teacher-examiner. Teacher-examiners must give themselves enough time to read the materials and procedures.

*** The following regulations do not apply to:**

- Cambridge IGCSE First Language English Speaking & Listening (0500/04, (9–1) 0990/04 and 0524/04)
- Cambridge IGCSE First Language Spanish Speaking & Listening (0502/03)
- Cambridge IGCSE Bahasa Indonesia Speaking (0538/03)
- Cambridge IGCSE Chinese as a Second Language Speaking (0523/03)
- Cambridge IGCSE Urdu as a Second Language Speaking (0539/03)
- **NEW** Cambridge International AS Level Afrikaans Language Speaking (8679/01)
- **NEW** Cambridge International AS Level Portuguese Language Speaking (8684/01) and A Level Portuguese Speaking (9718/01).

We do not send confidential materials for these speaking tests. All the materials you need for these tests are in the 2025 syllabus booklets.

(b) For all confidential materials, two members of staff must independently check they have the correct question paper packet before opening it. This includes checking the dates of the exam to make sure they are within the published window.

(c) Materials must not be removed from the centre and the information must stay confidential. When materials are not being used, put them back in your secure storage.

(d) You must store the materials securely in line with our regulations until after the speaking test period on the Cambridge timetable, even if you have completed your tests before that date.

3.4.7 Marking

(a) The teacher-examiner must award marks in line with the criteria in the mark scheme for the component. This is in the instructions for teachers/examiners booklet or the syllabus.

(b) The teacher-examiner must assess candidates during the face-to-face test, and not afterwards from a recording. During the test the teacher-examiner should fill in the marks under the separate headings on the Working Mark Sheet, Coursework Assessment Summary Form, Oral Examination Summary Form or Speaking Examination Summary Form. These are available on the samples database: www.cambridgeinternational.org/samples. Please see section 3.6.2 for how to fill in the forms.

(c) You must submit your total marks to us for all your candidates.

The samples database tells you how to submit your marks for each component. Check it before each series as we update it throughout the year: www.cambridgeinternational.org/samples

3.4.8 Internally moderating your marks

(a) We recommend you appoint only one teacher-examiner for each syllabus. However, if you are entering more than 30 candidates, you may want to use extra teacher-examiners. You must make sure that all teacher-examiners administer the test according to the syllabus. You must also conduct internal moderation of your centre's marks before you send them to us. More information on internal moderation can be found below and at www.cambridgeinternational.org/courseworkandmoderation

(b) Internal moderation makes sure all candidates have been assessed against the same standards for a particular syllabus. Each centre must select one teacher per component to act as an internal moderator. The internal moderator is usually a head of department (but can be a subject teacher who has been involved in the assessment of the tests). It is their responsibility to check that all teachers for each non-coursework test component are marking consistently to the same standard. The internal moderator may move marks for some teaching groups up or down to make sure they are consistent for the whole centre.

Contents
Introduction

2 **Section 2:** Entries
3 **Section 3:** Coursework and moderation
4 **Section 4:** Before the exams
5 **Section 5:** Exam day
6 **Section 6:** Results and certificates
7 **Section 7:** Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

(c) For each non-coursework test component, the internal moderator must make sure that a valid set of marks is produced for candidates from your centre. Record these marks on the Working Mark Sheet or Coursework Assessment Summary Form in the internally moderated mark column, and then submit these marks to us. Refer to the document Internal Moderation of Speaking Tests at Your School on the samples database for more information.

(d) If only one teacher is involved in the marking of a non-coursework test component, you do not need to internally moderate your candidates' marks before you submit them to us.

Important information

If you have candidates who are taking an A*–G syllabus, and candidates who are taking the 9–1 equivalent, you must complete a separate Coursework Assessment Summary Form or Working Mark Sheet for each group. Do not combine them onto one form. Visit the samples database to find out how to submit your marks and sample for a particular component: www.cambridgeinternational.org/samples

3.4.9 Collecting the evidence of candidate performance

(a) You need to collect evidence of candidate performance so we can moderate it. The syllabus document will tell you what we need. The samples database (www.cambridgeinternational.org/samples) will tell you how to send it to us.

(b) You need to provide your own equipment to record and save your tests.

Please see the samples database (www.cambridgeinternational.org/samples) for recording formats we accept.

(c) You must make sure that tests take place in a quiet room. There must also be a separate quiet area for candidates who are waiting or preparing for the test. There must be someone in the preparation room to supervise the candidate(s). If there is more than one candidate in the waiting/preparation room at any time, the supervisor must make sure the room is silent and candidates do not communicate with each other. Other candidates are not allowed in the area, including those who have taken the test.

Remove or cover up any display material which may help candidates in the exam room and in the waiting/preparation room.

You must display the Notice to Candidates and Candidate Warning poster both inside and outside the exam room for all tests. We recommend you print this as A2 size. You will receive copies of each poster in the pre-exam despatch and you can download them from our website at www.cambridgeinternational.org/examday

Important information

- **NEW** For Cambridge IGCSE English as a Second Language Speaking (0510/03, 0511/03 and (9–1) 0991/03, 0993/03), there is no preparation time before the test.
- **NEW** For Cambridge International AS Level Chinese Language (8238/04), Cambridge International AS Level Spanish Language (8022/04), Cambridge International AS Level French Language (8028/04) and Cambridge International AS Level German Language (8027/04) speaking tests, candidates spend five minutes preparing for the Conversation task card part of the test in the exam room with the teacher-examiner.
- You do not need to provide a separate quiet area for:
  - Cambridge IGCSE First Language English Speaking & Listening (0500/04, (9–1) 0990/04 and 0524/04)
  - Cambridge IGCSE First Language Spanish Speaking & Listening (0502/03)
  - Cambridge IGCSE Bahasa Indonesia Speaking (0538/03)
  - Cambridge IGCSE Chinese as a Second Language Speaking (0523/03)
  - Cambridge IGCSE Urdu as a Second Language Speaking (0539/03)
  - **NEW** Cambridge International AS Level Afrikaans Language Speaking (8679/01)
  - **NEW** Cambridge International AS Level Portuguese Language Speaking (8684/01) and A Level Portuguese Speaking (9718/01).

We do not send confidential materials for these speaking tests so candidates do not need any preparation time.

Index

(d) Check that you have good-quality recording equipment, for example, a digital voice recorder with a separate microphone. The test may be recorded on a mobile phone as long as it does not belong to the candidate; see section 3.4.9(b). The mobile phone should have notifications disabled, to avoid interrupting the recording. Before the test, you must check equipment for the quality of the recording in the room where the tests are being held.

(e) The teacher-examiner is responsible for making sure the recording equipment works correctly.

(f) Once a candidate's test has started you must not pause the recording.

(g) Only one teacher-examiner is allowed in the room during the test. See section A4 of 'Centre and Cambridge Associate responsibilities'.

(h) Before sending us recordings, teacher-examiners must check that all candidates have been recorded and that all recordings are audible and complete. Email us full details straight away if there are any problems (info@cambridgeinternational.org). You must not conduct the tests for any candidate for a second time.

(i) You must introduce each speaking test recording as follows:
- your (the examiner's) name
- the candidate's number
- the candidate's name
- the candidate card number (if applicable)
- the date of the test.

3.4.10 Absent candidates and not completing speaking tests

(a) Candidates who do not take the non-coursework test and who do not qualify for special consideration will not be awarded a grade in that syllabus and will receive a 'NO RESULT' outcome. See section 5.5 for more information about special consideration.

(b) Where the non-coursework test does not count towards the overall grade for the syllabus, candidates who do not attend still qualify for an overall grade but will not receive a separate score or endorsement.

(c) If a candidate does not take the non-coursework test the teacher-examiner must mark them as absent (with an 'A', not '0') when submitting marks. Do not do this if they have been given special consideration to take the test at a later date. Visit the samples database to find out how to submit your marks for a particular component: www.cambridgeinternational.org/samples

(d) On the Working Mark Sheet, Coursework Assessment Summary Form, Oral Examination Summary Form or Speaking Examination Summary Form the teacher-examiner must tick the 'absent' column.

(e) You must have a recording of each candidate's test to prove they took it. We may ask for this.

(f) If a candidate is absent for a non-coursework test and has returned to your centre, you must ask us if they can take it at another time within the test date window. Contact us by email as soon as possible, using the subject line 'Speaking test additional sitting'. This must not delay you sending us the sample and forms. This does not apply to Cambridge IGCSE First Language English Speaking & Listening (0500/04, (9–1) 0990/04 and 0524/04). If an absent candidate will be taking the test at a later date:

(i) State this on the Working Mark Sheet, Coursework Assessment Summary Form, Oral Examination Summary Form or Speaking Examination Summary Form.

(ii) Record the test in the format we specify on the samples database: www.cambridgeinternational.org/samples

(iii) Include the mark on the Working Mark Sheet, Coursework Assessment Summary Form, Oral Examination Summary Form or Speaking Examination Summary Form.

(iv) After the test, submit the recording and a copy of the Working Mark Sheet, Oral Examination, Speaking Examination or Coursework Assessment Summary Form.

(v) The samples database tells you how to submit your marks for each component. Check it before each series as we update it throughout the year: www.cambridgeinternational.org/samples

3.4.11 Not meeting our requirements

(a) We will tell you what to do if individual teacher-examiners or centres do not meet our requirements for non-coursework tests.

(b) If we believe there is a major problem, we may ask you to find another person to conduct and assess the non-coursework tests in future exam series.

3.5 Submitting marks for internally assessed coursework and non-coursework tests

You need to submit a mark for every candidate entered for an internally assessed coursework component or a non-coursework test.

- For each component that you assess, submit the final mark for each candidate. The final mark you submit for each candidate must match the total mark, or the internally moderated mark (if applicable), you record on the forms you submit with your sample. **NEW** You should keep a copy of the marks you submit for your records.
- If one teacher completes all the marking for the component, no internal moderation is needed.
- If you do not submit a mark for a candidate, they will be awarded 'NO RESULT' for the syllabus.
- Check the samples database: www.cambridgeinternational.org/samples. It tells you how to submit your marks and sample for each component. Check the samples database before each series as we update it throughout the year.

See section A24 of 'Centre and Cambridge Associate responsibilities'.

3.5.1 How to submit marks

Depending on which components you have entries for, you submit marks to us using Direct or Submit for Assessment. Before you submit your marks to us, check the samples database: www.cambridgeinternational.org/samples. It tells you how to submit your marks.

UK If you are a UK centre, see the Cambridge Handbook (UK Supplement) 2025 for information about A2C.

Submit for Assessment

1 Visit the samples database to find out how to submit your marks and sample for a particular component. For most components, you submit samples using Submit for Assessment. Make sure you can access Submit for Assessment via My Cambridge (see section 1.1.15): www.cambridgeinternational.org/my-cambridge

2 Submit your marks and upload your sample(s). There is information and an Administrative Guide available on our website: www.cambridgeinternational.org/submit-for-assessment

3 Using the information on the samples database, complete the relevant forms and upload them to Submit for Assessment.

4 Submit your sample(s) and forms.

Direct

If the samples database states that total marks should be submitted on Direct, submit your marks as soon as we have processed your entries. You must make sure you submit all your marks by the deadline in the samples database.

1 Go to your 'Dashboard' in the 'Administer Exams' section. You will see a list by syllabus of all the candidates you need to submit marks for. Submit the marks or show that the candidate was absent (with an 'A' not '0') in the boxes provided. Alternatively you can submit your marks all together using the 'Import Marks' area of Direct. See the 'Extra guidance' box on the next page.

2 Before you submit the marks, run a report to check all the marks you have entered. Click 'Download CSV' in the 'Internally Assessed Marks' tab. It is important that you do this, because once you have submitted a mark you cannot change it through Direct.

3 Once you have submitted your marks, click 'Download Internally Assessed Marks Report'. For most components, your marks automatically appear in Submit for Assessment within 24 hours of you submitting them on Direct. For some components, you will print your Internally Assessed Marks Report and include it in your sample packet when you send it to us. The samples database tells you whether you need to print and submit your Internally Assessed Marks Report to us.

A Associate Centres should submit their marks to their Cambridge Associate according to the instructions on the samples database.

Important information

Submit for Assessment and Direct will log you out if you are inactive for 20 minutes. You will lose any unsaved marks.

Extra guidance

See our online tutorial and factsheet on submitting internally assessed marks using Direct at www.cambridgeinternational.org/courseworkandmoderation

UK Internal Assessment Mark Sheets (MS1)

We no longer use Internal Assessment Mark Sheets (MS1s). You submit marks according to the instructions on the samples database: www.cambridgeinternational.org/samples. If you submit your sample to us in hardcopy, you must include a printout of your Internally Assessed Marks Report with each sample.

3.5.1.1 Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint Global Perspectives

Use Submit for Assessment to submit marks for Cambridge Primary Checkpoint and Lower Secondary Checkpoint Global Perspectives.

We include instructions about submitting work and internally assessed marks in the Administrative Guide: Using Submit for Assessment, which is available on our website: www.cambridgeinternational.org/eoguide

3.5.2 Carrying forward moderated marks

Please see section 2.5.3.

Important dates

The deadlines for sending us marks and samples of coursework and non-coursework tests are in the samples database: www.cambridgeinternational.org/samples

A Cambridge Associates should set earlier deadlines for Associate Centres to submit their marks. They should check they have the correct information and then send us the marks by the deadlines.

3.6 Submitting internally assessed coursework and non-coursework tests

You need to send us the work of some or all of your candidates, including internally assessed coursework and non-coursework tests you have marked, so that we can moderate your marks.

- Always include a copy of your marks with any hardcopy work you send us (your Internally Assessed Marks Report from Direct, see section 3.5.1), and the forms listed in the samples database.
- You must submit all the work that you have contributed to a candidate's final mark for that component.
- Before you submit samples to us, check the samples database: www.cambridgeinternational.org/samples. It tells you how to submit your marks and samples. Check the samples database before each series as we update it throughout the year.

A Cambridge Associates should work with their Associate Centres to make sure they choose the correct samples. They should set earlier deadlines for Associate Centres to send them their samples and the relevant forms. The Cambridge Associate should then send the samples and forms to us following the instructions in the samples database.

3.6.1 Which candidates should be submitted in the sample?

Use the samples database to check:

- when and how to submit your candidates' work
- how many examples of candidate work you need to submit
- which forms you need to submit with the work.

Submit for Assessment will identify the candidates to be included in the sample for components where marks are submitted on Submit for Assessment.

Find the samples database at www.cambridgeinternational.org/samples

Administrative forms
Index

3.6.2 How to fill in the forms

To show the breakdown of how you arrived at the final mark, you must complete one or more of the following (depending on the component):

- a Coursework Assessment Summary Form (CASF)
- a Working Mark Sheet (WMS)
- an Oral or Speaking Examination Summary Form (OESF or SESF).

For some components you also need to complete a marks breakdown form for each candidate. You may need to submit these forms for all candidates or only the candidates in the sample. Check the instructions on the form and the submission criteria for the specific requirements. All marks breakdown forms must be available for submission if we ask for them.

Download the interactive forms from the 'Forms to include with your sample' column of the samples database. **We recommend you complete them using Adobe Acrobat with the teacher who carried out the assessment.** When completing the forms listed above, please remember:

- Include the marks of all candidates entered for a component, not just the marks of the candidates in the sample.
- You must add up the marks correctly to give the total mark. The interactive forms on the samples database will add up the marks for you and tell you if you have exceeded the maximum.
- UK If only one teacher was involved in the assessment, enter the breakdown of marks and fill in the 'Total Mark' column. The marks in this column must match the marks you submit to us.
- If more than one teacher was involved in the assessment, you must also enter the standardised marks in the 'Internally Moderated Mark' column. The marks in this column must match the marks you submit to us.
- The samples database will tell you how to submit your marks to us. Check it before each series as we may update it throughout the year.
- If a candidate has not completed any work for the component, show that they were absent on the CASF, WMS, OESF or SESF by filling in their candidate details and ticking the 'absent' column.

Important information

If you have candidates who are taking an A*–G syllabus, and candidates who are taking the 9–1 equivalent, you must complete separate forms for each group and send them to us according to the samples database. Do not combine the candidates onto one form.

Important information

Before you submit your marks to us, check the samples database. It tells you how to submit your marks. Check the samples database before each series as we may update the information throughout the year. The samples database is available on our website: www.cambridgeinternational.org/samples

The database tells you the following:

- component, qualification and syllabus information
- how we assess the component
- how to submit materials
- how to choose samples
- who chooses samples
- deadline for marks
- deadline for samples
- forms to include with your samples.

3.6.3 How to submit the samples

What to include

Before you submit your marks and samples to us, check the samples database: www.cambridgeinternational.org/samples. It tells you how to submit your marks and sample(s).

Contents
Introduction
The Cambridge Exams Cycle
Centre and Cambridge Associate responsibilities

5 Section 5: Exam day
6 Section 6: Results and certificates
7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

When you send us your samples you must do the following:

- Include the sample specified in the samples database and all the work that you have contributed to the candidate's final mark for the component.
- Include the forms specified in the samples database. If forms are missing, incomplete or inaccurate this could delay the moderation process and the release of results.
- UK If you need to submit a report showing the component marks you have submitted for all candidates and this is not a syllabus/component that uses Submit for Assessment, you should download and print your Internally Assessed Marks Report from Direct and include it in the packet with your sample.
- If a candidate has used an access arrangement for their internally assessed coursework or non-coursework test, please fill in the Access Arrangements Cover Sheet (Exam Day – Form 4) and include this with your sample. You can download the cover sheet from: www.cambridgeinternational.org/forms

Preparing hardcopy samples

If the samples database asks you to submit hardcopy samples, follow the instructions below. Make sure each piece of work in your sample is clearly labelled with your centre number, the candidate number, the syllabus and component. We recommend you use the 'Coursework identification labels' we send in the pre-exam despatch. Download extra labels from www.cambridgeinternational.org/forms (Coursework & Moderation – Label 3).

Send written coursework in plain, thin covers. Do not use bulky ring binders. Please make sure any written coursework that is tied together is securely fastened.

NEW Do not send valuable materials, items containing organic matter, or large, bulky or fragile items. Such items will need to comply with customs regulations.

Packing and sending hardcopy samples

We send most of the materials you need to return your hardcopy samples in the pre-exam despatch.

1 Pack the samples for each component in separate script packets.

2 Attach the correct bar-coded label showing your centre number, the syllabus number and component number to the front of each packet.

3 Place the packets in a secure outer package to make sure your samples are not damaged. We do not supply the outer package. You can put a number of packets, for a variety of components, into one outer package. You can use more than one outer package.

4 Stick the coursework address label showing our address onto the outer package. You can download extra labels from www.cambridgeinternational.org/forms

5 Send your samples to the following address. Use a service with a tracking facility and keep a record of your tracking number.

Cambridge International Education
Cambridge University Press & Assessment
DC10
Hill Farm Road
Whittlesford
Cambridge CB22 4FZ
United Kingdom

6 Your samples must reach us no later than the deadlines in the samples database (www.cambridgeinternational.org/samples).

7 You must complete our Script Return Form each time you send us hardcopy samples: www.cambridgeinternational.org/script-return-form

Important information

- Before you send the work, check that you have kept the information and materials listed in section 3.6.4.
- Please pack hardcopy samples carefully. If samples are damaged this could delay the moderation process and your candidates' results.

Extra guidance

To help you submit your hardcopy samples correctly, watch our online tutorials at www.cambridgeinternational.org/courseworkandmoderation

Administrative forms

If you are preparing hardcopy samples, the labels are available from www.cambridgeinternational.org/courseworkandmoderation and www.cambridgeinternational.org/forms

- Coursework Address Labels: Coursework & Moderation – Label 2
- Coursework Identification Labels: Coursework & Moderation – Label 3

Important information

UK Do not wait to send your candidates' work at the same time as your scripts for timetabled exams.

3.6.4 Materials to keep

You must keep the following materials and information until after the enquiries about results period:

- a record of the work you sent us
- a record of the marks you submitted to us. Check the samples database before each series to see how to submit marks for a particular component
- a summary of how you internally moderated marks, if relevant
- copies of the coursework or non-coursework tests in your sample
- all the assessed coursework or non-coursework tests of all candidates not included in the sample, in case we ask you to send another sample of work
- a copy of each form. These forms are an important part of the assessment process and we may need to refer to them as part of our quality checks.

You must store the materials securely. Do not return them to candidates until after the enquiries about results period.

3.6.5 Moderation report

We send a moderation adjustment summary report for each component you have assessed. The report highlights any adjustments we have made to your candidates' marks. We send this to you in your results despatch. See section 6.1.3. We also send you a report from the moderator giving feedback on how you assessed the work. This is included in your results files on Direct.

3.6.6 Returning candidates' work

Please tell us if you would like us to return your moderated coursework samples. If you do not want us to return the work, you do not need to do anything. We do not charge for this. We do not return examined coursework components.

If you want us to return your coursework samples, send us Coursework and Moderation – Form 6, available from our website and the samples database. You must send us the form with your sample, by the deadline on the samples database. If you have already sent us the sample, email info@cambridgeinternational.org by the following deadlines:

- June 2025 series: 20 September 2025
- November 2025 series: 26 February 2026.

We will not be able to return coursework if you ask us after these deadlines. You can return the coursework to candidates as soon as you receive it. We may keep some items for research, exhibition, archive or educational purposes.

When do we return candidates' work to you?

We will return coursework that has not been subject to an enquiries about results service to you:

- between September and November for the June series
- between March and May for the November series.

If you have requested an enquiry about results for the coursework, we will not return work to you until the end of the enquiries about results appeals period.

3.7 Submitting Cambridge Global Perspectives work

3.7.1 Chk Cambridge Primary and Lower Secondary Checkpoint Global Perspectives (0838/01 and 1129/01)

You mark your candidates' Team Projects and Research Reports and upload all the work to Submit for Assessment.

3.7.2 How to submit Cambridge Global Perspectives work

Submit internally assessed marks, work and samples for all Cambridge Global Perspectives qualifications via Submit for Assessment. For detailed guidance, use the Administrative Guide: Using Submit for Assessment at www.cambridge international.org/eoguide

A Cambridge Associates should pass these instructions on to their Associate Centres.

Important dates

The deadlines for marks and samples of internally assessed coursework and non-coursework tests are in the samples database: www.cambridgeinternational.org/samples

A Cambridge Associates should set earlier deadlines for Associate Centres to submit their marks. They should check they have the correct information and then send us the marks by the deadlines.

Section 4: Before the exams

In this section

4.1 Forecast grades 82
4.2 Pre-exam and question paper despatches 83
4.3 Receiving question paper despatches 91
4.4 Storing confidential materials 94
4.5 Preparing the exam room 97
4.6 Invigilator requirements 100

4.1 UK Forecast grades

You must submit forecast grades for all your candidates.

A forecast grade is the grade the teacher expects a candidate to achieve for each syllabus they are entered for. It is not the teacher's assessment of the quality of the candidate's work during the course, or of their effort.

Where the candidate has partly completed a qualification in an earlier series (for example, a Cambridge International AS Level), the forecast grade should relate to the overall qualification, including the part already assessed.

We use forecast grades to:

- decide syllabus grade thresholds
- help adjust marks if you have applied for special consideration
- carry out checks before we release results.

If you do not submit forecast grades you will disadvantage your candidates. We cannot apply these quality assurance processes without them.

Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint

You do not need to submit forecast grades for Cambridge Primary Checkpoint and Lower Secondary Checkpoint.

The 'Administer Exams' section of Direct will ask you to submit forecast grades. You can ignore this message or submit a forecast grade of 'X' (meaning 'no forecast grade') for your candidates if you prefer.

4.1.1 How to submit forecast grades

UK You must submit forecast grades through Direct before or by the relevant deadline.

You can submit your forecast grades as soon as we have processed your entries.

After 20 minutes of inactivity you will be automatically logged out of Direct.

1 Go to your 'Dashboard' in the 'Administer Exams' section and click on the 'Forecast grades' link in the relevant series. You will see a list by syllabus of all the candidates you need to submit forecast grades for. Or you can submit your forecast grades all together using the 'Import Grades' area of Direct.

See the 'Extra guidance' box on the next page.

2 Choose the correct forecast grade for each syllabus and candidate.

3 If you cannot forecast a grade for a candidate, for example a private candidate, or an ICE or AICE group award, enter 'X' in the 'Forecast Grade' column (meaning 'no forecast grade').

4 Before you submit them, run a report to check all the grades you have entered. Click 'Download CSV' in the 'Forecast grades' tab. It is important that you do this, because once you have submitted a grade you cannot change it through Direct.

5 To change a forecast grade you have already submitted email info@cambridgeinternational.org

A Associate Centres should submit their forecast grades to their Cambridge Associate and let them know the grades are ready to approve and submit to us.

Extra guidance

View our online tutorial and factsheet on submitting forecast grades using Direct at www.cambridgeinternational.org/beforetheexams

Forecast Grade Forms

We no longer provide printed Forecast Grade Forms in your pre-exam despatch. You must submit forecast grades using Direct.

Important dates

Deadlines for submitting forecast grades:

- June series: 30 April 2025
- November series: 31 October 2025

A Cambridge Associates should set earlier deadlines for Associate Centres to submit their forecast grades. Cambridge Associates should check they have all the information and then send us the forecast grades by the deadline.

4.2 Pre-exam and question paper despatches

We send you the following despatches before the exams, depending on your entries. They contain all the materials you need.

1 **Early question papers despatch:** question papers, confidential instructions and exam materials for specific components, such as practical, project or speaking components where you need materials before the main timetable period. This is mainly based on estimated entries. However, we do send some early items using your final entries only.

2 **Entries confirmation despatch:** documents confirming your entries.

3 **Pre-exam despatch:** exam stationery, including multiple-choice answer sheets, key administrative documents, despatch labels, script packets and attendance registers.

4 **Question paper despatch:** confidential question papers.

5 **Bar-coded labels despatch:** to identify the contents of each script packet you send us.

The packaging material used in our despatch boxes is recycled paper. We encourage you to recycle the paper wherever possible.

Important information

For information and instructions about downloading confidential exam materials, such as early question papers and/or pre-release materials from the School Support Hub and/or Digital File Despatch, see sections 4.2.3 and 4.3.1.

A We send all despatches to Cambridge Associates. They are labelled for each Associate Centre. Cambridge Associates should pass the despatches to their Associate Centres according to their agreed arrangements.

Important information

For some centres in 2025, we will send your pre-exam despatch (your administrative materials) together with your question papers. If this affects you, we will email you more detailed information.

4.2.1 Dates and contents

The following tables tell you the contents of each despatch for the June and November series and when you can expect to receive them. Remember:

- Your despatch will contain everything you need based on your entries. Therefore, you may not receive everything that is listed in the tables below.
- If you make late entries, or have amended your entries, you may not receive the materials for these in your main despatch. They will arrive at a later date. Contact us if your materials have not arrived within two working days of the exam.
- We include bar-coded labels for early timetabled and non-timetabled components in your pre-exam despatch.

Early question papers

- June series: from November 2024 to March 2025
- November series: from June 2025 to September 2025

The regulations in sections 4.3 and 4.4 apply to early question papers too.

Case study for Cambridge IGCSE Enterprise (0454/01)	Give the case study to candidates straight away. When we receive your final entries, we will also make the case study available via Digital File Despatch.

UK Early question papers for speaking tests

We send these at the same time as the Early question papers despatch.

The regulations in sections 4.3 and 4.4 apply to early question papers too.

Speaking test cards for Cambridge IGCSE foreign languages and English as a Second Language Cambridge International AS Level languages (8022/04, 8238/04, **NEW** 8027/04 and 8028/04)	For teachers to use in non-coursework tests. Sent in print only.
Speaking test instructions for teachers/examiners for Cambridge IGCSE foreign languages and English as a Second Language Cambridge International AS Level languages (8022/04, 8238/04, **NEW** 8027/04 and 8028/04)	Teacher instructions for non-coursework tests. Sent in print only.

You do not need a question paper for:

- Cambridge IGCSE First Language English (0500/04, (9–1) 0990/04 and 0524/04)
- Cambridge IGCSE First Language Spanish (0502/03)
- Cambridge IGCSE Bahasa Indonesia Speaking (0538/03)
- Cambridge IGCSE Chinese as a Second Language Speaking (0523/03)
- Cambridge IGCSE Urdu as a Second Language Speaking (0539/03)
- **NEW** Cambridge International AS & A Level language speaking tests (8679/01, 8684/01 and 9718/01).

All the materials you need for these speaking tests are in the 2025 syllabus booklets, including:

- component requirements
- mark scheme
- help with administration.

Download the Working Mark Sheet from the samples database (www.cambridgeinternational.org/samples).

Confidential instructions

We send these at the same time as the Early question papers despatch.

You must store these instructions in the same way as question papers. See sections 4.3 and 4.4. You must also follow the regulations in section 5.7.1.

Confidential instructions for practical exams in science syllabuses	These instructions help the member of staff in charge of the laboratory to prepare for the exam. Sent in print only.

Entries confirmation despatch

- June series: February/March/April 2025
- November series: July/August/September 2025

Candidate statements of entry	Most countries no longer receive printed statements of entry in the entries confirmation despatch. Direct allows you to generate statements of entry. Download or print one for each candidate showing their details and syllabuses. Give the statements to the candidates and ask them to check they are correct. If your region has told us that it is critical for you to receive printed statements of entry, we will continue to send them to you. If any details are incorrect on Direct (or printed statements if you still receive them from us), follow the instructions in section 2.4.
Candidate entry list	Shows all your entries by candidate.
Centre summary of entries	Shows all your entries by syllabus and option.
Candidate entry warning list	Highlights any potential timetable clashes.

UK Pre-exam despatch

- June series: Mid-March to early May 2025
- November series: Mid-August to early October 2025

In your pre-exam despatch, there is a guide to explain what you need to do with each item. We will also send the guide in the Cambridge Exams Officer eNewsletter and you can download it from www.cambridgeinternational.org/beforetheexams

Exam stationery	
Brown paper envelope script packets	To return scripts or internally assessed samples, we provide two different-sized A4 script packets for all your components. You can choose which size envelope to use.
Continuation booklets	We send continuation booklets in your pre-exam despatch for candidates who run out of space in the answer booklets. You can print a supplementary answer booklet for any candidates who run out of space in the continuation booklet. These are available on our website www.cambridgeinternational.org/forms under 'Exam day'.
Formulae and statistics tables	Reference guides for candidates taking mathematics or statistics exams containing important formulae and tables. One table per candidate for specific exams. These are also available on our website www.cambridgeinternational.org/search/gcsearch.aspx?q=Formulae

UK Administrative forms and other materials

Notice to Candidates and Candidate Warning poster	These posters give our exam rules and regulations for candidates. Before the exam period starts, display a copy of both posters outside and inside all exam rooms. Download extra copies from www.cambridgeinternational.org/examday
Attendance registers for non-timetabled and timetabled exams	To record whether each candidate is present or absent at the start of the exam. If any of your candidates are not listed, add them to the bottom. Return the top copy with the scripts in the script packet. Keep the bottom copy for your own records.
Multiple-choice answer sheets	Pre-printed answer sheets for each candidate. Supplementary multiple-choice answer sheets are available from www.cambridgeinternational.org/examday under 'Running exams'.
Assessment forms for practical tests	For practical exams in ICT.

Pre-exam and question paper despatch • May series: From mid-March 2025 • October series: From early September 2025	
Attendance registers	To record whether each candidate is present or absent at the start of the test. If any of your candidates are not listed, add them at the bottom. Return the top copy with the scripts in the script packet. Keep the bottom copy for your own records.
Brown paper envelope script packets	Use these packets to return scripts after the tests.
Bar-coded labels	Bar-coded labels tell us what is in each script packet and allow us to track packets at every stage of the marking process. Place the scripts in the script packet then attach the relevant bar-coded label to the front of the packet. Make sure the script packet is marked with only one bar-coded label, and the barcode on the label is legible and not obstructed. Do not write anything on the bar-coded label or cover it with tape, other labels or anything that covers or damages the barcode. See section 5.4.1.
Return labels	Attach these labels to the outer packaging when you return scripts to us.
Question papers and supporting materials	Confidential question papers and supporting materials for each test component. Store the contents of this despatch securely and do not open the question paper packets.

4.2.2 Additional exam materials list

For any exam where candidates need extra materials, use our additional exam materials list (www.cambridgeinternational.org/database) to find out:

- which extra materials you need to provide
- which exam materials we provide
- whether candidates should answer directly on the question paper, on multiple-choice answer sheets or in an answer booklet we provide as an insert in the question paper.

The list also contains information about using dictionaries, and the standard materials candidates need for every exam. The 'Additional materials' section on the front covers of question papers says: 'You will need:'. This lists what the candidate needs, and includes items we provide such as an answer booklet, an insert or a map. It also includes the **extra** exam materials that you need to provide to the candidate **as well as** the standard materials that candidates need.

Calculators are **no longer** listed as extra exam materials for mathematics components. See section 5.1.7.1 for guidance about using calculators and what types of calculator can be used.

4.2.3 Early question papers and pre-release materials

UK For syllabuses that have early question papers or pre-release materials, you will receive this material in three ways:

- through Digital File Despatch
- through the School Support Hub
- in print (except for 0400/02; (9–1) 0989/02; 6090/02, 03; 9479/02; 9481/02; 0411/11, 12 and 13; and (9–1) 0994/12).

For information about how you will receive materials for each syllabus that has early question papers or pre-release materials, go to www.cambridgeinternational.org/prerelease

For Cambridge IGCSE Drama (0411 and (9–1) 0994) we will send you a printed copy of the pre-release materials with your question papers for use on exam day.

Digital File Despatch

To access early question papers and pre-release materials through Digital File Despatch, you must first submit final entries.

For instructions on how to access Digital File Despatch click 'Help' at www.cambridgeinternational.org/dfd

For more information on receiving and storing materials from Digital File Despatch, see section 4.3.1.

A If you are an exams officer for a Cambridge Associate, you will have access to Digital File Despatch but your Associate Centres will not.

You are responsible for transferring confidential materials to your Associate Centres securely, according to your local arrangements. Do not send confidential materials by email.

Early exam and pre-release materials (June 2025 and November 2025 series)

Go to www.cambridgeinternational.org/prerelease to find out which confidential materials you must access using the School Support Hub or Digital File Despatch for the June 2025 and November 2025 series. Instructions about how to access Digital File Despatch are available by clicking 'Help' at www.cambridgeinternational.org/dfd

We also include instructions in the monthly Cambridge Exams Officer eNewsletter.

4.3 Receiving question paper despatches

We send you question papers and exam materials before the exam period begins. The sooner you make your entries, the sooner your question paper despatch will arrive. A We send printed question papers and exam materials to Cambridge Associates who then share them with Associate Centres according to local arrangements.

This section explains the regulations you must follow when you receive confidential materials.

Important information

We pack question papers in blue packets. The blue packets must not be opened until the start of the exam. For additional security, the question papers are also packed in an inner transparent bag.

(a) The Head of Centre, or Cambridge Associate, is responsible for making sure an authorised and trained member of staff is available to receive question paper deliveries. This may include security staff outside of your centre's opening times. They must check the despatch but not open it. Tell us immediately using Before the Exams – Form 3 if the outer packaging is damaged or opened. You must have a procedure in place to make sure the despatch is kept securely as soon as it arrives at your centre. You must keep a record of this procedure.

It is your responsibility to pay for any outstanding customs duties, brokers' fees, local taxes, courier handling charges and other amounts payable in connection with the importation of materials. See section A15.

(b) You must check the following when a despatch arrives:

(i) that the correct centre number and address are shown on the outer box/courier packaging

(ii) that the correct number of boxes/packages have arrived

(iii) that the outer box/courier packaging is intact and there is no sign of damage, tampering or opening.

(c) The authorised person should then contact the Head of Centre or exams officer straight away. If they are not available, for example if your despatch has arrived when your centre is closed, the despatch must stay sealed and be kept secure.

(d) The Head of Centre or exams officer must then carefully check the contents. Another member of staff must watch. This person needs to understand our question paper regulations but does not need to be a senior member of staff. The Head of Centre or exams officer must choose a suitable member of staff for this task.

(e) You must check to make sure you have received blue question paper packets for all components you have made entries for. You are not checking the number of question papers. **The blue question paper packets must stay sealed until the start of the exam.** If they are damaged or open when you receive them, you must tell us immediately using Before the Exams – Form 3.

(f) You must keep a record of this check either by:

(i) ticking next to the listed materials on the despatch note, or

(ii) creating a list of all materials received in each delivery.

(g) The Head of Centre or exams officer, and the member of staff who witnessed the delivery being checked, must sign and date the records.

(h) You must keep the records until you receive certificates, and you must show us the records if we ask to see them.

(i) You must tell us immediately if there are any problems, for example if:

(i) the question papers have not arrived within two working days of the exam. **NEW** It is extremely important that you telephone us if you do not receive question paper packets within two days of the timetabled exam. Do not email us because we may not be able to deal with your query quickly enough

(ii) the delivery has the wrong centre number and address. In this case, do not open the box/outer packaging

(iii) the material does not relate to your entries

(iv) any of the question paper packets listed on the despatch note are missing

(v) the material is damaged

(vi) the seal of any question paper packet is broken, or if there is any sign of tampering

(vii) a question paper packet has been opened before the exam

(viii) a question paper packet has been opened before the exam and the transparent inner bag is also damaged.

For points (v) to (viii) take photos as evidence and send them to us with Before the Exams – Form 3. You must immediately reseal the damaged packet following the instructions in section 5.1.9.1.

For point (iv) if any of the question paper packets listed on the despatch note are missing, send us Before the Exams – Form 2 immediately.

(j) A Cambridge Associates must check the deliveries and tell us about any problems before sending materials to their Associate Centres. They are responsible for keeping all confidential materials secure and implementing local arrangements.

(k) You must keep the confidential materials secure during these checks, until you transfer them to secure storage. See section 4.4.

Administrative forms

Forms available from www.cambridgeinternational.org/forms

- Missing Question Paper Packet: Before the Exams – Form 2
- Damaged or Opened Question Paper Packet: Before the Exams – Form 3

4.3.1 Downloading and printing confidential exam materials

For any exams where you need to download confidential materials from Digital File Despatch we email you when we have uploaded your material(s), and email you again when your materials are available to download. For some exams where you need non-confidential and/or pre-release materials, these are available on the School Support Hub well in advance of the exam they relate to. You must download and print them securely. Your Head of Centre is responsible for keeping the question papers and all exam content secure. You must follow these steps when downloading confidential exam materials:

Before downloading the file:

- Prepare your secure environment. All electronic files must be downloaded and/or transferred in a secure environment (e.g. a private office) by the Head of Centre, or exams officer, in the presence of another senior member of staff.
- Prepare your password(s) and any storage devices. Electronic files must be kept secure at all times and any devices containing the electronic files must be password protected.

Before printing confidential exam material:

- Make sure you have enough paper and ink to print all the papers.
- Prepare your secure environment. Confidential materials must be printed in a secure environment (e.g. a private office) by the Head of Centre or exams officer, and another member of staff must watch. This person needs to understand our question paper regulations but does not need to be a senior member of staff. The Head of Centre or exams officer must choose a suitable member of staff. The relevant subject teacher(s) at your centre must not download or be present when files are downloaded.

When printing the question papers:

- Use international A4-size white paper (unless you are printing on coloured paper for an access arrangement).
- Question papers must be printed clearly. You must print them double-sided (using both sides of each piece of paper). Do not print question papers single-sided (using only one side of each piece of paper).
- Print with the scale set at 100%. Do not shrink or enlarge the question paper when you print it.
- If we have given you permission to print on coloured paper, we will upload a standard version of the question paper (unless you have requested extra modifications). You must then print the question paper onto the appropriate coloured paper.
- Some confidential materials contain maps and diagrams. Make sure their scale does not change during the printing process.

After printing the question papers or confidential exam material:

- Seal confidential materials in an envelope.
- Clearly label the envelope with the date of the exam, the session (AM, PM or EV), the syllabus and component.
- The present staff members should sign over the seal of the envelope and clear tape must be placed over the two signatures.
- Store the envelope securely until the exam; see section 4.4.2.

4.4 Storing confidential materials

You must store question papers securely in line with our regulations.

4.4.1 Checking confidential materials

(a) After the checks in section 4.3, move all confidential materials to your secure container. You must put the question paper packets in timetable date and session order in your secure container. This is so you can select and open the correct question paper packet at the time of the exam.

(b) Question paper packets and other confidential materials must remain unopened and in your secure storage until the time set for the relevant exam. You can open specific confidential materials in the cases below. Two members of staff must check they have the correct confidential materials before opening them. If you are not sure, contact us.

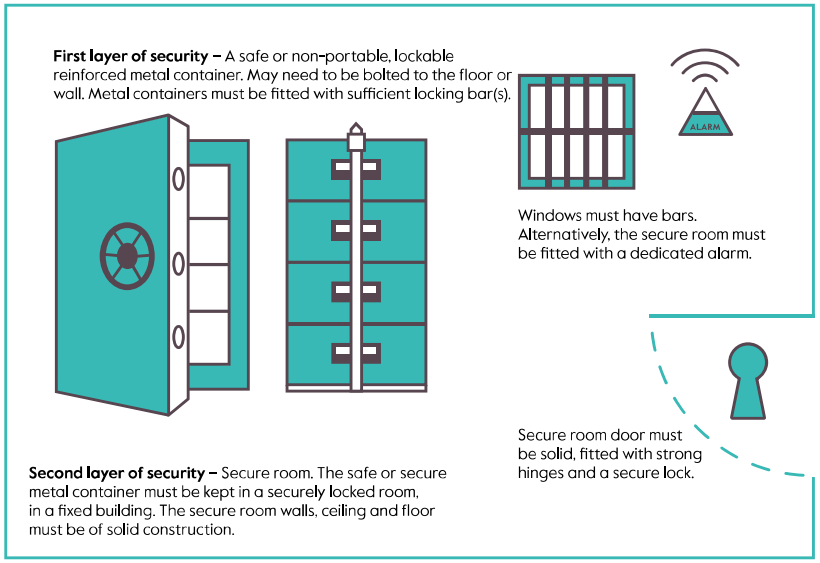
- **Confidential instructions** – You must open some confidential materials, such as instructions for practical exams, before the exam. Please refer to the Handling Confidential Materials poster for the security regulations for each type of component. This is available on our website www.cambridgeinternational.org/forms under 'Before the exams'. Keep confidential instructions secure at all times and do not remove them from the building. When they are not being used, put them back in your secure storage. Do not make copies of them. The Head of Centre is responsible for making sure these materials stay confidential and that no information about them reaches candidates. Never discuss or share the confidential instructions with another centre. Contact us or your Cambridge Associate if you have any questions.
- **Literature question paper packets** – You can open some literature question paper packets for plain text or open book exams one hour before the start of the exam to check the page references to specific editions of texts. The head of department or suitable teacher must open and check them. The Head of Centre or their deputy must watch.
- **Pre-recorded materials** – Where confidential material is pre-recorded as audio files, you must test them before the exam. See sections 5.7.2 and 5.7.5.
- **Erratum notices** – You must open erratum notices as soon as they arrive, unless we say otherwise on the envelope. Once you have read them you must store them securely until the exam.

4.4.2 Storing confidential materials

This section explains our regulations for storing confidential materials. These two layers of security must be maintained at all times.

(a) If you make entries for a component and then withdraw them all, you may still receive the question papers. If this happens, do not open them. You must store them securely until we release results.

(b) You must store exam materials and secure materials downloaded from Direct and Digital File Despatch securely until the time they are needed. You must treat digital confidential materials in exactly the same way as printed materials. If you have printed them you must store them securely with your other question papers and confidential materials. See section 4.3.1.



(c) If you have to store answer scripts before you send them to us you must seal them and store them under the same secure conditions as other confidential exam materials.

(d) If a member of staff is involved in administering an exam that is being taken by a person they have an interest in (see section 2.1.5), they must not have unaccompanied access to exam materials. This applies before the exam (for example, question papers and question paper packets) and after the exam (for example, answer scripts). If the member of staff is the exams officer, another person must be there for all administration relating to the exam. Another person must authorise any documents connected with the exam (for example, access arrangements forms) and fill in Entries – Form 1. See section 2.1.5.

You must have two layers of security to make sure your question papers and confidential materials are stored securely.

- First layer: All confidential materials must be stored in a secure container.
- Second layer: The container must be stored in a secure room.

Level 1 – Secure container
Requirement
Question papers and other confidential material must be stored unopened in their own secure container, ideally a strong safe. If a safe is not available, use a non-portable, lockable, solid metal container. If what you are using as a secure container can be easily manually moved, it must be bolted to the floor or wall. Where a metal container is used this must be fitted with sufficient locking bars to prevent the doors/drawers from being forced open. Padlocks used to secure external locking bars must be strong. The secure container must be locked at all times when exam materials are being stored there.

Extra guidance
Any external fixings that secure the container to the wall or floor must be tamperproof. One external locking bar across the middle of a tall metal container may not be enough. Any external fixings that secure the locking bars to the metal container must be tamperproof.

Level 2 – Secure room
Requirement
The secure container must be stored in a locked room in a building. The walls, ceiling and floor of the secure room must be of solid construction. The secure room must be locked at all times when not being used. The walls and ceiling must be made of brick or concrete. Partition or 'stud' walls need extra security measures. Please contact us to discuss your options. The room used to store the secure container should be a dedicated 'secure room' where only exam materials are stored. The room the secure container is in should have no internal or external windows. If this is not possible, windows must be securely fitted with metal bars, or the room must be fitted with a dedicated alarm. Secure room alarms must be on a separate circuit to the main centre alarm. The secure room alarm must be switched on at all times when there are secure materials being stored and the room is unoccupied.

7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

Level 2 – Secure room (continued)
Extra guidance
If the room has a false ceiling / ceiling tiles, you must make sure there is no access from adjacent rooms. If the secure room is also used for other purposes (e.g. an office) you must make sure that access to the room meets our regulations. There is more information below on who can have a key to the secure room. You must consider extra improvements to make sure that no unauthorised access can be gained to your secure container (for example, by installing a metal cage around the container). If your secure room has windows that require bars, fit these on the inside, rather than the outside, of the windows. Where outside bars are used, you must make sure the bar fixings are tamperproof. Where you have a dedicated secure room alarm you must have a process in place to respond quickly if it is activated.
Requirement
The door to the secure room must be solid, not hollow, and must be fitted with strong tamperproof hinges. Any glass panels in the door must be fitted with metal security bars, or the secure room must be fitted with an alarm system. Please see above for alarm requirements. The secure room door must be fitted with a secure locking mechanism; multiple strong locks are preferable. The secure room must be locked at all times when secure material is being stored and the room is unoccupied.
Extra guidance
If the hinges on your secure room door are on the outside of the room, you must make sure that they are tamperproof.

Requirement
A minimum of two and maximum of three authorised people must be key holders. For example, the Head of Centre, the exams officer and another member of staff. Key holders do not need to be senior members of staff but must have a clear understanding of our question paper regulations. The Head of Centre or exams officer can nominate an appropriate member of staff to be a key holder. Each key holder should be able to access the exam materials independently, in case other key holders are not available for unexpected reasons. The Head of Centre may require the responsibilities for key holding to be temporarily delegated to another suitably trained person. This may be required to cover sickness or other absences and should be appropriately recorded by the centre. Only authorised key holders can access the secure room. Where this is not possible (for example, where an office is used) anyone going into the room must be supervised by an authorised key holder at all times. Access to the secure container must be limited to authorised key holders only. Keys and any access codes to the secure room and secure container must be kept with the key holder at all times. If this is not possible, they must be kept in a separate locked place, ideally another metal key safe.
Extra guidance
Do not label the secure room with any signs that show it is a secure room. Having video surveillance (for example CCTV) on the inside or outside of the secure storage facilities is permitted. However, where you do have video surveillance, this cannot replace or substitute any of the required aspects of secure storage detailed in section 4.4.2 of this handbook. You must make sure that any installation or use of video surveillance complies with local or national laws.

Tell us immediately if the security of the question papers or confidential materials is put at risk by fire, theft, loss, damage, unauthorised disclosure or any other circumstances.

A Cambridge Associates are responsible for making sure their Associate Centres maintain the security of question papers and confidential materials.

4.4.3 Chk Storing confidential materials for Cambridge Primary Checkpoint and Lower Secondary Checkpoint as part of the Cambridge Primary programme

If your centre is registered and approved to offer Cambridge Primary Checkpoint and/or Lower Secondary Checkpoint only, the minimum requirement is to meet one of the two security layers detailed in section 4.4.2.

Extra guidance

Find support at www.cambridgeinternational.org/beforetheexams

- Our 'How to receive, check and store confidential materials' video explains what you need to do when your question papers arrive. It shows examples of storage facilities so you can check that your secure container and room meet our regulations.
- Our 'Secure storage' video shows examples of storage facilities so you can check that your secure container and room meet our regulations.
- Our Handling Confidential Materials poster explains the security regulations for each type of component. The information on this poster may not reflect local arrangements between Cambridge Associates and their Associate Centres. This poster is available from www.cambridgeinternational.org/forms

If you need advice on security arrangements, please contact us: info@cambridgeinternational.org

A Associate Centres should contact their Cambridge Associate.

4.5 Preparing the exam room

You must follow these regulations when you prepare the exam room. This includes exam rooms for practical exams, e.g. art & design.

4.5.1 Exam venue

All candidates must take the exam at the centre unless you have our permission for them to take the exam somewhere else. See section 2.6.

4.5.2 Exam room

(a) Exam rooms must be suitable for candidates. Think about access, heating, ventilation, lighting and outside noise.

(b) The conditions for practical exams must give all candidates the opportunity to finish their tasks and show their true level of knowledge in the subject.

(c) You must clearly display to all candidates:

- the centre number
- the date
- the start and finish time of each exam
- the syllabus name and number, and component code of each exam.

NEW You must make sure all candidates can read this information. You may need to display this information in multiple places.

(d) You must have a printed copy of sections 4 and 5, and the 'Key Times and Full Centre Supervision' section, of this handbook in each exam room. An electronic copy is not acceptable. We have produced an abridged version of sections 4 and 5 for centres to print out, which is available from www.cambridgeinternational.org/eoguide

4.5.2.1 Clock

All candidates in the exam room must be able to directly see a reliable clock. If you need several clocks in large rooms, they must all show exactly the same time.

All clocks must show the actual time. For candidates using a computer, checks must be made to make sure that the time is correct on each computer.

4.5.2.2 UK Notice to Candidates and Candidate Warning poster

You must display the Notice to Candidates and Candidate Warning poster both inside and outside the exam room for all exams, including speaking & listening tests. We recommend you print the posters as close to 42.0 × 59.4 cm as possible. We will send you copies of each poster in the pre-exam despatch and you can download them from our website at www.cambridgeinternational.org/examday

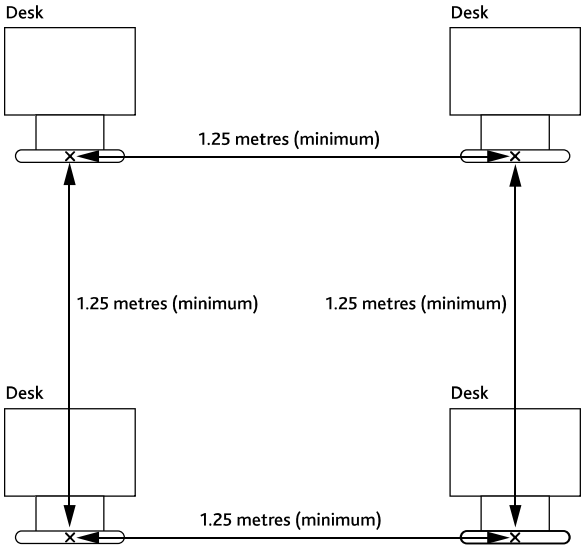
Administrative forms
Index

4.5.2.3 Display material



Never display material that might help or distract candidates in the exam room (for example, maps, diagrams, wall charts). You must take extra care with exams in laboratories or libraries.

4.5.3 Seating arrangements

4.5.3.1 Distance between candidates

Maximising the distance between candidates' desks is essential to help prevent malpractice in the exam.

The minimum distance in all directions from the centre of one candidate's chair to the centre of another's must be 1.25 metres (see below). The candidate's chair must be pulled out from under the desk, as though a candidate were sitting in the chair, when this measurement is made.

Use the exam room space to its full potential to achieve greater distances where possible. We recommend a distance of 2 metres in all directions from the centre of one candidate's chair to the centre of another, where it can be achieved. Inspectors will expect to see you using your space in the most effective way.

For multiple-choice papers, if desks are spaced 1.25 metres apart candidates may still be able to see others' work, whether they mean to or not. If this is the case the exams officer could:

- increase the space between desks
- alternate rows of candidates taking different exams
- use extra invigilators.

Where candidates take an exam in a language laboratory, the minimum distance in all directions from the centre of one candidate's chair to the centre of another's must be 1.25 metres. If you cannot do this you must use screened booths instead. These may restrict invigilators' view of candidates so you will need to use more invigilators.

Where candidates sit an exam in a computer laboratory, the minimum distance between the outer edge of one monitor to the other should be 1.25 metres. If you cannot do this, candidates must sit at alternate monitors or in screened booths. These may restrict invigilators' view of candidates so you will need to use more invigilators.

You can contact us or your Cambridge Associate for advice.

4.5.3.2 Written exams

(a) All candidates must face in the same direction.

(b) They must sit in candidate number order, with candidate numbers or index numbers on each desk, except where variation is needed to support candidates with access arrangements.

(c) Each candidate must have their own desk or table large enough for question papers, maps, equipment and materials for practical exams, and answer booklets/paper.

(d) Ideally do not use desks with shelves in exams. Candidates could use these shelves to store notes or other unauthorised items. If no other desks are available, invigilators must check the shelves before the exam, and must make sure candidates do not place anything on them during the exam. You could appoint extra invigilators to monitor this.

Index

(e) Candidates who are working on a drawing board set on an easel or another non-horizontal surface should sit in an inward-facing circle or similar if possible.

(f) You may hold other exams in the room at the same time, as long as candidates are not disturbed. We will not consider applications for special consideration on the basis that candidates were disturbed by the administration of another exam in the room.

4.5.3.3 Candidates with a contagious disease

(a) If a candidate has a contagious disease, decide whether they are fit to take the exam and whether it is safe to have an invigilator in a separate room with them. If they take the exam, all exam regulations must be followed in the separate room. See sections A4 and A5 of 'Centre and Cambridge Associate responsibilities'.

(b) After the exam you must photocopy the candidate's script and return this photocopy with the other candidates' scripts as normal. Seal the original script in a transparent file with a visible note explaining the situation. Store the original script securely and contact us for advice, or visit www.cambridgeinternational.org/help and type 'soiled scripts' into the search box.

4.5.3.4 Seating plan

You must produce a seating plan **before each exam**. It must show the position of each table and chair, and where each candidate will sit. It must also show the position of the invigilator's desk and the direction the candidates will face.

You must check and, if necessary, update your seating plan during each exam.

You must keep a signed record of each seating plan. We may ask to see your seating plans at any time until you receive certificates. See section 5.1.5 for more information about seating plans and an example of a seating plan.

Extra guidance

Use the first section of our Exam Day Checklist to make sure you are ready for the exams ahead and your preparations meet our regulations. Download the checklist from www.cambridgeinternational.org/examday

4.6 Invigilator requirements

(a) Invigilators are the people in the exam room responsible for the conduct of an exam. They:

- make sure the exam follows our regulations so that candidates have the opportunity to show what they know and can do
- keep the exam secure before, during and afterwards
- prevent and report suspected malpractice
- prevent administrative errors.

(b) The Head of Centre must use trained and experienced adults as invigilators. The Head of Centre must decide who is suitable.

(c) The Head of Centre **must** make sure that all invigilators know what is expected of them and are fully briefed and trained. You must keep a record of this training until you receive certificates.

(d) You must have a copy of sections 4 and 5, and the 'Key Times and Full Centre Supervision' section, of this handbook in each exam room. We have produced an abridged version of sections 4 and 5 for centres to print out, which is available from www.cambridgeinternational.org/eoguide

(e) Invigilators must:

- understand the regulations in sections 4 and 5 of this Cambridge Handbook
- understand our Key Times and Full Centre Supervision regulations; see the 'Key Times and Full Centre Supervision' section
- be familiar with the Notice to Candidates and Candidate Warning poster
- understand any specific regulations relating to the subjects being examined
- give their full attention to the conduct of the exam and move around the room
- tell the Head of Centre if they suspect malpractice; see section 5.6.

(f) Invigilators must not do any other task not related to the exam (for example, marking) in the exam room.

(g) Apart from one device to ask for help, invigilators must not have access to any other form of communication while in the exam room.

(h) You must keep signed records of the following:

- invigilator training records
- invigilators or supervisors used for each exam or period of Full Centre Supervision
- actual start and finish times of your exams
- start and finish times of any periods of Full Centre Supervision
- any changes to invigilators during each exam or period of Full Centre Supervision.

We may ask to see these records at any time until you receive certificates.

(i) **Invigilator numbers**

(i) You must have at least one invigilator for every 30 candidates. All candidates in the exam room must be visible to one or more invigilators at all times.

(ii) Invigilators must be able to ask for help easily, without leaving the exam room or disturbing candidates. Invigilators can have a mobile phone in the exam room for this purpose only. They must keep the phone on silent mode and away from candidates.

(iii) A teacher who has prepared the candidates for the exam must not be the only invigilator at any time. You must make sure appropriate invigilators are available to take any candidates to the washroom, if needed. Where there is one invigilator, you must make sure they can contact an appropriate member of staff without leaving the exam room or disturbing candidates.

(iv) For practical tests, you must have at least two invigilators in each room at all times. The ratio of invigilators to candidates in the exam room must not drop below 1 to 20 at any point during the exam. At least one invigilator should be a subject specialist.

For practical tests for the following syllabuses, see section 5.7.4:

- Cambridge IGCSE ICT (0417) and (9–1) 0983
- Cambridge International AS & A Level Information Technology (9626)
- Cambridge International AS & A Level Computer Science (9618).

For all our art & design syllabuses, you must have at least one invigilator for every 30 candidates.

(v) For practical exams where we require a supervisor, the supervisor must not be counted as an invigilator.

(vi) For listening exams, a member of staff who understands the language of the test should be there to deal with any technical problems. Do not count them as an invigilator.

(vii) In exams where questions or passages must be read to candidates, an invigilator must be there as well as the reader.

(viii) You can change invigilators during an exam, as long as the number of invigilators in the room does not fall below the required number. You must keep a record of any invigilator changes during the exam.

(ix) Invigilators can be supervisors for Full Centre Supervision.

(j) **Invigilator suitability**

(i) The Head of Centre cannot let anyone who has an interest in a candidate invigilate an exam by themselves. If the Head of Centre decides to use a candidate's parents/guardians/carers or relatives, they must send us Entries – Form 1 before the exams. See section 2.1.5.

(ii) A reader, scribe or practical assistant cannot also be an invigilator for the same exam.

Extra guidance

You are responsible for training your invigilators before the exam, even if they are experienced. Download our training presentation 'Invigilating Cambridge exams' from www.cambridgeinternational.org/training-invigilators. You can adapt it to train your invigilators or simply read it to refresh your own memory.

Section 5: Exam day

In this section

5.1 At the beginning of the exam 102
5.2 During the exam 110
5.3 At the end of the exam 112
5.4 Packing and sending scripts 113
5.5 Special consideration 117
5.6 Malpractice 121
5.7 Special instructions for particular exams 125

5.1 UK At the beginning of the exam

Candidates must take their exams in the correct timetabled session. You must schedule exams within the appropriate timetable session in compliance with the relevant Key Time. See the 'Key Times and Full Centre Supervision' section and section 1.2.2.

If you cannot meet these requirements you must apply for a timetable deviation. See section 1.2.3.

You are responsible for giving candidates their exam times.

Extra guidance

We offer free training to all exams officers which focuses on our regulations and how to administer exams. This is available via the Online Learning Area: www.cambridgeinternational.org/learningarea. See the Cambridge Exams Officer eNewsletter and section 1.1.14 of this handbook for more information. We have a range of support for exams officers before and during exams, including online video tutorials, invigilator training materials and 'how to' guides at:

- www.cambridgeinternational.org/beforetheexams
- www.cambridgeinternational.org/examday

We also have a video to help students understand what to expect on exam day. The video is in the 'Exam administration' section of our website at www.cambridgeinternational.org/what-to-expect-on-exams-day

5.1.1 Identifying candidates

The Head of Centre must make sure invigilators can check each candidate's identity. Identity checks must be respectful of religious customs and comply with relevant local laws.

Private candidates your centre does not know must prove their identity, for example with an ID photocard or passport. Each time they attend a session you must check that they are the same person who was entered for the exam. Identity checks must not disturb any candidates who are already taking their exam.

5.1.2 Candidate numbers

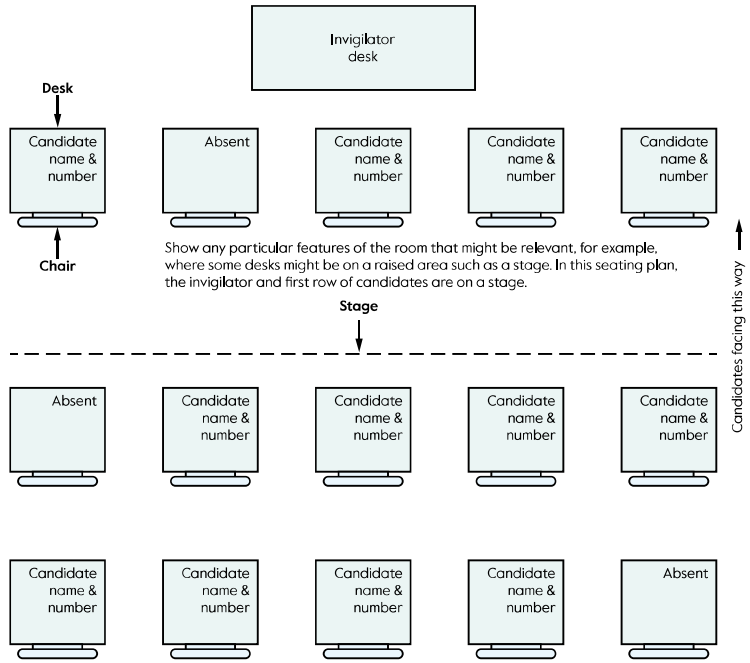
You must give all candidates their centre number and candidate number before the exam. You must also clearly display each candidate's number or index number on their exam desk.

5.1.3 Attendance registers

The attendance register records all the candidates registered to take each exam. We send you pre-printed attendance registers before the exams.

Use them to record whether the candidates listed are present or absent. If you do not receive the attendance register for an exam, use the supplementary attendance register, which is available to download and print from our website (www.cambridgeinternational.org/forms). Follow the instructions for returning attendance registers in section 5.4.1. If you have candidate(s) taking an exam in a separate exam room at your centre or at a different venue, do not send us a separate attendance register. Mark them as 'present' on the main attendance register and return their scripts in the same packet as the other candidates taking the exam.

If you do not fill in the attendance registers properly this can delay candidates' results.



Keep a copy of all completed attendance registers and store them securely. We may ask to see them at any time until you receive certificates.

Extra guidance

Watch our video for guidance on completing attendance registers at www.cambridgeinternational.org/examday

Example seating plan

Show the direction candidates are facing by including position of chairs or an arrow.
Show where candidates are sitting by marking names and candidate numbers on each desk.

5.1.4 Additional exam rooms

If you are unable to fit all the candidates sitting a certain component into one exam room, you can use one or more additional exam rooms. You do not need to tell us. You must set up any additional exam rooms in the same way as your main exam room. See sections 5.1.5, 5.1.9 and 5.3.1(f) for further information.

5.1.5 Seating plan

Before each exam, you must produce a seating plan to show how the exam room is set up. It shows the position of each table and chair, and where each candidate sat.

Contents
Introduction

3 Section 3: Coursework and moderation
4 Section 4: Before the exams
5 Section 5: Exam day
6 Section 6: Results and certificates
7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

It must also show the position of the invigilator's desk and the direction the candidates faced. During each exam, you must check your seating plan is accurate and update it if necessary. Seating plans must not be produced after the exam has finished.

You must keep signed records of the seating plan for each exam session. We may ask to see the seating plan and invigilation records at any time until you receive certificates.

5.1.6 Unauthorised entries

If a candidate arrives for an exam they have not been entered for, they can take the exam as long as:

- they can take all the components needed for the syllabus option. This means you must have enough spare question papers so the candidate can sit all the components at the right time, not just the specific exam. You must not photocopy question papers. If you do not have enough spare question papers, you should not allow the candidate to sit the exam
- you add them to the attendance register for each component they take. Once they have finished all the components for the entry, send Exam Day – Form 12 to us or to your Cambridge Associate straight away
- you can identify the candidate; see section 5.1.1.

We will then mark the candidate's scripts, enter them for the entry option and give a grade. We will charge a very late entry fee. See section 2.4.

See the fees list in the 'My Messages' section of Direct. **NEW** If you are a Cambridge Early Years Centre or Cambridge International School – registered as online, we send the fees list to you.

It may not be possible for us to release results for these entries at the same time as other results.

If we find any candidates who have not been entered for a syllabus but who have enough marks to make up a valid entry option, we will enter the candidates for you. We will charge very late entry fees, as described above.

If the candidate did not take enough syllabus components to make a valid entry option we will not enter them for that syllabus. However, we may send you an invoice to cover the administrative and marking costs.

Administrative forms

Forms available from www.cambridgeinternational.org/forms

- Supplementary Multiple-Choice Answer Sheet: Exam Day – Form 2a
- Reporting an Unauthorised Entry: Exam Day – Form 12
- Supplementary Answer Booklet: Exam Day – Form 13

5.1.7 Stationery, materials and other equipment

We update our additional exam materials list before each series. For components where candidates need extra materials, use the list (www.cambridgeinternational.org/database) to check:

- which extra materials you need to provide
- which exam materials we provide
- whether candidates should answer directly on the question paper, on multiple-choice answer sheets or in an answer booklet we provide as an insert in the question paper.

The 'Additional materials' section on the front covers of question papers says: 'You will need:'. This lists what the candidate needs, and includes items we provide such as an answer booklet, an insert or a map. It also includes the **extra** exam materials that you need to provide to the candidate **as well as** the standard materials that candidates need. **NEW** It is your responsibility to make sure all texts and materials you provide to candidates are lawfully acquired and used in accordance with the relevant intellectual property laws.

Calculators are **no longer** listed as extra exam materials for the mathematics components. See section 5.1.7.1 for guidance about using calculators and what types of calculator can be used.

We send continuation booklets in your pre-exam despatch for candidates who run out of space in the answer booklets. You can print a supplementary answer booklet for any candidates who run out of space in the continuation booklet. These are available on our website. Where we have not provided continuation booklets, give your candidates additional sheets of A4 lined paper if needed.

5 **Section 5:** Exam day
6 **Section 6:** Results and certificates
7 **Section 7:** Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

The invigilator must only give specified items to candidates.

For multiple-choice tests we provide individual pre-printed answer sheets for each candidate. The invigilator must make sure that each answer sheet is given to the correct candidate and that it is for the right subject and component. If you do not receive these in time for the exam, electronic copies of supplementary multiple-choice answer sheets are available to download and print from our website. For modern foreign language exams there are different answer sheets for different syllabuses. See www.cambridgeinternational.org/multiple-choice

Candidates must:

- provide their own pens, pencils, ink, drawing instruments (including rulers) and erasers
- write their answers clearly in permanent, non-erasable black or dark blue ink
- use soft pencils (type B or HB) for multiple-choice tests
- only use pencils or pens in other colours for diagrams and maps if the question paper says they can.

During the exam candidates must not use:

- red or green ink
- correction fluid or correction tape
- highlighter pens on answer sheets, answer booklets or in the answer sections of combined question and answer booklets.

Candidates may use highlighter pens on question papers or question sections of combined question and answer booklets.

5.1.7.1 Calculators

Unless the syllabus or the front of the question paper say candidates cannot use calculators, candidates can use a calculator if they want to.

See page 2 of the additional exam materials list (www.cambridgeinternational.org/database) for a list of mathematics components where calculators are **not** allowed.

Invigilators should check a sample of the candidates' calculators before the start of the exam to make sure they meet the regulations below.

For exams where calculators are allowed, you must tell candidates the following:

(a) The size of the calculator must be suitable for an exam.

(b) The candidate is responsible for the calculator's power supply and it must be built into the calculator. They can bring a spare set of batteries into the exam in transparent packaging.

(c) The candidate is responsible for making sure the calculator works.

(d) The calculator must be silent, with a visual display only.

(e) We will not give the candidate special consideration for a calculator fault.

(f) Candidates must not have calculator cases (unless they cannot be removed), instruction leaflets or any instructions or formulae printed on the lid or cover of a calculator, or similar. An invigilator should check any cover or case that the candidate cannot remove to make sure it does not contain any unauthorised information.

(g) Candidates must not borrow calculators from other candidates during the exam for any reason. However, the invigilator can provide a replacement calculator if the centre has one.

(h) Candidates must clear any information and/or programs stored in the calculator's memory before and after the exam. Retrieving prepared information and/or programs during the exam, or removing question paper content from the exam room, is malpractice.

(i) Candidates can use programmable calculators. However, we do not allow calculators with any of the following facilities, unless the syllabus says otherwise:

- graphic display
- data banks
- dictionaries
- language translators
- retrieval or manipulation of text or formulae
- QWERTY keyboards
- built-in symbolic algebraic functions (output must be numeric not algebraic)

A to Z of terms
Administrative forms
Index

- symbolic differentiation or integration (output must be numeric not algebraic)
- remote communication.

Using any of these is malpractice. We do not recommend any particular brand of calculator.

5.1.7.2 Dictionaries

We do not allow electronic dictionaries in any exam. This includes tablets and e-readers.

Cambridge O Level and Cambridge International AS & A Level

We do not allow dictionaries unless the syllabus says candidates can use them.

Cambridge IGCSE and Cambridge IGCSE (9–1)

We allow simple translation dictionaries, except in language exams or where the syllabus says candidates cannot use them. 'Simple translation dictionary' means a dictionary that only translates the word and not the meaning or definition of the word.

Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint

We allow simple translation dictionaries in science and mathematics tests. We do not allow them in English and English as a second language tests.

5.1.7.3 Science papers

(a) Candidates must have the following materials in all science papers:

- ruler (300 mm)
- protractor.

We do not list them on science question papers.

(b) You can give candidates graph paper if they ask for it.

(c) Candidates can use calculators in all science papers.

5.1.7.4 Mathematical tables

Candidates can only use mathematical or statistical tables that the syllabus allows or that are included in the 'Additional materials' section of the question paper. Candidates must have them for the whole exam.

5.1.7.5 Geography papers

Where a map is part of a question paper, candidates can use string and/or a magnifying glass if they want to.

5.1.8 Authorised and unauthorised materials

5.1.8.1 Authorised materials

(a) In addition to stationery, materials and equipment in section 5.1.7, candidates can only take materials into the exam room if the instructions on the question paper, in the additional exam materials list or in the syllabus booklet say they are allowed.

(b) The Head of Centre can decide whether to allow candidates to bring food and drink into the exam room. If they decide to allow this they must make sure candidates follow our regulations on packaging and labelling (see below) and that other candidates are not disturbed.

(c) The Head of Centre can decide whether to allow candidates to bring standard wrist watches into the exam room. If you allow this, invigilators must make sure candidates place the watches on their desk and that invigilators can see them.

5.1.8.2 Unauthorised materials

(a) Unauthorised materials are those that potentially enable or assist candidates to compromise the integrity of the assessment by:

- concealing information that may be relevant to the assessment
- sharing information about the assessment
- accessing information that may be relevant to the assessment.

NEW Unauthorised materials also include those that put the health and safety of others at risk. The following are examples of unauthorised materials:

- electronic devices with data storage and/or communication capabilities by any method. For example, mobile phones, cameras, e-readers, Bluetooth headsets, tablet or laptop computers and 'smart wear' such as smart glasses and smart watches
- revision notes of any kind
- calculator cases
- non-transparent pencil cases

A to Z of terms
Administrative forms
Index

- any packaging with images or text on it (candidates should put food or drink in plain packaging)
- **NEW** weapons of any kind.

This list does not include every possible item.

Use your judgement by asking yourself whether the item potentially allows a candidate to hide or access information in the exam room or areas accessed by a candidate during an exam, including washrooms.

(b) Candidates must switch off all electronic devices and leave them outside the exam room. They must leave other types of unauthorised material outside the exam room or give them to the invigilator before the exam begins. Invigilators must put the materials where candidates cannot see or reach them.

(c) You and your invigilators must be alert to candidates attempting to bring unauthorised materials into the exam room and must report all instances to us.

(d) Having unauthorised materials in the exam room is a breach of our regulations and you must inform us using the relevant suspected malpractice form. See section 5.6 for further details.

(e) You must contact us if candidates need medical monitoring devices in the exam room.

Important information

The invigilator must report any problems with question paper security or exam conduct to the Head of Centre. The Head of Centre or Cambridge Associate must tell us about this straight away.

5.1.9 Starting the exam

An exam is in progress from the time the candidates enter the room until all the scripts have been collected.

- You must collect the blue question paper packets from the secure storage as close to the start of the exam as possible. Once these have been removed from secure storage they must not be left unattended at any time.
- When the candidates are seated, two members of staff must check they have **the correct blue question paper packet before opening it**.
- Before opening the packet, two staff members must check it is undamaged. They must also check the details on the label are correct. This includes checking the centre number, exam date, session, subject title, syllabus and component number are correct.
- When the blue question paper packet is opened, the front cover of the question paper will be visible through the transparent inner bag. Two members of staff must check again that the subject and component are correct. They should also check to make sure that the inner packet has not been opened and is undamaged before opening it.
- When these checks have been completed, the inner transparent bag can be opened and the question papers handed out to the candidates.
- If you find you do not have enough question papers, you must contact us immediately. If this is due to unauthorised entries and you do not have enough question papers, you should not allow the additional candidates to sit the exam. You must not photocopy, photograph or share any of the contents of the confidential exam material to make copies. This may be considered centre staff malpractice.
- If you have more than one room of candidates or a large number of candidates it may be easier to place the question papers facing upwards on the desks before the candidates enter the room. If you do this, do not leave question papers unattended at any time. You must make sure that candidates do not open the question paper until the invigilator says they can do this (see section 4.6).
- You must read out a set of instructions before candidates are allowed to start working. The instructions are in our What to Say to Candidates in an Exam document. You can download it from www.cambridgeinternational.org/examday. If you use your own script instead you must include the content of our document. You must read out all instructions in English. You can then repeat them in another language as long as the content and meaning are exactly the same.

Administrative forms
Index

- Tell candidates to write their name, candidate number and centre number on any work they want to hand in. For listening tests, make sure candidates are given time to do this before the invigilator plays the audio file.
- You must tell candidates about any erratum notices.
- Unauthorised people who do not have a designated role in running the exam must not enter the exam room and must not have access to confidential materials in the exam room.

5.1.9.1 Opening the wrong question paper packet

If you open the wrong blue question paper packet by mistake, do not open the transparent inner bag and do not give the question papers to the candidates. Tell your Head of Centre and send us Exam Day – Form 11 straight away.

The Head of Centre must watch while you do the following:

- Do not reseal the blue packet. Take photographs of it.
- Put the opened blue packet in a large envelope.
- Write 'question papers', the syllabus and component code, and the date and time of the exam on the envelope.
- Seal the envelope.
- You must both sign over the seal to show you have witnessed the packet being resealed.
- Put a clear piece of tape over your signatures to protect them. Do not use masking tape.
- Take a photograph of the signatures and the new seal.
- Return the sealed envelope to secure storage.

On the form you must explain:

- why and how the packet was opened
- who opened it and when they opened it
- who has had access to the packet since it has been opened
- who has had access to the question paper since it has been opened.

Candidates may need Full Centre Supervision while you do this. You can then start the correct exam.

If you open the wrong blue question paper packet by mistake and then also open the transparent inner bag, you must follow the steps above.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Question Paper Packet Opened in Error: Exam Day – Form 11

5.1.10 Late arrivals

A candidate is a 'late arrival' if they arrive after one or both of the options below:

- after an exam has started
- after a period of Full Centre Supervision has started.

5.1.10.1 Candidate arrives late but before the Key Time

(a) You can decide whether to allow the candidate to take the exam. If they take it allow the full time.

(b) If the exam has already finished and other candidates who have taken the exam are under Full Centre Supervision, do not allow the late candidate to communicate with them.

(c) If you allow the candidate to take the exam you must follow our regulations in this section.

(d) If you do not allow the candidate to take the exam mark them as absent on the attendance register.

(e) You do not need to tell us about this late arrival.

5.1.10.2 Candidate arrives late, after the Key Time but during the exam or a period of Full Centre Supervision

(a) If the exam is still in progress, you can decide whether to allow the candidate to take the exam. If they take it allow the full time.

(b) If a candidate arrives late for a period of Full Centre Supervision before an exam, but it is after the Key Time, you can decide whether to allow them to take the exam. Do not allow them to communicate with candidates already under Full Centre Supervision. You must supervise the late candidate separately in line with our regulations. See the 'Key Times and Full Centre Supervision' section.

Administrative forms
Index

(c) If you allow the candidate to take the exam you must follow our regulations in this section.

(d) If the candidate arrives after the Key Time and you allow them to take the exam you must tell them that:

- you are reporting their late arrival to us (as in section 5.1.10.2(e))
- we will mark their answer script
- we may not accept their script however, and they may get 'NO RESULT' in the syllabus.

If you allow the candidate to take the exam you must report this to us on the same day.

(e) To report the late arrival email Exam Day – Form 3 to info@cambridgeinternational.org. Include your centre number and 'Late Arrival' in the subject line. If you do not do this it may be malpractice. See section 5.6.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Late Arrivals: Exam Day – Form 3

5.1.10.3 Candidate arrives late, after the Key Time, after the exam has finished

(a) Do not allow the candidate to take the exam. Mark the candidate as absent on the attendance register.

(b) You do not need to tell us about this late arrival.

5.1.10.4 Candidate arrives late for a timetabled listening exam

Follow the relevant regulations in sections 5.1.10.1 to 5.1.10.3. If you decide to allow the candidate to sit the exam you must also do one of the following:

- Keep the candidate under Full Centre Supervision until the other candidates have finished the exam and left the room. Do not allow the late candidate to communicate with other candidates who have already taken the exam or who are under Full Centre Supervision. You must supervise the late candidate separately in line with our regulations. Please see the 'Key Times and Full Centre Supervision' section. You can then start the audio file from the beginning for the late candidate.
- If you have a spare audio file for the exam, the candidate can take the exam in a separate room with a separate invigilator. This room must meet our regulations in section 4.5.

5.1.10.5 Candidate arrives late for an assessment where we do not apply Key Time regulations (windowed exams) within the exam window

(a) You do not need to report late arrivals for windowed exams to us.

(b) You can decide whether to allow the late candidate to take the assessment or mark them as absent.

(c) For windowed speaking tests, if you allow the candidate to take the test, you must also follow the regulations in section 3.4.9.

Important information

If a candidate is not present at the start of an exam, you may want to contact their parents/guardians/carers to see if the candidate can attend. If they can, ask the parents/guardians/carers to supervise the candidate at all times. They must not communicate with anyone until a member of centre staff meets them.

Index

5.2 During the exam

5.2.1 Supervising the candidates

Invigilators must supervise the candidates throughout the whole exam and give full attention to this at all times. They must not read through any question papers. See section 4.6.

5.2.2 Practical exams

During a practical exam, candidates may need to move around and invigilators may need to tell them what to do. **NEW** Invigilators must limit this to what is essential and must not help or assist candidates with answers.

5.2.3 Leaving the room while the exam is in progress

If candidates need to use the washroom during the exam, they must be accompanied by a member of staff. This can be an invigilator as long as the ratio of invigilators to candidates is maintained.

If this happens during a timetabled listening component, you can allow the candidate to listen to the material they have missed after the other candidates have left. The candidate can only hear the material the same number of times as the other candidates.

If a candidate has finished their exam early and wants to leave the exam room and not return, the following regulations apply:

- Before any candidate leaves the exam room, you must collect their answer script and question paper. See section 5.3.1.
- Candidates can be allowed to leave the exam room but must be kept under Full Centre Supervision until the Key Time has passed. See section 5.3.2.
- After the Key Time the candidate can leave the exam room and does not need to be under Full Centre Supervision.

If you prefer you can keep the candidate in the exam room until the end of the exam but you must keep them under exam conditions. See section 5.3.2.

5.2.4 Irregular conduct

(a) Wherever possible, the invigilator must remove and keep any unauthorised materials they find in the exam.

(b) The Head of Centre must tell us as soon as possible if our regulations have not been followed. They can tell a candidate to leave the exam room, but only if it is essential or if the candidate would disrupt others. If you tell a candidate to leave the room you cannot apply for special consideration.

(c) A candidate may be disqualified if our regulations are not followed. Only we can decide this. See section 5.6.

5.2.5 Emergencies

In an emergency the safety of candidates and staff is the most important thing. If it is safe and practical, invigilators should do the following to keep the exam secure:

- If necessary evacuate the exam room.
- Fully supervise candidates so they cannot communicate with anyone or access information.
- Make sure all question papers and answer scripts are left in the exam room and that the room is secured.
- After the candidates have returned to the exam room and before the exam restarts, mark on the candidates' work where the interruption happened, if possible.
- Note the time and length of the interruption.
- Allow candidates the full working time for the exam.
- If there are only a small number of candidates, you could take them to another room to finish the exam. Also take the question papers and scripts.
- Send us a full report of the incident and what you did straight away by emailing info@cambridgeinternational.org with 'Exam Day Emergency – (centre number)' in the subject line.

5.2.6 Five-minute warning

You must tell candidates when there are five minutes of the exam left. The invigilator must read out the 'Five-minute warning' section from our What to Say to Candidates in an Exam document. You can download it from www.cambridgeinternational.org/examday. If you use your own script instead you must include the content of our document. You must read out all instructions in English.

Index

You can then repeat them in another language as long as the content and meaning are exactly the same.

In listening exams, you should give a five-minute warning if it does not disturb candidates.

Important information

Multiple-choice answer sheets for foreign language and English (as an additional language and as a second language) listening and reading exams

Candidates taking the following syllabuses and components will submit their answers on a multiple-choice answer sheet. They will not submit them on the question paper. This will include the listening and reading components for some syllabuses.

- Cambridge IGCSE:
  - English (as an Additional Language) (0472/01) and (9–1) (0772/01)
  - English as a Second Language (Speaking Endorsement) (0510/02) and (9–1) (0993/02)
  - English as a Second Language (0511/02) and (9–1) (0991/02)
  - French (0520/01) and (9–1) (7156/01)
  - German (0525/01) and (9–1) (7159/01)
  - Spanish (0530/01) and (9–1) (7160/01)
  - Italian (0535/01) and (9–1) (7164/01)
  - Arabic (0544/01)
  - Malay (0546/01)
  - Mandarin Chinese (0547/01).
- Cambridge IGCSE Core:
  - English as a Second Language (0465/02).
- Cambridge O Level:
  - French (5020/01)
  - German (5025/01)
  - Spanish (5030/01).

Important information (continued)

- Cambridge International AS Level:
  - Spanish (8022/01, 02)
  - **NEW** German Language (8027/01, 02)
  - **NEW** French Language (8028/01, 02)
  - Chinese Language (8238/01, 02).
- Cambridge International A Level:
  - Spanish Language & Literature (9844/01)
  - Chinese Language & Literature (9868/01)
  - **NEW** German Language & Literature (9897/01)
  - **NEW** French Language & Literature (9898/01).

Important: At the end of the listening test, candidates have six minutes to transfer their answers from the question paper onto the multiple-choice answer sheet.

There is more information about multiple-choice answer sheets on our website, including a sample which you can share with your teaching colleagues, candidates and invigilators so they know what to expect on exam day: www.cambridgeinternational.org/multiple-choice

For candidates taking Cambridge IGCSE Arabic (0544/01), the answer options on the question paper are listed from right to left on the page. However, the answer options on the generic multiple-choice answer sheet are listed from left to right. Make sure your candidates are aware of this before the exam, and that they understand how to complete the multiple-choice answer sheet correctly.

You should not return the question papers to us. The multiple-choice answer sheets must be returned in the script packet envelope provided. See section 5.4 for instructions on packing and sending scripts.

Where component '01' is mentioned, it includes all variants of component '01' where applicable. For example, 11, 12, 13.

Where component '02' is mentioned, it includes all variants of component '02' where applicable. For example, 21, 22, 23.

For more information and to see a sample multiple-choice answer sheet go to www.cambridgeinternational.org/multiple-choice

5.3 At the end of the exam

At the end of the exam the invigilator should read out the 'Finishing the examination' section of our What to Say to Candidates in an Exam document. You can download it from www.cambridgeinternational.org/examday

If you want to use your own script instead you must make sure it includes the content of our document.

If candidates arrive late and the invigilator allows the full time to take the exam (see section 5.1.10), they should stop writing after the extra time.

5.3.1 The end of the exam

(a) Candidates must stay under exam conditions and in the exam room until the invigilator says they can leave.

(b) If an exam ends before the Key Time, you must keep candidates under Full Centre Supervision until the Key Time has passed. If a candidate does not attend a period of Full Centre Supervision you must tell us as it may be malpractice.

(c) You must collect all exam materials at the end of the exam. Before you allow candidates to leave the room, you must check that the number of question papers and any other exam material at the end of the exam matches the number handed out at the start.

(d) Use treasury tags or string to fasten together any continuation booklets or sheets of paper candidates want to hand in to be marked. Do not use staples or paper clips.

(e) Invigilators must:

- sort answer scripts into the order on the attendance register (candidate number order). **NEW** Scripts for absent candidates must not be included
- check they have all the answer scripts and that candidates have used correct centre and candidate numbers
- place answer scripts and any relevant access arrangement cover sheets in the script packet straight away and seal it in the exam room. The answer scripts must then immediately be given to the person responsible for sending them to us.

(f) If the same exam is taking place in different rooms, invigilators from the smaller rooms should place the scripts in an envelope. This does not need to be sealed. They should take the scripts to be collated with the scripts from the other rooms. Or, one invigilator can collect the scripts from the different rooms. The answer scripts must be sealed in the script packet in one of the exam rooms.

(g) You must store answer scripts in your secure storage until you send them to us.

(h) Answer scripts are confidential between us and the candidate. Nobody is allowed to read or photocopy them before you send them to us, unless we ask you to do this.

(i) Nobody is allowed to remove scripts from the exam room if they do not have permission. If this happens, you must email info@cambridgeinternational.org straight away. Warn the candidate that we may not accept their script.

5.3.2 The 24-hour security rule

Candidates must not remove any question papers or question paper content from the exam room. This includes writing questions on statements of entry, typing question content into calculators, etc. This is not a complete list. You must apply the 24-hour rule to keep question papers and their contents secure.

All unused question papers, answer booklets and any other confidential exam material must be stored in your approved secure storage until at least 24 hours after the end of the exam or Key Time, whichever is later. After this time you can dispose of the unused question papers or you can return them to candidates/centre staff if you want to.

You must store all empty question paper packets in your approved secure storage until you receive certificates. We may need them to investigate suspected malpractice.

Practical tests for Cambridge International AS & A Level Information Technology (9626) and Cambridge International AS & A Level Computer Science (9618)

You must collect all question papers at the end of the test. Store them securely until 24 hours after the end of the test window. After this time you can dispose of the question papers or you can return them to candidates/centre staff.

Practical tests for Cambridge IGCSE ICT (0417) and Cambridge IGCSE ICT (9–1) (0983)

You must collect all question papers at the end of the test. Store them securely until 24 hours after the end of the test window. After this time you can dispose of the question papers or you can return them to candidates/centre staff.

Chk Question papers for Cambridge Primary Checkpoint, Lower Secondary Checkpoint and speaking tests

You must securely store all unused question papers for these exams until at least 24 hours after the end of the test window. After this time you can dispose of the unused question papers or you can return them to candidates/centre staff if you want to.

5.4 UK Packing and sending scripts

NEW It is essential that you send exam scripts to us as soon as possible after the exam has finished, preferably on the same day. This is to make sure that marking and grading is not delayed, and that we can release results on time.

- If you cannot return scripts on the same day (for example, because of a limited or restricted courier service), you must send them within the next five working days.
- If you do not send scripts back to us on the day of the exam, or within five working days after the exam, we consider them to be late. For late scripts, we cannot guarantee that results will be released on time. We may not accept late scripts and we may issue a 'NO RESULT' (X grade) on candidates' certificates.
- You must pack scripts using the correct packaging and bar-coded labels.
- Do not send any unused question papers, answer scripts or continuation booklets. If a candidate was absent, you must not send the unused script back to us.
- You must return your scripts at your cost using a reputable courier with a tracking facility. Use an express service to return scripts to us. Keep a record of the contents of each consignment you send, and the courier and tracking information. Only use air freight for very large consignments of scripts. If you do this, please contact Customer Services for instructions.
- You must complete our Script Return Form each time you send us scripts. We will email you a link to the form in the Cambridge Exams Officer eNewsletter. You can also find a link in the 'Help' section of our website.

Chk You must make sure Cambridge Primary Checkpoint and Lower Secondary Checkpoint scripts reach us by the deadlines in section 5.4.2.

Keep your scripts in your secure storage before sending them. Remember that candidates' answer scripts are confidential. Nobody should read or photocopy them before you send them to us.

If you have to store scripts before you send them to us, you must seal the packaging and store them under the same secure conditions as other confidential exam materials.

For packing and sending samples you have assessed, see section 3.6. For instructions on submitting Cambridge Global Perspectives work, see section 3.7.

We are changing the script packet return envelopes from plastic bags to brown paper bags. If you have plastic script packets left over from a previous series, you can still use these to return scripts to us. We have carried out rigorous testing with the paper bags to make sure that question papers are still secure in the new packaging. You must also follow the regulations in section 5.4.1.

5.4.1 Packing scripts

We provide materials for packing, labelling and sending scripts: attendance registers, script packets, bar-coded labels and courier labels.

Please follow these steps when packing scripts.

1 Invigilators need to complete and sign the attendance register. Add the details of any candidates not printed on the attendance register to the bottom. If you need a blank copy of an attendance register use Exam Day – Form 1.

2 Check each script against the attendance register to make sure there is a script for every candidate marked as present.

3 If a candidate has used a scribe, word processor, practical assistant or transcript, attach Exam Day – Form 4 to the front of the script using a treasury tag or string, not paper clips or staples. Download the cover sheets from www.cambridgeinternational.org/forms

Contents

4 Section 4: Before the exams
5 Section 5: Exam day
6 Section 6: Results and certificates
7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

4 Place the scripts and the corresponding attendance register in a script packet. Do not put any other material in the script packet, except if you are including a cover sheet for one or more candidates (see point 3, above). To ask for special consideration use either the 'Special consideration' area of Direct or Exam Day – Form 7.

5 Pack the scripts for different components in separate packets so they match the syllabus and component number printed on the label. Seal the script packets and attach the correct bar-coded labels to each packet. These labels identify the contents of each script packet. They are in timetable date order with the labels for non-timetabled components printed first.

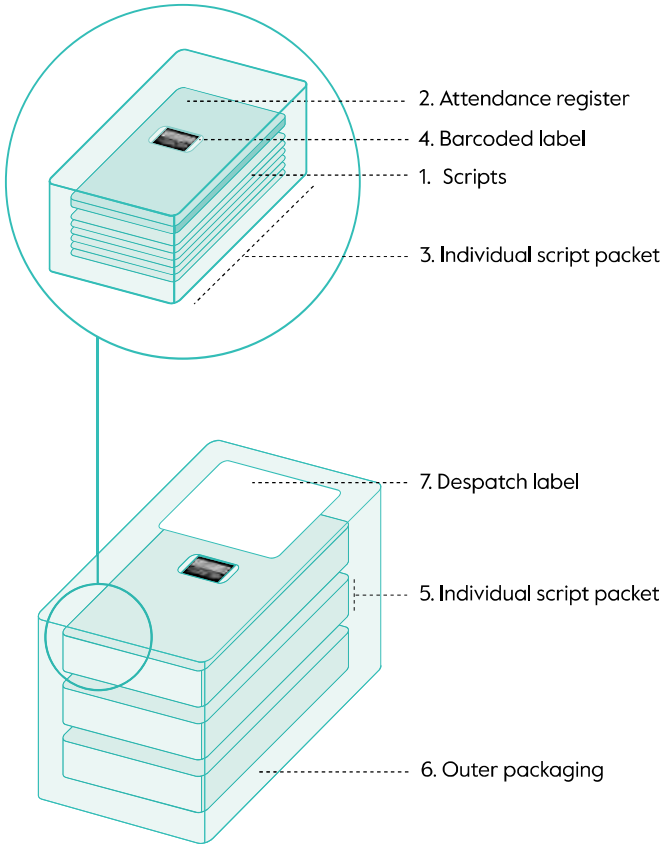
Remember:

- You will receive labels which are pre-printed with candidate number ranges. The scripts you include in each packet must match the candidate number range on the label you attach to the outside of each packet. Split the attendance register so it matches the scripts in each packet.
- If one packet is not large enough, you can use two or more. Put the bar-coded label on the first packet and number each of the packets (for example, 1 of 4, 2 of 4). Show the candidate number range on each packet. You do not need to split the attendance register. Place the register for the candidate range on the bar-coded label in the first packet. You can then tape the packets together that relate to the bar-coded label.
- You must never tape script packets together which contain different components.
- If you have lots of entries for an exam, you may receive more than one label. If you do, pack the scripts so they match the candidate number range on the label. Split the attendance register so it matches the candidate number range on the bar-coded label.
- Chk For each component of Cambridge Primary Checkpoint and Lower Secondary Checkpoint, you will receive one label for every 120 candidates. If you have more than 120 scripts, pack the first 120 scripts in one packet with the first label and the remaining scripts in another packet with the second label. Split the attendance register so it matches the scripts in each packet.
- If all the candidates for a component are absent, you still need to complete and enclose the attendance register in the script packet, attach the bar-coded label and return it to us.
- Do not use any bar-coded labels from earlier exam series.
- **Do not write anything on the bar-coded label** or cover it with tape, other labels or anything that would cover or damage the barcode.
- If you do not have a bar-coded label write the following information on the packet: centre number, syllabus number, component number, number of scripts and candidate number range. The script packets do not include a box for the candidate number range but it is helpful for the distribution centre if you include this information. Do not attach a bar-coded label **and** write details on the packet. You should only write on the packet if you **do not** have a bar-coded label. See www.cambridgeinternational.org/barcode-to-script for guidance on attaching bar-coded labels to script packets.

6 Place your packets in strong and suitable outer packaging:

- You can send script packets for a variety of components in the same outer packaging.
- As a precaution **do not send scripts for all the components of the same syllabus in the same outer packaging**.
- Make sure the contents are secure so they do not get lost or damaged.
- Each package must not weigh more than 15 kg.
- If you send several script packets for a variety of components together, please make sure that the packets are separate within the outer packaging and that all packets have the correct labels.

Important information



NEW You will submit work for Art & Design (0400, 0989, 6090 and 9479) via Submit for Assessment. You will no longer be able to submit hardcopy work for Art & Design. Return of Art and Design Work: Coursework and Moderation – Form 5 is no longer available to use. Check the samples database for the submission and completion deadlines for Art & Design.

5.4.2 Sending scripts

A Cambridge Associates are responsible for sending scripts from their Associate Centres to us, using a courier. Cambridge Associates should make arrangements with their Associate Centres for receiving their scripts.

Important dates

Chk We must receive your Cambridge Primary Checkpoint and Lower Secondary Checkpoint scripts by the following dates:

- May series: 3 May 2025
- October series: 25 October 2025

5.5 Special consideration

Special consideration is a change we make to a candidate's mark after an exam. This will be because something unexpected and adverse happened to the candidate, for example temporary illness, injury or bereavement that had an impact on their ability to perform in the exam. It can only go some way towards helping a candidate whose exam performance might have been affected.

Special consideration cannot change the circumstances faced by the candidate. There will be situations where you should not enter a candidate for an exam because they are not in a fit state to cope with the assessment. We can only make minor adjustments to the mark awarded. To do more than this would jeopardise the assessment standard.

There are minimum requirements for special consideration:

- the candidate was affected at the time of the assessment
- the circumstances were outside of the candidate's control
- the candidate had been fully prepared for the exam and covered the whole course.

You should not apply for 'Candidate present for the assessment but disadvantaged' or 'Candidate absent for an acceptable reason' until after the exam. At this point you will be able to confirm how the candidate was affected by adverse circumstances, or the reason for their absence.

Our decision whether to award special consideration is based on various factors. These may vary from candidate to candidate and from one assessment to another. Read this section before you apply for special consideration.

Important information

Apply for special consideration no later than seven days after the last exam of the syllabus in the exam series affected.

Contents
Introduction
The Cambridge Exams Cycle

1 Section 1: Preparation
2 Section 2: Entries
3 Section 3: Coursework and moderation
4 Section 4: Before the exams
5 Section 5: Exam day
6 Section 6: Results and certificates
7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

5.5.1 Special consideration principles

(a) We assess all candidates according to the same marking criteria so that grades and certificates are equally valid.

(b) We assess all candidates on what they know and can do, not on what they might have achieved if circumstances had been different.

(c) Special consideration must not give the candidate an advantage over other candidates.

(d) Special consideration must not affect the integrity of the assessment, and we will therefore restrict it in certain syllabuses.

(e) Centres are responsible for the conduct and administration of our assessments. Centre error is usually an unacceptable reason for special consideration; this includes, for example, making incorrect entries and providing incorrect exam timetables.

5.5.2 Candidate present for the assessment but disadvantaged

(a) We will normally give special consideration by applying a tariff (a small percentage of additional marks) to an affected component.

(b) The size of the tariff depends on the timing, nature and extent of the circumstances.

(c) We cannot apply special consideration cumulatively.

(d) We will not discuss how much special consideration should be given with centres, candidates or their parents/guardians.

5.5.3 Candidate absent from a timetabled component for acceptable reasons

(a) If a candidate is absent from a component for an acceptable reason, we may calculate and award an assessed mark for the missing component.

(b) In this case the minimum requirements for calculating an assessed grade are that the candidate must:

(i) have covered the whole course

(ii) have completed 50% of the total assessment by component weighting in the relevant exam series. Carry-forward marks do not count towards this.

(c) We cannot calculate an assessed mark for Cambridge International A Levels where a candidate has not completed any A Level components (A2 Level components) in the exam series.

(d) We cannot calculate an assessed mark for any component that does not have a weighting, e.g. some endorsed components.

(e) If a candidate is absent for a non-coursework test and has recovered before the end of the test date window, you must ask us if they can take it at another time within the test date window. Please see section 3.4.10.

(f) Where a candidate has a valid mark for a component that can be used, including carry-forward marks, we prioritise this over calculating an assessed mark based on the performance in other components of the syllabus.

5.5.4 Unacceptable reasons for special consideration

Candidates will not qualify for special consideration in the cases below. This list does not include every reason:

(a) long-term illness or other difficulties during the course that result in loss of teaching and/or revision time, unless the illness or circumstances are apparent at the time of the assessment

(b) bereavement more than six months before the assessment, unless there is an anniversary at the time of the assessment or there are on-going matters such as inquests or court cases

(c) matters at home such as moving house or taking holidays (including school/exchange visits and field trips) at the time of the assessment

(d) minor disturbance in the exam caused by candidates, such as bad behaviour and mobile phones

(e) candidates being disturbed by expected exam noise, e.g. other candidates writing or typing, the administration of another exam in the room

(f) the consequences of committing a crime or being charged with an offence. A retrospective application for special consideration may be considered if the charge is dropped or the candidate is found not guilty

(g) the consequences of taking alcohol or any other non-prescribed drugs

(h) the consequences of disobeying your internal regulations

Contents

7 **Section 7:** Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

(i) not preparing candidates properly for the exam for any reason. See section 5.5.8(c)

(j) staff shortages, building work or lack of facilities

(k) misreading the instructions of the question papers and answering the wrong questions

(l) making personal arrangements that conflict with the exam timetable

(m) submitting no coursework at all, unless coursework is scheduled for a restricted period of time, rather than during the course

(n) not covering the course because the candidate joined part way through

(o) permanent disability, unless a change in condition further affects the candidate at the time of the assessment

(p) unless there is a good reason, not processing access arrangements, alternative venue arrangements and timetable deviations by the deadlines

(q) misreading the timetable and/or not attending at the right time and in the right place

(r) participating in local, national or international events, e.g. sport, conferences

(s) **NEW** failure of equipment where suitable precautions have not been put in place, including word processors/computers not connected to mains electricity and science practical equipment not checked prior to exams.

5.5.5 Shortfall in coursework

(a) Where a candidate has not produced enough coursework due to an unexpected illness or other misfortune, we may be able to accept a reduced amount. It will not be possible in every case, for example, if the candidate has not met the coursework assessment objectives, or the shortfall has been caused by an unacceptable reason. To be eligible for special consideration (shortfall in coursework) the candidate must have completed at least 50% of the coursework.

(b) If a candidate does not complete any coursework they will receive a 'NO RESULT' for that syllabus.

(c) You should contact us as soon as you become aware of the shortfall, so we can give you further guidance.

(d) When you apply, tell us how much of the coursework the candidate has completed overall and give a breakdown of marks across the assessment objectives. Candidates should always try to finish the coursework, and we will look at the remaining time the candidate has left to submit the coursework before we reply. We will not normally agree to accept less coursework beforehand.

(e) We will not give special consideration to allow for your individual teaching arrangements.

(f) **NEW** For PE coursework, adapted activities should be considered before applying for a shortfall. Contact us for guidance.

5.5.6 Lost or damaged coursework

(a) Where a candidate's work has been lost or damaged you must tell us as soon as possible. You must tell us what has happened and how.

(b) You must be able to prove that the work was done and that you monitored it.

(c) If you have recorded marks we will allow you to submit them as normal. If work was lost before you marked it, you must send any existing coursework for the candidates affected.

5.5.7 Coursework extensions

(a) You can apply for an extension to the deadline for submitting coursework marks and samples.

(b) Email info@cambridgeinternational.org along with the relevant evidence before the first coursework deadline.

5.5.8 Other situations where we may consider special consideration

(a) There may be complex cases that need special consideration. We may ask our assessment managers or senior examiner to decide how to award it. This means the results may not show the special consideration straight away.

(b) In cases that you could not predict or plan for, for example, earthquakes, war or epidemics, we may consider, at our discretion, accepting alternative forms of evidence of candidate attainment.

(c) Where a syllabus lists set works (e.g. set texts in a literature syllabus) and you have prepared candidates for the wrong work, special consideration may be given at our discretion. We will only consider cases where:

Contents
Introduction

A to Z of terms
Administrative forms
Index

- there is evidence candidates have been fully prepared for the assessment objectives in the syllabus
- the incorrect work studied was assessed in the previous year or is listed in the same syllabus booklet.

However, we will consider each application separately and there can be no guarantee that a candidate will receive special consideration where a centre has prepared candidates for the wrong work. The Head of Centre must make sure candidates are taught the correct works.

(d) **NEW** If exceptional and unforeseen circumstances that are beyond a candidate's control make it impossible for them to meet the regulations for their qualification, please contact us for further information.

5.5.9 Applying for special consideration

(a) You should use the 'Special consideration' area of Direct.

(b) You must only apply for special consideration if the Head of Centre fully supports it.

(c) You must be able to provide evidence to support your application if we ask to see it. You must keep this evidence until we publish results.

(d) You must submit applications within seven days of the last exam in the series of the syllabus affected. If you have been made aware of a candidate's circumstances after the seven days, please continue to submit the application for our review.

(e) We may not consider your application if you do not send us the right information.

(f) A friend or relative of the candidate should not produce the evidence to support special consideration applications. Where this is unavoidable, a senior member of centre staff must countersign and authorise the evidence. We can refuse evidence a friend or relative has produced.

(g) The Head of Centre or exams officer may attach a letter with the application to help explain any unusual circumstances.

(h) If you have used Direct you must check your account for the outcome.

(i) If you are unable to submit your application using Direct you can complete Exam Day – Form 7 and email it to info@cambridgeinternational.org. Include your centre number and 'Exam Day – Form 7' in the email subject line. We will tell you if your application is approved or rejected, but please note that it may take longer to get your outcome than using Direct.

(j) You must not submit duplicate applications.

Direct

Go to www.cambridgeinternational.org/direct, log in and go to the 'Special consideration' area.

You can submit applications for:

- candidates who were affected at the time of the assessment
- circumstances that were outside of the candidate's control
- candidates who had been fully prepared for the exam and covered the whole course
- coursework-related special consideration.

Important dates

Applications can be made in Direct from these dates:

- June series: 1 March 2025
- November series: 1 September 2025

Administrative forms

Forms available from the 'Support Materials' section of Direct:

- Special Consideration (Shortfall in Coursework): Coursework and Moderation – Form 2
- Special Consideration (Lost Coursework): Coursework and Moderation – Form 3
- Special Consideration: Exam Day – Form 7

Extra guidance

Our guide to applying for special consideration online is in the 'Help' section of the 'Special consideration' area of Direct.

Cambridge Associates / Associate Centres

Associate Centres should apply for special consideration using Exam Day – Form 7 rather than Direct. They should download the form from the 'Support Materials' section of Direct and send it to their Cambridge Associate. The Cambridge Associate must check the form and email it to us within seven days of the last exam of the syllabus affected.

5.5.10 Appeals against special consideration decisions

To appeal against an outcome, please see section 7.4.

5.5.11 Chk Cambridge Primary and Lower Secondary Checkpoint

You cannot apply for any special consideration for Cambridge Primary and Lower Secondary Checkpoint candidates because the whole marking process is linked to the curriculum framework.

If a candidate does not sit a paper, the diagnostic feedback we send you will not include this candidate. We will not send their statement of achievement and report to student for this syllabus.

5.5.12 Honorary certificates

You may ask for an honorary certificate if a candidate:

- was entered but died before finishing the minimum amount of assessment
- was entered but is terminally ill and did not complete the minimum amount of assessment.

5.6 Malpractice

Malpractice is any action that breaks our regulations and potentially threatens the integrity of our exams and certificates. Malpractice can happen before, during or after timetabled exams or other assessments.

Malpractice can be:

- intentional and aim to give an unfair advantage in an exam or assessment
- caused by people being careless, forgetful or unaware of our regulations
- beyond anyone's control and be a result of circumstance.

A variety of people could be involved in malpractice, for example:

- candidates
- centre staff, for example, exams officers, teachers, invigilators, management, consultants and people who help with access arrangements
- other people, for example, the candidates' relatives or friends.

The Head of Centre must:

- make sure candidates and centre staff know their individual responsibilities as set out in our regulations
- tell us straight away about any potential malpractice they become aware of or that is reported to them.

5.6.1 Candidate malpractice

The following are examples of malpractice by candidates. This is not a complete list:

- bringing unauthorised materials into the exam room or accessing unauthorised materials during the exam. See section 5.1.8.2
- disruptive behaviour in the exam room (including talking or attempting to talk to other candidates and/or using offensive language)
- copying from another candidate
- collusion
- plagiarism: not giving sources and/or submitting another person's work as if it is their own
- looking for, getting, receiving, exchanging or passing on confidential or fake exam material in any way

Index

- not following an invigilator's instructions
- not following supervision rules designed to keep the exams secure
- stealing another person's work
- deliberately destroying another person's work
- including threatening, offensive or obscene material in scripts or coursework
- impersonation: pretending to be someone else, or arranging for another person to take their place in an exam
- altering, falsifying or misrepresenting any results information, including certificates
- behaving in a way that undermines the integrity of the exam.

5.6.2 Centre staff malpractice

The following are examples of malpractice by centre staff. This is not a complete list:

- not keeping exam material confidential
- not storing exam material securely
- not keeping candidates under Full Centre Supervision in relation to the Key Time
- not invigilating properly
- helping or prompting candidates with answers
- not keeping candidates' work confidential
- moving the session or date of a timetabled exam without telling us and getting our written permission
- helping candidates with coursework more than the regulations allow. See section 3.2 and individual syllabuses
- allowing candidates unsupervised access to coursework exemplar materials, whether this is the work of former candidates or material we have provided
- not keeping candidate computer files secure
- behaving in a way that undermines the integrity of the exam.

5.6.3 Suspected malpractice you discover

The Head of Centre must report any suspected malpractice to us on the same day or no later than 12:00, local time, the following working day. Use the relevant malpractice forms.

A The Head of Centre in an Associate Centre must report any suspected cases of malpractice to their Cambridge Associate straight away using the relevant malpractice forms. The Cambridge Associate should check the form and then send it to us straight away.

Administrative forms

Forms available from www.cambridgeinternational.org/forms

- Notification of Suspected Centre Staff Malpractice: Exam Day – Form 9a
- Suspected Centre Staff Malpractice Report: Exam Day – Form 9b
- Suspected Candidate Malpractice Report: Exam Day – Form 9c
- NEW Suspected Candidate Malpractice Report: Exam Day – Form 9d

The Head of Centre must:

(a) Tell us straight away about suspected malpractice they become aware of or that is reported to them. If they do not do this it might be considered malpractice in itself.

(b) Report suspected malpractice with all relevant information including:

- statements from relevant centre staff, for example, the Head of Centre, exams officer, invigilators or teachers. Statements should include a detailed account of the circumstances and any investigation the Head of Centre has carried out
- statements from all candidates involved in the suspected malpractice, giving their account of events in their own words or confirmation that they do not want to give a statement
- evidence of any unauthorised material the candidate had, e.g. a photograph of the unauthorised material
- seating plans
- any other relevant evidence or information.

Index

(c) All statements must be in English. If the level of English of the person writing the statement is poor we may accept statements in other languages. You must provide a translation or we may not be able to accept the evidence.

(d) We take all reports of suspected malpractice seriously. We will write to let you know we have received your report. In our response we will do one of the following:
- confirm that you do not need to do anything further
- provide you with guidance
- open a suspected malpractice investigation.

5.6.4 NEW Plagiarism in coursework

We need to be confident that the work we assess is the candidate's own before we can award a grade. You are responsible for supervising candidates when they are completing coursework. You must also authenticate their work before you submit the marks.

If you discover plagiarism in a candidate's work during the course, you should resolve this internally. If you discover plagiarism when you come to submit work to us, you must not submit it. For help on preventing and identifying plagiarism, see www.cambridgeinternational.org/courseworkandmoderation

When submitting coursework, you sign a declaration confirming that the work is the candidate's own original work. This declaration includes confirmation that the candidate has been taught how to correctly reference, that they have appropriately referenced and acknowledged any content taken from another source, and that they understand we may consider it malpractice if they submit work containing plagiarised material. Once you submit coursework to us, we may use plagiarism detection software to screen it.

Our subject experts will review any coursework we suspect may contain plagiarism. If we find plagiarised work, we may consider it candidate malpractice and therefore not accept the work. The candidate may then receive no marks for that component. The declaration you sign when submitting the work is made on behalf of the candidate and their teacher. It confirms that the candidate's work is their own, and that the candidate has used referencing correctly. Therefore, we may not request statements from you before closing the malpractice case and deciding the outcome, which we share with your Head of Centre. You can still appeal the outcome through the appeals process as per section 7.3.

You should contact us if you are unsure whether to submit work or if you have any other queries.

5.6.5 Suspected malpractice investigations

(a) When we open a suspected malpractice investigation, we will write to you with the details, including actions and instructions. We will try to find all relevant information to help us decide whether malpractice has happened or not.

(b) You must complete all actions and cooperate with all instructions in the timescales we give.

(c) We oversee all investigations. We expect the Head of Centre to personally supervise and collect information for us.

(d) If you do not do what we ask in suspected malpractice investigations this might be considered malpractice in itself.

(e) We can withhold results during investigations. We will tell you if we do this.

(f) We can deal directly with the candidate or the candidate's representative. In these cases, we will tell the Head of Centre.

(g) We may extend an investigation if we have further concerns.

(h) We may send representatives to your centre to investigate.

(i) You must treat malpractice cases as confidential between your centre, the individuals involved and us.

(j) You must treat correspondence about suspected malpractice as confidential between your centre and us.

(k) The Head of Centre can share concerns and/or requests for information with the candidate(s) involved and their parents/guardians/carers.

Index

(l) If the Head of Centre is implicated in the suspected malpractice we may ask someone else to collect information, for example, the chair of governors or director of education.

(m) We may suspend your centre's ability to make entries while an investigation is ongoing.

(n) Candidates involved in a malpractice investigation cannot withdraw from the relevant syllabus.

5.6.6 Rights of individuals suspected of malpractice

If someone is suspected of malpractice the Head of Centre must tell them as soon as possible, preferably in writing.

We may tell the Head of Centre to share relevant evidence with them.

If someone is suspected of malpractice you must:

- tell them what they are accused of
- give them the opportunity to write a statement
- tell them the possible consequences if it is decided that malpractice has occurred
- tell them about our appeals procedure.

5.6.7 Making a decision

(a) We will look at all available information and use a balance of probabilities to decide whether the suspected malpractice has occurred or not.
NEW Available information may include candidate and centre staff statements, seating plans, exam timetables, supporting documents (such as copies of notes), information from our assessment specialists, and evidence from scripts, coursework, and/or multiple-choice answer sheets. This list is not exhaustive.

(b) We may consider mitigating factors supported by suitable evidence.

(c) We only base our decisions on the information we have and make no assumptions about the intended actions.

5.6.8 Outcomes

(a) All outcomes will be justifiable and reasonable.

(b) We may:

- take no further action
- give a warning to candidate(s) and/or the centre staff
- deduct marks or award no marks for a component
- disqualify candidates from the subject (in serious cases this may extend to all subjects taken in the series)
- ban a candidate from entering our exams for up to five years
- ban members of staff from any involvement in administering our exams for a specified period of time
- not allow your centre to make entries for specific exams
- remove your centre status and terminate our Agreement with you; see section A14.

(c) We can apply outcomes not listed above.

(d) If we decide malpractice has occurred but cannot decide who was responsible, we may not accept the work submitted and/or issue the relevant results.

(e) We will write to the Head of Centre with the outcome.

(f) When the Head of Centre has received our outcome they can decide whether to take further action with their candidate(s) and/or staff.

(g) Some outcomes will mean that components do not qualify for enquiries about results. We will confirm this in our outcome letter.

(h) We will do our best to make sure candidates are neither advantaged nor disadvantaged by centre staff malpractice. In some cases we may not be able to issue results.

(i) Centres should keep records of malpractice outcomes for future reference. Where appropriate, redacted versions of these should be shared with new members of staff, including centre leadership and management, and exam teams, such as a new Head of Centre or exams officer.

5.6.9 Communicating outcomes to members of staff and candidates

The Head of Centre must tell the people concerned about the outcome(s). The Head of Centre is also responsible for telling them that we may share information as described in section 5.6.10.

5.6.10 Exchanging information with other awarding bodies and authorities

We will treat malpractice cases as confidential. However, where serious malpractice may affect the integrity of other awarding bodies' assessments we may exchange information with them or other regulators.

In cases of serious centre staff malpractice we can share information with professional organisations.

We can tell the relevant police authorities if there is suspected criminal activity. For example, cases involving theft, impersonation or falsifying documents.

5.6.11 Appeals

To appeal against a decision we have made in malpractice cases, please see section 7.3.

5.6.12 Allegations

If we receive a report of alleged malpractice we will look at any available information. This may lead to a suspected malpractice investigation.

We will only reveal the identity of the person making the allegation if we have to do this for legal reasons. During an investigation we will try to limit the risk of them being identified.

Extra guidance

For more information on making an allegation go to www.cambridgeinternational.org/whistleblowing

5.7 Special instructions for particular exams

This section gives regulations for specific subjects and qualifications. You should also check the relevant syllabus in case other regulations apply.

5.7.1 Science practical exams

5.7.1.1 Confidential instructions

We send confidential instructions for each syllabus once final entries have been submitted.

The supervisor should use them to prepare for the exam session. You must keep them secure at all times. The Head of Centre is responsible for making sure they remain confidential. Never discuss the instructions with another centre or allow any information to reach candidates.

Contact us or your Cambridge Associate if you have any questions. Never open any question paper packets before the exam.

5.7.1.2 Materials

We may supply some of the materials. Materials we supply will be clearly labelled and we will tell you how to use them in the confidential instructions. You must check materials and specimens we provide against the despatch list as soon as they arrive. Tell us straight away if there are any problems.

Open the packets containing perishable specimens (for example, enzymes for biological practical experiments) as soon as they arrive. Keep them in a refrigerator that only authorised people can access.

The Head of Centre and supervisor are responsible for the safe and confidential handling of all materials until they are used in the exam. No information about these materials must reach candidates.

After the exam, you must return all microscope slides to us, unless we say otherwise. In some cases we may allow you to keep materials and pay replacement costs, using the form enclosed with the materials.

We may charge you for the cost of materials you do not return in good condition.

5.7.1.3 Seating arrangements

Candidates must be seated so that they cannot see the work of other candidates. The minimum distance that you must seat candidates is 1.25 metres away from each other. This distance is measured from the centre of one candidate's seat to the centre of another's.

If you need to seat candidates so that they are not all facing in the same direction, you must make sure that they cannot see each other's work. You can use screens between candidates to achieve this but may need to use additional invigilators to monitor candidates if their view of candidates will also be obstructed.

5.7.1.4 UK Large numbers of candidates

If you do not have enough equipment for all your candidates to take their practical exam at the same time, you may need to divide the candidates into smaller groups and have the candidates sit the practical exam one after the other. You need to carefully plan how to do this and you must apply for additional sittings by following the instructions in section 1.2.4.

You must also schedule the exams in line with our Key Time and Full Centre Supervision regulations; see our 'Key Times and Full Centre Supervision' section. You must schedule each sitting of the exam so that candidates who are not taking the exam at the Key Time are under Full Centre Supervision. Candidates who have taken the exam, and who are waiting for the Key Time, cannot be in the same Full Centre Supervision group as candidates who are still waiting to take the exam. Candidates who have taken the exam may leave at the Key Time. Candidates from earlier sittings must be under Full Centre Supervision until the Key Time and cannot mix with any group of candidates who are due to sit later sittings. Your supervision arrangements must follow the regulations in section 1.2.3.1.

Scheduling the groups of candidates in this way may cause a morning exam to overlap with the afternoon (PM) exam session. If this happens, do one or more of the following to make sure no candidate needs to be in two exams at the same time:

- Arrange the groups of candidates so that candidates who have an afternoon exam are in the first sitting of the practical exam in the morning.
- Timetable the practical exam so the changeover between groups of candidates is earlier than the Key Time. If you do this, you must keep any candidates who finish their practical exam before the Key Time under Full Centre Supervision.
- Delay the start of the afternoon exam (as long as all candidates taking the afternoon exam are under Full Centre Supervision at the Key Time).

Scheduling two or more groups of candidates to sit their practical exam in an afternoon session may cause the various sittings to overlap with a morning exam. If this happens, do one or more of the following to make sure that no candidate needs to be in two exams at the same time:

- Arrange the groups of candidates so that those who also have a morning exam are in the last sitting of the practical exam in the afternoon.
- Timetable the practical exam so the changeover between groups of candidates is later than the afternoon Key Time (you will need to supervise the second group of candidates before their exam).
- Make the start of the morning exam earlier (as long as all candidates are under Full Centre Supervision at the Key Time).

Please apply for additional sittings at least four weeks before the exam so that we have time to help you carefully plan.

5.7.1.5 Invigilation

In all practical exams, invigilators must make sure candidates do not communicate with each other, especially where they need to move from one part of the room to another.

You must have one invigilator for every 20 candidates and at least two invigilators in each laboratory. The supervisor who set up the room must be there at the start of the exam. They should also be available throughout the exam to deal with any technical problems or safety matters, and to help with invigilation. Ideally one of the invigilators should be a specialist in the subject being examined. This may be the supervisor if they are not performing the experiment at the same time as the candidates.

Where the supervisor needs to perform the experiments from the question paper during the exam, they should do this in a separate room where the candidates cannot see them. You must have enough invigilators while they do this.

Contents

7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

One of the invigilators left with the candidates must be qualified to deal with any technical problems or safety matters.

If the supervisor has been involved in preparing any of the candidates for the exam another invigilator must be there at all times. You must follow all our invigilation regulations.

Where candidates need to change between one set of apparatus and another, the supervisor must reset the equipment back to its original state each time, unless the confidential instructions say otherwise. The changeover time is in addition to the time for the exam. Invigilators must make sure candidates do not communicate with each other during the changeover.

The supervisor and any invigilators should include any forms we ask for in the instructions with the answer scripts.

If there are any problems during the practical that disadvantage the candidates, for example, the equipment is faulty, the supervisor should record it in their report. They should then talk to the exams officer about applying for special consideration.

5.7.2 UK Cambridge IGCSE, Cambridge O Level and Cambridge International AS & A Level listening exams

We supply the audio files for the listening exams. We are no longer providing CDs for these exams. See section 1.1.8 Global Listening for further guidance.

We strongly advise you to hold the listening exam in a room that is suitable for up to 30 candidates. If you have equipment that is very powerful, you may have more candidates in the room without asking us. However, if candidates cannot hear the recording you cannot apply for special consideration. Candidates can use headphones if you conduct the test in a language laboratory. However, they cannot control the recording. A member of staff must always control the recording, and follow the instructions on the recording. An invigilator should listen to the recording while it is played.

For Cambridge International AS & A Level Music (9483/01), candidates need equipment that allows them to control the recording, for example, a laptop with Windows Media Player, or other device for playing audio files. See our Global Listening administrative guide for information about which equipment to use to play audio files and how to play them securely during exams (www.cambridgeinternational.org/global-listening).

5.7.2.1 Checking recorded material

The candidates' subject teacher should not be the person who checks the sound quality of the audio file.

(a) As soon as you receive the audio file, you must listen to a small section to check the sound quality. For listening exams where the recording is controlled centrally, you must check each audio file. For exams where candidates control the recording, randomly check some of the audio files.

(b) You must check the acoustics and sound quality of the audio file at the right volume in the exam room one working day before the exam. You may use curtains or carpets to reduce echoes in the room. This check must not affect the security of the exam. Check that candidates with individual listening equipment can hear clearly.

(c) When doing the above checks do not listen to the exam material in full or remove it from the centre. After each check you must return the material to secure storage.

(d) If there is an issue with the exam material, use a different device to attempt the spot checks again. If the issue continues, end the spot checks and contact us immediately.

5.7.2.2 Conducting listening exams

Ideally, a member of staff who speaks the language of the listening exam should be there to deal with any technical problems. If this teacher prepared the candidates for the subject they must not be the only invigilator.

The invigilator must give candidates time to fill in information on the front cover, including their name and centre number, before playing the audio file.

The invigilator must not stop the audio file once started, unless there is an emergency. Noise from outside the exam room is not an emergency. The invigilator should warn candidates of this before the exam begins.

If the invigilator stops the exam because of an emergency, they should restart the audio file at exactly the same place once they have dealt with the emergency. The invigilator must include a report with the candidates' scripts, saying at which point in the exam the interruption took place, how long it lasted and what happened. If the invigilator is not sure whether all candidates heard certain items, they must say why and identify the items in the report.

Contact us if equipment fails during the exam.

5.7.2.3 UK Large numbers of candidates

If you have more than 30 candidates sitting a listening exam, you may need to divide the candidates into smaller groups. If you cannot have the smaller groups sit the exam at the same time in different rooms, you must have the candidates sit the listening exam one after the other using additional sittings. You need to carefully plan how to do this and you must apply for additional sittings by following the instructions in section 1.2.4.

In all circumstances you must schedule the exams in line with our Key Time and Full Centre Supervision regulations; see our 'Key Times and Full Centre Supervision' section.

If you are approved to use additional sittings, you must schedule each sitting of the exam so that candidates who are not taking the exam at the Key Time are under Full Centre Supervision. Candidates who have taken the exam, and who are waiting for the Key Time, cannot be in the same Full Centre Supervision group as candidates who are still waiting to take the exam. Candidates who have taken the exam may leave at the Key Time. Candidates from earlier sittings must be under Full Centre Supervision until the Key Time and cannot mix with any group of candidates due to sit later sittings. Your supervision arrangements must follow the regulations in section 1.2.3.1.

Scheduling the groups of candidates in this way may cause a morning exam to overlap with the afternoon (PM) exam session. If this happens, do one or more of the following to make sure no candidate needs to be in two exams at the same time:

- Arrange the groups of candidates so that candidates who have an afternoon exam are in the first sitting of the listening exam in the morning.
- Timetable the listening exam so the changeover between groups of candidates is earlier than the Key Time. If you do this, you must keep any candidates who finish their listening exam before the Key Time in Full Centre Supervision.
- Delay the start of the afternoon exam (as long as all candidates taking the afternoon exam are under Full Centre Supervision at the Key Time).

Scheduling two or more groups of candidates to sit their listening exam in an afternoon session may cause the various sittings to overlap with a morning exam. If this happens, do one or more of the following to make sure that no candidate needs to be in two exams at the same time:

- Arrange the groups of candidates so that those who also have a morning exam are in the last sitting of the listening exam in the afternoon.
- Timetable the listening exam so the changeover between groups of candidates is later than the afternoon Key Time (you will need to supervise the second group of candidates before their exam).
- Make the start of the morning exam earlier (as long as all candidates are under Full Centre Supervision at the Key Time).

Please apply for additional sittings at least four weeks before the exam so that we have time to help you carefully plan.

5.7.2.4 Multiple-choice answer sheets for foreign language and English (as an additional language and as a second language) listening exams

Candidates sitting selected foreign language and English (as an additional language and as a second language) listening exams submit their answers on a multiple-choice answer sheet. They do not submit them on the question paper. At the end of the exam candidates have six minutes to transfer their answers from the question paper onto the multiple-choice answer sheet.

Please do not return the question papers to us. The multiple-choice answer sheets must be returned in the script packet envelope provided.

There is more information and a list of frequently asked questions on our website: www.cambridgeinternational.org/multiple-choice

5.7.3 Cambridge IGCSE 'open book' literature components

Candidates should take their set texts into the exam room for the following components:

- Cambridge IGCSE English Literature (0475 and (9–1) 0992) Paper 3
- Cambridge IGCSE Spanish Literature (0488) Paper 1.

Invigilators must make sure that candidates use original published books only, not photocopies. NEW If you are unable to find a set text that does not contain published on-page or page-facing notes, please contact us. Invigilators must make sure the texts do not contain notes, underlining, highlighting or anything else the candidate has added. Any breach of this regulation must be reported to us.

5.7.4 Cambridge ICT and IT practical tests

This section applies to practical tests in:

- Cambridge IGCSE ICT (0417) and (9–1) (0983)
- Cambridge International AS & A Level Information Technology (9626)
- Cambridge International AS & A Level Computer Science (9618).

5.7.4.1 Timetabling

The final timetable gives a one-day window to conduct these practical tests. Wherever possible, candidates in your centre should take their test at the same time.

The Cambridge International AS & A Level Computer Science (9618) practical test will show in the final timetable as having a session assigned to it. This practical test can still be sat throughout a one-day window.

If you need more than one sitting they should follow on from each other within the same day. You must apply for additional sittings by following the instructions in section 1.2.4.

Candidates in different sittings should have no contact with each other. Candidates from the first sitting will need to be under Full Centre Supervision until the last group start their exam. Your supervision arrangements must also follow the regulations in section 1.2.3.1.2, including supervising candidates overnight if relevant.

You need to consider the time needed to set up the system and allow time in case anything unexpected happens.

5.7.4.2 Administration instructions

You must download instructions from phase 4 of the 'Exam administration' area of our website: www.cambridgeinternational.org/beforetheexams. We no longer upload the instructions to Digital File Despatch at the Key Time for the exam. They tell you about:

- preparing for the tests
- submitting candidates' work for marking
- handling any technical problems during the test.

You must read, understand and follow these instructions. If you do not have them email info@cambridgeinternational.org

(A) Cambridge Associates should give the relevant instructions to their Associate Centres.

Before the exam, you must check the date and time settings on all your computers are correct.

5.7.4.3 Supervisor

An experienced supervisor, who may be the candidates' teacher, is responsible for administering the practical tests. They are also responsible for preparing the hardware and software.

5.7.4.4 Invigilation

One invigilator must be present for every 20 candidates. There must always be at least one invigilator who has not been involved in the preparation of any of the candidates for the test.

In addition, a suitably experienced supervisor must be present in each test room to deal with any technical difficulties. The supervisor can have been involved in the preparation of candidates for the test. The supervisor must not be counted as an invigilator.

We encourage you to have an extra technician available, as well as the invigilators and supervisor.

You must follow all the invigilation instructions in this handbook and in the practical test instructions we send you.

Important information

You must report any system errors or problems in the Supervisor Report Folder (SRF).

5.7.4.5 Candidate access to equipment during the test

Candidates must use your equipment to complete the tests.

They must not have access to their own electronic files, personal notes, pre-prepared templates or other files. Candidates are not allowed to refer to textbooks or centre-prepared manuals. During the practical test they can use English or simple translation dictionaries, spellcheckers, software help facilities and manufacturer manuals on the software packages. They may use the original software supplier's wizards.

Supervisors/invigilators must not give any other help to the candidates during the test, unless the equipment fails or malfunctions. If the supervisor gives any help during the test they must record this on the Supervisor's Report Form and send the form with the candidate's work.

5.7.4.6 Security issues

Candidates must not communicate with each other in any way and you must make sure their files are secure. They must not use a shared folder on your network to store the source files. You must use individual password-protected folders for each candidate for each practical exam. Give each candidate access to the folder at the start of the exam and remove access at the end. Candidates must not have access to portable storage media, for example, memory sticks. Invigilators must be vigilant throughout the test. Candidates must be under the same conditions as in sections 5.1 and 5.2.

You must treat all assessment material as confidential and must only issue it at the time of the test.

For Cambridge IGCSE ICT (0417), (9–1) (0983), Cambridge International AS & A Level Information Technology (9626) and AS & A Level Computer Science (9618) candidates must not have access to the internet and email during the practical test.

You must keep all work stored on a network or hard disk secure.

You must make sure that:

- candidates do not have access to test material, except during their test
- the invigilator collects all assessment material at the end of each session (including candidate-dated practical test papers and completed work). You can download instructions for conducting practical tests for syllabuses 9626, 9618, 0417 and 0983 from phase 4 of the 'Exam administration' area of our website: www.cambridgeinternational.org/beforetheexams
- you securely store a copy of all candidates' work until the end of the enquiry about results period in case we ask for it
- you destroy all draft copies and rough work that is not being submitted for marking
- you do not return the question paper with the candidates' work
- you keep all copies of the question paper under secure conditions until 24 hours after the end of the test window date.

Candidates must not keep any printouts they produce during the test. They must not keep any electronic files that form part of the test or that they have produced during it.

5.7.4.7 Software packages

Candidates can complete the practical sections using any software packages that allow them to show all skills listed in the relevant sections of each syllabus.

5.7.5 Cambridge International AS & A Level Media Studies

(a) You must spot-check the DVD extract as soon as you receive it.

(b) You must spot-check the sound and visual quality of the test material in the exam room one working day before the exam. This check must not affect the security of the exam.

(c) During the checks, do not watch the test material in full or remove it from the centre. After each check you must return the material to secure storage.

(d) If there is an issue with the exam material, use a different device to attempt the spot checks again. If the issue continues, end the spot checks and contact us immediately.

(e) You may transfer the test material from the DVD to a USB stick before the day of the exam, provided that this transfer does not affect the security of the exam. You must then return the material to secure storage. **NEW** Make sure the file is transferred in a secure environment (e.g. a private office) by the Head of Centre, or exams officer, in the presence of another senior member of staff. You should name the file with the date of the exam, the session, the syllabus and the component. You should use a strong password to protect the file, and a separate strong password to protect the USB stick. See section 4.3.1 for guidance about downloading confidential materials.

You should seal the USB stick in a tamperproof envelope or container and store it in secure storage. See section 4.4.2 for guidance about storing confidential materials.

5.7.6 Art & design exams

You should refer to the Guidance on the Administration and Online Submission of Art & Design for more information. See the syllabus pages of our website and the samples database.

5.7.6.1 Question papers

Question papers for art & design will be available from the School Support Hub and from Digital File Despatch. Make sure you download the correct question paper for your series.

5.7.6.2 Invigilation

You must have one invigilator for every 30 candidates and at least two invigilators in the exam room. The art teacher or technician must not be the sole invigilator but should be available throughout the exam to deal with any technical problems.

You must supervise candidates' work during breaks. However, you do not need to supervise candidates during breaks. Candidates are not permitted to remove work or to bring work into the room once the exam has started.

Important information

NEW You will submit work for Art & Design (0400, 0989, 6090 and 9479) via Submit for Assessment. You will no longer be able to submit hardcopy work for Art & Design. Return of Art and Design Work: Coursework and Moderation – Form 5 is no longer available to use. Check the samples database for the submission and completion deadlines for Art & Design.

Section 6: Results and certificates

In this section

6.1 Releasing results 132
6.2 Priority results 138
6.3 Enquiries about results 139
6.4 Certificates 144
6.5 Certifying statements 149
6.6 Verifying results 150
6.7 Applying to university 150
6.8 Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint results 151

6.1 Releasing results

We release electronic statements of results online through Direct and shortly after results release we send your results despatch.

You can give candidates their results straight away or when you receive the printed statements of results in your results despatch. It is your responsibility to give candidates their results. This also includes giving them access to the Candidate Results Service or giving them their results another way.

We can still amend results published on electronic and printed statements of results if necessary.

We confirm final results when we send certificates.

A Cambridge Associates are responsible for giving results, statements of results and other results material to their Associate Centres.

PDC Important dates

- We tell you the exact dates and times we will release results on Direct and in the Cambridge Exams Officer eNewsletter.

June series (all qualifications)

- Results available online: August 2025
- Results despatch: late August 2025

November series (all qualifications)

- Results available online: January 2026
- Results despatch: late January to early February 2026

(Exact dates will be confirmed on our website and in the Cambridge Exams Officer eNewsletter.)

6.1.1 UK Online results

You can access your results from the Direct homepage and from the 'Administer Exams' dashboard. Online results are available in the following formats:

- statements of results for every candidate (PDF)
- results for your centre in broadsheet format (PDF)
- results for your centre in broadsheet format (Microsoft Excel)
- moderation report for teachers: a report on the moderation for each internally assessed component. It also shows where our moderators re-marked coursework because they could not moderate the marks.

6.1.2 Candidate Results Service

Candidates can use the Candidate Results Service to view their results electronically. This may be particularly useful if they have difficulties reading the printed results. You can control who has access to the site and what they can see through the 'Administer Exams' page on Direct.

For more information see section 6.2 and www.cambridgeinternational.org/results

You can generate login details once the previous series has closed:

- June series – late March
- November series – early October.

Important information

We can still amend results published on the electronic and printed statements of results. We confirm final results when we send out your certificates.

Candidates should not print screenshots of their results from the Candidate Results Service to share with educational institutions. If candidates need results to be shared with educational institutions they can use our priority results service; see section 6.2.

6.1.3 UK Results despatch

We usually send this despatch by courier. We do not email results to you or anybody else. A Associate Centres will receive their results according to their local arrangements.

When you receive your despatch check that you have all the documents listed below, in particular statements of results for all candidates, including private candidates.

Statements of results: for candidates

We send you a statement of results for every candidate. It lists all the syllabuses each candidate entered and the syllabus grades we have awarded. It also shows results for group awards, with the exception of candidates who have sat Cambridge IGCSE and/or Cambridge O Levels which have not counted towards the Cambridge ICE award. These results are printed on a separate statement of results.

We print statements of results on full-colour watermarked stationery. Notes explain the qualification and syllabus grades shown.

We do not show centre names on statements of results for private candidates.

We do not issue copies of statements of results if lost by the centre or candidate.

If you would like us to replace a statement of results send us Results and Certificates – Form 12. We charge a replacement fee for this.

Candidates can view an electronic version of their statement of results using the Candidate Results Service, accessed through Direct.

See section 6.1.2. For more information see www.cambridgeinternational.org/results

UK Regulations

(a) You are responsible for giving all your candidates, including private candidates, their statements of results as soon as they arrive.

(b) Statements of results are not certificates. Universities or other organisations may not accept them.

(c) We can correct the information on any statement of results before we send certificates.

(d) The statement of results belongs to us and we issue it on the following conditions:

  (i) If a statement of results is altered or defaced it is invalid.

  (ii) The statement of results must be returned to us if we ask for it.

(e) When the statements of results arrive, you must check centre and candidate details on them, including the spelling of names and dates of birth.

(f) Contact us or your Cambridge Associate straight away if:

  (i) any of your statements of results have been altered or damaged

  (ii) any statements of results are missing.

(g) We do not usually give statements of results directly to candidates. In rare cases we may do this, once we have checked their identity.

Important information

As statements of results are a record of the exam, you must tell us straight away if there are any errors so we can correct the information we hold before we send your certificates. Use Results and Certificates – Form 12.

A Associate Centres must tell their Cambridge Associate about any errors.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Replacement Certificate Application: Results and Certificates – Form 12

PDQ Important dates

Tell us if any changes need to be made to personal information shown on printed statements of results by the following dates:

- June series: 22 September 2025
- November series: 26 February 2026

Results by syllabus, option and component: for teachers

This document shows all your results and component grades by syllabus, option and component. They let teachers compare a candidate's standard across different parts of a syllabus. They will not always exactly match the overall syllabus grade. You can share this information with candidates to help decide whether to retake a syllabus or apply for enquiries about results.

If you do this please tell them they should not share this information with anyone else. You can give component grade information if a university asks for it.

Results broadsheet: for teachers

The results broadsheet is a summary of all the results for your candidates. It shows the results in a grid, with names listed down the left-hand side and syllabus titles across the top.

Moderation adjustment summary reports: for teachers

We provide a summary of moderation adjustments for every internally assessed component. The summary shows any changes we made to the marks your teachers awarded.

We do not change weighted marks. 'NO ADJUSTMENT' means that we accepted your marks. The information is in syllabus component code order.

If we changed ranges of marks we show them in ascending order. We do not reduce marks below zero or raise them above the maximum mark for the component.

6.1.4 Syllabus grades on results documents

The tables on the following pages show how we report syllabus grades on results documents. The syllabus grade is calculated from the candidate's marks and not directly from the component grades. So candidates with the same component grades will not necessarily receive the same syllabus grade.

'NO RESULT' or 'X' means one of the following:

- You told us the candidate was absent or withdrawn from one or more components of the syllabus. Therefore we cannot award a grade.
- You told us the candidate was absent or withdrawn and there is no record of their mark in one or more components of the syllabus. Therefore we cannot award a grade.
- We disqualified the candidate. If this happened we will have told you why.

'PENDING' or 'Q' means that we cannot issue a result at the moment but will do this soon.

6.1.5 UK Grade changes after results release

If a candidate's grade changes after results are released and the change is not because of an enquiry about results, we will update your statement of results and send you a printed copy. We will not automatically update the following results documents on Direct:

- statements of results for every candidate (PDF)
- results for your centre in broadsheet format (PDF)
- results for your centre in broadsheet format (Microsoft Excel).

If you need updated versions, email info@cambridgeinternational.org confirming which documents you need and the syllabus and series.

Qualification	Grade reporting
Cambridge IGCSE	• A*(a*), A(a), B(b), C(c), D(d), E(e), F(f) or G(g). A*(a*) is the highest grade and G(g) the lowest. • 'UNGRADED' shows that the candidate did not reach the standard required for Grade G(g). • For some Cambridge IGCSE syllabuses we report separate oral endorsement grades on a scale of 1(ONE) to 5(FIVE). 1(ONE) is the highest grade and 5(FIVE) the lowest. • Candidates who do not reach the standard required for Grade 5(FIVE) will have nothing reported on the statements of results.
Cambridge IGCSE (9–1)	• 9(NINE), 8(EIGHT), 7(SEVEN), 6(SIX), 5(FIVE), 4(FOUR), 3(THREE), 2(TWO) or 1(ONE). 9(NINE) is the highest grade and 1(ONE) the lowest. • 'UNGRADED' shows that the candidate did not reach the standard required for Grade 1(ONE).

Qualification	Grade reporting
Cambridge IGCSE (9–1) First Language English (0990) and Cambridge IGCSE (9–1) English as a Second Language (Speaking Endorsement) (0993)	• For Cambridge IGCSE First Language English Speaking & Listening (0990/04) and Cambridge IGCSE (9–1) English as a Second Language (Speaking Endorsement) (0993/03), we report separate oral endorsement grades as Distinction, Merit or Pass. Distinction is the highest grade and Pass the lowest. They are reported as follows on statements of results: – with Distinction in Speaking & Listening (0990/04), Speaking (0993/03) – with Merit in Speaking & Listening (0990/04), Speaking (0993/03) – with Pass in Speaking & Listening (0990/04), Speaking (0993/03). • Candidates who do not reach the standard required for 'Pass' will have 'Unclassified' reported on their statements of results.

Qualification	Grade reporting
Cambridge ICE group award	• Cambridge ICE statements of results are issued to candidates who have entered for Cambridge ICE. • Distinction, Merit or Pass are awarded to candidates who meet the requirements of Cambridge ICE. • The statement of results shows the Cambridge ICE outcome and the individual syllabus results for Cambridge IGCSE and Cambridge O Level syllabuses. It does not include results for candidates who have sat Cambridge IGCSE and/or Cambridge O Levels which have not counted towards the Cambridge ICE award. These results are printed on a separate statement of results. • Only individual syllabus results for the final series are reported on statements of results. Therefore if a candidate is taking Cambridge ICE over more than one series, not all of the counting syllabuses are shown. • You will find details of the award rules for the Cambridge ICE group award in the Cambridge Guide to Making Entries.
Cambridge O Level (referred to as GCE O Level on statements of results)	• A*(a*), A(a), B(b), C(c), D(d) or E(e). A*(a*) is the highest grade and E(e) the lowest. • 'UNGRADED' shows that the candidate did not reach the standard required for Grade E(e).
Cambridge O Level syllabuses in languages other than English	• Performance in speaking tests (compulsory or optional) is reported on the statements of results below the syllabus grade as: 'with Pass in Oral'. • If a candidate does not achieve a 'Pass' in the speaking test or does not take the speaking test it will not show on their statement of results or certificate.

Qualification	Grade reporting
Cambridge International AS Level (referred to as GCE AS Level on statements of results)	• a(a), b(b), c(c), d(d) or e(e). a(a) is the highest grade and e(e) the lowest. • 'UNGRADED' shows that the candidate did not reach the standard required for Grade e(e).
Cambridge International A Level (referred to as GCE A Level on statements of results)	• A*(a*), A(a), B(b), C(c), D(d) or E(e). A*(a*) is the highest grade and E(e) the lowest. • 'UNGRADED' shows that the candidate did not reach the standard required for Grade E(e). • In some Advanced Level syllabuses, if a candidate did not reach the standard required for Grade E(e) we will award an AS (Advanced Subsidiary) Level Grade a(a), b(b), c(c), d(d) or e(e), if their performance is good enough in the relevant components. This is called a Compensatory Cambridge International AS Level.
Cambridge International AS & A Level syllabuses in languages other than English	• We report speaking test (compulsory or optional) performance on statements of results under the syllabus grade as either Distinction, Merit or Pass. Distinction is the highest grade and Pass the lowest. They are reported as follows on statements of results: – with Distinction in Speaking – with Merit in Speaking – with Pass in Speaking. • If a candidate does not reach the standard required for 'Pass' in speaking or does not take the speaking test, it will not show on their statement of results or certificate.

Qualification	Grade reporting
Cambridge AICE Diploma group award	• Cambridge AICE Diploma statements of results are issued to candidates who have entered for the Cambridge AICE Diploma. • Distinction, Merit or Pass will be awarded to candidates who meet the requirements of the Cambridge AICE Diploma. The total points scored will also be shown. – Distinction is awarded if a candidate achieves a point score of 360 to 420 points. – Merit is awarded if a candidate achieves a point score of 250 to 359 points. – Pass is awarded if a candidate achieves a point score of 140 to 249 points. • We allocate points to each potential counting syllabus according to the grade achieved. • An asterisk (*) appears next to the syllabuses we have used for the award. • Only individual syllabus results for the final series are reported on statements of results. Therefore if a candidate is taking the Cambridge AICE Diploma over more than one series, not all of the counting syllabuses are shown. • 'Fail' shows that the candidate did not reach the standard required for the Cambridge AICE Diploma. The total points scored will not be shown. • The candidate will also receive a certificate showing the grades achieved in Cambridge International AS & A Level syllabuses. • You will find details of the award rules for the Cambridge AICE Diploma in the Cambridge Guide to Making Entries.

Qualification	Grade reporting
Cambridge International Project Qualification	• A*(a*), A(a), B(b), C(c), D(d) or E(e). A*(a*) is the highest grade and E(e) the lowest. • UNGRADED shows that the candidate did not reach the standard required for Grade E(e).

6.2 UK PDQ Priority results

Many students have deadlines for submitting results to educational institutions around the world. We know that some deadlines are very close to our results release dates. Candidates can ask us to send a priority statement of results directly to their chosen educational institutions or employers on the day results are released. These results will arrive on the same day or shortly after results release.

Candidates who have applied to UK universities via the Universities and Colleges Admissions Service (UCAS) do not need to request priority results if they have taken Cambridge International AS & A Level exams.

We send all Cambridge International AS & A Level results to UCAS in time to meet university deadlines.

Chk We do not offer priority results for Cambridge Primary and Lower Secondary Checkpoint.

6.2.1 Applying for priority results

To apply, the candidate or the centre where they took the exam(s) must send us Results and Certificates – Form 9 by the dates shown on the next page.

This service can be paid for by card payment or invoice. The fees are in our fees list in the 'My Messages' section of Direct. **NEW** If you are a Cambridge International School – registered as online, we send the fees list to you.

Regulations

(a) If we are sending the statement directly to a school or university you do not need to send us a letter of authorisation. However, if the candidate wants us to send a copy of their results to another address you must send a letter of authorisation on headed paper with the form. If a candidate applies to us directly they must also send a letter of authorisation.

(b) Requests to send results to third parties are considered on a case by case basis. We may ask for proof of the third party's identity and address.

Important dates

We must receive all applications for priority results by:

- June series: 25 July 2025
- November series: 19 December 2025

We can accept late requests until we publish results. However, we may not be able to send the statement of results on the day we publish results.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Priority Results Application: Results and Certificates – Form 9

6.3 UK Enquiries about results

We carry out extensive quality checks before we issue results. However, you can submit enquiries about results if you would like us to check the results for particular candidates.

We offer a range of services depending on the type of check you would like; these are detailed below. For information about fees, see section 6.3.5.

Chk We do not offer enquiries about results services for Cambridge Primary and Lower Secondary Checkpoint.

6.3.1 UK PDQ Enquiries about results services

Service name	Details of service	Availability of service
Clerical re-check: Service 1	This service checks that all parts of the script were marked, and that the marks were totalled and recorded correctly.	Available for components we have assessed.
Clerical re-check with copy of script: Service 1S	The same as 'Service 1' but you also receive a copy of the script.	Available for components we have assessed.

7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

Service name	Details of service	Availability of service
Review of marking: Service 2	A review of the original marking to check that the mark scheme was applied correctly. Also includes the re-checks in Service 1. In this context, the 'original marking' means the marking used to determine the candidate's provisional result. This is often, but not always, the marking of the first examiner to mark the script.	Available for components we have assessed. Not available for multiple-choice question papers.
Review of marking with copy of script: Service 2S	The same as 'Service 2' but you also receive a copy of the script.	Available for components we have assessed. Not available for multiple-choice question papers.
Re-moderation of internally assessed component with report: Service 5	A re-moderation of a component you have assessed, and a report on how you assessed it. If you have submitted a different enquiry for any of the candidates in the group we will finish that enquiry before we produce the report.	Available for components you have assessed. Not available for individual candidates. We will only re-moderate the work of the candidates in the original sample.

Service name	Details of service	Availability of service
Report on the work of a group of candidates: Service 9	A report on the work of a group of 5 to 15 candidates for a component we have assessed. We do not review any marking. The report is designed to give teachers a better understanding of their candidates' performance in a particular component. You cannot use the reports to decide about retake entries. We process enquiries in the order that we receive them. If you submit a different enquiry for any candidates in the group after the Service 9 submission, the enquiry status will show as 'pending'. Once the Service 9 enquiry is completed and the report uploaded to Direct, we will process the 'pending' enquiries and change their status. We advise you submit all other services first before submitting a Service 9.	Available for components we have assessed. Not available for multiple-choice question papers.

Group awards

Recalculation of Cambridge ICE or the Cambridge AICE Diploma	A recalculation to make sure the results for Cambridge ICE or the Cambridge AICE Diploma are correct. Email info@cambridgeinternational.org to ask for this. Do not use Direct.

NO RESULT (X Grade) or PENDING (Q Grade)

We usually issue a 'NO RESULT' if we think the candidate has not completed all the components of an assessment. 'PENDING' means we cannot issue a result at the moment but will do this soon.

If the Head of Centre asks us, we can explain 'NO RESULT' or 'PENDING' outcomes free of charge.

We will ask you to send us any evidence that shows our records may be wrong, for example, an attendance register or a coursework mark.

If we say that we cannot issue a result we will:

- confirm which component(s) we have no mark for
- explain again why we cannot award a result, for example, that we did not receive documents, coursework marks or information to confirm that the candidate did or did not take a particular exam.

UK If you are a UK centre, see the Cambridge Handbook (UK Supplement) 2025 for information about access to scripts.

6.3.2 How to submit an enquiry about results

Submit enquiries about results online through Direct. For detailed instructions, read our step-by-step guide and watch our video tutorial at www.cambridgeinternational.org/ear

To submit an enquiry for 'NO RESULT' or 'PENDING' outcomes, visit the 'Administer Exams' section of Direct and click on the 'Enquiries about results' tab. Click on the 'NO RESULT (X Grade)/PENDING (Q Grade)' tab and follow the same process as you would for submitting an enquiry about results.

We will email any further information to you.

A Associate Centres should submit enquiries about results to their Cambridge Associate through Direct. Cambridge Associates can then approve the enquiry and send it to us or reject it.

If you want to make amendments to an enquiry or cancel an enquiry, you must do this within 24 hours of your enquiry being acknowledged. We will charge an administration fee for any changes after this time. If the enquiry has been completed, we will be unable to cancel any changes to the candidate's result.

Important dates

UK PDQ The deadlines for submitting enquiries about results, including enquiries about 'NO RESULT' or 'PENDING' outcomes, are:

- June series: 20 September 2025
- November series: 26 February 2026

We cannot accept requests submitted after the deadlines because we start to dispose of candidate scripts shortly after these dates.

A It is good practice for Cambridge Associates to submit enquiries about results for all their Associate Centres before the closing date. This gives time to check them and resolve any problems before the deadline. Cambridge Associates may set earlier deadlines for their Associate Centres.

Regulations

(a) The Head of Centre must support all requests.

(b) You must submit enquiries as soon as possible after we have issued results and before the deadlines.

(c) We will not consider:

(i) any telephone requests, including enquiries for 'NO RESULT' or 'PENDING' outcomes. You must submit them through Direct

(ii) some requests involving component(s) where malpractice is confirmed. We will confirm this in your malpractice outcome letter

(iii) any requests from candidates or their parents/guardians/carers

(iv) any requests for a component where we have calculated the component mark.

(d) You can only submit enquiries at component level.

(e) You can submit different services for different candidates in the same syllabus.

(f) You can submit the same or different services for the same candidate in different syllabuses.

(g) You cannot request multiple services for the same candidate for one syllabus.

(h) You must submit all the component enquiries for a candidate at the same time. We cannot accept extra enquiries for the same candidate and syllabus at a later date.

(i) For clerical re-check or review of marking services, you may only select one type of review or re-check service. For example, you cannot ask for a Service 1S for one component and then a Service 2S for another component if they are in the same syllabus.

(j) As well as enquiries for components we have assessed, you may also submit a Service 5 enquiry for any components you have assessed in the same syllabus.

6.3.3 UK How long does it take to process enquiries?

We deal with enquiries in the order we receive them. We normally tell you the outcome of your enquiry within 30 days of receiving it.

If a candidate wants to retake in the next exam series, we cannot guarantee that the outcome will be ready in time to help them prepare for the exam.

If a candidate's grade goes up as a result of an enquiry about results, and you have already entered them to retake the exam, we will credit your centre's account with the entry fee if you want to withdraw them. Please email info@cambridgeinternational.org with details of your candidate and the syllabus. When we have approved your request to credit your centre's account with the entry fee, we will withdraw the candidate and credit your centre's account.

We process Service 9 requests in the order we receive them. If you have submitted a Service 9 enquiry for candidates with other existing enquiries, the status for the Service 9 enquiry will display as 'Pending'. Once the existing enquiries are complete, the status for the Service 9 enquiry will change to 'Submitted'.

The enquiry will not display as 'Completed' on Direct until we upload the report. This may take longer than our normal 30-day turnaround. We cannot say when we will complete Service 9 reports so you cannot use them to decide about retake exams.

6.3.4 Outcomes of enquiries about results

Enquiries about results: Once we have received the enquiry we will upload an acknowledgement letter to the 'Enquiries about results' section of Direct.

We will email you when this letter is available. Please call Customer Services if it is not available 48 hours after you have submitted the enquiry.

We will upload the outcome of your enquiry and any copies of scripts and reports to the 'Enquiries about results' section of Direct. We will email you when they are available.

'NO RESULT' and 'PENDING' enquiries: Once we have received the enquiry we will acknowledge it or email you an outcome within seven working days. Please be aware that the status of your submitted 'NO RESULT' or 'PENDING' enquiry will not update in the 'Enquiries about results' section of Direct.

Regulations

If a reviewing examiner proposes a change in the candidate's mark at the enquiry about results stage, this may or may not lead to a change in the candidate's mark. Mark changes will be made in line with any pre-established marking tolerance. Find out more about tolerance on our 'Enquiries about results' webpage: www.cambridgeinternational.org/ear

(a) UK If an enquiry leads to a change in the candidate's mark for a component (their mark may go up or down), their syllabus grade will either stay the same or go up and their percentage uniform mark may go up or down.

(b) UK Where an enquiry does not lead to a syllabus grade change, but does lead to a component grade change, we will not reissue any results documents unless you ask us to by emailing info@cambridgeinternational.org

(c) Where an enquiry leads to a candidate's mark going down and that mark is carried forward to a later series, we will use the reduced mark to calculate the candidate's grade in that series.

(d) Where an enquiry leads to a change to a candidate's syllabus grade, we will:

(i) write to you straight away

(ii) issue a revised statement of results

(iii) tell UCAS (the UK organisation that processes applications to higher education), and any other universities that have asked for a similar arrangement (Level 3 qualifications only)

(iv) write to any other university or institution to confirm the grade change if the Head of Centre or Cambridge Associate asks us to

Regulations (continued)

(v) not charge all or part of the fee. See section 6.3.5

(vi) delay sending certificates for any candidate(s) where an enquiry about results outcome is still pending.

(e) You must tell the candidate the outcome.

(f) Very rarely the outcome of an enquiry may mean we need to check the results for other candidates in that syllabus. If this happens we will tell the Head of Centre/Cambridge Associate. We will then carry out the service on any other candidates who may have been affected free of charge. We will tell the Head of Centre/Cambridge Associate the outcome.

6.3.4.1 UK Using photocopied scripts

For Services 1S and 2S, we upload copies of scripts to the 'Enquiries about results' section of Direct.

Regulations

Only teachers at your centre can see the copies of scripts we return. They can decide whether to return them to the relevant candidates. Scripts belong to us. If teachers want to use a script as an example to other students they must ask for the candidate's permission. If they cannot do this they must remove the candidate's name from the script before showing it to other students and make sure the student cannot be identified.

6.3.5 Fees

(a) We charge for enquiries about results. The fees for each service are in our fees list in the 'My Messages' section of Direct. **NEW** If you are a Cambridge International School – registered as online, we send the fees list to you.

We invoice the Head of Centre for any enquiries about results. We will invoice you six to eight weeks after the deadline for submitting new enquiries.

(b) We will not charge all or part of the fee if the enquiry leads to a change to the syllabus grade.

(c) For Service 5 requests we will not charge the whole or part of the fee if a syllabus grade changes as a result of an enquiry.

(d) We explain 'NO RESULT' and 'PENDING' outcomes free of charge.

6.3.6 Appeals

To appeal against the outcome of an enquiry about results, see section 7.2.

6.4 Certificates

Subject to regulation 6.4.7, a Cambridge certificate records and confirms a candidate's final results. A certificate is separate from a statement of results. Until certificates are issued, we reserve the right to change a candidate's results.

We send certificates after the deadline for enquiries about results so you have time to query your results.

We send certificates by courier. A We send Associate Centres' certificates to their Cambridge Associate.

The name of the centre is not shown on certificates for private candidates.

PDC Important dates

You will receive your certificates by the following dates. Contact us if you do not receive them.

- June series: end of October 2025
- November series: end of March 2026

If an enquiry about results is still open when we send certificates, the candidate(s) involved will receive their certificates when the enquiry is closed.

Regulations

(a) Certificates belong to Cambridge University Press & Assessment, of which Cambridge International Education is a part. The following conditions apply:

(i) If the certificate is altered or defaced it is invalid.

(ii) You must return a certificate if we ask you to.

(iii) The certificate should be kept in a safe place.

(iv) We will not issue copies of certificates.

(b) You must check your certificates carefully when they arrive and contact us straight away if any are damaged or missing.

(c) If any information on certificates needs to be changed, for example, the candidate's name is incorrect, follow the instructions in section 6.4.2.

(d) You must store certificates in a secure place until you give them to candidates.

(e) You are responsible for giving all your candidates, including private candidates, their certificates as soon as you can. If you cannot give a certificate to a candidate personally, ask them to let you know when they receive it.

(f) A Cambridge Associates are responsible for sending certificates to their Associate Centres. They must contact us if any are missing or incorrect.

(g) You must keep unclaimed certificates in a safe place for at least 12 months from the date we issue them. After that period, you must return them to the address below with a list of the certificates you are returning. Keep a copy of this list. Never destroy unclaimed certificates.

Cambridge International Education
Shaftesbury Road
Cambridge

(h) You must not copy Cambridge certificates in any form.

6.4.1 What is reported on certificates?

We report results in individual subjects using the grades in the tables on the following pages.

Qualification	Grades shown on certificate
Cambridge IGCSE	• A*(a*), A(a), B(b), C(c), D(d), E(e), F(f) or G(g). • A*(a*) is the highest grade and G(g) the lowest. • We do not report performances below the standard of Grade G(g) on certificates. • Candidates awarded Grades A*(a*), A(a), B(b), C(c), D(d), E(e), F(f) or G(g) have reached standards at least equivalent to the same grades in the General Certificate of Secondary Education (GCSE). Candidates awarded A*(a*), A(a), B(b), C(c), D(d) or E(e) have reached standards at least equivalent to the same grades in the Cambridge O Level.

Qualification	Grades shown on certificate
Cambridge IGCSE language syllabuses	• For some language syllabuses we report separate oral endorsement grades on a scale of 1(ONE) to 5(FIVE). 1(ONE) is the highest grade and 5(FIVE) the lowest.
Cambridge IGCSE (9–1)	• 9(NINE), 8(EIGHT), 7(SEVEN), 6(SIX), 5(FIVE), 4(FOUR), 3(THREE), 2(TWO) or 1(ONE). 9(NINE) is the highest grade and 1(ONE) the lowest. • We do not report performances below the standard of Grade 1(ONE) on certificates. • Candidates awarded Grades 9(NINE), 8(EIGHT), 7(SEVEN), 6(SIX), 5(FIVE), 4(FOUR), 3(THREE), 2(TWO) or 1(ONE) have reached standards at least equivalent to the same grades in the General Certificate of Secondary Education (GCSE).
Cambridge IGCSE (9–1) First Language English (0990) and Cambridge IGCSE (9–1) English as a Second Language (Speaking Endorsement) (0993)	• For Cambridge IGCSE First Language English Speaking & Listening (0990/04) and Cambridge IGCSE (9–1) English as a Second Language (Speaking Endorsement) (0993/03), we report separate oral endorsement grades as Distinction, Merit or Pass, Distinction being the highest and Pass being the lowest. They are reported as follows: – with Distinction in Speaking & Listening (0990/04), Speaking (0993/03) – with Merit in Speaking & Listening (0990/04), Speaking (0993/03) – with Pass in Speaking & Listening (0990/04), Speaking (0993/03). • We do not report performances below the standard required for 'Pass' on certificates.

Qualification	Grades shown on certificate
Cambridge International Certificate of Education (Cambridge ICE)	• Distinction is awarded if a candidate achieves a Grade A(a) or above in five syllabuses and Grade C(c) or above in two more syllabuses. • Merit is awarded if a candidate achieves a Grade C(c) or above in five syllabuses and Grade F(f) or above in two more syllabuses. • Pass is awarded if a candidate achieves a Grade G(g) or above in seven syllabuses. • If a candidate does not achieve Cambridge ICE but gets a minimum of at least one Grade G(g) in a syllabus we award a Cambridge IGCSE certificate. • If a candidate achieves Cambridge ICE in one series they will receive separate Cambridge IGCSE and Cambridge ICE certificates. • If a candidate achieves Cambridge ICE over two series they will receive a certificate for the individual syllabuses they take at the end of the first series. They will receive separate Cambridge IGCSE and Cambridge ICE certificates at the end of the second series.
Cambridge O Level (referred to as GCE O Level on certificates)	• A*(a*), A(a), B(b), C(c), D(d) or E(e). • A*(a*) is the highest grade and E(e) the lowest. • We do not report performances below the standard of Grade E(e) on certificates. • The text 'Ordinary Level' before the grade awarded shows the level the grade was awarded at for the subject. • One certificate is awarded for Cambridge O Level, Cambridge International AS Level and Cambridge International A Level.

Qualification	Grades shown on certificate
Cambridge O Level language syllabuses	• For some language syllabuses we report separate oral endorsement grades on a scale of 1(ONE) to 5(FIVE). 1(ONE) is the highest grade and 5(FIVE) the lowest.
Cambridge International AS Level (referred to as GCE AS Level on certificates)	• a(a), b(b), c(c), d(d) or e(e). • a(a) is the highest grade and e(e) the lowest. • We do not report performances below the standard of Grade e(e) on certificates. • The text 'Advanced Subsidiary' before the grade awarded shows the level the grade was awarded at for the syllabus. • One certificate is awarded for Cambridge O Level, Cambridge International AS Level and Cambridge International A Level.
Cambridge International A Level (referred to as GCE A Level on certificates)	• A*(a*), A(a), B(b), C(c), D(d) or E(e). • A*(a*) is the highest grade and E(e) the lowest. • We do not report performances below the standard of Grade E(e) on certificates. • The text 'Advanced Level' before the grade awarded shows the level the grade was awarded at for the syllabus. • One certificate is awarded for Cambridge O Level, Cambridge International AS Level and Cambridge International A Level.

Qualification	Grades shown on certificate
Cambridge International AS & A Level language syllabuses	• For some language syllabuses we report separate oral grades as Distinction, Merit or Pass, Distinction being the highest and Pass being the lowest. They are reported as follows: – with Distinction in Speaking – with Merit in Speaking – with Pass in Speaking. • We do not report performances below the standard required for 'Pass' on certificates.
Cambridge AICE Diploma	• The Cambridge AICE Diploma certificate is issued to candidates who have entered for the AICE Diploma. • Distinction, Merit or Pass will be awarded to candidates who meet the requirements of the Diploma. The total points scored will also be shown. – Distinction is awarded if a candidate achieves a point score of 360 to 420 points. – Merit is awarded if a candidate achieves a point score of 250 to 359 points. – Pass is awarded if a candidate achieves a point score of 140 to 249 points. • To determine the award, we allocate points to each potential counting syllabus according to the grade achieved. • The candidate will also receive a certificate showing the grades achieved in Cambridge International AS & A Level syllabuses. • Details of the award rules for the Diploma are in the Cambridge Guide to Making Entries.

Qualification	Grades shown on certificate
Cambridge International Project Qualification	• A*(a*), A(a), B(b), C(c), D(d) or E(e). A*(a*) is the highest grade and E(e) the lowest. • We do not record performances below the standard of Grade E(e).

6.4.2 Incorrect details on certificates

You must check centre and candidate details, including the spelling of names and dates of birth on statements of entry and statements of results. You must tell us straight away about any errors before we send certificates. When you receive your certificates, check centre and candidate details, including the spelling of names. To ask for changes send us Results and Certificates – Form 12 with the incorrect certificate and the documents listed on the form.

We do not charge for replacing certificates where grades have changed. You must first send us the incorrect certificate with the form to receive a replacement certificate showing the final grades. We can only make small changes to certificates, for example errors in spellings of candidate names or centre details.

A Associate Centres should tell their Cambridge Associate about any errors on certificates.

PDQ Important dates

We charge for changes to certificates after the following dates. We also charge a courier fee.

- June series: 22 September 2025
- November series: 26 February 2026

Unless they have been lost by the candidate or centre, we will replace certificates until the following dates. After these dates we will send certifying statements.

- June series: 30 April 2027
- November series: 30 September 2027

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Replacement Certificate Application: Results and Certificates – Form 12

6.4.3 Name changes

A certificate is a permanent record of the candidate's achievement. It is in their name, as you entered it, at the time we make the award. We cannot provide replacement certificates to:

- show any changes that take place after the exam, for example a candidate changing their name because they get married or adopt a parent's name
- include part of a name that was not previously entered.

6.4.4 Combining grades on a single certificate

We send a separate certificate each series. We cannot combine grades achieved in different series or at different centres onto one certificate. If candidates took assessments at two different centres they will get two certificates. Each will show the grades they achieved at that centre.

We cannot delete any grades or syllabuses from a certificate.

6.4.5 Lost certificates

We will not replace certificates that have been lost. When you receive certificates from us, keep them in a safe place. If you lose a candidate's certificate, you may apply for a certifying statement on the candidate's behalf. If a candidate loses their certificate, they can apply for a certifying statement (see section 6.5).

6.4.6 Damaged certificates

We can agree to replace damaged certificates as long as we have satisfactory proof of the candidate's identity. See the instructions and deadlines in section 6.4.2. You must return the damaged certificate before we can replace it. We charge a fee per certificate and costs to send the certificate by courier.

6.4.7 Cambridge changes

In rare cases, as a result of appeals or our quality checks we may need to change statements of results or certificates. We can do this at any time, and without liability to you or your candidates.

6.5 Certifying statements

A certifying statement is an official document that shows a candidate's grades in a particular series. It shows the grades as they appear on the certificate rather than the statement of results.

Certifying statements are fully endorsed by the Vice Chancellor of the University of Cambridge. Educational institutions and employers accept them as a legitimate record of results.

We can only send certifying statements once we have issued the certificate for that series. They show all grades, except for 'UNGRADED', 'NO RESULT' or 'PENDING' outcomes.

We produce a certifying statement for each series and for each qualification. If you need a certifying statement for a candidate who took different Cambridge qualifications in the same exam series, you need to apply for separate certifying statements for each qualification. If you need a certifying statement for a candidate who took the same Cambridge qualifications in different exam series, you need to apply for separate certifying statements for each series.

We can also send a certifying statement to an educational institution or employer as proof of the applicant's results.

For security reasons, we cannot give results by telephone or email.

6.5.1 Applying for a certifying statement

Candidates can ask us for a certifying statement at any time after we send certificates. Or, you can apply for them. You can ask for several at the same time.

There are two ways to apply:

- If you are paying by credit or debit card, apply online at www.cambridgeinternational.org/certstat
- If you are paying by invoice, download Results and Certificates – Form 7 from www.cambridgeinternational.org/forms

We will process requests within four weeks of receiving a correctly completed application.

6.5.2 UK Applying for a certifying statement for Common European Framework of Reference (CEFR)

Candidates who need to prove their English language skills can apply for a certifying statement for CEFR. This is primarily (but not only) for candidates who have achieved a Cambridge IGCSE in either First Language English or English as a Second Language and who need a student visa to study in the UK.

There are two ways to apply:

- If you are paying by credit or debit card, apply online at www.cambridgeinternational.org/certstat
- If you are paying by invoice, download Results and Certificates – Form 11 from www.cambridgeinternational.org/forms

We process requests within four weeks of receiving a correctly completed application.

6.5.3 Fees

We charge the following fees for certifying statements:

- a search fee for each qualification
- a fee for extra copies, for example if you want us to send the same statement to several addresses. We charge a lower fee if you ask for extra copies at the same time
- a delivery fee for each address if we send the statement by courier or special delivery.

These fees are shown in our fees list in the 'My Messages' section of Direct. **NEW** If you are a Cambridge International School – registered as online, we send the fees list to you.

If we cannot find a result for a candidate and series, we will credit your centre's account with the delivery fee and the cost of any extra copies, but we cannot credit your centre's account with the search fee.

Administrative forms

Forms available from www.cambridgeinternational.org/forms

- Certifying Statement Application: Results and Certificates – Form 7
- UK Certifying Statement Application for Common European Framework of Reference (CEFR): Results and Certificates – Form 11

6.6 Verifying results

A third party, such as an employer or an educational institution, can ask us to verify a candidate's results at any time. To do this, they must send us Results and Certificates – Form 8 with a copy of the certificate they want us to verify and the supporting information we ask for.

Our certificates have extra security features that can be checked using UV light. Contact us straight away if you think a certificate is not authentic. We can tell you how to check it.

We charge a fee per certificate per candidate to verify results. The fee is in our fees list in the 'My Messages' section of Direct. **NEW** If you are a Cambridge International School – registered as online, we send the fees list to you.

Administrative forms

Form available from www.cambridgeinternational.org/forms

- Third Party Verification of Results Application: Results and Certificates – Form 8

6.7 UK Applying to university

Students should contact the relevant university if they have any questions about admissions.

To find out which universities and institutions recognise Cambridge exams and qualifications, see the recognition policy search database www.cambridgeinternational.org/recognition-search

6.8 Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint results

6.8.1 Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint diagnostic feedback and statements of achievement

Cambridge Primary Checkpoint tests are for the final year of primary education. The diagnostic feedback gives you an international benchmark of how your candidates performed in English, English as a Second Language, Mathematics and Science. This helps you and your teachers to recognise and address the learning needs of your candidates. We mark the tests.

Cambridge Lower Secondary Checkpoint tests are for candidates beginning courses in Cambridge IGCSE or O Level English, English as a Second Language, Mathematics and Science. We mark the tests.

NEW You will receive electronic and printed copies of statements of achievement (PDF). You will receive electronic copies only of diagnostic feedback reports (PDF) and breakdown of marks (Microsoft Excel).

A Cambridge Associates are responsible for sending diagnostic feedback to their Associate Centres according to their local arrangements.

You can give the statements of achievement and reports to students to your candidates as soon as you receive them.

We are unable to issue results for candidates who have not completed the full assessment in a Cambridge Checkpoint subject.

Extra guidance

For guidance on how to use the diagnostic feedback reports, see the following:

- Cambridge Primary Checkpoint Feedback Guide on the Cambridge Primary website at https://primary.cambridgeinternational.org/checkpoint
- Cambridge Lower Secondary Checkpoint Feedback Guide on the Cambridge Lower Secondary website at https://lowersecondary.cambridgeinternational.org/checkpoint

For more information about Cambridge Primary and Lower Secondary support sites, see section 1.1.11.

6.8.1.1 Chk Electronic and printed diagnostic feedback

We provide the following diagnostic feedback.

In PDF:

- centre report
- report on teaching group
- individual statements of achievement
- individual reports to students.

In Microsoft Excel:

- syllabus summary report
- component report.

We upload Cambridge Primary Checkpoint and Lower Secondary Checkpoint end of series reports to the Cambridge Primary and Lower Secondary websites at a later date.

Diagnostic feedback is not available under the 'Results' tab in Direct. Instead we send diagnostic feedback through the 'My Messages' section of Direct. We do not send results directly to anyone.

A Associate Centres will receive their results according to their local arrangements.

NEW To download your diagnostic feedback reports and breakdown of marks, go to the 'My Messages' section of Direct.

When you receive your feedback, check that you have all the documents listed above. In particular, check you have a statement of achievement and a report to student for each candidate. If any documents are missing, email info@cambridgeinternational.org straight away. You are responsible for giving your candidates their statements of achievement and reports. A If you work in an Associate Centre, contact your Cambridge Associate if any documents are missing.

Programme	Performance band and Checkpoint score reporting
Cambridge Primary Checkpoint English, English as a Second Language, Mathematics, Science	Basic, Aspiring, Good, High, Outstanding Checkpoint standardised scores on a scale between 0 and 50
Cambridge Lower Secondary Checkpoint English, English as a Second Language, Mathematics, Science	Basic, Aspiring, Good, High, Outstanding Checkpoint standardised scores on a scale between 0 and 50

Qualification	Grade reporting
Cambridge Primary Checkpoint Global Perspectives	Gold(Gold), Sil(Silver), Brz(Bronze) U(Ungraded) shows that the candidate did not reach the standard required for Grade Brz(Bronze).
Cambridge Lower Secondary Checkpoint Global Perspectives	Gold(Gold), Sil(Silver), Brz(Bronze) U(Ungraded) shows that the candidate did not reach the standard required for Grade Brz(Bronze).

6.8.2 Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint Global Perspectives results

We send electronic results for Cambridge Primary Checkpoint and Lower Secondary Checkpoint Global Perspectives through Direct. We also send printed copies of candidate statements of achievement.

We provide the following electronic results files:

- centre results information (Microsoft Excel)
- individual statements of achievement (PDF)
- moderation report (PDF).

You can give the statements of achievement to your candidates as soon as you receive them.

We report syllabus grades on the centre results information sheet as in the table below left.

'NO RESULT' or 'X' means one of the following:

- You told us the candidate was absent or withdrawn and there is no record of their mark. Therefore we cannot award a grade.
- You did not tell us the candidate was absent or withdrawn and there is no record of their mark. Therefore we cannot award a grade.
- We disqualified the candidate. If this happened we will have told you why.

'PENDING' or 'Q' means that we cannot issue a result at the moment but will do this soon.

Important dates

Chk Your Cambridge Primary Checkpoint and Lower Secondary Checkpoint diagnostic feedback for English, English as a Second Language, Mathematics and Science will be available to download from the 'My Messages' section of Direct on the following dates:

- May series: 19 June 2025
- October series: 18 December 2025

Your **end of series reports** will be available to download from the Cambridge Primary and Lower Secondary support sites on the following dates:

- May series: early July 2025
- October series: late December 2025

We do not send printed copies of your diagnostic feedback or end of series reports.

Chk Cambridge Primary Checkpoint and Lower Secondary Checkpoint Global Perspectives results will be available to download from the 'My Messages' section of Direct on the following dates:

- May series: 19 June 2025

We send you printed statements of achievement by the end of June 2025.

- October series: 18 December 2025

We send you printed statements of achievement by early January 2026.

6.8.3 Chk Incorrect details on results

You must check centre and candidate details, including the spelling of names and dates of birth on statements of entry. You must tell us about any errors straight away, before we send results. Check centre and candidate details when you receive your results. If anything is incorrect, email info@cambridgeinternational.org as soon as possible. We can only make small changes, for example to candidate names, dates of birth or centre details. We upload electronic replacement statements of achievement to the 'My Messages' section of Direct free of charge.

A If you work in an Associate Centre, please tell your Cambridge Associate about any errors.

Important information

Replacement statements of achievement after results release will be sent electronically only.

6.8.4 Chk Name changes

A statement of achievement is in the candidate's name, as you entered it, at the time we issue the statement. We cannot provide replacement statements of achievement to:

- reflect any changes that take place after the test, for example a candidate changing their name because they adopt a parent's name
- include part of a name that was not previously entered.

6.8.5 Chk Combining results on a single statement of achievement

We send a separate statement of achievement each series. We cannot combine scores or grades achieved in different series onto one statement of achievement, or delete any scores or grades from a statement of achievement.

Section 7: Appeals: Regulations and guidance

In this section

7.1 Introduction 154
7.2 Appeals against the outcome of enquiries about results 155
7.3 Appeals against malpractice decisions 157
7.4 Appeals against access arrangement, special consideration and late arrival decisions 158
7.5 Stage 2 appeals 159

7.1 Introduction

7.1.1 Purpose

This section tells you how to appeal against some kinds of decisions we have made in relation to our general qualifications (where we issue certificates). This includes Cambridge IGCSE, Cambridge IGCSE (9–1), Cambridge IGCSE (Core), Cambridge O Level, Cambridge International AS & A Level and Cambridge IPQ.

A Associate Centres must make appeals through their Cambridge Associate. Private candidates can only appeal through the Cambridge International School or Cambridge Associate they are registered with.

7.1.2 Scope

We accept appeals against five kinds of decision:

1 Outcomes of enquiries about results (see section 7.2).
2 Malpractice decisions (see section 7.3).
3 Access arrangement decisions (see section 7.4).
4 Special consideration decisions (see section 7.4).
5 Late arrival decisions (see section 7.4).

We can only address these through the appeals process, not in any other way, including our complaints process.

Contact Customer Services (info@cambridgeinternational.org) about any other matters.

7.1.3 About the appeals process

You can appeal under the five circumstances in section 7.1.2 as part of the services we provide. These appeals are not a judicial or quasi-judicial proceeding.

7.1.4 Fees

We charge a fee for each Stage 1 and Stage 2 appeal about enquiries about results. The charge is per appeal, not per candidate. See the fees list in the 'My Messages' section of Direct. NEW If you are a Cambridge International School – registered as online, we send the fees list to you.

If your appeal is successful we will not charge you.

7.1.5 More information

You can find more information as follows:

- access arrangements (section 1.3 of this handbook)
- late arrivals (section 5.1.10 of this handbook)
- special consideration (section 5.5 of this handbook)
- malpractice (section 5.6 of this handbook)
- results and enquiries about results (sections 6.1 and 6.3 of this handbook).

Our processes may differ from those of other exam boards. Read this material carefully to make sure you appeal correctly.

If you have any questions contact us at info@cambridgeinternational.org or on +44 1223 553554.

Administrative forms

Forms available from the 'Support Materials' section of Direct:

- Application for an Appeal: Access Arrangements, Malpractice, Special Consideration and Late Arrivals: Appeals – Form 1
- Application for an Appeal Following an Enquiry About Results: Appeals – Form 2

7.2 Appeals against the outcome of enquiries about results

If you have an enquiry about results outcome and wish to appeal, you must follow the procedures in this section. A two-stage appeals process is available.

If you do not follow these procedures, you may lose your opportunity to make an appeal.

The appeals process is not a way of getting another opinion about the candidate's or candidates' work. It is a way to challenge us if you believe we have not followed our procedures.

7.2.1 Making a Stage 1 appeal against the outcome of an enquiry about results

7.2.1.1 Who can make a Stage 1 appeal

You must make a Stage 1 appeal in writing. The Head of Centre must sign and support it.

All appeals must be made by the centre the candidate was registered with. We do not accept appeals directly from parents/guardians or candidates.
A Associate Centres must make appeals through their Cambridge Associate.

You may only make a Stage 1 appeal for candidates who have already received an enquiry about results outcome. You may not make an appeal for a candidate who has received a copy of a script without receiving the outcome of an enquiry about results.

Example 1: You have made enquiries about results for two candidates. One has already received an outcome. You may appeal for the candidate who has already received their outcome. You must wait until the second candidate has received their outcome to make a Stage 1 appeal. If you do not have the outcome for the second candidate by the appeal deadline and you wish to appeal for the first candidate, you will need to submit two separate appeals to meet the deadline for each candidate.

3 Section 3: Coursework and moderation
4 Section 4: Before the exams
5 Section 5: Exam day
6 Section 6: Results and certificates
7 Section 7: Appeals: Regulations and guidance
A to Z of terms
Administrative forms
Index

Example 2: You have made enquiries about results for some, but not all, candidates entered for a syllabus component. You can only appeal against the outcomes of candidates you have made enquiries about results for. You may not include the other candidates. You may only appeal for a whole group if you have made enquiries about results for all candidates in the group.

7.2.1.2 How to make a Stage 1 appeal

To make a Stage 1 appeal you must show you have a permitted reason for appeal. The reasons we consider are that either:

1 We did not comply with the commitments made in our Code of Practice; or

2 We did not apply our procedures properly and fairly in arriving at our judgements.

We will not consider appeals for any other reasons. For example, the following do not, on their own, constitute evidence that we have not complied with the Code of Practice or that we have not followed our procedures properly and fairly:

1 You disagree with our markers' or moderators' judgements, either originally or as part of an enquiry about results.

2 You disagree with our judgements on grade thresholds at either a component or syllabus level.

3 Candidates' results and their results in other assessments are different.

To make a Stage 1 appeal send us Appeals – Form 2, available from the 'Support Materials' section of Direct. You must fully explain the reason for the appeal, otherwise we will reject it.

Submit the form through the 'Enquiries about results' section of Direct within the time frame in section 7.2.1.3. If you are unable to submit the form through Direct you may email it to info@cambridgeinternational.org with 'Stage 1 Appeal – EAR' in the subject line, within the time frame in section 7.2.1.3. Once you have made an appeal, you can only contact us about it in writing. We will not communicate with candidates or parents/guardians involved in the appeal.

7.2.1.3 When to make a Stage 1 appeal

You must send us Appeals – Form 2 within 28 days of the date when we uploaded the outcome letter to Direct. If the enquiry included a request for a copy of the script, you must send the appeal within 28 days of the date we uploaded the outcome letter or the copy of the script – whichever is later. If your appeal is late we will not accept it.

You can make a Stage 1 appeal for more than one candidate, as long as it meets the requirements in section 7.2.1.1. The appeal must be for the same syllabus and component for all candidates. It must be within the 28-day deadline for each candidate. You do not need to appeal for all candidates at one time.

Example 1: You receive the outcome of an enquiry about results for one candidate, which we upload to Direct on 1 January. You have until 29 January to make your Stage 1 appeal following the instructions in section 7.2.1.2.

Example 2: You have made enquiries about results, with return of copies of scripts, for five candidates for the same syllabus and component. We upload the copies of the scripts on 1, 2, 3, 4 and 5 January respectively. To make a Stage 1 appeal for all five candidates in a single group, you would need to submit it by 29 January – the deadline for the earliest script you received. To submit the appeals separately, you must keep within the 28-day limit for each appeal.

Example 3: You have made enquiries about results, at different times, for five candidates for the same syllabus and component. We upload the first outcome letter on 1 January. By 29 January, we have uploaded three of the outcome letters.

To make a Stage 1 appeal you would need to submit it for the first three candidates by 29 January, the deadline for the earliest outcome you received. You may then decide whether to submit appeals for the other two candidates separately.

7.2.1.4 Stage 1 appeal consideration

We will email you to acknowledge your appeal within three working days of receiving it. If you have not received an email within that time, please contact us to check we have received your appeal.

One or more members of Cambridge staff, none of whom were involved in the original decision, will review your appeal request and any relevant evidence, and will consider whether we:

1 Complied with the commitments made in our Code of Practice; and

2 Applied our procedures properly and fairly in arriving at our judgements.

We will write to you within 21 days of receiving the appeal to let you know whether it was fully successful, partly successful or unsuccessful.

You must tell candidates and parents/guardians the outcome as soon as you receive it.

7.3 Appeals against malpractice decisions

7.3.1 Making a Stage 1 appeal against a malpractice decision

7.3.1.1 Who can make a Stage 1 appeal

You must make a Stage 1 appeal in writing. The Head of Centre must sign and support it.

All appeals must be made by the centre the candidate was registered with. We do not accept appeals directly from parents/guardians or candidates. **NEW** It is your responsibility to make sure that candidates and their parents/guardians are aware of the appeals process. We encourage you to explain the process to them and the approach you are taking in appealing on the candidates' behalf.

A Associate Centres must make appeals through their Cambridge Associate.

7.3.1.2 How to make a Stage 1 appeal

To make a Stage 1 appeal send us Appeals – Form 1 available from the 'Support Materials' section of Direct. You must explain your reasons for appealing against the decision. **NEW** These reasons should include why you believe that we did not comply with the commitments made in our Code of Practice and/or that we did not apply our published regulations properly and fairly in arriving at our judgement. You must give us any extra information or evidence that you want us to consider. We will not accept an appeal based on the following reasons:

1 The individual did not mean to commit malpractice.

2 The individual has a good academic record.

3 The individual could lose a university place.

4 The individual regrets what they did.

Email Appeals – Form 1 to info@cambridgeinternational.org with 'Stage 1 Appeal – MALPRACTICE' in the subject line within the time frame specified in section 7.3.1.3.

Once you have made an appeal, you can only contact us about it in writing. We will not communicate with candidates or parents/guardians involved in the appeal.

Index

7.3.1.3 When to make a Stage 1 appeal

You must make your Stage 1 appeal within 28 days of the date of the letter telling you of the outcome of the malpractice investigation. If your appeal is late we will not accept it.

Example: You receive a letter, dated 1 January, telling you the outcome of a malpractice case. You have until 29 January to make your Stage 1 appeal following the instructions in section 7.3.1.2.

7.3.1.4 Stage 1 appeal consideration

One or more members of Cambridge staff, none of whom were involved in the original decision, will review your appeal request, including any relevant evidence that you submit, and will consider whether we:

1 Did not comply with the commitments made in our Code of Practice; and

2 Did not apply our published regulations properly and fairly in arriving at our judgements.

We will write to you within 28 days of receiving the appeal to let you know whether it was fully successful, partly successful or unsuccessful.

You must tell candidates and parents/guardians the outcome as soon as you receive it.

For information about the Stage 2 appeals process, see section 7.5.

7.4 Appeals against access arrangement, special consideration and late arrival decisions

If you are dissatisfied with the outcome of an access arrangement application, a request for special consideration or a late arrival outcome, the Head of Centre may appeal. A two-stage appeals process is available.

The outcome of a special consideration request is our decision to accept or not accept an application and does not refer to how much special consideration should be given.

NEW You may request a second review of the tariff awarded in your approved 'Special consideration – present but disadvantaged' application. A second person will review your application and the tariff awarded to confirm its accuracy. To request this, please email info@cambridgeinternational.org and include 'Special consideration – second review' in the subject line.

Important information

If you are submitting an access arrangement or special consideration appeal and you submit new evidence that was not considered as part of the original decision, this may be reviewed and the appeal may not be needed.

7.4.1 Making a Stage 1 appeal against an access arrangement, special consideration or late arrival decision

7.4.1.1 Who can make a Stage 1 appeal

You must make a Stage 1 appeal in writing. The Head of Centre must sign and support it.

All appeals must be made by the centre the candidate was registered with. We do not accept appeals directly from parents/guardians or candidates. NEW It is your responsibility to make sure that candidates and their parents/guardians are aware of the appeals process. We encourage you to explain the process to them and the approach you are taking in appealing on the candidates' behalf.

A Associate Centres must make appeals through their Cambridge Associate.

7.4.1.2 How to make a Stage 1 appeal

To make a Stage 1 appeal send us Appeals – Form 1, available from the 'Support Materials' section of Direct. You must explain your reasons for appealing against the decision. NEW These reasons should include why you believe that we did not comply with the commitments made in our Code of Practice and/or that we did not apply our published regulations properly and fairly in arriving at our judgement. You must give us any extra information or evidence that you want us to consider.

Email Appeals – Form 1 to info@cambridgeinternational.org with 'Stage 1 Appeal – compliance' in the subject line within the time frame in section 7.4.1.3. Once you have made an appeal, you can only contact us about it in writing. We will not communicate with candidates or parents/guardians involved in the appeal.

7.4.1.3 When to make a Stage 1 appeal

You must appeal within 28 days of the date when we told you about our decision. If your appeal is late we will not accept it.

Example: You receive a letter, dated 1 January, with our decision about the late arrival of a candidate, or your application for access arrangements or special consideration. You have until 29 January to make your Stage 1 appeal following the instructions in section 7.4.1.2.

NEW An appeal can only be made in cases where your application has been rejected.

You may request a second review of the tariff awarded in your approved 'Special consideration – present but disadvantaged' application. A second person will review your application and the tariff awarded to confirm its accuracy. To request this, please email info@cambridgeinternational.org and include 'Special consideration – second review' in the subject line.

7.4.1.4 Stage 1 appeal consideration

Three members of Cambridge staff, none of whom were involved in the original decision, will review your appeal request and evidence (including any new evidence you have submitted). We will consider whether we:

1 Did not comply with the commitments made in our Code of Practice; and

2 Did not apply our published regulations properly and fairly in arriving at our judgements.

We will write to you within 28 days of receiving the appeal to let you know whether it was successful.

You must tell candidates and parents/guardians the outcome as soon as you receive it.

For information about the Stage 2 appeals process, see section 7.5.

7.5 Stage 2 appeals

If you are not satisfied with the outcome of a Stage 1 appeal, you can ask for a Stage 2 appeal. Instructions, including the deadlines, are in:

- section 7.5.1 for appeals against the outcome of enquiries about results
- section 7.5.2 for appeals against malpractice decisions
- section 7.5.3 for appeals against access arrangement, special consideration or late arrival decisions.

The instructions vary depending on the kind of decision you would like to appeal, so it is important to refer to the correct section.

Each Stage 2 appeal is heard by an independent panel who will decide the outcome.

All Stage 2 appeals are dealt with by a team which does not have any involvement in cases before they reach a Stage 2 appeal.

Email all correspondence related to Stage 2 appeals to info@cambridgeinternational.org with 'Stage 2 Appeal' in the subject line. Send a copy to cistage2appeals@cambridgeinternational.org

7.5.1 Making a Stage 2 appeal against the outcome of enquiries about results

If the appeal is not fully successful at Stage 1, you may choose to proceed to Stage 2.

7.5.1.1 Who can make a Stage 2 appeal

You must make a Stage 2 appeal in writing. The Head of Centre must sign and support it.

You may make a Stage 2 appeal for a candidate if they have received an enquiry about results outcome and a Stage 1 appeal outcome. All appeals must be made by the centre the candidate was registered with. We do not accept appeals directly from parents/guardians or candidates. (A) Associate Centres must make appeals through their Cambridge Associate.

Example: You made a Stage 1 appeal against the outcome of an enquiry about results for candidate A and have received an outcome. Candidate B had an enquiry about results outcome, but you did not make a Stage 1 appeal. You may make a Stage 2 appeal for candidate A but not candidate B.

7.5.1.2 How to make a Stage 2 appeal

To make a Stage 2 appeal send us Appeals – Form 2, available from the 'Support Materials' section of Direct. We will not accept an appeal that is not based on either of the two permitted reasons – either that:

1 We did not comply with the commitments made in our Code of Practice; or

2 We did not apply our procedures properly and fairly in arriving at our judgements.

You must include all your arguments and any evidence you wish to provide. You may give evidence that you did not give at Stage 1.

Email the form to info@cambridgeinternational.org with 'Stage 2 Appeal' in the subject line. Send a copy to cistage2appeals@cambridgeinternational.org within the time frame specified in section 7.5.1.3.

7.5.1.3 When to make a Stage 2 appeal

You must make your Stage 2 appeal within 14 days of the date of the Stage 1 outcome letter. If your appeal is late we will not accept it.

You can make a Stage 2 appeal for more than one candidate, as long as it meets the requirements in sections 7.5.1.1 and 7.5.1.2 You must do this within 14 days of the date of each Stage 1 appeal outcome letter.

Example 1: You receive the outcome of a Stage 1 appeal, dated 1 January, for one candidate. You have until 15 January to make your Stage 2 appeal.

Example 2: You made Stage 1 appeals for two groups of candidates for the same syllabus and component. The Stage 1 outcome letters are dated 1 January and 5 January. If you wish to make a Stage 2 appeal for both groups together, you would need to submit it by 15 January, the deadline for the earliest outcome you received.

7.5.2 Making a Stage 2 appeal against a malpractice decision

If the appeal is not fully successful at Stage 1, you may choose to proceed to Stage 2.

7.5.2.1 Who can make a Stage 2 appeal

You must make a Stage 2 appeal in writing. The Head of Centre must sign and support it.

All appeals must be made by the centre the candidate was registered with. We do not accept appeals directly from parents/guardians or candidates.
A Associate Centres must make appeals through their Cambridge Associate.

7.5.2.2 How to make a Stage 2 appeal

To make a Stage 2 appeal send us Appeals – Form 1 available from the 'Support Materials' section of Direct. You must explain your reasons for making a Stage 2 appeal against the decision. We will not accept an appeal that is not based on either of the two permitted reasons – either that:

1 We did not comply with the commitments made in our Code of Practice; or

2 We did not apply our published regulations properly and fairly in arriving at our judgements.

You must also provide any extra information or evidence that you would like the panel to consider.

Email Appeals – Form 1 to info@cambridgeinternational.org with 'Stage 2 Appeal' in the subject line, copying in cistage2appeals@cambridgeinternational.org within the time frame specified in section 7.5.2.3.

7.5.2.3 When to make a Stage 2 appeal

You must make your Stage 2 appeal within 14 days of the date of the Stage 1 outcome letter. If your appeal is late we will not accept it.

7.5.3 Making a Stage 2 appeal against an access arrangement, special consideration or late arrival decision

If the appeal is not fully successful at Stage 1, you may choose to proceed to Stage 2.

7.5.3.1 Who can make a Stage 2 appeal

You must make a Stage 2 appeal in writing. The Head of Centre must sign and support it.

All appeals must be made by the centre the candidate was registered with. We do not accept appeals directly from parents/guardians or candidates.
A Associate Centres must make appeals through their Cambridge Associate.

7.5.3.2 How to make a Stage 2 appeal

Send us Appeals – Form 1, available from the 'Support Materials' section of Direct. You must explain your arguments against the decision. We will not accept an appeal that is not based on either of the two permitted reasons – either that:

1 We did not comply with the commitments made in our Code of Practice; or

2 We did not apply our published regulations properly and fairly in arriving at our judgements.

Give us any extra information or evidence that you would like the panel to consider alongside what you provided at Stage 1.

Email Appeals – Form 1 to info@cambridgeinternational.org with 'Stage 2 Appeal' in the subject line, copying in cistage2appeals@cambridgeinternational.org within the time frame specified in section 7.5.3.3.

7.5.3.3 When to make a Stage 2 appeal

You must make your Stage 2 appeal within 14 days of the date of the Stage 1 outcome letter. If your appeal is late we will not accept it.

7.5.4 Before the Stage 2 appeal meeting

7.5.4.1 Scheduling the meeting

When you make your Stage 2 appeal, we will tell you we have received it within three working days. We will usually confirm the date and time of the meeting within 14 days. If you have not received an email within that time, please contact us to check we have received your appeal.

All Stage 2 appeal meetings take place at our offices in Cambridge or remotely. We will inform you of the meeting location, which you cannot change.

If you have told us you wish to attend the meeting, we will also ask you to name representatives from your centre who will attend and provide their email addresses. We will not be able to reschedule meetings to suit your representatives. You may name alternative representatives if those you originally named cannot attend, in line with section 7.5.5.3.

7.5.4.2 Submitting materials for consideration

If you want us to consider evidence or arguments you did not include in your Stage 1 appeal, you must include these in writing when you make your Stage 2 appeal. You must normally submit them electronically.

If you want to include evidence or arguments you could not reasonably have been aware of at the time you submitted the Stage 2 appeal, you may ask the chair for permission. You must send it to us at least five working days before the meeting. You must also explain why the material was not reasonably available at the time you made the Stage 2 appeal. The panel will not accept them if they were available to you when you submitted your Stage 2 appeal.

We strongly encourage you to submit all materials electronically as this is the most secure and reliable method. If you need to send us printed copies, you must send them when you request your Stage 2 appeal. You must provide six copies in the following format:

1 A4 size.

2 No staples, spiral binding or other permanent binding (hole-punched paper bound with tags or in arch-lever files is acceptable).

3 Consecutively numbered.

Contact us if you wish to submit materials that are not easily reproduced.

7.5.4.3 The Appeal Pack

We will send an 'Appeal Pack', normally by email, to everyone attending the meeting (see section 7.5.5) no later than five working days before the meeting. This will contain:

1 All relevant outcome/decision letters and Stage 1 appeal outcome letters.

2 All appeal forms.

3 All relevant material you sent us as evidence in the Stage 1 appeal and, in the case of malpractice, special consideration, late arrivals and access arrangements, when we first considered the matter.

4 All material you sent us as evidence when you made the Stage 2 appeal.

5 All our evidence.

We may make some sensitive materials available to the panel at the meeting but these will not be distributed. They will be clearly identified on the cover sheet of the 'Appeal Pack'.

If you are attending the hearing and are not able to access the 'Appeal Pack' or any of its contents, please contact us on cistage2appeals@cambridgeinternational.org as soon as possible.

7.5.5 Stage 2 appeal meeting participants

7.5.5.1 The panel of the Cambridge Appeals Committee

At the Stage 2 appeal meeting, a panel of the Cambridge Appeals Committee will consider the appeal.

The panel will consist of an independent chair and two panel members. At least one panel member will be independent. This means they are not, and have not been, members of our board or committees or an employee or examiner with Cambridge University Press & Assessment at any time during the five years before we appointed them. Neither the chair, nor either member of the panel (whether independent or not), will have any personal interest in the decision being appealed.

A Cambridge employee will be appointed to act as servicing officer on behalf of the panel. They will take notes of the meeting, communicate the outcome and prepare a summary record of the meeting (see section 7.5.7.2). The servicing officer will be present for the panel's deliberation after the meeting but will not take part in it. The servicing officer acts for the panel and not for Cambridge.

Other people may also be present to make sure the meeting runs fairly and efficiently.

7.5.5.2 Cambridge representatives

Cambridge will be represented by a member of either the Compliance team (in malpractice, access arrangement, special consideration or late arrival cases) or the Assessment Standards and Quality team (in the case of appeals against the outcome of enquiries about results). Other subject, assessment or specialist staff may also represent Cambridge. There may be up to a total of three Cambridge representatives.

7.5.5.3 Centre representatives

The meetings are designed to be equally fair, whether or not centre representatives attend remotely or in person, and the panel always considers all written submissions.

The usual format of meetings is remote via Microsoft Teams. Please make sure your representatives have a stable internet connection and have joined the meeting via the Teams link no later than five minutes before the hearing is due to start. The chair is able to start the meeting on time even if all representatives are not present, and is entitled to refuse entry to any representatives who arrive late. The meeting will not be delayed, paused, repeated, rescheduled or cancelled due to any problems your representatives may have in their attendance.

Up to three members of your staff can attend. You must tell us if anyone from your centre would like to attend on the Stage 2 appeal form when you request a Stage 2 appeal. If you attend remotely, your Head of Centre must sign a declaration of continued adherence to the terms of the Cambridge Handbook relating to attending the Stage 2 appeal meeting online. We send the declaration once we accept an appeal.

Candidates and their parents/guardians cannot normally attend as representatives. As the Stage 2 appeal is not a judicial or quasi-judicial process, legal representatives cannot attend.

7.5.5.4 Observers

The panel and servicing officer can decide to allow observers to attend. Observers must be:

1 Over the age of 18.

2 Not attending in any capacity as a legal representative or legal advisor.

If observers attend they will count towards the limit of three representatives.

Observers must not try to take part in the meeting in any way. If they do this the chair will give them a warning. After that warning, if an observer tries to take part again, the chair may ask them to leave.

7.5.5.5 Conduct of participants

All representatives and observers attending the meeting are expected to behave with courtesy to the panel, the servicing officer, and all other participants and observers. The panel will not tolerate rudeness, shouting, attempted intimidation or other inappropriate behaviour. The chair may ask any participant or observer who behaves in such a way to leave. The chair's decision is final. The meeting will then carry on as normal and shall not be prejudiced by the removal. If we need to we may take further steps to make sure the panel, Cambridge staff and centre representatives are safe. We can ban participants or observers from visiting our premises or contacting staff in future.

7.5.6 The meeting

7.5.6.1 Centre not attending

When centre representatives do not attend the meeting, the order will be as follows.

7.5.6.1.1 Introduction

Cambridge representatives will be invited to join the panel in the meeting. The chair will introduce the panel members and ask everyone to introduce themselves. The chair will then describe the procedures that will be followed.

7.5.6.1.2 The centre's position

The chair will summarise the centre's position based on its written submissions.

7.5.6.1.3 Cambridge's presentation

- The Cambridge representatives will be asked to put forward their arguments.
- The panel will be able to ask questions.

7.5.6.1.4 Final summaries

The chair will then invite the Cambridge representatives to summarise their arguments.

7.5.6.1.5 Deliberation

Cambridge representatives will be asked to leave while the panel considers whether there are any questions. The chair may also ask observers to leave. If the panel has more questions, Cambridge representatives will be asked back into the room.

If the panel has no more questions, the representatives will be allowed to leave.

The panel will discuss the matter in private. They will consider:

1 Whether Cambridge's procedures were consistent with the commitments made in our Code of Practice; and

2 Whether Cambridge applied those procedures properly and fairly in arriving at those judgements.

The panel may, after deliberation:

(i) find the appeal successful, in full or in part

(ii) find the appeal unsuccessful; or

(iii) require Cambridge to carry out further work in accordance with instructions from the panel.

7.5.6.2 Centre attending

When centre representatives are attending, the order will be as follows.

7.5.6.2.1 Introduction

Your representatives and Cambridge representatives, along with any observers, will be invited to join the panel in the meeting room. The chair will introduce the panel members and ask everyone to introduce themselves. The chair will then describe the procedures that will be followed.

7.5.6.2.2 The centre's presentation

- The chair will ask centre representatives to put forward their arguments.
- The chair will invite Cambridge representatives to ask the centre representatives questions.
- The panel will be able to ask the centre representatives questions.

7.5.6.2.3 Cambridge's presentation

- The chair will ask Cambridge representatives to put forward their arguments.
- The chair will invite centre representatives to ask the Cambridge representatives questions.
- The panel will be able to ask the Cambridge representatives questions.

7.5.6.2.4 Final summaries

- Centre representatives and Cambridge representatives will be given a final opportunity to make any comments.
- The chair will then invite first the Cambridge representatives and then the centre representatives to summarise their arguments. To make sure all involved are treated fairly, summaries should include only matters already discussed in the meeting and not introduce any new material or arguments. The chair will tell the panel to ignore any arguments or evidence not included in the Stage 2 Appeal Request Form or allowed under section 7.5.4.2.

7.5.6.2.5 Deliberation

The Cambridge and centre representatives will be asked to leave while the panel considers whether there are any more questions. The chair may also ask observers to leave. If the panel has more questions, both the Cambridge representatives and the centre representatives will be asked back into the room.

If the panel has no more questions, the representatives will be allowed to leave.

The panel will discuss the matter in private. They will consider:

1 Whether Cambridge's procedures were consistent with the commitments made in our Code of Practice; and

2 Whether Cambridge applied those procedures properly and fairly in arriving at those judgements.

The panel may, after deliberation:

(i) find the appeal successful, in full or in part

(ii) find the appeal unsuccessful; or

(iii) require Cambridge to carry out further work in accordance with instructions from the panel.

7.5.6.3 Length of the meeting

The chair may set a time limit on the meeting or on specific parts of it (e.g. presentations). Their decision is final.

When making their presentations, the Cambridge and centre representatives should assume that the panel has thoroughly reviewed the 'Appeal Pack' and focus on explaining their key arguments. The centre should not introduce any new arguments or evidence. They can only do this if extra evidence was allowed in line with section 7.5.4.2. The chair may ask the panel to ignore any extra evidence. Their decision is final.

7.5.7 After the meeting

7.5.7.1 The outcome

After the panel has agreed the outcome, the servicing officer for the appeal will tell the centre. This is usually within two working days of the Stage 2 appeal meeting. In all cases, you will receive the outcome within 28 days of Cambridge receiving the Stage 2 appeal.

The outcome is final. Nobody may discuss the appeal or the issues underlying it with the centre, the candidate or anyone representing the centre or the candidate.

You must tell candidates and parents/guardians the outcome as soon as you receive it. You must also tell them that the outcome is final.

7.5.7.2 Summary meeting record

After the meeting, the servicing officer will prepare a summary. This is not a verbatim account or a transcript. It is a summary of the key points made at the meeting and states the outcome. Once the chair has approved the draft, if you attended the meeting you will be able to suggest any corrections.

You will normally receive a letter containing the final summary within six weeks of the meeting.

Access arrangements	Access arrangements are the principal way in which Cambridge complies with its duty, as guided by the UK Equality Act (2010), to make 'reasonable adjustments' for candidates with special educational needs, disability, illness, or injury. Where a candidate would otherwise be at a substantial disadvantage in comparison to a candidate with no special educational needs, disability, illness, or injury, we may be able to agree pre-exam access arrangements. These arrangements help a candidate by minimising accessibility barriers and maximising their opportunity to demonstrate their knowledge, skills and understanding in an assessment.
ADIP	The entry code for the Advanced International Certificate of Education Diploma.
Administrative zone	An administrative zone is a part of the world where the clocks read similar times. We have six administrative zones and allocate every school to one depending on their country and location. We publish a different version of the timetable and Cambridge Guide to Making Entries for each administrative zone for each series. Using Key Times and administrative zones together helps us make sure countries in similar time zones have their candidates under exam or supervisory conditions at the same time to maintain the security of question paper content. You can check your administrative zone and Key Times at www.cambridgeinternational.org/preparation
Agreement	The Agreement between Cambridge and a centre or Cambridge Associate for providing programmes and qualifications. The Cambridge Handbook forms part of the Agreement.
Appeals	Under certain circumstances, we provide a formal process for requesting a review of our decision. This process is called an 'appeal'. Cambridge accepts appeals in relation to five kinds of decision: 1 Outcomes of enquiries about results. 2 Malpractice decisions. 3 Access arrangement decisions. 4 Special consideration decisions. 5 Late arrival decisions. For further information about appeals, please refer to section 7 of this handbook.
NEW Apply for Access Arrangements	A service to allow centres to apply for access arrangements for candidates via My Cambridge. We are launching Apply for Access Arrangements in phases throughout 2025 to better support you. When it is available for you to use, we will contact you by email.
Assessment	The method used to evaluate a candidate's performance, for example, a written exam or coursework.
A Associate Agreement	The Agreement between Cambridge and the Cambridge Associate setting out the Cambridge Associate's legal responsibilities for Associate Centres. The Cambridge Handbook forms part of the Associate Agreement.
A Associate Centre	In our operational communications we use the term 'Associate Centre' for an organisation which is affiliated with a Cambridge Associate, whose premises have been inspected and approved, and for whom the Cambridge Associate is responsible under the Agreement. We give the external brand status 'Cambridge International School' to Associate Centres.

Attendance register	Forms used in the exam room to record the presence or absence of each candidate.
UK **A2C**	If you are a UK centre, see the Cambridge Handbook (UK Supplement) 2025.
Cambridge AICE Diploma	Advanced International Certificate of Education Diploma.
A **Cambridge Associate**	An organisation such as a ministry, exams council, distributor, department of education or other agency, which has responsibility for Associate Centres through an Associate Agreement with Cambridge.
NEW **Cambridge Early Years**	Our Cambridge Early Years programme is for learners aged 3 to 6. It is the first stage in our Cambridge Pathway, which gives students a clear path for educational success from age 3 to 19. Organisations approved to offer Cambridge Early Years are called Cambridge Early Years Centres.
Cambridge Guide to Making Entries	The Cambridge Guide to Making Entries is available before each series from the 'Support Materials' section of Direct. It includes entry option codes and instructions for submitting entries. Entry option codes are specific to each series so make sure you are using the correct guide for your administrative zone.
Cambridge Handbook	This document. The Cambridge Handbook sets out the regulations for running Cambridge assessments, and provides guidance on the administrative tasks exams officers need to carry out during each exam series. It details the responsibilities of centres and Cambridge Associates, and forms part of the legal contract between Cambridge and the centre / Cambridge Associate. Our regulations exist to make sure that Cambridge candidates all over the world have the same exam experience and are treated equally and fairly. The Cambridge Handbook is updated annually, and includes any supplementary documents issued throughout the year. A reference to the Cambridge Handbook means the most recent issue available on Cambridge's websites.
Cambridge ICE	Cambridge International Certificate of Education.
UK **Cambridge IGCSE**	Cambridge International General Certificate of Secondary Education. The international version of the GCSE – GCSEs are national qualifications usually taken by students at around the age of 16 in England.
UK **Cambridge IGCSE (9–1)**	As above but this qualification is available only in zone 3.
Cambridge International AS & A Level	The international version of the AS/A Level. The AS/A Level is a national qualification usually taken at age 16 to 18 in England. For details of assessment approaches for Cambridge International AS & A Level, see section 2.5.2.

Cambridge International Education	Cambridge International Education is the name of our awarding body and a part of Cambridge University Press & Assessment, which is a department of the University of Cambridge.
Cambridge International School	The external brand status we give to schools that meet our registration quality standards and criteria to successfully register with us and offer our programmes and qualifications. A Cambridge International School can either work with us directly or through a Cambridge Associate.
Cambridge International School – also approved to offer Cambridge programmes online	A centre that delivers Cambridge programmes to some students at its physical premises and to others fully or mainly online. All students, whether studying in person or remotely, are registered with the school and sit their exams at the centre's physical premises.
Cambridge International School – registered as online	A centre that delivers Cambridge programmes for students remotely. A fully online centre has no traditional school campus but may have physical premises where students occasionally meet for extra-curricular or sporting activities. Most of the teaching and learning takes place online. Candidates register to sit their exams as private candidates at a Cambridge exam venue local to them.
Cambridge International School – registered as online (with exam venues)	A centre that delivers Cambridge programmes for students remotely. A fully online centre has no traditional school campus but may have physical premises where students occasionally meet for extra-curricular or sporting activities. Most of the teaching and learning takes place online. The centre is approved to run its own exam venues. Candidates can either be entered for exams directly and sit exams as regular candidates, or alternatively as private candidates at other Cambridge exam venues not connected to the online school.
Chk **Cambridge Lower Secondary Checkpoint**	Assessments available in English, English as a Second Language, Mathematics, Science and Global Perspectives, specially designed for candidates who are beginning courses leading to Cambridge IGCSE or Cambridge O Level exams in these subjects. They are designed for candidates of approximately 14 years of age. Cambridge Lower Secondary Checkpoint assesses skills at the end of stages 7 to 9 of the curriculum for English and English as a Second Language, and the curriculum content of stage 9 of the curriculum for Mathematics and Science.
Cambridge O Level	GCE Ordinary Level. Cambridge O Level is an internationally recognised qualification equivalent to the General Certificate of Secondary Education (GCSE) in England.

Chk **Cambridge Primary Checkpoint**	Assessments available in English, English as a Second Language, Mathematics, Science and Global Perspectives that provide assessment based on the learning objectives within the Cambridge Primary curriculum frameworks. They are designed for candidates of approximately 11 years of age and cover all major areas of learning in the first years of an international secondary education. Cambridge Primary Checkpoint assesses skills at the end of stages 4 to 6 of the curriculum for English and English as a Second Language, and the curriculum content of stage 6 of the curriculum for Mathematics and Science.
Cambridge University Press & Assessment	Cambridge University Press & Assessment is a non-teaching department of the University of Cambridge. They exist to further the University's mission 'to contribute to society through the pursuit of education, learning and research at the highest international levels of excellence'. Cambridge International Education is part of Cambridge University Press & Assessment.
Candidate	A person who has been entered for an assessment.
Candidate Data	Candidate Data means personal data and, in some cases, special category (sensitive) personal data, as defined in the UK General Data Protection Regulation (GDPR) and Data Protection Act 2018 which relates to a candidate.
Candidate Results Service	A service that gives your candidates access to their results directly via a secure website. Centres can control which of their candidates have access to the site and what they can view through the 'Administer Exams' page on Direct.
Centre	In our operational communications, such as the Cambridge Handbook, we use 'centre' as an overarching term to refer to any type of organisation that has met our registration quality standards and criteria to successfully register with us to offer our programmes and qualifications and make entries for our exams. This includes Cambridge International Schools, Cambridge Associates and Associate centres.
Centre name	The name of a centre, Cambridge Associate or Associate Centre.
Centre number	The five-character code given to a centre, Cambridge Associate or Associate Centre.
Centre status	Centre status is awarded to a school, institution or organisation once it has been approved by and registered with Cambridge as a centre. Cambridge can withdraw this status in line with the conditions of this handbook and the centre's Agreement with Cambridge.
Certificate	A Cambridge certificate records and confirms a candidate's final results.
Certifying statement	An official document issued by Cambridge to show the grades achieved by a candidate in a particular series. Cambridge can send certifying statements at any time to any address, including educational institutions, as long as the original certificate has been issued. Candidates can apply for certifying statements or centres can apply on their behalf.

Component	A component is part of or a section of the subject exam. An individual syllabus usually has several components. A component is sometimes referred to as a paper.
Component number	The two-digit number allocated to each component of a syllabus.
Coursework Assessment Summary Form **Oral Examination Summary Form** **Speaking Examination Summary Form** **Working Mark Sheet**	These forms should be used when assessing candidates' work in coursework and speaking test components. Depending on the component, you need to complete a Coursework Assessment Summary Form, Working Mark Sheet, Speaking Examination Summary Form, or Oral Examination Summary Form. The forms must show the marks of all candidates entered for the component and must be sent with the samples. For some components you also need to complete an Individual Candidate Record Card for each candidate. Visit the samples database (www.cambridgeinternational.org/samples) to check which forms are required for specific components and to access interactive copies of the forms.
Coursework (Examined)	A component for which the candidate produces work over the course which is assessed by us.
Coursework (Moderated)	A component for which the candidate produces work over the course which is assessed in the centre and moderated by us.

Chk Diagnostic feedback	Comprehensive feedback on a learner's strengths and weaknesses in the key curriculum areas of Cambridge Primary Checkpoint and Lower Secondary Checkpoint – English, English as a Second Language, Mathematics and Science. The feedback helps candidates understand more about their strengths and weaknesses in these subjects.
Digital File Despatch	Digital File Despatch is where we upload confidential materials, pre-release materials and early question papers as digital files, instead of sending printed copies, once centres have made their final entries.
Direct	Direct is a secure website for the direct submission and transfer of data and other information between centres and Cambridge. It is used by Cambridge exams officers to manage exam entries, download results and carry out other key administrative tasks. www.cambridgeinternational.org/direct
Direct online entries	A secure, quick and easy online system for making and submitting entries and amendments.
Enquiries about results	Services available to centres after the release of results if they want to have a candidate's script reviewed or their candidates' coursework re-moderated. See section 6.3 for details.
Entries	The candidates a centre has entered for a Cambridge qualification in a particular series.
Equalities laws	The UK Equality Act 2010 or any statutory successor and/or equivalent legislation in an applicable jurisdiction.

Estimated entries	An approximation of the number of candidates a centre will enter for assessments.
Exams officer	The person appointed by the Head of Centre to act on behalf of the centre, with specific responsibility for the administration of Cambridge exams. The Head of Centre may also be the exams officer.
Fees	Sums payable by the centre or by the Cambridge Associate to Cambridge, the amounts of which are specified in the relevant fees list, and any fees specified in the Associate Agreement.
Fees list	The official listings published from time to time by Cambridge, detailing its fees.
Forecast grade	The grade a teacher expects a candidate to achieve for a syllabus.
Full Centre Supervision	A specific type of supervision for candidates. For a full definition see the 'Key Times and Full Centre Supervision' section.
NEW Global Listening	A service to allow centres to access and download audio files for listening exams via My Cambridge.
GMT	Greenwich Mean Time – an absolute time reference that does not change with the seasons.
Group award	An award given to a candidate who has studied and passed assessments from a specified number of subject groups. Examples are Cambridge ICE, a group award for Cambridge IGCSE, and the Cambridge AICE Diploma, a group award for Cambridge International A Level.
Head of Centre	The Head of Centre is the person who has been appointed by the Responsible Person as the head or principal of the centre.
Intellectual property rights	All intellectual property rights throughout the world for the full term of the rights concerned, whether or not registered and whether or not registrable, including copyright, database rights, patents, rights in inventions, know-how and technical information, design rights, design patents, registered designs, trade marks (including business and brand names, domain names, devices and logos) and the right to apply for any of the foregoing anywhere in the world.
Internally assessed mark	A mark awarded by the centre for an internally assessed coursework or speaking test component.
Invigilator	A suitably qualified person, sometimes referred to as a supervisor, who is appointed by the Head of Centre to be responsible for the proper conduct of a particular exam in line with Cambridge regulations. Invigilators work closely with and often report to the exams officer.
UK Key Time	A time, defined by the location and country of a centre, specified by Cambridge, when all candidates taking timetabled exams must either be in an exam or under Full Centre Supervision. The Key Time will always be expressed as GMT/UTC. You can find your Key Times at www.cambridgeinternational.org/keytimes
Malpractice	Malpractice is any action that breaks our regulations and potentially threatens the integrity of our exams and certification.

Marks	The total score or individual points given by an examiner.
Moderation	The process to bring the marking of an internally assessed component to an agreed standard in all participating Cambridge centres.
Multiple-Choice Answer Sheet	Form used by candidates to answer multiple-choice questions.
My Cambridge	A 'single sign-on' service which allows you to access services provided by Cambridge using one set of login details.
Non-coursework test	A component which is administered by teachers or examiners at the centre as an exam within a time period specified by us. This component is internally assessed by teachers at the centre and then externally moderated by us.
Online Learning Area	The Online Learning Area (www.cambridgeinternational.org/learningarea) is where you can access all professional development training for teachers and exams officers.
Option code	A code that indicates the combination of components a candidate is taking. Option codes are specific to each syllabus, series and administrative zone. Option codes are shown in the Cambridge Guide to Making Entries.
Premises	Places which are available to a centre, Cambridge Associate or Associate Centre, and which are used for the purposes of exam administration.

Priority results	A statement of results we send directly to a candidate's chosen educational institutions or employers on the day results are released. The candidate applies for this using Results and Certificates – Form 9.
Private candidate	A candidate taking Cambridge exams who is not a registered student with your centre.
Qualification	A certificated award made by Cambridge to students to demonstrate their achievement.
Responsible Person	The Responsible Person is the person legally responsible for an institution to offer Cambridge assessments and exams. They are responsible for carrying out their duties in line with the Agreement and this handbook, whether or not they have delegated the duties to the Head of Centre or to any other person.
Results	The outcome issued to a candidate after they have completed a component and/or combination of components which together form a valid syllabus qualification.
School Support coordinator	The designated person at a centre who is responsible for creating and maintaining users of the School Support Hub. They also manage access to the Cambridge Primary and Lower Secondary support sites (if required).
Script	A candidate's response to a whole question paper or component.
Secure Exchange	Secure Exchange is available for some syllabuses that require internally assessed samples to be digitally transferred to us.

Series	A group of exams in the same range, for example, Cambridge IGCSE and Cambridge International AS & A Level, with the same closing date for entries and timetable period. A series is identified by a month and year, for example June 2025.
Session	A period in a day in which an exam takes place, which is either in the morning, afternoon or evening. The evening session only applies to centres in administrative zones 4 and 5.
Special consideration	A post-exam adjustment made to a candidate's mark, by Cambridge, to make allowances for any adverse circumstances, for example illness, bereavement or temporary injury.
Special educational needs	This term refers to candidates who have significantly greater difficulty in learning and accessing assessments than the majority of candidates of the same age. It includes candidates who have sensory impairments, physical needs or medical conditions who require additional/specialist support and/or adjustments in order to access learning and assessments.
Statement of entry	A document showing a candidate's details and the entry options the candidate has been entered for.
Statement of results	A document showing a candidate's details and the syllabus grades they have been awarded.
Submit for Assessment	Submit for Assessment is available for some syllabuses that require marks, samples and forms for some internally assessed and examined components to be sent to us digitally.

Syllabus	A complete description of the content, assessment arrangements and performance requirements for a qualification. A course leading to an award or certificate is based on a subject syllabus.
Syllabus number	The four-digit number allocated to each syllabus.
Teacher-examiner	A teacher-examiner is someone selected by the centre to administer and assess speaking tests. The teacher-examiner should normally be a teacher at your centre. Where this is not possible and it is necessary to look for someone outside the centre, select someone who is fluent in the target language, preferably with recent and relevant teaching experience and with experience of conducting other speaking tests. The person appointed must be given the opportunity to familiarise themselves with the requirements of the speaking tests before conducting any tests.
Timetable deviation	Arrangements proposed by the Head of Centre to resolve any timetable clashes.
UCAS	University and Colleges Admissions Service.
UTC	Coordinated Universal Time – the primary standard by which the world regulates clocks and time.
Venue	A location where assessments are taken.
Verification of results	A service offered by Cambridge if a third party, such as an employer or university, wants to verify results we have issued. The third party or candidate applies for this service using Results and Certificates – Form 8.

Administrative forms

The majority of our administrative forms are available from the 'Exam administration' area of the Cambridge website: www.cambridgeinternational.org/forms. The name of the form tells you which phase of the Cambridge Exams Cycle it relates to.

You can access special consideration forms from the 'Support Materials' section of Direct. The forms you need to send with your coursework and speaking test samples are in the samples database (www.cambridgeinternational.org/samples).

ENGLISH LANGUAGE

Paper 9093/11
Reading

Key messages

- Candidates need to ensure that they read a wide range of material from a diverse range of sources such as advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.
- Candidates need to demonstrate knowledge and understanding of the linguistic elements and features of texts such as parts of speech/word classes, vocabulary, figurative language, phonology, morphology, rhetorical devices, voice, aspect, tense, modality, narrative perspective, word ordering and sentence structure, paragraph and text-level structure, formality/informality of register, pragmatics.
- Candidates should develop an intimate knowledge and understanding of the conventions and discourses associated with a diverse range of genres, styles and contexts, enabling them to respond reflectively, analytically, discursively and creatively, as is appropriate to the task or context.
- For **Question 1(a)**, the accompanying instructions and text provide the context and background information to guide the candidates as they produce their directed response. Candidates should use these to make carefully considered choices of appropriate lexis, register and tone to suit the task set and ensure they achieve the highest possible standards of accuracy and expression in their writing.
- For **Question 1(b)**, candidates need to ensure they compare the form, structure and language of the original text and their own, with a clear emphasis on selecting elements from both texts that may be analysed to demonstrate how writers' stylistic choices relate to audience and shape meaning.
- For **Question 2** candidates need to comment on the form, structure and language of a text. They are required to identify characteristic features of the text, relate them to the meaning, context and audience of the writing, organise information in their answers, and write using clear and appropriate language.
- A secure degree of technical accuracy – especially in the use of spelling, punctuation and tenses – is required at this level.

General comments

Candidates accessed and, to differing degrees, engaged with both texts well. The rubric was generally understood, with only a few candidates omitting either a part of a question or a full question. There were some brief responses to **Question 1(a)**. Candidates are required to write between 150 and 200 words. While there is no direct penalty for failing to adhere to this requirement, this is an aspect of the response's relevance to purpose. Candidates should remember that their work is marked for task focus and relevant content as well as expression and accuracy. Largely speaking, though, the paper was handled with understanding and competence. Only a few responses showed a lack of the language skills necessary for text analysis. This session, only a few candidates seemed to struggle to manage their time appropriately; such candidates consequently tended not to complete their last response.

Specific language features were generally well understood, but candidates must ensure that the features they identify are actually present in the passage and that they use specific examples of language use to support the identification of those features and link them to effects created. Not all candidates clearly understood the need to make precise connections between language features and their contribution to the full effect of the passage.

Question 1(a) is a directed response task. Candidates need to follow the instructions carefully to produce a written response informed by language, style and structure to fit a specific form, purpose and audience – in this session, the original text was taken from an information leaflet about beekeeping. Their reworking (or recasting) of the original text should incorporate recognisable conventions of the text type identified in the instructions; in this session it was the text for a speech opening to be given to a local school community (150–200 words) about keeping bees. Careful consideration of the target audience is required. Candidates

© 2025

are expected to write clearly, accurately, with relevant content, and effectively for the prescribed purpose and audience.

A good working knowledge of linguistics is indispensable in responding to **Question 1(b)**, where candidates are required to compare the text produced for **1(a)** with the given text analysing form, structure and language. Here, candidates are assessed for their ability to demonstrate comparative understanding of texts, with clear reference to characteristic features and comparative analysis of form, structure and language and how a writer's stylistic choices relate to audience to shape meaning. It is very important that candidates employ some form of comparative approach in their response to **Question 1(b)**. A topical approach guarantees continuous comparison in which a conclusion can be used to emphasise the essential similarities and differences between the two texts. Those who adopted a topical approach tended to be the candidates who demonstrated the most comprehensive linguistic analysis. This series, only a few candidates compared the given text for **Question 1** with that given for **Question 2**, generally writing their comparative commentary after writing their directed response. These candidates did not respond appropriately to the **Question 1(b)** text analysis task.

In **Question 2**, a sound knowledge of linguistics is again required as candidates are assessed on their ability to demonstrate understanding of a text in terms of meaning, context and audience with reference to characteristic features, and their ability to analyse form, structure and language.

Quite a few candidates did not show understanding of the need to make precise connections between language features and their contribution to the full effect of the given text.

Less successful responses could often have been improved through more precise use of language to link evidence with explanatory comments; phrases such as 'allows the reader to think' and 'this helps the readers to imagine' cannot be considered useful text analysis.

Comments on specific questions

Question 1

(a) Candidates were asked to read the text taken from an information leaflet about beekeeping. They were then required to write the opening text of a speech about keeping bees to be given to a local school community as if they were a beekeeper.

The characteristic features and conventions of a speech opening were adopted, and most responses showed clear understanding of the text. Most candidates acknowledged the directions of the rubric in part and were prompted by the contents of the text, addressing their speeches to a school community of students and/or parents and/or teachers.

Detailed responses showed close attention paid to the directive *Write the opening*…, and were structured accordingly with an effective opening (usually expressing gratitude in present tense) and an effective closure which provided a springboard for the rest of the speech, often in the subjunctive mood. Clear and effective responses paid attention to the point of view (a beekeeper), and this was evident in their introductions: 'my name is… and I have been a beekeeper for (xx) years'. Such responses also showed attention paid to the implicitly personal nature of the speech and its implicit purpose – to inform – although many responses simply emulated the persuasive style of the information leaflet.

Stronger responses generally addressed the audience respectfully, acknowledging both students and adults. They clearly identified the speaker's profession as a beekeeper and often included a brief explanation of the role. Many responses effectively engaged the audience early on by posing a question such as 'Who likes honey?' or by seemingly prompting a show of hands with queries like 'Does anybody here know what a hive is?'

The main body of the speech openings in these responses typically focused on explaining what beekeepers do in their important mission to keep bees safe and healthy. Some responses referred to swarming as a key opportunity for beekeepers to collect bees and transport them to a safe location. Occasionally, candidates mentioned the beekeeper wearing protective clothing, reinforcing the message that it is safe to handle bees with the right precautions.

© 2025

Lists were often shortened to suit the spoken form, with candidates usually naming just two types of flowers, most often sunflower and one other less common variety, which helped maintain clarity for both speaker and audience. Bee-related puns were used sparingly; when included, they were generally effective, for example, 'bee-kind to our planet', which appropriately emphasised the insect's ecological value.

The second half of many speeches shifted focus to actions students could take to help save bees. Common examples included promoting initiatives like 'Adopt a Beehive' or suggesting that families offer spare outdoor space for siting a hive. Candidates often referred to the first line in the final paragraph – *Honey bees have been on Earth for some 30 million years, but it is only in the last 5000 years* – of the source material to include fun facts, enhancing the appeal of the speech.

Most candidates avoided discussing the risk of bee stings, likely recognising that this might discourage younger students. The opening sections of the speech usually concluded effectively, either with an invitation for the audience to ask questions or a clear signpost of what was to come, for instance, 'Let me now tell you more about the ways you can help in our cause.'

Most candidates paid careful attention to the audience and the context of the piece, adopting an appropriate, modified formal register and a respectful tone whilst employing first, second and third person at various points throughout. Most candidates adapted material from the source text, including the factual details (though not in the same way as mentioned above) *pollinating one third*, *30 million years* and *last 5000 years*, and the many references to plants. Candidates engaged their audiences by employing second person and rhetorical questions, e.g. 'so how can you help in saving honey bees?' and triadic structure, 'flowers, vegetables and trees'. The voice, passion, empathy and agenda of a beekeeper in ensuring the survival of honey bees was captured by one candidate in the sentence, 'Honey bees might be small but, together, they carry one of the world's most important tasks on their backs.'

Many weaker responses offered a summary of the extract, drifted from the focus of the question and original text or quoted large amounts from the original text, which was rarely justified. They often simply listed pieces of information presented in the article without much attempt to shape it to the requirements of the task, especially regarding form, purpose and register. Many candidates failed to copy words accurately that were actually provided in the text, such as *pollination* and *environment*. Weaker responses often employed possession in common plural nouns. This was typically the case with bees ('bee's'), the spelling of which was, again, provided in the text. There were also many instances of unnecessary commas before most coordinating conjunctions. Expressions that did not flow easily included 'Bees grow more plants' and 'Bees are used to make honey'.

Specifically, these responses often began with casual salutations and frequently included multiple bee-related puns; for example, 'bee-utiful flowers' was especially common. They tended to list all the flowers and 'flowering herbs' mentioned in the source text, as well as all the suggested actions the community could take to help save bees. These lists were typically presented without explanation or justification, offering no indication of the relative importance of each action. As a result, activities such as reporting a swarm were presented as equally significant as more impactful efforts like improving communal spaces through the planting of wildflowers.

Striking the balance between showing understanding of the text and crafting an effective response is the key to this question and the tendency was perhaps to be a little too safe. It is important for candidates to be aware that understanding is not necessarily demonstrated by rearranging sections of the given text. The most effective writing often emerged towards the end of responses, once candidates freed themselves from the constraints of systematically addressing the text.

Most of the candidates abided by the guidelines concerning the length of their responses (150–200 words). Several candidates wrote considerably shorter pieces that did not best suit the form and purpose specified.

(b) Candidates were asked to compare their speech opening with the text from the information leaflet, analysing form, structure and language.

To do well in this task, candidates need to analyse form, structure and language and to directly compare different approaches and features in the two texts available to them, i.e. the text given and the one that they have just created. An integrated approach is more effective for this type of

© 2025

comparative task than dealing with each text separately. Where textual evidence is selected, candidates should remember to offer clear analysis of how the writer's choices of form, structure and language are related to audience and shape meaning.

Most candidates adopted the framework of the rubric in their responses, comparing and commenting on each aspect in turn. Many responses lacked supporting evidence in their comparisons. It is advised that candidates focus on the difference in formality, tone and registers, and collaborate language with form and structure to give a more robust response in terms of their analysis.

Generally, stronger responses included appropriate and accurate critical terminology to link evidence with explanatory comments on the effects created by the writers of the original passage and directed response. These stronger responses showed a clear distinction between a speech opening and its conventions and the conventions of an information leaflet; these responses regarded the given text and the candidate's own speech opening as of equal status and commented on both extensively. Such responses also offered a considerable amount of detail to illustrate points, showing a strong grasp of each feature and detail selected, and how each related to audience and shaped meaning. Furthermore, they noted that the primary purpose of the leaflet was both to inform and to persuade the audience to become involved. They also noted that the leaflet targets a significantly larger audience than other formats and is primarily intended for adults, as indicated by references to fundraising and the donation of outdoor space. Beekeeping is promoted as a profession, and it is possible that a young person might find the content intriguing enough to consider it as a potential career. The text is structured into smaller paragraphs with clear headings, helping readers to navigate to the sections most relevant to their interests and circumstances. The language used is relatively straightforward and accessible to most adults. Candidates commented that any technical terms, such as *swarming* or *pollination*, are made understandable by the context in which they appear. Finally, these responses considered that the leaflet makes a strong appeal to the public's ecological concerns, not only by emphasising the importance of saving bees, but also by promoting broader environmental restoration efforts, such as the replanting of wildflower meadows. The best noted that *Invite a beekeeper to visit*…, the final sub-heading, effectively contextualised the directed response task.

Comparative points in limited responses were often straightforward with little attempt to provide evidence from each text or to analyse the features identified. These responses were often brief, focused more – occasionally entirely – on the extract than on the directed response, did not compare 'like with like' and tended to summarise content rather than to analyse comparatively, with few or no supporting examples from the texts. They were often very general, showing little awareness of how writers' stylistic choices relate to audience and shape meaning. Some candidates mainly listed the conventions of writing associated with the genres without reference to the texts; and merely pointed out the variety of sentence types or length of paragraphs without any reference to effect. Many weaker responses took a reflective commentary approach – a requirement of Paper 2 – when analysing their own writing, often referring to what they could 'done better' which is not a requirement of the task. Weaker responses showed lack of precision with use of linguistic terminology; frequently, for example, reference was made to high or low register (rather that formal, informal or modified formal) and high, middle or low lexis (rather than high frequency or low frequency lexis).

Specifically, in respect of **form**, many responses offered basic comments: 'one is an information leaflet, and the other is a speech' was usual. Clear and effective responses addressed some of the conventions of each text, linking such conventions to purpose, audience and language. Thus, the conventional use of a boldfaced title, italicised subheading, boldfaced subheadings and 'call to action', from the point of view of the advocate(s) of the 'Adopt a Beehive' scheme in the information leaflet informed, persuaded and/or advised a 'UK based' and/or 'broad, adult audience' because of its implied reference to home ownership – *if you have the space*… – and its directive to *encourage your own local authority*…. Responses often began with a conventional personal introduction and/or a call to action, written from the point of view of a beekeeper. This approach was used to inform, persuade, or advise a mainly young audience of students, although parents and teachers were often included as well. The effectiveness of this approach lay in several features: the initial address named the school community directly; credibility was established by referring to the beekeeper's years of practical experience; the topic was clearly introduced at the outset; some responses included a preview of the main points; and the language throughout was friendly and engaging. Candidates considered the register of each text, with the most effective responses comparing the modified formal and/or informal features of each. It was clear in effective responses

© 2025

that attention had been paid to the rubric in that there was recognition that the task involved writing the text for the opening of a speech. Such responses generally closed with an adverbial phrase, e.g. 'here's a list of ways you can help', and/or the hortatory subjunctive to indicate this: 'now, let's look at this in more detail…'.

In respect of **structure**, many responses this series were limited in that they simply itemised the paragraphs in each piece and discussed their lengths – often, at length. Such responses also discussed long and short sentences in a limited manner. However, clear and effective responses compared the ways in which the setting out of 'problem and solution' in an abbreviated 10-point list, in the leaflet, and the use of hypophora, in their own texts, governed the structure of each piece. Attention was paid to the closing sections of the leaflet (with its succession of rhetorical questions from *Why not give them a call*… to *Why not invite*…) and to the intriguing closure and effective springboard in their own texts.

For comments on **language**, comparisons were often formulaic. It was usual for candidates to respond in terms of logos, ethos and pathos. That said, candidates noted the use of use of factual and numerical detail in the leaflet (*pollinating one third*, *30 million years* and *last 5000 years*) and the inclusion of such details in their own texts 'to endorse credibility' and to outline 'the legitimacy' of the task of beekeeping and the 'serious' or 'urgent' tone of the project involved: 'to save honey bees from extinction' because they are 'diminishing at an alarming rate', despite the fact that 'they are vital to all food production'. With this in mind, several candidates commented on the secondary purpose of the information leaflet, noting the 'soft sell' tactic with its inclusion of a hyperlink and details about how 'adoption money' would be spent (one candidate noted the 'hybrid' nature of this text). In addition to register, candidates compared the uses of direct address, with effective responses commenting on the various ways in which number and person were employed (first, second and third) and how each of these were linked to purpose and content. Several candidates compared the mood(s) employed in each text, commenting on the use of declaratives within the body of the text and imperatives and conditionals in the subheadings, in the leaflet, and their own use of declaratives ('to provide information') and interrogatives ('to engage' and/or to provide structure). Several rhetorical features were compared: the tri-colons of the leaflet (*a park, a roundabout or a hanging basket* and *local group, schools and clubs*); the listing of *asters, and sunflowers, hollyhocks*… (usually, identified as asyndetic listing); the metaphor in *bee-magnets* and punning in *abuzz* was compared to their own usage of such features and linked to the friendly tone of each piece. Finally, the use of present tense in each text was compared because it provided 'a sense of immediacy'.

Candidates would be well advised to note that 'comparative' is the most discriminating skill in terms of reading and especially analysis, analysis that not only explains how a technique works generally but also how specific effects are created that relate to audience and shaping of meaning. Furthermore, responses would benefit from clear references to the relevant text; this is particularly important when following a topical approach.

Question 2

Candidates were asked to read an extract from a non-fiction book about snow. They were then required to analyse the text, focusing on form, structure and language.

Most of the responses began with an overview of the purpose and audience and commented on the descriptive and reflective nature of the excerpt.

Candidates appeared to really enjoy this text and there were many detailed and clear responses about the conventions of the **form**. Most candidates were able to comment on some of the conventional features of this extract from a non-fiction book. They commented on the bolded title and the word itself as an instance of Icelandic language. The 'unfamiliarity' of the noun was clarified by the italicised subheading, which provided a translation in the form of a simile. It was noted that the title of the extract appears later in the text as the title of a song by the band Sigor Rós; as such, this was identified as an instance of cataphoric referencing. Clear and effective responses identified the purpose and topic: to inform and entertain a broad audience about snow; the 'topic of snow was linked', in the text, 'to Icelandic culture': to song and language. Candidates identified quotations and factual details (such as references to singer/band names and dates) together with the reference to a meteorologist, Trausti Jónsson. These were seen as indicative of the non-fiction form in establishing credibility. Further, the writer's use of third person assisted in establishing an objective voice in the text.

© 2025

In terms of **structural** features, responses frequently displayed confusion about the organisation of the text, and a number of personal opinions were introduced inappropriately. Responses generally commented on the way in which the writer initially 'sets the scene' by a quotation from an early traveller, PC Headley, and some reference was made to the 'dreamy atmosphere' with its focus on 'silence'; the latter, in detailed/effective responses, providing a circular structure since the text ends on the noun *silence*. There were also comments on the abrupt transition from past to present tense and the changing 'atmosphere' of Iceland, encapsulated by the short sentence *Yet the glaciers are vanishing* and the transition in the various metaphors employed, from *barely perceptible crackle of frost* and *howling* to *the throbbing bass* and *elfin […] vocals*. Other features of structure included the reference back to the title in the third paragraph with *Hundslappadrifa*'s cultural resonance as a unique entity of snow: its size (*as big as dog's paws*), its texture and comfort (*soft* and *blankets*) and its ability to bring joy implied through, *Children are glad….*

In respect of **language**, and in addition to the above, reference was made to 'personification' in *tongues of ice*, but comments were often in need of development; furthermore, personification was not clearly understood. Comments on language features were generally not developed. Reference was made to the form, structure and language of music, but little was made of the impact of auditory imagery, apart from *Björk exploded*, suggesting her 'immediate impact' on the music scene. Responses commented on the writer's use of indigenous language to establish credibility. Several candidates commented on the beauty of the language of the final paragraph with its encapsulation of *musical notes*, *flakes falling* and technology and the way in which they recede to *silence*.

In summary, stronger responses demonstrated a clear engagement with the structure of the text, particularly in relation to the opening paragraph. Candidates recognised that this section plays a crucial role in introducing the main idea, as meaning is constructed through the reader's interpretation of the contrast between the initial silence described by Headley and the subsequent rise in tourism. This tourism, prompted by a desire to escape the modern world, is later ironically mirrored by the sounds of Icelandic indie bands and singers, sounds that attempt to replicate the now-absent *crackle of frost* as the glaciers melt. Some of these stronger responses also showed an appreciation of the cyclical structure of the extract, identifying how the concluding paragraph returns to the theme of silence. The image of the snow ceasing to fall allows the microphone to capture only *silence* once again, creating a thoughtful and effective structural echo.

In addition, stronger responses paid close attention to the language of the opening paragraph, noting the evocative use of words such as *exhilaration* and the idiomatic expression *drinking in the sunlight*. These descriptions of the natural world were often linked to later metaphoric representations, such as *musical notes and flakes falling* (as above) and the Icelandic words for different kinds of snow (e.g. *bright*, *calm*), which were understood as suggesting a direct connection between snowfall and the creation of music. This idea was also recognised in the metaphor of the *otherworldly orchestra [that] fades to a soft and dusty patter*. They also noted the contrast between the lyrical, descriptive passages and the stark simplicity of a sentence like *Yet the glaciers are vanishing*. This contrast was seen to create emotional impact and shift the tone.

Some responses reflected on the role of music in the extract, suggesting that lyrics do not need to be fully understood, or even carry clear meaning, to be appreciated. Others concluded that the writer's main message is environmental: highlighting the impact of climate change as the driving force behind the melting glaciers.

Weaker responses usually struggled to make more than a few disparate observations about textual features with correct use of terminology, identification of an apt example and some effort to describe (if not explain) a direct effect created. Weaker responses tended to take a more literal and surface-level approach to the text. These responses often proposed that the intended audience was primarily people considering a holiday to Iceland or fans of indie music, without exploring deeper or more nuanced interpretations. Such responses typically focused on extracting factual details to support the idea that the writer's main purpose was to inform, often pointing to the use of third-person pronouns and the inclusion of proper nouns, especially the names of bands and singers. While many noted the use of the verb *exploded* to describe Björk's rise to fame, and generally understood that this suggested a sudden and impactful emergence, they tended to stop at this observation rather than considering how the language contributed to the wider themes or tone of the piece.

Furthermore, such weaker responses often described style, mood and vocabulary as having 'positive connotations' or 'negative connotations', with little further elaboration or definition. Similarly, a range of precisely constructed language effects were sometimes summed up as 'creating an interesting image' or 'to paint a picture'. It is important that candidates use precise terminology. These weaker responses listed techniques with no reference or example given or explanation.

© 2025

Basic responses offered very generalised comments. These responses identified some language features but offered minimal analysis. Such responses tended to summarise the contents of the text, generally at great length.

Selection of evidence by way of quotation was not always expertly used in these responses, with some candidates quoting at far too great a length or merely referring to a range of lines.

Quotation from the text should always be precise, as concise as possible and linked to explanatory comments. Candidates should be advised to: use quotations, evidence and evaluation to produce precise, meaningful commentaries; use appropriate language to link quotations and evidence with explanatory comments; and integrate quotations and evidence into a cohesive argument.

It would be helpful for candidates to be aware that the discriminator 'analysis is coherent and effectively structured' is a feature of the higher levels; a whole-text approach can often provide sophisticated and coherent analysis. A line by-line approach can lead to repetition of the same point, such as the author's use of alliteration. It is worth remembering that the same point cannot be rewarded twice.

Candidates would also be well advised to avoid dependence on too formulaic an approach to the analysis of Reading texts. The categorisation of elements of a text as representative of 'ethos' or 'logos' or 'pathos', for example, needs to be precisely developed by reference to exact effects of language. Candidates should also be advised that a glossary is not part of a given text but provided by Cambridge to provide definitions for words or phrases that may be unfamiliar, or that have specialised or technical meaning within the context of the document, and that consequently they have no need to comment on it.

ENGLISH LANGUAGE

Paper 9093/12
Reading

Key messages

- Candidates need to ensure that they read a wide range of material from a diverse range of sources such as advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.
- Candidates need to demonstrate knowledge and understanding of the linguistic elements and features of texts such as parts of speech/word classes, vocabulary, figurative language, phonology, morphology, rhetorical devices, voice, aspect, tense, modality, narrative perspective, word ordering and sentence structure, paragraph and text-level structure, formality/informality of register, pragmatics.
- Candidates should develop an intimate knowledge and understanding of the conventions and discourses associated with a diverse range of genres, styles and contexts, enabling them to respond reflectively, analytically, discursively and creatively, as is appropriate to the task or context.
- For **Question 1(a)**, the accompanying instructions and text provide the context and background information to guide the candidates as they produce their directed response. Candidates should use these to make carefully considered choices of appropriate lexis, register and tone to suit the task set and ensure they achieve the highest possible standards of accuracy and expression in their writing.
- For **Question 1(b)**, candidates need to ensure they compare the form, structure and language of the original text and their own, with a clear emphasis on selecting elements from both texts that may be analysed to demonstrate how writers' stylistic choices relate to audience and shape meaning.
- For **Question 2** candidates need to comment on the form, structure and language of a text. They are required to identify characteristic features of the text, relate them to the meaning, context and audience of the writing, organise information in their answers, and write using clear and appropriate language.
- A secure degree of technical accuracy – especially in the use of spelling, punctuation and tenses – is required at this level.

General comments

Candidates accessed and, to differing degrees, engaged with both texts well. The rubric was generally understood, with only a few candidates omitting either a part of a question or a full question. There were some brief responses to **Question 1(a)**. Candidates are required to write between 150 and 200 words. While there is no direct penalty for failing to adhere to this requirement, this is an aspect of the response's relevance to purpose. Candidates should remember that their work is marked for task focus and relevant content as well as expression and accuracy. Largely speaking, though, the paper was handled with understanding and competence. Only a few responses showed a lack of the language skills necessary for text analysis. This session, only a few candidates seemed to struggle to manage their time appropriately; such candidates consequently tended not to complete their last response.

Specific language features were generally well understood, but candidates must ensure that the features they identify are actually present in the passage and that they use specific examples of language use to support the identification of those features and link them to effects created. Not all candidates clearly understood the need to make precise connections between language features and their contribution to the full effect of the passage.

Question 1(a) is a directed response task. Candidates need to follow the instructions carefully to produce a written response informed by language, style and structure to fit a specific form, purpose and audience – in this session, the original text was an extract from a book by an explorer and adventurer. Their reworking (or recasting) of the original text should incorporate recognisable conventions of the text type identified in the instructions; in this session it was the text for a section of a leaflet (150–200 words) advising travellers of the landscapes that they will encounter in Suriname. Careful consideration of the target audience is required.

© 2025

Candidates are expected to write clearly, accurately, with relevant content, and effectively for the prescribed purpose and audience.

A good working knowledge of linguistics is indispensable in responding to **Question 1(b)**, where candidates are required to compare the text produced for **1(a)** with the given text analysing form, structure and language. Here, candidates are assessed for their ability to demonstrate comparative understanding of texts, with clear reference to characteristic features and comparative analysis of form, structure and language and how a writer's stylistic choices relate to audience to shape meaning. It is very important that candidates employ some form of comparative approach in their response to **Question 1(b)**. A topical approach guarantees continuous comparison in which a conclusion can be used to emphasise the essential similarities and differences between the two texts. Those who adopted a topical approach tended to be the candidates who demonstrated the most comprehensive linguistic analysis. This series, only a few candidates compared the given text for **Question 1** with that given for **Question 2**, generally writing their comparative commentary after writing their directed response. These candidates did not respond appropriately to the **Question 1(b)** text analysis task.

In **Question 2**, a sound knowledge of linguistics is again required as candidates are assessed on their ability to demonstrate understanding of a text in terms of meaning, context and audience with reference to characteristic features, and their ability to analyse form, structure and language.

Quite a few candidates did not show understanding of the need to make precise connections between language features and their contribution to the full effect of the given text.

Less successful responses could often have been improved through more precise use of language to link evidence with explanatory comments; phrases such as 'allows the reader to think' and 'this helps the readers to imagine' cannot be considered useful text analysis.

Comments on specific questions

Question 1

(a) Candidates were asked to read an extract from a book by an explorer and adventurer. They were advised that they worked for a travel agency that organises expeditions to remote locations for young adults and then required to write the text for a section of a leaflet advising travellers of the landscapes that they will encounter in Suriname.

The characteristic features and conventions of a leaflet section were adopted, and most responses showed clear understanding of the text. Most responses showed close attention to the rubric, recognising the point of view, as directed, in addition to some conventional features of the form and the advisory nature of the task. Most employed a title that embodied both a sense of place and of exoticism in the landscapes (for example 'Lustrous Landscapes of Suriname', 'Suriname's Forests: A Hidden Gem', 'The Last Refuge of Nature' and 'Surreal Suriname'). Responses were conventionally structured, employing subheadings and/or bullet point lists to advise young adults about features of the landscapes to be encountered. In clear and effective responses, such features included adaptations of the *calamitous cliffs*, the *ancient rocks*, the *gorge* with a waterfall, the *impenetrable forest*, the *tropical rainforest*, the *riverside camps*, the *gold mine* and the *mountainous […] peaks*.

Effective responses adapted elements of the original text to provide cautionary interjections about the dangers of the landscapes that might prove 'challenging for young adults': 'Travellers be warned, this expedition is not for the faint-hearted'. Reference was made to appropriate footwear ('wear sturdy shoes') and to 'protective clothing' (wear 'proper equipment and gear') and to insect repellents ('don't forget your bug spray'). These responses tended to use sub-headings to provide coherence (for example 'Wonderful Waterfalls'). In these stronger responses, there was precise selection of adjectives to describe aspects of the landscape ('verdant foliage', 'vertiginous slopes', 'precariously steep', 'sky-scraping trees'); visual ('a perfect sight to behold') and auditory imagery ('a sonic boom jolting your chest') was employed; furthermore, there was a focus on adventurous activities suitable to aspects of the landscape ('sketchy death-defying situation'); some referenced gold mines in a vein of eco-tourism ('despicable activities that defile the forest').

Candidates generally employed direct address, an 'upbeat' tone and present tense to engage and to provide a sense of immediacy: 'Are you tired of always visiting…'. Most candidates recognised

© 2025

the secondary purpose of the text, employing persuasive tactics such hyperbole ('you will gain the skills of a real explorer'), tricolon ('majestic landscapes, mountainous walks and exposed rock cliffs') and hypophora ('tired of the same, boring, over-hyped expedition locations?') Most candidates employed first-person plural in recognition of the point of view whilst appealing to the perceived, adventurous nature of young adults, searching for a unique experience: 'our team awaits your arrival' if you 'want to have the thrill of a lifetime'. A sense of excitement and adventure was embodied from the outset in one response by the employment of an imperative: 'Pack your bags!' Most of the leaflet sections closed with a call to action ('Join us now') or with the travel agency's contact details.

Many weaker responses offered a summary of the extract, drifted from the focus of the question (for example did not address *landscapes*) and original text or quoted large amounts from the original text in their directed response, which was rarely justified. They often simply listed pieces of information presented in the article without much attempt to shape it to the requirements of the task, especially regarding form, purpose and register.

In weaker responses, titles often prioritised the travel agency itself ('Eternal Expeditions'); bucket-list-like potential achievements were included ('Conquer the Devil's Egg', 'Mine for gold in Wild West territory'); remoteness was over-emphasised ('lose contact with the rest of the world') at the expense of vivid descriptions of natural features (ancient rock, biggest waterfall, shallow green swamps situated above sea level). Some of these weaker responses did not focus on the *landscapes* as directed in the question. Many weaker responses presented *slumbering dragons* in a literal rather than figurative sense; there were lapses in maintaining a travel agency's perspective, usually found in the leaflet's conclusion ('I do hope you guys have an unforgettable trip!').

Striking the balance between showing understanding of the text and crafting an effective response is the key to this question and the tendency was perhaps to be a little too safe. It is important for candidates to be aware that understanding is not necessarily demonstrated by rearranging sections of the given text. The most effective writing often emerged towards the end of responses, once candidates freed themselves from the constraints of systematically addressing the text.

Most of the candidates abided by the guidelines concerning the length of their responses (150–200 words). Several candidates wrote considerably shorter pieces that did not best suit the form and purpose specified.

(b) Candidates were asked to compare the text of their leaflet section with the extract, analysing form, structure and language.

To do well in this task, candidates need to analyse form, structure and language and to directly compare different approaches and features in the two texts available to them, i.e. the text given and the one that they have just created. An integrated approach is more effective for this type of comparative task than dealing with each text separately. Where textual evidence is selected, candidates should remember to offer clear analysis of how the writer's choices of form, structure and language are related to audience and shape meaning.

Most candidates adopted the framework of the rubric in their responses, comparing and commenting on each aspect in turn. Many responses lacked supporting evidence in their comparisons. It is advised that candidates focus on the difference in formality, tone and registers, and collaborate language with form and structure to give a more robust response in terms of analysis.

Generally, stronger responses included appropriate and accurate critical terminology to link evidence and explanatory comments on the effects created by the writers of the original passage and directed response. These stronger responses showed a clear distinction between a section of a leaflet and its conventions and the conventions of an extract from a book; these responses regarded the given text and the candidate's own speech opening as of equal status and commented on both extensively. Such responses also offered a considerable amount of detail to illustrate points, showing a strong grasp of each feature and detail selected, and how each related to audience and shaped meaning. In respect of the extract, stronger responses noted the expository writing to vividly describe exploration of a not well-known remote location with the purpose of engaging in extreme physical activities; the audience usually being young adventure travellers who themselves enjoy hazardous activities (climbing and abseiling); use of first person

© 2025

pronouns to vividly capture the author's direct experiences (*We hold our breath*); 'semi-formal' register mainly owing to the author's more personal and introspective comments (*speak to Helen*, *chapter of my baby's childhood*); appeal to the senses (*murky orange*); short sentences to create tension; the perspective that the author was not sufficiently physically and mentally prepared for his ordeal (*most remote and impenetrable forest*, *I was dying to get to something approaching civilization*, *a bleak start to the next few weeks in the interior*, *missing home desperately*).

Furthermore, stronger responses demonstrated a thoughtful comparison between the given extract and the directed response, as relevant, particularly in relation to purpose and audience engagement. They recognised the need to enthral the audience and pique their interest in a country they may not even know about or have previously considered travelling to. To support this aim, key pieces of advice were often presented in bullet points 'so they stand out' or 'cannot be missed', showing an awareness of how layout can aid communication. Some also argued that graphology can be employed to appeal to a younger audience, citing the use of bold and underlined text, or even 'a different font for title and sub-headings'. There was purposeful use of second-person pronouns, with one candidate commenting that this helped 'close the gap between experienced adventure traveller and aspirational young audience'. They commented that rhetorical questions were used effectively to entice the audience, such as 'Do you dare to venture forth into the remote interior of Suriname?' These were often followed by a clear call to action in the final sentence, including phrases like 'We strongly urge…', which gave the piece a confident and persuasive conclusion.

Comparative points in limited responses were often straightforward, with little attempt to provide evidence from each text or to analyse the features identified. In respect of the extract, weaker responses generally noticed the alliterative title *Forgotten Forest*; they argued that first-person pronouns place an emphasis on the 'narrator' and 'his own story and experiences'; they labelled much of the writing as 'descriptive' with little attempt to show how various effects were created, and attempted to characterise the content ('very beautiful and dangerous terrain'). Furthermore, they found the author's intention to be persuasive (neglecting the many indicators that he was regretful of his decision to go into the Forgotten Forest). These weaker responses often saw the intended audience of the extract as being 'young travellers'. In comparison with the directed responses, where relevant, candidates commented on the 'fast pace' of leaflets created via short sentences and paragraphs to 'energise' the reader (and 'mimic the author'); there was a high incidence of 'you' considered to appeal to and influence the decision-making of impressionable potential customers; such responses saw the use of the semantic field of enjoyment ('joy', 'elated' and 'fun') as 'the primary aim of young travellers'.

Weaker responses were often brief, focused more – occasionally entirely – on the extract than on the directed response, did not compare 'like with like' and tended to summarise content rather than to analyse comparatively, with few or no supporting examples from the texts. They were often very general, showing little awareness of how writers' stylistic choices relate to audience and shape meaning. Some candidates mainly listed the conventions of writing associated with the genres without reference to the texts, and merely pointed out the variety of sentence types or length of paragraphs without any reference to effect. Many weaker responses took a reflective commentary approach, a requirement of Paper 2, when analysing their own writing, often referring to what they could 'done better' which is not a requirement of the task. Weaker responses showed lack of precision with use of linguistic terminology, chronology was not always clearly understood and types of verb received little attention (present continuous, dynamic and stative).

Specifically, in respect of **form**, clear and effective responses addressed some of the conventions of each text, linking such conventions to purpose, audience and language. Thus, the conventional use of a boldfaced title and short subtitle together with the autobiographical nature of the extract, combination of first and third person, factual detail and explorer's point of view served to inform and entertain a broad, adult audience interested in exploration and adventure. In the leaflet text, the conventional use of a title, subheadings, lists, call to action and contact details together with the employment of first and second person and travel agency point of view served to inform, advise and entertain an audience of young people searching for a unique and adventurous 'get-away', or 'adventurers and thrill-seekers', as one candidate put it. Candidates compared the modified formal/semi-formal register of the texts and the ways in which these appealed to their respective audiences.

In respect of **structure**, In addition to comments on form, and in clear and effective responses, candidates commented on the ways in which the extract evoked 'curiosity': beginning with the title

© 2025

Forgotten Forest and continuing through various shifts in focus and tone from the 'abrupt', 'dramatic' and italicised, opening paragraph with its focus on the 'dangerous' or 'precarious' surroundings (implied by the noun *Rock!* and *a boulder swoops*) to 'calmer' but, often, 'gloomier' sections when the writer is recounting his frustrations – *the internet connection […] was poor / would have taken weeks of jungle hacking* –, his 'despondency' and 'regrets' (*missing home desperately*, *an unrepeatable chapter of my baby's childhood was slipping away*) and his environmental concerns (*energy companies prowl offshore, coveting*…). Candidates compared how they had created curiosity in their titles and how their focus and tone were dictated by the form and purpose of their pieces and, as such, although they included shifts in focus from informative to advisory, they were far more 'upbeat' in their 'soft sell' tactics. The paragraph sequencing of the extract with its 'temporal references' and 'time shifts', such as *After three weeks* and *our journey began* (though, often, referred to as chronological order), and its various shifts in tense from present to past, was compared to their own sequencing of information and advice (generally their use of subheadings and bullet points) and changes in tense. One candidate indicated that they had 'focused on sights rather than the perilous process of getting to those sights'. Some reference was made to the variety of sentence structures, in each, with the short sentences of the extract which, in some instances, added to the 'intensity' of the unfolding drama (taken from *We hold our breath*) being compared to short imperative and/or exclamatory sentences in their leaflet: 'Book now!'

For **language**, candidates commented on the vivid, sensory imagery of the extract, both visual and auditory. For some candidates, the writer created 'wondrous detail' a 'fantastical mood' in the metaphor *slumbering dragons*. For one candidate, the onomatopoeic *boom* evoked a 'death defying tone'. Candidates commented on the writer's use of alliteration and sibilance (*calamitous cliffs* and *sandy slop*) and how these, in addition to hyperbolic similes, such as *like a fly caught in a storm-blown web*, contributed to the 'entertainment' value and 'drama' of the extract. Candidates compared these rhetorical features to the ways in which they had employed visual imagery and hyperbole to suggest the variety of landscapes to be encountered in Suriname. For one candidate, the lush landscape of Suriname was a 'hidden gem'. For another, the 'fairy tale' landscape of Suriname was 'like heaven on earth'. For yet another, who had noted the writer's concern with both the flora and fauna of the region, the landscape came with 'bat sized mosquitoes' – the latter being employed to contrast the negative tones of the extract, with the positive ones of the leaflet. Finally, candidates commented on the variety of moods in the extract with attention being drawn to the interweaving of factual/numerical declaratives (*13 billion barrels of oil* and *with $10000 apiece*) to establish the writer's credibility. The moods of the extract were compared to their own (as above), with credibility established by reference to the travel agency's credentials (we provide 'professional tour guides') and contact details: 'Contact us at SurinameTravellersAgency@gmail.com.'

Candidates would be well advised to note that 'comparative' is the most discriminating skill in terms of reading and especially analysis, analysis that not only explains how a technique works generally but also how specific effects are created that relate to audience and shaping of meaning.

Furthermore, candidates' responses would benefit from clear references to the relevant text; this is particularly important when following a topical approach.

Question 2

Candidates were asked to read the text from an article about how scientists plan to build biocomputers to emulate the human brain.

They were then required to analyse the text, focusing on form, structure and language.

Most of the responses began with an overview of the purpose and audience and commented on the descriptive and reflective nature of the excerpt.

Most candidates had a clear understanding of some of the conventional features of the article's **form**. Clear responses commented on the bolded and 'telegraphic' title as being 'straightforward' or 'matter-of-fact'. Effective responses identified the 'shocking' or 'sensational' nuances of making *computers out of brain* and that this provided the initial 'hook', arousing the curiosity of a broad audience interested in the 'latest technological developments'. Such responses then commented on how the nuances of the title were clarified in the italicised subheading by explaining that *scientists borrow the performance of the brain for computing* but that a positive outcome for such a 'pioneering project' was not certain, as indicated by the stative verb in *they hope*. For most candidates, the writer's use of formal register conveyed in the use of third person, quotations from reputable/expert sources, data, and jargon was indicative of an objective article, the purpose

© 2025

of which was to educate, to inform and even to persuade. For a few candidates, subliminal 'bias' could be detected in the positive tone throughout and the inclusion of quotations from Thomas Hartung, whose aim was to brook 'any opposition' to OI by emphasising the *ethical and socially responsible* vision of the project.

In terms of **structural** features, most candidates commented on the short paragraph structure of the extract, including the one-sentence paragraph in which Hartung is quoted. The latter served 'to emphasise' the storage capacity of the human brain (*2500 terabytes*) and the 'scale' of the OI project in scientists' attempts to emulate such storage capacity in new computers. Effective responses focused on the ways in which paragraphs were sequenced in present tense, opening, topically, with the aspirations of scientists, then shifting to some contextualisation, then to 'technical aspects', then to 'potential benefits to the world' and closing on a reputable source to endorse the credibility of both the project and the article. For some, structural cohesion was considered to have been achieved, in the article, through the writer's employment of repetition at the beginning of paragraphs and throughout the text. They noted that 'scientists and researchers are mentioned' frequently.

In respect of **language**, and in addition to numerical data (linked to science and computing), several candidates commented on the jargon of the article, with one candidate identifying the telescoping of the noun *biocomputers*, and the verb *biocomputing* to provide an effective 'shorthand' for science/computer 'geeks'. The coinage of *organoid intelligence* and its abbreviation 'OI' served to embody the 'exciting' new development in the world of computing. Most candidates identified Hartung's use of tricolon in *fast, powerful, and efficient* which served to emphasise his aspirations for new computers. They also commented on Hartung's use of tricolon in *scientists, ethicists, and the public* which served to endorse his emphasis of *partnership*.

In addition, stronger responses commented on the impressionistic title, especially the phrase *make computers out of brain*; they noticed an optimistic tone (as above) expressed through *they hope* in both lines 3 and 24 (especially as a 'standalone' in the former instance); they also commented on the use of factual content that does not always 'overwhelm the reader', such as *1015 connection points* and *50,000 cells* in respect of the *brain organoids* because 'readers appreciate the human brain consists of many billions of cells'. Such stronger responses commented on instances of tech-related lexis (*silicon*, *transistors*), though the article's relatively little scientific jargon was considered to be a virtue as it might otherwise alienate general readership. They saw the use of third person helped cast scientists as 'higher level entities' who did 'mind-bogglingly innovative work'; these valued the comparison of the human brain's superior capacity (*wired completely differently*) to a *tiny chip* as illustrative of the complexity of the work being undertaken. There was consideration of the metaphor *a host of work* as understatement of what has yet to be accomplished and evaluation of the alliterative, plosive *building biocomputers* as a useful means to encapsulate the article's topic ('a pithy takeaway concept'). The effect of triadic structure *fast, powerful and efficient* was considered to succinctly characterise bio-computing; the rule of three *learn, remember – and perhaps even understand* was seen to serve as an effective segue into the final section of article, i.e. the ethical dimension of the issue.

Weaker responses usually struggled to make more than a few disparate observations about textual features with correct use of terminology, identification of an apt example and some effort to describe (if not explain) a direct effect created. These responses tended to take a more literal and surface-level approach to the text. They found the subject would 'fascinate' a general reader on basis that the audience is familiar with computers and 'we all' have a brain. These weaker responses noted that the sub-heading creates both 'certainty and uncertainty' that could 'confuse many readers'. Statistical information was considered as 'gives readers a solid base to research further the topic' and the article's 'high lexis appeals to intellectual people'. Some candidates questioned the veracity of the Hartang quotation *A community of top scientists has gathered to develop this technology . . . efficient biocomputing* and labelled it 'science fiction'. Often the single-sentence paragraph was 'designed to help the reader remember it'.

Furthermore, such weaker responses often described aspects of the text as having 'positive connotations' or 'negative connotations', with little further elaboration or definition. Similarly, a range of precisely constructed language effects were sometimes summed up as 'creating an interesting image' or 'to paint a picture'. It is important that candidates use precise terminology. These weaker responses listed techniques with no reference or example given or explanation.

Basic responses offered very generalised comments. These responses identified some language features but offered minimal analysis. Such responses tended to summarise the contents of the text, and they generally did this at great length.

© 2025

Selection of evidence by way of quotation was not always expertly used in weaker responses, with some candidates quoting at far too great a length or merely referring to a range of lines.

Quotation from the text should always be precise, as concise as possible and linked to explanatory comments. Candidates should be advised to use quotations, evidence and evaluation, to produce precise, meaningful commentaries; use appropriate language to link quotations and evidence with explanatory comments and integrate quotations and evidence into a cohesive argument.

It would be helpful for candidates to be aware that the discriminator 'analysis is coherent and effectively structured' and similar descriptors, are a feature of the higher levels; a whole text approach can often provide sophisticated and coherent analysis. Another consequence of taking a line by-line approach can lead to repetition of the same point, such as the author's use of alliteration. It is worth remembering that the same point is not be rewarded twice.

Candidates would also be well advised to avoid dependence on too formulaic an approach to the analysis of Reading texts. The categorisation of elements of a text as representative of 'ethos' or 'logos' or 'pathos', for example, needs to be precisely developed by reference to exact effects of language. Candidates should also be advised that a glossary is not part of a given text but provided by Cambridge to provide definitions for words or phrases that may be unfamiliar, or that have specialised or technical meaning within the context of the document, consequently, they have no need to comment on it.

Paper 9093/13
Reading

Key messages

- Candidates need to ensure that they read a wide range of material from a diverse range of sources such as advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.
- Candidates need to demonstrate knowledge and understanding of the linguistic elements and features of texts such as parts of speech/word classes, vocabulary, figurative language, phonology, morphology, rhetorical devices, voice, aspect, tense, modality, narrative perspective, word ordering and sentence structure, paragraph and text-level structure, formality/informality of register, pragmatics.
- Candidates should develop an intimate knowledge and understanding of the conventions and discourses associated with a diverse range of genres, styles and contexts, enabling them to respond reflectively, analytically, discursively and creatively, as is appropriate to the task or context.
- For **Question 1(a)**, the accompanying instructions and text provide the context and background information to guide the candidates as they produce their directed response. Candidates should use these to make carefully considered choices of appropriate lexis, register and tone to suit the task set and ensure they achieve the highest possible standards of accuracy and expression in their writing.
- For **Question 1(b)**, candidates need to ensure they compare the form, structure and language of the original text and their own, with a clear emphasis on selecting elements from both texts that may be analysed to demonstrate how writers' stylistic choices relate to audience and shape meaning.
- For **Question 2** candidates need to comment on the form, structure and language of a text. They are required to identify characteristic features of the text, relate them to the meaning, context and audience of the writing, organise information in their answers, and write using clear and appropriate language.
- A secure degree of technical accuracy – especially in the use of spelling, punctuation and tenses – is required at this level.

General comments

Candidates accessed and, to differing degrees, engaged with both texts well. The rubric was generally understood, with only a few candidates omitting either a part of a question or a full question. There were some brief responses to **Question 1(a)**. Candidates are required to write between 150 and 200 words. While there is no direct penalty for failing to adhere to this requirement, this is an aspect of the response's relevance to purpose. Candidates should remember that their work is marked for task focus and relevant content as well as expression and accuracy. Largely speaking, though, the paper was handled with understanding and competence. Only a few responses showed a lack of the language skills necessary for text analysis. This session, only a few candidates seemed to struggle to manage their time appropriately; such candidates consequently tended not to complete their last response.

Specific language features were generally well understood, but candidates must ensure that the features they identify are actually present in the passage and that they use specific examples of language use to support the identification of those features and link them to effects created. Not all candidates clearly understood the need to make precise connections between language features and their contribution to the full effect of the passage.

Question 1(a) is a directed response task. Candidates need to follow the instructions carefully to produce a written response informed by language, style and structure to fit a specific form, purpose and audience – in this session, the original text was an article about making journeys on sleeper trains. Their reworking (or recasting) of the original text should incorporate recognisable conventions of the text type identified in the instructions; in this session it was the opening text for a brochure (150–200 words) advertising the launch of a company's new sleeper train journey. Careful consideration of the target audience is required. Candidates

© 2025

are expected to write clearly, accurately, with relevant content, and effectively for the prescribed purpose and audience.

A good working knowledge of linguistics is indispensable in responding to **Question 1(b)**, where candidates are required to compare the text produced for **1(a)** with the given text analysing form, structure and language. Here, candidates are assessed for their ability to demonstrate comparative understanding of texts, with clear reference to characteristic features and comparative analysis of form, structure and language and how a writer's stylistic choices relate to audience to shape meaning. It is very important that candidates employ some form of comparative approach in their response to **Question 1(b)**. A topical approach guarantees continuous comparison in which a conclusion can be used to emphasise the essential similarities and differences between the two texts. Those who adopted a topical approach tended to be the candidates who demonstrated the most comprehensive linguistic analysis. This series, only a few candidates compared the given text for **Question 1** with that given for **Question 2**, generally writing their comparative commentary after writing their directed response. These candidates did not respond appropriately to the **Question 1(b)** text analysis task.

In **Question 2**, a sound knowledge of linguistics is again required as candidates are assessed on their ability to demonstrate understanding of a text in terms of meaning, context and audience with reference to characteristic features, and their ability to analyse form, structure and language.

Quite a few candidates did not show understanding of the need to make precise connections between language features and their contribution to the full effect of the given text.

Less successful responses could often have been improved through more precise use of language to link evidence with explanatory comments; phrases such as 'allows the reader to think' and 'this helps the readers to imagine' cannot be considered useful text analysis.

Comments on specific questions

Question 1

(a) Candidates were asked to read an article about making journeys on sleeper trains. They were advised that they worked for a railway company and required to write the opening text for a brochure advertising the launch of the company's new sleeper train journeys.

The characteristic features and conventions of a producing persuasive and promotional brochure openings which focused on the launch of advertising the company's new sleeper train journeys were generally understood. Most candidates employed language typical of marketing material, using emotive vocabulary, rhetorical questions and positive adjectives to highlight the benefits of sleeper train travel. Phrases such as 'wake up in a new city', 'escape the hassle of flying' or 'travel greener, sleep deeper' were common, achieving the desired tone and register. Most responses were conventionally structured, employing subheadings and/or bullet point lists to advise young adults about features of the landscapes to be encountered.

There was a general consistency in register, with many candidates adopting a modified formal tone that reflected a serious business promoting its service to a target audience of experienced or regular travellers, particularly business clients, though some responses also referenced leisure travel and special excursions. Openings were often enthusiastic and eye-catching, with candidates supplying short, relevant titles such as 'Dream Destinations' (a pun on sleeper coaches), and subheadings like 'Book the train ride of a lifetime', which captured attention and set the tone for the rest of the piece.

Effective responses usually addressed the reader as early as possible, often simply through the use of the second person pronoun 'you'. They clearly identified and highlighted the most attractive features of sleeper trains. For example, many noted the promise of a comfortable night's sleep in beds, 'equivalent to those found in 5-star hotels'. The smooth, electric-powered nature of the trains was also referenced, presumably based on the assumption implied by the phrase *renewable energy*. Candidates described either the sleek, modern styling of the trains or their nostalgic appeal, reminiscent of the golden age of rail travel, such as the Orient Express-style 'red velvet seats lined with gold trim that elegantly invite you to take your seat'.

© 2025

These responses often appealed effectively to customers' environmental concerns, particularly their desire to reduce their carbon footprint. This was reflected in persuasive lines such as 'travel with a clear conscience […] only 20 kg of CO_2 released per journey'. Candidates also made a virtue of the panoramic experience offered by large windows, which allowed passengers to 'marvel at snowy peaks framed by a starry sky on a crisp Alpine night'.

Finally, stronger responses incorporated the sentiment of enjoyment expressed by Julia Senninger in the direct quotation *It's so much more fun*. This sense of pleasure was further supported by her reference to the opportunity to meet *new, interesting people*.

Many weaker responses offered a summary of the extract, drifted from the focus of the question (for example lacking focus on the *launch* of a new sleeper train) and original text, or quoted large amounts from the original text in their directed response, which was rarely justified. They often simply listed pieces of information presented in the article without much attempt to shape it to the requirements of the task, especially regarding form, purpose and register.

Weaker responses tended to focus heavily on listing destinations and types of travellers, often at the expense of developing a persuasive tone or promoting the specific benefits of sleeper train travel. Rather than highlighting the virtues of electric sleeper services, many took every opportunity to criticise air travel, frequently describing it as 'dirty', which sometimes resulted in an unbalanced or overly negative comparison.

Of these weaker responses, some candidates did not select an appropriate or persuasive name for the company they were representing. For example, 'Station Stripes' fails to clearly communicate the advantages or appeal of sleeper trains. Others produced advertising copy that lacked clarity or coherence, such as the line 'Listen to, NO! embrace the tranquillity', or the unfinished slogan 'Enjoy the miles and miles of open', which left the potential audience confused.

A few responses included content that was irrelevant to the task or lacked audience awareness. One candidate opened with an unnecessarily long historical overview of modes of transportation, while another described the target audience as 'the environmentally cautious', a phrase that unintentionally downplayed the urgency or conviction often associated with sustainable travel choices.

Striking the balance between showing understanding of the text and crafting an effective response is the key to this question and the tendency was perhaps to be a little too safe. It is important for candidates to be aware that understanding is not necessarily demonstrated by rearranging sections of the given text. The most effective writing often emerged towards the end of responses, once candidates freed themselves from the constraints of systematically addressing the text.

Most of the candidates abided by the guidelines concerning the length of their responses (150–200 words). Several candidates wrote considerably shorter pieces that did not best suit the form and purpose specified.

(b) Candidates were asked to compare the text of their leaflet section with the extract, analysing form, structure and language.

To do well in this task, candidates need to analyse form, structure and language and to directly compare different approaches and features in the two texts available to them, i.e. the text given and the one that they have just created. An integrated approach is more effective for this type of comparative task than dealing with each text separately. Where textual evidence is selected, candidates should remember to offer clear analysis of how the writer's choices of form, structure and language are related to audience and shape meaning.

Most candidates adopted the framework of the rubric in their responses, comparing and commenting on each aspect in turn. Many responses lacked supporting evidence in their comparisons. It is advised that candidates focus on the difference in formality, tone and registers, and collaborate language with form and structure to give a more robust response in terms of analysis.

Generally, stronger responses included appropriate and accurate critical terminology to link evidence and explanatory comments on the effects created by the writers of the original passage and directed response. Candidates recognised that the article employed a modified formal or mixed

© 2025

register, alternating between first person (from the company's perspective), second person (addressing the reader), and third person (to describe features and provide commentary). These choices supported an informative yet engaging tone, underpinned by a number of credibility-building devices. They noted that, in the given text, quotations from real passengers, such as Julia Senninger, served as indirect endorsements, while statistics such as the comparison of 250kg of CO_2 for air travel vs 26kg for trains reinforced the environmental case. Some candidates also commented on stylistic features, such as the alliterative *coaches and capacity to carry*, the onomatopoeic *buzz* conveying anticipation, and the triadic structure *adventurous, romantic and efficient*, which encapsulates the ethos of sleeper travel in a positively connoted phrase.

The comments from above were compared, as relevant, to their own directed response, noting that their tone was more promotional and energetic, designed to excite and persuade a travel-curious or younger audience. They described their use of direct address ('You deserve to travel in style'), rhetorical questions ('Why waste time in airports when you could wake up in a new country?'), and imperatives typical of advertising language ('Book now!', 'Don't delay!'). Some included short quotations as testimonials, for example 'Competitive cost, environmentally friendly, a relaxing experience', mimicking the article's use of expert or user perspectives.

Many stronger responses also addressed **structure**. Candidates recognised that the article adopted a chronological structure, beginning with a recent example *Back in October* and expanding outward to broader European developments. This helped frame sleeper trains as both a personal and pan-European experience. By contrast, where relevant, directed responses typically featured a thematic structure, organised around key benefits such as comfort, sustainability, and convenience. These were often signposted with bold headings and subheadings, for example 'Why Choose Sleeper Travel?' or 'Your Journey Starts Here' and occasionally bullet points, used judiciously for emphasis. There was also recognition of the present tense to highlight the sleeper service's immediacy and the future tense to suggest aspirations or outcomes: 'Travel will never be the same again'.

In terms of **language**, and in addition to above, many candidates identified that the title of the article suggested a sense of something being revived or brought back to life, aligning with the theme of the resurgence of sleeper trains. They commented on the use of quotations from both rail company representatives and passengers, recognising these as strategies to add credibility and authenticity to the article's claims.

The environmental benefits of train travel were frequently mentioned, with most candidates noting how the article contrasted rail and air travel, typically to the detriment of the latter. The inclusion of facts and figures (such as CO_2 emissions as above) was widely understood as reinforcing the case for sleeper trains, though at times candidates focused too heavily on the air travel comparison, both in analysis and in their own directed response.

Some candidates recognised the use of tripartite structures, such as *adventurous, romantic and efficient*, though fewer explored the effect of listing European cities, which was less commonly analysed. There was also general awareness of the article's romanticised portrayal of train journeys, for instance, the idea that sleeping onboard saves the cost of a hotel and creates a more pleasurable, experience-rich journey.

However, relatively few candidates commented on the wider tone of rejuvenation or revival present in the article. This was perhaps because many were more focused on the competitive advantages of rail over air travel, a theme that also dominated much of the language in their own directed responses. As a result, there was sometimes limited attention to the article's broader emotional appeal, beyond its practical benefits.

Weaker responses were more likely to treat the article and directed response separately, offering descriptions rather than comparisons. Many simply listed features, for example 'the article used quotes' or 'my writing used adjectives', with little explanation of effect or audience engagement. Some overlooked the importance of form and structure, focusing only on surface-level content or language. Others misunderstood the article's purpose, interpreting it as an argument about sleep itself, or mischaracterising its tone as entirely promotional rather than informative.

Less successful commentary also included generalisations such as the article being 'unbiased' for acknowledging both air and rail travel benefits, or over-simplistic observations about third person vs second person use.

© 2025

Such weaker responses often did not compare 'like with like' and tended to summarise content rather than to analyse comparatively, with few or no supporting examples from the texts. They were often very general, showing little awareness of how writers' stylistic choices relate to audience and shape meaning. Some candidates mainly listed the conventions of writing associated with the genres without reference to the texts, and merely pointed out the variety of sentence types or length of paragraphs without any reference to effect. Many weaker responses took a reflective commentary approach, a requirement of Paper 2, when analysing their own writing, often referring to what they could 'done better' which is not a requirement of the task. These responses showed lack of precision with use of linguistic terminology.

Candidates would be well advised to note that 'comparative' is the most discriminating skill in terms of reading and especially analysis, analysis that not only explains how a technique works generally but also how specific effects are created that relate to audience and shaping of meaning.

Furthermore, candidates' responses would benefit from clear references to the relevant text; this is particularly important when following a topical approach.

Question 2

Candidates were asked to read an extract from a non-fiction book about mindfulness. They were then required to analyse the text, focusing on form, structure and language.

Most of the responses began with an overview of the purpose and audience and commented on the descriptive and reflective nature of the excerpt. The most successful responses demonstrated not only a sound grasp of language, structure and form, but also an appreciation of the writer's purpose: to reflect, to connect, and ultimately to inspire empathy and action through shared humanity.

Stronger responses demonstrated a clear understanding of the writer's purpose, recognising that *The Invisible Army* was structured not just to recount a personal experience, but to offer advice, inspiration, and a call to action. Many noted that the title itself intrigued the reader, suggesting something hidden yet powerful, with the identity of the 'army' gradually revealed through the narrative and reflections.

These responses often highlighted the opening anecdote, describing how it immediately engaged the reader and created a personal connection. Phrases such as *our home* implied a family unit, and the first-person narrative drew the reader into the experience. Some referred to the speaker as a 'protagonist' or 'narrator' who was 'average' or 'ordinary', which allowed readers to sympathise with their vulnerability.

There was a strong focus on tone and structure, with perceptive commentary on how the piece evolved from a personal account to a broader, more philosophical message. Candidates observed that the use of discourse markers and the shift to a numbered list in the second half served to ease the reader into sensitive reflections, creating an almost conversational guide. One stronger response commented on this as a move 'from emotional recount to philosophical guidance', noting how each point developed the themes of connection and compassion.

Many responses were sensitive to the impact of language choices, including emotive lexis such as *helplessness*, *hurt*, and *flooding our minds*, which conveyed the trauma of the break-in. The use of idiom, like *power of love* and *love in action*, was interpreted as conveying warmth and collective strength, while metaphorical imagery was often seen to reinforce abstract values through emotional resonance.

The imperative mood, used in lines such as *Pick up the phone to say hi…*, was successfully analysed as a gentle call to action, fostering a tone that was empowering rather than forceful. The use of tricolon and repetition, for instance *say hi and check in*, *be honest, share your troubles*, and the repeated use of *do not*, was seen to give rhythm and clarity to the message, as well as reinforce its key ideas.

Stylistic features such as polysyndeton, for example, *and police were called and reports filed*, were explored in stronger responses, for their role in conveying a stream-of-consciousness effect, reflecting the narrator's sense of disorientation or emotional overload. Alliteration, such as *family, friends* and *more and more messages*, was sometimes highlighted for the emphasis it gave to the communal aspects of the narrator's recovery.

The most successful commented on tonal shifts across the piece – from the fear and tension of the initial break-in to a final tone of hope, gratitude and reflection. Several recognised how contrast was used, for

© 2025

example between digital communication and human connection, or self-sufficiency and accepting support to develop the message that genuine help is both powerful and needed.

In contrast, weaker responses tended to rely on narrative summary, retelling the events of the break-in and the community's response without analysing how the writer's stylistic choices shaped meaning. While many identified features such as the first-person voice or the emotive language, they often stopped short of exploring the effects of such devices in detail. For instance, some commented that 'this creates emotion' or 'this makes the reader want to read more' without elaborating on how or why.

Some of these weaker responses repeated similar ideas, focusing heavily on the sense of 'hopelessness' or 'community' without developing a nuanced comparison or analysis. Others misunderstood aspects of the text, for example interpreting *one autumn night* as establishing a dark, gothic atmosphere, or suggesting that the narrator's use of advice implied obligation (*must*), when the tone was in fact more invitational.

While many weaker candidates identified the personal tone, lists, and emotive vocabulary, they didn't often link these to the writer's broader purpose or intended audience. Some labelled the text as merely 'emotional' or referred vaguely to 'personal growth' without connecting these ideas to specific stylistic features. There was also a tendency to ignore form and structure, despite clear shifts in paragraphing and tone that reflected the writer's development from personal trauma to communal uplift.

Furthermore, many of these weaker responses neglected to discuss how structure supported meaning, for example, how the lengthier early paragraphs may have been intended to slow the pace and emphasise seriousness, or how the use of a numbered list helped organise advice clearly and accessibly. Likewise, while repetition and rhetorical questions were often mentioned, few candidates analysed their rhetorical or persuasive effect in detail.

Basic responses offered very generalised comments. These responses identified some language features but offered minimal analysis. Such responses tended to summarise the contents of the text, generally at great length.

Selection of evidence by way of quotation was not always expertly used in weaker responses, with some candidates quoting at far too great a length or merely referring to a range of lines.

Quotation from the text should always be precise, as concise as possible and linked to explanatory comments. Candidates should be advised to: use quotations, evidence and evaluation, to produce precise, meaningful commentaries; use appropriate language to link quotations and evidence with explanatory comments; and integrate quotations and evidence into a cohesive argument.

It would be helpful for candidates to be aware that the discriminator 'analysis is coherent and effectively structured' is a feature of the higher levels; a whole-text approach can often provide sophisticated and coherent analysis. A line by-line approach can lead to repetition of the same point, such as the author's use of alliteration. It is worth remembering that the same point cannot be rewarded twice.

Candidates would also be well advised to avoid dependence on too formulaic an approach to the analysis of Reading texts. The categorisation of elements of a text as representative of 'ethos' or 'logos' or 'pathos', for example, needs to be precisely developed by reference to exact effects of language. Candidates should also be advised that a glossary is not part of a given text but provided by Cambridge to provide definitions for words or phrases that may be unfamiliar, or that have specialised or technical meaning within the context of the document, and that consequently they have no need to comment on it.

© 2025

ENGLISH LANGUAGE

Paper 9093/21
Writing

Key messages

- Candidates should manage their time carefully, allocating an equal amount of time for each section of the paper. Quite often, the time spent on ***Section A*** seemed to have left candidates insufficient time to meet the required word count in ***Section B*** or to satisfactorily complete the task.
- Candidates must understand the importance of writing in clear, properly punctuated English, with accurate sentence demarcation, to perform well in this exam. Punctuation is a vital and essential aid to communication, especially as a guide to the structure of sentences, so it is imperative that candidates know and understand the basics of sentence construction if they are to succeed on this paper.
- Clear expression in simple and compound sentences without much variety is preferable to expression that does not flow, in long, rambling sentences. Often, weaker candidates lose control of grammar when they attempt to write in long, complex sentences. One error that again occurred regularly was that of separating sentences with commas rather than full stops; another common error was writing in sentence fragments. Clear and accurate sentence demarcation is crucial, followed by the accurate use of a wider range of punctuation.
- Candidates should be aware that relevant content in the correct form is a key aspect of the overall assessment of responses for **Question 1(a)** and ***Section B*** tasks. They should focus on answering each aspect of the task, ensuring that all content is relevant. Writing should be purposeful, without rambling or unnecessary filler content.
- To ensure that candidates do understand the key requirements of each question, it may be helpful to underline key words within the question which indicate the specified form, content, audience and purpose of the tasks chosen. In order to achieve the task (one of the Level 3 criteria on the mark scheme) the instructions must be followed.
- Candidates must be aware of the need for clear paragraphing in their responses, including paragraphing for direct speech. A secure focus on structure is crucial since it helps the reader to feel that the candidate is in control of their writing.
- Candidates who have difficulty with tense selection should focus on writing in one tense, preferably either the present tense or the simple past tense.
- Candidates should be encouraged to proofread carefully, particularly for accurate sentence demarcation and for tense confusion/inconsistency. Such errors impede, sometimes seriously, the overall sense of fluency and cohesion.
- Candidates need to ensure that they provide evidence from their text to support points made in the **Question 1(b)** commentary. It is helpful to candidates to use a clear structure for this question, such as a PEA structure (Point, Evidence, Analysis).
- Candidates should be exposed to a wide variety of different text types, as outlined in the syllabus, so that they become familiar with the conventions of a variety of writing forms and purposes. They should be taught key features of those text types, to enable them to replicate these in their own writing.

General comments

Many candidates self-penalised on the grounds of rubric infringement: some ***Section B*** responses were appreciably short of the minimum word limit and a few candidates did not answer **Question 1(b)** at all. Some candidates wrote well over 400 words for **Question 1(a)**, often at the expense of ***Section B***, which was either short or full of errors, possibly indicating that they had run out of time to check their work.

Stronger responses to **Question 1(a)** focused clearly on the question, comprised effective emails written in an appropriately formal tone. These candidates gave a few clear reasons to support their opinion, often referring to quotations from the original imagined article. Weaker responses often lacked an appropriate tone and relied on anecdotal evidence.

© 2025

The strongest responses to **Question 1(b)** maintained a close focus on linguistic and stylistic choices, with the relationship between these features being explained and explored successfully. They used relevant terminology consistently and confidently, and language precisely and appropriately. Weaker responses focused mostly, or entirely, on content and therefore only provided minimal analysis by indirectly outlining the structure of the piece.

Stronger responses on ***Section B*** generally had a strong sense of the appropriate form for the task; (review, story or speech), a clear focus on the question and included appropriate stylistic conventions, as well as relevant content. Weaker responses on ***Section B*** generally contained frequent errors or lacked focus on what the task required. For example, some responses to **Question 2** were simple recounts of the content of the TV series, with very little in the way of critique or personal opinion, some **Question 3** responses lacked any sense of drama or suspense, and some **Question 4** responses were not in an appropriate form for a speech.

Comments on specific questions

Section A: Shorter writing and reflective commentary

Question 1

You recently read a newspaper article which said that the world would be a better place without mobile phones. You decide to write an email to the editor, in response to this article, giving your opinion

(a) Write the text for your email, using no more than 400 words. In your writing, give reasons to support your opinion.

Most candidates structured their writing clearly in paragraphs and demonstrated good awareness of the conventions of an email, using an appropriate tone. However, some candidates failed to adopt a suitable register, becoming overly emotional and sometimes verbally attacking the editor. The majority of candidates objected to the proposition entirely; however, a few agreed with the editor. Many candidates referred to personal experiences and effectively used emotional appeal to support their arguments. Some candidates took a balanced approach before favouring the continued use of mobile phones. There was a tendency by some candidates to confuse social media and mobile phones; these candidates somewhat digressed by discussing how the world would be a better place without social media instead of without mobile phones.

Stronger responses consistently addressed the appropriate audience, often beginning with clear and relevant greetings such as, 'Dear Editor, I have to wholeheartedly disagree.' They included features of an argument consistently throughout, giving clear reasons why mobile phones can be useful. They explored each reason in depth and complex lexical choices helped create a tone of credibility, with phrases like 'substantial impact', 'limiting the opportunities of our future generation' and 'capitalism and consumerism' demonstrating sophistication in language use.

Stronger responses were written in a respectful and professional tone, citing appropriate examples that reinforced the main points. For instance, one candidate wrote, 'On the contrary, many individuals earn a living solely through mobile phones. Influencers earn money using platforms like Instagram, Tik Tok and You Tube.' These candidates made sure to address all aspects of the question, balancing their opinion with some less common lexis, as well as a variety of rhetorical devices. Some candidates made effective use of figurative language to strengthen a point, such as the analogies in this example: 'Phones are as dangerous as knives. Without any training, they can be used to harm people, including the wielder.'

In their development, stronger responses addressed multiple points and elaborated on these with appropriate examples and language techniques. These candidates commonly used rhetorical questions, repetition, pathos, and relevant jargon related to mobile phones. For example: 'Do not you find it beautiful how we can share our opinions from across states, countries, oceans? You must agree that phones have interconnected the world's vast cultures.' Paragraphs were structured with specific purposes in mind, and sentence structures were employed to emphasise key ideas. Many showed evidence of planning, which contributed to a coherent flow throughout the email. Most also wrote close to the 400-word limit, allowing sufficient space to fully develop their ideas and persuasively argue that mobile phones are not the root cause of societal issues. Additionally,

© 2025

candidates generally adhered to the email format, including address terms, body paragraphs, salutations, and signatures. For example, a considered final line was: 'I hope you will consider my humble opinions.' This demonstrated awareness of socio-pragmatic factors such as tone, directness, and formality appropriate to the audience and task.

Weaker responses were characterised by a poor awareness of audience and a lack of structure, as well as quite limited development of ideas. This all restricted the candidate's ability to fully meet the requirements of the question. These candidates typically wrote lists of reasons without sufficient elaboration, such as: 'Phones make life easier because we can call more people.' Their tense agreement was often insecure and inconsistent. They showed very little acknowledgement of audience or purpose, with examples like, 'Hi, I think cellphones are good.' Their viewpoints were frequently unclear or contradictory, for instance: 'I think mobiles should not be banned but also for some people they should be banned.' Sentence structures often contained errors such as missing punctuation and run-on sentences, which, along with numerous spelling mistakes, severely hindered communication.

Weaker responses tended to be subjective or emotional and attacked the editor without raising convincing arguments that justified their position on the article. These responses were sometimes very short, often only one paragraph, briefly outlining different ideas such as safety, education, GPS and using the internet, without exploring the subtleties and nuances around each idea. Some responses lacked respect for the audience, expressing outrage and/or shock at the opinions shared by the author of the newspaper article; at times, these were either too aggressive in their approach and language or far too casual in their tone and vocabulary.

(b) Write a reflective commentary on your text, explaining how your linguistic choices contribute to fulfilling the task set.

Many responses lacked true analytical depth, with candidates frequently summarising or paraphrasing what they had written in **Question 1(a)** rather than analysing their choices. One approach that worked well for some candidates was to use a Point, Evidence, Analysis format to analyse form, structure and language. They named, one by one, the techniques used, providing precise evidence and explaining the effect on the audience. However, many responses were limited in detail and did not provide evidence from the **Question 1(a)** response.

Stronger responses clearly identified techniques and elaborated on the purpose behind each one. These candidates quoted specific examples from their **Question 1(a)** writing and explained how the techniques helped achieve a particular effect. One illustrative example is: 'To appeal to my purpose of explaining my reasons for my opinions, I used rhetorical devices like rhetorical questions ("Were you aware that...") paired with statistics ("72 per cent") to back up my ideas and to put the editor in my shoes. This was also done through anecdotes like "just yesterday" to display a sense of knowledge. A friendly tone is also made through exclamatory sentences and parenthesis ("and this was during a coastal sunset too!") which adds a sense of humour and interest.' This example demonstrates how the candidate not only named the techniques but also explained their objectives, which aligns with the expectations for language analysis.

References to logos, ethos and pathos were also very popular. For example, in reference to the impact removing phones would have on small business, one candidate wrote: 'I utilized rhetorical language, specifically pathos, to appeal to emotion and further persuade the audience. In paragraph 7, I write, "What kind of cruel person would want to take that away?" which attempts to make the reader feel guilty by painting them as a villain for holding their opinion.'

Weaker responses tended not to demonstrate any analysis of language, form or style. Instead, candidates often merely stated words or sentences they used without discussing techniques. For example, one candidate wrote, 'I have used the word disagree to show that I disagree.' Similarly, some candidates tended to quote long chunks of their own writing, such as, 'I wrote that "I always make sure to get the weekly paper at the end of each week." This statement shows that I've read the weekly paper for a long period of time.' Although this shows some attempt to explain, it does not constitute analysis of language, form or structure.

Another common tendency was to simply list the techniques used, with statements like, 'I have used this simile' or 'This repetition has been used' followed by examples quoted from their work. these candidates did not explain the purpose or effect of these techniques. For instance stating that repetition has been used without commenting on what it achieves is insufficient to demonstrate true

© 2025

analysis. As a result, such responses showed limited analysis. In weaker responses, points were often very vague, with no examples provided, for example: 'The devices I used to get my points across was similes and metaphors. I got my points across through a emotional perspective but also through a serious and intelligent way as well. Overall, I made myself direct with my opinions and even pulled out quoting from the article.' Other responses were extremely short, sometimes under 100 words, and in some cases the question was not attempted.

Section B: Extended writing

Question 2 – Review

You have been watching a new TV series about interior design. You decide to write a review of the series, which will be published in your school magazine. Write between 600 and 900 words.

Most candidates wrote positive reviews, offering opinions on format, presentation and some technical aspects of the series. Most chose to write in an informal register, suitable for a school magazine, and there was generally an awareness that this was a review and that there needed to be some balance expressed, along with a final verdict.

In stronger reviews, candidates engaged their audience from the outset, often making their opinion clear in the title. For example, one review opened with the arresting title, 'The House Healers UK – a bigger disaster than I thought possible.' This was followed by an opening sentence which immediately addressed the audience directly and engaged them: 'Art and design candidates, if you have not turned on BBC One at 5 pm on Thursdays recently, then I would STRONGLY advise you to keep on living in uninformed bliss.'

Stronger responses often included subheadings to focus clearly on areas for review. Some developed the imagined content in an interesting way, for example by including ideas like an 'AI generator' to produce a mock-up of what a room would look like. Additionally, some included a comments section, with associated email address, for readers to write into, thereby fulfilling form and stylistic aspects of real-world reviews of this type. Such candidates also used less common lexis appropriate to the semantic field of interior design, such as 'aesthetically' and 'complementary colour schemes'. Authenticity was created by creating a suitable title for the review, such as 'Dream Designers…Destiny's Designs: a show you must not miss!' There were examples of a convincing sense of reviewer voice which engaged the audience, such as in the following two examples: 'Interior Design for Dummies shows that moving out into your first home does not have to be tough – hence it's a five-star watch for me,' and 'Another aspect that deserves all the praise is the variety of homes that were decorated in the show. Inclusivity, in niche markets like interior design, is an aspect I love to see. The show's hosts Luka and Jackie offered expertise to a wide range of houses—from cramped one-bedroom houses to palatial state-of-the-art mansions.' Some candidates referred in detail to an imagined specific episode, enabling them to write in precise detail rather than in general terms

In weaker reviews, candidates often wrote lengthy narrative accounts of an episode from the series, without giving their evaluation and opinion of the show beyond the very basic, such as: 'The show is good and fun to watch.' Other weaker responses focused too heavily on technological elements at the expense of meaningful review about content, presentation and other relevant aspects of the series. Some candidates spent too long setting the scene, for example describing themselves as 'bored, on a rainy day, scrolling through Netflix for something to watch.' Whilst this could form part of a relevant introductory paragraph, this point was sometimes laboured and starting to stray into diary entry territory, forming too large a section of the task. Other weaker responses were overly negative, giving a low star rating without convincing reasons, while others were very short and in need of development. Many weaker responses also contained numerous grammatical and structural errors.

Question 3 – Story

Write a story called *No Turning Back*, about a person who leaves home one morning and decides never to return. In your writing, create a sense of drama and suspense. Write between 600 and 900 words.

Many stories centred around a teenager experiencing abuse, neglect, or emotional conflict, usually within a troubled home environment involving parents or stepparents. This theme was a common choice, and while it offered opportunities for drama, the treatment of it varied significantly in quality. Whilst many candidates created or attempted to create drama and suspense, some candidates struggled to write consistently in one tense, resulting in a more muddled narrative. Most stories reached a satisfactory ending, even if it was necessarily looking forward to the unresolved future.

© 2025

Stronger stories were written with more control and development. These responses were focused on characterisation and setting to enhance their narratives and to build the appropriate atmosphere. For example, one such response described three key places the narrator cycled past on their way out of town, each providing a bit more exposition and context as to why they were leaving, rather than stating it explicitly in the beginning. These candidates demonstrated their ability to use imagery and linguistic techniques to achieve drama and suspense more effectively, such as in: 'My home grieved for me, even though I was not yet gone. Maybe it already knew I was a ghost.' Additionally, showing the character's feelings and reactions rather than merely stating them made for a more engaging response: 'I walked through the empty halls once more. My footsteps echoed through the house like the ghosts that haunted graveyards, an odd sort of hollow grief that trails behind the race of time.'

Stronger stories were successful in building drama and suspense through a carefully crafted structure. One candidate used a ticking alarm clock as a structural device: 'The slow ticking of the clock was her only company. It was consistent, reliable; it never hesitated.' As the girl tried to escape, the ticking of the clock intensified: 'She wished the clock would stop counting for a moment. Time was running out.' The reason for the protagonist wishing to escape an unpleasant home environment was gradually revealed at various points through the narrative, thus maintaining the reader's interest. Another strong response was written from the perspective of a refugee fleeing Lithuania for the USA in WW2, effectively describing small details such as suitcases on the boat and the 'luminous glow of skyscrapers' on arrival at New York: 'The low toned boat horn exclaimed that our journey was over; joy was tinged with sadness knowing we were never going back.'

Some candidates used a time lapse structure and this was sometimes very effective as they made it into a circular narrative, looking back from the perspective of an older person who had made a new life in different place. Occasionally humour was used to good effect, with candidates assuming a sarcastic or world-weary tone and maintaining it consistently throughout the piece. Other candidates utilised pathetic fallacy to set an ominous tone from the outset, for example: 'Dawn breaks over the peaks of snow-capped mountains and the clouds hang heavy and dense in the sky. Dark and black and viscous, they gather; static electricity crackles bright and tense within the cavernous confines of rain-burdened clouds.'

Weaker responses tended to be poorly planned with limited narrative characteristics and more of a focus on a series of events with little development, some not entirely connected to the opening prompt. Weaker responses sometimes used the 'it was an ordinary day'' phrase within the first few lines, followed by a pedestrian listing of a morning routine in the first few lines as an attempt at exposition, rather than integrating the exposition into the action. Weaker responses often lacked originality or relied on clichés. These narratives typically included limited character development and predictable plotlines. They tended to lack descriptive detail and suspense-building techniques.

In these stories, candidates seemed unsure of how to develop their plots or build tension. Often, these responses consisted of just an opening or fragment rather than a full narrative. Grammatical weaknesses and poor sentence demarcation were common, especially in weaker scripts that combined multiple issues, including lack of cohesion, inaccurate punctuation, and inconsistent tenses. A typical example read: 'As Georgina is climbing out her window her hand slip from grapping her window from and cuts herself, she screamed. Her mother dashed through her bedroom door "What on earth are you doing Gina" her mum yells out. Georgina froze at the site of her mother and decided to climb back into her window.' These errors disrupted the reader's engagement and impeded meaning. Additionally, weaker responses frequently fell short of the required word count, resulting in limited character or plot development.

Verb tense control was a particular challenge, with many candidates shifting inconsistently between past and present. Examples such as 'she speak' or 'I was aware I am a guest' demonstrate a lack of mastery over basic grammatical structures. The recommendation for such candidates is to stick to a single, consistent verb tense (preferably past tense) to avoid confusion.

Question 4 – Speech

Your class has just had a discussion about the benefits of studying science subjects at school. Your teacher has asked you to give a speech to first-year candidates at your school, encouraging them to learn science subjects. Write the text for your speech, creating a sense of enthusiasm for science. Write between 600 and 900 words.

Most responses focused quite well on the benefits of learning science subjects and frequently linked this to employment opportunities. A summary of the contents of the speech was usually provided in the conclusion, often with a call to action and a valediction to close. Some candidates demonstrated a solid understanding of

© 2025

audience and purpose. Most used at least some features of speech, such as rhetorical questions, and maintained an appropriate tone and register, generally informal but not overly colloquial.

Stronger responses created a genuine connection with the reader, often by establishing a voice or persona. For instance, opening lines like, 'I remember when I was just starting here' and 'We are so lucky that we have the facilities that we do here' added warmth and relatability. These candidates used a range of persuasive techniques to engage their audience directly, for example: 'Even the greatest minds like Marie Curie and Einstein were once candidates just like you' and 'In Environmental Science you will learn how to make a real difference in this world rather than sitting by and ignoring the greater issues.' They also maintained a strong sense of voice, for example: 'Plus, who does not love messing around with chemicals like an evil scientist? Shh, do not tell the headmaster I said that!'

Better responses were imaginative and purposeful. They used extended metaphors and referenced global issues such as 'global conflict' and 'global warming', linking their ideas to wider societal contexts. They also demonstrated grammatical accuracy throughout, with correct spelling and punctuation. An example of a strong, structured greeting was: 'To our Head Teacher, and her Deputy, teachers and fellow students – good morning!' This set a respectful and formal tone suitable for the speech format. The purpose was also made clear early on, as shown by: 'I am speaking to you today about the importance of learning a variety of sciences for our development.'

These responses elaborated on various ideas, for example, how science helps us understand the world, how it can be enjoyable and surprising, and how it leads to diverse careers providing 'infinite paths to go down'. Candidates used effective transitions such as 'moreover', 'furthermore', 'additionally' and 'consequently' to provide flow between paragraphs and ideas. Such candidates enriched their arguments by quoting famous scientists and philosophers, adding credibility and depth to their responses. One candidate wrote: 'Famous philosophers such as Pythagoras and Socrates as well as geniuses like Da Vinci and Tesla […] icons of human history have improved the overall life of humanity due to their inventions and reasoning.' This was often followed by rhetorical questions used purposefully, rather than as a standalone device, such as: 'Why can not you be the next one to influence humanity?' Many concluded their speeches effectively, providing closure and acknowledging the audience. One candidate wrote a personalised motto that left a memorable impression – 'If you want to, you can!' – paired with a simple thank you to the audience for their attention.

In weaker responses, candidates often listed different areas of science without development. Their understanding of science often came across as superficial or stretched. There were some pedestrian responses merely listing and explaining the different sciences, for example: 'Biology is the study of life we learn about the intresting things we may or may not know how we see a specific color, how the water cycle works, cells of organism similarity or differences.' Some weaker responses relied on a rather mundane understanding of studying science, such as in this limited understanding of the anatomy of plants: 'You will understand how they grow which will make your garden flourish even more, and in case you go on a family camping you'll be able to point out the different parts, and tell them which ones they can not orcan eat.'

A significant number of responses contained insecure spelling, punctuation, and grammar. Many responses contained frequent errors of various kinds, for example: 'Our science instructares here make learning science corses easy and fun to understand, so that it is both engaging and comprehendible. You should always take advantage of new ofpertanities to learn what goes on in the earth, your body, in the wild, and so much more.' Such language issues hindered clarity and reduced the overall impact of the writing. Another recurring issue was repetition, often of the same points in different paragraphs with no added effect or purpose. These responses were also frequently under the required minimum word count.

© 2025

ENGLISH LANGUAGE

Paper 9093/22
Writing

Key messages

- Candidates should manage their time carefully, allocating an equal amount of time for each section of the paper. Quite often, the time spent on ***Section A*** seemed to have left candidates insufficient time to meet the required word count in ***Section B*** or to satisfactorily complete the task.
- Candidates must understand the importance of writing in clear, properly punctuated English, with accurate sentence demarcation, to perform well in this exam. Punctuation is a vital and essential aid to communication, especially as a guide to the structure of sentences, so it is imperative that candidates know and understand the basics of sentence construction if they are to succeed on this paper.
- Clear expression in simple and compound sentences without much variety is preferable to expression that does not flow, in long, rambling sentences. Often, weaker candidates lose control of grammar when they attempt to write in long, complex sentences. One error that again occurred regularly was that of separating sentences with commas rather than full stops; another common error was writing in sentence fragments. Clear and accurate sentence demarcation is crucial, followed by the accurate use of a wider range of punctuation.
- Candidates should be aware that relevant content in the correct form is a key aspect of the overall assessment of responses for **Question 1(a)** and ***Section B*** tasks. They should focus on answering each aspect of the task, ensuring that all content is relevant. Writing should be purposeful, without rambling or unnecessary filler content.
- To ensure that candidates do understand the key requirements of each question, it may be helpful to underline key words within the question which indicate the specified form, content, audience and purpose of the tasks chosen. In order to achieve the task (one of the Level 3 criteria on the mark scheme) the instructions must be followed.
- Candidates must be aware of the need for clear paragraphing in their responses, including paragraphing for direct speech. A secure focus on structure is crucial since it helps the reader to feel that the candidate is in control of their writing.
- Candidates who have difficulty with tense selection should focus on writing in one tense, preferably either the present tense or the simple past tense.
- Candidates should be encouraged to proofread carefully, particularly for accurate sentence demarcation and for tense confusion/inconsistency. Such errors impede, sometimes seriously, the overall sense of fluency and cohesion.
- Candidates need to ensure that they provide evidence from their text to support points made in the **Question 1(b)** commentary. It is helpful to candidates to use a clear structure for this question, such as a PEA structure (Point, Evidence, Analysis).
- Candidates should be exposed to a wide variety of different text types, as outlined in the syllabus, so that they become familiar with the conventions of a variety of writing forms and purposes. They should be taught key features of those text types, to enable them to replicate these in their own writing.

General comments

Many candidates self-penalised on the grounds of rubric infringement: some ***Section B*** responses were appreciably short of the minimum word limit and a few candidates did not answer **Question 1(b)** at all. Some candidates wrote well over 400 words for **Question 1(a)**, often at the expense of ***Section B***, which was either short or full of errors, possibly indicating that they had run out of time to check their work.

Stronger responses to **Question 1(a)** focused clearly on the question by making the purpose of the speech clear from the outset and comprised effective speeches which engaged their peer group audience and introduced both sides of the debate. These candidates utilised a clear structure and format. Weaker responses were unclear in terms of the purpose of the speech or to whom it was addressed and they tended to focus on only one side of the debate. Ideas were disorganised and often lacked any paragraphing.

© 2025

The strongest responses to **Question 1(b)** maintained a close focus on linguistic and stylistic choices, with the relationship between these features being explained and explored successfully. They used relevant terminology consistently and confidently, and language precisely and appropriately. Weaker responses focused mostly, or entirely, on content and therefore only provided minimal analysis by indirectly outlining the structure of the piece.

Stronger responses on ***Section B*** generally had a strong sense of the appropriate form for the task (story, essay or review), a clear focus on the question and included appropriate stylistic conventions, as well as relevant content.

Weaker responses on ***Section B*** generally contained frequent errors or lacked focus on what the task required. For example, some responses to **Question 2** lacked any sense of drama or suspense, some responses to **Question 3** read more like magazine articles than essays, and some **Question 4** responses were simple recounts of the content of the photography course with very little in the way of critique or personal opinion.

Comments on specific questions

Section A: Shorter writing and reflective commentary

Question 1

You are going to take part in a debate at school about whether it is better to have one job for life, or to change careers one or more times. Your headteacher has asked you to open the debate by giving a short speech on the topic.

(a) Write the text for your speech, using no more than 400 words. Introduce both points of view and create a sense of interest in the debate.

Many candidates demonstrated an understanding of the required format, showing awareness of audience and tone. Most candidates were able to generate some relevant arguments in response to the task. Common points in favour of staying in one job included long-term security and pension benefits, the opportunity to build deep expertise, and a strong sense of workplace community. In contrast, arguments supporting career changes often focused on developing broader skills, achieving higher earning potential, and adapting to a rapidly changing job market. Many candidates acknowledged the merits of both sides before clearly stating their own position. This helped to build momentum for the debate and allowed room for potential rebuttal.

Stronger responses usually began with a direct address and attempted to engage their audience early on, for example: 'Today, we have an interesting topic that has been debated for centuries: Is it better to have one job for life, or to change careers one or more times? Think hard here! Explore one land and call it your home or discover numerous corners and choose the best.' This type of introduction captured the spirit of the debate and set a clear direction for the speech. Another approach that created impact with a punchy opening was: 'Survive or thrive? What is it that you intend to do over the course of your working life?'

In stronger responses, candidates consistently used a range of language to create a compelling voice, which gave their speeches a personal and persuasive tone. For example, one candidate wrote: 'Nothing compares to the adrenaline of securing your first job. I remember when…'. Such responses were well-balanced, presenting both the benefits and drawbacks of long-term careers over switching jobs. They moved beyond simplistic ideas like money, status or family expectations, instead exploring deeper motivations and societal factors. Stronger responses were characterised by the inclusion of a variety of rhetorical devices, anecdotes and use of statistics. Stronger responses had an engaging, lively opening address, presenting an interesting hook rather than just rephrasing the question, such as in this example: 'Your life is a story. One with multiple chapters and pages that signify milestones and achievements. You make the choices. You hold the pen.'

Better responses were marked by their clarity, accuracy, and control of grammar and structure. Paragraphing was clear, with transitional phrases such as 'First, let us consider …' helping to guide listeners. Such candidates employed complex sentence structures effectively, as seen in this example: 'Or maybe they would not. Maybe, since they were a kid, they've dreamed of "making it

© 2025

big" – discovering something groundbreaking, creating endlessly, or just becoming really important – and really rich – in their field. A zeal that tells them what they're destined for.' These candidates demonstrated a well-developed thesis, maintained a logical flow, and concluded with clarity.

Weaker responses showed some awareness of audience, usually with a greeting, but many closed inappropriately and often lacked a clear opinion or argument. These candidates jumped from one idea to the next without an organising structure or cohesive thesis. Many began with excessive detail, particularly personal anecdotes about childhood dreams or family pressures, then ran out of time or space to complete the task meaningfully. Content was often simplistic, sticking to repetitive points about earning money or stability, for example, without further development.

Weaker responses were composed very simply and lacked a sense of interest, for example: 'When it comes to sticking through one job; it is extremely understandable. Choosing one major career and holding on to it has a good direction.' Grammar and sentence demarcation were significant weaknesses in many lower-level scripts. For example, one candidate wrote: 'But be careful while choosing this critical and decisive decision, there are some crucial points you have to think about and take in consideration, one of them being financial stability, my advice is searching up the yearly salary a average person.' This sentence illustrates multiple issues, including run-ons, incorrect idioms, article misuse, and awkward phrasing.

(b) Write a reflective commentary on your text, explaining how your linguistic choices contribute to fulfilling the task set by your headteacher.

Many responses lacked true analytical depth, with candidates frequently summarising or paraphrasing what they had written in **Question 1(a)**, rather than analysing their choices. One approach that worked well for some candidates was to use a Point, Evidence, Analysis format to analyse the form, structure and language of their responses to **Question 1(a)**. They named, one by one, the techniques used, giving precise evidence from their answer and explaining the effect on the audience. However, most responses were limited in detail and did not provide evidence from their **Question 1(a)** response.

Stronger responses displayed candidates' ability to refer to specific stylistic features and explore their impact on meaning. For instance, one candidate wrote: 'I deploy the simile "Like a heart monitor" to create visualization of the changing careers.' Another wrote: 'Additionally, the metaphor "it could cripple you" demonstrates the negatives of one job for life.' These examples reflect an effort to identify language techniques and explain how they shape tone or contribute to argument.

Stronger responses effectively identified and explained specific linguistic features. For example, some discussed the use of rhetorical questions such as 'Have you ever wondered…?' to involve the audience, or inclusive pronouns like 'we' and 'us' to create a sense of shared experience. These candidates also commented on their use of a formal register and persuasive vocabulary. For example: 'The words "crucial" and "significant" add authority and emphasis.' Where relevant, some responses insightfully explored figurative language, such as metaphors depicting career change as a 'journey' or 'path,' and explained how these enhanced engagement and clarity.

They used relevant terminology consistently and confidently, using language precisely and appropriately. In this example, the analysis is detailed and focused: 'The simile "as risky as poker" suggests that switching careers is like playing poker which is generally considered a risky game. This further develops into an extended metaphor by using the words "royal flush" to describe the potential rewards as a royal flush is the highest value set in the game of poker.'

Such candidates demonstrated their ability to reflect on purposes, academic context and audience and how these factors shape style, tone and approach. They wrote about the spoken mode, politeness, debate protocol and rhetorical features. They traced the lexical patterns relating to both sides of the debate, often characterised by themes of stasis and change: 'trudging every day to the same place of work', 'doing the same thing day in day out can get repetitive and boring. It does not challenge you anymore', 'burnout' versus 'the fickle process of changing jobs and making countless applications' and 'As humans it's in our nature to want to explore and try new things.'

Weaker responses often summarised the content of the debate or made vague comments without providing examples, as in this case: 'The speech offers a new perspective on work troubles, with it being straightforward and simple. There is an avid use of connectors. Vocabulary is also simple and to the point as well as the use of paragraphs that distinguish the tackling of a different subject.

© 2025

I used simple words to make the speech more digestible.' Some candidates used written mode features to describe spoken mode features, for example referring to question marks rather than questions: 'This question mark helps to keep readers engaged throughout the text.' Other weaker responses tended to list a few basic features, mentioning devices like 'repetition' or 'pronouns', but with little or no attempt to explain how these were used or what effect they had on the reader. Frequently, these candidates listed words they had used without referencing the technical term or discussing its purpose. Many analyses were very short and were therefore insufficiently developed to demonstrate a sound understanding of form, structure, or language.

Section B: Extended writing

Question 2 – Story

Write a story which begins with the following sentence: *As I walked past the painting of the man, I was sure that his eyes were following me*. In your writing, create a sense of drama and suspense. Write between 600 and 900 words.

While some narratives demonstrated real creativity and linguistic flair, many fell short due to lack of planning, control and sustained development. More successful candidates tended to pick an appropriate location to fit with the prompt (museum, art gallery, mansion, antique shop) and then followed on their narrative from this point. A common technical fault was insecurity of tense throughout the piece: often, writing would move from the past to the present and back again frequently and in ways that did not suggest deliberate authorial intent.

In stronger responses, candidates demonstrated a clear ability to use language effectively to build atmosphere, tension, and imagery. They maintained focus on a single time frame, often a moment of confrontation with the painting, and shaped their narratives with intention and coherence. Tension was often created through sharp, controlled sentences such as, 'And there it was. I could never escape it.' These candidates made full use of descriptive and figurative language, bringing their stories to life through imagery like, 'Wave after wave of fear crashed throughout my body,' and 'the city retching heavily to rid itself of the panic we all felt.' Such vivid language added depth and mood. Stronger responses also displayed grammatical control, accuracy in spelling and punctuation, and a conscious use of structure to craft a complete and satisfying narrative. One strong example of descriptive control was: 'Deep in the school, past classrooms, lockers, and teacher's offices, lay a wide, open hall. Clumps of candidates hurried to grasp a glance, swarming the painting like bees swarming their hive.' Similarly, metaphors like 'my heart was an unruly drum' and expressions such as 'to soothe my beating heart' or 'I forced a staggering breath' reflected an elevated use of language to evoke emotion and develop tension.

Another way candidates successfully created tension was to establish a sense of ambiguity in the opening which stimulated reader engagement, for example: 'Though recently I did not know what to believe, who to trust. My life, once picture perfect, seemed to be spiralling out of control and all I could do was stand there and watch.' The use of analepsis was an effective device in this task, provided candidates were able to confidently master their tenses. Some candidates approached the task as the onlooker having some mental or psychological issue, creating a more intense sense of drama and suspense. This was then often revealed at the end. For example, 'There is no way a painting's eyes were following me. "Get it together", I mutter under my breath.'

One candidate wrote from the perspective of a security guard in an art gallery: 'From afar, there seemed nothing extraordinary about this man in a long brown trench coat, sneering at all the tourists that stood before him.' This candidate demonstrated a wide range of vocabulary and sentence structures, along with strong control over narrative organisation. Techniques such as internal monologue and sensory description were used effectively to create a growing sense of unease: 'I could feel a chill running down my spine as those eyes seemed to read my deepest, darkest thoughts.'

Weaker responses tended to be poorly planned, with limited narrative characteristics and more of a focus on a dramatic series of events with little development, some not entirely connected to the opening prompt. Weaker responses sometimes used the 'let's rewind a little' phrase within the first few lines but never returned to the prompt sentence, making for a fragmented response.

In weaker responses, candidates often struggled to use the prompt meaningfully. The painting was often treated as a throwaway detail rather than a central narrative device, as seen in the line, 'And I saw a painting with the eyes that followed me before I went back home.' These stories tended to lack planning, with seeming uncertainty over how to develop a plot or build tension. Often, these responses consisted of just an opening or fragment rather than a full narrative. Grammatical weaknesses and poor sentence demarcation

© 2025

were common, especially in scripts that combined multiple issues such as lack of cohesion, inaccurate punctuation and inconsistent tenses. A typical example read: 'I felt a shiver down my spine as a slowly turned around, I knew I wouldnt find anyone there… My hands wouldnt stop shakşng as I dailed the number.' These errors disrupted the reader's engagement and impeded meaning. Additionally, such candidates frequently failed to reach the required word count, resulting in limited character or plot development.

Verb tense control was a particular challenge, with many candidates shifting inconsistently between past and present. Examples such as 'she speak' or 'I was aware I am a guest' demonstrate a lack of mastery over basic grammatical structures. The recommendation for such candidates is to stick to a single, consistent verb tense (preferably past tense) to avoid confusion.

Question 3 – Essay

In class, you have been discussing whether it is better to spend your holidays in your home country, rather than travelling abroad. Your teacher has asked you to write an essay on the topic, giving your opinion. Write between 600 and 900 words.

Most candidates attempted to present both sides before offering an opinion. However, many responses lacked the formality required by the question and some were almost speech-like, including phrases like: 'Let's look at'. Other responses read more like magazine articles. Most candidates explored the topic to some degree but struggled to present a solid and well-reasoned opinion, as required by the task. In several cases, arguments presented were contradictory, which undermined the quality and coherence of the writing.

Stronger responses evidenced candidates' ability to present balanced arguments with clear examples, comparing cost, cultural experiences, and convenience. These responses used some cohesive devices and maintained a formal tone. For example: 'While holidays in your own country have their advantages like convenience and affordability, travelling abroad provides us with unique experiences that allow us to grow and connect with the wider world.' One environmentally conscious response evaluated the carbon emissions incurred in travel abroad, while another advocate of staying at home, keenly aware of diversity, suggested: 'Do not go to another gargantuan metropolis from whence you came, go to the interiors that may yet be untouched by rampant homogenous development.'

Stronger work was structured logically through the use of discourse markers such as 'On the other hand', 'furthermore' and 'it is not always as simple as that' to clearly link and contrast points. These candidates also used a range of language to craft a persuasive and reflective tone, with well-developed ideas that went beyond surface-level reasoning. One wrote: 'I could take out the latest holiday brochure and spend all of my allowance, or we could look closer to home and experience our own culture.' Such candidates also used this task to showcase their descriptive ability combined with the warmth of personal voice, for example: 'Best of all, travelling takes you to the most exquisite palate of incredibly sumptuous foods from all cultures – what one would not do for just one soft, fruity scoop of Italian gelato?'

Weaker responses often displayed misunderstanding of the task. These candidates sometimes launched straight into the task with a minimum of planning. For instance, one candidate began by writing: 'Holidays are favourite time for students and teachers. Since they are quite short, most of the people prefer to spend them abroad to make holidays unforgettable and probably one of the most engaging. Also it's too inconvenience.' Many produced narrative-style accounts instead of argumentative essays, for example: 'The day had come. I was finally boarding the plane.' Others simply listed reasons to go on holiday, without providing commentary or forming a viewpoint. Their pieces lacked development, with limited or no attempt to weigh perspectives or express a clear opinion. Instead, they relied on vague or repetitive points such as staying at home being cheaper. One response read: 'The question has too many answers but at different individuals with different thinking of life. If there are friends we can enjoy movie nights or pot locks, despite Its of no use.' Such errors in sentence construction, grammar, and spelling were frequent, often impeding meaning. These responses showed little awareness of structure or form, and the writing lacked the clarity and cohesion necessary for higher-level achievement.

Question 4 – Review

Last weekend, you did a one-day photography course for beginners. You decide to write a review of this course, which will be published on a photography website. Write between 600 and 900 words.

The review form was generally understood by most candidates, with most using evaluative lexis to some extent. The large majority were positive reviews of the photography course and there were some overly

© 2025

negative reviews, which sometimes became rather monotonous. Balanced arguments were raised – on what went well during the course and what did not go well – with a few providing suggestions for improvement.

Stronger reviews were balanced and had an element of credibility. There was some use of specialist language and field-specific lexis such as 'lighting/camera angle/shot' that would be appropriate for the review. Their use of headings, summaries, and final ratings strengthened the clarity and readability of their reviews. They also used conventions of the genre such as informal but informative language, subheadings, personal anecdotes, and ratings. For example, some candidates established their motivation for doing the course: 'As an avid traveller, I am always looking to capture beautiful moments in nature, but I fail to.' They evaluated aspects like tuition quality, value for money, and the expertise of instructors. For example, some described 'various cameras,' or mentioned 'the newly released 660 Canon' and provided insight into how such equipment enhanced the learning experience. The use of headings was a feature of stronger work, helping to organise content into sections while signposting focus areas for the reader.

Stronger responses tended to have an engaging and consistent voice throughout, the writers not only providing details of the course, but also their feelings and reactions too. They kept form in mind throughout, using evaluative language and providing recommendations: 'Overall, this course was one of the best I have experienced in recent years, and I urge you to take it too. You'll end the day with a dozen beautiful pictures, a smile on your face, and a sense of pride knowing that you created your own art.' They effectively developed a relationship with the reader and structured the review to focus on several key aspects of the experience, such as the venue, teaching quality, course content, and outcomes. For example, one candidate remarked, 'The organisation of the course was a real surprise,' effectively embedding a personal opinion. Others took a creative approach to tone and introduction, for example: 'Welcome back to the blog, clickers! That's what I call photographers who click at everything. You are in for a ride, for today I am going to talk about "SNAP ON THE MAP!" a photography course hosted by Tomorrow's Photos for beginners.' These openings established a clear voice while immediately situating the reader in a review format.

Weaker responses often showed misunderstanding or only partially addressed the requirements of the review genre. Some responses read more like descriptive accounts of the day or course without offering critical opinion or evaluation. First impressions of the organisers were overly long. There were several straightforward recounts with little evaluation of the course, even at the close. Such responses therefore lacked key features of a review, including little or no direct address to the audience. The 'beginners' aspect of the question did not feature much in weaker responses. Others presented the review as an afterthought – for instance, 'I give this 5/5' – and did not build meaningful commentary around their experiences. Some candidates spent long paragraphs listing what they knew about photography or different cameras, often unrelated to the course itself. Grammar, punctuation and spelling errors were frequent, as in: 'As soon as I entered the workers there welcomed me with choclates which were amazing and hot Arabic coffee.' Sentence boundaries were often unclear and verb tense usage was inconsistent. Some candidates switched between past and present without purpose, making the structure difficult to follow.

Paper 9093/23
Writing

Key messages

- Candidates should manage their time carefully, allocating an equal amount of time for each section of the paper. Quite often, the time spent on ***Section A*** seemed to have left candidates insufficient time to meet the required word count in ***Section B*** or to satisfactorily complete the task.
- Candidates must understand the importance of writing in clear, properly punctuated English, with accurate sentence demarcation, to perform well in this exam. Punctuation is a vital and essential aid to communication, especially as a guide to the structure of sentences, so it is imperative that candidates know and understand the basics of sentence construction if they are to succeed on this paper.
- Clear expression in simple and compound sentences without much variety is preferable to expression that does not flow, in long, rambling sentences. Often, weaker candidates lose control of grammar when they attempt to write in long, complex sentences. One error that again occurred regularly was that of separating sentences with commas rather than full stops; another common error was writing in sentence fragments. Clear and accurate sentence demarcation is crucial, followed by the accurate use of a wider range of punctuation.
- Candidates should be aware that relevant content in the correct form is a key aspect of the overall assessment of responses for **Question 1(a)** and ***Section B*** tasks. They should focus on answering each aspect of the task, ensuring that all content is relevant. Writing should be purposeful, without rambling or unnecessary filler content.
- To ensure that candidates do understand the key requirements of each question, it may be helpful to underline key words within the question which indicate the specified form, content, audience and purpose of the tasks chosen. In order to achieve the task (one of the Level 3 criteria on the mark scheme) the instructions must be followed.
- Candidates must be aware of the need for clear paragraphing in their responses, including paragraphing for direct speech. A secure focus on structure is crucial since it helps the reader to feel that the candidate is in control of their writing.
- Candidates who have difficulty with tense selection should focus on writing in one tense, preferably either the present tense or the simple past tense.
- Candidates should be encouraged to proofread carefully, particularly for accurate sentence demarcation and for tense confusion/inconsistency. Such errors impede, sometimes seriously, the overall sense of fluency and cohesion.
- Candidates need to ensure that they provide evidence from their text to support points made in the **Question 1(b)** commentary. It is helpful to candidates to use a clear structure for this question, such as a PEA structure (Point, Evidence, Analysis).
- Candidates should be exposed to a wide variety of different text types, as outlined in the syllabus, so that they become familiar with the conventions of a variety of writing forms and purposes. They should be taught key features of those text types, to enable them to replicate these in their own writing.

General comments

Many candidates self-penalised on the grounds of rubric infringement: some ***Section B*** responses were appreciably short of the minimum word limit and a few candidates did not answer **Question 1(b)** at all. Some candidates wrote well over 400 words for **Question 1(a)**, often at the expense of ***Section B***, which was either short or full of errors, possibly indicating that they had run out of time to check their work.

Stronger responses to **Question 1(a)** focused clearly on the question and made for effective blog entries which engaged the peer group audience. They created a sense of enthusiasm for learning and encouraged the audience to learn a new skill. Weaker responses were unclear in terms of the purpose of the blog. These candidates often gave an account of how they learned a new skill without there being any sense of it being their first blog entry. Their ideas were disorganised and sometimes lacked any paragraphing.

© 2025

The strongest responses to **Question 1(b)** maintained a close focus on linguistic and stylistic choices, with the relationship between these features being explained and explored successfully. They used relevant terminology consistently and confidently, and language precisely and appropriately. Weaker responses focused mostly, or entirely, on content and therefore only provided minimal analysis by indirectly outlining the structure of the piece.

Stronger responses on ***Section B*** generally had a strong sense of the appropriate form for the task (review, descriptive piece or speech), a clear focus on the question and included appropriate stylistic conventions, as well as relevant content. Weaker responses on ***Section B*** generally contained frequent errors or lacked focus on what the task required. For example, some responses to **Question 2** were simple recounts of the walking tour, with very little in the way of critique or personal opinion, some responses to **Question 3** were more narrative than descriptive, and some **Question 4** responses lacked any sense of being in an appropriate form for a speech.

Comments on specific questions

Section A: Shorter writing and reflective commentary

You have just started learning a new skill. You have always wanted to learn this skill, but you never thought you would be able to. You decide to write a blog about your experience.

(a) Write the text for your first blog entry, using no more than 400 words. In your writing, create a sense of enthusiasm for learning new skills.

Most candidates demonstrated a good awareness of blog conventions, especially the use of a conversational, light-hearted tone, and they approached this question enthusiastically. Subjects ranged from various sports, such as running, basketball, tennis and golf, to hobbies such as massage, origami, playing the guitar, crocheting and cooking. There was typically a strong emphasis on the difficulty of learning a new skill but also a recognition that the process of learning was extremely satisfying. Approaches varied, with some candidates opting for an anecdotal style, citing a long-lost yearning to play the piano, for example. This required 'dusting off my grandma's piano' which briefly evoked memories from childhood, wishing to honour their grandma's memory. Referencing members of a family as 'coaches' in acquiring a new skill was quite a common approach taken, and it came across to the reader as genuine and touching.

Stronger blogs included a range of conventions to organise the text, including catchy titles and sub-headings. These candidates grasped the purpose of the task and clearly outlined the fact that they had *just begun* to learn a new skill, rather than recounting full mastery of it. Such candidates understood the conventions of a blog and used them effectively to build a rapport with the reader. Some responses did include informal lexis, such as, 'So there you go guys, there's my story of how I learned a new skill', which was, in many cases, appropriate, due to the genre. When used judiciously, this informal tone helped establish a conversational and authentic voice.

Many strong responses began with engaging openings that sparked reader interest, such as*:* I've always had a fascination with novel party tricks like juggling or pen spinning.' This kind of introduction set the tone and provided a natural lead-in to the main narrative. Stronger entries often addressed the reader directly, employing questions or reflections, for example: 'Trust me, a little bit of something new can work wonders for your general happiness,' and 'For anyone who has tried something and failed, I encourage you to push through.'

Some responses deployed subject-specific lexis effectively to show a sense of growing mastery of the skill, while not forgetting the need to explain some of this lexis to the more general readership. In this response, the candidate wrote about learning to cook: 'I've always been bad at anything related to the culinary arts, from gingerbread cookies that wail in agony to soup that looks like something out of the Wastelands. I've never been a Picasso or Van Gogh of cooking'.

More successful candidates demonstrated their ability to describe the difficulty of learning the new skill whilst also conveying a sense of enthusiasm. Many encouraged the reader to give it a go by using an encouraging tone and suggesting common barriers to learning the specific skill. One notable blog, in which the writer described himself as 'feeling like Sisyphus struggling to push back against the endless waterfall of years' was written about a course in coding. Another drew this conclusion: 'Every time I fail, it is just more progress to break the barrier and learn and grow.'

© 2025

Many weaker entries simply described an activity, without reference to the process of learning the skill. These candidates often adopted a more generalised approach by saying the skill was beneficial without giving any specific examples. Other weaker responses were very short, sometimes of under 150 words, or focussed too heavily on the backstory of why the writer wanted to learn the skill, rather than the process of starting to learn it, hence demonstrating misinterpretation of the prompt. Some responses described an extended journey of practice and eventual mastery, thereby drifting away from the actual requirements of the task. This often resulted in a loss of focus and underdevelopment of key ideas.

In terms of structure, weaker responses were sometimes unfocused or lacked cohesion, with tangential details that distracted from the core narrative. Additionally, many of these responses revealed a struggle to convey a consistent or appropriate tone for a blog. One of the most significant weaknesses was a lack of control over verb tenses. As this task required clear shifts between past and present tenses, for example recounting a past experience while reflecting on it in the present, candidates who did not demonstrate tense accuracy were hindered in both clarity and style. Weaker responses were often brief, lacking in details as to the importance of learning something new. Sentences were undeveloped, as in 'I learned so much' but never saying what or how. Other weaker responses contained frequent errors of all kinds, as in this example: 'Im not tall enought and I do not know how to walk properly. Maybe I did not born to be a model. My body was my insecure and my dream was to big for me.'

(b) Write a reflective commentary on your text, explaining how your linguistic choices contribute to fulfilling the task set.

One approach that worked well for many candidates was to use a Point, Evidence, Analysis format to analyse the form, structure and language of their responses to **Question 1(a)**. They named, one by one, the techniques used, giving precise evidence from their blog entries and explaining the effect on the audience. However, some responses were limited in detail and did not provide any evidence from the **Question 1(a)** response.

Stronger responses displayed candidates' ability to identify key elements of blog writing and demonstrated thoughtful reflection on their language and stylistic choices. For example, some noted their use of the first-person perspective to convey personal experience and their deliberate shift to second person to 'address the audience and create a sense of relatability and intimacy'. This demonstrated clear awareness of both audience and form. A few candidates also acknowledged the typical demographic of a blog audience, often younger readers, and used this to justify their use of colloquial language. Terms like 'so there you go guys' or signoffs like 'Peace out' were explained as part of establishing a more informal register, suitable for the genre and audience. One candidate commented on the importance of their final sentence, 'Why have you not tried something new dear friends?' The analysis was clear: 'This not only appeals to typical features of a blog, by engaging with the reader in a casual manner, but it makes the reader ponder on their own unfulfilled passions as well.'

In addition, stronger responses engaged with lexical choices, noting the use of positive diction such as 'victorious' and 'confident' to foster a sense of empowerment and encouragement. These candidates understood the role of tone in achieving purpose, and linked language choices directly to audience impact. Other candidates gave some precise analysis, such as in this example: 'In addition the author utilizes hypophora within the reflection. They write "Was I afraid of falling? Not really. Was I afraid of proving my parents right? Maybe a little bit. Was I afraid of failing? Probably." The use of hypophora brings a sense of the author's train of thoughts as if going down a list of the author's fears. It brings focus to the fears the author experienced in a concise fashion.'

In many weaker responses, candidates focused almost exclusively on the content of their responses, providing no analysis of their linguistic choices. Weaker responses were lacking terms of construction of the **Question 1(a)** response using specific linguistic techniques, stylistic choices, or an awareness of form. As a result, they were left with very little material to analyse in **Question 1(b)**. Instead of identifying and evaluating specific choices, many summarised the content of their blog or made vague statements about tone or style without supporting examples. They often concentrated on describing structure and format with generalised comments such as, 'I use typical aspects seen in a blog such as paragraph format and a title.'

© 2025

In weaker responses, while candidates attempted to explain that their writing was intended to be 'encouraging' or 'relatable', they rarely unpacked *how* these effects were achieved. A common weakness was commenting only on the number of paragraphs or sentence types used – for example, 'I used five paragraphs' or 'I used simple and compound sentences' – without explaining the purpose or effect of these structural decisions. This lack of detail or connection of techniques to intended effects significantly limited the effectiveness of the analysis.

Many weaker responses were also short, included no examples, contained frequent errors or were inappropriate in tone. One typical response included the following vague paragraph: 'The structure of my blog was very organise. It had short or long paragraphs. For languages in my blog, I had imperative verbs throughout my writing to show what tense this writing was on. I included some past tense to my blog. There was some simile sentence in my blog.' Other responses were extremely short, sometimes under 100 words, and in some cases the question was not attempted.

Section B: Extended writing

Question 2 – Review

You recently saw an advertisement for a two-hour city walking tour called *Hidden Secrets*. You went on the tour last weekend. Write a review of this tour, which will be published on a travel website. Write between 600 and 900 words

Many candidates relied heavily on an anecdotal style, with lengthy preambles covering details regarding gatherings in the reception areas of hotels, with commentary on the appearance of the tour guide and other members of the tour. The 'hidden secrets' aspect of the tour was overlooked by some candidates, though it was integrated well by others who followed a clear review form, with some evaluative lexis being included.

In stronger responses, candidates employed a paragraphed, chronological structure – often with the use of headings and sub-headings – to describe the tour, and provided clear recommendations. They used an engaging, informative tone to both describe the walking tour and to address the extent to which it exposed the 'hidden secrets' of the area. They often provided a brief backstory but then focused on reviewing key elements of the tour such as the tour guide, the sights seen, the organisation, and the experience itself.

An effective strategy was to begin with an engaging introduction that captured attention and clearly stated the review's purpose. For example, a candidate wrote: 'One would think that the "secrets" of the beautiful city of Paris would have all been uncovered long ago, but the walking tour my wife and I recently took part in blew that theory out of the water.'

Such candidates established a clear personal voice, for example: 'Initially I was worried that my kids would not enjoy the tour, but they loved it!' They also addressed their audience directly, using phrases like, 'Happy travels everyone!' and employed description to good effect, as in this example: 'There lay cherry blossom trees encapsulating the beautiful architecture.' One candidate, reviewing Panoma Beach, used language to illustrate the beauty of the sea – 'a pool of glistening sea foam' – together with a stop on the tour to marvel at the hidden secrets of 'shells like pearls'

Other candidates employed a humorous or faintly ironic tone with some success, as in this example: 'While I do not doubt that Washington has many hidden secrets, they will remain hidden for eternity if this tour company continues in business. The biggest "hidden secret" on this tour was the "voluntary" added gratuity they charged us at the end of the tour. Secret indeed…'.

Weaker responses were often purely anecdotal with narrative descriptions of the tour, which relied on a chronological approach and offered little in the way of personal feedback or evaluation of whether one should do the tour or not. The review portion was sometimes tacked on at the end in a rather ad hoc fashion that fell short of meeting the task's purpose thoroughly. Some candidates did not name the location, or they made a name up, or place names were vague with no reference or attempt to explore 'hidden secrets.'

Such candidates tended to write a very personal account of a tour, not always of a city, without really addressing the prompt. The purpose and audience were often unclear and structure was weak, leading to disorganised, rambling responses: 'When we finally arrived at the meeting point there were loads of people waiting around and we had to just hope we were in the right group. They were handing out water bottles but we were at the back so we did not get any, and it was a hot day too so we really could have used some water to stop us getting dehydrated.'

© 2025

Weaker responses tended to be overly critical without suggesting what would make the tour better, and many were short, sometimes of well under 400 words. Some candidates started with fairly clear introductions that attempted to grab the attention of the reader and mainly stated the review's purpose. However, their language was overly simplistic and failed to address the specifics of the tour, resulting in a monotonous tone that failed to engage the reader.

Question 3 – Descriptive piece

Write a descriptive piece called *The Valley*. In your writing, focus on sound, colour and movement to help your reader imagine the scene. Write between 600 and 900 words.

Some candidates used a narrative frame, which was sometimes successful but occasionally replaced more relevant, descriptive content. A range of interpretations was seen; as well as natural settings of woods and rivers, some interpreted a more urban landscape. Better responses were often linked by the passing of time such as a twenty-four-hour period or the passing of the seasons.

In stronger pieces, the writer maintained focus on the present rather than trying to explain how they had got to the valley. Use of advanced vocabulary and phrasing kept the focus on the sounds, colours and movements in the valley's surroundings, for example: 'A small stone path snaked through the valley like a winding river of rock darting in between the patches of bright flowers.'

Such candidates often made use of sensory language, particularly sound and imagery. One effective example described 'the excited hum of conversation among the bumblebees', which introduced a subtle sense of life and movement to the setting. Another used visual imagery to evoke scale and permanence: 'With the entire valley nestled between them, they stood like stony guards, moving for no one and standing mighty and proud.' The best responses demonstrated rich vocabulary and figurative language throughout, with vivid imagery and striking similes. For instance, one candidate wrote, 'An astonishing sight, a rich kaleidoscope of vibrant blooms sprouting from the lush expanse of grass,' which was both precise and evocative. Another offered an original and humorous sensory comparison: 'Those flowers smell like your dead grandmother's perfume; feminine yet forceful.'

Such moments elevated the work by offering the reader both imaginative flair and concrete detail, hallmarks of higher-level descriptive writing. Candidates who succeeded in this task usually demonstrated stronger technical control, particularly with grammar, spelling and sentence variety, and were more disciplined in maintaining focus on setting rather than drifting into narrative. Another candidate wrote: 'The valley was teeming with life. Millions of years of sharp rain and howling winds had created a deep gash within the crust of the earth. The afternoon sun loomed above the valley as the foliage and animals bathed in the sunlight.'

Weaker responses lacked cohesion, drifted into narrative, or relied too heavily on generic description. Even where some descriptive language was attempted, it was often vague or overused – for example, references to 'birds chirping', 'the sun shining' and 'a peaceful valley' appeared repeatedly without variation or deeper effect. These candidates also tended to rely on basic vocabulary and struggled with sentence control, leading to repetitive phrasing and grammatical inconsistency.

Frequently in very weak responses, candidates misinterpreted the task, shifting into full-blown narrative mode with minimal, or superficial, descriptive content. These responses focused on plot-driven action rather than atmosphere or setting, resulting in a loss of focus on the descriptive requirements of the task. The setting was mentioned briefly or in passing, with little development of sensory experience or concrete detail. Some candidates used the title to write a story about a place called 'The Valley' without creating effective description or focus on sensory imagery. They also changed tenses frequently and were imprecise in their direction and sense of writing style. They described how they had travelled to the valley and often peopled their description with characters who had lengthy backstories. These characters often engaged in conversations, which meant several lines of poorly punctuated speech with no focus on description.

Question 4 – Speech

You are going to take part in a debate at school about whether children should be allowed to use social media before the age of 16. Your headteacher has asked you to open the debate by giving a speech on the topic. Write the text for your speech, discussing both points of view and creating a sense of interest in the debate. Write between 600 and 900 words.

Candidates generally adopted a clear structure, discussing the advantages of allowing 16-year-olds to access social media. Most responses had an opening address and a suitable closing line. However, not all

© 2025

candidates included direct address to the audience, making the text more of a discursive essay than a speech. Introductory paragraphs were common, giving some context with regards to the place of social media today. Most arguments were credible, including the need to understand what is happening in the world since newspapers do not attract the average 16-year-old. The importance of maintaining contact with their peers was a common argument. Candidates referenced the pandemic and social isolation as a further strong argument.

Stronger responses showed understanding of the need to present a balanced discussion, addressing both the benefits and drawbacks of social media use among young people. These responses were often structured using effective discourse markers such as 'however', 'in contrast', or 'moreover' to transition between contrasting viewpoints. They also demonstrated an awareness of their audience by using a respectful tone and controlled rhetorical techniques.

More successful candidates often employed logos, pathos, or ethos to establish credibility and connect with their listeners. For example, one candidate cited a relevant statistic: 'A study shows that teens with social media learn 30 per cent more about political and economic issues than teens without social media.' Another appealed to unity and broader social values: 'At the end of the day, social media is a tool that brings people together, not rips them apart.' Such candidates sometimes indicated their personal stance subtly, while still remaining open to other ideas. They were careful not to alienate any portion of their audience and demonstrated maturity in tone, thought, and structure. Their use of evidence, examples, and rhetorical strategies helped to deliver a reasoned and persuasive argument.

Stronger responses reflected in depth on the dangers of social media for young people and many commented on the effect of social media on mental health. A range of rhetorical techniques was employed, which served to pique interest in the audience, as in this example: 'While doomscrolling, social media consumers mindlessly consume more and more vacuous content. Have you ever felt like hours of your life have gone by in an instant while on social media?' Stronger responses provided a concluding paragraph, offering the writer's own point of view or summarising the main points: 'No matter how beneficial social media can be, it is the actual detriments that must, at the end of the day, be taken account of.'

In weaker responses, candidates often struggled to maintain the appropriate register. Many slipped into overly informal language or relied heavily on colloquial expressions and flawed structures. In addition to register issues, weaker responses often focused on a single side of the argument, usually opposing the ban, and presented it vociferously, without acknowledging alternative perspectives. Some responses veered into general arguments about mobile phone use or communication, thereby missing the more specific requirement to address social media and its impact on young people. As a result, these responses tended to lack focus, development and structural coherence.

Other weaker responses lacked paragraphing and demonstrated a lack of technical accuracy, such as in this example: 'The world is to leanient with social media. Social media isnt safe for anyone. Its not the platform. Its the people. The people who let children on these platforms and the people who should have common knawlege for children.'

© 2025

ENGLISH LANGUAGE

Paper 9093/31
Language Analysis

Key messages

In Paper 31, candidates are required to respond to two compulsory questions. The topic for **Question 1** in **Section A** is *Language change* and the topic for **Question 2** in **Section B** is *Child language acquisition*. Each of the two compulsory questions have 25 marks available, meaning that the question paper as a whole carries 50 marks.

The main requirement in both compulsory questions is for responses to present analytical findings drawn from the stimulus material. Ideas need to be evidenced throughout by data selected from the texts supplied. Furthermore, points raised are required to contain references to the relevant area of wider study of the topic.

General comments

In June 2025, several responses to both sections of the question paper were brief, meaning ideas were underdeveloped, and responses focussed mainly on presenting their understanding of linguistic concepts, models and approaches rather than selecting data from the stimulus material.

In **Question 1**, Assessment Objective 5 is weighted more heavily at 15 marks, therefore, there is an expectation of a more in-depth engagement with the given data. In **Question 2**, conceptual references need to be tied relevantly to selected data because of the weighting of Assessment Objective 4 (15 marks).

Comments on specific questions

Section A

Question 1 – Language change

This question requires candidates to read Texts A, B and C and analyse how the texts exemplify the various ways in which the English language has changed over time. Text A was extracted from the opening of *The Quality Papers*, a magazine of short stories, published in 1827. Text B was a word table illustrating the top five modifying adverbs found with *conceited* taken from the Early English Books Online Corpus (1470s – 1690s) and the English Web Corpus (2020). Text C was an *n*-gram graph for the words *shew* and *show* (1780 – 2000).

Writing

Analyses tended to be set into a clear and usually logical sequence of paragraphs. Candidates tended to organise their work according to a series of linguistic frameworks which included grammar, syntax, morphology, semantics or pragmatics. In limited responses, lexical or graphological frameworks were those most frequently used.

Some sophisticated analysis was seen where candidates had made use of technical terminology fluently and with ease although there were also some terminological inaccuracies, with a minority of candidates incorrectly identifying the modifying adverbs in Text B as adjectives, despite the question stem making this clear. This suggests that closer attention to word class and grammatical precision is required.

© 2025

In June 2025, some responses included reference to irrelevant material such as accounts of historical periods including the Roman, Nordic or French invasions of Britain. These tended to be offered as an introduction to the main body of the analysis. Candidates could be reminded that analytical responses do not need lengthy introductions and could result in wasted examination time. The same can be said of conclusions which repeat material which has already been seen in the main body of the response.

Conceptualisation

Most responses commented on the process of standardisation, relating prescriptive grammar influences, such as those of Robert Lowth or other 18th-century grammarians to the discussion. Greater awareness of prescriptivist and descriptivist views, for example those of Honey, Crystal or Aitchison and their connection to punctuation norms or syntactical device would strengthen responses. There was appropriate reference to Johnson's Dictionary (1755) and the role of the printing technology in promoting linguistic consistency. These ideas were often well-integrated with some relevant sociological comment and demonstrated sound understanding of internal and external influences on language change.

More effective responses cited Romaine, Fairclough or Goodman in analyses of levels of formality and how informalisation maybe a driver for gradual change in the English language. Less convincing were arguments which sought to translate perceived archaic constructions into contemporary English to illustrate points regarding levels of formality without recourse to theoretical models or approaches.

Halliday was usually relevantly cited in terms of what was described by most candidates as 'functional theory' and also more clearly as the theory of lexical gaps. However, random fluctuation (Hockett) or cultural transmission (Bandura et al) were generally not attributed even though they were the were the approaches most often suggested to account for changes.

The concepts of pejoration, amelioration, narrowing and broadening were often applied to consideration of 'conceited' as seen in Text B although there was some inaccuracy seen in such labelling. Jespersen's notion of the Great Vowel Shift was frequently applied to account for the orthographical change in *shew* for *show* seen in Text C. 'Industrialisation' and even 'globalisation' were also offered as reasons for change seen in Text C, sometimes with limited arguments. More useful were references to Chen's S curve model which was easily identified in the *n*-gram graph or to Aitchison's PIDC model.

Data handling

In June 2025, there was a tendency for weaker responses to include fewer items for analysis from the stimulus which led to surface-level analysis. In basic responses only items from the notes at the foot of Text A drew commentary. There was also a tendency to label those items which might be outside a candidate's everyday lexicon as 'archaic' or 'obsolete' although such items may have been more accurately described as 'low frequency' which should have been expected from a prose text of 1827. Lexemes from Text A inaccurately labelled in this way included *quest, illuminated, ascertain, graced* and *paunch*.

Limited responses mainly focused on the punctuation in Text A, with attention to what was often described as 'unusual spacing' between *Ryde* and the question mark, and then *RISE* and *EARLY!* There was further similar discussion of the use of the '.,' after *Dr. B*, the use of italics, capitalisation, the asterisks replacing the name in line 19, moving on to the use of semi colons, dashes, commas and the length of sentences. However, clearer responses progressed to lexical analysis which included *thither, beget, paunch,* or *lowermosts*. Nonetheless, a common error was noted where candidates had indicated that *beget* was from the French 'baguette'.

Although in contemporary English the inappropriateness of describing someone as *portliest* was frequently discussed, only effective or sophisticated responses extended commentary to make a deeper morphological analysis of the inflection *–est* even though there were a number of incidences of this seen in Text A.

In June 2025 analyses were more synthesised than those seen in previous examination sessions. For example, clear and more effective responses drew findings together from Texts A and Texts C in consideration of the lexeme *shew*. However, there was still the tendency to organise responses with analysis of Text A, moving to a separate analysis of Text B and then a further separate analysis of Text C. This approach usually led to brief descriptions of the data in Text C where time may have become an issue during the examination.

© 2025

Section B

Question 2 – Child language acquisition

The stimulus material for **Question 2** comprised a transcription of a conversation between Izzy (age 3 years) and her mother who were at home, having breakfast. Candidates were required to analyse ways in which Izzy and her mother are using language in this conversation. In their responses, candidates were further required to refer to specific details from the transcription, as well as to ideas and examples from their wider study of child language acquisition.

Understanding

Almost all responses demonstrated a clear understanding of the conventions of Conversation Analysis Transcription with only very few commenting that both the child and the mother were at fault in their lack of use of punctuation. The transcription provided many opportunities for comment on characteristic features, but basic or limited responses selected only those features which had been indicated in the transcription key.

Characteristic features which could have been identified for analysis in terms of how the mother was using language included her frequent separation of clause with pause and micropause, her questioning technique of using pitch variation in both closed and open questions, for example *are you going to eat yours↗* and *what do we need to do↗*, her use of plural pronouns to indicate the close relationship between herself and Izzy and joint activity in *lets blow on it*, recasting of Izzy's emerging phonological competence rather than explicit correction, and maintenance of her level of politeness in controlling behaviour, for example *dont stand on that chair please*.

With regard to characteristic features illustrated in the child's utterances, opportunities for identification and analysis included Izzy's residual substitution of phoneme /r/ in */pɒwɪdʒ/↗* and */kæwɪ/* even though she appeared able to produce the consonant cluster in *wobbly*, reception and transmission of negation, competence in turn-taking with one minor lapse, initiation and fulfilment of adjacency pairs, omission of auxiliaries – occasionally coupled with emphasis as in *I NOT LIKE IT*, pitch variation in questioning and stressed syllable as in *coat*. Subject verb agreement appeared as virtuous error at times as in *daddy like /pɒwɪdʒ/* although there was clear cognition in comparing states as in *too wobbly* and *too hot*.

Most responses demonstrated an understanding of a selection of the characteristic features shown above. More effective responses described features fully and labelled using technical terminology with consideration not only being to what the features were but also why they were being used.

Conceptualisation

Some responses used only the child's age to identify that Izzy had reached the telegraphic stage of language acquisition. However, more effective responses provided differential diagnoses using analysis of her utterances to illustrate that whereas at times her speech had telegraphic tendencies there was some clear evidence that she had progressed into the post-telegraphic stage.

This was similar to the way in which only the child's age was used to identify which of Piaget's stages of cognitive development Izzy had reached. Where it was stated that she remained in the sensorimotor stage, the argument became implausible as there was clear evidence (including her egotistical utterances) that the preoperational stage was more accurate.

Most candidates introduced Skinner's notion of behaviourism to an extent. There was clear evidence of positive and negative reinforcement in the mother's utterances, for example in *thats it* and *we're not going yet* respectively.

A number of Hallidayan functions of spoken language were evident in the transcription with clear responses correctly identifying the personal function in *I NOT LIKE IT*, the regulatory function in */kæwɪ/ me* and the heuristic function in *we /gəʊɪn/ see papa tom↗.* At times, there was mislabelling of these functions and at times they were described as 'stages' which led to an impression of limited understanding of Halliday's approach.

In effective responses, details according to Bellugi's Stage 3 of language acquisition were referenced as Izzy was seen to use a variety of pronouns, including person, subject, number and possession – further evidence that Izzy had progressed into the post-telegraphic stage.

© 2025

As in previous examination sessions, Chomsky was frequently cited but comments were not always tied to identification of characteristic features from the transcription. This was similar to the way Vygotsky's Zone of Proximal Development was introduced. The Vygotskyan approach was often discussed but evidence from the text was not always supplied although the mother could be seen to scaffold the child into constructing a list, for example in lines 20 and 23.

Data handling

In June 2025, some responses were limited in their selection of data for analysis, relying more on identifying features for generalised discussion rather than demonstrating keen analytical skills.

Analysis should include exploration of how the grammatical structure of specific utterances supports the identified feature or by examining word choice and selection in relation to how it might function in a communicative role. For example, Izzy's repetition in *i like /pɒwɪdʒ/ (.) mummy like /pɒwɪdʒ/ (.) daddy like /pɒwɪdʒ/ (1) what bout nanny and papa tom↗ /deɪ/ like /pɒwɪdʒ/↗* provides a clear example of how she seeks to build social connections. Here, the coordinated simple clauses and use of familiar nouns reflect her developmental stage, while the rising intonation suggests she is prompting a response — showing emerging pragmatic competence in her understanding of turn-taking.

Clear, effective or even insightful responses attempted phonological analysis although these varied in their accuracy and precision. Often, Izzy's substitution of the voiced plosive /d/ in place of the voiced fricative in /*deɪ*/ was inaccurately labelled as consonant cluster reduction. Similarly, the rhotic /*r*/ was described as a plosive phoneme at times. Her pronunciation of /*suːz/* was also mislabelled with some limited descriptions stating that she was 'not able to pronounce the letter h'. Candidates are reminded of the difference between graphemes (used in written language) and phonemes (used in spoken language and as seen in Conversation Analysis transcription).

The child's pronunciation difficulties were frequently described as 'mistakes' whereas in there were many instances of emerging competencies, for example in *we /gəʊɪn/* where Izzy's deletion of the final /g/ may indicate imitation of the caregiver's more colloquial production of continuous present tense at other times – a possible further indication of how a young child might use language to establish her position in a close social setting.

Overall, although clear to effective analysis was seen at times in June 2025, Data handling was the least well addressed of the three assessment objectives. This was due mainly to fewer selections being made from the transcription and reliance on generalised descriptions of identified features.

ENGLISH LANGUAGE

Paper 9093/32
Language Analysis

Key messages

Paper 32 presents stimulus material in ***Section A –*** *Language change*, and ***Section B –*** *Child language acquisition*. Candidates are required to provide two sustained and cohesive analytical responses by making a careful selection of data from each of the texts provided, and to support their analysis with relevant knowledge and understanding from their wider study of the two language topics.

Each section of the question paper carries 25 marks, giving 50 marks overall. Assessment Objectives 2, 4 and 5 are applied in Section A, and in Section B, Assessment Objectives 1, 4 and 5 are applied.

General comments

In June 2025, there were some brief responses particularly to ***Section B*** of the question paper which meant that there was a lack of development of ideas. In general, responses focused mainly on presenting linguistic concepts, models and approaches rather than selecting data from the stimulus material.

However, in **Question 1**, it is Assessment Objective 5 which is weighted more heavily at 15 marks therefore there is an expectation of a more in-depth engagement with the data. In **Question 2**, conceptual references were tied relevantly to selected data because of the weighting of Assessment Objective 4 (15 marks).

Comments on specific questions

Section A

Question 1 – Language change

The stimulus material for **Question 1** comprised three texts. Text A was the opening of an essay published in 1773 about the mineral water found naturally in the Liverpool area of England; Text B was a word table illustrating five of the top collocates for 'spa' from the Early English Books Online Corpus (1650s – 1780s) and the Cambridge International Corpus (1980s – 1993), and Text C was an *n*-gram graph for the words 'acidulous' and 'acidic' (1760 – 1980).

Candidates were required to read Texts A, B and C and analyse how Text A exemplified the various ways in which the English language has changed over time. In their responses, they were further required to refer to specific details from Texts A, B and C, as well as to ideas and examples from their wider study of language change.

Writing

Although responses were brief at times, most analyses were set into a clear and usually logical sequence of paragraphs. Candidates had also tended to organise their work according to a series of linguistic frameworks. In limited responses, lexical or graphological frameworks were those most frequently used whereas clear or effective responses presented analysis led by commentary on grammar, syntax, morphology, semantics or pragmatics.

Some sophisticated analysis was seen in responses that used technical terminology fluently and with ease although there were also some terminological inaccuracies, with a minority of candidates incorrectly identifying the collocates in Text B as 'replacement words', despite the question stem making this clear. For examples, some basic responses claimed that the words *treatment* and *waters* had changed their meanings

© 2025

to become *pamper* and *whirlpool* respectively. This suggests that closer attention to word class and grammatical precision is required.

In June 2025, some lengthy introductions were seen which contained information that was not relevant to the stimulus material. These usually included accounts of historical periods which had gone before any of the publication dates of the texts provided and were therefore not plausibly discussed. Candidates could be reminded that analytical responses do not need lengthy introductions and can result in wasted examination time. A more productive approach would be to begin immediately by setting Text A on a timeline, which in this case would have been just inside the upper date limit of Early Modern English.

Conceptualisation

The most frequently cited reference to Text A was that to Halliday's Systemic Functional Linguistics, usually weakly described as 'Halliday's functional theory'. Halliday was generally referenced in terms of the ideational metafunction where the passive voice was noted to structure information to emphasise processes and outcomes rather than agents. A small number of responses referred to the Latinate structures in the text, but did not always successfully connect this to Latin's enduring influence on scientific discourse — a point well-articulated in the work of theorists such as David Crystal.

Levels of formality were frequently discussed, though not always in terms of the scientific register presented in Text A, nor was the concept of scientific advancement as a driver for language change. However, the concept of prescriptivism was referenced by most candidates as was the opposite concept, descriptivism, though seldom attributed as a specific theorist's approach. More effective responses cited Romaine, Fairclough or Goodman in analyses of how informalisation may be responsible for gradual change in the English language. Less convincing were arguments which sought to translate perceived archaic constructions into contemporary English to illustrate points regarding levels of formality without recourse to theoretical concepts or approaches.

A number of responses referred to random fluctuation theory although not all attributed it to Hockett, leaving the reference incomplete. There was generally, however, a clear identification of how seemingly minor and 'random' variations which may have begun in error in language use can, over time, lead to one form becoming dominant. While this occasionally lacked depth, it nonetheless demonstrated a willingness to engage analytically with the data provided, particularly in Text B.

A smaller number of responses accurately applied Chen's S-curve model to findings from Text C, though even fewer analysed the change through its three key stages: innovation, acceleration and stabilisation. Those who did were able to offer more nuanced, theory-driven commentary. A greater number of effective responses referenced Aitchison's three stages of language change — slow emergence, rapid growth, and final stabilisation — and applied these or their understanding of Aitchison's PIDC model to their findings from Text C.

The concepts of pejoration, amelioration, narrowing and broadening were often applied to consideration of 'spa' as seen in Text B although there was some inaccuracy seen in such labelling – where broadening would have been the most precise. There was also evidence of speculative etymological analysis of the lemma which led to ideas on the concept of borrowing. French was usually seen as the loaning superstrate (spa derives from the Belgian town of Spa but it was not expected that this should be known).

Data handling

In June 2025, there was a tendency in limited responses to label those items which might be outside a candidate's everyday lexicon as 'archaic' or 'obsolete' although such items may have been more accurately described as 'low frequency' which should have been expected from a prose text of 1773. Lexemes from Text A inaccurately labelled in this way included *inattention, impregnated* and *pungent*.

There were some thoughtful comments on the graphological features. Some responses noted its distinctive graphological conventions, such as the prominent use of section headings *PREFACE* and *§ i. Of Mineral Waters* in general, recognising these as precursors to the structured formats seen in later academic and scientific writing.

Others discussed orthographic features, including the use of the long s (ſ) in words such as *diſcovered, uſed*, and *poſſeſs'd*. These were mainly accurately identified as typographical conventions typical of 18th-century printing, which gradually disappeared by the early 19th century. There were also references to elided spellings (for example in *promis'd, fix'd* and *poſſeſs'd*), with a number of responses linking these to older

© 2025

stylistic conventions and poetic influence. However, some limited responses made links to Shakespeare, which tended to be implausible.

Most responses made successful observations about capitalisation, identifying how both concrete nouns (*Spring, Stone Quarry, Spa Water*) and abstract concepts (*Virtues, Humanity, Society*) were capitalised. This was correctly linked to the lack of standardisation in 18th-century English, as well as to typographic conventions that assigned emphasis or social status through visual prominence.

In analysis of Text C, more effective responses tracked how *acidic* initially gained recognition within scientific circles (innovation), subsequently increased in popularity as it aligned with broader trends in scientific discourse (acceleration), and ultimately became embedded in usage, superseding the more archaic acidulous (stabilisation). An in-depth morphological analysis of these two lexemes was seen only in insightful analyses, however.

In general, there was still the tendency seen in previous examination sessions to organise responses with separate analyses of Text A, Text B and Text C. This approach usually led to brief descriptions of the data in Text C where time may have become an issue during the examination. More effective and fuller responses applied analytical skills to all three texts in ***Section A*** of the question paper.

Section B

Question 2 – Child language acquisition

The stimulus material for **Question 2** comprised a transcription of a conversation between Faizal (age 2 years) and his mother which had taken place at home. Candidates were required to analyse ways in which Faizal and his mother were using language in this conversation. In their response, candidates were further required to refer to specific details from the transcription, as well as to ideas and examples from their wider study of child language acquisition.

Understanding

All responses demonstrated a clear understanding of the conventions of Conversation Analysis Transcription. The transcription provided many opportunities for comment on characteristic features but basic or limited responses selected only those features which had been indicated in the transcription key.

Characteristic features which could have been identified for analysis in terms of how the mother was using language included her extended responses to Faizal's interrogatives as seen in *a snowman is where we roll lots of snow into a big big ball and make it look like a man*, her questioning technique which provided a variety of closed, open and tag questions as in *you like your red hat (.) yes↗* and *what else would we need to make it look like a man↗,* her use of inclusive plural pronouns, for example, *shall we go and find our warm clothes*, and her choice to recast rather than explicitly correct Faizal's pronunciation difficulties.

In terms of how the child was using language, characteristic features which were present for identification included substitution of phoneme /r/ in */wed/* and consonant cluster reduction in */fʌfɪ/ /bɒl,* deletion of final phoneme and plural in /pebuː/, omission of the copula verb and indefinite article in *what snowman↗,* fulfilment of adjacency pairs, clear understanding of turn-taking with minimal interruption, intonation technique including pitch variation, stressed syllable and volume increase (for example in *go <u>now</u> (.) we go NOW mummy*, repetition, mirroring of the mother's syntactical patterns, ability to express preferences, the emergence of negation and understanding of temperature, as seen in *i cold mummy* and *warm clothes*.

Most responses demonstrated an understanding of some of the characteristic features shown above. Responses became more effective when features were described fully and labelled using technical terminology with consideration not only being to what the features were but also why they were being used.

Conceptualisation

Limited to clear responses had used only the child's age to identify that Faizal had reached the holophrastic or telegraphic stages of language acquisition. More effective responses provided evidence from the range of characteristic features listed above to consolidate their differential diagnosis. Some basic responses interpreted Faizal's utterances set into phonemic representation as an indication that he remained in the babbling stage which was incorrect.

© 2025

There was frequent clear citation of major theorists, for example Skinner, Vygotsky and Bruner with reasonable explanations for their inclusion being provided. More effective responses progressed beyond Skinner's operant conditioning by integrating Vygotsky's Zone of Proximal Development, illustrating how Faizal's mother was scaffolding his language acquisition, *for example by explaining a snowman is where we roll lots of snow into a big big ball.* Most responses also applied Bruner's Language Acquisition Support System (LASS) with varying degrees of clarity, highlighting the mother's use of questions, prompts, and shared routines as in *shall we go and find our warm clothes now then?*

Effective responses incorporated Nelson's criticism of Motherese, arguing that Faizal's own language use and interaction with his environment might be more crucial to his development than the specific style of maternal speech. The Fis Phenomenon was also introduced to demonstrate the extent of which Faizal's level of understanding outweighed his level of production, as seen in *i like /fʌfɪ/ /bɒl/ it tickle.*

Piaget's theory of cognitive development was generally well applied, with appropriate references to the transcript in terms of his acquisition of object permanence and examples of egocentricism indicating the preoperational stage. Nevertheless, some candidates incorrectly placed Faizal in the sensorimotor stage without taking account of characteristic features which illustrated that he had progressed beyond that. These could have included him knowing that he should *not eat /pebuː/* which was a demonstration of him not only remembering that she should not eat pebbles but also that he is able to articulate that memory.

A number of Hallidayan functions of spoken language were evident in the transcription with clear responses correctly identifying the personal function in *i like /spaɪz/*, the regulatory function in *we go NOW mummy* and the heuristic function in *what snowman↗.* At times, there were inaccuracies in the labelling of these functions and at times they were described as 'stages' which led to an impression of limited understanding of Halliday's approach.

As in previous examination sessions, Chomsky was frequently cited but comments were not always tied to identification of characteristic features from the transcription. Further weak or incomplete references were made to some referred to Genie and the critical period with some citation of Lenneberg.

Data handling

In June 2025, some responses were limited in their selection of data for analysis, relying more on identifying features for generalised discussion rather than demonstrating keen analytical skills. This led to an imbalance noted between Assessment Objective 1 – Understanding and Assessment Objective 5 – Data Handling. Some responses which demonstrated at least a clear if not detailed understanding of the transcription provided little or no data selection, which was problematic given the task's focus. Close, consistent engagement with the transcript is crucial to an effective response.

Candidates are further reminded that analysis should include exploration of how the grammatical structure of specific utterances supports an identified feature or by examining lexical choice in relation to how it might function in a communicative role.

Clear, effective or even insightful responses attempted phonological analysis although these varied in their accuracy and precision. Often, Faizal's substitution of the voiced plosive /d/ in place of the voiced fricative in /*deɪ*/ was inaccurately labelled as deletion. Similarly, the rhotic /r/ was described as a plosive phoneme at times. However, more precise labelling was seen in analysis of *i like /speʃə/ (2) and i like /spaɪz/* with deletion of liquid /l/ in */speʃə/* and assimilation of initial syllable together with consonant cluster reduction in */spaɪz/.*

In limited analyses, the child's pronunciation difficulties were frequently described as 'mistakes' whereas there were many instances of emerging phonological competencies, thus a deficit approach had been taken. Responses could instead have explored Faizal's mirroring of the mother's lexical choices and syntactic pattern, including tag question seen in *you got /wed/ hat↗ (.) yes↗* a possible further indication of how a young child might use language to establish his position in a close social setting.

Overall, although effective analysis was seen at times in June 2025, Data handling was the least well addressed of the three assessment objectives. This was due mainly to fewer selections being made from the transcription and reliance on generalised descriptions of identified features.

Paper 9093/33
Language Analysis

Key messages

In Paper 31, candidates are required to respond to two compulsory questions. The topic for **Question 1** in **Section A** is *Language change* and the topic for **Question 2** in **Section B** is *Child language acquisition*. Each of the two compulsory questions have 25 marks available, meaning that the question paper as a whole carries 50 marks.

The main requirement in both compulsory questions is for responses to present analytical findings drawn from the stimulus material. Ideas need to be evidenced throughout by data selected from the texts supplied. Furthermore, points raised are required to contain references to the relevant area of wider study of the topic.

General comments

In June 2025, there were some brief responses to both sections of the question paper which led to undeveloped ideas. In general, it seemed that candidates had not fully observed the weighting of the assessment objectives which is different in the two sections. Even in some clear responses to **Question 1**, they seemed to include as much evidence of wider study as possible, rather than to provide an in-depth analysis of the language data. Conversely, some clear responses to **Question 2** touched lightly and quickly on linguistic models and approaches yet offered full explanations of minor characteristic features which had been spotted in the transcription. Candidates could be reminded of the assessment objective weightings to address this issue.

Comments on specific questions

Section A

Question 1 – Language change

The stimulus material for **Question 1** comprised three texts: Text A was an article about cooking, published on the Good Housekeeping website in 2023; Text B was a word table illustrating five of the top collocates for 'epic' taken from the Early English Books Online Corpus (1470s – 1690s) and from a corpus of online English (2020 – 2022), and Text C was *n*-gram graph for 'microwave oven' and 'air fryer' (1950 – 2019).

Candidates were required to read Texts A, B and C and analyse how Text A exemplified the various ways in which the English language has changed over time, by referring to specific details from Texts A, B and C, as well as to ideas and examples from their wider study of language change.

Writing

Overall, analyses tended to be set into a clear and usually logical sequence of paragraphs. Candidates had also tended to organise their work according to a series of linguistic frameworks. In limited responses, lexical or graphological frameworks were those most frequently used whereas clear or effective responses presented analysis led by commentary on grammar, syntax, morphology, semantics or pragmatics.

Some sophisticated analysis was seen where candidates had made use of technical terminology fluently and with ease although there were also some terminological inaccuracies, with a minority of candidates demonstrating misunderstanding of the concept of collocation as shown in Text B. This suggests that closer attention to word class and grammatical precision is required.

© 2025

In June 2025, although clarity and control of expression was generally clear, some material was presented which was not made relevant to the task. This tended to be offered as an introduction to the main body of the analysis. Candidates are reminded that analytical responses do not need lengthy introductions and can result in wasted examination time. The same can be said of conclusions which merely repeat material which has already been seen in the main body of the response.

Conceptualisation

Most responses commented on the processes of standardisation and informalisation, relating descriptive grammar influences on linguistic creativity, such as the invention and widespread use of the internet and social media, to language change as seen in Text A. Crystal was briefly cited in limited responses although more effective responses referenced Romaine, Fairclough or Goodman in analyses of levels of formality and how informalisation maybe a driver for gradual change in the English language. Fairclough was also cited in terms of synthetic personalisation as seen in the direct address to the audience in Text A, for example with the rhetorical *Curious about exactly what an air fryer is?*

Halliday was usually relevantly cited in terms of what was described by most candidates as 'functional theory' and also more clearly as the theory of lexical gaps. Random fluctuation (Hockett) or cultural transmission (Bandura et al) were generally not attributed even though they were concepts frequently suggested to account for changes. Some responses selected from the range of hyphenated examples such as *all-purpose*, *cult-status* and *perfectly-seared* to illustrate random fluctuation in the development of compounding over time.

The concepts of pejoration, amelioration, narrowing and broadening were often applied to consideration of 'epic' as seen in Text B although opinions varied on which of these four concepts could be most accurate label. Jespersen's notion of the Great Vowel Shift was frequently introduced as evidence of wider study of the language topic, as was Johnson's dictionary of 1755, Caxton's printing press of 1476 and the influence of Shakespeare, although these references were not made entirely relevant to the stimulus material. Industrialisation and even globalisation were also offered as reasons for change seen in Text A and these were much more plausibly introduced. Additionally, references to Chen's S curve model or to Aitchison's PIDC model were useful in exploration of Text C.

Data handling

Text A offered many opportunities for language analysis. Most candidates engaged with the playful nature of lexical and grammatical items presented by the text originator. Those which drew the most frequent attention included the clipping in *mozz* and diminutive in *veggies* and the rhythmic or humorous qualities offered by examples of alliteration such as *crispy, crunchy and craveable*.

Although Text A contained many incidences of stylistic features of contemporary popular journalism, for example the use of conjuctions *And* and *But* to begin sentences, incomplete constructions as in *So. Much.* and the inclusion of hyperlinks, there were examples of lexical items from classical Greek and Roman literature which provided contrast in line 7 with *ode* and *epic* used to construct hyperbole. These items enabled synthesis of commentary using Texts A and B.

Text B was generally interpreted well although some basic responses demonstrated misunderstanding of the nature of collocates, stating that the word table illustrated changes in meaning of the items so that 'majesty now means fantasy and tragedy now means failure' which is incorrect.

Only very few responses undertook morphological analysis of the items in Text C where the peak shown for *microwave oven* in 1990 could indicate wider reception and public interest in scientific or technological advancement in the late 20th century as well as the development of compounding. The sharp incline after 2015 of *air fryer* could provide further evidence of informalisation in a move away from the scientific register of *microwave,* and the widespread unquestioning acceptance of nonsensical nature of the name of the appliance as it is not possible to fry air.

In June 2025 analyses were more synthesised than those seen in previous examination sessions. In general, there was still the tendency seen in previous examination sessions to organise responses with separate analyses of Text A, Text B and Text C. This approach usually led to brief descriptions of the data in Text C where time may have become an issue during the examination. More effective and fuller responses apply analytical skills to all three texts in ***Section A*** of the question paper.

© 2025

Section B

Question 2 – Child language acquisition

The stimulus material for **Question 2** comprised a transcription of a conversation between Otto (age 5 years), Felix (age 8 years) and their mother. The interlocutors were at home, playing a board game.

Candidates were required to analyse ways in which Otto, Felix and their mother were using language in the conversation. In their responses, candidates were further required to refer to specific details from the transcription, as well as to ideas and examples from their wider study of child language acquisition.

Understanding

All responses demonstrated a clear understanding of the conventions of Conversation Analysis Transcription. However, although the transcription provided many opportunities for comment on characteristic features, basic or limited responses selected only those features seen in the text which had been indicated in the transcription key.

Characteristic features which could have been identified for analysis in terms of how the mother was using language included the way in which she had adopted the role of mediator by using language to address behaviour and to progress the activity, her choice not to correct or recast any deviation from standard grammar or pronunciation which may be perceived as different from the usual methods of child directed speech (for example in *it doesnt matter how he says it felix (2) we all know what he means)*, her use of timed pause and micropause to assist the children's understanding, and her use of simple polite yet direct forms in mainly declarative structures such as *felix you need to be more kind to your brother please*.

With regard to characteristic features illustrated in the children's utterances, opportunities for identification and analysis included fulfilment of adjacency pairs with some interruption to the turn-taking, ease with negation and contraction as in *no i did not,* Otto's residual virtuous errors in construction, for example, *i can not do it cos hes putting me off to think*, use of the diminutive *mummy* from Otto and the contrasting clipped *mum* from Felix, prosody including raised and decreased volume, pitch variation for closed and open questions, repetition and use of emphatic stress, for example in *fell over not falled over*.

Most responses demonstrated an understanding of a selection of the characteristic features shown above. However, responses became more effective when features were described fully and labelled using technical terminology with consideration not only being to what the features were but also why they were being used.

Conceptualisation

Limited or clear responses had used only the children's ages to identify that Otto had reached the post-telegraphic stage of language acquisition and that Felix is continuing his language development beyond the initial stages.

Evidence from the transcription was selected in most responses to indicate that Otto may still remain in the preoperational stage according to Piaget; given the age of Felix it was generally stated that he should have reached the concrete operational stage. Clear or effective responses used evidence to substantiate claims including that of understanding of cause and effect and inductive reasoning in Felix's utterance: *and you should know that from school*.

A number of Halliday's functions of spoken language were evident and most responses described the way in which Felix used the regulatory function in *say it properly* as well as the representational function in *he sounds like a baby*. On the other hand, Otto's utterances were seen to demonstrate the personal function, for example in *my knees hurty* and the mother's language being used in an interactional way, as in her *lets get on with the game.* Some insightful responses had selected and differentiated these functions to illustrate how each of the interlocutors had used language to establish their individual roles in the conversation.

Most responses described the way in which the mother was using scaffolding to encourage Otto. Some attributed this to Bruner's Language Acquisition Support System rather briefly although more effective responses referenced the mother as Vygotsky's More Knowledgeable Other, somewhat accurately stating that her approach using initiation, response and feedback was designed to bring Otto into a zone of proximal development. Evidence for this was provided in *so ive shaken a three and a five (2) how many does that make* ↘ and the following utterance: *nearly right otto (1) we need a bigger number than seven*.

© 2025

Although Chomsky and the Language Acquisition Device, as in previous years, was introduced but generally not thoroughly explained, effective responses demonstrated understanding of the notion of Universal Grammar by including Otto's natural use of the English morphological rule for numbers in *eleventy twelve*.

Data handling

In June 2025, some responses were limited in their selection of data for analysis, relying more on identifying features for generalised discussion rather than demonstrating keen analytical skills.

Limited responses tended to describe items presented as phonetic representation as 'mistakes', taking a deficit approach rather than attempting to provide evidence of progression through cognitive development and phonological competence which is almost complete apart from Otto's rhotic phoneme substitution in*/wɪpʌnd/*.

There was some clear analysis of grammatical forms, however, using the same item, */wɪpʌnd/*, to discuss overgeneralisation of past tense, and reduplication of comparative *be more kinder* in which Otto has ignored his mother's modelling of the correct form. Tense was also considered in Felix's utterance *i havent complained did i mum* ↘ in a somewhat generalised manner although this selection is an example of how children at eight, and who are in the continuing development stage of acquisition, may have residual grammatical or syntactical difficulties in extended spontaneous constructions.

Overall, although clear to effective analysis was seen at times in June 2025, Data handling was the least well addressed of the three assessment objectives. This was due mainly to fewer selections being made from the transcription and reliance on generalised descriptions of identified features.

© 2025

ENGLISH LANGUAGE

Paper 9093/41
Language Topics

Key messages

The overall title for 9093 Paper 41 is *Language topics*. The question paper is set into two sections, each containing one compulsory question. Each question carries 25 marks, with 50 marks being available for the question paper as a whole. For each question, there is a specific question frame, pertinent to the stimulus material and appropriately relevant to a particular aspect of the language topic.

The topics considered in Paper 41 are *English in the world* provided in the question paper in ***Section A***, as **Question 1**, and *Language and the self*, positioned as **Question 2** in ***Section B***. Assessment Objectives 1 (Understanding **–** 10 marks), 2 (Writing **–** 5 marks) and 4 (Conceptualisation **–** 10 marks) apply to both questions.

General comments

The main requirement in Paper 41 is for candidates to provide sustained, discursive essays in response to the focus of the question. As in previous examination sessions, at times there was evidence that analysis of the stimulus material had been undertaken, with responses containing commentary on the text originator's use of language. This was seen more in responses to **Question 2** rather than in those to **Question 1**. Such analysis is not required in Paper 41 and any response comprising such material ran the risk of becoming irrelevant.

In June 2025, despite the engaging nature of the stimulus material, some responses were rather brief, particularly in ***Section B***, meaning that ideas remained undeveloped. Moreover, particularly in responses to **Question 1**, there was a good deal of evidence of candidates wanting to present the entirety of their understanding of the broader language topic instead of selecting what they considered to be the most important points raised in the text. This led to loss of focus and a lack of development of any main, relevant points.

Nonetheless, some clear to effective work was seen at times, mainly in ***Section A***. Such responses retained focus on the ideas presented in the stimulus material and the specific frame of the question. More effective essays provided relevant support drawn from wider study of the language topics and demonstrated clarity and control of expression throughout.

Comments on specific questions

Section A

Question 1 – *English in the world*

The stimulus material for **Question 1** was a series of extracts from the Indian online newspaper The Print, titled *Dear Indians, MTI (Mother Tongue Influence) stigma is just language apartheid. Make English another bhasha*, which was published in 2021.

Candidates were required to discuss what they felt were the most important issues raised in the text relating to the influences on the *use and status of English in an international context*. They were further required to refer to specific details from the text as well as to ideas and examples from their wider study of English in the world.

© 2025

Assessment Objective 1 – Understanding (10 marks)

The stimulus material presented a number of points which candidates could select for discussion, including a definition of the linguistic concept described in the text as *mother tongue influence* which is the way international learners of English were taught by teachers who spoke in a regional rather than British or American accent. Further elements for discussion included the overwhelming view of the text originator that Indian learners should *embrace MTI* even though some aspirational Indians are trying desperately to forget their mother tongue and the reasons why Indian speakers of English should be concerned if their accent betrayed their mother tongue if, as the text originator stated, there should be a complete acceptance that the English language has multiple registers, dialects and accents, even in the United Kingdom and beyond.

Most candidates selected at least some of these points although in a large number of limited responses some misunderstanding was demonstrated in discussion of the text originator's view that mother tongue influence should be seen as *normal, natural and healthy*; even some clearer responses had stated that it was the British received pronunciation which the author viewed as *natural* and therefore it was not surprising that mother tongue influence could lead to *cultural inferiority and self-hatred*. Candidates are reminded that close reading of the stimulus material is necessary to gain as much insight into the ideas presented as possible.

As in previous examination sessions, basic or limited responses referred to the stimulus material only minimally, choosing instead to present knowledge and understanding of their wider study of English in the world. Candidates are reminded that even where this knowledge and understanding of the language topic is demonstrated as extensive, focus on the stimulus material should underpin the question frame – in this case the *use and status of English in an international context* and not the other way round.

Assessment Objective 2 – Writing (5 marks)

On the whole, those responses which were sustained were clearly organised into a logical sequence of paragraphs. This controlled approach demonstrated commendable writing skills including clear to effective introductions which provided a succinct precis of the text and gave a brief overview of the points which were to follow. On the other hand, limited introductions provided either a history of the emergence of the English language into its current form, or an extended overview of the language topic. Candidates are reminded that Assessment Objective 2 does not only cover aspects of writing such as spelling, punctuation and grammar: relevance of content and development of ideas are also assessed by applying that AO.

The most cohesive and coherent discussions followed a strong standpoint supported by a logical progression of ideas, well-integrated theoretical citation, and purposeful reference to the text. In contrast, weaker responses often meandered, lacking a stated line of argument or lapsing into general commentary.

Tone and register were generally maintained; clear discourse markers were usually seen to develop ideas or to introduce new points. Some loss of control was evident in responses which were overly long, indicating a move away from the original direction in the writing: extending a response into a continuation booklet does not necessarily mean that the essay has remained focused and relevant. On the contrary, it is more likely that the writing is not succinct, that the essay may have become repetitious or that some of the material presented is not relevant.

Assessment Object 4 – Conceptualisation (10 marks)

In June 2025, a wide range of linguistic issues, concepts, models and approaches were referenced, usually relevantly and accurately.

Kachru's model of concentric circles was the most frequently-cited theory and understandably so, as it offers a clear, accessible, and relevant framework in relation to the specific points raised in the stimulus material and the question frame. However, there were some recurring errors in its application. Limited responses tended to describe Kachru's model in simplistic terms, often misidentifying India's position as originally posited, or failing to accurately articulate its norm-developing role.

Clear to effective responses used Kachru's framework as a springboard to explore deeper postcolonial themes such as linguistic imperialism, language death – including progression to extinction according to UNESCO – and the dynamics of language revitalisation as seen, for example, in Wales or New Zealand. These more effective responses demonstrated a deeper grasp of linguistic theory and often integrated examples drawn from broader academic contexts.

© 2025

Encouragingly, effective and, at times, sophisticated responses developed discussion by referencing more contemporary theorists. Macaulay's notion of English as a colonial tool was seldom cited, while more developed responses incorporated the work of McArthur and Phillipson. These responses not only explored English as a global lingua franca but also engaged with its benefits and drawbacks, particularly in relation to cultural homogenisation and linguistic hybridity. Examples provided included Chinglish, Konglish and Japlish.

Some effective responses drew on Platt, Weber and Ho's work on World Englishes and discussed the concept of hybridisation in detail. Jennifer Jenkins was cited with some confidence, and several candidates used her work on English as a lingua franca to argue for a more inclusive and pluralistic understanding of global English, often contrasting this with older deficit models.

Section B

Question 2 – *Language and the self*

The stimulus material presented in **Question 2** was taken from a podcast called *Ideas*, broadcast by the Canadian broadcaster CBC Radio in 2021, titled *The ongoing search for the perfect climate change metaphor.*

Candidates were required to discuss what they felt were the most important issues raised in the text relating to the ways in which language can *shape and reflect the ways people think*. They were further required to refer to specific details from the text as well as to ideas and examples from their wider study of Language and the self.

Assessment Objective 1 – Understanding (10 marks)

Most responses selected at least some of the specific points raised in the stimulus material, including explanations of how the use of metaphors in material concerning climate change could be more meaningful than providing factual information because data may not always be understood or their use may lead to what is described as the *information deficit model*. The view that *Metaphors are central to how we talk and think about a lot of aspects of our world* was widely discussed, as was the feeling that it was crucial to select *the right metaphor to get people motivated*.

Limited responses relied on the examples of metaphors provided **–** *heat-trapping blanket, house on fire*, and *melting ice cream cone* to demonstrate a generalised understanding of the stimulus material. However, clear to effective responses discussed in detail the dangers of *relying on war metaphors* as some people's interpretations may assign glory, bravery and success to war instead of the intended interpretation of collective continuous striving with no end point to allay climate change.

Clear responses responded thoughtfully to Professor Kai Chan's contribution in which he proposed the metaphor of love as an alternative to fear- or crisis-based metaphors like war, although only insightful responses offered counterarguments to Chan's suggestion.

Assessment Objective 2 – Writing (5 marks)

In June 2025, many brief responses were seen in ***Section B***, possibly indicating that time management during the examination had been a problem. Candidates are reminded to ensure that their response time should be used equally between ***Section A*** and ***Section B*** in order to maximise the potential to gain marks.

As in previous examination sessions, some responses were limited by the inclusion of literary analysis of the stimulus material instead of linguistic discussion of the specific ideas which it presented. At times, responses offered analysis of the text originator's tone, use of imagery and narrative point of view and did not engage with ideas underpinning the question frame. Often these responses were overly long and lacking in precision and relevance.

However, those responses which were appropriately and relevantly sustained were generally crafted into a clear organisational structure with ideas flowing through a logical sequence of paragraphs. Introductions were generally succinct giving a clear overview of ideas which were to be discussed or a short precis of the stimulus material. However, conclusions tended only to repeat points already stated rather than end by reaffirming a strong linguistic point of view.

© 2025

Assessment Objective 4 – Conceptualisation (10 marks)

It was evident that while some candidates had surface knowledge of linguistic determinism or relativity, many lacked a clear understanding of these concepts. The result was superficial commentary, often unmoored from the actual text. References to Sapir and Whorf were sometimes made, but tended to rely on examples such as the Hopi tribe which did not meaningfully enhance the argument. Furthermore, most responses did not distinguish between the strong and weak hypotheses, which were critical to assessing how the text relates to linguistic relativity.

Effective responses showed a grasp of the weak hypothesis, linking it thoughtfully to the extract's discussion of the *information deficit model*. These responses argued that the shift from factual communication to metaphorical language reflects an understanding that people's perception of climate change is mediated by language – a key tenet of linguistic relativity. Some effective responses also applied a determinist viewpoint, arguing that the very need for metaphor suggests a deterministic assumption: namely, that if climate change is not framed in specific, emotionally resonant ways, people will struggle to conceptualise it or take action. This showed some sophisticated thinking, especially where responses evaluated how metaphors do more than communicate – they structure thought and behaviour.

Effective responses engaged confidently and accurately with George Lakoff's theory of conceptual metaphor. These responses demonstrated an assured understanding that metaphors are not merely decorative, but fundamental to thought, and that abstract concepts are understood through familiar, embodied experiences (for example *blanket, house on fire*, and *war*). Sophisticated discussion explicitly found echoes of Lakoff in Stephen Flusberg's idea: *Metaphors are, to use a metaphor, baked into language*.

The concept of love as proposed by Chan was often linked to Universalism, which led to discussions of how universal cognitive and emotional frameworks (sometimes citing Pinker but with little development) enable such metaphors to transcend language-specific differences. Clear responses drew attention to Chan's rhetorical question: *Everybody knows what that word means, right?* interpreting this as a tacit appeal to universal understanding, reinforcing the idea that the metaphor of love works precisely because it draws on a shared human emotional capacity, supporting a universalist position.

Some discussion of genderlect theories was provided in limited responses which stated that metaphors of war would be more meaningful to a male audience and metaphors of love could be more meaningful to a female audience. Even where Robin Lakoff, Cameron and Tannen were cited in some irrelevant detail, such wide-reaching generalisations were not plausible.

There were also many citations of the four maxims of conversation according to Grice. In most cases these references were implausible and usually not tied relevantly to specific points from the stimulus material or to the question frame.

In some very long responses, presentation of conceptualisation dominated the response throughout. Rather than carefully selecting and applying the most appropriate theoretical examples to points being made, at times there were successions of paragraphs which only discussed various linguistic models or approaches, making no mention of how or why they supported ideas from the text. Candidates are reminded that in Paper 41, focus on the stimulus material, the question frame and reference to conceptualisation should remain intertwined throughout a sustained but firmly-directed response in order to maximise marks being awarded.

ENGLISH LANGUAGE

Paper 9093/42
Language Topics

Key messages

The overall title for 9093 Paper 42 is *Language topics*. The question paper is set into two sections, each containing one compulsory question. Each question carries 25 marks, with 50 marks being available for the question paper as a whole. For each question, there is a specific question frame, pertinent to the stimulus material and appropriately relevant to a particular aspect of the language topic.

The topics considered in Paper 42 are *English in the world* provided in the question paper in ***Section A***, as Question 1, and *Language and the self*, positioned as Question 2 in ***Section B***. Assessment Objectives 1 (Understanding – 10 marks), 2 (Writing – 5 marks) and 4 (Conceptualisation – 10 marks) apply to both questions.

General comments

The main requirement in Paper 42 is for candidates to provide sustained, discursive essays in response to the focus of the questions. As in previous examination sessions, at times there was evidence that analysis of the stimulus material had been undertaken, with responses containing commentary on the text originator's use of language. This was seen more in responses to **Question 2** rather than in those to **Question 1**. Such analysis is not required in Paper 42 and any response comprising such material ran the risk of becoming irrelevant.

In June 2025, despite the engaging nature of the stimulus material, some responses were rather brief, particularly in ***Section B***, meaning that ideas remained undeveloped. Moreover, particularly in responses to **Question 1**, there was a good deal of evidence of candidates wanting to present the entirety of their understanding of the broader language topic instead of selecting what they considered to be the most important points raised in the text. This led to loss of focus and a lack of development of any main, relevant points.

Nonetheless, some clear to effective work was seen at times, mainly in ***Section A***. Such responses retained focus on the ideas presented in the stimulus material and the specific frame of the question. More effective essays provided relevant support drawn from wider study of the language topics and demonstrated clarity and control of expression throughout.

Comments on specific questions

Section A

Question 1 – *English in the world*

The stimulus material for Question 1 was taken from an article published in the British newspaper The Guardian in 2022 titled *English is picking up brilliant new words from around the world – and that's a gift*.

Candidates were required to discuss what they felt were the most important issues raised in the text relating to *the causes and effects of the expansion of English around the world*. They were further required to refer to specific details from the text as well as to ideas and examples from their wider study of English in the world.

© 2025

Assessment Objective 1 – Understanding (10 marks)

The stimulus material presented a number of points which candidates could select for discussion. These included whether English could be viewed as a global language with examples of its predominance around the world, given that the text provided information that there are *1.75 billion global speakers*. Discussion was often developed with ideas of *ownership* of English and the extent to which it had become *shared* across the world.

Such ideas led naturally into explorations of English *in all its diversity* which had evolved due to borrowing, or indeed the *important reframing* of terminology from *loanwords* to *gifts* as defined by the text originator. Clear to effective responses brought forward arguments for, and relevant counterarguments to, the point that lexical gifts might be enriching English as it becomes more widely shared in response to the text's position that *Speakers of world varieties of English are remaking its vocabulary to better express their identities, cultures and everyday realities.*

Limited responses tended to focus solely on the examples of English borrowing from other languages for *lack of a direct English equivalent* provided in the stimulus material including the Portuguese *saudade*, the Dutch *gezellig* and *nomakanjani* from isiZulu. Clearer or more effective responses explored the text originator's notion that borrowing had been, and remains, part of the natural evolution of all living languages.

As in previous examination sessions, basic or limited responses referred to the stimulus material only minimally, choosing instead to present knowledge and understanding of their wider study of English in the world. Candidates are reminded that even where this knowledge and understanding of the language topic is demonstrated as extensive, focus on the stimulus material should underpin the question frame – in this case *the causes and effects of the expansion of English around the world* – and not the other way round.

Assessment Objective 2 – Writing (5 marks)

On the whole, those responses which were sustained were clearly organised into a logical sequence of paragraphs. This controlled approach demonstrated commendable writing skills including clear to effective introductions which provided a succinct precis of the text and gave a brief overview of the points which were to follow. On the other hand, limited introductions provided either a history of the emergence of the English language into its current form, or an extended overview of the language topic. Candidates are reminded that Assessment Objective 2 does not only cover aspects of writing such as spelling, punctuation and grammar: relevance of content and development of ideas are also assessed by applying that AO.

The most cohesive and coherent discussions followed a strong standpoint supported by a logical progression of ideas, well-integrated theoretical citation, and purposeful reference to the text. In contrast, weaker responses often meandered, lacking a stated line of argument or lapsing into general commentary.

Tone and register were generally maintained; clear discourse markers were usually seen to develop ideas or to introduce new points. Some loss of control was evident in responses which were overly long, indicating a move away from the original direction in the writing: extending a response into a continuation booklet does not necessarily mean that the essay has remained focused and relevant. On the contrary, it is more likely that the writing is not succinct, that the essay may have become repetitious or that some of the material presented is not relevant.

Assessment Objective 4 – Conceptualisation (10 marks)

In June 2025, a wide range of linguistic issues, concepts, models and approaches were referenced, usually relevantly and accurately, although somewhat briefly. Taking the fundamental standpoint from the stimulus material, the issue of colonial influence and concepts of linguistic borrowing, cultural homogenisation and linguistic hybridisation were frequently seen. English as a killer language and cultural imperialism were also frequently referenced, although not always attributed to Pakir and Phillipson respectively.

Basic or limited responses introduced the standpoints of descriptivism and prescriptivism in relation to the stimulus material, although these introductions did not go beyond generalised description. This was similar to the frequent but often inaccurate inclusion of quotes from Crystal which were not tied to any specific points.

Understandably, Kachru's model of concentric circles was generally cited, even in basic responses, and it offered a clear, accessible and relevant framework in relation to some specific points raised in the stimulus material and the question frame. Effective responses used Kachru's Three Circles Model not just descriptively but as a springboard to interrogate issues such as borrowing, nativisation, and anxieties over

© 2025

linguistic purity. From here, responses often branched into discussion of more contemporary or less well-known theories, including Tom McArthur's model of World English, Macaulay's notion of English as a colonial tool and Jennifer Jenkins' work on English as a lingua franca.

Some insightful discussion was seen in responses which explored the complex sociolinguistic outcomes of the global spread of English including code-mixing and the pathway to language death according to UNESCO. Effective responses analysed the phenomenon of hybrid languages such as Singlish to discuss the socio-political tensions between local identity and perceived linguistic legitimacy. A small number of responses incorporated relevant personal experiences from their own bilingual education or observations of English use in multicultural contexts, to add authenticity and insight to their argument.

Section B

Question 2 – *Language and the self*

The stimulus material presented in **Question 2** was taken from an article on the BBC website, published in 2021 titled *Africa's lost languages: How English can fuel an identity crisis*.

Candidates were required to discuss what they considered to be the most important issues raised in the text relating to the ways in which language can *shape and reflect personal and social identity*. They were further required to refer to specific details from the text as well as to ideas and examples from their wider study of Language and the self.

Assessment Objective 1 – Understanding (10 marks)

The stimulus material offered viewpoints gained from two lived experiences: the first, from Khahliso, offered insight from a regional language speaker who was bullied for her lack of proficiency in English; the second was from Amaka who described her identity crisis which had resulted, conversely, from her not knowing Igbo and who had taken steps to learn her native language as an older student. Basic or limited responses used the above examples to paraphrase the presented narratives without exploring the wider linguistic consequences of the details provided.

However, clear responses selected at least some of the specific points raised in the stimulus material, including how language can be used to discriminate, and therefore in regions around the world, English *can open and close doors*. These differentiated views were developed by the text originator with the notion that *Language gives you a sense of community*, although most responses provided more engagement using the idea that, in the past, children have been *forced to speak English*.

In terms of the language topic, *Language and the self*, clear or effective responses explored ways in which a speaker's *diction* can engender discrimination or how learning languages other than one's mother tongue can allow one to *see the world in a different light*.

Assessment Objective 2 – Writing (5 marks)

In June 2025, many brief responses were seen in Section B, possibly indicating that time management during the examination had been a problem. Candidates are reminded to ensure that their response time should be used equally between Sections A and Sections B in order to maximise the potential to gain marks.

Although a number of responses to **Question 2** were brief, there were also responses which were overly long and lacking in precision and relevance.

However, those responses which were appropriately and relevantly sustained were generally crafted into a clear organisational structure with ideas flowing through a logical sequence of paragraphs. Introductions were generally succinct giving a clear overview of ideas which were to be discussed or a short precis of the stimulus material. However, conclusions tended only to repeat points already stated rather than end by reaffirming a strong linguistic point of view.

Overall, tone and register were appropriately maintained and discourse markers allowed a degree of fluency through clear to effective responses. There was a tendency, however, to use rhetorical questions in the main body of some discussions, possibly in an attempt to provide journalistic flair. This approach to crafting academic writing is not advised because if there are questions to be posed, then they should be answered by the candidate.

© 2025

Assessment Objective 4 – Conceptualisation (10 marks)

In those responses which were sustained, a wide range of mostly relevant conceptual references was seen. These included those to Michael Pearce's work on language and social groups, as well as examples of accent studies such as those conducted by Gary Ives.

As expected, there were many citations of landmark sociolinguistic theories such as Giles' Communication Accommodation Theory, Labov's overt and covert prestige, Tajfel and Turner's social identity theory and Milroy and Milroy's social network theory. Effective responses referred to Fishman's theory of language and ethnicity as well as Butler's performativity in relation to the construction of social identity. There was also some insightful reference to Gumperz as a critical source on code switching, presenting it as a strategy for navigating the social and linguistic expectations of the various social groups to which an individual belonged.

Support for arguments with real-world illustrations such as the overt prestige associated with Received Pronunciation in the UK and the covert prestige enjoyed by African American Vernacular English in the US was plausible where it was relevantly tied to specific points made in the stimulus material. However, less plausible was reference to theories pertaining to English and its impact on the world as these would have been better placed in a response to Question 1. Conceptualisation which was misplaced included reference to Kachru's concentric circles model or concepts such as Phillipson's linguistic imperialism and Pakir's English as a killer language which refer to the pre-eminence of English and the resultant language death.

There were also many citations of the four maxims of conversation according to Grice. In most cases these references were implausible and usually not tied relevantly to specific points from the stimulus material or to the question frame. This was similar to inclusions of Bernstein's elaborated and restricted codes, the Sapir-Whorf hypothesis and Tannen's genderlect which were not made relevant to the discussion.

In some very long responses, presentation of conceptualisation dominated the response throughout. Rather than carefully selecting and applying the most appropriate theoretical examples to points being made, at times there were successions of paragraphs which only discussed various linguistic models or approaches, making no mention of how or why they supported ideas from the text. Candidates are reminded that in Paper 42, focus on the stimulus material, the question frame and reference to conceptualisation should remain intertwined throughout a sustained but firmly-directed response in order to maximise marks being awarded.

Paper 9093/43
Language Topics

Key messages

The overall title for 9093 Paper 43 is Language topics. Thus, the question paper is set into two sections, each containing one compulsory question. Each question carries 25 marks, with 50 marks being available for the question paper as a whole. For each question, there is a specific question frame, pertinent to the stimulus material and appropriately relevant to a particular aspect of the language topic.

The topics considered in Paper 43 are *English in the world* provided in the question paper in ***Section A***, as Question 1, and *Language and the self*, positioned as **Question 2** in ***Section B***. Assessment Objectives 1 (Understanding **–** 10 marks), 2 (Writing **–** 5 marks) and 4 (Conceptualisation **–** 10 marks) apply to both questions.

General comments.

The main requirement in Paper 43 is for candidates to provide sustained, discursive essays in response to the focus of the question. As in previous examination sessions, at times there was evidence that analysis of the stimulus material had been undertaken, with responses containing commentary on the text originator's use of language. This was seen more in responses to **Question 2** rather than in those to **Question 1**. Such analysis is not required in Paper 43 and any response comprising such material ran the risk of becoming irrelevant.

In June 2025, despite the engaging nature of the stimulus material, some responses were rather brief, particularly in ***Section B***, meaning that ideas remained undeveloped. Moreover, particularly in responses to **Question 1**, there was a good deal of evidence of candidates wanting to present the entirety of their understanding of the broader language topic instead of selecting what they considered to be the most important points raised in the text. This led to loss of focus and a lack of development of any main, relevant points.

Nonetheless, some clear to effective work was seen at times, mainly in ***Section A***. Such responses retained focus on the ideas presented in the stimulus material and the specific frame of the question. More effective essays provided relevant support drawn from wider study and demonstrated clarity and control of expression throughout.

Comments on specific questions

Section A

Question 1 – *English in the world*

The stimulus material for **Question 1** was an extract from an article published on a business website in 2021 titled *Is English taking over the world? Or is the world taking over English?*

Candidates were required to discuss what they felt were the most important issues raised in the text relating to *the changing use of English in the world*. They were further required to refer to specific details from the text as well as to ideas and examples from their wider study of English in the world.

© 2025

Assessment Objective 1 – Understanding (10 marks)

The stimulus material presented a number of points which candidates could select for discussion. These included consideration of the potential of any impact experienced in the text originator's notion that English is becoming the language of international trade, the linguistic concept of borrowing including any *random collection of origins*, the reasons for transmission and absorption of loanwords into the English language including any colonial legacy, the author's conceptualisation of what they describe as *tentpole words*, changing international perceptions of the *coolness factor* of English, the concept of code switching and whether it may be deemed necessary for reasons of *pragmatism, efficiency and pronunciation*.

Most responses provided a selection of at least some of these points with a tendency to focus more on the well-known concept of borrowing rather than exploring the idea of tentpole words being used in a variety of regions *because they describe a thing that was not there before*. Only very few responses explored the questions posed by the text originator in the title of the text, *Is English taking over the world? Or is the world taking over English?*

Effective responses demonstrated a deeper reading of the stimulus material, discussing the validity of the text originator's final point that there may be instances when English, as used by some multilingual speakers, can sound *pretentious and inauthentic*.

Basic or limited responses referred to the texts only minimally, choosing instead to present knowledge and understanding of their wider study of English in the world or an historical account of the development of the English language over time. Candidates are reminded that even where this knowledge and understanding of the language topic is demonstrated as extensive, focus on the stimulus material should underpin the question frame – in this case *the changing use of English in the world* – and not the other way round.

Assessment Objective 2 – Writing (5 marks)

On the whole, responses were clearly organised into a logical sequence of paragraphs. This controlled approach demonstrated commendable writing skills including provision of clear to effective introductions which provided a succinct precis of the text and gave a brief overview of the points which were to follow.

On the other hand, limited introductions provided either a history of the emergence of the English language into its current form, or an extended overview of the topic, *English in the world.* Candidates are reminded that Assessment Objective 2 does not only cover aspects of writing such as spelling, punctuation and grammar: relevance of content and development of ideas are also assessed by applying that AO.

Tone and register were generally maintained; clear discourse markers were usually seen to develop ideas or to introduce new points. Some loss of control was evident in responses which were overly long, indicating a move away from the original direction in the writing: extending a response into a continuation booklet does not necessarily mean that the essay has remained focused and relevant. On the contrary, it is more likely that the writing is not succinct, that the essay may have become repetitious or that some of the material presented is not relevant.

Assessment Objective 4 – Conceptualisation (10 marks)

A wide range of linguistic issues, methods, concepts and approaches were referenced in response to **Question 1**, most of which were accurately cited although not all were attributed to their originator.

The most frequent citation used was of Kachru's Circles of English model with a generally accurate account of how Kachru had differentiated use of English in the inner, outer or expanding circles. Using the text originator's reference to Hindi, Japanese, German or Korean speakers, most responses referencing Kachru made accurate placements of these speakers' home nations according to the original model. Effective responses sought to discuss whether Kachru's differentiation may have changed and become outdated, in consideration of any changing use of English internationally.

Crystal and Diamond were also frequently referenced, although not always accurately, and with little relevance to the discussion in hand. At times, conceptualisation was generalised, especially in terms of English as a 'killer language', language death, and influences of colonialism. Some citations were somewhat out of place and would have been better positioned in a response to **Question 2** of Paper 43. These included references to the Sapir-Whorf Hypothesis, Giles' Communication Accommodation Theory and Bernstein's elaborated and restricted codes.

© 2025

Clear or effective conceptual references included detailed accounts of Schneider's dynamic model, McCrum's default position, Widdowson's spread and distribution, Modiano's circles and the channels described by Galloway and Rose and how these approaches might reflect the ways in which the use of English is changing. The most effective, or even insightful, responses took care to reference only those theoretical examples with direct relevance to the point being made rather than present a succession of names of theorists whose work was either outside the scope of the stimulus material or was only minimally appropriate to the discussion.

Section B

Question 2 – *Language and the self*

The stimulus material presented in **Question 2** was an extract from an article in the American magazine *The Atlantic*, published in 2021 and titled *Why We Speak More Weirdly at Home*.

Candidates were required to discuss what they felt were the most important issues raised in the text relating to the ways in which language can *shape and reflect social identity*. They were further required to refer to specific details from the text as well as to ideas and examples from their wider study of Language and the self.

Assessment Objective 1 – Understanding (10 marks)

The main thrust of the article was delivered in its subtitle: *When people share a space, their collective experience can sprout its own vocabulary, known as a familect*, thus a number of opportunities for discussion on the concept of language used within familial relationships was offered.

Specific points raised by the text originator included the ways in which, and reasons for, development of a *secret* language or, as described a *private lexicon*, how and why the *shared experience* of being part of a family unit can affect language and its users, the value of being able to extend one's familect to others resulting in the effect of *welcoming outsiders into one's clan,* the personal and social values of being able to express *our nonpublic selves in all their weird glory*, and how and why a sense of community might be developed in using a familect or other private language.

Most candidates engaged with the purposes of forming at least a private, if not secret, language and drew upon examples from their personal experience to enhance their response and demonstrate their understanding of the concept of familect.

Clear to effective responses explored how relationship dynamics, described in the article in terms of Mignon Fogarty's podcast might be enhanced and form a strong social identity for the family unit internally and possibly also externally. Limited responses, on the other hand, tended to take a narrative approach in recasting the humorous experience of Alex Roberts where *half a hog* had come to mean a small unit of measurement of liquid instead of making an in-depth exploration of Cynthia Gordon's final comment: *moment by moment, in everyday language use, we create our families*.

Assessment Objective 2 – Writing (5 marks)

Writing skills generally demonstrated structural control in that most responses were crafted into a logical sequence of paragraphs, headed by appropriate discourse markers. Some effective introductions provided a succinct overview of the main points which would be presented in the body of the essay. Limited introductions tended to define the difference between idiolect and sociolect without reference to the stimulus material, even though the familect concept was clearly a specific aspect of sociolect. Most discussions concluded with a generalised repetition of points already stated instead of reaffirming a strong linguistic point of view.

Tone and register were generally maintained throughout and content of responses was mostly relevant even in brief responses. This gave the impression that completing a sustained discursive response equal to that provided to **Question 1** had not been possible due to time constraints. Candidates are reminded to plan their examination time carefully, including giving themselves enough time for deep reading of the stimulus material.

© 2025

Assessment Objective 4 – Conceptualisation (10 marks)

Using knowledge and understanding gained from the June 2024 stimulus material for **Question 2** for Paper 43, responses plotted the concept of familect plausibly against examples of cryptolect, including that developed in prisons, Polari and Cockney Rhyming Slang. These two concepts sat well together as support for evidence selected from the stimulus material.

The setting of the family unit gave a natural opening for reference to the strong ties defined in Milroy's Social Network theory, the notion of In-groups according to Tajfel, and Giles' Communication Accommodation Theory. Effective responses were developed by introducing how language can be used to exclude as well as to include. These discussions cited Kramarae's Muted Groups or Eckert's Jocks and Burnouts to support points made in terms of how private sociolects may be perceived as secret and exclusionary to anyone outside the established social group.

At times, however, there was loss of focus on the question frame which asked specifically for discussion of *social identity*. In such cases, responses began to present irrelevant citations which were more suited to explorations of language and thought, with references being made to the Sapir-Whorf Hypothesis, Universalism, Innatism and Language of Thought. Candidates are reminded of the importance of maintaining focus on the question frame and the stimulus material and not to add in the names of theories and theorists just because they are known. Relevant conceptualisation should be tightly knitted into a response which is sustained and firmly directed in order to maximise its potential for marks being awarded.

Section A: Directed response

Question 1

Read the following text, which is taken from an information leaflet about beekeeping.

(a) You are a beekeeper who plans to visit a local school to give a speech to the school community about keeping bees. Write the opening of your speech. Use 150–200 words. [10]

(b) Compare your speech opening with the leaflet, analysing form, structure and language. [15]

10 ways to help the honey bee

Honey bees are responsible for pollinating one-third of all the foods we eat.

Content removed due to copyright restrictions.

Content removed due to copyright restrictions.

Why not invite a local beekeeper to visit and tell you more about the facts and folklore that surround this fascinating and ancient species?

Section B: Text analysis

Question 2

Read the following text, which is an extract from a non-fiction book about snow. The text explains an Icelandic word for snow.

Analyse the text, focusing on form, structure and language. [25]

Hundslappadrífa

Snowflakes as big as a dog's paw (Icelandic)

One of the first Icelandic tourists, P C Headley, wrote of riding across the island on horseback 'in a sort of grave exhilaration, gazing as in a dream at the hills, and drinking in the sunlight, content with silence and the present'. More and more people have been journeying to Iceland, hoping to find silence away from the modern world in the great snowfields and frozen tongues of glacial ice. Yet the glaciers are vanishing. The first to melt away was *Ok*, in 2019, and scientists fear that of 400-plus glaciers, none will remain by 2200. The barely perceptible crackle of frost in the air has been replaced by throbbing bass, and the howling wind by elfin, high-pitched vocals. Today Iceland is as well known for its music as the ice from which it takes its name. In the 1990s the enigmatic singer Björk exploded onto the indie music scene, introducing many English native speakers to the concept of diacritics[1] – and then came a riot of Icelandic indie and post-rock bands, of which Sigur Rós remains the headliner. While Björk tactically chose to sing in English, Sigur Rós achieved success even with British and American audiences who could not understand the words.

Over time, Sigur Rós lyrics became impossible for Icelanders to understand too – some of the band's songs aren't sung in Icelandic either. The lead singer Jónsi began to apply his eerie falsetto to a newly invented language: 'Hopelandic', or 'Vonlenska' in Icelandic. This is not so much a language (since it has no vocabulary or grammar), but rather 'a form of gibberish vocals' that fits to the music and acts as another instrument. Many singers do this while composing, when they've decided on the melody but haven't yet written the lyrics, but the exercise rarely makes it into the final score. Hopelandic appears on the Sigur Rós albums *Von*, *Ágœtis byrjun* and *Takk* …, and throughout the enigmatic album *()*. The name *()* is suggestive – is hope beyond words?

It was probably only a matter of time before the human voice melted away from Jónsi's productions altogether. In 2019 he created a haunting ambient album, *Lost and Found*, with Alex Somers, which the pair dropped on the world just before a North American tour. 'It falls somewhere between what was, what is, and what will be,' Somers said, cryptically. 'Sound friends that you may have heard or seen before appear; familiar, but different.' One track is named *Hundslappadrífa*, which translates as 'snow as big as a dog's paws'. These large snowflakes cluster together, and fall swiftly and softly from clouds in calm weather, softening the bleak landscape. Children are glad when 'hundslappadrífa' blankets the grey city streets as it is ideal for making snowballs. According to Icelandic meteorologist Trausti Jónsson, the term first appeared in print in a newspaper report in 1898. Iceland has a rich vocabulary for snow: the default is 'snjór' (snow), while 'mjöll' is snow that has just fallen; there are variations like 'skœðadrífa' (bright snow) and 'logndrífa' (calm snow). But 'hundslappadrífa' has a particular magic of its own.

The song *Hundslappadrífa* elides the experience of precipitation and listening: musical notes and flakes falling, chords gradually accreting in the listener's memory. In the end this delicate, otherworldly orchestra fades to a soft and dusty patter, which can only be a real

© UCLES 2025

field recording of snowfall. The microphone is held up into swirling flakes, documenting them as other artists have angled a camera lens down upon them – and then there is silence.

[1]*diacritics*: marks written above or below letters that change their original pronunciation

MARK SCHEME

Maximum Mark: 50

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2025 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

PUBLISHED

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

© Cambridge University Press & Assessment 2025

GENERIC MARKING PRINCIPLE 5: Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).
GENERIC MARKING PRINCIPLE 6: Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

© Cambridge University Press & Assessment 2025

English & Media subject specific general marking principles
(To be read in conjunction with the Generic Marking Principles (and requiring further guidance on how to place marks within levels))

Components using level descriptors:

- We use level descriptors as a guide to broad understanding of the qualities normally expected of, or typical of, work in a level.
- Level descriptors are a means of general guidance and should not be interpreted as hurdle statements.
- Where indicative content notes are supplied for a question, these are *not* a prescription of required content, and must not be treated as such. Alternative correct points and unexpected answers in candidates' scripts must be given marks that fairly reflect the knowledge and skills demonstrated.
- While we may have legitimate expectations as to the ground most answers may occupy, we must at all times be prepared to meet candidates on their chosen ground, provided it is relevant ground (e.g. clearly related to and derived from a relevant passage/text and meeting the mark scheme requirements for the question).

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

Annotations

Annotation	Meaning

English Language specific marking instructions:

AO1 Read and demonstrate understanding of a wide variety of texts. (Understanding)

- Marks should be awarded for the accuracy of the candidate's understanding of the text and its features, **not** for any analysis of them which is recognised under AO3.
- Where comparison is required, marks should be awarded for the candidate's recognition of similarities and differences between the texts and their features, **not** for any consequent analysis.
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

AO2 Write effectively, creatively, accurately and appropriately, for a range of audiences and purposes. (Writing)

- Marks should be awarded equally on the basis of the level of the candidate's written expression (range of features used and accuracy) and the development of their writing (its organisation and relevance to task and audience).
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

AO3: Analyse the ways in which writers' and speakers' choices of form, structure and language produce meaning and style. (Analysis)

- Marks should be awarded equally on the basis of the level of the candidate's analysis of the text's elements (form, structure and language) and of the writer's stylistic choices (including how style relates to audience and shapes meaning).
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

In response to **Question 1(a)**, candidates are required to write between 150 and 200 words. While there is no direct penalty for failing to adhere to this requirement, examiners should consider this an aspect of the response's 'relevance to purpose'. As such, adherence to the word limit is assessed as part of the second bullet point of AO2.

© Cambridge University Press & Assessment 2025

Section A: Directed response

Question	Answer	Marks
1(a)	**Read the following text, which is taken from an information leaflet about beekeeping.** **You are a beekeeper who plans to visit a local school to give a speech to the school community about keeping bees. Write the opening of your speech. Use 150–200 words.** Mark according to the levels of response marking criteria in Table A. **Additional guidance:** The comments below are illustrative and are not intended to be exhaustive. Candidates may make other valid comments that should be credited. **Responses might feature the following:** • Form, audience, purpose, style, conventions, language and structure will be appropriately adapted to suit task • Content may include key factual information as well as other relevant ideas • Tone will be used to have an impact on the reader and to create an effect	**10**

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
1(b)	**Compare your speech opening with the leaflet, analysing form, structure and language.** Mark according to the levels of response marking criteria in Table B. **Additional guidance:** The comments below are illustrative and are not intended to be exhaustive. Candidates may make other valid comments that should be credited. Candidates may organise their response in any appropriate way. They are not required to focus on form, structure and language in separate sections. **Responses might compare and analyse the following:** **Form** • The typical text conventions used in the leaflet and the candidate's speech opening • The ways in which the different purposes affect the content and style of the two texts • The ways in which the leaflet and the speech opening appeal to their respective intended audiences • Any other relevant aspect of the texts' form **Structure** • Relatively consistent paragraph length and the effect of this on the reader • The way the text develops the idea that honeybees are important and worth helping • The way the text builds its argument and credibility with examples and easy to follow actions • Discourse markers and other cohesive devices including subheadings • Any other relevant structural feature in the text	**15**

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
1(b)	**Language** • The use of direct address to engage and encourage the reader • The use of imperatives in the subheadings to give a clear plan of action to follow: *Make a honeybee-friendly habitat* • The use of lists to emphasise how much can be done to help: *asters and sunflowers, hollyhocks, larkspur and foxgloves* which are all readily available • The positive language used: *an excellent source of pollen, there is scope for more bee-friendly planting, this amazing insect, crops of fruit and veg will look and taste better, and your flowers will be abuzz all summer long* • Repetition of the words *honey bee* to emphasise the subject • The use of factual information: *pollinating one-third of all the foods we eat, Swarming is a natural process, on earth for some 30 million years* • The reference to the benefits of supporting the scheme: *You will receive, Your adoption money will help, simple things you can do to help save our honey bees* • The use of rhetorical questions and exclamation marks to enliven the text

Marking criteria for Section A Question 1 (a)

Table A

Level	AO1: Read and demonstrate understanding of a wide variety of texts. **5 marks**	AO2: Write effectively, creatively, accurately and appropriately, for a range of audiences and purposes. **5 marks**
5	• Sophisticated understanding of text (meaning/context/audience) • Insightful reference to characteristic features 5 marks	• Sophisticated expression, with a high level of accuracy • Content is fully relevant to audience and purpose; ideas are developed throughout in a sophisticated manner 5 marks
4	• Detailed understanding of text (meaning/context/audience) • Effective reference to characteristic features 4 marks	• Effective expression, with a few minor errors which do not impede communication • Content is relevant to audience and purpose; ideas are developed in an effective manner 4 marks
3	• Clear understanding of text (meaning/context/audience) • Clear reference to characteristic features 3 marks	• Clear expression, with occasional errors which do not impede communication • Content is relevant to audience and purpose; ideas are developed clearly 3 marks
2	• Limited understanding of text (meaning/context/audience) • Limited reference to characteristic features 2 marks	• Expression is clear but may not flow easily, with frequent errors which generally do not impede communication • Content is mostly relevant to audience and purpose; ideas are developed in a limited manner 2 marks
1	• Basic understanding of text (meaning/context/audience) • Minimal reference to characteristic features 1 mark	• Basic expression, with frequent errors which impede communication • Content may lack relevance to audience and purpose; minimal development of ideas 1 mark

Section B: Text analysis

Question	Answer	Marks
2	**Read the following text, which is an extract from a non-fiction book about snow. The text explains an Icelandic word for snow.** **Analyse the text, focusing on form, structure and language.** Mark according to the levels of response marking criteria in Table C. **Additional guidance:** The analysis should address the style, form, genre, structure and language of the text (including specific and relevant references), explaining how they create meaning in relation to audience and purpose. The comments below are illustrative and are not intended to be exhaustive. Candidates may make other valid comments that should be credited. Candidates may organise their response in any appropriate way. They are not required to focus on form, structure and language in separate sections. **Responses might analyse the following:** **Form** • The typical text conventions used in the extract • The ways in which the purpose affects the content and style of the text • The ways in which the extract appeals to its intended audience, e.g. through the tone and register used in the text • any other relevant aspect of the text's form **Structure** • The ways in which paragraphs are constructed and sequenced in the text • The ways in which ideas are developed • Varying paragraph length and how this enables the writer to develop certain points in depth/detail, or make high impact points for dramatic effect • The use of discourse markers for organisation/cohesion • The use of a range of cohesive devices – tense agreement, anaphoric/cataphoric refences, substitution, etc. • any other relevant structural feature in the text	**25**

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
2	**Language** • The inclusion of facts such as the first reference to *hundslappadrífa* in 1898, names of albums, reference to one of the first Icelandic tourists, *P C Headley* • Use of third person narrative for objectivity • Use of a lexical field related to sound and music: *diacritics, lyrics, instrument, percussion, triangle, tambourine, notes, chords, orchestra* • The names of singers to lend credibility: *Björk, Sigur Rós, Alex Somers, Jónsi* and quotations from them • The use of/reference to different languages used including *Icelandic, Hopelandic and gibberish* and the many words for different kinds of snow in Icelandic: *snjór*, *mjöll*, *skoeðdadrífa, logndrífa* • The beauty of the language used to describe the snow: *fall swiftly and softly from clouds in calm weather, softening the bleak landscape* • The use of onomatopoeia and the way that the place, sounds and language are all in harmony together: *crackle of frost*, *patter* • The use of personification: *frozen tongues* • any other relevant language feature used in the text.

Marking criteria for Section B Question 2

Table C

Level	AO1: Read and demonstrate understanding of a wide variety of texts. **5 marks**	AO3: Analyse the ways in which writers' and speakers' choices of form, structure and language produce meaning and style. **20 marks**
5	• Sophisticated understanding of text (meaning/context/audience) • Insightful reference to characteristic features 5 marks	• Analysis is sophisticated, coherent and very effectively structured • Insightful selection of elements of form, structure and language for analysis • Sophisticated awareness of writer's stylistic choices, including how style relates to audience and shapes meaning • Uses precise and fully appropriate language to link evidence with explanatory comments 17–20 marks
4	• Detailed understanding of text (meaning/context/audience) • Effective reference to characteristic features 4 marks	• Analysis is detailed, coherent and effectively structured • Effective selection of elements of form, structure and language for analysis • Detailed awareness of writer's stylistic choices, including how style relates to audience and shapes meaning • Uses effective and appropriate language to link evidence with explanatory comments 13–16 marks
3	• Clear understanding of text (meaning/context/audience) • Clear reference to characteristic features 3 marks	• Analysis is clear, coherent and well structured • Appropriate selection of elements of form, structure and language for analysis • Clear awareness of writer's stylistic choices, including how style relates to audience and shapes meaning • Uses clear and appropriate language to link evidence with explanatory comments 9–12 marks
2	• Limited understanding of text (meaning/context/audience) • Limited reference to characteristic features 2 marks	• Limited analysis, with some structure and limited coherence • Some appropriate selection of elements of form, structure and/or language for analysis • Limited awareness of writer's stylistic choices • Attempts to use appropriate language to link evidence with explanatory comments 5–8 marks

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

© UCLES 2018

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

English Language specific marking instructions:

AO1: Read and demonstrate understanding of a wide variety of texts. (Understanding)

- Marks should be awarded for the accuracy of the candidate's understanding of the text and its features, **not** for any analysis of them which is recognised under AO3.
- Where comparison is required, marks should be awarded for the candidate's recognition of similarities and differences between the texts and their features, **not** for any consequent analysis.
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

AO2: Write effectively, creatively, accurately and appropriately, for a range of audiences and purposes. (Writing)

- Marks should be awarded equally on the basis of the level of the candidate's written expression (range of features used and accuracy) and the development of their writing (its organisation and relevance to task and audience).
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

AO4: Demonstrate understanding of linguistic issues, concepts, methods and approaches. (Conceptualisation)

- Marks should be awarded equally on the basis of the level of the candidate's understanding of the relevant issues, concepts, methods and approaches represented both in the text(s) and in their wider studies.
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

Marking criteria for Section A Question 1 and Section B Question 2

Table A

Level	AO1: Read and demonstrate understanding of a wide variety of texts. **10 marks**	AO2: Write effectively, creatively, accurately and appropriately, for a range of audiences and purposes. **5 marks**	AO4: Demonstrate understanding of linguistic issues, concepts, methods and approaches. **10 marks**
5	• Sophisticated understanding of text (meaning/context/audience) • Insightful reference to specific points 9–10 marks	• Sophisticated expression, with a high level of accuracy • Content is fully relevant; ideas are developed throughout in a sophisticated manner 5 marks	• Sophisticated understanding of linguistic issues, concepts, methods and approaches represented in the text • Insightful reference to wider study of linguistic issues, concepts, methods and approaches 9–10 marks
4	• Detailed understanding of text (meaning/context/audience) • Effective reference to specific points 7–8 marks	• Effective expression, with a few minor errors which do not impede communication • Content is relevant; ideas are developed in an effective manner 4 marks	• Detailed understanding of linguistic issues, concepts, methods and approaches represented in the text • Effective reference to wider study of linguistic issues, concepts, methods and approaches 7–8 marks

Section A: English in the world

Question	Answer	Marks
1	**Read the following two texts. Text A is a news item published in 2014 on the *BBC World News Asia* website. Text B consists of four online comments written in response to this news item.** **Discuss what you feel are the most important issues raised in the texts relating to the spread of English around the world. You should refer to specific details from the texts as well as to ideas and examples from your wider study of English in the world.** Mark according to the levels of response marking criteria in Table A. **Additional guidance:** The comments below are illustrative and are not intended to be exhaustive. Candidates may make other valid comments that should be credited. **Responses might discuss the following:** • the concepts of a world language, English as a 'global' language, and English as a lingua franca • the spread and/or distribution of English, e.g. Kachru's concentric circles model • ideas of linguistic/cultural imperialism • the domination of world media and commerce by the English language • the effects of language contact • prescriptivist versus descriptivist attitudes to language change • language shift • the phenomenon of zero translation, e.g. *GDP*, *WTO*, *Wifi* • how and why some brand names are translated, e.g. *Nokia*, while some others are not, e.g. *iPhone* • lexical borrowing, e.g. *cul-de-sac*, *karaoke*, *jodhpurs*.	**25**

© UCLES 2018

Section B: Language and the self

Question	Answer	Marks
2	**Read the following text, which is an extract from a blog on the website of SOAS, a college of the University of London. It was posted in 2017.** **Discuss what you feel are the most important issues raised in the text relating to the ways in which language can shape and reflect social identity. You should refer to specific details from the text as well as to ideas and examples from your wider study of Language and the self.** Mark according to the levels of response marking criteria in Table A. **Additional guidance:** The comments below are illustrative and are not intended to be exhaustive. Candidates may make other valid comments that should be credited. **Responses might discuss the following:** • the notion of how identity is constructed by language • the fact that language is constantly evolving • the idea of RP being *under attack* • MLE as a sociolect which is very dynamic and changes constantly and rapidly • how MLE *occurred naturally due to an inner-city generation's exposure to a variety of accents, foreign languages, and pronunciations* • the idea that common culture rather than ethnic or social background is what matters in becoming part of the MLE language community • concepts related to the idea of language as an expression of self and identity • concepts related to the idea of shared culture-specific values (covert prestige) • the use of loanwords in MLE and other variants of English • specific instances of the lexis, grammar, syntax or phonology of MLE, e.g. the suffix *-dem*, the term *dutty* • concepts of convergence/divergence, e.g. Giles's Accommodation Theory; Sperber and Wilson's Relevance Theory • the idea that MLE is becoming *redundant* and less relevant as it spreads and UBE is suggested as a more appropriate term for the sociolect • the idea of code-switching from Standard English to MLE.	**25**

Section A: English in the world

Question 1

Read the following two texts. Text A is a news item published in 2014 on the *BBC World News Asia* website. Text B consists of four online comments written in response to this news item.

Discuss what you feel are the most important issues raised in the texts relating to the spread of English around the world. You should refer to specific details from the texts as well as to ideas and examples from your wider study of English in the world. [25]

Text A

Why some English words are controversial in China

Nowadays, if you eavesdrop on Chinese people's phone conversations, it is commonplace to hear English phrases popping up here and there, like 'Okay', 'Cool' and 'Bye bye'.

In today's Chinese publications, English abbreviations and acronyms also pop up frequently without any Chinese translations: GDP, WTO, Wifi, CEO, MBA, VIP and the air pollutant term PM2.5 are among the most popular.

This phenomenon, termed 'zero translation', has sparked a fierce debate, with the Chinese Communist Party's official newspaper *People's Daily* the latest to join the fray.

'Why is zero translation so prevalent?' screams the headline in a recent commentary piece. 'Why do we have translations for Nokia and Motorola, but not for iPhone or iPad?' ask the authors.

What irritates them is the fact that these foreign terms are found not only in newspapers and online, but in serious science journals as well.

They claim that such practices damage the integrity and harmony of the Chinese language, dilute the richness of Chinese culture and hamper comprehension. 'How many people can understand these words?' they ask.

Text B

fedup123
1 May 2014 22:10

All languages will I believe merge. English will absorb ever more useful words and so will living languages elsewhere, until they resemble each other more and more.

If China wants to preserve as much of its language and culture as possible, it needs to export it.

noonehere624
1 May 2014 22:14

In what way does including words and terms from another language 'dilute the richness of Chinese culture'?

Doesn't it do the opposite? Or have I misunderstood the word richness?

Where would English be without all its borrowings from other languages?

I would suggest that it would be a lot less rich, and a lot less interesting.

laughalots96
1 May 2014 22:19

This 'purity of the language' debate goes on all over the world and the government in China or elsewhere is doomed to failure. People will say whatever they want to, however they like. They use the expressions they find useful and ignore the rest. Power to the people actually works when it comes to languages, thank goodness.

happy81
1 May 2014: 22:41

One of the reasons English is such a rich language is that it absorbs words from around the world like a sponge. I live in a cul-de-sac with a petite wife who likes to sing karaoke while wearing an azure dress and wearing cologne fragrance. She never uses rouge on her cheeks when she takes our kids to the kindergarten. Then she goes riding in her jodhpurs.

Section B: Language and the self

Question 2

Read the following text, which is an extract from a blog on the website of SOAS, a college of the University of London. It was posted in 2017.

Discuss what you feel are the most important issues raised in the text relating to the ways in which language can shape and reflect social identity. You should refer to specific details from the text as well as to ideas and examples from your wider study of Language and the self. [25]

The rise of Multicultural London English, innit?

Received Pronunciation is under attack. An early threat to the standard accent of English as spoken in the south of England dates back to the 1980s in the form of Estuary English. A more recent – and perhaps more potent – assault comes in the form of Multicultural London English (MLE).

MLE is a sociolect of English, in as much as it is a dialect specific to a particular social class. It is predominantly spoken by young, working class people in the multicultural neighbourhoods of inner-city London and its suburbs.

In a newspaper article, Dr Chris Lucas, Senior Lecturer at SOAS University of London, describes the spread of MLE beyond the capital: 'London accents have spread beyond London and are spreading still. You're seeing more and more features of this Multicultural London English being adopted and blended with the local, traditional, working-class accents of whichever city it might be – Manchester, Liverpool, Birmingham.'

The power of cool

The term 'cool' to signify something that is fashionable and stylish may be thought to have its origins in the Jazz Age of the 1930s; however, the term was being used at least a century beforehand to similarly signify something that was desirable.

The spread of MLE beyond London can be seen as a triumph of the 'cool', with language taken from Grime, Street and Hip-Hop music, and from a gang culture characterised in films such as AdULTHOOD and KiDULTHOOD, becoming fashionable in youth culture.

However, the rise of MLE in London has not been so much as a result of the influence of popular culture, but has occurred naturally due to an inner-city generation's exposure to a variety of accents, foreign languages, and pronunciations, which have shaped its everyday spoken language.

Loanwords

The use of MLE words which derive from other languages is significant. For example, the suffix *-dem* as a plural marker in words such as *mandem* or *gyaldem*, or the term *dutty* to mean something that is either dirty, bad, or ugly, both come from Jamaican Creole. The concept of loanwords is nothing new in language: the English language would be nothing like as rich without the loanwords it has acquired from its neighbours, far and wide.

Urban British English (UBE)

Language is ever evolving. Even during the relatively short time it has taken for MLE to become established, spread and now studied, it is also becoming redundant. As MLE gains popularity beyond its original catchment area of London and the Home Counties, so its relevance is diminished.

So RIP MLE; and hello UBE.

Cambridge Assessment International Education

Syllabus

Cambridge International AS & A Level English Language 9093

Use this syllabus for exams in 2024, 2025 and 2026.
Exams are available in the June and November series.
Also available for examination in March 2024, 2025 and 2026 for India only.

Version 2

For the purposes of screen readers, any mention in this document of Cambridge IGCSE refers to Cambridge International General Certification of Secondary Education.

Cambridge Pathway

Why choose Cambridge International?

Cambridge International prepares school students for life, helping them develop an informed curiosity and a lasting passion for learning. We are part of the University of Cambridge.

Our Cambridge Pathway gives students a clear path for educational success from age 5 to 19. Schools can shape the curriculum around how they want students to learn – with a wide range of subjects and flexible ways to offer them. It helps students discover new abilities and a wider world, and gives them the skills they need for life, so they can achieve at school, university and work.

Our programmes and qualifications set the global standard for international education. They are created by subject experts, rooted in academic rigour and reflect the latest educational research. They provide a strong platform for students to progress from one stage to the next, and are well supported by teaching and learning resources.

We review all our syllabuses regularly, so they reflect the latest research evidence and professional teaching practice – and take account of the different national contexts in which they are taught.

We consult with teachers to help us design each syllabus around the needs of their learners. Consulting with leading universities has helped us make sure our syllabuses encourage students to master the key concepts in the subject and develop the skills necessary for success in higher education.

Our mission is to provide educational benefit through provision of international programmes and qualifications for school education and to be the world leader in this field. Together with schools, we develop Cambridge learners who are confident, responsible, reflective, innovative and engaged – equipped for success in the modern world.

Every year, nearly a million Cambridge students from 10 000 schools in 160 countries prepare for their future with the Cambridge Pathway.

School feedback: 'We think the Cambridge curriculum is superb preparation for university.'

Feedback from: Christoph Guttentag, Dean of Undergraduate Admissions, Duke University, USA

Quality management

Cambridge International is committed to providing exceptional quality. In line with this commitment, our quality management system for the provision of international qualifications and education programmes for students aged 5 to 19 is independently certified as meeting the internationally recognised standard, ISO 9001:2015. Important: Changes to this syllabus

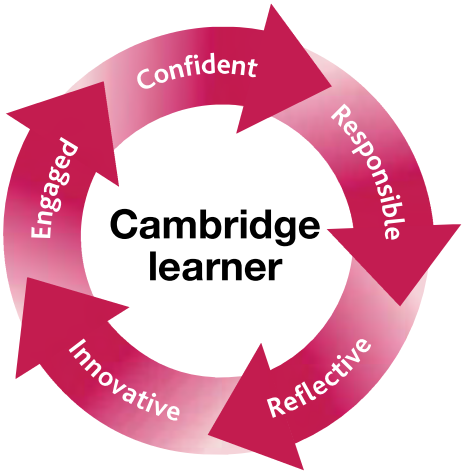
For information about changes to this syllabus for 2024, 2025 and 2026, go to page 31.



The latest syllabus is version 2, published October 2021.

Any textbooks endorsed to support the syllabus for examination from 2021 are still suitable for use with this syllabus.

1 Why choose this syllabus?

Key benefits

The best motivation for a student is a real passion for the subject they're learning. By offering students a variety of Cambridge International AS & A Levels, you can give them the greatest chance of finding the path of education they most want to follow. With over 50 subjects to choose from, students can select the ones they love and that they're best at, which helps motivate them throughout their studies.

Following a Cambridge International AS & A Level programme helps students develop abilities which universities value highly, including:

- a deep understanding of their subjects
- higher order thinking skills – analysis, critical thinking, problem solving
- presenting ordered and coherent arguments
- independent learning and research.

Cambridge International AS & A Level English Language develops a set of transferable skills. These include critical analysis; constructing arguments; presenting knowledge and understanding; and writing English in a balanced, articulate and fluent manner. Learners can apply these skills across a wide range of subjects and real-world situations. These skills will also equip them well for progression to higher education or directly into employment.

Our approach in Cambridge International AS & A Level English Language encourages learners to be:

confident, exploring texts and ideas with self-assurance, intellectual freedom and personal insight

responsible, committing to their learning and developing linguistic expertise to better understand themselves, others and the wider community

reflective, developing a keen and critical sense of themselves as users and consumers of language in a range of ever-changing contexts

innovative, approaching tasks and texts with a combination of creative, original and flexible thinking

engaged, recognising and interrogating the role language plays in matters of personal, social and global significance, and being prepared to apply this learning beyond the classroom

School feedback: 'Cambridge students develop a deep understanding of subjects and independent thinking skills.'

Feedback from: Principal, Rockledge High School, USA

Key concepts

Key concepts are essential ideas that help students develop a deep understanding of their subject and make links between different aspects. Key concepts may open up new ways of thinking about, understanding or interpreting the important things to be learned.

Good teaching and learning will incorporate and reinforce a subject's key concepts to help students gain:

- a greater depth as well as breadth of subject knowledge
- confidence, especially in applying knowledge and skills in new situations
- the vocabulary to discuss their subject conceptually and show how different aspects link together
- a level of mastery of their subject to help them enter higher education.

The key concepts identified below, carefully introduced and developed, will help to underpin the course you will teach. You may identify additional key concepts which will also enrich teaching and learning.

The key concepts for Cambridge International AS & A Level English Language are:

- **Text and context**
  A **text** can be defined as a single, coherent unit of language, from the briefest spoken utterance to a book published across several volumes. However, no text exists without **context**; students of English language must always consider how a text's meaning is informed by the circumstances not only of its production, but also of its communication and reception.
- **Meaning and style**
  The study of English language involves developing a range of strategies for exploring the complex ways in which different linguistic elements come together to create **meaning**. Whether producing their own texts or analysing texts produced by others, students of English language must consider how choices regarding form, structure and language also interact to create a distinctive **style**.
- **Audience**
  Students of English language must learn to identify and analyse the strategies writers and speakers use to communicate with their intended **audience(s)**. Likewise, they must be able to predict, recognise and analyse the various responses these strategies might elicit.
- **Creativity**
  Whether writing artfully for a specified purpose and audience, reading deeply between the lines of a challenging text, or developing strategies for acquiring the language in the first place, users of the English language must demonstrate **creativity** in a range of forms and contexts.
- **Diversity**
  Constantly subject to a range of influences – whether personal, social, geographical or otherwise – the English language exists in a range of competing and overlapping forms at any given moment. This extraordinary **diversity** offers a rich opportunity for analysis, comparison and exploration.
- **Change**
  The phonological, morphological, semantic, syntactic and other aspects of the English language are liable to **change** over time. Students of English language must analyse these changes and explore in detail the factors that drive them.

International recognition and acceptance

Our expertise in curriculum, teaching and learning, and assessment is the basis for the recognition of our programmes and qualifications around the world. Every year thousands of students with Cambridge International AS & A Levels gain places at leading universities worldwide. Our programmes and qualifications are valued by top universities around the world including those in the UK, US (including Ivy League universities), Europe, Australia, Canada and New Zealand.

UK NARIC, the national agency in the UK for the recognition and comparison of international qualifications and skills, has carried out an independent benchmarking study of Cambridge International AS & A Level and found it to be comparable to the standard of AS & A Level in the UK. This means students can be confident that their Cambridge International AS & A Level qualifications are accepted as equivalent, grade for grade, to UK AS & A Levels by leading universities worldwide.

Cambridge International AS Level English Language makes up the first half of the Cambridge International A Level course in English Language and provides a foundation for the study of English Language at Cambridge International A Level. Depending on local university entrance requirements, students may be able to use it to progress directly to university courses in English Language or some other subjects. It is also suitable as part of a course of general education.

Cambridge International A Level English Language provides a foundation for the study of English or related courses in higher education. Equally it is suitable as part of a course of general education.

For more information about the relationship between the Cambridge International AS Level and Cambridge International A Level see the 'Assessment overview' section of the Syllabus overview.

We recommend learners check the Cambridge recognition database and university websites to find the most up-to-date entry requirements for courses they wish to study.

Learn more at **www.cambridgeinternational.org/recognition**

School feedback: 'The depth of knowledge displayed by the best A Level students makes them prime targets for America's Ivy League universities.'

Feedback from: Yale University, USA

Supporting teachers

We provide a wide range of resources, detailed guidance and innovative training and professional development so that you can give your students the best possible preparation for Cambridge International AS & A Level. To find out which resources are available for each syllabus go to **www.cambridgeinternational.org/support**

The School Support Hub is our secure online site for Cambridge teachers where you can find the resources you need to deliver our programmes. You can also keep up to date with your subject and the global Cambridge community through our online discussion forums.

2 Syllabus overview

Aims

The aims describe the purposes of a course based on this syllabus.

The aims are to enable students to:

- enjoy the experience of studying English language
- develop a critical and informed response to texts in a range of forms, styles and contexts, produced for a variety of audiences
- communicate effectively, creatively, accurately and appropriately in their writing
- develop the interdependent skills of reading, analysis and research
- develop an appreciation of concepts and techniques in the study of English language
- build a firm foundation for further study of language and linguistics.

Cambridge Assessment International Education is an education organisation and politically neutral. The contents of this syllabus, examination papers and associated materials do not endorse any political view. We endeavour to treat all aspects of the exam process neutrally.

Content overview

Cambridge International AS Level English Language provides learners with opportunities to make critical and informed responses to a wide range of texts. Learners will also demonstrate their ability to produce writing to specific briefs and for given audiences.

Cambridge International A Level English Language learners will also develop a strong foundation in the study of linguistics, focusing on language change, child language acquisition, English in the world, and language and the self.

Learners who follow the Cambridge International AS & A Level English Language syllabus will develop the following skills and understanding:

- sustaining accurate, fluent and consistent writing
- producing informed responses appropriate to the specified form, style, context, and audiences
- conveying knowledge and understanding from both specific examples and wider studies.

These are highly transferable skills and may help learners in other subject areas, as well as equipping them for higher education or employment.

Support for Cambridge International AS & A Level English Language

Our School Support Hub **www.cambridgeinternational.org/support** provides Cambridge schools with a secure site for downloading specimen and past question papers, mark schemes, grade thresholds and other curriculum resources specific to this syllabus. The School Support Hub community offers teachers the opportunity to connect with each other and to ask questions related to the syllabus.

School feedback: 'Cambridge International AS & A Levels prepare students well for university because they've learnt to go into a subject in considerable depth. There's that ability to really understand the depth and richness and the detail of a subject. It's a wonderful preparation for what they are going to face at university.'

Feedback from: US Higher Education Advisory Council

Assessment overview

Paper 1

Reading 2 hours 15 minutes

50 marks

Candidates answer **two** compulsory questions: Question 1 in Section A, and Question 2 in Section B.

Externally assessed

50% of the AS Level

25% of the A Level

Paper 2

Writing 2 hours

50 marks

Candidates answer **two** questions: one compulsory question from Section A, and one question from a choice of three in Section B.

Externally assessed

50% of the AS Level

25% of the A Level

Paper 3

Language Analysis 2 hours 15 minutes

50 marks

Candidates answer **two** compulsory questions: Question 1 in Section A, and Question 2 in Section B.

Externally assessed

25% of the A Level

Paper 4

Language Topics 2 hours 15 minutes

50 marks

Candidates answer **two** compulsory questions each on a separate topic area: Question 1 in Section A, and Question 2 in Section B.

Externally assessed

25% of the A Level

Information on availability is in the **Before you start** section.

There are three routes for Cambridge International AS & A Level English Language:

	Route	Paper 1	Paper 2	Paper 3	Paper 4
1	**AS Level only** (Candidates take all AS components in the same exam series)	yes	yes	no	no
2	**A Level** (staged over two years) Year 1 AS Level*	yes	yes	no	no
	Year 2 Complete the A Level	no	no	yes	yes
3	**A Level** (Candidates take all components in the same exam series)	yes	yes	yes	yes

* Candidates carry forward their AS Level result subject to the rules and time limits described in the *Cambridge Handbook*.

Candidates following an AS Level route will be eligible for grades a–e. Candidates following an A Level route are eligible for grades A*–E.

Assessment objectives

The assessment objectives (AOs) are:

AO1

Read and demonstrate understanding of a wide variety of texts.

AO2

Write effectively, creatively, accurately and appropriately, for a range of audiences and purposes.

AO3

Analyse the ways in which writers' and speakers' choices of form, structure and language produce meaning and style.

AO4

Demonstrate understanding of linguistic issues, concepts, methods and approaches.

AO5

Analyse and synthesise language data from a variety of sources.

Weighting for assessment objectives

The approximate weightings allocated to each of the assessment objectives (AOs) are summarised below.

Assessment objectives as a percentage of each qualification

Assessment objective	Weighting in AS Level %	Weighting in A Level %
AO1	15	20
AO2	45	30
AO3	40	20
AO4	0	20
AO5	0	10
Total	100	100

Assessment objectives as a percentage of each component

Assessment objective	Weighting in components %			
	Paper 1	Paper 2	Paper 3	Paper 4
AO1	30	0	10	40
AO2	10	80	10	20
AO3	60	20	0	0
AO4	0	0	40	40
AO5	0	0	40	0
Total	100	100	100	100

3 Subject content

AS Level content (Paper 1 and Paper 2)

In Paper 1, candidates are primarily assessed on skills and techniques related to reading.

In Paper 2, candidates are primarily assessed on skills and techniques related to writing.

The examples listed in the content below are suggested rather than prescribed ways in which candidates can demonstrate knowledge and understanding. These examples are not exhaustive.

Paper 1 Reading

Learners are encouraged to read widely throughout their programme of study, continually deepening their appreciation of an increasingly rich array of reading material. They should develop an intimate knowledge and understanding of the conventions and discourses associated with a diverse range of genres, styles and contexts. Furthermore, learners should continue to cultivate their personal relationship with reading, enabling them to respond reflectively, analytically, discursively and creatively, as is appropriate to the task or context.

Knowledge and understanding	
Candidates should be prepared to demonstrate knowledge and understanding of:	Examples:
• the conventions of a wide range of written textual forms	• advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing
• the linguistic elements and literary features of texts	• parts of speech / word classes, vocabulary, figurative language, phonology, morphology, rhetorical devices, voice, aspect, tense, modality, narrative perspective, word ordering and sentence structure, paragraph- and text-level structure, formality/informality of tone, pragmatics
• the significance of audience in both the design and reception of texts	
• the ways in which genre, purpose and context contribute to the meaning of texts	

Skills and techniques

Candidates should be prepared to demonstrate the following skills and techniques:

- reading a range of unseen texts
- analysing the ways in which linguistic elements come together in a text to create meaning
- recognising different nonfiction textual forms and their conventions
- writing analytically about the effects produced by a range of linguistic elements and literary features
- integrating individual analytical points into broader overall responses to texts
- selecting and interpreting words and phrases from a text with care and precision
- recognising and commenting on the overall style of a text, and exemplifying this through specific instances of language analysis
- using quotations and evidence, with judgement, to produce precise, meaningful commentaries
- using appropriate language to link quotations and evidence with explanatory comments
- integrating quotations and evidence into a cohesive argument
- writing short, directed pieces in response to a text
- writing in the same style as another text
- writing in a different style from a text at the same time as re-using the content/material
- comparing the style and linguistic elements of their own writing with those of a given text.

Paper 2 Writing

Using their reading as inspiration, learners should explore and experiment with a similarly extensive variety of genres, styles and contexts in their writing. In addition to refining their ability to express themselves with precision and clarity of purpose, learners should become increasingly reflective writers, capable of adapting the style of their writing to fit a diverse range of forms, audiences, purposes and contexts.

The knowledge and understanding that candidates are required to demonstrate in Paper 2 is the same as is covered in Paper 1.

Knowledge and understanding

Candidates should be prepared to demonstrate knowledge and understanding of:	Examples:
• the conventions of a wide range of written textual forms	• advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing
• the linguistic elements and literary features of texts	• parts of speech / word classes, vocabulary, figurative language, phonology, morphology, rhetorical devices, voice, aspect, tense, modality, narrative perspective, word ordering and sentence structure, paragraph- and text-level structure, formality/informality of tone, pragmatics

Knowledge and understanding continued	
Candidates should be prepared to demonstrate knowledge and understanding of:	
• the significance of audience in both the design and reception of texts	
• the ways in which genre, purpose and context contribute to the meaning of texts	

Skills and techniques	
Candidates should be prepared to demonstrate the following skills and techniques:	Examples:
• writing for a specified audience and purpose, to fulfil the brief provided	
• producing an appropriate structure for longer pieces of writing	• Freytag's Pyramid in imaginative writing; dialectical structure in discursive writing; introductory, summary and evaluative sections in review writing
• organising writing to achieve specific effects	• withholding key information in imaginative writing; juxtaposing counterarguments in discursive writing; evidentiary logic in critical writing
• structuring paragraphs	• topic sentences, connectives, internal coherence, discourse markers
• using a range of appropriate linguistic elements and literary features	• imagery in descriptive writing; rhetorical devices in argumentative writing; evaluative lexis in critical writing
• expressing ideas accurately and clearly at both sentence and word level	
• reflecting upon and evaluating the qualities of their own writing, including aspects relating to its purpose, form and audience	

A Level content (Paper 3 and Paper 4)

At A Level, candidates are required to build upon the knowledge and understanding established at AS Level, and to concentrate their study on four specialised subject areas:

- language change
- child language acquisition
- English in the world
- language and the self.

Similarly, the skills and techniques required at A Level expand upon those required at AS Level: Paper 3 primarily focuses on skills and techniques related to analytical reading, while the emphasis in Paper 4 is on discursive writing.

The examples listed in the content below are suggested rather than prescribed ways in which candidates can demonstrate knowledge and understanding. These examples are not exhaustive.

Paper 3 Language Analysis

Learners should familiarise themselves with a comprehensive set of tools, strategies and conventions for studying language. This should include the following: developing frameworks for analysing and comparing unseen texts; assimilating a range of appropriate technical terminology; assessing, evaluating and synthesising sources of evidence; carrying out independent research into language concepts; contextualising their views in relation to theories; and understanding language data presented in the form of transcripts, tables and graphs.

Section A: Language change

In Section A, learners will explore how English has continually adapted to reflect changes in the social, cultural, political and technological contexts in which it has been used. Learners will explore the causes and consequences of language change in English, developing their knowledge of the topic through research, analysis, and an understanding of conventional methods of presenting historical language data.

Knowledge and understanding	
Candidates should be prepared to demonstrate knowledge and understanding of:	Examples:
• the chronology and essential features of the development of the English language from Early Modern English to Contemporary English	• graphology, orthography, phonology, morphology, syntax, lexis, semantics, pragmatics, grammar
• concepts and terminology related to language change	• etymology, derivation, inflection, telescoping, coalescence, acronym, conversion, compounding, backformation, blending, borrowing, amelioration, pejoration, broadening, narrowing
• theories and theorists of language change	• random fluctuation theory, cultural transmission theory, theory of lexical gaps, substratum theory, functional theory, tree and wave models
• *n*-gram graphs representing changes in language use over time	• comparisons of related words, parts of speech, inflections, collocations
• word tables derived from corpus data	• collocate lists, synonym lists

Skills and techniques

Candidates should be prepared to demonstrate the following skills and techniques:

- researching in the field of language change
- analysing unseen texts as exemplars of certain aspects of language change
- interpreting and analysing *n*-gram graphs and corpus data relating to language change
- contextualising findings alongside relevant theories and concepts relating to language change
- synthesising their responses to a range of language data into a coherent analytical essay.

Section B: Child language acquisition

In Section B, learners will explore the stages of early development (0–8 years) in child language acquisition, considering the various features and functions of spoken language use during this period, and familiarising themselves with a range of relevant theories, theorists and conventions within the field.

Knowledge and understanding

Candidates should be prepared to demonstrate knowledge and understanding of:	Examples:
• the main stages of early development in child language acquisition	• babbling, holophrastic, telegraphic and post-telegraphic stages
• the different functions of children's language	• instrumental, regulatory, interactional, personal, representational, heuristic, imaginative
• theories and theorists of child language acquisition	• imitation and reinforcement theory, language acquisition device, language acquisition support system, cognitive development theory, child-directed or caretaker speech
• the conventions and features of unscripted conversation and spoken language transcripts	• notation for pauses, overlaps, stress, intonation and phonemic features

Skills and techniques

Candidates should be prepared to demonstrate the following skills and techniques:

- researching in the field of child language acquisition
- analysing spoken language transcripts as exemplars of certain aspects of child language acquisition
- interpreting and analysing instances of conversation involving children aged 0 to 8 years
- contextualising findings alongside relevant theories and concepts relating to child language acquisition
- synthesising these theoretical considerations into a coherent analytical essay.

Paper 4 Language Topics

Throughout the syllabus, learners are encouraged to move beyond the practical application of English language, and to engage in a deeper consideration of a number of theoretical issues related to its use. Learners should develop their ability to engage in discussion on how the diverse forms of English that exist across the world interact both with one another and with other languages, and, how language use contributes to the construction and development of the self.

For Paper 4, learners will study two key topics in the field of English language studies: 'English in the world' in Section A and 'Language and the self' in Section B.

Section A: English in the world

In Section A, learners will explore the history of English as a 'global' language; the development of standard and nonstandard forms of English, including the varieties used by first-language users outside the UK; and ethical considerations related to the continuing expansion of English usage around the world.

Knowledge and understanding	
Candidates should be prepared to demonstrate knowledge and understanding of theories, theorists and studies relating to:	Examples:
• the historical development of English as a 'global' language	• colonialism, cultural influence and effects, concentric circles model, multilingualism, the future of English
• varieties of English	• standard and nonstandard 'Englishes', creolisation, sociolect continuum, official and unofficial attitudes and policies
• relevant ethical considerations	• language shift and death, cultural imperialism, equality of opportunity, global cooperation

Skills and techniques

Candidates should be prepared to demonstrate the following skills and techniques:

- reading and demonstrating critical understanding of unseen texts relating to 'English in the world'
- selecting and analysing pertinent ideas and examples from the texts
- relating these ideas and examples to theories, theorists and studies from their wider research in the relevant topic area
- synthesising these considerations into a coherent analytical essay.

Section B: Language and the self

In Section B, learners will explore how language allows us to communicate our sense of self to others, as well as playing a highly significant role in the ongoing construction, determination and development of that self. Learners will study the degree to which language is innate, learned, or both; the ways in which language and thought are both interwoven with, and separable from, each other; and how we use language, both consciously and unconsciously, to construct and maintain social identities.

Knowledge and understanding	
Candidates should be prepared to demonstrate knowledge and understanding of theories, theorists and studies relating to:	Examples:
• innateness and learning	• behaviourism, innatism, nativism, empiricism
• the relationship between language and thought	• linguistic relativity and determinism, universalism, language of thought hypothesis
• the relationship between language and social identity	• speech communities, prestige, idiolect, dialect, sociolect, genderlect, variation, standard and nonstandard features, inclusion and exclusion, speech sounds and accents

Skills and techniques

Candidates should be prepared to demonstrate the following skills and techniques:

- reading and demonstrating critical understanding of unseen texts relating to 'Language and the self'
- selecting and analysing pertinent ideas and examples from the texts
- relating these ideas and examples to theories, theorists and studies from their wider research in the relevant topic area
- synthesising these considerations into a coherent analytical essay.

Support for Cambridge International AS & A Level English Language

New support for teachers includes a Teacher guide, Learner guide and a Glossary of terms. Other support is available from our School Support Hub at **www.cambridgeinternational.org/support**

4 Details of the assessment

Paper 1 Reading

Written paper, 2 hours 15 minutes, 50 marks

This paper has two sections, Section A: Directed response, and Section B: Text analysis. Each section is worth 25 marks.

Candidates must answer **two** compulsory questions: Question 1 in Section A, and Question 2 in Section B.

Each question requires candidates to respond to one unseen text.

Examples of the text types candidates may be required to read (or produce for Question 1(a)) include advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.

Dictionaries may **not** be used.

Section A: Directed response

Question 1 is in two parts:

(a) directed writing task in response to a text (10 marks)
(b) comparison of the form, structure and language of the candidate's response in part (a) with that of the original text (15 marks)

In Question 1(a), candidates are required to read a text of approximately 550–750 words, and write a directed response of 150–200 words, choosing their vocabulary, style and structure to fit a specific form, purpose and audience.

This question assesses AO1 and AO2.

In Question 1(b), candidates are required to:

- identify, analyse and compare characteristic features of the texts
- relate these features to the purpose, audience and context of the texts.

This question assesses AO1 and AO3.

Section B: Text analysis

In Question 2, candidates are required to read a text of approximately 550–750 words, and comment on the form, structure and language of the text.

Candidates are required to:

- identify characteristic features of the text, relate them to the meaning, context and audience of the writing, and organise information in their answers
- comment on aspects of form, structure and language
- write in an appropriate style.

This question assesses AO1 and AO3.

Paper 2 Writing

Written paper, 2 hours, 50 marks

This paper has two sections, Section A: Shorter writing and reflective commentary, and Section B: Extended writing. Each section is worth 25 marks.

Candidates must answer **two** questions: Question 1 in Section A (compulsory), and **one** question in Section B.

Dictionaries may **not** be used.

Section A: Shorter writing and reflective commentary

Question 1 is in two parts:

(a) writing a short text in response to a prompt (15 marks)

(b) writing a reflective commentary based on how the text produced in part (a) fulfils the brief (10 marks)

In Question 1(a), candidates are required to write a response of no more than 400 words to a prompt, choosing their vocabulary, style and structure to fit a specific form, purpose and audience.

Examples of the text types candidates may be required to produce include advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.

This question assesses AO2.

In Question 1(b), candidates are required to write a reflective commentary explaining how their linguistics choices have contributed to fulfilling the brief in part (a).

Candidates are required to focus on their choices of form, structure and language, and to analyse how these stylistic choices relate to audience and shape meaning.

This question assesses AO3.

Section B: Extended writing

Candidates choose to answer **one** out of three questions.

Each question corresponds to one of the three following categories:

- imaginative/descriptive
- discursive/argumentative
- review/critical.

Depending on the category, examples of the text types candidates may be required to produce include advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.

In each question, candidates are required to:

- produce a continuous piece of writing of 600–900 words
- express their ideas clearly, coherently and accurately, using an appropriate range of language
- develop their writing in a manner appropriate to the form, purpose and audience.

This question assesses AO2.

Paper 3 Language Analysis

Written paper, 2 hours 15 minutes, 50 marks

This paper has two sections, Section A: Language change, and Section B: Child language acquisition. Each section is worth 25 marks.

Candidates must answer **both** questions.

Dictionaries may **not** be used.

Section A: Language change

In Question 1, candidates are required to respond to three texts:

- a prose text of approximately 300–400 words, written at any time from the Early Modern English period (beginning c.1500) to the present day
- two sources of quantitative language data: an *n*-gram graph and a word table of corpus data.

Examples of the prose text types candidates may be required to analyse include advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto) biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.

Candidates are required to analyse how the prose text exemplifies ways in which the English language has changed over time. They are required to support their response with reference to the two sources of quantitative language data provided, and also to their wider study of language change.

This question assesses AO2, AO4 and AO5.

Section B: Child language acquisition

In Question 2, candidates are required to respond to a transcript featuring language spoken by a child or children between the ages of 0 and 8, possibly alongside other speakers.

Candidates are required to analyse ways in which the speakers in the transcript use language, referring to specific details from the transcription, and relating their observations to ideas and examples from their wider study of child language acquisition.

This question assesses AO1, AO4 and AO5.

Paper 4 Language Topics

Written paper, 2 hours 15 minutes, 50 marks

This paper has two sections, Section A: English in the world, and Section B: Language and the self. Each section is worth 25 marks.

Candidates must answer **both** questions.

Dictionaries may **not** be used.

Section A: English in the world

In Question 1, candidates are required to respond to approximately 400–500 words of text on the topic of 'English in the world'.

In their essay, candidates are required to discuss the most important issues the text raises in relation to a specified aspect of the role and status of the English language in the world. They are required to refer to specific details from the text, relating points in their discussion to ideas and examples from their wider study of the topic of English in the world.

This question assesses AO1, AO2 and AO4.

Section B: Language and the self

In Question 2, candidates are required to respond to approximately 400–500 words of text on the topic of 'Language and the self'.

In their essay, candidates are required to discuss the most important issues the text raises in relation to a specified aspect of the relationship between language and the self. They are required to refer to specific details from the text, relating points in their discussion to ideas and examples from their wider study of the topic of language and the self.

This question assesses AO1, AO2 and AO4.

Command words

Command words and their meanings help candidates know what is expected from them in the exam. The table below includes command words used in the assessment for this syllabus. The use of the command word will relate to the subject context.

Command word	What it means
Analyse	examine in detail to show meaning, identify elements and the relationship between them
Compare	identify/comment on similarities and/or differences
Discuss	write about issue(s) or topic(s) in depth in a structured way

5 Additional information

Reference table of International Phonetic Alphabet (IPA) phonemic symbols (Received Pronunciation)

1 Consonants of English	
/ f /	fat, rough
/ v /	very, village, love
/ θ /	theatre, thank, athlete
/ ð /	this, them, with, either
/ s /	sing, thinks, losses
/ z /	zoo, beds, easy
/ ʃ /	sugar, bush
/ ʒ /	pleasure, beige
/ h /	high, hit, behind
/ p /	pit, top
/ t /	tip, pot, steep
/ k /	keep, tick, scare
/ b /	bad, rub
/ d /	bad, dim
/ g /	gun, big
/ tʃ /	church, lunch
/ dʒ /	judge, gin, jury
/ m /	mad, jam, small
/ n /	man, no, snow
/ ŋ /	singer, long
/ l /	loud, kill, play
/ j /	you, beyond
/ w /	one, when, sweet
/ r /	rim, bread
/ ʔ /	uh-oh

2 Pure vowels of English	
/ iː /	beat, keep
/ ɪ /	bit, tip, busy
/ e /	bet, many
/ æ /	bat
/ ʌ /	cup, son, blood
/ aː /	car, heart, calm, aunt
/ ɒ /	pot, want
/ ɔː/	port, saw, talk
/ ə /	about, sudden
/ ɜː /	word, bird
/ ʊ /	book, wood, put
/ uː /	food, soup, rude

3 Diphthongs of English	
/ eɪ /	late, day, great
/ aɪ /	time, high, die
/ ɔɪ /	boy, noise
/ aʊ /	cow, house, town
/ əʊ /	boat, home, know
/ ɪə /	ear, here
/ eə /	air, care, chair
/ ʊə /	cure, jury

Transcription key

(1)	=	pause in seconds
(.)	=	micropause
underlined	=	stressed sound/syllable(s)
//	=	speech overlap
[*italics*]	=	paralinguistic features
<*italics*>	=	contextual information
UPPER CASE	=	words spoken with increased volume
°word°	=	words spoken with decreased volume
↗	=	upward intonation
↘	=	downward intonation
/wiv/	=	phonemic representation of speech sounds

6 What else you need to know

This section is an overview of other information you need to know about this syllabus. It will help to share the administrative information with your exams officer so they know when you will need their support. Find more information about our administrative processes at **www.cambridgeinternational.org/eoguide**

Before you start

Previous study

We recommend that learners starting this course should have completed a course in English equivalent to Cambridge IGCSE™ or Cambridge O Level.

Guided learning hours

We design Cambridge International AS & A Level syllabuses based on learners having about 180 guided learning hours for each Cambridge International AS Level and about 360 guided learning hours for a Cambridge International A Level. The number of hours a learner needs to achieve the qualification may vary according to local practice and their previous experience of the subject.

Availability and timetables

You can enter candidates in the June and November exam series. If your school is in India, you can enter your candidates in the March exam series. You can view the timetable for your administrative zone at **www.cambridgeinternational.org/timetables**

Private candidates can enter for this syllabus.

Combining with other syllabuses

Candidates can take this syllabus alongside other Cambridge International syllabuses in a single exam series. The only exceptions are:

- Cambridge International AS Level Language and Literature in English (8695)
- syllabuses with the same title at the same level.

Group awards: Cambridge AICE

Cambridge AICE (Advanced International Certificate of Education) is a group award for Cambridge International AS & A Level. It allows schools to offer a broad and balanced curriculum by recognising the achievements of learners who pass exams in a range of different subjects.

Learn more about Cambridge AICE at **www.cambridgeinternational.org/aice**

Making entries

Exams officers are responsible for submitting entries to Cambridge International. We encourage them to work closely with you to make sure they enter the right number of candidates for the right combination of syllabus components. Entry option codes and instructions for submitting entries are in the *Cambridge Guide to Making Entries*. Your exams officer has a copy of this guide.

Exam administration

To keep our exams secure, we produce question papers for different areas of the world, known as administrative zones. We allocate all Cambridge schools to one administrative zone determined by their location. Each zone has a specific timetable. Some of our syllabuses offer candidates different assessment options. An entry option code is used to identify the components the candidate will take relevant to the administrative zone and the available assessment options.

Support for exams officers

We know how important exams officers are to the successful running of exams. We provide them with the support they need to make your entries on time. Your exams officer will find this support, and guidance for all other phases of the Cambridge Exams Cycle, at **www.cambridgeinternational.org/eoguide**

Retakes and carry forward

Candidates can retake Cambridge International AS Level and Cambridge International A Level as many times as they want to. Cambridge International AS & A Levels are linear qualifications so candidates cannot re-sit individual components. Information on retake entries is in the *Cambridge Handbook* at **www.cambridgeinternational.org/examsofficers**

Candidates can carry forward the result of their Cambridge International AS Level assessment from one series to complete the Cambridge International A Level in a following series, subject to the rules and time limits described in the *Cambridge Handbook*.

Language

This syllabus and the related assessment materials are available in English only.

Accessibility and equality

Syllabus and assessment design

Cambridge International works to avoid direct or indirect discrimination in our syllabuses and assessment materials. We aim to maximise inclusivity for candidates of all national, cultural or social backgrounds and with other protected characteristics. In addition, the language and layout used are designed to make our materials as accessible as possible. This gives all learners the opportunity, as fairly as possible, to demonstrate their knowledge, skills and understanding and helps to minimise the requirement to make reasonable adjustments during the assessment process.

Access arrangements

Access arrangements (including modified papers) are the principal way in which Cambridge International complies with our duty, as guided by the UK Equality Act (2010), to make 'reasonable adjustments' for candidates with special educational needs (SEN), disability, illness or injury. Where a candidate would otherwise be at a substantial disadvantage in comparison to a candidate with no SEN, disability, illness or injury, we may be able to agree pre-examination access arrangements. These arrangements help a candidate by minimising accessibility barriers and maximising their opportunity to demonstrate their knowledge, skills and understanding in an assessment.

Important:

- Requested access arrangements should be based on evidence of the candidate's barrier to assessment and should also reflect their normal way of working at school; this is in line with *The Cambridge Handbook* **www.cambridgeinternational.org/eoguide**
- For Cambridge International to approve an access arrangement, we will need to agree that it constitutes a reasonable adjustment, involves reasonable cost and timeframe and does not affect the security and integrity of the assessment.
- Availability of access arrangements should be checked by centres at the start of the course. Details of our standard access arrangements and modified question papers are available in *The Cambridge Handbook* **www.cambridgeinternational.org/eoguide**
- Please contact us at the start of the course to find out if we are able to approve an arrangement that is not included in the list of standard access arrangements.
- Candidates who cannot access parts of the assessment may be able to receive an award based on the parts they have completed.

After the exam

Grading and reporting

Grades A*, A, B, C, D or E indicate the standard a candidate achieved at Cambridge International A Level. A* is the highest and E is the lowest grade.

Grades a, b, c, d or e indicate the standard a candidate achieved at Cambridge International AS Level. 'a' is the highest and 'e' is the lowest grade.

'Ungraded' means that the candidate's performance did not meet the standard required for the lowest grade (E or e). 'Ungraded' is reported on the statement of results but not on the certificate. In specific circumstances your candidates may see one of the following letters on their statement of results:

- Q (PENDING)
- X (NO RESULT).

These letters do not appear on the certificate.

If a candidate takes a Cambridge International A Level and fails to achieve grade E or higher, a Cambridge International AS Level grade will be awarded if both of the following apply:

- the components taken for the Cambridge International A Level by the candidate in that series included all the components making up a Cambridge International AS Level
- the candidate's performance on the AS Level components was sufficient to merit the award of a Cambridge International AS Level grade.

On the statement of results and certificates, Cambridge International AS & A Levels are shown as General Certificates of Education, GCE Advanced Subsidiary Level (GCE AS Level) and GCE Advanced Level (GCE A Level).

School feedback: 'Cambridge International A Levels are the 'gold standard' qualification. They are based on rigorous, academic syllabuses that are accessible to students from a wide range of abilities yet have the capacity to stretch our most able.'

Feedback from: Director of Studies, Auckland Grammar School, New Zealand

How students, teachers and higher education can use the grades

Cambridge International A Level

Assessment at Cambridge International A Level has two purposes:

- to measure learning and achievement
  The assessment:
  - confirms achievement and performance in relation to the knowledge, understanding and skills specified in the syllabus, to the levels described in the grade descriptions.
- to show likely future success
  The outcomes:
  - help predict which students are well prepared for a particular course or career and/or which students are more likely to be successful
  - help students choose the most suitable course or career.

Cambridge International AS Level

Assessment at Cambridge International AS Level has two purposes:

- to measure learning and achievement
  The assessment:
  - confirms achievement and performance in relation to the knowledge, understanding and skills specified in the syllabus.
- to show likely future success
  The outcomes:
  - help predict which students are well prepared for a particular course or career and/or which students are more likely to be successful
  - help students choose the most suitable course or career
  - help decide whether students part way through a Cambridge International A Level course are making enough progress to continue
  - guide teaching and learning in the next stages of the Cambridge International A Level course.

Grade descriptions

Grade descriptions are provided to give an indication of the standards of achievement candidates awarded particular grades are likely to show. Weakness in one aspect of the examination may be balanced by a better performance in some other aspect.

Grade descriptions for Cambridge International A Level English Language will be published after the first assessment of the A Level in 2021. Find more information at **www.cambridgeinternational.org/alevel**

Changes to this syllabus for 2024, 2025 and 2026

The syllabus has been updated. This syllabus is version 2, published October 2021.

You are strongly advised to read the whole syllabus before planning your teaching programme.

Changes to version 2, published October 2021

Changes to syllabus	• Amendments have been made to the underlining in certain examples given in the Reference table of International Phonemic Alphabet (IPA) phonemic symbols (Received Pronunciation) on page 21 of the syllabus document.

Any textbooks endorsed to support the syllabus for examination from 2021 are still suitable for use with this syllabus.

School feedback: ‘While studying Cambridge IGCSE and Cambridge International A Levels, students broaden their horizons through a global perspective and develop a lasting passion for learning.’

Feedback from: Zhai Xiaoning, Deputy Principal, The High School Affiliated to Renmin University of China

We are committed to making our documents accessible in accordance with the WCAG 2.1 Standard. We’re always looking to improve the accessibility of our documents. If you find any problems or you think we’re not meeting accessibility requirements, contact us at **info@cambridgeinternational.org** with the subject heading: Digital accessibility. If you need this document in a different format, contact us and supply your name, email address and requirements and we will respond within 15 working days.

Section 1: About this guide	4
Section 2: Syllabus content - what you need to know	5
Section 3: How you will be assessed	9
Section 4: What skills will be assessed?	10
Section 5: Example candidate response	11
Section 6: Revision	19
Section 7: Useful websites	30

Section 1: About this guide

This guide explains what you need to know about your Cambridge International AS & A Level **English Language** course and examinations.

It will help you to:

- understand what skills you should develop by taking this Cambridge International AS & A Level course
- understand how you will be assessed
- understand what we are looking for in the answers you write
- plan your revision programme
- revise, by providing revision tips and an interactive revision checklist (Section 7).

Following a Cambridge International AS & A level programme will help you to develop abilities that universities value highly, including a deep understanding of your subject; higher order thinking skills (analysis, critical thinking, problem solving); presenting ordered and coherent arguments; and independent learning and research.

Studying Cambridge International AS & A Level **English Language** will help you to develop a set of transferable skills, including the ability to work with linguistic information; think logically and independently; consider accuracy; understand situations from a linguistic point of view; analyse language and reflect on findings.

Section 2: Syllabus content - what you need to know

This section gives you an outline of the syllabus content for this course. There are four components, which can be combined in specific ways (see Section 3). Talk to your teacher to make sure you know which components you will be taking.

Content section	Assessment	Topics included
Reading	Paper 1 AS and A Level	You will develop your knowledge and understanding of a wide range of written texts such as: • advertisements • brochures • leaflets • editorials • news stories • articles • reviews • blogs • investigative journalism • letters • podcasts • (auto)biographies • travel writing • diaries • essays • scripted speech • narrative writing • descriptive writing.
Writing	Paper 1 AS and A Level	The knowledge and understanding that you will need to show in Paper 2 is the same as is covered in Paper 1 but you will apply your skills and techniques in a number of ways, including: • writing for a specific audience and purpose. • structuring your writing • using a range of appropriate linguistic and literary features • expressing ideas accurately and clearly • reflecting upon and evaluating the qualities of your own writing, including aspects relating to its purpose, form and audience

Content section	Assessment	Topics included
Language Analysis Section A: Language change Section B: Child language acquisition	Paper 3 A Level only	When studying **Language change** you will explore: • how English has developed from Early Modern to Contemporary English • graphology, spelling, phonology, morphology, syntax, lexis, grammar and the ways meaning might change when language in use • n-gram graphs, concordance and word tables You will develop your use of terminology related to language change, and explore relevant theories and theorists. When studying Child language acquisition you will explore: • the stages of early development of language in children aged 0-8 years. • the various features and functions of children's spoken language • relevant theories and theorists of child language. • how children's language develops • how to interpret and analyse spoken language transcriptions • how to analyse conversation involving children • how to plot your findings alongside relevant theories
Language Topics Section A: English in the world Section B: Language and the self	Paper 4 A Level only	When studying **English in the world** you will explore: • the history of English as a 'global' language • the development of standard and nonstandard forms of English i • ethical considerations related to the continuing expansion of English usage around the world. • colonialism, cultural influence and effects • multilingualism • the future of English • varieties of English • standard and nonstandard 'Englishes' • official and unofficial attitudes and policies • relevant ethical considerations • language shift and death • cultural imperialism, equality of opportunity, and global cooperation You will develop skills and techniques in reading and demonstrating critical understanding of unseen texts. When studying **Language and the self** you will explore: • how we use language to communicate our sense of self to others • how language might be innate, learned, or both • the ways in which language and thought are both connected and separate from each other • how we use language, both consciously and unconsciously, to construct and maintain our identity. • behaviourism, innatism, nativism and empiricism • linguistic relativity and determinism, universalism, language of thought hypothesis • the relationship between language and social identity • speech communities and prestige • idiolect, dialect, sociolect, genderlect

Content section	Assessment	Topics included
		• standard and nonstandard features • inclusion and exclusion • speech sounds and accents You will develop skills and techniques in reading and demonstrating critical understanding of unseen texts relating to 'Language and the self', selecting and analysing pertinent ideas and examples from the texts and relating these ideas and examples to theories, theorists and studies from your wider study of the topic.

Make sure you always check the latest syllabus, which is available from our public website. This will also explain the different combinations of components you can take.

Prior knowledge

We recommend that you have completed either the Cambridge IGCSE™ First Language English or Cambridge O Level English Language.

Key concepts

Key concepts are essential ideas that help you to develop a deep understanding of your subject and make links between different aspects of the course.

The key concepts for Cambridge International AS & A Level English Language are:

- Text and context

It is important to understand that 'a text' can range from a short conversation, to a book published across several volumes. Furthermore, all texts have a context, which can refer to the time period or situation where something happens, was written or spoken. This can help to explain it and may help your understanding of the language. As an English language learner you should always consider the meaning of a text due to the circumstances of where and when it was produced, how it's communicated and how it's received.

- Meaning and style

As an English language learner, you should consider how form, structure and language help to create a distinctive writing style. While studying your A Level in English Language you will develop a range of skills and techniques to identify and analyse how linguistic features in your own and other's writing and spoken language create different effects and meanings.

- Audience

As an English language learner, you will need to identify and analyse the ways that writers and speakers use and adapt language to communicate with their intended audience(s). Likewise, you must be able to predict, recognise and analyse the different responses the audience(s) may give depending on context, gender, age, race, class etc.

- Creativity

Throughout your English language learning you will need to think creatively and show your creativity in a range of forms and contexts such as writing for a specific purpose and audience or analysing a challenging text.

- Diversity

You will learn that language is constantly subject to a range of influences – whether personal, social, geographical or otherwise – and that the English language exists in a range of forms at any given moment. Understanding how diverse language can be will offer you many opportunities for analysis, comparison and exploration.

- Change

As a learner of English language you will learn how the sounds, shapes, meaning and style of letters, words and syntax can change over time. You will learn how to analyse these changes and explore the reasons why these changes may have taken place.

Section 3: How you will be assessed

Cambridge International AS Level English Language makes up the first half of the Cambridge International A Level course in English Language and provides a foundation for the study of English Language at Cambridge International A Level.

About the examinations

For AS Level you will take Paper 1 and Paper 2 only

For the full A Level you will take Paper 1, Paper 2, Paper 3 and Paper 4

These are summarised in the table below. Find out from your teacher which papers you will be taking.

About the papers

The table gives you further information about the examination papers:

Component	Time and marks	Questions	Percentage of qualification
Paper 1: **Reading**	2 hours 15 minutes 50 marks	You will need to answer two compulsory questions: • Question 1 in Section A • Question 2 in Section B.	50% of the AS Level 25% of the A Level
Paper 2: **Writing**	2 hours 50 marks	You will need to answer two questions: • Question 1 in Section A is compulsory • One question from a choice of three in Section B.	50% of the AS Level 25% of the A Level
Paper 3: **Language Analysis**	2 hours 15 minutes 50 marks	You will need to answer two compulsory questions: • Question 1 in Section A • Question 2 in Section B.	25% of the A Level
Paper 4: **Language Topics**	2 hours 15 minutes 50 marks	You will need to answer two compulsory questions: • Question 1 in Section A • Question 2 in Section B.	25% of the A Level

Section 4: What skills will be assessed?

The areas of knowledge, understanding and skills that you will be assessed on are called **assessment objectives** (AOs).

Assessment objectives (AO)	What does the AO mean?
AO1: Read and demonstrate understanding of a wide variety of texts.	You will need to show the examiner that you have developed your reading skills and techniques using the texts provided in the exam paper. The examiner will be looking at your knowledge and understanding of linguistic and literary features, as well as your ideas about the ways audience, purpose, style and context influence the meaning of texts.
AO2: Write effectively, creatively, accurately and appropriately, for a range of audiences and purposes.	For AO2, the examiner will be looking at your skills and techniques in writing, including how your writing is appropriate for the audience, purpose and form specified in the question on the exam paper. You will need to write in a structured way, expressing your ideas accurately and clearly, using linguistic and literary features, such as imagery, rhetorical devices or evaluative terms.
AO3: Analyse the ways in which writers' and speakers' choices of form, structure and language produce meaning and style.	Here, you need to be able to analyse and compare the texts presented in the exam paper. The examiner will be looking at how you choose features from the text to use as evidence for your ideas on form, structure and language, comparisons you may make, and the way in which you bring your ideas together.
AO4: Demonstrate understanding of linguistic issues, concepts, methods and approaches.	For AO4, you will need to apply theories to support your ideas about language, using the knowledge and understanding from the Syllabus and from your wider study. The examiner will be looking at how you refer to theories and theorists to support your ideas and how you show the depth of your knowledge and understanding.
AO5: Analyse and synthesise language data from a variety of sources.	You will need to show that you have developed techniques in understanding of texts, graphs and tables which offer information on language. The examiner will be looking at how you use the data presented in the question as evidence for your ideas and how you bring your ideas together to form effective analysis.

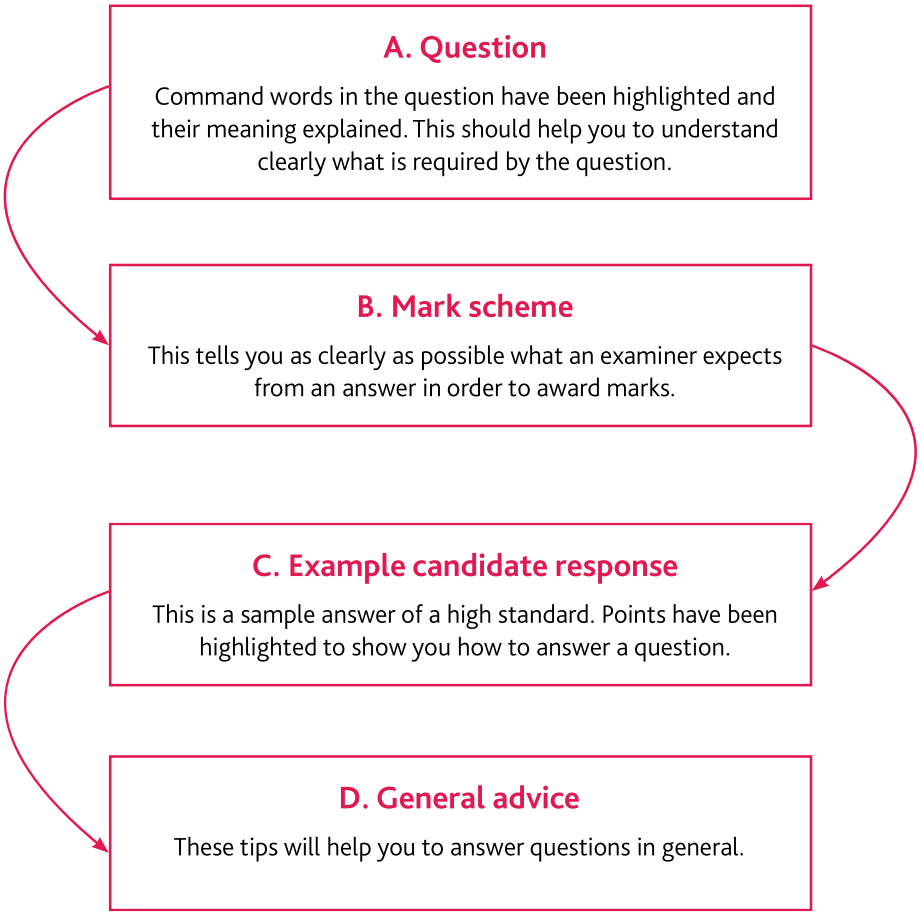
It is important that you know the different weightings (%) of the assessment objectives, as this affects how the examiner will assess your work.

The approximate weightings given to each of the assessment objectives (AOs) are given below:

Assessment objectives as a percentage of each qualification

Assessment objective	Weighting at AS Level %	Weighting at A Level %
AO1	15	20
AO2	45	30
AO3	40	20
AO4	–	20
AO5	–	10
Total	100	100

Assessment objectives as a perventage of each component



Assessment objective	Weighting in components %			
	Paper 1	Paper 2	Paper 3	Paper 4
AO1	30	–	10	40
AO2	10	80	10	20
AO3	60	20	–	–
AO4	–	–	40	40
AO5	–	–	40	–
Total	100	100	100	100

Section 5: Example candidate response

This section takes you through an example question and candidate response. It will help you to see how to identify the command words within questions and to understand what is required in your response. Understanding the questions will help you to know what you need to do with your knowledge. For example, you might need to read something, write something, analyse something, compare something or discuss something.

All information and advice in this section is specific to the example question and response being demonstrated. It should give you an idea of how your responses might be viewed by an examiner but it is not a list of what to do in all questions. In your own examination, you will need to pay careful attention to what each question is asking you to do.

This section is separated as follows:

A. Question

Command words

Question 1 is set into two parts; you'll need to be able to write in a very different way for each of these two separate tasks.

The command words in Question 1(a) are 'Write the text for the leaflet'.

In Question 1(a) you are given the expected word count – no more than 400 words – so the examiner will expect your response to be approximately that length, and you should divide your exam time accordingly.

Question 1

Your headteacher has asked you to produce a leaflet called *Leaving Home*. The leaflet will be aimed at older teenagers who are going to live in another town or city to go to university.

(a) Write the text for the leaflet, using no more than 400 words. In your writing, give advice and guidance on how to manage living away from your family for the first time. [15]

In this part of the question, you are only asked to write the text – you don't need to add drawings, or spaces which would be filled with images, even though such items might appear in a printed leaflet. The examiner will only look at your writing, and how you've crafted it to fit the task.

It would be very useful, however, to think about the overall layout of your text. For example, you should consider how the use of headings, subheadings and paragraphing would improve the form of the leaflet. Bear in mind that these features may also streamline your focus when writing.

The command words in Question 1(b) are also in two parts: firstly:

The command words in Question 1(b) are also in two parts: firstly: 'Write a reflective commentary on your text'

and then 'explaining how your linguistic choices contribute to fulfilling the task'.

(b) Write a reflective commentary on your text, explaining how your linguistic choices contribute to fulfilling the task set by your headteacher. [10]

Let's look at what the examiner will expect from your reflective commentary. This can be written using the first person: after all, it is your writing you are reflecting on. Your commentary should contain a logical sequence of ideas and you should use a good standard of written English.

Firstly, you should decide which features of your writing you are going to reflect on, for example: style, lexis, grammar, register, semantics or pragmatics. You then need to explain why you made these writing choices and how you feel they are appropriate to what you've been asked to do in the question. You do not need to mention all of the linguistic frameworks listed in the example above, instead it is better to select the features or frameworks carefully and be prepared to write fully on just a few of them.

The reflective commentary is an opportunity for you to evaluate your choices: think about how well you have achieved the focus of the question in the language features you have used.

B. Mark scheme

Assessment objectives and mark scheme criteria	Explanation
AO2: Write effectively, creatively, accurately and appropriately for a range of audiences and purposes	Your writing in Question 1(a) will be marked using AO2. You need to be able to: • write creatively in the form, and for the purpose, specified in the question. • engage your audience with the language choices you make. • structure and develop your ideas logically • maintain your engagement with your audience, making sure all of your answer is relevant to the task. • write accurately using a wide range of language features.
AO3: Analyse the ways in which writers' and speakers' choices of form, structure and language produce meaning and style	Your writing in Question 1(b) will be marked using AO3. You need to be able to: • explain and evaluate your writing, commenting on the form, structure, language you have used and how these give meaning to your writing. • explain and evaluate your style, commenting on the ways you have related to your audience.

C. Example candidate response

Question 1(a)

(1) So, congrats! You've aced your A levels, and now it's the time you've been waiting for. Time to wave bye bye to your bro, sis, Ma, Pa and pet goldfish and head off for Universityville, Freedom County, zip code IND3P3ND3NC3. Yay! But before you pack your lifetime collection of odd socks and a year's supply of chocolate, hang on a minute and have a look at some valuable advice from me, your friendly expert Uni Preparation Guide.

(2) **Tempted to squander? Try not to blunder!**

Too posh to look after your dosh? Or in too much of a daze to save? At Uni, you'll be in charge of your own money for the first time in your life. It may feel pretty amazing to have all that filthy lucre to manage. Keep a track of everything you spend so you don't run out of cash when you're going to need it most. Always make sure you've allowed enough for rent, food, books and travel before you're even tempted to treat yourself to that extra-special customised Porsche.

JK! For that you'll have to wait until you've graduated...

(3) **Eating like Einstein**

We all know that students need brainpower, brains need food and food equals fuel, but what kind of fuel are you going to feed that thinking machine inside your head? Burgers? Fries? Ice cream? Cake? Uh-oh! Take-aways are super-high in empty calories and astronomical in cost. Instead, take time to select fresh fruit and veg to cook yourself; choose pasta for slow-release carbs. Eating healthily, you'll feel good, learn more efficiently and you won't be allowing unhealthy choices to chow down on your budget!

(1) Right from the start, the candidate addresses the audience directly in a very informal style which is appropriate to the task. This is very engaging and uses lots of language devices such as abbreviation, neologisms (new made up words), Americanisation and text language. There is excitement implied by the exclamation mark and capitals, giving a lively feel to the writing.

(2) The writing carries on in its journalistic style, using internal rhyme, with direct questions to the audience. Notice the use of 'filthy lucre' though – the candidate is careful to use some low frequency lexis to maintain the idea of speaking to potential university students.

There is something else important to note in this paragraph: although the level of formality is low (using the popular abbreviation 'JK' for example), the candidate is aware that the task of 'advice' was originally given by the headteacher and shows awareness of this aspect of the question.

(3) Look at the different ways the response uses sentence structures. There is a wide variety of sentence types here. Note how the longer and more complex sentences contain the serious messages and how the short, or incomplete sentences are used to maintain the humorous aspect of the writing.

(4) Tickety tock

No doubt having made all those new friends, you'll be desperate to become the life and soul of the party, but late nights and disco fever can take their toll. Sure, use your planner to detail which nights you're meeting your mates, league match fixtures and hot dates with the girl who sits on the front bench of the lecture theatre, but plot in your lecture timetable, seminar dates and assignment deadlines first. If you manage your time carefully, you won't need to give your fave band's next gig a miss because you've an essay to hand in the next day – you'll have that essay proof-read and printed, smug as you like.

Good luck, peeps! And enjoy! (5)

Specimen answer 1(b): Reflective commentary

(1) *I decided to write the text for my leaflet in the same chatty style as that used in popular magazines which are aimed at teenagers, giving a light-hearted and humorous feel to the text whilst offering serious messages. My reason for the humour was to attract and maintain the attention of the target audience of older teenagers; on the other hand I felt that the information and advice the leaflet was offering needed to be sensible and worthwhile, as the original instructions had come from the headteacher – therefore he also needed to approve of what I wrote.*

(2) *The structure of the leaflet is set into separate paragraphs, to make the overall graphology of the leaflet clear and easy to read. I used subheadings which have catchy titles including ellipsis and rhetorical question ('Tempted to squander?') coupled with a rhyming imperative ('Try not to squander!) and alliteration ('Eating like Einstein' and 'Tickety tock . . .' as I felt they needed to match the overall style of writing, rather than just state 'Healthy Eating', for example, at the top of the third paragraph which would seem too formal for the writing style I chose.*

(4) You will see how effective the overall organisation of the writing has been made with the use of headings and clear paragraphing. The candidate has checked spellings and there is a logical flow of ideas which bring the writing to the required word count.

(5) The candidate selected three topics for advice: finance, healthy eating and time-keeping. All of these are relevant and the response is crafted very well – make sure you look at all of the question though. Here, the response does not tackle the idea of moving to 'a new town or city'.

The response was awarded 14 out of 15 marks.

(1) The first paragraph comments on the overall style of the writing, using the first person to explain the ways in which the candidate has made choices to engage the audience but has also included advice which the headteacher would feel was valuable.

(2) Next, the candidate explains the reasons for the layout and the linguistic features of the headings used. You will see that a range of technical terminology is used accurately and fluently. There's an effective explanation here of how and why the level of formality was kept low on purpose.

(3) I used second person address throughout to create an intimate relationship between writer and audience. I wanted to enhance this by creating a very informal register, with flattery ('congrats') and colloquial terms such as 'JK', 'Yay!' and 'peeps' which were used to position the reader as an equal. The inclusion of 'zip code IND3P3ND3NC3' is set out to resemble text-speak, which also lowers the level of formality and is in capitals to imply shouting and excitement.

(3) The way this section is written is very confident in the explanation of how and why the relationship between reader and writer is created.

(4) My sentence structures include snappy fragments, 'So, congrats!' with the low register discourse marker opening the leaflet but more complex sentences containing the more serious messages, such as 'Keep a track of everything . . .' (paragraph 2) are positioned inside each paragraph. Hopefully this juxtaposition of structures acknowledges the fact that the leaflet is meant to appeal by being humorous whilst containing meaningful information.

(4) Here, the response loses some of its tone and is in danger of repeating itself. It's true that the original response was very rich in literary and linguistic features but it's better to select what you feel are the most successful than have a list of them running through the commentary. It's in this paragraph that the commentary starts to be rather 'chatty' – make sure you maintain your register and tone throughout your commentary.

Some of the features I used were intended to enhance the feeling of excitement about going to university. Therefore 'Too posh to look after your dosh? or in too much of a daze to save?' include rhyme on 'posh' and 'dosh' and assonance in 'daze' and 'save' inside rhetorical questions with ellipsis, to create an interesting rhythm. However, I also used hyperbole in 'super-high' and 'astronomical' to reinforce my warning about eating fast food in paragraph 3. By combining these features, I wanted to give an overall impression of everything that going to university might mean, which should be an exciting but maybe also a tricky time for young people leaving home for the first time.

(5) On reflection, I feel that I have achieved my aims in my writing. I wondered at first whether I had chosen too many colloquial features and not enough low frequency lexis or formal grammatical structures although when I considered that my main purpose was to get teenagers to read my leaflet, when I read through my writing I felt that I had a good balance of informality of style and formality of sensible advice.

(5) The reflection and evaluation are balanced; look how the candidate refers to what was 'considered' which implies that time was spent before the writing began, making sure that the response fitted the task properly.

Although the reflection and evaluation are balanced, these are used as a conclusion to the commentary. It would have been more effective to reflect within each paragraph of the commentary to make sure the writing flows and makes a cohesive whole.

The response for Question 1(b) was awarded 9 out of 10 marks.

This means that overall for Question 1, 23 out of 25 marks were awarded.

D. How the answer could have been improved

Both parts of the specimen answer are high-grade responses although there are ways in which improvements could have been made.

Although in part (a), the candidate has written the text in a very engaging manner, and has addressed most of the question content, there is no advice to the target audience of living in another town or city, nor does it directly address the age of the target audience, in this case older teenagers. If the candidate had used these two ideas alongside the ideas already incorporated in the response, the examiner would know that a complete exploration of all aspects of the question had been made.

The part (b) specimen response shows balanced explanations which address the question. This means that the candidate has made a careful selection from the writing in part (a) in order to explain why the linguistic choices were made and how they fulfil the task. Even so, the candidate's register could be a little more formal and less chatty. Although you will be describing your own writing and possibly using the first person to do so, the examiner will look for a good standard of written English which incorporates a wide range of technical terminology being used to describe language.

E. Common mistakes and misconceptions

Look carefully at the weighting of marks for each part of the question: fifteen marks are available for Question 1(a) and ten marks are available for Question 1(b). This doesn't mean that you should cut your commentary short, which is a mistake which is often made. You'll need to plan your exam time carefully though – often candidates will put all their writing energy into Question 1(a) and run out of steam for the second part of the question. It's a common misconception that your commentary is a supplementary or add-on item to the question – in fact it an important part of the overall requirement of the exam. You will be proving to the examiner that you can write in two distinct ways and for 25 marks overall.

Before you start your writing in the exam, you will probably want to make a plan which will help you focus. It's a common mistake to put so much time and detail into the plan that there's not enough exam time left to complete the writing task set. Look upon the plan as a tool to help you, rather than something elaborate for your finished writing to duplicate.

It's a common mistake to forget about paragraphing when ideas are in full creative flow! Make sure your writing is clearly set out, with well-defined paragraphs separating your ideas. This will give the logical organisation to your writing that the examiner is looking for and will help maintain your own focus.

Depending on the form of text asked for Question 1(a), candidates are often tempted to enhance the look of the specified form by putting in illustrations. It's a common misconception that these are useful: instead, concentrate on using a wide variety of linguistic choices relating to audience and meaning, improving your style and giving yourself a range of features you can reflect upon in your commentary.

When you're writing your commentary, be careful when you quote from your own writing. It's a common mistake to quote whole sentences (or even paragraphs!) to support ideas but it's better to use just one or two brief examples to justify your point.

Where it's appropriate to the form required in Question 1(a) you might write in an informal style and register. It would be a mistake, though, to continue like that in your reflective commentary. There you should use a wide range of technical terminology to describe and explain your choices.

It's a common misconception that a response to Question 1(b) should be merely a brief description of your writing in Question 1(b). Make sure you give reasons for your language choices and that you reflect on whether you have achieved your aims. If you think you could have improved your writing in some way, then explain how – and if you think you have been successful then say how and why!

General advice

Read all parts of the question very carefully before deciding on your approach. For Question 1(a) you could consider the following points to get you started:

- Who is your target audience?
- How are you going to impart meaning to your audience?
- What style of writing will you adopt?
- What register will you use?
- Will you use rhetorical devices?
- What about the overall layout (graphology) of your finished text?

For Question 1(b) you might think about:

- Do I need to change the register and style of my writing to achieve my reflective commentary?
- Which features of my writing do **I** feel are the most important ones to reflect upon?
- What should I select from my writing to support the points I intend to make?
- Which features of my writing have achieved my writing aims?
- Which features of my writing could be improved upon?

So you will know for the exam how long your writing will need to be to achieve the word count in Question 1(a), practise writing 400 words of your creative choice lots of times. By doing this you will be able to see the amount of text you will be expected to create.

Each time you perform this task, keep an eye on the time and try to think how you would alter your writing times to fit in with the exam timing.

Where you've created writing in class or for homework, write a reflective commentary each time. Ask yourself what linguistic choices you have made, give yourself a heading for each one and then write a paragraph on each. Headings are not required in the exam but for your practice, they will help you to focus clearly. In the exam you could use headings as a brief plan for your commentary.

Whenever you write, whether it is in class, for homework, or in the exam – read through your finished piece and check your spelling, punctuation and grammar. Of course, in class or at home you will be able to use a dictionary – make sure you learn those tricky spellings before the exam!

Make sure you can use a wide range of technical terminology fluently and accurately: get used to incorporating this in class and in your homework and use a glossary of terms in your revision.

Section 6: Revision

This advice will help you revise and prepare for the examinations. It is divided into general advice and specific advice for each of the papers.

Use the tick boxes ☐ to keep a record of what you have done, what you plan to do or what you understand.

General advice

Before the examination

- ☐ Find out when the examinations are and plan your revision so you have enough time for each topic. A revision timetable will help you.
- ☐ Find out how long each Paper is and how many questions you have to answer.
- ☐ Know the meaning of the command words used in questions and how to apply them to the information given. Highlight the command words in past papers and check what they mean. There is a list on p11 of this guide.
- ☐ Make revision notes; try different styles of notes.

- ☐ Work for short periods then have a break. Revise small sections of the syllabus at a time.
- ☐ Build your confidence by practising questions on each of the topics.
- ☐ Make sure you practise lots of past examination questions so that you are familiar with the format of the examination papers. You could time yourself when doing a paper so that you know how quickly you need to work in the real examination.
- ☐ Look at mark schemes to help you to understand how the marks are awarded for each question.
- ☐ Make sure you are familiar with the technical terminology that you need for this syllabus. Your teacher will be able to advise you on what is expected.
- ☐ Check which theories and theorists are appropriate for the relevant topic you are revising, and which ones you need to learn.

During the examination

- ☐ Read the instructions carefully and answer **all** the questions. In Paper 2, don't forget that in Section B, you will have a choice of three questions. Don't be tempted to answer all of these!
- ☐ Check the number of marks for each question or part question. This helps you to judge how long you should be spending on the response. You don't want to spend too long on some parts of the questions and then run out of time at the end.
- ☐ Do not leave out questions or parts of questions. Remember, no answer means no marks.
- ☐ You do not have to answer the questions in the order they are printed in the answer booklet. You may be able to do a later question more easily then come back to an earlier one for another try.
- ☐ Read each question very carefully. Misreading a question can cost you marks: Identify any command words – you could underline or highlight them. Identify the other key words and perhaps underline them too.
- ☐ Read all parts of a question before starting your answer. Think carefully about what is needed for each part. You will not need to repeat material.
- ☐ For n-gram graphs, look very carefully at the information you are given, read the title, key, axes, etc. to find out exactly what they show. For word tables, look at any headings for clues as to what the question is about.
- ☐ **Answer the question.** Use your skills and techniques to show your knowledge and understanding. Don't just try to write about everything you know. Only use the knowledge, understanding, skills and techniques you need to answer the question.

- ☐ Make sure that you have answered everything that a question asks. Sometimes one sentence asks two things, e.g. 'Write … and explain …'. It is easy to concentrate on the first request and forget about the second one.
- ☐ Always check your spelling. The examiner is looking for a good standard of accurately written English.
- ☐ Use the correct linguistic terminology in your answers when possible.
- ☐ Make sure all your writing is clear, and that your paragraphs form a logical sequence.
- ☐ If you need to change a word, it is better to cross out your work and rewrite it. Don't try to write over the top of your previous work as it will be difficult to read.
- ☐ Don't write your answers in columns, or add diagrams. The examiner is looking for your English language skills, not your artwork!

Advice for all Papers

- ☐ Don't write in note form – the examiner is looking for fluent, logically structured prose responses.
- ☐ Read through your responses before the exam is finished: have you checked your spellings? Do your paragraphs flow in an organised manner?
- ☐ Make sure your knowledge and understanding of technical terminology is tip-top, and that you can use it fluently and accurately.
- ☐ Read as much as you can, to absorb form, style, meaning, purpose and structure.
- ☐ Write as much as you can, to ensure that when the exam approaches you don't feel as though you don't know where to start.
- ☐ Get used to analysing everything you read, whether it is a 500-page novel or the back of a cereal packet!
- ☐ Get used to analysing everything you write – be honest with yourself but don't feel you should be harsh on yourself all the time, you should take confidence in your own ability to create good quality writing!
- ☐ Share your writing with your friends and family – tell them what your writing aims have been, and ask for their constructive criticism.

Advice for Paper 1

- ☐ Make sure you know the difference in the forms and styles of writing which may appear in advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.
- ☐ Make sure you understand exactly what is required by the directed writing task in response to a text (10 marks).
- ☐ Make sure you can use language to compare the form, structure and language of your own response in part (a) with that of the original text (15 marks).
- ☐ Make sure you know how much of your own handwriting corresponds to the word count Question 1(a), which is 150-200 words. This is only a small word count, so don't waste valuable words, and don't make your response too brief!
- ☐ Practise writing whenever you can – look at lots of varieties of texts, then choose your vocabulary, style and structure to match or contrast with the form, purpose and audience of the text you are reading.

Advice for Paper 2

- ☐ Make sure you feel confident to create writing in the form and style of writing which may be required in advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto) biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.
- ☐ Make sure you know how much of your own handwriting corresponds to the word count Question 1(a), which is approximately 400 words. This is only a short word count, so don't waste valuable words – on the other hand, don't make your response too brief! You need to be able to use your own writing to be able create an effective reflective commentary.
- ☐ Keep practising writing reflective commentaries on all of your classwork and homework. Make sure you use evaluative language, questioning yourself whether you have achieved your writing goals.

- [ ] Don't forget, in Question 1(b) the examiner will be looking at your focus on your choices of form, structure and language, and your analysis of how these stylistic choices relate to audience and shape meaning. Use the first person in your explanation and evaluation if you wish, but make sure you use technical terminology to describe your linguistic choices.
- [ ] Don't answer all of the questions in Section B – you need to make a choice of one out of three questions. Play to your strengths: if you are more confident in creating narrative writing, answer that question; if you prefer to write argumentatively, answer that question, and so on.

Advice for Paper 3

- [ ] For Section A, before the exam, look for and read closely as much historical prose that you can find, to make sure you are as familiar as possible with examples of English from the Early Modern period to Contemporary English.
- [ ] Make sure you know all the terminology you will need to describe, explain and evaluate the language presented by the changes in the English language.
- [ ] Look for n-gram graphs representing changes in language use over time – you can use the Google n-gram site and insert words of your choice, or words that interest you from something you are reading – that way you are creating your own n-grams! Read the n-grams very carefully so you can see what language changes the data is showing.
- [ ] Use the internet to find word tables from corpus data, looking for collocate lists and synonym lists. Think carefully: what are these data telling you? How do they compare with data you have found on any n-grams?
- [ ] For Section B, make sure you are confident in reading and interpreting transcriptions of spoken language. There are strict conventions in conversation transcriptions and they look very different from a script from a play, for example. By the time the exam approaches, you shouldn't need to refer to the transcription key; you should be an expert!
- [ ] Make sure you know which theories and theories are appropriate to child language acquisition: it would be unlikely, for example, that a gender theorist would be an appropriate reference to six year old children's spoken language.

Advice for Paper 4

- [ ] Paper 4 requires a different style of writing from that of Paper 3: you're now being asked to discuss two given topics which in turn are quite different from each other. Make sure you can adopt this 'discursive' style of writing by practising setting up arguments and counter-arguments around the two topics. You can do this in class or at home whenever the opportunity arises.
- [ ] For Section A, make sure you know about some of the varieties of English spoken around the world. These might be Hinglish, Singlish, Spanglish, one that you know from your own country, or many more that have arisen in the relatively recent past. They are also known as 'hybrids'.
- [ ] So that you are fully confident about the ethical considerations of English in the world, find articles from the Internet and newspapers which give reports on the topic. Such reports may contain information about cultural imperialism, equality of opportunity or global cooperation, for example. Some reports may contain bias: to practise your discursive style, set up your own arguments surrounding this bias.
- [ ] Make sure you have knowledge and understanding of the ways that English in the world has developed due, for example, to colonialism or technological developments over time.
- [ ] Be clear about which theories and theorists are relevant to the topic, making sure you can spell all names accurately. It's not enough just to mention names; the examiner will be looking for short explanations which support the points you are making – that way you will show that you are applying theories confidently.
- [ ] Make sure you have in-depth knowledge about language and social identity so that you can write fluently in Section B about speech communities, prestige, idiolect, dialect, sociolect, genderlect, variation, standard and nonstandard features, inclusion and exclusion, speech sounds and accents – these are the features of our speech that make up our identity. Some of these we use on purpose (because we have learnt to do so), some of them come naturally to us (innately). Try to identify these features in yourself and others around you.

Revision checklists

The tables below can be used as a revision checklist: **It doesn't contain all the detailed knowledge you need to know, just an overview.** For more detail see the syllabus and talk to your teacher.

The table headings are explained below:

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
Here is a list of the skills you need to cover and work on.	Here are some suggestions of how to practise your skills.	You can use the tick boxes to show when you have revised an item and how confident you feel about it. R = RED means you are really unsure and lack confidence; you might want to focus your revision here and possibly talk to your teacher for help A = AMBER means you are reasonably confident but need some extra practice G = GREEN means you are very confident. As your revision progresses, you can concentrate on the RED and AMBER items in order to turn them into GREEN items. You might find it helpful to highlight each topic in red, orange or green to help you prioritise.			You can use the Comments column to: • add more information about the details for each point • include a reference to a useful resource • add learning aids such as stories, articles or word play • highlight areas of difficulty or things that you need to talk to your teacher about.

Paper 1: Reading

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
Reading Forms and styles	Read and understand the difference in forms and styles of writing which may appear in advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.	☐	☐	☐	
Reading Linguistic elements and literary features	Identify and use the linguistic elements and literary features of texts including parts of speech/word classes, vocabulary, figurative language, phonology, morphology, rhetorical devices, voice, aspect, tense, modality, narrative perspective, word ordering and sentence structure, paragraph- and text-level structure, formality/informality of tone and pragmatics.	☐	☐	☐	
Reading Audience	Identify and demonstrate knowledge and understanding of the significance of audience in both the design and reception of texts.	☐	☐	☐	
Reading Genre, purpose and context	Identify and demonstrate knowledge and understanding of the ways in which genre, purpose and context contribute to the meaning of texts.	☐	☐	☐	
Reading Meaning	Analyse the ways in which linguistic elements come together in a text to create meaning.	☐	☐	☐	
Writing Analysis	Write analytically about the effects produced by a range of linguistic elements and literary features.	☐	☐	☐	
Reading	Selecting and interpret words and phrases from a text with care and precision.	☐	☐	☐	
Writing	Integrate individual analytical points into a fluent, logically sequenced essay.	☐	☐	☐	
Reading Writing	Recognise and comment on the overall style of a text, and give examples of this through specific instances from the text.	☐	☐	☐	
Writing	Use quotations, evidence and evaluation, to produce precise, meaningful commentaries.	☐	☐	☐	
Writing	Use appropriate language to link quotations and evidence with explanatory comments.	☐	☐	☐	

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
Writing	Integrate quotations and evidence into a cohesive argument.	☐	☐	☐	
Reading Writing	Write short, directed pieces in response to a text.	☐	☐	☐	
Reading Writing Style	Write in the same style as another text.	☐	☐	☐	
Reading Writing Style	Write in a different style from a text at the same time as re-using the content/ material.	☐	☐	☐	
Reading Writing	Compare the style and linguistic elements of your own writing with those of a given text.	☐	☐	☐	

Paper 2: Writing

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
Writing Forms and styles	Write confidently in the following forms and styles: advertisements, brochures, leaflets, editorials, news stories, articles, reviews, blogs, investigative journalism, letters, podcasts, (auto)biographies, travel writing, diaries, essays, scripted speech, narrative writing, and descriptive writing.	☐	☐	☐	
Reading Writing Linguistic elements and literary features	Identify and use linguistic elements and literary features including parts of speech/word classes, vocabulary, figurative language, phonology, morphology, rhetorical devices, voice, aspect, tense, modality, narrative perspective, word ordering and sentence structure, paragraph- and text-level structure, formality/ informality of tone and pragmatics.	☐	☐	☐	
Reading Writing Audience	Show knowledge and understanding of the significance of audience in both the design and reception of texts.	☐	☐	☐	
Writing Genre, purpose and context	Show knowledge and understanding of the ways in which genre, purpose and context contribute to the meaning of texts.	☐	☐	☐	

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
Writing Audience and purpose	Write for a specified audience and purpose, to fulfil the brief provided.	☐	☐	☐	
Writing Structure	Produce an appropriate structure for longer pieces of writing.	☐	☐	☐	
Writing Structure	Use a structure such as Freytag's Pyramid in imaginative writing.	☐	☐	☐	
Writing Discursive	Set up argument and counter-argument to structure discursive writing.	☐	☐	☐	
Writing Review	Use introductory, summary and evaluative sections in review writing.	☐	☐	☐	
Writing Literary purpose	Organising writing to achieve specific effects, such as withholding key information in imaginative writing to achieve tension and climax/anti-climax.	☐	☐	☐	
Writing Criticism	Use evidentiary logic in critical writing Use evaluative lexis in critical writing.	☐	☐	☐	
Writing Essay	Structure paragraphs, using topic sentences, connectives, internal coherence, discourse markers to form a fluent overall response.	☐	☐	☐	
Writing Descriptive	Use imagery in descriptive writing.	☐	☐	☐	
Writing Rhetoric	Use rhetorical devices in argumentative writing.	☐	☐	☐	
Writing Expression	Express ideas accurately and clearly at both sentence and word level.	☐	☐	☐	
Writing Reflection and evaluation	Reflecting upon and evaluate the qualities of your own writing, including aspects relating to its purpose, form and audience.	☐	☐	☐	

Paper 3: Language Analysis

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
Language change Linguistic frameworks	Identify and write about the timeline and essential features of the development of the English language from Early Modern English to Contemporary English, including graphology, orthography, phonology, morphology, syntax, lexis, semantics, pragmatics and grammar.	☐	☐	☐	
Language change Concepts and terminology	Identify and write about concepts and terminology related to language change, including etymology, derivation, inflection, telescoping, coalescence, acronym, conversion, compounding, backformation, blending, borrowing, amelioration, pejoration, broadening and narrowing.	☐	☐	☐	
Language change Theories and theorists	Identify and write about theories and theorists of language change, including random fluctuation theory, cultural transmission theory, theory of lexical gaps, substratum theory, functional theory, and tree and wave models.	☐	☐	☐	
Language change *n*-grams	Use and interpret data from n-gram graphs representing changes in language use over time, including comparisons of related words, parts of speech, inflections, collocations.	☐	☐	☐	
Language change Word tables	Use and interpret data from n-gram graphs representing changes in language use over time, including comparisons of related words, parts of speech, inflections, collocations.	☐	☐	☐	
Language change Word tables	Use and interpret data from word tables derived from corpus data including collocate lists and synonym lists.	☐	☐	☐	
Language change Research	Show that you have explored research in the field of language change	☐	☐	☐	
Language change Analysis	Analysing unseen texts as exemplars of certain aspects of language change.	☐	☐	☐	
Language change Theories and concepts	Contextualise your findings from unseen texts alongside relevant theories and concepts relating to language change.	☐	☐	☐	
Writing	Synthesise your responses to a range of language data into a coherent analytical essay.	☐	☐	☐	

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
Child language acquisition Stages of acquisition	Identify and write about the main stages of early development in child language acquisition, including babbling, holophrastic, telegraphic and post telegraphic stages.	☐	☐	☐	
Child language acquisition Functions	Identify and write about the different functions of children's language, including instrumental, regulatory, interactional, personal, representational, heuristic and imaginative.	☐	☐	☐	
Child language acquisition Theories and theorists	Apply your knowledge and understanding of theories and theorists of child language acquisition, including imitation and reinforcement theory, language acquisition device, language acquisition support system, cognitive development theory, and child directed or caretaker speech.	☐	☐	☐	
Child language acquisition Transcription Analysis	Identify and interpret the conventions and features of unscripted conversation and spoken language transcripts, including notation for pauses, overlaps, stress, intonation and phonemic features.	☐	☐	☐	
Child language acquisition Research	Explore research in the field of child language.	☐	☐	☐	
Child language acquisition Analysis	Analyse spoken language transcripts as exemplars of certain aspects of child language acquisition.	☐	☐	☐	
Child language acquisition Analysis Theories Concepts Writing	Contextualise findings alongside relevant theories and concepts relating to child language acquisition.	☐	☐	☐	
Child language acquisition Theories Writing	Synthesise theoretical examples into a coherent analytical essay.	☐	☐	☐	

Paper 4: Language Topics

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
English in the world Development	Show your knowledge and understanding of the historical development of English as a 'global' language, including colonialism, cultural influence and effects, concentric circles model, multilingualism, the future of English	☐	☐	☐	
English in the world Varieties	Identify and write about varieties of English, including standard and nonstandard 'Englishes', creolisation, sociolect continuum, and official and unofficial attitudes and policies.	☐	☐	☐	
English in the world Ethics	Identify and write about relevant ethical considerations, including language shift and death, cultural imperialism, equality of opportunity, and global cooperation.	☐	☐	☐	
English in the world Criticism	Read and demonstrate a critical understanding of unseen texts relating to 'English in the world'.	☐	☐	☐	
English in the world Analysis	Select and analyse relevant ideas and examples from the texts.	☐	☐	☐	
English in the world Theories and theorists	Relate ideas and examples to theories, theorists and studies from your wider study of the relevant topic area.	☐	☐	☐	
English in the world Writing	Synthesise your ideas and theoretical considerations into a coherent analytical essay.	☐	☐	☐	
Language and the self Innateness and learning	Identify and write about innateness and learning, including behaviourism, innatism, nativism and empiricism.	☐	☐	☐	
Language and the self Language and thought	Identify and write about the relationship between language and thought, including linguistic relativity and determinism, universalism, and the language of thought hypothesis.	☐	☐	☐	
Language and the self Language and social identity	Show your knowledge and understanding of the relationship between language and social identity, including speech communities, prestige, idiolect, dialect, sociolect, genderlect, variation, standard and nonstandard features, inclusion and exclusion, speech sounds and accents.	☐	☐	☐	
Language and the self Reading	Reading and demonstrate critical understanding of unseen texts relating to 'Language and the self'.	☐	☐	☐	

Skills and Knowledge	Ways to practise skills	R	A	G	Comments
Language and the self Analysis	Select and analyse relevant ideas and examples from the texts.	☐	☐	☐	
Language and the self Theories and theorists	Relate your ideas and examples to theories, theorists and studies from your wider research into Language and the self.	☐	☐	☐	
Language and the self Writing	Synthesise your considerations into a coherent analytical essay.	☐	☐	☐

CAMBRIDGE

International Education Facts and figures

Ready for the world.

We work with schools worldwide to build an education that shapes knowledge, understanding and skills. Together, we help Cambridge learners be **ready for the world.**

- We are the world's largest provider of international education programmes and qualifications for 3 to 19 year olds.
- Over **10 000** schools in more than **160** countries offer Cambridge programmes and qualifications.
- Every year, nearly **a million** Cambridge learners prepare for their future with an education from Cambridge.
- Our teaching and learning resources are trusted by more than **1.5 million** teachers and learners worldwide.
- We are part of Cambridge University Press & Assessment, a not-for-profit organisation and part of the world-renowned University of Cambridge.

Programmes and qualifications

- The Cambridge Pathway has **five stages**, including Cambridge Early Years which was launched globally in 2023.
- Cambridge Primary is taught in more than **2500** schools in over **120** countries. There are over **130 000** entries for Cambridge Primary Checkpoint every year.
- Cambridge Lower Secondary is taught in more than **4000** schools in nearly **140** countries. Every year we receive over **130 000** entries for Cambridge Lower Secondary Checkpoint, our tests for 11 to 14 year olds.
- Cambridge IGCSE™ is the world's most popular international qualification for 14 to 16 year olds. It is taken in over **150** countries and in nearly **6000** schools around the world.
- 2022 marked the **35th** anniversary of the first Cambridge IGCSE exam.
- More than **275 000** students worldwide took Cambridge IGCSE and O Level exams in our June 2023 series.
- We are the world's biggest provider of O Level qualifications. Cambridge O Level is taught in over **50** countries.

- Cambridge International AS & A Levels are taught in over **130** countries. Over **270 000** students around the world took Cambridge International AS & A Level exams in our June 2023 series.
- Over **2350** universities in **90** countries formally recognise Cambridge qualifications, including all UK universities and over **1000** in the US.

Delivering exams worldwide

- The first Cambridge exams were taken in Trinidad in **1864** by six candidates.
- There were more entries for our June 2023 exam series than ever before. Over **576 000** students in **147** countries sat Cambridge exams.
- We produce over **9 million** question papers every year.

Professional development

- Over **230** institutions around the world run Cambridge Professional Development Qualifications to help teachers and school leaders develop their practice.
- We run almost **2000** online and face-to-face professional development courses for teachers and school leaders every year.

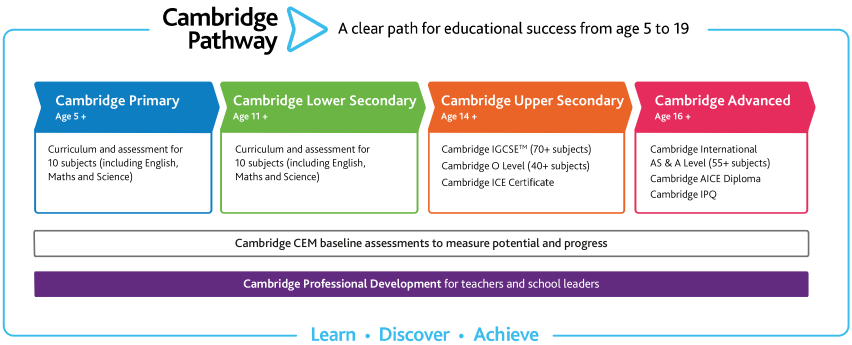
Cambridge Assessment International Education

Cambridge Pathway – a guide for parents

Cambridge International prepares school students for life, helping them develop an informed curiosity and a lasting passion for learning. We are part of the University of Cambridge. Cambridge Pathway gives students a clear path for educational success from age 5 to 19. Schools can shape the curriculum around how they want students to learn – with a wide range of subjects and flexible ways to offer them. It helps students discover new abilities and a wider world, and gives them the skills they need for life, so they can achieve at school, university and work.



Your child's needs as a learner are at the heart of our approach to education. Our Cambridge Pathway helps give your child a love of learning that will stay with them through school, university and beyond.

Our approach supports schools to develop learners who are:

- **confident** in working with information and ideas – their own and those of others
- **responsible** for themselves, responsive to and respectful of others
- **reflective** and developing their ability to learn
- **innovative** and equipped for new and future challenges
- **engaged** intellectually and socially, ready to make a difference.

Cambridge Pathway

The four stages of Cambridge Pathway lead seamlessly from primary to secondary and pre-university years. Each stage builds on the learners' development from the previous one, but can also be offered separately. We give schools flexibility so they can build a curriculum to match the needs of each student.

At the end of the Cambridge Upper Secondary and Cambridge Advanced stages, your child can achieve globally recognised qualifications like Cambridge IGCSE™ or Cambridge International AS & A Level.

Benefits for your child

We believe education is most effective when curriculum, teaching, learning and assessment are closely aligned.

Cambridge Pathway helps students develop the deep subject knowledge, conceptual understanding and higher order thinking skills that they need for success at school, at university and in employment.

Opening up opportunities worldwide

Cambridge students can be confident that their qualifications are understood and valued throughout their education and career, in their home country and internationally.

Every year thousands of students use Cambridge qualifications to gain places at leading universities worldwide. Over 2100 universities recognise our qualifications, including nearly 850 universities in the US (including all the Ivy League) and all UK universities.

Students can easily find out which universities worldwide accept Cambridge qualifications by searching our online database at **www.cambridgeinternational.org/recognition**

A global learning community

With the Cambridge Pathway, your child is joining a global community of learners from more than 10 000 schools in over 160 countries. By developing a global outlook in Cambridge learners, we aim to equip them for success in the fast-changing modern world.

Learn more! For more information on the Cambridge Pathway visit **www.cambridgeinternational.org/pathway** or contact your school.

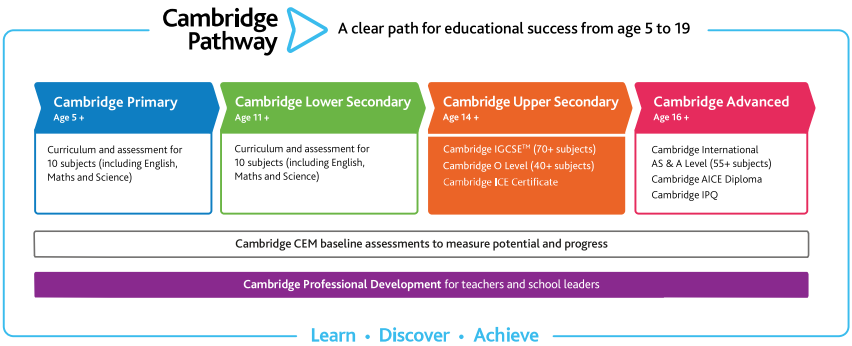
Cambridge Assessment International Education

Cambridge IGCSE™
A guide for parents

Cambridge International prepares school students for life, helping them develop an informed curiosity and a lasting passion for learning. We are part of the University of Cambridge. Our Cambridge Pathway gives students a clear path for educational success from age 5 to 19. Schools can shape the curriculum around how they want students to learn – with a wide range of subjects and flexible ways to offer them. It helps students discover new abilities and a wider world, and gives them the skills they need for life, so they can achieve at school, university and work.



Your child's needs as a learner are at the heart of our approach to education. Our Cambridge Pathway gives your child a love of learning that will stay with them through school, university and beyond. Our approach supports schools to develop learners who are:

- **confident** in working with information and ideas – their own and those of others
- **responsible** for themselves, responsive to and respectful of others
- **reflective** and developing their ability to learn
- **innovative** and equipped for new and future challenges
- **engaged** intellectually and socially, ready to make a difference.

What is Cambridge IGCSE?

Cambridge IGCSE is the world's most popular international qualification for 14 to 16 year olds. It is taken in over 140 countries and in more than 4500 schools around the world.

Benefits for your child

Cambridge IGCSE helps students to develop knowledge, understanding and skills in subject content and intellectual enquiry. The programme has been designed for students worldwide, including those whose first language is not English.

We offer students the flexibility to choose from over 70 subjects at Cambridge IGCSE, meaning they can study the subjects they enjoy and are best at.

Assessment takes place at the end of the course and offers students a range of ways to demonstrate their learning, including written, oral, coursework and practical assessments. There are also options to suit learners of different abilities. The grades awarded at Cambridge IGCSE are A*–G, with A* being the highest.

This means that Cambridge IGCSE is a great foundation for further study, including Cambridge International AS & A Level, Cambridge Pre-U and other post-16 routes.

Opening up opportunities worldwide

A Cambridge IGCSE qualification is recognised by leading universities around the world and employers view it as a valuable certificate of achievement.

In the UK, Cambridge IGCSE is accepted as equivalent to the GCSE. A good grade (grade C or above) in Cambridge IGCSE English as a Second Language is accepted for entry by a number of universities in the UK as evidence of competence in the English language.

Many universities worldwide require a combination of Cambridge IGCSEs and Cambridge International A Levels to meet their entry requirements. Leading US and Canadian universities require Cambridge International AS & A Levels, but some US and Canadian colleges and universities will accept students with five Cambridge IGCSEs at grade C or above.

A global learning community

With the Cambridge Pathway, your child is joining a global community of learners from more than 10 000 schools in over 160 countries.

By developing a global outlook in Cambridge learners, we aim to equip them for success in the fast-changing modern world.

FIRST LANGUAGE ENGLISH

Paper 0500/11
Reading

Key messages

Candidates did well when they:

- worked through the texts and tasks in the order set
- followed task instructions carefully and based their responses on the correct text and/or section of text
- responded appropriately to the command word(s) in the question
- attempted all parts of all questions
- paid attention to the marks allocated to each question and organised their response time accordingly
- focused on the particular evidence of skills and understanding they needed to demonstrate for each question
- avoided repetition of the same idea within an answer
- did not introduce material/ideas that were not directly related to or rooted in the text
- used their own words where appropriate, avoiding unselective copying and/or lifting from the text
- planned the ideas they were intending to use in longer responses
- checked and edited their responses to correct any unforced errors, incomplete ideas or unclear points.

General comments

Candidates' responses indicated that they were broadly familiar with the format of the Reading paper and the general demands of each of the three questions. There were few instances where whole tasks had not been attempted, though some responses to part questions were incomplete or missing and extended responses were often uneven, limiting the possibility of scoring higher marks. There were some candidates who missed opportunities to target higher marks by offering mechanical and/or limited responses that simply played back sections of text with little modification in the higher tariff questions. Some missed opportunities to evidence their reading skills convincingly by paying insufficient attention to the details of questions as set.

Almost all candidates appeared to find all three Reading texts equally accessible and engaging. There were few examples of significant misreading of explicit ideas across the cohort, though opportunities to evidence understanding of implicit ideas were missed by some as a consequence of less careful reading of detail. There were many excellent responses to all three questions, with candidates often going significantly above and beyond the demands of level 5. It is though important in timed conditions for candidates to ensure that they do not spend too long on one question at the expense of any of the others, and not all remembered this. For example, it was not unusual for the response to **Question 2(d)** (worth a maximum of 15 marks) to be far longer and/or more carefully crafted than the response to **Question 3** (worth up to 25 marks), whilst a few candidates wrote more/as much in their answer to **Question 2(c)** (worth a maximum of 3 marks) as they did in **Question 2(d)**.

In many of the least effective responses, a failure to complete all aspects of a task and/or a loss of focus on the rubric limited the evidence of understanding and skills offered, or resulted in redundant material **–** for example, a few candidates offered choices from paragraphs other than 3 and 7 in the language question **2(d),** or offered explanations of more than one choice in **2(c)**, and so included explanations that could not be credited. Similarly, there were some less well-focused responses from candidates who had scored well in the smaller sub questions but missed opportunities to target marks in other higher tariff tasks. For example, some wrote considerably more than the maximum of 120 words advised for the selective summary **Question 1(f)** or wrote their response to **Question 3** from a different perspective from that specified in the task guidance**.**

Some less effective responses were focused solely on word count at the expense of other aspects of their answer **–** spending time counting individual words and/or writing out a full draft version of their answer to

© 2025

Question 1(f) is unlikely to be an efficient use of time in the context of an examination. Candidates are reminded that the word guidance offered in **Question 2(d)** and **Question 3** is not a requirement of the task in itself – the guidance is offered to help them organise their time efficiently and offer sufficient evidence of their skills and understanding to target higher levels. In **Question 1(f)** the task details offer a reminder of the need for concision (Your summary should not be more than 120 words). Responses to **1(f)** that were far longer than that were likely not only to limit their success in that task but also to create unnecessary time pressure during the rest of the examination.

In **Question 1**, candidates scoring highly had worked through the tasks in the order presented and made efficient use of their time, for example by paying attention in **Questions 1 (a)–(e)** to the marks and space available as a helpful indicator of the length and detail they needed to offer in each response. They did not add further unnecessary material and focused on answering each question as set. Most candidates were careful to follow the line or paragraph references in the questions to help them to move down Text A in order and direct their attention, though a number of the least effective responses tried to answer questions based on one part of the text from another and/or by unselective copying. A few candidates had not remembered that in a test of comprehension their responses to these initial short answer questions needed to be derived from Text A in order to evidence their Reading skills and should not be based on their personal opinion, imagination or experience.

Less effective responses attempted to include extra guesses in their responses to **Questions 1(a)–(e)** taking up valuable examination time by doing so and often diluting evidence of understanding. Others simply copied out sections of text with limited modification – often negating any suggestion of understanding by doing so. A number of otherwise more effective candidates offered circular responses in one or more of their responses, repeating some or all of the language of the question where own words were specified as required, and/or addressed only part of the question in their answer. Such responses provided limited evidence of understanding as a consequence and these candidates missed out on marks they might reasonably have been expected to target – for example in **1(b)(i)** by suggesting 'people would go back for the things later'. In **Question 1(f)** some candidates relied heavily on the language of **Text B** and/or copied out chunks of text, limiting the available evidence of their own skills and understanding as a result.

In **Question 2** candidates needed to identify (in **2(a)**) and explain (in **2(b)**) words and phrases from the text, moving towards an explanation of how language was being used by the writer via **Question 2(c)** and on to the language task, **Question 2(d)**. More effective responses were careful to refer back to **Text C** to locate specific relevant choices and consider their meaning in context. In **Question 2(a)** those who copied out longer sections or sentences from the text, rather than identifying precisely the exact word/phrase that matched the sense of the underlined word/phrase in the question, were not providing secure evidence of their understanding. Likewise, opportunities for marks were missed by a few candidates in **Question 2(c)** who did not clearly identify one example from the text in their explanation and/or attempted to offer a generalised overview of the whole extract. To aim for higher levels in **Question 2(d)**, candidates should ensure that they explore and explain the meaning of each of the words they have chosen in some detail before moving on to consider associations and connotations or suggest effects. Most candidates were able to identify three potentially useful examples for analysis in each half of the **2(d)** task and offer a little basic effect / meaning in context, though a number of candidates were not sufficiently clear, careful or detailed in the examination of their choices. In less effective responses, vague and generalised comment and/or labelling of devices without explanation of how these were working in this instance meant opportunities to target higher levels were missed. A number of candidates did not address the **Question 2(d)** task effectively, often repeating rather than explaining the language of the original text and/or identifying few or no clear choices in one or both halves of the question.

In **Question 3** most candidates had recognised the need to respond with the words of a speech and most had at least attempted to include ideas from the text relevant to all three bullets. A few candidates lost sight of the task and/or text – for example, writing their speech from the perspective of the original narrator in the text rather than from her son Charlie's viewpoint, or offering a very general response on the topic of conservation / beaches from their own perspective. Candidates are reminded that responding to the specifics of the task as set will offer them the widest range of opportunities to demonstrate skills at higher levels in any extended Response to Reading question. Responses across the cohort covered the full range of levels of achievement, with top level responses offering responses that used, interpreted and developed a wide range of ideas to address all three bullets equally well, integrating key details from the text. Mid-range responses often missed opportunities as a consequence of uneven focus, a lack of planning beforehand and/or offering a narrow range of ideas from the text overall. Less effective responses either offered only brief reference to the passage, included evidence of misreading and/or repeated sections from the text with limited or no modification. Along with unselective copying, reliance on the language of the text in order to communicate ideas is an indicator of less secure understanding and should be avoided.

© 2025

Candidates should remember that though Paper 1 is primarily a test of Reading, 15 of the 80 marks available are for Writing – divided between **Question 1(f)** and **Question 3.** In these two questions, it is important that candidates consider the clarity, organisation and register of their writing. Where meaning becomes unclear due to inaccurate writing this is likely to limit achievement, as will over-reliance on the language of the passages. When responding to **Question 1(f)** and **Question 3,** it is advisable to factor in time to plan and review responses to avoid inconsistencies of style, errors that impede communication of ideas and awkward expression.

Comments on specific questions

Question 1 Comprehension and summary task

Questions 1 (a) – (e)

Short answer **Questions 1(a)–(e)** required candidates to read and respond to **Text A: Treasure hunting.** More effective responses paid attention to the paragraph references and command words in the instructions to demonstrate efficiently the evidence of understanding required. Some mid-range responses missed opportunities to target higher marks, for example through overlong, muddled or unfocused explanations. The least effective responses often repeated the language of the text where own words were required and/or relied on copying longer sections of text with little or no modification to address the question as set.

Effective responses provided evidence that candidates had understood the need to interpret and use details in the text carefully to answer each of the comprehension questions to show what they could do and understand. They followed the order of the sub questions to work through **Text A** from the beginning, picking up on pointers where appropriate to help them to identify relevant material. Occasionally, opportunities to evidence understanding were missed where explanations offered were unclear or partial and/or injudicious selection changed the meaning from that of the original text – candidates are reminded that whilst writing is not assessed in **Questions 1(a) – (e)**, responses do need to be sufficiently precise and clear to communicate details from the text accurately.

(a) **What two things give people the idea to search for treasure, according to paragraph 1?**

In **Question 1(a)**, most candidates picked up on the signposts in the text to recognise that the two things that 'Certainly inspire' people to search for treasure were identified in the second sentence of the paragraph. A few copied out all/part of the first sentence and missed out on a straightforward mark for selection as a result. Some candidates made use of the question stem to help focus their answer, whilst others worked more economically and simply wrote the key words of their answer – either approach was acceptable.

(b) **Using your own words, explain what the text means by:**

(i) **'… to recover later.' (lines 6–7)**

(ii) **'… concealed around the globe.' (line 7).**

In **Question 1(b)** task guidance made it clear that use of own words was required to evidence understanding. Where responses failed to score both marks, it was sometimes the result of offering a partial explanation only, for example in **Question 1(b)(ii)** offering a meaning for 'concealed' and/or 'globe' but repeating rather than explaining any sense of 'around the'. In **1(b)(i)** effective responses often explained 'recover' simply as meaning 'retrieve', 'collect' or 'come back to get. A few misread 'recover', not considering context, and so suggested incorrectly that this referred to 'replacing the outer layer of material around something' or 'feeling better after an illness'. In **1(b)(ii)** effective responses tackled both aspects of the idea, dealing first with concealed (most popularly explained as hidden) and then 'around the globe' (often explained as 'all over the world' or 'in lots of different places on the planet'). A few missed opportunities to score both marks in **1b(ii) –** for example, by guessing 'found', 'discovered' or 'spread' as a meaning for concealed and/or repeating 'around the' without explanation of this key aspect. Effective responses to both parts of **1(b)** were able to evidence that they had securely understood the meaning of both aspects of each question.

© 2025

(c) Reread paragraph 3 ('So, how … of the treasure.').

Give <u>two</u> different ways treasure hunters should get the information they need to start their search.

In **Question 1(c)** candidates rereading paragraph 3 closely were able to identify two distinct ways advised in the text; most recognised the explicit advice that this should be done 'By reading' (reference to the example(s) of books and/or old maps could be credited). A few had not read carefully however and so offered 'pay(ing) for information' as a recommendation; this was not in line with the text and where included in an answer indicated that the advice in relation to residents had been misinterpreted.

(d) Reread paragraphs 4 and 5 ('Treasure hunters … work again.'").

(i) Identify <u>two</u> reasons why people who have been inspired to hunt for treasure might not set out straight away.

(ii) Explain why some people might not be persuaded to take up treasure hunting by Alex Rohn's claims.

Candidates who paid attention to command / key words in the question and reviewed the two paragraphs in the light of those were best placed to offer creditworthy responses and make efficient use of their time. Effective responses in **1d(i)** spotted that the reasons delaying people who were inspired to set out on a search were given in paragraph 4 of the text and identified that Alex Rohn's claims were covered in paragraph 5. In **1d(i)** effective responses needed only to identify two of the three reasons given and most were able to do so, though a few responses offered incomplete ideas that did not evidence understanding securely – for example writing one-word responses such as 'information'. In **1d(ii)**, candidates interrogating the text effectively considered both what Alex said and what was said about Alex – with those scoring the maximum 3 marks having recognised the details and implications in the text that casted doubt on Alex's credibility as an expert.

On occasion, candidates offered suggestions in their answer to one part of question **1(d)** that would have been more appropriate to the other – for example, suggesting erroneously in **1d(ii)** that people might not be persuaded by Alex's claims since they needed time to get the information or money for a search. Others missed opportunities as a consequence of less careful reading of the question – for example explaining why people might be persuaded by Alex, rather than why they might **not** be.

(e) Reread paragraph 6 ('If your heart's … equipment.').

<u>Using your own words</u>, explain why now may not be a good time to take up the hobby of treasure hunting.

In **Question 1(e)** the most effective explanations reworked the relevant information from paragraph 6, using their own words as appropriate, to identify three distinct reasons in their explanation. Many identified issues around the cost of the modern equipment required or the difficulties accessing the locations of any remaining treasures. Some made explicit the suggestion that most, or all, of the easy to find treasure would already have been discovered in previous decades by the teams of dedicated hunters, leaving little behind for anyone taking up the hobby now. Occasionally, candidates offered responses suggesting why now would be a good time to take up treasure hunting – citing the existence of advanced technology as a positive – indicating less careful reading of both task and text.

(f) According to Text B, what concerns, worries and objections might there be about the hobby of metal detecting?

You must <u>use continuous writing</u> (not note form) and <u>use your own words</u> as far as possible.

Your summary should not be more than 120 words.

In their responses to **Question 1(f)** most candidates were able to demonstrate at least a general understanding of some relevant ideas from **Text B: Metal detecting** and some understanding of

© 2025

the requirements of the selective summary task with relatively few introducing ideas or opinions from outside the text. All points on the mark scheme were covered over the range of responses seen, though repetition of the same idea, misreading and/or inclusion of unnecessary detail meant opportunities were missed by some candidates to target higher marks. A failure to recast information from the passage to address the question sometimes diluted evidence of focus and/or understanding in less effective responses.

Where responses were most effective, candidates had made a consistent attempt to use their own words where appropriate and to keep their explanations concise. Overview was evidenced in some of the most effective responses where relevant ideas had been carefully selected from different parts of the text and organised helpfully for their reader. Less well-focused responses copied from the text, with minimal or no rewording or reorganisation of the original, often resulting in redundancy. Some offered points that argued against any concerns, worries or objections and/or offered advice for anyone considering taking up the pastime; neither of these approaches was in line with the task as set and likely to result in less effective responses as a consequence. Some candidates attempted to rely on lifting whole phrases and/or sentences from the text to communicate ideas, diluting evidence of their skills and understanding as a result and affecting their marks for both reading and writing. Indiscriminate copying of the passage, repetition and adding comment or example should all be avoided as these do not allow candidates to demonstrate their understanding and effectively address the selective summary task.

The most effective responses to the selective summary task showed evidence of candidates having planned a route through the content of their answer before writing their response. Many had produced and followed a bullet point plan, editing out obvious repetitions and efficiently grouping together similar ideas. There were many extremely effective and well-crafted responses that demonstrated both concision and precise understanding over a wide range of relevant ideas. In partially effective responses, excess often arose from attempts to comment on the concerns of others, lists of examples related to the same point and/or repetition of ideas as the result of an unnecessary introduction or conclusion to the response.

Most candidates appeared to be aware of the need to try to use their own vocabulary where feasible – without changing or blurring the original idea – and to organise points helpfully for their reader. However, some candidates overlooked the need for concision in a selective summary task and offered lengthy explanation, with a few candidates continuing to write far more than the maximum of 120 words advised in the task guidance. Others adhered to the advised length of the response but took far too long to explain just a few, sometimes repeated, ideas.

The majority of candidates showed at least some awareness of the need to use only those ideas relevant to answering the question, though not all were able to select ideas efficiently to navigate around more obviously redundant material – for example, some lost focus and spent time detailing the plot of the television programme ‘Detectorists’ and/or highlighting stories of valuable finds reported in the media.

More effective responses were not dependant on the structure or language of **Text B** to communicate their ideas and were consequently able to offer more concise explanations. They remembered to keep in mind the ‘negative’ focus of concerns, worries and objections only and ignored/recast anything appearing in the original text as a comment on, or counter argument to, these. Less effective responses sometimes relied on trying to offer an own words version of the whole text in the order it was presented and often repeated ideas and/or included unnecessary or inappropriate detail as a result. In these responses, excess was often a significant feature. In low to mid-range responses, some candidates simply linked lifted phrases, missing opportunities to target own words and indicate more secure understanding by failing to reword phrases/sections from the text such as ‘digging in public spaces creates trip hazards’ and ‘divorcing those objects from their context and most of the information that makes them valuable’. The least effective responses were almost entirely reliant on the language of the original. Candidates are reminded that lifting sections of text and splicing them together is unlikely to evidence understanding of either the ideas in the passage or requirements of the task.

Advice to candidates on Question 1(f):

- read the task instructions carefully – identify the focus of the question and how it relates to the perspective in the text

© 2025

- reread Text B to identify just the ideas that are potentially relevant to the focus of the question
- discard any ideas or extra details which are not relevant to the specific focus of the question
- plan the ideas you are going to include ahead of writing your response – draw a neat line through your planning afterwards
- reflect on the ideas you have highlighted in your plan; check that they are distinct and complete
- check whether there are repeated ideas or examples which could be covered by one 'umbrella' point
- return to the text to 'sense check' any ideas you are unsure of before you try to use them
- organise and sequence your ideas to make them clear to your reader; do not rely on repeating ideas in the order of the original text
- explain ideas in a way that someone who had not read the text themselves would understand
- do not comment on ideas or add examples/details/opinions of your own that are not in the text
- write informatively and accurately in your own words, avoiding errors which affect meaning
- check back to ensure that you have included all of the ideas you planned to but not repeated anything
- though it is not necessary to count every word, you should keep in mind the guidance to write 'no more than 120 words' and aim for concision.

Question 2

(a) **Identify a word or phrase from the text which suggests the same idea as the words underlined:**

(i) **The boys and their mother have to pass through and around the delicate hills of sand to get access to the beach.**

(ii) **The goods carried by the ship that sank were never found, but the people on board were saved.**

(iii) **It is not unusual for the narrator to discover everyday items that have been thrown away without thought on the beach.**

(iv) **Previously, vehicles were allowed on the beach.**

Focused responses to **Question 2(a)** clearly identified the correct word or phrase from **Text C: The beach** to correspond with the meaning of the underlined example in each part – simply and efficiently giving the exact word or phrase only as their answer. Candidates should note that it is **not** necessary to write responses to **Question 2(a)** in full sentences and they need only to offer the word or phrase selected from the text as their answer. Some candidates added unnecessary time pressure by copying out the entire question in each case, substituting the word or phrase from the text and then bracketing or underlining the relevant section of their answer.

Marks were sometimes missed where responses were unfocused – for example, offering responses that covered only part of the meaning of the underlined phrase, or adding in extra words from the text that went beyond the meaning of the underlined words, such as 'cars' in **2(a)(iv**) or 'fragile dunes' in **2(a)(i)**. Occasionally, candidates had overlooked the instruction to 'identify a word or phrase from the text' and tried to offer an explanation of meaning in their own words.

(b) **Using your own words, explain what the writer means by each of the words underlined:**

On this dazzling afternoon, cycling along the sea's edge is exhilarating and our laughter sends seagulls scattering skywards. The new path we're following ends abruptly and we're stranded on the wrong side of a channel of water.

(i) **dazzling**

(ii) **exhilarating**

(iii) **abruptly**

In **Question 2(b),** some responses offered just one carefully chosen word or phrase as their answer, whilst others offered longer explanations as evidence of their understanding. Either approach could be creditworthy, though candidates should be careful not to dilute evidence of understanding by offering several suggestions and extra guesses of different meanings that are

© 2025

contradictory and/or not in line with the text. Effective responses had considered the precise meaning in context of each of the words underlined, recognising for example that 'abruptly' suggested a sudden, unexpected end to the path rather than something that ended quickly as less precise responses suggested. A number of candidates were unsure of the meaning of 'exhilarating' – for example, suggesting incorrectly that it meant breathless or exhausting. Some missed the suggestion of very bright sunlight in 'dazzling' and offered only generic adjectives such as wonderful or awesome which were too general to credit.

(c) **Use <u>one</u> example from the text below to explain how the writer suggests her feelings as she attempts to cross the channel of water on her bicycle.**

<u>Use your own words in your explanation.</u>

I show the boys that, like life, if you approach it full on, you can most times power through on sheer determination. But today the channel's deeper than it looks. I've misjudged it massively. My bike comes to a graceless halt midway, balances briefly, then falls flat on its side, depositing me spectacularly in fifty centimetres of water.

In **Question 2(c),** those candidates who had focused clearly on using just **one** example taken from the text extract as instructed were best placed to demonstrate their understanding. Some underlined their chosen example in the text, others copied it out as a subheading for their explanation; either approach was acceptable.

Effective responses included those which began with an explanation of the meaning of the key word(s) in their example, ahead of going on to explain what those meaning(s) suggested about the writer's feelings at that point. Many responses centred their answer around all/part of the image of the writer's belief that 'like life, if you approach it full on, you can most times power through on sheer determination' and were generally able to exploit their chosen example effectively, often suggesting something of the optimism and self-belief it suggested. Some who had selected the whole image still missed opportunities to target higher marks by not explaining how 'power', 'sheer' and/or 'full on' helped to contribute to the sense of commitment to succeed in life. Those who selected 'depositing me spectacularly in fifty centimetres of water' were often able to unpack it particularly effectively and score full marks showing understanding of the drama and amused embarrassment communicated in the choice of vocabulary and implied tone.

The most effective responses had carefully noted the number of marks available and focused their response to make three distinct points in relation to their one chosen example. Less effective responses often attempted to discuss more than one example – time that might have been more profitably spent in **Question 2(d)** where there were up to 15 marks available. Some less effective responses did not pay careful attention to the instruction to select from the given extract and attempted unwisely to paraphrase the whole extract and/or discuss it in very general terms. Others chose less interesting selections from the text (for example, 'the channel's deeper than it looks' or 'But today') that offered little/no opportunity to explore how the writer's feelings were conveyed or chose a potentially useful example but then offered explanations better suited to another. On occasion, opportunities were missed to offer evidence of understanding through circular responses that simply repeated the language of the text or misreading of key words – for example, some candidates attempted to explain the writer's 'sheer determination' as showing how determined she was to power through.

(d) **Reread paragraphs 3 and 7.**

- **Paragraph 3 begins 'From this distance …' and is about the wreck.**
- **Paragraph 7 begins 'Treasure hunting …' and is about the egg cases of fish.**

Explain how the writer uses language to convey meaning and to create effect in these paragraphs. Choose <u>three</u> examples of words or phrases from <u>each</u> paragraph to support your answer. Your choices should include the use of imagery.

Effective responses to **Question 2(d)** offered clear analysis of three relevant selections from each paragraph – six in total – often beginning by explaining the literal meaning of the choice and then moving on to explore effect. Such responses demonstrated understanding of how the writer was using language through detailed discussion of focused choices centred around images, individual

© 2025

words or phrases. Where candidates had considered all of the key words in slightly longer choices they were able to avoid those more generalised comments of less effective responses, though candidates do need to be careful to choose and explain examples of interesting or powerful language use precisely and deliberately, rather than simply offer whole sentences from the paragraph with a general comment in the hope there will be something useful in there. Occasionally, some candidates did not indicate any clear choices for explanation, offering instead a general summary of each paragraph that did not address the task and could not be credited.

Some candidates appeared to attempt to adopt a more formal, academic register when writing their response to **2(d)** which was not always helpful to their explanations. The most effective responses simply offered clear explanation of their ideas – often as if explaining orally each quotation to their teacher or fellow learners and avoided repeating the same idea over several choices (finding different words to express it where they felt it was equally relevant).

Some candidates used each of their choices as a sub-heading for their explanation of it effectively, though candidates repeating the language of the text within their explanations missed opportunities to target higher marks. The most effective responses considered words within their choices individually, as well as suggesting how they worked within the longer phrase and/or in the context of the description as a whole. Rather than selecting the first three choices in each half they came across, or the most 'obvious' literary devices, Effective responses often set out to identify those relevant selections that they felt best able to explain. Some of the most effective responses spent some time exploring interesting contrasts between descriptions of essentially the same objects within the paragraph, for example unpicking the two opposing descriptions of 'mermaids' 'purses'. Responses at level 5 frequently analysed their choices precisely and offered responses that were balanced across both parts of the question. In the mid-range, responses were often uneven in favour of one paragraph or the other and opportunities were missed where the same or very similar general suggestion was offered for more than one choice and/or words from choices were recycled in responses rather than explained.

Choices from paragraph 3 often centred around the idea of the wreck appearing to have been deliberately placed on the sand for dramatic effect – many candidates selected choices containing the words 'prop', 'stage' and 'magic' though some relied on repeating other words from the paragraph such as 'unreal', 'thrill' and 'astonishing' in their explanations, diluting evidence of understanding by so doing. A number of candidates had misread the game of hide-and-seek as something the two boys were playing and/or tried to explain sweeping as the movement of a broom (not relevant to this context).

Images connected to the wreck as the carcass of a huge prehistoric creature were popular choices, identified by many, though fewer considered precisely the individual words within the choice– with only the most effective responses explaining precisely how 'picked clean of its flesh by the sea' helped to underline that there was nothing at all left of the external fittings of the ship.

Occasionally, limiting their comments to an explanation of just one word within longer choices meant some candidates offered partially effective explanations only – for example, not all considered the word 'cartoon' in 'clamber on board like marauding cartoon pirates' and so overlooked what it suggested about the writer's interpretation of her boys' behaviour. The least effective responses to **2(d)** offered generic empty comments such as 'The writer has used metaphors and similes to help create a picture in the reader's mind of what it was like to be there'. Comments like these are not helpful to candidates since they do not evidence any understanding of how language is working in a particular given section of the text and can create a false sense of security, meaning candidates move on without saying anything creditworthy. Functional responses to the task offered a clear explanation of the literal meaning of each example they had chosen, whilst more effective responses also identified effect. Candidates working at higher levels were often able to visualise images, using explanation of precise meaning in context and going on to explore connotations and associations as the starting point for their explanation of effect. For example, many were able to explain the unpleasant image of the dried-out egg cases by working outwards from the meanings and associations of 'blackened' and 'hardened', though not all tackled 'desiccated' and some appeared to have misread it as 'dissected'. Less effective responses often only labelled devices and/or offered no more than a generic explanation of the writer's reasons for using them.

In **Question 2(d)**, it is the quality of the analysis when considering how language is being used which attracts marks. Candidates are reminded that their Writing skills are not being assessed in

© 2025

this question. They should be encouraged to work at the very edges of their vocabulary range as they explore and explain each choice – reaching to find the right words to help explain their choice, rather than limiting their answer to those words they are sure they can spell correctly, could be helpful for some candidates. Likewise consideration of shades of meaning might help some candidates to improve the precision of their explanations and move towards effect, targeting higher marks – for example, in paragraph 3 the description of the wreck as 'enormous' did more than suggest it was merely 'big' and in paragraph 7 the use of the word 'tiny' to describe the fish went further than suggesting it was just 'small'.

Selections in **Question 2(d)** need to be clear, accurate and deliberate, helping to focus the analysis which follows. Long quotations with only the first and last words identified are unlikely to be useful and/or result in very thin general comments at best. Opportunities this session were missed in a few responses where choices were from one paragraph only and/or only three choices were offered overall. The most effective responses were often able to 'talk their reader through' their understanding of words within relevant choices, considering different possibilities of meaning, associations and connotations, ahead of arriving at an understanding of how and why these particular words might have been used by the writer in this context.

Advice to candidates on Question 2:

- do not copy out lines or chunks of text, miss out key words or include only part of the choice
- copy words and choices correctly from the text
- in each part of **2(a)** make sure that your selection from Text C is clearly identified and matches the sense of just the underlined words in the question
- in **2(b)** be careful that your explanation is consistent with how the word is used in context (if unsure, try substituting your answer in the text to check it)
- in **2(c)** try to say three separate things about your one chosen example
- in **2(d)**, choose 3 examples from each of the two specified paragraphs (6 choices in total)
- only offer an overview in **2(d)** if you have spotted that there is a relevant connection between your chosen choices in a paragraph
- where you are trying to explain meaning, read your answer back to check that your explanation makes sense
- when explaining how language is working avoid empty comments such as 'the writer uses personification to interest the reader' – you need to say how your chosen example does this to show your understanding
- make sure your explanations deal with each of the key words within an identified choice separately as well as how they work together
- when you are unsure how to explain the effect, start by explaining the precise meaning in context of the word(s) in the choice and work from there
- when you are trying to explore and explain images, consider the connotations and associations of the words within choices to help you to suggest the effect the writer might have wanted to create
- allow time to edit your responses – for example, to add in further detail and/or correct errors to help show you have read carefully and understood.

Question 3

You are Charlie. Years later you work for an organisation which protects natural environments. As part of your work, you give a speech to persuade young people to protect your local area.

In your speech you:

- **describe how you spent your afternoons on the beach as a young boy and what you enjoyed best about those activities looking back**
- **explain what you learned from your mother about the beach, its history and its people**
- **suggest how and why you were inspired to protect natural environments and what you think young people can do to help this beach.**

Write the words of the speech.

Having worked through **Question 2** and already familiarised themselves with **Text C**, candidates following the order of tasks as set were best placed to adopt the perspective of Charlie, one of the narrator's sons, and reflect back on the explicit and implicit ideas conveyed in the passage in this extended Response to Reading

© 2025

task. The task guidance invited candidates to present a speech persuading young people to protect the local area.

Generally, candidates seemed familiar with the requirements of a speech and many were able to write persuasively, using an appropriate register for their imagined audience. The best responses used and extended the speaker's experience to connect with young people, blending personal memory with a call to action. Occasionally, candidates allowed rhetoric to take over and lost sight of the text and task, developing passionate arguments for blue whales, dolphins and turtles and inventing detailed accounts of ways to reduce carbon footprints that strayed too far from the passage to evidence reading skills.

Some candidates invented complicated backstories for why Charlie had been inspired to protect natural environments that were not rooted in the text, for example suggesting the death of his mother through illness and/or sale of treasure discovered in the shipwreck as reasons for wanting to help the world/reduce global warming. A few candidates missed the opportunity to offer and develop a range of key ideas appropriately by opting to write their speech as Charlie's mother and limited the development they were able to offer as a result.

Most candidates were able to demonstrate that they had understood both the narrative and task in at least general terms. Most were able to recount how Charlie had spent his afternoons on the beach as a young boy citing bicycle rides, treasure hunting for natural and man-made objects and playing pirates with his brother, though a number missed opportunities to develop ideas by not reflecting on those experiences as bullet one invited them to do. More effective responses found natural links when developing ideas for bullet one to ideas relevant to bullets two and three and were often able to use those connections to shape their speech effectively. For example, some reflecting on the most enjoyable moments looking back cited the comic timing of his mother's fall into the channel and went on to reflect on her optimism and enthusiasm as inspiring their own determination and approach to life. Others recalled the vulnerability of the baby skate they discovered together and linked that to the fragility of the dunes they purposefully cycled around rather than over and/or the beauty of nature before moving to explain the change in rules concerning cars on the beach.

Some in the mid-range moved on too quickly in bullet one and/or two to make full use of the ideas they had identified and target higher marks, for example many mentioned finding the shipwreck and car though did not reflect or comment on either experience. More effective responses had often considered what one or both of these might suggest about the power of nature and/or weaknesses of humankind and often went on to link to relevant points about tides/weather or the 'physical culture' of generations before them that the beach concealed and might reveal.

Where candidates had planned their response beforehand, they were often able to draw on relevant ideas and details from different parts of the text to address all three bullets effectively. There were some particularly effective responses that showed thorough evaluation of the text and expertly weaved in detail to produce a convincing and persuasive speech. Meanwhile responses that simply relied on mechanically tracking back through the text and replaying the passage often offered a more limited range of ideas overall, missing opportunities to evidence understanding of implicit ideas and suggestions. The least effective responses copied sections of text with minimal modification and/or included inaccuracies as a result of misreading of key details and information. For example, some reading less closely thought hide-and-seek was a game played by the two boys and/or suggested that the brothers had discovered actual fossilised remains of a large extinct animal on the beach. Some very general responses recognised the need to refer to the beach but had moved away from evidence in the text completely – for example to suggest that Charlie remembered playing on the beach with groups of friends, making sandcastles and/or surfing – none of which were referenced in, or suggested by, the text so could not be credited as evidence of close reading skills.

Where candidates copied sections of text and/or replayed phrases that were not securely understood, responses were generally less effective; expression often became awkward and/or there were inconsistencies of style that also affected the writing mark. Candidates are advised to leave sufficient time to read back through their response to correct any mistakes or inconsistencies in their use of language – for example to ensure that meaning is clear and that the register sounds consistently appropriate. In the least effective responses, lifting in relation to all three bullets was an issue, with copying of whole sections of text not uncommon in these responses. This affected evidence of both Reading and Writing skills.

Advice to candidates on Question 3:

- remember to base your answer on the ideas and details you find in Text C
- keep the audience and purpose for your response in mind throughout your answer

© 2025

- do not invent information and details beyond the scope of the passage; look for the clues and evidence in the text to help you make judgements about characters and situations
- give equal attention to each of the three bullet points: the bullet points are designed to help you to identify a wide range of relevant ideas
- plan a route through your answer beforehand: you can choose not to follow the order of the bullet points and /or link ideas from each
- do not copy directly from the text: use your own words as far as you can to express ideas
- try to do more than just repeat details of what happened: developing ideas allows you to better show your understanding, for example by explaining feelings or commenting from the point of view of the character you are writing as
- leave sufficient time to edit and correct your response.

FIRST LANGUAGE ENGLISH

Paper 0500/12
Reading

Key messages

Candidates did well when they:

- read the introductions to each text carefully
- followed question instructions carefully, responding appropriately to the command words
- considered the marks allocated to each question and developed their responses accordingly
- understood the different requirements of the extended response questions
- paid attention to the guidance offered to help them focus their responses – for example, writing no more than 120 words in the summary, using just one example from the given text extract in **2(c)**, and selecting three language examples from each paragraph in **2(d)**
- avoided unselective copying and/or lifting from the text where appropriate
- used their own words where specified in the question
- planned the ideas to be used and the route through extended responses before writing
- selected only the material that was most appropriate for the response to the question
- avoided repetition of ideas in all questions
- checked and edited their responses to correct any careless errors, incomplete ideas, or unclear points.

General comments

The vast majority of candidates attempted every question on the reading paper; examiners reported seeing very few incomplete papers. Candidates' responses indicated familiarity with the format and question types on the paper. The texts proved to be accessible to nearly all candidates, and they responded positively to both texts and questions. There were relatively few examples of misunderstanding in terms of task requirements, and time-management was generally effective. Occasionally a failure to follow the rubric, or complete a task fully, limited opportunities to demonstrate understanding. This was most common in **Question 1(d)(ii)** and **1(e)** where some candidates did not attempt to find three points, in **Question 1(f)** where some candidates included a limited range of ideas in their responses or ignored the 120–word guidance, in **Question 2(c)** where a number of candidates did not select a clear example from the text provided or selected more than one, or in **Question 2(d)** where some candidates offered three choices of language in total rather than three choices from each paragraph as specified in the task or focused on the wrong paragraphs in the text.

In **Question 1**, the most effective approach taken by candidates was to work through the questions in the order presented, carefully noting the number of marks allocated and the space provided for their responses as helpful indicators of how detailed their responses needed to be. They also referred carefully to the lines or paragraph specified in each question moving efficiently through the text as directed. Less effective responses to **Question 1** tended to lack focus on the text or lacked relevance to the question. At times candidates used the language of the text where they had been asked to use own words – for example **in Question 1(b)(ii)** by explaining 'conventional' but lifting the word 'options' instead of offering an alternative to show understanding of the whole phrase. In **Question 1b(i)** many candidates found it difficult to fully explain **'**sample delicacies' offering vague explanations such as 'food' or 'dishes' for delicacies and therefore not showing sufficient understanding to be given both of the marks available. This was sometimes an issue in **Question 1(f)** where some candidates copied phrases (or whole chunks of text) rather than remodelling the language of the text in their response. Even where copying is selective, it should be avoided in **Question 1(f)** to demonstrate evidence of full understanding for the Reading mark and produce an effective response to the task. Many candidates also included too many examples and details from the text, such as references to 'Chris' or the complete list of the advantages offered in a school minibus converted into a home. This made copying the original wording of the text more tempting and often led to the inclusion of excess material or sometimes indiscriminate selection of ideas.

© 2025

In **Question 2** candidates were required to explain carefully selected words or phrases from specified sections of the text. **Question 2(c)** supplied a short section of the text to select from ahead of the longer response selecting from two paragraphs in **Question 2(d)**. More effective responses were able to consider meanings in context and as well as the effects of the powerful language identified, demonstrating understanding of the writer's purpose in a clear overview of the featured paragraphs. Middle-range responses tended to focus on the meanings of the language choices showing mostly clear understanding, although at times they tended to be literal rather than considered within the context of the whole text. Less effective responses struggled to develop viable explanations sometimes repeating the language of the text in the explanations or identifying literary techniques with varying degrees of accuracy but then offering general comments about the techniques rather than focusing on the words themselves. These responses did not always choose appropriate language to discuss or only selected three examples in total.

In **Question 3** the majority of responses addressed all three bullets in the question, although some candidates found it challenging to develop the ideas from the text. Most candidates wrote as Vic, although some adopted a rather vague voice, referring to Vic in the response rather than using his voice and perspective. The most effective responses produced a convincing letter adopting an appropriate voice for Vic reflecting on his experiences during the trip in the bus as well reflecting on what he had learnt from the experience. More effective responses developed the ideas and details in the text selectively to work through the bullets logically. They were able to explain what preparations were done before starting the trip, outline all the challenges faced and how they were managed, as well as reflecting on lessons learnt for the future. Responses in the middle range tended to use the text rather mechanically often paraphrasing closely rather than selecting ideas and details to use in their own writing to demonstrate understanding. These responses tended to focus on the first part of each bullet point, thus losing opportunities to develop the ideas in the text through offering more developed explanations and advice. Less effective responses tended to lack focus on the text covering only the main ideas and sometimes inventing material that moved too far away from the text itself. Some responses included a great deal of fabricated material about how Vic became part of the group, often reminiscing about fictional past events and trips with Roger. Other less effective responses copied unselectively thus providing little evidence of understanding.

Paper 1 is primarily an assessment of Reading, however 15 of the 80 marks available are for Writing – 5 marks in **Question 1(f)** and 10 marks in **Question 3**. In these questions, candidates need to pay attention to the quality and accuracy of their writing to maximise their achievement. Candidates are advised to plan and review their responses to avoid inconsistencies of style and to correct errors that may impede communication.

Comments on specific questions

Question 1

Questions 1(a) – (e)

In response to Text A candidates were asked to response a series of short answer questions. More effective responses paid careful attention to the command words in the instructions as well as the number of marks allocated to individual questions. These responses demonstrated sound understanding by selecting appropriate details and evidence from the text in concise, focused responses. Less effective responses tended to write too much or failed to follow the instruction to use own words. Some candidates offered several possible responses thus using time inefficiently and diluting evidence of understanding.

(a) What were the first food trucks called, according to the text?

This question required candidates to be selective and focus on paragraph 1 only. Most candidates identified and 'chuckwagons' to get 1 mark. Occasionally the mark was not awarded because of too much excess information from the text.

(b) Using your own words, explain what the text means by:

(i) 'sample delicacies' (line 2)

(ii) 'conventional options' (line 3).

In **Question 1(b)** candidates were instructed to use their own words to evidence understanding of the phrases in the question. Where responses failed to achieve both marks available for each

© 2025

phrase, it was usually due to the candidate's partial use of the words from the text. For example, in **Question 1(b)(ii)** a few candidates used the word 'options' in their explanation of 'conventional' (such as 'the usual options' thus partially addressing the task. Some offered vague words to explain 'delicacies' such as 'food' or 'dishes' which did not explain the meaning in context clearly enough. Candidates should be aware that the 2-marks offered for each sub-section of **Question 1(b)** require all parts of the phrase to be explained clearly and precisely in the context of the text.

(c) Reread paragraph 2 ('Unlike modern ... journalists.').

Give <u>two</u> differences between modern food trucks and chuckwagons.

To achieve both marks for this question candidates were required to offer two clear differences between modern food trucks and chuckwagons, but many candidates simply offered two characteristics of chuckwagons *or* modern food trucks with no element of comparison. Some candidates wrote a characteristic of chuckwagons on one line and an opposing characteristic of modern food trucks on another line and therefore could be credited with 1 of the 2 marks available. The most effective responses clearly identified two differences such as 'Unlike modern food trucks, chuckwagons sold items other than food and drink', or 'Modern food trucks just have chefs but a person running a chuckwagon would have many other roles'.

(d) (i) Reread paragraphs 3 ('The modern ... parked.').

Identify <u>two</u> reasons why food trucks are becoming more popular with customers.

To respond to **Question 1(d)(i)** candidates needed to focus on what customers like about food trucks. Many candidates did not read the question carefully enough and offered general benefits of food trucks without focusing on the customer. They often offered material more suitable for **Question 2d(ii)**. Where candidates had read the question carefully, they were usually able to identify two reasons for their popularity with customers and gain both marks available. The most common response was due to nostalgia, followed closely by innovation and technology. Some candidates identified that street food has become more fashionable, but others were too vague and did not include street food in the point. Fewer candidates offered the idea that they can be found easily by customers.

(ii) Reread paragraphs 3 ('The modern ... parked.').

Explain why many business people prefer operating mobile food trucks to running restaurants in permanent locations.

In **Question 1(d)(ii)** candidates also sometimes failed to read the question carefully enough and focused on the customer instead of the business owner. This was more common where **Question 1d(i)** had also not been read carefully. Most candidates were able to explain that running a food truck is cheaper than having a permanent restaurant and many candidates referred to the ability to perfect a limited number of menu items. Some candidates identified the potential to serve food at a range of large events, but some were too vague on this point, simply offering a basic meaning of mobile as being able to move around rather than explaining why this is an advantage for the business owner.

(e) Reread paragraph 4 ('Successful food ... ready!').

<u>Using your own words</u>, explain why it might be challenging to establish a unique food truck business nowadays.

This question required candidates to show both explicit and implicit understanding from their reading of paragraph 4. Most candidates were able to achieve one mark, a reasonable number gained two marks, but fewer gained all three. The most common correct idea was that converting a food truck can be expensive, followed by the idea that all of the potential food options have been covered already. The point in the mark scheme explained clearly by fewer candidates was that the number of unusual or gimmicky vehicles/concepts already on the market, makes it challenging to find something original. Many simply repeated that there are many unusual ideas out there without clearly identifying it as a challenge. Some candidates simply repeated the question claiming it was challenging to establish a unique food truck. Candidates should be aware that to gain the full 3

© 2025

marks in this question at least some remodification of the ideas in the text is necessary. There were very few examples of candidates copying out the paragraph completely in this session.

(f) According to Text B, how and why are old buses being used?

You must use continuous writing (not note form) and use your own words as far as possible.

Your summary should not be more than 120 words.

This question was based on Text B and required candidates to select relevant ideas from the text and organise them into a focused summary which addressed the task. Most candidates were able to demonstrate at least a general understanding of the text and offer some relevant ideas about how and why old buses are being used. The most effective responses were carefully planned, organised and coherent, focusing sharply on the task by referring to a wide range of ideas from the text, reordering the material where necessary to aid fluency and achieve logical progression, avoiding repetition and re-modelling the wording of the text to use own words effectively. These responses were often preceded by a bullet-pointed plan in which ideas from the text were noted briefly before being included in a fluent own-words response. Responses in the middle range tended to include a more limited range of relevant ideas, the most common being helping the homeless, using them as libraries, theatres and museums, converting minibuses to homes, advertising, and creating a pop-up shop or a café/office. A number of candidates failed to spot similar ideas such as helping the homeless and running musical events for elderly people with dementia as both aiding the community, or recycling buses being environmentally friendly and converting minibuses into homes reducing the carbon foodprint, which could have been summarized into one environmentally friendly idea. This led to repetition. There was often inclusion of excess material even where an effective range of ideas had been considered, particularly when including both community ideas with full details or outlining all the living spaces offered in a converted minibus as well as citing that it can be used as a holiday home. Some less effective responses closely paraphrased the whole text resulting in repetition as outlined above but also the inclusion of irrelevant ideas and details.

Length was often an indicator of the level of the response, with some responses being too short due to a small number of relevant ideas identified, and others very long and wordy due to unnecessary information or quotations to exemplify comments. The most effective responses tended to adhere to the advised length through adopting a concise and focused approach to the task while adapting the style to produce a plain, informative text. Less effective responses were either very brief due to a very limited number of ideas being considered or were excessively long and unselective. Occasionally less effective responses adhered to the advised word count but took far too long to consider a few ideas by including unnecessary details and/or comments. In most responses there was an attempt to use their own words although a surprisingly large number of candidates did rely on lifting phrases from the text. The most commonly lifted sections of text/phrases were, 'they can't be buses forever', 'bringing arts to communities via mobile libraries, theatres or museums', 'educate, raise awareness and maybe save a life or two along the way', 'stopping in zones where homeless people tend to gather, 'musical events for elderly people suffering memory loss', 'working together can make a difference', 'renovated to accommodate four adults, complete with cooking facilities and a bathroom','3D-paint your advertisement all over their vintage vehicle and drive it around', and 'bus that's been transformed into an office and café'.

Many responses strung together these lifted phrases, so were at best partially effective due to the reliance on the wording of the text affecting the evidence of reading understanding. These responses often lacked a helpful structure as the ideas had not been reorganised to address the task. There was very little evidence of misreading in this task (although many thought that elderly people with dementia were enjoying a 1970s disco on a bus), but an issue in some responses was a tendency to include repetition of a number of points when trying to address the 'how and why' in the question.

Advice to candidates on Question 1(f):

- reread Text B after reading the question to identify potentially relevant ideas
- plan the response using brief notes to ensure a wide range of ideas from the text is selected
- avoid including unnecessary details which do not address the question
- organise the ideas, grouping them where relevant, to ensure that your response is coherent

© 2025

- avoid repeating ideas
- avoid including a general introduction or summative conclusion
- use your plan rather than the text as you write your response to avoid lifting
- write clearly and make sure you express yourself fluently using your own words – avoid lifting phrases
- do not quote from the text
- do not add comments or your own views – use a neutral writing style
- try to keep to the guidance to 'write no more than 120 words'.

Question 2

(a) Identify a word or phrase from the text which suggests the same idea as the words underlined:

(i) Any interested person watching might notice that this large bus was different from the buses they sometimes saw in their country.

(ii) The bus company was still really helpful after the bus had been sold.

(iii) The disastrous end to their journey was when the bus ended up in a river.

(iv) The writer and their fellow travellers showed incredible immaturity to think that they could make such a journey without mishap.

The most effective responses to **Question 2(a)** focused on the underlined word or phrase, located the correct version in the text and gave it as the response. A few responses copied the whole sentence from the question inserting the correct phrase from the text to replace the underlined phrase in the question, but this was a less common approach presumably because it wastes valuable time for the candidates. Responses that used the text more widely than in the equivalent phrase/sentence could not be rewarded even if the correct word/phrase was included, as candidates do need to exercise precision to demonstrate full understanding. Most candidates were familiar with the demands of this question, but a few seemed confused about how to respond, offering own words equivalents of the underlined words instead of locating them in the text. Where marks were lost, it was usually due to partially matching the underlined phrase, for example 'breath-taking naivety' (missing the 'displayed' for 'showed', or more commonly including too much of the text and therefore moving beyond the meaning of just the underlined phrase, for example 'a curious spectator would see a bus', or 'until that fateful last day when it sank'.

(b) Using your own words, explain what the writer means by each of the words underlined:

It's difficult to envisage how cut off from our previous lives we were back then. Mobile phones and emails weren't yet invented. There was no internet linking different countries and cultures. To phone home was expensive and public phones weren't easy to find. I was away two years and managed to phone home twice.

(i) envisage

(ii) linking

(iii) expensive

In **Question 2(b)** the most effective responses covered the meaning of each word considering its context as used in the text. Many candidates were able to explain 'envisage' as 'imagine', but some candidates simply wrote 'think' which did not show full understanding. 'Linking' was usually effectively explained as 'connecting', and most candidates were easily able to explain 'expensive' as 'costly'. These responses to **Question 2(b)** thought carefully about meanings in context and offered viable responses which would accurately replace the words in the text without altering the meaning. Some candidates seem to be under the impression that their explanations should only be a single word to replace the original which is not the case.

© 2025

(c) **Use <u>one</u> example from the text below to explain how the writer suggests the attitude of the owner of the orange juice.**

<u>Use your own words in your explanation</u>.

This is the story of that big, red double-decker bus. This isn't a children's story, and if you try reading it to children, they'll soon lose interest in the increasingly petty details of our daily life. In one early letter to my parents, I wrote: 'We had yet another meeting yesterday to sort out grievances.' This latest inquest had been into who'd drunk someone's orange juice from the fridge. The devastated owner knew some had been 'stolen' because he'd marked the level of the liquid in the bottle.

In **Question 2(c)** candidates were required to select one example of language from the specified section of the text and explain how it suggested the attitude of the owner of the orange juice. A significant number of candidates did not follow these instructions but instead offered a very general response with no focus on the writer's language and no language choice selected. Where a paraphrased version of a language choice was offered, it was occasionally possible to credit an explanation if they lifted a word such as 'petty', but they often lacked any focus on any specific words used by the writer and therefore could not be credited at all. The most effective responses offered a concise quotation then considered how the writer was able to convey the attitude of the owner of the orange juice. The most popular example was 'The devastated owner knew some had been 'stolen' and many responses explored the overly dramatic reaction suggested in 'devastated' recognising that the owner was acting as if heartbroken, as well as the use of 'stolen' suggesting that a trivial annoyance was being viewed as a serious crime. These responses often cited the immaturity of the orange juice owner.

Some responses, however, tried to explain 'devasted' with less powerful words such as 'sad' or 'upset' thus limiting the opportunities to tackle the exaggerated language effectively. Some responses explored 'this latest inquest into who'd drunk someone's orange juice' focusing on the phrase 'latest inquest' as suggesting that it was a regular occurrence which merited a formal investigation like a serious crime thus emphasising the owner's possessiveness and overblown sensitivity.

Other candidates focused on 'he'd marked the level of liquid in the bottle' and were able to explain the calculated trapping of the 'thief' revealing the stinginess and possessiveness of the orange juice owner. Some candidates failed to focus on the question selecting choices such as This is the story of that big, red double-decker bus', or 'This isn't a children's story' which were not related to the attitude of the orange juice owner. Only one example could be rewarded so offering more was a waste of valuable examination time that could have been spent on **Question 2(d)** where more developed responses are expected. A number of responses simply paraphrased the whole paragraph without selecting a language choice at all.

(d) **Reread paragraphs 5 and 6.**

- **Paragraph 5 begins 'Our world ...' and describes the inside of the bus.**
- **Paragraph 6 begins 'That bus ...' and describes where, when and how the bus travelled.**

Explain how the writer uses language to convey meaning and to create effect in these paragraphs. Choose <u>three</u> examples of words or phrases from <u>each</u> paragraph to support your answer. Your choices should include the use of imagery.

The most effective responses to **Question 2(d)** offered clear analysis of three appropriate language choices from each of the two paragraphs indicated in the question. The most effective approach was to consider the meanings of carefully chosen phrases in the context of the text and then consider connotations, effects and impacts created by the writer's language choices. These responses often offered a clear overview of the writer's intentions in each paragraph. Less effective responses were sometimes written in note form and offered less developed analysis or repeated the same ideas about effects, often making generalised assertions rather than considering specific words more closely. Middle range responses were usually more effective when explaining meanings but struggled to explore the effects fully, and the least effective responses tended to offer

© 2025

quotations (sometimes unselectively) but struggled to find anything relevant to say about them. Some candidates chose three language choices in total rather than three from each paragraph as clearly stated in the question leading to some underdeveloped responses. Some candidates chose inappropriate language choices – sometimes plain language offering limited opportunities.

The most effective responses selected phrases but also considered the individual words within them suggesting how they worked within the context of the whole language choice. Rather than identifying literary devices they engaged fully with the language, considering its impact and connotations fully and linking each choice to a coherent and developed consideration of the paragraph. In paragraph 5 many were able to explore their individual choices within the context of the unusual and cramped conditions on the bus. They considered the importance of the bus to the occupants as a temporary home through 'our world was inside that double-decker bus', often linking it to the overcrowded conditions suggested by 'an overloaded display case of rattling glass and metal on wheels', many also using this language choice to explore the poor condition of the bus, as well as the idea that the occupants were also on 'display' and attracting attention wherever they went. Many candidates also chose to explore Vic's formidable and unbelievable skills as a carpenter suggested by 'magicking snug bunk beds', or the phrase 'ingenious storage seats' citing his use of limited space to create functional and effective furniture. This was often linked to 'no sliver of space escaped' as further demonstrating that every inch of space on the bus had been utilised efficiently by Vic's designs. These choices could all be linked to an overview effectively yet considered independently offering candidates a great deal of scope for precise and developed analysis of the language used in paragraph 6.

In paragraph 6 many responses were able to appreciate the challenges posed by driving the enormous bus on such a long journey across varying and challenging terrains. Many candidates opted to discuss 'traversed deserts and climbed mountains' as evidence of the variation in landscapes and the adventurous nature of the journey. Another popular choice was 'rumbling across continents' as evidence of the great distances covered by the bus and its sturdy reliability suggested in the 'rumbling' of the engine. This was often linked closely to 'threatened to halt its determined march' and the impression of a bus that refuses to give up, no matter what, with military endurance and formidable strength. Many candidates focused on difficulties of driving the bus suggested in 'heavy, awkward vehicle' and linked this to 'less manoeuvrable than a whale in quicksand' implying that the bus is out of its natural environment and extremely difficult to control in some terrains. Many also appreciated the humour suggested in the image.

Where effects were less effectively explained, it tended to be due to repeating the same idea for all three language choices in the paragraph. In paragraph 5 this tended to be through repeating the idea of the lack of space and in paragraph 13 it tended to be repeating the idea of the bus being hard to control/drive. There were also candidates who used the language of the text repeatedly in their explanations: most commonly 'world', 'rattling glass and metal on wheels', 'stared and gazed', 'squeezing', 'magic, 'secretly', 'continents', 'lumps, bumps and obstacles', 'determined', 'march', 'a whale in quicksand' and 'fateful last day'.

There some evidence of misreading in the two paragraphs specified in the question: some candidates interpreted 'gutted' too literally and focused on the bus being permanently harmed or completely destroyed by a deliberate violent action; other candidates misread 'overloaded display case of rattling glass' and thought that the bus was full of glass items which were not properly secured; and a number of candidates misread 'sliver' as 'silver' which affected the candidate's interpretation of the whole phrase as they focused on how precious the space was. Some less effective responses also included very long quotations with general explanations rather than engaging closely with specific words. Very rarely were quotations included at all with a brief description of the paragraphs offered instead. Such responses did not address the question at all. In a very small number of responses, the wrong paragraphs were used so no choices could be credited, or candidates moved through every paragraph in the text, wasting valuable time: candidates are advised to look at the section of text supplied in the question as well as the paragraph number to ensure that they select language choices from the correct paragraphs. They should also be aware of where paragraphs end, especially where there is a page break.

Candidates are reminded that it is the quality of their language analysis which can be credited. Listing of literary devices or the selection of plain language from the text is unlikely to lead to an effective response.

Advice to candidates on Question 2:

© 2025

- select three precise and accurate language choices from both specified paragraphs
- make sure explanations of meanings make sense within the context of the text – avoid literal meanings unless this is the case
- avoid very general explanations such as 'this helps the reader imagine it' or 'this creates a strong visual image for the reader' or 'this is an example of powerful language and imagery'
- try to engage with the language at word level by considering meaning in context then connotations / associations of words and why the writer has selected them
- always start with the contextualised meaning then move on to the effect created by the language in terms of how it helps the reader's understanding of the situation, characters, atmosphere, for example
- avoid repeating the same explanations of effects for each language choice: try to be more specific about analysing at word-level.

© 2025

Question 3

You are Vic. Shortly after the whole trip ends, you write a letter to a friend telling them about your experience.

In the letter you should:

- **describe the preparations for the trip and how you came to be involved**
- **outline the different challenges faced once the journey began and how these were resolved**
- **explain what you think everyone learned through the experience and looking back what you all should have done differently and why.**

Write the words of the letter.

Base your letter on what you have read in Text C, but be careful to use your own words. Address each of the three bullets.

Write about 250 to 350 words.

This question required candidates to write a letter from Vic (the skilled carpenter) to a friend describing and reflecting on his experience of the two-year adventure on the double-decker bus. The three bullet points in the question offered guidance to candidates to help them identify relevant ideas for their letter. The first and second bullets required candidates to retrieve relevant information from the text and adapt it to fit the requirements of a letter written from Vic's perspective. The third bullet required candidates to infer what Vic feels he has learned from the experience as well as considering what he wishes they had done differently.

The majority of candidates were able to show general understanding of the text addressing the task by using some of the main ideas in the text to support the response. Many of the responses were also able to develop the ideas by writing in a credible style for a letter to a friend, evaluating the ideas in the text and adapting them accordingly. Where candidates had followed the bullets carefully, they were often able to develop explicit and implicit ideas effectively to write a lively and amusing letter which captured the absurdity of the journey as well as the highs and lows experienced by the occupants of the bus. Most candidates addressed the bullet points in chronological order using them to structure the response coherently. Less effective responses tended to be unselective or closely paraphrase the text without adapting the style therefore offering a rather plain narrative account of the bus journey with little sense of Vic's perspective of the events. The least effective responses used the ideas in the text thinly, often offering very general ideas about in response to the first bullet mostly connected to acquiring the bus, listing some of the more obvious challenges for the second bullet, and offering an undeveloped response to the third bullet mostly citing the need to take more money for fuel without offering any further details or trying to develop the ideas in any way. Some less effective responses only addressed one or two of the bullets.

The first bullet of the question invited candidates to describe the preparations for the journey and how Vic came to be involved. This gave candidates opportunities to look at the acquisition of the bus by Roger, the advert he placed to travel around the world, the need to refurbish the interior requiring Vic's carpentry skills and his subsequent alterations. The best responses considered the forming of the group through an advert, the old age and impractical height of the bus, the decision to paint it red, and the sterling work Vic did in a confined space to make it comfortable for the group. Less effective responses usually found a narrow range of ideas in this bullet and did not look for ways to develop the ideas. There was little evidence of misreading in response to the first bullet, although a large number of candidates thought Roger and Vic were old friends ignoring the reference to 'Roger's new friend, Vic' in the text. Some candidates spent time creating a back story for Vic and Roger which had no connection to the ideas in the text at all.

The second bullet offered many opportunities to identify the challenges of life on the bus and how the group resolved them. The best responses selected carefully and were able to remodel the material. They were able to look at the implication of silly arguments suggested by the 'theft' of the orange juice and link it to the limited space on board creating tension. They were also able to develop the suggestion of financial woes by referring to the boredom or physical difficulty of the 'manual work' they were forced to do. They also cited a feeling of isolation or home sickness created by the lack of ways to communicate with family and friends at home in an era before the creation of digital communication. Many candidates also considered the problems caused by the bus itself, citing its age creating mechanical issues, as well as its size making it very tricky to drive in some landscapes and conditions.

© 2025

When responding to the third bullet, the most effective responses clearly organised the material into the positives of the adventurous journey and the shared experiences they had but weighing it against the foolishness of their lack of preparation due to their relative naivety. These responses picked out a range of clues from throughout the text to develop appropriate ideas, reflecting on the experience of different cultures, and their personal growth as they learnt to work together to overcome adversities. The best responses took a reflective approach and considered their lack of preparation in terms of finances, as well as the impracticality of the vehicle for the nature of the journey undertaken and their stupidity in attempting to float it across a river on a raft. Less effective responses tended to lack range in response to this bullet often simply referring to their lack of money and some misread the ending completely and thought that the bus made it safely across to continue to journey. Some responses did not address this bullet at all.

Many candidates seemed comfortable and familiar with the format of an informal letter to a friend with the best responses adopting an appropriately lively and entertaining tone and register. Middle-range responses tended to be written as a rather plain narrative relying heavily on the sequencing of the original text and sometimes were not written as Vic. The language used was mostly appropriate and some more effective responses were genuinely convincing. In less effective responses the language and voice were very plain but rarely inappropriate for the genre, although such pieces tended to lack a sense of purpose or audience. Some less effective responses wrote a completely fictional piece about a journey on a bus with other friends or family rather than using the text.

Generally, accuracy was effective with some skilfully written responses. Others struggled to maintain fluency resulting in some awkward expression caused by errors in grammar and punctuation. Candidates are advised to check through their work carefully to correct errors where possible. There were few instances of wholesale lifting from the passage, but some less effective responses were over-reliant on lifted phrases and sentences throughout the response.

Advice to candidates on Question 3:

- read Text C carefully, more than once, to ensure sound understanding
- do not refer to ideas in Texts B and C
- pay careful attention to the written style adopted – for example, the register required for the purpose and audience of the task
- do not invent information and material that is not clearly linked to the details and events in the text
- give equal attention to all three bullet points
- briefly plan your response to ensure that you are selecting ideas relevant to all three bullets
- remember to look for ideas throughout the text for the third bullet
- avoid copying from the text: use your own words as far as possible
- remember to use ideas and details from the text but to adapt and develop them appropriately to create a convincing voice and new perspective
- leave some time to check through your response
- do not waste time counting the words: the suggested word length is a guide, not a limit.

© 2025

FIRST LANGUAGE ENGLISH

Paper 0500/13
Reading

Key messages

Candidates did well when they:

- attempted all parts of all three questions, working through the question paper in the order set
- read the introductions to the texts carefully
- paid attention to the guidance offered to help them focus their responses – for example, writing no more than 120 words in **1(f)** the selective summary task and using three precise examples from each of the specified paragraphs in **2(d)**
- focused on the particular evidence of skills and understanding they needed to demonstrate for each type of question
- avoided unselective copying and/or lifting from the text
- did not include unrelated opinion/generic comments and/or invent material not tethered to the text used their own words where required
- planned the ideas to be used and the route through extended responses before writing, selecting only relevant material for each question
- checked and edited their responses to correct any careless errors, incomplete ideas or unclear points.

General comments

Candidates' responses indicated that they were familiar with the format of the Reading paper and the demands of each of the three questions had largely been understood. There were a few instances where whole tasks had not been attempted. On occasion, responses to part questions were incomplete or missing and/or responses were uneven, which limited the possibility of scoring higher marks. Candidates seemed to find all three texts accessible, and the majority demonstrated engagement through their responses. There were many excellent responses to all three questions, though candidates do need to ensure that they do not spend too long on one question at the expense of another. Occasionally a failure to follow the rubric limited opportunities to demonstrate understanding. This was most common in **Question 2(c)** where a candidate did not select a clear example or tried to discuss several examples from the text provided, or in **Question 2(d)** where some candidates selected long chunks of the language in the specified paragraphs rather than selecting words and phrases or discussed fewer than six language choices. A number of candidates needed to plan more carefully to include a full range of relevant ideas in their responses to **Question 3**. Candidates are also reminded that the word guidance offered in **Question 2(d)** and **Question 3** is not a requirement of the task in itself and there is no need for them to spend time counting every word – the guidance is offered to help candidates organise their time efficiently and offer sufficient evidence of their skills and understanding to target higher levels.

In **Question 1**, the most effective approach taken by candidates was to work through the tasks in the order presented paying careful attention to the number of marks allocated and the space provided for their responses as helpful indicators of how detailed their responses needed to be. They did not add further unnecessary and/or contradictory material but focused on answering each question as set. Most candidates were careful to follow the line or paragraph references in the questions to help them to move down **Text A** in order and the most effective had reworked material where appropriate to show secure understanding of implicit as well as explicit ideas. Less effective responses to **Question 1** tended to lack focus on the question. At times candidates used the language of the text where they had been asked to use own words – for example, in **Question 1(b)(i)** by repeating the word 'interviews' instead of explaining it, or in **Question 1(b)(ii)** where they copied 'stages'. In **Question 1(f)** a few candidates relied heavily on the language of **Text B** and/or copied out lines of text, limiting the available evidence of their own skills and understanding as a result.

© 2025

In **Question 2** candidates were required to select and/or explain carefully selected words or phrases from the text. More effective responses were able to identify choices clearly, consider meanings in context and in **2(d)** suggest the effects of the powerful language identified, often demonstrating further their understanding of the writer's purpose in an overview. More effective responses were careful to refer back to **Text C** to locate relevant choices and consider their precise meaning in context. In **Question 2(a)** those who copied out longer sections from the text rather than identifying the exact word/phrase that matched the sense of just the underlined word/phrase in the question were not providing secure evidence of their understanding. Likewise, opportunities for marks were missed by a few candidates in **Question 2(c),** who attempted to offer a generalised overview without clearly identifying one example from the text in their explanation. Less effective responses did not always choose appropriate language to discuss and/or in **2(d)** only selected three examples in total.

In **Question 3** the majority of responses attempted to address all three bullets in the question, although some candidates found it challenging to develop ideas for the third one. Most candidates wrote as Ben with the best responses developing a convincing voice and an appropriate tone for his journal entry demonstrating understanding of the reflective element of the task. Better responses used the ideas and details in the text selectively to work through the bullets logically. They were able to explain how Jojo felt about his interview experience and why he did not accept the job, including the changes Ben will make to his own behaviour and the buildings, as well as outlining his future plans for developing the business to persuade Jojo to continue working with him by selecting a range of appropriate ideas and details from the text to develop. Mid-range responses often missed opportunities as a consequence of uneven focus on the bullets of the question, a lack of planning beforehand and/or offering a narrow range of ideas from the text overall. Less effective responses either offered only brief reference to the passage and/or included evidence of misreading or sometimes invented material that was not tethered to the text. Some responses copied unselectively thus providing little evidence of understanding.

Paper 1 is primarily an assessment of Reading, however 15 of the 80 marks available are for Writing – 5 marks in **Question 1(f)** and 10 marks in **Question 3**. In these questions, candidates need to pay attention to the quality of their writing to maximise their achievement. Candidates are advised to plan and review their responses to avoid inconsistencies of style, awkward expression and to correct errors that may impede communication.

Comments on specific questions

Question 1 Comprehension and summary task

Questions 1(a)–(e)

In response to **Text A: Technology in the job application process**, candidates were asked to response a series of short answer questions. More effective responses paid careful attention to the command words in the instructions as well as the number of marks allocated to individual questions. These responses demonstrated sound understanding by selecting appropriate details and evidence from the text in concise, focused responses. Less effective responses often repeated the language of the text where own words were required and/or relied on copying longer sections of text with little or no modification to address the question as set. Some candidates offered several possible answers thus using time inefficiently and diluting evidence of understanding.

(a) **Give two different types of technology being used by companies to help them to manage applications, according to the text.**

In **Question 1(a)**, most candidates recognised that chatbots or automated applicant-tracking were different types of technology being used by companies to help them to manage applications; very few candidates did not gain the mark for this question. A few read less carefully and offered incorrect answers such as 'Artificial Intelligence (AI)' or 'pre-recorded interviews'.

(b) **Using your own words, explain what the text means by:**

(i) **'schedule interviews' (line 3)**

(ii) **'early stages' (line 4).**

© 2025

In **Question 1(b)** candidates were instructed to use their own words to evidence understanding of the phrases in the question. Where responses failed to achieve both of the marks available for each phrase it was usually due to the candidate's partial use of the words from the text. For example, in **Question 1(b)(i)** a number of candidates were able to explain 'schedule' but then used the word 'interviews', thus not fully addressing the task. More effective responses were able to explain the full phrase as used in the context of the text by demonstrating understanding of arranging a time to question a candidate or talking with someone about a possible job. Similarly, in **Question 1(b)(ii)**, some candidates effectively explained the meaning of 'early', though repeated 'stages' in their explanation, rather than suggesting that technology is in its initial developments or first phases.

(c) Reread paragraph 2 ('Though … expressions.').

Give <u>two</u> mistakes that should be avoided by an applicant during an automated interview.

To achieve both marks for this question candidates were required to offer two mistakes that should be avoided by an applicant during an automated interview. Most candidates were able to effectively identify dressing inappropriately and assuming they can re-record responses. Where candidates failed to gain both marks, it was usually because they were not clear about the facial expressions and offered it without explanation, included vague comments about dressing as you are or referred to asking common interview questions that was a **Question 1(d)(i)** response.

(d) Reread paragraphs 3 and 4 ('In pre-recorded … right person.').

(i) Identify <u>two</u> advantages for the applicant of the use of technology in the job application process.

(ii) Explain the challenges the internet has created for companies looking to hire people for jobs.

To answer **Question 1(d)(i)** candidates needed to identify two pieces of evidence from paragraphs 3 and 4 to demonstrate the advantages for the applicant of the use of technology in the job application process. Correct responses focused on predictability or that you can prepare for interview questions, you can apply online, or you can apply for more jobs. Most candidates found this question relatively straightforward and were able to gain both marks. In **Question 1(d)(ii)** many candidates were effective in gaining two of the three marks available by referring to there being too many applicants to deal with and that it is difficult to identify the right person or the right person might not stand out. Some candidates did not get the second or third mark because they only offered two explanations perhaps missing the fact that this was a 3-mark question and therefore required three distinct points to be made.

(e) Reread paragraph 5 ('Perhaps … application.').

<u>Using your own words</u>, explain the qualities that applicants need to demonstrate to be successful when applying in a competitive job market.

In **Question 1(e)** the most effective explanations reworked the relevant information only, using their own words as appropriate to tease out implicit ideas, identifying from the four available three distinct reasons in their explanation of the qualities that applicants need to demonstrate to be successful when applying in a competitive job market. Many candidates identified keeping their social media appropriate and being personable by reaching out to the hiring manager, as well as being strategic. Less effective responses tended to copy directly from the text without explanation or mentioned only partial details, such as referring to either font or colour without addressing both elements. Additionally, some candidates attempted to reword being focused and strategic, though in doing so, occasionally altered the meaning, which led to misinterpretation.

© 2025

(f) According to Text B, what are the signs that you may need to find a new job?

You must use continuous writing (not note form) and use your own words as far as possible. Your summary should not be more than 120 words.

Your summary should not be more than 120 words.

Question 1(f) was based on **Text B: Signs it's time to make a bold career change!** and required candidates to select relevant ideas from the text and organise them into a focused summary which addressed the task. Most candidates were able to demonstrate at least a general understanding of the text and offer some relevant ideas to demonstrate understanding of the signs that you may need to find a new job.

Where responses were most effective, candidates had made a consistent attempt to plan, organise and use their own words to convey a wide range of relevant ideas efficiently and accurately to their reader. Overview of the material was evidenced in some of the most effective responses where relevant ideas had been carefully selected from different parts of the text and reordered where necessary to aid fluency and achieve logical progression. Responses in the middle range tended to consider a more limited range of ideas, the most common being how work can negatively affect your health, being stuck in the same job for years, being over-qualified for the job and no opportunities for growth. These responses often missed the more subtle points about boredom, no longer loving what you do, low morale in the company as a whole, or the job has become impractical. There was also a tendency to offer being 'underpaid' as a reason to find a new job without including the sense of it being the result of not earning enough to live on or not being able to exist on their current salary as suggested in the text. Some less effective responses repeated the same ideas or included unnecessary examples such as registering for mynewjob.com, information about recruiters and the number of hours the average person spends at work over a lifetime.

Length was often an indicator of the level of the response with some less effective responses being too short due to a limited number of points being offered and other responses very long and wordy due to the inclusion of unnecessary information and/or personal comments. The most effective responses tended to adhere to the advised length through adopting a concise and focused approach to the task. In most responses there was an attempt to use own words although some candidates did rely on lifting phrases from the text and wrote from the perspective of an employee rather than using an informative style. This included some responses where there was evidence of selection and a range of ideas but also a failure to use own words which is an important aspect of summary writing. Examples of the most commonly lifted phrases were 'high-pressure roles can negatively affect physical or mental health', 'regularly daydreaming about storming into your manager's office to resign', 'If morale is low throughout the company', 'a position that doesn't offer growth opportunities and training', 'If you're continually passed over for promotion' and 'If you struggle to live on your current salary'. Some responses copied indiscriminately without any effort to select relevant ideas or included too much introductory information.

The majority of candidates showed at least some awareness of the need to include only those ideas relevant to the focus of the question, though not all were able to select ideas efficiently to navigate around more obviously redundant material. For example, references in partially effective responses to 'high-pressure roles can negatively affect physical or mental health' were more succinctly covered by umbrella phrases such as 'burnout' or 'negatively affecting your health' in most effective responses. Where candidates had simply tried to paraphrase the text rather than select only those ideas necessary to answer the question, their responses often contained superfluous detail compromising both evidence of Reading, through the use of excess or indiscriminate selection, and Writing, resulting in a lack of concision. More effective responses were not dependant on the structure or language of **Text B** to communicate their ideas and were consequently able to offer more concise explanations.

Advice to candidates on Question 1(f):

- read the task instructions to identify the focus of the summary task then read **Text B** again to identify just the relevant ideas for use in your response
- plan the response using brief notes to ensure a wide range of ideas from the text is selected
- discard any details which do not address the question

© 2025

- do not add details, examples or comment to the content of the passage
- organise the ideas, synthesising and grouping them where relevant, to ensure that your response is coherent
- check whether there are repeated ideas which could be covered by one 'umbrella' point
- write your response using your plan rather than the text to avoid lifting
- write informatively and accurately in your own words, avoiding errors which affect meaning
- explain ideas in a way that someone who had not read the text themselves would understand
- check back to ensure that you have included all the ideas you planned to
- try to keep to the guidance to 'write no more than 120 words'.

Question 2

(a) **Identify a word or phrase from the text which suggests the same idea as the words underlined:**

(i) **Jojo nearly crashed into the lorry.**

(ii) **Jojo hoped that when he visited The Peacock for his interview that day the people he might be working with if he got the job would like him.**

(iii) **Jojo was slightly jealous of how well Ben got on with guests.**

(iv) **The table covering Jojo provided for Ben and the guests to use at lunchtime was immaculately clean.**

The most effective responses to **Question 2(a)** focused on only the underlined word or phrase, precisely located the correct version in the text and gave it as the answer. Other responses copied the whole sentence from the question replacing the underlined phrase with the correct words from the text. This was an acceptable approach but unnecessary as it wasted examination time. Responses that used the text more widely than in the equivalent phrase/sentence could not be rewarded even where the correct word or phrase was included incidentally. For example, some candidates missed opportunities for marks by offering responses that added in extra words from the text that went beyond the meaning of the underlined words, such as 'I almost collided my bicycle with the large lorry' in **2(a)(i)**, 'I needed to impress my potential new colleagues.' in **2(a)(ii)** or 'I admit I envied a little' in **2(a)(iv)**. Very occasionally, candidates had misread the instruction to 'identify a word or phrase from the text' and tried to explain meaning in their own words or identified an incorrect word - most notably offering 'sanitised' for 'pristine' in **2(a)(iv)**. Other less effective responses only offered part of the phrase by omitting 'potential' in **2(a)(ii)** or 'a little' in **2(a)(iii).**

(b) **Using your own words, explain what the writer means by each of the words underlined:**

I waited anxiously for it to finish its delivery of frozen foodstuffs. Being behind schedule today wasn't an option. Brown boxes destined for some awful fast-food restaurant were finally off-loaded and I resumed my commute.

(i) **anxiously**

(ii) **schedule**

(iii) **resumed**

In **Question 2(b)**, some responses offered just one carefully chosen word or phrase as their answer, whilst others offered evidence of understanding through longer explanations. Either approach could be creditworthy, though candidates should be careful not to dilute evidence of understanding by offering various suggestions and extra guesses of different meanings that are contradictory and/or not in line with the text. Responses that included other potential meanings and guesses that were not correct in context could not be credited. A few candidates were unsure of the meaning of 'anxiously' – for example, suggesting that it meant excited or impatient. Effective responses had considered the precise meaning of each of the underlined words as they were used in the text. For example, the word 'anxiously' in **2b(i)** refers to worriedly or nervously. Many candidates were able to explain 'schedule' in **2b(ii)** as the time things are meant to happen, the planned time or the timetable. In **2b(iii)**, 'resumed' was usually effectively explained as 'carried on

© 2025

with', 'continued' or 'restarted'. The most effective responses to **Question 2(b)** thought carefully about meanings in context and offered viable answers which would accurately replace the words in the text without altering the meaning.

(c) Use <u>one</u> example from the text below to explain how the writer suggests Jojo's feelings about conditions in his workplace.

<u>Use your own words in your explanation</u>.

By dawn, I'd arrived, parked against a disused outbuilding and begun the hazardous operation of re-starting the ancient, moody generator. Still coughing from the smoke, I entered the kitchen, loudly listing the merits of solar power and onsite staff accommodation, then turned my attention to the wooden worktable peppered with curling skins of yellowing paint, fallen from the ceiling.

In **Question 2(c)** candidates were required to select one example of language from the specified section of the text and explain how it suggested Jojo's feelings about conditions in his workplace. Some underlined their chosen example in the text, whilst others copied it out as a subheading for their explanation – either approach was acceptable. A few of the least effective responses attempted unwisely to rewrite the whole extract in their own words and/or discuss it in very general terms only or offered phrases such as 'By dawn. I'd arrived' which did not address the requirements of the question which related to Jojo's feelings about conditions in the workplace.

The most effective responses offered a concise quotation then considered what the writer suggested about Jojo's feelings through the language used. The most popular example was 'hazardous operation of re-starting the ancient, moody generator' and many responses explored how it was unreasonable for Jojo to expect this every day and how dangerous the task was due to the old and unreliable equipment. Other responses considered the example of 'peppered with curling skins of yellowing paint fallen from the ceiling' and were able to explore ideas about how unhygienic the workplace was as a result of the unattractive flakes of paint everywhere which Jojo had come to expect each morning as part of his routine to clean up. Some candidates were able to offer convincing explanations of 'loudly listing the merits' and show understanding of Jojo talking about the positives at a high volume and presenting the arguments for onsite accommodation and solar power as he had had enough of the commute and the generator. Some less effective responses tried to do too much, selecting several examples and therefore only offering slight explanations of each. Only one example could be rewarded so offering more was a waste of valuable examination time that could have been spent on **Question 2(d)** where more developed responses are expected.

(d) Reread paragraphs 9 and 11.

- **Paragraph 9 begins 'The ancestral font …' and is about The Peacock restaurant.**
- **Paragraph 11 begins 'Propelled …' and is about Party Planet.**

Explain how the writer uses language to convey meaning and to create effect in these paragraphs. Choose <u>three</u> examples of words or phrases from <u>each</u> paragraph to support your answer. Your choices should include the use of imagery.

The most effective responses to **Question 2(d)** offered clear analysis of three appropriate language choices from each of the two paragraphs indicated in the question. The most effective approach was to consider the meanings of carefully chosen individual words, phrases or images in the context of the text and then consider their effects in terms of connotations and the atmosphere or attitudes created by the writer's language choices. These responses often offered a clear overview of the writer's intentions in each paragraph. Effective responses set out to narrow down their options and decide which six of those relevant selections that they felt best able to explain, rather than attempting to deal with all the potential choices or simply defining literary devices in each half they came across. Where candidates had considered all of the key words in slightly longer choices, they were able to avoid those more generalised comments of less effective responses and offer more secure evidence of understanding. Responses evidencing understanding at level 5 frequently showed imagination and precision when discussing a judicious range of language choices and offered answers that were balanced across both parts of the question.

Less effective responses tended to offer less developed analysis or repeated the same ideas about effects, most notably that it was impressive in The Peacock restaurant in paragraph 9 or that it was

© 2025

childish in Party Planet in paragraph 11, often making rather generalised assertions rather than considering specific words more closely. Middle range responses were usually more effective when explaining meanings but struggled to explore the effects fully, and the least effective responses tended to offer quotations, sometimes rather unselectively, and struggled to find anything relevant to say about them. Some candidates chose three language choices in total rather than three from each paragraph as clearly stated in the question resulting in some underdeveloped responses. A number of candidates chose inappropriate language choices – sometimes plain language, such as 'To avoid doubt, I informed Artur of my own credentials' or 'I looked forward to working with him,' offering limited opportunities for developed discussion.

In paragraph 9, many were able to explore their individual choices within the context of The Peacock restaurant as a formal dining place that was past its former glory. They considered the intricate, old fashioned lettering style of the 'ancestral font of the glass protected menu' that was displayed as if it was valuable. Many focused on how 'every letter curled elegantly, imitating the showy tail-feathers of the fancy fowl itself' and how the text was meant to represent a peacock's feathers as it was very self-conscious and concerned to impress. Others focused on 'immense gold picture frames displaying darkened portraits of important-looking people' where the descriptive language suggests how ostentatious, oversized and old-fashioned the pictures were, although it was not clear who the people were. These choices could all be linked to an overview, yet considered independently, offering candidates a great deal of scope for precise and developed analysis of the language used in paragraph 9.

In paragraph 11, many responses were able to appreciate how the newly established Party Planet was both unconvincing and disappointing and contrasted with the main restaurant. Many candidates opted to discuss 'plastic UFOs and cardboard space rockets' as unconvincing models made from cheap materials. Another popular choice was 'fashioned into undersized chairs and surprisingly low tables' creating a feeling that the furniture was unusually small and Jojo had not yet realised that it was designed for children. This was often linked closely to 'bank of microwaves and brown boxes' that serves as a reminder of the foodstuffs in brown boxes that were delivered earlier and gives the impression that this was the 'awful fast-food restaurant'. The numerous appliances suggest that it was dull and lacked creativity which contrasts with Jojo's earlier dream kitchen. Finally, many candidates selected 'propelled', suggesting that Jojo was pushed into another room as though he had no choice.

There were also candidates who used the language of the text repeatedly in their explanations: most commonly 'expensive'. 'elegant', 'fancy'. 'flair' and 'passion'. There was some confusion about the 'waterfalling faded-velvet curtains' with some candidates suggesting that they were new and impressive without capturing the sense of them now being jaded, which was similar to the portraits whose colours had also dimmed over time. Others managed to capture the idea of the aged chef who wasn't hurrying in 'Eventually, an elderly chef, Artur, escorted me', though few were able to effectively explore the notion that he was treating Jojo formally or as if he could not be trusted to go through on his own. Some less effective responses also included very long quotations with general explanations rather than engaging closely with specific words. On occasions where no quotations were included with a brief description of the paragraphs offered instead, these responses did not address the question at all. In a small number of responses, the wrong paragraphs were used so no choices could be credited: candidates are advised to look at the section of text supplied in the question as well as the paragraph number to ensure that they select language choices from the correct paragraphs.

Candidates are reminded that it is the quality of their language analysis which attracts marks. Listing of literary devices and/or the selection of plain language from the text is unlikely to lead to an effective response. Many candidates simply identified literary devices offering vague explanations such as 'it's an interesting metaphor' with no attempt to look at the words themselves. In this question candidates should focus carefully on words used in an interesting or unusual way: for example, rather than simply focusing on 'cartoons of friendly alien lifeforms' to explain the caricatures of smiling space life, adding the words 'adorned the walls' to the language choice allows a much more developed exploration through considering how the room was decorated which gave a ridiculous or childish appearance. It is this precision when selecting language choices to include carefully chosen words that will maximise candidates' opportunities for developed discussion.

© 2025

Advice to candidates on Question 2:

- make sure that any quotations you select from the text are precise: do not copy out lines or chunks of text, miss out key words or include only part of the choice
- in each part of **2(a)** make sure that your selection is clearly identified – remember you are looking for just a word or phrase from **Text C** to match precisely the sense of the only underlined words in the question
- in **2(b)** be careful that your explanation is consistent with how the word is used in context (if unsure, try substituting your answer in the text to check it)
- in **2(c)** try to say three separate things about your one chosen example
- in **2(d)**, choose 3 examples from each of the two specified paragraphs (6 choices in total)
- only offer an overview in **2(d)** if you have spotted that there is a relevant connection between your chosen choices in a paragraph
- when you are unsure how to explain the effect in **2(d)**, start by explaining the precise meaning in context of the word(s) in the choice and work from there
- when explaining how language is working avoid empty comments such as 'the writer helps us to visualise the scene'; you need to say how your chosen example does this to show your understanding
- when exploring images, consider the connotations and associations of the words within choices to help you to suggest the effect the writer might have wanted to create
- allow time to edit your responses – for example, to add in further detail and/or correct errors to help show you have read carefully and understood.

Question 3:

You are Ben. When Jojo returns that evening, you have an honest conversation about the events of the day and your plans for the business. You persuade Jojo to continue working with you as your new business partner.

In your journal entry you should:

- **explain what Jojo felt about his interview experience that afternoon and why he did not accept the job**
- **explain the changes you will make to your own behaviour and to the buildings to improve Jojo's work life**
- **explain the plans you have to develop the business and the different qualities and skills you and Jojo have to make it a success.**

Write your journal entry for the day.

Base your journal on what you have read in Text C, but be careful to use your own words. Address each of the three bullets.

Write about 250 to 350 words.

Question 3 required candidates to write Ben's journal entry reflecting on his conversation with Jojo about the events of the day and his plans for the business in response to **Text C: Jojo's interview**. The three bullet points in the question offered guidance to candidates to help them identify relevant ideas for their journal entry. The first and second bullets required candidates to retrieve relevant information from the text and develop the ideas to explain what Jojo felt about his interview experience and why he did not accept the job, and the changes that Ben would make to his own behaviour and to the buildings to improve Jojo's work life. The third bullet required candidates to infer what plans Ben may have to develop the business and the different qualities that he and Jojo have to make it a success using details and clues in the text to indicate possible ideas and support the inferences. A few candidates attempted to answer the question as Jojo, whilst others confused Ben's small hotel business in an old stone farmhouse with Party Planet and wrote as though they were the owner and had interviewed Jojo for the job there which limited the development they were able to offer as a result. A number of candidates missed the opportunity to develop a wide range of key ideas appropriately – for example, by writing a letter from Ben to Jojo or writing a dialogue instead of a journal entry.

The majority of candidates were able to show general understanding of the text addressing the task by using some of the main ideas in the text to support the response. Many of the responses were also able to develop the ideas by creating a convincing voice for Ben and interpreting the events from his perspective, evaluating

© 2025

the ideas and adapting them accordingly. Where candidates had followed the bullets carefully, they were often able to develop explicit and implicit ideas effectively to include convincing articulation of Ben's feelings about his plans for his business. Many dealt with his feelings about his relationship with Jojo very effectively through acknowledging the longevity of their friendship and his appreciation of Jojo's creativity and innovative flair as a chef. Less effective responses tended to track the text often paraphrasing it closely and therefore lacking development of Ben's perspective on the events. Some in the mid-range missed potentially useful details about Jojo's interview experience, such as the elderly chef, Artur, who left Jojo waiting on the doorstep or the manager, Paul, who appeared to actually like the place and thought it was a success. Where candidates had planned their response beforehand, they were often able to draw on relevant ideas and details from throughout the text to address this first bullet effectively and offer development about The Peacock restaurant and how it was old-fashioned and not as good as expected. They went on to explore how Jojo would have no opportunity to show his creativity in Party Planet that was designed only for children with its ready prepared food and its gimmicky frozen food. There was also some interesting development around the unprofessional image created by the astronaut themed uniform.

In mid-range responses, ideas for bullet two were often only touched on through recounting details of replacing the generator, redecorating the house and modernising the kitchen, whereas more secure responses were able to offer development by explaining how the disused outbuilding could be renovated to create staff accommodation on site so Jojo would no longer have to get up so early to travel to work. Candidates responding to the text and task more carefully were able to pick up on suggestions that Ben felt disappointed that Jojo did not tell him about the interview and planned to consider Jojo's feelings in future as they went to school together and had worked together for years. They also described how Ben planned to show more respect to Jojo by using the title he preferred. Some less effective responses simply repeated ideas from the text about the buildings with very little attempt to explain Ben's thoughts and feelings about these changes, such as how replacing the unreliable, dangerous generator for solar power would be an advantage.

When responding to bullet 3 the most effective responses focused on the evidence in the text such as Ben's easy manner with the guests, providing great food due to Jojo's culinary skills and acquiring money from investors. The most effective responses used these ideas to develop considered suggestions of how they would offer guests a relaxing holiday with freshly cooked food and would be able to fund the changes with the possibility of employing extra staff. Other developments included ideas about the authenticity of the place as Ben had helped his father to run it, and the genuine cultural experience contrasted with The Peacock and Party Planet. They also picked up on subtle details such as Ben's hiking gear and developed the idea of the rural location to offer hiking to guests. Less effective responses included ambitions for the business which had no grounding in the text at all such as building a swimming pool, opening a cocktail bar or chains of restaurants around the world. These responses often added new material without any tethering to the ideas in the text. These included details about Ben and Jojo's relationship in school, or what they like to do in their free time.

Candidates are reminded that their response to **Question 3** needs to be relevant to the details of the text and task in hand in order to effectively evidence their Reading skills.

Candidates seemed comfortable and familiar with the format of a journal entry with most adopting an appropriately reflective tone. The less effective responses tended to be too narrative as they relied too heavily on the sequencing of the original text and did not offer reflections and interpretations to adapt the material to indicate what Ben would be likely to include in his journal. The language used was mostly appropriate and some more effective responses created a wholly convincing voice as Ben, capturing his annoyance with Jojo for not confiding in him about the interview but also his appreciation that he should be more respectful and present a more professional image. In less effective responses the language and voice were rather plain but rarely inappropriate for the character. Some responses were clearly and skilfully written, though others struggled to maintain fluency resulting in some awkward expression. Candidates are advised to check through their work carefully to correct errors that may affect meaning and/or fluency. There were a few instances of wholesale lifting from the passage, and some other candidates were over-reliant on lifted phrases and sentences. Some of the most commonly lifted phrases were descriptions of the kitchen in the text: 'the ancient, moody generator', 'my fantasy kitchen's gleaming stainless-steel surfaces and modern equipment' and the description of Party Planet: 'undersized chairs and surprisingly low tables', 'buttons and strings of small lights' and 'a bank of microwaves'. Candidates should be aware that use of own words is necessary both to show understanding of what they have read and also to access writing marks in the higher levels.

© 2025

Advice to candidates on Question 3:

- remember to base your response to **Question 3** on just the ideas and details you find in **Text C**
- pay attention to details of the task as set **–** for example, note the form of the response and the perspective/viewpoint you need to adopt
- decide on the voice and style you want to create and maintain that in your response
- give equal attention to each of the three bullet points to help you to identify a wide range of relevant ideas you can use in your response
- plan a route through your response beforehand: you can choose not to follow the order of the bullet points and/or link ideas from each
- do not invent information and details beyond the scope of the passage; look for the clues and evidence in the text to help you make judgements about characters and situations
- do not copy directly from the text: use your own words as far as you can to express your ideas
- try to do more than just repeat details of what happened: developing ideas allows you to better show your understanding, for example by explaining feelings or commenting from the point of view of the character you are writing as
- leave some time to check through your response.

© 2025

FIRST LANGUAGE ENGLISH

Paper 0500/21
Directed Writing and Composition

Key messages

This paper was mainly assessed for writing, although there were fifteen marks available for reading in **Question 1**.

In order to achieve high marks, candidates were required to:

- use an appropriate form and style in both questions
- structure ideas and organise their writing effectively to engage the reader
- produce detailed and evocative descriptions and engaging, credible narratives
- understand how different audiences, purposes and genres should influence the style adopted
- construct varied sentences accurately, with a clear attempt to influence and interest the reader
- use precise and wide-ranging vocabulary, appropriate for the task.

General comments

Most candidates were familiar with the format of the examination paper and understood what was required for both the directed writing and composition questions. There were some very brief scripts, incomplete scripts and some in which copying of large sections of the reading texts made it difficult to assess the candidate's own abilities. Some lifting of phrases or sentences was fairly common; where this lifting of material was more extensive, marks were inevitably limited for both Reading and Writing. There were a small number of responses to **Question 1** which were entirely copied from the texts and a few scripts contained no **Question 1** response but nearly all candidates understood the instructions for the examination.

In ***Section B***, most candidates understood how the content of descriptive and narrative writing differs, although there were stories submitted for the descriptive writing tasks, especially **Question 3**, which made it difficult for examiners to award high marks for Content and Structure. **Question 5** was sometimes addressed in a more discursive than narrative style. Where this was seen, the response was usually a discussion of different measures of success or different kinds of successful careers and again this sometimes limited the Content and Structure mark available because the mark scheme directs examiners to reward characteristically narrative features.

Nearly all responses showed a clear understanding of and engagement with the topic of volunteering by school or college students in the reading texts in **Question 1**. Most responses attempted an appropriate style and format for an article with an audience of young people, with varying effectiveness. The register required here was interpreted in different ways with some responses more formal in style while others adopted a conversational tone which sometimes showed an awareness of what would engage a younger readership. Some misunderstood this less formal register, however, and slipped into a colloquial, less accurate style, using words such as 'kinda' and 'gonna', which was inappropriate in the context of an examination. The majority of candidates approached the topic using their own words rather than lifting or copying the words in the passages. More effective answers here also tended to structure responses independently, selecting and commenting on the details in the texts in a coherent response. Some opinion, based on ideas in the texts, was often given about how students would react to the instigation of a volunteering scheme in school, with only a minority simply reporting the facts and ideas in the texts with no comment on them. More effective responses tended to comment on specific ideas in the texts, such as the contradiction between compulsion and genuine volunteering. Sometimes, responses reflected the ideas in the texts in a more straightforward, practical way without addressing these wider ideas about the nature and value of volunteering in a school context. A common issue was that the scheme itself was not discussed and comments focused on volunteering without reference to what was being proposed. There was also some misreading of the scheme with candidates suggesting that, for example, the school should not compel students to give up their

© 2025

evenings and weekends when Text A outlined how it would operate within the school timetable. More effective evaluation tended to probe some ideas in the texts and examine carefully the implications of the scheme on different groups, rather than record or summarise what was in both reading texts.

Less effective responses tended to repeat the ideas in the texts, rather than selecting points and commenting on them. Some salient ideas in the texts were side-stepped rather than examined. For example, many candidates suggested that the scheme should be optional rather than compulsory but did not really justify this to show an understanding of the inevitable tension between freely giving up one's time and being made to do so. The details of the scheme were sometimes not well-understood at this level. Sometimes an assumption was made that teachers would resent having to supervise students in their volunteering work when Text A specifically precluded this. Most commonly, the implementation of the scheme to work within school hours was not completely understood. This meant that opportunities to examine and evaluate the implications of reducing teaching time or narrowing the range of academic or sporting experiences were missed.

Most made good use of the bullet points in the question to help structure the response and the ideas in the texts were scrutinised thoughtfully in more effective responses. Effective evaluation often addressed the inherent contradiction between true volunteering and compulsion, some outlining how this would diminish its real value and others acknowledging that, while not truly voluntary, its impact on the students and others would nonetheless be beneficial. The structure and organisation of ideas required in an article, often including some rhetorical sub-headings or clear lines of argument, were used effectively in better responses to persuade and argue a case. Less effective responses were often written in a flat, reporting tone with less consistent awareness of the audience and purpose of the task.

In ***Section B***, effective responses to the composition questions were characterised by a clear understanding of the genre selected, descriptive or narrative, and of the features of good writing in each.

Descriptive writing at the highest level was evocative and subtle and most responses gave a range of descriptive detail without resorting to narrative. There were many kinds of 'shelter' described for **Question 2** and Examiners accepted a very wide range of interpretations as long as the idea of 'sheltering' was essential to the response. Shelters for civilians during conflicts, animal shelters and huts found on walks to shelter from storms were amongst many interpretations which featured at all levels of achievement in these responses.

Less effective responses to this question were sometimes a little vague in depicting forest or other natural landscapes, often with the shelter only featuring tangentially after a much longer description of a journey. The purpose or nature of the shelter was sometimes unclear, giving rise to some confusion for the reader.

For the second descriptive writing question, there was a narrower range of interpretations of having to 'wait for a delivery' though some proved very effective in creating a sense of anticipation, nervousness or excitement. Whether the delivery awaited was a pizza, news through the post about examination results or news about the birth of a baby, the ability to evoke an atmosphere during the wait tended to determine how effective the description was.

Less effective responses here described relatively ordinary scenes and focused more on the narrator's actions while waiting, often unconnected to the idea of waiting and not really evoking an atmosphere of anticipation or a build-up of tension. While there were some effective responses which used the idea of waiting for a fast-food delivery, more thoughtful choices of what was to be delivered often elicited more effective responses.

Both narrative writing questions proved popular across the range of abilities. **Question 4** was a very common choice for candidates of all levels of achievement. Again, making a careful choice about what it was that 'could not be stopped' tended to help to determine how credible and well-constructed the narrative became. The sense of the inevitability of some action or consequence often helped to shape responses at the higher levels, including the narrator being unable to control an urge for revenge and the immense natural force of a tsunami.

This sense of jeopardy was often important in the creation of a believable response to this question.

Less effective responses tended to include the required phrase in a way which was less impactful or was incidental to an otherwise relatively straightforward narrative. While some at this level used credible scenarios, stories were sometimes mundane or lacked drama and pace.

© 2025

Question 5 elicited some, though fewer, highly engaging and well-constructed narratives, including some which used the idea of 'success' ironically in scenarios of bungled bank robberies or plans to steal examination papers. There was more of a tendency here to write discursively about the various journeys to success of sporting stars, often a discussion of different types of success or sometimes a simple set of exhortations to 'never give up' or to 'do your best'. These kinds of responses showed limited narrative shaping and content for Content and Structure, even when organised and paragraphed.

Comments on specific questions

Section A: Directed writing

Question 1

Write an article for your school or college magazine about whether or not a volunteer scheme for older students would be a good idea.

In your article you should:

- **evaluate the ideas, attitudes and opinions about volunteering in both texts**
- **consider the effects a compulsory volunteering scheme in school would have on students, teachers and the wider community.**

Base your article on what you have read in both texts, but be careful to use your own words. Address both of the bullet points.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer and up to 25 marks for the quality of your writing.

Marks for Reading

Examiners awarded high marks for Reading where there was some probing and evaluation of the ideas in the reading material, rather than a straightforward listing and reproduction of the points in the texts. The most effective responses adopted a consistently evaluative, critical stance and read effectively between the lines of the texts, drawing inferences and making judgements about the efficacy or otherwise of compelling students to volunteer as part of their school curriculum.

More effective responses here focused carefully on the ideas about the true nature of volunteering explored in Text B and whether it could be reconciled with the scheme proposed by the writer of Text A. The highest marks were awarded for those which handled the different, often conflicting views with confidence and perceptive evaluation.

The extent to which the implicit ideas and opinions contained in the texts were scrutinised tended to determine the level of candidates' achievement. These implicit ideas often involved the effect of compulsion on the concept of volunteering and a range of impacts on students and others, such as the implication that students could develop independence because teachers would not supervise their efforts or that teachers would struggle to cover the syllabus because of re-timetabling to accommodate volunteering into the school day. Many responses, for example, reflected Text A's implied criticism of younger generations for their selfish fixation on academic success but better responses used that implication to contest the idea that students could be compelled to be compassionate simply by including it in the curriculum. Similarly, the effect on teachers was sometimes explained fairly simply using the lack of supervision as giving teachers a well-earned rest from teaching – a valid use of implicit ideas – while others combined this notion with reduced teaching time to highlight the potentially detrimental effect on students' academic achievement and grades.

There was sometimes some subtle grasp of the slightly assertive tone of Text A with some candidates offering a critique of the head teacher's contradictory ideas that a scheme that did not work in the past could be made compulsory as a way to instil values of kindness and compassion in students. Some saw the scheme as a way for the school to raise its profile on the back of the unpaid labour of the students: as one wrote, 'Its made so that the head master can toot his own horn and look in the mirror and say he is a good person.'

© 2025

In contrast, the sarcastic tone of the parent at the end of Text B was almost always missed with many candidates taking literally the suggestion that students should be sent home for an afternoon to help their families with chores. Occasionally, however, there was a thoughtful discussion about the difference between helping friends and neighbours and disadvantaged strangers, with the true spirit of selfless volunteering only being shown in the latter case.

The safety and potential exploitation of students in their volunteer placements was considered thoughtfully by some candidates, inferred from the lack of supervision by teachers and the notion, based on careful reading, that the vetting of charities could not ensure they would be protected from other volunteers or their clients. A bad experience could mean that rather than instilling an 'ethos of service', the scheme could mean students never volunteered in the future.

In more effective responses, the inherent contradiction of compelling students to volunteer was properly considered alongside the implications of Text B's comment that the true impulse to help others which underpins volunteering would not necessarily be in evidence under the scheme. These arguments often made use of Text B's depiction of young people as self-conscious and ill-equipped to deal with vulnerable people, suggesting that compulsion would negate any benefit to all concerned as a result. While many candidates suggested an alternative, optional scheme would be better, these comments were not always rooted in a rationale based on ideas in the texts but rather as a personal reaction to the idea of volunteering. Where clear inferences were drawn from specific ideas in the texts, examiners could award higher marks for Reading.

The extent to which these ideas were addressed often determined whether a response could be given a Level 5 mark for Reading and in some cases a range of more evaluative comments merited a Level 6 mark. Responses awarded marks in Level 5 characteristically offered one or two more evaluative ideas, often about the impact of a lack of supervision on students' independence or the dangers to their academic success in the light of fewer teaching hours.

Where some comment or opinion was offered, mostly without specific reference to particular points in the texts but generally relevant to the ideas in them, marks in Level 4 were usually awarded. These comments were usually less selective and included some details which were factually accurate but not evaluative, such as the scheme would cause more stress for students who would be concerned about preparation for examinations or that an optional scheme would be more acceptable to students. More general, if valid, ideas were also typical at this level with many responses listing the benefits of volunteering (rather than the scheme) for students, teachers and charities. At this level, there was sometimes a lack of close reading resulting in assumptions that leisure time would be affected or that students would be too exhausted after a long day at school to volunteer.

Examiners usually awarded marks in Level 3 for Reading where there was some coverage of the texts, and some selection of ideas from them, but where these were listed or simply recorded, or there was some more obvious misreading. Often, there was a clear paraphrase of both texts but limited comment on them. Where there were some brief opinions, usually at the end of the response, they tended to be more generally about volunteering rather than the scheme and not strongly anchored in the specific ideas in the texts. Some assertions were based on misreading of how the scheme would work and who would be involved and responses at this level were usually brief.

Comments made at this level were given mostly in candidates' own words. Less effective responses tended to paraphrase and list ideas and many given marks in low Level 3 and below contained much copied material. In a few cases the entire response was copied from the texts. Where a mark of 6 was awarded, some firmer roots in the passages were needed, whereas 5 was generally given for thin or mainly lifted responses in which there was some insecure grasp of the ideas in the passage.

Marks for Writing

25 marks were available for style and register, the structure of the answer and the technical accuracy of spelling, punctuation and grammar.

Style and audience

Candidates needed to adopt an appropriate style and register for an engaging, informative article for an audience of young people. Most responses showed a clear understanding of the required, largely formal but engaging register, even where technical writing skills were ineffective, and this allowed for examiners to consider marks for Level 4 and above where a 'sometimes effective style' was required. Some attempted to

© 2025

adopt a style of mediation between conflicting interests, exhorting their fellow students to get involved with volunteering. Some high scoring responses used a more rhetorical style, presenting their arguments in a more combative way, especially when pouring scorn on the ideas underpinning the headteacher's scheme. These responses made their case effectively and with some impact.

In the middle range of marks, examiners could sometimes award marks for Writing in Level 4 even where more technical writing skills were lacking if the style and register adopted were appropriate for the task and the audience. A clear, consistent attempt to engage young people with the arguments worked well. Conversely, some responses were generally accurate but were largely summaries of the reading material rather than adopting the style of an article or the register appropriate for a young audience. Sometimes, in reaching for an engaging, age-appropriate style and register, colloquialisms and slang were used, detracting from the maturity required by the seriousness of the arguments and the circumstances of examination writing.

Level 3 marks were usually awarded where the reading material was largely reproduced so that the organisation and sequence of sentences and paragraphs reflected the original and were not adapted to create a coherent style. Where the reading material was heavily lifted or copied, there was often little of the candidate's own style for examiners to reward, though these kinds of responses were fairly rare. Phrases and words such as 'nudged out of their comfort zone', 'feely giving something that money can't buy' and 'learn to navigate their way through without supervision' were often used but in some cases several sentences were also copied. More commonly, a range of expressions was lifted to express salient ideas which could then not be credited for either Reading or Writing. In more effective responses, ideas were incorporated into the writer's own style and selected for their usefulness to the overall argument rather than copied.

Structure

Responses awarded high marks for Writing handled the material confidently and presented their arguments cogently. The issues addressed were combined so that the judgements which emerged was clearly derived from the ideas in the texts but the response was not dependent on them for its structure and sequence. At the highest level, the lines of argument were set from the introductory paragraph and the issues in the two texts were addressed but as a cohesive piece. The opening and concluding sections of the most effective responses tended to introduce and summarise the main points, with the intervening sections arguing a coherent case. The argument being pursued determined the sequence of ideas in these responses rather than the sequence of the original texts.

Responses given Level 5 marks for Writing tended to reflect a range of points made in each text but were reordered to some degree in a response which was sensibly structured and paragraphed. An overall coherence and structure were required for this Level which was usually less evident in responses below Level 5.

Less effective responses sometimes struggled to provide a coherent argument and were more dependent on the sequencing of the original texts. In most cases the information given in the texts was offered with some rewording but not reordering of ideas, with some contradiction of points taken from each text. While some brief opinion was sometimes given at the end of the response, these views were asserted and imposed on the structure of the original texts rather than argued for.

Accuracy

Accomplished writing which was accurate and controlled as well as subtle in tone and register was given a Writing mark in Level 6. These responses were not only engaging in style and convincing in their arguments but fluent and virtually free of error. There was a range of precisely selected and complex vocabulary and sentence structures varied and were consciously used, often rhetorically, to engage the reader.

Some complex sentences structures were chosen which helped to balance and weigh up contending views and complex clauses were controlled by careful punctuation within sentences.

Level 5 responses were usually purposeful and clear, though perhaps not as ambitious and wide ranging in vocabulary or as precise in register or style as those given higher marks. Level 4 responses, as described in the marking guidelines, were 'sometimes effective' but not consistently so. Although the style was usually fairly plain, the language used was generally accurate. A range of relatively basic errors was made at this level which limited the effectiveness of the style but did not affect clarity of meaning. There were lapses in the use of definite and indefinite articles (usually omission) and some grammatical disagreement, often

© 2025

between plurals and verb forms. Common spelling errors in this mark range included some frequently used words in the texts, creating a jarring note when the topic covered meant there were frequent misspellings, such as 'volunteer' very often written a 'volenteer', misspelling of 'scheme', 'programme' and 'compassion'.

Faulty sentence structures, fluctuating tense use or too much lifted or copied material often kept Writing marks for **Question 1** below Level 4. These responses often showed reasonable clarity in conveying meaning but there was a wide range of relatively basic punctuation and grammar errors which meant that Examiners could not award marks in Level 4. The omission of definite or indefinite articles was moderately common, as were tense errors, and agreement errors were more frequent and more damaging to meaning at this level. In rare cases, material from the texts was copied; responses where this occurred more substantially could not be given marks in Level 4 for Writing or for Reading because neither the content nor the style of the response was the candidate's own.

Ways in which this type of answer could be improved:

- be prepared to challenge the ideas in the reading texts
- look for contradictions in the arguments and point them out
- group ideas from both texts together and discuss them rather than repeat them
- think carefully about the kind of style which suits your task and the audience
- check your writing for basic punctuation errors, such as missing definite or indefinite articles, ineffective control of grammar, or misspellings of key words, which are in the passage
- check your spelling of key words which appear often in the texts.

Section B: Composition

Descriptive writing

Question 2 – Write a description with the title, 'The shelter'.

Question 3 – Describe a time when you had to wait for a delivery.

Both descriptive writing questions were popular choices for candidates, though **Question 2** was much more often selected; examiners awarded a wide range of marks for these responses. Both questions elicited responses describing a wide variety of scenarios which examiners could reward appropriately. A sense of a very specific place, brought to life in vivid ways, was often key to the effectiveness of the description of shelters in **Question 2**. Shelters from war and conflict, both now and in the past, featured strongly amongst more effective responses. The use of underground stations in several city locations during wars worked well for some who could make use of closely observed details in their depictions of the physical location and the sometimes terrified, sometimes bored occupants: 'The man, dressed as if he was just going to work at 2 am when the sirens rang over the city, sat on the ground reading a book. His back upright and his tie straight, he could have been in a public library if it weren't for the dim light and the seething mass of terrified humanity around him. His eyes scanning the page only paused for a split second as the falling bombs made impact on the ground above.'

Other scenarios included previously unnoticed huts or sheds in more rural landscapes. These were often sought out or stumbled upon by walkers during a storm. In some effective responses, the contrast between the raging storm and the saturated landscape outside and the safety and warmth of the inside gave candidates opportunities to develop the detail and impact of their piece. While this scenario sometimes elicited some clichéd or exaggerated ideas and images, in the most effective it was often a quiet understatement which characterised the writer's confident creation of a cohesive picture in the reader's mind: 'Inside, a drenched man, silent as a ghost, made no sound as he retreated into the shelter. The only sign of life was extinguished when he blew out the match he held in his hand, obscuring his face once more.' In a description of a hospital shelter during a war, the face of a nurse was described as 'frozen stern by the uncountable deaths she has witnessed. The nurse pulled a grieving girl from the body of a dead soldier 'with all the force of indifference.'

Some shelters were unusual interpretations of the task, such as pieces describing safe spaces such as a homely family kitchen for a bullied schoolboy or the bedroom of an autistic person for whom the world outside was overwhelming and frightening. In a few cases, the shelter was another human being who offered a kind of sanctuary and a sense of protection. Where these responses were consistently and effectively descriptive in content, examiners accepted such interpretations of the task.

© 2025

Question 3 also elicited responses across the mark range. As mentioned above, the most effective focused on creating a vivid atmosphere of anticipation, nervousness or excitement. Here, as well as in **Question 2** and many previous descriptive writing tasks, the selection of a particular scenario often contributed significantly to the effectiveness of the response. While many chose waiting for a fast-food delivery to arrive, some included some exaggerated ideas and images about desperate hunger. Where the style was sometimes fluent and accurate, the content seemed hyperbolic and extreme: describing waiting for the delivery of a pizza, one candidate wrote, 'Slowly, sepulchral tears slid lethargically down my forehead catching the opalescent light like tiny beads of glass. Sweaty and impatient, my hands clawed at the foggy windows.'

Time and its passing often featured in interesting ways in responses to **Question 3**. There was often the conventional ticking of a clock or the 'painfully slow, pitilessly, glacially slow' movements of the clock's hands as one candidate described it, to mark the discomfort of waiting in many responses as well as the different ways in which delivery apps in the hands of the person waiting affected them. One writer described the dot on the screen showing where the delivery driver was as a 'digital promise' and in another response, the driver chose a circuitous route to the writer's house, frustrating the writer who knew 'he'd now been five minutes from my house for the last half hour and that arrow on my phone screen had mocked and taunted me the whole time.'

Some scenarios seemed more appropriately selected than waiting for a pizza delivery, however, in order to give candidates an opportunity to describe a range of different kinds of intense emotions. In one response, a small boy waits for post from home after being sent to live with a distant aunt: 'Every morning my breakfast would turn to sand in my mouth. Play was stripped of its ancient charms and I spurned my friends who knew nothing, my childish heart wracked with the pain of abandonment unexplained.'

Hospital waiting rooms also provided a suitable location for dramatic arrivals of babies or sometimes the results of medical tests which could be momentous. Observable details of sight and sounds were diverse and precise in the most effective responses: one described the light as 'a little too bright' and the sound of the telephone ringing at the abandoned desk' as 'jarring', yet when it stopped the 'weighted hush that fell on the room' was even more unwelcome. In responses where the tension was controlled but varied, shown through observed detail rather than hyperbolic language and imagery, the effects created were often very interesting and engaging.

In both descriptive writing questions, unusual, closely observed details created engaging, evocative scenes in the best responses. Where they were sustained and developed and showed skill in building a detailed, convincing overall picture, examiners could award marks for Content and Structure in Level 6. These consciously crafted pieces held the reader's attention by linking the different elements described in an interesting, cohesive response. Level 6 responses were characterised by this cohesive structure, often provided by the narrator's reactions or a specific atmosphere, as well as carefully chosen detail and striking images or extended motifs which held the piece together.

Level 5 responses tended to use a wide range of details and were well-constructed, if a little less effective and cohesive overall. At the bottom of Level 5 and in Level 4, responses were sustained and competently organised but usually a more predictable. Selected scenes and details at this level tended to involve less striking images and more stereotypical ideas, as mentioned above.

In both questions, where some responses lacked specific detail or the situation chosen was too mundane to sustain a more heightened range of ideas, marks for Content and Structure tended to be awarded in Level 4. Lower in the mark range, responses to both questions were relatively prone to narrative though Examiners rewarded description wherever it appeared. In the second question particularly, a minority of responses included narrative sections about what the writer did while waiting – making a cup of tea, phoning a friend, watching television – rather than evoking an atmosphere of anticipation or tension which was credible for the scene described.

Level 4 descriptions for Content and Structure tended to become more narrative in intent, and while most responses at this level were organised and paragraphed, the details included were simple and there was less use of images or a range of vocabulary.

Some lack of awareness of the essential elements of descriptive writing was evident in responses at Level 3, although they were sometimes fairly accurately written. These were sometimes entirely narrative and often brief and undeveloped.

© 2025

Narrative writing

Question 4 – Write a story which includes the words, '… it could not be stopped …'.

Question 5 – Write a story with the title, 'The path to success'.

Both narrative writing questions were popular choices for candidates across the mark range though **Question 4** proved to be a more common option than **Question 5**. There was a very wide range of plots, characters and scenarios in these responses as candidates took the opportunities offered by the open questions to determine the genre, style and content for themselves. **For Question 5**, examiners sometimes saw responses which showed some lack of understanding of the narrative genre.

Effective responses were well organised and thoughtful interpretations of the title which used engaging, credible ideas to create developed stories. An ability to shape the narrative and to produce moments of tension, mystery or drama and to vary the pace of the story were essential elements of more effective responses to both questions. In **Question 4**, the required line in the question gave candidates an opportunity to construct a story around the idea of something or someone unstoppable and where this idea was used as a central point in the response, the narrative often proved more engaging and cohesive. These stories often featured unstoppable forces of nature, such as storms, fires and floods, or other kinds of forces, such as alien invasions, illnesses or psychological impulses, as well as overwhelming social pressures in the form of bullying or forced marriages. Abstract concepts such as justice or love were convincingly used by some skilled writers, though perhaps in the middle range of achievement these ideas were a little more difficult to sustain. These choices were often important in determining the effectiveness of responses, even where more technical skills were not as secure.

Effective responses also showed evidence of the thoughtful use of other characteristics of developed narrative writing which are important in creating stories which engage the reader. Sometimes, concise and evocative description, scene-setting characterisation were used effectively. In one response, some economically written scene-setting helped the reader to imagine a gothic scene: 'The basement door yawned open. The candlelight licked the walls, casting twitching shadows like hanged men. Mother was sitting on the bed, her white, silk robe pooling around her like spilled milk.'

This economy of style and the use of images and striking ideas in narrative writing was typical of the most effective responses to this question. The confidence of understatement was a fairly rare but a clear indicator of an accomplished writer. Introducing an abstract concept as the 'unstoppable' force in the question, one candidate wrote: 'Regret settled in like the rain outside: quiet, steady, undeniable.'

In the middle range of achievement, responses were cohesive but often a little more predictable, with chronological structures and less developed characterisation and setting. These often involved floods or fires and occasionally a fairly coherent narrative used the phrase in the question as an incidental detail or part of dialogue which did not fit comfortably in the story and seemed more suitable as responses to other questions.

The subject matter at this level varied widely and some responses used scenarios which were difficult to control for less confident writers: zombie incursions, alien invasions and attacks by viruses were some of the choices made in this range in which the scale and scope of the narrative often made it difficult to use characters and settings which engaged and interested the reader. Nevertheless, many cohesive, organised responses were given marks in Level 4 for Content and Structure where there was enough shape and cohesion to meet the criteria.

Less effective narratives for this question tended to be brief outlines of a sequence of events, often lacking credibility and development but with some overall clarity. These often employed similar content to more effective stories but there was very limited characterisation and the focus was almost entirely on events and actions. Occasionally, the story was almost entirely written in dialogue with little actual narrative.

For **Question 5**, the idea of a 'path to success' was used imaginatively in more effective responses. The notion of what constituted 'success' was challenged in some thoughtful responses. One candidate wove a convincing story about a girl who had been sent off to boarding school to fulfil her evident academic potential and forge a successful career. She came to realise that these values, promoted somewhat heartlessly by her parents, were less important to her than those of friendship, companionship and loyalty, as she lived through bitter loneliness at school: 'I had no friends. Nights were spent pouring over textbooks in my dark room, tissues spread around me like the feathers of a moulting dove, soaked with the salty tears of a grief that comes from never having been a child.'

© 2025

Other paths to success involved more subversive versions of the idea, such as successful heists pulled off against the odds or escaping from some kind of entrapment by guile and deception. Some of these included some closely observed characterisation and description which enlivened the piece. In one successful robbery of a large corporate company which had driven the narrator's father to his death by their corrupt practices, the unknowing 'look-out' for the robber was his own child who was unwittingly drawn in by playing a simple game of 'I Spy'.

In other effective responses, candidates chose an unusual or interesting point of view from which to tell the story. One narrative involved a grandfather who had trained a grandson in the art of deception and who told the story of his grandson's rise to a rather dubious notoriety with obvious pride and affection, creating some interesting, ironic dissonance for the reader. In another, a story which began with many of the standard images and vocabulary of another bank robbery turned out to be an attack on a chicken coop by a group of foxes, told through the voice of the leader of the pack. The real nature of the attack, as well as the real identity of the protagonists and narrator, were revealed in carefully seeded words and phrases which only created a clear, satisfying picture by the end. At the beginning, the preparations were described: 'The rest of the crew assembled, most of them lumbering in a torpid haze, but that would change soon.' The lock on the coop is then broken by one of the crew 'clawing' at it, as if they were a gang of incompetent gangsters – a detail which only made sense when the real scenario came slowly to light.

These different versions of what 'success' might mean and the use of interesting points of view and storytellers helped to showcase how to use a task or question in a more engaging way. In the middle range, responses were often cohesive and there was sometimes some characterisation and scene-setting, but the stories were more conventional 'rags to riches' tales or narratives in which much hard work contributed to sporting or academic success. In most, there were some fairly predictable obstacles on the way which jeopardised protagonists' paths – examinations were failed, start-up businesses collapsed, sportspeople sustained crippling injuries – but success was assured at the end. Where there was a little more care taken over creating credible characters or perhaps evoking the atmosphere of a sporting event, these stories were sometimes given marks for Content and Structure just into Level 5 but most were Level 4 narratives.

Examiners awarded marks in Level 6 for Content and Structure for narratives which created convincing, interesting scenarios and characters in responses to both questions. While the events in a story were important in creating such credibility, Level 6 responses paid attention to characterisation and how events were driven by character traits, choices and relationships.

Narratives given marks in Level 5 were usually more straightforward in structure and approach but nonetheless cohesive and reasonably credible for the reader. Examiners could award marks in Level 5 for Content and Structure where the narrative was organised and there was a clear attempt to create a developed, relevant story. Responses in this range were more usually chronological accounts but were cohesive and balanced and contained a suitable ending depicting some satisfying resolution. Whichever interpretation was given to the tasks, for Level 5 marks for Content and Structure stories needed to be well-managed with some conscious shaping of the narrative beyond a simple retelling of events.

Level 4 marks for Content and Structure were awarded for stories which were relevant to the task but were less developed and used fewer elements of effective narrative writing. Characters and narrators tended to be more simply drawn and responses were often more dependent on a series of events, lacking attention to characterisation and setting. A simplicity of content or a lack of development rather than ineffective organisation were typical lower in this level. There was a tendency to say simply what happened or to state who the characters were rather than drawing the reader in by characterisation and setting. Characters were identified but there was more time and emphasis given to relating events than developing credible characters. While the majority of less effective narratives had some simple but clear sequence of events, there were fewer features of a developed narrative and the reader was less engaged as a result.

High marks for Style and Accuracy were given for responses where the writing was engaging and varied in vocabulary and where different sentence structures were controlled and used to create particular effects. The characteristics of Level 6 writing included a fluent and flexible use of language which was subtle enough to create a range of effects to engage the reader. Punctuation within sentences, especially in the use of dialogue, was secure in responses in Level 6 and where coupled with a sophisticated and precise range of vocabulary, the highest marks were given.

Responses awarded marks in Level 5 tended to be less ambitious and complex but still mostly accurate while Level 4 responses were plain in style and there was a more limited range of vocabulary. Speech punctuation was almost always problematic at this level although the writing had few serious errors which affected the clarity of meaning, such as ineffective sentence control, sentence separation and grammar

© 2025

errors. Moderately common errors of grammar and expression appeared increasingly in responses given low Level 5 and Level 4 marks, such as disagreements, missing articles and imprecise, sometimes over-ambitious vocabulary. Occasionally, the use of obscure, archaic vocabulary, the meaning of which was not well understood, seriously affected the clarity of the writing and resulted in lower marks for both Content and Structure and Style and Accuracy because neither the story as a whole or the meaning of the language was clear.

Errors in sentence control and separation, as well as lapses in tenses, limited otherwise competently told stories to Level 4, as did frequent errors in basic punctuation or grammar. The omission of definite and indefinite articles, the incorrect use of participles or errors in grammatical agreement contributed to a lack of fluency and accuracy which kept many responses out of Level 5. Similarly, basic punctuation errors and the misspelling of simple words and wrongly selected homophones sometimes appeared in otherwise competent writing and were sometimes frequent enough to affect the mark for Style and Accuracy. A common reason for keeping an otherwise clearly written story out of Level 5 was ineffective demarcation of sentences, most commonly the use of commas where full stops were needed but sometimes sentence separation was missing altogether. Though the mixing of tenses and the use of incomplete sentences were more prevalent in the descriptive writing, these issues also limited the marks available in the narrative writing.

Ways in which the writing of narratives can be improved:

- choose your plot carefully so you have time to develop characters and settings
- consider imaginative ways and points of view to tell your story, not just a chronological account
- characters' thoughts and feelings help to engage your reader: do not rely on actions
- check your writing for errors which will badly affect your mark, such as basic spelling and punctuation mistakes: only use incomplete sentences when you want to create a specific effect
- use complicated vocabulary only with precision and consider the power of simple words and sentences to create particular effects.

FIRST LANGUAGE ENGLISH

Paper 0500/22
Directed Writing and Composition

Key messages

This paper was mainly assessed for writing, although there were fifteen marks available for reading in **Question 1**.

In order to achieve high marks, candidates were required to:

- use an appropriate form, style and register in both questions
- structure ideas and organise their writing effectively to persuade and engage the reader
- produce detailed and evocative descriptions and engaging, credible narratives
- understand how different audiences, purposes and genres should influence the style adopted
- construct varied sentences accurately, with a clear attempt to influence and interest the reader
- use precise and wide-ranging vocabulary, appropriate for the task.

General comments

Candidates were familiar with the format of the examination paper and understood what was required for both the directed writing and composition questions. Nearly all candidates understood the instructions for the examination and attempted **Question 1** and either a descriptive or narrative writing task, with very few rubric infringements seen. A small number of candidates did not attempt **Question 1** but wrote relatively competent responses to one of the composition questions. Most responses were written in candidates' own words although there were a few responses which were mostly or wholly copied from the texts in the Reading Booklet Insert. Some lifting of phrases or sentences was fairly common but where this lifting of material was more extensive, marks were inevitably limited for both Reading and Writing. In ***Section B***, most candidates understood how the content of descriptive and narrative writing differs, although there were some stories and occasionally discursive or polemical pieces submitted for the descriptive writing tasks, which made it difficult for examiners to award high marks for Content and Structure.

Nearly all responses showed a clear understanding of and engagement with the topic of the desirability or otherwise of redesigning a neighbourhood into a 'city village' in **Question 1**. Most responses were written in an appropriate style and format for a formal letter to a city authority. The register required here was generally well understood, with a businesslike and persuasive tone and the use of some stylistic devices, although some responses used phrases which were inappropriately colloquial.

The majority of candidates approached the topic using their own words rather than excessively lifting or copying the words in the passages. More effective answers here also tended to structure responses independently, selecting and commenting on or employing the ideas in the texts in a coherent response. Even in responses which offered only limited coverage of the ideas in the reading material, some opinion or recommendation was usually given about whether or not such a major change was desirable or workable, as given in the task, though not always probing or offering judgements about the ideas: only a very small minority simply reported the views and ideas in the texts with no comment whatsoever on them. More effective evaluation tended to challenge some ideas in the texts rather than reproduce them and also develop them thoughtfully to consider the impact on different groups of people.

Less effective responses tended to repeat the ideas in the texts, rather than selecting points and commenting on them. Here salient ideas in the texts were not fully addressed, such as the morality or practicality of enforcing radical change to a settled neighbourhood. A number of responses at different levels of writing skills focused on the requirements of the first bullet point in the task, thus missing important evaluation opportunities offered by the second.

© 2025

Most candidates made good use of the bullet points in the question to help structure the response, and the ideas in the texts were scrutinised thoughtfully in more effective responses. Less effective responses were sometimes little more than a summary in paraphrase of the two passages in the Reading Insert. The structure and organisation of ideas required in a letter, such as a focused and explanatory opening and a thoughtful and convincing conclusion, were well understood by many candidates, though there were also responses which were relatively flat and discursive in style after a brief introduction.

In ***Section B***, effective responses to the composition questions were characterised by a clear understanding of the genre selected, descriptive or narrative, and of the features of good writing in each. In this examination session the narrative and descriptive options were almost equally popular.

Descriptive writing at the highest level was evocative and subtle and most responses gave a range of descriptive detail without resorting to narrative. Many responses to the descriptive writing questions were effective, organised and sustained. The first question was slightly the less popular but produced responses across the mark range. In response to this option there were some many convincing evocations of moments of tension in a competitive situation, and while the chosen scenario was most frequently that of a sports competition or match, written in the first person, there were also effective descriptions set in chess games, dance competitions, online gaming and drama auditions: a few candidates made the best of their own situation by convincingly representing the anxiety of 'freezing' during an academic examination.

Less effective responses to this question were less likely to focus tightly on the moment but covered longer periods of time and activity in the match or competition, almost inevitably drifting into narrative, although Examiners rewarded description where they found it. Responses to the second descriptive option resulted in some highly effective and sophisticated depictions of artists of different kinds. Most were of painters, but also featured were sculptors, musicians and composers, dancers and couturiers. At various levels of achievement a more metaphorical approach was taken, with God or Nature being the artist. Some of these were most engaging, evocative and well-structured. A small number of responses were biographical pieces about well-known artists or discursive pieces about the nature of art. These offered assessment challenges to examiners but they rewarded descriptive content where they could.

The first narrative option was less popular than the second, but both produced responses across the range of abilities. In response to **Question 4** a large proportion of narratives involved excursions of different types, difficult hikes with school or college friends, and a considerable number of attempts to conquer Everest or K2. There were also journeys of growth or self-realisation. Less effective responses were often accounts of family holidays or lists of events and places encountered on their travels. In response to the second narrative option the idea of the 'switch' had sometimes only the most limited or almost incidental significance. Many narratives, at varying levels of achievement, were based on an actual, physical switch, while others involved stories of switching events and attitudes to alter one's life path or progress. Those using the former approach produced many narratives of transportation to other worlds, or the finding of treasure. Often there were stories where bodies or personalities were switched, with frightening or humorous results: these were sometimes clearly derived from well-known movie franchises. Responses to both questions which were coherently constructed and which included credible characters and scenarios were always more effective. Less effective responses to both questions were over-packed with incident succeeded by an ambiguous or abrupt ending. Some highly effective responses created tension and pace, supporting the narrative detail with the deliberate manipulation of paragraph- and sentence length for effect.

Comments on specific questions

Section A

Question 1

Imagine you live in a city which is considering redesigning your neighbourhood.

Write a letter to the city authorities, giving your views on the proposal to create a 'city village'.

In your article you should:

- **evaluate the ideas, attitudes and opinions given in both texts**
- **consider whether or not the proposal is desirable or workable and whether or not it will benefit different people in the community.**

Base your article on what you have read in both texts, but be careful to use your own words. Address both of the bullet points.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer and up to 25 marks for the quality of your writing.

Examiners awarded high marks for Reading where there was some probing and evaluation of the ideas in the reading material, rather than a straightforward listing and reproduction of the points in the texts. Where the letter was also accurate and precise in vocabulary, with a clear understanding of the appropriate style and register for the specific task and audience, the highest marks for Writing could be awarded. More effective responses here focused carefully on the arguments in the texts, with the highest marks awarded for those which handled the different, often conflicting views with confidence and perceptive evaluation. The extent to which the implicit ideas and opinions contained in the texts were probed and scrutinised tended to determine the level of candidates' achievement.

Marks for reading

The most effective responses adopted a consistently evaluative, critical stance and read effectively between the lines of the texts, drawing inferences and making judgements about the desirability or workability of such radical change to city layout and planning. Responses given marks in Level 5 and 6 effectively challenged the outright banning of polluting vehicles, forcing people including the old and the disabled to walk or cycle in possibly tropical heat or monsoon rain, the assumptions of designers that all residents would welcome or at least tolerate the massive disruption that major demolition and rebuilding would surely bring, and the idea that most people would value living in the type of community where, 'everyone knows your business'. Some very thoughtful responses given marks in Level 6 stood back from the minutiae of the proposal to look at the concept as a whole: 'What right have the city authorities and the designers –no doubt from outside – to determine how we should live? However 'convenient', they will create ghettoes which restrict freedom and cultural growth.'

Elsewhere effectively argued responses challenged the notion of 'minimal travel' in Text A: 'You might say that having all services close by would be helpful in an emergency, but are you really suggesting that a fully equipped and staffed major trauma centre will be provided in every neighbourhood? Will factories and industrial units be placed in every area so that workers can walk to their employment? I think not!'. There were a number of responses which managed to synthesise ideas from both texts to craft a fully developed response in the form of a letter, offering a range of evaluative points, and these could be awarded marks for Reading in Level 6 or high in Level 5. These showed a mature and thorough grasp of the subtleties of the issues involved. Where even a single evaluative point was firmly made examiners could award marks at the bottom of Level 5 if there was otherwise reasonable coverage of the reading material. Where coverage was more extensive and more evaluative points were made the response could move up the mark range in this Level. Examiners noted an increase in this examination series of brief responses which precluded the awarding of marks in Level 5 or above because they were not 'thorough' or 'developed' responses as required by the Mark Scheme, but where some comment on or development of key ideas in the texts was offered examiners could award marks in Level 4. A small number of responses were seen in which one or two points of the proposal were subjected to impressive analytical discussion and development but the

© 2025

marks awarded were limited to mid- or lower Level 5, because the range of evaluative points was limited. These responses were often awarded high-level Writing marks.

Where some comment or opinion was offered, sometimes without specific reference to particular points in the texts but generally relevant to the ideas in them, marks at the lower end of Level 4 were usually awarded. These comments usually focused more exclusively on the pragmatic, reproducing some of the benefits of both approaches to the proposal. Examiners noted well-written responses which could not be awarded marks for Reading above Level 3; these sometimes lengthy and thoughtful responses about the importance of community, friendship and tolerance seemed only based on the writer's own experience, with little reference to the task in the question or to the specific ideas in the texts. They were sometimes very accurately written and employed an effective register and so had marks in widely differing Levels for the two components of the question. Where the beginnings of evaluation of explicit points were evident, marks at the top of Level 4 could be awarded, while in undeveloped or brief responses, a mark of 7 at the bottom of Level 4 could be given if a comment had some firm roots in the text.

Examiners usually awarded marks in Level 3 for Reading where there was some coverage of the texts, and some selection of ideas from them, but where these were listed or simply recorded, or comments were relevant but simple. A mark of 5 or 4 was usually given where answers were thin or partly lifted directly from the texts. Often, there was a clear paraphrase of both texts but little comment on them. Where there were some brief opinions, usually at the end of the response, they tended to be more general and not strongly anchored in the specific ideas in the texts. There was also sometimes, at this level, misunderstanding of some details in the texts or an unbalanced grasp of ideas: some understanding of the writer's perspective in Text A was evident, but little or no reference was made to the ideas in Text B. These responses were sometimes muddled but also opportunities for evaluation were lost elsewhere because responses were limited to asserting that the redesigning of the neighbourhood should or should not go ahead, without relevant support from the texts or development with the writer's own ideas.

Less effective responses tended simply to paraphrase and list ideas and many given marks in low Level 3 and below contained much copied material. Some candidates neglected the direction in the task about considering different people in the community, thus missing many evaluation opportunities. Examiners also noted a marked degree of confusion about the proposal itself, perhaps arising from an imperfect grasp of the task: responses argued for or against the conversion of the whole city into a village or wrote about their rural home villages being made into cities.

Marks for Writing

Style and audience

Candidates needed to adopt an appropriate style and register for a letter to city authorities, whose specific concerns and points of view could be imagined or understood. Most responses showed a clear understanding of the required register, even where technical writing skills were ineffective, and this allowed Examiners to consider marks in Level 4 and above where a 'sometimes effective style' was required. At all levels of achievement having a distinct point of view supported the effectiveness of the writing because it could become impassioned and highly persuasive.

In the middle range of marks, examiners could sometimes award marks in Level 4 even where more technical skills were lacking if the style and register adopted were appropriate for the task and audience. These often maintained an effective register without resorting to the overly colloquial slang and even expletives of a few responses. In these, expressions such as, 'gonna' and, 'you guys' or overly loose sentence structures were used which were not appropriate for a response in the context of an examination where a range of writing skills is assessed. A small but significant minority wrote as if the proposal to redesign the neighbourhood was entirely their own idea which they were presenting to the city authorities: some were still able to develop and evaluate points from that perspective but for most it hampered the creation of a coherent response.

Level 3 marks were usually awarded where the reading material was largely reproduced so that the organisation and sequence of sentences and paragraphs reflected the original and were not adapted to create a coherent style or argument. Where the reading material was heavily lifted or copied, there was often little of the candidate's own style for examiners to reward, though this kind of response was rare. More commonly, phrases and sentences were lifted and increasingly so as the response developed. In a small number of responses lengthy quotes from the texts were supplied; that inverted commas were used did not disguise the fact that too much of the response was not the candidate's own writing. At the lower level, awkward paraphrasing was seen with syntactically incorrect insertion of phrases from the text. In this

© 2025

examination session several instances of inappropriate reference to 'Text A' and 'Text B' which would negatively affect the register were seen, although rather less so than in previous sessions.

Structure

Responses awarded high marks for Writing handled the material confidently and presented their arguments cogently. The issues addressed were combined so that the judgements which emerged were clearly derived from the ideas in the texts but the response was not dependent on them for its structure and sequence. At the highest level, the lines of argument were set from the first paragraph and the issues in the two texts were addressed but as a cohesive piece. The opening and concluding sections of the most effective responses, apart from the rhetorical flourishes or salutations, tended to introduce and sum up the main points, with the intervening sections arguing a coherent case. The point of view being developed determined the sequence of ideas in these responses rather than their sequence in the original texts.

Responses given Level 5 marks for Writing tended to reflect a range of points made in each text but were reordered in a response which was sensibly structured and paragraphed and usually avoided the repetition of similar ideas which appeared in both. An overall coherence and structure were required for this Level which was usually less evident in responses below Level 5.

Less effective responses sometimes struggled to provide coherent judgement or recommendation and were more dependent on the sequencing of the original texts. In most cases the information given in the texts was offered with some rewording but not reordering of ideas. While some brief opinion was sometimes given at the end of the response, these views were imposed on the structure of the original texts rather than argued for, and a concluding recommendation was often in apparent contradiction to the weight of selected points preceding it. It was not unusual to see responses which set out all the possible benefits and advantages of a city village, but concluded, 'So leave our neighbourhood alone -we like it as it is', or some similar exhortation. Some less effective responses were very long and involved a considerable amount of repetition; introductory paragraphs were often very laboured and artificial: they sometimes reworded the whole task and promised the recipients to reveal all the results of their research on the subject. At a similar level, conclusions often summarised all that had gone before in a very laborious, repetitive manner.

Accuracy

Accomplished writing which was accurate and controlled as well as appropriate in tone and register was given a Writing mark in Level 6. These responses were not only engaging in style and convincing in their deliberations but fluent and virtually free of error. There was a range of precisely selected and complex vocabulary and sentence structures were varied and consciously used to persuade the reader.

Some complex sentence structures were chosen which helped to balance and weigh up contending views, and complex clauses were controlled by careful punctuation within sentences.

Level 5 responses were usually purposeful and clear, though perhaps not as ambitious and wide ranging in vocabulary or as precise in register or style as those given higher marks. Level 4 responses, as described in the marking guidelines, were 'sometimes effective' but not consistently so. Although the style was usually fairly plain, the language used was generally precise. A range of relatively basic errors was made at this level which limited the effectiveness of the style but did not affect clarity of meaning. There was some grammatical mis-agreement, often between plurals and verb forms. Words commonly misspelt in this range included 'environment', 'convenient/convenience', 'amenities', 'business', 'benefit', 'society' and 'accessible'. Faulty sentence structures, fluctuating tense use or too much lifted or copied material often kept Writing marks for Question 1 below Level 4. These responses often showed reasonable clarity in conveying meaning but there was a wide range of relatively basic punctuation and grammar errors which meant that examiners could not award marks in Level 4. Here, the omission of definite or indefinite articles was relatively common, as were tense errors, and agreement errors were more frequent and more damaging to meaning at this level. In rare cases, material from the texts was copied and responses where this occurred more substantially could not be given marks in Level 4 for Writing or for Reading because neither the content nor the style of the response was the candidate's own.

In this examination session examiners noted a reduction in the random use of capital letters, with only the very occasional response written wholly in capital letters.

© 2025

Ways in which this type of answer could be improved:

- be prepared to challenge the ideas in the reading texts
- look for contradictions in the arguments and point them out
- group ideas from both texts together and discuss them rather than repeat them
- think carefully about the kind of style which suits your task and the audience
- ensure that you understand the specific focus of the question to avoid misinterpretation or 'drifting'
- check your writing for basic punctuation errors, such as missing definite or indefinite articles, ineffective control of grammar, or misspellings of key words, which are in the passages or given in the task
- do not lose marks by using capital letters randomly.

Descriptive writing

Describe a tense moment during a competition.

Write a description with the title, 'The artist'.

Descriptive Writing was a very popular choice for candidates, with **Question 3** being chosen rather more often, and examiners could award a wide range of marks for these responses. Both questions were interpreted in a variety of ways which examiners could reward appropriately. In the first task, there were many detailed, organised and effective descriptions of anxious moments in a range of situations, although the dominant scenario was that of sporting competitions, often international football or basketball matches. There were highly engaging evocations of critical points in the competition or the player's personal career. Where these responses eschewed narrative beyond that strictly necessary for context, and included original and convincing details and images, examiners could award marks in Level 6. Some of the most effective descriptions for **Question 2** summoned up crucial moments in chess tournaments, using images of sound and almost monochrome visual details, or conveyed the mental stress of the competitor which could not be alleviated by physical movement: 'He dug the heels of his palms into his eye sockets in a frantic attempt to calm his trepidated self.'

Descriptions, as is always the case, were more effective if they contained vivid and specific details rather than more general or stereotypical ideas and images. In the middle and lower ranges of achievement writers depended more on visual or stereotypical images: 'He ran faster than a cheetah'; 'The goalkeeper saved the ball like a lion pouncing on its prey'; 'The crowd roared.' In responses to the second question, a substantial number depicted painters, either in a studio or outside painting a landscape. The painting itself often became the main focus of the description rather than the artist, but images were often so convincing and evocative that examiners were able to award high marks for content and structure. Although the subject lent itself primarily to visual imagery including the resonant names of oil colours, tactile and olfactory images were also effectively employed: 'She ran her fingers over the thickly ridged impasto created by his palette knife….'; 'Instinctively she poured linseed oil that spat out a potent odour and diffused quickly through the room.'

For both descriptive writing questions, unusual, closely observed details created convincing, evocative scenes and atmospheres in the best responses. Where they were sustained and developed and showed skill in building a detailed, convincing overall picture, examiners could award marks for Content and Structure in Level 6. These consciously crafted pieces held the reader's attention by linking the different elements described in an engaging, cohesive response. Level 6 responses were characterised by this cohesive structure, often provided by the narrator's reactions or attitudes or a specific atmosphere, as well as carefully chosen detail and striking images. When writing in the descriptive genre, candidates often struggle to provide suitable introductions and conclusions, but in response to **Question 2**, at varying levels of accuracy of writing skills, numerous responses began in medias res, perhaps when a penalty shot in a match was imminent or a crucial chess move or ballet step was about to be attempted. Here the backstory was often effectively provided in flashback. Sometimes this effect was reduced by a later slide into overlong narrative. In responses to **Question 3** much less narrative preamble or scene-setting was evident: the writer often came across a painter or performer when turning a street corner, or opening a door into a studio: 'And there he was, utterly oblivious to my presence, his paint-daubed overall hardly distinguishable from the splattered floor around his easel.'

Level 5 responses tended to use a wide range of details with well-managed structures, if a little less effective and cohesive overall. At the bottom of Level 5 and in Level 4, responses were sustained and competently organised but usually more predictable. Selected scenes and details at this level tended to involve less striking images and more stereotypical ideas. In response to **Question 2**, some writers struggled to employ effective structures without resorting to excessive narrative, for example detailing the progress of their

© 2025

sporting career which had led to this important competition. Responses awarded marks in Level 4 for Content and Structure generally tended to become more narrative in intent although Examiners rewarded description where it was found. In responses awarded marks in Level 3, there was often some lack of awareness of the essential elements of descriptive writing, even though some were fairly-accurately written. These were sometimes entirely narrative or the details included were mundane and stereotypical: 'The team was all in their red strip and the stadium was packed.' In other responses the scenario of an on-line gaming tournament was employed, and this could be challenging for the non-specialist to understand fully.

The most effective responses employed precise and varied vocabulary, striking images and personification, as well as a range of sentence structures to create subtle, complex atmospheres. In less effective responses, vocabulary was occasionally wide-ranging and complex but used with less precision. In a few cases, this insecure use of language resulted in a style which was difficult to follow and the credit which could be given for a wide-ranging vocabulary was lost by its imprecise use and lack of clarity. Occasionally, obscure, even archaic language sometimes revealed a lack of understanding of its meaning rather than a wide range of vocabulary. In a few responses, there seemed evident a determination to employ a learned corpus of vocabulary, where it was inappropriate or even impaired meaning.

As is often the case in less secure descriptive writing, tenses switched between past and present, sometimes within sentences. Incomplete or verbless sentences continued to affect marks given in the middle range, even where other technical aspects of style were more accurate. Lapses in grammar, perhaps minor in isolation but more damaging when persistent, also kept responses out of Level 4 for Style and Accuracy. These included mis-agreement, especially between pronouns and verbs, and the omission of definite and indefinite articles was also common and damaging to otherwise relatively accurate, if simple, styles.

Ways in which the writing of descriptions can be improved:

- try to avoid clichéd scenarios and consider a more individual and original selection of content: choose a scenario which gives you a range of details on which to focus
- keep your focus on details which will help you evoke a specific atmosphere
- write sentences with proper verbs and do not switch tenses
- use vocabulary precisely: complex words used wrongly do not help your style.

Narrative writing

Write a story which involves an extraordinary journey.

Write a story with the title, 'The switch'.

Narrative writing questions were popular choices for candidates across the mark range, and there was a very wide range of plots, characters and scenarios in these responses, numbers of which were awarded marks in Level 6 for both components of the answer. These most engaging responses often included vivid descriptive detail to create the setting and characters, essential elements of more effective responses to both questions. Examiners sometimes saw narratives which seemed more suited to titles set in previous examinations or were pre-prepared: this was much more apparent in **Question 4**. Occasionally responses were seen which did not comfortably fit with either title, and where some lack of cohesion was evident. Responses awarded marks in Level 5 showed an ability to shape the narrative and to produce moments of tension, mystery or drama and to vary the pace of the story.

In **Question 4**, many responses were accounts of a family holiday or of hiking adventures with friends. Those awarded marks at the top of Level 3 or in lower Level 4 tended to be straightforward chronological accounts, with little or no characterisation or convincing scene-setting. These failed to convince or engage the reader, often because of their unrealistic nature: friends bored during school holidays might decide on a whim to attempt a mountain climb which would deter all but the most experienced mountaineers, and by the next morning were at base camp with no apparent preparation or expertise. At this Level family trips to Disneyland or some exotic location were also seen, often unrelieved by any major incident or development. Level 5 responses revealed a wider range of scenarios, and included journeys of personal growth and development, sometimes poignantly evoking sadness and self-realisation. Another candidate wrote about a journey through the written words of her deceased grandfather's journal, revealing her father's secret life. There were several stories set at the time of the Partition of India, with exhausted refugees attempting journeys in both directions. One of these was awarded marks at the top of Level 6. In careful, spare prose it evoked the loss of home and fear of the future: 'The journey had taken pieces of us: a scarf lost, a prayer whispered, a photo of my father crushed at the last checkpoint.' This recounted not only a harrowing physical

© 2025

journey, but also one of personal development, even transformation, as the teenage narrator gradually assumed responsibility for keeping older family members alive: 'I had crossed more than a border that day'. Another response awarded full marks was narrated by an Alzheimer's sufferer. Expertly using internal monologue and flashback techniques, the writer depicted the sufferer's journey through past and present times, ending most movingly with a painful moment of realisation when, believing he was ten years old and playing with his teenage sisters he heard his own aged and roughened voice calling to them. Examiners could reward such responses for their ambition and engagement, even where levels of accuracy were somewhat lower than those for content and structure.

For **Question 5**, there were many different plotlines, characters and events which allowed candidates to show their narrative writing ability, but several themes dominated at all levels of achievement: the discovery of actual switches, the operation of which had often spectacular results such as opening a portal to other worlds; fantasy stories in which bodies or personalities were mysteriously exchanged, leading to many kinds of adventures; pranking stories involving twins, and narratives in which the protagonist underwent some sort of an epiphany which changed the direction of their lives. To achieve high marks for content and structure, such narratives had to demonstrate convincing scene-setting and characterisation, and the creation of drama and tension. At the lower end of Level 5 and in Level 4 responses to **Question 5** fantastic or spectacular events were sometimes presented without any expression of fear or even consternation, as if finding oneself in the body of another was no more surprising than picking up their belongings by mistake; the resulting loss of credibility negatively affected marks for Content and Structure. Sometimes marks in the Level first considered by the examiner for an engaging tale could not be awarded because of ineffective endings or faults in the plot's resolution. This particularly affected some otherwise engaging and convincing responses to Question 4. Examiners noted an emerging trend for an action-packed or fantasy plot to end abruptly with, 'I realised it was all a simulation.' Also seen was an increase in the number of responses –small but significant—which included gratuitous violence or other disturbing material.

Examiners awarded marks in Level 6 for Content and Structure for narratives which created convincing, interesting scenarios and characters in responses to both questions. While the events in a story were important in creating such credibility, Level 6 responses paid careful attention to characterisation and how events are driven by character traits and choices. This was often supported by the skilful employment of both direct and reported speech.

Narratives given marks in Level 5 were usually more straightforward in structure and approach but nonetheless cohesive and reasonably credible for the reader. Examiners could award marks in Level 5 for Content and Structure where the narrative was organised and there was a clear attempt to create a developed, relevant story. Responses in this range were more usually chronological accounts but were cohesive and balanced and contained a suitable ending depicting some satisfying, if not always engaging, resolution. For higher marks for Content and Structure stories needed to be well-managed with some conscious shaping of the narrative beyond a simple retelling of events.

Level 4 marks for Content and Structure were awarded for stories which were relevant to the task but were less developed and used fewer elements of effective narrative writing. Characters and narrators tended to be more simply drawn and responses were often more dependent on a series of events, lacking attention to characterisation and setting. A simplicity of content or a lack of development rather than ineffective organisation were typical at this level: here there was a tendency to say simply what happened or to state who the characters were rather than drawing the reader in by characterisation and setting. Characters were identified but there was more time and emphasis given to relating events than developing characters as credible and rounded. While the majority of less effective narratives had some simple but clear sequence of events, there were fewer features of a developed narrative and the reader was less engaged as a result.

High marks for Style and Accuracy were given for responses where the writing was engaging and varied in vocabulary and where different sentence structures were controlled and used to create particular effects. The characteristics of Level 6 writing included a fluent and flexible use of language which was subtle enough to create a range of effects to engage the reader. Punctuation within sentences, especially in the use of dialogue, was secure in responses in Level 6 and, where this was coupled with a sophisticated and precise range of vocabulary, the highest marks were given. Responses awarded marks in Level 5 tended to be less ambitious and complex but still mostly accurate while Level 4 responses were plain in style and lacked some range in vocabulary. Speech punctuation and paragraphing were usually problematic at this level although the writing had few serious errors which affected the clarity of meaning, such as ineffective sentence control, faulty sentence separation and grammar errors. Some writers resorted to laying out dialogue in the style of a playscript in order to make clear who was speaking. Relatively common errors of grammar and expression appeared increasingly in lower Level 4 responses such as mis-agreements, missing articles and imprecise, sometimes obscure vocabulary. Errors in sentence control and separation, as well as lapses in tenses,

© 2025

limited otherwise competently told stories to Level 4, as did frequent errors in basic punctuation or grammar. The omission of definite and indefinite articles, the incorrect use of participles or errors in grammatical agreement contributed to a lack of fluency and accuracy which kept many responses out of Level 5. Similarly, basic punctuation errors and the misspelling of simple words and wrongly selected homophones sometimes appeared in otherwise competent writing and were sometimes frequent enough to affect the mark for Style and Accuracy. A common reason for keeping an otherwise clearly written story out of Level 5 was ineffective demarcation of sentences, most commonly the use of commas where full stops were needed but sometimes sentence separation was missing altogether. Though the mixing of tenses and the use of incomplete sentences were perhaps more prevalent in the descriptive writing, these issues also limited the marks available in the narrative writing. Examiners noted the use of the language of on-line gaming in some responses such as, 'I had a clutch of 1v4', or 'I saw a double holding', which detracted from the reader's appreciation of their content.

Ways in which the writing of narratives can be improved:

- think about how to interest and intrigue the reader in shaping your narrative
- consider imaginative ways to tell your story, apart from a chronological account
- characters' thoughts and feelings help to engage your reader: do not rely only on events
- check your writing for errors which will badly affect your mark, such as basic spelling and punctuation mistakes, taking special care to avoid misspelling words given in the tasks: accurate speech punctuation and paragraphing will help to lift your mark
- use complicated vocabulary with precision and consider the power of simple words and sentences to create particular effects.

FIRST LANGUAGE ENGLISH

Paper 0500/23
Directed Writing and Composition

Key messages

This paper was mainly assessed for writing, although there were fifteen marks available for reading in **Question 1**.

In order to achieve high marks, candidates were required to:

- use an appropriate form, style and register in both questions
- structure ideas and organise the response effectively to inform, persuade and engage the reader
- to produce detailed and evocative descriptions and engaging, credible narratives that understand the different kinds of content required for description and narration
- construct varied sentences accurately, with a clear attempt to create an effect on the reader
- use precise and wide-ranging vocabulary, appropriate for the task and style required.

General comments

There was a secure understanding by the majority of candidates on how marks were awarded for both tasks, Directed Writing and Composition. There were few very brief scripts or responses. Nearly all candidates understood the instructions for the examination and attempted **Question 1** and either a descriptive or narrative writing task, with very few rubric infringements seen by examiners. In **Question 1**, most responses were written mostly in candidates' own words. There were a few responses which were mostly or wholly copied from the texts in the Reading Booklet Insert, although some lifting of phrases or sentences was fairly common. Where this lifting of material was more extensive, marks were inevitably limited for both Reading and Writing. In **Section B**, most responses showed an understanding of how the content of descriptive and narrative writing differs, although there were narratives submitted for the descriptive writing tasks which made it difficult for examiners to award high marks for Content and Structure.

Nearly all responses showed a clear understanding of and engagement with the topic of the reading texts in **Question 1**. Most responses were written in an appropriate style and format for a letter to a head teacher on whether or not pupils should be allowed to use their mobile phones to take pictures on a school trip. The register required here was well understood, with most responses reflecting the right level of formality required for such an audience. There was in many responses an attempt to persuade a head teacher that the use of mobile phones on a school trip was either desirable or a hindrance to the students appreciating the moment. The majority of responses approached the topic using their own words rather than lifting or copying the words in the passages. More effective answers here also tended to structure responses independently, selecting and commenting on the details in the texts in a coherent response. Some responses were structured by providing clear paragraphing for each section of their letter which was often a helpful way to organise the material for the benefit of the reader. Some opinion was often given as a conclusion to the letter to round it off in a suitable way. The factors for and against the use of mobile phones on the school trip were mostly rooted in the ideas given in the reading texts. In the middle of the mark range, responses tended to reproduce the points made in the texts, sometimes with an opinion given about some of the points made, with some beginning to evaluate the ideas. A substantial number of responses at this range made some comments about the ideas in the texts, though not always probing or offering judgements about them. In many cases, responses developed the idea of using the images from the phones to preserve memories of the school trip, either for themselves, their families or for future generations.

Less effective responses tended to repeat the idea in the texts, rather than selecting points and commenting on them. In some responses at this level there was sometimes a tendency to rephrase the ideas of each text, for instance, moments being fleeting so they have to be preserved so they can move you forever.

© 2025

Most candidates made good use of the bullet points in the question to help structure the response and the ideas in the texts were scrutinised thoughtfully in more effective responses. The images taken on mobile phones teaching us to see the beauty of the world and to appreciate it was often effectively evaluated. Less effective responses sometimes showed limited awareness of the specific audience for the article, the head teacher at a school, providing a summary of the ideas in the texts but without the focus of giving their views on whether or not using cameras on a school trip was desirable. Overall, however, there was often a clear adaptation of style and register for the given task. The introduction to the letter, clearly stating the letter's purpose, and the conclusion summarising the main points and expressing any desired actions, along with the structure and organisation of ideas required in a letter were well understood in the majority of the responses. In general most responses showed an ability to maintain an appropriate style and register for a letter with evidence of awareness regarding the purpose of the letter and the intended audience.

In **Section B**, effective responses to the composition questions were characterised by a clear understanding of the genre selected, descriptive or narrative, and of the features of good writing in each.

Descriptive writing at the highest level was evocative and subtle and most responses gave a range of descriptive detail without resorting to narrative. Many responses to the descriptive writing questions were very effective and sustained. There were some imaginative descriptions of an uncomfortable ride on public transport, whether it was a bus, train or other mode of transport. Some descriptions of a person working outdoors were engaging and effective. A wide range of approaches and scenarios was employed in these tasks, with some highly effective and detailed descriptions of the uncomfortable ride, how the observer reacted to being there and what they felt and imagined about their surroundings. Less effective responses to this question tended to become more narrative, for instance describing why the journey was taking place, or the details given were relatively clichéd or stereotypical. For the second question, there was a wide range of descriptions of the outdoor worker and their surroundings. More effective responses were able to develop intricate details of the worker, how they felt, what they looked like, with some effective description of the place and surroundings they were working in. Less effective responses sometimes lacked descriptive details and tended to have less organised ideas; for example, some descriptions just described the worker's tasks without reference to the surroundings or the worker them self.

Both narrative questions elicited a very wide range of approaches and interpretations and examiners awarded marks across the range here. Effective and engaging responses to the first question, a story that involved making a new friendship, had effectively developed plots, their characterisation was convincing and the climax to the plot was well managed. Less effective pieces tended to include more obvious or more mundane events or, conversely, a series of unlikely actions in responses which paid limited attention to characterisation and setting. While some included ordinary events, other less effective narratives were less credible or were under-developed in style and less cohesive in structure. The story with the title 'The last one,' was often effectively written whether it was a fictional narration or the candidates' own experience.

Some composition responses would have benefited from a clearer grasp of the features of good writing in specific genres. The best descriptive writing was specific, used some original and thought-provoking imagery and effectively evoked the atmosphere of the place or the thoughts and feelings evoked by the objects described. The conscious shaping of narratives to interest and intrigue the reader and the creation of credible characters were features understood by the most effective writers who chose narrative writing options. The tendency for descriptive writing questions to be answered by straightforward narratives with limited descriptive detail was noted by examiners, sometimes in responses where the writing was accurate and relatively fluent.

Comments on specific questions

Section A: Directed writing

Question 1

Your school has organised a visit to an area of great natural beauty. To appreciate the experience more fully, the head teacher has decided that students will only be allowed access to their mobile phones in an emergency, not to take pictures.

Write a letter to the head teacher giving your views on this decision.

In your letter, you should:
- **evaluate the ideas, attitudes and opinions given in the texts**
- **consider whether the experience will be more rewarding with or without the ability to take pictures.**

Base your letter on what you have read in both texts, but be careful to use your own words. Address both of the bullet points.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer, and up to 25 marks for the quality of your writing.

Examiners awarded high marks for Reading where there was some probing and evaluation of the ideas in the reading material, rather than a straightforward listing and reproduction of the points in the texts. Where the letter was also both accurate and ambitious in vocabulary and style, with a clear understanding of the appropriate style and register for the specific task and audience, the highest marks for Writing could be awarded. More effective responses here focused carefully on the arguments in the texts, with the highest marks awarded for those which handled the different ideas within the two texts with confidence and perceptive evaluation. The extent to which the implicit ideas and opinions contained in the texts were probed and scrutinised tended to determine the level of achievement for the response. These implicit ideas often involved the discussion of how, photographs preserved memories, had a sense of nostalgia and allowed these memories to be shared with others in the future. While most responses offered some ideas on how cameras captured special moments using the explicit ideas from the texts there was often a limited evaluation of these ideas implicitly. These responses often tended to take the form of a list of details the camera could capture, or a list of reasons on why students should or should not be allowed to use their cameras on the school trip

The range and number of different ideas in the two texts required some organisation and selection for the higher Levels in both Reading and Writing. An ability to assimilate the ideas from the two texts was shown in some responses. In Text B for example, the idea that we should remember significant moments without photographing them, was assimilated with the ideas from the material in Text A that memories are unreliable but photographs will faithfully preserve the moment.

In responses given marks in Level 5 and above for Reading, examiners often rewarded some careful grasp of the implications suggested by the texts, selecting relevant ideas and integrating them into their responses. For example, some responses discussed the use of the camera as a creative tool to take images which could be inspirational to others, that photography was a form of art that could ultimately lead to a career.

Most effective responses were often those that did not simply list the points for and against the use of mobile phones to take photographs but engaged with the passage by evaluating the material, inferring and expanding upon their ideas and offering inferences relating to the wider picture. For example, the long-term benefits of preserving images as opposed to the benefits of being able to enjoy the moment and appreciate it without the use of a camera.

Marks for reading

As always, the most effective responses adopted a consistently evaluative, critical stance and read effectively between the lines of the texts, drawing inferences and making judgements about being able to

© 2025

access mobile phones to take pictures and whether the experience would be more or less rewarding with the ability to take pictures.

Most responses included the reference in Text A to the fact that photographs were desirable as they preserved the moment enabling you to relive it and be moved by it forever. More thoughtful responses considered carefully the advantages and disadvantages of taking pictures, whether it was a better way of appreciating the beauty of the world than just being there in the moment. Some responses pointed out the fact that memories were unreliable so therefore they needed some way to preserve that moment and that the best way was by a digital image.

Others took the opposite viewpoint and argued that a photograph only took seconds to take and therefore did not detract from the moment. Responses that were awarded marks in Level 5 or 6 for Reading used a broad canvas of ideas that effectively evaluated the passages. These included ideas such as images can inspire others, foster creativity, and are a form of art. Some argued that reality as seen through a camera lens was often distorted and how this could be used by individuals to enhance their online image, discussing whether or not this was desirable.

In some highly rewarded responses, a wide range of ideas was developed and evaluated, both from the point of view of the desirability of taking photos and their drawbacks and these were able to make persuasive arguments and judgements about the factors to consider for letting students use the phones to take photographs. These included ideas such as photographs helping to cement shared memories with other people, the ability to learn from past images, and the sense of nostalgia these images evoked. Some candidates argued that digital image making was just as valuable as printed photos and their phone was their photograph album. Other candidates took the opposite stance that screen images did not have the same value as printed images. Also, the idea that the photograph should not be used online to enhance their image or compete with others was often effectively developed and evaluated both from the point of view of there being nothing wrong with this and the point of view of its undesirability.

Relatively few candidates developed the ideas about how photography could form an opportunity for creative growth for students. For instance, how it could motivate them allowing the schools to benefit from their art displays of their photography, which could be inspirational for other students. They did not develop how it was often easier to show friends or family a picture than to describe it in words so they too could share in the experience of the trip. More could have been said about the search for external validation on internet platforms such as Face book and Snap Chat and whether the photographers were more interested in the views of their audience rather than living the moment themselves.

Where some comment or opinion was offered, mostly without specific reference to particular points in the texts but generally relevant to the ideas in them, marks in Level 4 were usually awarded. Most candidates picked up on the most obvious points about photographs being a way to express yourself and to relive memories in the future but these ideas were used explicitly without probing or exploring them in depth. These responses sometimes developed the ideas effectively fully but did not evaluate the implicit ideas from either of the texts. Level 4 responses tended to have a large number of reproduced points, especially from Text A which was often referred to more than Text B, which was about how photography had changed. Some prefaced these ideas with the phrase ‘in an article written by a professional photographer I read it said that ...’ followed by a reproduction of the ideas. Although these ideas were relevant, they were rarely evaluated in any depth.
.
Examiners usually awarded marks in Level 3 for Reading where there was adequate breadth of coverage of the texts, and some selection of ideas from them, but without the more implicit meanings mentioned above or with less scrutiny of the points made in the passages. Often, there was a clear paraphrase of both texts but limited comment on the ideas in them. Where there were some brief opinions, usually at the end of the response, they tended to be general comments on why the Headmaster should allow the students to bring their phones on the school trip which were not effectively anchored in the specific ideas in the texts.

Comments made at this level were given mostly in the candidates’ own words. Less effective responses tended to paraphrase and list ideas and many given marks in low Level 3 and below contained much copied material. Copying of phrases was also relatively common, especially ‘The camera is there to preserve that moment so that it can live and move you forever’ and ‘These are the images that tell your story’. While there was generally a good understanding of the passages there was some misunderstanding of expressions such as ‘experience enhanced by photographs is a kind of consumerism to which we are now addicted’, and the digital revolution ‘unleashed’ in recent years, but on the whole the reading of the passage showed a clear understanding both of the passage and the task. Occasionally there was some misreading of the task and candidates wrote an article instead of a letter, but this was relatively uncommon. Where a mark of 6 was

© 2025

awarded, some firmer links with the passages were needed, whereas 5 was generally given for thin or mainly lifted responses in which there was some insecure grasp of the ideas in the passage. Those responses that showed no evidence of using the given texts and were very general in nature could not go beyond a Level 2 in the Reading mark.

Marks for writing

25 marks were available for style and register, the structure of the answer and the technical accuracy of spelling, punctuation and grammar.

Style and audience

Candidates needed to adopt an appropriate style and register for a letter to a Head teacher. Most responses showed a clear understanding of this required register, even where technical writing skills were ineffective, and this allowed examiners to consider marks for Level 4 and above where a 'sometimes effective style' was required. Although not always sustained, many articles began with a suitable introduction, outlining their points on the topic of access to mobile phones to take photographs during the school trip. Most responses were organised in paragraphs, which were sometimes helpful to the organisation of the ideas. Some high scoring responses used a more formal style, presenting their arguments in a methodical and structured way but making their case effectively and with some impact, while consistently adopting a suitable tone for a letter to a head teacher. These letters were moderately authoritative and consistently paid attention to both the purpose and audience for the letter.

In the middle range of marks examiners could sometimes award marks in Level 4, even where more technical writing skills were lacking, if the style and register adopted were appropriate for the task and the audience. A clear, consistent attempt to engage and inform the reader of the letter could sometimes compensate for other elements of style such as incorrect spelling or insecure grammar. Conversely, some responses which were generally accurate read like summaries of the reading material rather than a letter with a specific audience. In these cases, while letters often began appropriately, with a suitable introduction to the topic, there was limited awareness of the style appropriate for a formal letter. One response, for example, began the letter with 'I understand where you are coming from ...', without a suitable salutation or introduction to the letter. This showed a limited sense of audience and awareness of the purpose of the letter. A small minority of responses used quotations from the passage which were often not appropriate as the audience would not know where they were quoting from. Some used quotations more sensibly by explaining where this information was coming from, such as 'An article I read recently written by a professional photographer stated that …' This was a more suitable way of using the material rather than stating 'In text A it says that ...' Occasionally a more colloquial, less formal style and language crept into responses, which created a somewhat jarring tone for the task and audience. Expressions such as 'I get where you are coming from,' 'I am sending this letter to tell you,' or 'if we are not gonna have our phones,' affected the overall appropriateness of the register and sometimes limited the marks. Too colloquial a style can be inappropriate for an examination response.

Level 3 marks were usually awarded where the reading material was largely reproduced so that the organisation and sequence of sentences and paragraphs reflected the original and were not adapted to create a coherent letter. A minority of the responses lifted material directly from the passage which could not be credited even if this was presented in quotation marks. There were very few responses which were wholly lifted from the reading material.

Structure

Responses awarded high marks for Writing handled the material confidently and presented their arguments cogently. The issues addressed were combined so that the judgements which emerged were clearly derived from the ideas in the texts but the response was not dependent on them for its structure and sequence. At the highest level, the lines of argument were set from the first paragraph and the issues in the two texts were addressed but as a whole. The opening and concluding paragraphs of these effective responses tended to introduce and sum up the main points, with the intervening sections arguing a coherent case. The argument being pursued determined the sequence of ideas in these responses rather than the sequence of the original texts.

Responses given Level 5 marks and above for Writing tended to reflect a range of points made in each text but were reordered in a response which was sensibly structured and paragraphed. This often avoided the repetition of similar ideas, such as the idea of the best way to preserve a special moment whether by camera or with the mind's eye which was developed in both texts. An overall coherence and structure were required

© 2025

for this level which was usually less evident in responses below Level 5. These responses were generally well structured, although sometimes a lack of paragraphs meant that ideas were not grouped effectively or coherently organised.

Less effective responses sometimes struggled to provide a coherent argument and were more tied to the sequencing of the texts. In most cases the information given in the texts was offered with some rewording but not reordering of ideas. While some brief opinion was sometimes given at the end of the response, these views were imposed on the structure of the original texts rather than argued for throughout the letter. Sometimes at this level the response was too brief, which limited the marks that could be awarded.

Accuracy

Accomplished writing which was accurate and controlled as well as appropriate in tone and register was given a writing mark in Level 6. These responses were not only authoritative in style and convincing in their arguments but fluent and virtually free of error. There was a range of precisely selected and complex vocabulary and sentence structures varied and were consciously used, often rhetorically, to engage the reader. Some complex sentences structures were chosen which helped to balance and weigh up contending views and complex clauses were controlled by careful punctuation within sentences.

Level 5 responses were usually purposeful and clear, though perhaps not as ambitious and wide ranging in vocabulary or as precise in register or style as those given higher marks. Level 4 responses, as described in the marking guidelines, were 'sometimes effective' but not consistently so. Although the style was usually fairly plain, the language used was apt and generally accurate. A range of basic errors was made at this level which limited the effectiveness of the style but did not affect clarity of meaning. There were occasional lapses in the use of definite and indefinite articles (usually omission) and some grammatical disagreement, often between plurals and verb forms. There was often some confusion when to use 'it' and 'it's' as well as common spelling errors in this range including 'access', 'opinion', 'decision', 'recommend', 'believe', 'appreciate' and other words, some of which were used in the texts.

Faulty sentence structures, fluctuating tense use or too much lifted or copied material often kept writing marks for **Question 1** below Level 4. These responses often showed reasonable clarity in conveying meaning but there was a wide range of basic punctuation and grammar errors which meant that examiners could not award marks in Level 4. The omission of definite or indefinite articles was very common, as were tense errors, and agreement errors were more frequent and more damaging to meaning at this level. In rare cases, material from the texts was copied and responses where this occurred more substantially could not be given marks in Level 4 for Writing or for Reading because neither the content nor the style of the response was the candidate's own.

Ways in which this type of answer could be improved:

- be prepared to challenge the ideas in the reading texts
- look for ideas in the texts that you disagree with and explain why
- group ideas from both texts together and discuss them rather than repeat them
- think carefully about the kind of style which suits your task and the audience
- check your writing for basic punctuation errors, such as missing definite or indefinite articles, ineffective grammar or misspellings of key words which are in the passage.

© 2025

Section B: Composition

Descriptive writing

Describe an uncomfortable ride on public transport.

Describe someone working outdoors.

Both descriptive writing questions were popular choices, especially the description of the uncomfortable ride on public transport. Examiners awarded a wide range of marks for these responses. Both questions were interpreted in a wide variety of ways which examiners could reward appropriately. In the first task, various journeys were described on buses, trains, underground transport and sometimes boats. In the second task, a range of different outdoor workers were described, from gardeners, artists, and construction workers to oil rig workers and farmers.

Responses were more effective if they contained vivid and specific details rather than more general or stereotypical ideas and images. Most responses were relevant to the topic although some were a little generalised and lacked specific detail, or the detail was sometimes generic rather than specific and sometimes lacked relevance to the topic.

In highly rewarded responses to the first question, an ability to effectively engage the reader was shown. The uncomfortable ride was described with many effective and sensory images. One response, for instance, was a very convincing description of an underground subway with many developed ideas, for instance being full to the brim of people struggling to get to their destination, and the overwhelming smell of oxidised metal from the old vehicle. Another effective response described the journey writing in the third person, describing her discomfort as she gripped the sticky metallic pole desperately searching for an unoccupied seat, and her final relief at being able to emerge into the busy streets and humid air of the city; this response described the journey in intricate detail linking the descriptions into an integrated response. There were also descriptions of dilapidated old buses, crowded trains, including a tightly packed bullet train on a very hot day. Effective descriptions used a wide, varied and well-chosen vocabulary.

Some effective responses to the second question were able to vividly describe the outdoor worker, their appearance, their attire and their thoughts and feelings as they performed their tasks. A wide range of vocabulary was often used with some precision to do this. Some responses described workers such as gardeners, working outside, how they for instance carefully tended their plants, the terrain they worked in, their clothes and their rugged appearance from years spent outside. One candidate described a girl working in an outside café, in Paris, as she deftly moved between the tables the soft smile on her face never fading. Some responses also focused on the surrounding environment, such as for instance, someone working on a farm with the green crops contrasting to the dark brown soil and the stench of fertiliser filling the air.

Many responses were able to create a convincing and detailed overall picture. These were able to utilise varieties of focus to provide a well-balanced and secure structure and the descriptions were effective and engaging.

In both descriptive writing questions, unusual, closely observed details created convincing, evocative scenes in the best responses. Most were sustained and developed and at the highest level showed skill in building a detailed scene. These consciously crafted pieces held the reader's attention by linking the different elements described in an engaging, cohesive response. Level 6 responses were characterised by this cohesive structure as well as carefully chosen detail and striking images.

Level 5 responses tended to use a wide range of details and were well-constructed, if a little less effective and cohesive overall. At the bottom of Level 5 and in Level 4, responses were sustained and competently organised but usually more predictable. Selected scenes and details at this level tended to involve less striking images and more stereotypical ideas. These responses to **Question 2** tended to focus generally on how uncomfortable the journey was, the reason for the journey, and their thoughts and feelings when reaching the new destination. These descriptions included some general observations of the vehicle they were travelling in or the type of people that were accompanying them on the journey. The responses sometimes lacked the subtle details provided in more effective responses to make descriptions engaging for the reader. They were, however, adequately structured, with some range of vocabulary.

Level 4 responses tended towards a more narrative style, such as for **Question 3**, a first-person description of a day working as a gardener, or **Question 2** having to make a journey on public transport to reach a certain destination on time. These descriptions did develop images and details of what was seen or felt with

© 2025

some precision but they lacked the attention to detail of more effective responses and there was less variety of ideas and images.

Less effective responses given marks in Level 3 or below often included less well organised lists of details briefly given rather than developed. Level 3 responses often resorted to a narrative style with few descriptive details and little cohesion in the structure. Sometimes responses were brief or lacked structure and organisation. Vocabulary tended to be simple in range and lacked some precision. Responses often lacked descriptive details and tended to have less organised ideas, such as using the idea of a trip on public transport as the basis for a narrative rather than developing any images. They tended to use a plainer vocabulary with fewer observational details than those in the higher levels. Responses were less focused and controlled at this level.

High marks for Style and Accuracy often reflected the precise and varied vocabulary used as well as the technical accuracy of the writing. In both descriptive tasks, similar details were often included but more effective responses had a much wider range of vocabulary, precisely deployed to create specific effects. Highly effective responses showed an ability to use both simple and complex language and sentence structures to create subtle, complex atmospheres. In less effective responses, vocabulary was sometimes wide-ranging and complex but used with less precision. In a few cases, this insecure use of language resulted in a style which was difficult to follow and the credit which could be given for a wide-ranging vocabulary was lost by its imprecise use and lack of clarity. A significant number of responses showed a tendency to repeat the same sentence structure excessively, for instance in their description of the bus or train each feature of the uncomfortable transport being described by a simple sentence. On the other hand, complex and obscure language was unhelpful where it was not used with understanding.

As is often the case in less secure descriptive writing, tenses switched between past and present, sometimes within sentences. Incomplete or verbless sentences also affected marks given in the middle range, even where other technical aspects of style were more accurate. Lapses in grammar, perhaps minor in isolation but more damaging when persistent, also kept responses out of Level 4 for Style and Accuracy. This included disagreement, especially between pronouns and verbs, and the omission of definite and indefinite articles were also common and damaging to otherwise accurate style at this level.

Ways in which the writing of descriptions can be improved:

- try to avoid clichéd scenarios and consider a more individual and original selection of content. Choose a scenario which gives you a range of details on which to focus
- keep your focus on details which will help you evoke a particular atmosphere
- write sentences with proper verbs and do not switch tenses
- use vocabulary precisely: complex words used wrongly do not help your style.

Narrative writing

Write a story which involves making a new friendship.

Write a story with the title, 'The last one'.

Both narrative writing questions were popular choices across the mark range and there was a very wide range of plots, characters and scenarios in these responses. Effective responses were well organised and thoughtful interpretations of the title which used engaging, credible ideas to create developed stories. An ability to shape the narrative and to produce moments of tension or drama and to vary the pace of the story were credited by examiners as essential elements of narrative writing, as was the use of characterisation to create believable protagonists and characters. The first question offered a range of scenarios for making the new friendship, from someone starting a new school or moving to a new area, to making a new friend whilst on holiday. Effective responses were able to build a narrative using setting, character and plot development, whereas less effective responses offered a straightforward narrative in which there was little opportunity to elaborate on character, setting or, the creation of tension.

Responses at Level 5 and 6 wrote engaging and effective narratives with effectively developed plots. Characterisation was convincing and the climax to the plot was well-managed. One narrative for **Question 2** was written set in a dystopian landscape where two survivors meet each other scavenging for food and form an unlikely friendship. Another narrative described an Antarctic scientist studying penguins and the friendship she developed with a young and lonely local girl. Whichever interpretation was given to the tasks, for Level 5

© 2025

marks for Content and Structure, stories needed to be well-managed with some conscious shaping of the plot.

Level 4 marks for Content and Structure were awarded for stories which were relevant to the task but were less developed and used fewer elements of effective narrative writing. Characters and narrators tended to be more simply drawn and responses were often more dependent on a series of events, lacking attention to characterisation and setting. A simplicity of content or a lack of development rather than ineffective organisation was typical at this level. Similar plots and scenarios were used as those in more effective narratives but these narratives rarely moved beyond a simple retelling of events.

These Level 4 responses had a relevant plot; their narratives were cohesive with some setting of scene and their characters sometimes developed. Often the plots centred on making friends after moving to a new school, for example, in one response a new friend was made at school, culminating in a dramatic sleepover where it was discovered the new friend's intentions were malignant. Another response was written about how the character was nervous and anxious about the new school until meeting a new friend who introduced them to the other students leading the plot to a happy conclusion.

Lower-level responses had less organised plot lines which did begin to meet the brief but lacked details and clear development of ideas. For example, there was one response about a lonely boy forming a friendship with a pet dog with very little detail about how the boy felt before and after the friendship resulting in a very briefly developed plot.

For the second question, the title 'The last one' was used in a variety of different ways from a story about the last packet of crisps in the shop to a narrative in a futuristic world about the last survivor of the human race. Effective responses were often, imaginative, dramatic and engaging. Less effective responses tended to narrate a timeline of events, making their responses relatively basic.

In higher level responses, the plot often led up to the title, fully incorporating this into the narrative, leading to a suitable climax and conclusion. In one response, there was a tension filled description of two siblings hiding in a classroom from their dangerous father as he approached the last classroom to kidnap his daughter after a failed custody battle. In another response the candidate described a character alone in the world after an apocalypse. The empty and eerie surroundings were convincingly described with a plot twist in the last paragraph where a penetrating voice was heard whispering 'you weren't supposed to live'. Level 5 responses were usually more straightforward in structure and approach but nonetheless engaging for the reader. Examiners could award marks in Level 5 for Content and Structure where the narrative was organised and there was a clear attempt create a developed story which was relevant to the task. Responses in this range were more usually chronological accounts but were cohesive and balanced and contained a suitable ending depicting some satisfying resolution: for example, in one engaging response there was a mostly clear narrative about a 'Game' being held where the contestants had to fight until they were the last one standing. This response gave detailed descriptions of the contestants in the event, of how they felt and acted, and the surroundings were also well described. The last contestant standing was a little girl called 'Memory' but the significance of this character and her name was not made clear to the reader. Because of the mostly well-developed characterisation and clear structure the candidate was awarded Level 5 despite the ambiguity of the conclusion. Level 4 responses were often relevant and developed narratives in which a character would for example describe how everyone disappeared from the world with the exception of them self, what they did and how they coped with this. Although these responses developed features of character and setting, they often lacked a suitable conclusion or enough interest to engage the reader.

Less effective responses were often simple, straightforward narratives without much detail of setting or description of the characters, although these responses were relevant, they were often just a simple a timeline of events. Sometimes responses were disorganised accounts of something or someone being the last one, which although relevant lacked cohesion and a sense of purpose.

High marks for Style and Accuracy were given for responses where the writing was engaging and varied in vocabulary and where different sentence structures were controlled and used to create particular effects. The characteristics of Level 6 writing included a fluent and flexible use of language which was subtle enough to create a range of effects to engage the reader. Punctuation within sentences, especially in the use of dialogue, was secure in responses in Level 6 and were coupled with a sophisticated and precise range of vocabulary, the highest marks were given. Responses awarded marks in Level 5 tended to be less ambitious and complex but still mostly accurate and largely fluent while Level 4 responses were plain in style and lacked some range in vocabulary. At this level, the writing had few serious errors which affected the clarity of meaning, such as insecure sentence control, sentence separation and grammar errors. Relatively common errors of grammar and expression appeared increasingly in responses given low Level 5 and Level 4

© 2025

responses, such as disagreements, missing articles and imprecise, sometimes over-ambitious vocabulary. Errors in sentence control and separation, as well as lapses in tenses, limited otherwise competently told narratives to Level 4, as did frequent errors in basic punctuation or grammar. The omission of definite and indefinite articles, the incorrect use of participles or errors in grammatical agreement contributed to a lack of fluency and accuracy which kept many responses out of Level 5. Similarly, basic punctuation errors and the misspelling of simple words and wrongly selected homophones sometimes appeared in otherwise competent writing and were sometimes frequent enough to affect the mark for Style and Accuracy. A frequent reason for keeping an otherwise clearly written narrative out of Level 5 was insecure demarcation of sentences, most commonly the use of commas where full stops were needed. Though the mixing of tenses and the use of incomplete sentences were perhaps more prevalent in the descriptive writing, these issues also limited the marks available in the narrative writing.

Ways in which the writing of narratives can be improved:

- think about how to interest and intrigue the reader in shaping your narrative
- consider imaginative ways to tell your story, apart from a chronological account
- characters' thoughts and feelings help to engage your reader. Do not rely on events
- check your writing for errors which will badly affect your mark, such as basic spelling and punctuation mistakes
- use complicated vocabulary with precision and consider the power of simple words and sentences to create particular effects.

Paper 0500/03
Coursework Portfolio

Key messages

Candidates did well when they:

- adapted their writing style to demonstrate an understanding of the needs of different audiences and context for each of the three assignments in their coursework portfolio
- read critically and thoroughly evaluated the implicit and explicit ideas, opinions, and attitudes they identified in a text for **Assignment 1**
- assimilated ideas from a text to provide developed, thoughtful and sophisticated responses in **Assignment 1**
- supported their analysis, evaluation and comments with a detailed and specific selection of relevant ideas from a text in **Assignment 1**
- wrote original and interesting assignments which reflected their personal ideas, feelings and interpretations of events and situations
- wrote with confidence using a wide range of vocabulary with precision and for specific effect
- sequenced sentences within paragraphs in a way which maintained clarity of arguments, description, or narrative
- demonstrated a high level of accuracy in their writing
- engaged in a process of careful editing and proofreading to identify and correct errors in their writing.

The best practice for the production and presentation of coursework portfolios was when:

- centres followed the guidelines and instructions set out in the Course syllabus and the Coursework Handbook
- a wide range of appropriate texts were used for **Assignment 1**, which contained ideas and opinions to which candidates could respond, and were relevant to their interests
- centres set a range of appropriately challenging tasks which allowed candidates to respond individually and originally to topics and subjects they were interested in, or of which they had personal knowledge or experience
- teachers gave general advice for improvement at the end of the first drafts
- following feedback, candidates revised and edited their first drafts to improve their writing
- candidates checked, revised, and edited their final drafts to identify and correct errors
- teachers provided marks and summative comments at the end of the final draft of each assignment which clearly related to the appropriate mark level descriptors
- teachers indicated all errors in the final drafts of each completed assignment
- centres engaged in a process of internal moderation and clearly indicated any mark adjustments in the coursework portfolios, on the Individual Record Cards (ICRC), and on the Candidate Assessment Summary Forms (CASF).

General comments

A significant number of candidates produced interesting coursework portfolios which contained varied work across a range of contexts. There was evidence to show that many centres set tasks which allowed candidates flexibility to respond to subjects related to their personal interests or experiences. Most coursework portfolios contained writing of three different genres. Moderators reported seeing very few incomplete folders.

The majority of centres provided the correct paperwork and completed all relevant forms accurately. The Moderation Team reported that many centres provided summative comments closely related to the mark

© 2025

schemes at the end of each completed assignment. These were extremely helpful in helping moderators to understand how and why marks had been awarded and centres are thanked for following the process as instructed in the Coursework Handbook.

The major concern for all moderators was that some markers of the coursework portfolios did not indicate errors in the final draft of each assignment and/or provide a summative comment which referred to the marking level descriptors to justify the marks awarded. Failure to follow this process often resulted in inaccurate or inconsistent marking and was one of the main reasons for adjustment of marks.

Administration

Successful administration was when centres:

- used the coursework checklist to ensure all administration guidelines had been followed
- submitted their sample and documents by the deadline
- carried out a thorough process of internal moderation which was clearly signposted on the assignments themselves as well as all relevant documentation
- indicated all errors in the final draft of each assignment
- supplied marks and specific comments relating to the mark schemes at the end of the final draft of each assignment
- accurately completed the CASF and ICRC, including any amendments made during internal moderation
- ensured that each coursework folder was stapled or tagged and securely attached to the ICRC, using the ICRC as a front cover
- submitted their sample of coursework folders without using plastic or cardboard wallets.

Internal Moderation

Moderators reported further improvements in the number of centres getting the administration right this session. This can be attributed to the coursework checklist which when used ensures that centres follow all guidelines in the 0500/0990 Coursework Handbook.

Centres who followed the instructions for carrying out internal moderation as directed in the Coursework Handbook are thanked for engaging in this important process. There was a general trend of greater accuracy of marking by centres where there was clear evidence of internal moderation than centres where no internal moderation process was evident on the coursework folders and documentation.

Some centres did not record changes made at internal moderation on the candidates' Individual Candidate Record Cards (ICRCs) which caused some confusion about the final mark awarded to candidates. Centres are requested to ensure that any changes made at internal moderation are signposted clearly on the work itself then also recorded on the ICRC as well as on the Coursework Assessment Summary Form (CASF).

Using the Coursework Handbook

A cause of concern for all moderators was that some issues persist even though there are clear instructions in the Coursework Handbook, and the same concerns have been raised in previous Principal Moderator Reports. To ensure effective and accurate marking is achieved, and that all paperwork arrives safely for moderation, it is essential that all the instructions given in the Coursework Handbook, and on the relevant forms, are carefully followed.

Below highlights the three most significant issues related to the administration and annotation of candidates' work which led to mark adjustments by moderators:

1 Indicating all errors in the final version of each assignment

- Some of the assignments showed little or no evidence of complying with the instruction in the Coursework Handbook that **markers should indicate all errors in the final draft of each assignment**. This process helps markers to effectively and accurately evaluate the strengths and weaknesses of a piece of work and to apply the most appropriate 'best fit' mark from the mark scheme. If this process does not take place, it is difficult for markers to make a balanced judgement. In several centres there was evidence across all three assignments that markers had awarded marks from the higher levels of the assessment criteria to work containing frequent, and often serious errors that had

© 2025

not been annotated by the marker. This inevitably led to a downward adjustment of marks by the moderator.

2 Individual Candidate Record Cards (ICRC)

- A number of centres did not attach the portfolios of work to the ICRC in accordance with the instructions in the Coursework Handbook and point 4 on the electronic version of the ICRC.
- Some confusion was caused when centres included ICRCs for the whole cohort as well as the ICRCs for the sample sent; centres only need to send the ICRCs (securely attached to the coursework portfolio) for the candidates in the sample submitted for moderation.
- On some folders there were errors in the transcription of internally moderated mark changes, or it was unclear which mark was the final one. **Where internal moderation has taken place, any mark changes should be transferred from the assignment to the ICRC** to ensure that the moderator has a clear understanding of all mark changes.

3 Coursework portfolios

- A small number of centres did not collate the individual assignments into complete coursework portfolios but instead placed loose pages of work into the grey plastic envelopes and despatched them to Cambridge; this caused moderators some difficulties when assembling the coursework folders and increased the risk of work becoming lost or mislaid. Centres should secure each individual coursework folder using tags or staples with the ICRC securely fastened as a cover sheet.
- Moderators reported that several centres used plastic wallets or folders to present candidates' work as an alternative to securely attaching the individual assignments to the ICRC; this caused extra work for moderators and increased the risk of work being mislaid. **Centres are requested not to place coursework folders into plastic or cardboard wallets.**
- Some centres included more than one rough draft in each folder; this is unnecessary and can lead to confusion. Please ensure that the rough draft included is clearly labelled as a draft.
- Occasionally rough drafts contained annotations and specific feedback; centres are reminded that when markers offer feedback on rough drafts, it should be general advice. No errors should be indicated, and the marker should not offer corrections or improvements.
- Some centres included documentation not required for the moderation process; the only paperwork that should be included in the sample is clearly indicated in the Coursework Handbook.

Use of Artificial Intelligence

- Moderators reported seeing a number of responses where AI may have been used. This was particularly apparent where a draft had been improved considerably in terms of style and use of vocabulary, or where a response to one assignment appeared to attain a much higher standard than the other assignments in the folder.
- Centres are reminded that it is the teacher's responsibility to ensure that all coursework assignments are the candidate's own work and that any use of generative AI for research purposes has been clearly acknowledged in the work. Centres are reminded that the inappropriate use of generative AI to create or enhance student work without acknowledgement risks being classed as plagiarism.

Comments on specific assignments

Assignment 1

Candidates were successful when:

- they responded to interesting texts of appropriate length which contained engaging content
- they demonstrated analysis and evaluation of the individual ideas and opinions identified within a text
- the form, purpose and intended audience of their writing was clear to the reader
- they wrote in a fluent, accurate and appropriate style.

Moderators commented that many candidates responded to texts which were of an appropriate length and challenge, and which appealed to the interests of the candidates. Successful texts included articles exploring issues relevant to young people, for example, single-sex schools, social media influencers, the pros and cons of having tattoos, climate change, the influence of fashion, the pros and cons of AI, and issues of local or national interest. Less successful texts were those which were old and outdated, texts which were too

© 2025

informative (and often long) or texts which were of limited personal interest to the candidates. Texts selected for **Assignment 1** should be an appropriate length, explore ideas and offer opinions, and use rhetorical or literary devices designed to provoke or sustain the reader's interest to ensure that the text offers scope for candidates to fully engage and respond to it in a sustained piece of writing. Centres are encouraged to use a good range of relevant and up-to-date texts for **Assignment 1**. Other less successful texts were ones where the candidate fully endorsed the writer's views and opinions because they offered few opportunities for evaluating those ideas and opinions, as required by the mark scheme. It is also crucial to select texts for their quality of written communication: moderators reported seeing a number of poorly written texts taken from a variety of websites. Many of these were too long and tended to be informative, offering very little scope for rigorous evaluation or analysis. Moderators also reported seeing texts which contained potentially offensive or disturbing material. This may indicate that candidates were allowed to make their own text choices, but centres are reminded that it is their responsibility to ensure that all texts used for **Assignment 1** are fit for purpose, and this includes avoiding offensive or unsuitable material.

Some centres set one text for a class or sometimes whole cohort. When this approach was adopted by a centre there was usually a tendency for candidates to produce responses which were very similar in content and structure due to heavy scaffolding. This made it difficult for candidates to create the original and sophisticated responses expected of the higher-level assessment criteria and was a reason for adjustments of marks. Centres are advised that teaching a text to a whole class and offering a scaffolded plan for the response may be a useful teaching strategy for developing the necessary skills and knowledge for **Assignment 1**, but this approach should not be used for the final coursework submission; it is recommended that candidates are offered a choice of texts approved by the teacher.

If centres are unsure about how to approach and set tasks for **Assignment 1**, they can refer to the Course Syllabus and the Coursework Handbook. Both documents provide advice and guidance about task setting and text selection and can be found on the School Support Hub via the main Cambridge website.

Reading

Although many centres were accurate with their marking of reading, as in the previous moderation sessions, there was a significant trend for many centres to award marks from the highest-level assessment criteria to work which more appropriately met the lower-level assessment criteria. Candidates who successfully met the higher-level assessment criteria were those who demonstrated a consistently evaluative approach to most of the ideas and opinions in a text, and provided a developed, sophisticated response which made direct reference or included quotes from the text. Candidates who engaged in a general discussion about the topic or subject of a text, or those who did not thoroughly evaluate a text, tended to produce work which more appropriately met the Level 4 assessment criteria in Table B (reading). The most common reasons for adjustments to a centre's marks for reading were when moderators identified a trend of candidates engaging in a general discussion about the topic of a text/s, or when the number of points covered were 'appropriate' rather than 'thorough'.

Writing

Many candidates responded to texts in an appropriate form and style. Letters were the most popular choice of form, and many candidates demonstrated some understanding of audience and purpose. When candidates were less successful with writing, it was often because the form, intended audience and purpose of the writing was not clear. This made it difficult for the candidates to meet the highest-level assessment criteria and was a reason for adjustments to writing marks for **Assignment 1**. Successful responses to **Assignment 1** tasks were those in which the writing was highly effective, almost always accurate, and consistent throughout in the application of form and style. Work which showed insecurity with form and style, such as the omission of an appropriate ending to a letter, a limited or inconsistent use of rhetorical devices for speeches, or lack of clarity of the intended audience, tended to meet the assessment criteria for Level 5 Table A (writing) or below. The moderators noted that there was a tendency for some centres to award marks from the highest-level assessment criteria to work which more appropriately met the lower-level assessment criteria.

Another common reason for the adjustment of marks for writing was because of the accuracy of the candidates' writing. When errors impaired meaning, such as the incorrect construction of sentences or use of grammar, typing errors, or the incorrect selection of words from spellcheck, the overall quality and efficacy of the discussion was affected. Errors such as these are classed as serious and make it difficult for candidates to meet the higher-level assessment criteria; this type of writing is more characteristic of writing achieving marks from the middle to the lower levels of the assessment criteria. Moderators also noted a tendency for

© 2025

centres to over-reward vocabulary that had some merit in its selection but was not always used precisely or effectively in the response.

Advice to candidates for Assignment 1

- thoroughly explore, challenge, and discuss the ideas in the text
- avoid making general comments about the topic or subject of the text, instead, ensure that comments are specifically related to the ideas, opinions or attitudes identified in the text
- look for, and use inferences made implicitly in the text
- look for contradictions or misleading assumptions in the text and comment on them
- develop points to create a thorough, detailed, and clear line of argument or discussion
- make sure that the audience and purpose is clear and adapt the written style accordingly
- proof-read assignments to ensure punctuation, vocabulary choices and grammar are correct.

Assignment 2 (description)

The majority of tasks set for **Assignment 2** were appropriate and encouraged candidates to write in a descriptive style. Many students wrote engaging and vivid descriptions from experience or their imaginations, which were a pleasure to read. Moderators also noticed that there were fewer descriptions which slipped into narrative than in previous sessions, but this is still a relatively common flaw in descriptive writing assignments, sometimes due to the nature of the tasks set. Moderators reported seeing some tasks which invited candidates to describe a specific scene from a play, or chapter from a novel, which tended to lead to unoriginal responses, or tasks more suited to narrative writing. Centres are reminded to set descriptive tasks and remind candidates to avoid using narrative writing techniques in their responses.

The most engaging and successful descriptions were those where the candidates had carefully selected vocabulary to create a realistic and credible sense of atmosphere, place or person, and which were well sequenced and carefully managed for deliberate effect. Successful responses included descriptions of towns or cities in which candidates lived, important events in candidates' lives, or significant settings or places. Less successful tasks were those which asked candidates to describe events or scenarios of which they had no personal experience, or settings and situations in which the candidate clearly had no interest or engagement. Many of these responses relied on unconvincing descriptive writing which did not engage the reader. This type of writing is characteristic of work achieving marks from the middle to lower levels of the assessment criteria, although it was noticed that many centres awarded marks from the higher-level assessment criteria. This was quite often a reason for adjustment of marks from Table C (content and structure).

Whilst many candidates showed a secure and confident understanding of language, there was still a general tendency by a number of centres to award marks from the higher-level assessment criteria to work which contained ineffective overuse of literary techniques. Some moderators commented that this seemed to be actively encouraged by some centres. To achieve marks from the higher-level assessment criteria, candidates need to demonstrate a confident and secure understanding and use of language for specific effect. This is difficult for candidates to achieve if they over-use adjectives, include inappropriate images or idioms and/or use obscure or archaic language. The overworking of language was a common reason for moderators adjusting marks.

Another common reason for adjustments to marks was when moderators identified a trend of awarding marks from the higher-level assessment criteria to writing that contained a limited range of sentence structures, incorrectly constructed sentences, or contained frequent errors with punctuation and grammar. Writing that achieves marks from Levels 5 and 6 of Table D (style and accuracy) is expected to be consistently accurate, consistent with the chosen register, and demonstrate an ability to use a range of sentences for specific effect. The moderators saw some writing which displayed these characteristics, but a significant number of the assignments receiving marks from centres from Levels 5 and 6 in Table D more frequently displayed the characteristics of writing expected from Level 4 or below. Many candidates 'told' the reader about the scene being described, rather than engaging the reader with a careful and precise use of vocabulary and images. The moderators also noticed a general trend for candidates to use repeated sentence structures and create almost list-like descriptions.

In addition, the work of a significant number of candidates contained frequent and serious errors which impaired the meaning and overall effect of the candidates' work. The most frequent errors were missing prepositions and articles, tense inconsistencies, typing errors, commas used instead of full stops and grammar errors. Quite often, the meaning of sentences was blurred, or meaning was lost altogether. Errors

© 2025

which affect the meaning and clarity of writing cannot be considered as 'minor'. As mentioned earlier in this report, the absence of the indication of all errors made it difficult for the moderators to determine whether errors had been considered when marks had been awarded; moderators noted that on some weaker assignments no errors had been annotated, and the summative comment declared a high level of accuracy. Accurate and effective application of the assessment criteria is achieved through the careful weighing up of the strengths and weaknesses of a piece of writing and the application of a mark which 'best fits' the assessment criteria. To achieve this, it is essential that errors are identified and indicated by the markers. Engaging in this process allows markers to effectively balance the strengths and weaknesses of a piece of writing and apply marks that are most appropriate to their candidates' work.

Information and guidance on how to apply the mark schemes are given in the Coursework Handbook. Examples of good tasks and exemplification of the standard of work expected at the different levels of the mark scheme are also provided in the Coursework Handbook.

Advice to candidates for Assignment 2

- use a range of vocabulary suited to the context and content of the description
- create images appropriate for the context and content of the description
- create an engaging imagined scenario using language designed to have an impact on the reader
- avoid slipping into a narrative style
- proof-read responses to identify and correct common errors such as missing articles and prepositions, switches in tenses and typing errors
- avoid repetitive sentence structures; instead use a range of sentences for specific effect.

Assignment 3 (narrative)

Much of the task setting for **Assignment 3** was generally appropriate and moderators saw some engaging and effective narratives which were well controlled and convincing. Moderators reported seeing some tasks which did not invite narrative responses as they were too informative. These included accounts of Jack the Ripper or sometimes descriptions of film or book plots. Successful narratives were those in which candidates created stories characterised by well-defined plots and strongly developed features of narrative writing such as description, strong characterisation, and a clear sense of progression. The narration of personal experiences and events, or responses where candidates were able to create convincing details and events within their chosen genre, tended to be more successful. Candidates were generally less successful when their understanding of audience and genre was insecure, and the resulting narratives lacked credibility and conviction. Moderators commented that this sort of writing was often seen when candidates were writing in the genre of horror or murder mystery stories. Stories such as these, although containing a definite beginning, middle and ending, were often unrealistic and incredible, or lacked development of character or plot. Some responses failed to conclude properly, ending with an unconvincing or unsatisfactory cliff hanger. This sort of writing is classed as 'relevant' or 'straightforward' and should expect to be awarded marks from Level 4 or below from Table C (content and structure). Moderators noticed that there was a trend with a significant majority of the work sampled for centres to award marks from Levels 5 and 6 to writing which more appropriately fitted the Level 4, or below, assessment criteria. This was quite frequently a reason for marks being adjusted.

When moderators saw very accurate work containing precise well-chosen vocabulary, and which maintained a consistent register throughout, they could agree when centres awarded marks from Levels 5 and 6 in Table D (style and accuracy). As with **Assignments 1** and **2**, moderators noticed a significant trend for centres to award marks from the highest levels of the mark scheme to work which contained frequent and persistent errors and which more accurately met the assessment criteria from Level 4 or below in Table D. This was a common reason for adjustment of marks. The comments made for **Assignment 2** with regards to accuracy and the annotation of errors are also relevant to **Assignment 3** and should be noted by all who mark coursework.

Advice to candidates for Assignment 3

- create stories that are realistic, credible, and convincing
- remember that characters' thoughts and feelings help to engage the reader
- avoid clichéd scenarios and consider an individual and original selection of content
- carefully proof-read and check assignments for errors such as punctuation, use of prepositions and articles, tenses, and construction of sentences.

FIRST LANGUAGE ENGLISH

Paper 0500/04
Speaking and Listening Test

Key messages

Whilst the majority of centres adhered to the rubric of the test with regard to timing, some did not follow the requirement to conduct full tests. This is a serious concern. Where centres have conducted short tests, particularly for **Part 2**, the conversation, Moderators have been instructed to adjust marks to address the brevity.

Part 1 should last for 3 **–** 4 minutes. A significantly short **Part 1** response will affect the mark that should be awarded. Equally, an overly long response to **Part 1** should also affect the mark awarded.

Part 2 should last for 7 **–** 8 minutes and it is the responsibility of the Examiner to ensure the correct timing is adhered to. Conversations that run for significantly less than the minimum 7 minutes required do not allow candidates the opportunity to access the full range of marks available because certain descriptors in the higher levels cannot be met.

Part 2 should consist of a conversation between the candidate and the Examiner. It follows that a **Part 2** that is in essence a series of unrelated questions is not an appropriate model to use for the most successful outcome. Questions should be used to prompt candidates to explore ideas and opinions related to the topic content introduced in the **Part 1** talk but a **Part 2** that consists solely of questions followed by answers is not a natural conversation and cannot be credited as such when awarding marks.

Centres should avoid grouping marks in the top level unless this is strongly evidenced in the candidates' performances. Centres that simply award marks in Level 5 for either **Part 1** or **Part 2**, without recourse to applying differentiation where it is needed, actually disadvantage those candidates who may have performed to a higher level. This was particularly noticeable in **Part 2**. The way that moderation works means that inflating marks for those candidates who do not justify them through performance will almost certainly mean downscaling is applied.

Administration – General comments

For most centres, administration of the test was diligent and accurate. Summary forms were completed to a high degree of accuracy and samples uploaded to SfA were of a very good sound quality.

Where there were issues, the following guidelines may help to clarify administrative requirements:

- Each candidate's test requires a full formal introduction to be made by the Examiner prior to the beginning of **Part 1**. This introduction should include the centre name and number, the candidate's full name and candidate number, the date on which the test is being recorded and the name of the Examiner. This is important information for the Moderator. The overwhelming majority of centres were compliant with this requirement and are to be congratulated for their diligence.
- Whilst it is perfectly acceptable for centres to create their own version of the Summary Form (the OESF), it is important that any such version includes all the same information required on the form provided by Cambridge. A form that does not have a full breakdown of the marks for each candidate in the cohort is not acceptable. All forms should have, therefore, a breakdown of the marks that includes a mark out of 20 for **Part 1**, a mark out of 10 for **Part 2** Speaking, a mark out of 10 for **Part 2** Listening and a total mark out of 40. A form that truncates **Part 2** into one mark out of 20 is not acceptable for the Moderator.
- Centres are reminded that for moderation to take place effectively and efficiently OESF Summary Forms are required that show the breakdown of marks for the whole cohort of entered candidates and not just those in the sample requested.

© 2025

- Centres are to be congratulated for managing internal moderation where more than one Examiner was involved in conducting the tests. However, these centres should be careful to enter the correct set of marks into SfA. On some occasions the original marks appeared in SfA even though changes had been made during internal moderation.
- It is the centre's responsibility to check the quality of the recordings being made, preferably as an ongoing process during each recording session, to ensure that the recordings are clearly audible and without interference. On a few occasions, the Examiner was clearly audible, but the candidates were not. Any problems with the quality of recordings should be reported to Cambridge immediately so that candidates are not adversely affected by such issues.
- A small percentage of centres uploaded videos of their candidates performing their tests. This practice is actively discouraged.

Conduct of the test – General comments

Overall, across the component entry, the standard of examining was very effective with candidates being given plenty of opportunities to express their ideas and demonstrate their range of oratory skills productively. There were some centres who did not follow the rubric set out in the syllabus but still awarded highly inflated marks for their candidates. Subsequently, these marks were reduced upon moderation.

Where there were concerns, the following advice is offered:

- It is strongly advised that each test should begin with the Examiner's formal introduction and be followed immediately by the candidate performing **Part 1**, the Individual Talk. If an Examiner feels that a candidate is very nervous and needs a moment of calming prior to the formal test beginning, it is recommended this is done before the recording is started. Examiners formally starting the test then engaging in 'off topic' conversation with candidates before asking them to begin their **Part 1** task is strongly discouraged.
- Given that both Speaking and Listening are assessed in **Part 2**, it is important that the conversations last long enough for candidates to demonstrate their strengths in both mediums. It is the Examiner's responsibility to ensure this minimum expectation of 7 minutes is met so that candidates are given every opportunity to demonstrate the range of skills they possess.
- If a candidate has exceeded the maximum 4 minutes for **Part 1**, the Examiner should not compensate by shortening the time allowed for **Part 2**. Candidates must be allowed the required 7 **–** 8 minutes to complete a full response to **Part 2**, irrespective of the length of the talk in **Part 1**.
- It is also important that the conversations offer sufficient challenge to allow candidates to demonstrate the range of skills they possess. Focused questioning and prompts are needed to move the conversation forward, together with an adaptability on the part of the Examiner to absorb the candidate's previous comments and to extend the conversation as a result. A **Part 2** that is merely a question-and-answer session is not a natural conversation and as a consequence is limited in terms of the marks that should be awarded.
- Examiners who rely on a pre-determined set of questions disadvantage their candidates, in particular with regard to the mark for Speaking in **Part 2**. A question from the Examiner should lead to an answer from the candidate which then may lead to a comment or prompt from the Examiner that is connected to the same content matter. This will in turn lead to another connected response from the candidate; and so, the conversation develops naturally.
- Examiners who dominate conversations or who frequently interrupt candidates during the conversation do so to the disadvantage of those candidates. Effective Examiners prompt candidates then allow them the opportunity to respond in full and to develop their ideas before moving the conversation forwards again.

Comments on specific sections of the test

Part 1 – Individual Talk

The following comments by Moderators reflect performance in **Part 1** in this series:

Focused talks are more successful in that they allow the candidate to explore and go 'deep' into a topic. For example, instead of 'Music', I enjoyed listening to 'The Power of Music' and 'Music Invokes Memory'. Similarly, instead of the broader 'Pets' there was 'Protecting Domestic Pets'.

© 2025

Many candidates had experiences of travel or living in different countries to draw on so there was plenty to talk about. However, this needs to be framed in a way that demands some reflection or evaluation rather than just an explanation of what happened.

*Avoid **Part 1** talks which come across as over-scripted or over-memorised. Instead, aim for a more natural approach which engages the audience and retains some spontaneity.*

Some candidates chose to tackle a specific aspect of their topic, and this benefited them greatly, allowing them to focus on a specialised area or point of debate.

Almost exclusively, all the responses to **Part 1** were in the form of a presentation. This format remains a safe and acceptable one, particularly if there is an attempt to analyse, evaluate and reflect on personal experiences. For many candidates this choice remains a safe and productive way to achieve a high mark in **Part 1**, but only when well-timed and clearly structured. Less successful responses to **Part 1** tended to lack focus because a strong structure had not been created and time constraints had not been factored in. Largely narrative responses that follow a linear path, such as talking about a holiday or simply restating facts about a topic choice, tend to be unimaginative and rarely achieve higher than Level 3. This is why topics such as 'My Favourite Football Team (or video game, K-Pop band, movie, hobby)' do not tend to be very successful. Generally, these kinds of topic only become more successful if there is an added element that expands the talk beyond adequate. For example, 'How My Hobby Has Been Life-changing' immediately introduces more sophisticated elements into the talk through introspection, analysis and evaluation.

Very strong performances in **Part 1** successfully combined excellent knowledge and development of a topic, a tightly defined structure timed accordingly and a confident delivery style. It should be noted that the bullet point descriptor 'lively' in Level 5 does not have to mean that a candidate delivers an animated performance. A candidate who delivers a talk in a confident and assured tone without being overtly 'lively' can perform equally well for the second descriptor in Level 5. Subtle changes of tone can be very effective in fully engaging an audience.

Some examples of **Part 1** topics from this series that worked well included:

The science of sleep
Ethics of true crime shows
Tourism in Jamaica
Women in film
Split decisions
The dark side of football
The fascinating world of fragrances
Persistence
Editing classic books
The Butterfly Effect
Marketing: A twenty-first century dilemma

Some examples of **Part 1** topics from this series that were less successful included:

Technology (Too generalised)
Music (Too generalised)
Social media (Too generalised)
A.I. (Topical but without a clear focus)
Neymar (Descriptive and without a clear focus)
A typical day (Limiting and little to discuss in **Part 2**)

Part 2 – Conversation

The following comments from Moderators reflect performance in **Part 2** in this series:

*There was some marking of **Part 2** which was lenient when they were considerably short of the required 7 minutes.*

*Candidates who had relied on cue cards or visual aids in **Part 1** were often stronger in **Part 2** when more natural, spontaneous speaking skills could be assessed.*

© 2025

A number of Examiners asked lots of closed or factual questions whereas more effective Examiners spoke less and asked more open questions such as 'tell me about…' or 'tell me more about…' and then referenced what had been said.

Candidates should choose topics they are already familiar with. It is detrimental to the marks when a candidate is answering questions in an area they have seemingly newly studied just for this component.

Candidates should try and provide detailed responses and avoid monosyllabic answers.

Most Examiners conducted the conversations effectively and encouraged candidates to extend and develop the topics.

Generally, the **Part 2** conversations were well conducted and Examiners asked appropriate and interesting questions which enabled the candidates to extend and develop their ideas. After initial questioning to stimulate the conversation, the use of prompts, instead of lots of further questioning, was often more effective in eliciting developed responses from candidates.

Unlike in **Part 1**, the Examiner can influence the quality of the candidate's performance in **Part 2**. Concise but challenging prompts often led to candidates developing their ideas more successfully than when a question was convoluted or closed. Some Examiners included closed questioning and offered too many of their own ideas during the conversations. Indeed, where a candidate was moved down a level during moderation, it was sometimes due to a lack of detailed response, caused by unimaginative questioning. The use of pre-determined questions or a perfunctory question and answer technique limits the candidate's ability to engage in a real conversation where responses are elicited by what is said immediately before.

Issues with timing are also a major contributor to candidates achieving fewer marks than they could in **Part 2**. A **Part 2** that lasts for significantly less than the minimum of 7 minutes required cannot fulfil the descriptors in Level 5, and most likely not in Level 4 either. The descriptors for **Part 2** are assessed on the basis of a full **Part 2** being performed. Allowing only 2 – 4 minutes for **Part 2** does not provide the necessary evidence of consistent and detailed responses required. In effect, short conversations limit the range of marks that can and will be awarded.

One issue remarked upon by several Moderators is that some of the formal conversations in **Part 2** became too informal and 'chatty'. It is understandable that Examiners wish to put their candidates at ease, but a level of formality is still expected and is addressed in the second bullet point descriptor at each level regarding the accurate use of language.

It should be noted that the 'changes (alterations) in the direction of the conversation' descriptor does not mean that Examiners should steer the conversation away from the central topic to something completely different. 'Changes in the direction' can mean introducing a new perspective on the topic or challenging a previously stated opinion but any ensuing conversation should still be focused on the topic presented in **Part 1**.

Advice to centres

- Adhering to the correct timings for each part of the test will allow candidates the best opportunity to be successful. Ensure that the candidate's Individual Talk is 3 – 4 minutes long. If necessary, you can help them in the test by interceding before 5 minutes and initiating the conversation.
- When considering the timing of **Part 1**, please remember that **Part 1** begins when the candidate starts speaking and does not include the Examiner's introduction.
- Helping a candidate choose the most appropriate topic is key to them being successful in the test. At the planning stage, a gentle suggestion to choose an alternative topic may be very beneficial in some cases.
- Try to dissuade candidates from simply delivering a memorised talk in **Part 1** that may have artificial fluency but lacks any emotional attachment and suffers from robotic intonation. It is much better to prepare using a cue card so that what is said has some level of spontaneity.
- Ensure a full 7 – 8 minutes is allowed for the conversation in **Part 2**. The Examiner can control the timing of this.
- Administering the conversation in **Part 2** can be quite challenging for Examiners so it may be necessary to practise just as the candidates should. Knowing the topic in advance and preparing some relevant

© 2025

back-up questions may help the Examiner but they should not be restrictive, and the candidate should have no prior knowledge of them.

- Scaffold questions strategically to encourage higher level responses from more able candidates. This will help them to access the higher mark ranges.
- Do not interrupt too keenly; another prompt given before the previous response is finished, or when the candidate pauses for thought, can affect the candidate adversely by limiting their capacity to develop their ideas fully.
- Be careful not to make judgements based on personal interpretations of a comment made by a candidate. This is a test of speaking and listening and not the perceived accuracy of what is said.

Advice to candidates

- Choose a topic you are passionate about and one you can talk about for 3 – 4 minutes then discuss in even more detail for 7 – 8 minutes without repeating yourself.
- Practise your presentation but do not learn it word for word.
- Have bullet point notes to help prompt you in **Part 1** but not the 'full speech'. You will be tempted to read it or, at the very least, deliver it without appropriate liveliness and intonation. 'Talk through' each bullet point in a confident and enthusiastic way.
- Structure your Individual Talk carefully, making sure that it develops points and stays within the 3 – 4 minutes allowed. Long talks do not earn more marks! On the contrary, an overly long talk will be regarded as not being 'well organised' (a requirement for Level 5 marks).
- Respond to the prompts and questions from the Examiner in **Part 2** as fully as possible by developing your ideas, giving examples and leading off into other aspects of the topic if you can.
- Watch examples of speeches/presentations/talks to learn how effective speakers make their speeches engaging and interesting and how they incorporate effective language devices. Try to copy these techniques.
- Practise simulations of **Part 2**. There are as many marks available for **Part 2** as for **Part 1** so treat each part as equally important.

FIRST LANGUAGE ENGLISH **0500/01**

Paper 1 Reading **For examination from 2020**

SPECIMEN PAPER **2 hours**

You must answer on the question paper.

You will need: Insert (enclosed)

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined pages at the end of this booklet; the question number or numbers must be clearly shown.
- Dictionaries are **not** allowed.

INFORMATION

- The total mark for this paper is 80.
- The number of marks for each question or part question is shown in brackets [ ].
- The insert contains the reading texts.

This document has **14** pages. Blank pages are indicated.

© UCLES 2017

Read **Text A**, ***Project Mammoth***, in the insert and then answer **Questions 1(a)–(e)** on this question paper.

Question 1

(a) Give **two** examples of extinct species (other than the mammoth) according to the text.

- .....
- ..... [1]

(b) **Using your own words**, explain what the text means by:

(i) 'candidates for "de-extinction"' (line 2): .....

..... [2]

(ii) 'not just distant dreams.' (line 5): .....

..... [2]

(c) Re-read paragraph 3, ('Scientists working on such projects … climate change.').

Give **two** reasons why scientists might be excited by the possible birth of a woolly mammoth.

- .....
- ..... [2]

(d) Re-read paragraphs 4 and 5, ('The basic idea … Siberia's permafrost.').

(i) Identify **two** main tasks that scientists will need to complete in order to breed the hybrid.

- .....
- ..... [2]

(ii) Explain why Asian elephants were chosen for Project Mammoth.

.....

.....

..... [3]

© UCLES 2017

(e) Re-read paragraphs 6 and 7, ('The project is not without ... chance of survival.').

Using your own words, explain why some people disagree with Project Mammoth.

.....

.....

..... [3]

Read **Text B**, ***Waking the Baby Mammoth***, in the insert and then answer **Question 1(f)** on this question paper.

Question 1

(f) According to Text B, what made Lyuba such a remarkable and precious scientific specimen **and** what did scientists hope to discover by studying her?

You must **use continuous writing** (not note form) and **use your own words** as far as possible.

Your summary should not be more than 120 words.

Up to 10 marks are available for the content of your answer and up to 5 marks for the quality of your writing.

.....

Read **Text C**, ***The Gift***, in the insert and then answer **Questions 2(a)–(d)** on this question paper.

Question 2

(a) **Identify a word or phrase from the text** which suggests the same idea as the words underlined:

(i) Natalia was expecting the quietness of their walk to be broken suddenly.

..... [1]

(ii) Natalia slowed herself down and made herself as tall as possible before refusing to go any further.

..... [1]

(iii) Her grandfather spoke to her in a low, angry voice.

..... [1]

(iv) The homeless person was fast asleep.

..... [1]

(b) **Using your own words**, explain what the writer means by each of the words underlined:

I peered out into the street. On the other side, there was a street lamp with a dying bulb. I was opening my mouth to say 'What?' and then I saw it. Half a block from us, an enormous shadow was moving along the street.

(i) peered ..... [1]

(ii) dying ..... [1]

(iii) enormous ..... [1]

© UCLES 2017

(c) Use **one** example from the text below to explain how the writer suggests Natalia's experiences and feelings that night.

Use your own words in your explanation.

I peered out into the street. On the other side, there was a street lamp with a dying bulb. I was opening my mouth to say 'What?' and then I saw it. Half a block from us, an enormous shadow was moving along the street.

.....

.....

.....

.....

.....

..... [3]

(d) Re-read paragraphs 9 and 12.

- Paragraph 9 begins 'At first I thought it was a tram …' and is about the elephant and how it was moving when Natalia first saw it.
- Paragraph 12 begins 'Its ears were folded back …' and gives Natalia's impression of the elephant as she watches it come towards her.

Explain how the writer uses language to convey meaning and to create effect in these paragraphs. Choose **three** examples of words or phrases from **each** paragraph to support your answer. Your choices should include the use of imagery.

Write about 200 to 300 words.

Up to 15 marks are available for the content of your answer.

Re-read **Text C**, ***The Gift***, in the insert and then answer **Question 3** on this question paper.

Question 3

You are the grandfather. Some years later you are interviewed about your memories of that night for a radio programme about local history. The interviewer asks you the following three questions only:

- What did you see **and** feel during your journeys through the city that night?
- What do you remember of your granddaughter's behaviour **and** reactions that night?
- What were your reasons for taking your granddaughter out that night **and** what do you think she gained from the experience?

Write the words of the interview.

Base your interview on what you have read in **Text C**, but be careful to use your own words. Address each of the three bullet points.

Begin your interview with the first question.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer and up to 10 marks for the quality of your writing.

Read **both** texts, and then answer **Question 1** on the question paper.

Text A

The following passage is an article from a local newspaper about a school in the area and the future of its school council.

Student representation: Do we <u>really</u> care what students think?

The once fashionable idea of giving students a say in how their schools are run is being challenged by a recently appointed head teacher as 'mere lip service to student participation.' As is now common in many schools, students in Mr Aziz's school elect representatives from each year group to attend meetings and discuss their concerns with the school authorities. But Mr Aziz believes that these school councils do more harm than good, draining students' and teachers' energies on a fake body whose decisions do not, and should not, influence children's education. 'The misguided belief that young people should be able to limit the actions of experienced educators is simply wrong,' he says. 'We're accountable to their parents to give them the best education: we cannot waste their time and ours consulting them at every stage about issues which they don't understand.'

One pupil, Sofia, who campaigned enthusiastically over a whole term for the votes of her Year 11 classmates last year, gave Mr Aziz some unexpected support. 'The school council meets every now and then to give the impression that students have a say, but nothing ever happens. We spent ages working on a report about improvements we wanted to see in the school – sensible things like more gym equipment and a wider curriculum. The teachers listened politely but the report was ignored. In class our teachers were even irritated that our homework was late because of all the planning involved!' Sofia's dad also had misgivings. 'We selected this school for its solid academic record. My daughter's here to learn – and I'm paying a lot for that,' he adds wryly.

Mr Aziz says it makes sense to be concerned about individual students' worries and ideas and his door is always open to those who are unhappy about any aspect of school life. 'And I encourage teachers to listen to their students and pass on any concerns to me,' he said. 'But one pupil told me the older representatives on the school council should even be consulted on teacher appointments! I have twenty years' experience to ensure that students leave my school with good academic results and the skills to become useful adults. Student representatives can't and shouldn't interfere with that.'

© UCLES 2017

Text B

The following passage is taken from a guide for teachers about setting up school councils.

There's a transformation taking place for thousands of school students all over the country and it's thanks to their enlightened approach to student participation. This Guide contains some good examples of including children and young people in decision-making. We have also included some simple pointers of what makes an effective school council.

Recent research has shown that if a school places the involvement of their students at the heart of everything they do, the benefits and opportunities for them, and for the school, are significantly increased. But it takes real commitment, not just lip service. Young people are very astute. They will quickly identify a lack of commitment and if they do, they will soon become disillusioned. Set out clear aims, explaining what participation is, why it's important, and how to get involved. State clearly what you're prepared to commit and what you expect from them.

The most effective participation is when pupils have a say on the 'real' issues that affect their school. For example, invite them to help shape key policies for the future. Empower them with the responsibility of helping to regulate behaviour, bullying or the environment. Give them the opportunity to influence the development of the curriculum or new teaching initiatives. Give children and young people the chance to make a difference and you'll see the difference … in their attitude to school, to learning, to their teachers and to their peers.

Talk to anyone associated with a school that has a strong student participation policy and they are unanimous in the belief that empowering children and young people in this way has changed school life for the better. Behaviour, attendance and results can improve because more children and young people acquire the self-esteem that comes from improved communication, negotiation and decision-making skills. Children and young people can provide a fresh, new perspective. They see things differently and, because any decision will directly impact on their lives, they often have very clear views and opinions.

Paper 2 Directed Writing and Composition **For examination from 2020**

MARK SCHEME

Maximum Mark: 80

Specimen

This document has **12** pages. Blank pages are indicated.

© UCLES 2017

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

© UCLES 2017

Note: All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated. Nonetheless, the content must be clearly related to and derived from the text.

Section A: Directed Writing

Question 1

This question tests the following writing assessment objectives (25 marks)

W1 articulate experience and express what is thought, felt and imagined
W2 organise and structure ideas and opinions for deliberate effect
W3 use a range of vocabulary and sentence structures appropriate to context
W4 use register appropriate to context
W5 make accurate use of spelling, punctuation and grammar.

and reading assessment objectives (15 marks)

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R3 analyse, evaluate and develop facts, ideas and opinions, using appropriate support from the text
R5 select and use information for specific purposes.

© UCLES 2017

Question	Answer	Marks
1	**Imagine you are a pupil in a school which does not have a school council.** **<u>Write a speech</u> to be given in a school assembly, giving your views on whether or not students should participate in decisions made about the school.** **In your speech you should:** • **evaluate the views given in both texts about student participation** • **give your own views, based on what you have read, about whether a school council would benefit students and teachers.** **Base your speech on what you have read in <u>both</u> texts, but be careful to use your own words. Address both of the bullet points.** **Begin your speech: 'Thank you for coming to listen to me today …'.** **Write about 250 to 350 words.** **<u>Up to 15 marks are available for the content of your answer, and up to 25 marks for the quality of your writing.</u>** Notes on task: **Responses *might* use the following ideas:** **Text A** • 'once fashionable' – student representation may just be a passing fad • School councils take up too much time and energy from students and teachers • 'lip service' – if student representation is fake, it has no substance • Teachers are accountable to parents and should put education first • Experienced teachers should make decisions, not children **Text B** • An 'enlightened' approach is needed to make school councils work • Student participation is very popular and well regarded • Student participation works when children are involved in 'real' issues • Students can take responsibility for difficult problems, e.g. behaviour • Participation can make a difference to students' attitudes to school • Attendance and results are improved by participation • Students can learn important skills, e.g. negotiation, communication, decision-making • Students can have a fresh eye on issues • Decisions made may have a major impact on them so they are motivated to participate	**40**

© UCLES 2017

Question	Answer	Marks
1	**Possible evaluation of ideas:** **Text A** • School councils may indeed be pointless if students' decisions are not valued • Mr Aziz suggests students have little experience to bring to decisions about school • The main function of a school is to educate – this has implications for student participation **Text B** • Student representation on its own is not enough – needs planning • Some quite ambitious claims are made about its benefits – are these realistic? • Not much is said about how much time and commitment it takes – just that it should be spelt out **Possible synthesis of ideas:** Text A seems to illustrate a different approach to education/the purpose of schools from Text B. The approach in Text A is based on the authority of the teacher/lack of trust in students, whereas the approach in Text B is based on the teacher as facilitator/faith in students to make good decisions – candidates' own views may reflect this. Text A shows some ridicule towards student participation while Text B enthuses about it – the candidate may suggest these are both extremes and the truth lies somewhere in between. The 'it all depends' approach may show synthesis of ideas – Mr Aziz's cynicism means student participation would never work but students' 'fresh eye' on difficult problems might work.	

© UCLES 2017

Marking criteria for Section A Question 1

Table A, Writing

Use the following table to give a mark out of 25 for writing.

Level	Marks	Description
6	**22–25**	• Highly effective style capable of conveying subtle meaning. (W1) • Carefully structured for benefit of the reader. (W2) • Wide range of sophisticated vocabulary, precisely used. (W3) • Highly effective register for audience and purpose. (W4) • Spelling, punctuation and grammar almost always accurate. (W5)
5	**18–21**	• Effective style. (W1) • Secure overall structure, organised to help the reader. (W2) • Wide range of vocabulary, used with some precision. (W3) • Effective register for audience and purpose. (W4) • Spelling, punctuation and grammar mostly accurate, with occasional minor errors. (W5)
4	**14–17**	• Sometimes effective style. (W1) • Ideas generally well sequenced. (W2) • Range of vocabulary is adequate and sometimes effective. (W3) • Sometimes effective register for audience and purpose. (W4) • Spelling, punctuation and grammar generally accurate though with some errors. (W5)
3	**10–13**	• Inconsistent style, expression sometimes awkward but meaning clear. (W1) • Relies on the sequence of the original text. (W2) • Vocabulary is simple, limited in range or reliant on the original text. (W3) • Some awareness of an appropriate register for audience and purpose. (W4) • Frequent errors of spelling, punctuation and grammar, sometimes serious. (W5)
2	**6–9**	• Limited style. (W1) • Response is not well sequenced. (W2) • Limited vocabulary or words/phrases copied from the original text. (W3) • Limited awareness of appropriate register for audience and purpose. (W4) • Persistent errors of spelling, punctuation and grammar. (W5)
1	**1–5**	• Expression unclear. (W1) • Poor sequencing of ideas. (W2) • Very limited vocabulary or copying from the original text. (W3) • Very limited awareness of appropriate register for audience and purpose. (W4) • Persistent errors in spelling, punctuation and grammar impede communication. (W5)
0	**0**	• No creditable content.

© UCLES 2017

Table B, Reading

Use the following table to give a mark out of 15 for reading.

Level	Marks	Description
6	**13–15**	• Successfully evaluates ideas and opinions, both explicit and implicit. (R1, R2, R3) • Assimilates ideas from the text to give a developed, sophisticated response. (R3, R5)
5	**10–12**	• Some successful evaluation of ideas and opinions, both explicit and implicit. (R1, R2, R3) • A thorough response, supported by a detailed selection of relevant ideas from the text. (R3, R5)
4	**7–9**	• Begins to evaluate mainly explicit ideas and opinions. (R1, R2, R3) • An appropriate response that includes relevant ideas from the text. (R3, R5)
3	**5–6**	• Selects and comments on explicit ideas and opinions. (R1, R2, R3) • Makes a general response including a few relevant ideas from the text. (R3, R5)
2	**3–4**	• Identifies explicit ideas and opinions. (R1, R2, R3) • Makes a limited response with little evidence from the text. (R3, R5)
1	**1–2**	• Very limited response with minimal relation to the text. (R1, R2, R3, R5)
0	**0**	• No creditable content.

© UCLES 2017

Section B: Composition

Questions 2, 3, 4 or 5

This question tests the following writing assessment objectives (40 marks)

W1 articulate experience and express what is thought, felt and imagined
W2 organise and structure ideas and opinions for deliberate effect
W3 use a range of vocabulary and sentence structures appropriate to context
W4 use register appropriate to context
W5 make accurate use of spelling, punctuation and grammar.

Question	Answer	Marks
2	**EITHER** **Describe an occasion when a group of people are eating together.** Use Table A to give a mark out of 16 for content and structure, and Table B to give a mark out of 24 for style and accuracy.	**40**

Question	Answer	Marks
3	**OR** **Describe a busy train or bus station.** Use Table A to give a mark out of 16 for content and structure, and Table B to give a mark out of 24 for style and accuracy.	**40**

Question	Answer	Marks
4	**OR** **Write a story that includes the words, '… nothing could have prepared him for what he saw …'.** Use Table A to give a mark out of 16 for content and structure, and Table B to give a mark out of 24 for style and accuracy.	**40**

Question	Answer	Marks
5	**OR** **Write a story that involves a character new to the area.** Use Table A to give a mark out of 16 for content and structure, and Table B to give a mark out of 24 for style and accuracy.	**40**

Read Text A and Text B in the insert and then answer **Section A, Question 1** on this question paper.

Section A: Directed Writing

Question 1

Imagine you are a pupil in a school which does not have a school council.

Write a speech to be given in a school assembly, giving your views on whether or not students should participate in decisions made about the school.

In your speech you should:
- evaluate the views given in both texts about student participation
- give your own views, based on what you have read, about whether a school council would benefit students and teachers.

Base your speech on what you have read in **both** texts, but be careful to use your own words. Address both of the bullet points.

Begin your speech: 'Thank you for coming to listen to me today …'.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer, and up to 25 marks for the quality of your writing.

Section B: Composition

Answer **one** question from Section B.

Write about 350 to 450 words on **one** of the following questions. Answer on this question paper.

Up to 16 marks are available for the content and structure of your answer, and up to 24 marks for the style and accuracy of your writing.

EITHER

Descriptive writing

2 Describe an occasion when a group of people are eating together.

OR

Descriptive writing

3 Describe a busy train or bus station.

OR

Narrative writing

4 Write a story that includes the words, '… nothing could have prepared him for what he saw …'.

OR

Narrative writing

5 Write a story that involves a character new to the area.

Cambridge Assessment International Education

Syllabus

Cambridge IGCSE™

First Language English 0500

Use this syllabus for exams in 2024, 2025 and 2026.
Exams are available in the June and November series.
Exams are also available in the March series in India only.

Version 1

For the purposes of screen readers, any mention in this document of Cambridge IGCSE refers to Cambridge International General Certification of Secondary Education.

Cambridge Pathway

Why choose Cambridge International?

Cambridge International prepares school students for life, helping them develop an informed curiosity and a lasting passion for learning. We are part of the University of Cambridge.

Our Cambridge Pathway gives students a clear path for educational success from age 5 to 19. Schools can shape the curriculum around how they want students to learn – with a wide range of subjects and flexible ways to offer them. It helps students discover new abilities and a wider world, and gives them the skills they need for life, so they can achieve at school, university and work.

Our programmes and qualifications set the global standard for international education. They are created by subject experts, rooted in academic rigour and reflect the latest educational research. They provide a strong platform for learners to progress from one stage to the next, and are well supported by teaching and learning resources.

Our mission is to provide educational benefit through provision of international programmes and qualifications for school education and to be the world leader in this field. Together with schools, we develop Cambridge learners who are confident, responsible, reflective, innovative and engaged – equipped for success in the modern world.

Every year, nearly a million Cambridge students from 10 000 schools in 160 countries prepare for their future with the Cambridge Pathway.

School feedback: 'We think the Cambridge curriculum is superb preparation for university.'

Feedback from: Christoph Guttentag, Dean of Undergraduate Admissions, Duke University, USA

Quality management

Cambridge International is committed to providing exceptional quality. In line with this commitment, our quality management system for the provision of international qualifications and education programmes for students aged 5 to 19 is independently certified as meeting the internationally recognised standard, ISO 9001:2015. Important: Changes to this syllabus

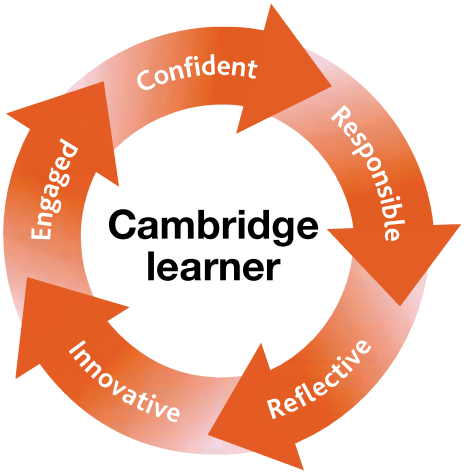
For information about changes to this syllabus for 2024, 2025 and 2026, go to page 35.

The latest syllabus is version 1, published September 2021.

Any textbooks endorsed to support the syllabus for examination from 2020 are still suitable for use with this syllabus.



1 Why choose this syllabus?

Key benefits

Cambridge IGCSE is the world's most popular international qualification for 14 to 16 year olds, although it can be taken by students of other ages. It is tried, tested and trusted.

Students can choose from 70 subjects in any combination – it is taught by over 4500 schools in over 140 countries.

Our programmes balance a thorough knowledge and understanding of a subject and help to develop the skills learners need for their next steps in education or employment.

Cambridge IGCSE First Language English allows learners to:

- develop the ability to communicate clearly, accurately and effectively when speaking and writing
- learn how to use a wide range of vocabulary, and the correct grammar, spelling and punctuation
- develop a personal style and an awareness of the audience being addressed.

Learners are also encouraged to read widely, both for their own enjoyment and to further their awareness of the ways in which English can be used. Cambridge IGCSE First Language English also develops more general analysis and communication skills such as inference, and the ability to order facts and present opinions effectively.

School feedback: 'The strength of Cambridge IGCSE qualifications is internationally recognised and has provided an international pathway for our students to continue their studies around the world.'

Feedback from: Gary Tan, Head of Schools and CEO, Raffles International Group of Schools, Indonesia

International recognition and acceptance

Our expertise in curriculum, teaching and learning, and assessment is the basis for the recognition of our programmes and qualifications around the world. The combination of knowledge and skills in Cambridge IGCSE First Language English gives learners a solid foundation for further study. Candidates who achieve grades A* to C are well prepared to follow a wide range of courses including Cambridge International AS & A Level English Language.

Cambridge IGCSEs are accepted and valued by leading universities and employers around the world as evidence of academic achievement. Many universities require a combination of Cambridge International AS & A Levels and Cambridge IGCSEs or equivalent to meet their entry requirements.

UK NARIC, the national agency in the UK for the recognition and comparison of international qualifications and skills, has carried out an independent benchmarking study of Cambridge IGCSE and found it to be comparable to the standard of the reformed GCSE in the UK. This means students can be confident that their Cambridge IGCSE qualifications are accepted as equivalent to UK GCSEs by leading universities worldwide.

Learn more at **www.cambridgeinternational.org/recognition**

School feedback: 'Cambridge IGCSE is one of the most sought-after and recognised qualifications in the world. It is very popular in Egypt because it provides the perfect preparation for success at advanced level programmes.'

Feedback from: Managing Director of British School in Egypt BSE

Supporting teachers

We provide a wide range of resources, detailed guidance and innovative training and professional development so that you can give your students the best possible preparation for Cambridge IGCSE. To find out which resources are available for each syllabus go to our School Support Hub.

The School Support Hub is our secure online site for Cambridge teachers where you can find the resources you need to deliver our programmes. You can also keep up to date with your subject and the global Cambridge community through our online discussion forums.

Find out more at **www.cambridgeinternational.org/support**

Support for Cambridge IGCSE			
Planning and preparation • Next steps guides. • Schemes of work. • Specimen papers. • Syllabuses. • Teacher guides.	**Teaching and assessment** • Endorsed resources. • Online forums. • Support for coursework and speaking tests.	**Learning and revision** • Example candidate responses. • Past papers and mark schemes. • Specimen paper answers.	**Results** • Candidate Results Service. • Principal examiner reports for teachers. • Results Analysis.

2 Syllabus overview

Aims

The aims describe the purposes of a course based on this syllabus.

The aims are to enable students to:

- read a wide range of texts, fluently and with good understanding, enjoying and appreciating a variety of language
- read critically, and use knowledge gained from wide reading to inform and improve their own writing
- write accurately and effectively, using Standard English appropriately
- work with information and with ideas in language by developing skills of evaluation, analysis, use and inference
- listen to, understand, and use spoken language effectively
- acquire and apply a wide vocabulary, alongside a knowledge and understanding of grammatical terminology and linguistic conventions.

Content overview

Cambridge IGCSE First Language English offers candidates the opportunity to respond with understanding to a rich array of reading texts during the course as a whole. Candidates will use these texts to inform and inspire their own writing, and write in a range of text types for different purposes and audiences.

Candidates will develop both their speaking and their listening skills, delivering a presentation, and responding to questions and engaging in conversations.

Candidates are encouraged to become appreciative and critical readers, writers, speakers and listeners.

Cambridge Assessment International Education is an education organisation and politically neutral. The contents of this syllabus, examination papers and associated materials do not endorse any political view. We endeavour to treat all aspects of the exam process neutrally.

Assessment overview

All candidates take two papers. Paper 1, and one of Paper 2 or Component 3. Candidates will be eligible for grades A* to G. Component 4 is optional and assesses speaking and listening skills. This component is separately endorsed and marks will not contribute to a candidate's overall grade.

All candidates take:

Paper 1 2 hours
Reading 50%
80 marks
Structured and extended writing questions
Questions will be based on three reading texts
Externally assessed

and:

Paper 2 2 hours
Directed Writing and Composition 50%
80 marks
Extended writing question and a composition task
Externally assessed

or:

Component 3
Coursework Portfolio 50%
80 marks
Three extended writing assignments
Internally assessed and externally moderated

Centres may also choose to enter candidates for the Speaking and Listening Test. Marks for this optional component do not contribute to the overall grade candidates receive for the written components. Instead, where candidates perform to an appropriate standard, certificates record achievement of grades 1 (high) to 5 (low).

Candidates can also take:

Component 4 Approx. 10–12 minutes
Speaking and Listening Test
40 marks Separately endorsed
Individual Talk and Conversation
Internally assessed and externally moderated

Information on availability is in the **Before you start section.**

Check the timetable at **www.cambridgeinternational.org/timetables** for the test date window for Component 4.

Check the samples database at **www.cambridgeinternational.org/samples** for submission information, forms and deadlines for Components 3 and 4.

Assessment objectives

The assessment objectives (AOs) are:

AO1 Reading

Candidates will be assessed on their ability to:

R1 demonstrate understanding of explicit meanings

R2 demonstrate understanding of implicit meanings and attitudes

R3 analyse, evaluate and develop facts, ideas and opinions, using appropriate support from the text

R4 demonstrate understanding of how writers achieve effects and influence readers

R5 select and use information for specific purposes.

AO2 Writing

Candidates will be assessed on their ability to:

W1 articulate experience and express what is thought, felt and imagined

W2 organise and structure ideas and opinions for deliberate effect

W3 use a range of vocabulary and sentence structures appropriate to context

W4 use register appropriate to context

W5 make accurate use of spelling, punctuation and grammar.

AO3 Speaking and Listening

Candidates will be assessed on their ability to:

SL1 articulate experience and express what is thought, felt and imagined

SL2 present facts, ideas and opinions in a cohesive order which sustains the audience's interest

SL3 communicate clearly and purposefully using fluent language

SL4 use register appropriate to context

SL5 listen and respond appropriately in conversation.

Weighting for assessment objectives

The approximate weightings allocated to each of the assessment objectives (AOs) are summarised below.

Assessment objectives as a percentage of the qualification

Assessment objective	Weighting in IGCSE %
AO1 Reading	50
AO2 Writing	50
AO3 Speaking and listening	Separately endorsed
Total	100

Assessment objectives as a percentage of each component

Assessment objective	Weighting in components %		
	Paper 1	Paper 2 and Component 3	Component 4
AO1 Reading	80	20	0
AO2 Writing	20	80	0
AO3 Speaking and listening	0	0	100
Total	100	100	100

3 Subject content

This syllabus gives you the flexibility to design a course that will interest, challenge and engage your learners. Where appropriate you are responsible for selecting suitable subject contexts, resources and examples to support your learners' study. These should be appropriate for the learners' age, cultural background and learning context as well as complying with your school policies and local legal requirements.

The skills covered in the syllabus are outlined below.

Reading

- Demonstrate understanding of written texts, and of the words and phrases within them
- Summarise and use material for a specific context
- Develop, analyse and evaluate facts, ideas and opinions
- Demonstrate understanding of how writers achieve their effects and influence readers
- Select appropriate information for specific purposes
- Recognise and respond to linguistic devices, figurative language and imagery.

In developing reading skills, candidates should engage with a range of genres and text types from the twentieth and/or twenty-first centuries, including literature, fiction and non-fiction, and other forms of writing, such as discursive essays, reviews and articles. This study should include focus on writers' use of language and style and the ways in which writers achieve effects and influence readers. Candidates should study how influence may include fact, ideas, perspectives, opinions and bias.

Writing

- Express what is thought, felt and imagined
- Organise and convey facts, ideas and opinions effectively
- Demonstrate a varied vocabulary appropriate to the context
- Demonstrate an effective use of sentence structures
- Demonstrate an understanding of audience, purpose and form
- Demonstrate accuracy in spelling, punctuation and grammar.

As developing writers themselves, candidates should be introduced to a range of writing skills, including the ability to create and compose texts with a variety of forms and purposes, e.g. descriptive, narrative, discursive, argumentative and persuasive. This study should include focus on the following text types: letter, report, article, journal, speech, interview and summary.

Speaking and Listening

- Describe and reflect on experience, and express what is thought, felt and imagined
- Organise and convey facts, ideas and opinions effectively
- Understand and convey complex ideas
- Communicate with clarity, focus and purpose
- Communicate appropriately for the context
- Engage appropriately in conversation.

Candidates should explore a range of speaking and listening skills, including the ability to participate in engaging conversations and to respond spontaneously to questions and prompts. This study should include focus on presentation skills in employing and organising content, and language devices, such as irony, tone and emphasis.

4 Details of the assessment

Paper 1 Reading

Written paper, 2 hours, 80 marks

Candidates answer three compulsory questions on three texts which may be on a similar topic. Candidates write all their answers in the space provided on the question paper.

Text A and Text B will be 700–750 words in length and Text C will be 500–650 words in length. Candidates should spend approximately 15 minutes reading the texts.

The texts will be printed on the question paper insert.

Dictionaries may **not** be used.

Question 1 Comprehension and summary task (30 marks)

Comprehension task: this question requires candidates to respond to Text A.

Candidates respond to a series of sub-questions. These include short answers testing understanding of both explicit and implicit meanings.

This question tests the following reading assessment objectives (15 marks):

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R5 select and use information for specific purposes.

Summary task: this question requires candidates to respond to Text B.

Candidates answer a selective summary task in their own words. Candidates write their summary as continuous writing of no more than 120 words.

This question tests the following reading assessment objectives (10 marks):

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R5 select and use information for specific purposes.

This question also tests the following writing assessment objectives (5 marks):

W2 organise and structure ideas and opinions for deliberate effect
W3 use a range of vocabulary and sentence structures appropriate to context.

Question 2 Short-answer questions and language task (25 marks)

Short-answer questions: this question requires candidates to respond to Text C.

Candidates respond to a series of sub-questions which require answers of different lengths.

This question tests the following reading assessment objectives (10 marks):

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R4 demonstrate understanding of how writers achieve effects and influence readers.

Language task: this question requires candidates to respond to Text C.

Candidates write about 200–300 words.

This question tests the following reading assessment objectives (15 marks):

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R4 demonstrate understanding of how writers achieve effects and influence readers.

Question 3 Extended response to reading (25 marks)

This question requires candidates to respond to Text C.

Candidates write about 250–350 words, responding in one of the following text types: letter, report, journal, speech, interview and article.

This question tests the following reading assessment objectives (15 marks):

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R3 analyse, evaluate and develop facts, ideas and opinions, using appropriate support from the text.

This question also tests the following writing assessment objectives (10 marks):

W1 articulate experience and express what is thought, felt and imagined
W2 organise and structure ideas and opinions for deliberate effect
W3 use a range of vocabulary and sentence structures appropriate to context
W4 use register appropriate to context.

Paper 2 Directed Writing and Composition

Written paper, 2 hours, 80 marks

Candidates answer two questions, one from each section.

The texts will be printed on the question paper insert.

Dictionaries may **not** be used.

Section A Directed Writing (40 marks)

Candidates answer one compulsory question on one or two texts totalling 650–750 words in length.

Candidates use, develop and evaluate the information in the text(s) to create a discursive/argumentative/persuasive speech, letter or article.

Candidates write about 250–350 words.

This question tests the following writing assessment objectives (25 marks):

W1 articulate experience and express what is thought, felt and imagined
W2 organise and structure ideas and opinions for deliberate effect
W3 use a range of vocabulary and sentence structures appropriate to context
W4 use register appropriate to context
W5 make accurate use of spelling, punctuation and grammar.

This question also tests the following reading assessment objectives (15 marks):

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R3 analyse, evaluate and develop facts, ideas and opinions, using appropriate support from the text
R5 select and use information for specific purposes.

Section B Composition (40 marks)

Candidates answer one question from a choice of four titles: two descriptive and two narrative.

Candidates use the title to develop and write a composition.

Candidates write about 350–450 words.

This question tests the following writing assessment objectives (40 marks):

W1 articulate experience and express what is thought, felt and imagined
W2 organise and structure ideas and opinions for deliberate effect
W3 use a range of vocabulary and sentence structures appropriate to context
W4 use register appropriate to context
W5 make accurate use of spelling, punctuation and grammar.

Component 3 Coursework Portfolio

Written assignments, 80 marks

This information should be read in conjunction with the relevant sections of the *Cambridge Handbook* for the relevant year of assessment.

The forms required for the conduct and assessment of the portfolio may be downloaded from **www.cambridgeinternational.org/samples**

Candidates submit a portfolio of three assignments, each of about 500–800 words. The assignments may be completed in any order, and are:

Assignment 1: writing to discuss, argue and/or persuade in response to a text or texts

Assignment 2: writing to describe

Assignment 3: writing to narrate.

The Coursework Portfolio tests the following writing assessment objectives (65 marks):

W1 articulate experience and express what is thought, felt and imagined
W2 organise and structure ideas and opinions for deliberate effect
W3 use a range of vocabulary and sentence structures appropriate to context
W4 use register appropriate to context
W5 make accurate use of spelling, punctuation and grammar.

For Assignment 1 only, the following reading assessment objectives are tested (15 marks):

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R3 analyse, evaluate and develop facts, ideas and opinions, using appropriate support from the text
R5 select and use information for specific purposes.

Work may be handwritten or word-processed.

Dictionaries may be used.

Candidates **must** include the first draft of one of the three assignments submitted. The first draft will not contribute to the final internally assessed mark or to the externally moderated mark for the portfolio.

The Coursework Portfolio **must** also include the text(s) used for Assignment 1.

Internal moderation

If more than one teacher in your centre is marking internal assessments, you must make arrangements to moderate or standardise your teachers' marking so that all candidates are assessed to a common standard. (If only one teacher is marking internal assessments, no internal moderation is necessary.) You can find further information on the process of internal moderation on the samples database at **www.cambridgeinternational.org/samples**

You should record the internally moderated marks for all candidates on the Coursework Assessment Summary Form and submit these marks to Cambridge International according to the instructions set out in the *Cambridge Handbook* for the relevant year of assessment.

External moderation

Cambridge International will externally moderate all internally assessed components.

- You must submit the marks of all candidates to Cambridge International.
- You must also submit the marked work of a sample of candidates to Cambridge International.

The sample you submit to Cambridge International should ideally include examples of the marking of each teacher. The samples database at **www.cambridgeinternational.org/samples** explains how the sample will be selected.

The samples database at **www.cambridgeinternational.org/samples** also provides details of how to submit the marks and work.

External moderators will produce a short report for each centre with feedback on your marking and administration of the assessment.

Additional information for Component 3 Coursework Portfolio

Please read this information in conjunction with the relevant sections of the *Cambridge Handbook* for the relevant year of assessment.

Assignments: general issues

- Assignments should arise from the programme of study undertaken by the teaching group.
- The best assignments are usually those that come from a shared learning experience but are finally chosen by individual candidates; negotiation of assignments with the teacher is recommended.
- All tasks set should be sufficiently challenging to stretch candidates to their full potential. For example, a class might study types of short story and their structures and conventions before individual candidates choose their own titles and write their own short stories for Assignment 3.
- Questions from past examination papers should not be used for coursework.
- Candidates are not expected to work under timed conditions.
- Assignments 1–3 may be completed in any sequence during the course. It is generally better that candidates complete more than three assignments during the course from which a suitable choice can eventually be made for the final portfolio.
- The assignments must clearly demonstrate different writing intentions and styles to the reader.

Assignment 1

- Assignment 1 is a piece of directed writing in response to a text or texts chosen by the teacher (or by the candidate, with the teacher's approval).
- This assignment is assessed for both writing and reading skills.
- Centres are advised to select text(s) of approximately two sides of A4 in total. Text(s) may consist of facts, opinions and/or arguments which can be selected, analysed and evaluated by the candidate and can be integrated into their own views.
- Note that literature texts are not usually suitable for this assignment.
- Text(s) may be of local, national or global interest – or all three – and should be suitable for the ability range of the candidates. They may be drawn from a variety of sources, e.g. newspapers, magazine articles, travel writing, text-based websites and media.
- Note that text(s) that are mainly informative or that provide content which has no development/discussion should not be set.
- Candidates should be able to give an overview of the argument as a whole and illustrate their understanding by commenting on specific ideas presented by the author of the text. This should include an explanation of any ideas of interest and an argument for or against them, as well as examining them for inconsistencies and substituting complementary or opposing views (e.g. recognise and comment on bias).
- The assignment may be written in any appropriate form, e.g. an article, a letter, or the words of a speech.
- A copy of all texts used for Assignment 1 must be included with the sample of portfolios sent to the external moderator.

Assignment 1 Discuss/argue and/or persuade in response to text(s)	Two examples: • **You are a local resident and feel very strongly about the ideas suggested in your local newspaper. Write a response to the editor in which you argue for or against the proposed ideas.** In your discussion you will need to evaluate the ideas and opinions presented in the text and centre your arguments around what is said. *Text:* a letter or article from a local newspaper arguing in favour of or against a controversial local issue. For example: plans to make changes to the local transport system, proposals to build a community building on public land or a plan to address the behaviour of young people in the area. *Note to teachers:* responses could be in any appropriate form, e.g. a letter or an article. • **You have read the transcript of a speech by a well-known person about an important topical issue. Write a response to that person in which you try to persuade them to change their minds about what they have said.** In your discussion you will need to evaluate the ideas and opinions presented in the speech and centre your arguments around what they have said. *Text:* a speech about a current topical, local or global issue. For example: a teacher's speech about space travel, a celebrity's speech about an environmental issue, or a doctor's speech about medicine. *Note to teachers:* responses could be in any appropriate form, e.g. a speech or a letter.

Assignment 2

- Assignment 2 is a piece of descriptive writing which is assessed for writing skills only.
- Candidates may submit poetry for Assignment 2, but this must be accompanied by some form of commentary by the candidate, e.g. about how the poem(s) came to be written. The commentary will be included in the word count.
- The candidate should develop ideas and images which create a convincing, well-defined picture, with varieties of focus.

Assignment 2 Writing to describe	Two examples: • **You are in a busy place waiting for a friend who is late. Describe your surroundings and your thoughts and feelings as you wait.** *Note to teachers:* a busy place can be any place which provides a definite sense of place/atmosphere and will contain a range of sights, sounds and/or characters for candidates to describe, e.g. cafes, train or bus stations, airport arrival or departure areas, sports stadiums, beaches and markets. • **Describe an important gathering or celebration.** *Note to teachers:* candidates should be encouraged to choose a celebration or gathering of which they have personal experience. Appropriate occasions could be any event which provides a definite sense of place/atmosphere and will contain a range of sights, sounds and/or characters for candidates to describe, e.g. weddings, significant anniversaries or birthdays.

Assignment 3

- Assignment 3 is a piece of narrative writing which is assessed for writing skills only.
- Candidates may write in any form.
- The candidate should ensure the plot is well defined and developed with features of fiction writing, such as description, characterisation and convincing details.

Assignment 3 Writing to narrate	Two examples: • **Write a narrative piece in which the following words appear '*and then they finally realised that it didn't really matter anymore*'.** *Note to teachers:* the words may appear in any part of the narrative writing. Candidates may write in a range of appropriate narrative forms, e.g. the opening or closing chapter of a novel or a short story. • **Write a fictional or autobiographical account of an important or life-changing event.** *Note to teachers:* candidates may write in a range of appropriate narrative forms and perspectives, e.g. a short story or several diary entries.

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The marker should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range (where middle marks are available).
- If the candidate's work **just** meets the level statement, award the lowest mark.

Table A: Level descriptions for writing in Assignment 1 (15 marks)

Level	Marks	Description
6	**13–15**	• Highly effective style capable of conveying subtle meaning. (W1) • Carefully structured for benefit of the reader. (W2) • Wide range of sophisticated vocabulary, precisely used. (W3) • Highly effective register for audience and purpose. (W4) • Spelling, punctuation and grammar almost always accurate. (W5)
5	**10–12**	• Effective style. (W1) • Secure overall structure, organised to help the reader. (W2) • Wide range of vocabulary, used with some precision. (W3) • Effective register for audience and purpose. (W4) • Spelling, punctuation and grammar mostly accurate, with occasional minor errors. (W5)
4	**7–9**	• Sometimes effective style. (W1) • Ideas generally well sequenced. (W2) • Range of vocabulary is adequate and sometimes effective. (W3) • Sometimes effective register for audience and purpose. (W4) • Spelling, punctuation and grammar generally accurate though with some errors. (W5)
3	**5–6**	• Inconsistent style, expression sometimes awkward but meaning clear. (W1) • Relies on the sequence of the original text. (W2) • Vocabulary is simple, limited in range or reliant on the original text. (W3) • Some awareness of an appropriate register for audience and purpose. (W4) • Frequent errors of spelling, punctuation and grammar, sometimes serious. (W5)
2	**3–4**	• Limited style. (W1) • Response is not well sequenced. (W2) • Limited vocabulary or words/phrases copied from the original text. (W3) • Limited awareness of appropriate register for audience and purpose. (W4) • Persistent errors of spelling, punctuation and grammar. (W5)
1	**1–2**	• Expression unclear. (W1) • Poor sequencing of ideas. (W2) • Very limited vocabulary or copying from the original text. (W3) • Very limited awareness of appropriate register for audience and purpose. (W4) • Persistent errors in spelling, punctuation and grammar impede communication. (W5)
0	**0**	• No creditable content.

Table B: Level descriptions for reading in Assignment 1 (15 marks)

Level	Marks	Description
6	**13–15**	• Successfully evaluates ideas and opinions, both explicit and implicit. (R1, R2, R3) • Assimilates ideas from the text to give a developed, sophisticated response. (R3, R5)
5	**10–12**	• Some successful evaluation of ideas and opinions, both explicit and implicit. (R1, R2, R3) • A thorough response, supported by a detailed selection of relevant ideas from the text. (R3, R5)
4	**7–9**	• Begins to evaluate mainly explicit ideas and opinions. (R1, R2, R3) • An appropriate response that includes relevant ideas from the text. (R3, R5)
3	**5–6**	• Selects and comments on explicit ideas and opinions. (R1, R2, R3) • Makes a general response including a few relevant ideas from the text. (R3, R5)
2	**3–4**	• Identifies explicit ideas and opinions. (R1, R2, R3) • Makes a limited response with little evidence from the text. (R3, R5)
1	**1–2**	• Very limited response with minimal relation to the text. (R1, R2, R3, R5)
0	**0**	• No creditable content.

Table C: Level descriptions for composition: content and structure in Assignments 2 and 3 (10 marks each)

Level	Marks	General and specific marking criteria	
		General	
6	**9–10**	• Content is complex, engaging and effective. (W1) • Structure is secure, well balanced and carefully managed for deliberate effect. (W2)	
		Specific – descriptive	**Specific – narrative**
		Many well-defined and developed ideas and images create a convincing overall picture with varieties of focus.	*The plot is well-defined and strongly developed with features of fiction writing such as description, characterisation and effective climax, and convincing details.*
		General	
5	**7–8**	• Content is developed, engaging and effective. (W1) • Structure is well managed, with some choices made for deliberate effect. (W2)	
		Specific – descriptive	**Specific – narrative**
		Frequent, well-chosen images and details give a mostly convincing picture.	*The plot is defined and developed with features of fiction writing such as description, characterisation, climax and details.*
		General	
4	**5–6**	• Content is relevant with some development. (W1) • Structure is competently managed. (W2)	
		Specific – descriptive	**Specific – narrative**
		A selection of relevant ideas, images and details, even where there is a tendency to write in a narrative style.	*The plot is relevant and cohesive, with some features such as characterisation and setting of scene.*
		General	
3	**3–4**	• Content is straightforward and briefly developed. (W1) • Structure is mostly organised but may not always be effective. (W2)	
		Specific – descriptive	**Specific – narrative**
		The task is addressed with a series of relevant but straightforward details, which may be more typical of a narrative.	*The plot is straightforward, with limited use of the features of narrative writing.*
		General	
2	**2**	• Content is simple, and ideas and events may be limited. (W1) • Structure is partially organised but limited in its effect. (W2)	
		Specific – descriptive	**Specific – narrative**
		The recording of some relevant events with limited detail.	*The plot is a simple narrative that may consist of events that are only partially linked and/or which are presented with partial clarity.*
		General	
1	**1**	• Content is occasionally relevant or clear. (W1) • Structure is limited and ineffective. (W2)	
		Specific – descriptive	**Specific – narrative**
		The description is unclear and lacks detail.	*The plot and/or narrative lacks coherence.*
0	**0**	No creditable content.	

Table D: Level descriptions for composition: style and accuracy in Assignments 2 and 3 (15 marks each)

Level	Marks	Description
6	**13–15**	• Precise, well-chosen vocabulary and varied sentence structures, chosen for effect. (W3) • Consistent well-chosen register suitable for the context. (W4) • Spelling, punctuation and grammar almost always accurate. (W5)
5	**10–12**	• Mostly precise vocabulary and a range of sentence structures mostly used for effect. (W3) • Mostly consistent appropriate register suitable for the context. (W4) • Spelling, punctuation and grammar mostly accurate, with occasional minor errors. (W5)
4	**7–9**	• Some precise vocabulary and a range of sentence structures sometimes used for effect. (W3) • Some appropriate register for the context. (W4) • Spelling, punctuation and grammar generally accurate, but with some errors. (W5)
3	**5–6**	• Simple vocabulary and a range of straightforward sentence structures. (W3) • Simple register with a general awareness of the context. (W4) • Frequent errors of spelling, punctuation and grammar, occasionally serious. (W5)
2	**3–4**	• Limited and/or imprecise vocabulary and sentence structures. (W3) • Limited and/or imprecise register for the context. (W4) • Persistent errors of spelling, punctuation and grammar. (W5)
1	**1–2**	• Frequently imprecise vocabulary and sentence structures. (W3) • Register demonstrates little or no sense of the context. (W4) • Persistent errors of spelling, punctuation and grammar impair communication. (W5)
0	**0**	• No creditable content.

Component 4 Speaking and Listening Test

Individual Talk and Conversation, approximately 10–12 minutes in total, 40 marks

This component is separately endorsed with grades of 1 (high) to 5 (low). Marks for Component 4 do **not** contribute to a candidate's overall grade.

Teachers must treat this component as a non-coursework speaking test and must read this information in conjunction with the relevant sections of the *Cambridge Handbook* for the relevant year of assessment.

There are two parts to the Speaking and Listening Test. In Part 1, candidates present an individual talk. In Part 2, candidates engage in a conversation with the teacher/examiner on their chosen topic.

There is no question paper for the test. The test must be taken within the Speaking and Listening Test window. You should record all candidates. Candidates must only take the Speaking and Listening Test **once** and both parts of the test **must** be recorded as one.

Part 1 Individual Talk (3–4 minutes) (20 marks)

The candidate talks for about 3–4 minutes on a single topic or theme which they have selected before the test. The candidate talks about a topic of particular interest, for example, about the candidate's reactions to meeting a famous person or about a recent film, which would include suggestions as to why others would also like it.

Candidates need to show that they are able to prepare and organise material, are aware of audience, and can select and employ a range of language devices. Candidates are encouraged to make presentations which are lively, by perhaps incorporating more creative presentational styles, such as taking up a 'voice' or presenting a dramatic monologue.

There is no question paper and each candidate chooses their own subject with guidance from their teacher. Teachers should advise on the suitability of topics or themes, but must **not** be involved in the preparation of material for the Individual Talk. The interaction is between the candidate and the teacher only, although the class may be present as an audience.

Candidates may bring one 'cue card' (about postcard size) into the examination room, to remind them of the main points they wish to make. The cue card should contain a list of key points, not continuous sentences. Candidates may write their points on one side of the cue card only. Candidates may also use a limited quantity of illustrative material, which may include maps, diagrams, statistics and pictures. Reading from, or reliance on, a script or extended notes is **not** allowed. Recitation of a memorised script is unlikely to be successful. The cue card and illustrative material must be retained by centres until six months after publication of results. The cue card and illustrative material must be labelled with the candidate's name and number.

The talk should be continuous. If absolutely necessary the teacher/examiner may prompt a candidate who is finding it difficult to continue within the advised time of 3–4 minutes. Teachers/examiners should interrupt to ask questions, and begin Part 2, if the candidate shows no sign of finishing after 4½ minutes.

Dictionaries may be used to prepare the Individual Talk, but they may **not** be taken into the test.

This part of the test is to be assessed using the level descriptions in Table A on page 25.

The Individual Talk tests the following speaking and listening assessment objectives (20 marks):

SL1 articulate experience and express what is thought, felt and imagined
SL2 present facts, ideas and opinions in a cohesive order which sustains the audience's interest
SL3 communicate clearly and purposefully using fluent language
SL4 use register appropriate to context.

Part 2 Conversation (7–8 minutes) (20 marks)

The Individual Talk leads into a conversation with the teacher/examiner about the candidate's chosen topic. For example, an account of meeting a famous person could be developed into a discussion of wider issues such as the nature and role of 'celebrity' and media intrusion; a talk about a film could be developed into discussion of wider issues such as censorship, popular culture and the film industry.

Candidates should be encouraged to consider how a conversation might develop around their chosen topic; if they cannot think of six questions they **could** be asked, the topic is unlikely to be easy to discuss.

During the Individual Talk, teachers/examiners are likely to make notes in order to help them ask appropriate questions.

Candidates must be prepared to supply additional factual material where appropriate and to express and defend a point of view. In order to give the candidate every opportunity, questions should be open, such as 'tell me more about...', 'why?' and 'how?', rather than closed questions which may be answered by 'yes/no'. Candidates should not be made to feel embarrassed about expressing viewpoints that are not those of the teacher/examiner. The teacher/examiner may wish to ask questions about those views, but these questions must not be judgemental.

The teacher/examiner should normally allow 7–8 minutes for each candidate. If a candidate 'dries up' after a few minutes, teachers/examiners should be ready to explore another aspect of the topic or theme; they should keep trying to make conversation so that the candidate is given every opportunity to demonstrate their ability. Questions should be rephrased (rather than repeated) in an attempt to continue the dialogue.

Teachers/examiners should beware of talking too much and of candidates being given credit for what the teacher/examiner has actually said. Candidates are responsible for showing that they can converse adequately; at the same time the teacher/examiner must make sure the candidate is given every opportunity to converse by following up any opening given.

Dictionaries may **not** be used in the test.

This part of the test is to be assessed using the level descriptions in Table B on pages 26 and 27.

The Conversation tests the following speaking and listening assessment objectives (20 marks):

SL1 articulate experience and express what is thought, felt and imagined
SL2 present facts, ideas and opinions in a cohesive order which sustains the audience's interest
SL3 communicate clearly and purposefully using fluent language
SL4 use register appropriate to context
SL5 listen and respond appropriately in conversation.

Marking instructions

The teacher must mark each candidate's test out of a total of 40, in line with the level descriptions. The total mark for the test is divided into 20 marks for Speaking in Part 1 (Individual Talk), and 10 marks for Speaking and 10 marks for Listening in Part 2 (Conversation).

For information, dates and methods of submission of the Speaking and Listening Test marks and sample, please refer to the *Cambridge Handbook* for the relevant year of assessment and the samples database at **www.cambridgeinternational.org/samples**

Marking: general principles

Marking of the Speaking and Listening Test should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The marker should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range (where middle marks are available).
- If the candidate's work **just** meets the level statement, award the lowest mark.

Table A: Level descriptions for Component 4, Part 1 – Individual Talk (20 marks)

Level	Marks	Description
5	**17–20**	• Full and well-organised use of content. • Lively delivery which fully engages the audience. • Employs a wide range of language devices (e.g. tone, irony, emphasis) accurately and sometimes eloquently. • Sustained, appropriate and accurate use of language throughout.
4	**13–16**	• Sound use of content. • Delivery may occasionally be stilted but often attempts to engage the audience. • Employs a good range of language devices (e.g. tone, irony, emphasis) soundly. • Mainly appropriate and accurate use of language.
3	**9–12**	• Adequate use of content. • Delivery is secure but at times unimaginative, with some attempt to engage the audience. • Language devices (e.g. tone, irony, emphasis) are used safely and appropriately. • Appropriate and accurate use of language demonstrated but some inaccuracy may be present.
2	**5–8**	• Content is thin or perhaps inconsistently used. • Delivery is not secure, with little attempt to engage the audience. • Limited employment of language devices (e.g. tone, irony, emphasis) with some inaccuracy. • Some appropriate use of language but with some inaccuracy.
1	**1–4**	• Content is mostly undeveloped and/or very thin. • Delivery is weak, with no attempt to engage the audience. • Not able to use language devices (e.g. tone, irony, emphasis) or devices used with serious error. • Language is not used appropriately, or is used with serious inaccuracy.
0	**0**	• Does not meet the above criteria.

Table B: Level descriptions for Component 4, Part 2 – Conversation (20 marks)

For Part 2, record separate marks for speaking and for listening.

Speaking			Listening		
Level	**Marks**	**Description**	**Level**	**Marks**	**Description**
5	**9–10**	• Extends the subject matter and elicits responses from the listener; speaks on equal terms with the listener. • Employs a wide range of language devices (e.g. tone, irony, emphasis) accurately and sometimes eloquently; sustained, appropriate and accurate use of language throughout.	**5**	**9–10**	• A natural and fluent conversation. • Responds fully to questions and develops prompts; deals confidently and sometimes enthusiastically with alterations in the direction of the conversation.
4	**7–8**	• Subject matter is organised and expressed competently; attempts to speak on equal terms with the listener but with a varying degree of success. • Employs a good range of language devices (e.g. tone, irony, emphasis) soundly; mainly appropriate and accurate use of language.	**4**	**7–8**	• The conversation is occasionally fluent and sometimes shaped by the candidate. • Consistently responds appropriately and in extended detail to questions and prompts; deals appropriately with most of the changes in the direction of the conversation.
3	**5–6**	• Deals with the subject matter adequately; the listener is generally but not always prominent. • Language devices (e.g. tone, irony, emphasis) are used appropriately; appropriate and accurate use of language demonstrated, but some inaccuracy may be present.	**3**	**5–6**	• The conversation is maintained through the candidate's responses. • Responds to questions adequately but deals less effectively with prompts; changes in the direction of the conversation are occasionally dealt with.
2	**3–4**	• There is evidence of some linking together of ideas relating to the subject matter but it is inconsistent; accepts that the listener is in full control of the conversation. • Limited use of language devices (e.g. tone, irony, emphasis) with some inaccuracy; some appropriate use of language but with some inaccuracy.	**2**	**3–4**	• The conversation is driven by the listener's questions. • The candidate provides limited response to the questions and struggles to develop prompts; tends to maintain the direction of the conversation.

Speaking			Listening		
Level	**Marks**	**Description**	**Level**	**Marks**	**Description**
1	**1–2**	• Simple facts and ideas are expressed with generally unsuccessful attempts at organisation; barely capable of engaging in a two-way conversation. • Not able to use language devices (e.g. tone, irony, emphasis) or devices used with serious error; language is not used appropriately or is used with serious inaccuracy.	**1**	**1–2**	• A two-way conversation is not successfully maintained. • The candidate responds simply or is unable to respond to questions or prompts; cannot recognise changes in the direction of the conversation.
0	**0**	• Does not meet the above criteria.	**0**	**0**	• Does not meet the above criteria.

Command words

Command words and their meanings help candidates know what is expected from them in the exams. The table below includes command words used in the assessment for this syllabus. The use of the command word will relate to the subject context.

Command word	What it means
Describe	state the points of a topic / give characteristics and main features
Explain	set out purposes or reasons / make the relationships between things evident / provide why and/or how and support with relevant evidence
Give	produce an answer from a given source or recall/memory
Identify	name/select/recognise

5 What else you need to know

This section is an overview of other information you need to know about this syllabus. It will help to share the administrative information with your exams officer so they know when you will need their support. Find more information about our administrative processes at **www.cambridgeinternational.org/eoguide**

Before you start

Previous study

We recommend that learners starting this course should have studied an English Language curriculum such as the Cambridge Lower Secondary programme or equivalent national educational framework.

Guided learning hours

We design Cambridge IGCSE syllabuses based on learners having about 130 guided learning hours for each subject during the course but this is for guidance only. The number of hours a learner needs to achieve the qualification may vary according to local practice and their previous experience of the subject.

Availability and timetables

All Cambridge schools are allocated to one of six administrative zones. Each zone has a specific timetable.

You can view the timetable for your administrative zone at **www.cambridgeinternational.org/timetables**

You can enter candidates in the June and November exam series. If your school is in India, you can also enter your candidates in the March exam series.

Check you are using the syllabus for the year the candidate is taking the exam.

Private candidates can enter for this syllabus. Some components are not available to private candidates. For more information, please refer to the *Cambridge Guide to Making Entries*.

Combining with other syllabuses

Candidates can take this syllabus alongside other Cambridge International syllabuses in a single exam series. The only exceptions are:

- Cambridge IGCSE English (as an Additional Language) (0472)
- Cambridge IGCSE (9–1) First Language English (0990)
- Cambridge IGCSE English as a Second Language (0510)
- Cambridge IGCSE (9–1) English as a Second Language (0993)
- Cambridge IGCSE English as a Second Language (count-in oral) (0511)
- Cambridge IGCSE (9–1) English as a Second Language (count-in oral) (0991)
- Cambridge O Level English Language (1123)
- syllabuses with the same title at the same level.

Cambridge IGCSE, Cambridge IGCSE (9–1) and Cambridge O Level syllabuses are at the same level.

Group awards: Cambridge ICE

Cambridge ICE (International Certificate of Education) is a group award for Cambridge IGCSE. It allows schools to offer a broad and balanced curriculum by recognising the achievements of learners who pass exams in a range of different subjects.

Learn more about Cambridge ICE at **www.cambridgeinternational.org/cambridgeice**

Making entries

Exams officers are responsible for submitting entries to Cambridge International. We encourage them to work closely with you to make sure they enter the right number of candidates for the right combination of syllabus components. Entry option codes and instructions for submitting entries are in the *Cambridge Guide to Making Entries*. Your exams officer has a copy of this guide.

Exam administration

To keep our exams secure, we produce question papers for different areas of the world, known as administrative zones. We allocate all Cambridge schools to one administrative zone determined by their location. Each zone has a specific timetable. Some of our syllabuses offer candidates different assessment options. An entry option code is used to identify the components the candidate will take relevant to the administrative zone and the available assessment options.

Support for exams officers

We know how important exams officers are to the successful running of exams. We provide them with the support they need to make your entries on time. Your exams officer will find this support, and guidance for all other phases of the Cambridge Exams Cycle, at **www.cambridgeinternational.org/eoguide**

Retakes and carry forward marks

Candidates can retake the whole qualification as many times as they want to. Information on retake entries is at **www.cambridgeinternational.org/entries**

Candidates cannot resubmit, in whole or in part, coursework [or speaking tests] from a previous series. To confirm what entry options are available to carry forward marks for this syllabus, refer to the *Cambridge Guide to Making Entries* for the relevant series. Regulations for carrying forward internally assessed marks can be found in the *Cambridge Handbook* for the relevant year at **www.cambridgeinternational.org/eoguide**

Language

This syllabus and the related assessment materials are available in English only.

Accessibility and equality

Syllabus and assessment design

Cambridge International works to avoid direct or indirect discrimination in our syllabuses and assessment materials. We aim to maximise inclusivity for candidates of all national, cultural or social backgrounds and with other protected characteristics. In addition, the language and layout used are designed to make our materials as accessible as possible. This gives all learners the opportunity, as fairly as possible, to demonstrate their knowledge, skills and understanding and helps to minimise the requirement to make reasonable adjustments during the assessment process.

Access arrangements

Access arrangements (including modified papers) are the principal way in which Cambridge International complies with our duty, as guided by the UK Equality Act (2010), to make 'reasonable adjustments' for candidates with special educational needs (SEN), disability, illness or injury. Where a candidate would otherwise be at a substantial disadvantage in comparison to a candidate with no SEN, disability, illness or injury, we may be able to agree pre-examination access arrangements. These arrangements help a candidate by minimising accessibility barriers and maximising their opportunity to demonstrate their knowledge, skills and understanding in an assessment.

Important:

- Requested access arrangements should be based on evidence of the candidate's barrier to assessment and should also reflect their normal way of working at school; this is in line with *The Cambridge Handbook* **www.cambridgeinternational.org/eoguide**
- For Cambridge International to approve an access arrangement, we will need to agree that it constitutes a reasonable adjustment, involves reasonable cost and timeframe and does not affect the security and integrity of the assessment.
- Availability of access arrangements should be checked by centres at the start of the course. Details of our standard access arrangements and modified question papers are available in *The Cambridge Handbook* **www.cambridgeinternational.org/eoguide**
- Please contact us at the start of the course to find out if we are able to approve an arrangement that is not included in the list of standard access arrangements.
- Candidates who cannot access parts of the assessment may be able to receive an award based on the parts they have completed.

Some access arrangements are not allowed in this syllabus because they affect the assessment objective:

- candidates are **not** allowed to use voice-activated software to dictate their written work
- human readers are **not** allowed.

If your candidate(s) will have significant difficulties accessing the components of this qualification, please contact **info@cambridgeinternational.org** before starting the course.

After the exam

Grading and reporting

Grades A*, A, B, C, D, E, F or G indicate the standard a candidate achieved at Cambridge IGCSE.

A* is the highest and G is the lowest. 'Ungraded' means that the candidate's performance did not meet the standard required for grade G. 'Ungraded' is reported on the statement of results but not on the certificate.

In specific circumstances your candidates may see one of the following letters on their statement of results:

- Q (PENDING)
- X (NO RESULT).

These letters do not appear on the certificate.

On the statement of results and certificates, Cambridge IGCSE is shown as INTERNATIONAL GENERAL CERTIFICATE OF SECONDARY EDUCATION (IGCSE).

How students and teachers can use the grades

Assessment at Cambridge IGCSE has two purposes:

- to measure learning and achievement

  The assessment:

  – confirms achievement and performance in relation to the knowledge, understanding and skills specified in the syllabus, to the levels described in the grade descriptions.
- to show likely future success

  The outcomes:

  – help predict which students are well prepared for a particular course or career and/or which students are more likely to be successful

  – help students choose the most suitable course or career.

Grade descriptions

Grade descriptions are provided to give an indication of the standards of achievement candidates awarded particular grades are likely to show. Weakness in one aspect of the examination may be balanced by a better performance in some other aspect.

Grade descriptions for Cambridge IGCSE First Language Engish will be published after the first assessment of the syllabus in 2020. Find more information at **www.cambridgeinternational.org/igcse**

Changes to this syllabus for 2024, 2025 and 2026

The syllabus has been updated. This is version 1, published September 2021.

You must read the whole syllabus before planning your teaching programme.

Changes to assessment (including changes to specimen papers)	Paper 1 Reading: • The assessment of W5: Make accurate use of spelling, punctuation and grammar, has been removed from Paper 1 Reading only. • W5 has been removed from Question 1f and Question 3.

Any textbooks endorsed to support the syllabus for examination from 2020 are still suitable for use with this syllabus.

School feedback: ‘While studying Cambridge IGCSE and Cambridge International A Levels, students broaden their horizons through a global perspective and develop a lasting passion for learning.’

Feedback from: Zhai Xiaoning, Deputy Principal, The High School Affiliated to Renmin University of China

We are committed to making our documents accessible in accordance with the WCAG 2.1 Standard. We’re always looking to improve the accessibility of our documents. If you find any problems or you think we’re not meeting accessibility requirements, contact us at **info@cambridgeinternational.org** with the subject heading: Digital accessibility. If you need this document in a different format, contact us and supply your name, email address and requirements and we will respond within 15 working days.

Text A: Project Mammoth

This text is an article about a new scientific project.

Of all the incredible possibilities presented by controversial new scientific techniques, perhaps the most intriguing are efforts to bring animals back from extinction. Candidates for 'de-extinction', as the process is known, include species like the passenger pigeon (the last one died in captivity in 1914) and the dodo (last seen in 1662).

These projects are not just distant dreams.

Scientists working on such projects estimate that a variation of the first new woolly mammoth (which disappeared some 4 000 years ago) may soon be born. They hope these animals will play a role in slowing or reversing the effects of climate change.

The basic idea behind how it would work is that scientists would first retrieve DNA from the remains of a woolly mammoth that had been preserved for centuries in the frozen tundra[1] and use that to alter the DNA of modern Asian elephants. According to scientists, the two species are so closely related that if mammoths were alive today they could successfully breed with elephants. Tweaking the Asian elephants' DNA to more closely resemble that of their ancient relatives could mean elephants might be able to give birth to a furrier, fattier hybrid.

Scientists say this work is decidedly not about creating Mammoth Park – the creature would not be a perfect copy of a mammoth anyway. The hope is that these mammoth-like Asian elephants will be more resistant to cold and will repopulate the tundra and coniferous forest in Eurasia and North America. Scientists feel that this will help to protect endangered Asian elephants and revive an ancient grassland in the tundra, which could prevent the melting of Siberia's permafrost.

The project is not without its critics who claim the idea is no more than a gimmick, seducing scientists into thinking they are saving the world and distracting us from guaranteeing our planet's biodiversity for future generations with promises of being able to fix mistakes later.

Scientists defending the idea explain, 'We're just bringing DNA back from the past to improve modern survival and diversity. The Asian elephant faces threats to its existence – it's going extinct, just like the mammoth did, and mainly because of humans. Bits of mammoth DNA can give them a better chance of survival.'

Read **Text B**, and then answer **Question 1(f)** on the question paper.

Text B: Waking the Baby Mammoth

This text is a review of a television programme called 'Waking the Baby Mammoth'.

Only a handful have been found before. But none like her. Her name is Lyuba. A one-month-old baby mammoth, she walked the tundra about 40 000 years ago, then died mysteriously. Discovered on a riverbank in Siberia, she's the most perfectly preserved woolly mammoth ever discovered. Lyuba has mesmerised the scientific world with her arrival – creating headlines across the globe.

'Waking the Baby Mammoth', a new television programme, tells the tale of this single accidental discovery of a frozen baby mammoth in the Siberian tundra and how the discovery has enriched our understanding of these extinct magnificent beasts.

The programme begins with the incredibly fortunate discovery of Lyuba by a reindeer herder who feared that disturbing the remains of the dead might lead to a curse. Too often with such findings, the preserved creature would be dug up and sold, leading to irreversible decomposition and the loss of a treasure trove of valuable information. However, the herder had enough foresight to contact authorities, and scientists began the careful retrieval process. Everyone wanted to know how Lyuba had died. What could she tell us about life during the Ice Age and the Earth's changing climate?

The programme follows the scientific process and the hurdles in understanding where Lyuba came from and what she can tell us about her Pleistocene[1] life. That being said, apart from specific experiments involving high-tech bone scans, tissue extraction and dental examinations, the programme does not delve too far into the intricate data. We are left wondering whether scientists will be able to extract her DNA, and what secrets that might uncover. It's impossible to watch the work on Lyuba without sharing the anxiety the scientists must have felt to get it right.

The programme succeeds brilliantly in bringing drama to a quite amazing story. We are presented with stunning 3D animations of Lyuba and her mother. In cinematic form, Lyuba is brought to life as an active furry baby mammoth, bouncing along next to scientists as they contemplate the frozen carcass's secrets. The visuals are beautiful – light shines off the baby's fur and her shadows dance in just the right way to really make her come alive.

The programme has truly woken the baby mammoth within our minds and hearts.

[1] **Pleistocene**: the Ice Age, which lasted over 2.5 million years and ended about 12 000 years ago

Read **Text C**, and then answer **Questions 2(a)–(d)** and **Question 3** on the question paper.

Text C: The Gift

This text is taken from a longer narrative. At this point in the story, it is the night of Natalia's sixteenth birthday. Her grandfather, a doctor, has arrived back late at night from visiting patients. He has woken Natalia and asked her to follow him quietly through the streets of their city.

We were nearing the end of our side street and I assumed the silence of our walk would be shattered by the bustle along the tramway. But when we got there, nothing, not even a single passing car. Every window was dark. The hazy moon seemed to gather the silence up around it like a net. Not a sound: no sirens, no rats in the bins that lined the street. My grandfather stopped, looked up and down the street, then turned left.

'It's not far now,' he said.

I caught up with him long enough to see that he was smiling. 'Not far to where?' I said, out of breath, angry. I drew myself up and stopped. 'I'm not going any further until you tell me.'

He turned to look at me, indignant. 'Lower your voice you fool,' he hissed. Suddenly his arms went over his head in a wide arc. 'Can't you feel it? No one in the world awake but us.' And off he went again.

We passed empty windows of shops that had gone out of business; lightless buildings; a beggar sleeping so soundly that I would have thought him dead if I hadn't realised that the moment had closed around us, making everything still.

Suddenly grandfather stopped ahead of me and stood, pointing into the distance, his hand shaking with excitement.

'There,' he said. 'Look!'

I peered out into the street. On the other side, there was a street lamp with a dying bulb. I was opening my mouth to say 'What?' and then I saw it. Half a block from us, an enormous shadow was moving along the street.

At first I thought it was a tram, but its shape was too organic, too lumpy, and it was going far too slowly for that, making almost no noise. It was swaying, swaying up the street with an even momentum in a rolling motion that was drawing it away from us like a tide, and every time it rocked forward, something about it made a soft dragging sound on the rails. As we watched, the thing sucked in air and then let out a deep groan.

'That's an elephant!' I said.

My grandfather said nothing. His glasses had fogged up during the walk, but he wasn't taking them off to wipe them. He took my hand; we watched the animal.

Its ears were folded back against the domed, bouldered head with big-lidded eyes; the arched roll of the spine fell away into the hips; dry folds of skin shook around the shoulders and knees as it shifted its weight. It seemed to take up the whole street. It dragged its curled trunk like a fist along the ground.

Several metres in front of it, holding a bag of something that must have been enormously tempting, a short young man was walking slowly backward, drawing it forward with whispers.

'I saw them at the train station as I was coming home,' my grandfather said.

© UCLES 2017

The elephant passed: slow, graceful, enchanted by the food in the young man's hand.

'No one will ever believe this,' I said.

My grandfather looked at me like he'd never seen me before. 'You must be joking,' he said.

'Look around. Think for a moment – do you think anybody would understand? Do you think it will matter to them?'

Later that year, we would read about how some soldiers had found an elephant near death at the site of an abandoned circus; about how, despite everything, despite closure and bankruptcy, the zoo director had said, 'Bring him in – eventually the kids will see him.' The newspapers ran a picture of him, standing stark-ribbed in his new pen at the zoo, an advert of better times to come, hope for the future and the end of the war.

Changes to this syllabus for 2024

Paper 1 Reading

The assessment of *W5: Make accurate use of spelling, punctuation and grammar* has been removed from Paper 1 Reading.

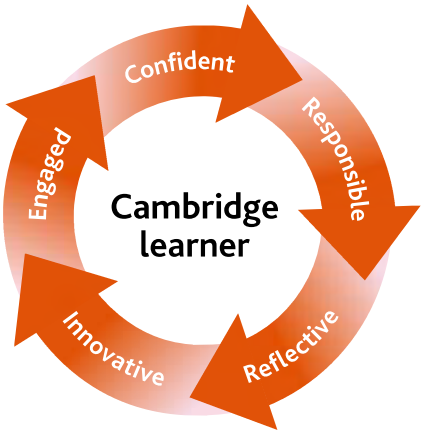
The W5 assessment objective has been removed from the following questions and marking criteria: Question 1f and Question 3

W5 will continue to be assessed in extended responses in the Writing Paper.

Section 1: About this guide

This learner guide explains what you need to know about your Cambridge IGCSE First Language English course.

It will help you to understand:



- ✓ the skills you should develop by taking this Cambridge IGCSE course
- ✓ how you will be assessed
- ✓ what examiners are looking for in the answers you write
- ✓ how you can revise effectively, using our revision tips and interactive revision checklist (Section 6).

You can use this guide to help you during your Cambridge IGCSE First Language English course, but remember that it is important to **read widely** – both for your own enjoyment and to increase your awareness of the different ways in which English can be used. Try to read different types of text, such as short stories, novels, newspaper reports, magazine articles, travel writing, autobiographies and biographies.

Reading a wide range of texts will help to inform and inspire your writing, and help to increase your understanding of **how to write for different purposes and audiences**.

Alongside your skills in reading and writing, you also need to develop your speaking and listening skills, e.g. by engaging in conversations.

Cambridge IGCSE qualifications are accepted and valued by leading universities and employers around the world as evidence of academic achievement. Following the Cambridge IGCSE First Language English course will help you to understand the subject and develop the skills you need for your next step in education or employment. This guide provides ideas and information to help you make the most of the opportunities your Cambridge IGCSE course offers to become an appreciative and critical reader, writer, speaker and listener of English.

Section 2: Syllabus content – skills and understanding

During your Cambridge IGCSE First Language English course you will need to:

- develop your ability to communicate clearly, accurately and effectively when speaking and writing
- learn how to use a wide range of vocabulary, and the correct grammar, spelling and punctuation
- develop your personal style of writing and speaking, as well as your awareness of the audience you are addressing.

You can think of your Cambridge IGCSE First Language English course as having three main areas of skills and understanding:

- Reading
- Writing
- Speaking and listening.

Here is an outline of the skills you should aim to have developed by the end of your course.

Reading

You need to be able to:

R1 demonstrate understanding of explicit meanings

R2 demonstrate understanding of implicit meanings and attitudes

R3 analyse, evaluate and develop facts, ideas and opinions, using appropriate support from the text

R4 demonstrate understanding of how writers achieve effects and influence readers

R5 select and use information for specific purposes.

Writing

You need to be able to:

W1 articulate experience and express what is thought, felt and imagined

W2 organise and structure ideas and opinions for deliberate effect

W3 use a range of vocabulary and sentence structures appropriate to context

W4 use register appropriate to context

W5 make accurate use of spelling, punctuation and grammar.

Speaking and listening

You need to be able to:

SL1 articulate experience and express what is thought, felt and imagined

SL2 present facts, ideas and opinions in a cohesive order which sustains the audience's interest

SL3 communicate clearly and purposefully using fluent language

SL4 use register appropriate to context

SL5 listen and respond appropriately in conversation.

These skills are sometimes called **assessment objectives** as they are the skills you will want to show you have when they are tested at the end of your course.

Section 3: How you will be assessed

There are four components available in the Cambridge IGCSE First Language English course. You will take either two or three components in total. Find out from your teacher which components you will be taking, and when you will be taking them.

At the end of your course, your reading and writing skills will be assessed for your final grade for Cambridge IGCSE First Language English. There are two different options for how this can happen.

Option one

You will take **two examinations.**

Paper 1
Reading

AND

Paper 2
Directed Writing and Composition

OR

Option two

You will take **one examination** and submit a **coursework portfolio** of written assignments completed during your course.

Paper 1
Reading

AND

Component 3
Coursework Portfolio

The same reading and writing skills will be tested in both options, and you will be able to access the full range of grades for the Cambridge IGCSE qualification.

There is also an extra option for assessing your speaking and listening skills:

Component 4
Speaking and Listening Test

Marks for speaking and listening do not contribute to the overall grade you receive for the reading and writing components. Instead, where you perform to an appropriate standard, your Cambridge IGCSE certificate will also record an additional speaking and listening grade.

Components at a glance

The table below gives you further information about each of the components.

Component	Time and marks	Skills assessed	Details	Percentage of qualification
Paper 1 Reading Passages (compulsory)	2 hour examination 80 marks	Reading (65 marks) Writing (15 marks)	Read three texts in the examination and answer **three questions**.	50%
Paper 2 Directed Writing and Composition (alternative to Component 3)	2 hour examination 80 marks	Writing (65 marks) Reading (15 marks)	Read one or two texts in the examination and answer **two questions**.	50%
Component 3 Coursework Portfolio (alternative to Paper 2)	Completed during your course 80 marks	Writing (65 marks) Reading (15 marks)	Complete **three written assignments**. One of these is a response to one or two texts.	50%
Component 4 Speaking and Listening Test (optional)	Additional test 10–12 minutes total 40 marks Completed before your written examination(s)	Speaking (30 marks) Listening (10 marks)	You will talk for about 3–4 minutes on a single topic or theme. This **individual talk** leads into a **conversation** about your chosen topic or theme.	Separately endorsed

Remember:

- you **must** take Paper 1
- you take **either** Paper 2 **or** Component 3
- Component 4 does **not** contribute to your overall result, and is marked as a separate examination, for which you will be given a separate result.

About each component

Below are further details about each component.

Paper 1	Marks	Questions
Reading 2 hour examination You will answer three compulsory questions on three texts (A, B, C). The texts will be printed on the question paper insert and may be on a similar topic. You should spend about **15 minutes reading the texts**, leaving approximately 30–35 minutes to respond to each question.	30	**Question 1** is based on Text A and Text B (The total length of Text A and B combined will be 700–750 words) This question is divided into separate parts: • **Comprehension task (based on Text A)** You respond to a series of sub-questions. These sub-questions test your understanding of both explicit and implicit meanings and your ability to select/use information from the text. *15 marks are available for reading* • **Summary task (based on Text B)** You answer a selective summary task using your own words. Your summary must be written as continuous writing of no more than 120 words. *10 marks are available for reading, 5 marks for writing*
	25	**Question 2** is based on Text C (500–650 words). This question is divided into two separate parts: • **Short-answer questions** You respond to a series of sub-questions which require answers of different lengths. These sub-questions test your understanding of the meaning of words and phrases used in Text C, as well as the effect they have on the reader. *10 marks are available for reading* • **Language task** You write 200–300 words in response to a question focused on certain paragraphs in Text C. You must select three relevant examples of interesting use of language from each of the paragraphs specified and analyse these examples to show how the writer uses language to convey meaning and to create effect. *15 marks are available for reading*
	25	**Question 3** is based on Text C (500–650 words). • **Extended response to reading** You should write 250–350 words in response to the task in which you modify, use and develop ideas and details from Text C. You will be asked to respond using your own words in one of the following text types: letter, report, journal, speech, interview and article. *15 marks are available for reading, 10 marks for writing*

Paper 2	Marks	Questions
Directed Writing and Composition 2 hour examination You will answer two questions: Question 1 and Question 2, 3, 4, or 5. Question 1 is compulsory and text-based. The text(s) will be printed on the question paper insert.	40	**Section A Directed Writing** is based on one or two texts totalling 650–750 words. You should write 250–350 words in response to the task in Question 1, using, evaluating and developing the information in the text(s). You will be asked to create a discursive/argumentative/persuasive response using your own words in one of the following text types: a speech, letter or article. *25 marks are available for writing and 15 marks for reading*
	40	**Section B Composition** offers a choice of four questions: two descriptive (Questions 2 and 3) and two narratives (Questions 4 and 5). You choose one question title (Question 2, 3, 4 or 5) and use the title to develop and write a composition. You should write 350–450 words. *40 marks are available for writing*

Component 3	Marks	Questions
Component 3 Coursework portfolio You will submit three assignments that you have completed during your course of study. The three assignments will need to demonstrate different writing intentions and styles to the reader. Assignments may be completed in any sequence during the course.	30	**Assignment 1: Writing to discuss, argue and/or persuade** You will be asked to respond to a text or texts in your own words, e.g. to create an article, a letter, or the words of a speech. *15 marks are available for writing and 15 marks for reading*
	25	**Assignment 2: Writing to describe** You will be asked to create a piece of descriptive writing (or poem(s) with a commentary). You will need to develop ideas and images which create a convincing, well-defined picture, with varieties of focus. *25 marks are available for writing*
	25	**Assignment 3: Writing to narrate** You will be asked to create a piece of narrative writing. You will need to ensure the plot is well defined and developed with features of fiction writing, such as description, characterisation and convincing details. *25 marks are available for writing*

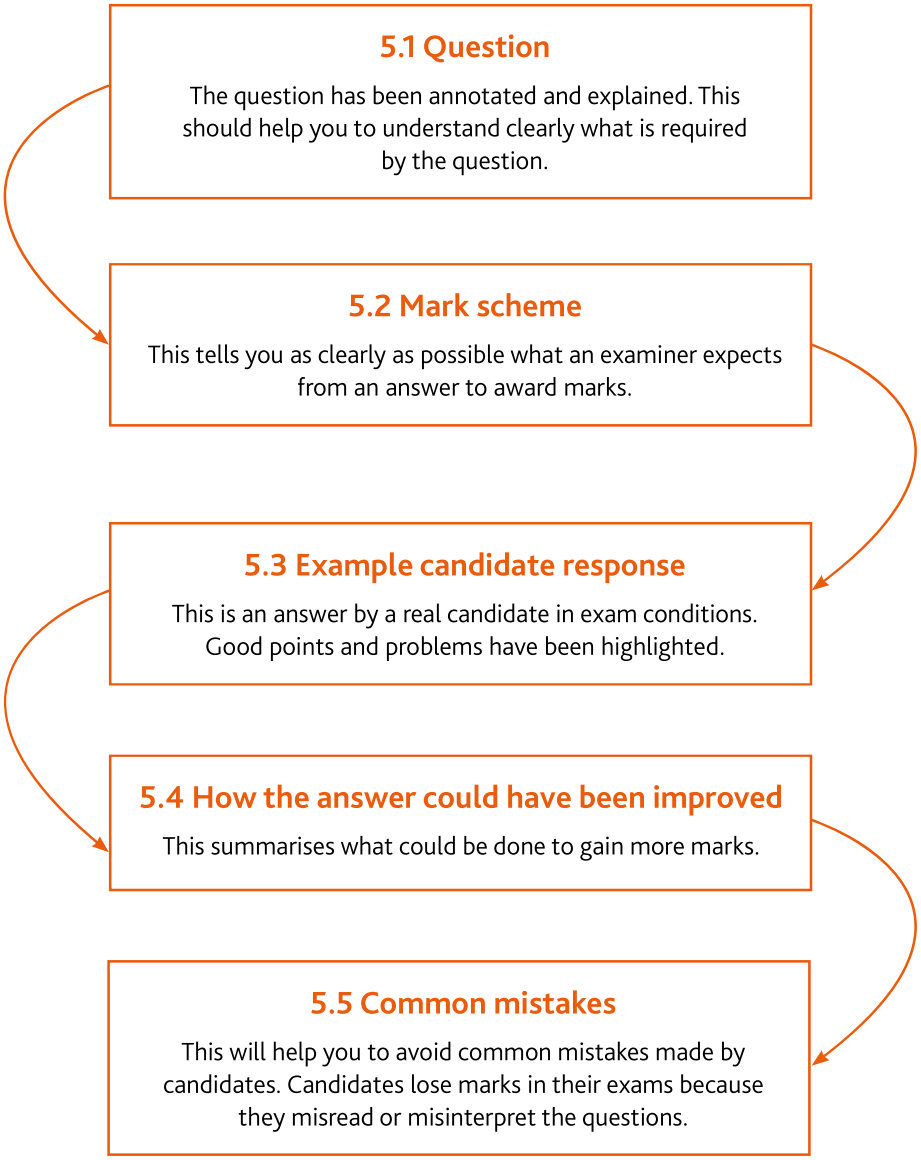
Component 4	Time	Questions
Component 4 (optional) Speaking and Listening Test There are two parts to the test. There is no question paper. You will choose your own subject with guidance from your teacher. You are not allowed to read from, or rely on, a script or extended notes.	3–4 mins	**Part 1: Individual Talk** You will talk for about 3–4 minutes on a single topic of particular interest. You will also need to show that you are able to prepare and organise material, are aware of audience, and can select and employ a range of language devices to make a lively presentation.
	7–8 mins	**Part 2: Conversation** You will take part in a conversation with the teacher/examiner about your chosen topic.

Section 4: What skills will be assessed

In section 2 of this learner guide, you saw that the areas of knowledge, understanding and skills that you will be assessed on are called assessment objectives (AO) and that there are three sets of assessment objectives for English:

- Reading
- Writing
- Speaking and listening

Assessment objectives(AO)	What does the AO mean?	What do you need to be able to do?
AO1 Reading (50% of your final mark)	This is the part of the course where your ability to read and respond in different ways to different types of text is assessed. .	• Show that you understand the explicit (more obvious) meanings communicated in a particular text • Show that you can recognise hints and suggestions in a text to understand the implicit (more subtle) meanings and attitudes • Evaluate and analyse the facts, ideas and opinions you read by using, explaining and developing them (and referring to supporting evidence from the text where it is appropriate) • Show that you understand how a writer has influenced their reader through their use of language • Select and use relevant information from a text to answer different questions
AO2 Writing (50% of your final mark)	This is the part of the course where your ability to write accurately and effectively, using Standard English appropriately is assessed.	• Write convincingly to convey real and imagined experience, thoughts and feelings • Sequence and connect the ideas and opinions effectively within your written response to interest and influence your reader • Use a range of appropriate vocabulary and sentence structures within each written response • Vary your writing to suit the purpose, audience and form of the task • Write accurately, avoiding errors of spelling, punctuation and grammar
AO3 Speaking and listening (This is optional and reported separately. It is not part of your final mark.)	During your course, you will be developing your use of spoken English in a range of situations. If you choose Component 4 Speaking and Listening Test, this is the part of the course where your presentation skills, your ability to participate in engaging conversations and to respond spontaneously to questions and prompts will be assessed.	• Speak about appropriate thoughts and feelings that relate to the topic of your talk • When you present your talk, ensure the order of your ideas are logical to make it easy to understand • Use a range of appropriate key features to communicate ideas in a way that satisfies the purpose and audience of your task • Communicate an appropriate and effective voice that matches the purpose and audience of the different types of talks you present • Listen to what others say during a conversation and respond with appropriate, relevant and thoughtful ideas of your own



Section 5: Example candidate response

This section takes you through an example question and response from a Cambridge IGCSE First Language English specimen paper. It will help you to understand what is required in a particular response.

Remember, the information and advice in this section is specific to the example question and response being demonstrated. It will help you to understand how your responses might be viewed by an examiner, but it is not a list of what to do in all questions.

In your own examination, you will need to pay careful attention to what each question is asking you to do and consider the evidence of skills and understanding you need to demonstrate for that particular task.

This section is separated as follows:

5.1 Question

This is an example of a **Paper 1 Question 3** task – an extended response to the text.

Once you have read through the question instructions, you will need to **re-read** the text to identify ideas and details you can adapt to use in your answer.

The **purpose** of the response is to explain the grandfather's point of view as he remembers the events described in Text C.

Re-read Text C, *The Gift*, in the insert and then answer Question 3 on this question paper.

Question 3

You are the grandfather. Some years later you are interviewed about your memories of that night for a radio programme about local history.

The interviewer asks you the following three questions only:

- What did you see and feel during your journeys through the city that night?
- What do you remember of your granddaughter's behaviour and reactions that night?
- What were your reasons for taking your granddaughter out that night and what do you think she gained from the experience?

Write the words of the interview.

Base your interview on what you have read in Text C, but be careful to use your own words. Address each of the three bullet points.

Begin your interview with the first question.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer and up to 10 marks for the quality of your writing.

The **audience** for the response includes both the interviewer and listeners to the radio programme who are interested in what happened at the time of the story.

You will need to include both explicit (obvious) and implicit (more subtle) ideas in your response – making sure you cover ideas for all three questions the interviewer has asked will help you to do this.

The response to this question needs to be in the **form** of an interview. Remember in your examination to check which form (or text-type) you need to use to answer the task.

The number of words suggested is for guidance: write **about** 250–350 words. Paying attention to the guidance for word limits will help you to plan your time in the examination and target the requirements of each question more effectively.

You will need to use ideas from Text C to show evidence of close reading, but be careful not to copy phrases or longer sections from the text as doing so suggests that you have not fully understood what you have read.

Text C: The Gift is taken from a longer narrative, *The Tigers Wife* by Téa Obreht. Your teacher will be able to find a full copy of the 2020 Specimen Paper 1 Insert on our School Support Hub www.cambridgeinternational.org/support

Here is an extract of Text C:

"We were nearing the end of our side street and I assumed the silence of our walk would be shattered by the bustle along the tramway. …'The newspapers ran a picture of him, standing stark-ribbed in his new pen at the zoo, an advert of better times to come, hope for the future and the end of the war."

At this point in the story, it is the night of Natalia's sixteenth birthday. Her grandfather, a doctor, has arrived back late at night from visiting patients. He has woken Natalia and asked her to follow him quietly through the streets of their city.

5.2 Marking Criteria for Question 3 (Level 5)

The marking criteria below lists the evidence of reading skills and understanding the examiner will be looking for in your answer. Level 5 includes a possible mark of 13–15 out of 15 marks available for reading in this question.

READING Level 5 description	READING Explanation
The response reveals a thorough evaluation and analysis of the text.	You have considered, adapted and used ideas from the text carefully and shown your understanding by presenting them from a different perspective to that of the original.
Developed ideas are sustained and well related to the text.	You have paid attention to details, hints and suggestions in the text to extend ideas in your response, e.g. to suggest what different characters might be thinking based on the evidence you have.
A wide range of ideas is applied	You have selected and used relevant ideas from the whole text and shown that you understand both explicit (obvious) ideas and implicit (more subtle) ideas and attitudes.
There is supporting detail throughout, which is well integrated into the response, contributing to a strong sense of purpose and approach.	You have identified a good number of important details in the text which your audience would need to know and/or which help to back up your purpose for writing. You include these details by dropping them in where relevant as you write your response.
All three bullets are well covered.	You have paid equal attention to all three bullet points in the question and included a number of relevant ideas for each bullet.
A consistent and convincing voice is used.	You have shown that you understand attitudes and perspectives in the text by using your own words to create a suitable voice for your response.

The marking criteria below lists the evidence of writing skills including structure and order and style of language, that the examiner will be looking for in your answer. Level 5 includes a possible mark of 9–10 out of 10 marks available for writing in this question.

WRITING Level 5 description	WRITING Explanation
Effective register for audience and purpose.	Just as we speak differently to different people, we write English differently in different circumstances. For example, we might alter the tone we use and/or be more formal in how we write depending on who is going to read what we write (the audience) and why we are writing (the purpose). You will need to use a level and style of writing to suit the audience and purpose for the task as set.
The language of the response sounds convincing and consistently appropriate.	You will need to maintain a suitable style, voice and tone for the whole of your response in order to show your expertise in using language in that particular context. You can think of this as like playing a role – your whole response should be convincing and sound like the real thing.
Ideas are firmly expressed in a wide range of effective and/ or interesting language.	Avoid repeating vocabulary from the text, or over-using certain words and expressions. You should try to use a wide range of vocabulary, selecting the appropriate words to express your meaning precisely and help communicate your ideas exactly to your reader.
Structure and sequence are sound throughout.	Make sure that your reader can follow your writing. Plan, organise and link ideas clearly and helpfully. Avoid repeating the same points, listing ideas or simply replaying information in the order of the passage.

5.3 Example candidate response and examiner comments

(1) "Hello, thanks for having me on this programme today."

"No problem we are welcome to have you. Regarding your memories of that particular night, what did you see and feel during you journeys through the city that night?"

(2) "Well, I took my granddaughter out for her 16th birthday. We walked to the end of our side street and entered into complete silence. (3) There were no cars and no windows alight (4) at all. I felt like time had stopped, everything was so silent. Smiling to myself, I turned left and kept walking until my granddaughter stopped me. I told her to be quiet (5), then we carried on, passing empty shops, lightless buildings and a beggar sleeping like a rock. (6) Then we reached it. Ecstatic (7), I told my granddaughter to look across the street, the one with the broken street light. And there it was, that majestic creature, walking slowly along the street.

1	The candidate does not waste time with a long introduction, and remembers to adapt their style to suit that of a radio interview.
2	This information would be better used in answering the third question as it explains one reason for taking his granddaughter out that evening.
3	The candidate includes a number of relevant ideas in answer to the interviewer's first question: it was silent, it was dark and there was no one around.
4	'Alight' is not the correct use of the word – alight means being on fire not being illuminated or lit up. More precise use of vocabulary is needed.
5	This idea answers the second question as it concerns Natalia's behaviour – suggesting she was too loud and needed to be quiet.
6	Supporting details make the response more convincing. Empty shops, lightless buildings, a sleeping beggar are explicit details of what grandfather saw (mentioned by Natalia). To show higher level reading skills, the candidate could develop these ideas by suggesting how grandfather felt about what he saw, based on the details in the text, e.g. we can infer that he felt sadness and regret at seeing the city like this.
7	The candidate picks up on details in the text to work out grandfather's feelings at this point.

Amazed by this creature, I could only stand and watch in awe. It slowly swayed up and down the street, full of lethargy (8) *it dragged it's trunk across the ground.* (9) *A few metres in front of it was a young man, coaxing it with a tempting bag filled with food. We watched as they slowly walked away."*

"Wow. And for my next question, what do you remember about your daughter's behaviour and reactions that night?"

"I remember she was completely in awe (10) *of the magnificent beast, just like I was. She was extremely surprised at it. She was complaining the whole way as well."* (11)

"And for my final question, what were your reasons for taking your granddaughter out that night and what do you think she gained from the experience?"

(12) *"My reason for taking her out were simple, number one, to give her an appreciation of animals and their lives and also, number two, to give her hope and the courage to live on till the end of the war. I wish she will have gained the courage and ability to never give up and that is a very important message. I want to share."* (13)

"Amazing. Thank you for that and I appreciate your finding the time in coming here today."

"No problem and thank you for the brilliant show."

(8) The candidate works out that the elephant seemed tired and lacking in energy (lethargic). This is an implicit idea – suggested by the way the animal is moving. Including implicit ideas as well as explicit ideas shows evidence of careful reading.

(9) The candidate mentions the creature they saw, but could show they had read the whole text carefully by mentioning that grandfather had seen the elephant earlier at the train station.

(10) The grandfather's feeling of awe at the elephant is mentioned – this is based on the suggestions in the text of the elephant's potential power and size. This development shows that the candidate is focused on the task and thinking about the events from the grandfather's point of view.

(11) The candidate offers a very short answer to the second question from the interviewer with just one clear idea – that Natalia was surprised to see the elephant. The candidate mentions her complaining which is not correct. She refused to go further, but followed him without complaining for most of their journey. This needed more careful explanation.

(12) The reason that it was Natalia's birthday is mentioned earlier in the answer. The candidate might suggest that this trip was also a present for her birthday. This idea is hinted at in the title of the text 'The Gift'.

(13) The candidate offers two more relevant ideas – that the trip to see the elephant was to give Natalia hope, and that grandfather hoped that seeing the elephant would help her to appreciate the wonders of nature/ the natural world. The candidate explains that this was important as this was all happening during wartime, showing that the candidate has read the text carefully.

5.4 How the answer could have been improved

The candidate includes a good range of ideas, but could have used more ideas from the text in response to the second bullet especially.

Some ideas are developed but opportunities are not always taken to suggest grandfather's feelings and his reactions looking back.

Planning ideas for each bullet before writing their response would have allowed the candidate to organise the route through their answer and make sure they made the best use of the ideas they had spotted rather than rely on the order of the text. For example, it could have been better to mention that it was Natalia's birthday in answer to the third bullet and suggest more clearly that this was a present for her, rather than including that information at the start of the answer.

The writing is mostly accurate, though there are some errors which could have been avoided with more careful checking.

At times, the candidate repeats vocabulary, e.g. 'slowly' – rather than offering a wider range by finding alternatives.

5.5 Common mistakes

Remember that the extended response task is designed to assess both your reading and writing skills. You need to provide the examiner with evidence to show the skills and understanding you have. You should try to avoid mistakes which suggest you have misread either the task or text. Below is a list of some of the common mistakes learners make:

- **Missing out one or more of the bullet points of the question**

Bullet points are included to help you plan your answer to show evidence of your reading skills and understanding. It is important to identify and include ideas relevant to all three of the bullet points.

- **Forgetting to include relevant details**

Details such as names, times and locations may be important evidence that you have read closely. Try to include all the details your audience would need to know to have a full understanding of the ideas you are including in your answer.

- **Drifting from the text.**

The task is designed to test how well you have read and understood the text. If your answer invents characters, events or information that are not mentioned or even hinted at in the text, you are missing the chance to show your reading skills and may have lost focus on the task and text. Make sure that any ideas you include in your answer have been suggested in the text or task.

- **Repeating the text**

Simply repeating what happens exactly as it happens in the text is not going to show that you are able to understand implicit meanings, or make judgements about what you have read. Make sure you pay attention to what the task is asking you to do, e.g. how it wants you to change perspective (point of view) to show that you have understood more than just the obvious, explicit ideas.

- **Writing from the wrong perspective**

The extended response task is designed to give you the best opportunities to show that you have read the text closely and understood the ideas and attitudes it contains. Make sure you pay close attention to the role you have been given, e.g. you may have been asked to be a particular character in the text and write from their point of view, or asked to write an article as if you were a journalist who had interviewed those involved.

- **Missing opportunities to develop ideas**

You will need to show evidence that you have not just considered the obvious surface meaning of what you have read, but can read more carefully. Reading carefully and closely will mean that you able to make judgements about what you have read and show that you understand the implications by extending ideas. Making judgements and extending ideas are examples of 'development' you might include to show reading skills at a higher level. You can think of 'development' as making obvious in your answer some of the meanings and ideas which are not as obvious in the original text, e.g. what a particular character might be thinking at a given point, or what they are likely to do next based on the evidence you have in the text.

- **Using inconsistent or faulty style**

Your response to the extended reading task will also be assessed for writing skills. It is important to control your writing throughout the whole response. Make sure that you do not include errors that affect the meaning of what you are writing. Do not lose focus on the type of text you are meant to be writing in your response, e.g.by forgetting to sign off in character at the end of a letter.

5.6 General advice

- Read the text and question carefully more than once.
- As you read the question, identify the perspective (the point of view or role) you are being asked to take in your answer.
- Underline the text type the question is asking you to use for your response, e.g. letter, interview, speech and keep this in mind for the whole response.
- Thinking from the perspective you have been asked to take, consider why you are writing (or speaking) and who you are imagining will be reading (or listening to) what you write or say.
- Use the bullet points in the question to plan the ideas you will include in your response. Make sure you include ideas for all three bullet points.
- Use your own words most of the time – try not to copy phrases or longer sections from the text.
- Remember to include all the important details your reader would need to know.
- Use and develop ideas from the text – if you find you are simply repeating ideas, re-read the question to check what you have missed.
- Control and correct your writing, e.g. keep tenses in agreement and use connecting words/phrases to link your ideas.
- Make sure that the voice and register you develop in your response fits your persona/role, audience and purpose.

Section 6: Revision

This advice will help you revise and prepare for the examinations. It is divided into general advice for all papers and more specific advice for Paper 1, and Paper 2.

Use the tick boxes ☐ to keep a record of what you have done, what you plan to do or what you understand.

General advice

Before the examination

- ☐ Find out when the examinations are and plan your revision timetable. Divide the time you plan to use into sections to cover each part of the course.
- ☐ Use this guide to find out how long each examination is, how many questions you have to answer, and how many marks there are for each question, to help you plan how long you have for each question.
- ☐ Find out the choices you have in each examination paper. Make sure you know how many sections there are and which sections you should answer from.
- ☐ When there is a choice of question types in a section, or a range of response types possible, make sure you revise all response and question types equally well.
- ☐ Make sure you understand the meaning of the words used in questions. Look at past examination papers, highlight the words and consider carefully what they are asking you to do.
- ☐ Make revision notes of errors to avoid and/or rules you need to remember, e.g. spellings you often get wrong, or how to punctuate direct speech correctly. Try different styles of notes, e.g. mind maps, cue cards, extended notes, colour coding, voice recordings, etc.
- ☐ Work for short periods then have a break. Revise small sections of the syllabus at a time.
- ☐ Test yourself by listing the main writing styles and their key features without looking at your notes.
- ☐ Make a list of the different question types in your examination paper(s) and the things you need to do, or avoid doing, for each type.
- ☐ Look at past paper questions so that you are clear about what to expect in an examination.
- ☐ Look at mark schemes to help you understand how the marks are awarded for each question.
- ☐ Read and listen to other writers and speakers of English. When revising, you do not have to read or listen to whole texts and could listen to excerpts or read short sections of longer texts. Write your own examination-type questions based on what you have read or try to write a paragraph in the same style as the writer.

In the examination

- [ ] Read the instructions on the examination paper carefully and make sure that you answer the correct number of questions from each section.
- [ ] Plan your time according to the marks for each question. For example, a question worth three marks requires less time and a shorter answer than one worth ten marks. If a question has several parts, then the parts with more marks will need more time and more developed answers.
- [ ] Do not leave out questions or parts of questions. Remember, no answer means no mark.
- [ ] Read each question carefully so that you are clear what you need to do.
    - Identify the key words – you could underline or highlight them.
    - Identify the other key words and guidance, e.g. if it is important to use your own words, or write no more than a certain number of words in your answer, the question will tell you.
- [ ] Read through all parts of a question before starting your answer. This will help to make sure you do not repeat material and waste time.
- [ ] Read any text(s) you are given in the examination more than once – circle or underline key information and ideas to use in your answer. You might find it useful to use a question mark or wiggly line next to anything in the text you are unsure of and need to look back at.
- [ ] Answer the question. Stay focused on what you are being asked to do and only write what is needed to answer the question.
- [ ] Plan your answer before you write them. Rambling, muddled or repetitious answers are unlikely to score well – if you know what you are planning to write before you start it is easier to communicate clearly and make efficient use of the time in the examination.
- [ ] Make sure that your answer is presented helpfully, e.g. your hand-writing is clear and any corrections you make to your work can be read easily. If you continue an answer on another sheet make sure that the continuation is clearly labelled to show the question number you are answering. Paper 1 advice

Paper 1 advice

Question 1: Comprehension

- [ ] Read Text A carefully before you answer any of the questions. As you deal with each question, look back at the section of the text it is asking about to work out your answer.
- [ ] Make sure you use your own words where the question tells you to do so.
- [ ] Pay attention to the specific evidence the question is asking for, e.g. if the question asks for two examples make sure you give two.
- [ ] Where a question asks you to explain how or why, make sure you explain ideas fully. You can use 'because', 'as' and 'since' to help you to do this.

Question 1: Summary task

- [ ] As you read Text B, underline ideas that will help you answer the focus of the summary task.
- [ ] Use your own words where possible when writing your summary. Do not use quotations or copy phrases or longer sections from Text B.
- [ ] Keep your summary objective – do not include personal experiences, comments or opinions.
- [ ] Only include ideas that directly answer the question, any redundant material or extra information from the text should not be included.
- [ ] Organise relevant ideas from the text into a logical order. Paragraph your summary if it is necessary and helpful to do so.
- [ ] Use connecting words/phrases to link or contrast ideas within and between sentences. Do not write in note form or list ideas.
- [ ] Ensure your summary is within the word limit. If it is too long, then it is not an effective summary.

Question 2: Short-answer questions

- [ ] Read the whole of Text C at least once before you start your answers to Question 2. You will need to show that you understand the meaning of words and phrases as they are used in this context not just the general meaning of them.
- [ ] Read each question carefully and pay attention to what you are being asked to do to show your understanding, e.g. if the question asks you to give one word or phrase do not give a whole sentence.
- [ ] Make sure you use your own words where the question tells you to do so.
- [ ] As you answer each question, look back at the section of Text C it is asking about in order to work out your answer.
- [ ] Where a question asks you to explain how or why, make sure you explain your ideas fully. You can use 'because', 'as' and 'since' to help you to do this.
- [ ] Remember when you are asked to use an example to explain, you will need to identify your example clearly, e.g. put quotation marks around any words taken from the text. Use your own words in the explanation of how the example chosen is working to suggest something particular to the reader.

Question 2: Language task

- [ ] Re-read both of the paragraphs identified in the question, underlining examples of words or phrases you might choose to explain in your answer.
- [ ] Select the strongest three examples from each paragraph – that is six in total. Try to include imagery and to choose examples you can best explain in detail.
- [ ] For each example you use, make sure that you explain the precise meaning in context and suggest exactly how the words/phrases are meant to make the reader feel in relation to the focus of the question (the 'effect' the writer wanted to create).

- [ ] To help you analyse and explain the effect of your examples, think of the associations of the each of the words and phrases the writer has used, e.g. consider where else you might expect to hear this word used, what picture(s) it creates, what sensation(s) it suggests.
- [ ] Use 'because', 'as' and 'since' to help you extend your explanations.
- [ ] Where you recognise connections or contrasts in how the writer has used language, explain them in a concluding general comment or overview.
- [ ] Make sure that your explanations are precise and specific – avoid empty general comments such as 'the writer uses a lot of description' and do not use the same explanation for more than one example.
- [ ] Remember Question 2 is not assessed for writing – this means it is better to try to find the right word to explain a meaning or effect precisely and show your understanding more fully, even if you are not quite sure of the spelling.

Question 3 Extended response to reading

Reading

- [ ] Pay attention to the perspective, audience, purpose and form required by the question.
- [ ] Use the bullet points to help plan the content for your answer.
- [ ] It is important to demonstrate your ability to interpret and use a good range of relevant ideas and details from the text.
- [ ] Make sure you cover all aspects of all three bullet points – this will help you to include evidence that you have understood implicit ideas and attitudes, as well as explicit. more obvious meanings.
- [ ] Use your own words where you can – do not just copy expressions from the text.
- [ ] Try to develop ideas – watch out for hints and suggestions in the text such as how characters might feel, or their reasons for behaving as they did.
- [ ] Extend explanations and ideas using the evidence you have found by reading Text C – do not invent completely new ideas or information that could not be backed up with details or clues from the text.

Writing

- [ ] Ensure the voice, style and register you use fits the persona/role, audience and purpose for the task.
- [ ] Plan the route through your answer before you start writing to make sure your ideas are ordered logically and linked helpfully for your reader.
- [ ] Keep in mind the text type that you are meant to be writing for the whole answer.
- [ ] Take time to read back and correct your answer to avoid errors which affect meaning.

Paper 2 advice

Section A Directed Writing

Writing

- [ ] Identify the purpose and form (text type) for the task as you read the question and keep these in mind as you plan and write your answer.
- [ ] Organise your ideas before writing and plan the structure of your response carefully so that is it helpful and clear for your reader. For example, if you are arguing a particular point of view make sure you build your argument logically and persuasively, rather than just list ideas or track through points in the same order as the text(s).
- [ ] Use vocabulary carefully and deliberately – try to use a range of precise and appropriate words, rather than repeating the same words, using very simple words or copying vocabulary from the text(s).
- [ ] Control sentence structures, keep tenses in agreement and use connecting words/ phrases to link your ideas.
- [ ] Be aware of the audience for your response and adapt your written style to suit the kind of style your reader/ listener would expect.

- [ ] Check and correct your writing to avoid errors in spelling, punctuation and grammar.

Reading

- [ ] Read the text(s) carefully, underlining ideas that will help you address the task. Plan to use ideas from the whole text, or both texts, in your answer.
- [ ] Do not just repeat ideas from the text(s) – be prepared to criticise or question the ideas in the text(s).
- [ ] As you read the text(s), look for clues to the attitudes of writers or speakers which may affect their viewpoint or suggest that something they say may be biased.
- [ ] Include a range of ideas from the text(s) – including implicit (more subtle) ideas as well as explicit (more obvious) ones and evaluating at least some ideas in depth.
- [ ] Make sure the ideas you use are derived from the text(s) – paying attention to the bullet points when you are planning your content will help you to do this.

Section B Composition

- [ ] Consider all four choices of task before selecting the one you feel will best allow you to demonstrate your skills as a writer.
- [ ] Remember the key features of the type of writing you choose – descriptive or narrative – and keep these in mind as you plan and write your composition.
- [ ] Plan your route through your composition – including how it will end – before you start writing.
- [ ] Try to be convincing and original in your use of detail.
- [ ] Choose your vocabulary and sentence structures carefully to create specific effects.
- [ ] Check your writing carefully and correct errors especially those which will badly affect your mark, such as basic spelling, tense and punctuation mistakes.

Component 3 advice

Coursework portfolio

- [ ] Do not leave writing your coursework assignments until the last minute.
- [ ] Adapt your writing to demonstrate a different writing intention and style in each assignment.
- [ ] Plan your assignment beforehand and be prepared to revise, edit and draft your response to make sure it best suits your audience and purpose.
- [ ] Re-read each draft carefully and correct any errors in grammar, spelling, paragraphing, sentence structure or punctuation.
- [ ] Choose your vocabulary and sentence structures carefully to create specific effects.
- [ ] Always think carefully about which tense you should be using, and check that your tenses are always in agreement.
- [ ] It is generally better that you complete more than three assignments during your course from which a suitable choice can be made for your final portfolio.

Assignment 1: Writing to discuss, argue and/or persuade in response to a text or texts

Reading

- [ ] Your response should include an overview of the argument in the text(s) as a whole.
- [ ] Show your understanding by commenting on specific ideas presented by the author of the text(s).
- [ ] Do not just repeat ideas from the text(s) – be prepared to criticise or question the ideas in the text(s).

- [ ] As you read the text(s), you look for clues to the attitudes of writers or speakers which may affect their viewpoint or suggest that something they say may be biased.
- [ ] You evaluate a range of ideas - including implicit (more subtle) ideas as well as explicit (more obvious) ones.

Writing

- [ ] Keep the purpose and form (text-type) for the task in mind as you plan and write your assignment.
- [ ] Organise your ideas before writing and plan the structure of your response carefully so that is it helpful and clear for your reader. For example, if you are arguing a particular point of view make sure you build your argument logically and persuasively, rather than just list ideas or track through in the same order as the text(s).
- [ ] Use vocabulary carefully and deliberately – try to use a range of precise and appropriate words, rather than repeating the same words, using very simple words or copying vocabulary from the text(s).
- [ ] Control sentence structures, keep tenses in agreement and use connecting words/ phrases to link your ideas.
- [ ] Be aware of the audience for your response and adapt your written style to suit the kind of style your reader/listener would expect.
- [ ] Check and correct your writing to avoid errors in spelling, punctuation and grammar.

Assignment 2: Writing to describe

- [ ] Remember the key features of descriptive writing and keep these in mind as you plan and write your assignment.
- [ ] Plan your route through your description – including how you will vary the focus – before you start writing.
- [ ] Develop the ideas and images you include carefully using well-chosen details.
- [ ] Try to develop a convincing overall picture.
- [ ] Choose your vocabulary and sentence structures carefully to create specific effects.
- [ ] Check your writing carefully and correct errors in spelling, tense and punctuation mistakes.
- [ ] Be prepared to revise and redraft your assignment to find the best way to engage your reader.

Assignment 3: Writing to narrate

- [ ] Remember the key features of narrative writing and keep these in mind as you plan and write your assignment.
- [ ] Plan your route through your narrative – including any twists or turns in the plot and how you will end – before you start writing.
- [ ] Decide how best to begin your story to interest your reader from the start.
- [ ] Avoid using clichés. Try to 'show rather than tell' your reader, e.g. include convincing details.
- [ ] Choose your vocabulary and sentence structures carefully to create specific effects.
- [ ] Check your writing carefully and correct errors in spelling, tense and punctuation mistakes.
- [ ] Be prepared to revise and redraft your assignment to find the best way to engage your reader.

Component 4 advice

Speaking and listening

- [ ] Speak clearly and audibly.
- [ ] Offer full explanations.
- [ ] Take account of your listener and consider their reaction(s) to what you say.
- [ ] Use a range of vocabulary to express your ideas.
- [ ] Adapt the way you speak to suit your purpose, e.g. by varying your use of tone or emphasis for effect.

Part 1 Individual Talk

- [ ] Choose a theme or topic of particular interest which will allow you to create a lively presentation.
- [ ] Think about the kind of questions you might be asked about your planned topic – if you cannot think of any questions, it may be that the topic is not interesting enough and you might want to change it.
- [ ] Prepare and organise the ideas for your talk beforehand – you can bring one small cue card into the examination room to remind you of the points you want to make, but you are not allowed a script or extended notes.
- [ ] Think about how you will gain and maintain the interest of your audience, e.g. by making use of creative presentational styles such as taking up a 'voice'.
- [ ] Practise your talk before you undertake the recorded assessment but do not try to memorise everything you will say – you need to be able to talk naturally and take account of your audience as you speak.

Part 2 Conversation

- [ ] Try to respond fully to any question the teacher/examiner asks, offering reasons and/or examples to support your ideas, thoughts and opinions.
- [ ] Try to develop the conversation by asking the teacher/examiner questions, or moving the conversation on by introducing another relevant discussion aspect, point or idea.
- [ ] Listen to any suggestions and comments from the examiner but do more than simply agree or disagree. Be confident to extend what they are saying with further explanation or examples to illustrate the point, and/or suggest an alternative viewpoint.

Revision checklists

This section of your guide provides some revision checklists you can use to help focus your revision. These checklists do not cover everything you need to know in detail, but will provide you with an overview of the skills and knowledge from the syllabus that you should revise. For more details you should talk to your teacher about what the syllabus requires.

The table headings are explained below:

Question type	You should be able to	R	A	G	Comments
Questions for each paper.	Skills and understanding you need to cover.	You can use the tick boxes to show when you have revised a part of the course and how confident you feel about it. R = RED means you are really unsure and lack confidence in that skill; you might want to focus your revision here and possibly talk to your teacher for help A = AMBER means you are reasonably confident in a skill but need some extra practice G = GREEN means you are very confident in a skill. As your revision progresses, you can concentrate on the RED and AMBER skills in order to turn them into GREEN. You might find it helpful to highlight each skill in red, orange or green to help you prioritise.			You can use the 'Comments' column to: • add more information about the details for each point • include a reference to a useful resource • add learning aids such as rhymes, poems or word play • highlight areas of difficulty or things that you need to talk to your teacher about.

Remember to check which of the four course components you are taking – Paper 1 Reading, Paper 2 Directed Writing and Composition, Component 3 Coursework Portfolio and/or Component 4 Speaking and Listening Test – then use the relevant revision checklists on the next pages to help plan and guide your revision.

Paper 1 Reading

Question type	You should be able to	R	A	G	Comments
1(a–e)	Find evidence in the text of explicit (more obvious) ideas	☐	☐	☐	
1(a–e)	Use your own words to explain explicit (more obvious) ideas from the text	☐	☐	☐	
1(a–e)	Identify and explain implied (more subtle) ideas in a text	☐	☐	☐	
1(f)	Select relevant ideas from the text to answer the summary question	☐	☐	☐	
1(f)	Organise and structure your summary response helpfully for your reader and to avoid repetition	☐	☐	☐	
1(f)	Use your own words, concisely, to show you have understood a wide range of relevant ideas from the text	☐	☐	☐	
		☐	☐	☐	
2(a–b)	Find a word or phrase in the text with a particular meaning	☐	☐	☐	
2(a–b)	Use your own words to explain the precise meaning of a word or phrase used by a writer	☐	☐	☐	
2(c)	Use examples from a short section of text to explain how a writer makes the reader feel about a character, event or setting	☐	☐	☐	
2(d)	Choose a range of interesting examples of words or phrases (including imagery) from two paragraphs of text	☐	☐	☐	
2(d)	Explain the precise meanings of each of the words and phrases you have chosen	☐	☐	☐	

Question type	You should be able to	R	A	G	Comments
2(d)	Explain how and why the writer has used this language to create specific effects	☐	☐	☐	
3	Take account of the persona/role, purpose and audience for the task	☐	☐	☐	
3	Consider ideas in the text from a different perspective to that of the Original, e.g. from a different character's point of view or a different point in time	☐	☐	☐	
3	Adapt your writing to suit different text types, e.g. letter, report, article, journal, speech and interview	☐	☐	☐	
3	Identify a wide range of relevant ideas from the text to fully address each bullet point of the task	☐	☐	☐	
3	Use your own words to respond to the task fluently, accurately and clearly	☐	☐	☐	
3	Develop and extend ideas based on the hints and more subtle details of the text	☐	☐	☐	

Paper 2 Writing

Question type	You should be able to	R	A	G	Comments
Question 1 Section A	Use an appropriate register (discuss/argue/persuade)	☐	☐	☐	
	Identify relevant ideas from the text to address the task bullet points	☐	☐	☐	
	Evaluate the information (facts and ideas) in the text(s) for use in your answer	☐	☐	☐	
	Adapt your writing to suit different text types, e.g. speech, letter, article	☐	☐	☐	
	Make accurate use of spelling, punctuation and grammar	☐	☐	☐	
	Take account of your audience, e.g. organise ideas and opinions	☐	☐	☐	
	Recognise and respond to implicit meanings and attitudes – including perspectives, opinions and bias	☐	☐	☐	

Question type	You should be able to	R	A	G	Comments
Question 2/3/4/5 Section B	Use the title/task to plan relevant and interesting content ideas before you write your composition	☐	☐	☐	
	Engage and interest the reader in your answer	☐	☐	☐	
	Organise and structure your answer deliberately for effect	☐	☐	☐	
	Develop the plot clearly in narratives, e.g. use description, characterisation and convincing details	☐	☐	☐	
	In descriptions, create a convincing overall picture with varieties of focus	☐	☐	☐	
	Use precise, well-chosen vocabulary and varied sentence structures, chosen for effect	☐	☐	☐	
	Use an appropriate register for your response	☐	☐	☐	
	Avoid errors in spelling, punctuation and grammar	☐	☐	☐	

Component 3 Coursework

Question type	You should be able to	R	A	G	Comments
All assignments	Use an appropriate register for each response	☐	☐	☐	
	Plan, redraft and revise your writing to make it more engaging and effective for your reader	☐	☐	☐	
	Identify and correct errors in spelling, punctuation and grammar	☐	☐	☐	
	Use precise, well-chosen vocabulary and varied sentence structures appropriate to context	☐	☐	☐	
	Organise and structure your ideas and opinions for deliberate effect	☐	☐	☐	
Assignment 3	Develop the plot clearly, e.g. use description, characterisation and convincing details	☐	☐	☐	
Assignment 2	Create a convincing overall picture with varieties of focus	☐	☐	☐	
Assignment 1	Adapt your writing to suit different text types – e.g. speech, letter or article – and different purposes (discuss, argue and/or persuade)	☐	☐	☐	
Assignment 1	Identify relevant ideas from the text to address the bullet points of the task	☐	☐	☐	
Assignment 1	Recognise and respond to implicit meanings and attitudes – including perspectives, opinions and bias	☐	☐	☐	

Component 4 Speaking and Listening Test

Question type	You should be able to	R	A	G	Comments
Task 1: Individual task and Task 2: Conversation	Express what you feel, think or imagine in some detail without relying on or reading from extended notes or a script	☐	☐	☐	
	Take account of your audience – e.g. by ordering your ideas helpfully and using a lively style of delivery	☐	☐	☐	
	Explain experience(s) clearly and effectively – e.g. using tone or emphasis for effect	☐	☐	☐	
Task 2: Conversation	Listen carefully to what the teacher/examiner says during your conversation and respond fully to their questions and ideas	☐	☐	☐	
	Speak on equal terms with the teacher/examiner during your conversation	☐	☐	☐	

Section 7: Useful websites

The websites listed below are useful resources to help you study for your Cambridge IGCSE First Language English course.

www.cambridgeinternational.org/cambridge-for/parents-and-students/in-class/study-resources/
This is the Cambridge International Assessment Education public website where you can find the syllabus and the most recent past papers to download in the **Resource centre**.

Please note: The website links below provide direct access to internet resources. Cambridge Assessment International Education is not responsible for the accuracy or content of information contained in these sites. The inclusion of a link to an external website should not be understood to be an endorsement of that website or the site's owners (or their products/services).

The website pages were selected when the guide was produced. Other aspects of the sites were not checked.

https://www.thepaperboy.com/uk/index.cfm
This provides front page articles from a variety of newspapers in real time.

www.ted.com/talks
Find some interesting and engaging talks to study and analyse.

http://www.bbc.co.uk/learningenglish
Some interesting activities, games and videos to help secure your skills of writing, reading and, speaking and listening. This website also has the feature of learning English with the support of other languages, e.g. Mandarin, Gujarat and Hindi.

learnenglish.britishcouncil.org/en/
This site contains resources and activities to help improve your English.

CAMBRIDGE
UNIVERSITY PRESS & ASSESSMENT

Cambridge Professional Development Pricing – North America

1 August 2025 thru 31 July 2026

We believe that supporting teachers in their professional development leads to improved outcomes for learners. Good quality professional development and reflective practice are essential parts of a teacher's professional life. We offer a range of different professional development opportunities for teachers at all stages of their professional journey, so you can find something that meets your needs.

Our courses are available in three different formats:

- **online** courses that you can access at any time. These courses 3 to 5 weeks in duration.
- live **virtual** courses. These courses consist of 1 to 4 sessions that are ~3 hours in duration.
- **face-to-face** courses. These courses are 2 days in duration.

Open courses are available for booking by any Cambridge teacher, and can be booked via the Professional Development Calendar. Please contact Customer Support if you need assistance making a booking.

Private courses are closed to the requesting school or district. These events are not advertised on the public website. Capacity is 30 people per course.

Schools and districts in North America can request *open* or *private* training to be held at their facilities. To request any Cambridge professional development courses, please complete this form and our team will respond with options and pricing.

What a Cambridge Classroom Looks Like

This 4-hour course introduces four key approaches which are the foundations of a Cambridge classroom: active learning, assessment for learning, metacognition, and inclusion. Explore what these approaches look like in practice and start building a practical toolkit of strategies.

Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	n/a	n/a	$3,725.00
Virtual	$96.00	$120.00	$3,195.00

© Cambridge University Press & Assessment, 2025

Syllabus-specific courses

Introduction

Introduction courses are for teachers who are new to Cambridge or to a specific syllabus or programme. More information can be found on our website.

Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$518.00	$576.00	$11,915.00
Virtual	$168.00	$210.00	$3,865.00
Online	$168.00	$210.00	$3,865.00

Focus on Teaching

Focus on Teaching courses are for teachers who want to explore a specific area of teaching and learning within a syllabus or programme. More information can be found on our website.

Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$284.00	$316.00	$6,540.00
Virtual	$96.00	$120.00	$2,210.00
Online	$112.00	$140.00	$2,575.00

Focus on Assessment (IGCSE and Advanced) or Progress (PLS)

Focus on Assessment courses are for teachers who want to understand the assessment of a syllabus in greater depth. More information can be found on our website.

Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$569.00	$632.00	$13,085.00
Virtual	$136.00	$170.00	$3,130.00
Online	$112.00	$140.00	$2,575.00

Marking Workshops

Our syllabus-specific marking and coursework marking workshops help teachers build their confidence in assessing students' work. More information can be found on our website.

Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Virtual *per component	$80.00	$100.00	$3,195.00
Online	$112.00	$140.00	$2,575.00

Improving Speaking

Our Improving Speaking Performance courses help language teachers to improve their speaking lessons and understand how to better support their students. More information can be found on our website.

Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Online	$168.00	$210.00	$3,865.00

Enrichment courses

Our Enrichment Professional Development is perfect for teachers and school leaders who want to transform their approach to teaching.

We design our Enrichment courses to be dynamic and engaging. Our experienced trainers encourage teachers and leaders to reflect on their professional practice and help them to develop practical strategies they can use in their schools. Participants are also encouraged to share ideas and learn from other members of the Cambridge International community.

Each course focuses on a specific skill or concept in teaching and learning. For example:

- Active Learning and Assessment for Learning
- Metacognition: Boosting Students' Learning
- Effective Talk and Questioning
- Responsive Education for All Learners

Some courses also concentrate on a particular subject or syllabus. More information can be found on our website.

Format	Early Bird Pricing	Regular Pricing	Private Course Max 30 participants
Face-to-face	$548.00	$609.00	$12,605.00
Virtual	$168.00	$210.00	$3,865.00
Online	$168.00	$210.00	$3,865.00

CAMBRIDGE

Cambridge School Leader Standards

Cambridge is committed to supporting the continuing improvement of the quality of educational outcomes for all learners following Cambridge programmes in schools around the world.

We recognise that classroom teaching has the largest impact on the quality of educational outcomes. What teachers know and do makes the difference in improving student learning outcomes – their knowledge, pedagogical practices and relationships with students.

We also recognise that teachers cannot achieve and sustain high-quality outcomes for all students without effective leadership. In support of this, we have developed the Cambridge School Leader Standards to define key characteristics and practices of effective leaders.

2. School culture and environment 5
3. Leadership skills and practices 6
4. Innovation and improvement through leadership 6
5. Community engagement 7

What we mean by school leaders

These Standards presume that in each Cambridge school there is one individual who has overall responsibility for implementing the school's vision. This person is ultimately accountable for the learning outcomes of all students. We see this as a unique and vital position and role within the school. Cambridge schools use a variety of titles for this leadership position. In many cases, this person is also the chief executive, accountable directly to the governing body of the school. In other cases, the school's senior educational leader may be accountable to a chief executive or director who does not have an educational leadership role. In the context of the Cambridge School Leader Standards, we define the principal school leader as the individual who has the responsibility as well as the professional training, knowledge, skills and experience to be the senior educational leader.

Of course, leadership is not only a function of one particular senior and experienced individual in a school. It is also a collective process that includes a wider group of people. We are committed to the principle of distributed leadership. This is where both the responsibility and delegated authority for leading specific aspects of the school's work are distributed among the staff. From individual teachers to the senior leadership team, it includes all those with leadership responsibilities. Pastoral heads, heads of subject departments, curriculum coordinators and others will find that both the Cambridge Teacher Standards and some of the Cambridge School Leader Standards are relevant to their work. Teachers who aspire to positions of leadership will also want to use the Standards to reflect on their professional characteristics and skills, and to shape their own professional development.

In contemporary educational research, leadership is typically seen as focussing on bringing about change and improvement to achieve the school's vision and mission. Management, however, is seen as making sure the school is stable, coherent and sustainable. Typically, effective school leaders will also have specific management responsibilities requiring particular knowledge, skills and practices. These Standards include school leaders' responsibilities for effective management systems. However, there are senior management responsibilities that do not come within the scope of the Standards. These include managing school facilities, human resources, fund-raising and development, and others. Where appropriate, these management responsibilities are addressed within the Cambridge Standards for Schools.

Purposes and audiences for the Cambridge School Leader Standards

The first purpose of the Cambridge School Leader Standards is to define the range of characteristics and practices of school leaders needed to effectively provide Cambridge programmes. They derive from and are consistent with contemporary international research into effective school leadership. School leaders who use the Standards to evaluate their own leadership practice and guide their continuing professional development will be in a strong position to achieve the desired student outcomes from Cambridge programmes, and to be leaders in their profession.

Secondly, the Standards are intended for school leaders themselves to use, to confirm successful leadership practice and help determine areas and priorities for their own professional development. This might include taking Cambridge advanced qualifications in educational leadership. Those who aspire to become school leaders will find the Standards a helpful guide to the scope of the role and the need for further development. If you are head of a school, you may also use the Standards to review the strengths of your senior team, to inform decisions about skill gaps and needs for team development.

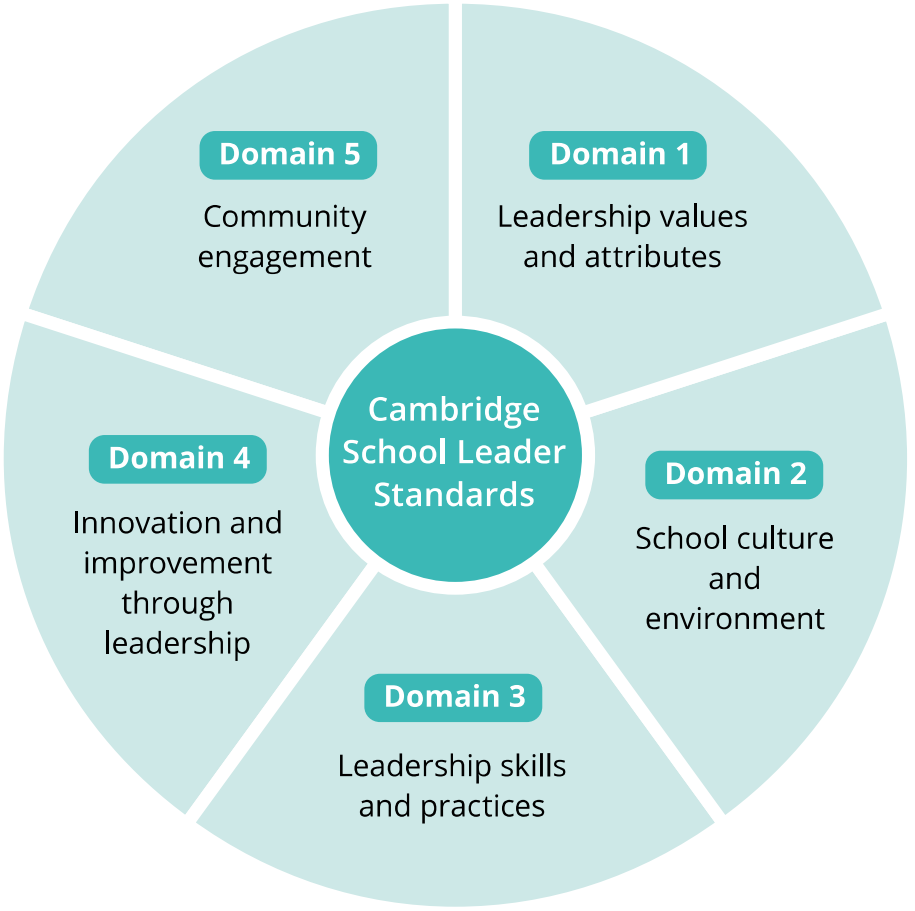
Thirdly, the Standards will be of value to school boards and governing bodies in respect of their responsibilities and duties for overseeing school leadership. The definition of effective leadership represented by the Standards will support recruitment and retention processes, and will inform the governance responsibility for holding school leaders accountable for their work. The Standards will also help boards to understand and support the professional development needs and priorities of both the serving and the aspiring leaders they are responsible for.

Fourthly, the Standards will inform the understanding of leadership within the school. School leaders are accountable to their employers and to the community of parents and others that the school serves. They are also accountable to their staff and students for the quality and style of leadership that they provide and how it shapes and directs the school community. This also includes the outcomes of the school's collective work. The Standards provide a common language and a framework of expectations that will help the school community reflect on how effective its leadership is.

The Cambridge School Leader Standards in context

We have developed the Cambridge School Leader Standards alongside the Cambridge Teacher Standards, and with the Cambridge Standards for Schools, which are intended to support schools with their self-evaluation processes. Our series of statements about the attributes of Cambridge learners, teachers and leaders have also informed these Standards.

The three sets of Standards are designed to help schools provide high-quality Cambridge programmes, and are complementary to and consistent with each other. In particular, the Cambridge Teacher and School Leader Standards recognise that the career path of most school leaders has included teaching and middle leadership positions. These two sets of Standards have been designed and structured with this progression in mind.



The structure and organisation of the Cambridge School Leader Standards

There are 25 Standard statements, organised under five domains. The individual Standard statements are detailed and concrete. This should allow heads of schools and other users to clearly understand how to show they have met individual Standards.

Together, these five domains of Standards make up our definition of the range of characteristics and practices that are needed to lead a Cambridge school, founded on contemporary international educational research.

We also recognise that school leadership is contextual. Cambridge schools are found in 160 countries, in a range of different political, social, cultural, economic and educational-historical settings. This variety means that detailed recommendations will not be relevant or helpful. Effective school leaders will take lessons from educational research and their own experience, adapt them intelligently and apply them reflectively to their current context.

We have designed the Standards to be as open as possible so school leaders can apply them to their own contexts. They are based on the principle that effective school leadership has many common practices, so they are relevant to all leaders in Cambridge schools. What will vary is the way that the leadership practices are applied, depending on each school's context and the capabilities of the individual, the senior team and the school staff.

1 Leadership values and attributes

Cambridge school leaders:

Standard 1 provide a strong sense of direction and a clear vision for the school

Standard 2 prioritise the physical, emotional, and psychological wellbeing of students and staff, ensuring a safe and healthy environment

Standard 3 model the highest standards of ethical conduct in their interactions with the school community

Standard 4 empower staff by distributing professional responsibilities and establishing shared accountability

Standard 5 model a commitment to reflective practice and lifelong learning.

2 School culture and environment

Cambridge school leaders:

Standard 1 establish a culture of high expectations for all, in regard to learning outcomes, behaviours and attitudes

Standard 2 demonstrate emotional intelligence and empathy in leadership to foster a fair and inclusive environment

Standard 3 establish professional relationships with all members of the school community

Standard 4 motivate and encourage teachers to take responsibility for the development of effective learning and teaching

Standard 5 enrich the learning culture of their school by establishing partnerships with other institutions, professional bodies and educational organisations.

3 Leadership skills and practices

Cambridge school leaders:

Standard 1 demonstrate knowledge and understanding of current research into educational leadership and the practices of effective leaders, and use it to support the reflective evaluation of their own practice

Standard 2 keep up to date with the latest research and evidence into effective curriculum, pedagogy and assessment

Standard 3 make sure that the school has appropriate policies and procedures in place, as well as written roles and responsibilities, which are reflected in operational practice

Standard 4 demonstrate a consistent commitment to the professional learning and development of all staff, including the development of their leadership potential

Standard 5 plan and budget for the annual cycle informed by evidence, data and curriculum requirements

Standard 6 develop a leadership team that meets the school's operational and developmental needs.

4 Innovation and improvement through leadership

Cambridge school leaders:

Standard 1 understand the principles and practices of school improvement, leadership and management of change to enable the school to grow and flourish

Standard 2 create a professional culture in which innovation and collaboration for the improvement of learning and teaching practice are encouraged

Standard 3 allocate time and resources for the evaluation and improvement planning process that is based on data and stakeholder input

Standard 4 establish and review documented procedures that evaluate staff performance and inform professional development needs

Standard 5 promote and model collaboration among all staff to evaluate and share effective practice and to develop content knowledge and pedagogy

Standard 6 establish whole-school responsibility for the implementation, monitoring and evaluation of the improvement plan.

5 Community engagement

Cambridge school leaders:

Standard 1 actively engage with the wider community to build strong partnerships and collaborative relationships that support and reflect the purpose and values of the school

Standard 2 promote and facilitate the involvement of parents and carers in the life of the school

Standard 3 inspire student participation in the wider community, contributing to their development as responsible, active citizens.

Cambridge Teacher Standards

Cambridge is committed to supporting the continuing improvement of the quality of educational outcomes for all learners following Cambridge programmes in schools around the world.

We recognise that classroom teaching has the largest impact on the quality of educational outcomes. What teachers know and do makes the difference in improving student learning outcomes – their knowledge, pedagogical practices and relationships with students.

In support of this, we have developed the Cambridge Teacher Standards to define key characteristics and practices of effective teachers.

Contents

Purposes and audiences for the Cambridge Teacher Standards 2
The Cambridge Teacher Standards in context 3
The structure and organisation of the Cambridge Teacher Standards 3
1. Teacher values and attributes 4
2. Classroom culture and environment 4
3. Teaching skills and practices 5
4. Innovation and improvement in teaching and learning 5
5. Community engagement 6

Purposes of the Cambridge Teacher Standards

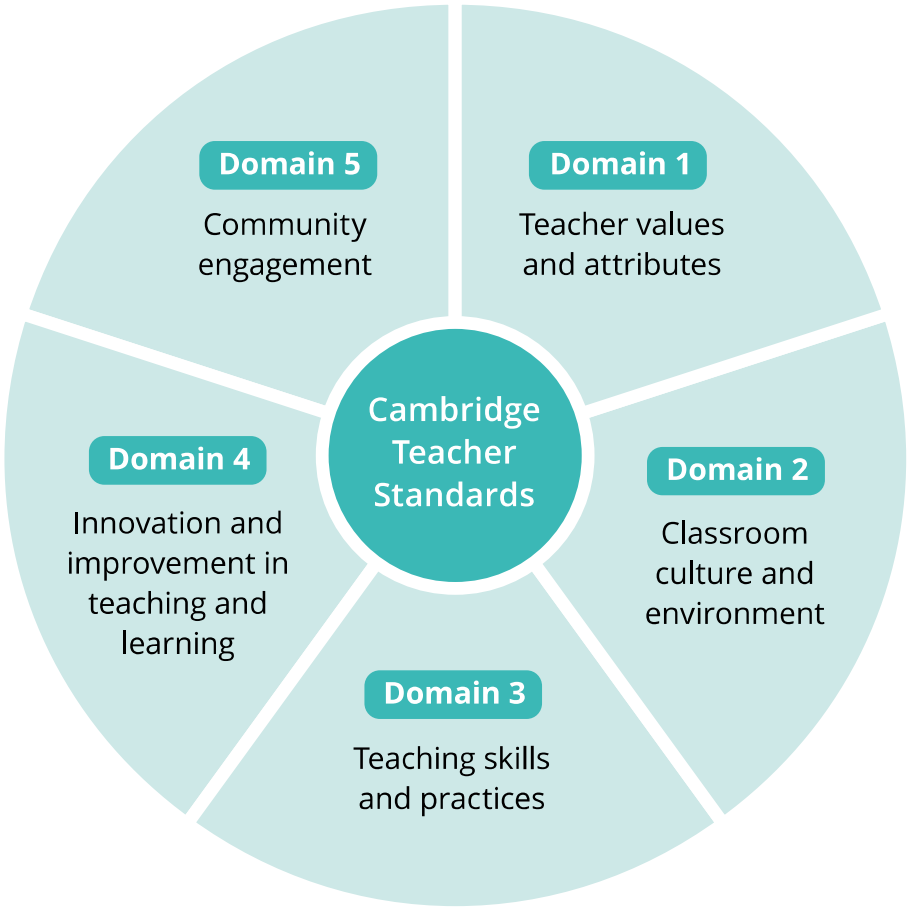
The primary purpose of the Cambridge Teacher Standards is to define the range of teacher characteristics and practices needed to deliver Cambridge programmes effectively. They derive from and are consistent with contemporary international research into effective teaching.

Teachers who use the standards to evaluate their own practice and guide their continuing professional development should be in a strong position to achieve the desired student outcomes from Cambridge programmes.

The standards provide a benchmark of what we consider to be teacher quality. They can be used by teachers to confirm successful teaching practice and help determine areas and priorities for their own professional development. This might include participating in an appropriate Cambridge Professional Development Qualification (PDQ) programme. Teachers aspiring to develop their career prospects will find the standards a helpful guide to the scope of the teaching role and aspects they want to develop.

The Cambridge Teacher Standards in context

We have developed the Cambridge Teacher Standards alongside:



- the Cambridge Standards for Schools, which help schools carry out self-evaluations
- the Cambridge School Leader Standards, which define the range of characteristics and practices school leaders need to provide Cambridge programmes effectively.

Our statements about the attributes of Cambridge learners and teachers are also relevant. All these documents are intended to help schools provide high-quality Cambridge programmes, and are complementary to and consistent with each other.

We recognise that school teaching is dependent on context. Cambridge schools are found in 160 countries, in a range of different political, social, cultural, economic and educational-historical settings. This variety means that detailed recommendations will not be relevant or helpful. Effective teachers will learn from educational research and their own experience, adapt ideas intelligently and apply them to their current context. We have designed the Cambridge Teacher Standards to be as open as possible so teachers can apply them to their own contexts. They are based on the principle that effective teaching has many common practices, so they are relevant to all teachers in Cambridge schools.

The structure and organisation of the Cambridge Teacher Standards

There are five Cambridge Teacher domains. Each domain contains a number of individual standard statements that are detailed and concrete. They outline what a teacher should know and be able to do, or demonstrate, in terms of their professional knowledge, practice and engagement. This should allow teachers to understand how to show they have met individual domains within the standards.

1 Teacher values and attributes

Teachers:

Standard 1 demonstrate a shared understanding of the school's vision, mission and objectives

Standard 2 model the highest standards of ethical conduct in their interactions with the school community

Standard 3 make a positive contribution to the wider life and ethos of the school

Standard 4 demonstrate a commitment to lifelong learning by engaging in reflective practice

Standard 5 demonstrate a consistent commitment to well-being for the whole community.

2 Classroom culture and environment

Teachers:

Standard 1 create a classroom culture and environment where all students are supported in their learning

Standard 2 establish positive and productive relationships with all students to support their learning and achievement

Standard 3 have high expectations of themselves in their professional practice

Standard 4 have high expectations of all students

Standard 5 work effectively with colleagues to develop the curriculum and enhance student learning.

3 Teaching skills and practices

Teachers:

Standard 1 demonstrate knowledge and understanding of how students learn and how this impacts on teaching

Standard 2 demonstrate secure content knowledge and pedagogy to plan coherent, authentic and engaging learning programmes and lessons

Standard 3 have a deep understanding of the diverse needs of students and adapt their practice accordingly

Standard 4 orientate their students and ensure they are ready to learn

Standard 5 use effective teaching strategies to motivate, challenge and extend student learning

Standard 6 use a range of assessment strategies to inform next steps in the teaching and learning process and to provide timely, accurate and constructive feedback

Standard 7 use summative assessment to understand student progress and attainment

Standard 8 manage time effectively and ensure the classroom is free from disruption.

4 Innovation and improvement in teaching and learning

Teachers:

Standard 1 engage in reflective practice to improve the teaching and learning process

Standard 2 use a variety of teaching and learning strategies that encourage the development of students' problem-solving, metacognitive, critical and creative thinking skills

Standard 3 demonstrate effective use of digital technologies to extend learning to enhance student knowledge, skills and conceptual understanding

Standard 4 share key information on progress, attainment and areas for development with colleagues, and collaboratively work towards improving student learning

Standard 5 critically engage with research and evidence in learning and teaching, and apply new ideas and approaches to improve the quality of their practice.

5 Community engagement

Teachers:

Standard 1 involve parents and carers in school life to support student learning

Standard 2 engage with the wider community to contribute to the school's life, vision and mission

Standard 3 encourage student participation in the wider community, contributing to their development as responsible, active citizens

Standard 4 establish professional relationships with colleagues in other institutions, professional bodies and educational organisations to develop professional practice.

Cambridge Presentation of Psychometric Evidence

Narrative point ~ Evidence detail	Evidence type	Evidence source
General test information		
Rationale and purpose of test		
The purpose of Cambridge International AS & A Levels as courses of study: *"Cambridge International AS & A Level develops learners' knowledge, understanding and skills in:* • *In-depth subject content* • *Independent thinking* • *Applying knowledge and understanding to new as well as familiar situations* • *Handling and evaluating different types of information source* • *Thinking logically and presenting ordered and coherent arguments* • *Making judgements, recommendations and decisions* • *Presenting reasoned explanations, understanding implications and communicating them logically and clearly* • *Working and communicating in English"*	Qualitative	Online information: Overview of AS & A Level curriculum Web: cambridgeinternational.org/.../cambridge-international-as-and-a-levels/curriculum/
The purpose, value and aims of an AS & A Level qualification: Economics: *"Cambridge International AS & A Level Economics provides learners with the skills needed to use economics in work or further study, including how to explain and analyse economic issues and arguments, evaluate economic information, and organise, present and communicate ideas and judgements clearly."* (p.2) Design & Technology: *"This syllabus encourages candidates to be innovative and creative and to develop their ability to design high-quality products. Through their studies, candidates will: develop an awareness of the significance of design and technology to society; learn more about production processes and industrial practices; and develop critical evaluation skills which they can employ in a variety of technical, aesthetic, economic, environmental, social and cultural contexts. As a result, candidates will also become discerning consumers of design and technology, able to make informed choices."* (p.7)	Qualitative	Syllabus document – Cambridge International AS & A Level – Economics 9708 (version 2; for exams in 2023, 2024 and 2025) Web: cambridgeinternational.org/.../595463-2023-2025-syllabus Cambridge International AS & A Level – Design & Technology 9705 (version 1; for exams in 2024) Web: cambridgeinternational.org/.../651351-2024-syllabus *NB: These are examples taken from two Cambridge AS & A Level syllabuses; syllabus documents for all syllabuses are provided in the Faculty packets.*
Cambridge International AS & A Level qualifications generally have a modular structure, with Cambridge International AS Levels offered as a standalone qualification, or as part of a progression to Cambridge International A Level. The structure of the assessment and of subject content reflects this relationship.		Presentation document: Comparing AS Level and A Level Doc: [01_pres_Comparing AS Level and A Level]
Name(s) and institutional affiliations of the principal author(s) or consultant(s)		
Cambridge draws upon external consultants and SMEs for syllabus development, test development, and scoring. There are comprehensively documented protocols and procedures.	Qualitative	Policy document: Cambridge International Code of Practice • §2.11 and §3.1 Web: cambridgeinternational.org/.../416992-code-of-practice Operational document: Assessment Staff Manual: Chapter 4 – Selection of assessment specialists • §4.2 – Considerations when Selecting Assessment Specialists Doc: [02_proc_ASM_chapter_04]
Cambridge only engages Assessment Specialists with the requisite qualifications and experience of ***both*** the subject area ***and*** assessment theory and practice.	Qualitative	Presentation document: Presentation of consultants' credentials Doc: [03_pres_consultant_credentials]

Narrative point ~ Evidence detail	Evidence type	Evidence source
Types of scores reported for examinees		
Candidates' attainment is reported on a letter scale from 'A*' to 'E' or 'a' to 'e', where candidates have meet the required standard, or 'U' or 'u' (i.e. 'ungraded'), where they have not. *"Grades A*, A, B, C, D or E indicate the standard a candidate achieved at Cambridge International A Level, with A* being the highest grade.* *Grades a, b, c, d or e indicate the standard a candidate achieved at Cambridge International AS Level, with 'a' being the highest grade.* *'Ungraded' means that the candidate's performance did not meet the standard required for the lowest grade (E or e).* *If a candidate takes a Cambridge International A Level and fails to achieve grade E or higher, a Cambridge International AS Level grade will be awarded if both of the following apply:* • *the components taken for the Cambridge International A Level by the candidate in that series included all the components making up a Cambridge International AS Level* • *the candidate's performance on the AS Level components was sufficient to merit the award of a Cambridge International AS Level grade."* (p.37)	Qualitative	Syllabus document: Cambridge International AS & A Level – Economics 9708 (version 2; for exams in 2023, 2024 and 2025) Web: cambridgeinternational.org/.../595463-2023-2025-syllabus *NB: This information is presented in all syllabus documents; syllabus documents for all syllabuses are provided in the Faculty packets.*
Additionally, candidates are provided with a 'percentage uniform mark' (PUM). This is similar to a scale score, and locates their performance within a score band on a standardised scale. *"The Percentage Uniform Mark for GCE AS Level and GCE A Level is provided in addition to the grade for a syllabus. The Percentage Uniform Mark is not the total mark achieved for the syllabus. It is a common scale for all syllabuses to show whether the candidate's performance is close to the top, bottom or middle of the grade."*	Qualitative	Presentation document: Statement of results Doc: [04_pres_Statement_of_Results]
Directions for scoring procedure and keys		
Marking is one of the 'Core Processes', identified and monitored through the quality management system (QMS), which is ISO 9001 certified. There is comprehensive procedural documentation covering operational activities, as well as detailed audit trails of decision making and actions.	Procedural	Operational document: CP06 – Marking and grading Doc: [05_proc_CP06]
There is comprehensive procedural documentation for internal staff involved in scoring candidate responses, including monitoring aspects of quality.	Procedural	Operational document: Assessment Staff Manual Chapter 5 – Marking by UK panels Doc: [06_proc_ASM_Chapter_05] Operational document: Assessment Staff Manual Chapter 12 – On-screen marking Doc: [07_proc_ASM_Chapter_12] *See also, in "Rationale for the particular cut-score recommended":* Presentation document: Scoring Cambridge IGCSE assessments Doc: [49_pres_Scoring Cambridge IGCSE] • pp.4-9
Once candidates have taken the exam and this evidence is available, the 'marking standardisation' process takes place. This includes: a review of the question paper to check it has functioned as intended; an update of the mark scheme as necessary in light of candidate responses; training for Examiners about how to apply the mark scheme; and testing of Examiners through qualifying scripts.	Procedural	Operational document: Instructions for Standardisation Team Members May/Jun 2022 Doc: [08_proc_STM_User_Guide_May_Jun_23] • pp.20–30
Once approved to mark, the accuracy and consistency of Examiners' marking is monitored by supervising Examiners. This includes: spot-checking and back-reading of a sample of live scripts; statistical monitoring of the consistency and accuracy of marking though analysis of performance on validation scripts. Where issues are identified, corrective action is taken.	Procedural	Operational document: Instructions for Standardisation Team Members May/Jun 2022 Doc: [08_proc_STM_User_Guide_May_Jun_23] • pp.31–35 *See also "Scorer reliability for essay items"*
There are well established and documented procedures for detecting and dealing with cases of malpractice and maladministration; this can lead to results being delayed, not issued, or withdrawn.	Procedural	Policy document: Cambridge Handbook 2024 • §5.6 Web: cambridgeinternational.org/.../700835-cambridge-handbook-2024

Narrative point ~ Evidence detail	Evidence type	Evidence source
Candidate scripts very close to a cut score (generally within 1%) are subject to Grade Review, where candidate responses are re-marked. *"The task of the grade review will be to re-mark the scripts of candidates at greatest risk of receiving an inappropriate syllabus grade. We will re-mark a candidate's work at grade review if they are close to a grade threshold (at syllabus level) and also at risk for at least one other reason."* (p.4)	Procedural	Operational document: Assessment Staff Manual Chapter 8 – Grade Review Doc: [09_proc_ASM_Chapter_08]
Centres can submit enquires about results where they believe an error has been made. This is the first stage of the wider appeals process.	Procedural	Policy document: Cambridge Handbook 2024 • §6.3 Web: cambridgeinternational.org/.../700835-cambridge-handbook-2024
Item/Test Content Development		
Specifications that define the domain(s) of content, skills, and abilities that the test samples		
Cambridge follows an integrated model of education, where curriculum, teaching, instruction and assessment are closely aligned.	Qualitative	Online information: An international education from Cambridge Web: cambridgeinternational.org/.../417448-overview-brochure
There are clear, principled expectations, as well as comprehensive procedural documentation, for syllabus development.	Procedural	Policy document: Cambridge International Code of Practice • §1 – Syllabuses Web: cambridgeinternational.org/.../416992-code-of-practice Operational document: Assessment Staff Manual Chapter 2 – Syllabuses and Schemes of Assessment Doc: [10_proc_ASM_Chapter_02]
The central point of reference is the syllabus document, which clearly defines: (a) the aims and key concepts for the test (b) the content specification for the test • knowledge and skills • content areas (c) the outline of the test structure • scheme of assessment • assessment objectives (i.e. how the construct is broken down) • weighting of assessment objectives	Qualitative	Syllabus document: Cambridge International AS & A Level – Economics 9708 (version 2; for exams in 2023, 2024 and 2025) Web: cambridgeinternational.org/.../595463-2023-2025-syllabus *NB: This point applies equally to all syllabuses; syllabus documents for all syllabuses are provided in the Faculty packets.*
The way in which content is sampled and targeted is exemplified in specimen assessment materials and, once available, past papers. Candidates can have confidence in the format and expectations of the assessment.	Qualitative	Assessment/Support material: Specimen and past question papers – AS & A Level Economics 9708 Web: cambridgeinternational.org/.../9708/past-papers/ *NB: This point applies equally to all syllabuses; question papers for all syllabuses are provided in the Faculty packets.*
The precise detail of how candidate performance is judged is set out in the mark scheme, including how assessment objectives are targeted by different items.	Qualitative	Assessment/Support material: Specimen and past question papers – AS & A Level Classical Studies 9274 Web: cambridgeinternational.org/.../9274/past-papers/ *NB: This point applies equally to all syllabuses; mark schemes for all syllabuses are provided in the Faculty packets.*

Narrative point ~ Evidence detail	Evidence type	Evidence source
Summary of the job analysis research (if a non-academic test)		
N/A – Cambridge International AS & A Levels are conventional academic tests		
Statement of test's emphasis on each of the content, skills, and ability areas		
The Assessment Objectives section in each syllabus describes the weighting each objective contributes to the assessment and details the subject content (knowledge, understanding and skills) that are sampled across each assessment.		*See "Specifications that define the domain(s) of content, skills, and abilities that the test samples"*
There is comprehensive setting guidance for each syllabus and/or component, and documentation to record how assessments meet targets for content sampling and demand. This contributes significantly to internal consistency between forms and across time.	Psychometric	Technical document: Paper Setting Guidelines – IGCSE Biology, Paper 3/4, 2018 Doc: [11_0610_P4_paper_setter_guidelines] Technical document: Chair's guidance document – IGCSE Biology, Paper 1/2, 2021 Doc: [12_0610_P2_chair's guidance] *NB: Technical documents are provided here to illustrate Cambridge's processes; further examples are available on request.*
Rationale for the kinds of tasks (items) that make up the test		
Cambridge uses multiple choice items in subjects with significant 'factual content'. This type of item allows for a large amount of subject content to be tested. Objective/selected response items are tagged for content standard, assessment objective (broad skill area), and intended level of demand. Content sampling and demand are built into the test structure, as stated in the syllabus document and exemplified in Specimen Assessment Materials, and are managed through Specification Sheets and Attribute Reports.	Psychometric	Technical document: MCQ setting grid – IGCSE Biology, Paper 22, Jun'21 Doc: [13_0610_22_Jun21_setting_grid] Technical document: Attribute report – IGCSE Biology, Paper 22, Jun'21 Doc: [14_0610_42_Jun21_attribute_report] *NB: Technical documents are provided here to illustrate Cambridge's processes; further examples are available on request.*
Cambridge uses points-based free-response items in the vast majority of assessments. This type of item allows knowledge, understanding and skills to be tested thoroughly, often though questions that require students to work through multiple steps, targeting a range of content standards. Points-based items are tagged for content standard, assessment objective (broad skill area), intended level of demand and, in some cases, item tariff. Content sampling and demand are built into the test structure as stated in the syllabus document and exemplified in Specimen Assessment Materials, and are managed through Specification Sheets	Psychometric	Technical document: Setting grid – IGCSE Biology, Paper 42, Jun'21 Doc: [15_0610_42_Jun21_setting_grid] *NB: Technical documents are provided here to illustrate Cambridge's processes; further examples are available on request.*
Cambridge uses levels-based free-response items widely in its assessments. These items allow a wide range of knowledge, understanding and skills to be tested within one question. In some cases, a single item (or task) will assess all content – knowledge *and* skills – for a substantial section of the course. For levels-based items, content sampling, demand and expectations around performance standards are built into the mark schemes (scoring rubrics)	Psychometric	Assessment/Support material: Mark scheme – AS & A Level Classical Studies 9274, Paper 1, Specimen for 2022 onwards Doc: [16_9274_P1_Specimen_mark_scheme] AS & A Level Design & Technology 9705, Paper 12, Jun'23 Doc: [17_9705_12_Jun23_mark_scheme] *NB: These are examples to illustrate the narrative point; mark schemes for all syllabuses are provided in the Faculty packets.*
Item development and assessment processes support accuracy and consistency of scores for items requiring a high degree of expert judgement. Level-based mark schemes (scoring rubrics) follow clearly articulated design principles, which supports both their design and their application. Scorers undergo comprehensive training, and their performance is assessed before they begin scoring live candidate work (though qualifying scripts) and throughout their allocation of scripts (validation scripts and spot-checking).	Procedural	Operational document: Mark Scheme Design Principles – Levels-based mark schemes Doc: [18_proc_Mark Scheme Design Principles] *See also "Scorer reliability for essay items"*

Narrative point ~ Evidence detail	Evidence type	Evidence source
Information about the adequacy of the items on the test as a sample from the domain(s)		
Item writers record information concerning coverage and intended demand/difficulty for the items for each test paper. This information is reviewed and confirmed throughout the item/test development process.	Psychometric	Technical document: MCQ setting grid – IGCSE Biology, Paper 22, Jun'21 Doc: [13_0610_22_Jun21_setting_grid] Technical document: Setting grid – IGCSE Biology, Paper 42, Jun'21 Doc: [15_0610_42_Jun21_setting_grid] *NB: Technical documents are provided here to illustrate Cambridge's processes; further examples are available on request.*
Information on the currency and representativeness of the test's items		
N/A – Cambridge International AS & A Levels are conventional academic tests		
Description of the item sensitivity panel review		
Test development is one of the 'Core Processes', identified and monitored through the quality management system (QMS), which is ISO 9001 certified. There is comprehensive procedural documentation covering operational activities, as well as detailed audit trails of decision making and actions.	Procedural	Operational document: CP03 – Development of assessment materials Doc: [19_proc_CP03]
The Question Paper Evaluation Committee (QPEC) meeting is a key quality control activity. All items are considered by a group of subject matter experts (SMEs) before a test form is approved for use.	Procedural	Operational document: Assessment Staff Manual Chapter 3a – Question Papers and Mark Schemes • §§3a.13.6-8 – summarizes the QPEC review Doc: [20_proc_ASM_Chapter_03a] Operational document: QPEC agenda Doc: [21_proc_QPEC_agenda_template]
Cambridge AS & A Level programs are followed across the world and the use of accessible, clear English is essential. Cambridge has developed a set of accessible language principles, which are referenced in procedural documentation for test development and production. These principles are applied both by individuals, e.g., the Reviser, and by the Question Paper Evaluation Committee (QPEC).		Operational document: Accessible language principles Doc: [22_proc_Accessible language principles for Assessment] Operational document: Instructions for Revisers Doc: [23_proc_Instructions_for_Revisers]
Whether and/or how the items pre-tested (field tested) before inclusion in the final form		
Cambridge follows a "review and award" methodology, with new forms and items created for each examination series. Furthermore, many tests make use of high-tariff free-response items. For these reasons, it is not practicable to systematically pre-test or field test items. The Question paper Evaluation Committee (QPEC) allows for thorough evaluation of test items and the test form as a whole. In practice, this serves a similar purpose to 'field testing'.		*See "Description of the item sensitivity panel review"*

Narrative point ~ Evidence detail	Evidence type	Evidence source
Item analysis results (e.g. item difficulty, discrimination, item fit statistics, correlation with external criteria)		
Items are expected to function within acceptable parameters (e.g. difficulty, discrimination, targeting, etc.) that are a central consideration when developing schemes of assessment, and when authoring and evaluating items during test development.	Procedural	Operational document: A guide to using ILD for setting and QPECs Doc: [24_proc_Guide To Using ILD]
Detailed item statistic reports are generated routinely to analyse and evaluate item functioning. These follow a Classical Test Theory approach. The reports are generated before cut-scores are set ('ILD for Awarding'), and after ('Post award ILD'), with slightly different information reported. *Test level information:* • *N of questions and of items* • *Cronbach's Alpha / Backhouse's P* • *Sum. stats – all candidates: N, mean, SD, min, max* • *Sum. stats – by quartile: N, mean, SD, min, max* • *Mark/frequency distribution* • *Grade distribution – all cands. and by gender* *Question/item level information:* • *Sum. stats – all candidates: tariff, omit, fac., discr.* • *Sum. stats – by quartile: facility* • *Sum. stats – by grade and/or gender: facility* • *Mark/frequency distribution*	Psychometric	Technical document: ILD for Awarding – AS & A Level Information Technology, Paper 12, Jun'23 Doc: [25_9626_12_ILDforAwarding_June2023] AS & A Level Economics, Paper 22, Jun'23 Doc: [26_9708_22_ILDforAwarding_June2023] Technical document: Post award ILD – AS & A Level Information Technology, Paper 12, Jun'23 Doc: [27_9626_12_PostAwardILD_June2023] AS & A Level Economics, Paper 22, Jun'23 Doc: [28_9708_22_PostAwardILD_June2023] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
Item statistic and distractor analysis reports are generated routinely for papers composed of multiple choice items. *Test level information:* • *N of items* • *Summary stats – N, mean, SD, min, max* • *Cronbach's Alpha* • *Standard Error of Measurement* • *Test stats (mean) – P, Item-Tot., Biserial* • *Mark/frequency distribution* *Item level information:* • *Item stats – P, Discrimination, Point Biserial* • *Distractor analysis – P_{tot}, P_{high}, P_{low}, Point Biserial*	Psychometric	Technical document: Statistical Analysis report – AS & A Level Economics, Paper 12, Jun'23 Doc: [29_9708_12_iteman_June2023] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
As part of ongoing process improvement, Cambridge is developing an enhanced technical report to support the evaluation of test forms. These reports provide further detail around discrimination and difficulty for candidates through the ability range. Note: These reports are not for live use, but are useful for illustrative purposes. They are taken from the June 2022 examination series.	Psychometric	Technical document: Enhanced ILD – AS & A Level Travel & Tourism, Paper 11, Jun'22 Doc: [30_9395_11_Enhanced_ILD_Jun22] AS & A Level Physics, Paper 22, Jun'22 Doc: [31_9702_22_Enhanced_ILD_Jun22] A Level Geography, Paper 31, Jun'22 Doc: [32_9696_31_Enhanced_ILD_Jun22]
Principal Examiner reports analyze student performance and errors on all test papers in every exam series. They identify common misunderstandings or mistakes, as well as strengths of understanding and skills, that students demonstrate on each assessment.	Qualitative	Assessment/Support material: Principal Examiner report – AS & A Level Economics, Jun'23 Doc: [33_9708_examiner_report_Jun23] *NB: This point applies equally to all syllabuses; Principal Examiner reports for all syllabuses are provided in the Faculty packets.*

Narrative point ~ Evidence detail	Evidence type	Evidence source
Reliability Information		
Internal consistency reliability		
Detailed statistical reports are generated routinely to analyse and evaluate reliability. These follow a Classical Test Theory approach. The reports are generated after cut-score have been set. • *N of candidates* • *N of items and of compulsory items* • *Total mark* • *Mean mark – absolute and %age* • *SD – absolute and %age* • *Cronbach's Alpha / Backhouse's P* • *Standard Error of Measurement* • *N of grades and average grade bandwidth – absolute and %age* • *Average grade bandwidth-to-SEM ratio* • *Comparison: reliability against N of items – given an acceptable parameter; relative to other assessments*	Psychometric	Technical document: Component Reliability report – AS & A Level Information Technology, Paper 12, Jun'23 Doc: [34_9626_12_Reliability_June2023] AS & A Level Economics, Paper 22, Jun'23 Doc: [35_9708_22_Reliability_June2023] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
For papers composed of multiple choice items, the Statistical Analysis report includes statistics to analyse and evaluate reliability. These follow a Classical Test Theory approach. The reports are generated after cut-score have been set. • *N of items* • *Summary statistics – N, mean, SD, min, max* • *Cronbach's Alpha* • *Standard Error of Measurement* • *Test statistics (mean) – P, Item-Tot., Biserial*	Psychometric	Technical document: Statistical Analysis report – AS & A Level Economics, Paper 12, Jun'23 Doc: [29_9708_12_iteman_June2023] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
During standard setting and evaluation, correlation between papers within a syllabus can be analysed, including: • *N of common candidates* • *Pearson correlation coefficient*	Psychometric	Technical document: Unit pair distribution – AS Level Economics, Paper 12 ~ Paper 22, Jun'23 Doc: [36_9708_UnitPairs_12_22_Jun23] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
Evidence for equivalence of forms of the test		
New forms are created for each examination series, and almost all items are developed specifically for each new form. This protects items from over-exposure. The grading process focuses on maintaining awarding standards from year to year.	Procedural	Policy document: Cambridge International Code of Practice • §4 – Grading and the reporting of results Web: cambridgeinternational.org/.../416992-code-of-practice
Cambridge administers multiple forms internationally, with specific forms for individual countries or regions; this is to ensure high levels of test security and integrity. In the US, a single form of each test is used.	Procedural	Policy document: Cambridge Handbook 2024 • §1.2 – Preparing your exams timetable Web: cambridgeinternational.org/.../700835-cambridge-handbook-2024
Equivalence between test forms is assured through the item/test development and grading processes. There is comprehensive setting guidance for each syllabus and/or component, and documentation to record how assessments meet targets for content sampling and demand. Cambridge International makes clear its commitment to maintaining awarding standards from year to year through the grading process. These activities contribute significantly to internal consistency between forms and across time.		*See "Statement of test's emphasis on each of the content, skills, and ability areas" (i.e. item/test development)* *See "Rationale for the particular cut-score recommended" (i.e. standard setting)*

Narrative point ~ Evidence detail	Evidence type	Evidence source
Scorer reliability for essay items		
Cambridge follows a "review and award" methodology, with most assessments requiring expert judgement for accurate and reliable scoring. *"Awarding-based assessments: design – review – administration – outcomes – awarding – endorsement* *This can be characterised as a 'review and award' model. […] Internal quality assurance processes operate on marking and awarding, using data derived from the awarding session, previous sessions and other bodies of data such as prior attainment of candidates."* (p.7)	Qualitative	Policy document: The Cambridge Approach Web: cambridgeassessment.org.uk/.../cambridge-approach-to-assessment
Mark schemes include comprehensive instructions at a level of detail that allows for consistent replication, including: • generic marking instructions • detailed performance descriptors at each level • exemplar responses and or indicative content	Qualitative	Assessment/Support material: Mark scheme – AS & A Level Classical Studies 9274, Paper 1, Specimen for 2022 onwards Doc: [16_9274_P1_Specimen_mark_scheme] AS & A Level Design & Technology 9705, Paper 12, Jun'23 Doc: [17_9705_12_Jun23_mark_scheme] *NB: This point applies equally to all syllabuses; mark schemes for all syllabuses are provided in the Faculty packets.*
In order to be approved for live scoring, Examiners must complete a set of qualifying scripts, which are reviewed by a senior examiner. During live marking, Examiners are monitored by senior examiners, including spot-checking. Where issues are identified, corrective action is taken.		*See "Directions for scoring procedure and keys"* *See also, in "Rationale for the particular cut-score recommended":* Presentation document: Scoring Cambridge IGCSE assessments Doc: [49_pres_Scoring Cambridge IGCSE]
A range of statistical monitoring techniques are employed to monitor the consistency and accuracy of marking, measuring differences between examiner marks and definitive marks on validation scripts. Where issues are identified, corrective action is taken. Two metrics are used to monitor scorers: • Paper Difference (sum of item differences) • Paper Deviation (sum of absolute item differences)	Psychometric	Presentation document: Marker Monitoring analysis – AS Level Biology, Paper 22, Jun'19 Doc: [37_pres_Biology_P22_examiner_scoring_stats] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
After the series, validation script data can be analyzed. The summary of examiner agreement on validation scripts can be used to evaluate the suitability of specific scripts and validation scripts, and by extension, the wider scorer monitoring process for a given assessment.	Psychometric	Technical document: Component Reliability report (Marking) – AS Level Biology, Paper 22, Jun'19 Doc: [38_9700_22_Reliability_June2019_Marking] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
Cambridge conducts on-going research to maximize marker agreement and reliability; examples include: Mark scheme features associated with different levels of marker agreement (Bramley, T. 2008) The interrelations of features of questions, mark schemes and examinee responses and their impact upon marker agreement (Suto, I., Bramley, T. and Black, B. 2010) An experimental investigation of the effects of mark scheme features on marking reliability (Child, S., Munro, J. and Benton, T. 2015) The effect of adaptivity on the reliability coefficient in comparative judgement (Vitello, S. and Bramley, T. 2017) Investigating the reliability of Adaptive Comparative Judgment (Bramley, T. 2015)	Qualitative – research	Cambridge Assessment research papers available at: Web: cambridgeassessment.org.uk/.../109770-mark-scheme-features-associated-with-different-levels-of-marker-agreement Web: cambridgeassessment.org.uk/.../111943-the-interrelations-of-features-of-questions-mark-schemes-and-examinee-responses-and-their-impact-on-marker-agreement Web: cambridgeassessment.org.uk/.../417277-an-experimental-investigation-of-the-effects-of-mark-scheme-features-on-marking-reliability Web: cambridgeassessment.org.uk/.../423984-the-effect-of-adaptivity-on-the-reliability-coefficient-in-comparative-judgement Web: cambridgeassessment.org.uk/.../232694-investigating-the-reliability-of-adaptive-comparative-judgment

Narrative point ~ Evidence detail	Evidence type	Evidence source
Errors of classification percentage for the minimum score for granting college credit (cut score)		
Results are reported as grades, giving wide classification categories. Grade bandwidth-to-SEM ratio is calculated at component level to monitor the risk of grade misclassification. The statistics calculated include: • *Standard Error of Measurement* • *N of grades and average grade bandwidth – abs. and %age* • *Average grade bandwidth-to-SEM ratio* Note that candidates can appeal scores and grades if they feel they are unfair or unrepresentative.	Psychometric	Technical document: Component Reliability report – AS & A Level Information Technology, Paper 12, Jun'23 Doc: [34_9626_12_Reliability_June2023] *See also "Internal consistency reliability"* *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
Validity Information		
Content-related validity		
Overall validity of AS & A Level qualifications The research report *Benchmarking Cambridge International* shows that: • Cambridge assessments access higher-order thinking skills • Cambridge assessment methods require candidates to demonstrate the necessary knowledge and skills identified as learning or assessment objectives • Cambridge courses provided solid preparation for higher education	Qualitative – research	Research paper: Benchmarking Cambridge International (UK NARIC, 2016) Doc: [39_Report_ Benchmarking Cambridge International] In particular: • Assessment Objectives, page 18 • Overarching Observations on the Cambridge International AS & A Level, page 22
Validity in terms of content and standards The research paper *Comparison of the AICE, AP and IB specifications and written assessments* shows that Cambridge courses cover similar content at a similar or higher level of cognitive demand as advanced IB and AP courses.	Qualitative – research	Cambridge Assessment research paper: Comparison of the AICE, AP and IB specifications and written assessments (Rushton, N., Darlington, E. and Constantinou, F. 2016) Doc: [40_Report_AICE AP IB comparisons]
Validity argument – AS & A Level Physics The Cambridge Assessment publication *An approach to validation: Developing and applying an approach for the validation of general qualifications* represents a detailed investigation of this syllabus within the context of a rigorously developed framework found strong support for claims for validity.	Qualitative – research	Cambridge Assessment research paper: An approach to validation: Developing and applying an approach for the validation of general qualifications (Shaw, S. and Crisp, V. 2020) Doc: [41_Report_research-matters-special-issue-3]
Criterion-related validity		
Impact of Cambridge AS & A Level qualifications The research paper *Assessing the Impact of the Cambridge International Acceleration Program on U.S. University Determinants of Success* shows that the benefits of Cambridge participation are statistically similar to those of other accelerator programs (IB and AP).	Qualitative – research	Research paper: Assessing the Impact of the Cambridge International Acceleration Program on U.S. University Determinants of Success (Shaw, S., Warren, J. and Gill, T. 2014) Doc: [42_Report_US Impact CUJ]
Comparison of Cambridge AS & A Level qualifications with other accelerator programs The research paper *Higher education performance of Cambridge students in the United States* considers how Cambridge qualifications compare with other courses.	Qualitative – research	Cambridge Assessment research paper: Higher education performance of Cambridge students in the United States: A case study comparing qualification levels (Pastorino, C. 2021) Doc: [43_Report_PerformanceHE_US_AvsAS]
Construct validity (if appropriate)		
After each series, the Principal Examiner for a component produces a detailed report. These reports summarize student performance on every test paper, and show that items elicit the intended response processes.	Qualitative	Assessment/Support material: Principal Examiner report – AS & A Level Economics, Jun'23 Doc: [33_9708_examiner_report_Jun23] *NB: This point applies equally to all syllabuses; Principal Examiner reports for all syllabuses are provided in the Faculty packets.*

Narrative point ~ Evidence detail	Evidence type	Evidence source
Correlations between candidate performance on the different components that make up the syllabus show strong relationships between papers (i.e. there are common underlying constructs), while allowing for the focus on distinct skills across the papers.	Psychometric	Presentation document: Inter-component correlations – AS Level Biology, Jun'19 Doc: [44_SG_Biology inter component correlations] *NB: This presentation document provides evidence to illustrate typical performance for a sample of Cambridge tests; further information is available on request.*
Possible test bias of the total test score		
Cambridge International sets out commitments Candidates will be treated fairly in all circumstances.	Procedural	Policy document: Cambridge International Code of Practice • §5 – Maintaining the integrity and currency value of examination results Web: cambridgeinternational.org/.../416992-code-of-practice
Reasonable and appropriate steps are taken to ensure that tests are accessible and fair (unbiased) across student groups. Fairness and accessibility are considered, evaluated and confirmed throughout course and exam development and review. Examples of issues for which explicit guidance is provided include: • Social and Cultural Considerations and Sensitive Topics • Anglo-centric Bias and National Sensitivities • Command Words • Problematic Command Words • Language Guidance for Question Setters	Procedural	Operational document: Instructions for Revisers Doc: [23_proc_Instructions_for_Revisers]
Finalised (post-grading) item statistics give facility by score category (grade) by gender: • *Test level: grade distribution, for all candidates and by gender* • *Question/item level: summary statistics (facility), by grade and/or gender*	Psychometric	Technical document: Post award ILD – AS & A Level Economics, Paper 22, Jun'23 Doc: [28_9708_22_PostAwardILD_June2023] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
Cambridge conducts analyses of assessment data to identify potential bias. The research paper *Success in the US* summarizes analyses comparing the college outcomes of Cambridge participants across gender and ethnicity.	Qualitative – research	Research paper: Success in the US (Shaw, S. and Bailey, C. 2011) Doc: [45_Report_Success in the US_final]
Evidence that time limits are appropriate and that the exam is not unduly speeded		
Omit rates are generally low and do not show a trend of being higher at the end of the test; this is evidence of acceptable item functioning.	Psychometric	Technical document: ILD for Awarding – AS & A Level Information Technology, Paper 12, Jun'23 Doc: [25_9626_12_ILDforAwarding_June2023] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes and/or typical performance of Cambridge tests; further examples are available on request.*
Provisions for standardizing administration of the examination		
Test administration procedures for all course exams are comprehensively and clearly documented, with detailed guidance to support schools. This includes guidance and regulations on: • Standardized test preparation instructions • Standardized test administration procedures • Consequences of breaching test administration regulations have consequences • Special instructions for particular exams	Procedural	Policy document: Cambridge Handbook 2024 Web: cambridgeinternational.org/.../700835-cambridge-handbook-2024

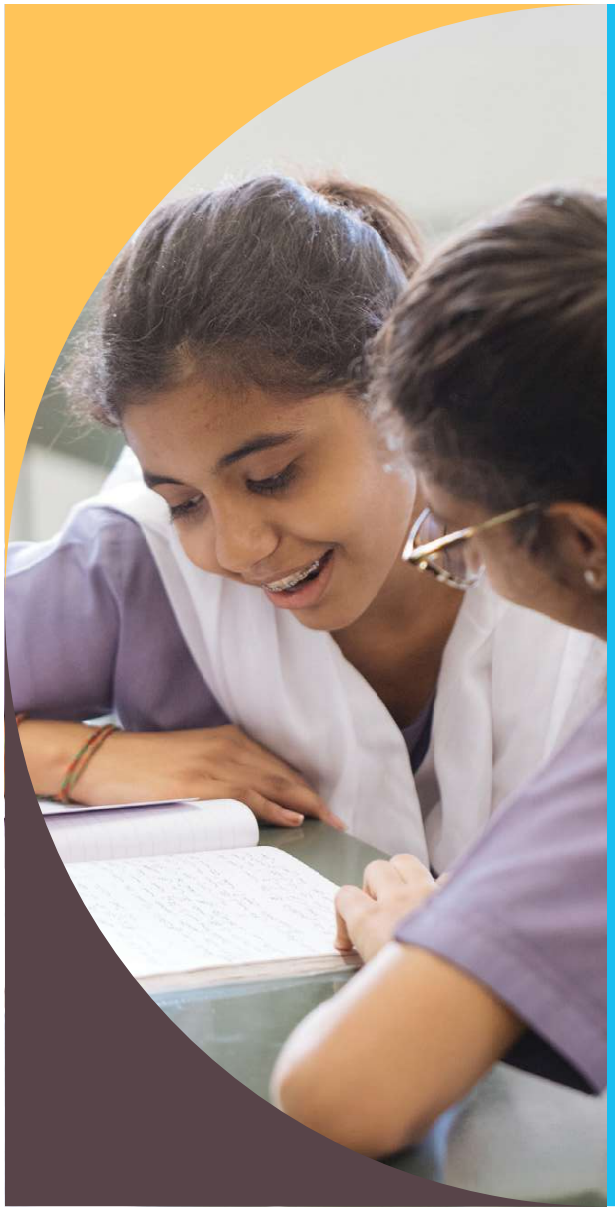
Narrative point ~ Evidence detail	Evidence type	Evidence source
There is comprehensive guidance and procedure around access accommodations for candidates published on the Cambridge International website. Statement: *"Access arrangements are pre-exam arrangements made on behalf of a candidate with particular needs, for example the use of a scribe, modified papers or extra time."*	Procedural	Online information: Access arrangements Web: cambridgeinternational.org/.../access-arrangements/

Provisions for exam security

Cambridge implements numerous policies and procedures to ensure security while developing secure test materials.	Procedural	Policy document: Cambridge International Code of Practice • §5.3 – ten commitments to maintain the security and integrity of Cambridge exams Web: cambridgeinternational.org/.../416992-code-of-practice
Cambridge's approach to test security, preventing irregularities in assessment, and maintaining test integrity is clearly set out.	Procedural	Policy document: Cambridge Handbook 2024 • §4: Before the exams (especially §4.2–§4.6) • §5: Exam day (especially §5.1–§5.3; §5.7) • §5.6: Malpractice Web: cambridgeinternational.org/.../700835-cambridge-handbook-2024

Cut-Score Information

Rationale for the particular cut-score recommended



Cambridge International makes clear its commitment to maintaining awarding standards from year to year through the grading process. This activity contributes significantly to internal consistency between forms and across time. Statement: *"Aim 4.3: Grading will maintain the awarding standard of the previous year's examination and comparability with other options and qualifications."* (p.18) *"The awarding standard is the standard of candidate performance that is just sufficient for the award of a particular grade."* (p.18)	Procedural	Policy document: Cambridge International Code of Practice • §4 – Grading and the reporting of results Web: cambridgeinternational.org/.../416992-code-of-practice
Grading is one of the 'Core Processes', identified and monitored through the quality management system (QMS), which is ISO 9001 certified. There is comprehensive procedural documentation covering operational activities, as well as detailed audit trails of decision making and actions.	Procedural	Operational document: CP06 – Marking and grading Doc: [05_proc_CP06]
There is comprehensive procedural documentation for internal staff involved in grading activity. A staff briefing is held in advance of every examination series to provide guidance on matters pertaining to the series in question.	Procedural	Operational document: Assessment Staff Manual Chapter 7a – Grading Doc: [47_proc_ASM_Chapter_07a]
The aim of grading is to ensure the equivalence of test forms over time (carrying forwards the awarding standard from the previous year) and between variants (ensuring comparability around the world). Statement: *"The purpose of the grading process is to determine, for each key threshold on each component and each syllabus option, what is the lowest mark for which the performance this year can be deemed equivalent to that achieved by candidates at the lowest mark for the same grade last year."* (p.6)	Procedural	Operational document: Assessment Staff Manual Chapter 7a – Grading Doc: [47_proc_ASM_Chapter_07a]

Narrative point ~ Evidence detail	Evidence type	Evidence source
Grading decisions focus on balancing evidence of cohort ability (outcomes) and test difficulty (thresholds), making use of "multiple sources of evidence", including a range of technical and statistical data, alongside input from subject matter experts. Statement: *"Cambridge International's grading decisions are made using a combination of professional judgement and the technical and statistical evidence."* (p.6)	Procedural	Operational document: Assessment Staff Manual Chapter 7a – Grading Doc: [47_proc_ASM_Chapter_07a]
The process for setting cut-scores for each syllabus is comprehensively recorded, presenting the evidence used and rationales for all decisions.	Psychometric	Technical document: Grading Plan – AS Level Biology, Jun'19 Doc: [48_9700_GradingPlan_Jun2019---SENSITIVE] *NB: Technical documents are provided for a sample of syllabuses to illustrate Cambridge's processes; further examples are available on request.*
A wide range of sources of technical and statistical data are generated and analysed to support the cut-score setting process – both during decision making and subsequent quality assurance. The analyses that inform the final rationale for proposed cut-scores include: Comparisons between series and between variants – focus on test difficulty • Threshold comparison tool – Historic paper and syllabus thresholds presented in tables and graphs Comparisons between subjects – focus on test difficulty • Syllabus pairs analysis – Score achieved on different subject tests by common candidates Comparisons between 'first half' and 'second half' of advanced courses – focus on test difficulty *NB: AS Levels are the 'first half' of an A Level course* • AS to A Level progression analysis – Outcomes by score/grade for AS Level component and A Level overall Comparison of cohort size over time – focus on cohort ability and likely stability • Entries analysis tool – Counts of cohort size overall and by subgroups Comparison of cohort size and make-up (by country) over time – focus on cohort ability • Cohort mix analysis Comparison of projected grades (by teachers) over time – focus on cohort ability • Forecast grade analysis Consideration of test statistics, historic thresholds and outcomes by series – focus on general test functioning • Tables of historic data – summary statistics, cut-scores and outcomes • Tables presenting summary statistics for current series Consideration of likely thresholds to maintain outcomes based on stable continuing cohort – focus on statistical standards • Benchmark Basket Threshold Indicator analysis – based on 'stable common centres' • Returning Centre Threshold Indicator analysis – based on centres with entries in previous series • Putative outcomes analysis – based on prior attainment for 'matched candidates'	Psychometric	Presentation document: Scoring Cambridge IGCSE assessments Doc: [49_pres_Scoring Cambridge IGCSE] • pp.18-21

Narrative point ~ Evidence detail	Evidence type	Evidence source
Evidence for the reasonableness and appropriateness of the cut-score recommended		
A brief rationale for the recommended cut-scores for every assessment is presented to Cambridge International's Accountable Officer for their endorsement. The focus is on appropriate use of evidence and decision making.	Psychometric	Presentation document: Grading confirmation comments [sample; redacted] Doc: [50_pres_Phase_1_comments_Jun_19---SENSITIVE] *NB: This presentation document provides evidence for a sample of syllabuses to illustrate Cambridge's processes; further information is available on request.*
Trends in outcomes (percentage achieving at each cut-score) for every assessment are reviewed by the Accountable Officer and senior colleagues. The focus is on the maintenance of standards over time.	Psychometric	Presentation document: Qualification Statistics report [sample; redacted] Doc: [51_pres_qualstats_Jun19---SENSITIVE] *NB: This presentation document provides evidence for a sample of syllabuses to illustrate Cambridge's processes; further information is available on request.*
Procedures recommended to users for establishing their own cut scores (e.g. granting college credit)		
Cambridge publishes whole-world outcomes by grade for each syllabus, which gives currency to the grades achieved by individual candidates.	Psychometric	Technical document: Cambridge International AS and A Level results statistics Web: cambridgeinternational.org/.../results-statistics/
Cambridge publishes cut-scores and scoring rubrics, which together, and in combination with other published resources, demonstrate the level of performance required at each grade.	Qualitative	Technical document: Grade threshold tables Web: cambridgeinternational.org/.../grade-threshold-tables/ Assessment/Support material: Mark scheme – AS & A Level Classical Studies 9274, Paper 1, Specimen for 2022 onwards Doc: [16_9274_P1_Specimen_mark_scheme] *NB: This point applies equally to all syllabuses; assessment materials and grade thresholds for all syllabuses are provided in the Faculty packets.*
Through the School Support hub, Cambridge publishes Example Candidate Responses, which demonstrate in concrete terms the level of performance typically required at given score points.	Qualitative	Assessment/Support material: Example candidate responses – AS & A Level History, Paper 2 Doc: [52_9489_P2_Example_Candidate_Responses] *NB: This point applies equally to all syllabuses; example candidate responses for all syllabuses are provided in the Faculty packets.*
Information on norms and normative groups (if applicable)		
Cambridge does not use norms.		
Statistical standards are considered as part of the process of carrying forward awarding standards from year to year.		*See "Rationale for the particular cut-score recommended"*
Recommended Items		
Effects of different content samples		
Cambridge tests focus on consistent content sampling of the syllabus from series to series, considering Assessment Objectives, targeting levels of difficulty, and systematically drawing upon areas of content.		*See "Evidence for equivalence of forms of the test"*

Narrative point ~ Evidence detail	Evidence type	Evidence source
Effects of testing on different occasions		
Standard setting focuses on maintaining awarding standards from year to year, also considering standards between sessions (March, June, November); centres choose which session to enter based on their delivery model.		*See "Rationale for the particular cut-score recommended"*
Equivalence of forms		
Cambridge International makes clear its commitment to maintaining awarding standards from year to year through the grading process.		*See "Evidence for equivalence of forms of the test"*
Score stability over time		
Cambridge International makes clear its commitment to maintaining awarding standards from year to year through the grading process.		*See "Rationale for the particular cut-score recommended*
Irrelevant sources of difficulty affecting test scores		
Cambridge exams are designed to minimize construct irrelevant variance.	Procedural	Policy document: Cambridge International Code of Practice • §2.4: Question papers and mark schemes will minimize construct-irrelevant variance Web: cambridgeinternational.org/.../416992-code-of-practice
Cambridge provides comprehensive guidance for those involved in test development. Instructions for Revisers and Vetters, who carry out quality assurance activities, include: • Language guidance • Managing the content of mark scheme	Procedural	Operational document: Instructions for Revisers Doc: [23_proc_Instructions_for_Revisers] Operational document: Instructions for Vetters Doc: [53_proc_Instructions_for_Vetters] *See "Description of the item sensitivity panel review"*

Glossary 72

Foreword

A key and consistent finding from international research into educational effectiveness is that pupil achievement, broadly defined, is influenced most by classroom-level activity and by what teachers do in classrooms (see Muijs et al 2014). Unfortunately the practical realities of running a school can mean that not enough attention is paid to the classroom level. School administrators and leaders can spend most of their time on operational and administrative matters. This guide focuses on classroom-level activity, providing support and guidance to Cambridge schools that want to improve the quality of teaching and learning.

There are many effective approaches to teaching Cambridge programmes. No two schools are identical, even in a common culture, let alone in an environment as rich and diverse as the Cambridge community. How you prioritise the principles and practices identified in this guide, and how you implement them, will vary considerably. This will depend on the culture and values of your school as well as the level of the school's development. Effective educational practice is the result of local ownership and leadership. It must involve careful management of the large number of inter-dependent variables that contribute to it. Only you know your school and its community, and only you can drive school improvement. Cambridge International's role is to support you, to help you make the right decisions for your school.

I hope this guide will prove useful to school leaders as a resource to help evaluate and then develop practice. I also hope you will be inspired to become active within our community of schools. One of the implicit themes throughout this guide is that no individual teacher, school leader or school should ever work in isolation. We all improve our professional practice with critical and supportive friendship.

Dr Tristian Stobie
Director of Education, Cambridge Assessment International Education

1: Introduction

1.1 Audience, aim, purpose and focus of the guide

Many books and articles have been written about improvement in schools and school systems over the past two decades. This has been a period of intense international interest in educational quality and standards. Today, we are in a position where there is a wealth of theory and research evidence about what makes an effective school and a quality education. This material is not always easily available to school leaders and teachers in a practical and coherent form. This Cambridge guide is designed to meet this need for schools that:

- provide one or more of the Cambridge curriculum programmes for their learners
- aspire to achieve a high standard of education for these learners
- are committed to the ongoing process of school development.

This guide will help school leaders and teachers to understand, and put into practice in their own context, some of the important lessons learned from international work on raising quality standards and improving educational outcomes. It is designed to complement other Cambridge resources for school leaders and teachers including *Implementing the Curriculum with Cambridge* and *Developing the Cambridge Learner Attributes* . Find them at **www.cambridgeinternational.org.uk/teaching-and-learning**

The primary audience for the guide is schools that are newly registered with Cambridge International. Providing one or more Cambridge programmes often involves significant transformation, with new and different approaches. The guide supports the development work that schools will already have undertaken to register with Cambridge International and to plan for introducing one or more Cambridge programmes. Newly registered schools are likely to be 'working towards' the achievement of at least some of the Cambridge standards, which is recognised in the registration process. The development work covered in the guide will enable the school to achieve these standards and then continue to develop to become an even better school.

The guide will also be of interest to schools going through the registration process, and to well-established schools that have achieved the Cambridge registration standards. School development is a journey, and one of the characteristics of outstanding schools and school systems is that they are always striving for further improvements.

The timescale of activity in the guide covers a period of 3–5 years. This will vary depending on what processes you have already put in place and the outcomes achieved in the school. As school development is a never-ending cycle of evaluation and improvement, the activities will relate closely to ongoing cycles of implementation, monitoring, review and revision well into the future.

The **aim** of the guide is to provide an introduction to school development that improves the delivery of Cambridge programmes and thereby supports student learning.

The **purpose** of the guide is to be a user-friendly and practical manual for Cambridge schools in a wide range of contexts. As well as providing some guidance about effective practice, it will also direct users to additional reading on key topics so that schools can access the research evidence directly. It will introduce, but not fully explore, further steps that more experienced schools could take towards achieving sustainable excellence.

The **focus** of the guide is on improving the quality of student learning. This includes:

- a classroom focus on the quality of learning for individual students
- a broader focus on improving the quality of student learning – through developing a school-wide culture of learning supported by a shared educational vision and the systems and processes necessary to achieve and sustain it.

1.2 Resources

This guide contains a limited selection of examples. We are developing further examples of criteria, policies, procedures, documents and approaches described in this guide. When available these resources will be published on our public website. It is very important to stress that these resources are provided to help your planning. You must develop your own procedures and practices in line with your school community's needs.

An annotated bibliography is provided at the end of the guide. Terms used in the guide are defined in the glossary section.

1.3 The challenge of professional and institutional change

Change is, by its nature, disruptive as it involves challenging traditional attitudes and practices to improve and broaden the range of professional skills. School development involves evaluating and refining existing practices and introducing new ones, all supported by professional learning. For teachers this is likely to include developing a broader range of effective teaching practices that support active learning. For school managers and leaders this might include developing new leadership styles and strategies. Introducing change is only the beginning of the process as effective change requires ongoing evaluation and development.

This guide provides some guidance to help schools design their own development plans. How change is managed will depend on the context and culture of the school. While research into school improvement has some generalisable findings, it is important to recognise that every school is unique, with its own context and culture. As Kamens (2013, p.130) points out:

"It should be clear that the search for 'best practices', is now an international one. With it come high expectations that there are easily borrowed protocols that can vastly improve local educational systems ... The search for best practice is built on an optimistic faith that 'a school is a school is a school.' It assumes that a practice that works in say Finland will work as well in the United States or Germany. It assumes Education is like Engineering."

The richness of the Cambridge community is its diversity, and we do not believe that education is like engineering. Every school has its own distinctive mission and community, and every class of learners its own character and needs. School development is also a gradual process. Planning needs to move incrementally through stages, recognising the current practical reality the school faces. This guide is not intended in any way to be prescriptive. School leaders and teachers will want to consider the ideas and practices presented here critically. They can then apply them in ways that fit their own unique context, circumstances and needs.

1.4 What are 'standards' in an education system supported by Cambridge International?

It is helpful to have a common understanding of what we mean by 'standards' in the context of Cambridge programmes, our international family of schools and the processes of school development. Standards are clear descriptions used to define quality expectations. In education they often refer to student achievement but they also relate to quality across the whole of a school's work and functions.

The international qualification standard

As we are a curriculum and assessment authority and awarding organisation, Cambridge standards relate to the prescribed syllabus and its assessment. Cambridge International can justifiably claim to set an international standard for its qualifications. At Cambridge Upper Secondary and Advanced levels our qualifications are widely recognised by higher education institutions, universities, employers and other stakeholders as excellent preparation for the next stage of education. Because these standards are international and portable, a student receiving a grade in one country at one time can accurately be compared to a student receiving the same grade at another time and place. Cambridge International is responsible for maintaining these standards and ensuring they are the same for all students in all Cambridge schools.

Our international standard is a combination of three different types of standard. We set and maintain standards defined by our qualifications.

1. **Curriculum standard:** This standard relates to the explicit and implicit demand of the content and skills set out in our syllabuses. The syllabuses and their specifications provide an appropriate selection of material for the age group at an appropriate level of difficulty.
2. **Assessment standard** (also called the attainment standard): This standard relates to the demand of the assessments we set. What students know and can do is measured through assessment processes that are valid, reliable and fair. This means that results students receive are seen as accurate measures of their performance in relation to the particular subjects being assessed.
3. **Grading standard** (also called awarding standard): This standard relates to the achievement we recognise via our grade threshold decisions. Students are awarded a mark/grade accurately reflecting their level of performance.

Maintaining confidence in these standards is fundamental to our operation. We have very strict regulations universally applied to all our schools relating to all areas that might compromise this standard. All of our examination procedures and grade awarding practices, coursework and security regulations are designed to maintain this high level of confidence in our qualifications.

One immediate challenge for new schools is to develop a clear understanding of these Cambridge standards. Only then will they be able to communicate them to learners, parents and other stakeholders. This is obviously important for teachers and leaders in planning, providing, monitoring and assessing the educational programme. It is equally important that learners are helped to develop their own understanding of the standards and what they can do to improve their own achievement.

School standards

There are three other domains of education standard (Faubert 2009) that are particularly relevant to this guide:

- standards related to processes at classroom level
- standards related to processes at school level
- standards related to the school environment.

These three types of standard support the school's achievement of the primary aim: a high standard of educational achievement for all learners. Cambridge International's registration quality standards fit within this category of supporting standards. They set out and exemplify an initial benchmark of quality that schools need to commit to in order to implement successful Cambridge programmes. Because we recognise and value the diversity of schools in the Cambridge family, and the differences in the contexts in which the schools operate, we have not set out further, more aspirational and detailed standards to guide the process of school development. We believe that schools are best placed to determine their own ongoing quality standards, related to their own circumstances and the needs of their learners and communities.

National or state governments are likely to be responsible for determining these standards, as national standards form the basis for evaluation of school quality in the public sector. If national standards are not sufficient for delivering Cambridge qualifications, the school will need to develop and implement their own. In private schools the governing body and/or owner, as well as the senior management, will be responsible for determining these school-based standards. Internationally many schools seek accreditation with one or more accreditation bodies, which publish their own sets of accreditation standards. These are wide-ranging definitions of quality across the whole of a school's work and functions, and are focused both on quality assurance and on promoting improvement. Schools that are considering applying for international accreditation will find this guide very useful, as the principles and practices outlined are consistent with best international practice.

1.5 Curriculum alignment and coherence

While Cambridge International defines the curriculum and assessment standard, schools are responsible for developing standards related to processes at classroom level and those related to processes at school level that will influence student learning. Aligning what is prescribed and expected with what is actually taught and experienced by the student is one critical activity the school has to address. Because teaching happens locally, only schools can be responsible for ensuring that the taught and experienced curriculum is well aligned to Cambridge curriculum and assessment specifications. Furthermore, the Cambridge curriculum is not designed to be delivered in the same way in all classrooms around the world. While Cambridge International defines the standards, the approach to delivering the Cambridge programmes must be contextualised to optimise its value for the local context. Cambridge International provides teaching support material and exemplar materials but these need to be adapted for local needs.

Schools are a complex system of many interdependent parts. Changes in one area will have impacts on others, so a key concept in school development is coherence. Changes should be aligned and designed to pull in the same direction. The direction will be determined by the mission and values of the school. However, one common value for all Cambridge schools must be improving the quality of student learning and preparing students properly for Cambridge qualifications. A school provides a coherent education when the written, taught, assessed and experienced curricula align, and school practices, incentives and written resources (including textbooks) support the curriculum.

1.6 Leadership and management

Both leadership and management are critical to school development. A useful, if simple, distinction relates management functions to effective operations, making sure that the school is running well. Leadership is focused on the direction the school is going in, ensuring it is doing the right things, has a vision and mission that is inspiring teaching and learning, and improving the school's performance in relation to this. Leadership is also concerned with getting the most out of individuals and developing a collaborative culture.

Within the administrative team of a school different management responsibilities will be assigned to different individuals. Often leadership is also viewed in terms of a position – the principal or director. The principal of a school is responsible for making sure that teaching and learning is effective. It is, however, useful to view leadership as a process rather than just a position of authority. Leadership of school development demands a complex set of skills and qualities. This will be a mixture of expertise and abilities best found in a team or a network of leaders. Each individual leader will bring their own set of skills and attributes to the group. These will combine with those of others to make a powerful whole. Discovering, inspiring, motivating and developing this network of leaders of learning is one of the most demanding but rewarding roles of a school principal. In busy schools too much attention can be given to administration, focusing on managing the day-to-day operations, and not enough on leading learning.

International research demonstrates that leaders make a difference to schools. In a review of the impact of school leadership on learner outcomes, Robinson (2007) grouped leadership dimensions into five main categories:

- establishing goals and expectations
- strategic resourcing
- planning, coordinating and evaluating teaching and the curriculum
- promoting and participating in teacher learning and development
- ensuring an orderly and supportive environment.

In her analysis of the effect of each of these on learner outcomes, based on a review of a number of studies, she found that what leaders (in this case primarily referring to principals) do is very important. The more leadership is focused on teaching and learning and the professional development of teachers, the greater the effect on student outcomes. The largest impact was the result of leaders promoting and participating in teacher learning and development. The second was planning, coordinating and evaluating teaching and the curriculum.

While school development should have a particular focus on classroom change, it is much more than that because classrooms do not operate in a vacuum. Developing a culture of learning across the whole school community is important. The school climate has a profound effect on attitudes and approaches to learning. Where appropriate, empowering and involving teachers, students, parents and the broader community will help generate a collective sense of responsibility for school development.

The following chapters are designed to help school leaders (broadly defined) to build the skills and knowledge necessary for improving the success of learners. The focus is on developing those areas that have the greatest impact on learner, and therefore school outcomes. These are the two dimensions of leadership identified by Robinson as:

- promoting and participating in teacher learning and development
- planning, coordinating and evaluating teaching and the curriculum.

We also briefly consider other important related areas.

1.7 What do we mean by 'evaluation'?

We use the term 'evaluation' in several contexts in this guide. Evaluation is associated with two different types of judgement which need to be distinguished:

- judgement with a view to hold to account
- judgement with a view to improve.

Throughout this guide the term 'evaluation' is used in terms of judgement with a view to improve. Cambridge schools will be operating under very different circumstances, and standards and expectations will be largely based on the school's context. This will give rise to different judgements required to hold to account. Beyond establishing that all Cambridge recognition standards are met and maintained, holding schools to account is not Cambridge International's concern. As this is a guide for school development, making accurate and valid judgements with a view to improvement is absolutely central. The purpose of judgement is to bring about change that will better support student learning.

One example of this distinction applies in Chapter 6, which considers evaluating teaching. Some schools and school systems will require teacher evaluation also to be teacher appraisal, where the teacher is held to account. Performance review in this situation might, for example, impact on salary. Schools may or may not have a choice over this. What matters in the context of this guide is that teaching improves as a result of the evaluation process.

The same principle applies to Chapter 2, which considers school development planning. Many state systems apply school accountability measures where evaluation is about holding the school to account. In the context of this guide our concern is the process used, data gathered, judgements made and plans to implement that result in better practice.

2: Creating the school development plan

This chapter provides an overview of school development planning. It makes a link between the application and initial planning that a school completes in order to register with Cambridge International, and ongoing processes of quality assurance and school development. The starting point for school development planning is the requirement that the school fully meets Cambridge quality standards defined in the registration process. Once this is achieved school development planning becomes an ongoing cycle involving evaluation, planning and development designed to improve student learning and achievement. The school development planning process should fit naturally with, and complement, the school's ongoing quality assurance policies and practices. These are considered in detail in subsequent chapters.

2.1 An overview of school development planning

Professor David Hopkins, Professor Emeritus at the Institute of Education, University of London (2006) defined the purpose of the school improvement process as being:

"... to improve the learning and achievement of all students and enhance the school's capacity to manage continuous improvement. The focus is upon school level factors (e.g. leadership, planning, professional development) and classroom level factors (teaching, learning and student feedback). These two areas are united through a process of enquiry."

In this guide school development planning is the overarching process of enquiry, evaluation, prioritisation, planning and execution of plans designed to improve student learning and achievement.

Enquiry is the first part of the process of evaluation. Evidence is gathered and interpreted to ensure judgements are reasonable and accurate. A school needs to create a flow of data and evidence about how it is performing in key areas. This evidence will be generated annually from processes like those described in Chapters 5 and 6, which consider in detail how student learning can be improved through assessment and evaluating teaching. Evidence will lead to judgements about what is working well and what needs attention. The process helps a reflective school to:

- take ownership of monitoring and evaluating its own performance and to plan effectively for improvement
- gather information and evidence to review progress in terms of the whole-school experience as well as learner outcomes
- build up a picture of the quality of provision in the school over time – this will provide the school and its community (the stakeholders) with a measure of how well learners are performing and the standards being achieved
- identify good practice so that it can be shared throughout the school.

Development plans map out how issues identified during the evaluation phase are followed up. They should be a response to the following questions:

- What specific aspects of our work do we need to develop (priorities and intended outcomes)?
- How are we going to develop them (processes)?
- What resources do we need to achieve this (resources)?
- How long will it realistically take to achieve (timescale)?
- Who is going to lead and manage the achievement of each objective and the overall plan (responsibilities)?
- How will we know that we have achieved the plan (evaluation)?

Annual development cycles and periodic whole-school evaluation

Development planning can just be based on an annual review using evidence generated in the process of running the school. One limitation of this is that it does not allow for a more complete evaluation of the school system as a whole. It also uses a limited number of sources of evidence. For this reason we advise schools to periodically (usually every five to 10 years) have a major whole-school evaluation.

How this is organised will depend on the school context. Normally the process starts with a comprehensive school self-evaluation. This examines all areas of school life, updates the school's mission, vision and educational aims, and considers school strengths and limitations from the perspective of the whole-school community. There are roles for representatives from each group of stakeholders including teachers, students, parents and governors or owners. Their contributions will provide perspectives that will inform the school's review and help identify the next steps that need to be taken. The process is a learning activity for all those engaged in it. The school leadership team should plan to devolve responsibility to groups of other leaders, teachers and stakeholders. If the process is managed well, all those who participate will gain skills, experience and confidence.

Sometimes the school is seeking accreditation with an agency. See, for example, the Council of International Schools (2015). In this case the school evaluation process will use a standard self-evaluation format and incorporate external validation of this. This involves a team of appropriately experienced external evaluators visiting the school. Their role is to validate the school's self-evaluation, be 'critical friends' and make sure the school is actually meeting the standards required for accreditation. They provide an informed outsider's perspective and check the self-evaluation is a realistic reflection of the quality of education in the school.

A strategic development plan is normally created following this comprehensive process of whole-school evaluation. Once written, the strategic plan identifies and explains the school's strategic priorities for a specified period of time, normally 5–10 years. It also identifies actions needed to achieve these goals and considers how resources will be used to achieve the plan. Within this timeframe there is likely to be detailed planning for the first year or two, with higher-level planning for the rest of the plan's lifetime. Implementation will be monitored and the plan will be adjusted in the light of ongoing feedback incorporated in the annual development cycle. Towards the end of the plan the outcomes will be evaluated and the process will then begin again with a new review and self-evaluation. The long-term strategic plan created by this process will provide guidance for the whole-school community – about the school's objectives, how they are to be achieved, and how the members of the school community will contribute to their achievement.

The annual school development cycle, sometimes referred to as the management cycle, is a process of goal setting, implementing actions, monitoring, evidence collecting and evaluation that occurs every year. This leads to affirmation or refinement of the school's strategic plan (see Figure 1).

Figure 1: The annual school development cycle

2.2 Achieving Cambridge registration quality standards

Schools registering with Cambridge International are required to complete an application form showing how the school measures up across five sets of registration quality standards (see Table 1). Some standards have to be fully met before the school can teach Cambridge programmes. These include:

- a clear mission
- positive relationships between staff and students
- appropriate qualified staff
- reasonable and safe premises
- transparent financial management and procedures for complaints
- examinations security.

See *Becoming a Cambridge International School: A Guide to the Registration Process* for full details. You can find this document at **www.cambridgeinternational.org/images/163193-becoming-a-cambridge-international-school.pdf**

Schools, however, are not expected to demonstrate evidence of having fully achieved all the registration standards before they are registered. They can be 'working towards' achieving some of these standards. Examples are:

Standard 1: The school's mission and educational values

- The culture of the school is learner-centred and supports students and teachers to become confident, responsible, reflective, innovative and engaged.
- International awareness and global perspectives are promoted throug h the curriculum and other activities.

Standard 2: School management and leadership

- The school principal is suitably qualified and experienced in educational leadership.
- The senior management team and the governing body demonstrate clear goals for the successful introduction of Cambridge qualifications and can evidence planning to support effective implementation.
- Senior staff are committed to setting targets for school improvement and staff development, supported by well-designed performance review and self-evaluation.

Standard 3: Quality of teaching and learning

- The school curriculum is clearly expressed and accessible to teachers, students and their parents.
- Assessment outcomes are monitored and evaluated with clear feedback into teaching and learning strategies.
- Teaching takes account of students' diverse learning styles and individual needs.
- The school has a well-designed approach to the professional development of teachers and other staff.
- The school has a clear policy to address the language needs of learners.

Depending on the outcome of the registration process, schools will need to review and build upon their initial development planning in order to make sure that these standards are fully achieved as soon as is practically possible. This must be the initial priority for newly registered Cambridge schools – this document is designed to help in this process. Even when the Cambridge registration standards are achieved, schools will want to make sure that they are maintaining them and striving for further improvements. No school can ever claim that it is perfect or afford to be complacent. One of the hallmarks of excellent schools is the fact they are constantly seeking improvements in ways to enhance the learning and achievement of all students.

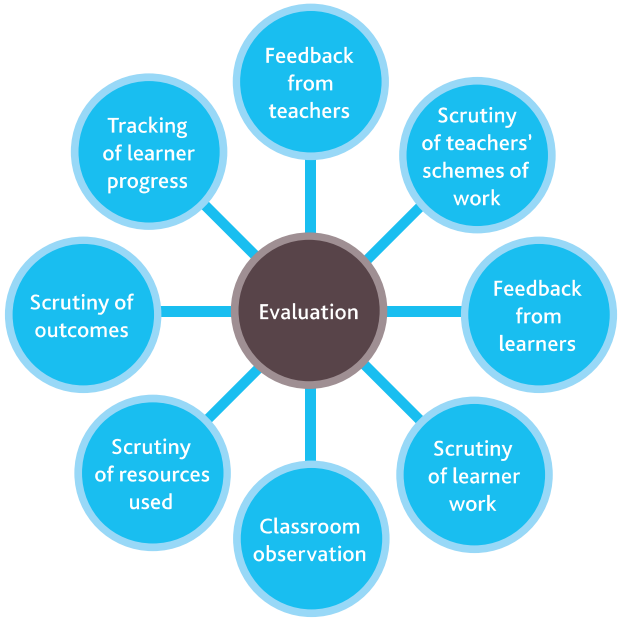
2.3 Preparing the school development plan

The Cambridge registration quality standards (see Table 1) provide a suitable starting point for new schools implementing formal school development planning for the first time. Schools that have recently registered with Cambridge International should use the initial development plan, part of the application process, as the starting point. Following registration most schools will have some standards identified as needing further work, and the initial priority must be to address these. Once this is achieved the objective becomes continuous school improvement.

Reviewing the initial implementation of Cambridge programmes

Conducting regular reviews of the school curriculum, and the effectiveness of its implementation and delivery, is a critical part of the school development process. An absolute priority for newly registered schools will be to evaluate the implementation of the Cambridge programme. This will include reviewing the effectiveness of each of the contributing factors, answering the following questions:

- How well do the schemes of work and teaching plans support the successful implementation of the curriculum in the classroom? (the school's written curriculum is well aligned with the Cambridge prescribed curriculum)
- Are teachers using appropriate teaching strategies? (the written curriculum is well aligned with the taught curriculum)
- Are learners achieving appropriate results? What progress have learners made? (the assessed curriculum is aligned with the taught and written curriculum)
- What is the experience of learners? (the experienced curriculum is aligned to the written, taught and assessed curriculum)
- Are the conditions for learning supportive?
- Do teachers have the necessary resources and professional development?
- Are school policies well aligned, establishing the right priorities and sending the right messages?



To evaluate effectively, no one piece of evidence is sufficient on its own. You will need to collect data from a wide range of sources and compare it to generate an overall picture. This is sometimes referred to as triangulation. Figure 2 shows a review model for a school evaluating the initial implementation of a Cambridge programme, identifying different sources of feedback. This review model can also be used for evaluating the student learning experience in groups of subjects, grades and for specific groups of learners.

Meeting our registration quality standards

Table 1: Cambridge registration quality standards

1. The school's mission and educational values	2. School management and leadership	3. Quality of teaching and learning	4. The physical environment of the school	5. Legal requirements
a. The school has a clear mission statement that makes reference to its educational values. **b.** The culture of the school is learner centred and supports students and teachers to become confident, responsible, reflective, innovative and engaged. **c.** International awareness and global perspectives are promoted through the curriculum and other activities. **d.** Relationships between staff and students are positive, demonstrate mutual respect, and the school has established and consistent expectations of behaviour.	**a.** The school principal is suitably qualified and experienced in educational leadership. **b.** The senior management team and the governing body demonstrate clear goals for the successful introduction of Cambridge qualifications and can evidence planning to support effective implementation. **c.** Senior staff are committed to setting targets for school improvement and staff development, supported by well-designed performance review and self-evaluation. **d.** There is effective and transparent management of school budgets. **e.** A complaints procedure is in place that effectively manages complaints for parents and other stakeholders.	**a.** The school is appropriately resourced with sufficient staff employed in management, teaching and support roles. **b.** The school curriculum is clearly expressed and accessible to teachers, students and their parents. **c.** Assessment outcomes are monitored and evaluated with clear feedback into teaching and learning strategies. **d.** Teachers have appropriate qualifications to deliver Cambridge programmes and qualifications successfully. **e.** Teaching takes account of students' diverse learning styles and individual needs. **f.** The school has a well-designed approach to the professional development of teachers and other staff. **g.** The school has a clear policy to address the language needs of learners.	**a.** The school premises create a positive learning environment for students. **b.** Library or learning resources adequately support delivery of the curriculum. **c.** Specialist facilities are provided (e.g. for Cambridge syllabuses in art and design, music, languages, ICT, physical education and the sciences). **d.** Secure storage arrangements for question papers and other examination materials comply with our regulations. **e.** Appropriate facilities that comply with our regulations for accommodating examinations have been identified. **f.** A good understanding of the Centre responsibilities set out in the first section of the Cambridge Handbook.	**a.** Fire certificate. **b.** Government approval to operate, including any approvals needed to provide the Cambridge curricula you wish to offer. **c.** Health and safety policies in line with government requirements. **d.** First aid provision in line with government requirements. **e.** Child protection policies in line with government requirements.

Figure 2: Sources of evidence for a school reviewing the implementation of a Cambridge programme

Structure and templates to assist planning

Schools will adapt or develop a format that meets their own needs and circumstances – no one template is suitable for all. There are two points to take into account before choosing a format:

- The period of time covered by the plan. Medium to long-term strategic planning normally considers a period of about 5–10 years. The format of the plan should help users to see how the planned activities are completed over this time. Annual plans need to be more specific, showing in detail the full set of activities and outcomes for that year. This way all contributors will have a clear understanding of what to do.
- The priorities identified in the plan. Plans should prioritise and focus on the most important developments. Some can be achieved in a year and some will take several years to achieve. The format of the plan should help users to understand the individual objectives and how they are to be achieved. It should also show how the objectives interact and are connected.

The plan format will include high-level overviews of the development plan priorities and objectives, as well as detailed summaries of activity by priority. It is best to present the information in a table format, with explanations as necessary. The format and language of the plan should be accessible, not just to school leaders and teachers but also to other members of the school community and stakeholders.

Table 2 (on page 15) is an example of an annual planning template for an imaginary school that is about to start its second year teaching Cambridge IGCSE® programmes. This school wants to make sure that important changes in teaching and learning started in the first year will continue and expand into the second. The school has decided it needs to focus on the teaching of science (the introduction of science practicals), English (a stronger emphasis on listening and speaking, and on extended writing) and history (development of source-based analysis). These objectives are all intended to have a direct impact on the quality of teaching and learning (Cambridge registration standard 3 as well as registration standard 1b: *The culture of the school is learner centred and supports students and teachers to become confident, responsible, reflective, innovative and engaged).*

These three subject departments will identify case studies of good practice from the first year of teaching. This includes the use of assessment in support of learning, learner feedback and effective practice identified from other sources, particularly Cambridge training courses teachers have completed. This material will be discussed and heads of department will be responsible for preparing the detailed plans with actions, responsibilities and success criteria identified. Departments will review and update their schemes of work and monitor the teaching of the new Grade 10 schemes. Towards the end of the plan period, once the results from the first Cambridge IGCSE entry are available, the school will review the whole Cambridge IGCSE programme. It will use data from questionnaires and 'exit interviews' with students completing the programme. Specific activities are described in the plan. We consider the following in detail in subsequent chapters: teacher evaluations, mentoring, writing schemes of work and assessment in support of learning.

The final column will be used for periodic reports on progress, using a 'traffic light' (Red, Amber, Green – RAG) system. In the RAG report, red type indicates that the activity is not on target, amber that deadlines or actions are at risk, and green that the activity is meeting deadlines and on target. When the activity is finished it is marked as completed.

Practices also need to feed into, and be supported by, clear school-wide policies. (This is the subject of the Chapter 3.) These can support the development of teaching practice at a whole-school level. This will support the extension of new styles of teaching and learning into other areas of the curriculum and other years.

Table 2: Imaginary annual planning relating to specific objectives

PRIORITY 1: Teaching and Learning							
OBJECTIVE: To support the continuing development of learner-centred pedagogy in Cambridge IGCSE courses in Grade 10							
RELEVANT CAMBRIDGE STANDARDS: 1.2, 3.3 and 3.5							
LEADERSHIP/COORDINATION BY: Ruchira Mitra							
MONITORING/EVALUATION BY: Lee Harris							
	Specific objectives	**Tasks and action required**	**Who is responsible?**	**Timescales/ key milestones**	**Resource implications?**	**Success criteria – Impact on student learning and achievement**	**Progress report (RAG)**
1	Science a. Develop science practicals	• Evaluation of first year Cambridge IGCSE implementation identifying good practice	Waleed	May previous year	$10,023	Evaluation produces clear recommendations	Closed
		• Upgrading Science lab B	Juan	Work completed Jun–Jul		Work completed by 31 July	Red
		• Mentoring	Waleed to mentor John	Sep–Dec		John's evaluation in January	Green
		• Teacher evaluation criteria added and included in evaluations	Sarah	Jan–Jun		Evidence emerges in evaluations	Green
		• New assessments in support of learning designed and incorporated into schemes of work	Sarah to lead	Sep–Dec		Evidence in schemes of work and their implementation observed in teacher evaluation process	Amber
2	English A. Enhance listening and speaking skills B. Support extended writing	• School workshop bringing in consultant David Smith	Hema to organise	15 October	$500	Recommendations identified and implemented	Closed
		• Rewrite schemes of work indicating how skills are taught	Hema to oversee	By 31 Aug before teaching begins		Evidence in schemes of work and their implementation observed in teacher evaluation process	Green
		• Mentoring	Hema to mentor Chris	Sep–Dec		Chris's evaluation in March	Green
		• Teacher evaluation criteria added and included in evaluations	Jane	Jan–Jun		Evidence emerges in evaluations	Completed
3	History A. Develop students' ability to analyse source material	• Attend Cambridge introductory History training workshop	Peter and Uzma	Sep	$500	Attending conference and dissemination of feedback to department	Completed
		• Purchase new textbooks identified as supporting source interpretation	Jay	Aug		Purchased and used	Completed
		• Rewrite schemes of work indicating how source material will be taught	Whole department led by Mark	By 31 August before teaching begins		Evidence in schemes of work and their implementation observed in teacher evaluation process	Completed
		• Teacher evaluation criteria added and included in evaluations	Mark	Jan–Jun		Evidence emerges in evaluations	Green

3: Developing policies that support improvements in teaching and learning

This chapter explains the importance of having clear policy documents that define values, principles and practices to guide school evaluation and development. We identify key policy documents and consider processes that you can use to create and revise them. This chapter also has a brief section considering how parents should be engaged to support school policies and practices aimed at enhancing learning.

3.1 Policy documents

A policy is a guide for action based on clear principles. A policy is only worthwhile if it is used and influences practice and decision-making in the school. If it just remains in a file on a shelf it serves no purpose and has no value. School policies will inform the development and revision of other documents, for example student, staff and parent handbooks.

As we require a number of supporting documents for the Cambridge registration process, schools that have completed the process will already have some policy documents. These will need regular review and updating in parallel with the school evaluation cycle. In this chapter, we provide guidance on writing policies and the structure and content of effective policies. Statements that clearly define standards are also important policy documents, in particular those defining the school's expectations for teaching and learning, assessment and teacher evaluation. We cover these in Chapters 4, 5 and 6.

Key policy documents include:

1. **Mission statement and educational values:**
   The mission statement is a written declaration defining the school's educational purpose. The school's educational aims and values might be included in the statement or listed separately. Some schools also publish a vision statement. This gives an indication of the future direction of the school, and should be widely shared and inspire commitment. These three elements should focus the development planning process and guide the educational priorities of the school. They are therefore very important, informing on all other policy documents.
2. **School curriculum policy:**
   This policy sets out the principles upon which the school's curriculum has been constructed. It explains how the curriculum should progress vertically (from one age level to the next) and horizontally (the requirements and choices for a particular year). The document might also exemplify the principles and approaches to teaching, learning and assessment. Or, these might be covered as separate policies that are cross-referenced with each other (see Chapter 5.2 on assessment policy). The curriculum policy will also identify the outcomes expected for learners. It will be based upon the school's vision and mission statements, and should clearly relate the curriculum that is offered to the school's educational values and the Cambridge learner attributes (see Chapter 4, Table 4).
3. **School language policy:**
   This requirement is included in the registration process, specifically for bilingual and multilingual schools. These schools need to make clear how they will structure the curriculum, and organise programmes and support to meet the needs of learners for whom English is a second or third language. It is also important in schools with a majority of students who are proficient in English but do not have English as their first language or mother tongue. The language policy should indicate how the school will encourage and support the maintenance of students' first languages.
4. **Performance management – Teacher and leaders' evaluation:**
   This will include an account of how the work of teachers and leaders is evaluated. It should include explanations of accountability for each individual's responsibilities. Standards for teachers and leaders will be identified and evaluation practices explained based on the principles that underpin them. In Chapter 6 we give

guidance on developing standards for teaching planning and putting into place a teacher evaluation system. We consider that school boards and/or the school owner are responsible for the performance review of the school director, chief executive or principal.

5. **School professional development policy:**
   The professional development policy sets out the purposes and objectives of the school professional development programme. It describes the kinds of professional development that are available to staff and their responsibilities and entitlements in this area. Plans for professional development need to be very closely linked to the evaluation process. Therefore, this policy needs to be cross referenced with the performance management policy and school curriculum policy, which will identify priority areas that need to be supported.

6. **Code of conduct for students and teachers:**
   We do not cover student conduct and behaviour in this guide. However, it is self-evident that students must have a clear understanding of expected behaviours and schools must consistently apply appropriate rules of conduct to achieve excellent learning outcomes. Cambridge schools will want to include in the code some account of the Cambridge learner attributes and how they relate to the expectations and social and academic behaviours of learners in the school.

7. **Complaints policy:**
   The way in which the school deals with complaints, particularly those from students and parents or carers, needs to be clear.

   Other important supporting documents include:

8. **Organogram and job descriptions for the senior management team:**
   The organogram is a graphic representation of the organisational structure of the school. It shows the individual members of the senior leadership team, from the principal down, their titles and areas of responsibility, and other key leaders and groups of staff they are responsible for. The job descriptions should clearly state the overall purpose and accountabilities of each management position, and identify specific roles and responsibilities. There should be a clear line of accountability, in terms of who the post-holder reports to, and which key positions report to the post-holder. Finally, it should show any conditions that affect post-holders' work, and the constraints within which they work. The job descriptions will have been discussed with and accepted by the individual post-holders. The organogram should demonstrate a clear, analytical account of the major areas of responsibility for achieving school objectives.

9. **Roles and responsibilities with respect to Cambridge programmes and** qualifications for senior management team:
   In many schools a Cambridge curriculum is followed by all students, but in other instances it is part of a wider curriculum. Therefore leadership responsibilities for the Cambridge programme may make up the whole of an individual's responsibilities, or only a part. It is equally important that the school identifies and records how leadership responsibilities associated with the effective provision of a Cambridge programme have been allocated. The detail of these responsibilities will be included in job descriptions.

10. **Key staff CVs (principal and teachers involved in teaching Cambridge syllabuses):**
    Cambridge International needs to see these CVs as assurance that all involved have, or intend to achieve, a level of skill and experience appropriate to their specific responsibilities in the Cambridge programme. These documents are also important for teacher evaluation and professional development planning. Therefore all school leaders and teachers will want to maintain up-to-date versions.

3.2 Creating, developing and implementing school policies for teaching and learning

Schools will have some written guidance and information for teachers, learners and parents about how the school operates, even if formal policies do not exist. Examples might include a staff handbook that gives guidance on what teachers should do if a child misbehaves in school, or how they should assess learners' work. A handbook for learners and parents will include a range of information such as school procedures, homework and reporting guidance. These handbooks should be based on clear policies rather than policy emerging from the handbook.

Writing clear policies is a very valuable process that can help the school run better. Clear policies will make sure that the approaches used by everyone in the school are consistent and efficient. These will then determine what is written in secondary documents including handbooks and procedures.

Suggestions for developing or reviewing school policies:

- Establish a School Policy Steering Group. This group will prioritise work, consider draft policies, make any final revisions and make sure all school policies are consistent and reflect the school ethos and values. Consider including parent, governing board and different staff group representatives, as well as senior management. Too many representatives, however, will make the group less effective. As quality is more important than quantity, focus on writing and reviewing a few policies each year.
- Set up working groups, reporting to the steering group, to draft each policy. Consider including parents and older learners in these groups where appropriate. These groups will discuss, develop and then write the draft policies, so each one will need to include at least one senior member of staff.
- Use the expertise and experience available in the school. For example, if a teacher or administrator is responsible for assessment, it makes sense to involve them in writing the draft assessment policy or to lead the working group tasked with writing it.
- Use example policies or policies developed by other schools as a starting point, but do not implement them in full. For the policy to succeed you must own it and make it specific to your school's context.
- Clarity and brevity are important. Attach appendices and refer to other policies and guidance documents where necessary.
- Policies need to be accessible to the whole community and need to be written in language(s) that make this possible.
- Consult with representatives of all those affected by the policy before publishing the final version. Where policies are new, think about how and when they will be introduced.

Policies can be short and to the point – the procedures and the instructions that follow will give more detail of how the policy is implemented. This elaboration is suitable in documents like handbooks for teachers, learners and parents, which is why these should be produced (or revised) after policies are established.

Each policy will usually be formed through consultation and be written by people with the most knowledge and understanding of the subject area. Therefore it is a good idea to agree on a template that you can use for all policies. This will make sure that the approach and style are consistent and will act as guidance for those writing the policy.

Table 3: What makes a good policy

What makes a good policy?
• informative • clear • as concise as possible • easy to understand • up to date • reviewed regularly • approved by a group that includes the principal and/or senior leaders • consulted upon with stakeholders (staff, parents, learners …) and, where necessary, with legal counsel • approved by the governing board • its application in school practice is evident
Policies should include:
• the name of the school • the title of the policy • the purpose of the policy • the scope of the policy and to whom it applies • the date and issue number of the policy • the date by which the policy should be reviewed • the name and title of who is authorising the policy • references to any other appropriate policies.

3.3 Engaging parents and carers in improving learning

"*Education is a triangle with three legs: parents, child, school and if any of the legs fall, the triangle falls as well*" (Harris and Goodall 2007, p. 2).

Parents are key partners in the drive to improve student learning. Their active participation in this partnership makes a difference, and so engaging with parents is a key priority for any school. According to evidence gathered in the United States (Henderson and Mapp 2002, p. 7) learners whose parents were involved with their school and their learning were more likely to:

- achieve more highly (gain higher grades and test scores)
- enrol in higher-level programmes
- attend school regularly
- have better social skills, be well behaved and have good attitudes to school and to learning
- graduate from school with the qualifications to go on to higher education.

Parents can make a very significant contribution to the self-evaluation and goal-setting processes described in Chapter 2. In some cases it might make sense for parents to be involved in policy developments described above. It is absolutely essential that parents understand the mission and values of the school.

Learning does not begin or end at the school gate. If parents understand and support the learning that happens in school, this will have a very significant impact on learner achievement. Parental engagement is more about parents engaging with the learning of their children, rather than engaging with the school. When parents and teachers work together to improve learning, learners achieve more highly. When parents support their child's learning in the home, it makes a bigger difference than when they support activities in the school. Parental involvement in school-based or school-related activities can have an impact on a child's social development and can help to embed the partnership with the school. However, where these activities are not directly connected to learning they have little impact on learner achievement.

Schools should consider the following:

- Make parental engagement a priority. Have a clear communications plan with parents.
- Prioritise parents engaging with their child's learning rather than just involving parents in the school. Support the engagement of parents who are already involved in their children's learning, as well as trying to improve the partnership with those who are less engaged.
- Be as flexible as possible in provision for meeting parents face to face and talking to parents remotely. Where it is difficult for parents to come to your school regularly use alternative means of communication, for example video-conferencing or video phone calls.
- Think carefully about the nature of communication with parents. Is it two-way or usually just communication that informs or reports to parents? Are parents encouraged to communicate openly about their child's learning and progress? How can this process be improved?
- Use new technologies to support parental engagement, but think carefully about the best way to do this. For example, share course outlines online and, where appropriate for certain age groups, homework assignments.
- Include policies and practices for engaging parents in appropriate school policy documents.

4: Teaching Cambridge programmes

Learning happens when students have to think hard (Husbands 2014).

Improving teaching is the single most important intervention that a school can make to improve students' learning and performance. The written curriculum is produced in the school and is an interpretation of Cambridge syllabuses reflecting local needs. Schemes of work are either adapted from models supplied by Cambridge International or written by teachers and used to guide teaching. One indicator of excellence is that the written, taught, assessed and experienced curricula are well aligned. Good teachers constantly use feedback from students to fine tune their plans and activities (considered in detail in Chapter 5). The most effective approach to delivering Cambridge programmes is active learning. We briefly consider this here, giving links to other Cambridge resources. Excellent teachers are highly reflective and focus not only on the outcomes or products of learning, but also on the processes of learning. Differentiation centres on looking for patterns of needs in students. Existing and emerging technologies can be valuable teaching and learning resources if they are thoughtfully incorporated into planning.

4.1 The quality of teaching

Excellent teaching is the most significant factor that affects learners' academic performance and the development of the learner attributes (see Table 4). Successful schools develop and nurture highly skilled teachers who are encouraged to be creative professionals working in a collaborative culture. Good teachers have high expectations of the learners in their classrooms, and of themselves as learners of pedagogy and practice. They see their own development and learning as a continuous process.

What teachers do in the classroom has the biggest impact on student learning and outcomes. A good written curriculum by itself does not result in improved learner progress unless the teaching is also good. "A bad curriculum well taught is invariably a better experience for students than a good curriculum badly taught ... what matters is how things are taught" (Wiliam 2011, p. 13). Effective teaching increases the rate of learning. According to Wiliam (2011, p. 20), citing recent studies: "The most effective teachers generate learning in their students at four times the rate of the least effective teachers."

Coe et al (2014) define effective teaching as that which leads to improved student achievement using outcomes that matter to their future success. They identify six components of great teaching, all of which are important. The two with the strongest evidence of impact on student outcomes are pedagogical content knowledge and quality of instruction. Effective teachers have a deep knowledge of their subjects as well as an understanding of how students think about subject content at different developmental stages (pedagogical knowledge). They support this with a range of effective practices including:

- the effective use of questioning
- the effective use of assessment
- reviewing previous learning while progressively introducing and scaffolding new learning
- giving time to embed skills
- modelling good thinking.

Classroom climate and management moderately affect student outcomes, with teacher beliefs and professional behaviours having some evidence of impact.

Muijs et al (2014) consider key findings from 35 years of research on effective teaching. The quantity of academic activity is critical. Effective teachers manage the classroom environment. They maximise students' active engagement with learning, supported by an appropriate school calendar and timetable. There is a climate and culture of learning both in the class and the school. Effective teachers carefully structure lessons, beginning with overviews and objectives, explaining the content to be covered, identifying the most important ideas and reviewing key learning objectives. In this way they help students to understand the place of a particular piece of learning within the larger picture, helping them make connections.

Good teachers also instruct and talk much of the time. It is a misconception that they let students do most of the talking. Effective teachers spend much of the time asking focused questions, facilitating discussion and giving feedback rather than lecturing. Instruction and questions are carefully targeted to make students think hard. It is not enough for teachers to have good knowledge of the subject and the material they are teaching, although this is essential – they must make it understandable to learners. Planning the overall course thoroughly, as well as unit and lesson planning, is important so that the learning journey is clearly defined. Planning a variety of learning activities and developing an environment in the classroom that engages, stimulates and supports learners is important. Effective teachers check learners' understanding repeatedly and make sure that learners are able to use and apply their understanding in different contexts. They respond to the feedback learners give them by adjusting the way they are teaching. In this way teachers help to bring understanding and knowledge to a higher level than learners could achieve on their own – focusing on what Vygotsky (1978) describes as the **zone of proximal development**.

Muijs et al (2014) emphasise teachers' expectations of students as an important factor in teacher effectiveness. Pupils who teachers expect to do well actually do better. This is not just a matter of teachers accurately predicting student potential. Students are very sensitive to subtle messages and behaviours generated by teachers' expectations.

More recently there has been evidence identifying the importance of metacognitive awareness and strategies on students' academic performance (see Muijs et al 2014).

Metacognition, often described as thinking about thinking, is concerned with the learner managing their own learning. To be effective this is a complex process because the learner has to accurately understand their learning, different procedures, strategies and skills, and know when and how to use them. They also need to be able to self-evaluate the effectiveness of their actions, so self-regulate. It also requires students to have a disposition to behave in a certain way. Of particular interest is research that suggests that effective metacognitive awareness and behaviour might, up to a point, compensate for students' cognitive limitations in a discipline (Veenman et al 2006 in Muijs et al 2014). What teacher behaviours support the development of metacognitive skills?

Metacognition is closely associated with helping students become self-regulated learners – learning how to learn. It is essential that learning how to learn is naturally infused in the process of subject learning – it cannot be effectively taught in isolation. Good teaching has always supported the development of metacognitive awareness, and

the practices identified throughout this guide provide a good starting point. Having a higher-level overview of the subject and what constitutes excellence is important for learners as it provides a basis for them to understand their own work in relation to it. Supportive approaches include:

- effective feedback, using assessment as a tool that supports learning
- searching questioning that requires students to reflect on the processes, not just the products of learning
- teachers modelling effective thinking.

Students and parents need to be aware of the value of nurturing this capacity. It will help improve student academic performance as well as develop learning maturity, supporting students in further education and the workplace.

One distraction that is often presented is that skills are emphasised and presented as an alternative to content. As Hattie (2015, p. 14) argues, this is a false dichotomy: "*The art of teaching is to balance the need for surface knowledge with deep processing of this knowledge. Deeper thinking skills need content on which to work. You cannot use deeper thinking skills unless you have something to think about.*" As Hattie points out, when learning something new, the learner first needs to develop surface understanding based on knowledge and simpler applications of skills. Strategies like enquiry-based and problem-based learning should build on a solid foundation of surface-level understanding. Excellent teachers understand when to teach new ideas developing surface understanding, and when to extend these and go deeper. This is particularly important when planning lessons and schemes of work.

Another distraction for teachers can be ideas simplistically presented as effective approaches to teaching and learning. There is little evidence, for example, of the effectiveness of learning styles and multiple intelligences (Muijs et al 2014). Too often these complex concepts are misunderstood and misrepresented in terms of teaching approaches and applications.

4.2 Active learning

The approach to teaching and learning required for learners to achieve their maximum potential using Cambridge curricula and assessments is based on active learning. Active learning is often misunderstood. It does not mean that learners have to be involved in lots of activities in each lesson or that all activities need to be centred on student enquiry. It refers to processes that engage learners and promote the skills of analysis, evaluation, problem solving, synthesis, critical reasoning and creativity – in other words, requiring learners to think hard. So activities such as reading, writing, discussion (in groups or whole class), collaborative learning, problem-based learning, the use of simulations and case studies can all be used for active learning, provided they are well planned in relation to the learning objectives.

Teaching and learning have strong cultural dimensions. Sometimes schools new to Cambridge International worry about how they can implement active approaches to teaching and learning. Often these are schools working in cultures where the teacher is an authority and the student is not encouraged to question. While schools do need to engage with the concepts and strategies associated with active learning, it is important that they do this in a sensitive way, taking into account their own circumstances. We advise you to manage change in an incremental way. For example, a school could take only a few of the ideas presented in this guide and work on these during the initial years of school development planning. If the school is operating in a culture and community where student performance in examinations is the overriding imperative, then focus initially on developing formative assessment. This will be restricted to the purpose of feeding back into the teaching and learning process in support of Cambridge qualifications and assessments. (See Carless 2011 and Section 5.1 in the next chapter.) Doing this really well is an important first step for more ambitious approaches in the future.

The Cambridge learner attributes (see Table 4) are designed to support active learning. They encourage learners to take intellectual risks and recognise that the processes of learning are important, not just the products of learning. How this is done needs to be based on school culture and context. Cambridge learners will achieve more if they see learning as challenging and enjoy the act of striving for achievement, a necessary part of growth. There are many important habits that different cultures value, which should

be nurtured. Resilience – the ability to continue when finding work difficult and to learn from successes and failures – is vital for success. Deliberate and persistent practice is also critical for success. In certain contexts, memorising facts and texts will provide important surface knowledge that can be built on more actively in the future.

4.3 The written curriculum: Schemes of work

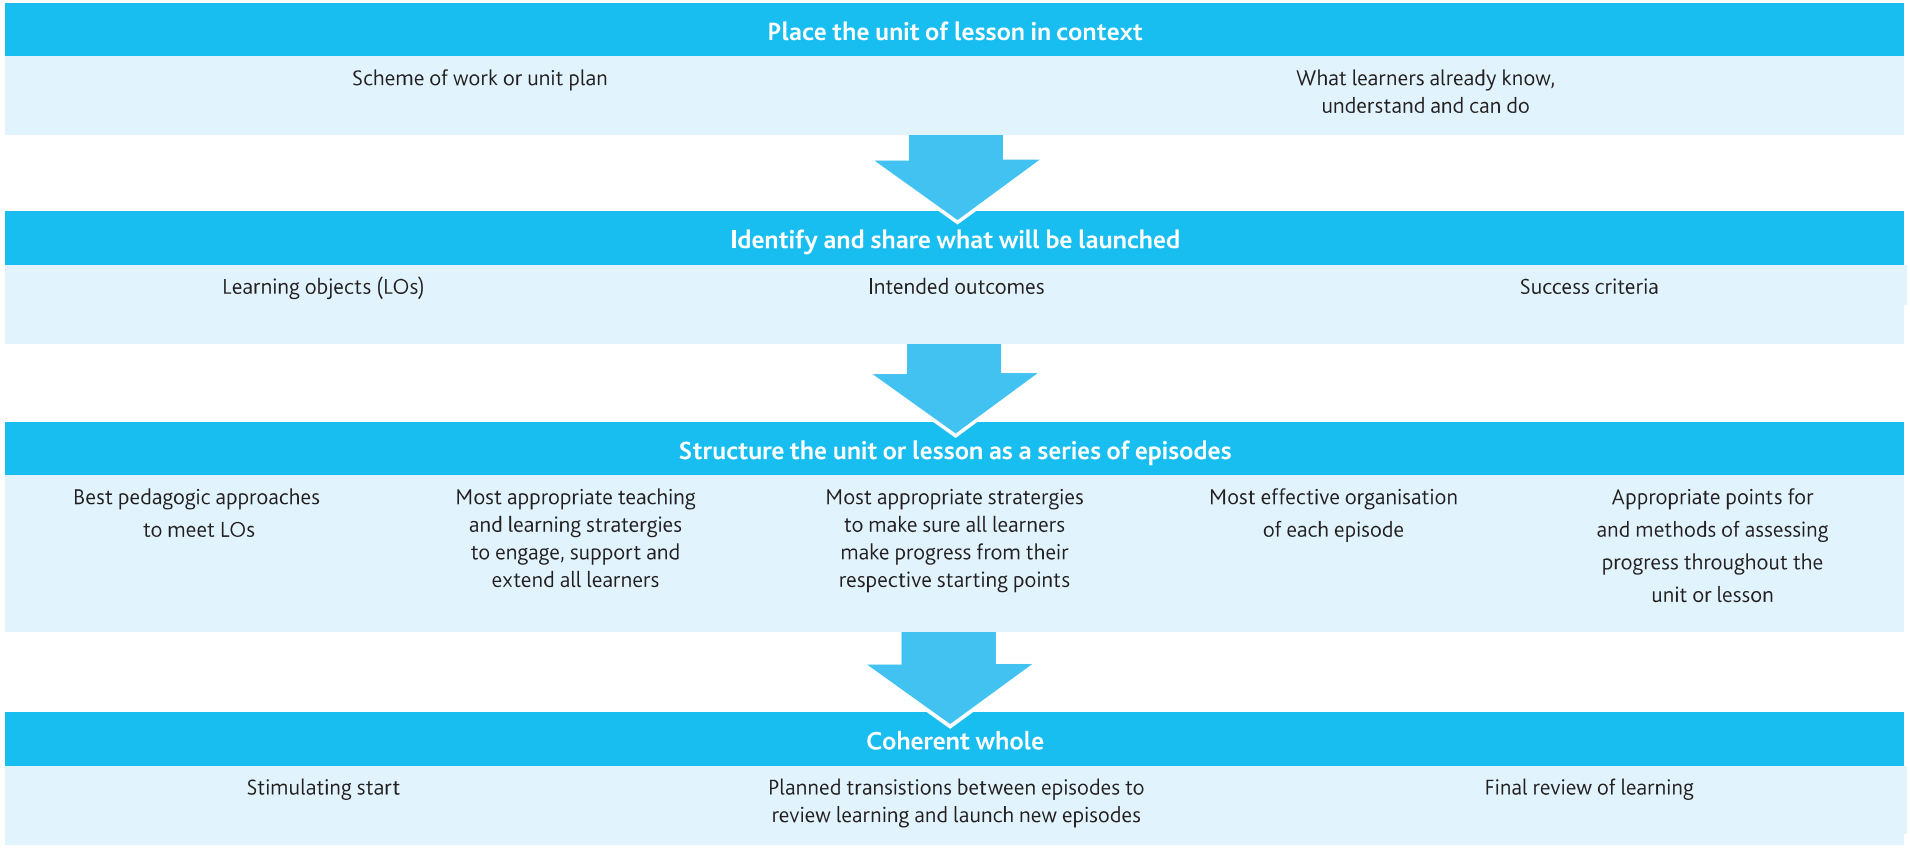
All teaching needs to be carefully planned. Schemes of work (sometimes called scope and sequence documents) show what topics, content, concepts and skills the teacher is intending to cover and the order in which they will be taught. They also provide an outline of the learning journey and may show the activities that will be incorporated into the lessons. Schemes of work provide the teachers' interpretation and plan for delivering the syllabus.

Cambridge International produces schemes of work to support many of its syllabuses. These present one way of delivering the course but they are neither prescriptive nor exhaustive in their content – teachers are expected to adapt them to their own purposes. Many teachers prefer to write their own, working with department heads and other responsible managers. For an inexperienced teacher or department, the Cambridge scheme of work provides useful support. It can reassure the teacher that they are covering the topics, content, concepts and skills required by the syllabus. The Cambridge schemes of work can be particularly helpful in demonstrating how to structure and sequence learning in a logical and coherent way, throughout a unit of work and a whole year's learning. Schemes of work are working documents and can be modified based on feedback as it occurs while delivering the curriculum. They need to reflect the local context of the school and be based on the school culture, timetable, vision and mission.

Planning is a process involving a number of stages (see Figure 3). Good teachers tend to design their teaching backwards (see Wiggins and McTighe 2005).

- The scope and sequence documents help identify the context – how a particular lesson or unit fits into the broader written curriculum expectations.
- Teachers identify the knowledge and skills learners need to master – the learning goals or priorities for a unit of work.
- Next, they decide the method learners will use to demonstrate learning – the success criteria or evidence that will be used to measure this.
- Then they plan the learning experience – the activities learners will use to master the content and skills being taught.

While planning is a process completed before instruction, actual teaching must be sensitive to learning that is actually happening, with constant checks on learners' understanding. Teachers need to constantly review and adjust their teaching, being prepared to adapt and change their plans based on the evidence of student learning. In this way the experienced curriculum can be aligned with the taught and the written curricula.



Evaluating the written curriculum, linking it to the taught and experienced curricula is an important part of teacher evaluation considered in Chapter 6.

Table 4: Cambridge learner and teacher attributes

Cambridge learners	Cambridge teachers
Confident in working with information and ideas – their own and those of others. Cambridge learners are confident, secure in their knowledge, unwilling to take things for granted and ready to take intellectual risks. They are keen to explore and evaluate ideas and arguments in a structured, critical and analytical way. They are able to communicate and defend views and opinions as well as respect those of others.	**Confident** in teaching their subject and engaging each student in learning. Cambridge teachers know their subject well and know how to teach it. They seek to understand their learners and their educational needs. They strive to communicate a love of learning and to encourage students to engage actively in their own learning.
Responsible for themselves, responsive to and respectful of others. Cambridge learners take ownership of their learning, set targets and insist on intellectual integrity. They are collaborative and supportive. They understand that their actions have impacts on others and on the environment. They appreciate the importance of culture, context and community.	**Responsible** for themselves, responsive to and respectful of others. Cambridge teachers are highly professional in their approach to teaching and they are collaborative and supportive. They understand their actions will help shape future generations and they are concerned about the holistic development of every individual they teach.
Reflective as learners, developing their ability to learn. Cambridge learners understand themselves as learners. They are concerned with the processes as well as the products of their learning and develop the awareness and strategies to be lifelong learners.	**Reflective** as learners themselves, developing their practice. Cambridge teachers are themselves learners, seeking to build on and develop their knowledge and skills through a virtuous circle of reflection on practice – involving research, evaluation and adaptation. They support students to become independent and reflective learners.
Innovative and equipped for new and future challenges. Cambridge learners welcome new challenges and meet them resourcefully, creatively and imaginatively. They are capable of applying their knowledge and understanding to solve new and unfamiliar problems. They can adapt flexibly to new situations requiring new ways of thinking.	**Innovative** and equipped for new and future challenges. Cambridge teachers are creative, experimenting with new ideas and pursuing an enquiring approach in their teaching. They are open to new challenges, being resourceful, imaginative and flexible. They are always ready to learn and apply new skills and techniques.
Engaged intellectually and socially, ready to make a difference. Cambridge learners are alive with curiosity, embody a spirit of enquiry and want to dig more deeply. They are keen to learn new skills and are receptive to new ideas. They work well independently but also with others. They are equipped to participate constructively in society and the economy – locally, nationally and globally.	**Engaged** intellectually, professionally and socially, ready to make a difference. Cambridge teachers are passionate about learning within and beyond the classroom, sharing their knowledge and skills with teachers in the wider educational community.

Figure 3: The planning process

4.4 Teaching skills and content

Cambridge programmes are designed to develop and consolidate student understanding of the subjects they are studying. This requires students to learn content knowledge, develop conceptual understanding and the skills needed to apply their understanding and solve problems. Skills are related to specific contexts and tasks and are developed through, and embedded in, subject content knowledge. The more demanding the qualification level, the more complex the material and the deeper the level of understanding students will need to demonstrate. Higher-order thinking skills are identified in Cambridge syllabuses and include analysis, synthesis and evaluation based, for example, on Bloom's taxonomy of educational objectives (Bloom et al 1956).

The development of understanding, supported by complex thinking skills, takes considerable time and practice. Skill development always occurs in a particular context and is not easily transferred from one situation to another even within a particular subject. When learning something new surface understanding needs to be developed first, including basic knowledge and simpler skills, before the student can proceed to more complex tasks. One implication for teaching and learning is that a spiral curriculum, where students frequently re-visit concepts and practise their skills at higher levels and in new situations, will help both consolidate and develop student learning. This is the approach Cambridge International supports.

Content and skills are described in syllabuses. These, together with specimen papers, teacher support materials and mark schemes, inform teachers about Cambridge curriculum and assessment standards. Understanding how Cambridge assesses student understanding, identifying what constitutes excellence in a particular qualification, is absolutely critical to effective teaching. It is vitally important that teachers new to Cambridge develop their understanding of Cambridge programmes and standards, not only through familiarising themselves with the materials Cambridge International provides but also attending subject-specific Cambridge professional development.

Cambridge teacher support material also provides important information to teachers and gives guidance about how the Cambridge learner attributes can be developed. Developing the learner attributes supports students to become independent and effective learners, thereby also improving their ability to perform well in Cambridge assessments.

Interdisciplinary curriculum mapping

It is essential to establish coherent and consistent planning processes to deliver Cambridge programmes. In addition some schools choose to go beyond this and map inter-disciplinary links between subjects. This involves horizontal planning across a particular year group to consider the relationship between what a student is learning in all their subjects at a particular point in time. In this way teachers can help students make connections between what they are learning in different subjects. This reinforces learning and helps students to see that human knowledge and understanding transcends individual subjects.

Coordinating the different schemes of work teachers are using enables cross referencing. In history a topic being taught might link up with a book being studied for English. The maths teacher might agree to teach a topic, for example statistics, at a time that reinforces what the science, business studies, economics or geography teacher is teaching. The possibilities are endless.

Interdisciplinary planning is often coordinated by a head of year who is responsible for examining the curriculum across all subjects and helping to establish links. Curriculum-mapping software is available that helps teachers view what others are planning and consolidates the whole curriculum. The results can then be examined for meaningful links.

Curriculum mapping does not need to be complicated. It is better to make a few meaningful links than to try and force links that are not natural. Another approach that can be adopted instead of, or together with, curriculum mapping is providing time in the calendar or timetable for students to work on interdisciplinary projects, facilitated by their teachers.

Cambridge Global Perspectives®, at both Cambridge IGCSE and Cambridge International A Level, is specifically designed to help develop interdisciplinary

understanding. By studying global issues, learners explore different and often opposing perspectives to develop critical thinking, research, communication and collaboration skills. The learner develops an informed curiosity and understanding of the world, becoming more able to transfer these skills to their other content-based subjects.

4.5 Developing a culture of reflective practice

Experience alone does not necessarily lead to learning; deliberate reflection on experience is very important (Loughran 2002, p. 9). Through reflection, learners can translate experiences into deeper learning that improves their overall effectiveness as learners. In Visible Learning (2009, p. 22), John Hattie argues that the "… biggest effects on student learning occur when teachers become learners of their own teaching, and when students become their own teachers". The self-regulatory attributes that Hattie argues are the most effective for learners, such as self-monitoring, self-evaluation, self-assessment and self-teaching, are also essential for teachers as learners.

In the reflective classroom the processes, as well as the products, of learning become an object of attention (see table 5 for some examples of teaching strategies that promote reflection). Teachers actively encourage learners to take time to step back and to:

- reflect on what they have learned
- compare intended and actual outcomes
- evaluate the strategies they have used
- establish and analyse connections and relationships with other areas of learning
- create meanings
- think about how to apply what they have learned to new situations.

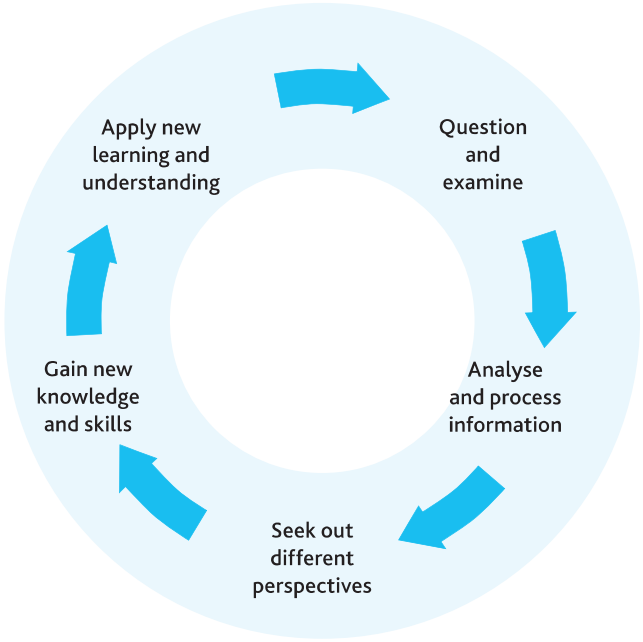


Table 5: Some strategies for promoting the attitudes and skills of reflective learning with students

Reflection on assessment criteria. What does excellence look like?	Share the intended outcomes and success criteria with learners so that they can assess their own progress towards the objectives.
Scaffold learners' responses	Push learners to think more deeply through targeted questions and prompting.
Revisit, review and consolidate learning	Review learning and progress regularly, including providing opportunities for learners to restructure their newly acquired skills, knowledge and conceptual understanding into further evidence of learning, for example, short presentation, essay, revision notes.
Silent thinking	Give learners time to think and reflect independently before asking them to comment or to write in their log or journal about what they have learned from the activity undertaken.
Teacher models reflection	Teachers can help learners by sharing their own reflections on what they have learned from an activity, lesson or unit of work and so model the reflective process, including listening skills; thoughtful, exploratory questioning; and deep thinking.
Learner self-evaluation and/or Learning logs and journals	Ask learners to write a self-evaluation as part of the reporting process, explaining: • what they have learned about how they learn • what they need to do in order to improve • what challenges they have encountered • how they might overcome these. If used on a regular basis, learning logs and journals build in an expectation that the learner will reflect regularly, not only on what they have learned, but also on what they have found challenging, and strategies to improve learning.
Create steps towards problem solving	Involve the whole class in reflecting on the steps they took to solve a problem set and then 'build a ladder' of steps for the next time they undertake a similar activity.
Interviews	These might be peer-to-peer or teacher-to-learner interviews. They not only encourage learners to share reflections but also help to develop learners' skills of active listening, questioning and communication as well as deep thinking. This type of activity is particularly successful if the teacher models the thought process and encourages the whole class to design examples of effective questions to ask before learners engage in interviews themselves.
Reflective conversations	In small groups, pairs, or as a whole class, discuss the processes in which learners have been engaged. Teachers might ask learners to share their thought processes, detail the problem-solving strategies they used and reflect on the strategies to assess their effectiveness before reporting back to the whole class. These conversations should encourage learners to listen actively and to learn from others' reflective practices.

Reflective teachers constantly question, analyse and self-evaluate their effectiveness as teachers and use this to identify new knowledge and skills they need (see Figure 4). They ask themselves questions including:

- What worked in this lesson/unit of work?
- How do I know? What sources can I use to provide me with information?
- What would I do the same, or differently, if I was planning and teaching this lesson again? Why?
- What new knowledge or skills do I need to make improvements?
- How will I gain these? Research? Collaborate with other teachers?

Figure 4: The reflective cycle

Providing teachers with opportunities to reflect on practice, discuss their learning, learn from each other, and develop knowledge and skills collaboratively helps to foster this supportive climate for reflective practice that is so important for professional learning. Possible ways to encourage this practice may include:

- promoting a 'buddy' system for teachers to reflect and learn in pairs
- establishing cross-subject teaching and learning study groups, with sharing reflection on practice included as a regular agenda item
  encouraging specialist subject teachers to meet weekly or at the end of each unit of work to reflect on experiences together and to plan for improvements
- peer planning, observations of classroom practice and evaluation
- small-scale classroom studies of different teaching strategies and skills for promoting reflective learning
- developing case studies about the attitudes and skills of teachers and students as reflective learners.

Reflective teaching requires teachers to evaluate their own strengths and areas for development. This can be the starting point for creating a personal professional development plan (see Chapter 7). This process is also an integral part of the teacher evaluation processes that we consider in detail in Chapter 6. If teachers are used to the practices of reflection, self-evaluation and planning for improving their skills, they are likely to be more comfortable with, and supportive of, these practices as part of teacher evaluation systems. Personal professional development plans will also be useful when coaches work with teachers to help them concentrate on, and track progress against, identified and agreed areas for improvement.

4.6 Differentiated learning

"*Differentiation doesn't ask teachers to begin by individualizing instruction. In other words, it doesn't call for teachers to create 20 tasks for 20 students who will come to class tomorrow. It asks teachers to look for patterns of need*" (Tomlinson 2010).
One question that is often raised by Cambridge teachers concerns how to stretch all students in a large class, meeting the needs of the less able as well as the talented at the same time. How can teaching and learning be differentiated so that every student is working at their level, given work that is challenging for them but achievable given

their current level of understanding? There is no easy answer to this question. Cultural influences and expectations have a powerful influence on what happens in classrooms. Every school and every teacher must engage with this question because it is an important expectation in lesson planning and teaching that all learners can achieve their full potential.

Differentiated learning is characterised by having challenging objectives, ambitious individual and class targets, accurate, regular and robust assessment to check, track and support learning followed by prompt and targeted intervention where needed. Teachers should use ongoing formative assessment to identify learners' needs and to refine their teaching to meet these needs as learners change and develop. The following practices can be helpful in supporting differentiated learning:

- Use a variety of teaching strategies and approaches to engage all learners.
- Design activities that are interesting, stimulate deep thinking and challenge learners.
- Check learner progress on an ongoing basis and adjust strategies in response.
- Plan different ways for learners to engage in and demonstrate their learning.
- Try to include 'real-world' applications for what learners are learning.
- Use different groupings as appropriate e.g. whole class, small groups, pairs, individual, and change these as needed (flexible grouping).

It is possible to support differentiated learning during whole-class instruction provided all students are engaged. The reality in many classrooms is that teachers constantly select the same students to contribute to classwork. These students tend to be the most enthusiastic and confident. It is critical to develop a culture of learning in which all students understand that everyone's voice is important and incorrect answers are nothing to be embarrassed about. Through listening to students, as well as assessing their written work, teachers will be able to identify patterns of need.

Teachers should vary whole-class instruction with smaller groupings of students. These can be particularly useful for making learners more confident in working collaboratively. They might include:

- **Grouping according to need on a short-term basis.** For example, a teacher may group in order to address learners' specific reading or writing skills and strategies.
- **Structured or random grouping.** This makes sure that learners work collaboratively with different learners in the class to experience a range of views and opinions beyond their friendship groups.
- **Paired working to facilitate discussion.** One example of this is 'think, pair, share', where learners are given time to think individually. They then join with a partner to discuss and develop ideas, and finally share with the whole class.
- **Short-term regrouping across a whole grade or year group.** This allows choice and increases motivation, or makes the best use of teachers' strengths. For example, in physics, classes might be regrouped for a few weeks to study a particular unit with a teacher who has a particular interest and greater expertise in this area.
- **Guided learning groups.** This is where teachers target their support to small groups within the classroom and 'guide' their learning. A teacher will usually plan guided sessions over a sequence of lessons to make sure that all learners benefit from the approach. The approach can also be used to respond to immediate needs by intervening at the point of learning. For example, it may become clear through formative assessment that a group of learners has a particular barrier to learning that needs to be addressed. Teachers will, of course, need to make sure that they provide other learners with appropriately challenging work and a range of resources and self-help strategies to support them. It is also important that all learners are given time to reflect and then report on their learning and progress in the whole-class session.

When supporting teachers to plan for differentiated learning it is important to consider whether the learning environment is flexible enough to allow a wide range of teaching and learning activities. Are there areas in the classroom or corridors to provide working spaces for independent work or pairs? Do learners and teachers have easy access to learning resources? Can the furniture in the classroom be rearranged easily to allow for small-group working? Schools and teachers must create stimulating learning environments that support and promote active, differentiated learning.

4.7 Teaching with new technologies

Existing and emerging technologies can provide many stimulating opportunities to enhance active learning. However, they need to be carefully planned like any learning activity. In the information technology enabled classroom, providing additional sources of knowledge and information means learners are less dependent on the teacher. They

can use the technology to control and pace their own learning, taking an active role. They are able to make choices and decisions independently and collaboratively.

A critical competence that learners will need to develop in order to use technology effectively and wisely is information literacy. This is the ability to evaluate information and online material for its usefulness in answering particular questions, and use it in their own work in appropriate ways. One common mistake in classrooms is that teachers do not spend enough time helping students develop this competence, assuming everyone knows how to use the internet. Information literacy is an interdisciplinary skill. It can be supported simultaneously by a number of teachers in different disciplines teaching the same skills and expecting the same standards. Having an information technology policy will help identify responsibilities in this area. It should identify clear expectations, supported by an information literacy curriculum taught by a number of different teachers.

New technologies can be used to support teaching and learning by:

- giving learners more control of their own learning, more opportunities to set their own goals and providing support for reviewing and assessing their own learning
- providing opportunities for learners to learn in alternative and challenging ways, using a wide range of sources of information and techniques to support critical thinking
- providing additional opportunities for learners to demonstrate evidence of learning, for example a blog entry, wiki creation and use of multimedia
- providing vivid examples of 'real world' situations for learning that increase student engagement
- providing primary sources of data
- helping learners to work collaboratively, even when at a distance from their peers
- helping teachers to view, assess and provide feedback on learners' individual and collaborative work, in school and at a distance
- helping learners to see patterns and behaviours more clearly
- helping teachers to facilitate whole-class discussion regarding first-hand observations, and encouraging learners to consider issues raised by their observations within a wide range of contexts
- helping teachers to collaborate to improve schemes of work, unit plans and lesson design
- helping teachers to support learners to review, refine, re-draft and modify work in progress
- helping learners to improve their attainment through refining and presenting their ideas more effectively and in different ways
- supporting teachers and learners to improve their presentation of work.

There are also many advantages of using new technologies for teachers' own learning and for the support they give to learners. It is easy for teachers to share resources, expertise and advice with other colleagues within a school, between schools or even internationally, using online professional communities and social media sites. Using technology to interact and share resources can make sure that planning for active learning and its assessment is thorough and effective without taking too much teacher time. Teachers can design web-based assignments for schemes of work and unit plans collaboratively, and build formative and summative assessments into these. They can record electronically a learner's assessment data, the feedback the teacher has given, and the action the learner has taken in response. This makes tracking learner progress and setting individual and group targets for learning easier. Teachers and learners can email classwork and homework. Video-conferencing between schools can support student and teacher learning.

There are pre-conditions for using new technologies in and beyond the classroom. The most fundamental is that a fast, reliable internet connection is essential. It also requires learners and teachers to have easy access to new technologies, and this can be costly for the school. However, the use of BYOD (bring your own device) and low-cost tablets, and the availability of the cloud network (which eliminates the need for software installation, servers and local file storage) can help to reduce the impact on the school's budget.

5: Improving student learning through assessment and feedback

For assessment systems to enhance learning – and not just measure it – students need to be at the centre of the assessment framework. To become lifelong learners, they need to be able to assess their own progress, make adjustments to their understandings and take control of their own learning. (OECD 2013, p 220).

Excellent schools give a great deal of attention to improving the quality of their assessment practices. Assessment is not only critical in measuring achievement standards. It also helps students understand their own strengths and limitations, and know what they need to do to improve. Because of its significance to learners, teachers and parents, it is important to have a clear assessment policy.

This chapter looks at assessment that is used to support learning. This includes feedback teachers give to students in day-to-day interactions as well as marks, comments and reports they produce. A section of this chapter looks at how teachers can provide valuable oral and written feedback to students. Feedback that teachers get from students' comments in class and work is critical in helping them understand how the learner is thinking. Assessment information needs to be recorded and tracked in a way that is meaningful.

This chapter suggests that criterion-referenced reporting against clear learning and assessment objectives is a good approach that helps make learning progression understandable. Teachers need to be sure they have a common understanding of assessment standards so we briefly consider standardising teacher assessments. Using assessment data is important for the school development planning process as well as reporting to parents and other stakeholders.

5.1 Developing classroom assessment practice

Assessment is central to the teaching and learning process in the classroom, not only to measuring student achievement and progress. The following different uses of assessment are often distinguished:

- **Formative –** assessment activities which are used primarily to help student learning by providing feedback during the learning process. This enables teachers and/or learners to modify teaching and learning activities to improve learning.
- **Diagnostic –** activities which identify learning difficulties or issues and indicate where help or change is needed.
- **Summative –** an assessment of learning that has taken place at the end of a course or unit of study. This is designed primarily to measure achievement but could also involve ranking, certifying competence or accountability.

Harlen (2012, p. 98) believes it is better to describe assessment purposes and practices as a dimension. At one end are informal formative procedures which directly influence the next steps in learning. These are characterised by immediate feedback as a normal part of classwork, and usually not planned in advance. This broadly corresponds to **assessment for learning** in the sense Swaffield (2009, p. 8) describes: "*Assessment for learning's prime concern is with the here and now of learning. It occurs in the flow of activity and transactions occurring in the classroom. The focus is on the learning of these students now, although there is also consideration given to their learning in the*

future." Formal formative processes are more structured. An example might be a brief test planned for the whole class, with feedback into the teaching of that class. Informal summative assessment might be a more structured process that is primarily used to monitor progress. Formal summative assessment would be a higher-stakes text or exam. The distinction between formative and summative is largely based on considering what the assessment is used for. In practice, summative assessments that are primarily designed to assess learning at the end of a learning episode can, and in many cases should, be used formatively as well.

A further important consideration is raised by Carless (2011). He points out that more ambitious interpretations of formative assessment aim to help students accurately evaluate their own work, develop motivation, metacognitive awareness, self-regulation and independence. He describes this as extended formative assessment. Restricted formative assessment, in contrast, has the more limited purpose of feeding back into the teaching and learning process relating directly to the course of study and assessment expectations.

Carless argues that how far the more ambitious extended aim can be implemented will depend very much on the school context and culture. Schools need to be sensitive to this:

"Although extended formative assessment is more theoretically desirable than restricted formative assessment, it risks being viewed by some teachers as too difficult to implement within their own educational setting because facilitating factors are not in place ... when pedagogy is dominated by testing then formative assessment needs to take credence of that reality" (Carless 2011, p. 107).

This is a very good example of how schools need to consider their own context in terms of prioritising developments. Consider the example of a school working in a culture where the existing pedagogy is predominantly direct, teacher-led instruction, and pressure on teachers and students is for immediate good test results. A more effective and realistic strategy will be to focus initially on restricted formative assessment and do this really well. This presents a win–win situation as the formative assessments will be designed to support learning that will result in good summative assessment performance. As assessments are designed to test a broad range of higher-order thinking skills, students will still need to understand the specific assessment criteria, their application and their own performance in relation to this. They will at least start to develop a more sophisticated understanding of what constitutes excellence in a particular discipline and what they need to do to improve. Developing good restricted formative assessment practice over time will then make it possible for this to be more ambitious and extended in the future. Trying to move too quickly may alienate teachers and parents, and slow progress.

Assessment for learning (or informal formative assessment) involves activities that support the learning that occurs naturally in class. It is a continuous process and should be viewed as an aspect of effective teaching practice. More structured formative assessment activities and summative assessments that are also used formatively need to be regular and planned in schemes of work and lesson plans. Teachers always need to be clear about how they will review and use the resulting data before the assessment takes place.

5.2 Assessment policy

Because of its critical importance, a whole-school approach to assessment should be adopted that involves teachers, learners and, where meaningful, parents. This approach focuses on developing a clear understanding of the purposes of assessment and the values, practices and procedures the school uses.

Developing and implementing a whole-school policy for assessment will help to ensure that systems for assessing learning have an impact on the quality of teaching and learning across the school, and are understood by teachers, learners and parents. One important first step is to agree a common understanding of different types of assessment and how they can be used effectively to promote learning in each classroom. It may also be necessary and desirable to engage in further research and in whole-school training for the effective use of assessment to support learning.

An assessment policy should provide the structure for the school's approach to assessment. It will identify the framework through which learners' progress can be monitored, summarised, recorded and reported. It also needs to overlap with the school's policies for teaching and learning, and the policy and procedures for marking and reporting.

A typical policy for assessment will include:

- a brief explanation of the purpose of assessment and uses of assessment
- a clear statement about what is valued in assessment – this should include reference to broader educational objectives, including the development of the Cambridge learner attributes
- what learners should expect from assessment
- planning for assessment
- assessment processes
- responsibilities (who needs to do what)
- guidance on marking and providing feedback to students
- guidance on reporting, providing feedback to students and parents
- the school's marking policy
- guidance on portfolios of work
- details of which assessment data will be shared with parents, in what format and how frequently.

The policy should also be accessible to key stakeholders such as parents, who will want to understand how their children will be assessed or evaluated (see Chapter 3 on school policies).

5.3 Supporting student learning through formative assessment

Well-designed and applied formative assessment has a significant positive impact on learners' motivation and achievement. It also supports their ability to work independently. In a good school, formative assessment will be embedded in day-to-day classroom practice. Where this is the case, learners have a clear understanding of what they are learning as well as the standards towards which they are working. There are frequent discussions about how students' work meets assessment criteria, both between the teacher and learners and between the learners themselves. Specific and clear feedback helps learners to understand and evaluate what they have done to meet the criteria so far and what they need to do next. Students are encouraged to become reflective, curious learners, confident in assessing their own and others' progress, knowing that they will be supported in their next steps to achieve the standards set.

Formative assessment activities will range from very informal but rich interactions, for example a student going over their work with a teacher, receiving verbal feedback, to more structured assessments, for example unit tests. Classroom assessment should be:

- **Relevant –** relate directly to the learning objectives and the course and syllabus standards.
- **Appropriate –** give the information that is required. Teachers will almost certainly need to use a variety of methods to assess different assessment criteria and learning objectives.
- **Fair –** assume that all learners can make progress, regardless of their starting point, and provide them with the opportunity to demonstrate what they know, understand and can do.
- **Reliable –** provide an objective and accurate check of learners' skills, knowledge and understanding at the point of assessment.
- **Informative –** establish where learners are in their learning, i.e. what they already know, understand and can do. This information should then be used to diagnose what each learner needs to improve and how the teacher can support this. Where this information is gained during a lesson, it may lead to immediate changes to the lesson plan. Or, where it is gained from a series of lessons or unit of work, it may lead to revisions in course plans or schemes of work.
- **Integrated into the lesson and teaching and learning cycle –** the reflection on learning and progress by learners and teachers will provide evidence that guides the next steps to be taken and provide motivation for future progress in learning.
- **Manageable –** assessments should be integral to classroom activities. The recording of these assessments needs to be time efficient and the information provided needs to be valuable for improving learning.

Table 6 provides examples of some teaching and learning strategies that support assessment for learning. In addition to ongoing feedback on class activities, assessment tasks need to be selected that provide an accurate understanding of learners' current strengths, limitations and needs. Teachers will need to collect assessment data from a range of appropriate activities and tasks – this will depend on the subject being studied and the level of the programme. These are likely to include class tests, student written work completed at home and/or in the classroom, student responses to structured

questions, oral responses, project work, portfolios, presentations, creative work and exhibitions.

5.4 Using assessment data to improve learning

Using multiple sources of evidence/assessment data helps to 'triangulate' data. This means that evidence from different sources is compared to generate a richer and more accurate picture of students' understanding (see Figure 5). This can be particularly useful for developing hypotheses and educated guesses for what approaches may be most effective for the next stage of learning.

The two examples 5A and 5B illustrate how triangulating data can help teachers to identify students' needs and prioritise what to do next. Using summative test data formatively, to identify where learners performed well and where more depth of understanding is needed to improve attainment, helps teachers to recognise how they might need to adjust lesson plans, unit plans and schemes of work. Using a variety of data from classroom assessments as well, teachers can be more confident in deciding what needs to change in order to improve learning. Whenever changes to curriculum plans, or to teaching strategies teachers use to deliver those plans are made, it is important to review and evaluate the success of those changes.

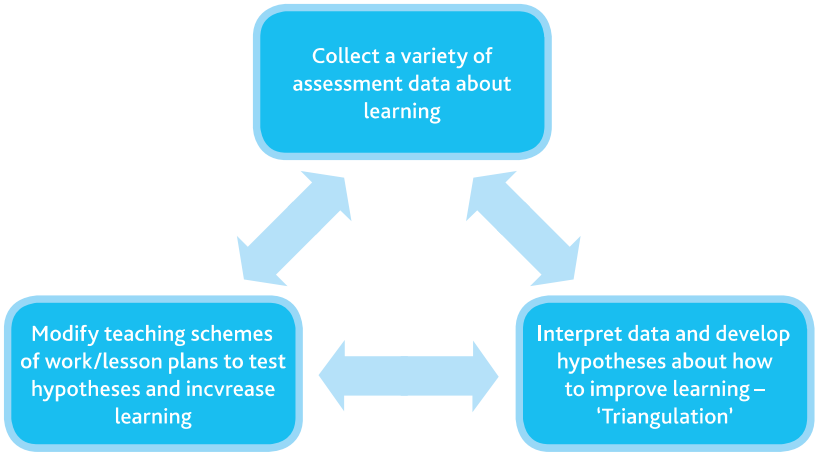

Table 6: Examples of classroom practices and assessment in support of learning

Characteristics of classroom assessments	Teaching and learning strategies
Teachers recognise that assessment for learning is integral to and an essential aspect of teaching for learning. They understand that it provides learners with the skills and strategies to take the next steps in their learning and plan their schemes of work and lessons accordingly.	• Integrate assessment activities into schemes of work. • Plan each scheme of work, series of lessons and individual lessons backwards: – Identify what learners need to be able to do with what they will learn – the learning goals or priorities for this unit of work. – Decide how you will know that learners have achieved the learning goals set – the evidence that you need and the methods for gaining this. – Plan the learning experience – the scheme of work, unit plan, individual lesson, or the next episode in the lesson. – Plan the points for and methods of assessment.
Teachers share learning objectives (learning intentions) with learners.	• Share clear and age-appropriate learning objectives at the beginning of the lesson/series of lessons and, where appropriate, during the lesson. • Use these objectives as the basis for questioning and feedback during the lesson and at the end. • Evaluate learner progress against the learning objectives for assessment of learning and for informing the next steps for learning.
Teachers establish what learners already know through classroom activities that show evidence of learning.	• Refer to individual learner assessment data, including records of feedback on previous work and actions taken by learners in response. • Use a 'recall' question-and-answer session to check prior learning with strategies such as: – Each learner is provided with a mini white or blackboard so that they can all respond to a question at the same time when prompted. Teachers can see at a glance who has the knowledge and who needs further support. – "Here's the answer, what's the question?" e.g. "The answer is 42. What could the question be?" This strategy can quickly encourage learners to think more deeply and to make connections. – Use questions that require higher-level thinking and allow time for this thinking before accepting any answers, e.g. instead of "Draw an isosceles triangle", ask learners to "Draw four different triangles. Now explain what is similar and what is different between each of them". – Traffic lights or thumbs up to show recall and follow up with questions to check understanding.

continued

Characteristics of classroom assessments	Teaching and learning strategies
Teachers help learners to know and understand the standards they are aiming for by sharing assessment and success criteria routinely.	• Share examples of work that have met assessment criteria with learners and help them to understand why these are good examples. • Give learners clear success criteria related to learning objectives. • Model what a successful piece of work will be like, for example, complete an activity as a whole group. • Make sure that learners understand expectations of the presentation of work. • Display learners' work that is good 'in progress' as well as completed.
Teachers involve learners in self-assessment and peer assessment.	• Encourage learners to talk about what they have learned and what they found challenging in relation to the learning objective as well as the activities undertaken. • Give learners opportunities to work collaboratively and discuss their work, focusing on how they can improve. • Ask learners questions that encourage them to explain their thinking, e.g. "Can you tell the rest of us how you got to that answer?" • Make sure it becomes commonplace for learners to reflect on what they have learned. • Identify with learners the next steps in learning.
Teachers provide prompt oral and written feedback on learning that leads learners to recognise what they need to do next and how to do it.	• Value information on learner progress provided by oral feedback as well as written. • Make sure feedback is constructive, specific to each learner (does not make comparison with other learners) and identifies what the learner has done well in addition to what he/she needs to do to improve and how to do it. • Provide time and support for learners to act on the feedback given. • Identify the next steps in learning for groups and individuals.
Teachers promote learner confidence and make it clear that all learners can improve and will be supported to do so.	• Identify small steps for learners so that they can see their own progress and gain confidence as a result. • Create a classroom environment for learning that is supportive, where a wrong answer is turned into an opportunity for learning, where thinking and exploration is highly valued and where learners are encouraged to take risks.
Teachers reflect on, review and evaluate assessment data with learners.	• Choose learning activities that provide quality information, with an emphasis on process rather than just the outcome. • Encourage learners to reflect on the process of learning with other learners and with the teacher. • When planning lessons/units of work, build in time for learners to reflect on their learning, and to recognise where they are less secure. • Adjust schemes of work/lesson plans/resources in response to information provided by assessments. • Encourage learners to be owners of their learning.

Figure 5: Using assessment data to improve teaching

The two examples 5A and 5B also illustrate the benefits of teachers working collaboratively in collecting and interpreting assessment data. Benefits include:

- refining and developing effective teaching strategies and practices over time
- receiving feedback from others about tentative conclusions reached and how best to proceed
- establishing common assessment practices
- establishing common expectations of learner performance
- developing understanding of the needs of individual learners and agreeing how to support identified needs
- recognising when it is not the teaching strategies that need to be adjusted but rather the curriculum plans that need improving, for example more time needs to be spent on reinforcing a skill, and when it is both.

Example 5A

A teacher shares the learning objective with her class: "We will be able to recognise layers of multiple meaning in a text". She then hands out the short text that will be the focus for the lesson, which has some highlighted and annotated examples to help learners understand what they need to do. The teacher also discusses one of the examples and asks if everyone understands what they have to do. The teacher divides the class into small groups of mixed prior attainment, allocates each group a different paragraph from the text and tells them to highlight and annotate the text to demonstrate their understanding of the learning objective. Each group feeds back their points to the rest of the class and the outcomes are such that the teacher believes that each group has understood the learning objective and is ready to apply it to a different text.

However, an assessment of written work completed individually shows that most learners do not yet have sufficiently deep understanding and skill for them to take the next steps in their learning. When she shares the assessment information with other teachers who are teaching the same topic with the same grade, it is clear that most learners in other classes have achieved the learning objective and are ready to take the next steps in the scheme of work. The teacher forms a hypothesis as a result. She identifies that she needs to amend her teaching strategy for this learning objective to include more effective modelling and more prepared higher-level teacher questioning. After including these strategies in the next two lessons, she again assesses learners' understanding and skill through asking learners to analyse two short texts from different media. This time, all learners in the class demonstrate that they are able to recognise layers of multiple meaning and have applied their learning to two, previously unseen texts.

Example 5B

The teacher shares the learning objective with the class: "To understand the effects of water flow on the landscape" and uses enquiry-based, practical activities and some short film sequences to embed students' understanding and learning. In a question-and-answer session, learners demonstrate that they all understand and that most can apply what they have learned. The teacher then sets a second task to assess learners' progress towards achieving the learning objective. He asks learners to work in small groups to make a presentation for the whole class that demonstrates the effects of water flow on the landscape, and gives each group clear criteria for success against which they will assess themselves and be assessed by their peers. The self and peer assessments provide evidence of learners' understanding and ability to apply that understanding.

In the next lesson, the teacher sets a summative test taken from past external examination papers, which includes the topic studied. The written responses to the questions asked in this test reveal gaps in learners' knowledge and understanding that were not evident in the classroom-based assessments. When the teacher shares the assessment data and his experience with other subject teachers who teach the same topic and the same grade, their data and experience are similar. On this triangulated evidence, the team of teachers recognises that in-class assessment data provides evidence of progress against the learning objective set. This would suggest that it is not the teachers' delivery that is resulting in gaps in knowledge and understanding. They therefore form the hypothesis that the weak performance of learners in response to the external assessment task set suggests that the unit plan is not sufficiently detailed to support teachers in their delivery of each aspect of this unit of work and that they need to revise it.

5.5 Providing feedback on student work

Giving specific and clear feedback to learners on their work helps them understand their performance and what they need to do next. Feedback also helps students understand the standards against which their work is being judged, enabling them to become better in future at judging their own performance. A better term for the guidance given to students to help them improve their work is 'feed forward'. This is because it is about providing effective feedback to help the learner improve their next pieces of written work – to prompt them to think about 'What's next?' As Hattie and Timperley (2007, p. 86) argue, effective feedback should answer three questions for the learner: 'Where am I going?', 'How am I going?', 'Where to next?'

Feedback works in three directions:

1. **Teacher to learners** – the teacher gives guidance to learners about their current achievement and the next steps they need to take.
2. **Learners to teacher –** the teacher receives feedback from learners about their learning.
3. **Learner to learner –** peer assessment.

All of these are important. Peer-to-peer assessment against clear criteria can be highly effective in helping learners to understand what they need to do to improve their work as they analyse other learners' work. It is also important to appreciate that feedback is not a one-way process. John Hattie (2009) believes that the most powerful feedback is given from the learner to the teacher as it allows teachers to see learning through the eyes of their students. In the previous sections we considered how classroom assessment processes can support this direction of feedback.

Teacher feedback on student work needs to be:

- **Focused –** it should include two or three areas for improvement, referenced to the learning objectives.
- **Accessible –** it should be given in language that is appropriate for the age and competence of the learner. It should be unambiguous and clear.
- **Constructive –** it should include specific guidance for improvement and point towards the relevant criteria for success.

- **Supportive –** it should be given in a positive tone and make clear the support that is available for the learner.
- Related to learning objectives and success criteria that have been shared with learners.
- **Challenging –** it should encourage the learner to think more deeply about what and how they are writing.

Giving oral feedback

Oral feedback is the most regular and interactive form of feedback, and can be a highly effective way of helping learners know what they need to do to move forward with their work. It can be targeted to individuals or groups but has the advantage that others can listen to what is said and learn from it indirectly. Oral feedback is usually spontaneous, but teachers should recognise that it needs to be detailed, personalised and provide the information learners need for it to be effective. So, developing approaches to giving oral feedback, and planning explicitly for its use within a supportive learning environment, are important to achieve its potential as a powerful tool for improving learning.[1]

Oral feedback has some advantages over written feedback. It is:

- **Immediate and specific to the context –** misconceptions can be dealt with as they occur and in the context of the specific learning.
- **Dynamic and adaptable –** encourages discussion of ideas and can be adapted to respond to particular learning needs.
- **Ongoing –** a continuous and regular part of a lesson. It can also be used for transitions between learning episodes and to structure learning with reference to the objectives woven through the lesson.
- **Versatile –** questioning, modelling and explaining can all be used as strategies to provide feedback.
- **Stimulating and motivating** – learners enjoy immediate feedback and quick improvements can be made as learning is fresh.
- **Personalised –** facial expressions and positive body language enhance constructive advice.

1. In their study of oral feedback that examined 3000 reports, covering nearly 13 000 learners, Kluger and DeNisi (1996) found that oral feedback raised achievement in 60 per cent of cases, but in 40 per cent was ineffective. The challenge for teachers is to make their spontaneous oral feedback more specific and to encourage deeper thinking and learning.

The effectiveness of oral feedback can be improved by:

- making feedback both positive and developmental
- relating feedback to the learning objectives – and making sure the objectives and outcomes have been explored thoroughly when introduced
- establishing a supportive environment for learning so that learners want to share their thinking process with others and recognise that self, peer and teacher feedback helps them to identify ways they can improve
- encouraging learners to take risks and welcome challenge so that they do not always choose the easiest option and recognise that making mistakes provides learning opportunities
- planning learner groupings in advance to support the use of oral feedback, e.g. using guided ability groups for giving feedback on previously completed written work; using paired work for peer assessment followed by teacher feedback
- building in 'wait time' before and after questions or responses to encourage learners to think deeply and to expand on their response – and let learners know that you will do this routinely. Often teachers, or other students, talk on behalf of students who are being questioned if they do not respond immediately
- providing red, amber and green flashcards for learners to indicate the extent to which they understand the current learning objective
- encouraging other learners to reflect and question or comment before the teacher responds, then to use the appropriate specific learning outcomes/success criteria to assess their own and other learners' responses
- using prompts such as, "Can you say a bit more about that?" in order to make the process developmental and to modify feedback as appropriate
- targeting questions at specific learners and not just responding to students who put their hands up to answer, thereby ensuring everyone participates
- planning questions and tasks carefully to encourage higher-level thinking and responses so that feedback also contributes to progress in learning
- building in time for giving extended or structured feedback to individuals or small groups with similar needs, as appropriate

- encouraging learners to reflect on the feedback then to act upon it in the lesson, e.g. through revising their work, and giving them time to do this
- checking back on actions taken in response to feedback to make sure that learners have understood and are making use of what has been said
- using learners' work to exemplify feedback (examples are often easier to understand), and encouraging learners to do the same
- thinking about offering coaching sessions to individuals or small groups to follow up feedback.

Giving written feedback

Traditionally, teachers spend hours marking learners' written work, correcting spelling and grammatical errors, and providing marks and comments. What matters is the quality and nature of this marking. The value of much marking in many classrooms is very limited. It can even be counter-productive if learners find it difficult to make sense of the grades and comments, and become discouraged and unsure of themselves. Learners also tend to focus more on the mark or grade and ignore comments made by the teacher.

When marking learners' written work, providing selective high-quality, detailed and informative marking will improve learning much more than superficial marking for all learners on every piece of work. As Black and Wiliam concluded (1998, p. 9):

"Feedback to any pupil should be about the particular qualities of his or her work, with advice on what he or she can do to improve, and should avoid comparisons with other pupils", and "Feedback has shown to improve learning where it gives each pupil specific guidance on strengths and weaknesses, preferably without any overall marks."

Principles and practices that define expectations for marking and written feedback need to be developed as part of the school's assessment policy. These should stress that:

- The learning objectives and learning outcomes should be used as the points of reference for written feedback and so should be shared and explored before learners attempt the task. Include assessment criteria in schemes of work and unit plans. Teachers must check that learners understand these.
- Feedback is given in relation to learners' performance against learning objectives and assessment criteria, and not the work of others.
- Written feedback should provide clear evaluation of learners' strengths and identify areas for improvement. It should prompt learners into deeper thinking and identify the next steps they should take.
- Teachers need to identify the next steps for learners. Focus on two or three points for improvement that will help to bridge the gap between present performance and future targets. This will require a good understanding of subject progression, described in scheme of work documents.
- Teachers will need to diagnose learners' misunderstandings and difficulties. These are likely to require further action and support, which they need to facilitate or seek extra help for.
- Agree the frequency of detailed written feedback in the whole-school policy and share the timings with all learners and parents. Informative feedback on selective student work is better than limited feedback on all student work. Subject areas need to identify the key pieces of work they will focus on.
- Agree how feedback on progress is shared with parents in the whole-school assessment policy.

How marks or grades are used also needs to be agreed. Black and Wiliam (1998, p. 9) believe that when pupils are given a mark, their ego responds and they react emotionally to the score. A lower than expected mark is seen as failure, whereas a better than expected grade leads to students feeling elated and keen to find out if they have done better than their friends. Either way, they ignore the teacher's comments. One effective practice that helps prevent this is focusing on assessment criteria, rather than providing overall marks. Assessment rubrics (tables showing how the assessment criteria relate to levels of student performance) can be extremely effective at showing what excellence looks like and how the student's work measures up to the different criteria.

A key consideration is developing learners' awareness about what they can do to improve their own work. This can be supported by providing opportunities for learners to think things through for themselves, by giving prompts or outlining the process they need to follow. Providing the time and support for learners to discuss, correct and develop their work following initial feedback is a valuable process. However, a balance has to be struck – teachers need to be careful that they are not directing students too much so that the final work is in fact their own.

5.6 Recording and tracking progress and achievement

How and when assessment information is recorded should be a whole-school decision described in the assessment policy. Schools also need to decide how often data should be collected for tracking purposes (sometimes referred to as monitoring). It is important to note that recording and tracking is not the assessment itself but simply a means to help record and recall learners' progress and attainment. Assessment is the *"accurate and usable knowing and understanding of children, not the quantity or form of recorded information"* (Dubiel 2014, p. 9).

Deciding what to track and record is an important decision that needs to be clarified in the school's assessment policy. It will not be easy to measure everything that the school values, identified in the mission or vision statement. The danger with not monitoring or reporting on these broader learning objectives is that they will be valued less. Outcomes that are easily quantified, such as grades, may be prioritised. The challenge for senior leaders, teachers and learners themselves is to decide how they can monitor and track each aspect of learner progress towards objective learning goals, or targets – not just the knowledge and understanding that can be easily assessed through summative testing. The broader the range of assessment evidence, the more valid the judgements will be and the more accurate and valuable the progress tracking.

Another danger is placing too much emphasis on records and reports that compare students with other students (mentioned in the previous section). Students tend to focus on their position and grade rather than on what they need to do to improve. No matter where in a class rank order a student is placed, they can always improve. The highest-placed student may think they are doing very well, when it might actually be the case that they are very able and could do much better. Students lower down the class ranking order tend to be demotivated. The most important function of tracking is to serve the learner's needs by making sure that appropriate support is given for continued progress.

Tracking is useful for:

- providing information on what has been learned, what needs more attention and what needs to be learned
- supporting teachers to plan learning experiences and activities that will meet each learner's needs
- identifying when a learner is not making expected progress so that this can be addressed
- providing teachers and school leaders with information about the progress of individuals, classes, groups and whole grades
- providing teachers, learners, parents and school leaders with information about whether learners are on track to meet age-related expectations
- providing teachers, learners, parents and school leaders with information about whether learners are on track to meet objective learning goals mapped against skills and knowledge, and based on high expectations.

Learners should be encouraged to use assessment data to monitor their own performance and identify their next steps. When learners are supported to use their own achievement data and track their progress, it helps them to take ownership of their own learning and become more independent. They improve their ability to reflect on what they have learned and recognise what they need to do to achieve their next steps. They also feel more in control of their learning outcomes. Teachers can help learners to do this by sharing clear learning objectives, making assessment data easy to understand and use, explaining expectations and assessment criteria clearly and providing specific and constructive feedback promptly.

Recording progress and achievement: Criteria referencing

To track the progress of a class or an individual learner all teachers will have mark books or electronic records of assessments of work set. In many cases these records are numbers, grades or percentages that are of limited use to teachers, or learners, in identifying what students need to do to improve. Grades alone do not help identify the complexity of a task. If a student receives a grade A for a short factual test and a grade C for a long and demanding piece of work, for example an essay, how should the teacher aggregate these? Some recording systems simply treat them as the same and give the student a misleading average – in this case a B – as the final grade reported at the end of a period of learning. For this reason alone recording grades should be supplemented, or better replaced, by more detailed records relating to student performance against specific assessment criteria and learning objectives.

Cambridge teachers will become familiar with the assessment objectives and criteria used. These are described in syllabuses and mark schemes. Attending subject-specific training workshops is also important, particularly for teachers new to Cambridge.

These will help them understand how the criteria are used to derive final marks and ultimately grades. Classroom assessment results should record students' performance and progress against the criteria, which the teacher can then track. Using assessment rubrics can be particularly helpful. These describe a set of criteria and standards linked to assessment objectives and describe different levels of performance in relation to these. The teacher can show the student their performance on the assessment rubric.

The teacher can record marks for performances against different assessment objectives and criteria, and then convert them into a grade at the end of a term or when reports are due. Students and parents will then receive marks relating to the assessment objectives and an explanation about how these are converted into a final grade. They will then understand how the final grade comes from a combination of assessment objectives and related criteria. In this way students can appreciate their relative strengths and weaknesses and understand what they need to do to improve.

Record keeping needs to be manageable, and performance does not need to be recorded after each activity in the classroom. Decisions about how much, as well as what, to record will be described in the assessment policy. It's vital to balance the right amount of information (avoiding excessive bureaucracy/time) with the need to monitor and evaluate the progress of each learner. Many schools will want to record the positive, constructive comments and advice teachers have given to each learner for improvement against the learning objectives and success criteria they have set. One way of doing this is for the teacher to keep a copy (paper or digital) of assessment rubrics returned to students which have been annotated by the teacher with comments.

There are a number of ways to record assessments. Some are more appropriate to specific subjects, and schools need to decide which to use:

- marks derived from assessment criteria relating to assessment objectives recorded in a teacher's mark book or electronically
- assessment rubrics with annotated comments
- a portfolio of a learner's work that has been assessed by the teacher
- the teacher's summary of marks, comments, next steps and advice for improvement
- a summary of achievement and progress, including marks and comments, against learning and assessment objectives. This might include comments by the learner. This would be completed periodically – monthly or termly, even weekly if this can be achieved without taking up too much time.

Processes chosen need to be easily understood by teachers, parents and learners and applied consistently across the school. Records need to clearly relate to what was assessed. They must also help judge achievement against clear criteria and help make comparisons between individual learners and between different groups of learners.

5.7 Standardising teacher assessments within subjects

Standardisation is a process designed to make sure that teachers' assessment of learners' work is fair, consistent and accurate. When used effectively, it leads to a shared understanding between all teachers in a subject area – they know what standards are required in that subject at a particular stage of learners' development, or their age. The most common method for standardising teacher assessment involves using samples of learner work. These help teachers agree on the levels of learning reached against the assessment criteria.

Creating robust systems for standardising teachers' assessment helps to make sure that:

- assessment of learning and attainment is accurate
- each teacher understands the criteria for assessment and applies those criteria fairly and consistently
- the approach to assessment within the subject is consistent as a result
- teachers, learners and parents have confidence in teacher assessments
- assessments are reliable and allow teachers, learners and parents to track learner progress with confidence
- target-setting processes can build on the reliability of learning assessments.

How can teacher assessments within subjects be standardised?

1. Develop assessments and standards criteria collaboratively. When writing schemes of work or unit plans, it is important to link assessment objectives with learning objectives and establish clear assessment criteria. Involving subject teachers, led by experienced colleagues, in developing and agreeing the standards criteria is a good first step. This will ensure that teachers understand and know the criteria, and agree the expectations of learner performance. Cambridge's published guidance helps with this.

2. **Planned standardisation sessions.** Giving teachers time to work together for frequent and regular sessions focused on standardising assessments helps to embed standardisation throughout the school. One effective use of these sessions is for subject leaders to photocopy two or three unmarked pieces of work and distribute a set to each subject teacher together with the assessment criteria. Each teacher assesses each piece independently, identifying the characteristics of the criteria that the work illustrates. The whole team then reviews and evaluates the assessments and comments, before agreeing the refined assessment.
3. **Setting learners a common assignment.** One strategy that can be used for standardisation is for all subject teachers to set learners in the same grade the same assignment at the same point, for example, at the end of a unit. Teachers mark the assignments of their own teaching group (or of a different teaching group) against the agreed criteria. The subject leader or experienced teacher then checks the marking for consistency.
4. **Use the experience and expertise available. I**n many schools, there are some teachers who have years of experience of assessing learners' work in their subject. There may also be some who have had training or experience in examining or moderating outside the school, for Cambridge or for other examining bodies. Wherever there are teachers with such experience, they can take the lead and help other teachers in their subject by, for example, assessing and commenting on pieces of work collected from different learners across a grade or year group. These assessments can be reviewed, discussed, and, where appropriate, refined with the subject team. This will help teachers to understand and agree the standards expected and the feedback that should be provided to learners. They can then be used as exemplar pieces for future assessments.
5. **Build up exemplary assessment material. I**t can be very helpful to teachers and to learners to build up exemplars in the form of subject standardisation portfolios. These can include samples of assessed work, annotated with teacher comments that demonstrate which aspects of the work characterise the assessment criteria. Teachers can use examples from the portfolio with learners in lessons to help them understand how to meet standards set. They can also 'post' copies on the learning wall when appropriate.
6. **Use subject development time to share examples of work.** One effective use of subject development time is to share examples of learner work and to assess these pieces collaboratively. This will help to reinforce a common approach and consistent application. **I**t will also give each teacher confidence in their ability to assess in line with other subject teachers.
7. **Develop a best practice guide.** To support and encourage a consistent approach to assessment across the school, as well as within subjects, it is worth considering developing a guide to good practice in assessment for all teachers. The guide could give detailed information on assessment processes in the school and in each subject area. **I**t would also encourage teachers to share more detailed information than in the assessment policy.

5.8 Using assessment data for school evaluation and target setting

Assessment data should be used as one input into the school evaluation and development planning process. **I**t can help schools understand their students, with a view to improving teaching and learning for all. Assessment data can compare performance over time and identify areas needing improvement. Target setting should be used to support whole-school, subject, and teacher plans to improve learners' performance. This should include:

- using quantitative and qualitative assessment data to focus plans on raising learner performance
- making sure learners' attainment is built upon, with a high level of value added at each stage
- identifying underperformance (of learners or subjects or grades) and focusing teaching on addressing this
- supporting improved learning outcomes for underachieving groups of learners and/or individual learners, and for extending high-performing students.

Curricular target setting helps to achieve this through focusing on areas of the curriculum that need development and setting targets for improved student learning. A curricular target expresses in words a specific aspect of the curriculum as a focus for improvement. **I**t is supported by data. Targets may relate to groups of learners, a class or a whole grade, and be established over medium or longer-term horizons. The target

might focus on quantifiable outcomes, for example: '100 per cent of Grade 11 learners will achieve Cambridge IGCSE English First Language A*–G; 70 per cent will achieve A*–C'. Or, it might refer to more qualitative outcomes, for example: '90 per cent of Grade 7 learners are able to select and justify the appropriate software for presenting information'.

Targets need to be translated into meaningful actions. This will make sure it is clear how they will be achieved and who is responsible, as described in Chapter 2. They will also need to result in changes to the planned written curriculum, schemes of work, and be appropriately resourced.

5.9 Using assessment data to report to parents and other stakeholders

Reports for parents

A school's stakeholders are, in the broadest sense, anyone who has an interest in the school and what it does. Beyond learners, teachers and parents, the governing board and/or school owners will want to know how well the school is doing. The reporting policy, which should be part of (or cross referenced with) the assessment policy, will clarify how reporting will operate. It is important to question the purpose and audience for reports when deciding how they should be designed.

Parents' main concern will be to understand how much progress their child is making. They want to see their child's achievements over the period, and compare their performance to others in the year group and against national and international standards and benchmarks. They will also want guidance on what they, as a parent, can do to help their child improve. Cambridge schools are expected to ensure that parents, as well as learners, understand the curriculum. It is equally important to make sure that parents are involved in and understand the progress that their children are making in school, both academically and more broadly.

As parents will want information related to their own children, the subjects they take and the teachers who teach them, the report will be focused on the individual learner. In addition to reports on individual subjects, include an overall summary commenting on progress across the curriculum. This may be provided by the class or grade teacher and endorsed by the principal. For the report to promote learning, this needs to be followed by advice and guidance for the learner on what they need to do next to improve further. If the assessment policy is being effectively implemented in classrooms, these 'next steps' will not be a surprise to the learner – they will be taken from the most recent feedback given by and discussed with the teacher.

If they have a report that gives sufficient and quality information, learners and parents will be able to ask key questions at face-to-face meetings or through conference telephone or video calls. For example, they will be able to check that a teacher is providing good enough support for a learner to make good progress in a particular subject. If a learner is not doing as well in geography as in history, the learner and parent should have that information. They can then try to find out why that is the case and what the teacher and school are doing to improve the situation. In other words, they can hold the teacher and the school to account.

Reports for the governing board

The governing board and/or owner will want to know how well all students are doing. They may well be the first to congratulate the school on its successes. They may also be ambassadors for the school to the local community and beyond. However, they should also challenge the school on whether or not it is providing an excellent education. Reports to governing boards should provide them with the information to do this. Even if the board is not interested in too much data, the school's senior management (as part of the self-evaluation process) should be. Data should allow for comparisons across grades and over time – for example how well learners in Grade 10 are doing in mathematics compared with their performance in physics. It might be of interest to compare whether boys are making as much progress as girls in each grade. If your assessment data is recorded electronically, it should be straightforward to compile the data. The school, and its governing board, might also be interested in comparing attainment against local, national and international standards.

A good report for stakeholders should include all the information that the reader will want to know and understand. It should be brief and to the point.

Data alone will not answer all the questions that stakeholders may have. For instance, a member of the governing board might notice that the attendance of learners in Grade 6 was better in term 3 than term 2. What they cannot tell is why this might be the case and, most importantly, what the school is doing to prevent the same issue arising in the next academic year. It is therefore important that data is accompanied by an analysis of what it is suggesting. The reader can then form a clear picture of what is going particularly well in the school and where there are areas of concern. Often too much importance is attached to performance in examinations. This can vary from cohort to cohort. Value-added measures are more reliable and helpful measures of progress over time.

Table 7: Some principles for reporting to parents

1. Make sure that the report is easy to understand. Use plain, everyday language. Avoid using technical terms that are only familiar to teachers.
2. Summative grades or marks are not informative unless they are accompanied with an explanation of what they mean a learner can do. It is good to:
   a. include objective information about what has been taught
   b. summarise learners' current knowledge, skills and understanding
   c. include areas for development (specific next steps or targets)
   d. consider, where relevant, referring to a portfolio of work that can be seen and discussed at a face-to-face meeting and/or include scanned or word-processed pieces of assessed work.
3. Show what progress a learner has made over the period since the last report (achievement). Focus on learning and progress rather than judgements.
4. Include what is expected of learners at a particular grade level. This will help parents check how well the learner is doing in comparison with others in the same grade.
5. Provide information about all areas of the learner's development. How well are they progressing socially as well as academically? Do they have the skills to work on their own? Can they concentrate for extended periods of time? Do they work and interact well with other learners? Do they have positive attitudes to learning and behave well?
6. Recognise effort and levels of engagement, as well as attainment.
7. Make it clear what parents can do to support their child's learning.
8. Include what teachers are doing and plan to do to support the learner(s) to make good progress.
9. Include data for attendance and punctuality.
10. Provide an opportunity for a face-to-face or video-conference discussion of learners' progress and of this report.

6: Evaluating teaching

Just as assessment that supports learning is critical for student development, teacher evaluation that focuses on providing accurate evidence of practice and supports improvement is central for teachers' development. Having clear standards that teachers are expected to meet is an important starting point considered in this chapter. We review evaluation processes, emphasising the importance of teachers' reflective participation. We also consider classroom observation practices and giving feedback to teachers who support professional growth and development.

6.1 What is teacher evaluation and why is it important?

Teacher evaluation is a vital element in improving student learning outcomes. It is concerned with gathering evidence from a range of sources that inform on teacher performance and using this to support improvements in practice. This is sometimes referred to as performance review, teacher appraisal or teacher assessment. A good teacher evaluation system is a powerful tool to:

- help schools improve
- identify opportunities for teachers of all levels to develop further
- deliver accountability for learner progress.

In the first round of the OECD Teaching and Learning International Survey (OECD 2009, p. 29), teachers reported that "performance review and feedback increases their job satisfaction and significantly increases their development as teachers".

There are a number of approaches that can be used in evaluating teaching. The most common include:

- classroom observations (by managers, other teachers or external evaluators)
- value-added models that try to measure gains in student achievement
- student evaluations of teachers
- judgements made by the teacher's line manager or principal
- teacher self-evaluation
- teacher portfolios of work.

How judgements are made is critically important. Too much weight can be given to a narrow range of evidence, for example students' examination performance. Triangulating evidence from a number of sources, systematically incorporating classroom observations and using more than one evaluator will help ensure judgements are sound.

Teacher evaluation systems are influenced by many factors. The following are important for their success:

- The system identifies and supports the values of the school.
- Teachers and managers are fully prepared for the implementation of the review system and they understand it.
- Care is taken that evaluation focuses on teachers' professional practice.
- Teachers are evaluated formatively to provide feedback and identify professional development needs, so their knowledge and experience can grow. In this way, performance review of teachers has a direct benefit on the learning experience of learners, and therefore on learner outcomes.
- The process is manageable and supports teaching rather than becoming a burden that hinders it.

Some systems emphasise evaluation with the intention of holding teachers to account rather than improvement. Some also link performance to salary changes. While there are effective evaluation systems that combine summative performance review with formative evaluation, there is a danger that they can unintentionally create a climate of fear and resistance among

teachers and inhibit creativity and honesty. Teachers might be less willing to be self-critical if their pay is linked to performance. Systems work much better when they motivate.

6.2 Developing standards for teachers

Standards are clear descriptions used to define and measure quality expectations. We have already considered the importance of developing a clear understanding of learning and assessment objectives when planning lessons, and ensuring learners understand these. For teacher evaluation the practice is similar. Teachers need to have a clear knowledge and understanding of the standards and criteria against which they can evaluate their own performance and against which they will be evaluated by their managers.

Most schools will already have their own standards for teachers that can be refined and developed. Some Cambridge schools will be operating in systems where national standards are already prescribed, and they could expand these. Researching standards that have been developed by excellent schools and school systems is helpful (see for example Danielson 1996). However, it is important for schools to develop their own and not just copy a system designed for another context. Establishing appropriate standards needs to be led by the school's most skilled practitioners, who know the expertise and competencies good teachers must have. Standards need to be informed by the school's vision and mission as well as the expectations Cambridge International defines. We created the Cambridge teacher and learner profiles (see Chapter 4, Table 4) to help schools identify the sorts of attributes teachers need to be effective at delivering Cambridge programmes, and it provides an important reference.

One example of a four-criteria model for developing teacher standards is described next. Please note that this is provided for guidance only.

Table 8: Four-criteria model for developing teacher standards

Stage 1

Agree the criteria. The criteria in this model have been designed as broad headings to describe the key elements in which a good teacher will be engaged.

- Learner development and well-being.
- Learner achievement and progress.
- Teacher professional development and improvement.
- Contribution to whole school and community (in order to promote learning).

Stage 2

Agree the aspects of the teacher's role that contribute to the criteria. It might be helpful to make a list of these and then to summarise the expectations as in the model below.

Learner development and well-being.

Every teacher in our school will:

- have high expectations of the behaviour, attitudes and potential for progress of all learners
- be confident, responsible, reflective, innovative and engaged
- manage classes and the classroom well
- inspire and motivate all learners
- build, model and nurture strong and positive relationships with all learners
- encourage all learners to reflect on their work and progress
- help all learners to set and achieve challenging and appropriate targets
- identify learners who need additional support and/or challenge and provide this.

The teacher uses resources, routines and procedures to provide a respectful, positive, safe, learner-centred environment that is supportive of all learners and conducive to learning.

Learner achievement and progress.

Every teacher in our school will:

- be accountable for learners' progress and outcomes
- plan and teach well-structured lessons that promote a love of learning
- have a secure knowledge of the curriculum area
- use a range of inspiring teaching resources
- use effective teaching strategies to help all learners to learn, including effective questioning
- assess learners' progress regularly and effectively
- give regular and supportive feedback to all learners.

The teacher plans and supports learning using the school's curriculum, effective strategies, resources and data. They engage learners effectively, measuring their progress and meeting individual learning needs.

Teacher professional development and improvement.

Every teacher in our school will:

- engage in professional development in their curriculum and/or specialist area
- take an interest in current research in the curriculum, effective teaching strategies and how children learn
- contribute to the professional development of other teachers in our school
- collaborate regularly with other teachers to improve our teaching practices
- develop expertise in and use a range of different resources, including ICT
- build, model and nurture strong and positive relationships with all colleagues
- contribute to our overall mission of the school as a learning community.

The teacher is a committed professional who communicates effectively. They take responsibility for and participate in professional growth that results in enhanced student learning.

Contribution to whole school and community (in order to promote learning).

Every teacher in our school will:

- build, model and nurture strong and positive relationships with all parents
- collaborate and communicate sensitively and respectfully with parents and the community
- make sure that parents understand what they can do to support their children's learning
- contribute to the personal development of learners outside the classroom through, for example, running an after-school club.

The teacher collaborates, communicates and works in partnership with learners, families and the school's community to promote student learning and achievement in and beyond the classroom.

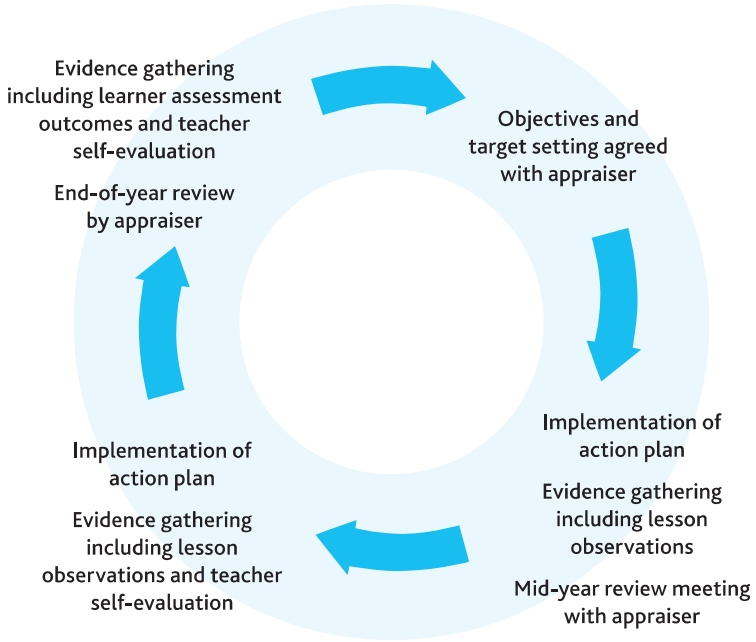
Stage 3

To make sure that teachers can effectively assess their own practice and are confident that, when they are evaluated, that evaluation is fair and unbiased, they need to have examples of what is expected for each criterion. Exemplar behaviours or indicators should, therefore, be developed at this stage to explain what each of the criteria means in terms of teacher behaviour. For example, what does highly effective lesson planning really mean? How can we judge the difference between effective and developing practice in assessing learners' work?

The exemplar indicators in the model are designed to help teachers and evaluators judge whether teaching is highly effective, effective, or developing in response to each of the criteria. When used with supporting evidence, for example from classroom observation, they also provide a rigorous 'checklist' system. This will make sure that your monitoring and evaluation fairly and accurately assesses your teachers. Appraisers can also use these exemplar indicators when assessing how effectively teachers are fulfilling the teacher standards and criteria in their professional practice.

Stage 4

Introduce the standards and criteria to all your teachers. You may decide to consult with the whole teaching staff at this stage. Or, the working group may have consulted with curriculum areas while writing them. Whatever you decide, teachers need to have a good understanding of the standards and criteria you have developed and of their purpose and use. Their introduction will be a good starting point for you to discuss, plan and develop your teacher performance review policy.



6.3 The teacher evaluation process

The following diagram illustrates a typical annual review cycle. The process starts with setting objectives. This might be completed immediately after the final review at the end of a school year, or at the start of a new school year. The teacher needs to reflect on their evaluation report. This will identify strengths and areas needing improvement, and a few priority objectives for the year ahead. Objectives should be focused and achievable, and need to be discussed and agreed with managers. You will also need to identify any professional development support that is needed. Remember that having too many objectives makes it difficult to focus on achieving them.

Teachers will incorporate their objectives and apply the teaching standards throughout the year. In an ideal situation managers should be visiting classrooms regularly.

Figure 6: Model of a teacher evaluation cycle

Feedback should be formative, supportive and ongoing. An excellent practice is to encourage teachers to visit each other's classrooms and act as 'critical friends'. Schools should use their best teachers as role models and a resource to support less experienced or underperforming staff. How far a manager observes and oversees a teacher will depend on the situation – teachers who are new to the profession or who are struggling will need more monitoring and support.

Ideally include at least one more formal meeting (normally mid-year) between teachers and their managers to review progress. Classroom observations provide critical evidence, and we consider these in detail in the next section.

One valuable form of feedback that some schools decide to use is student evaluation of teachers' performance. This practice only works well in some cultures and settings, so you must decide if it could work in your school. When done well, it can provide a particularly powerful form of feedback. Good student evaluation of teacher systems includes the following characteristics:

- Students are given very clear and specific guidance about the feedback being requested.
- Students' comments are in relation to the teaching standards and never personal.
- Students do not rate the teacher; they provide feedback.
- Teachers give students a list of questions, based on their own objectives and school standards. Students only respond to these.

Ways of making student evaluation less threatening include encouraging, but not requiring it, and/or requiring all feedback to go to the teachers concerned rather than the teacher's manager. The teacher is then expected to write a summary of the feedback, which is shared with their manager and considered at the final review.

The final review should be a well-structured meeting following a clear agenda. Documentary evidence is presented and discussed. This is likely to include lesson observation reports and the teacher's own self-evaluation. A common format for the report will help structure the meeting and ensure consistency. The meeting should be highly reflective, with teachers encouraged to talk about what they have learned and what they found challenging.

Procedures and practices also need to be defined to deal with any specific concerns about a teacher, for example by parents or students. This needs to be treated separately from teacher evaluation. Concerns that are repeated and substantiated will provide one source of evidence in evaluating performance. If concerns are proved justified, first create a course of action to help the teacher correct the performance issue(s). Keep a written record of the issues, agreed actions and support, as well as timeframes. The school needs to have a clear policy that identifies principles, practices and procedures that will be followed, ensuring fairness and transparency.

Managing the evaluation process

- Make sure that each teacher has an up-to-date job description.
- Allocate an appraiser to each teacher – usually the teacher's line manager.
- Identify a reasonable number of teachers that an individual appraiser is responsible for (a maximum of five teachers is recommended).
- Provide professional development and support to make sure that each individual appraiser:
  - has the specific knowledge, skills, understanding and time to carry out the role effectively
  - understands the school's policies and procedures and how performance review fits into the wider context of a teacher's professional development
  - has copies of all relevant documentation and any whole-school and team objectives as specified in the school development plan
  - understands the impact and implications of equal opportunities on the performance review process
  - is confident in evaluating evidence, including through classroom observation
  - is able to provide constructive feedback and engage in positive dialogue with the teacher
  - is aware of the resources available to support teacher development
  - is not over-burdened with performance review responsibilities.
- Make sure that there are opportunities for appraisers to share knowledge, learn from each other and align practice.
- Consider any justified request made by a teacher for a change in appraiser and make the final decision whether or not to agree a change.
- Make sure that all teachers understand the whole-school objective(s) they need to contribute to.
- Make sure that professional development not only addresses the needs of teachers identified through performance review but that it is also aligned to the whole-school improvement plan.

6.4 Classroom observation

Classroom observations are the most widely used source of evidence to give feedback to teachers. Observing lessons provides a unique opportunity to understand the curriculum students actually experience and what learners undergo on a daily basis. Unfortunately in many instances this is poorly done, with a very limited impact on student outcomes (Coe et al 2014). Schools need to ensure that the process is robust, understood and delivered in an environment of trust and understanding.

Observations can:

- give first-hand evidence to help evaluate an individual teacher's practice and the progress they are making in relation to the objectives agreed during teacher performance reviews
- monitor whether the school's teaching standards are being applied consistently throughout the school
- give a deeper view of the school's performance by triangulating classroom observation findings with other data (for example scrutinising learners' work, analysing end-of-unit assessments and students' performance in Cambridge qualifications)
- show how well new courses or schemes of work are being introduced
- provide first-hand knowledge of what learners experience in a particular year group or grade (learner shadowing, where an evaluator follows one student for a day or more, attending all their classes)
- establish where in the school good practice exists and identify expertise so that it can be used as part of the school's professional development programme

- offer opportunities for mentoring and coaching
- offer opportunities for teachers to work collaboratively by becoming 'critical friends' of each other's practice.

Observing a lesson is a privilege and a responsibility. Positive relationships between teachers and learners and between learners themselves are built and developed over time, and are crucial for a strong learning ethos in the classroom. Having an observer in the classroom can place pressure on teachers, even when the observer is present as a 'critical friend' or to observe learners rather than aspects of the teacher's practice. This can affect the behaviour of teachers and learners.

Where classroom observations are primarily used for teacher evaluation in a school, teachers tend to be more nervous about the process. It can be very helpful to encourage using observation developmentally by involving all teachers in observing lessons of their peers. This could be through developing a coaching model or in a less formal way, for example teachers observing other teachers in their subject area. Peer observations can play a key role in gaining teachers' confidence in the benefits of classroom observation for sharing and developing practice.

Having clear protocols or guidelines for classroom observation practice can also help to make sure that the experience is as positive and developmental as possible – for the teacher, the observer and learners. Involve teachers in agreeing these protocols so that they understand the purposes of classroom observation and feel a greater ownership of the process. They will also recognise that it can be a key support for their professional learning. The following are examples of questions you might wish to ask:

- Should teachers always be warned about an observation, even when it is not part of their evaluation? What notice should a teacher be given of a formal observation?
- Should there be a limit on the number of times a teacher's class is observed?
- Can teachers arrange to observe each other informally in addition to any whole-school or subject-wide observation schedule?
- Should classroom observation guidance apply to impromptu 'drop-in' observations?
- Should there be guidelines for observers? For example, you may wish to state that, unless agreed in advance, the observer should not interrupt or join in with the lesson, but may take opportunities to talk to learners when appropriate.
- Should there be guidelines for teachers? For example, should teachers greet the observer? Should they make sure a lesson plan is placed where they wish the observer to sit?
- What preparation or training should the school provide for teachers in classroom observation practice and giving feedback?

Developing classroom observation strategies

For formal observations that form part of the evaluation process you will need a common approach to ensure fairness and consistency. Table 9 provides some guidance on effective observation practices. Table 10 provides one very simple example of a teacher evaluation form.

Table 9: Suggested strategies for observing lessons

Observing lessons
Think how you would like an observer to behave in your classroom and model this. Remember that you are a colleague, not an inspector. Whatever the focus of the observation, the purpose should be about improving learning and so be developmental. Try to put your colleagues at ease and be as unobtrusive in the classroom as possible. If you stand with a clipboard and pen it looks more like you are there to judge performance rather than observe to support development.
Arrive at the lesson promptly. Unless you are only observing the final part of the lesson, or are conducting a learning walk, it is courteous to arrive at the lesson on time. Take the seat provided for you and see how the lesson starts.
Remember you are there to observe. Observing means watching attentively. If you are writing all the time you are in the lesson, you cannot observe properly. A good method to practise is to avoid writing anything for at least 10 minutes. Then, when you do write, make concise notes using bullet points. This will help you remember particular strengths and areas for improvement to discuss with the teacher (What went well; even better if…). Think of standing back and looking at the 'big picture'. This is often what teachers in the classroom fail to do for themselves, so your post-lesson discussions will be all the richer if you are able to 'replay' this for them.
Focus on the learners. Whatever the focus for the observation, look for the teacher's impact on each learner and their progress. This takes practice, but it is helpful to think in terms of cause (what the teacher does) and effect (what progress towards mastering the learning objective all learners make as a result). If we do this, it helps to make sure that we are objective observers. It also makes it less likely that our observations are influenced by our own style of teaching or over influenced by those teachers who are naturally more charismatic. It also makes sure that we recognise the strengths of a lesson planned so effectively that the teacher appears to be redundant because learners take full charge of their own learning.
Look at the resources available to learners. Are there sufficient and appropriate resources to support learners? Do learners and the teacher use technology effectively to support learning?
Take opportunities to talk to learners. There should always be opportunities to talk and listen to learners without disturbing their learning or interrupting the teacher in a lesson. Of course, this should be done quietly and discretely. However, if there are no opportunities because it would interrupt the teacher, then the teacher is probably directing and instructing too much. If you are worried that it would disturb the learners, think about moving to sit and listen to different groups while they are working. Ask questions that are relevant to their learning. For example, ask them to describe what they are doing and how they will know that they have achieved the learning or lesson objective well. Ask if you may look at their workbooks while they are working on something else. Learners can provide us with lots of primary evidence including: • what it is like to attend lessons with this teacher in this subject, so how typical the lesson you are observing is • how enthusiastic they are about their learning and the course • how much progress they think they are making and how they know this • how effectively the teacher delivers the course and helps them to understand what they need to do to improve further • any problems they are facing and what support they receive from the teacher. Before the observation think about what you want to know and what questions you will ask if you have the opportunity. • Talk to learners about the work they are currently doing and past work in their books. • Plan questions carefully to suit the age group of the learners. • Avoid leading questions. • Keep the questions brief and simple. • Use real examples in questions. • Ask questions that do not go back too far for younger learners to remember.
Look at work and displays on the walls. Take time to look around you to observe the learning environment. Are there any resources on the walls to support learners? Do they find them useful? Are there any examples of assessed learner work on display? Does it help learners to know what to aim for and how they can get there?

Table 10: Example of a teacher evaluation form

A	**Overall learning environment created by the teacher** (Evidence in lesson observation)					
		1	2	3	4	Comments
1.	The teacher creates a safe and pleasant learning environment					
2.	The teacher clearly respects the students and listens to the voice of the learner					
3.	The overall atmosphere in class is positive and encouraging					
4.	The teacher has an open and approachable relationship with students					

B	**Instructional practice** (Evidence in lesson observation, lesson plans)					
		1	2	3	4	Comments
5.	The teacher leads the class in well-prepared activities					
6.	The objectives of the lesson are clear to the teacher and to the students					
7.	The lesson accurately develops student understanding of part of the Cambridge curriculum					
8.	The teacher has an open and approachable relationship with students					
9.	The teacher checks students' (previous) understanding					
10.	The teacher uses classroom materials and media when appropriate					
11.	The teacher delivers the lesson clearly in an effective style					

C	**Differentiation** (Evidence in observed lesson, lesson plans, student work, student questionnaire)					
		1	2	3	4	Comments
12.	The teacher pays special attention to the very able students (e.g. by offering in-depth assignments and tasks)					
13.	The teacher pays special attention to the academically weaker students					
14.	The teacher supports bilingual students within his or her subject area					

continued

D	**Preparation** (Evidence lesson plans, student work, student questionnaire)					
		1	2	3	4	Comments
15.	The teacher is aware of Cambridge expectations, as published in the guide, and uses the Cambridge syllabuses and support materials in planning lessons					
16.	Lessons are planned that incorporate a variety of appropriate activities consistent with Cambridge expectations					

E	**Assessment** (Evidence in marked student work, observed lesson, lesson plans, student questionnaire)					
		1	2	3	4	Comments
17.	The teacher provides regular, clear and accurate formative feedback to students on their performance indicating what they need to do to improve. Cambridge assessment criteria are appropriately used					
18.	The teacher provides regular, clear and accurate summative assessment					
19.	Students demonstrate understanding of the nature and expectations of Cambridge assessment in the subject					

F	**Beyond the classroom** (Evidence: self-evaluation, faculty head comments, student feedback)					
		1	2	3	4	Comments
20.	The teacher is a proactive departmental colleague					
21.	The teacher is actively engaged in professional development to become a better teacher					
22.	The teacher supports students with their learning beyond the classroom by offering extra academic support					

6.5 Giving effective feedback to teachers

In a review of research, What makes great teaching? (Coe et al 2014, p. 39), the authors cite a range of studies that "… suggest the quality of feedback is a key component of any teacher assessment". To make sure that feedback is high quality, observers need guidance, training and practice. They identify six principles for teacher feedback that support sustained professional learning:

1. The focus is kept clearly on improving student outcomes.
2. Feedback is related to clear, specific and challenging goals for the recipient.
3. Attention is on the learning rather than the person or on comparisons with others.
4. Teachers are encouraged to be continual independent learners.

5. Feedback is mediated by a mentor in an environment of trust and support.
6. An environment of professional learning and support is promoted by the school's leadership.

Just as classroom observation should be supportive and developmental, so feedback to teachers on what has been observed should help them to decide on their next steps for professional learning and development. Ideally give verbal feedback to the teacher within 48 hours of the observation. If the observation is formal, review the lesson with the teacher and provide a written record, preferably within one week.

The written record should include the date of the observation, the focus of the observation, what was learned from it, the feedback given and any further actions/follow-up agreed. Teachers are learners, so many of the suggestions described in Chapter 5 on giving effective developmental feedback to students are also relevant to teachers.

Table 11: Providing feedback to teachers

Conducting the lesson review	• Be prompt. The review will be more worthwhile when it is easy to recall the lesson. • Encourage teachers to talk about what they have learned. They should also talk about what they found challenging in supporting learners to achieve the learning objective through the activities chosen. • Give teachers opportunities to discuss their work, focusing on how they can improve. • Ask teachers questions that encourage them to explain their thinking, e.g. "Can you tell me your thinking behind your choice of activities in the lesson?" • Make sure it becomes commonplace for teachers to reflect on each lesson and what they have learned as well as what students learned. • Help teachers to identify their next steps in learning.
Providing feedback	• Be focused. Include two or three areas for improvement, referenced to the lesson observed. • Be intelligible. Feedback should be unambiguous and clear. • Be constructive. Include specific guidance for improvement and point towards the relevant criteria for success. Feedback should be specific to individual teachers (not comparing with other teachers) and identify what worked well in addition to what they need to do to improve and how to do it. • Be supportive. Use a positive tone and make clear the support that is available for the teacher. • Relate to the progress made by learners and what the teacher does to support and promote this. • Provide the teacher with more than he or she could gain from self-evaluation of the lesson e.g. information on learner progress gained from talking to individuals and small groups during the lesson; an objective view of whether all learners were engaged actively throughout the lesson. • Be challenging. Encourage the teacher to think more deeply about what they do well, what areas they could improve upon, and how they might do this. • Provide time and support for teachers to act on the feedback given. • Help to identify the next steps in learning.

7: Planning and managing a whole-school professional development programme

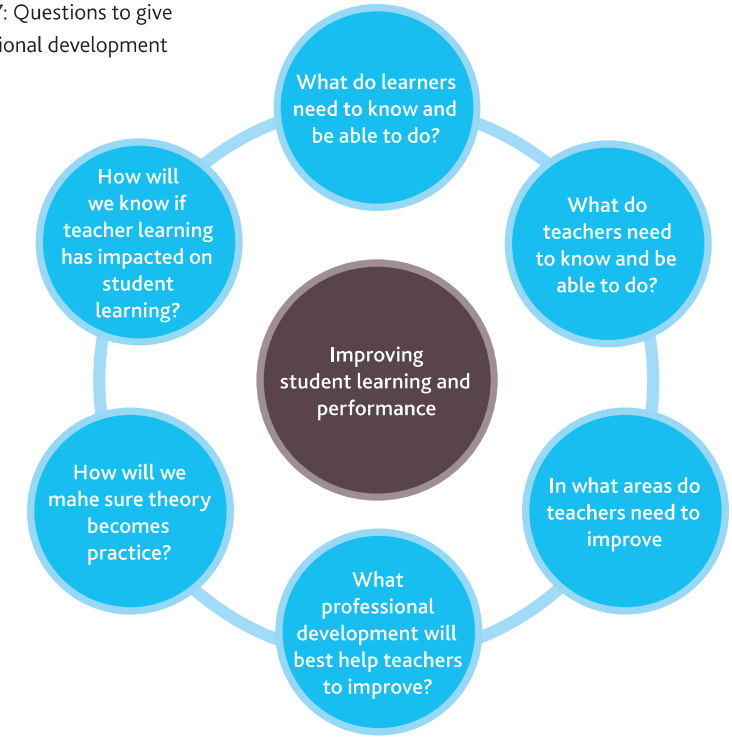
"We will fail ... to improve schooling for children until we acknowledge the importance of schools not only as places for teachers to work but also as places for teachers to learn" (Smylie 1995).

Throughout this guide we have emphasised the importance of teacher professional development. This chapter suggests principles schools need to think about as they plan their professional development activities. The focus should be on improving learning outcomes. Therefore, important sources of information about priorities for professional development will come from the key areas covered in previous chapters: the school development plan, improving student learning through assessment practices and evaluating teachers. Schools should pay particular attention to coaching and mentoring teachers. They should also take a systematic approach to evaluating their efforts to support continuous professional learning. Finally, this chapter emphasises the need to establish and foster communities of practice in schools and how Cambridge Professional Development Qualifications can help this to happen.

7.1 Planning and evaluating professional development

We cannot overstate how important teacher professional development is to school improvement. In a review of the impact of different school leadership practices on learner outcomes reported in the introduction (Robinson 2007), leaders promoting and participating in teacher learning and development had the greatest impact on student learning.

Timperley (2008) synthesised the research on teacher professional learning and development that has been shown to have a positive impact on valued student outcomes. Her advice for schools planning for teachers' professional learning includes:



- The focus should be on improving valued learner outcomes. Start with students' learning needs. *"Teachers need to be able to answer the question what knowledge and skills do we as teachers need to help students bridge the gap between current understandings and valued student outcomes?"*
- There need to be repeated and sustained opportunities to embed any new learning in an environment of trust and challenge.
- New learning needs to take account of existing practice and prevailing ideas about teaching and learning.
- Leaders should create an environment that supports professional learning.
- Leaders should promote professional learning.

The importance of linking teacher evaluation to professional development was mentioned in Chapter 6. It is very likely that patterns will emerge from teacher evaluations suggesting priorities for professional development. The school development planning process will also identify areas for teacher development which may relate to the whole school or to specific disciplines or year groups. As Figure 7 illustrates, the sequence starts with identifying needs, considering how practice can be improved, applying new practices and then evaluating their impact. Too often important parts of this process are missed out, in particular assessing the impact of changes on student learning, which will then provide input into the next cycle of development.

Teachers and schools are inundated with ideas about how to improve teaching and learning. Some are appropriate, some are not. Too often professional development activities in schools are superficial because too much is attempted – decisions are made

based on the interest an individual has with a new practice rather than on the needs of students. Once you have decided the priorities you must fully engage with them and identify appropriate principles and practices for improving pedagogy. Embedding new practices takes time and effort, and this is another reason why persistent effort and evaluation need to be part of the process. External input, either from outside the school or from experienced colleagues in other parts of the school, can be very helpful. Schools should look internally to their own resources, supporting teachers through coaching and mentoring. The most effective professional development focuses on improving learning rather than changing teaching practice (see Weston 2013).

Figure 7: Questions to give professional development

Professional development refers to a wide range of activities that are intended to improve teacher practice. These include:

- mentoring and coaching
- encouraging teachers to work collaboratively to conduct lesson studies and/or research into the impact of any new teaching strategies they have implemented
- developing team teaching
- developing teaching and learning communities
- encouraging groups of teachers to engage with, and learn from, other successful schools – locally, nationally and internationally
- attending Cambridge training courses
- encouraging teachers to become trainers themselves
- encouraging teachers to become examiners
- encouraging teachers and leaders to take Cambridge Professional Development Qualifications.

Professional development needs will depend on the situation. Teachers new to the profession, or to teaching Cambridge qualifications, will need support from experienced colleagues and to attend appropriate Cambridge training events. Experienced Cambridge teachers will want to improve their practice by leading the development of others (being mentors), involving themselves in professional learning communities, or becoming Cambridge trainers or examiners. They might also want to complete Professional Development Qualifications provided by Cambridge International or others. Some schools do not use their own experienced staff enough to lead the learning for others in the school, relying too much on external training.

Whatever professional learning you engage in to meet your needs, it is important to monitor progress and evaluate to check that it is doing what you need it to do. One framework schools can use to do this (and to answer the question: How will we know if teacher learning has impacted on student learning?) is provided by Guskey (2000). This framework provides five critical stages or levels of evaluation that are arranged hierarchically and move from the simple to more complex. The table below lists these stages. It also shows the key research questions and methodologies schools can use to make the impact of their professional development programmes more visible to their community.

Note that with each succeeding level, the process of gathering evaluation information is likely to require increased time and resources. As Guskey (2000, p. 78) states, *"each higher level builds on the ones before [such that] success at one level is necessary for success at the levels that follow"*.

Table 12: Adapted from Five Critical Levels of Professional Development Evaluation (Guskey 2000)

Evaluation level	What questions are addressed?	How will information be gathered?	What is measured or assessed?	How will information be used?
1. Participants' reactions	• Did they like it? • Was their time well spent? • Did the material make sense? • Will it be useful? • Was the leader knowledgeable and helpful? • Was the environment right and fit for purpose?	Questionnaires administered at the end of the session.	Initial satisfaction with the experience.	To improve programme design and delivery.
2. Participants' learning	Did participants acquire the intended knowledge, conceptual understandings and skills?	• Questionnaires • Simulations • Demonstrations • Participant reflections (oral and/or written) • Professional portfolios of evidence.	New knowledge, understanding and skills of participants.	To improve programme content, format and organisation.
3. Organisation support and change	• Was implementation advocated, facilitated and supported? • Was the support public and overt? • Were problems addressed quickly and efficiently? • Were sufficient resources made available? • Were successes recognised and shared? • What was the impact on the organisation? • Did it affect the organisation's culture and procedures?	• School records • Minutes from follow-up meetings • Questionnaires • Structured interviews with participants and school leadership • Professional portfolios of evidence.	The organisation's advocacy, support, accommodation, facilitation and recognition.	To document and improve organisation support. To inform future change efforts.

continued

Evaluation level	What questions are addressed?	How will information be gathered?	What is measured or assessed?	How will information be used?
4. Participants' use of new knowledge and skills	• Did participants effectively apply the new knowledge and skills? • Did classroom practice change as a result?	• Questionnaires • Structured interviews with participants and their mentors • Participant reflections (oral and/or written) • Professional portfolios of evidence • Direct observations • Video or audio tapes.	Degree and quality of implementation.	To document and improve the implementation of programme content.
5. Student outcomes	• What was the impact on students? • Did it affect student performance or achievement? • Did it influence students' physical or emotional well-being? • Are students more confident as learners? • Is student attendance improving? • Are dropouts decreasing? • Have levels of literacy and numeracy improved?	• Student records (formative and summative) • School records • Questionnaires • Structured interviews with students, parents, teachers, and/or leadership • Professional portfolios of evidence.	Student learning outcomes: • Cognitive (performance and achievement) • Metacognitive or self-regulated learning • Affective (attitudes and dispositions) • Psychomotor (skills and behaviours).	To focus and improve all aspects of programme design, implementation and follow-up. To demonstrate the overall impact of professional development.

The key purpose of professional development is made clear – to change classroom practice and thereby improve student outcomes. If schools are serious about the investments they make in this area, then a systematic approach to evaluation is key – to both understand the effectiveness of teacher professional development and determine future expenditure. Adopting the framework provided by Guskey will go some way in helping schools with this process.

7.2 Mentoring and coaching teachers

Introducing and implementing a high-quality programme of mentoring and coaching is one effective way of promoting good practice within the school to improve teachers' skills and performance. The terms 'mentoring' and 'coaching' are sometimes used as if they are the same. While they do have many aspects in common, each has specific attributes and specific uses. Schools need to consider the potential impact of each and carefully plan how to introduce and implement them.

A national framework for coaching and mentoring in England developed by the Centre for the Use of Research and Evidence in Education (CUREE) in 2005 distinguished between mentoring, specialist coaching and co-coaching (peer coaching):

- **Mentoring** is a structured, sustained process for supporting professional learners through significant career transitions.

- **Specialist coaching** is a structured, sustained process for developing a specific aspect of a professional learner's practice.
- **Collaborative (co-) coaching** is a structured, sustained process between two or more professional learners to help them embed new knowledge and skills from specialist sources in day-to-day practice.

Mentoring

Mentoring is a supportive, long-term relationship between an experienced teacher (mentor) and a less experienced teacher (mentee). A mentoring programme is often used as part of the induction process. It supports teachers who are newly qualified and/or new to the school, or those newly appointed to management or other 'new' positions. The relationship is characterised by the fact that the mentor has greater experience and more advanced skills than the mentee. The mentor seeks to alter and improve the teacher's behaviour, values and pedagogy. The process may form part of the teacher performance review process.

The role of the mentor:

- Provide support for the teacher, professionally and emotionally.
- Demonstrate effective teaching skills and strategies.
- Lead learning conversations that support, scaffold and challenge the teacher to improve their pedagogy.
- Support and guide the teacher's lesson planning, observe and assess the lesson, provide feedback against agreed criteria.
- Set targets for improvement with the teacher.
- Advise and help to negotiate the teacher's next steps for professional development.

Professional mentoring is a highly skilled role for which mentors need to be well prepared. In most cases, they will need professional development themselves to learn and develop the necessary skills. Mentoring itself will also provide opportunities for development, especially as the mentor will learn from the relationship with the mentee.

A professional mentor needs to have the following skills and attributes:

- A reflective practitioner with a clear understanding of what constitutes outstanding teaching and learning.
- Respected as an effective practitioner by other teachers and learners.
- A skilled, active listener and someone who asks the mentee open, rather than closed, questions.
- Effective at modelling and describing potential teaching strategies.
- Open to sharing and discussing pedagogy.
- Skilled and experienced at classroom observation and providing sensitive and developmental feedback.
- Prepared to commit time and resources to the mentoring relationship.

Coaching

According to Creasy and Paterson (2005, p. 10) *"Whilst it takes many different forms, coaching is principally a joint enterprise in which one person supports another to develop their understanding and practice in an area defined by their own needs and interests. ... Coaching often involves integrating new or alternative approaches into the professional's existing repertoire of skills and strategies."*

The coaching relationship is characterised by the fact that it is non-hierarchical and involves peer-to-peer discussion and collaborative working. Teachers choose their coaches and what area of their practice they want to work on. Coaching is a partnership, with the coach playing the role of 'critical friend'. They give objective feedback on the teacher's strengths and areas for development so they can evaluate their own performance. The coach may lead the discussions at times, but the teacher should be in control. In discussion with the coach, the teacher analyses and evaluates their practice, sets targets, identifies next steps for development, and decides what support or training they might need and where to find it.

The role of the coach involves:

- building a supportive, collaborative working relationship. This may include joint lesson planning, delivery and evaluation
- facilitating discussions and encouraging the teacher to take the lead
- not being judgemental
- normally being an equal, rather than a superior, to the teacher in the school's hierarchical structure

- focusing on the areas agreed with the teacher. For example, if the teacher has planned to use new strategies to differentiate by content, the coach may agree to gather data on individual learners. This will assess how well they are making sense of the content and reacting to the task. After the lesson, the coach and the teacher consider the lesson using the information gathered and evaluate the impact of the new strategies. (You could set up a video camera to record the lesson for deconstructing. This has the advantage of allowing the teacher and coach to observe the lesson together. Also, if the camera is set up on a tripod the coach does not necessarily need to be present in the lesson)
- giving feedback objectively, focusing on the agreed areas for observation
- supporting teachers to take ownership of their own professional development plan and set their own targets
- being chosen in agreement with the teacher.

Coaches require many of the same qualities and skills as mentors. The coach needs to have good listening skills and ask open and searching questions to help discussion. The relationship needs to be one of mutual respect and, like mentoring, coaching requires training and practice for it to be effective.

7.3 Establishing communities of practice through Cambridge Professional Development Qualifications

Throughout this guide we have emphasised the need to develop the teaching faculty of the school. This investment needs to be sustained over a long period of time. The main objective should be to improve classroom practice and student outcomes. Many successful schools achieve this by developing professional learning communities, or communities of practice among their teachers. These are gatherings of two or more teachers who share a common goal or interest, and which are characterised in the education context by (adapted from Lee and Spillane 2008):

- open classrooms – teacher classroom practice made available for peer observation and critique
- open dialogue between colleagues, deeply reflecting on their practice
- a focus on student learning
- a high degree of collaboration in terms of, for example, curriculum and assessment planning, moderating and standardising the marking of student work, etc.
- sharing constructive norms and values.

Cambridge International supports schools in developing communities of practice through its suite of Professional Development Qualifications. Otherwise known as PDQs, these qualifications have been designed to be integrated, over a sustained period of time, into a school's professional development planning, activities and culture. They help teachers and leaders to:

- engage critically with relevant concepts, principles, theories and international best practice
- apply new ideas and approaches in reflective practice
- evaluate experiences and outcomes to plan further development
- improve the quality of their teaching and leadership to enhance the quality of their learners' learning.

Professional learning draws on the candidate's own teaching and learning environment, making the qualifications immediately applicable and relevant. Crucially, Cambridge PDQs aim to help schools improve through cost-effective, sustainable programmes. They benefit teachers as well as their learners, and demonstrate to parents, carers and the school community that the school values and nurtures its teaching staff.

The suite of Cambridge qualifications covers four themed areas:

- Teaching and Learning
- Teaching Bilingual Learners
- Teaching with Digital Technologies
- Educational Leadership

All qualifications are available at both Certificate and Diploma level, with the Certificate providing a strong foundation for the Diploma. The Cambridge PDQs are accredited by University College London Institute of Education, offering successful candidates a clear pathway to further professional development. The courses are for international education professionals at all stages of their careers.

Becoming a Cambridge Professional Development Centre

Deciding to offer the qualifications is an important step in the school's development process. In doing so, the school is making a clear statement that continuous professional development is a key part of its overall improvement planning and that it wants to meet the needs of its teachers and learners.

All organisations wishing to offer Cambridge PDQs must be approved by Cambridge International. This process allows us to learn more about the school's values and approach to education, and ensure that it meets the appropriate quality standards. Once approved, the school will join a select network of organisations all working to improve their professional development strategy.

You can find more information in the following publications on our website at: www.cambridgeinternational.org/pdq:

- *Cambridge Professional Development Qualifications – a guide for Cambridge school leaders*

8: Working with us

This chapter highlights the range of support services and resources we offer to schools working with us. This includes our Professional Development Qualifications, which were outlined in the previous chapter. It will give you an overview of the different types of support available and where you can find detailed information.

To help your teaching team understand and effectively deliver our programmes, and to meet their professional development needs, we offer a range of support materials and services. Teachers can access this support if your whole-school curriculum is built on Cambridge courses, or if you combine Cambridge courses with other national or international qualifications.

We can provide three major areas of support:

- curriculum materials and resources to support teachers in delivering subject curricula
- professional development
- local advisory and development services.

School Support Hub

An online resource bank and community forum where teachers can access thousands of Cambridge support resources, exchange lesson ideas and materials, and join subject-specific discussion forums.

Assessment tools

We provide dedicated online support to schools registered to offer Cambridge Primary and Cambridge Lower Secondary. Teachers can download progression tests and use results analysis tools to monitor learners' progress.

For teachers and students of Cambridge Global Perspectives

Cambridge schools offering Cambridge Global Perspectives can use our online learning area. It provides a space for teachers and learners to build online communities where they can share resources and work with other schools. In addition, there are interactive Cambridge IGCSE and Cambridge International AS Level Global Perspectives courses available in the online learning area.

Teaching resources

Syllabus (or curriculum framework)

The most important documents teachers will use. They describe what learners need to know, what they must be able to do, and how they will be assessed. We provide curriculum frameworks for Cambridge Primary and Lower Secondary subjects and syllabuses for Cambridge Upper Secondary and Cambridge Advanced subjects.

Schemes of work

Medium-term plans that give ideas on how teachers might deliver the courses.

Teacher guides

Some subjects have teacher guides which provide extra guidance on planning and teaching.

Textbooks and publisher resources

We publish lists of resources to support teaching, including textbooks and websites. Some of these resources are endorsed by us. This means we have quality checked them and judge them to match the syllabus content well.

Example candidate responses (Standards Booklets)

Real candidate answers are shown alongside examiner comments so teachers can see the level of performance needed to achieve each grade.

Exam preparation materials

Past question papers

We publish past papers for each subject. These are useful for giving learners practice at answering different types of question.

Examiner reports

Our principal examiners write detailed reports describing learners' overall performance on each part of the question. The reports give insight into common misconceptions shown by learners, which teachers can address in lessons.

Grade thresholds

These show the minimum number of marks learners needed to achieve in order to be awarded a particular grade.

Mark schemes

These help teachers understand how marks are awarded for each question and what examiners look for when they mark.

For more information go to www.cambridgeinternational.org/teachers

Local support

We can provide local support and guidance for teachers and school leaders involved in implementing the Cambridge curriculum. By working with you we will be able to respond to your specific needs by providing a more personalised experience. We can also help identify solutions or processes to address any problems or challenges you may experience. If you need longer-term support we can work with you to develop and implement a more formalised programme. This could include expert consultancy around activities introduced in this guide, including whole-school evaluation, school development planning and teacher evaluation.

If you are interested in local support please contact us at info@cambridgeinternational.org with 'Local curriculum support request' in the email subject line.

Annotated bibliography

This guide has provided an introduction to school development, with the aim of improving the delivery of Cambridge programmes and increasing the quality of student learning. In this section we identify some texts for schools interested in exploring some of these ideas further. We recommend these because they are relevant, research based, accessible and reasonably priced. They are good starting points from which you can follow your particular interests, but represent only a few of the wide range available. We encourage schools to share any literature and resource material they have found useful through the School Support Hub.

Black, P., Harrison, C., Lee, C., Marshall, B. and Wiliam, D. (2003). *Assessment for Learning: Putting it into Practice*. Buckingham: Open University Press.
Based on a two-year research project, this title describes the specific assessment for learning practices that 36 UK teachers found productive. It explores the underlying ideas about learning that these practices illustrate and discusses the problems that teachers encountered when implementing the new practices in their classroom. It offers guidance for school management about promoting and supporting such changes.

Clarke, S. (2014). *Outstanding Formative Assessment:* Culture and Practice. London: Hodder Education.
This book focuses on how teachers can create an environment for pupils to be active learners, constant reviewers and self-assessors. It provides ideas and practical strategies based on classroom examples and whole-school case studies for teachers in primary and secondary schools. It includes stories from outstanding schools in order to explore whole-school development.

Claxton, G. (2002). *Building Learning Power: Helping Young People Become Better Learners.* Bristol: TLO.
Building Learning Power is grounded in international research and practical experience. It addresses the skills and understanding that are needed to enable teachers to help young people become better lifelong learners. It offers practical guidance on how teachers can create a culture in the classroom and in the school more widely that systematically cultivates habits and attitudes to empower young people to face difficulty and uncertainty calmly, confidently and creatively.

Guskey, T.R. (2000). *Evaluating Professional Development.* London: Corwin Press.
This book explores the processes and procedures involved in evaluating professional development. It moves through five levels to examine: participants' reactions to professional development; how much participants learn; the evaluation of organisational support and change; how participants use their new knowledge and skills; and improvement in student learning. It includes sample evaluation forms, checklists, and helpful tips.

Hargreaves, A. and Fullan, M. (2012). *Professional Capital: Transforming Teaching in Every School.* London: Routledge.
This book presents action guidelines for classroom teachers and school leaders to transform the culture of teaching and teacher development.

Hattie, J. (2012). *Visible Learning for Teachers: Maximising Impact on Learning.* London: Routledge.
In Visible Learning (2008) Hattie synthesised the results of more than 15 years' research and over 800 meta-analyses on the influences on student achievement. This title explains how to apply the principles of Visible Learning to any classroom. It offers user-friendly summaries of the most successful interventions and practical step-by-step guidance to the effective implementation of visible learning and visible teaching in the classroom.

Hopkins, D. (2001). *School Improvement for Real.* London: RoutledgeFalmer.
This book sets out a strategy for educational change that focuses on student achievement by modifying classroom practice and adapting the management

arrangements within the school to support teaching and learning. It outlines an approach to school improvement that has a medium-term, systemic orientation, providing both principles and suggestions for better practice.

MacBeath, J. and Dempster, N. (Eds.) (2009). *Connecting Leadership and Learning: Principles for Practice.* London: Routledge.
This book explores what it means to lead schools that place learning at the centre. It draws on research from seven different country projects to offer five key principles for practice: a focus of learning; an environment for learning; a learning dialogue; shared leadership; internal and external accountability.

MacBeath, J. and McGlynn, A. (2002). *Self-Evaluation: What's in it for Schools?* London: RoutledgeFalmer.
This title makes school self-evaluation accessible, and through the use of case studies, helps schools and teachers to develop self-confidence in working with evaluation tools. It discusses the concerns and issues of schools today to propose challenging ideas for the future.

MacBeath, J. and Mortimore, P. (Ed.) (2004). *Improving School Effectiveness.* Buckingham: Open University Press.
This book reviews findings from seminal international work to analyse school effectiveness, its measurement, and its impact for teachers, parents and pupils.

Mercer, N. and Hodgkinson, S. (Ed.) (2010). *Exploring Talk in School.* London: Sage.
