Classroom talk is essential for guiding the development of understanding and for learners to understand their teachers and their peers in constructing knowledge. This book considers the practical steps teachers can take to develop effective classroom interaction, looking at: classroom communication and managing social relations; talk in science classrooms; using critical conversations in studying literature; exploratory talk and thinking skills; talking to learn and learning to talk in the mathematics classroom; the 'emerging pedagogy' of the spoken word.

Muijs, D. and Reynolds, D. (2011). *Effective Teaching: Evidence and Practice.* 3rd ed. London: Sage.
This book provides insights into the latest research on effective teaching and learning relevant for primary and secondary levels. The authors provide a broad and comprehensive overview of the large body of knowledge on effective teaching. It explores: generic teaching skills; teaching for specific goals; subject-specific strategies and other classroom issues. Practitioners are encouraged to reflect through the points for reflection and further reading.

OECD. (2013). *Teachers for the 21st Century: Using Evaluation to Improve Teaching*. OECD Publishing.
Based on evidence from across the world, this report discusses how teacher quality is defined and what standards are set and by whom. It examines what systems are in place for teacher evaluation, how evaluations are conducted and how teacher evaluation contributes to school improvement and teacher self-efficacy.

Pollard, A. (2014). *Reflective Teaching in Schools.* 4th ed. London: Bloomsbury.
This book offers practical advice and evidence-based guidance on key issues in classroom practice including relationships, behaviour, curriculum planning, learning and teaching strategies, assessment and evaluation. It introduces principles and concepts to support a deeper understanding of teacher expertise. It provides numerous examples of effective reflective teaching from diverse school contexts across the world.

Robinson, V. (2011). *Student-Centred Leadership.* San Francisco: Jossey-Bass.
This book shows leaders how they can make a bigger difference to the quality of teaching and learning in their school and ultimately improve their students' performance. It is based on evidence about the impact of different types of leadership on student outcomes. The book includes examples of five types of leadership practice as well as practical lessons and rich accounts of the knowledge and skills that leaders need to employ them with confidence.

Swaffield, S. (Ed.) (2008). *Unlocking Assessment: Understanding for Reflection and Application.* London: Routledge.
This book explores the values, principles, research and theories that underpin our understanding and practice of assessment. It provides practical suggestions and examples, and addresses key points about the future development of assessment. Complex but crucial ideas and issues are made accessible, so that teachers can be more confident and proactive in shaping assessment in their classrooms, in ways that support learning and avoid unintentional harmful consequences.

Wiliam, D. (2011). *Embedded Formative Assessment.* Bloomington: Solution Tree Press.
Wiliam outlines five key strategies of formative assessment: clarifying, sharing and understanding learning intentions and criteria for success; engineering effective classroom discussions, activities and learning tasks that elicit evidence of learning; providing feedback that moves learners forward; activating learners' instructional resources for one another; activating learners as the owners of their learning. Through a summary of the research evidence he shows the impact of each of these strategies, and offers many practical techniques that teachers can use to incorporate the strategies into their classroom practice.

Glossary

Active learning
Learning which engages students and challenges their thinking, using a variety of activities.

Assessment criteria
Concise, written descriptions of what students are expected to know or be able to do and how this will be measured.

Assessment for learning
Approaches employed during learning activities to help teachers and students evaluate progress, providing guidance for subsequent teaching and learning. See also formative assessment.

Assessment rubrics
Make clear the assessment criteria being used and describe different levels of performance in relation to these criteria.

Benchmark
A measure of performance against an established standard.

Bilingual education
Teaching and learning in two or more languages, developing both subject and language knowledge, and skills. For Cambridge International, bilingual education means that learners study typical school subjects – for example, maths or geography – through an additional language (such as English) and some subjects through their first language, or they may study the same subject through two languages. See also www.cambridgeinternational.org/bilingualeducation

Cambridge community
Schools using Cambridge educational programmes.

Cambridge Handbook
The official document detailing the regulations for running Cambridge examinations and assessments. It details the responsibilities of Centres and forms part of the schools' contract with Cambridge International.

Component
An assessable part of a subject examination, not certificated as a separate entity, e.g. a written paper or a practical.

Coursework
Classroom assignments undertaken by learners as prescribed in the syllabus. Normally assessed by the learner's teacher according to criteria set by Cambridge International. The work is moderated within the school and then by Cambridge International or in some cases assessed directly by Cambridge International.

Criterion referenced
Performance is measured against a fixed set of predetermined criteria, which are concise, written descriptions of what students are expected to know and be able to do. This contrasts with norm referencing, where students' performance is compared with that of other students.

Curriculum
An overall description of the aims, content, organisation, methods and evaluation of the learning programme and the factors influencing the quality of learning. The term is used in different ways. In this guide the term is qualified as follows:

- The *school curriculum* refers to the combination of subjects provided by the school.
- A *subject curriculum* refers to the content, skills, conceptual understandings and activities prescribed for a subject over a particular time period.
- The *written curriculum* is the prescribed course of study identified in documents such as syllabuses and schemes of work.
- The *taught curriculum* is what teachers actually deliver in the classroom.
- The *assessed curriculum* is what is summatively assessed at the end of a particular time period.
- The *experienced curriculum* is what students actually learn from their whole educational experience. This includes both planned and unintended outcomes, as a result of all their activities in the learning environment provided by the school.
- The *co-curriculum* refers to valued educational activities, such as social and emotional development, that support learning beyond the school curriculum. The school encourages and supports this.

Curriculum framework
The systematic structure of the curriculum as set out in document(s) specifying the way in which learning and assessment is to be organised.

Curriculum mapping
This documents all the interrelationships within the curriculum for a particular group of students, making links between subjects, skills development, conceptual understandings and activities over time.

Development planning
The overarching process of enquiry, evaluation, prioritisation, planning and execution of plans designed to improve the learning and achievement of all students.

Differentiated learning
Adapting teaching to suit the needs of different learners based on their current level of understanding and performance in order to help all students fill their potential. This is achieved by providing appropriate learning activities, support and assessment, so that all students in the group can learn effectively.

Educational aims
Statements of the broad purposes or intentions of the curriculum or learning programme.

Evaluation
In this guide 'evaluation' means judgement with a view to improve. Evaluation can also refer to a judgement that holds an individual or group to account. Evaluation involves a process of enquiry based on evidence leading to judgements.

First language
The main or primary language that the learner or teacher uses. When we refer to 'maintenance of the first language', it usually means the language learned first. When we refer to the 'first language as a medium of instruction' in a bilingual education programme, it usually means an official first language identified by the school, not necessarily an individual's 'mother tongue'.

Formal formative assessment
Formative assessment which is planned in advance. It is used to inform the next stage of teaching, for example a class test at the start of a lesson for the whole class with feedback into the teaching of that class.

Formative assessment
Assessment practices used primarily to support students' learning. This includes providing feedback and questioning during the learning process, allowing teaching and learning activities to be modified to improve learning. Harlen (2012, p. 98) makes a distinction between the following:

- **Informal formative assessment**, which broadly corresponds to **assessment for learning**. Characterised by immediate feedback as a normal part of classwork and usually not planned in advance.

Higher education
Courses in universities and colleges beyond upper secondary school, e.g. degrees.

Management cycle
An iterative process in which school leaders set goals, implement actions, and monitor and evaluate progress and outcomes in relation to the school's strategic plan.

Metacognitive awareness
The ability of a learner accurately to judge their own learning in specific areas and be able to effectively manage it, becoming a self-regulated learner.

Mission statement
A written declaration defining the school's educational purpose and the school's educational aims and values. This might be included in the statement or listed separately.

Moderation
The process of checking that assessment standards have been applied correctly, consistently and fairly, and making adjustments if necessary to ensure that all assessments are aligned to the standards.

Norm referenced
A process in assessment that measures how a student performed in relation to other students being assessed or a hypothetical average student, which is determined by comparing scores against the performance results of a statistically selected representative group of those assessed.

Pedagogy
The theory and practice of teaching and learning.

Professional development (PD)
Teachers continuously and systematically reflect on and improve their professional thinking and practice, engaging in appropriate learning opportunities to improve and upgrade their knowledge and skills.

Programme of study
A planned schedule of teaching and learning activities, relating to the curriculum framework and qualification. See also Curriculum.

Qualification
The formal certificated recognition of a student's achievement at the end of a particular course. This is based on successful performance demonstrated through assessed evidence.

Reflective practice
The process through which the teacher or learner continuously learns from the experience of planning, practice, assessment and evaluation. This can improve the quality of teaching and learning over time.

Scaffold learning
The teacher provides appropriate guidance, activities and support to enable students to build on their current level of understanding progressively. They acquire confidence and independence in using new knowledge or skills. This helps students achieve more than they could on their own by operating in the zone of proximal development.

Scheme of work
A set of planned units of learning written by the teacher relating to a topic, subject or stage.

Standards
Standards are clear descriptions used to define quality expectations. The term is used in different contexts in this guide.

- The international qualification standard set by Cambridge International

Cambridge standards relate to the prescribed syllabus and its assessment. Cambridge International sets and maintains standards for our qualifications which are the same for all students in all Cambridge schools. We define:

1. Curriculum standard: This standard relates to the explicit and implicit demand of the content and skills set out in our syllabuses.
2. Assessment standard (also called the attainment standard): This standard relates to the demand of the assessments we set. What students know and can do is measured through assessment processes that are valid, reliable and fair. This means that students' results are seen as accurate measures of their performance in relation to the particular subjects being assessed.
3. Grading standards (also called awarding standards): This standard relates to the achievement we recognise via our grade threshold decisions. Students are awarded a mark/grade accurately reflecting their level of performance.

- School standards

Cambridge International identifies registration standards that have to be met for a school to offer Cambridge programmes. They set out an initial quality benchmark that schools must commit to in order to implement successful Cambridge programmes. Some are absolute standards: the school either meets the standards or does not (for example, secure storage arrangements).

Cambridge International requires evidence of other standards for a school to be registered. For example, assessment outcomes are monitored with clear feedback into teaching and learning strategies, but we do not provide detailed criteria related to these. Schools are responsible for this fundamental aspect of school development. Schools may also be required to adhere to other standards in addition to Cambridge International's, such as those of their national regulatory body, or their chain of schools

Strategic plan
A document that explains the school's strategic priorities for a specified period of time, normally 5–10 years. It includes setting goals, identifying actions to achieve the goals, and considering how resources will be used to achieve the goals that have been identified.

Student-centred learning
In designing the learning activities, the teacher focuses on the needs, abilities and interests of each individual learner in relation to the learning outcomes.

Summative assessment
An assessment of learning that has taken place at the end of a course or unit of study, which is designed primarily to measure achievement. This could also involve ranking, certifying competence or accountability.

Syllabus
A complete description of the aims, content, assessment arrangements and performance requirements for a qualification. A course leading to an award or certificate is based on a subject syllabus.

Teacher support
The framework of courses, resources and guidance that Cambridge International provides to help teachers develop their understanding and delivery of Cambridge programmes.

Timetable
A schedule listing the times and durations of lessons across a specific period of time, often a week. This is sometimes referred to as the teaching schedule.

Foreword

Since their launch in 2011 the Cambridge learner attributes – **confident, responsible, reflective, innovative, engaged** – have been an increasingly visible design principle in the curricula of thousands of Cambridge schools worldwide.

I am often struck when I visit schools by the original ways in which the Cambridge learner attributes are promoted and supported. It was precisely our intention in launching the attributes that they would encourage schools, drawing on well-evidenced ideas about learning, to shape distinctive curricula suitable to their circumstances and contexts.

This new guide revisits the insights into learning and teaching on which the Cambridge learner attributes are built, and suggests how schools can interpret the attributes in a practical way to improve the value of the education they offer. The guide will be useful both for seasoned Cambridge schools looking to make further improvements to the curriculum, and for schools new to Cambridge and wishing to start from a clear understanding of our approach. It is an empowering approach, in which we aim to help schools adopt tools, well-evidenced ideas and flexible resources in order to shape a curriculum which belongs uniquely to the school.

Today's educators are not permitted complacency: everywhere we see, if not downright dissatisfaction with education, then strident demands for improvement. Central to those demands is the idea that students should emerge from the compulsory years of education equipped not only with core knowledge and literacies, but with the abilities and dispositions necessary to be effective life-long learners. When education theories are turned to for help in meeting this challenge, two questions confront schools – how to assess the soundness of a theory, and how to apply it successfully in the classroom.

I believe this guide will answer both needs, by explaining the solid foundations on which the Cambridge learner attributes are based, and showing how to make use of the attributes for the benefit of learners.

Michael O'Sullivan, Chief Executive,
Cambridge Assessment International Education

The Cambridge learner attributes

	Cambridge learners	Cambridge teachers
Confident	**Confident** in working with information and ideas – their own and those of others. Cambridge learners are confident, secure in their knowledge, unwilling to take things for granted and ready to take intellectual risks. They are keen to explore and evaluate ideas and arguments in a structured, critical and analytical way. They are able to communicate and defend views and opinions as well as respect those of others.	**Confident** in teaching their subject and engaging each student in learning. Cambridge teachers know their subject well and know how to teach it. They seek to understand their students and their educational needs. They strive to communicate a love of learning and to encourage students to engage actively in their own learning.
Responsible	**Responsible** for themselves, responsive to and respectful of others. Cambridge learners take ownership of their learning, set targets and insist on intellectual integrity. They are collaborative and supportive. They understand that their actions have impacts on others and on the environment. They appreciate the importance of culture, context and community.	**Responsible** for themselves, responsive to and respectful of others. Cambridge teachers are highly professional in their approach to teaching and they are collaborative and supportive. They understand their actions will help shape future generations and they are concerned about the holistic development of every individual they teach.
Reflective	**Reflective** as learners, developing their ability to learn. Cambridge learners understand themselves as learners. They are concerned with the processes as well as the products of their learning and develop the awareness and strategies to be life-long learners.	**Reflective** as learners themselves, developing their practice. Cambridge teachers are themselves learners, seeking to build on and develop their knowledge and skills through a virtuous circle of reflection on practice – involving research, evaluation and adaptation. They support students to become independent and reflective learners.
Innovative	**Innovative** and equipped for new and future challenges. Cambridge learners welcome new challenges and meet them resourcefully, creatively and imaginatively. They are capable of applying their knowledge and understanding to solve new and unfamiliar problems. They can adapt flexibly to new situations requiring new ways of thinking.	**Innovative** and equipped for new and future challenges. Cambridge teachers are creative, experimenting with new ideas and pursuing an enquiring approach in their teaching. They are open to new challenges, being resourceful, imaginative and flexible. They are always ready to learn and apply new skills and techniques.
Engaged	**Engaged** intellectually and socially, ready to make a difference. Cambridge learners are alive with curiosity, embody a spirit of enquiry and want to dig more deeply. They are keen to learn new skills and are receptive to new ideas. They work well independently but also with others. They are equipped to participate constructively in society and the economy – locally, nationally and globally.	Engaged intellectually, professionally and socially, ready to make a difference. Cambridge teachers are passionate about learning within and beyond the classroom, sharing their knowledge and skills with teachers in the wider educational community.

Introduction

What are the learning habits students need to be successful in school, higher education, the workplace and life in general? This question inspired the development of the Cambridge learner attributes in 2011.

Since we introduced the attributes a number of schools and teachers have asked us for more guidance. This guide is a response to that request. It is intended to complement the *Implementing the Curriculum with Cambridge* guide and the *Developing your School with Cambridge* guide, as well as other resources on the teaching and learning area of our website (**www.cambridgeinternational.org/teaching-and-learning**).

The purpose of the Cambridge learner and teacher attributes is to support the development of five powerful and highly desirable learning habits that will inspire students to love learning and help them to lead fulfilled and successful lives. Students who demonstrate the attributes habitually approach learning by being confident, responsible, reflective, innovative and engaged. They are able to skilfully employ a broad range of cognitive skills and socio-emotional skills (including personality qualities such as resilience, self-motivation and self-regulation) towards effectively managing their performance.

The attributes are interdependent and should be viewed as a whole. Confidence, for example, needs to be grounded in reflection and responsibility so that the learner demonstrates skill and humility in judging how confident they can be that they are right. Learners need to be confident to be innovative, ready to take intellectual risks and not be frightened of making mistakes because they view these as a learning opportunity.

The learner attributes need to be infused into the teaching and learning of all disciplines, subjects and activities. Effective practice starts with small changes, in particular developing a climate that helps to nurture the attributes. Nothing is more important than teachers modelling the attributes and so the teacher attributes correspond to the learner attributes.

A great deal has been written about the failure of some school systems to prepare students properly for life in higher education and the modern world. Too much attention, it is argued, is given to preparing students for examinations instead of developing the learning habits needed to be effective independent learners and team problem solvers. One dangerous misconception is that teachers have to teach to the test to get the highest grades for students. We know that teaching students to be good learners not only prepares them for university and life, it will also result in higher grades in high-stakes assessments.

We hope that this guide will stimulate discussion and the sharing of practice between schools. One of the main sources for the material presented here has been presentations and discussions at Cambridge Schools Conferences over the past six years. These events will continue to provide rich materials and perspectives. To help us create this guide schools from 15 countries have volunteered case studies to share their experiences and practices. We are very grateful for their contributions (see **Appendix 2** for a summary of participating schools).

Our mission at Cambridge International is to support schools around the world to give students the best education for life. Our qualifications and educational programmes are well designed for this purpose. However, they must be supported by effective teaching, learning and leadership practices. This guide, along with all our professional development activities, will help teachers to develop their classroom practice to improve student outcomes. It will also support school leaders to understand what effective schools look like – and how to become one.

How to use this guide

Schools use Cambridge programmes and qualifications in more than 160 countries. Each one of these schools is a unique community with its own identity. We believe that one curriculum prescription or educational approach can never be suitable for all. This guide will help school leaders, governors, proprietors, teachers, parents and students think about how to engage with the learner attributes in their own contexts. Only you know your school and its community, and only you can drive school improvement. Our role is to support you in making the right decisions for your school.

What teachers do in the classroom has the biggest impact on student learning, so much of this guide focuses on effective teaching practice. Teachers themselves need to exemplify the attributes in everything they do: teachers are learners, which is why the attributes are the same for teachers and learners.

Education, however, does not begin or end in the classroom, so we have also given attention to the co-curricular programme and developing a school culture of learning. Throughout the guide we also make references to resources for schools and to complementary programmes run by other organisations.

Chapter overviews

Chapter 1 The learner attributes are closely related to a wide range of educational ideas and approaches and cannot be considered in isolation. Chapter 1 explores some of these and introduces some of the themes that are considered in more detail in later chapters.

Chapter 2 builds on the ideas presented in Chapter 1. It considers the characteristics of a broad, balanced and coherent curriculum that schools need to support the development of the learner attributes. The second part of the chapter focuses on a supportive co-curricular programme.

Chapter 3 looks at the attribute of reflection and the related concept of learning how to learn. It explores the concept that schools need to have a learning, rather than a performance, orientation with reflection at its heart.

Chapter 4 considers innovation and creativity. These are fundamental to all academic disciplines and educational activities, not just the arts.

Chapter 5 looks at the profound impacts of wellbeing and stress on learning and performance, considering the pressures today's students are under. We also look at strategies to deal with stress.

Chapter 6 focuses on how schools can broaden the educational experiences of students through activities designed to nurture confidence, responsibility, compassion and wisdom. These activities have a particular focus on service learning and student leadership.

Chapter 7 looks at our Cambridge Global Perspectives® and Enterprise courses. These provide schools with an educational programme that is particularly supportive of developing the learner attributes.

Chapter 1: The learner attributes in teaching and learning

Overview

The learner attributes are closely related to a wide range of educational ideas and approaches and cannot be considered in isolation. This chapter explores some of these and introduces some of the themes that are considered in more detail in later chapters.

Competencies

A great deal has been written about the 'skills' needed to flourish in the modern, global, interconnected world. The *Assessment and Teaching of 21st Century Skills* researchers (Griffin, McGaw & Care, 2012) group these skills into four categories (see Table 1). While it can be argued that these have always been central to education, there is no doubt that they have become more prominent in the global information age.

Competencies might be considered to be a broader and better description of these than 21st century skills. Competencies are closely related to the learner attributes and refer to specific patterns of behaviour that enable someone to perform a task at the required standard. Competencies can be defined as: 'combinations of knowledge, skills and attitudes, which facilitate the application of knowledge to real world contexts' (see Cook & Weaving, 2013). The OECD (2005) says that competency 'involves the ability to meet complex demands by drawing on and mobilising psychosocial resources (including skills and attitudes) in particular contexts'.

To communicate competently, for example, an individual needs to be both knowledgeable and skilled in the language being used. But this is not enough. Effective communication is likely to draw on other resources including practical IT skills and skilled habits including confidence, reflection, empathy and creativity. Critical thinking, creativity and problem-solving all occur in contexts that will require specific knowledge, skills and understanding. However, they also require a range of intra- and inter-personal skills, and an inclination to demonstrate them.

Table 1

Defining 21st century skills	
Categories	**21st century skills**
Ways of thinking	Creativity and innovation Critical thinking, problem-solving, decision-making Learning to learn, metacognition
Ways of working	Communication Collaboration
Tools for working	Information literacy ICT literacy
Living in the world	Citizenship – local and global Life and career Personal and social responsibility – including cultural awareness and competence

> “Ultimately, education is not what we do to our children. Rather, it is what we do with them, and for them, to bring out the best in each of them, so that they grow up to embrace the best of the human spirit – to strive to be better, to build deeper wells of character, and to contribute to society.”
>
> **Mr Heng Swee Keat**, Minister for Education, Singapore, 2013

The importance of socio-emotional skills / competencies in the learning process

Put very simply, learning happens when students think hard (Husbands, 2014), effectively mobilising a number of different mental processes and resources that are both cognitive (such as reasoning and memory) and socio-emotional (sometimes called non-cognitive skills).

As well as developing knowledge, skills and understanding, learning involves transforming behaviours and attitudes that underpin cognitive functioning, so that students have the inclination and the resources needed to demonstrate competence.

Kautz, Heckman, Diris, ter Weel and Borghans (2014) describe a number of 'non-cognitive skills': these include personality qualities such as perseverance, self-control, attentiveness, resilience to adversity, openness to experience, empathy and tolerance of diverse opinions. They say that these skills:

- predict life outcomes at least as well or better than traditional measures of cognition
- have positive and strong effects on educational attainment. They also help to improve workplace and life outcomes
- can be enhanced, and there are proven ways to do so.

The Cambridge learner attributes provide a cross-curricular language that can support the development of these broader skills and personal qualities. It is also important to note that these skills are particularly valued in higher education and the workplace. Appendix 1 pprovides evidence of the attributes universities are looking for in undergraduates and considers core skills for employability.

Appropriate challenge

Constructivism, a well-established theory that explains how learning happens, has important implications for effective teaching and learning. Constructivism highlights the fact that learners construct their own understanding from their own experiences. Understanding cannot be transmitted from a person (or any resource) without the active engagement of the learner. The most important implication is that learning needs to engage and challenge the learner's thinking so that they are made to think hard. Every learner brings knowledge, understanding and learning habits to the learning process. These need to be recognised and positively challenged for learning to occur.

The concept of the proximal zone of development, introduced by Vygotsky (1978), is helpful in identifying the right level of challenge. The proximal zone of development describes the distance between what the learner can achieve working on their own and the level of their potential development when being guided by a skilled teacher [or peer]. Vygotsky pointed out that learning is optimised when students' thinking is extended beyond what they can easily manage on their own. Teachers have a responsibility to scaffold learning by challenging a student with carefully designed instruction and activities. These make the student think hard and challenge their existing understanding. Sometimes in learning environments expectations are too easy so learners are bored, or too hard so learners become frustrated and demoralised as the leap in understanding expected is too high.

Teachers are responsible for designing and delivering instruction and learning tasks that foster deep learning in the proximal zone of development. In order to achieve this, Hattie (2009) argues that teachers need to be activators not facilitators of learning. Skilled teachers understand where students are in their learning and then plan and implement appropriate activities and instruction to take them to the next level, constantly challenging student thinking.

Vygotsky's ideas are absolutely relevant to developing the learner attributes. Learners need to be made to think hard about what it means to be confident, responsible, reflective, innovative and engaged in all of the contexts of their learning in the school, within and beyond the classroom, so that their understanding of themselves as learners evolves. The concept of enjoying challenge is crucial. In the words of Mihaly Csikszentmihalyi (1990), p3:

'The best moments in our lives are not the passive, receptive, relaxing times…
The best moments usually occur if a person's body or mind is stretched to its limits in a voluntary effort to accomplish something difficult and worthwhile.'

Critical thinking, creativity and the problem of transfer

Critical thinking, creativity and problem-solving relate to particular disciplines. History, science, mathematics and the arts, for example, should all develop the ability to think critically and creatively, and they do this in ways that are not easily transferable to other contexts. This is because the capacity to think critically and creatively is intertwined with knowledge and understanding of a discipline. The main reason for including academic disciplines in the curriculum is that they nurture powerful knowledge (see Young, 2013) with applications that are not easily acquired from everyday experience. Students learn to think competently and solve problems as mathematicians, scientists, historians and artists.

Critical thinking and problem-solving have general applications beyond particular disciplines, of course, and the school's role is to develop these more general competencies. In this sense critical thinking is the ability to identify, analyse and evaluate situations, ideas and information to come up with responses and solutions. Creativity is the ability to imagine new ways of solving problems, approaching challenges, answering questions or creating products.

Because it is not easy to transfer what is learned from one discipline to another, for students to become effective critical and creative thinkers in this general sense they need to be able to reflect on and apply approaches they learn in academic disciplines in an interdisciplinary way. Interdisciplinary approaches need to be based on rigorous disciplinary understanding. Teachers, backed by a supportive curriculum, can help make connections in students' minds between what they learn in one context and discipline and another.

Every student's self-image and learner attributes profile will vary from one context to the next. If a student struggles with mathematics, for example, they are probably not as confident, responsible, reflective, innovative or engaged in this area as they are in others. Helping students identify their passions and areas of strength can form the basis of reflection around why it is that they perform well in one area compared to another. Reflective practices can help them to understand themselves as learners across the curriculum, maximising their strengths and minimising weaknesses.

Intelligence

There are lots of definitions of intelligence. Narrow definitions focus on problem-solving and mental agility in specific analytical problem-solving tasks and are often associated with intelligence quotient (IQ-g) as a general measure.

In a broader sense, intelligence can be understood as a person's ability to adapt to an environment and learn quickly from experience, demonstrating effective problem-solving strategies in a variety of contexts. This broader interpretation recognises the importance of personal competencies and practical problem-solving abilities as well as specific analytical skills.

Robert Sternberg (2009) views intelligence as the ability to achieve goals in life by capitalising on strengths and compensating for weaknesses to effectively interact with different environments using analytical, creative and practical abilities. He points out that successful students in higher education, in life and in the workplace have original creative ideas and the reflective and management skills necessary to make the best of their abilities. Sternberg observed that most of the successful graduate students he worked with were not those with the highest grades but those that demonstrated practical intelligence combined with wisdom and creativity. Practical intelligence is the ability to get things done, to communicate well, collaborate and see a task through to completion. Sternberg argues that intelligence, wisdom and creativity are learnable and can be developed over time. They are forms of 'developing expertise'.

The concept of wisdom, highly valued by Sternberg, is very relevant to the learner attribute of being responsible. It goes beyond being knowledgeable, stressing the importance of using knowledge well to make good judgements.

Howard Gardner (1983) suggested that traditional concepts and measures of IQ fail to measure or explain cognitive abilities. He said that intelligences are in fact multiple. He originally posited the existence of seven intelligences (musical-rhythmic, visual-spatial, verbal-linguistic, logical-mathematical, bodily-kinaesthetic, interpersonal and intrapersonal). He added naturalistic in 1995. Daniel Goleman (1995) popularised the term 'emotional intelligence', referring to the ability to understand one's own and other people's emotions and modify one's behaviour appropriately. He pointed out how critical emotional intelligence is in leadership.

Critics of multiple and emotional intelligence theory say they are more appropriately labelled as aptitudes or abilities, and empirical support for non-IQ-g intelligences is contested. More significantly there have been a number of popular books published suggesting educational approaches derived from these theories are based on poor reasoning and lack of evidence. It does not follow for example, as Gardner acknowledges, that students need to be taught differently depending on their own intelligence profile. Multiple intelligences are not learning styles. Such approaches, which assume students have preferred styles (for example visual, audio, kinaesthetic), have been discredited (see for example Riener & Willingham, 2010).

While recognising these limitations there are very important implications of how intelligence is understood for developing the learner attributes in schools.

1. Inclusive education practices that recognise individual strengths, and stretch and support all students should be valued. It's helpful to have what is sometimes called a 'growth mindset' (see Dweck, 2006 and Deans for Impact, 2015): this is where students and teachers believe that performance can be improved for all through goal-directed hard work. Teachers often have expectations of how particular students are going to progress, which tends to become a self-fulfilling prophecy. Students are sensitive to their teachers' expectations (Muijs, Kyriakides, van der Werf, Creemers, Timperley & Earl, 2014). At worst, this can result in students underestimating their own potential and underachieving.
2. If schools want to give students a broad education, preparing them for life, Sternberg's perspective on intelligence as developing the expertise needed to perform well in different environments has important implications for practice. The global information age requires students to navigate lots of environments using a combination of analytical, creative and practical abilities. This raises questions about what to include in the curriculum. Cheng, for example (2002, see Resources section), argues that there are a number of 'contextualized multiple intelligences' that are increasingly important in the modern world and schools should focus on developing these. The implications for curriculum of developing a wide range of expertise are considered in Chapter 2. The learner attributes can support a wide range of interpretations and approaches that schools adopt.

The importance of emotion and engagement

The importance of emotions in learning, thinking and decision-making is becoming increasingly well understood due to developments in neuroscience. In the past, the assumption was that the emotional and rational parts of the brain were largely separate systems. Immordino-Yang and Damasio (2007) and Immordino-Yang (2016) suggest a very high level of interdependence between effective emotional and cognitive functioning: 'It is literally neurobiologically impossible to build memories, engage complex thoughts, or make meaningful decisions without emotion' (Immordino-Yang 2016, p.18).

Immordino-Yang (2016, pp. 36–40) introduces the concept of emotional thought. This means that emotional and cognitive processes interact to produce thought processes that affect learning and reasoning and underpin decision-making. Having an effective 'emotional rudder' is critical, particularly for students to be able to use knowledge effectively.

Because learners construct their own understanding of the world, bringing prior knowledge and learning habits to the learning process, it is a fact of human nature that we tend to internalise experiences we have based on our existing world view and emotional states. No two people will internalise an experience in the same way. Schools need to nurture emotional awareness by making emotions (as well as reason) an object of reflection and respecting the role emotions play in learning.

Implications for teachers and schools include creating a culture of learning in classrooms so students feel emotionally safe. It is well known that adolescents are particularly concerned about their social image. This needs to be recognised so that students learn to see making mistakes as a learning opportunity and not something to be feared. This is considered in Chapter 5.

The learner attribute of engagement is particularly important. We think more deeply about things that engage us. Fostering emotional engagement in lessons is a great way to help students understand the relevance of what they are learning to their lives. Students need time to engage deeply with concepts and material. An overcrowded curriculum can result in rushing through material without fully engaging with it. One reason teachers need to generate their own schemes of work and lessons plans (see the *Developing your School with Cambridge* guide, Chapter 4:

www.cambridgeinternational.org/teaching-and-learning/developing-your-school-with-cambridge/) is so they can make it engaging and relevant.

Our first case study is a good example of how a school department made learning engaging. It also illustrates how the school supported the development of all the learner attributes with one well-designed activity. The annual writing event helps to improve students' language skills – but that is only a part of its purpose. Students make a personal emotional connection to writers (they become engaged) and produce their own innovative creative response. They are encouraged to discuss ethics, demonstrating responsibility. Reflection is essential to the process, and developing confidence an inevitable outcome, reflected in the students' responses.

Case study 1:

Developing a community of confident and engaged learners at the United World College of South East Asia (UWCSEA)

When planning learning activities for students in the English department at UWCSEA (East Campus), Kate Levy, the Head of Faculty, and her team work hard to consider how students engage with concepts in the English curriculum and the 'real world'.

Each year Kate organises a fortnight-long writing event for students in grades 9 and 10. The 'Write Here' event exposes students to a range of writers, allowing them to hear their stories, their inspirations and their challenges. In this way students make a personal connection to real stories and the power of the pen.

Kate brings in writers from a variety of professions: novelists, speech writers, journalists and those in the marketing industry. They share their experiences of the writing process.

The event is an engaging way for students to:

- develop an understanding of what it means to tell a story responsibly and the ethical concerns that come with it
- ask questions about media representations of people, places, events, and sensitising students to how truths are constructed, and how bias, assumptions and attitudes are embedded in the content, style and structure of the article. The students meet and interview journalists in the parent body about their work
- explore the relationship between words and images through the school's photojournalist writer-in-residence
- consider the relationship between form and purpose. What story and ideas do they want to share, why, and which text type would serve this best?

Case study 1: continued

- consider the values, expectations and sensitivities of the intended audience
- engage in critical thinking. It is quite provocative to hear a photojournalist reveal that he finds photography limited and potentially dangerous as a storytelling tool. Or that same journalist reveal that he felt some sympathy for the Khmer Rouge commandant that he tracked down and helped to bring to justice. Or to meet a teacher-author who had to battle with their editor at every stage to say what they wanted in a book about Western and Asian parenting. Or to hear a spoken word poet (and former refugee and ex-con) reveal how a life of displacement and violence in the US penal system (he spent 18 months in solitary confinement) gave him his poetry.

Students listen intently and talk animatedly about the ideas and the concepts raised by the writers. Many of them make insightful connections between very different speakers. The students' brief is to interview the guests to uncover their stories and then to share those stories purposefully and responsibly.

This ensures high levels of engagement as students respond to issues or stories that they feel connected to. The readers of the students' work (**click here to see an example**) are an authentic audience: perhaps an article for the school publication with an audience of 11 000+, an open blog post or a letter to the Board of Governors. In this way students understand the responsibility of the writer and develop the confidence to communicate appropriate messages in appropriate forms to a wide range of audiences.

By sharing stories through writing, students help to build understanding and compassion in our community. However, through their writing they also build their confidence not only as writers, but as young people with a voice in the community.

The importance of diligent and deliberate practice

Students need goal-directed deliberate practice to develop and embed skills that will help them progress, improve their understanding and apply their knowledge. Deliberate practice focuses on specific areas of weakness or misunderstanding. 'Diligent' refers to the fact it is usually repetitive and involves hard work.

Nowadays, knowledge is freely available on the internet and computers can perform many skill based tasks. One dangerous and false argument is that students therefore do not need to learn content or practise basic skills. This is based on a misunderstanding of what competence is. Form and substance are both equally important. Pak Tee Ng (2016) points out that a master of the martial arts has both substance, developed by repeated diligent practice of basic skills, and the aptitude to apply these in creative and useful ways. The same analogy applies to musicians, scientists, mathematicians, historians, linguists, artists, sportspeople or experts in any field.

One critical role of assessment for learning in classrooms is to identify areas that require focus and deliberate practice that will help students, once they have mastered these, to progress onto the next stage. Often this requires breaking down complex tasks or expectations into smaller component parts and practising to improve these specifically.

One of the limitations of project or inquiry-based approaches, if they are overused or poorly designed, is that students can be asked to demonstrate complex skills without mastering the component skills that are required for competent performance first. The assumption is that these skills are best developed through 'authentic' learning activities that are as much like the desired end product as possible. This may not actually be a good way to develop component skills (see Christodoulou, 2016). This needs to be balanced with the fact that carefully designed project and inquiry work, as part of a broad-based teaching strategy, can support engagement and help students understand component areas that they need to target and improve through deliberate practice.

Critical thinking, creativity, communication and collaboration 'depend on complex reasoning as well as multiple low-level skills that first must be automated' (Abadzi, 2015, p. 35). The importance of the working memory as a bottleneck to processing power in learning and performance is well understood. When learners practise a task like mental arithmetic it becomes automatic and embedded in long-term memory, freeing up space in the working memory for more complex calculations. Longer and

complex chains of skills can only be effectively developed after smaller chains have been formed through practice. Students have limited working memory and this can be overwhelmed by tasks that are too cognitively demanding.

Knowledge is also a prerequisite for sophisticated analysis and understanding. Studying history, for example, should help students to become excellent historians who understand concepts like continuity and change, similarity and difference, cause and effect. This needs to be based on detailed subject knowledge. What that knowledge actually is will vary depending on culture and context. But factual knowledge matters. Acquiring it will help students to understand concepts and transfer their understanding to new contexts.

High-performing musicians and sportspeople understand why they repeatedly practise basic skills, and good schools have a strong expectation of goal directed deliberate practice based on a growth mindset in all disciplines. This is why deliberate and diligent practice, along with all approaches used to support learning, need to become a topic of reflection and discussion in schools.

It is important to note, of course, that the wrong sort of diligent practice, drilling students with what teachers or tutors perceive as the correct answers needed to do well in examinations, is counter-productive. It destroys confidence and engagement, does not teach students understanding of the discipline, is likely to produce worse examination results, and does not prepare students for life. It develops dependency rather than independence.

The importance of reflection in learning

Skilled reflection deepens understanding and permits students to apply their knowledge in new contexts. It is also at the heart of becoming a self-regulated, life-long learner. According to David Whitebread (2017), 'children developing self-regulatory abilities predict academic outcomes and emotional wellbeing more powerfully than any other aspect of children's development'. Chris Watkins (2010) argues that to develop students' self-regulatory abilities, to learn how to learn, schools need to have a learning rather than a performance orientation. This involves making 'learning an object of attention and reflection, in other words to make learning an object of learning'. When this is practised well, students also do better in high-stakes assessments.

The Education Endowment Foundation (EEF) is an independent research foundation in the United Kingdom that investigates the effectiveness of educational interventions. It has shown that metacognitive approaches (a term used to refer to a learner's ability to self-regulate their learning and learn how to learn; see Chapter 3), have consistently high levels of impact. Evidence suggests that the strategies and habits associated with learning how to learn can be particularly effective for low-achieving students. This is detailed in the Teaching & Learning Toolkit: **https://educationendowmentfoundation.org.uk/resources/teaching-learning-toolkit/meta-cognition-and-self-regulation**

John Hattie's *Visible learning: A synthesis of over 800 Meta-Analyses Relating to Achievement* (2009) presents similar findings to the EEF. Hattie stresses the importance of making students' thinking visible, both to the teacher and the student, as a critical process in developing students' understanding of the material being learned. Developing metacognitive awareness and control is identified as having a powerful effect on students' learning and their ability to become independent learners.

Experiential learning, reflective practice and 'challenge education'

Experiential learning engages learners through direct experience of authentic problems and challenges. It is supported by focused reflection as a means of developing skills, acquiring knowledge and developing positive attitudes. The idea is relevant to classrooms, co-curricular activities and service learning.

The extent to which a school engages with experiential learning will depend on its vision, context and culture. All schools should to be concerned with relating learning in classrooms to the students' broader experiences, making learning relevant and engaging. As argued earlier, teaching and learning needs to constantly challenge students' thinking. This will involve using a variety of approaches including: collaborative group work, investigations, fieldwork, projects and presentations in addition to direct instruction and diligent practice.

Practical work is very important in a number of disciplines. To really understand science, for example, students need to practise the scientific method. Practical skills, like any other set of skills, have their own developmental pathway. Actually doing and experiencing a scientific experiment cannot be adequately reproduced by watching one or reading about it in a textbook.

Good reflective practice is fundamental to experiential learning. Kolb (1984) created the cycle of experiential learning (see figure 1), which contains four elements. Concrete experience forms the basis for observation, analysis and reflection. These lead to a new theory or understanding which forms the basis for learning in the next cycle. The critical importance of reflection in learning is considered in detail in Chapter 3. The reflective cycle forms the basis of the Cambridge Professional Development programme for teachers.

Proponents of 'challenge education' advocate the value of taking students outside their comfort zone, requiring them to experience learning in the real world of their communities, the workplace, the wilderness. Being challenged can develop confidence, resilience, practical problem-solving abilities, teamwork and wisdom which aren't easily developed in classrooms. This is considered in detail in Chapter 6.

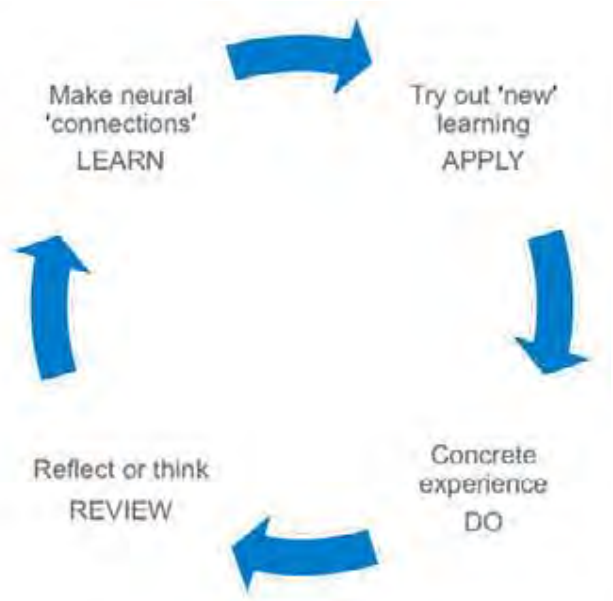

Figure 1: The reflective cycle adapted from Kolb (1984)

The importance of school culture

The educational programme in a school cannot meaningfully be viewed in isolation from the culture in which it operates. Culture creates the environment in which learning takes place and includes hidden and unintentional messages that may contradict the school's stated aims and objectives. Everyone involved in the school community – teachers, administrators, governors, students and parents – will have their own core values that determine how they think and act. These must be consistent with those of the school and supportive of the learner attributes.

Even if the school backs its mission with a clear strategy, it can be difficult to make progress without addressing culture. School culture is complex. Understanding and engaging with school culture is both an essential and often neglected part of school development. Culture operates on different levels. The most obvious is the surface level, which includes the visible aspects of pedagogy, curriculum and the overt behaviours of teachers, administrators and students. But schools also need to engage with deeper structures, including fundamental beliefs and value systems. Problems occur when deep values don't match surface appearances.

What are the implications?

- Curriculum is built on culture so it is in reality a local construct. No two schools are the same. All Cambridge International or any other external organisation can do is support you to develop your own.
- Culture is not easily changed. It is important to understand and respect what your culture is and work with it, gradually evolving practice rather than trying to enforce practices that are not fully understood or accepted.
- Evaluation is central. Are learners actually experiencing what you intend? If not, why not? Often the intended prescribed curriculum is different from the experienced curriculum.
- Recruitment of teachers, school leadership and governors is absolutely critical. A great deal of attention needs to be given to recruiting people who share the school's vision.
- Most learning happens outside the school, at home and in the wider community, so parental understanding and support for the school mission is crucial.

It is important to teach parents about the value of the learner attributes. In many schools parents are very results focused and might only be engaged with the learner attributes at a surface level. The learner attributes will be more effective when they are actively supported beyond the school by parents deeply committed to them. This guide is intended to help with this process by explaining why supporting the learner attributes will improve results as well as prepare students for life.

School culture is not static and it does change over time. Efforts to ensure that the culture is supportive will be rewarded with more effective practice.

Case study 2 is an illuminating example of how a school reflects on learning that brings together a number of ideas discussed in this chapter. The focus is on learning, and the school recognises that this will automatically lead to performance improvements. It concerns itself with cognitive and affective skills, knowledge, understanding and learning habits. Students are supported to become leaders of their own learning with the approach developing confidence, engagement and reflective practice for both learners and teachers. The desired outcomes are concrete in terms of improving Arabic language skills, and the school recognises the importance of culture, and that learning is different in every class and context.

Case study 2:

Doha College's Lesson Study* approach: High-performance learning in an international context.

How to revolutionise your ideas about learning and therefore change your teaching accordingly.

Watch the video at
https://vimeo.com/228214201

As part of the pioneering High Performance Learning (HPL) programme, launched by Professor Deborah Eyre, we reviewed our Lesson Study planning, observation and analysis cycles to gain a deeper understanding of how students learn, and, in particular, if and how students from different cultural backgrounds can be further supported to excel in their learning. We have subsequently adapted our pedagogy as we have engaged in an approach that is much more responsive to students' learning needs and therefore is a more harmonious learning process between the student and the teacher.

Lesson Study, first introduced in Japan in 1870, is an action research focusing on the development of teacher practice knowledge. The exclusive, non-judgemental focus on the learning processes aims to help us as teachers to challenge some of our misconceptions about how students actually learn. This teacher inquiry looked at students as having individual needs rather than as recipients of our teaching, and this encourages teachers to adapt their teaching to tune in much more accurately to the learner.

We were particularly interested how we, as teachers, can best embrace the notion of HPL. An HPL approach in school develops the cognitive skills and attitudes necessary for students to be successful not just academically but also in the wider aspects of their lives. Skills such as risk-taking, meta-thinking or intellectual curiosity are improved by developing their independence, confidence, ability to collaborate, deal with failure and perseverance, to name but a few

Case study 2: continued

qualities. We felt that by engaging in the observation of the learners, taking on board students' perception of their learning and acting upon it, we would gain an insight of how to best to empower our students to strive for excellence.

We chose a sequence of Arabic lessons to case study three students where we could observe a wide array of context. This included students with a range of social, linguistic and cultural prior knowledge and experience of the subject, as well as different learning styles, abilities, personalities and genders. We planned the research lessons collaboratively, then observed the learning (and not the teaching!), interviewed students about their learning experience and, finally, analysed the progress made. That research, data and student feedback then fed into the design of the subsequent lessons. We found ourselves refining our teaching approach to meet the actual requirements of students, rather than what we thought would work from the teacher's point of view.

The process was a remarkable experience for all the teachers involved, on many levels. Firstly, during the planning stage, we realised that as teachers we work in isolation so that our decisions, thinking and judgement processes are not a product of negotiation or compromise but are very subjective and one dimensional. Secondly, we have a pre-conceived idea of what teaching and learning should look like. Having completed team planning based on our 'knowledge' of students and 'half a century' of teaching experience, we watched 'our' lesson fall apart. We realised that so much of our focus is on ourselves and how we deliver material. Although we have incorporated support, assessment for learning and student feedback into our planning, we used it as a consequence to the learning, rather than enabling it to guide the learning itself.

Consequently, against our expectations, a semi-native Arabic speaker underperformed as he was not comfortable with the grouping (which derived, perhaps, from his social background) and, rather than leading the learning, he would only react when prompted. On the other hand, a student struggling with the language felt reassured in a group composed of the opposite sex and performed excellently, displaying self-regulation and critical thinking. What surprised us the most was a high-performing student who reacted as predicted to the lesson but, in the interview, commented how unhappy she was with the timings which prevented her from analysing the topic in depth.

The whole process of the Lesson Study made us aware that to provide a truly personalised learning experience, where students strive to achieve the best they can, we need to positively embrace the fact that students are the leaders of their own learning and not us, or certainly not just us. As teachers, we were reminded that we too have to be constantly learning from the students in order to provide them with opportunities to succeed. The final case study lesson was much more in tune with the actual learning needs of the three case study students, who were now fully engaged in their learning. Thus, although the notion of 'knowing your audience' is an old one, we found the process tremendously valuable. Now back with our classes, we are continuing to question and examine our and students' approach to learning, making the experience continuously evolving and therefore better.

Chapter 2: Designing and delivering a curriculum that supports the development of the learner attributes

Overview

This chapter builds on some of the points made in Chapter 1 of this guide and Chapter 2 of the *Implementing the Curriculum with Cambridge* guide **www.cambridgeinternational.org/curriculumguide**.

Schools interested in developing the learner attributes need to develop a curriculum that is broad, balanced and coherent in a number of ways.

A broad and balanced curriculum

The *school curriculum* is sometimes narrowly defined to include only the subjects a student studies within a school year, and in sequential years, as they progress through the school. The concept of curriculum, however, can be considered more broadly to include the *co-curricular curriculum*, which recognises the valued educational activities that support learning beyond classes and subjects. We also need to recognise the hidden or informal curriculum. This is learning that takes place as a result of the culture and climate of the school and is often unacknowledged. Broad definitions of curriculum focus on the overall learning experience a student receives as a result of the educational programme and culture in the school.

It can be useful to distinguish the curriculum, which includes all valued learning, from qualifications and subjects. The curriculum in an excellent school is more than the sum of the qualifications, subjects and activities that are visible on the school schedule. This is because careful attention in curriculum design and implementation is given to learning within, across and between the subjects and activities. All subject teachers support the development of the learner attributes and other qualities identified in the school's vision. Breadth, balance and coherence need to be built in by design.

Here are a few questions to consider for your school. Does the curriculum:

- expose students to learning powerful knowledge and skills that will be useful for them in the future? Is there an appropriate balance of subjects, disciplines and activities?
- make connections in students' minds between what they are learning in different topics in a discipline and between different disciplines?
- teach subjects and disciplines in a way that helps students master basic skills and build on these to develop deep understanding of the material and the ability to apply their knowledge in unfamiliar contexts?
- encourage students' creative contributions?
- help students explore their interests and passions, exposing them to new possibilities?
- nurture learning habits in all subjects and activities that help students understand themselves as learners so that they can help themselves learn new material?
- support the development of emotional, physical and creative competences?
- support the development of collaborative and individual learning habits and skills?
- provide challenge in non-academic practical areas, for example service learning?
- support students' physical and mental wellbeing?

How should the curriculum be organised?

Most schools operate a timetable that divides the day into blocks of time in which subjects are taught. The main reason for including academic disciplines in the curriculum as discrete subjects is that they nurture powerful knowledge (Young, 2013), with applications that are not easily acquired from everyday experience, so that students learn to think critically and creatively as mathematicians, artists, scientists, historians etc. Each academic discipline has its own methodology. Critical thinking in science, for example, requires an understanding of the scientific method and the development of scientific knowledge and understanding which is embedded in practice and theory. As competence and understanding grow, learners can take on more advanced concepts and challenges because they have a solid disciplinary foundation.

The idea of powerful knowledge is based on improving understanding and performance, not just learning facts.

One danger with organising learning in this way is that students, teachers and parents can start to view knowledge as compartmentalised into silos that do not relate to each other. Interdisciplinary understanding, the ability and confidence to traverse disciplines, make connections and develop a holistic appreciation of knowledge that provides new perspectives, is extremely important.

For this reason some schools, particularly at primary level, organise the curriculum around inter-disciplinary or trans-disciplinary topics. This can be effective provided careful attention is given to developing the foundational literacies and knowledge needed for progression. Disciplinary understanding needs to be the foundation on which a rigorous interdisciplinary approach is based, otherwise learning can lead to superficial coverage and confusion. One alternative is to use interdisciplinary courses to complement traditional subjects and timetable them separately. These can provide an opportunity for students to investigate interdisciplinary questions using knowledge and skills acquired across the curriculum. This is the approach adopted in Cambridge Global Perspectives (see Chapter 7).

Excellent schools support the development of interdisciplinary understanding by expecting teachers to plan collaboratively. Teachers need to understand what other teachers are teaching a particular year group in order to make connections with their own classes. This can be facilitated through using curriculum mapping exercises to coordinate the curriculum so that knowledge and skills taught in one class support learning in another.

What subjects and activities should the curriculum provide?

This has to be the choice of the school based on school values expressed in the school mission statement, student age, local culture and national requirements. Curriculum is a local construct owned by the school; no one curriculum prescription is suitable for all.

There are a number of views on how to choose what to include in the curriculum and what weighting to attach to each. Traditionally these have emphasised cultural transmission (Lawton, 1989), where the school's role is to empower students with the knowledge, skills and competencies valued in their culture. Today, we see schools placing increasing emphasis on transformation of society, which is based on the argument that the skills needed to succeed in the modern world are different from in the past (see for example Cheng, 2002). Another perspective highlights the critical importance of helping students to identify and develop their passions. All these perspectives have value and they should be viewed as complementary approaches, not alternatives.

A good curriculum must respect local culture and traditions, recognise the changing nature of the world and encourage students to explore their interests. The terms broad and balanced are relative. There is no one right answer about the extent to which schools will want to engage with ideas presented in this guide. One curriculum prescription is not suitable for everyone and some schools will want to specialise in particular disciplines more than others.

Decisions about what to include in the curriculum have an opportunity cost. There are only so many hours in a school day, and days in a school year. Including more disciplines and/or giving more time to particular disciplines/subjects will have a cost expressed in terms of the best alternatives lost. There is, therefore, a potential trade-off between depth and breadth that schools must consider in designing their curriculum. If a school values the learner attributes it needs to evaluate what it offers to ensure an acceptable degree of breadth, balance and depth in curriculum planning.

One common and dangerous misunderstanding in curriculum design is that adding more subjects or content improves it. In fact the opposite is often true. Covering too much content can reduce the quality of that coverage. Howard Gardner made an important point when he said that 'the greatest enemy of understanding is coverage' (Brandt, 1993). What matters most is the quality of engagement in learning so that students learn to deeply understand the material and can apply that understanding in new contexts. This is considered in more detail in Chapter 3. This was one reason why the phrase 'teach less learn more' was introduced into the Singaporean national curriculum (see Ministry of Education, Singapore, 2015).

One way of optimising learning, given time constraints, is to look for areas of synergy across the curriculum. The statement 'an excellent curriculum is more than the sum of its parts' means that learning is more effective when key processes and competencies are reinforced in all disciplines and activities. The learner attributes are designed to help

schools facilitate this. Creativity and innovation, for example, are fundamental to all disciplines and need to be nurtured across the curriculum. They are not just confined to arts subjects (see Chapter 4).

There is also a danger in trying to create a discrete subject out of everything that is valued when the desired learning outcomes are better infused in the curriculum as a whole. Learning how to learn and personal development are concerned with habits and skills that are foundational to performance in all areas, and therefore the concern of every teacher and class. Students need to experience them as habits reinforced across the curriculum. Everything that has value does not need to result in a qualification.

Another important consideration to be aware of in designing the curriculum is the fundamental importance of language. Language is privileged in the curriculum as learners are dependent on their understanding of a language to access knowledge and skills in all subjects taught through the medium of that language. This has direct implications for the student's first or best language and the language of instruction of the school. Students attending international schools are often learning the curriculum through the medium of English, so developing a high level of English language competence will help them learn.

It is also very important that all students continue to develop their first or best language, this can be neglected if attention is just focused on English. All subjects students learn provide rich opportunities for language development and teachers need to be language aware. Students can only become more confident, responsible, reflective, innovative and engaged if their powers of expression and communication, mediated through language, are enriched. Language is also critical to developing student identity and international understanding. Cambridge has published a number of resources on language awareness and bilingual education recognizing the critical importance of language in the curriculum. Further information is available at: **www.cambridgeinternational.org/programmes-and-qualifications/bilingual-education/**

Curriculum coherence, assessment and teaching that support deep learning

We talk regularly to universities about our syllabus development. They often tell us how important it is for them that students understand key concepts and ideas deeply, and can take learning from one area and apply it elsewhere in novel ways. It is mainly for this reason that the high-stakes summative assessment we provide is linear, which means it takes place at the end of the course. This allows students more time to think, mature and practise before they are assessed. Teachers have more time to engage students' interests and support their development through assessment for learning rather than assessment of learning.

Coherence is important to support deep learning. This is different from the concepts of breadth and balance considered earlier. A coherent curriculum organises learning in a carefully planned and aligned 'spiral' instructional system. Oates (2010, p. 13), citing the work of Schmidt and Prawat (2006) relating to effective practice in national education systems, points out: 'A system is regarded as coherent when the curriculum content, textbooks, teaching content, pedagogy assessment and drivers and incentives all are aligned and reinforce one another.' The same principle holds true for effective schools. Curriculum, assessment and pedagogical practice are well aligned and mutually supportive. Learning experiences are thoughtfully sequenced, respecting students' developmental stages.

Our syllabuses, teacher support material, teacher professional development and assessments are designed by subject experts to ensure a smooth progression from primary to upper secondary. We plan the progression carefully so it respects the progression of knowledge and understanding needed to advance to the next stage in each discipline. Subject curricula are based on key concepts, principles, fundamental operations, key knowledge and the learner attributes.

We use ideas about important concepts in a number of ways. Threshold concepts are the ones that students need to understand before they can engage with more difficult material as they progress through a discipline. These are fundamental to curriculum and assessment planning and are used to decide what goes into syllabuses, and to define the level of demand expected, from primary to upper secondary. The order is critical and students need to be exposed to more complex ideas earlier on before they can be

expected to master them. Learning progressions need to be based on a learning spiral where students return to knowledge, concepts and skills repeatedly.

The term 'key concept' is specifically used by Cambridge International to describe essential ideas that help learners to develop a deep understanding of their subject and make links between different aspects. Key concepts may open up new ways of thinking about, understanding or interpreting the important things to be learned. These include a range of significant ideas and organising concepts that help learners to develop a deeper understanding, making sense of their subject and making links between different aspects of it. They can be transformative in nature and can be compared to a door or portal (Meyer & Land, 2003), opening up new and previously inaccessible ways of thinking about the important things to be learned. They support improved ways of understanding, interpreting or viewing, which helps the learner progress. As Cambridge International redevelops its syllabuses, key concepts are being emphasised more clearly (see, for example, Table 2) with the intention of helping students gain:

- a greater depth as well as breadth of subject knowledge
- confidence, especially in applying knowledge and skills in new situations
- the vocabulary to discuss their subject conceptually and show how different aspects link together
- a level of mastery of their subject to help them enter higher education.

Table 2: Example of key concepts from Cambridge International A Level Geography

The key concepts on which this [Cambridge International A Level Geography] syllabus is built are set out below. These key concepts can help teachers think about how to approach each syllabus topic in order to encourage learners to make links between topics and develop a deep overall understanding of the subject. The teaching support package gives teachers guidance on integrating the key concepts into their teaching. See page 7 for more information on our teacher support.

1. Space: the implications of spatial distributions and patterns of a range of physical and human geographical phenomena.
2. Scale: the significance of spatial scale in interpreting environments, features and places from local to global, and time scale in interpreting change from the geological past to future scenarios.
3. Place: the importance of physical and human characteristics which create distinctive places with different opportunities and challenges.
4. Environment: how the interactions between people and their environment create the need for environmental management and sustainability.
5. Interdependence: how the complex nature of interacting physical systems, human systems and processes create links and interdependencies.
6. Diversity: the significance of the similarities and differences between places, environments and people.
7. Change: the importance of change and the dynamic nature of places, environments and systems.

Teachers are expected to embed the key concepts through the study of the topics, both in general and specifically through examples and case studies.

Embedding the learner and teacher attributes in teaching practice

It is the teacher's responsibility to take Cambridge syllabuses and teacher support material, and develop appropriate schemes of work and lesson plans that provide engaging and locally relevant classroom activities for students. Cambridge syllabuses and support material also emphasise the learner attributes in subject-specific ways that complement their more general use across the curriculum (see the example in Table 3).

Table 3: The learner attributes in Cambridge Mathematics

Confident	In using and sharing information, ideas and mathematical techniques to solve problems. These skills support work in other subject areas as well as in mathematics.
Responsible	By learning and applying skills which prepare them for future academic studies, and also help them to become numerate members of society.
Reflective	Through the development of insight into the connections between different branches of mathematics and the steady build-up of mathematical and modelling skills.
Innovative	Through solving both familiar and unfamiliar problems in different ways, selecting from a range of mathematical and problem-solving techniques.
Engaged	By the beauty and structure of mathematics, its patterns and its many applications to real-life situations.

While developing a culture of learning in a school that emphasises effective learning habits will create a supportive environment, nothing is more important than teachers being good role models, exemplifying the Cambridge learner attributes by being confident, responsible, reflective, innovative and engaged themselves.

> “How can we expect inspired students without inspired teachers?”
>
> **Pak Tee Ng** at Cambridge Schools Conference, 2016

Collaboration

One potential limitation with curriculum in schools is that learning tends to be focused on the individual. Most summative assessment practices, notably examinations, assess the student's own knowledge and problem-solving abilities. Students need to learn to function effectively as team members and leaders as this an important ability needed to get on in life and the workplace. They also need to learn to solve problems collaboratively. The Organisation for Economic Co-operation and Development (OECD, 2013, p. 6) defines collaboration as follows:

'Collaborative problem-solving competency is the capacity of an individual to effectively engage in a process whereby two or more agents attempt to solve a problem by sharing the understanding and effort required to come to a solution and pooling their knowledge, skills and efforts to reach that solution.'

Collaborative problem-solving requires teamwork where individuals actively, responsibly and productively work towards a shared goal. This requires high levels of emotional competence and inter- and intra-personal awareness. Collaboration is more sophisticated than cooperation. A cooperative task may involve dividing up the work equally and everyone getting on with their share. Collaboration requires collective intelligence and agility. Individual responsibilities may change as progress or obstacles are met. Many schools tend to support cooperative learning rather than collaborative learning.

Being an effective collaborator requires additional habits and skills to being a good individual learner. Students need to be able to define the problem and ensure they have a joint understanding of what is being asked, think critically as a group, communicate

and reflect on how well the group is progressing towards solving the problem. Effective collaboration is linked to the concept of student leadership considered in Chapter 6. Leadership requires monitoring that the group is doing the right things towards achieving the set task and adjusting practices and work as required. Leadership should be viewed as a process rather than a position of responsibility, and is often distributed with different individuals contributing as leaders in different ways and at different times.

Schools that focus on the learner attributes have a responsibility to provide opportunities for collaborative learning through well-planned learning activities. Many academic disciplines can provide such learning opportunities through collaboration, including social science fieldwork and science practicals, or project work in courses like Global Perspectives and Enterprise (see Chapter 7). The co-curricular programme provides opportunities for group work and collaboration, as many of the case studies in this guide illustrate. Chapter 6 considers how 'challenge education', service and leadership can support the development of collaborative skills.

The assessment of collaboration requires careful consideration of an individual's contribution to the success of a group. This means teachers need to analyse the processes that led to group performance, and reflect on individual and group performance. The process of collaboration, as well as the product of the group, needs to be assessed at least formatively in terms of reflection and feedback.

Information literacy and research skills

Students today are bombarded with information. It has never been more important to learn how to argue critically, evaluate evidence and handle information wisely. Information literacy is closely related to learning how to learn (considered in Chapter 3) and needs to be the concern of all disciplines. Many disciplines focus on critical thinking skills and the evaluation of evidence. These are usually context specific but students can learn to apply them more broadly through supportive teaching and appropriate reflection.

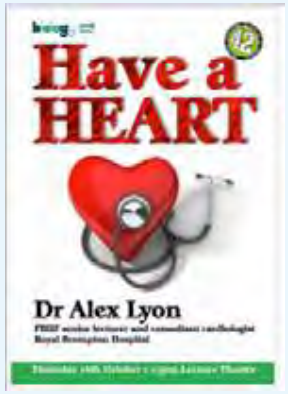
Learning how to research is vital for success in higher education and the world of work. This means being able to define then investigate a significant question, evaluate evidence and prepare and communicate an argument in extended writing and through spoken communication. It is also an engaging process that will develop confidence, innovation and responsibility.

A well-balanced curriculum provides students with the opportunity to research as a part of their learning experience. It is important that teachers help students to understand research methodology and to improve their research skills. As with any learning activity it is important that students are made to think hard and reflect on the process of research. Cambridge Global Perspectives, highlighted in case study 4 and considered in detail in Chapter 7, is a programme specifically aimed at developing critical thinking and research skills. There are also many possibilities for the co-curricular programme to support the development of practical critical thinking and research. Case study 3 provides one example of this.

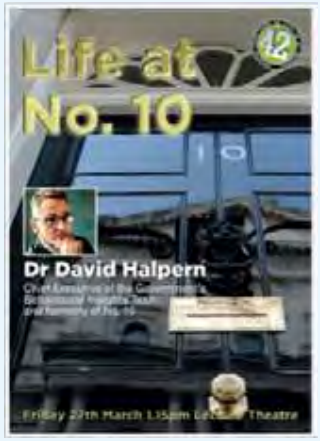
Students at Frensham School, Australia (*case study 4*)

Case study 3:

Supporting the development of research skills at The Perse School, Cambridge, UK



Organising a structure: Independent learning and research



Research and scholarship are at the heart of The Perse School's learning culture. The school supports the development of pupils as effective independent learners by a programme of embedded research skills built into the curriculum. There is a strong emphasis on helping students make progress in their capabilities as researchers. Every year group is offered activities ranging from reading groups to lunchtime lectures with experts and external partnerships, trips and visits. Extension tasks and booklets for every subject are issued at the start of the year with a range of challenging material to dip into. The emphasis is on supporting pupils to become independent learners by making good choices about how to direct their time and extend their learning.

Pupils are offered a pipeline of research opportunities as they move through the school, with an increased level of depth and challenge at each stage. These begin with internally designed and assessed independent investigation programmes with teacher mentor support in Years 7 and 8, with the option of undertaking an externally validated research qualification in Year 10 and Year 12 respectively.

Pupils have the opportunity to develop great depth of subject knowledge at the same time as learning valuable skills in project management, the critical evaluation of source material and metacognition and reflection. This emphasis on research-driven learning as a creative approach to the curriculum reflects the school's location and values, situated as they are in Cambridge, a global centre of scholarship.

The school's lecture series 'The 42' draws on volunteer speakers to provide a weekly lunchtime focus lecture with Q&A opportunities. It draws a wide student audience from all year groups

The co-curricular programme

Co-curricular refers to learning experiences, usually organised into activities and programmes, which complement what students are learning in the classroom. Another term often used with a similar meaning is extra-curricular activities, 'extra' referring to the fact that these fall outside the scope of the 'normal' curriculum. Co-curricular is a better term as it suggests a central idea in this guide that this valued learning is not extra to the curriculum but fundamental to it.

The learning experiences provided by the co-curricular programme complement and support what the students are learning in the academic programme. They play a particularly important role in developing foundational competencies including self-understanding, communication, leadership, a sense of responsibility, health and wellbeing, confidence and intra- and inter-personal skills.

For this reason, schools that value the learner attributes consider the co-curriculum carefully. The culture of the school is permeated with a sense of valuing worthwhile student activities and these are considered on a par with academic achievement.

It is possible to broaden the concept of the co-curriculum to include activities that the school encourages which are actually provided in the community beyond the school. The extent to which a school is able to provide a rich choice of activities will be constrained by its context and resources. One way to broaden these opportunities is for the school to discover, support and develop opportunities for students to use clubs and resources available in the local community, recognising student participation beyond the school.

As with the academic curriculum there is no one formula for what to include in the co-curricular programme. Typically schools support activities and programmes in: physical recreation, performance arts, community service, student government, recreational hobbies, health and social education, outdoor pursuits and work experience. Many of the best programmes and activities, a number of examples of which are illustrated in case studies in this guide, are student led and managed. Activities and opportunities should reflect the local culture and community, and provide one opportunity for placing the school as a contributing force to community cohesion and development.

How should student participation in co-curricular areas be organised?

Again, this is a decision for each school. Some schools require students to do certain activities and reward credit towards school diplomas and graduating requirements. Other schools are more flexible and voluntary in their expectations.

Structure provides clarity. Well-designed compulsory co-curricular programmes will give students a wide range of experiences. On the other hand, too much compulsion can have unintended consequences. For the learner attributes to become life-long habits it is essential that learners pursue co-curricular activities because they want to, not because they are another requirement to be ticked off. Ultimately we want students to behave in certain ways because this leads to personal fulfilment and enjoyment.

This does not mean that assessment and evaluation of student participation in co-curricular activities should be ignored. Assessment needs to be fit for purpose and we need to assess what we value, not just value what we assess.

How should student performance in the learner attributes be assessed?

Assessment needs to develop self-awareness and responsibility in learners. It also needs to give them the belief, desire and knowledge to improve. With this in mind valid assessment approaches could include:

1. **Self-evaluation instruments and reporting**. This could be done in a number of different ways, respecting the students' age and school culture. Quality is more important than quantity in order to preserve enthusiasm and commitment. Options include:
    - Students complete a self-evaluation as part of the end-of-term report sent home to parents.
    - Students complete self-evaluations of their performance in particular tasks or activities, including individual and group work.

2. **Students running parent–student meetings**. They lead the conversation with their own reflections on how they are doing and what they need to do to improve (as demonstrated in Case study 10 in Chapter 3).
3. **Process journals, e-portfolios or blogs** where students can write about their learning journey and reflect on it.
4. **Involving students, where appropriate, in designing assessment rubrics** that include learner attribute criteria. Students can then evaluate their own performance individually or collectively.
5. **Displays of student work and school activities** that exemplify the learner attributes.

The following four case studies illustrate different approaches schools have developed in order to support the development of the learner attributes and other valued learning highlighted in their missions. Each approach has been designed by the school to reflect its own context and culture.

The Jamieson Programme at Frensham provides structured challenge in a number of areas beyond traditional academics. The school includes Cambridge Global Perspectives as a requirement that supports the development of global citizens, together with The Duke of Edinburgh's international youth award and other activities.

The Global Citizenship Award at ShenZhen College of International Education is an integrated programme. It ensures that the educational objectives of the College are being addressed through the academic and the co-curricular programmes. This started with a sophisticated mapping exercise of skills and habits the school identified as important to the curriculum. They then added a co-curricular dimension, along with ways of encouraging and recording student involvement.

Bromsgrove School created their own bespoke Learner Profile supported by the Bromsgrove Award and Badge system.

Confucius International School, Qingdao introduced the Six Arts curriculum in order to develop a unique programme blending the best of Confucian and Western traditions.

Case study 4:

Jamieson Programme at Frensham, Australia: Grit, gratitude and good humour.

Watch the video at
https://vimeo.com/228213301

Unique to Frensham, the Jamieson Programme is built on the belief that teenagers are risk takers growing up in a complex and rapidly changing world. In order to thrive they must develop empathy, self-control, integrity and grit – as core personal attributes. Based on the precept of experiential education, the programme offers real-world challenge through engagement in new physical, intellectual and emotional experiences in a secure, stimulating environment that is inherently exciting and immensely rewarding.

The Cambridge IGCSE® course Global Perspectives, which the school added to the Jamieson Programme in 2012, is a perfect fit in terms of preparing students to be global citizens of the 21st century. Developing global competence is a core focus of the Jamieson Programme, whose goals are closely aligned with the Cambridge learner attributes.

Responsibility in action, or 'character in action', is a fundamental principle that guides students in a diverse range of activities and leadership experiences. Frensham girls are encouraged to embrace challenges and undertake service activities with 'grit, gratitude and good humour', qualities that awaken a belief in themselves that will stay with them throughout their lives.

Frensham's Jamieson Programme

From its origin in 1986, the Jamieson Programme has become an integral component of Frensham's curriculum. The Programme continues to develop, as each element is tested and reviewed and each activity refined.

Case study 4: continued

The Jamieson Programme has four goals, which provide a focus for students aged 12–16 in Years 7 to 10:

1. Global citizenship: to develop an understanding of your responsibilities as a global citizen; to develop an intelligent perspective about other cultures.
2. Health/fitness and physical challenge: to develop and sustain a healthy lifestyle; to understand and develop your physical capabilities.
3. Critical, ethical and flexible thinking: to develop a love of learning; to become a skilled and critical user of technology; to become a disciplined learner; to develop creativity coupled with a strong work ethic; to develop a deep understanding of mathematics, literature, science, history and the arts.
4. Responsibility, service, leadership: to be the best you can be; to understand and act on your environmental responsibilities; to develop an awareness of, and to act on, your responsibilities to help those less fortunate.

The students meet these goals through regular programmed activities tailored to the needs of each year group. Activities include:

- community service
- outdoor education
- leadership (through, for example, the School Forum and peer support programmes)
- specialised courses in subjects such as presentation skills, personal development and financial literacy
- Jamieson Weekends (when all students remain at school to participate in planned activities)
- Jamieson Week (the final week of the school year full of activities dedicated to the goals of the Jamieson Programme).

The Jamieson Programme – Year 9 experience

The Jamieson Programme for Year 9 targets specifically their personal needs at what is a crucial time in adolescent development. In addition to ongoing involvement with their Year 12 mentors and acceptance of increased responsibility with Junior Houses, each fortnight Year 9 students engage in a mandatory extended-day curriculum from 13.30 to 20.30. During this time they undertake the Cambridge IGCSE Global Perspectives course, exploring key global issues from a personal, local, national and global perspective. The extended day also gives the Year 9 students the opportunity to work together as a whole cohort in a range of activities spread across each term including: community service, environmental projects, personal fitness, health and well-being workshops and challenges, religious studies and study skills.

Integral also is participation in a three-day residential Global Forum, where Year 9 students have the opportunity to engage with global thinking in a range of collaborative workshops with guest speakers from local, business, sporting, social justice and artistic communities. The Global Forum is directly linked to the Cambridge IGCSE Global Perspectives course and the three-day immersion in ideas adds significantly to the outcomes achieved by all students. A cornerstone of the Global Forum experience is working, learning and playing alongside students and teachers from an Intensive English Learning Centre (a school for students who have recently arrived in Australia).

Year 9 also engages in a mandatory programme associated with The Duke of Edinburgh's Award scheme. This includes an outdoor education camp, a caving expedition, overnight expeditions and service activities. Students can also undertake additional service activities that contribute to The Duke of Edinburgh's Award, such as visiting nursing homes, environmental management and the Addis Ababa Fistula Hospital Project. At the end of the school year, Year 9 joins with the rest of the school in Jamieson Week, a whole-school focus on Jamieson Programme activities.

Student reflections

“We are emerging as global thinkers who do not just picture our own lives but consider the perspectives of others.”

Holly, Year 8

“You don't have to do something extraordinary in your life to make a change in the world; little steps can have a big impact.”

Sophie, Year 9

Case study 5:

The Global Citizenship Award at ShenZhen College of International Education (SCIE), China

Most schools have a set of educational objectives, skills and attributes, which the curriculum and extra-curricular programmes are designed to promote. A similar set of objectives are defined by Cambridge as the learner attributes. However, unlike examination results, which provide objective data against which to measure performance, the softer skills and attributes – teamwork, leadership, environmental awareness, empathy – tend not to be so easily quantified and measured.

The story began at SCIE after the Council of International Schools accreditation visit suggested that a clearer definition of international-mindedness should be created and that measures to assess the effectiveness of its implementation be devised. The first stage involved identifying the broad aims of the curriculum, supplemented by a range of activities designed to promote those skills.

The first area to be developed was international-mindedness. The process began with staff seeking to identify what was meant by international-mindedness in the context of our school and our country. We agreed upon a set of strands, running through the whole curriculum. In each scheme of work, opportunities were identified to address the most appropriate strands. These key activities, which addressed each strand, were then plotted on a **whole-school patchwork**, showing how the various strands are embedded in the curriculum. A similar process then took place for the remaining areas, including social skills and thinking skills.

The various skills and attributes within each category were identified, individual courses were examined and opportunities for promoting these skills and attributes were considered and plotted on the patchwork. We were then able to show how the various aspects of the curriculum are embedded into the courses.

Case study 5: continued

SCIE set out clearer definitions for thinking skills and social skills

We could also map the development of these skills throughout the four-year teaching programme on each subject curriculum map. View example of business studies curriculum map at **www.cambridgeinternational.org/images/411331-business-studies-curriculum-map.pdf**

In addition to identifying the activities, we felt that it would be beneficial to develop a method of recording students' involvement. Given the difficulty of conducting formal assessments of these skills and attributes, we felt that student participation could be recorded as evidence of the process taking place. At the same time, we had a separate community service and extra-curricular programme known as the Development Award. This required students to meet certain standards in non-academic activities and community service.

Case study 5: continued

Rather than having two separate awards, the sensible option was to combine these two into the Global Citizenship Award. By doing this, we created an integrated programme which ensures that the educational objectives of the College are being addressed through both the taught curriculum and co-curricular programmes.

The Global Citizenship Award was created with four levels:

Y10 **Global Freshman Award**

Y11 **Global Sophomore Award**

Y12 **Global Citizen Award**

Y13 **Global Leader Award**

At each level, there are three standards available: Award, Merit and Distinction. Students earn points from their teacher, which vary depending on whether Bronze, Silver or Gold is awarded, and by the nature of the task. For example, each hour of community service earns 10 points. We required a system to allow teachers to input records of student activities and for students to be able to check their progress towards the award. This was done via the College Information Management System, which had the added benefit of creating a record of activities and achievements for students. This record can be used when writing pastoral comments for reports or when writing references for university applications, and can generate a non-academic transcript for students to exemplify their rounded education experience.

The programme was introduced in 2016–17. It will take at least one year to find out how many points students earned on average and to set the future levels accordingly. As time passes it may be necessary to adjust boundaries as students become more engaged in earning points. To add validity to the Global Citizenship Award programme, and to increase the interest of students and parents, it was decided that three of the annual student scholarships should go to the highest scorers in the Global Citizenship Award.

We hope that the end product will be an integrated system, which effectively recognises and records all aspects of the students' non-academic experience at the College. It will promote the skills and attributes which form part of the core values of the College and will generate a record of achievement for students. The project also helped to engage staff in the schemes of work and aligned them more closely with the College's educational goals. On the whole, it was a valuable and worthwhile project.

> "The Global Citizenship Award ensures that the educational objectives of the College are being addressed through both the taught curriculum and co-curricular programmes."

ShenZhen College of International Education

Case study 6:

Developing the Cambridge learner attributes at Bromsgrove International School, Thailand

The reward system at Bromsgrove is unique in developing our learners' awareness of the world around them and of the competences they are developing every day within and outside the classroom. We have created our own, bespoke Learner Profile, which all staff use to develop attributes which all our students need in order to become successful global citizens who are reflective, creative and responsible, and also ready to lead and inspire others.

All students at Bromsgrove from early years through to Year 13 engage actively with the Learner Profile. Recently we recognised the need to develop the areas of service and leadership among our students as the next stage of the development of the Learner Profile. So we came up with the concept of the Bromsgrove Badge and the Bromsgrove Award. These, along with the Learner Profile, help our students to develop the competences required for success in their Cambridge exams.

The Bromsgrove Badge and the Bromsgrove Award are opportunities for students to show how they have progressed in the different aspects of the Bromsgrove Learner Profile and also look at Service and Leadership in the Upper Key Stages. Primary students work towards the Bromsgrove Badge, with Years 2–4 focusing on the core attributes of the profile. Students have to complete six tasks to earn each Bromsgrove Badge. We decided that a more prescriptive approach would be most effective with our youngest learners. During Years 5 and 6, students engage in student leadership activities and in Year 6, complete a student leadership project that counts towards their Bromsgrove Award.

In Secondary, students independently choose a specific attribute to work towards to develop their unique portfolios, with different Key Stages focusing on different areas. They set their own targets, with guidance from their form tutor if required, to allow them to explore areas about which they are truly passionate. When they have achieved the targets, they will have earned the right to apply to be considered for one of the Bromsgrove Attribute Awards.

In Key Stage 3, students focus on the following attributes:

Curiosity, Risk Taker, Determination, Team Player, Positivity, Kindness, Independent

In Key Stage 4, we add:

Service, Creativity

The award culminates In Key Stage 5, when they also explore:

Leadership

To develop this attribute, Sixth Form students lead the student committees. They also lead extra-curricular activities, which has a direct impact on younger members of the school community.

An important part of the scheme is that students are required to take ownership of their work. They can document their progress in any medium, and the response has been exceptionally creative and varied.

Students are encouraged to see the Bromsgrove Badge and the Bromsgrove Award as a long-term project, not simply a tick-box activity. This complements our school's vision to develop life-long learners who are committed global citizens. We celebrate the success of students in a termly Bromsgrove Award assembly and it is also a key part of our BEAM (Building Effective Attitudes and Mindsets) Pastoral Programme.

Case study 7:

Bringing ancient education traditions into the 21st century at Confucius International School Qingdao, China (CISQD)

Confucius International School in Qingdao, China (CISQD) was founded in 2009 by the direct descendant and current head of the Confucius family. It is the first educational initiative of its kind to unite the best practices in Western teaching with Confucian teaching and principles.

Confucius considered that a primary goal of education was to produce capable individuals (xiancai) – whom he also called *shi* (gentlemen) or *junzi* (men of quality) – who 'combined competence with virtue' and whose subsequent careers in administration and government would bring about the ideal of a kingdom managed with integrity. Confucius believed that education plays a fundamental role in the development of society and of individuals. By raising individual moral standards, it renders society more virtuous. His ethics, philosophy and politics are a cohesive unit, rooted in 'humanity' or 'benevolence' (*ren*).

Confucius's philosophy of education focused on the 'Six Arts': archery, calligraphy, computation, music, chariot-driving and ritual. These concepts have been modernised and made relevant to the modern world at CISQD, while retaining their essential meaning, to form the basis of a broad and balanced curriculum. Newly enrolled CISQD students are provided with the Confucian Six Arts Passport, which will document their engagement in all aspects of the Six Arts throughout their time at CISQD. Documentary proof of continuous engagement in the Confucian Six Arts is a graduation requirement of CISQD and will be a component of the graduation requirements for all CIS schools.

See Case study 16 in Chapter 6 which considers how the Confucius International School develops student leadership based on the Six Arts programme.

Chapter 3: Reflection

Overview

Chapter 1 briefly considered how skilled reflection is critical to becoming an engaged, self-regulated, life-long learner. This chapter looks at the attribute of reflection, and the related concept of learning how to learn, in more detail. It starts by considering what reflection is and exploring its key role in the learning process. It then considers implications for students, teachers and schools. This chapter is closely related to Chapter 4 of the *Developing your School with Cambridge* guide (available at **www.cambridgeinternational.org/images/271309-teaching-cambridge-programmes.pdf**). A number of useful resources are provided at the end of the chapter that expand on the ideas developed in it.

What is reflection?

Reflection is an active, disciplined and deliberate strategy. It is incorporated into the processes and activities of teaching and learning to help improve understanding. It is, therefore, much more than a review and justification of what has happened at the end of a period or activity.

This chapter considers two closely related types of reflection:

1. Reflecting on what is being learned to support deeper understanding of the material.
2. Making learning itself an object of reflection to support student self-regulation and learning how to learn.

Reflection is necessary for learners to be able to effectively manage complex thinking processes and outcomes. For Dewey (quoted in Moon 1999 p. 12), reflection is an essential part of the process of making meaning that pushes learners from one experience to the next: 'The kind of thinking that consists in turning a subject over in the mind and giving it serious thought.' Reflection is 'active, persistent, and careful consideration of any belief or supposed form of knowledge in the light of the grounds that support it, and the further conclusions to which it tends.'

Reflection helps students to develop a deeper understanding of what they are learning through making new connections and relating different ideas. To Perkins (1992 pp. 77–79), demonstrating understanding involves being able to carry out a number of performances that both show understanding of a topic and help advance it. Perkins illustrates this in the context of Newton's First Law of Motion (every object in a state of uniform motion tends to remain in that state of motion unless an external force is applied to it). If students are given the opportunity to reflect upon this concept, with appropriate teacher guidance, exploring key ideas and considering their implications, they are then able to:

- explain this law in their own words
- provide further examples of the law at work (exemplify)
- apply the law to new situations and phenomena not yet studied
- offer up evidence in defence of the law (justify)
- note the form of the law and draw from it any further general principles about the physical world (contextualise and generalise).

Critically, the process of reflection is necessary for the above to happen – the ability ('performance') to extrapolate and generalise comes as a consequence of thinking

> "Cambridge students understand themselves as learners. They are concerned with the processes as well as the products of their learning and develop the awareness and strategies to be lifelong learners. Cambridge teachers are themselves learners, seeking to build on and develop their knowledge and skills through a virtuous circle of reflection on practice – involving research, evaluation and adaptation. They support students to become independent and reflective learners."
>
> **(Cambridge learner reflective attribute)**

deliberately and hard about the intended constructs (the important things we want our students to learn) and practising them in relation to different questions. Reflection, therefore, is a critical activity that helps develop deeper understanding of the material being covered.

Because all learning is constructed in learners' minds, learning cannot simply be transmitted from a teacher or a book to the learner. A teacher who is instructing the whole class needs to incorporate reflective strategies and activities into lesson plans as much as a teacher who is overseeing group or practical work. The best whole-class instruction is highly reflective.

The reflective student: learning how to learn

'Effectiveness as a learner hinges on the ability to be versatile as a learner. To have a rich view of learning and a learning orientation which is in turn linked to the ability to plan, monitor and review one's learning' (Watkins, 2010).

Metacognition (thinking about thinking) is a general term to describe the processes involved when learners plan, monitor, evaluate and subsequently make changes to their learning behaviours. Another term developed by Watkins (2010) to convey the very specific idea of reflecting on and regulating learning, is 'metalearning'. We use the two terms interchangeably in this guide.

In 1999, the US Department of Education's Office of Educational Research and Improvement (OERI) commissioned the National Research Council (NRC) to synthesise and review the research literature on the science of human learning. The subsequent report, How People Learn (Donovan, Bransford & Pelligrino, 1999), suggested important implications for the design of curricula, teaching, assessments and learning environments. It highlighted three findings that had both a solid research base and strong implications for how students learn and therefore how teachers should teach. These are consistent with the description of constructivism as a theory that explains how learning happens (which we covered in Chapter 1):

1. 'Students come to the classroom with preconceptions about how the world works. If their initial understanding is not engaged, they may fail to grasp the new concepts and information that are taught, or they may learn them for the purposes of a test but revert to their preconceptions outside the classroom.'
2. 'To develop competence in an area of inquiry, students must: a) have a deep foundation of factual knowledge, b) understand facts and ideas in the context of a conceptual framework, and c) organise knowledge in ways that facilitate retrieval and application.'
3. 'A metacognitive approach to instruction can help students learn to take control of their own learning by defining learning goals and monitoring their progress in achieving them.' (Donovan et al, 1999, pp. 10–13)

To ensure students are appropriately challenged and made to think hard, teachers and students need to reflect carefully on where students are in the learning process before learning commences. In this sense, reflection is a carefully structured and disciplined process. It is based on an understanding of the material being learned, the process of learning and the current strengths and limitations of the individual learner in that context.

A metacognitive approach can help students navigate their learning journey. Students reflect upon their thinking, evaluating the success or otherwise of their approaches to learning as they are deployed, and then revising them if need be. It is a habit, incorporating strategies and skills.

Metacognition involves two distinct processes. Metacognitive knowledge is the knowledge the student has about the task in hand, their own cognitive abilities and the learning outcomes or goals. Metacognitive regulation involves a student controlling the cognitive processes and strategies being used as they complete a task, for example, re-reading a passage of text because the meaning was lost first time around (see Flavell, 1976 pp. 231–236). It is quite common for a learner to demonstrate metacognitive knowledge but not be competent at metacognitive regulation. Both are critical.

Swartz and Perkins (1989 pp. 179–183) defined four levels of metacognition:

Figure 2: The reflective learner

Tacit learners are unaware of how they think and learn – they simply accept whether they know something or not and will very likely have barriers (real or otherwise) in the way of their progress and development.

Aware learners know about some of the kinds of thinking they do – they can compare and apply, for example, but are not strategic in their thinking. Again, barriers to learning in the form of misconceptions are prevalent and these learners do not work hard to overcome them.

Strategic learners can organise their thinking by using problem-solving, decision-making, evidence-seeking and other kinds of cognitive strategies to aid their learning. They prove successful where the task or activity is known to them and are able to select an appropriate approach based on prior understanding and knowledge. Where strategic learners can fall down, though, is in situations and contexts that they have not come across before.

At the final level, reflective learners are not only strategic in their thinking but are able to reflect upon their thinking-in-progress, pondering their strategies and revising them as appropriate. They thrive in the unfamiliar or unknown, actively learn from failure or setbacks, and have developed a considerable degree of resilience and determination. Moving from being a tacit to a reflective learner involves 'learning how to learn'.

Learning to learn is concerned with developing the capacity to accurately reflect on one's learning and deliberately apply this understanding to learning in the future. In the words of Watkins (2010) this involves making 'learning an object of learning'. This requires a number of learning habits, strategies and processes incorporating metacognitive knowledge and regulation including:

- self-awareness of how I am learning and how effective my learning is
- identifying and overcoming barriers to learning
- questioning assumptions
- delaying gratification, sticking to a task, enjoying challenges and difficulties
- organising learning effectively
- being willing and able to ask for help, understanding when one's own resources are limited
- learning from mistakes and setbacks
- trying new strategies.

The attitude a learner has towards learning is critical. Effective learners are more likely to be self-regulated and intrinsically motivated. They approach learning in a way that emphasises understanding and retention of learning. Extrinsically motivated students are predominantly driven by rewards and recognition. Deep and strategic learning, what Watkins (2010) terms a *learning orientation*, not only helps students develop the learning skills they will need for further education, life and the world of work, it also helps them perform better in public examinations. This can be a powerful fact in persuading results-orientated parents and students about why reflective learning matters. Learning needs to be made an object of attention, reflection, conversation and evaluation in everything the school does.

For students to effectively regulate their own learning it is important that they understand their performance in relation to what constitutes excellence. They must develop concepts of standards and measure their current performance against these. Students need to understand what good performance at a task looks like and reflect on the implications for them (see Figure 3).

Figure 3: Making learning an object of learning

This is not easily achieved and too often reflective activities and processes carried out by teachers and students are superficial. Cognitively demanding tasks require a number of complex skills and sophisticated understandings, and it may be that a student is lacking some basic techniques or has not fully grasped a critical concept. They may not be aware of this and unconsciously have become skilled at disguising these in order to keep up with the class. The art and science of excellent teaching and learning is being able to accurately interrogate performance and deduce real strengths and limitations. Some of the implications for teachers are considered later in this chapter.

The following case study from a state school in the United States gives an example of a school committed to raising standards through high expectations for all based on students taking responsibility for their learning. It uses state standards and the Cambridge curriculum to help them develop a mastery of learning.

Case study 8:

Encouraging students to take on responsibility at Parkside Middle School, Virginia, USA

Our overarching goal when becoming a Cambridge International School was to be able to develop and sustain a community in our building that encourages our students to take responsibility for their own learning.

Parkside, unlike many middle schools, is not a community school. All our students come by bus to our school as none of the communities that surround our school service our school district. Therefore, our students arrive to Parkside as 6th graders from five very diverse elementary schools. Many of our students come from homes where their parents are very involved and have high expectations for their students, while others come from homes where their parents are illiterate, and depend on the school to provide their children with an adequate education. With these challenges, Parkside decided that the Cambridge International ethos provided our entire student population with high expectation for all, offered an enriched curriculum, experiencing active learning across all contents and providing students with the opportunity to develop their critical thinking skills, not only in the curriculum but also when dealing with problems in the real world.

The mission of Parkside Middle Cambridge International School, a culturally and technologically rich learning environment, is to inspire and empower all students in a student-focused environment to excel both academically and socially, and prepare them to be productive citizens and future leaders.

All students are encouraged to take responsibility supported by a pledge recited by all students, every morning. The pledge states 'I am responsible for my own learning, I am responsible to the success of the class, I will make a difference.' Many times during the school day, students are reminded of this pledge to guide them with their personal decision making. The emphasis on our students taking an active role in their own learning is the driving force at Parkside.

Our goal is to develop learners who are confident in working with information and ideas (their own and those of others), responsible for themselves, responsible to and respectful of others. We include reflection in our daily practices to encourage students to be reflective as learners, while developing their ability to learn, innovate and be equipped for new and future endeavours.

Virginia has very clear standards of learning that drive our curriculum, therefore in English, Maths and Science, we enrich our curriculum with Cambridge programmes. At Parkside, we believe that it is important that our students (and parents) truly understand the standards that they are expected to master, and that the grades they earn depict this learning. It is important that our students understand the areas where they have strengths as well as weaknesses so they can work alongside their teachers to develop next steps in the educational journey.

All student assessments focus on the development of mastery of learning. Students play an active role in the mastery process. They record their progress in data folders and through the online gradebook maintained by teachers. All grades that are entered in the gradebook are broken down by individual standards, and only summative assessments and projects are included. With that students are expected to re-learn, re-study and re-take all assessments to improve on their learning. Classroom study and homework are viewed as practice opportunities so they do not receive grades. Our vision is to structure learning experiences for our students to be able to take risks in their own learning, and not to see mistakes as failures, but as a way of practising for the goal of mastering the material.

Approaches to teaching and learning that support reflection and learning how to learn

It is important that reflection is fundamental to the day-to-day activities of all teachers, and that it forms part of their lesson planning and practice. Students need to learn to enjoy being made to think hard and actively reflect on learning as it occurs. Powerful approaches and strategies include (all appropriately supported by the teacher):

- making learning goals and assessment criteria explicit, helping students to plan strategies and develop ways of monitoring their progress towards achieving these goals
- involving students in collaborative activities in which they practise articulating their own understandings of the material and reflect on their own performance and learning process
- reciprocal teaching and learning which involves students summarising and presenting to others key ideas, findings and outcomes and/or teaching their peers specific content and skills
- instructional practice which requires students to give explanations of their own understanding of the studied material leading to discussion and questioning
- teaching students self-verbalisation. This helps students to develop a language that enables them to be self-critical evaluators of their own performance and what they are learning
- students assessing their own levels of understanding, effort and strategies on task and peer assessment where students learn to assess each other
- encouraging discussion of strategies in class so that students understand when to use certain strategies, the impact they have on their learning, and why the strategies work
- visible thinking routines. These are an effective way to promote deliberate thinking and to provide a structure to the way students go about the process of learning (see for example Harvard thinking routines at: **http://www.visiblethinkingpz.org/VisibleThinking_html_files/03_ThinkingRoutines/03a_ThinkingRoutines.html** One example is 'connect, extend and challenge':
  - **Connect:** How are the ideas and information presented connected to what you already know?
  - **Extend:** What new ideas did you get that extended or pushed your thinking in new directions?
  - **Challenge:** What is still challenging or confusing for you to get your mind around? What questions, wonderings or puzzles do you now have?

In a study of metacognition in five and six-year-olds the researcher Larkin (2000) used a coding framework to identify all the metacognitive behaviours she saw when observing both teachers and students. On pages 39 and 40 are two tables summarising the different behaviours and the language used in support of metacognition in the classroom. While based on young children, the examples illustrate styles that are relevant and adaptable for all ages (note that some of the examples have been adjusted for an international audience):

Table 4: Metacognitive talk – teachers

Teacher behaviour and language supportive of metacognition	
Explanation	**Example**
Refers to self-learning strategies	'What could you do if you've got problems?'
Questions acquisition of knowledge	'How do you know that?'
Teacher prompts regarding information provided	'We found the biggest; what else could we do?'
Teacher aids explanations	'X explained putting the biggest to smallest very well.'
Teacher questions/comments on strategies	'How are you putting them in order?'
Teacher asks for predictions of success	'Will this make it easier?'
Teacher shows expectations of planning	'How are we going to do this; what do we need to think about?'
Teacher expects checking	'Check what you are counting in or the unit of measure.'
Teacher refers to own cognitive processes	'I don't understand it either, so let's have a look together.'
Teacher refers to thinking	'Let's put on our thinking caps.'
Teacher refers to universals of cognition	'We are learning how to solve problems. We are learning to analyse a poem.'
Teacher prompts evaluation	'Was it difficult to do or was it easy?'

Table 5: Metacognitive talk – students

Student behaviour and language supportive of metacognition	
Explanation	**Example**
Shows knowledge of self in relation to cognition and/or predicts from this.	'I know what to do.' 'Oh I love hard work.'
Refers to what others may think/desire	'She doesn't know.' 'He doesn't want to be last.' 'I think they can help us.'
Refers to universals of cognition	'We've got to solve a problem.' 'I think we need to quote more examples from the poem if we're going to get more marks for "analysis".'
Questions task information and/or seeks clarification	'Something is missing.' 'Can you explain what that means? I think it is important.'
Predicts success/failure	'We'll be finished soon.'
Rating: refers to ease/difficulty of task	'I think this is easy. It won't take us long at all.'
Compares with other tasks	'This is like when we made a model.'
Evaluates: indicates knowledge about what might be useful	'We should build up the boxes.' 'That's the quickest way to do it.'
Refers to planning how to do the task	'We need to know where best to start.' 'We should talk about it together.'
Paraphrases to confirm understanding	'Did you mean...?'
Asks questions of self	'Is that right?'
Checks work	'This one's good, this one's not.'

Reflective learning and study skills

Making learning an object of learning requires learners to develop a sophisticated and accurate understanding of the learning process. Sometimes in schools this is not sufficiently recognised or supported. Students, parents and teachers should think about what learning involves and how it happens, as well as considering how the learner attributes can contribute.

One way of looking at learning is to consider learning efficiency, the amount and quality of learning that takes place over a specified period of time. Improving learning efficiency can result in more being learned, more quickly, more effectively and more deeply. This creates more time for further learning in valued areas across the formal and co-curriculum, and for students to pursue passions and interests.

One example of wasted time and effort that slows down learning efficiency is when students adopt ineffective study habits. Table 6 looks at some of these. The common factor in ineffective study is that it is passive and not targeted or specific enough. Students tend to practise what they already know and can do, and are not sufficiently challenged (the work is too easy) or they cannot access it and get demotivated (the work is too demanding). The revolution that has occurred in high-performance sport towards high-quality, targeted, specific practice based on evidence of performance is relevant to schools.

Table 6: Effective study habits

Misconception and common practice	Reality and more effective practice
In revising for examinations and tests students read the textbook and their notes over and over again trying to memorise everything. Often students are spending time reviewing what they understand already. Students easily get distracted – as revision is passive, their mind can wander with the illusion they are learning.	Students need to focus and practise specific areas of challenge identified by formative assessment and reflection. Revision is more effective when students have to answer questions and note what they can and cannot do well. This provides a clearer focus for further study. This form of revision is active as students are testing their understanding and reflecting on the outcome.
Students copy out their notes over and over and concentrate on factual recall.	Learning is best split into chunks and facts are best learned in connection with the concepts and ideas to which they relate. See the section on mind maps in Chapter 4 on innovation and creativity.
Revision is delayed until a unit test or end-of-year examination. Lessons and units are taught as discrete entities.	Revision and practice should be constant. At the start of every lesson students (supported by teachers) should be made to think of what has been recently learned. Teachers need to build bridges in students' minds between learning in different classes, and students need to practise and practise again new skills and understandings soon after they are learned so that they become deeply embedded. Once a concept is deeply learned and understood it is very hard to forget, making revision before the examination much easier.

Table 6: Effective study habits continued

Misconception and common practice	Reality and more effective practice
Students revise and work alone.	While revision can effectively be done by students alone it does not have to be a solitary activity. Revision can effectively be done as a collaborative activity with students working in pairs or groups. Students can specialise by dividing up the material, testing each other and teaching each other. Note that student reciprocal teaching has a very high effect size in Hattie's (2009) analysis of effective practice.
Once an assignment, examination or test is complete, students do not reflect on what caused their performance to be what it was.	Assignments provide powerful formative learning opportunities. Students can be encouraged to reflect on their performance using specific practices and instruments designed for this purpose. See for example Stanford University's 'exam wrappers' concept: **teachingcommons.stanford.edu/teaching-talk/exam-wrappers**

Students and teachers can be encouraged to ask a series of reflective questions that help identify the processes of learning that are taking place and link learning activities together. One simple example is in Table 7, right:

Some schools try to support study skills through providing specific, discrete classes or activities as part of a personal and social health curriculum. This can support the development of a learning orientation but will not work unless practices and habits are modelled and supported by all teachers across the curriculum. Learning is highly context specific and cannot be separated from what is being learned. Individuals will have different strengths and limitations in different subject areas, and it is important that they engage with these as they learn new material.
All teachers in the school need to support learning how to learn.

One practice that can work well is to include student self-evaluation in reporting and parent conferences. One example of this is provided in Case study 9 (on the next page), which highlights the focus of parent conferences as 'talking with students about their learning, not talking about a student's work'. The case study also emphasises the value of reflective conversations as part of every teacher's professional development and the role parents play as an active participant in a three-way conference, which exemplifies some of the points made in the following sections of this chapter.

Another tool some schools use is to require students to write learning journals or blogs, or to keep their portfolios of work regularly updated with metacognitive reflections on their learning as it progresses.

Table 7: Nine questions for students to develop metacognitive thinking (adapted from Innerdrive, 2017).

Before the task

1. Is this similar to a previous task?
2. Can I describe in my own words what success in this task will look like?
3. Where is the best place to start?

During the task

4. Am I on the right track?
5. What can I do differently if I'm not?
6. Who can I ask for help? (One strategy: see two classmates before approaching the teacher for help.)

After the task

7. What worked well?
8. What could I have done better?
9. Can I apply or connect this to other situations and learning contexts?

Case study 9:

Reflective learning at United World College South East Asia, Singapore

Reflection as a tool to support learning is widely used in schools, and this has certainly been true at United World College South East Asia (UWCSEA). But perhaps it was only when we as teachers started to use reflective conversations as a tool for our own professional development that we began to see the importance of reflective dialogue to support student learning too.

How we define reflection

Reflection can improve **self-awareness, self-management, thinking** and **wellbeing** through three phases of reflection:

Awareness phase. In the first phase we look again (as in the metaphor of a mirror) at ourselves. We do this by intentionally creating conditions that allow for heightened awareness of feelings, thoughts, events (actions, achievements, completed tasks, outcomes) or approaches (use of particular strategies, perspectives or thinking during a process). Sometimes reflection might stop here with greater mindful awareness.

Analysis phase. In the second phase we might use thinking routines (protocols, dialogue, mediative questions, prompts etc.) to help us consider causal factors, with the aim of clarifying or understanding our feelings, thinking and mindset. This might be 'thinking' in lots of domains from the cognitive to the affective (moods, feelings, attitudes). Sometimes reflection might stop here with a greater sense of causality, clarity or understanding.

Application phase. In the third phase we might think about the implications or the application of what we have learned during previous phases of reflection. We may try new thinking, new perspectives or modify existing approaches with the help of thinking routines. This might support the development of a growth mindset, enhance self-regulation and support an internal locus of control. (UWCSEA East – reflection guidance)

Example of how we use reflective dialogue with students

Three-way conferences are held twice a year and are attended by high school students, their parents and their teachers. They form one opportunity to support reflective conversations and increase student ownership of the learning and self-directedness.

- Three-way conferences are based in UWCSEA Learning Principles, including:
  - learners use timely and goal-directed feedback
  - learners have ownership of their learning
  - learners think and act upon their learning.
- Three-way conferences encourage development of elements of the UWCSEA Profile including:
  - communicator, self-aware, self-manager, resilience.
- Three-way conferences strengthen open communication about learning between students, parents and teachers. The focus is on talking with students about their learning, not talking about a student's work. It is about developing student voice and then listening to it.

It is through the use of mediative questions used in Cognitive Coaching® that students (and teachers) are encouraged to reflect on their own learning, and to become more self-directed. Mediative questions engage and transform the thinking of a student. They have three characteristics that make them powerful:

1. They are invitational, i.e. they encourage students to think about their learning in a strategic way.
2. They engage specific cognitive operations, e.g. compare, analyse, predict.
3. They are intentional, i.e. they have a deliberate purpose in their structure and use.

Case study 9: continued

Before each three-way conference, students are asked to spend time going through the first phase of reflection for each of their subjects. Parents are asked to consider the student's learning at home and questions they might ask for clarification from the student and the teacher. Teachers consider the sorts of mediative questions they might ask each student to support their analysis of what is helping or hindering their learning. During the three-way conference, students and parents are encouraged to take notes to help with the setting of goals and to support phase three of the reflective process.

The value of reflective conversations to support student learning may best be summarised by one parent's response: 'Feedback to my child was very motivational. I liked that they did not focus so much on grades but on progress, attitudes and strengths. This is what we teach current leaders – how to motivate people!'

It is our intention to use reflective dialogue to help student and teacher learners think reflectively about their growth and development, to be able to plan future learning and to have a sense of autonomy. The open communication and support of the process has also been helped in building trust within the UWCSEA community.

Examples of questions	Phases of reflection
What might be the skills you contributed most? What did you need to consider when planning? What did you have control over in this situation? What aspects of this unit might have challenged you most?	Awareness
What options did you have when planning? Why was this important to you? How might you have responded if…? What restraints did you have and how did you overcome them?	Analysis
How might your actions have shaped the outcome? How might you consider planning this service differently next time? How might your approach influence other situations or people? Which of your skills did this call for and how might you use them in other situations?	Application

The reflective teacher

For students to be reflective it is essential that teachers model reflective processes themselves and create the right conditions in the classroom through the way in which they plan and deliver their lessons. Teachers need to nurture practices that support metacognitive knowledge and regulation in students. We considered some strategies for this in the previous section. They need to apply the same principles to their own professional practice and become reflective practitioners.

Reflective practice can be described as the process of learning through and from experience, towards gaining new insights of self and practice (Schön, 1983). Schön makes reference to two main processes of reflection in professional practice – reflection-in-action (self-monitoring) and reflection-on-action (an aspect of self-evaluation). He emphasised the former more because he argued that in many professions, there is an absence of a secure body of knowledge: 'Real-world problems don't come well formed. They tend to present themselves, on the contrary, as messy, indeterminate, problematic situations' (Schön, 1992 pp. 49–63).

This is best illustrated in a classroom environment. Students come to the classroom with preconceived ideas about how the world works that teachers do not always immediately recognise or understand. Teachers need to be able respond quickly to what they learn about student understanding as the class progresses. In such an uncertain, 'messy and indeterminate' context, reflection-in-action is critical to addressing this and making sure that what happens next brings student learning back on track. This involves asking questions of ourselves and exploring the problem with the students to get to the bottom of it. Effective teaching, therefore, involves probing and questioning, reflecting on the outcomes of this process and adapting practice accordingly.

Kolb's (1984) experiential learning cycle was introduced in Chapter 1. Another influential model of reflection is Gibbs's reflective cycle (1988, p. 49). It builds on Kolb's work on experiential learning, and proposes that theory and practice enrich and inform each other in a never-ending cycle. Gibbs describes seven stages of a 'structured debriefing' in relation to the learning experience:

- Description – illustration of the teaching/learning experience, where no judgments are made and conclusions are not drawn.
- Feelings/reactions – describing the reactions and feelings that emerged as part of the experience.
- Evaluation – making value judgements about the experience.
- Analysis – making sense of the situation, bringing the ideas from outside the experience, comparison of different people's experience.
- Conclusions (general) – what can be concluded from the experience and the analysis undertaken.
- Conclusions (specific) – what can be concluded about one's own specific, unique and personal situation and way of thinking.
- Action plan – thinking about how to differently approach the same type of situation in the future; what steps can be taken on the basis of what was learned?

The model is a cycle: learning and actions provide new forms of experience that become the subject of reflection. Mezirow and Associates (2000) stress that professional learning happens because the teacher takes charge of his or her critical reflection and explicitly plans and carries out steps to learn from it, transforming his or her behaviour. This level of personal responsibility for learning is crucial during initial teacher education, but should continue throughout a professional career if the teacher is to be successful.

Dr Ron Ritchhart has an excellent bank of resources for teachers to develop themselves as reflective practitioners on his blog: **www.ronritchhart.com/COT_Resources.html**. He has also developed a tool for patterns of thinking in the classroom (available at **tinyurl.com/patternsofthinkingtool**), which helps structure a post hoc view of recent teaching and learning. A checklist called Visible Learning Inside (**tinyurl.com/visiblelearninginside**), developed by Professor John Hattie, provides an evaluation and reflection tool on teaching efficacy in the school. Here teachers are asked to reflect on what their students are telling them about the impact of their classroom practice. It is a powerful way of gaining feedback on teaching and learning in the school, as well as increasing student voice.

Table 8 illustrates how Cambridge Professional Development Qualifications are based around developing the teacher as a reflective practitioner.

Table 8: Developing reflective practice through Cambridge Professional Development Qualifications

Cambridge Professional Development Qualifications in teaching and learning	
Cambridge Professional Development Qualifications contain a number of guiding questions to help develop teachers as reflective practitioners. These include: **Module 1** Unit 1: • an identification and explanation of the key features teachers think make an effective lesson • an evaluation of the impact their new learning and experiences will have on their practice. Unit 2: • an analysis of the effectiveness of the lesson, highlighting what aspects went well and explaining why they think these went well • an evaluation of their existing teaching practice, identifying what aspects need further development and explaining how they intend to change and develop those aspects in their future practice. Unit 3: • an explanation of how they used formative assessment to monitor the learners' learning and progress and evaluate how effective it was • an evaluation of the new knowledge and skills they have developed throughout the programme and an explanation of how this will help to develop their future professional practice so that their learners will learn more effectively. **Module 2** Based on the two taught sequential lessons and teacher experiences during this module, reflection will consider: • an analysis of the approaches to teaching and learning they used in the two observed lessons – this should identify what engaged and motivated their learners to learn, and explain the reasons why • an evaluation of the two lessons, highlighting what worked well and why, and what did not work well and why – it should also explain what developments they intend to make in the future	**Module 2 continued** • an evaluation of the learning activity and formative assessment activity they designed and used that were 'new' to their practice • an evaluation of their teaching practice and the learners' learning, using feedback from a variety of sources to identify existing strengths and those aspects that need further development. **Module 3** Based on their Diploma experiences and teaching the sequence of learning (programme plan) designed for Module 2, reflection will consider: • an evaluation of the current programme plan indicating what realistic and feasible changes they would like to make to develop future learning programmes • an analysis of the significant changes in their planning, teaching and assessment practice – this also explains why the changes have been adopted and the impact these have had on their learners' learning • an analysis of the strategies used to promote inclusive learning and the impact this had on the learners and their learning • an analysis of the activities that encouraged the learners to be curious and creative in their learning and how effective they were in motivating them to learn • an evaluation of how learning was inclusive so all the learners' learning was supported, challenged and extended • an analysis of how effectively formative assessments were used to support and monitor the learners' learning • a justification of why an understanding of the concept of learning and how people learn helps to develop their professional practice • an evaluation of the knowledge and skills they have developed during the Diploma programme – this should also explain what they intend to develop in their future professional practice to help their learners learn more effectively.

Reflective schools and school effectiveness

Schools need to be reflective organisations to set up the conditions needed for learners and teachers to be reflective. Effective schools are those that successfully progress the learning and growth of all of their students, regardless of background, beyond their normal expected developmental rate of growth. The two most important in-school variables to impact on student outcomes are the quality of teaching and school leadership.

Where should schools concentrate their efforts in terms of analysis and reflection? While there is no single key determinant of an effective school, research suggests that there are many things that schools can do to become more effective and maximise the chances of success for every child. These actions emerge from what are called the correlates (or indicators) of effective schools. These include: high academic standards and expectations; a school climate which focuses on achievement and learning; instructional leadership; high-performing teachers; students who are confident as learners and perceive themselves as in control of their learning; parents with high aspirations and expectations; resources that are fit for purpose; and excellent school governance including sound financial management.

Setting high standards for individual student achievement, measuring and tracking performance against these standards, and then intervening as soon as any student begins to fall behind these standards are central to effective schools. Schools that collect, analyse and reflect upon student achievement data, then design teaching strategies to build student outcomes, are likely to be effective (Barber & Mourshed, 2007).

The Cambridge Standards for School Self-Evaluation (see Table 9) are based on these indicators of effective schools and provide a mechanism by which schools can reflect upon them formally.

More detailed consideration of school effectiveness is provided in the *Developing your School with Cambridge guide*. This is available at: **www.cambridgeinternational.org/teaching-and-learning/developing-your-school-with-cambridge/**

Professional learning and development

A large body of research confirms that, of all the in-school variables that can be influenced, classroom teaching has the largest impact on student outcomes (Hallinger, Heck & Murphy, 2014; Hanushek & Rivkin, 2012; Hattie, 2009). It is what teachers know and do – their knowledge, pedagogical practices and relationships with students – that makes the difference in improving student learning outcomes. High-quality teachers are characterised by having a deep knowledge of their subject discipline and how concepts are taught, a commitment to ongoing professional development, high expectations for all students and the creation of a positive student–teacher relationship. According to Hattie (2003):

'Teachers account for about 30% of the variance [in student performance]… Students who are taught by expert teachers exhibit an understanding of the concepts targeted in instruction that is more integrated, more coherent, and at a higher level of abstraction than the understanding achieved by other students.'

Creating strong, professional learning communities among teachers is a powerful tool for improving student outcomes. Networks of professionals, planning and collaborating together around student learning, are known to have a greater collective impact than teachers working in isolation. The work of Bolam et al (2005) and Louis & Marks (1998) found that student achievement was significantly higher in schools with strong professional learning communities. It is important, therefore, that the focus shifts from helping individuals be more effective in their isolated classrooms to creating a collaborative culture of interdependence and shared responsibility (Dufour & Marzano, 2011; Fullan, Rincon-Gallardo & Hargreaves, 2015) and building, what Hattie (2015) calls 'collaborative expertise'.

School leadership and governance

The school principal, together with other senior administrators, has a critical role in creating the conditions necessary to support the learner attributes and the practices associated with effective schools. They need to provide a clear vision and sense of direction for the school, promote evidence-based teaching practices, prioritise professional learning, create a culture of high academic expectations and ensure that student learning is central to school improvement strategies. It is interesting to note that school leadership has a significant influence on student outcomes, second only to classroom teaching (see for example: Leithwood et al, 2004; Louis et al, 2010; Qian & Walker, 2011; Robinson, Lloyd & Rowe, 2008). Leadership is also the single most important determinant of attracting and retaining high-quality teachers (Darling-Hammond, 2013).

The importance of the principal as an instructional leader is well supported by research (see for example Robinson, 2008). Robinson concludes that the more school principals focus all their efforts and their own learning on improving teaching and learning, the greater their influence on student outcomes. More recently, Hattie (2015, p. 24) has argued that leaders need to build teacher instructional skills through 'collaborative expertise'. Fullan et al (2015) build on the theme of capacity building by arguing that the primary strategy for leaders is to build effective collaborative cultures.

Within the school the relationship between leadership and school improvement and school effectiveness is clear. What is also increasingly clear is the critical role that strong governance plays in effecting ongoing improvement. The Confederation of British Industry argues that 'evidence shows that more effective governance and higher quality leadership and management together have a positive effect on the quality of provision and on pupil achievement'(Confederation of British Industry, 2013 p. 8). Its research confirms that schools and principals need robust support structures to help drive improvements. Leaders benefit from a clear framework in which to act, so that they can carry out their roles effectively and be properly held to account.

The Cambridge Standards for School Self-Evaluation

The *Developing your School with Cambridge guide* Chapter 2 (available at **www.cambridgeinternational.org/images/271307-creating-the-school-development-plan.pdf**) considers the registration standards expected to become a Cambridge authorised school, and development planning post-registration. The Cambridge Standards for School Self-Evaluation (see Table 9 and Table 10) are designed to help schools reflect on their progress post-registration with Cambridge, providing more support for schools that want this service. Schools can complete a questionnaire that provides a carefully structured opportunity to engage with their three main stakeholders – students, staff and parents. It also allows them to collect data which will help them reflect on their performance, design improvement strategies and track progress over time in the key areas of performance as defined by the literature relating to effective schools.

The focus for school improvement defined in these standards is unambiguously a student learning culture and everything that contributes to that culture, such as leadership, teacher quality, governance and parental support and involvement.

While the evaluation surveys provide powerful feedback, schools are encouraged to collect other data sets (for example, academic results and annual improvement plans) to complement the data collected through these surveys. These data may also suggest that the school needs to investigate further particular areas for development, and this can be done at the school level through a range of analysis and data strategies.

Table 9: Cambridge Standards for School Self-Evaluation

Cambridge Standards for School Self-Evaluation	
Domain 1 – The school's mission and values 1. The school has a clear mission and vision statement underpinned by its educational values. 2. The culture of the school focuses strongly on student growth and the realisation of their potential in all areas of development. 3. The actions of the school leaders and teaching staff are consistent with the school's values and philosophy. 4. The school promotes intercultural understanding, celebrates diversity and actively develops in students a deep appreciation of other people's views and perspectives.	3. Teachers and teaching are of an excellent quality and are enhanced by systematic, high-quality professional development opportunities. 4. The teaching and learning programme caters effectively for individual student needs. 5. Formative assessment (assessment for learning) is embedded into classroom practice throughout the school. 6. Students at the school are actively engaged in their studies, think reflectively, and exhibit a love of learning. 7. Students demonstrate behaviours and attitudes that are consistent with the school's mission and values. 8. Student transitions from year to year are managed effectively and seamlessly.
Domain 2 – School management and leadership 1. The school principal and leadership team have the appropriate knowledge, skills and experience to lead the school effectively. 2. The school leadership team promotes high-quality educational programmes and activities for all students and tracks individual growth. 3. The school culture is inclusive and supports all students and staff in their learning and development. 4. All members of staff are supported through a performance and development programme which focuses on continuous improvement. 5. The leadership team has a clear process for evaluating programmes and developing school-wide improvement strategies. 6. Teachers and staff have a clear sense of their shared purpose and mission. 7. Students and staff feel valued and are treated with dignity and sensitivity.	**Domain 4 – The physical environment of the school** 1. The school's resources are sufficient to support a high-quality teaching and learning programme. 2. The school is a safe and secure place in which students can learn. 3. Students have access to up-to-date technology, tools and resources to enable quality learning. 4. The school uses resources sustainably and in turn encourages students to take responsibility for the local and wider environment in which they live.
Domain 3 – Quality of teaching and learning 1. The school's written curriculum is fully articulated and made available to the school community. 2. The school is committed to an ongoing and rigorous review of its academic programme to ensure quality outcomes for all.	**Domain 5 – School community engagement** 1. School parents are actively engaged in the life of the school and have regular opportunities to contribute their knowledge and expertise. 2. Parents receive regular reports about the progress of their child/ren in academic domains as well as other areas of development. 3. Parents are perceived as co-partners in their child/ren's learning. 4. The school engages with and mobilises relevant individuals and groups within the community and welcomes them as co-contributors to the life of the school.

Table 10: Some exemplar questions from the Cambridge Standards for School Self-Evaluation

Examples of questions asked against Cambridge Standards for School Self-Evaluation:
Formative assessment (assessment for learning) is embedded into classroom practice throughout the school. (Standard 5)

To what extent do students agree with the following?

- My teachers provide me with feedback about my learning on a regular basis.
- My teachers help me to understand mistakes I have made.
- My teachers regularly mark my work and return it to me promptly.
- My teachers provide support when I am having difficulties.
- I am encouraged to give feedback to teachers on my learning.
- In my assignments, I know what I have to do to be successful.

To what extent do teachers agree with the following?

- In my classes, I use a broad range of assessment tasks.
- Students have opportunities to provide written feedback about their learning in their classes.
- Students have opportunities to improve their work after they receive feedback.
- It is important to show students what success looks like in their learning.
- I always give students written feedback about their work.
- I use a range of formative assessment strategies to plan the next steps in my students' learning.
- I know what the key concepts are for my curriculum area and pay particular attention to them in my classroom practice.

To what extent do parents and carers agree with the following?

- Teachers provide feedback through written comments on assignments.
- Our children receive individual attention with any difficulties they may encounter.
- Our children know where they are in their learning and what they have to do next to improve.

Chapter 4: Innovation and creativity

> “Electricity is not only present in a magnificent thunderstorm and dazzling lightning, but also in a lamp; so also, creativity exists not only where it creates great historical works, but also everywhere human imagination combines, changes, and creates anything new.”

Lev Vygotsky, 1930/1967, cited in Smolucha, 1992, p. 54

Overview

Innovation and creativity are fundamental to all academic disciplines and educational activities, not just the arts. The creative process, as with reflection considered in the previous chapter, is a critical component of making sense of learning experiences. A number of approaches to teaching and learning are considered in this chapter that help to nurture creativity and innovation. See Figure 6 for a visual overview (page 58).

What are innovation and creativity?

Innovation can be broadly thought of as new ideas, new ways of looking at things, new methods or products that have value. Innovation contains the idea of output, of actually producing or doing something differently, making something happen or implementing something new. Innovation almost always involves hard work; persistence and perseverance are necessary as many good ideas never get followed through and developed.

Creativity is an active process necessarily involved in innovation. It is a learning habit that requires skill as well as specific understanding of the contexts in which creativity is being applied. The creative process is at the heart of innovation and often the words are used interchangeably.

According to Kampylis and Berki (2014, p. 6):

‘Creative thinking is defined as the thinking that enables students to apply their imagination to generating ideas, questions and hypotheses, experimenting with alternatives and to evaluating their own and their peers’ ideas, final products and processes.’

Kaufman and Beghetto (2009, p. 6) developed four categories of creativity which help to reveal the nuances between different levels and types of creativity. See Table 11 (page 54).

Table 11: Four categories of creativity

Big-C creativity (sometimes called 'high' creativity)	Big-C creativity is reserved to describe the work of an elite few who have transformed their discipline with their inventions. Their work has been generally accepted as being innovative and ground-breaking, even if it was considered controversial when it was first created. Some examples are scientific works such as Einstein's theory of relativity and Darwin's theory of evolution, and works of art such as Picasso's Guernica, Jane Austen's novel Emma or Ludwig van Beethoven's Symphony No. 9 in D Minor. Big-C creativity is out of reach of most of us, and big-C creators themselves are often as extraordinary as their creations.
Pro-c creativity	This type of creativity has involved time (usually at least 10 years) and effort to develop. A musician who showed promise as a child, has trained to degree level and now makes a living teaching and playing classical music could be classified as pro-c. A physicist working at a university who teaches and undertakes academic research could also be classified as pro-c.
Little-c creativity	Little-c creativity is about 'acting with flexibility, intelligence and novelty in the everyday' (Craft, 2005, p. 43). This results in creating something new that has 'originality and meaningfulness' (Richards, 2007, p. 5). This everyday kind of creativity can be found in the kind of person who can resolve a complex problem at work, is a keen gardener with an eye for design, or takes creative photographs and exhibits them on a photo-sharing website. School-age learners may work at little-c level if they engage in purposeful practice in their discipline. Little-c creativity involves practice and may be developed over a long period of time. The internet has provided the infrastructure for little-c creativity to thrive. Websites such as YouTube, Instagram and Etsy enable creative people to share their expertise and work.
Mini-c creativity	Mini-c is defined as the 'novel and personally meaningful interpretation of experiences, actions, and events' (Beghetto & Kaufman, 2007, p. 73). This is the kind of creativity that can be nurtured by teachers and parents. 'Mini-c happens when a person demonstrates "flexibility, intelligence and novelty" in their thinking' (Craft, 2005, p. 19). It is usually applied, but not necessarily limited, to children's creativity. Mini-c creativity may not be visible to outsiders and may consist purely of ideas and connections that the learner creates. As Vygotsky (1967, p. 7) explains: 'Any human act that gives rise to something new is referred to as a creative act, regardless of whether what is constructed is a physical object or some mental or emotional construct that lives within the person who created it and is known only to him.' Piaget suggested that 'to understand is to invent' (1976, cited by Richards, 2007, p. 95) meaning that a learner 'invents' an understanding of new material for themselves. Mini-c creativity could describe a learner's achievement in finding several different ways of approaching a maths problem. It could also involve making a new connection between their existing knowledge and a new piece of information which helps them to understand the subject more fully.

The boundaries between these categories can be blurred and they are not age specific. A person could fit into multiple categories in different areas of their life. For example, a chef who could produce dishes at a pro-C level while at work might work at a little-c level when attending a watercolour painting class.

The two categories most relevant to schools are little-c and mini-c creativity. They highlight the fact that being creative and innovative is not so much about revolutionary ideas or new inventions that change the world. It is about individual growth achieved through small insights. Creativity and innovation are fundamental to all disciplines and an essential part of the learning process, forming an important dimension of learning how to learn, which we considered in Chapter 3. They are also fundamental to teachers improving their professional practice and to school development.

Being innovative and creative is dependent on the other attributes. Being creative requires reflection, encourages engagement and develops confidence and responsibility. The ability and inclination to be creative is essential to living a fulfilled and successful life, and it is valued in higher education and the workplace. There are many other benefits of maximising one's own creative potential such as physical and psychological health improvements, improved resilience in the face of difficulties and even lower levels of aggression (Richards, 2007, p.9).

Craft (2005, p.15) points out that our understanding of innovation and creativity have progressed and broadened over time. In the early 20th century creativity was considered to be an innate, elusive quality that individuals were born with. Initially creativity was most closely associated with the arts but grew to include science, technology and other disciplines. In the 21st century creativity is increasingly viewed as a distributed and collaborative process of communal sense making and problem solving.

As with all the learner attributes, cultural perspectives are also very important when considering creativity. Confucian heritage cultures, for example, tend to see creativity more as a collective exercise. They place responsibility for creativity on the social group rather than the individual. Individuals, therefore, are not encouraged to stand out from the class in the same way or to the same extent as in Western cultures. This does not mean that creativity is in any way less valued. As with all the learner attributes, ideas presented in this chapter need to be interpreted and implemented in a culturally sensitive way.

Creativity, innovation and learning

As discussed in Chapter 1, learning involves challenging, refining and improving understanding by being made to think hard. Sometimes, to understand new concepts and broaden perspectives, our approaches to thinking need to be creative, imaginative and lateral (incorporating new ways of looking at things), as well as linear (using existing patterns of thought).

One characteristic of the creative process that makes it particularly powerful is that it requires not only knowledge and understanding of the domain being investigated, but also a willingness to question and not be constrained by existing knowledge. Learners should understand how they can question or challenge established knowledge to help them to formulate their own understanding, and imagination can play an important role:

'One cannot think creatively unless one has the knowledge with which to think creatively. Creativity represents a balance between knowledge and freeing oneself of that knowledge' (Johnson-Laird, 1988, p.207, cited by Sternberg, 2012, p.4).

For creative thinking to deepen and extend learning, rather than be an enjoyable but superficial activity, it must be grounded in understanding of the content being investigated. It is vital that learners have sufficient understanding of the material with which they are being asked to be creative. Creative practice needs to complement diligent and deliberate practice that develops foundational skills – not be a substitute for it.

A revised version of Bloom's original 1956 taxonomy by Krathwohl (2002, p.212–218; see Figure 4) includes creativity in the taxonomy and places creativity above evaluation as a higher order thinking skill. An alternative, and probably more accurate, representation would be to include creativity as a process involved in skills at all levels represented in the taxonomy, and increasingly so with higher order skills. It might be thought that remembering factual information does not involve creative processes. In fact, as the section later in this chapter on mind maps reveals, creative approaches can be very helpful in remembering information. The processes used by champions at the World Memory Championships are highly creative as they use the mind's capacity to recognise and remember chunks or patterns that have meaning to the individual much more effectively than isolated facts.

Creative learning activities, like any other, need to respect Vygotsky's zone of proximal development with appropriate scaffolding provided by the teacher.

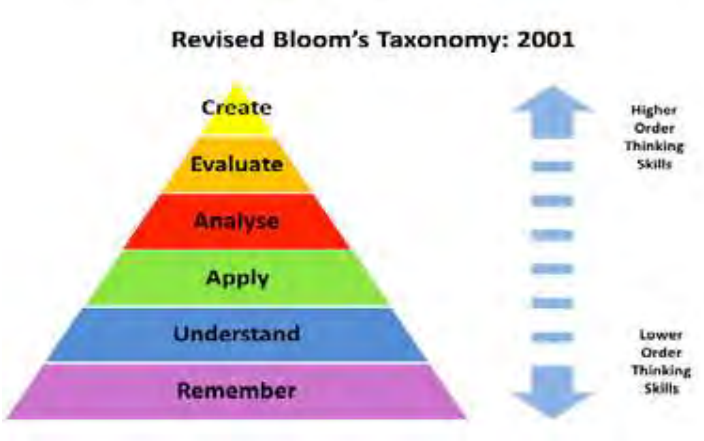

Figure 4: A revised version of Bloom's taxonomy

This is an area in which cultural sensitivity may be particularly important. If students are not used to being asked to demonstrate creative habits and skills they need to be guided. How the creative activity links to broader learning objectives needs to be clearly understood by teachers and students.

Having a creative habit, the disposition to behave creatively is critical. Csikszentmihalyi (2002, p.99) emphasises the importance of having a playful attitude while remaining disciplined. Whenever possible, play should be used to extend the range of opportunities to think. There are several character traits and learning habits that affect a learner's personal disposition, motivation and confidence to be creative. For example:

- resilience: an ability to tolerate uncertainty and persevere at a task to overcome obstacles
- not being afraid to make and learn from mistakes
- an ability to suspend judgement while generating ideas
- willingness to take sensible risks or go out of their comfort zone in their work.

A creative learner needs to be able to develop and apply a set of skills that they can use in the creative process. These include being able to:

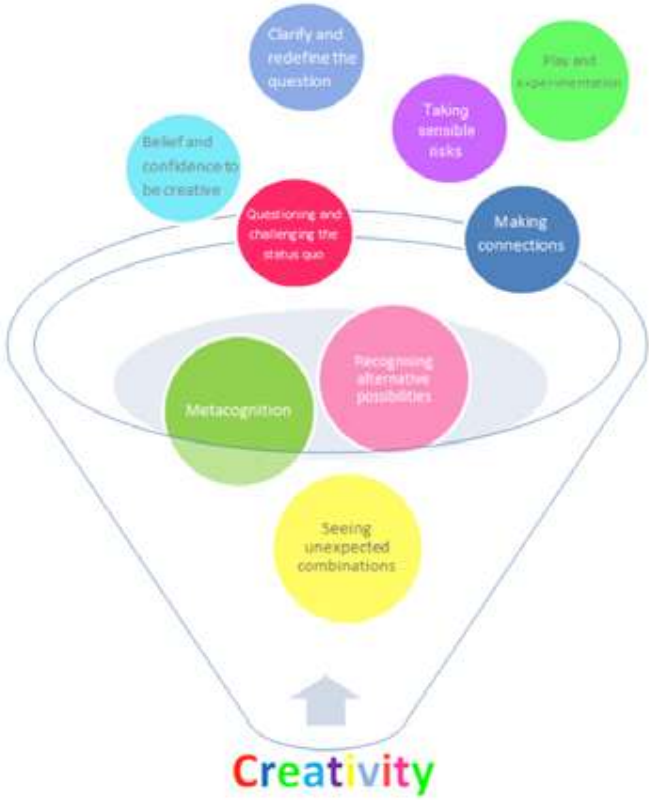
- clarify, analyse and re-define the problem or question to uncover new ways of looking at it
- ask thoughtful questions
- notice connections between seemingly unrelated subject matter
- challenge established wisdom by asking: how would I improve this?
- recognise alternative possibilities
- look at things from different perspectives.

Creative processes usually require self-regulation, and the ideas relating to reflection and metacognition considered in Chapter 3 apply. These include learners:

- being aware of their own skills, both strengths and limitations
- thinking of a range of different strategies or approaches to use in response to a problem or question
- planning which approach to use
- monitoring their work, and being flexible enough to change to a different approach if necessary
- critically evaluating their work at appropriate points

Creating a culture of creativity in schools and classrooms

We are all born with a creative instinct and all people have creative potential. Young children naturally engage in play – a state when the imagination is used to 'try out' situations and possibilities. A cardboard box becomes a car, grass becomes food, a toy comes alive. As children mature and move through their school career, creativity can be stifled as an unintended consequence of other pressures. Students can become fearful of making mistakes if they only receive recognition for giving an answer



the teacher is looking for rather than valid original thinking and ideas. A study on creativity and innovation in education in European member states (Craft, 2005, p.21) found that teachers preferred their learners to be 'conforming' or 'considerate' to 'risk taking' and 'playful' (Ferrari, Cachia & Punie, 2009, p.21). A culture of 'one right answer' stops learners from being willing to make mistakes. They quickly learn to guess what answer the teacher has in their heads. As von Oech (1998, p.14) points out, 'many of us have been taught that the best ideas are in someone else's head'.

Like any habit, creativity can be encouraged or discouraged. Having a learning rather than a performance orientation, considered in Chapter 3, helps to create an environment where creativity is encouraged. Schools that are successful at stimulating creative learning:

- value and celebrate learners' creative and innovative contributions
- do not overcrowd the curriculum. They focus on depth as well as breadth. They manage time effectively, providing opportunities for pupils to explore, concentrate for extended periods of time, reflect, discuss and review. Students are expected to reflect deeply on the material that they are learning and to make connections between subjects and topics
- encourage a broad and balanced curriculum so that students experience a range of subjects and activities, including the arts
- encourage students not studying the arts as qualifications to pursue creative activities in the co-curricular programme
- develop codes of behaviour and classroom procedures that value and promote creativity
- encourage sensible risk taking, for example, teachers trying something new in their lessons.

The creative process requires time and collaboration, so creating time for creative thinking activities is important. Using a flipped classroom approach for example, where learners prepare content and do written exercises preparing for lessons in advance at home, allows teachers to plan for higher-level creative thinking activities during class time. Another approach that helps students to make connections across topic areas and understand the discipline as a whole is spaced delivery of content in lessons. This involves teachers revisiting related subject matter over a long time rather than just teaching each topic as a separate entity.

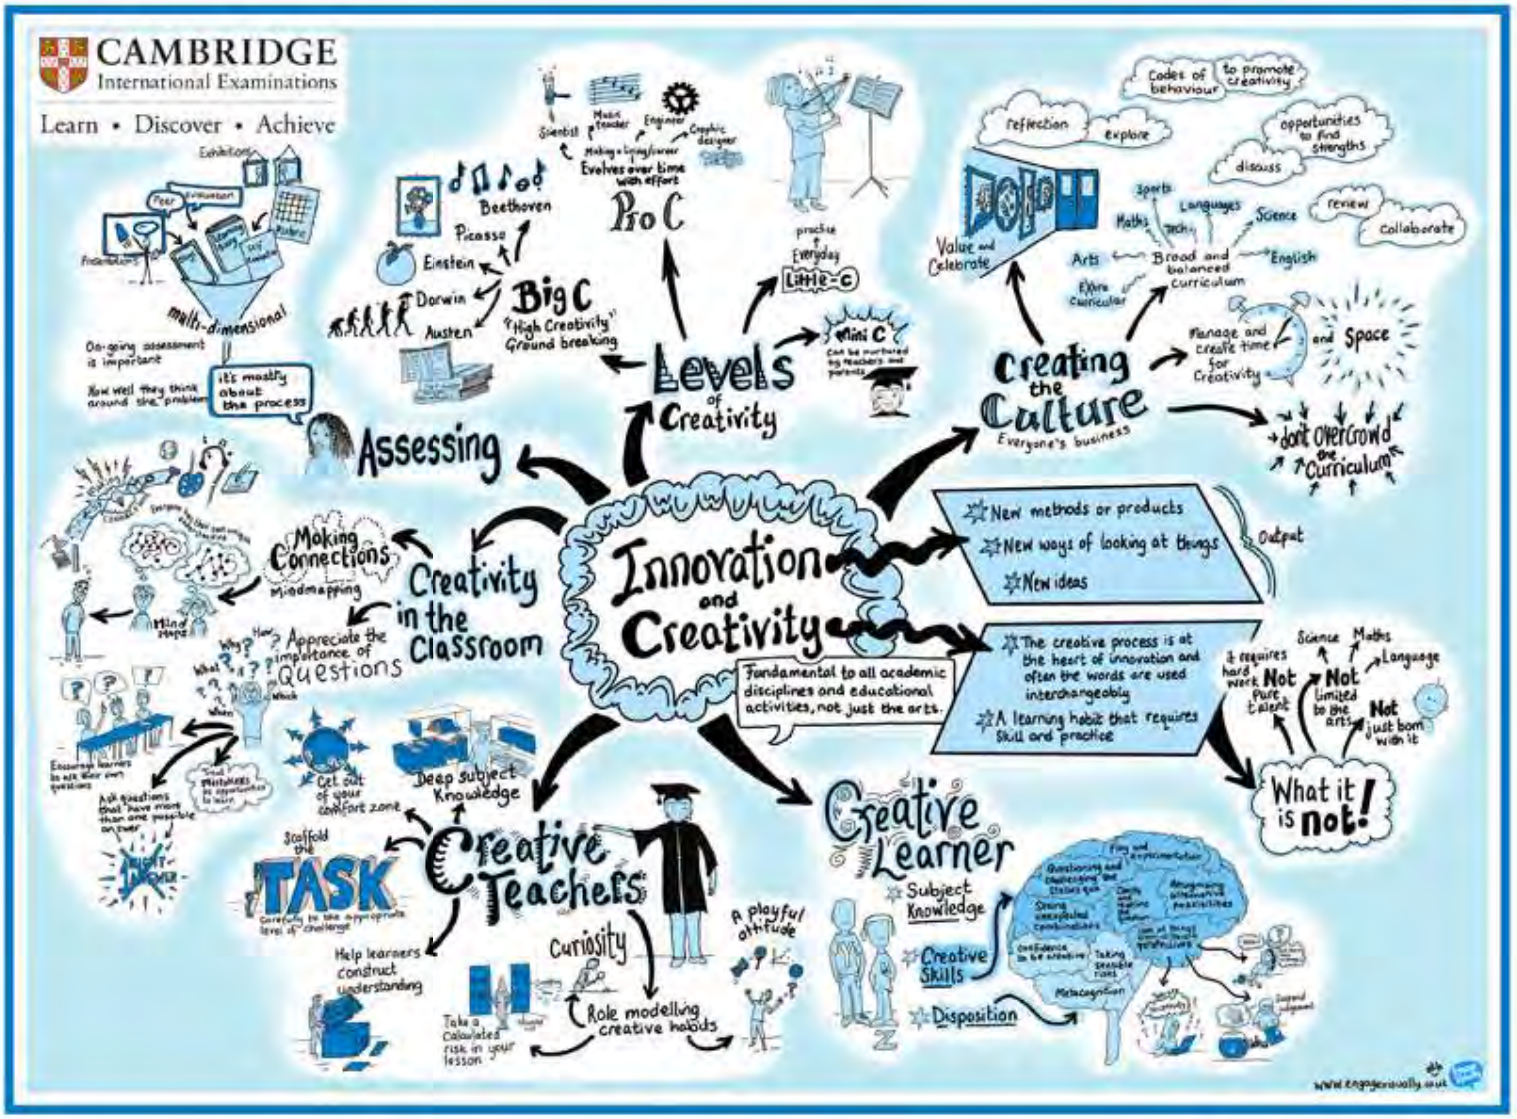


Figure 5: A creativity orientation

Creating a climate in the school by providing an environment that supports innovation can be very powerful, as Case study 10 shows:

St. Andrew's Scots School, Buenos Aires, Argentina – The Learnerspace: a new pedagogy by design

Watch the video at
https://vimeo.com/228213052

Makerspaces have become ubiquitous in schools all over the world to encourage students to apply creativity and critical thinking through design. A similar approach to learning, transforming a traditional environment into a Learnerspace can also be a great catalyst for moving pedagogy towards a learner-centred model.

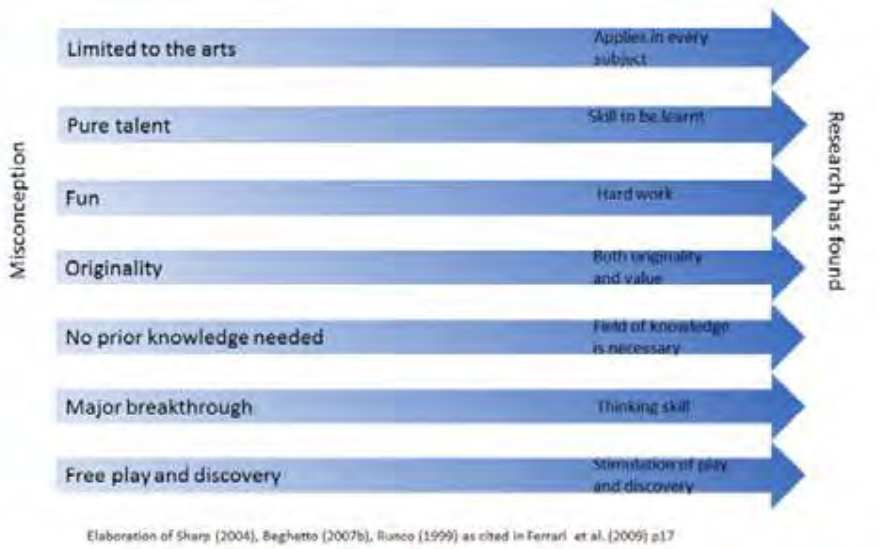
Of all the many spaces in school, the school library lends itself to becoming an emblem for a new learning paradigm. In that context, we set out to embody the principles of 21st century learning through a transformation that was as profound as it was bold, and that went far beyond architectural modifications.

The first dimension of change entailed making true on the principle that learning is continuous, and transcends the physical and chronological boundaries of the classroom. By de-centralising books from the library and sending them out to school corridors and departments, we sent out the message that learning is not restricted in space and time. By allowing students to freely check out books without restrictions or controls, throughout the school, we explicitly stated that learning is a transcendent value that knows no limits or constraints.

In moving from a library to Learnerspace, the most important element of change was making sure that the redesign of the space was conducive to joyful learning. Three distinct spaces were created: a large, flexible workspace with furniture that could be rearranged freely to suit multiple configurations; a cave-like, forest-themed silent room; and a collaborative room with two projectors and floor-to-ceiling walls that students can write on. All throughout the Learnerspace, blackened walls invited students to express themselves using chalk.

Student reactions surpassed our best expectations. From being a space that students mostly used to seek refuge from cold weather, the library almost immediately became the centre of gravity of the school. Students naturally tended to occupy and make spaces come alive in ways that were hitherto unforeseen. Teachers started delivering their lessons at the Learnerspace, often sharing space with colleagues, and increasingly applying differentiation of teaching to the needs of individual learners.

And then the true joy of the learning process gradually emerged. Midday philosophy talks, quiz show-type contests, educational board games, and even a chessboard with a clock for blitz games also became manifestations that learning could be an enjoyable process.



The Learnerspace embodies most of the desired learner attributes: students discuss their learning and naturally engage in metacognitive reflections, propitiated by the collaborative environment and the literal writing on the walls; they become less teacher dependent; exercise their creativity by expressing themselves actively within the space; work on the development of creative projects; take possession of the space in meetings related to their leadership roles; and create new extracurricular projects.

Many of the community forums and discussions also take place in the agora-like open space, with an openness that inspires the discussions and projects that emerge from such gatherings. The importance of the physical learning environment is often underestimated in how it can truly foster a new learning modality consistent with the modern information-rich world. Sometimes schools are daunted by the magnitude of the change required, but our Learnerspace has joyfully demonstrated that a few changes in the layout can have a substantial and inspiring effect.

Common misconceptions about creativity

Runco (1999, cited in Ferrari, Cachia & Punie, 2009, p.16) explains that people sometimes hold tacit beliefs or theories about the nature of creativity which can have detrimental effects on attempts to nurture creativity in an educational context. These theories are different from what research suggests is in fact the case. For example, many people believe that creativity is a natural talent which cannot be taught, whereas studies have shown that learners can improve their creative thinking skills with the right type of input.

Figure 7: Common misconceptions about creativity

Elaboration of Sharp (2004), Beghetto (2007b), Runco (1999) as cited in Ferrari et al. (2009) p17

Creative teachers: How can teachers help learners to develop their creative habits and skills?

'Cambridge teachers are creative, experimenting with new ideas and pursuing an enquiring approach in their teaching. They are open to new challenges, being resourceful, imaginative, and flexible. They are always ready to learn and apply new skills and techniques.'

Chapter 4 of the *Developing your School with Cambridge guide* considers the attributes of effective teachers (available at **www.cambridgeinternational.org/teaching-and-learning/**). It highlights that effective teachers have a deep knowledge of their subject as well as an understanding of how students think about subject content at different developmental stages (pedagogical knowledge). They are able to make thinking visible, helping learners to recognise misconceptions and manage their own learning. Because the creative process is fundamental to student learning, nurturing creativity is also an aspect of good teaching in all subjects.

Fostering a creative climate in the school, supportive of creative teacher professionalism, is another theme considered in the Developing your School with Cambridge guide. It is very hard for a teacher to be creative if they are following a prescribed curriculum and given little or no room for their own creative input into their teaching practice. Syllabuses, textbooks and teacher support material are extremely important in helping to structure and support learning but they also need to allow for the teacher's professional creativity. Teachers can support creativity and innovation by:

1. **Role modelling creative habits**
   Nothing is more important than the teacher exemplifying the habits, behaviours and thinking they want students to demonstrate. They need to exemplify creative traits such as curiosity and the development of creative skills (see thinking routines later in this chapter).
2. **Appreciating the critical importance of questions, both their own and those asked by students**
   Considered later in this chapter.
3. **Treating mistakes as learning opportunities and encouraging learners to take sensible risks in the classroom**
   Encouraging learners to take 'sensible risks' in their work is important for building up their creative confidence. It is important that this takes place in a supportive environment, and that the teacher and learner have discussed what boundaries are acceptable in their context. It is also important to set some ground rules in collaboration with learners.

4. **Giving learners sufficient time to complete their work**
   Sometimes ideas need time to develop before becoming valuable. Giving learners the scope to come up with their own ideas can be challenging for both teachers and learners. Learners will need time to think and work independently of the teacher. Delay judgement of learners' ideas until they have had time to work them out properly.
5. **Scaffolding tasks carefully to provide the appropriate level of challenge**
   Ideally, a teacher should try to design tasks that help the learner to cross over into this area by 'scaffolding', or supporting them at first, and then withdrawing support so that the learner can increasingly achieve the task on their own.

Even a small change in teaching approach can bring about a change in a learner's creative disposition. If learners start to see that there is not always 'one right answer' to many questions, both in school and in life, then their creative confidence will grow. The most important thing of all is for learners to lay the foundation of their personal creative abilities, on which they will build throughout their lives

Incorporating creativity into classroom practice across the curriculum

Problem solving and enquiry are at the heart of learning. By definition, they require learners to think hard using their existing understanding to engage with the question or problem at hand and work out solutions.

Pitching questions or problems at exactly the right level to stretch student thinking, and providing just enough support, is the mark of a good teacher. How teachers present problems and questions will vary depending on student age, the local culture, the discipline being studied and many other factors. There is a place for a wide range of approaches including whole-class instruction as well as individual and group collaborative work, and some variety is important.

Sometimes it is incorrectly assumed that creativity occurs best in group work with the teacher acting as a facilitator. In fact, direct instruction involving the whole class can encourage creativity as long as the classroom culture is supportive and the class focuses on powerful questions and problems. It is important to note that direct instruction, well done, is identified in John Hattie's work (2009, p. 204) as a highly effective approach to teaching and learning. Direct instruction should involve a highly skilled active process in which the teacher engages and challenges student thinking, responding quickly to student thinking as it emerges. Discussions are focused on important concepts and ideas with questions from students. The teacher stimulates thought and encourages new ideas and new ways of thinking. Both students and teachers see errors as guiding what still needs to be learned rather than signalling failure.

Enquiry-based learning is often associated with student-led projects. In this context learning involves a teacher and/or learners setting a meaningful problem or question which challenges and extends learners' understanding over an extended period of time. Projects could be within one subject or combine two or more subjects. The problems or questions may be open ended, complex and multi-faceted. Projects often culminate in learners doing a presentation of their work to the rest of the class, but the 'product' created could be something that is made public such as a blog, website, exhibition or magazine. By its nature, project-based learning involves learners using reflective, creative and critical thinking skills in collaboration with others.

For project-based learning to work well it is important that the learning objectives are clear, supportive of the broader curriculum, and the teacher plays an active role in supporting the development of student understanding. This may involve the teacher standing back for long periods, allowing students to explore and experiment and think through the problem, but they need to be active in challenging student thinking and bringing learning to a productive conclusion. Cambridge Global Perspectives (considered in Chapter 7) provides well-structured examples of this approach.

One advantage of enquiry-based learning is that it provides an opportunity for learners to collaboratively explore a question or problem from multiple perspectives using lateral as well as linear thinking. Edward De Bono is credited with inventing the concept of lateral thinking and has developed a number of approaches including the Six Thinking Hats (1993, p. 54), a strategy that can be used to help learners at all levels and in any subject, to think about a question from multiple perspectives (see De Bono in the Resources section).

Using questions to trigger creative thinking

Socrates (470–399 BC), popularised through Plato's writings, believed the best form of teaching was through using skilled, disciplined questioning to deeply explore ideas resulting in improved understanding. This technique has become known as 'Socratic questioning' and is a fundamentally important teaching and learning approach in all disciplines. A good question, from the teacher or student, has the power of making student thinking visible and is a natural part of the ongoing feedback loop in classrooms between students and teachers, helping to guide the instructional process.

On average, teachers ask between 300 and 400 questions a day (Leven & Long, 1981, p.29). If a teacher carefully plans the type, wording and delivery of questions that they are going to ask in a lesson, research shows that the quality of learners' thinking and responses will improve (Budd Rowe, 1986, pp.43–50). Questions that stimulate responses that require complex mental processing can encourage creativity. What if...? and Why…? questions tend to stimulate creative and critical thinking, especially if followed by more questions that probe and encourage the learner to go further (Kazemi, 1998, pp.410–414).

Asking learners to think of their own questions is a particularly valuable activity. Guy Claxton (cited in Scales, 2013, p.250) points out: 'Asking good questions is the basis for becoming a successful learner. If children aren't asking questions, they're being spoon-fed.' A learner formulating a question can illuminate their current thinking, helping to guide instruction, as well as being a creative activity in its own right. Encouraging learners to ask questions can:

- develop their curiosity about the subject, helping with engagement
- stimulate learners to 'think hard' about a topic
- consolidate a learner's understanding of the material
- enable learners to look at a topic from different perspectives
- clarify a goal or plan for their own investigations
- inspire them to want to find out the answer.

One line of questioning that can encourage creative input is 'possibility thinking'. This requires learners to explore ideas and use their imagination to generate lots of possibilities. If a teacher regularly asks questions that have more than one answer during lessons, this can develop an atmosphere where learners feel that their unique contributions are welcomed and valued. This helps learners to develop their creative disposition as described earlier in this chapter.

Table 12: Examples of possibility thinking

Consider asking your learners questions that have more than one possible answer

In maths: 'How many ways can you find to make 24 using any mathematical operation?'

What was the question?
'The answer is… 1989, … what was the question?'

Give learners a word or number that could be the answer to many different questions in your subject. For example, the question could be:

- When did the Berlin Wall fall?
- In which year did South Africa start to dismantle the apartheid system?
- In which year did the Cold War end?
- Which year saw the dissolution of the Soviet Union?
- Which year saw the end of the Soviet Union's occupation of Afghanistan?
- When did Tim Berners-Lee produce the proposal that led to the World Wide Web?

Thinking routines, introduced in Chapter 3 (see Harvard University's Project Zero 'Visible Learning' resources at the end of the chapter) can be helpful in generating questions and nurturing critical and creative thinking skills, emphasising the use of discussion and collaboration in the classroom. One example of a thinking routine is below in Table 13. This can be adapted to almost any subject or context to prompt thinking and questions from learners.

Table 13: Harvard Project Zero – Artful thinking routine: See/Wonder/Connect

This thinking routine is useful to trigger questions and thinking about a topic for which you have a related photograph, artwork or object. For example, photographs of a specific place for a geography case study.

See: Show learners an artwork, photograph or object that relates to your subject. This could be in an art gallery, or the classroom.

Wonder: Brainstorm a list of 3–5 questions about the artwork. Use these question stems as starters:

I wonder… Why… What are the reasons… What if… I am puzzled by… How would it be different if… What if we knew…? If I could interview the artist/maker, I'd ask…

Connect: Compare the artwork/object/photograph to others you've seen. How are they similar? How are they different?

The questions that learners formulate should be recorded and displayed if possible, to show the value that the teacher places on them

Mathematics, creativity and innovation

'Creativity is what maths is all about… We're coming up with some completely unexpected patterns, either in the reasoning or the results… We're thinking in terms of beauty and creativity, but the outside world thinks of us like a computer' (Sir Andrew Wiles, who proved Fermat's Last Theorem).

The Fields Medal is the mathematical equivalent of the Nobel Prize, awarded to mathematicians who have made major contributions to the field. In 2014, it was awarded to a successful young mathematician called Manjul Bhargava. His achievement was to simplify a very complicated mathematical 'proof' from the 18th century into a few lines. He was inspired by seeing a Rubik's Cube in his room, and imagined that the numbers that he was working on were applied to the corners of the Rubik's Cube. 'If you think about things the way someone else does, then you will never understand it as well as if you think about it your own way,' he said about the creative process that led to his breakthrough.

That mathematics is still being created often comes as a surprise to most students, and many teachers. Their perception is that mathematics is the one subject in which you know conclusively that you have the right answer. Indeed, many students prefer mathematics over other subjects precisely because of this. The misconception arises because they believe that calculation, and solving routine problems such as those assessed in qualifications, is mathematics. In fact the whole point of learning mathematics is to solve problems, including those which are non-routine, and that of course involves thinking creatively.

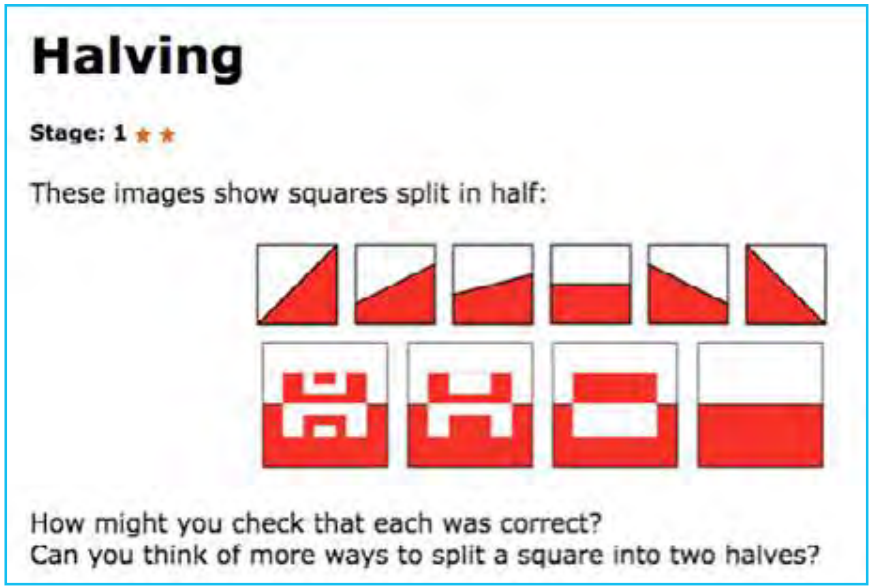
While Fields medallists – who are certainly exhibiting Big-C creativity – come along only once in a while, there are plenty of opportunities in mathematics lessons to support students in becoming creative mathematicians of the small-c or mini-c variety. Indeed, a mathematics scheme of work that does not include opportunities for students to think mathematically – to explore, discover, imagine and produce some mathematics which is original to them – needs serious adjustment.

So what does creativity look like in the mathematics classroom?

Firstly, creativity is considerably inhibited if students do not have an adequate mathematical toolbox. In other words, they need to have a reasonably secure base of

knowledge and skills to draw on. However, creative activities should not be restricted to those who are already good mathematicians. The very act of being creative can itself enhance students' understanding and fluency, so such tasks are suitable for all.

To support students in being creative, teachers offer tasks and activities which allow students to:



1. **Find multiple ways of solving a problem.**
2. **Ask their own questions as well as answering the teacher's.**
3. **Discover relationships, patterns and make connections that are new to them.**
4. **Conjecture about the results of making changes.**

The NRICH project (**www.nrich.maths.org**) offers 'low threshold, high ceiling' tasks. These are open-ended tasks which everyone can begin, but which have enough challenge built into them to occupy the most confident and competent, so they are suitable for whole-class teaching.

Next are four examples of such tasks.

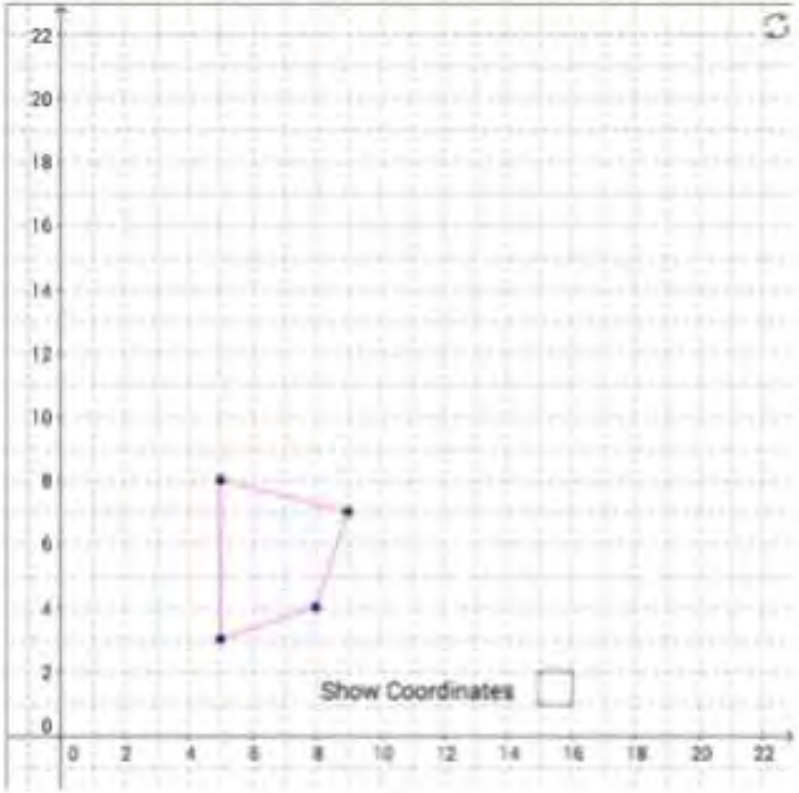
1. Finding multiple ways of solving a problem

This activity, recorded on squared paper (with square size appropriate to age of student) supports the concept of equivalent areas. The examples offered show identical halves and the majority of students will be able to replicate this idea. However, creative individuals will look for examples where although the areas are equivalent, the shapes of the halves are not the same. This is an example of students devising their own solutions and simultaneously extending their idea of a half, and of area. To see how students solved this, visit **nrich.maths.org/1788/solution**

2. Ask their own questions

The mathematics in Got It! is quite trivial – adding small numbers. However, to 'solve' the question, students have to work out how to win. This requires asking the right questions and trying out lots of strategies. The question includes some 'high ceiling' hints such as changing the target – but students have to choose wisely if they are to succeed. For an interactive version visit **nrich.maths.org/1272**

3. Discover relationships



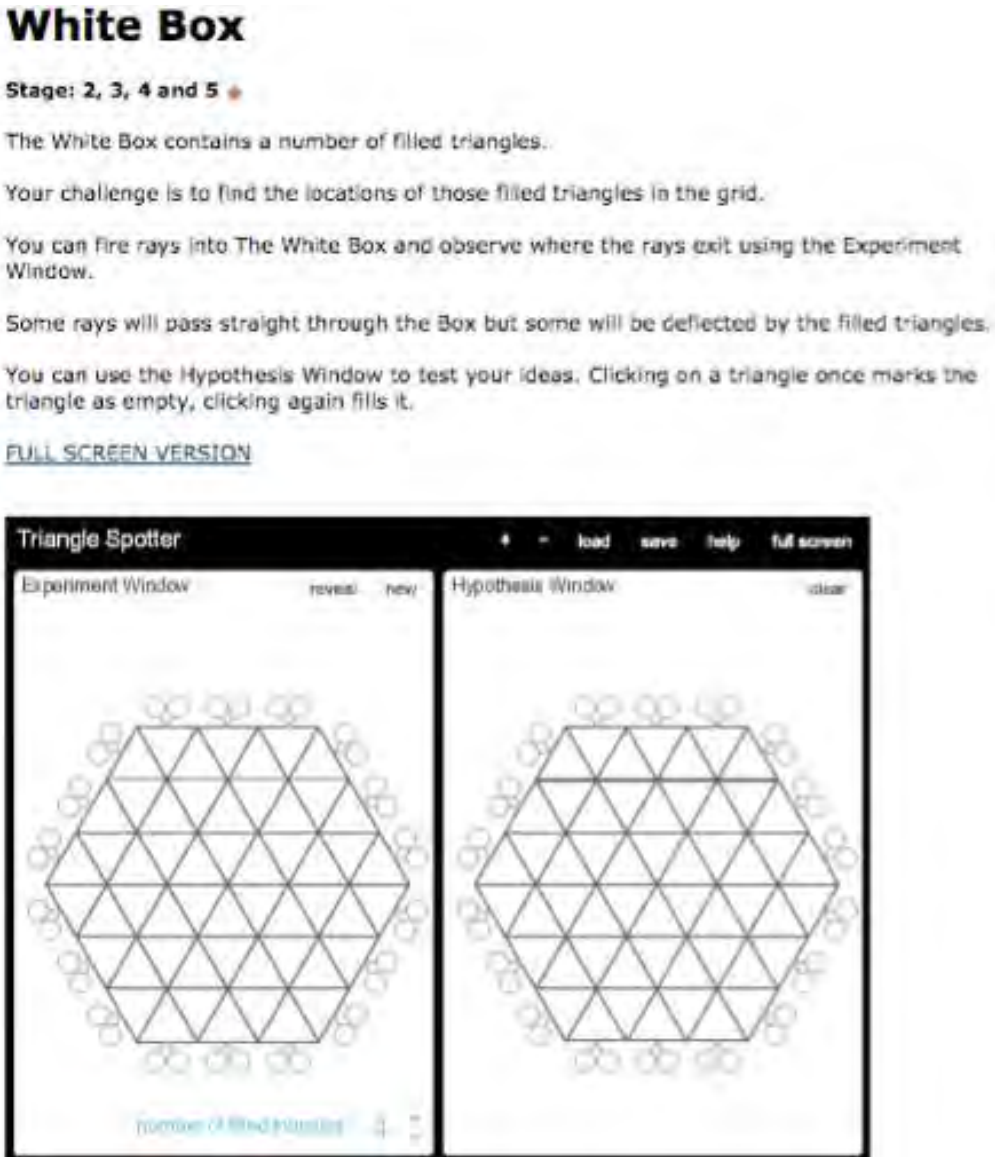
This interactive task allows students to play around with the characteristics of squares, using visual clues initially. To solve the last question, they have to focus on the coordinates and are then confronted with the idea that points in certain relationships have coordinates that fit a pattern. This activity highlights the power of digital technology to provide instant feedback – a hugely important part of working creatively. Visit **nrich.maths.org/10733** to find out more.

Coordinates of Corners

Stage: 3 and 4

This resource is part of "Dotty Grids - Exploring Coordinates and Vectors"

Move the dots below to make some squares. Can you make a variety of squares whose sides are not parallel to the axes?



If you have a set of four coordinates, is there a quick way to decide (without drawing) whether they form a square?

4. Conjecture about making changes

White Box (**nrich.maths.org/7007**) models the scientific process of working out the structure of atoms and molecules. It is an ideal activity to support students in making conjectures or hypotheses, as they work systematically to change the layout, record their findings and deduce what is happening. Where must the triangle be to produce that result? What if I move it to…? As with 3 above, these modelling-type questions would not be possible without immediate feedback.

A proficient mathematician therefore needs not only a thorough knowledge and understanding of the subject matter, but they also need creative thinking skills to be able to manipulate that knowledge and to become truly innovative.

Science and creativity

Science is not only a body of knowledge to be learned and understood, it represents a powerful method in identifying and solving problems with a significant creative component. Well-planned, structured enquiry is fundamental to science teaching as it reflects the scientific method: curiosity based on existing knowledge, hypothesis formulation, systematic observation, measurement and experimentation leading to new insights. A deep understanding of the scientific method provides powerful knowledge to students, preparing them for further study in science and helping them to understand applications beyond science. One simple example of enquiry-based learning in science that offers the potential for creative thinking is in Table 14, below.

Table 14: An example of a low-tech tinkering activity: Marble Machines (Winterbottom et al, 2016, p.14)

Cambridge teachers exploring the idea of scientific tinkering

In this activity the participants choose from a wide selection of recycled materials and low-tech tools (for example, scissors, sticky tape, cardboard, elastic bands, pipe cleaners) to achieve the goal of 'getting a marble to move from the top of the pegboard to the bottom as slowly as possible'. The imposed condition 'as slowly as possible' is important. Without it, it's too easy, and the goal is too closed.

Through their explorations, participants may engage in 'engineering' (for example, working out the best materials to create a funnel), 'making' (for example, building a run from cut-up tubes) and 'tinkering' (playfully experimenting with the different materials as they develop their thinking and set new short-term goals).

In a science lesson, this could be a starting activity to help learners to encounter ideas about forces and motion before any of them have been taught the ideas theoretically. By imposing the 'as slowly as possible' condition, learners use intuitive ideas about friction. They also use ideas about rotational movement, linear movement, acceleration and velocity. When they have misconceptions about those topics, this activity can help expose them, and enable the learners to discover that they have misconceptions.

However, most of the time, this is not used in the context of a specific topic in science. It is more there to foster skills, and understanding of the nature of science, including hypothesis setting (albeit informally), testing, controlling for variables and collaboration.

What can we learn from the arts?

Arts subjects such as art and design, music, drama and dance are often associated with creativity and innovation. A broad and balanced curriculum (see Chapter 2) recognises that encouraging the arts can help students to develop their own creative voice and creative thinking skills. Studying an arts subject can also build learners' self-confidence as they feel valued for their unique contributions and talents. When encouraging creativity across the curriculum, it can be useful to look at the ideas and techniques that underpin the teaching of creative subjects such as art, drama and music.

Learner autonomy: Arts subjects can be popular with learners because of the perceived high level of learner choice that is involved. Learners often work on projects that they have devised themselves, according to their own interests and passions. Unique and original work is particularly valued, in both informal and formal assessments. When learners take control of their work in this way, their levels of intrinsic (internal) motivation tend to increase (Craft, 2005, p.56).

Valuing uniqueness: Every learner's outcome will be different in arts subjects. The idea of there being 'no one right answer' is deeply embedded in both the teachers' and the learners' approaches. Although other subjects have more fixed subject matter, it is important for students to learn that there is often more than one correct answer or more than one way to arrive at an answer.

Experimentation and play: In all arts subjects, there is an emphasis on experimentation and 'play'. An art teacher will introduce a technique or material, for example acrylic paint, and learners try it out. This may initially involve copying examples and practising. Boden (2001, cited in Ferrari, Cachia & Punie, 2009, p.19) describes this as 'exploratory creativity', and likens it to a jazz musician learning to improvise based on a defined set of chords or scales. Having developed some degree of skill, learners can then start to experiment and push the boundaries of the material or technique. They may choose to combine it with another technique or idea to produce something that is original to them. Boden calls this 'combinatorial creativity' – the generation of new ideas by combining or associating existing ideas.

There is a role for experimentation and play in all disciplines so that students learn to use their imagination and develop engagement. As in arts subjects, this must be balanced with, and be supportive of, skill development so that it supports students' basic literacies.

Looking at and discussing artworks: The study of artworks is not necessarily limited to art or art history lessons. Images of artworks can be used to prompt thinking in any subject area. Teachers can use carefully chosen artworks to prompt discussions and deeper critical thinking about a topic. Visual Thinking Strategies (VTS), developed by Yenawine (2014, p.25; see the Resources section) uses art to help learners of any age to develop their visual literacy, thinking and communication skills, and is an excellent resource.

Journals, notebooks and sketchbooks: Keeping a notebook, sketchbook or journal is an essential part of an art and design education. All the creative skills can be practised through the discipline of keeping a record of a learner's observations, ideas, reflections and collections. By recording and collecting a wide range of information, a learner can then start to cultivate creative connections between different elements and come up with more unique and original ideas. Notebooks and journals have been used by many great creators, such as the poet Lord Tennyson, who recorded fragments of thought and then generated connected words and images which led to his poetry (Michalko, 2001, p.58). Charles Darwin kept detailed journals on his travels to the Galapagos Islands, and his journals contain a record of his tentative diagrams of the branching system on which he eventually based his theory of evolution. Guy Claxton (2006, p.353) recommends encouraging learners 'to keep a commonplace book… in which they keep scraps of overheard conversation, images, quotes, fleeting thoughts that didn't go anywhere… as most creative writers, scientists, composers do'.

The value of failure: The arts, perhaps more naturally than other subjects, accept and celebrate failure as a learning opportunity and understand that it is an inherent part of the creative process. As West-Knights (2017, p.49) points out: 'One of the mainstays of drama classes… is the notion that mistakes are OK, as long as you are trying things out.'

Peer review and feedback: Peer review sessions (sometimes called group critiques) are commonly used in art and design as a method of informal interim assessment. Learners present their work to small groups of their peers and receive constructive feedback. The process is carefully scaffolded by the teacher, who leads initial sessions, modelling the types of questions and comments that are appropriate. When successful, peer reviewing helps learners to build independence, gain insight into their peers' working and thinking processes, and develop confidence in themselves as creative individuals.

Making connections: mind mapping

As illustrated in figure 6 on page 58, mind maps (sometimes called concept maps or spider diagrams) are a flexible and powerful tool for representing information and nurturing creative and critical thinking. Originally popularised and developed by Tony Buzan in the 1970s, mind maps are designed to 'harness the full range of cortical skills' (Buzan, 1986, p.45) by using key words, colour, images, number, logic, rhythm and spatial awareness.

Mind maps are essentially diagrams that visually organise information. They normally consist of a central concept, which is expressed with a key word or short phrase. Related ideas branch off from this, spreading across the paper, which is usually in landscape format to give the optimum space for ideas to be written. Each main branch that emerges from the central theme can then branch out further to related sub-sections.

The theory of semantic network models (Collins & Quillian, 1969, p.240) helps to explain why mind maps are effective. Each learner has their own unique understanding of any subject at a particular time based on their own personal associations and connections. The act of creatively constructing mind maps requires students to think hard about what they are learning and to build new connections. Learners will find it easier to remember information by building their own personal representation of understanding. It is impossible to create a mind map without active engagement and thinking through the construct being mapped. Building up a large amount of information on a page also encourages creativity. Learners can make connections between topics, which they may not see while studying a dense block of text. Mind maps can be used in a number of ways including:

- Note taking. The act of creating a mind map requires chunking of information and concepts, relating them to each other. This can be helpful both in developing understanding and helping to memorise information. It makes the process of note taking active rather than passive. At the end of a unit, a teacher might ask learners, individually or collaboratively, to create a mind map of what they understand about a topic that has been covered. Many learners find mind mapping a very useful technique when revising for exams, as the process of reformulating their notes into a new structure is in itself a memorable activity.
- Planning essays, presentations or projects. By using key words, learners can fit large amounts of information onto one page, allowing them to get an overview of a topic and to plan information strategically.
- Clarifying, analysing and re-defining problems or questions. This helps learners to uncover new perspectives, to build higher-level thoughts and to develop understanding, analysis, synthesis and evaluation.
- Making connections. This supports the development of holistic and disciplinary understanding through connecting ideas from different topics or different subjects.

Mind maps are an extremely versatile and accessible approach to help visualise and understand material. Many learners, including those who have dyslexia or other learning difficulties, find mind maps very useful, and they can be used to support learning in all disciplines. Research by Park and Brannon (2013, pp.2013–2019) found that training learners to use visual and spatial representations significantly improved their performance in mathematics, even when undertaking numerical problems. Research has shown that mind mapping is more effective as a means of knowledge retention and transfer than attending lectures, participating in class discussions or reading text passages alone (Nesbit & Adesope, 2006, p.434).

For more information on mind maps see the references and resources at the end of this chapter.

Assessing innovation and creativity

As argued already in this chapter, the outcomes of creative processes are incorporated naturally into teaching and learning. Teachers can assess them when students complete an assignment or task and have demonstrated creativity.

Because creativity is a process inherently linked to reflection, it is often valuable to assess progress at appropriate points in the journey. This needs to be done sensitively. If learners or teachers are too critical of ideas during the ideas generation phase, they may find that they dismiss all their ideas and do not have anything to work with.

Creativity lends itself to self-evaluation, peer evaluation, process/progress learning diaries (sometimes called process or progress journals), portfolio assessments, blogs, presentations and exhibitions. As Rachel Logan, Product Manager for Art and Design at Cambridge explains: 'We are assessing how well they have thought "around" a problem, not necessarily how well the solution works.' She adds: 'It's vital that learners have critically evaluated their outcomes, but in the end it's mostly about the process that they went through to get there.'

Ellis and Barrs (2008, p.78) have developed a generic rubric to informally assess creative learning. Rubrics are designed to clarify criteria and standards against which students' work can be assessed. This focuses on the processes involved in creative work, including investigation, skills, discussion, evaluation and reflection. The rubric is intended for use in a primary classroom, but could be adapted for any level.

Resources

Questioning

Rothstein, D. & Santana, L. (2015). *Make just one change: Teach students to ask their own questions*. Cambridge, MA: Harvard Education Press.

This practical teachers' guide describes the 'question formulation technique' as developed by the authors over several years of working with learners across a range of socio-economic backgrounds, including bilingual learners. The book goes through the strategies step by step and gives examples of how teachers of different subjects have implemented the technique.

Essentially, the strategy is to prompt learners' curiosity with a 'question focus' which could be an image, statement or audio-visual stimulus. Learners then create questions through divergent thinking routines. They then prioritise and improve these questions with help from their teacher. Finally, a range of possible next steps are suggested as to what learners might do with the questions. These include 'do-now' activities, identifying topics for further research and investigation, preparing for tests, providing formative assessment information for teachers or preparing a research agenda for the next unit of study.

Educating for Creativity: Level 1 Resource Guide
www.creativeeducationfoundation.org/wp-content/uploads/2015/06/EFC-Level-1-FINALelectronic.pdf

This guide from the Creative Education Foundation gives lots of useful tips about how to encourage your learners to solve problems creatively. The creative problem solving (CPS) process is based on the Osborn-Parnes CPS model. There are descriptions of brainstorming-type activities for cross-curricular projects. The ethos behind this model is to encourage an environment in which creativity and innovation can thrive using a range of techniques and strategies. The authors aim to nurture creative skills which will become an integral part of learners' work and life in future.

Buzan, T. (1996). *The Mind Map book*. New York, NY: Penguin.
One of many publications by Tony Buzan that explores the possibilities of mind maps and explains how they are best generated.

De Bono, E. (1993). *Serious Creativity: Using the Power of Lateral Thinking to Create New Ideas*. USA: Harper Business.
Although primarily aimed at a business market, this book contains very detailed descriptions of how to implement Edward De Bono's many lateral thinking tools, including Six Thinking Hats, Provocations, Random Input and more. There are also suggestions for how to run training or set up a creative thinking session, which could easily be adapted for use in schools.

Online resources from Edward De Bono
Edward De Bono's CoRT thinking tools are described in this resource, along with many other ideas for using questions to trigger critical and creative thinking:
www.nsead.org/downloads/Effective_Questioning&Talk.pdf

Instructions and descriptions of De Bono's CoRT thinking tools with examples:

Chapter 5: Student wellbeing

Overview

Learning is embedded in emotional states. A confident, responsible, reflective, innovative and engaged learner reasons and makes decisions on the basis of positive personal values and an understanding of their emotions. This chapter looks at the profound impacts of wellbeing and stress on learning and performance. Most of it has been written by the author and speaker Nicola Morgan, informed by presentations she gave in 2016 at Cambridge Schools Conferences.

Schools should care about wellbeing and stress because it is the decent and fair thing to do. However, they also need to care because wellbeing and stress management directly affect students' outcomes at school as well as their ability to thrive in later life. The concept of resilience is often used to describe people's ability to deal with pressure and stress effectively. It is a life skill that schools need to nurture. All students will encounter adversity and barriers to learning. The resilient will overcome these, helping them to fulfil their potential.

This chapter considers a number of potential pressures that can have an impact on young minds. Adolescent brains are different from those of mature adults in significant ways. The world in which young people operate is dominated by technology and social media, and this is creating new pressures that need to be understood. This chapter ends with some practical strategies for schools to improve stress management, increase wellbeing and empower students to manage their lives.

The adolescent brain

Adolescence can be described as a progressive transition from childhood into adulthood. During this phase teenagers go through profound changes in brain and functional development. These changes affect young people in different ways and to different extents, but it is important for teachers and other adults close to young people to recognise this.

For example, scientific evidence (Casey, Jones & Hare, 2008) suggests a neuro-biological reason for high-risk-taking and impulsive behaviour and emotional reactivity in adolescents. Emotional processing that occurs in subcortical limbic regions is particularly powerful in relation to control exerted by the prefrontal cortex area of the brain. This means that in situations that are personally emotionally charged, adolescents tend to rely less on intellectual reasoning and more on their feelings. If the situation is not emotionally charged, for example if an adolescent is asked a hypothetical moral question, logical reasoning will dominate.

The development of the social brain during adolescence supports the observation that during this period of life individuals may be more susceptible to social pressure to seek status with peers and also to embarrassment in social situations. Peer influence is an extremely important driver for behaviour at a time when adolescents are moving away from the protection of their family unit and building new groups (see Blakemore S.-J., 2014, for much work on the adolescent social brain). The importance of self-image in front of peers is particularly heightened during adolescence.

What is wellbeing?

Wellbeing describes a state of overall mental and physical health, strength, resilience and fitness to function well at work and personally. It was brought into the public and educational domain by positive psychologists, notably Seligman (2011), and offers an alternative to the goal of 'happiness', which tends to describe a transient, short-term state which cannot logically or practically be sustained for long. 'Happiness' itself – that active emotion, 'how I feel now' – is highly reactive, depending on the right things happening to or around the person. When a sad, worrying or difficult event or thought occurs, that feeling of happiness necessarily ceases or decreases. Happiness is hard to control, being immediately dependent on both an internal mindset and external factors.

'Wellbeing' is more stable and resilient. Although it is somewhat affected in the longer term by outside influences, when a sad, worrying or difficult thing happens, wellbeing is not immediately affected. In fact, a good state of wellbeing offers some protection against difficult outside events. One might say that wellbeing is a background state, whereas happiness is a temporary response to stimuli. Wellbeing helps cause success and good function; happiness is caused by them (among other things).

Wellbeing is neither permanent nor innate. It is a state of mind and body which is acquired over time and can be lost over time. It forms a valid part of a school curriculum because:

- it has profound direct effects on learning and performance
- it affects relationships with peers, family and teachers
- many aspects can be (to a valuable extent) within the control of an individual who has learnt good practices
- not being fixed, it is vulnerable over time to external events; therefore the individual needs to build a bank of wellbeing for resilience
- understanding about and strategies for wellbeing gained at an early age can be used at all stages of the individual's life – wellbeing management is a genuine life skill
- it explicitly affects learner attributes as students can better 'understand themselves as learners' when they understand some influences that directly affect their ability to learn easily
- for all these reasons, it falls into the competency category of Living in the World.

In summary, people with good wellbeing feel generally healthy, sufficiently positive, able to focus on the task in hand and ready to deal with whatever occurs. They have reserves of physical and mental health, and resilience, to help them deal with more negative events or challenges. Crucially, people with good wellbeing can proactively manage stress, rather than suffer from it. For more insights see Dodge, Daly, Huyton & Sanders (2012).

What is stress and what problems does it create?

Stress is a positive, life-enhancing and even life-saving biological response to threat or the need for peak performance. Its fundamental function is to respond instantly to physical threat or danger and optimise the powerful 'fight or flight' response in the brain.

When threat occurs, the brain (first the amygdala, followed by the hypothalamus and pituitary gland) instantly triggers the release of chemicals, most importantly the hormones adrenaline (in the US epinephrine) and cortisol. These combine to speed up the heart and breathing so that blood (carrying oxygen and glucose) is pumped quickly to the muscles of legs and arms, enabling them to be stronger than normal and to move faster. The nervous system is stimulated and the brain instantly becomes super-alert, focusing acutely on the threat, rapidly reacting to and choosing options to deal with it. The individual is likely not to notice less irrelevant things (including pain) and instead focuses on the task in hand: to survive and win, whether by fighting or fleeing. The physical feelings produced by these chemicals are somewhat unpleasant but this state of discomfort and agitation is required to stimulate the individual to act.

Thus, in a situation of threat, the stress response allows the individual to super-perform: to run faster, jump higher, fight harder, focus better and react more quickly and strongly, both mentally and physically, than under relaxed circumstances. 'Threat' is not confined to physical danger such as being chased by an aggressor or predator (the original biological purpose). It applies to all situations where a creature is required to super-perform or deal with challenge: exams and tests, competitions and matches, arguments and debates, any performance or situation where people are looking at the individual. Even apparently small things such as being asked a question one does not know the answer to, being addressed by a stranger, noticing that one is late for something, a person saying something hostile, something unusual or unpleasant or strange, hearing about a frightening or tragic event, having an anxious thought: all these activate the biological stress response. And the aim in every case is the same: to enable survival and success.

Therefore, stress is not something to avoid or fear. It is natural and healthy and facilitates best performance. In that case, why do we tend to frame it negatively? Why do some people 'suffer' from stress and become ill, under-performing instead of super-performing? Exactly what are the problems with stress?

Clearly, people do suffer from stress. Stress-related illnesses lead to time lost from school and adult work. Suffering from stress is very unpleasant and spoils our enjoyment of life. But we should be clear about the exact problems if we are to avoid meaningless clichés and if, crucially, we are to understand and act on some solutions.

There are three main ways in which stress can be a problem, whatever the age of the individual. We will later look at some ways in which teenagers may respond differently and reasons why some extra attention may be needed for that age group.

1. Panic: too much adrenaline response can lead to a feeling of panic or a full panic attack.
2. Cortisol build-up: cortisol doesn't disappear quickly once the threat is over and the build-up can lead to many short, medium and long-term problems.
3. Preoccupation: when our mind is occupied by something, we have less 'bandwidth' to focus on necessary tasks, so performance suffers.

Let us look in more detail at each problem. Later in this section, we will look at solutions.

The panic response and the effects of cortisol build-up

An over-production of or over-reaction to adrenaline makes the heart race to the extent that, instead of feeling focused and ready, we feel panicky, out of control. Most people will have experienced this. One feels overloaded by information and messages, while experiencing uncomfortable physical symptoms, such as shallow breathing, a racing heart or palpitations, sweatiness, nausea and even, sometimes, vomiting or diarrhoea. Usually, this passes quickly once the anticipated event (such as an exam, sporting match or public performance) is over. However, the individual may feel so uncomfortable that he or she focuses more on the discomfort than the performance.

Sometimes, this leads to a panic attack. A panic attack is different from a more ordinary feeling of panic in two ways: first, it is usually in response to something relatively minor rather than something commonly recognised as terrifying. This means that it can be unpredictable and sufferers may become anxious about the possibility of a panic attack. Fear of a panic attack can trigger a panic attack. Secondly, the severity is such that the sufferer loses control; the need to get away from the stressful situation can lead to running from the room, failing to notice what one is doing; sufferers commonly really believe (falsely) that they may die.

Whereas adrenaline dissipates quite quickly from the body once the threat or perceived threat has passed, cortisol lingers. Today's stresses tend to be frequent and lingering, rather than the occasional life-threatening ones that the stress response evolved for, so there is a huge opportunity for cortisol to build up.

Possible effects of cortisol build-up are wide ranging, and directly affect wellbeing, function and performance in all areas of life, including home, social and school. A function of cortisol that helps explain this is that it supresses some bodily functions that are 'unnecessary' in the moment of stress: including protective mechanisms such as the immune system. So we become temporarily vulnerable and this vulnerability can linger after the stress trigger has passed. It is often impossible to be clear which of the following are directly caused by cortisol build-up or simply a more general repeated assault on the stress system, but factors commonly associated with persistent stresses leading to cortisol build-up are:

- sleep problems – difficulty in getting to sleep; also waking in the night or early in the morning and not being able to return to sleep
- poor concentration (which is also damaged by poor sleep)
- weaker immune system – it is common to be prone to minor ailments when suffering stress build-up
- other physical health problems – many illnesses may be worsened or some even triggered by stress; people with unconnected health problems may take longer to recover when under stress
- repeated headaches and stomach-aches
- change in appetite and therefore weight gain or loss – people may either lose appetite or be drawn to more unhealthy foods, particularly sugar and other carbohydrates
- low mood – which can lead to problems in relationships and lower self-esteem
- irritability – also affects relationships and self-esteem.

Preoccupation

This interesting and complex topic is relevant not only to the effects of stress on learning and performance but also to the widespread problem of distraction and multi-tasking in today's technology-dominant society. This will be mentioned in more detail later in the chapter but here let's look at preoccupation in relation to stress.

It is helpful to think of the brain as working on a 'bandwidth' principle (see Mullainathan and Shafir 2014), using the analogy of broadband bandwidth. The capacity of connection to the internet (whether fixed or wireless) is finite. If someone using the same line is doing something that occupies much bandwidth, everything else is slower. The brain works analogously. We have a finite amount of bandwidth or processing power, and different activities (both mental and physical) occupy different amounts. Some occupy little – those we have become expert in and which require little concentration, such as walking, clapping hands, routine tasks such as brushing our teeth. Other activities occupy a lot – complex or unfamiliar ones, or any we sense require a lot of concentration, such as reading complex or new material, writing, solving a problem, listening to instructions (see Levitin, 2014 for a comprehensive overview).

One activity which illustrates this is car driving. Once we are experienced drivers, we can do some driving without thinking very much; we can hold a conversation; listen to music or voices on the radio; think about our next meeting. We are driving somewhat automatically and using relatively little bandwidth compared to when learning to drive. But when a situation arises where we have to concentrate more, these secondary tasks become more difficult. If we have to concentrate on an unfamiliar route, or park in a tricky space, or a traffic situation arises, we tend to stop talking and may turn the radio off because we sense that we need more bandwidth for the driving activity. In fact, car manufacturers often engineer the car so that radio volume reduces during parking.

This will become very relevant when we look at distraction in the context of wellbeing, but it is relevant to our discussion of stress because one thing that occupies bandwidth is any major stressful situation or anxiety. When we are worried about something, that worry occupies a significant amount of bandwidth and affects concentration and performance. It is vital that we understand that bandwidth is effectively finite. Even if it turns out that we can learn to stretch it somewhat, in practical terms we are limited by the bandwidth we have at any time. This means that if a significant part of our bandwidth is occupied by something else, we cannot focus and perform at our best on the task in hand. Performance on that task suffers. This is why genuine multi-tasking is so difficult. People of all ages are vulnerable to this but there are reasons which make teenagers more likely to be vulnerable.

How do the challenges of stress affect teenagers more than others?

Biologically, stress seems to work similarly whatever one's age. There may, however, be small differences in sensitivity and adaptation in adolescence compared with adults. Some research suggests (Romeo, 2013), that hormonal stress responses may be stronger in teenagers, who may also adapt to a stressful stimulus more slowly, requiring more exposure to a particular stressor before learning to manage it with a less negative response. However, these differences are not categorical and may be small. Regardless, there are several ways in which teenagers may have more difficulty with each of the three stress problems.

Panic response:

- Teenagers have less previous experience of each stressor, so may be less able to process an event as 'something I have met before and will be able to manage'.
- They are less likely to have learnt simple strategies with which to fight the response.

Cortisol build-up:

- A school day contains many possible stressors. Students go between lessons, switching topic rapidly, and are required to perform better both in subjects they succeed in and subjects they struggle with. They are asked questions they cannot answer or criticised for imperfect work. Break times are not usually a genuine 'break', as students must socialise in a noisy environment and may be dealing with negative situations with friends and peers. (This is particularly the case for introverts, who require more breaks from noise.) There are pressures about how they look, how they speak, how many friends they have.
- There is little opportunity to relax, and adolescent free time often involves social media and screen time.

Preoccupation:

- Three mental activities use a significant amount of brain bandwidth: intrusive worrying or anxiety; processing new information; and using digital media. These are not the only high-bandwidth activities but teenagers may be trying to do all three simultaneously. When we discuss digital media and multi-tasking, this will become even more relevant.

- When preoccupied by a worry, it is very difficult to focus on work. The brain area we would use to force focus is the prefrontal cortex, which is not fully developed until well into the 20s (Morgan, 2007) so most teenagers will struggle more than adults with this.
- Teenagers typically have a great deal going on in their lives, each one occupying mental capacity.

What extra stressors do teenagers have?

There are stressors that apply more to this age group than to others. Consider how each might contribute to one of the three negative stress categories, occupy brain bandwidth and lower wellbeing.

- A perfect storm of change – everything is changing: their brains, bodies, chemistry, friends, pressures, curriculum, fears, protection from adults. Change is stressful if it is change one has not asked for or cannot control.
- Lack of control – they can control very little about their day. They may have developed 'learned helplessness', becoming so used to lacking control that they fail to notice where they could have control. They may not ask for help because they think no help is possible.
- Exams – stakes are high, with frequent demands to achieve the best, often unattainable goals.
- The internet and social media – these provide enormous benefits but come at some cost. Many costs apply equally to adults engaging in digital media, but teenagers may be more vulnerable because of extra pressures to do what friends and peers are doing and less well-developed neural control centres. Very briefly, these costs include:
  - Strong temptation to spend too much time on devices – this temptation is biological and powerful, involving dopaminergic reward pathways in the brain (Kardaris, 2017), which are activated during pleasurable experiences and addictive behaviours towards activities or substances we find pleasurable. Addictive behaviour is defined as continuing to seek pleasure despite clear negatives occurring from that pleasure.
  - More 'friends' than we can manage – the evolutionary biologist Dunbar (1997) has studied social groups of different species in relation to brain size and posits that humans can manage up to 150 'friends'. Friendships need to be maintained by certain actions and contact, and with more than around 150 we cannot do this properly. Anyone on social media typically has far more than 150 friends and contacts, and the act of trying to maintain them all – by responding with 'likes' or sympathy, for example – is stressful, exhausting and time consuming.
  - Constant comparison and goals of perfection – everyone's lives seem to be perfect, as they display their beautiful (touched-up) photos and talk about only their successes.
  - Competition for popularity – measured by how many 'likes' one's social media post has received. Each time we see that someone has liked a post or photo, we get a small rush of dopamine, that chemical responsible for the feeling of pleasure. There's evidence (Freitas, 2017) that many young people (and perhaps others, too) measure their own worth by how many likes a post or picture has received and can spend huge amounts of time checking.
  - The 'online disinhibition effect' – the theory proposed by Suler (2004) showing that most people of all ages are somewhat less careful or inhibited online than face to face. The 'toxic disinhibition' that he describes helps explain the prevalence of cyber-bullying and online 'trolling', as well as careless behaviour such as sending risky messages or pictures.
  - Some young people are dealing with difficult situations at home. They may be witnessing parental strife or unhappiness, dealing with illness or even the death of someone close to them, caring for a family member or aware of a whole range of preoccupying life problems. It is harder for adults to protect them from these things and yet they are not yet fully equipped to cope.
  - Friendships and peer pressure can be huge problems for this age group, harming wellbeing and dominating mental space.
  - Information overload, 'continuous partial attention' (Stone, 2017) and the problems of multi-tasking. These arguably affect any adults, too, and form such a large topic that we will look at them separately.

Digital media: information overload, continuous partial attention and multi-tasking

Those who use the internet and social media are reading far more than we were 20 years ago. Our screens, especially when we are online, provide many requests for attention, whether from notifications from apps or platforms, hyperlinks which we must decide whether to follow, moving images to attract attention, and text that encourages us to skim rather than to focus deeply. Many of us are in a state of what Stone (2017) calls 'continuous partial attention' – a phrase she coined in 1998, before smartphones had come to dominate. This state is likely to create a level of stress and inefficiency and, therefore, to lower performance on tasks that require focus.

We are all familiar with the experience of trying to concentrate and someone interrupting with a question or demand for attention. Most would agree that ability to concentrate is harmed, that we would perform better if left uninterrupted. When we (and this applies to all ages) work on digital media we have a situation where those interruptions and distractions are almost inevitable. Very often, communication software will be open while we are working, so notifications of emails or other messages may arrive. We can choose not to open those messages, of course, but that requires great self-control, which in turn requires significant mental energy and bandwidth. Even if we switch off our email and social media and remove our phones from sight, focusing on the document on our screen, we are distracted by hyperlinks. Each one requires a decision: to click or not. If we click, we are taken somewhere else and must adjust to the new document while somehow trying to remember the one we were reading. If we choose not to click, we expend energy in that decision, and research suggests that it takes more mental capacity to resist the temptation than to follow the link.

The message from a number of sources (Levitin, 2014; Gazzaley & Rosen, 2016) is clear: multi-tasking (with activities that require conscious mental process) is generally bad for performance and the attempt to multi-task by allowing interruptions is stressful.

Extra stress for introverts

Introverts are often particularly poorly catered for and undervalued in today's noisy, busy, social, collaborative schools and many workplaces. Yet they are estimated to make up a third to a half of all people (Bayne, 1995). To understand this, we must first understand introversion (see Cain's work (2013) for an excellent analysis). We must note that introversion is neither 'better' nor 'worse' than extroversion; they are simply two different sets of personality traits and there are advantages and disadvantages to each.

Despite popular opinion, shyness has little to do with introversion. Introversion describes an over-reaction to external stimuli, especially stimuli that include human interaction. Introverts may deal very well with strangers, have lots of friends and be adept performers. But every social situation, from a relaxed face-to-face chat with a close friend to walking into a room full of strangers or performing in front of a crowd, is mentally and physically tiring for an introverted person. An extroverted person, on the other hand, will typically feel energised by social interaction. This is partly a biological response but partly also because as an introvert it can feel as if one is using more 'brain bandwidth' when interacting with other people. Introverts may spend more effort imagining what the other people might be thinking, what other people's needs are, how the social situation is working. An extrovert might be having fun, while the introvert is processing a number of potentially alerting and stressful thoughts. They can do it but it has a cost: mental exhaustion and a feeling of being overwhelmed.

At school, many teaching methods and activities involve collaborative work. While collaboration cannot be ignored, teachers should realise that during these activities introverted students are unlikely to be doing their best work and may be more exhausted and more stressed, leading to poorer learning outcomes. When an introvert is asked to do a piece of work jointly with a neighbour, the introvert switches out of learning mode and into social mode. The last thing on his or her mind is 'How can I do as well as possible on this piece of work?'

Of course, most people have a combination of introvert and extrovert tendencies, or may feel differently in different situations or when in different mental states. But a significant number (even if a minority) of the students in any classroom will score highly on tests for introversion, and they pose specific problems and have specific needs if they are to fulfil potential at school and have good wellbeing.

The special requirements of introverts – and how to provide them:

- A school day, being noisy, busy and high pressure, and involving almost constant social interaction and expectation, is likely to be exhausting for introverted students. They need options for time out, to replenish their energy levels and reduce cortisol.
  - Ensure that your school has a place where students know they can find peace during break times. Offer time and explicit permission. When talking about this avoid terminology that suggests that students who need this are in any way more fragile than others. (This is not the same as a safe space. It is simply acknowledging that noise and social intensity are not good for some people.)
- Many students and staff have a poor understanding of introversion and may fall into the common trap of valuing introverts less highly than the social, seemingly confident extroverts. This can lead to low self-esteem for introverts and teasing by others.
  - Share understanding among students and staff of what introversion is. Of course, some staff will have introvert tendencies and this can be used to help understanding. Ensure that equal value is placed on introversion and extroversion, and that students can value the strengths that each other brings to all situations.
- Students need to learn skills to succeed in the extrovert world, including being able to stand up in front of peers and express oneself. Avoiding the things we fear is not the best way to overcome them.
  - While acknowledging that public performance may make introverted individuals more anxious and uncomfortable, teach that these skills can be learnt and that practice and familiarity make them easier. Expose students to challenging situations step by step, gently and respectfully. Encourage them to be proud of their achievements and to see the challenges as achievable and worth aiming for.
- Collaborative work is likely not to suit introverted students, but collaboration is necessary in schools and in life.
  - There are ways for teachers to manage collaborative situations to the value of all students. Cain's 2013 work (op cit) offers examples. Teachers should consider: assigning suitable team roles; allowing students to choose partners; offering choices for reporting and work sharing; sensitively facilitating turn sharing; joint presentations.
- Answering a question in public or sharing one's work with the class is likely to be very stressful for introverted students, yet this is a necessary part of schoolwork.
  - If students are aware both of the need for contribution and why it can be difficult, they can be armed with useful and often simple strategies. For example, they can prepare questions in advance, offer their contribution early in the lesson to get it over with and acknowledge pride in their achievement when they rise to the challenge.
  - Teachers can be encouraged to create an environment in which all students feel able to contribute without fear that they will be teased if they get it wrong or right. One useful idea is to tell students that no one should put their hand up for a certain amount of time after the question is asked; this gives introverts time to test their answer internally and extroverts time to think more carefully.

Strategies for schools

We see that stress can be a huge factor in teenage lives and can negatively affect their wellbeing and performance, despite its biological function being to encourage peak performance. What can and should schools do about this? How can you help students to manage stress so that it becomes genuinely performance enhancing, something that they can thrive on, not just survive with?

It is impossible to provide a complete guide to stress management in this space but the resources at the end of the chapter will guide you further. It is important also to share these with parents, so that they can reinforce the messages at home.

1. Educate about the biology of stress: what stress is; how it affects us (each somewhat differently); recognising symptoms; simple strategies to deal with each of the three categories of negative stress.

2. Ensure that no students or staff think stress is a weakness. Encourage openness and respect.
3. Reinforce the message that relaxation is not a luxury but essential for wellbeing and improves performance. Managing stress is as important a part of health and wellbeing as eating the right (and right amount of) food, having physical exercise and good quality sleep.
4. Teach instant calming strategies such as belly-breathing. This is sometimes called diaphragmatic breathing or abdominal breathing and refers to the fact that when we are stressed our breathing tends to become shallow and move to the upper chest. If we can learn to shift our breathing towards the abdomen, we immediately notice less tension and we feel better. Although it is simple, students should practise this so that it is easy to activate at moments of extreme stress or in a panic attack.
5. Provide 'time-out' every day and encourage students to build this into their own day/evening. For some, this will be a place where there is peace and quiet; for others it will be somewhere they can let off steam with physical activity.
6. Be deliberate about this time-out: when we expect a result, we are more likely to notice and experience it; so, if we take a break, do some exercise, read a book deliberately as a stress management activity, we are likely to experience greater benefit than if we were not so conscious and deliberate.
7. Provide good sleep education (see Wiseman, 2015). Understand the importance of sleep and how it is not only essential for mental and physical health and wellbeing but also for learning. Direct students to good advice about 'sleep hygiene', the term used to describe the things we should and should not do in the hour or so before sleep.
8. Emphasise the importance of a quiet, technology-free hour before bedtime.
9. Encourage daily exercise for pleasure: something each student can enjoy, whether team sport or solo exercise, energetic or not.
10. Encourage reading for pleasure. Understand and share the strong evidence (see The Reading Agency, 2015) of many benefits, including stress reduction and sleep improvement.
11. Give clear routes for students to talk to someone they trust. Keep these routes open and repeat regularly. Ensure that some staff have counselling skills and, ideally, mental health first aid training. Crucially, ensure that students understand that there is help for them.
12. Understand introversion and share that understanding among adults and students. Make sure you cater for and value introverts and extroverts equally.
13. Educate about the downsides of attempting to multi-task: worse performance and concentration, greater stress and exhaustion. Teach (and model) the importance of switching off devices when trying to concentrate. If devices are being used for a particular task, ensure that background or social media apps etc. are switched off and that only necessary software is open.
14. Model good stress management yourselves: students need to see a) that adults also have stress and b) that we deal with it proactively. Digital switch-off and making time for focused activities such as reading for pleasure are important for all ages.
15. Reinforce a message of 'active agency': the mindset that tells us that we can control a lot of our wellbeing by taking care of our diet, sleep, physical exercise and stress.

Learning to see failure as an opportunity

One consequence of moving from a performance to a learning orientation is that failure is viewed as both inevitable and desirable because it is impossible to grow as a human being without learning from failure. Humans are born with an instinct to learn from mistakes in a way that does not generate anxiety or stress. This changes if expectations are forced on young people to be successful, with performance and position counting for more than learning.

One of the purposes of the learner attributes is to encourage learners to be risk takers who have the confidence to take on new challenges and enjoy learning from mistakes. This requires learners to not be frightened to ask for support and help, and not to worry about losing face to their peers or teachers. Having intrinsic self-motivation is necessary for young people to become flexible, independent learners who are not dependent on extrinsic rewards. The resilient will have coping mechanisms to deal with failure, supported by the behaviour of individual teachers and the culture of the school.

Supportive parenting

It is very important to teach parents about the learner attributes. This helps them to understand the importance of having a learning rather than a performance orientation. This guide argues that doing this effectively will prepare young people for higher education, the workplace and life, as well as improving examination performance. For a helpful resource see the Queensland Research Digest (2014) listed in the Resources section.

According to Lahey (2013) schools need to have active strategies against over-protective parenting. He says: 'Year after year, my "best" students – the ones who are happiest and successful in their lives – are the students who were allowed to fail, held responsible for missteps, and challenged to be the best people they could be in the face of their mistakes.'

Lahey suggests teachers help by:

- creating a classroom culture where failure, setbacks and disappointment are expected and form the basis of future learning
- establishing and reinforcing an atmosphere where students are praised for demonstrating good learning habits, perseverance and grit rather than grades
- holding students to account for producing their own work. If work is not completed or it is plagiarised, there is a direct consequence
- educating parents that supporting their children through failure builds resilience and will prepare them well for success in the future.

Mindfulness

Mindfulness is increasingly becoming recognised as an effective approach that supports social and emotional learning and the development of resilience and emotional intelligence. Kabat-Zinn (1994) describes mindfulness as 'paying attention, in a particular way, on purpose, in the present moment, and non-judgmentally'.

Mindfulness practices are aimed at helping people to accept and respond skilfully to events as they happen. Adolescents who are mindful, either through temperament or training, tend to experience greater wellbeing, and mindfulness correlates positively with positive emotion, popularity and friendship extensiveness, and negatively with negative emotion and anxiety (Miners, 2008, cited in Weare, 2013).

While scientific evidence is currently limited, a number of well-conducted studies have produced promising results (see Weare, 2013). One significant project currently in progress is the MYRIAD (2015) mindfulness and resilience in adolescence study.

Chapter 6: Responsibility and engagement through community awareness, service and student leadership

> “As our society has become information rich, it has become action poor… As affluence has increased, the young person's environment has become impoverished for responsible and productive action, or any action that tests and develops them… There is more in us than we know if we could be made to see it; perhaps, for the rest of our lives we will be unwilling to settle for less.”
>
> **Kurt-Hahn**, 1886-1974

Overview

This chapter considers ways that schools can broaden students' educational experiences through activities designed to nurture confidence, responsibility, compassion, wisdom, innovation and collaboration. It builds on some of the ideas considered in Chapter 5 on wellbeing and in Chapter 2 on the co-curricular programme.

Challenge education

Kurt Hahn was an influential educational thinker who inspired the development of the Round Square conference of schools, the United World Colleges, the Duke of Edinburgh's International Youth Award and the Outward Bound movement. Hahn believed that appropriate challenges beyond the classroom provided unique experiences for the development of character and compassion. Those challenges included community service, outdoor pursuits and craftsmanship. It is interesting to reflect on what Hahn would have thought of the modern global information age – the quote at the start of the chapter is from the 1960s, and even then he was expressing concern for student inactivity due to an abundance of information.

Most education in schools focuses on developing academic competencies. If the only learning contexts that students experience are classrooms, formal teaching, books and the internet then students' development of all-round practical competencies will be constrained. Challenge education supports cognitive and affective development by challenging students to use critical thinking and problem-solving skills in contexts with which they are not particularly familiar, often working in teams, with powerful emotional engagement.

Challenge education, therefore, is an excellent way of supporting the development of collaboration and leadership. In completing a service learning activity or an expedition (or many other co-curricular activities such as team sport or playing in an orchestra) success is dependent on the whole group performing well. This often requires students to act as leaders, demonstrate resilience and practise their social skills.

Vygotsky's zone of proximal development, considered in Chapter 1, is primarily used for pitching academic tasks at precisely the right level of difficulty. The same concept can be applied to challenge education. Activities that fall comfortably within a student's current capabilities will not develop new competencies. Equally, schools have a responsibility to ensure that students can grow and learn through the experience and do not feel overwhelmed by expectations or situations that are too demanding.

The extent to which a school will wish to engage with these ideas depends on its vision and educational aims. It is perfectly reasonable for a school to have the sole aim of developing academic competences. That said there is much that can be achieved by small changes in orientation and practice. Challenge education does not have to involve expeditions to the great outdoors. Community awareness and service should prioritise local environments and much can be achieved through encouraging student participation in activities offered in the local community so that the school does not have to organise everything itself.

Responsibility involves cultivating wisdom

A responsible, wise person reasons on the basis of secure emotional states and their actions are based on positive personal values. In the learner attribute of responsible, the idea of wisdom is implicit. Wise people need to be knowledgeable, creative and intelligent, but they have the capacity to apply these responsibly based on positive

values, towards the common good. They make good choices, both for themselves and those around them. As Sternberg (2009, pp. 20–21) points out:

'Wisdom is not just about maximising one's own or someone else's self-interest, but about balancing various self-interests (intrapersonal) with the interests of others (interpersonal) and of other aspects of the context in which one lives (extrapersonal), such as one's city or country or environment.'

Being knowledgeable is usually associated with academic understanding. Being wise goes beyond this to include notions of living well, making good decisions, being compassionate and caring about the community and others. The first place to start nurturing wisdom and responsibility is in the school, with the creation of a supporting learning environment and clear codes of behaviour. As always, the most important influence on students are teachers and school staff as role models. Schools must have a well-articulated and clearly understood value system across the entire community that forms the basis upon which the school functions and informs relationships both within and beyond the school.

In some cases schools market values and educational principles without sufficient attention to their implementation. Schools must attempt to put their values into action by clearly saying what they mean and meaning what they say. Beyond this it is possible to organise and create a co-curriculum that nurtures powerful learning experiences, the focus of this chapter.

Community service: service learning

The term service learning is sometimes used to describe experiential learning that occurs through meaningful, useful, structured and reflective community service. Some writers distinguish *service learning from community service*, emphasising the broad learning dimensions implied in the former including personal, social and cognitive development.

Good service learning programmes emphasise personal and community awareness as well as service. Students need to learn to understand how actions are based on personal values and to reflect on and question their own values. If learners are to grow as individuals, it is essential that they engage with their own values and do not see service as a requirement or chore. They need to spend time and effort understanding the purpose of service learning, developing a more sophisticated understanding of the individual as part of the community, developing a sense of responsibility, for themselves and others, and an appreciation of the value and rewards of giving.

At the heart of all good service learning, therefore, is reflection. Students need to think critically and creatively, individually and in groups, about service learning expectations and experiences. The intention is to equally benefit the provider and the recipient of the service. It is important for students to understand that people from different backgrounds, in particular those less privileged, will have something to teach them.

Well-planned and managed service learning and community service programmes have a number of benefits to the community and the individual. These include:

- Developing a sense of wellbeing from helping others.
- Physical and mental health benefits, particularly in older volunteers (see CNCS, 2007), but starting young will help encourage students to see this as a life-long activity. Interestingly some research seems to suggest that the motivation for doing service is a critical factor in determining the health benefits to the giver. If the motivation is altruism the benefits are stronger than if it is obligation or duty.
- Engaging students with the community increases social awareness, self-awareness and a sense of responsibility.
- Developing communication, collaboration, leadership and other intra and inter-personal skills.
- Understanding social issues relevant to their communities and developing a greater understanding of and appreciation for diversity
- Enhancing students' applications to higher education and the workplace.

Service learning should be celebrated. The form this celebration takes needs careful thought and can vary depending on the age of students. Recognising student accomplishments through badges or awards can be a good motivator, but only if the student values their participation intrinsically rather than seeing it as an obligation that is imposed on them. Schools can celebrate service learning, and other valued co-curricular learning activities, by making them a regular part of school communications and discussion. Students who do creative and valuable things need to be appreciated,

not just those who are high academic achievers. The culture of the school needs to evidence regular, sincere and widespread dialogue around service learning. The important role teachers play in modelling this through their behaviour and actions cannot be overstated.

Service learning ideally should be linked to a student's passions, personal goals and ambitions. There are plenty of opportunities for those with particular skills to apply them to service learning. IT skills can be used to develop helpful IT products or to train others. Students with aptitudes in disciplines like languages and mathematics can tutor others. Performing artists can provide entertainment and have their art inspired from activities in the community. Student leadership and entrepreneurial experience can be nurtured.

'Under the sea' mural created by students at the British School in Colombo, Sri Lanka (*case study 11*)

Case study 11:

Using art to make a difference at theBritish School in Colombo, Sri Lanka

This case study focuses on Year 6 students at the British School in Colombo and their community service project. The project was multi-phased: children painted art murals and provided donations to the Lady Ridgeway Hospital for Children, a government-funded children's hospital in central Colombo. The Lady Ridgeway Hospital is one of the largest public hospitals in Sri Lanka, and the project focused on the ward in which children receive occupational therapy.

While the main objective was to assist the hospital, children were able to develop and strengthen all five Cambridge learner attributes by gaining a deeper understanding and awareness of the needs of their community, including the experiences of those from varied socio-economic backgrounds.

Why this project?

The project was chosen as it involved children and would benefit the Year 6 students personally, as well as providing outreach to an important service in the British School's direct community. Year 6 students were chosen to participate in the project, being the most senior grade in the Junior School, and it would provide a foundation for the many community service projects and societies they are exposed to in the Senior School. The ward required a 'new look' to make it more welcoming to the young patients. It was decided that the Year 6 students would paint a variety of murals depicting child-friendly themes such as 'Under the sea' and 'A drive through the countryside'. Rather than just collecting and donating money to the hospital, it was a unique opportunity for the students to engage in a hands-on project that directly benefited the community. It was also a way for them to interact and experience a new environment but put into practice the Cambridge attributes they have been developing daily at school.

Case study 11: continued

Attributes developed

Due to the multi-faceted and extensive nature of the project, all five Cambridge attributes were built upon and strengthened over the year. When the project was first introduced to the Year 6 students, they were immediately challenged with producing ideas for fundraising money for the paint and other necessary equipment. From the outset, student responsibility was demonstrated as they had to work independently or in small groups to devise their proposals for fundraising. The first fundraising event the students held was a bake sale in which they independently designed advertising posters, and then brought and sold food to their peers with minimal parent and teacher guidance. The bake sale increased community awareness of the project and gave all Year 6 students the opportunity to speak to their peers, teachers and parents about their assignment. After raising a significant sum of money, students then responded positively by volunteering in large numbers to visit the hospital and assist in the painting.

In the next stage of the project during the hospital visits, children had to organise themselves to be ready to leave school at the end of the school day. Once inside the hospital, children demonstrated responsibility by organising the paint, moving furniture, following instruction and painting the walls carefully. In order for the project to run smoothly, students put themselves into groups, developing leadership skills such as teamwork, independence, focus and decision-making. Students were also given the opportunity to reflect, not only on the task and the benefit to the wider community, but also the skills required for undertaking painting on a foreign surface in a new, unfamiliar setting. Self-awareness and monitoring was also developed, as children had to conduct themselves maturely and not disrupt the running of the hospital.

Year 6 students: Using art to make a difference

Case study 11: continued

Student perspectives

The Lady Ridgeway project benefited student growth and development. It was a rewarding experience in which children gained satisfaction and a greater awareness of the society in which they live.

Eugene, a student who was new to the school, began fundraising by selling cake and stationery in her apartment building with the help of her family and friends. She said: 'When I was in the Lady Ridgeway Hospital, I didn't just feel the joy of painting but the happiness of helping a hospital for children. It was my first project – volunteering and helping out the hospital is one of my biggest achievements in Sri Lanka. I will never forget the experience.'

Adithi, another student who worked on the project throughout the year, said: 'I felt as though I was making an impact. To be able to paint the walls with bright, uplifting pictures and to then see the children who were there to receive therapy in the ward look curiously and happily at the improved ward was one of the most memorable and beautiful feelings. The Lady Ridgeway project was one of the best things that happened in Year 6 and the amount of work we had done made me feel proud.'

The partnership between the Lady Ridgeway Hospital and the British School in Colombo is ongoing, with current Year 6 children also contributing to the project. Students receive an enriched, broader learning experience by having the opportunity to participate in the project. By allowing students to independently fundraise and participate, with little teacher guidance, they were able to strengthen and further develop their Cambridge learner attributes.

Community awareness and service in the school

Community awareness and service must start in the school. Schools are made up of a number of communities ranging in scale from classrooms, year groups, houses or sections and school divisions to the whole school community including parents and the local community. Creating a positive learning culture, which we considered in earlier chapters, involves developing a sense of responsibility and engagement in these communities. People need to be able to relate to actions, to understand its immediate impact in relation to their own and the school's values.

Excellent service learning programmes within schools:

- Involve students in the creation and implementation of codes of behavioural expectations and codes of conduct. These are better if they accentuate the positive rather than focus on negative behaviours. The learner attributes could form the heart of a school's code by exploring how students should display confidence, responsibility, reflection, innovation and engagement. It is much more powerful for students to be expected to work on these rather than just provide pre-digested solutions and expect compliance.
- Encourage teachers to find opportunities to bring aspects of service learning and personal reflection into the subject areas they teach and other aspects of school life.
- Use qualitative forms of self-evaluation and reporting to complement traditional summative performance measures such as grades.
- Provide opportunities for student service in the school. Some of the best service projects are school based and include peer-tutoring, students being trained then acting as mediators when other students have disagreements, students working occasionally as classroom assistants for younger children, and helping staff in support roles such as maintaining the school grounds and environment.
- Involve classroom activities linking with service opportunities within or beyond the school. Examples include evaluating a local need and designing a product (physical, IT based or creative/artistic) that meets a local need.

- Provide opportunities to bring all members of the school community together and explore partnerships with parents and alumni.
- Involve students in school government through organisations such as a student council.

The characteristics of excellent outreach community service programmes

Being part of a wider community, schools can offer students learning opportunities that benefit the community, as well as students, in familiar, accessible settings. The fact that students are required to interact with people they may not know in the local community might take them outside their comfort zone, allow them to see things from a different perspective and provide more challenge than activities organised by the school. It can help students to develop sensitivity and compassion for others as they learn their personal stories and understand their circumstances.

As schools will have resources including classrooms and IT, they can offer opportunities for outreach programmes by bringing the local community into the school, as well as opportunities for students to go into the local community.

The concept of service learning can be broadened to include work placement activities where students experience and contribute to real work settings. This can help them explore future work options.

Excellent outreach community service programmes:

- Offer relevant and meaningful service in the community. Schools and partners must see that the service provided by students meets the immediate needs of those they serve or the goals of the organisation.
- Give students challenging, real service that engages them actively rather than as observers so that they feel that they are making a positive contribution and receive necessary support and appreciation from supervisors.
- Allocate enough time to have a developmental impact.
- Can involve students in developing products (for example, physical, electronic, artistic) in the school, which are then used in the community.
- Require students to apply what they have learnt in class to real-world situations and what they learn in service to activities in school. Examples might include learning from older people about their experiences, or understanding the chemistry and biology of substance abuse.

Examples of community service programmes

There are numerous opportunities for community service; a few are outlined in Table 15. Service is normally best organised over a sustained period of time. Some schools timetable a fixed amount of time for community service and other co-curricular activities, for example one afternoon a week. Other schools expect this to be completed after school hours.

Service can also be organised as an activity over a fixed short period of time. Some schools suspend the regular schedule for a period, requiring students to complete a programme. This can work well for some activities such as work placement or project-based learning that might be scheduled at appropriate times of the year that disrupt the schedule the least (for example, after examinations have finished or before the regular school year starts).

Some schools offer international service learning opportunities. A few organise service learning opportunities during school holidays or gap years after a student has graduated, before they attend university.

Table 15: Some examples of service learning and community service activities

Activity	Examples
Innovative: overcoming barriers	• Researching then designing and/or developing solutions, products or services, for example for those with disabilities, improving environmental sustainability, renewable energy • Building simple databases or IT solutions, apps that serve a community function • Raising community awareness of health/environmental issues through research and communication/presentation of findings
Creative and performance	• Student choir, drama, artistic activities in the local community • The local community is brought into the school where artistic activities such as singing, drama and art are organised • Students organise local community participation in artistic activities
Instructional	• Students lead training in IT skills for the local community, in particular older citizens who may lack basic skills, using the school IT facilities and classrooms • Students tutor other students or community groups in languages, mathematics or other subjects • Students participate as classroom assistants or assistant sports instructors
Active service	• Assisting in care homes, hospitals, schools for special needs • Assisting in an animal welfare centre
Environmental	• Environmental club in the school monitors wastage, organises recycling and suggests better environmental practices • Students are involved in local conservation work
Leadership/management	• School council, classroom representative, prefect
Work related	• Work secondments • Research projects with relevance to the workplace completed and communicated
Working through external agencies	• Organisations such as Oxfam and Habitat for Humanity (see Case study 16) can provide service opportunities
Related student-led co-curricular activities	• Model United Nations • Amnesty International

Case study 12:

Community service: Successful and sustainable projects at the British International School, Ho Chi Minh City, Vietnam

The British International School (BIS) has 2145 students representing 51 nationalities across three campuses in Ho Chi Minh City (HCMC). BIS started to develop community service projects around eight years ago and since then, the number of projects and activities has increased dramatically. This case study illustrates the important considerations when trying to make a community partnership sustainable and successful, with particular reference to involving the whole school community.

Community service at the BIS, HCMC

Community service is an integral part of life here. We have a dedicated, full-time community department which organises community projects, clubs and events across our three campuses. At BIS, HCMC, students continue to develop their skills and understanding throughout their time here. From the early years stage and all the way to the sixth form, each year group has a specific community project that teachers will endeavour to embed into the curriculum. In addition to this, a plethora of optional clubs and school events take place all year round. The community projects are not designed to just raise money; the goal is to develop students' sense of social responsibility towards other people and the environment. They learn that they can have the biggest impact on our community projects by spending their most precious resources: time and energy.

The main aim of the community projects is to create opportunities for students to develop the learner attributes outlined in our aide memoire. Similar to the Cambridge learner attributes, BIS has identified six traits: integrity, care, respect, reflection, enquiry and perseverance. We have a commitment to the holistic development of every child and we feel that the projects play a key role in nurturing global citizens ready to take on the challenges of the modern world in a considerate and caring manner.

Thien Phuoc Foster Home for Disabled Children

One of our longest running projects is with Thien Phuoc Foster Home for Disabled Children. We first became aware of Thien Phuoc in 2007, when a teacher at BIS was looking for an organisation to support. Thien Phuoc is a residential centre that provides healthcare, rehabilitation and education for children with epilepsy, cerebral palsy and Down's syndrome.

Projects with Thien Phuoc were initiated as a way for students to increase their understanding of disabilities, as well as teaching them to not shy away from people who are different. As the relationship between BIS, HCMC and Thien Phuoc grew, we found areas where students, teachers and our parent teacher group (PTG) could become more involved with sustainable, meaningful projects.

Year 12 student at Helping Hands with Thien Phuoc club (2016)

Case study 12: continued

We now have a cross-campus programme involving both primary and secondary students who spend their time with the children at Thien Phuoc, as well as long-term financial support that comes from our PTG.

Support of the whole school community

It can take years for partnerships like Thien Phuoc to become fully effective – this is why BIS created a programme that has a commitment to long-term partnerships with the community on a global, but mostly local, scale. The key to having a sustainable community project is ensuring the commitment from the whole school community – students, teachers, staff, parents and the community partner themselves.

PTG with children from Mai Tam House of Hope (2014)

Parents

BIS parents have shown a keen interest in supporting our partners financially by holding fundraising events throughout the year. This allows us to delegate this important aspect of the project to the PTG and focus on providing the students with a more profound learning experience.

Teachers/staff

Teachers always take on an essential role in the realisation of new projects and their enthusiasm and commitment are essential to its success. At BIS, teachers are encouraged to not just supervise the activities, but to facilitate them. At the beginning of each academic year, community INSET afternoons are organised to give staff first-hand experience of working with our community partners. Some staff travel off-site to visit a local partner, while the remaining staff plan and host activities for partners who visit us. These visits can highlight the difficulties of community service in international schools, such as language barriers and cultural differences. By overcoming these barriers, teachers gain a new perspective and are better prepared to support their students who will face similar challenges. Not only does the INSET set the foundation for their current community year group projects, it can also inspire teachers to run new community clubs or events at school.

Students

Students are the pioneers of a good community project. Community Clubs are a great way for students to dedicate more of their time to a community initiative that they are interested in. Enthusiastic students are encouraged to start their own student-led clubs. The carefully designed progression of year group projects that the children experience as they move through the school provide them with the platform to develop and organise their own community service activities.

Case study 12: continued

Preparation and reflection

Students are given time ahead of projects to develop their understanding of a partner, and to consider any issues or feelings they may have relating to the project. This is particularly crucial when students are exposed to new situations which may be daunting to them, such as meeting other local children with disabilities. Time is also allocated during and after a project for students to reflect not only on its success, but also their involvement in the activities and their personal growth. Reflection can be seen in the form of a written piece or a whole-class/peer-to-peer discussion. In our Year 8 project, the students gave a reflective presentation during assembly, which in turn supported their peers with their own preparation.

Summary

Setting up an activity with a local organisation and children in our school is relatively straightforward. We have ample facilities to host exciting events and a fleet of buses to transport students and staff to and from different locations. Creating a series of community projects that are meaningful to all parties is a much more complicated affair. At BIS, HCMC, we are developing a strong tradition of building relationships with our partners that benefit them in a sustainable manner. Our PTG is instrumental in planning and funding initiatives that use the amazing wealth of expertise and enthusiasm present in our parent community. Teachers understand the progression of skills that the children acquire during these projects and buy into the vision set out in our mission statement. They are led by a senior leadership team who prioritise resources and staff allocation in support of the community projects. Most importantly of all, the children who attend this school gain experiences that take them out of their comfort zones and challenge them to engage with the world purposefully, compassionately and effectively.

Case study 13:

Developing global competence – Christel House Art Project at The Perse School, Cambridge, UK

The Perse School has developed a meaningful and growing relationship with Christel House Charity schools. Christel House transforms the lives of impoverished children around the world to break the cycle of poverty. Through a combination of fortnightly enrichment programme sessions and a weekly extra-curricular lunchtime club, we have developed a variety of student cross-cultural art projects between our schools which also function as fund-raising activities.

Case study 13: continued

The initial project was a sketchbook exchange that was completed by our community art enrichment students in conjunction with students from Christel House School India and Christel House School South Africa. The 10 pupils taking part in each school, ranging from Year 11 to upper sixth, were given a sketchbook in which they worked on one of four themes: identity, family, school and recreation. The pupils were paired up with one student from each of the other two schools and worked in response to their partner's work. Once each theme was completed, the sketchbooks were posted to the next school in rotation. The exchange worked as a visual stimulus, and pupils from all three schools benefited from being inspired by their partner school's artwork, as well as developing an understanding of the cultural similarities and differences. The final work was compiled into a photo-book with copies sent to each participating school.

In Christel House Club, pupils have created a range of literacy resources, children's books and illustrated alphabets for the kindergarten pupils at Christel House School Bangalore. Pupils were encouraged to write their own children's story, illustrate it and manage their own team of illustrators. In an effort to promote the charity, pupils have run a stand at our Christmas fair to raise money by selling items from those made both in India and at the Perse. Pupils have led an assembly, produced a film, auctioned their artwork and are now currently developing a Christel House Newsletter to aid fundraising. They each have particular roles, for example, editor, photographer, proofreader. Students have interviewed Perse staff who have contributed to raising money for Christel House and some Christel House employees.

From the connection with Christel House School and the artwork they have produced together, pupils have learnt a variety of skills, time management, team building, independent thinking and problem solving – all within the context of helping others less fortunate than themselves.

Case study 13: continued

Community awareness and service – enrichment programme

Year 11 and sixth form students spend one afternoon a fortnight doing enrichment activities as part of their core curriculum. The aim is to provide something different from the experience of normal classroom lessons, enabling students to have opportunities for leadership, develop new interests, learn new life skills and challenge themselves.

Year 11 and lower sixth enrichment focuses on co-curriculum and 'self-enrichment', with practical courses and activities, academic non-examined courses, and also some non-examined subjects which pupils would not otherwise have time to do. Options include first aid, history of art, journalism, photography, TEFL and young entrepreneurs.

Upper sixth students all undertake community service, with almost all working with older people or with primary school pupils through our primary schools partnership.

We believe that we have the responsibility to play a full part in the life of the local community, and that such active participation is of equal benefit to us and to our partners. Through these links our pupils learn the importance of selfless service, develop a sense of social responsibility and acquire interpersonal skills.

Two groups work with older people. One group runs a six-week 'Digitstart' course for older people wanting to learn how to use the latest technology, from Skype to online shopping. Another works with Dementia Compass to run a choir for dementia sufferers and their carers.

Each fortnight Perse staff and students can be found working with teachers and pupils in one of 17 local primary schools with which we have a partnership. Each primary school specifies the kind of support they would like – from one-to-one maths sessions to stretch their brightest young mathematicians, and coding workshops, to helping children for whom English is a second language, teaching French or running a Latin club.

We also run a mentoring programme with two local primary schools, the Fitzwilliam Museum and the Museum of Archaeology and Anthropology. The aim of the eight-week course is to raise primary pupils' aspirations, develop skills and enhance their confidence. Created with an art history education organisation called The Bigger Picture, the programme uses history and art history to spark pupils' curiosity, with sessions also hosted by King's College and Gonville and Caius College. Working closely with education officers at the museums, Perse students run fun workshops with the Year 5 and 6 pupils, using masterpieces such as Michelangelo's Laocoon to encourage pupils to think and speak analytically. The year's sessions culminate in the primary school pupils producing a presentation and delivering it to their peers in an assembly at their school, alongside their Perse student mentors.

Student leadership

The School Council at the Perse provides a forum for all students to improve their school. It in turn is run by the Senior Council (Years 11–13), who organise half-termly meetings where each form can feed back via their form representatives. The senior members then liaise with relevant members of staff to communicate issues and ideas and request changes where appropriate. Pivotal to the success of the structure is that it is seen to achieve meaningful results – the simplest ideas are often the best and these can be implemented quickly and fed back to students via assemblies and tutorials. Senior Council Leader Emily Deane (upper sixth) explains more in the video below.

Watch the video at
https://vimeo.com/228212787

Student leadership and responsibility

Leadership is a process, not a position of authority. It has a moral purpose based on a deep sense of respect and responsibility for oneself and others. Unlike much of what students are required to do in terms of academic learning, leadership affects other people and is inherently collaborative in nature. Involvement in leadership activities can improve students' own learning as well as helping them to develop the broader competencies needed for success beyond the classroom.

Student leadership:

- starts with 'knowing yourself' and developing self-confidence, empathy, communication skills, resilience and resourcefulness
- is about virtue: making a positive difference
- requires emotional thought and engagement, intra- and inter-personal competencies as much as cognitive skills
- as a process (rather than a position of responsibility), should involve every member of the community being encouraged to lead at appropriate times through reflective leadership actions based on situational understanding
- should see those who have positions of responsibility focusing on getting the best out of the team by encouraging others to lead at appropriate times
- should be shared and distributed with collective responsibility and accountability
- should respect and encourage quiet leadership – often the most effective leaders get things done without acknowledgement or recognition
- should respect the culture and context of the school – different cultures have important protocols and conventions that need to be understood and respected
- involves students in meaningful school development activities so that they are involved in helping to get the best out of the system.

Case study 14:

Cambridge learner attributes develop confident and responsible leaders at The Heritage School, Cyprus

*By Year 12 student **Eleni Socratous***

What does student leadership mean? Some may think it is merely a concept, an idea, yet it is so much more. Being a leader means having confidence in yourself. It means learning how to apply your skills and help others work together in a way that produces the desirable outcome for the team. Cambridge learner attributes encourage intellectual curiosity, perceptiveness and self-reflection, assisting students to nurture their inner leader. My Cambridge IGCSEs provided the foundation and cultivated the necessary skills for me to develop my leadership. From personal experience I can say with certainty that The Heritage Private School instils the Cambridge learner attributes through its academic and extra-curricular activities, thus helping all of us in our school community of many different nationalities and backgrounds become well-rounded international citizens, and excellently prepared for the many opportunities that the future holds.

All the activities in which I have participated have helped to shape me as an individual, but have also created memories that I will forever cherish, and given me friends I will never forget. Having the opportunity through our school to be a part of the Cyprus Youth Parliament was perhaps one of the most enriching experiences I have ever had. This two-year service deepened my knowledge of my country's problems and the laws affecting children, and as a result I felt empowered to help those children whose voice could not be heard. Similarly, through taking part in the Model United Nations sessions in both Nicosia and The Hague, my awareness broadened from local to global issues. These events gave me the confidence to state my opinions in public, forming speeches and resolutions. Being naturally shy, giving speeches has never been my forte, but through my Cambridge IGCSEs and now Cambridge International A Level

Case study 14: continued

subjects, I developed the skills necessary to succeed in these activities. Especially through English, History and Business Studies, I enhanced my critical reading, analysis and evaluation capabilities, which not only trained me to debate effectively, but will doubtless be useful in other real-life situations.

Being a prefect absolutely requires leadership skills, and our school therefore arranges a leadership development and team building prefect training camp at the beginning of each academic year. This familiarises us with each other through team-building activities, and also helps us to realise and acknowledge the importance of our position. Being a prefect requires a great deal of team work as we are responsible for organising many school events. Organising events with my fellow prefects has been one of the most wonderful experiences during this school year. It is stressful, especially when you are head of that event: the whole school depends on you planning the event properly for it to be successful. It is time-consuming because you also need to focus on your Cambridge International A Levels. However, it is also very beneficial, in the sense that it helps you manage your time effectively; it encourages you to practise the skills you have learned, and to balance your school work and extra-curricular activities. At the same time, though, especially if you are the head of the event, you have to remember that being a leader does not only mean being in charge, it also means becoming one with your team, inspiring them and working with them to ensure that the team performs efficiently and effectively.

Additionally, through physical extra-curricular activities, The Heritage Private School captures the importance of teamwork in a broader environment. Through being a hike leader as well as taking part in The Duke of Edinburgh's International Award (DofE), I learned not just how to use a compass, but suddenly that I was responsible for 10 other students. Taking part in the DofE Award, you have to learn

Case study 14: continued

how to cooperate with others. Such activities help you to not only develop your leadership but also teach you how to communicate, collaborate and negotiate in new situations.

Cambridge learner attributes are also engaged through the Junior Achievement Programme, which focuses on organisational and innovation skills. You not only have to devise and develop a product that is original and creative enough to be saleable, but you also have to learn the basic procedures of running a business. Being the finance manager of our candle company, Wicked Wonders, helped me immensely in acquiring an insider's view of how a business functions, and in particular the work of an accountant. I discovered how difficult the job of an accountant can be, which gave me a new respect for this role. The Junior Achievement Programme was another remarkable experience, and I was very thankful for this unique opportunity. It enabled me to apply the theory from my Business Studies syllabus by participating in a real scenario. It also gave all of us a better insight into future careers that we might be interested in pursuing.

Overall, I am very pleased that through the ethos, curriculum and wider activities offered by my school, and based on the Cambridge learner attributes, I have not only improved my leadership skills but have grown and matured more as a person. I believe this is of central importance, because an individual who has access to support and guidance in developing independence will be better equipped to set goals and know how to achieve them. In essence, the Cambridge syllabuses and the Cambridge learner attributes activate all of the attributes necessary to make the best future global leaders.

Case study 15:

Encouraging student leadership, innovative learning and community awareness at First Steps School, Pakistan

First Steps School of Arts and Sciences is a small private school in Faisalabad, Pakistan. The focus of the case study is children aged 13–14 in the 8th and 9th Grades because they are the most senior students and have assumed leadership positions in the school.

Initially, it is important to organise a structure. First Steps initiated a student council, with the purpose of asking students to assume responsibility for some administrative tasks. The students were divided into four houses, and each was assigned a house captain (captains were shortlisted based on an interview with the principal, after which an election was conducted in school where students voted).

These captains are responsible for marking attendance, guiding the younger children in extra-curricular activities such as sports day, and in helping to monitor children during break time. This student government has proved to be very successful, with the children automatically assuming a new level of maturity and leadership. They are diligent in their duties and take pride in the role that has been assigned to them. This has led to a marked improvement in their academic performance as well, due to the increase in confidence and because their ability to keep their leadership position depends on maintaining their grades. These leadership positions are not limited to students with exceptional academic ability. There are roles assigned to those who excel in sports for example, such as sports captain. By assigning this role to those who are known for their athletic ability, we aim to instil in them confidence and pride, which will translate to their academic work as well.

Morning assemblies are a great tool for fostering a sense of unity among students. Each week, a different class is responsible for the morning assembly, in

Case study 15: continued

which they can perform a play, read a dialogue or have a discussion about important events taking place around the world. The aim is to help the students to make connections with people around the world, and to foster awareness about global phenomena. By exposing our younger students to information like this on a daily basis, we set the foundation for the Cambridge Global Perspectives course, which is mandatory for our Grade 9 students. These assemblies can be instituted in a school of any size, and it is most important that the teachers take part. For example, on Earth Day, which is new and unfamiliar in Pakistan, a teacher prepares a presentation about the topic and helps to educate the students on how it is celebrated around the world.

Morning assemblies are also a great forum to raise community awareness. A large part of the mission statement at First Steps is to educate students on becoming better citizens and to assume a role in the betterment of their community. We held a fundraising drive for the Shaukat Khanum Cancer Hospital in Lahore, and the morning assembly was used to encourage students to participate and to give them a running total of the amount we had raised. This drive was extremely successful, and ended with First Steps raising the second highest amount in the whole country for the hospital. Another activity we have implemented is the '100th day of school' celebration. Every year, to commemorate the 100th day of school, we ask students to bring in 100 snacks, such as candies or cookies. They are packaged and donated to the children's hospital. These activities help the students reflect upon their role in the community.

As a Cambridge school, it is vital that we introduce innovative learning across the curriculum to make students reflective learners. In English for example, simply reading a poem to the class will offer them a single perspective. The use of videos exposes the students to various renditions of the same poem. This activity has been very successful, as students love watching the readings of the poem, and learn to the see the same text with different perspectives. In the sciences, First Steps organises a science expo every year, where the entire student body participates by conducting experiments and presenting their projects at a large fair. The projects are studied by judges, and the students have to present their experiment to them. This expo allows them to see practical implementation of scientific theories and increases confidence.

Innovative learning is also challenging, as it forces students to step outside their comfort zone and experience new ideas and techniques. First Steps takes part in numerous competitions, like the national DAWN Spelling Bee and the International Kangaroo Math Competition. These have proven to be great tools in motivating the students to improve their personal results, as well as how they compare to international students. Many of our students have earned top positions in their city and country due to their hard work and the encouragement the school administration offers in preparing them for this competition. Our students also participated in the Oxford Big Read competition, and our students went on to win the regional competition. The Big Read competition happened in three phases, the first of which was to get the students to select books from their reading level and write reviews. The students with the best reviews were shortlisted and trained by the teachers and their reviews were then sent to the competition, where they received accolades. This is an innovative way to encourage reading, develop writing skills and help students reflect on how they can improve their comprehension and understanding of reading material.

By encouraging student leadership, innovative learning and community awareness, First Steps aims to produce reflective learners. These learners have the confidence to evaluate their peers (in peer evaluations conducted in class), and to evaluate their own improvement and growth. By introducing them to the concepts of community service and challenges, we hope to make them responsible for the role they play in school, in the community and in their own personal growth.

Case study 16:

The cultivation of the Confucian leader: Leadership and service in action at Confucius International School, Qingdao, China (CISQD)

Continued from Case study 7 in Chapter 2

A leader's primary purpose is to serve the people. Confucius highlighted the duties of a leader by explaining the proper way to think, act and make decisions in government positions. Most importantly, Confucius taught extensively on virtue and why leaders must be virtuous. Developing leadership potential is a gradual process that requires discipline, education and natural talent.

For the purposes of this case study, we will focus on the Confucian concepts of Li, Jen and Chun-Tzu.

The term Li has several meanings, often translated as propriety, reverence, courtesy, ritual or the ideal standard of conduct. It is what Confucius believed to be the ideal standard of religious, moral and social conduct. The second key concept is the principle of Jen. It is the fundamental virtue of Confucian teaching. Jen is the virtue of goodness and benevolence. It is expressed through recognition of value and concern for others, no matter their rank or class. In the Analects, Confucius summarises the principle of Jen in this statement, often called the silver rule: 'Do not do to others what you would not like them to do to you' (Analects 15:23). Li provides the structure for social interaction. Jen makes it a moral system. The concept is Chun-Tzu, the idea of the true gentleman. It is the man who lives according to the highest ethical standards.

CISQD strives to create an atmosphere that will nurture and empower leadership and active, caring citizens within the student body, rooted in the Confucian principles of Li, Jen and Chun-Tzu. The school has in place a number of systems that facilitate both formal and informal leadership. To be eligible for and to maintain one's position, all leaders must be of good academic and behavioural standing in the school community.

The school prefect

CISQD school prefects have an essential role in the day-to-day running of the school. Although they are perhaps most visible in the school, their other duties, particularly in the boarding house, are also very important. They must be able to command the respect of pupils, including their peers, and to exercise their authority in a responsible manner. School prefects are nominated by the faculty and current prefect body, and subsequently appointed by the headmaster.

Student council executives

The CISQD student council is comprised of student leaders elected by their peers to participate in designated areas of school government. Essentially, the student council serves as the voice of the student body. They participate with the school leadership, student welfare department and marketing department in the planning of school events throughout the academic year, inter-school events and events within the local community. The student council executive brings ideas, requests and feedback to the meetings, and a democratic process is used to give students a voice and make decisions in creating a year-long programme of activities. Students who participate in student councils, under the supervision of a teacher or administrator, learn about the democratic process, civic responsibility, leadership, problem solving and teamwork.

Tutor group representation

Every tutor group in the school is required to elect a tutor group representative. This individual serves as the tutor group representative on the student council, representing the tutor group at the weekly meeting of the student council, bringing the concerns of the tutor group to the full council and disseminating information, feedback and updates from the student council directly to the tutor group. This role

Case study 16: continued

enables even the youngest and newest members of the school community to assume a position of leadership and to begin the realisation of their leadership potential.

CISQD house system

The school is divided into sub-units called 'houses'. Each student is allocated to one house when they enrol. Houses may compete with one another at sports and in other ways, providing a focus for group loyalty, house spirit and a healthy atmosphere of inter-house competition and honour. The pinnacle of the house system is the awarding of the annual house trophy for the house that has secured the greatest number of house points in an academic year. House points may be awarded by all faculty and staff to students for a variety of reasons: exemplary well-mannered behaviour; demonstrating an exceptionally caring attitude towards peers; producing work of an exceptional quality; excellence in academic performance; acts of service to the school community; public performances; representing the school in competitions and events and situations.

Confucian ceremonies at Qu'fu, the birthplace of Confucius

Every year, all lower sixth students participate in a ceremony to honour and pay respect to Confucius in the city of his birth. This ceremony has very strong cultural and spiritual significance and is traditionally led by the founder of CIS, Mr Kong, board members, the headmaster and members of the senior leadership team. It is part of the school's graduation requirements.

Local and international community service programme

As part of our commitment as global citizens, CISQD students engage in a wide range of local and international community service initiatives. Locally, CISQD has entered into partnership with the Chinese Red Cross to form the Rose Alliance Charity to support local charities. Students actively engage in fundraising and in the activities of the respective charities. Internationally, CISQD students have participated in house builds with Habitat for Humanity in Cambodia and Anchorage, Alaska. Indeed, CISQD students were the first Chinese nationals to participate in a global house build with Habitat for Humanity in the USA. In collaboration with our sister school in Chengdu (CISCD), CISQD students participate in the annual Christmas community service project in Northern Thailand, where students participate in educational and construction initiatives with the descendants of the Free Chinese Brigade, Chinese nationals who fought alongside the Allies against the Japanese in Northern Thailand from 1942–1945, only to be abandoned as stateless people.

Habitat for Humanity community service

Hengdien film production

Each year, all newly enrolled students participate in two film production projects at China's Hengdien studios. In the semester prior to the actual film production, in collaboration with the English, performing arts and marketing departments,

Case study 16: continued

students engage in all aspects of preparation of the actual film production, including script preparation, auditions, casting, direction and rehearsal. Throughout the production and filming process, students play very significant leadership roles in the direction of the movie, supported by film production professionals from the Hengdien studios.

Model United Nations

Model United Nations, also known as Model UN or MUN, is an extra-curricular activity in which students typically roleplay delegates to the United Nations and simulate UN committees. Participation in this demanding club fosters and facilitates the development of more effective leadership skills, greater global awareness, enhanced public speaking skills, more developed time-management skills and the opportunity to exchange and interact with peers from all around the world.

National Debate League

In recent years the school's debating teams have dominated the National Debate League for the eastern seaboard of China. In recent years, school teams have secured first and second places, in addition to best public speaker at two of the last three annual debate competitions for the eastern seaboard. These teams have then progressed to represent the eastern seaboard in the National Debate League.

Extra-curricular activities programme

The school operates an extra-curricular activities (ECA) programme comprising of our 50 clubs and activities. Each faculty member is required to actively support and engage in two weekly ECAs. In each of these ECAs students serve in leadership roles at club level, collaborating with the respective teachers in the weekly functioning of the club or activity. Each ECA is required to reflect one of the Confucian Six Arts.

School sports

As part of the school's commitment to the provision of as wide and diverse leadership opportunities as possible, as well as our commitment to the formation of well-rounded individuals, the school engages in a wide range of athletic competitions and tournaments. It is very much part of our 'work hard, play hard' school culture and this is evident in the fact that some of our most active student leaders also serve as school ambassadors on our respective sports teams.

Student exchange programme

CISQD students have the opportunity to apply for participation in the CISQD student exchange programme which allows them to live in one of our sister schools in the UK or with Loughborough Grammar School, one of our student exchange partners.

CISQD student ambassadors and facilitators

Every year, student leaders assist the school in hosting a number of large public events, the majority of which attract schools and student participants from all parts of mainland China. Included in these are:

- The National ASDAN Business Simulation Competition. Coordinated by ASDAN UK, this annual business simulation attracts a great deal of interest from international and Chinese schools alike and has proved to be a highly competitive and rigorous tests of student leadership and business acumen.
- The British Council University Tour. For the past four years, CISQD has been the British Council's venue of choice for its university tours in the Shandong Province, thanks to the reputation secured by those students who have acted as hosts, facilitators and translators at such events since 2013.

Contacts and resources

Duke of Edinburgh's International Award:
http://www.intaward.org

The Award was created in 1956 by HRH The Duke of Edinburgh and Kurt Hahn, for young people in the UK. By 1971 the Award was operating in 31 countries and today it is delivered in over 140 countries. The Award is open to any young person between the ages of 14 and 24, and aims to equip 'young people for life regardless of their background, culture, physical ability, skills and interests. Doing the award is a personal challenge… it pushes young people to their personal limits and recognises their achievements.'

There are three levels to the Award – bronze, silver and gold – and each level has four sections (service, skills, physical recreation and adventurous journey). In order to get the gold award, the young person has to also complete a residential project.

The Award has a positive impact on the lives on young people in a number of ways including improved health and wellbeing, educational attainment and social inclusion. The award is widely internationally recognised as evidence that a student has completed an excellent co-curricular programme that will have challenged them and nurtured the development of desirable character traits and qualities.

Genesis Debate Programmes:
www.genesisdebateprogrammes.com

Genesis Debate Programmes (GDP) empowers teachers from across the curriculum to use debating in their classroom, and provides opportunities for students to learn how to debate through their innovative debating programmes. These range from week-long summer schools, to weekend or three-day debating festival workshops.

Genesis programmes provide opportunities for students to become independent, thoughtful learners who communicate well with each other, engage in the curriculum and with the world around them in a meaningful way. The GDP methodology, led by top university students, recent graduates and qualified teachers, teaches communication in an innovative, engaging and enjoyable way that supports the development of skills and competencies needed to flourish in the modern global world. It also provides a highly enjoyable way to develop spoken English. Genesis contact: **info@genesisdebateprogrammes.com**

Habitat for Humanity:
www.habitat.org

Habitat for Humanity is an organisation that provides housing for people in need. Founded by Millard and Linda Fuller, its vision is to 'put God's love into action by bringing people together to build homes, communities and hope'. Habitat for Humanity has built or repaired over 800 000 homes and served more than 4 million people worldwide since its creation in 1976. Their vision is 'a world where everyone has a decent place to live', and they achieve this by constructing new homes and regenerating neighbourhoods. It is active in about 70 countries and there are many ways to volunteer with the organisation.

Model United Nations (MUN):
www.una.org.uk/get-involved/learn-and-teach/model-un-portal

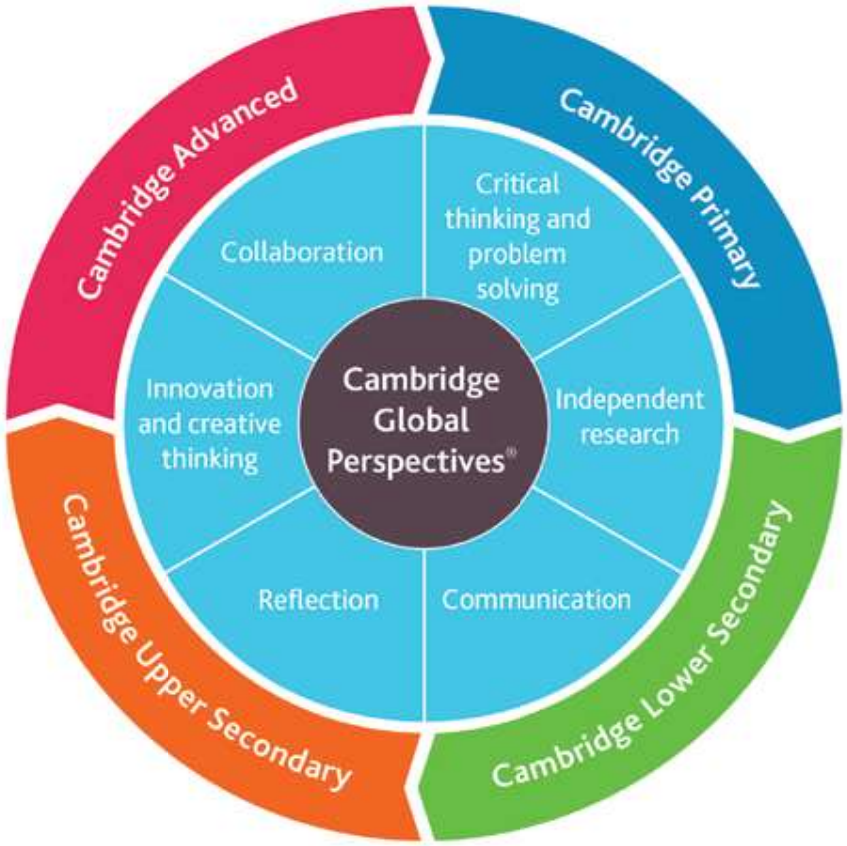
Provides an opportunity for students to develop negotiation, diplomacy, leadership and critical thinking skills. MUN originated in the USA and the model has spread worldwide with conferences held in many countries. Students take on the role of a delegate at a simulated UN committee and each represents a national government. The delegates then negotiate a particular issue, having researched it first.

Oxfam:
www.oxfam.org

Oxfam is a coalition of 19 organisations working together in over 90 different countries. Their primary focus is on fighting poverty – both the cause and the impact. There are many ways to support the work of Oxfam including campaigning, volunteering and fundraising through initiatives such as Trailwalker.

Chapter 7: Developing the Cambridge learner attributes through Cambridge Global Perspectives and Enterprise

> “It is widely recognised that we live in an increasingly digitised and interconnected world. The means by which we access information and the pace with which this takes place are profoundly changing the way we learn, communicate and work. Increasingly, young people are faced with access to a multiplicity of competing ideas. In such an information-rich society, young people need the skills and dispositions to be able to think critically..”
>
> **Extract from Cambridge International A Level Global Perspectives syllabus** 2017–19



Overview

This guide has argued throughout that the learner attributes need to be at the heart of approaches to teaching and learning in all disciplines and activities the school provides. This chapter focuses on two programmes that Cambridge offers that complement a discipline-focused curriculum. They are specifically designed to support habits and skills development associated with preparing students for the modern global information age and the world of work.

Cambridge Global Perspectives

Cambridge Global Perspectives is an interdisciplinary programme, currently offered through Cambridge IGCSE , Cambridge International AS & A Level and Cambridge Pre-U syllabuses. It focuses on the nature of argument and evidence, develops research and information literacy skills and encourages understanding and respect for the perspectives of others. Global Perspectives will become available for Primary and Lower Secondary (5–14 year olds) for first teaching from June 2018.

Students learn to appreciate alternative perspectives on global issues where ideas and interests compete and there are no easy answers. They learn how to evaluate arguments, in particular the evidence and reasoning used to support them, as well as improve the quality of their own arguments.

Through studying a variety of authentic and significant case studies students become better informed about the world and better able to make informed and sensitive judgements. The course develops the skills of flexible, reflective, creative and critical thinking, and students learn how to research issues and arrive at well-reasoned and evidenced conclusions. They also learn to work collaboratively with others and effectively communicate and critique ideas so that they become, in support of the Cambridge learner profile, more confident, responsible, reflective, innovative and engaged.

Specifically Cambridge Global Perspectives aims to develop learners who:

- understand the nature of evidence in a variety of forms and effectively evaluate evidence in deciding what conclusions can be reasonably reached
- can support their own arguments with sound reasoning and the appropriate use of evidence
- enquire into and reflect on issues both independently and in collaboration with others from a variety of cultures, communities and countries
- generate and express clearly in written and spoken forms their own well-reasoned arguments
- use disciplined and scholarly research skills to investigate issues of global significance
- consider issues from personal, local, national and global perspectives, and analyse the links between them
- communicate sensitively with people from a variety of backgrounds, empathising with the needs and rights of others
- can transfer their thinking and planning skills to unfamiliar contexts
- develop a sense of their own responsibility as active citizens.

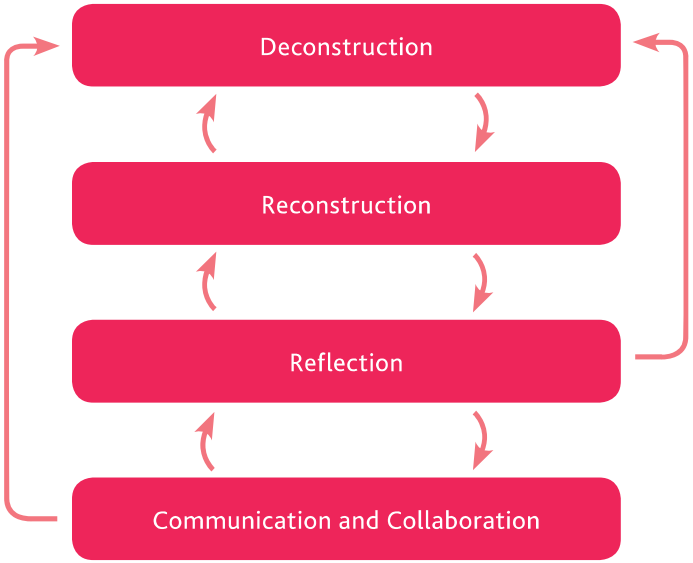
Bob Wilson - the importance of challenging students

Watch the video at **https://vimeo.com/232473942**

How critical thinking, information literacy, reflection and research are supported and assessed through Cambridge Global Perspectives

The Cambridge Global Perspectives curriculum continuum is based on a developmental spiral of learning. At all stages, students are required to critically engage with information and source material to improve their information literacy (in developmentally appropriate ways reflected in course standards, activities and requirements). At all levels students are required to complete research and to communicate their ideas both in writing and through spoken presentations.

Schools have the opportunity to make Cambridge Global Perspectives a core curriculum activity so that learning that takes place across the curriculum in other subjects is linked to Global Perspectives themes. This reinforces students' ability to make connections between all the disciplines they are learning, reinforces learning and helps students transfer skills and understandings from one context to the next. Alternatively schools can choose to teach Global Perspectives as a discrete subject.



A web-based learning platform is available for all schools who register for the programme. This Online Learning Area has extensive materials specifically for Global Perspectives and is freely available to all Cambridge centres delivering or considering delivering Global Perspectives. The Online Learning Area provides online structured courses, with guidance for both students and teachers, and multimedia resources, together with teaching and learning activities. Secure personal journals encourage higher level thinking among students as they engage with and reflect on the materials and activities. Spaces with forum discussions allow for collaboration between schools, in topic-based groups and within students' own class groups. Teachers and learners can also collaborate with other Global Perspectives teachers elsewhere in the world. Students can use ePortfolio tools to gather together and share their research, and gain feedback from peers and teachers.

Teachers and students can access the Online Learning Area using any connected device, including tablets, laptops and desktop machines. We suggest that teachers request student accounts, thereby providing students with access outside the traditional classroom environment.

The Cambridge IGCSE requires students to collaborate in groups to agree an aim and then to plan, research and produce a shared outcome. Students are assessed collectively on how well they collaborate and how well their outcome communicates their research. They are also assessed individually on a reflective paper they produce which analyses and evaluates the project and reflects upon the process of collaboration and their own contribution to the project. The video available at **www.youtube.com/watch?v=YB7qD-w4vVw** demonstrates one example of a collaborative project completed by a group of Cambridge IGCSE students at the Singapore International School in Hong Kong.

Figure 8 gives an overview of the critical path methodology that forms the core of the Cambridge International AS Level, A Level and Pre-U programmes. Standards and expectations at this stage are high, reflecting the qualification standard, but the general

Figure 8: The critical path in Cambridge Global Perspectives

approach is the same at lower levels so that this represents a natural progression. Clearly developing the habits, skills and understanding needed to perform the critical path well provides an excellent preparation for students engaging with ideas in other subjects and preparing them for higher education and the workplace.

The learner attribute of reflection is at the heart of the programme. Students are required through assessment objective 2 (reflection) to:

- research and consider alternative perspectives objectively and with empathy
- consider the ways in which personal standpoints may have been affected by the research process
- evaluate the impact of alternative perspectives and conclusions on personal standpoints
- identify the need for further research in light of the research findings
- reflect on the scope, nature and limitations of their own research report (Cambridge International A Level only).

Students who want to take Global Perspectives to a full Cambridge International A Level or Pre-U standard will complete a research report as the Cambridge International A2 Level component of the Cambridge International A Level. You can download a comprehensive guide for learners at **www.cie.org.uk/images/385159-a-learner-s-guide-to-the-cambridge-research-report.pdf**

Read an example of a completed student project at: **www.cambridgeinternational.org/images/413316-example-candidate-responses.pdf**. This report, called *To what extent does globalization contribute to higher unemployment?*, considers a global problem taking an interdisciplinary approach, including economic, social and political viewpoints.

Case study 18:

Linking the World's Largest Lesson with Cambridge Global Perspectives at the Southland Girls' School, Invercargill, New Zealand

The World's Largest Lesson launched in September 2015, when world leaders committed to the 17 goals for sustainable development (read about them at **worldslargestlesson.globalgoals.org**).

Connecting our Global Perspectives learning with the global goals through the World's Largest Lesson has allowed us to focus on the learner attributes in a real-life context, with a particular focus for this case study on confident, responsible, reflective, innovative and engaged learners.

Our Global Perspectives class is a Year 9/10 class in our Year 7–10 Global Minds programme at Southland Girls' High School. In 2015 our lesson was selected as one of eight worldwide to help launch the World's Largest Lesson. The focus of our submitted lesson was building a link between the Millennium Development Goals and the new Sustainable Development Goals. The World's Largest Lesson has a growing resource base to help support learning across all year levels and contexts. The global goals have become embedded in our Global Minds course.

We use the goals to link our local actions to global targets, giving learning deep relevance and a sense of purpose. We start with considering the global goals to help us to understand the issue at hand, then transfer our new learning into our Global Perspectives group and individual projects. This has allowed us to consolidate, challenge and extend our students' conceptual understanding. Connecting learning in class to the global goals, students are encouraged through collaborative learning tasks to reflect on how their understanding has changed and discuss what has affected the change.

We have inSiGHtS (SGHS being an abbreviation for Southland Girls' High School) groups so students are in responsive social contexts to deepen their

Case study 18: continued

global competency skills. The Cambridge Global Perspectives skills are the scaffold we use to structure these sessions to deepen understanding of global issues. We

plan open-ended discussions around, for example, the global goals Twitter feed. We challenge students' understanding, encouraging them to act on issues of global significance. We do this using tools such as global thinking routines from the Visible Thinking project at Harvard Project Zero, and reflection prompts that draw on the solo taxonomy.

Students then reflect on themselves as learners and plan next steps to transfer new understanding into their Cambridge tasks.

Collaborating with schools through the World's Largest Lesson network allows our students to form creative ideas based on wider perspectives. Students appreciate and understand the cultural complexity in communicating with others and evaluating whether their innovative ideas will be successful across different groups and local, national and global contexts.

Students are engaged because they are motivated by the collective impact of their ideas. In addition, their personal passion for issues is given a real-life context. A strong focus and reason for connecting to this initiative has been the focus on using our personal gifts and talents to make a positive difference in our world, both now and in the future. We actively discuss that the skills we are developing are about equipping us to be leaders prepared to connect and align future decisions to achieving the global goals. Although students may be working on their independent research study they are at all stages connecting to a global community. This allows them to dig deeper into key concepts and evaluate possible scenarios. Our class has created a wiki site (**stepup2sdg.wikispaces.com**) to share learning with other New Zealand schools because they have become so engaged and passionate about students using their learning to make a difference, and they see the power of going one step further and aligning outcomes of their inquiries to targeted collective actions.

Case study 18: continued

Using technology to open up creative possibilities to share new learning has also been a focus of our learning. Students enjoy sharing new understanding and what it means to them in creative ways. Technology also allows us to share learning with a wider audience, building a community of learners.

Through being part of the World's Largest Lesson and aligning the global goals to our Global Perspectives syllabus we have strengthened the attributes of being a confident and responsible learner. Through the real-life, real-time resources students are emotionally connected to issues of global significance. This learning means actions planned for service and raising awareness are informed and targeted.

Through increased opportunities for cross-cultural collaboration enhanced by a shared language of the global goals our students have a more authentic appreciation of how their actions will affect others.

Sharing our learning via our class Twitter account (@GlobalMindsSGHS) also allows students to gather real-time feedback, which enhances motivation further.

As a way to reflect on our learning and set new challenges for the following year we hold a Year 7–10 World Café. This allows the students in an informal environment to share changes in understanding, make connections between each other's learning and provide new insights for future learning.

All these learning opportunities have uncovered the importance of a combination of values, dispositions, attitudes, knowledge and skills that have an impact on global competency learning. Understanding learning as a lifelong disposition and building the capacity to be a leader of change has allowed all our students to experience success in a personal context relevant to them and their learning goals within Cambridge and beyond.

The Cambridge Primary and Lower Secondary Global Perspectives programme (piloted 2016–18, launched for first teaching in June 2018)

This programme will be added to our offering of English, English as a Second Language, Maths and Science in the Cambridge Primary and Lower Secondary curriculum. Global Perspectives will provide a carefully structured enquiry-based approach to learning that will complement and be supported by the development of knowledge, literacies and learning habits in the other subject areas. The programme will:

- Involve six Challenges a year, two a term. Each Challenge is six hours long, subdivided into a range of activities. The Challenges are designed to be used in one-hour blocks with flexibility as to how they are scheduled. There are 24 topics to choose from, at Primary and Lower Secondary.
- Build and develop, through iteration, the skills, knowledge and habits defined by the Global Perspectives continuum.
- Be taught through a wide range of topics using a personal, local and global perspective. The teacher helps the learner to look at a range of topical global issues that give a range of contexts.
- Involve challenges that will include activities such as projects, presentations, reports, logs, posters, questionnaires, written work and blogs that are both team based and individual. The challenges support five skills strands: research, evaluation, analysis, reflection, collaboration and communication.
- Be delivered digitally through our Online Learning Area. All the Challenges are located in the Online Learning Area, with support provided for a student's ePortfolio and Reflective Logs. In addition areas for collaboration and communication will be available in accordance with our age-appropriate eSafety policy.
- Be assessed: all Challenges are self, peer and teacher internally assessed, to help teachers in the formative assessment of their learners. There are also teacher-assessed Cambridge-moderated Checkpoint assessments at age 11 and 14 which are available twice a year, and graded Gold, Silver or Bronze.

Case study 19:

Cambridge Primary Global Perspectives pilot, Escuela y Liceo Elbio Fernández, Uruguay

(extract adapted from the Pilot Forum)

We chose to work with the theme 'helping people to belong' because we thought it would be very useful for our group of learners. This project would help make our students reflect on the concept of 'belonging to a group'. We implemented it in Grade 4, in classes of approximately 25 students. We are part of a very big school in Montevideo, so we thought that this topic could be especially meaningful for our context.

While doing this challenge, students had to think hard about several questions: Why is it important to belong to a group? What is belonging? These reflections generated a warm, meaningful and memorable environment where students expressed thoughtful ideas.

My students were able to show development of their communication skills, strengthening their personal strategies through interviews and surveys. They had to talk among themselves and formulate questions to later ask to other members from other teams or their own families and friends to identify different groups, find out specific information and collect data. They also listened to other groups' findings. They discussed, compared and shared data. They wrote in copybooks, on the whiteboard and designed new mind maps.

They made descriptions, improving their writing skills. They read them aloud, introducing their families and friends, with real pictures and photos. They enjoyed the learning process, making learning easier. When they relate content provided by the teacher with their real lives and personal experiences, learning becomes fun and natural. Students were exposed to memorable and meaningful activities, where they felt engaged and motivated to continue researching, improving their understanding and learning successfully. Students were always asked to self-assess their learning process, as well as the experience in general, and they were given the chance to suggest new ideas and possibilities to improve the project. We had a wonderful experience with this challenge.

Cambridge Enterprise

Cambridge Enterprise is offered as a Cambridge IGCSE and Cambridge O Level syllabus at Cambridge Upper Secondary level. It encourages candidates to develop their understanding and the practical skills associated with the work environment and the running of a small enterprise. The syllabus provides the basic knowledge an entrepreneur requires and an opportunity for candidates to apply this knowledge in a practical and engaging way when running their own enterprise project or activity. We encourage candidates to study enterprise in a local as well as a global context, while enhancing their skills of investigation, analysis, interpretation, evaluation and practical problem-solving.

The aims of Cambridge Enterprise are to:

- make effective use of relevant terms, concepts and methods when discussing enterprise and enterprising behaviour
- develop an understanding of what it means to be enterprising, and the skills that requires
- develop the ability to work in an enterprising and independent manner
- develop and apply knowledge, understanding and skills to contemporary enterprising issues, in a range of local, national and global contexts
- appreciate the roles and perspectives of a range of other people and organisations involved in enterprise, and the importance of ethical considerations
- investigate the world of work and entrepreneurial organisations
- develop the ability to communicate effectively, in a variety of situations, using a range of appropriate techniques.

One of the key aspects of Enterprise, which is assessed by Cambridge through a portfolio submitted by each candidate, is the planning, implementation and evaluation of an enterprise activity (see Case study 20).

Candidates should carry out their own enterprise project or activity, either on their own or as a member of a group (usually of no more than six candidates). Candidates working on their own will take sole responsibility for carrying out a small, relatively simple project or activity. Candidates working in groups should carry out a larger, more complex project or activity that allows each person to play a separate, defined role. Candidates may work as part of a group when planning and running their activity but the work they present for assessment must be completed individually.

Case study 20:

Enterprise at Chisipite Senior School, Zimbabwe

Watch the video at:
https://vimeo.com/230900327

Why does Chisipite Senior School teach Cambridge IGCSE Enterprise?

The school sees Cambridge IGCSE Enterprise as having a real benefit for the vocational studies which the students undertake in Sixth Form. The curriculum offers the students the opportunity to develop business skills and knowledge and also develops their life skills, encouraging them to work as part of a team and communicate with their peers and also with wider groups. The school also thinks that the syllabus encourages the students in their thinking skills and problem-solving approaches as they have to consider what will and won't work in the ideas and proposal that they are considering. The students especially enjoy running and participating in business meetings and seeing the final results of the activities they have undertaken.

Case study 20: continued

How does Chisipite Senior School teach Cambridge IGCSE Enterprise?

Students currently take Cambridge IGCSE Enterprise in a year, with six hours of teaching each week. They also undertake activities outside the classroom as part of their coursework. The subject is taken by vocational students in the Lower Sixth Form who have just completed Cambridge IGCSEs. The girls then progress to Cambridge International AS Level Business Studies in their Upper Sixth year.

The girls begin the course by researching a local business person to gain a first-hand insight into the unique challenges faced by entrepreneurs in Zimbabwe. Each pupil prepares a business plan which is presented to the head teacher. This presentation is followed by a verbal question and answer session where the girls justify their ideas.

Many pupils choose to use other students as their market and carry out surveys and pilot projects to test the viability of their products. This has been invaluable in encouraging them to question their preconceptions of a market they thought they understood. In addition, they learn to recognise the need for careful research.

The pupils often have innovative ideas but putting them into practice provides more challenges than they realise. The time constraints of a busy school term combined with organising the finer details, where and when to sell their product, as well as the unique issue of there being little physical cash in the country, offer obstacles that they have to negotiate. As teachers we see their growth in how they deal with these challenges on a weekly basis and an increasing focus on organisation skills.

The school is also seeing the emergence of leadership qualities within the cohort of students undertaking Cambridge IGCSE Enterprise. They feel that this will have an impact on their progress in the school where all students in the Upper Sixth Form are given the opportunity to serve as 'senior leaders'.

This programme aims to encourage, enhance and exploit the leadership potential of all the students, to give them valuable management experience that will be relevant throughout their lives.

Final thoughts

We hope this guide has helped you think about how you might use the Cambridge learner attributes to help develop teaching practice and shape a curriculum which belongs uniquely to your school.

We are very grateful to the 17 schools who have shared some of their experiences through providing case studies for this guide. What is clear from reading these case studies is how every school engages with the learner attributes in different ways.

Cambridge International is committed to helping schools improve. With approximately 10 000 schools in over 160 countries using our educational programmes and qualifications – often combined with national or other curricular components – our role is to support you in making the right decisions for your school. Excellent schools understand their own culture and context, and constantly strive to improve teaching and learning taking these factors into account.

Students at Southland Girls' High School, New Zealand (*case study 18*)

Appendix 1

How developing the learner attributes can help students to prepare for success in further education and the workplace

What are universities looking for in undergraduates?

Universities want knowledgeable students with good learning habits who are passionate about the discipline they are studying, able to apply their understanding to new questions and contexts.

Knowledge and understanding need to be backed up by effective learning habits. A study conducted by Cambridge Assessment Research Division (Dale, 2011), interviewing admissions officers and academic tutors from a number of universities in a wide range of subjects, identified 10 generic competency areas: active enquiry, open thinking style, motivation, self-discipline, organisation, coping with demands, resilience, self-reflection, emotional control and organisation citizenship. Table 1 taken from the study illustrates responses to the question: What do students performing at different levels at university do differently?

Guy Claxton (2014) illustrates this with an example taken from the University of Cambridge admissions interview. Students are given extremely searching questions by the interview panel. What they want to see is evidence that the student can 'flounder intelligently'. This strategy is widely used by top universities that interview students as part of the application process. Often the question will not have a correct answer. Good candidates will display the list of characteristics in the top category in Table 1. They probably will not give the correct answer but the way they attempt an answer will tell a great deal about their potential.

Universities often complain that learners have been 'spoon-fed' information and lack the requisite thinking skills to progress successfully to higher education. The following comments reflect this:

'At interview we are observing how students behave when they are struggling, and how they respond to advice. Many students have always been "good at maths" and can't cope when they are finally challenged.'

Table 1: Categories of undergraduate students

Top	Average
Intellectual magpie. Engaged with the subject. Critical and questioning. Makes connections. Integrates material. Self-directing. Confident, will try new things. Works through problems and setbacks. Proactive, finds out what is needed. Focuses on the right things. Strong sense of purpose. Thinks and arranges things in a systematic way. Can reflect on how they are doing and learning experiences.	Absorber, takes things in, but less questioning. Wants to know what it is they have to do to get a good degree. Step-by-step approach to learning. Planned approach to work. Takes on board criticism and self-aware of their progress. May need pointing in the right direction. Achievement oriented, may re-direct energies if they feel they are not doing well enough on the course.
Struggling	**Problem**
Passive, does not ask questions or otherwise participate. Linear thinking, over-focused on a single answer. Waiting for you to help them. Can work harder and harder, rather than smarter. Wants to please but can try too hard. Gets very upset if they make a mistake. Listens but seems unable to make changes. Can become a solitary learner. Easily discouraged.	Highly critical of staff and other students. Problems with authority figures. Lacks a sense of responsibility. Always has extenuating circumstances. Poor work ethic. Self-defeating, decides not to try in case they fail. Lacks insight and can be over-confident. Everyone else is the problem. Not a team player. Cannot take feedback. Easily frustrated.

Admissions interviewer, Faculty of Mathematics, University of Cambridge

'I'm looking for students who have the following:

- an ability to think flexibly and adapt arguments in the light of new information
- a willingness to weigh up the relevance of different points of view
- the desire to go beyond "textbook" knowledge and see the limits of what we know
- evidence of an ability to work independently.'

Dr Andrew Thompson: Admissions Tutor and Director of Studies in History, Queens' College, University of Cambridge

Cambridge learner attributes and 'core skills for employability'

Schools are the critical channel through which young people acquire skills that improve opportunities for good jobs. Many key employability skills, such as critical thinking and problem-solving, are dependent on deep content knowledge and cannot be taught in isolation. So teaching such skills requires innovative ways of delivering the academic curricula; it is not about developing a core skills curriculum. The question is how best to integrate these skills into core academic content.

According to the Confederation of British Industry (CBI, 2010), 'a positive attitude is the key foundation of employability… Employers are clear that they are looking to the education system to develop confident, motivated young people, with the attitude, knowledge and skills to succeed in life and in the world of work.' It is critical that schools nurture and develop a broad set of employability skills necessary for all work, which includes teamworking, problem-solving, communications, business and customer awareness and self-management in addition to literacy (including IT) and numeracy.

'Young people's careers will be characterised by change, flexibility and lifelong learning. Business needs its current and future workforce to have the transferable skills and attitudes necessary to succeed in this environment, underpinning the development of job-specific and technical skills' (CBI, 2010).

Like the CBI, the International Labour Organization (ILO, 2013, pp. 14–15) highlights the importance of a high-quality education in preparing young people with the fundamental skills that employers across the world are looking for. The ILO proposes a detailed framework, *Core skills for employability,* which groups these skills into four broad skill categories: learning to learn, communication, teamwork and problem-solving.

The development of Cambridge learner attributes directly contributes to the development of these skills, allowing learners to develop as confident, responsible, reflective, innovative and engaged young adults, preparing them well for their future career (see Table 2).

Students at The Heritage Private School, Cyprus (*case study 14*)

Table 2: The Cambridge learner attributes mapped to the ILO core skills for employability

Cambridge learner attributes	International Labour Organization core skills for employability
Confident in working with information and ideas – their own and those of others. Cambridge learners are confident, secure in their knowledge, unwilling to take things for granted and ready to take intellectual risks. They are keen to explore and evaluate ideas and arguments in a structured, critical and analytical way. They are able to communicate and defend views and opinions as well as respect those of others.	**Learning to learn:** think abstractly; interpret and communicate information; conduct systematic inquiry and follow through with answers; select the best approach for tasks; adaptable **Communication:** write to the needs of an audience; listen and communicate effectively; articulate own ideas and visions **Team work:** respect the thoughts and opinions of others in the group; value others' input **Problem-solving:** think creatively; solve problems independently; test assumptions; identify problems; take the context of data and circumstances into account; adapt to new circumstances; ability to identify and suggest new ideas to get the job done (initiative)
Responsible for themselves, responsive to and respectful of others. Cambridge learners take ownership of their learning, set targets and insist on intellectual integrity. They are collaborative and supportive. They understand that their actions have impacts on others and on the environment. They appreciate the importance of culture, context and community.	**Learning to learn:** pursue independent learning; take responsibility for own learning; manage own learning Team work: interact with co-workers; work within the culture of the group; work in teams or groups; accountability for actions taken; manage oneself at work; value others' input; accept feedback
Reflective as learners, developing their ability to learn. Cambridge learners understand themselves as learners. They are concerned with the processes as well as the products of their learning and develop the awareness and strategies to be lifelong learners.	**Learning to learn:** use learning techniques to acquire and apply new knowledge and skills; pursue independent learning; conduct systematic inquiry and follow through to find answers; take responsibility for own learning; manage own learning; is willing to learn
Innovative and equipped for new and future challenges. Cambridge learners welcome new challenges and meet them resourcefully, creatively and imaginatively. They are capable of applying their knowledge and understanding to solve new and unfamiliar problems. They can adapt flexibly to new situations requiring new ways of thinking.	**Problem-solving:** think creatively; solve problems independently; test assumptions; identify problems; take the context of data and circumstances into account; adapt to new circumstances; ability to identify and suggest new ideas to get the job done (initiative)

Table 2: The Cambridge learner attributes mapped to the ILO core skills for employability *continued*

Cambridge learner attributes	International Labour Organization core skills for employability
Engaged intellectually and socially, ready to make a difference. Cambridge learners are alive with curiosity, embody a spirit of enquiry and want to dig more deeply. They are keen to learn new skills and are receptive to new ideas. They work well independently but also with others. They are equipped to participate constructively in society and the economy – locally, nationally and globally.	**Learning to learn:** pursue independent learning; conduct systematic inquiry and follow through with answers; take responsibility for own learning; manage own learning **Team work:** interact with co-workers; work within the culture of the group; respect the thoughts and opinions of others in the group; value others' input; plan and make decisions with others and support the outcome; build partnerships and coordinate a variety of experiences; work toward group consensus in decision-making **Problem-solving:** think creatively; solve problems independently; test assumptions; identify problems; take the context of data and circumstances into account; adapt to new circumstances; ability to identify and suggest new ideas to get the job done (initiative)

Appendix 2

Schools providing case studies

The British International School, Vietnam

The British International School is the largest international school in Vietnam and has 2145 students, ranging in age from 2 to 18 and representing 51 nationalities. Based across three campuses in Ho Chi Minh City, the school has nurtured an environment where students work hard but also take risks and try out new ideas. There is a strong focus on the school's Global Network and on the community involvement of the pupils.

The British School in Colombo, Sri Lanka

The British School in Colombo is a co-educational day school and has 1200 students, ranging in age from 2 to 18. Established in 1994, the school strives to enrich the lives of young people by providing a holistic educational experience that allows students to grow to become global citizens. There is a strong focus on social awareness and community initiatives.

Bromsgrove International School, Thailand

Bromsgrove International School is a private international school located on the outskirts of Bangkok. It has 393 students, ranging in age from 2 to 18 and representing 27 nationalities. Founded in 2002, the school conducts admissions screening to determine student placement but is ultimately non-selective and proud of its inclusive ethos. The school strives to produce respectful and ambitious students.

Chisipite Senior School, Zimbabwe

Chisipite Senior School was founded in 1954 and was the first inter-denominational private girls' school in Central Africa. It has 550 students ranging in age from 12 to 18. The school aims to provide a broad and balanced education, and provides a learning environment which both motivates pupils to achieve their full academic potential and encourages them to think creatively, critically and independently.

Confucius International School, China

Confucius International School, Qingdao, was founded in 2009 by the direct descendant and current head of the Confucius family. It is the first educational initiative of its kind to unite the best practices in Western teaching with Confucian teaching and principles. Confucian education is concerned primarily with what constitutes the makings of the 'man of quality' and with the tools that the leaders of today and tomorrow must master.

Doha College, Qatar

Doha College is the leading British curriculum international school in Doha and has more than 1800 students, ranging in age from 3 to 18 and representing more than 70 nationalities. Established in 1980, the college subscribes to High Performance Learning, a pedagogy that requires teachers to instil in the students thinking skills and a growth mindset. The college also has a rich and diverse extracurricular programme.

Escuela y Liceo Elbio Fernández, Uruguay

Escuela y Liceo Elbio Fernández is in Montevideo, the capital city of Uruguay in South America, with approximately 1500 students. It was the first private school in Uruguay, founded by the pedagogist José Pedro Varela. It has always been a school where new paradigms and freethinkers are promoted and where secularism is paramount to guarantee equality and fraternity among students.

First Steps – School of Arts and Sciences, Pakistan

First Steps – School of Arts and Sciences embodies a deep commitment to the provision and advancement of high-quality education. It is a 'Lighthouse School of Excellence' for Faisalabad, which models academic rigour and high student performance. Using whole-child instruction, the curriculum strives to meet individual needs and assist the development of children in all developmental domains: intellectual, social, emotional and physical. The faculty and administration take pride in holding their students to high academic, behavioural and ethical standards. The well-rounded students of First Steps

develop the character traits of honesty, integrity, responsibility and respect as they prepare for further leadership roles.

Frensham School, Australia

Frensham School is a single-sex boarding school in New South Wales. Founded in 1913, the school provides an outward-looking academic programme for girls in Years 7–12. The school offers an enriched and extended curriculum across all year groups. The school began the Jamieson Programme in 1986. The Frensham motto, 'In love, serve one another', encourages students to be active and compassionate in recognising the needs of others and to respond with generosity, demonstrating leadership by example and integrity.

The Heritage Private School, Cyprus

The Heritage Private School is an English co-educational, academically selective school for almost 1000 students aged 2 to 18, with an intake from a wide variety of cultural backgrounds. Founded in 1987, the school provides an education based on the UK national curriculum. In addition to its academic courses, the school also actively involves students in national, European and international educational and community projects to extend experience and learning.

Parkside Middle School, Virginia, United States of America

Parkside Middle is one of 18 middle schools in a highly diverse school division. It is the only middle school in Virginia to be classified as a Cambridge School and it offers the Cambridge ethos, beliefs and philosophy to their entire student population of 1253 6th–8th Grade students. It is also the first Cambridge PDQ School in the USA and currently offers the Certificate in Teaching and Learning to its teaching staff.

The Perse School, UK

The Perse School is an independent secondary co-educational day school in Cambridge, for students ranging in age from 3 to 18. The school was founded in 1615 by Stephen Perse and has an enrolment of more than 1500 students. The Perse has been listed as the top-performing co-educational school for GCSE and Cambridge IGCSE results in national newspapers for the past three years but is committed to a broad and balanced education in which extracurricular and sporting activities play an essential part in the development of its pupils and the success that the school enjoys.

Shenzhen College of International Education, China

Shenzhen College of International Education is a selective UK national curriculum school for predominantly Chinese citizens. Established in 2003, the college teaches Cambridge IGCSE and Cambridge International AS & A Level, and each student attends at least one extracurricular activity per term. The college has a strong focus on educational attainment and on creating successful global citizens.

Southland Girls' High School, New Zealand

Southland Girls' High School is the only state school for girls aged 7 to 13 in New Zealand and has an enrolment of 1200 students. Located in Invercargill and established in 1879, the school has a long history of academic excellence and the students have access to an innovative curriculum. The school has a global outlook and contributes to the World's Largest Lesson.

St Andrew's Scots School, Argentina

Founded in 1838 by Scottish settlers, St Andrew's Scots School in Buenos Aires is the oldest bilingual school in the world. Serving around 1950 students from 2 years of age until secondary school, most of them Argentine, St Andrew's features an extensive bilingual programme with a wide variety of sports and extracurricular activities, and has offered Cambridge examinations for more than 50 years.

Frensham School, Australia

Frensham School is a single-sex boarding school in New South Wales. Founded in 1913, the school provides an outward-looking academic programme for girls in Years 7–12. The school offers an enriched and extended curriculum across all year groups. The school began the Jamieson Programme in 1986. The Frensham motto, 'In love, serve one another', encourages students to be active and compassionate in recognising the needs of others and to respond with generosity, demonstrating leadership by example and integrity.

The Heritage Private School, Cyprus

The Heritage Private School is an English co-educational, academically selective school for almost 1000 students aged 2 to 18, with an intake from a wide variety of cultural backgrounds. Founded in 1987, the school provides an education based on the UK national curriculum. In addition to its academic courses, the school also actively involves students in national, European and international educational and community projects to extend experience and learning.

Parkside Middle School, Virginia, United States of America

Parkside Middle is one of 18 middle schools in a highly diverse school division. It is the only middle school in Virginia to be classified as a Cambridge School and it offers the Cambridge ethos, beliefs and philosophy to their entire student population of 1253 6th–8th Grade students. It is also the first Cambridge PDQ School in the USA and currently offers the Certificate in Teaching and Learning to its teaching staff.

The Perse School, UK

The Perse School is an independent secondary co-educational day school in Cambridge, for students ranging in age from 3 to 18. The school was founded in 1615 by Stephen Perse and has an enrolment of more than 1500 students. The Perse has been listed as the top-performing co-educational school for GCSE and Cambridge IGCSE results in national newspapers for the past three years but is committed to a broad and balanced education in which extracurricular and sporting activities play an essential part in the development of its pupils and the success that the school enjoys.

Shenzhen College of International Education, China

Shenzhen College of International Education is a selective UK national curriculum school for predominantly Chinese citizens. Established in 2003, the college teaches Cambridge IGCSE and Cambridge International AS & A Level, and each student attends at least one extracurricular activity per term. The college has a strong focus on educational attainment and on creating successful global citizens.

Southland Girls' High School, New Zealand

Southland Girls' High School is the only state school for girls aged 7 to 13 in New Zealand and has an enrolment of 1200 students. Located in Invercargill and established in 1879, the school has a long history of academic excellence and the students have access to an innovative curriculum. The school has a global outlook and contributes to the World's Largest Lesson.

St Andrew's Scots School, Argentina

Founded in 1838 by Scottish settlers, St Andrew's Scots School in Buenos Aires is the oldest bilingual school in the world. Serving around 1950 students from 2 years of age until secondary school, most of them Argentine, St Andrew's features an extensive bilingual programme with a wide variety of sports and extracurricular activities, and has offered Cambridge examinations for more than 50 years.

Suffern School, United States of America

Suffern High School is a public 9th–12th Grade school in Suffern, New York, serving approximately 1500 students. Suffern High is ranked in the top 500 high schools in the United States and was named a 2017 New York State High Performing Reward School. Suffern offers a large number of electives through programmes such as Advanced Placement, Cambridge, and numerous local colleges. Ninety eight percent of their students continue into post-secondary educational institutions.

United World College South East Asia (UWCSEA), Singapore

UWCSEA is an international school with more than 5500 students, representing more than 90 nationalities. Established in 1971 and spread over two campuses, the school provides a learning programme consisting of five interlinking elements: academics, activities, outdoor education, personal and social education and service. It is part of the United World Colleges movement

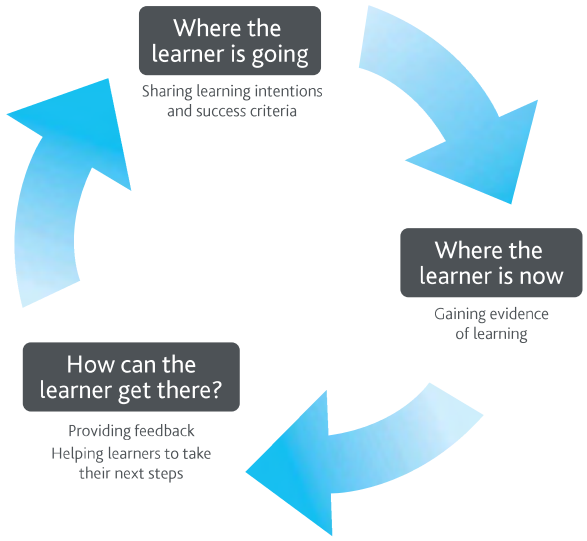
Cambridge Assessment International Education

Assessment for learning

Assessment for learning (AfL) is an approach, integrated into teaching and learning, which creates feedback for students and teachers in order to improve learning and guide their next steps.

What does assessment for learning mean?



AfL focuses on **both the teacher and student understanding** three key things:

1. **Where the learner is going**. Sharing the aims of a lesson and success criteria helps learners to see what they are aiming for and what they need to do to achieve those aims.

2. **Where the learner is now.** Techniques such as effective questioning will help teachers to gauge what individuals and groups have learnt during a lesson, generating evidence of learning that both teacher and students can make use of.

3. **How can the learner get there?** Teachers use this evidence of learning to inform choices about what they will do next with a class or individual students. Learners can use this evidence to make decisions about their learning, such as how to spend their independent study time.

AfL is concerned with maximising the feedback process (teacher to student and student to teacher) to optimise student learning. Feedback ranges from the **informal** (e.g. oral comments given immediately to learners as they think through problems), to more **formal** (e.g. written feedback given after an end-of-topic test). AfL also involves high-quality **peer and self-assessment** where learners or peers may be involved in making decisions about future learning needs (Wiliam, 2018).

The term 'assessment for learning' became popular in the 1990s. At this time there was concern that learners were being over-assessed and that there was a disproportionate focus on end results (assessment **of** learning) rather than on assessment processes that could actively enable learners to make progress. Both assessment **for** learning and assessment **of** learning are valuable in education, but they have different purposes.

What is the theory behind assessment for learning?

- AfL is associated with **social constructivist** theories of learning. Mental models and assumptions that the learner uses to understand a subject are complex, and are constructed from previous experiences and interactions with others. This means the quality of interactions between teachers and learners is critical in the learning process.
- The work of Paul Black and Dylan Wiliam has been highly influential. Their pamphlet for teachers called *Inside the Black Box* (1998a) was based on a literature review of 250 sources on classroom assessment practices (Black & Wiliam, 1998b). They found that 'the effective use of formative assessment [see below] would increase achievement by between 0.4 and 0.7 standard deviations, which would be equivalent to a 50 to 70 percent increase in the rate of student learning' (Wiliam, 2018, p.38).
- Black and Wiliam (1998a) suggested that formative assessment could be improved by:
  - helping **learners understand** exactly what they have to do in order to succeed
  - encouraging productive classroom **discussion**, including **sufficient thinking time**
  - embedding opportunities for **all** learners to **express their understanding**
  - providing **feedback** that helps students to move on in their learning and avoids comparison with other learners, then giving them the **opportunity** to act on that feedback
  - training learners in **self-assessment** and providing opportunities for them to be **learning resources for each other**.

What other terms are associated with assessment for learning?

- **Formative assessment** has a similar meaning to AfL. The term was introduced to contrast with summative assessment (see below), and show that assessment could be used to **form** students' learning and **look forward to** what they will learn next. Some writers in this area see a distinction between AfL and formative assessment (e.g. Swaffield, 2011), while some use the two terms synonymously (see Wiliam, 2018, for further discussion).
- **Summative assessment** means the same as **assessment *of* learning**. Summative assessment is used to sum up students' learning at the end of a period – for example, once a school term or a course has finished. As it **sums up** what the students have achieved, it **looks back** and indicates what the students have learnt, usually measured formally against clearly defined standards.
- **Diagnostic assessment** refers to assessment that identifies what the learner knows or is capable of, perhaps at the start of a new topic. The focus is on identifying difficulties or misconceptions that the learner might have so that the teacher can plan learning activities to address these.

Both summative and diagnostic assessment activities could also be used to support assessment for learning (see below).

What are the benefits of assessment for learning?

- AfL helps learners and teachers focus on the **aim** of their learning. This can help students understand what constitutes 'excellence', take responsibility for their own learning and plan how they might move forward.
- AfL encourages **assessment and learning** to be seen as an integrated whole. The clarification of objectives and feedback about student learning will have a direct impact on the devising of teaching and learning strategies.
- According to research (Hattie, 2012),'feedback' has a **positive effect on learner achievement** (ranked 10th out of 150 factors), particularly if it involves feedback from learner to teacher. This is important as teachers need this information from learners in order to effectively modify their teaching. Many other factors identified as powerful influences in Hattie's analysis are also closely associated with AfL.

What are the challenges of assessment for learning?

- **Confusing function with instrument:** Sometimes an instrument (such as a test) is seen as formative or summative, when these terms are intended to describe the purpose of their use (Wiliam, 2018). For example, a mid-term test might have both a summative and a formative purpose. It sums up learners' attainment to that point, but it can also be reviewed and the information about learning used for a formative purpose, perhaps through an exam wrapper (see *Education Brief: Metacognition*), or to inform teachers' planning for the next series of lessons.
- **Fidelity of implementation:** Wiliam (2018, p.1), said that 'the **effective** use of formative assessment would increase achievement' (emphasis added). If AfL becomes a superficial exercise (for example a teacher formative comment copied by a student into a grid at the end of the unit, without any opportunity for the student to implement the feedback and with no change to future teaching), then it cannot be expected to make a positive impact on achievement.

- **Assessing long-term recall:** Recent work from cognitive science encourages teachers to think about long-term recall of knowledge. This cannot be evaluated accurately when material has just been taught. Teachers need to plan opportunities for tests (which could be low stakes), which are spaced out over a period of weeks or months to encourage long-term recall (EEF, 2014).
- **Change of practice:** It can be challenging to implement AfL practices in a context where learners, teachers and parents are only familiar with summative assessment. It is important to explain the rationale for changes, for teachers to understand them thoroughly and to implement them slowly over time (Black & Wiliam, 1998a). In particular, careful scaffolding and preparation is needed for learner self- and peer-assessment.
- **Workload:** In some contexts, the implementation of written marking practices has had a negative impact on teacher workload (EEF, 2016). It is important that AfL is embedded in everyday classroom practice (for example oral feedback at the point of need) and that written feedback is high-quality and strategically placed when it will have most value.

Practical tips:

How can schools make the best use of assessment for learning?

- **Professional development** in AfL should be given a high priority. It needs to be ongoing and linked to each teacher's own professional practice.
- Schools can encourage teachers to work together to **review and develop the school's assessment policy and practice** so that assessment is seen as a positive method of encouraging students to learn and understand, without becoming an unreasonable burden on teacher workload.
- Make sure that **written and oral feedback** across the school is accurate, easy to understand and focused on learning, also that learners have the opportunity to put it into practice (Wiliam, 2018).
- Teachers need **support putting principles into practice**. Teacher learning communities can change habits and improve teaching (see *Getting Started with Peer Observation*).
- **Evaluate the impact** of new strategies that are implemented, whether these are tried across the whole school or by individual teachers or departments (see Getting Started with Evaluating Impact*). Allow a* reasonable length of time for new strategies to impact on learner outcomes (Wiliam, 2016).

How can teachers make the best use of assessment for learning?

- Much of AfL is skilled practice that is core to being a good teacher. It involves **multiple strategies** – e.g.:
  - Sharing learning intentions and success criteria in an accessible and engaging way (Hattie & Clarke, 2019) and checking if learners have understood them.
  - Using questioning to check and to deepen understanding within and across lessons. All-student response systems are a helpful way to gauge developing understanding across the whole class e.g. learners using mini-whiteboards to respond to hinge-point questions (Wiliam, 2018).
  - Using focused feedback from teacher, peer-, and self-assessment.
  - Giving formative feedback without marks and/or grades as appropriate. Providing formative comments **linked to specific success criteria** can focus the learner on what they need to do to improve a piece of work without the distraction of marks or grades.
  - Making formative use of summative tests. Results can be used by teachers to change their teaching plans and by learners to highlight areas of development need.
  - Feedback needs to **be related to the learning goals** set for each task. This will allow learners to use the feedback to improve. Feedback could focus on the content and quality of work, how a learner has approached a task, and/or the effectiveness of a strategy they used.
- Effective AfL involves **developing learner autonomy** so they can assess themselves accurately and regulate their own learning. In this way, it supports development of the Cambridge learner attributes.

How is Cambridge supporting schools with assessment for learning?

- **Online resources** such as *Getting Started with Assessment for Learning* provide teachers with new ideas and approaches that link theoretical understanding with practical classroom application.
- **Training** such as our Enrichment face-to-face and online workshops on active learning and assessment for learning provides the opportunity for teachers to develop these practices further.
- **Cambridge Professional Development Qualifications** have been designed to encourage and support the use of assessment for learning.
- **Cambridge Primary and Lower Secondary programmes** are specifically designed to help learners and teachers to make and assess progress and provide feedback on strengths and weaknesses across a range of subjects.

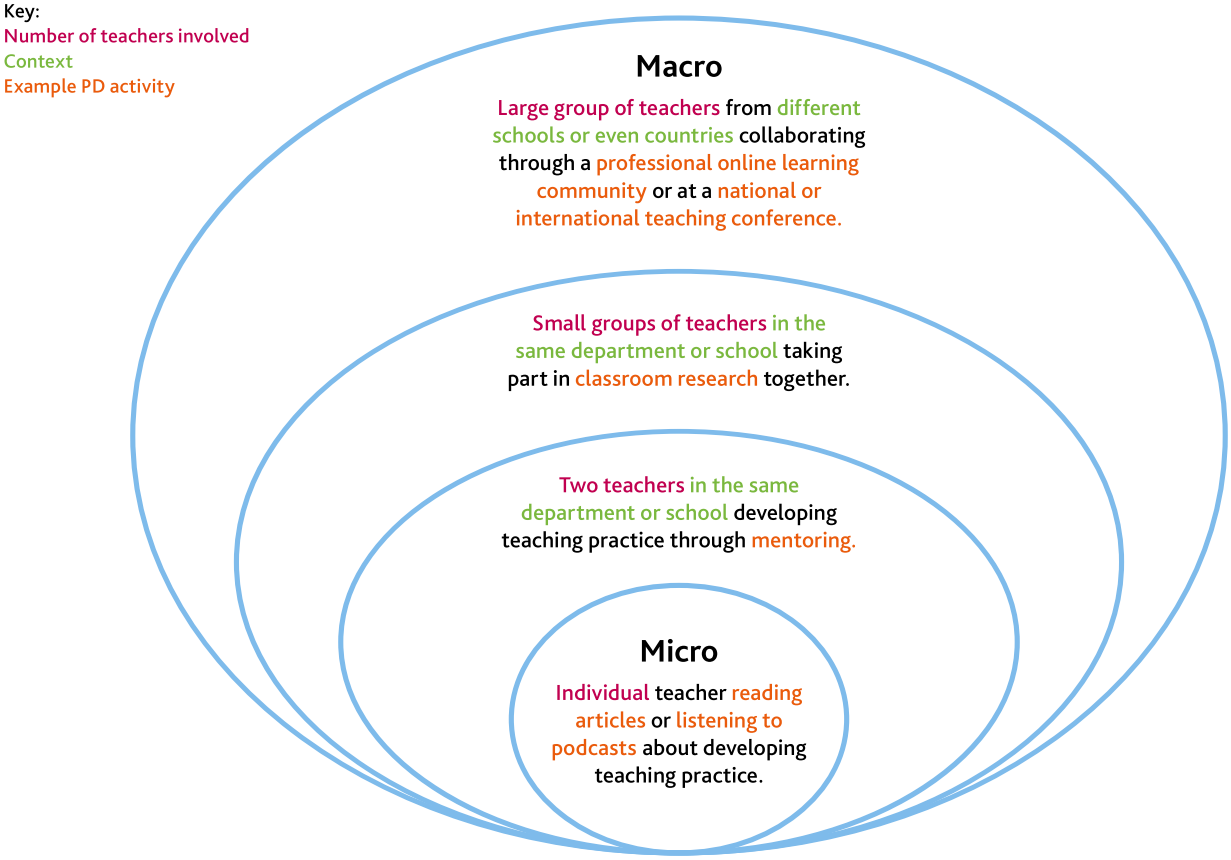
Cambridge Assessment International Education



Education Brief: Teacher professional development

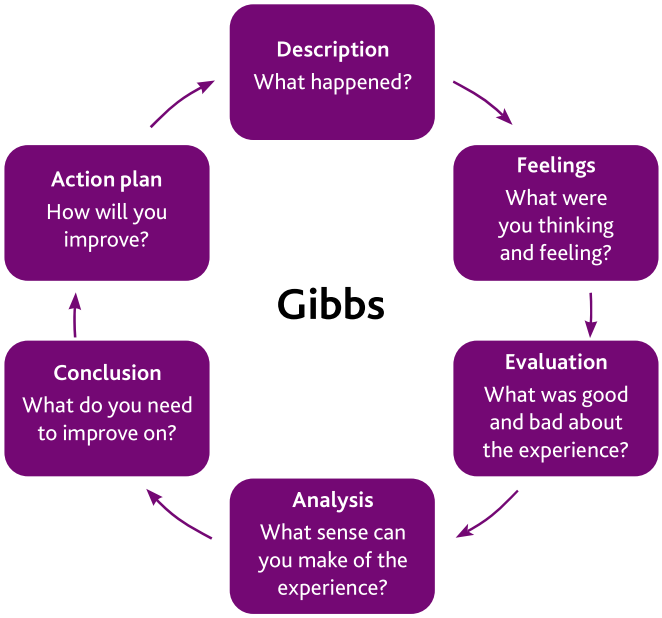
Teacher professional development involves a continuous process of reflection, learning and action to further a teacher's knowledge and skills, leading to enhanced teaching practices that positively impact on students' learning.

What does teacher professional development (PD) mean?

- Teacher PD aims to improve teachers and their practice by adopting a holistic approach to developing the teacher as a professional practitioner. It is an ongoing process that supports continuous development of practice throughout the whole of a teacher's career.
- Teaching practice comprises a range of areas, each of which can be targeted by PD activities. For example, in the TPACK model (Mishra and Koehler, 2006) three overlapping areas exist – Technological, Pedagogical and Content Knowledge. PD activities could therefore specifically target subject content knowledge or instead focus on subject-specific pedagogical knowledge (the overlapping areas of Pedagogical and Content Knowledge).
- Any activity that supports teachers to reflect, learn and then act to improve their practice can be classed as teacher PD, and such activities can occur in a face-to-face or online environment. Some examples are given in Figure 1.
- Teachers can engage in PD activities at the micro (individual) or macro level (collaborating with teachers across a range of contexts; Figure 1).

Figure 1: Micro to macro scale engagement with PD activities

What other terms are associated with teacher PD?



Other terms commonly associated with teacher PD include:

- **Continuing professional development (CPD)** reinforces the notion that professionals should always develop their expertise and teaching practice.
- **Teacher (**or **professional) education** emphasises how engagement in educational experiences leads to learning, advancing a teacher's knowledge, skills and characteristics and enhancing their practice.
- **Training** often develops operational features of a role, focusing on accomplishing one specific skill, such as understanding how to teach a syllabus or how to write learning objectives.
- **Mentoring and coaching** are slightly different from one another. **Mentoring** focuses on establishing a supportive relationship where a less experienced teacher benefits from the guidance of a more experienced colleague (a 'critical friend'). **Coaching** is a technique that provides structured support to encourage a practitioner to review and develop their practice in relation to a specific skill or change in circumstance.
- A **professional learning community/network** brings practitioners together, enabling the sharing of ideas and experiences, as well as providing mutual support, either online or face to face.
- In **action research** teachers conduct research into their own practice with the aim of finding out how they might overcome a specific issue or problem associated with their practice.

What is the theory behind teacher PD?

- **The impact of teachers on learners:** Educational research indicates that teachers and their classroom actions play a large role in explaining variation in learner achievement (Creemers and Kyriakides, 2013). Therefore, effective teacher PD can positively impact teachers' practice and substantially improve learner outcomes.
- **Teachers as learners themselves:** Dylan Wiliam captured the notion of teachers as lifelong learners when he said: 'Every teacher needs to improve, not because they are not good enough, but because they can be even better'. Teachers' expertise can also be developed through formative feedback within a professional learning environment (Coe et al., 2020), echoing the social constructivism approaches to learning (Vygotsky, 1978) that teachers use with their own learners.
- **Engaging in reflection** is a fundamental aspect of teacher PD. By undertaking careful and deliberate critical analysis of classroom events and asking *'Why?'* to determine the reasons behind the events, teachers subsequently develop their practice and expertise, recognising what changes to practice to make in the future (Dewey, 1933; Schön, 1983; Tripp, 1993). Many models depict the cyclical nature of the reflection process: Kolb's Experiential Learning cycle (1984); Gibbs' Reflective Cycle (1988, Figure 2); Driscoll's 'What? So What? Now what?' cycle (2007); and Jasper's 'Experience, Reflection, Action (ERA)' cycle (2003).

Figure 2: Gibbs' Reflective Cycle

What are the benefits of teacher PD?

- **Improved learner outcomes:** Numerous research studies highlight the vital role that teachers play in securing learner outcomes (e.g. Creemers and Kyriakides, 2013; Hattie 2012). Teacher PD that is explicitly focused on improving learner outcomes has a significant impact on learner achievement (Cordingley et al., 2015). Therefore, by enhancing teachers' practice through effective PD opportunities, learner achievement will also improve.
- **Increased teacher motivation:** PD activities that provide teachers with a sense of agency and control over their professional development foster intrinsic motivation in teachers (Coe, 1998). Teachers also express higher job satisfaction when they have autonomy over their own PD (Worth and Van den Brande, 2020).
- **Benefits for schools and the sector:** When teachers engage in PD activity, individual schools and the school sector overall can benefit through:
  - the retention of teachers in the profession (Worth and Van den Brande, 2020).
  - an elevation of a school's reputation for effectively supporting learning as learner progress accelerates and outcomes improve.
  - enhancing a school's reputation as a place where staff are valued and supported to develop as professionals.
  - the wider sharing of best practice pedagogies for sector-wide improvement.

What are some of the misconceptions of teacher PD?

- **More experienced teachers cannot benefit from PD:** PD is a continuous process – teachers benefit from PD throughout, not just at the start of, their career. The number of years of teaching experience does not necessarily equate to expertise (Hattie, 2012) – it is also important for teachers to adapt teaching practices as educational contexts change (e.g. as a consequence of globalisation or emergency situations such as a pandemic) and to keep up to date with emerging pedagogical research and technological advances that inform effective teaching practices.
- **PD opportunities are one-off training events:** PD is more successful and leads to long-lasting and meaningful changes in teaching practice if it is contextualised and prolonged, with multiple opportunities for ongoing support and follow-up (Cordingley et al., 2015). Such a PD programme can be coordinated internally, externally, or through both means.
- **Passive engagement in PD is effective:** PD activities in which teachers remain passive recipients of knowledge and ideas rarely result in long-term changes in teacher practice (Cordingley et al., 2015). Teachers should instead have the opportunity to actively engage with new ideas and content, just as they would expect their learners to do, reflecting on how these apply to their own context.
- **PD takes lots of time for little impact:** PD should be embedded and integrated into a teacher's role, rather than considered as an extra activity. If implemented effectively, the time invested in PD will pay off. However, changing established ways of working commonly elicits both positive and negative emotional responses (e.g. Kelley and Conner, 1979), meaning that reflection cycles and a support network are vital to ensure that implementation of learning from PD activities occurs for long enough to see impact. We can use models such as the 'five levels of professional development evaluation' (Guskey, 1999) to help us gauge impact from participants' reaction to student learning outcomes.
- **PD is expensive:** Sometimes PD can be expensive but investing in high-quality PD programmes can elicit significant positive impact on teaching practices – make sure to invest in the most appropriate type of PD for your context and needs. Remember that free PD can also be impactful, for example, engaging with self-study guides in a reading group or being an active participant in learning communities through social media platforms.
- **Investing in teacher PD leads to loss of teachers:** Teachers gain job satisfaction through engaging with PD (Worth and Van den Brande, 2020) which in turn enhances their motivation. Therefore there is a danger that teachers who do not have the opportunity to engage in PD activities could leave their school, or even the profession.

Practical tips

How can schools support PD?

- **Actively demonstrate that teacher PD is valued in your school.**
  - Provide teachers with the resources that they need to engage in effective PD and for it to have impact, such as access to internal and external expertise and opportunities to follow up and consolidate learning.
  - Integrate PD into your teachers' roles and schedules, ensuring they can engage in PD activities regularly, rather than only when there is 'spare time'.
  - Elevate the status of PD in your school by formally recognising engagement with teacher PD, for example through teacher retention, promotion and remuneration.
- **Establish a collaborative learning culture** where opportunities for teachers to learn together – both within and beyond their school – are crafted and celebrated. This approach employs Vygotsky's (1978) social constructivism theory by allowing teachers to build understanding and progress in their learning by interacting with colleagues. Hattie (2016) also ranks collective teacher efficacy as having a very large positive impact on student achievement.
- **Reflect on your school context and teacher needs** to ensure that any PD activity will meet your teachers' and school's specific needs (Ellams, 2018). This keeps the PD relevant, meaning it is more likely to have impact.

- **Use the research evidence** to identify the most impactful areas to focus on for improving teaching practice and student learning in your school, for example Hattie's (2012) work on effect sizes, Creemers and Kyriakides' dynamic model of teacher effectiveness (2013), Rosenshine's (2010) 10 principles of instruction, and the Great Teaching Toolkit (Coe et al., 2020).
- **Remember quality assurance:** Cordingley et al. (2015) identified the key features of successful PD programmes, such as their ongoing nature, meeting teachers' specific needs and providing opportunities to put learning into practice in the classroom – remember these features when designing internal PD programmes. When sourcing external PD providers seek quality – do not be afraid to ask the provider how they will approach the PD programme and check it aligns with the research, such as tailoring of the PD offering to the needs of your teachers and school context. In both cases the school senior leadership team should collectively support the PD programme and teacher involvement with it.

How can teachers engage in PD?

- **Do not try to do everything at once.** Select one or two aspects of your practice to focus on developing and master these first before targeting further areas.
- **Seek guidance from evidence-informed sources** to identify teaching practices that are likely to strongly impact on your learners' learning (see the, '**Use the research evidence',** bullet point in the How can schools support PD? section above).
- **Take time to identify the existing strengths** in your practice – we can be overly critical of ourselves and focus only on areas of weakness. Try reflecting against recognised sets of teacher standards or seek feedback from colleagues. Keep doing the things you do well and get even better at them! Teachers with specific expertise are vital for supporting others to develop in these areas.
- **Identify areas for improvement:**
  - **Engage with colleagues** as sometimes we do not know what we do not know – often known as unconscious incompetence. A critical friend can help you to identify areas of your practice to improve.
  - **Ask yourself where most of your PD activity lies.** Do you mainly engage in PD on subject content knowledge? Do you tend to engage in individual PD activities at the micro level (see Figure 1)? Try broadening the types of PD activity you engage with to develop your practice more holistically.
- **Once you have identified one or two areas of focus, create an action plan.** Set specific goals and build in time to engage in reflective cycles to determine whether the changes to your practice are having an impact. Decide if you will share your progress with others, maybe through a mentor relationship or professional online learning community – this can help to keep you motivated.
- **Learn from your students!** Your learners are key stakeholders and a great source of information about what does (and does not) work well in your classroom. You can also get feedback from your learners (quick surveys, exit slips or short focus groups work well) and use this in your reflections to update your action plan.

How is Cambridge International supporting schools with teacher PD?

Our PD framework ensures all teachers and leaders have a wide variety of PD options to choose from to meet their experience level and specific needs. Our approach to PD reflects the principles outlined in this brief, supporting teachers to embody the Cambridge teacher and learner attributes: **confident, responsible, reflective, innovative** and **engaged.**

- Our **webpages** include numerous resources to support all Cambridge schools and their teachers. In particular, the Teaching Cambridge at your school webpage links to our Education Briefs, the Cambridge School Leader Standards and Cambridge Teacher Standards and self-assessment grids, and 'Getting Started with…' guides. The Getting Started with Evaluating Impact and Getting Started with Reflective Practice resources are particularly relevant for this brief.
- The **School Support Hub** is a secure online site for teachers at Cambridge schools, consisting of many thousands of high-quality teaching and learning resources, including schemes of work and learner guides.
- **Online and face-to-face professional development** events support teachers according to their experience and needs, with the offer comprising syllabus-based training, as well as Enrichment Professional Development.
- **Cambridge Professional Development Qualifications**, consisting of guided learning, individual study and collaborative learning, and school-based learning, help teachers develop their thinking and practice with expert guidance and support.
- We regularly hold **Cambridge Schools Conferences**, which include keynote speakers and workshops, and bring together Cambridge teachers and principals from across the globe.

Author acknowledgment: Dr Karen Angus-Cole

CAMBRIDGE
International Education

Exam day checklist

This is a guide for exams officers and invigilators. Use it to check you are ready for each exam and that you are following all our regulations.

1. Before the exam starts

Make sure:

- the exam room is set up properly
- your invigilators are fully briefed
- you have any additional materials the candidates need.

Use the checklist below to make sure you and your invigilators are fully prepared. If you are unsure about any of the points below see sections 4 and 5 of the *Cambridge Handbook*.

- ☐ I have timetabled the exam is correctly and all candidates will be in the exam or under Full Centre Supervision at the Key Time.
- ☐ I have checked the conditions in the exam room are suitable (heat, light, noise, cleanliness).
- ☐ I have displayed The Notice to Candidates and Candidate Warning posters both inside and outside the exam room.
- ☐ I have covered up any display material which might be helpful to candidates (e.g. periodic tables, maps).
- ☐ I have correctly placed the desks and I am using the exam room space to its full potential to space candidates as far apart as possible. There is a minimum distance of 1.25 metres between the centre of one candidate's chair to the centre of another's, when the chairs are pulled out as though a candidate were sitting at the desk.
- ☐ I have checked the type of desk in the exam room is suitable (for example, there is enough space on the desk for everything the candidate needs and any desk shelves have been checked for unauthorised material).
- ☐ I have put candidate numbers on the desks.
- ☐ A clock can be seen from each candidate's desk, and it is displaying the correct time.
- ☐ I have printed the 'Cambridge Handbook 2024: sections and 4 and 5 (abridged)', and the 'Cambridge Handbook 2024: Key Times and Full Centre Supervision' documents. I have put them in all exam rooms.
- ☐ I have the right number of invigilators for the number of candidates sitting the exam and they can call for assistance if needed without disturbing candidates.

- ☐ I have trained all the invigilators and am confident they understand what they need to do.
- ☐ I have the correct question paper packet(s) and other materials for the exam.
- ☐ I will securely store question papers packets and other confidential materials. I will not leave packed unattended at any time between removing them from secure storage and starting the exam.
- ☐ I have the script packet envelopes ready to pack the scripts into at the end of the exam, and the relevant bar-coded labels.
- ☐ I know which materials (dictionaries, set texts, calculators) are allowed in the exam (check the Additional Materials List available at www.cambridgeinternational.org/beforetheexams if you are unsure about which materials are allowed in each exam.).
- ☐ I have a copy of the relevant 'What to Say to Candidates in an Exam' document ready to read aloud to the candidates in English.
- ☐ If I am using multiple exam rooms, I have set up each exam room with the same requirements as above.
- ☐ I have allocated which washrooms may be used by candidates during the exam, and checked each cubicle for any unauthorised materials.

2. Before the candidates enter the room

You must be sure of the identity of all your candidates and make sure that they do not bring any unauthorised materials into the exam room.

- ☐ I am sure of the identity of each candidate.
- ☐ All candidates have handed in any unauthorised materials and I have stored these outside the exam room.

Once you have checked the above, ask the candidates to enter the exam room in silence and sit at their desks.

3. Once the candidates are seated

Once the candidates are seated, two members of staff must check they have the correct question paper packet before opening it and handing out the question papers. To make sure all candidates have the same exam experience you must read aloud a specific set of instructions at the start and end of the exam. The instructions are available at www.cambridgeinternational.org/examday

- ☐ Together with another member of staff, we have checked that we have correct blue questions paper packet before opening it. We have checked:

- ☐ the centre number
- ☐ exam date
- ☐ session (AM/PM/EV)
- ☐ syllabus name
- ☐ syllabus code
- ☐ component code

are correct and there is no damage to the blue question paper packet.

- ☐ After opening the blue question paper packet, together with another member of staff, we have checked the syllabus and component shown on the question paper is correct and there is no damage to the inner packet before opening it.
- ☐ I have checked the instructions on the front of the question paper to make sure our arrangements for unauthorised materials are correct.
- ☐ I have read aloud the instructions to candidates and the exam is now in progress.

4. During the exam

During the exam all invigilators must be alert, move around the room and supervise the candidates to make sure they do not cheat or distract other candidates. Invigilators should look out for candidates who may be using electronic devices, including smart watches, and for any other irregular behaviour, such as clicking pens during multiple-choice exams.

There are a few tasks you need to complete during the exam:

- ☐ I have completed the attendance register, adding the names of any candidates not listed to the bottom of the document.
- ☐ I have completed a seating plan. It shows how the room is set up, including the position of the tables, chairs and invigilators' desks and the direction the candidates are facing.
- ☐ I have told candidates that only five minutes remain until the end of the exam.

Remember to follow the regulations detailed in the *Cambridge Handbook* when responding to any situation during the exam:

- See section 5 if a candidate arrives late or if anything unexpected happens.
- Your invigilators must tell you about any suspected malpractice that happens during the exam. Your Head of Centre must then report the suspected malpractice to us immediately using Exam Day – Form 9, available at www.cambridgeinternational.org/examday
- Only answer candidate's questions about information on the front of the paper.
- Do not give any advice to candidates about the content of the question paper.

- If a candidate needs to leave the room temporarily, make sure they are accompanied by an invigilator.
- If a candidate leaves the room, without intending to come back, make sure they are kept under Full Centre Supervision until the Key Time has passed and that you collect their question paper and answer script (if applicable).
- Do not remove any question papers from the room.

5. At the end of the exam (candidates are still seated)

To make sure all candidates have the same exam experience, there are a number of tasks you need to complete at the end of the exam:

- ☐ I have read aloud the instructions in the *What to Say to Candidates in an Exam* document.
- ☐ I have checked and signed the attendance register.
- ☐ I have collected and accounted for all question papers, answer scripts and unused stationery.
- ☐ I have checked the question papers and answer sheets (if any) to make sure that:
    - the candidates have written their name, candidate number and centre number on all their answer sheets or question papers
    - candidates have numbered their answers correctly
    - candidates have fastened any supplementary sheets of paper to the back of their answer booklet or question paper.
- ☐ I have arranged the question papers and answer sheets into candidate number order, and sealed these in an envelope in front of candidates (if using only one exam room)
- ☐ I have told candidates they can leave the room, and that if the Key Time has not passed they are now under Full Centre Supervision.

6. At the end of the exam (after candidates have left the room)

- ☐ If I have used multiple exam rooms, I have brought all question papers and answer sheets together to be sealed in candidate number order.
- ☐ I have packed the scripts, relevant attendance registers and any access arrangement coversheets into the script packet envelopes provided, attached the relevant bar-coded label and sealed the packet.

- ☐ Where there is more than one bar-coded label, I have packed the attendance register and scripts for the range of candidate numbers on the labels into separate script packet envelopes.

Calculators and dictionaries

Section 5 of the *Cambridge Handbook* explains our regulations on dictionaries. For up-to-date information about calculators, please check the Additional Materials List available at www.cambridgeinternational.org/beforetheexams.

Running exams with access arrangements

If you have candidates with access arrangements in their exams, please see section 1.3 of the Cambridge Handbook for details about how run exams. Section 1.3 of the Cambridge Handbook has more information about each access arrangement and how they are used in exams. For information on separate or small room invigilation see section 1.3.8, and for emergency access arrangement information, see section 1.3.9.

Key Times and Full Centre Supervision

Key Times

- The Key Time is a single point in time, defined by the location and country of a centre, stipulated by Cambridge, when all candidates taking timetabled exams must either be in an exam or under Full Centre Supervision.
- If the Key Time is before or after the exam, keep candidates under Full Centre Supervision from the Key Time or until it passes.
- If a candidate finishes early and wants to leave the exam room before the Key Time, they need to be kept under Full Centre Supervision until the Key Time passes.

Full Centre Supervision

Full Centre Supervision is a specific type of supervision for exam candidates. If candidates are not in their exam at the Key Time they must be under Full Centre Supervision. This means that they must be supervised by teachers or invigilators and that they cannot have access to any form of external communication, for example, a mobile phone or the internet.

Full Centre Supervision can be in the exam room or any other suitable room.

- You must have enough invigilators/supervisors to make sure all candidates are following Full Centre Supervision requirements.
- Candidates can have access to books and revision notes during Full Centre Supervision.
- Candidates can talk to each other, as long as they do not disturb other candidates.
- Candidates must not communicate with anyone who is not under Full Centre Supervision.
- If a candidate needs to leave the room during Full Centre Supervision they must be accompanied by an invigilator.

Multiple-choice and practical exams

Multiple-choice

We provide answer sheets for multiple-choice exams. Invigilation arrangements are slightly different for multiple-choice exams. The differences are detailed below.

- We send you multiple-choice answer sheets for each candidate.
- You must arrange exam desks at least 1.25 metres apart (if possible this should be 2 metres), in all directions, so that candidates cannot see the work of others.
- You should distribute answer sheets before the exam.
- Make sure you give candidates the correct multiple-choice answer sheet – there may be different versions available depending on the syllabus: www.cambridgeinternational.org/multiple-choice
- Ask candidates to check their pre-printed details and sign in the space provided to show they are correct.
- Tell candidates who do not have personalised multiple-choice answer sheets to enter their details on the supplementary sheets, writing their names in block capital letters.
- You can download supplementary sheets from www.cambridgeinternational.org/examday
- Read the instructions on the front of the answer sheet to make sure that candidates use the answer sheet properly.
- For each absent candidate fill in the appropriate lozenge on their answer sheet, using a pencil, and include the answer sheet in the return despatch.
- At the end of the exam arrange all the sheets in candidate number order.

Science practicals

Invigilation arrangements are slightly different for science practical exams. The differences are detailed below.

- Make sure you have access to the confidential instructions – they may include some specific administrative instructions.

- Candidates are allowed to use calculators but these must not be in a case.
- Remind candidates they should only use pencils for graphs and diagrams.
- You must make sure there is a subject specialist in the exam room to help you with any technical issues. This is usually the supervisor who is responsible for setting up the exam.
- Arrange equipment and chemicals to limit the need for candidates to move around.
- During the exam candidates will need to move around and the supervisor may need to give spoken instructions. Please make sure this does not compromise the security or integrity of the exam in any way.
- Only communicate with candidates about administrative and safety issues.
- In some cases, you can give practical assistance to candidates (this will be explained on the front of the question paper or in the confidential instructions). Keep a note if you give any assistance to candidates.
- If a candidate experiences any difficulties during the exam, communicate directly with them. If it is something that affects all the candidates, you can make an announcement as long as the security or integrity of the exam is not compromised. The supervisor should make a note of this in their report.
- If a candidate appears to be having problems with faulty equipment, tell the supervisor. They will determine if there is a problem with the equipment. If the problem is with the equipment this should be replaced or fixed as soon as possible. Any issues should be recorded in the supervisor's report.
- You can give more materials to candidates if they need them. The supervisor is allowed to increase the quantity of each substance used in the exam by 25 per cent.
- The supervisor's report must be signed by a subject specialist. A copy of the report must be sent to Cambridge with the scripts.

If for some reason you do not have all the required materials for a science practical exam, please contact us immediately at info@cambridgeinternational.org or +44 1223 553554.

Information Technology, Computer Science and Information & Communication Technology practical exams

We make instructions about invigilating Cambridge IGCSE™ and Cambridge International AS & A Level practical tests for the about subjects available to you at least one month before the tests start. These are available on our website: www.cambridgeinternational.org/beforetheexams and we also let you know they are available via the Exams Officer's eNewsletter.

CAMBRIDGE
International Education

Fees list: USA

May and June 2026 series

Introduction

In this list you will find our:

- Cambridge Pathway qualification entry fees for:
  - Cambridge Primary
  - Cambridge Lower Secondary
  - Cambridge Upper Secondary
  - Cambridge Advanced
- Cambridge Professional Development Qualification (PDQ) fees
- administration fees.

Cambridge Primary and Cambridge Lower Secondary

US DOLLAR ($)

Qualification fees (per exam entry)	
Cambridge Primary Checkpoint (per candidate, per subject)	30.00
Cambridge Lower Secondary Checkpoint (per candidate, per subject)	45.00

Cambridge Upper Secondary and Advanced

US DOLLAR ($)

Qualification fees (per exam entry)	
Cambridge IGCSE™	82.75 per subject
Cambridge IGCSE Double Award	165.50 per subject
Cambridge ICE entry fee	90.70 per certificate
Cambridge International AS Level component or A2 Level component (except AS Level Global Perspectives)	124.80 per subject
Cambridge International A Level (except A Level Global Perspectives)	201.85 per subject
Cambridge International AS Level Global Perspectives component	218.85
Cambridge International A2 Level Global Perspectives component	169.45
Cambridge International A Level Global Perspectives	275.35
Cambridge IPQ	169.45 per subject
Cambridge AICE Diploma entry fee	143.75 per diploma

Cambridge Professional Development Qualifications (Cambridge PDQs)

Registered Cambridge schools: access to the Cambridge PDQ programme is included in the Cambridge Primary, Cambridge Lower Secondary, and the Cambridge Upper Secondary and Advanced programme fees following a successful approval application.

	US DOLLAR ($)
Induction fees (per Programme Leader)	
Online Programme Leader Induction course with delivery materials	593.25
Online Programme Leader Extension course with delivery materials	326.30
Resubmission of the programme plan and rationale for Online Programme Leader courses	120.90 per module
Qualification fees (per exam entry)	
PDQ Certificate (Module 1) – Syllabuses starting with the number 6	421.00
PDQ Certificate (Module 1) – Syllabuses starting with the number 5	484.20
PDQ Diploma (Module 2) – Syllabuses starting with the number 6	252.60
PDQ Diploma (Module 3) – Syllabuses starting with the number 6	252.60
PDQ Diploma (Module 2 + 3) – Syllabuses starting with the number 5	505.20

Administration fees

You can find fees for results services, post-results services and late entries below. After the final entry closing date, we will charge late fees for any new entries you make, as well as for any entry amendments or syllabus changes. For more information about these services please see the Cambridge Handbook.

	US DOLLAR ($)
Late entries (in addition to the normal syllabus fee)	73.55 per entry, per subject
Very late entries (in addition to the normal syllabus fee)	183.90 per entry, per subject
Results services	
Duplicate results – whole school	103.10
Duplicate results – broadsheet only	68.90
Duplicate results – additional fee for despatch by courier	89.60
Priority results information	99.15
Priority results information – additional fee for extra copy	27.60
Priority results information – additional fee for despatch by courier	89.60
Post-results services	
Certifying statement search fee	99.15
Certifying statement – additional fee for extra copy	27.60
Certifying statement – additional fee for despatch by courier	89.55
Certifying statement – additional fee for authentication per statement	351.95
Replacement certificate – candidate/centre details change requested after the issue of certificates	99.15
Replacement certificate – additional fee for despatch by courier	89.55
Replacement statement of results – candidate/centre details change requested after the issue of statements of results	99.15

Replacement statement of results – additional fee for despatch by courier	89.55
Verification of results	44.00
For Enquiries about Results (EARs) services for Cambridge IGCSE™ and International AS & A Level	*See table below*
Recalculation of Cambridge ICE or the Cambridge AICE Diploma (non-refundable fee)	
For the first five candidates	238.75
For each additional candidate	24.00
EARs service for Cambridge Professional Development Qualifications: Service 3 – Review of marking and clerical re-check, with detailed report on syllabus assignment (fee per candidate)	137.70
Appeals against enquiries about exam results outcomes Stage 1	343.75
Appeals against enquiries about exam results outcomes Stage 2	412.15

Enquiries about results (EARs) — **US Dollar ($)**

Service number	Description	Cambridge IGCSE™ Component fee	Cambridge International AS & A Level Component fee
1	Clerical re-check (fee per candidate)	37.35	41.40
1S	Clerical re-check with a copy of the script (fee per candidate)	81.40	82.50
2	Review of marking and clerical re-check (fee per candidate)	86.80	103.10
2S	Review of marking and clerical re-check with a copy of the script (fee per candidate)	130.80	148.70
5	Re-moderation of the school's coursework marks for a component, together with a report on the assessment of the coursework of the candidates (fee per cohort)	495.30	573.50
9	Report on the work of a group of candidates Note: The report is for the information of teachers only and does not involve any review of marking For the first five candidates: For each additional candidate up to maximum 15:	 452.90 63.10	 507.90 82.60
10	Review of selection of evidence – for portfolio of evidence route A review of the choice of the pieces of evidence included in the candidate's portfolio to check that the pieces of evidence chosen meet the criteria for selection in our published portfolio of evidence guidance (fee per candidate)	173.60	206.10

Other fees

Fees for publications, merchandise, consultancy on curriculum, assessment design and school improvement are available on request.

Refund of fees

We only refund fees if you let us know about the withdrawal of a candidate before the published entry closing date. We issue refunds after the end of the exam series. More information is in the Cambridge Handbook at www.cambridgeinternational.org/examsofficersguide

Taxation

Fees are net of local taxation. All fees are payable without deduction for any taxes; all sums payable to us shall be increased to the extent necessary to provide us with the same net amount we would have received if no such taxes had been applicable to those fees.

Invoicing and payment

We email invoices to your designated Finance contact at your school or centre. To update or change this information, please contact us at info@cambridgeinternational.org

Learn more

You can find out more about the stages of the Cambridge Pathway on our website.
Our fees: Learn more at www.cambridgeinternational.org/why-choose-us/join-cambridge/our-fees
Cambridge Early Years: Learn more at www.cambridgeinternational.org/earlyyears
Cambridge Primary: Learn more at www.cambridgeinternational.org/cambridgeprimary
Cambridge Lower Secondary: Learn more at www.cambridgeinternational.org/lowersecondary
Cambridge Upper Secondary: Learn more at www.cambridgeinternational.org/uppersecondary
Cambridge Advanced: Learn more at www.cambridgeinternational.org/cambridgeadvanced
Cambridge Professional Development: Learn more at www.cambridgeinternational.org/pdq
Professional development training courses (subject and skills based): Learn more at www.cambridgeinternational.org/professionaldevelopment
Fees for teacher training depend on the type of delivery method and are available on request. Contact info@cambridgeinternational.org for more information.

If you have any questions

Contact us at info@cambridgeinternational.org. Our Customer Services team is available 24 hours a day, 6 days a week. Our hours are Sunday 00:01 UTC to Friday 23:59 UTC, all year round. We are closed on Saturdays 00:01 UTC to 23:59 UTC. For help, go to www.cambridgeinternational.org/help

Cambridge Assessment International Education

Metacognition

Metacognition describes the processes involved when learners plan, monitor, evaluate and make changes to their own learning behaviours.

What does metacognition mean?

The prefix 'meta' means 'about' the thing itself. So, metacognition is 'cognition about cognition', or 'thinking about one's thinking'. It is often considered to have two dimensions: metacognitive knowledge and metacognitive regulation.

- **Metacognitive knowledge** includes the learner's knowledge of their own cognitive abilities (e.g. I have trouble remembering dates), the learner's knowledge of the nature of particular tasks (e.g. the ideas in this article are complex), and the learner's knowledge of different strategies including when to use these strategies (e.g. if I break telephone numbers into chunks I will remember them) (Brown, 1987; Flavell, 1979).
- **Metacognitive regulation** describes how learners monitor and control their cognitive processes. For example, realising that the strategy they are using to solve a mathematical problem is not working and trying another approach (Nelson & Narens, 1990). Monitoring and control are described in more detail in the following section.

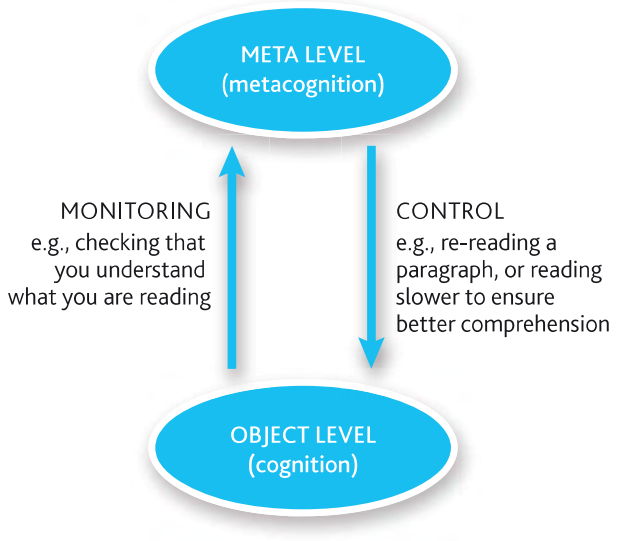

Figure 1. Nelson and Narens' (1990) Model of Metacognition

What is the theory behind metacognition?

A theory of metacognitive regulation that is widely cited in the research literature is Nelson and Narens' (1990) model of metacognition. This consists of two levels: the **object level** and the **meta level** (see Figure 1 below).

- The **object level** is where cognitive processes or 'one's thinking' occurs. One example is decoding text when reading. At the object level, cognitive strategies (e.g. decoding) are used to help the learner achieve a particular goal (understanding the meaning of the text). This is **cognition**.
- The **meta level** is where 'thinking about thinking' takes place. At this higher-order level, metacognitive strategies are used to make sure the learner reaches the goal they have set. To continue with the reading example, this would begin with the learner thinking about how well they have understood the paragraph they have just read. This is termed **monitoring**. If they are happy with their comprehension level they will continue reading. If not, they will perhaps re-read the paragraph, or decide to use a dictionary to help their understanding. These actions are called **control** processes, as they are changing the learner's cognitive processes or related behaviours, based on the monitoring feedback. This is **metacognition**.

Perkins (1992) defined **four levels of metacognitive learners**: tacit; aware; strategic; reflective. 'Tacit' learners are unaware of their metacognitive knowledge. They do not think about any particular strategies for learning and merely accept if they know something or not. 'Aware' learners know about some of the kinds of thinking that they do – generating ideas, finding evidence, etc. – but thinking is not deliberate or planned. 'Strategic' learners organise their thinking by using problem solving, grouping and classifying, evidence seeking, decision making, etc. They know and apply the strategies that help them learn. 'Reflective' learners are not only strategic about their thinking but they also reflect upon their learning while it is happening, monitoring the success of any strategies they are using and then changing them as appropriate.

What other terms are associated with metacognition?

- **Self-regulated learning** is a broader term, encompassing cognition, metacognitive knowledge, metacognitive regulation and the motivation necessary to employ these strategies successfully (EEF, 2019).
- **Metamemory** – the metacognitive aspects of learning and memory (Nelson & Narens, 1990).

What are the benefits of metacognition?

- Metacognitive practices help learners to plan, monitor and evaluate their own progress and **take control of their learning** as they read, write and solve problems in the classroom.
- Research indicates that metacognition is a **powerful predictor of learning**. Metacognitive practices make a unique contribution to learning over and above the influence of cognitive ability. The implication of this research is that improving a learner's metacognitive practices may compensate for any cognitive limitations they may have (Veenman, Wilhelm & Beishuizen, 2004; Wang, Haertel & Walberg, 1990).
- Metacognitive practices have been shown to **improve academic achievement** across a range of ages, cognitive abilities and learning domains. This includes reading and text comprehension, writing, mathematics, reasoning and problem solving, and memory (Dignath & Buttner, 2008; EEF, 2019; Hattie, 2009).
- Metacognitive skills can help students to **transfer** what they have learnt from one context to the next, or from a previous task to a new task. The teacher can support this by explaining how what has been learnt from one task can be applied to the next.

What are the misconceptions of metacognition?

- **Metacognition is always deliberate**. Many metacognition researchers highlight the **conscious**, **deliberate** nature of metacognition. An alternative approach is to say that less conscious, automatic processes are also metacognitive. For example, a learner may check work for errors as they write, out of habit, with little awareness that they are doing so until an error is identified. The notion of automatic or **implicit metacognition** may cause further difficulties in distinguishing cognitive from metacognitive processes. However, it has led to more sophisticated models of metacognition, particularly in the area of metacognition in young children (Whitebread et al., 2009).
- **Metacognition is for older students**. In contrast to the view that metacognitive skills emerge at the age of 8 to 10 years old, Veenman & Spaans (2005), Whitebread & Pino-Pasternak (2010) and Larkin (2010) document a number of studies which indicate evidence of **young children's metacognitive abilities**. Findings include children as young as 18 months demonstrating error-correction strategies, 5 to 6-year-old children showing understanding of memory processes, and 3 to 5-year-olds exhibiting a wide range of verbal and non-verbal indicators of metacognitive processes in nursery and reception classrooms. These studies demonstrate that although young children may not be able to describe the metacognitive processes they are exhibiting, it does not mean that these processes are not occurring.

Practical tips:

How can schools make the best use of metacognition?

- Prioritise **professional development** in metacognition. There should be an explicit focus on teaching both cognitive and metacognitive techniques, and how to create a learning environment that supports the development of metacognitive skills and motivation. Encourage teachers to work together and **share practice** that promotes the development of metacognitive abilities in the classroom. For example, a group could meet regularly to reflect on a reading about metacognition or to share their experiences of implementing a new strategy.
- Support teachers in **encouraging metacognitive practices** at school. For example, exam wrappers are worksheets that learners complete before and/or after they receive test feedback. These include questions to help learners to reflect on the processes of planning, monitoring and evaluation when preparing for and sitting the test.

- Embed metacognitive strategies in **high-quality subject teaching** rather than as decontextualised generic skills training (EEF, 2019).
- Involve the whole school community in **promoting metacognitive talk**. Monitoring and evaluating performance and using learning strategies effectively is not only helpful in the classroom, but also in the wider school and beyond.
- **Evaluate the impact** of new strategies that are implemented, whether these are tried across the whole school or by individual teachers or departments (see *Getting Started with Evaluating Impact*).

How can teachers make the best use of metacognition?

- Make **learning goals explicit** and help students to plan strategies and ways of monitoring their progress towards achieving these goals. For example, encourage **self-assessment** against learning goals and redrafting of work as necessary to reach these goals.
- Help students to understand their mid- and long-term goals. As well as metacognitive knowledge and regulation, learners need to employ motivation strategies such as **deferred gratification** to make sure they learn successfully (EEF, 2019).
- Plan for **progression** in the teaching of new metacognitive strategies, starting with activating prior knowledge and explicit strategy instruction, and ending with independent practice and structured reflection (EEF, 2019). Try to keep learners within their zone of proximal development (ZPD) – see *Education Brief: Active learning*. Scaffolding should be gradually reduced so that eventually learners are able to employ the metacognitive strategy independently. Learners should also be able to choose which strategy to employ in a new context, or when another strategy is not working.
- **Model** the use of metacognitive strategies by thinking aloud. This could be related to metacognitive knowledge, e.g. What do I know about this task? Have I done a task like this before? Which strategies worked in the past on a task like this? Or, **metacognitive talk** could be related to metacognitive regulation, e.g. the teacher talking aloud while monitoring and evaluating what they are doing. Similarly, model the **transfer** of strategies across different domains of the school curriculum. For example, what strategy have I learnt in mathematics that would help me with this problem in geography?
- Try **reciprocal teaching** in reading. This is one of the most well-known reading interventions that uses a metacognitive approach (Palincsar & Brown, 1984). This involves teachers working with small groups of learners and modelling the use of four key strategies: summarising, questioning, clarifying and predicting. The students are then asked to teach these strategies to other students.
- Use **artefacts or visual resources** to support younger children in planning, monitoring and evaluating their learning. For example, involve learners in creating 'photo-cues' – photographs of learners undertaking different learning processes – and discuss what is happening and why (Tarrant & Holt, 2016).
- Teach the **language of metacognition** by using word walls or banks (Tarrant & Holt, 2016). Make sure that the language is embedded in high-quality subject teaching.
- When **debriefing** a cognitive activity, also seek opportunities to encourage reflection and evaluation about the metacognitive strategies used.

How is Cambridge supporting schools with metacognition?

- **Syllabus design and development** is informed by research evidence about metacognition and its impact on teaching, learning and assessment. We always aspire to make sure our exams require learners to use their metacognitive skills and to apply their thinking to new contexts. As such, the synoptic nature of our syllabuses and assessment requires students to understand the whole subject rather than simply individual modules. For example, our suite of Global Perspectives courses have been designed with tools to support learners in the process towards metacognition.
- **Online resources** such as *Getting Started with Metacognition* provide teachers with new ideas and approaches that link theoretical understanding with practical classroom application.
- **Training** such as our Enrichment face-to-face and online workshops on metacognition provide the opportunity for teachers to develop their metacognitive practices further.
- **Cambridge Professional Development Qualifications (PDQs)** have been designed to encourage and support metacognitive practices in Programme Leaders and candidates.

CAMBRIDGE
International Education

Fees list: USA

October 2025 to September 2026

Introduction

In this list you will find our:
Our registration year runs from 1 October to 30 September every year. In this fees list, we refer to 'Cambridge schools' – these are schools, colleges or any other organisation registered to offer our programmes and qualifications. For the Cambridge Early Years programme we refer to 'centres'.

In this list you will find our:

- application fees
- Cambridge Pathway programme fees for:
    - Cambridge Early Years
    - Cambridge Primary
    - Cambridge Lower Secondary
    - Cambridge Upper Secondary
    - Cambridge Advanced
- Cambridge Professional Development Qualification (PDQ) fees
- Per learner registration fees for online schools
- administration fees.

Customer notice: As you may be aware we have been undertaking customer research to review our pricing structures to best support schools and learners. This research will help inform work on improvements to our offer from October 2026. We plan to share further updates with customers over the coming year.

Registering as a Cambridge International School or Cambridge Early Years Centre

Before you can offer our programmes and qualifications you must go through our approval process. This includes an approval visit, where a Cambridge representative will visit your school or centre to understand your plans and help you to register. The following application fee will apply to cover this process. The visit may be conducted remotely or in person.
We will refund a portion of the application fee if a school or a centre does not meet our standards. We keep the remainder of the fee to cover the cost of the application process.
If we need to conduct a visit to assess a school or centre's ability to extend the programmes they offer, or if a school is extending to offer our programmes online, a programme extension application fee will apply.

	US DOLLAR ($)
Application fee	3,822.00
Refund following an unsuccessful approval visit	1,274.00
Programme extension application fee	1,911.00

Programme fees

Following a successful application, schools and centres pay a yearly programme fee to access a programme. Additional programmes may be included subject to another approval process. The table below shows what programme can be included at no extra cost. For example, if a school pays the Cambridge Primary programme fee, they could offer the Cambridge Lower Secondary programme without paying an additional programme fee.

What can be included (subject to successful application)

	Cambridge Early Years programme fee	Cambridge Primary programme fee	Cambridge Lower Secondary programme fee	Cambridge Upper Secondary & Advanced programme fee	Cambridge Professional Development Qualifications programme fee
Cambridge Early Years	•				
Cambridge Primary		•	•		
Cambridge Lower Secondary		•	•	•	
Cambridge Upper Secondary				•	
Cambridge Advanced				•	
Cambridge PDQ	•	•	•	•	•

Cambridge Early Years

Programme fee	US DOLLAR ($)
Centres that do not offer other programmes of the Cambridge Pathway will pay:	
Centres renewing their registration, or registering for the first time before 31 Dec	3,273.00
Centres registering for the first time part way through the registration year:	
from 1 Jan to 31 Mar	2,455.00
from 1 Apr to 30 Jun	1,637.00
from 1 Jul to 30 Sep	819.00
Centres that offer other programmes of the Cambridge Pathway will pay:	
Centres renewing their registration, or registering for the first time before 31 Dec	1,965.00
Centres registering for the first time part way through the registration year:	
from 1 Jan to 31 Mar	1,474.00
from 1 Apr to 30 Jun	983.00
from 1 Jul to 30 Sep	492.00

Cambridge Primary and Cambridge Lower Secondary

Programme fee	US DOLLAR ($)
Schools renewing their registration, or registering for the first time before 31 Dec	5,515.00
Schools registering for the first time part way through the registration year:	
from 1 Jan to 31 Mar	4,137.00
from 1 Apr to 30 Jun	2,758.00
from 1 Jul to 30 Sep	1,379.00

Cambridge Upper Secondary and Advanced

Programme fee	US DOLLAR ($)
Schools renewing their registration, or registering for the first time before 31 Dec	11,302.00
Schools registering for the first time part way through the registration year:	
from 1 Jan to 31 Mar	8,477.00
from 1 Apr to 30 Jun	5,651.00
from 1 Jul to 30 Sep	2,826.00

Cambridge Professional Development Qualifications (Cambridge PDQs)

Registered Cambridge schools: access to the Cambridge PDQ programme is included in the Cambridge Primary, Cambridge Lower Secondary, and the Cambridge Upper Secondary and Advanced programme fees following a successful approval application.

Programme fee	US DOLLAR ($)
Schools renewing their registration, or registering for the first time before 31 Dec	11,302.00
Schools registering for the first time part way through the registration year:	
from 1 Jan to 31 Mar	8,477.00
from 1 Apr to 30 Jun	5,651.00
from 1 Jul to 30 Sep	2,826.00
Online Programme Leader Course Fees	
Online Programme Leader Induction course (11 weeks)	447.65
Online Programme Leader Extension course (6 weeks)	246.25
Online Programme Leader Induction course with delivery materials (from Oct 2025)	593.25
Online Programme Leader Extension course with delivery materials (from Oct 2025)	326.30
Resubmission of the programme plan and rationale for Online Programme Leader courses	120.90 per module

Qualification fees (per exam entry)	
PDQ Certificate (Module 1) – Syllabuses starting with the number 6	421.00
PDQ Certificate (Module 1) – Syllabuses starting with the number 5	484.20
PDQ Diploma (Module 2) – Syllabuses starting with the number 6	252.60
PDQ Diploma (Module 3) – Syllabuses starting with the number 6	252.60
PDQ Diploma (Module 2 + 3) – Syllabuses starting with the number 5	505.20

Please note the Annual Waiver threshold that relates to programme fees charged in October 2026 is being reviewed. The Annual Waiver threshold that relates to programme fees charged in October 2025 can be found in our 2024/25 fees lists. Please see the customer notice in the Introduction section of this document for more details on the customer research and review we are undertaking.

Per learner registration fees for online schools

Cambridge schools registered as online or approved to offer Cambridge Primary, Lower Secondary or Upper Secondary and Advanced programmes online must pay a learner registration fee per student. We will invoice you for this fee based on the data you provide to us. If you do not submit your learner numbers by the due date, we will charge a 30 per cent increase on the learner registration fee. The amount you must pay at this increased rate will be based on student numbers you submitted the previous year. We cannot adjust your invoice once we have issued it. If you do not submit your learner numbers for two years in a row, we may withdraw your centre status and terminate our Agreement with you.

	US DOLLAR ($)
Schools renewing their registration, or registering for the first time before 31 Dec	46.50 per learner
Schools registering for the first time part way through the registration year:	
from 1 Jan to 31 Mar	34.90 per learner
from 1 Apr to 30 Jun	23.25 per learner
from 1 Jul to 30 Sep	11.65 per learner

Administration fees

You can find fees for results services, post-results services and late entries below. After the final entry closing date, we will charge late fees for any new entries you make, as well as for any entry amendments or syllabus changes. For more information about these services please see the Cambridge Handbook.

	US DOLLAR ($)
Late entries (in addition to the normal syllabus fee)	73.55 per entry, per subject
Very late entries (in addition to the normal syllabus fee)	183.90 per entry, per subject
Results services	
Duplicate results – whole school	103.10
Duplicate results – broadsheet only	68.90
Duplicate results – additional fee for despatch by courier	89.60
Priority results information	99.15
Priority results information – additional fee for extra copy	27.60
Priority results information – additional fee for despatch by courier	89.60

Fees list: USA – October 2025 to September 2026 (continued)

Post-results services	
Certifying statement search fee	99.15
Certifying statement – additional fee for extra copy	27.60
Certifying statement – additional fee for despatch by courier	89.55
Certifying statement – additional fee for authentication per statement	351.95
Replacement certificate – candidate/centre details change requested after the issue of certificates	99.15
Replacement certificate – additional fee for despatch by courier	89.55
Replacement statement of results – candidate/centre details change requested after the issue of statements of results	99.15
Replacement statement of results – additional fee for despatch by courier	89.55
Verification of results	44.00
For Enquiries about Results (EARs) services for Cambridge IGCSE™ and International AS & A Level	*See table below*
Recalculation of Cambridge ICE or the Cambridge AICE Diploma (non-refundable fee)	
For the first five candidates	238.75
For each additional candidate	24.00
EARs service for Cambridge Professional Development Qualifications: Service 3 – Review of marking and clerical re-check, with detailed report on syllabus assignment (fee per candidate)	137.70
Appeals against enquiries about exam results outcomes Stage 1	343.75
Appeals against enquiries about exam results outcomes Stage 2	412.15

Enquiries about results (EARs)			US Dollar ($)
		Cambridge IGCSE™	**Cambridge International AS & A Level**
Service number	**Description**	**Component fee**	**Component fee**
1	Clerical re-check (fee per candidate)	37.35	41.40
1S	Clerical re-check with a copy of the script (fee per candidate)	81.40	82.50
2	Review of marking and clerical re-check (fee per candidate)	86.80	103.10
2S	Review of marking and clerical re-check with a copy of the script (fee per candidate)	130.80	148.70
5	Re-moderation of the school's coursework marks for a component, together with a report on the assessment of the candidates' coursework (fee per cohort)	495.30	573.50
9	Report on the work of a group of candidates Note: The report is for the information of teachers only and does not involve any review of marking For the first five candidates: For each additional candidate up to maximum 15:	 452.90 63.10	 507.90 82.60

10	Review of selection of evidence – for portfolio of evidence route A review of the choice of the pieces of evidence included in the candidate's portfolio to check that the pieces of evidence chosen meet the criteria for selection in our published portfolio of evidence guidance (fee per candidate)	173.60	206.10

Other fees

Fees for publications, merchandise, consultancy on curriculum, assessment design and school improvement are available on request.

Refund of fees

We only refund fees if you let us know about the withdrawal of a candidate before the published entry closing date. We issue refunds after the end of the exam series. More information is in the Cambridge Handbook at www.cambridgeinternational.org/examsofficersguide

Taxation

Fees are net of local taxation. All fees are payable without deduction for any taxes; all sums payable to us shall be increased to the extent necessary to provide us with the same net amount we would have received if no such taxes had been applicable to those fees.

Invoicing and payment

We email invoices to your designated Finance contact at your school or centre. To update or change this information, please contact us at info@cambridgeinternational.org

Learn more

You can find out more about the stages of the Cambridge Pathway on our website.

About this guide

This guide explains what you need to know about your Cambridge International AS Level Global Perspectives & Research 9239 course and examinations.

This guide will help you to:

- ✓ understand what skills you should develop by taking this AS Level course
- ✓ understand how you will be assessed
- ✓ understand what we are looking for in the answers you write and the coursework you produce.

Following a Cambridge International AS Level programme will help you to develop abilities that universities value highly, including a deep understanding of your subject; higher order thinking skills (analysis, critical thinking, problem solving); presenting ordered and coherent arguments and independent learning and research.

Studying Cambridge International AS Level Global Perspectives & Research will help you develop a set of transferable skills. These include critical thinking, deconstructing and differentiating arguments, evaluating claims and developing strong reasoning. Learners can apply these skills across a range of subjects and complex real-world issues. These skills will equip you well for progression to higher education or directly into employment. In particular, studying Cambridge International AS Level Global Perspectives & Research will help you to be:

confident, explaining, analysing and evaluating global issues and communicating arguments

responsible, researching extensively and selecting suitable material from a globally diverse range of sources, directing their own learning

reflective, developing a critical awareness of their personal standpoint and how that impacts on their response to different opinions and diverse ways of thinking

innovative, thinking creatively to propose solutions to issues

engaged, working collaboratively to develop each individual's potential in pursuit of a common goal.

1. Syllabus content - what you need to know

This section gives you an outline of the syllabus content for this course. The aims of the course are to help you to:

- acknowledge and understand the diversity of perspectives on global issues
- develop the ability to evaluate claims and evidence
- make independent judgements supported by reasoning and evidence, and understand the importance of justifying your own opinions
- become an effective researcher, using appropriate sources to support judgements and understanding of research processes
- develop your ability to reflect on your own learning and judgements and on your work with others
- develop a range of effective written and spoken communications skills.

Make sure you always check the latest syllabus, which is available from our public website.

Prior knowledge

We recommend that learners starting this course should have completed a course in English equivalent to Cambridge IGCSE™ or Cambridge O Level First Language English.

Skills overview

As a Cambridge AS Level Global Perspectives & Research learner, you will have opportunities to gain and apply a range of skills to support you in these challenges, including:

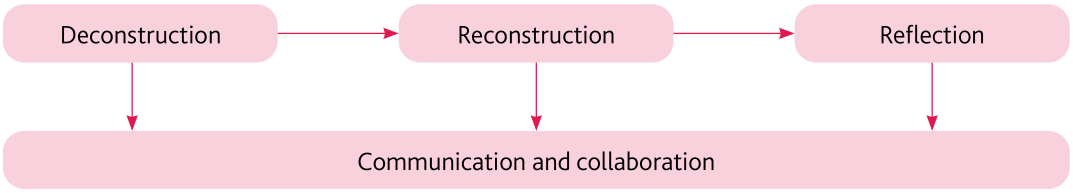
- thinking skills of analysis, evaluation and synthesis through considering a range of global topics
- independent enquiry and learning about appropriate research methods and methodology
- developing research, reasoning and communication skills systematically, using an approach called the Critical Path
- working both independently and collaboratively, with respect for and understanding of different cultures and perspectives.

Cambridge International AS Level Global Perspectives & Research has a strong focus on the acquisition of skills rather than the learning of knowledge. You will develop skills that will be useful for further study, work and as an active citizen of the future.

The Critical Path

The Critical Path is an approach to teaching and learning that will provide you with a systematic way of developing the skills of research, reasoning and communication. By using the Critical Path you will develop the ability to deconstruct and reconstruct arguments about global issues through personal research and interrogation of evidence.

Deconstruction is the first step on the Critical Path and involves breaking down topics into smaller areas through analysis. At this stage in the process you might ask questions such as:



- what issues arise from this topic?
- what are the different points of view?
- who is saying what, where and why are they taking that point of view?

Reconstruction is the second step on the Critical Path and involves synthesising or combining different arguments and evidence into coherent perspectives.

Reflection is the final step on the Critical Path and at this point you will consider what you think and why, and how has your viewpoint changed. During the reflection stage you will also reflect upon your own performance as an effective researcher and collaborative team member.

The Critical Path is underpinned by the skills of communication and collaboration. You will be required to communicate in different ways such as written and oral communication. Collaboration may be seen as a form of interpersonal communication arising from team work.

The Critical Path

The Critical Path is best seen as a sequence of repeated steps, which need to be practised. Each time you repeat the process you will be improving your ability to apply the transferable skills that are at the heart of the Global Perspectives & Research course.

2. How you will be assessed

Cambridge International AS Global Perspectives & Research makes up the first half of the Cambridge International A Level course and provides a foundation for the study of Global Perspectives & Research at Cambridge International A Level.

About the examinations

You will be assessed through the completion of three compulsory components:

- Component 1 – Written Exam
- Component 2 – Essay
- Component 3 – Team Project.

About the components

Component	Time and marks	Details	Percentage of qualification
Component 1 Written Exam	1 hour 30 minutes 45 marks	You will answer three compulsory questions based on sources provided with the exam paper. Question 1: 5 marks Question 2: 15 marks Question 3: 25 marks	36% of the AS Level
Component 2 Essay	40 Marks (your teacher will give you the deadline date)	You will write a 1750–2000 word essay based on a global issue of your own choice arising from topics studied during the course. You must choose an essay title that is a single question. Your choice of essay question must provide opportunities to develop globally contrasting perspectives.	32% of the AS Level
Component 3 Team Project	40 Marks (your teacher will give you the deadline date)	You will work in teams of two to five members to identify a local problem that has global relevance. Each team member researches the problem from a distinct perspective and suggests a solution based on their research findings. **Presentation** (30 marks) You will present your individual research and proposed solution to the problem in a presentation (maximum of 10 minutes in length). **Reflective paper** (10 marks) You will write a reflective paper (maximum of 800 words) focusing on your experience of team work and the learning gained from completing the project.	32% of the AS Level

About each component

It is important that you understand the requirements of each component and how you should approach them. A general introduction is below:

Component 1 – Written Exam

This is a formal examination. You will be provided with two source documents both of which will be approximately 500 words in length. The source documents may present different perspectives on an issue of global significance. You should spend 15 minutes reading the documents. You must answer all the questions on the exam paper.

Note that for the example below Q1(a) is worth 3 marks and Q1(b) worth 2 marks. On the exam paper the marks could also be awarded as Q1(a) being worth 2 marks and Q1(b) being worth 3 marks.

Question 1 (5 marks) is a structured question based on the two source documents. You are required to read both sources and answer short questions that demonstrate AO1 skills. An example of a Question 1 is below:

> **1 (a)** Identify **three** development projects that have been successful in Malawi according to the author of Document A. **[3]**

To answer Question 1a, you will need to refer to Document A.

This is a short-answer question asking you to identify three elements of Document A.

One sentence for each identification is enough, there is no requirement to explain.

The answer must come from Document A and not your own knowledge.

> **1 (b)** Identify **two** ethical problems associated with foreign aid according to the author of Document B. **[2]**

To answer Question 1b you will need to refer to Document B.

This is a short-answer question asking you to identify two elements of Document B.

One sentence for each identification is enough, there is no requirement to explain.

The answer must come from Document B and not your own knowledge.

Question 1 will always have two parts, one worth two marks and the other worth three marks. You should spend around 8 minutes answering Question 1.

Question 2 (15 marks) requires a longer response based on Document A. You are required to focus on the evidence in the document and demonstrate AO1 skills. An example of a Question 2 is below:

> **2** Assess the strengths and weaknesses of the evidence used by the author of Document A to support her argument that foreign aid programmes benefit sub-Saharan Africa.
> In your answer, explain the impact of the evidence on the author's perspective. **[15]**

Question 2 requires you to refer to both strengths and weaknesses of evidence.

You should make explicit reference to Document A when answering the question.

In each paragraph you should:

- identify evidence from Document A
- explain why the evidence is strong or weak (a piece of evidence may contain both strengths and weaknesses)
- explain how the strength or weakness will impact the overall argument put forward by the author.

Question 2 will always refer to Document A and will always be focused on evidence. You should spend around 25 minutes answering Question 2.

Question 3 (25 marks) requires a longer, essay response based on the two source documents. You are required to focus on the arguments and perspectives given in the documents and provide a reasoned judgement, demonstrating both AO1 and AO3 skills. An example of a Question 3 is below:

> **3** The two authors present different arguments and perspectives about foreign aid programmes. Evaluate the arguments and perspectives of both authors. In your answer, include a reasoned judgement about whether one argument is more convincing than the other. **[25]**

Question 3 requires you to identify, analyse and compare the perspectives of each document and the key components of their respective arguments.

You are also required to evaluate the arguments presented before arriving at a final judgement as to which document is stronger or more convincing.

You should make explicit reference to both documents when answering the question.

This question also assesses your communication skills and requires that you present a clear, well-structured and logical argument.

In each paragraph you should:

- identify key components of argument or evidence from Document A or B
- explain why this key component makes Document A or B more convincing than the other. It is a good idea to arrive at intermediary conclusions throughout your answer before presenting your final conclusion.

Question 3 will always require you to evaluate Document A and Document B in order to arrive at a judgement as to which author's argument is more convincing or stronger. You should spend around 42 minutes answering Question 3.

Component 2 – Essay

You will devise your own title question that addresses an issue that arises from one of the topics you have studied.

The essay should be between 1750–2000 words.

In the essay you will demonstrate AO1, AO2 and AO3 skills.

You will need to devise a question that sets up a debate between two contrasting perspectives.

Your essay should be informed by varied research using sources that are globally diverse.

You should make links between your source materials to build two coherent perspectives.

The implications of your question should be considered with reference to a globally diverse range of locations.

You must critically evaluate your source material and justify its appropriateness but also recognise any weaknesses it may contain.

After critically evaluating both perspectives presented you should present a conclusion that follows on logically from the debate presented.

Your essay should be clearly communicated and well-structured and all sources used should be clearly cited and referenced in a bibliography.

Your response should be balanced and each perspective treated fairly and evenly.

You should reflect on the work carried out and how engaging with contrasting perspectives has shaped your viewpoint.

Finally, you should make a specific suggestion for further research that is relevant to the essay presented.

Component 3 – Team Project

You will work in teams of two to five members to identify a local problem that has global relevance. The team must outline their local problem in a single statement that allows different team members to address the problem from different perspectives.

You will record an individual presentation (maximum of 10 minutes in length) that argues for your distinct solution to the problem chosen by the team.

You will also write an individual reflective paper (maximum 800 words).

Presentation

Your presentation should offer a full analysis of the team's problem which is supported by local and global research.

Your presentation will demonstrate AO1 and AO3 skills.

Your presentation should both evaluate and make links between source materials.

You will need to demonstrate the effectiveness of your proposed solution with reference to supporting evidence.

Your presentation should be coherent and well-organised, making clear links between points as your argument progresses.

Your presentation should use methods of visual representation that support the argument and evidence.

You should use language effectively making the presentation engaging for the audience.

Reflective paper

You must evaluate the effectiveness of your team's collaboration, considering which aspects worked well and which aspects were less successful.

You will demonstrate AO2 skills.

You should also reflect on what you have learned from the project, this should include; the impact of other perspectives on your viewpoint; what you have learned about the issue and what you have learned about working as part of a team.

3. What skills will be assessed

The examiners take account of the following skills areas (**assessment objectives**) in the examinations:

- AO1 Research, analysis and evaluation
- AO2 Reflection
- AO3 Communication

You will find explanations of some words in the **Glossary** at the end of this guide.

Assessment objectives (AO)	What does the AO mean?	
AO1 Research, analysis and evaluation	• identify and analyse arguments, evidence and perspectives • synthesise and evaluate arguments, evidence and perspectives • locate through research a range of appropriate sources and perspectives • use research to support judgements about arguments and perspectives	Find a diverse range of relevant research material. Through analysis identify key arguments and evidence. Make judgements about the quality and appropriateness of research material. Make links between source materials to develop broad and coherent perspectives. Conclusions and solutions should be supported by the research materials selected.
AO2 Reflection	• acknowledge different perspectives and evaluate their impact on the learner's own standpoint • consider the extent and limits of the learning and research that has been undertaken • reflect on and evaluate the effectiveness of collaboration with others	Reflect upon how your viewpoint has been impacted by engaging with different perspectives. Reflect upon what you have learned, this could be knowledge or skills. Reflect upon the limitations of your research and consider how it might be improved or further developed. Reflect upon the process of working as a team, considering what worked well and what aspects could have been improved.
AO3 Communication	• produce structured, written arguments using appropriate terms and referencing where applicable • produce a structured presentation using language appropriate for the audience • communicate information visually in order to engage an audience	Organise essays and longer examination responses in a logical and balanced manner. Write a conclusion that reaches a supported judgement. Ensure that your presentation is well-organised and that it clearly communicates the argument you are presenting. The combination of oral and visual elements should complement one another and engage the audience rather than confuse.

It is important that you know the different weightings (%) of the assessment objectives, as this affects how your work will be assessed.

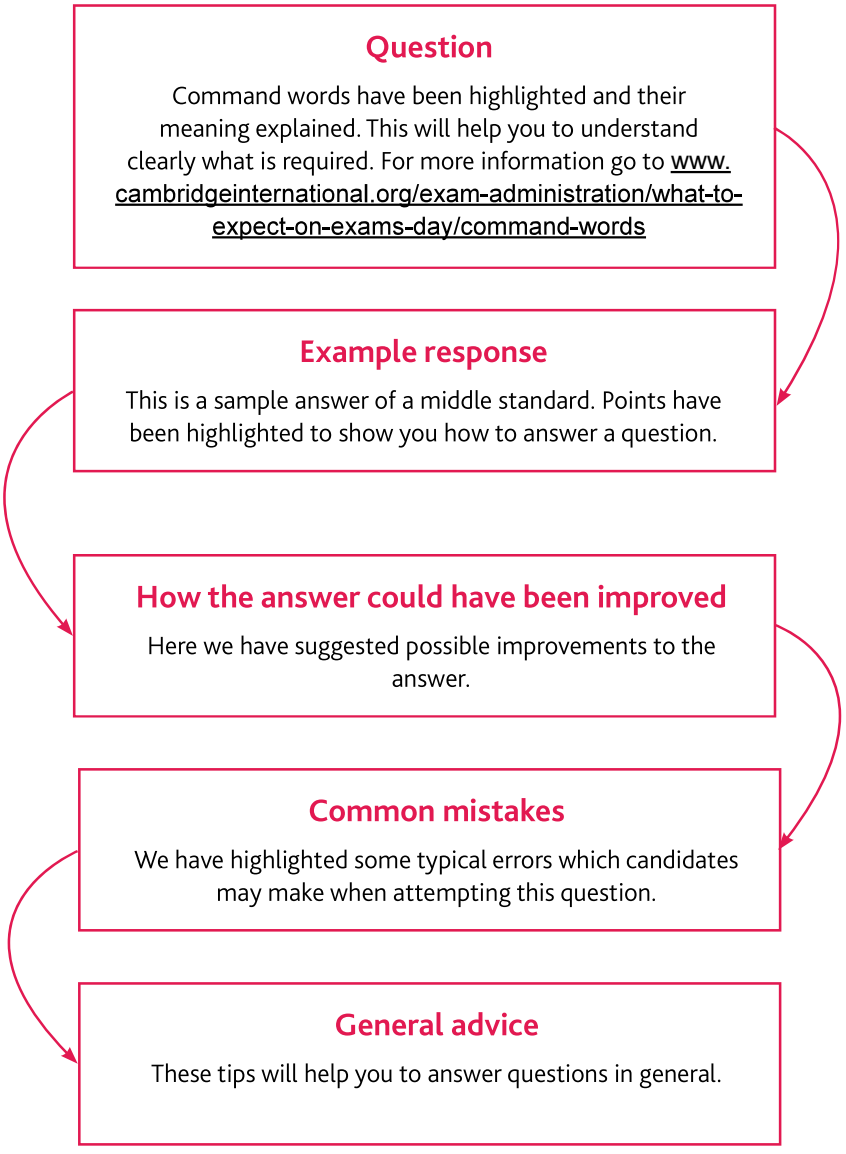
Assessment objective	Component 1 %	Component 2 %	Component 3 %	Weighting at AS Level %
AO1 Research, analysis and evaluation	89	63	40	65
AO2 Reflection	-	22	25	15
AO3 Communication	11	15	35	20
Total	100	100	100	100

4. Command words

The table below includes command words used in the assessment for this syllabus. The use of the command word will relate to the subject context.

Command word	What it means
Assess	make an informed judgement
Compare	identify/comment on similarities and/or differences
Contrast	identify/comment on differences
Demonstrate	show how or give an example
Develop	take forward to a more advanced stage or build upon given information
Evaluate	judge or calculate the quality, importance, amount, or value of something
Explain	set out purposes or reasons / make the relationships between things evident / provide why and/or how and support with relevant evidence
Identify	name/select/recognise
Justify	support a case with evidence/argument

Phrases such as 'To what extent…?' and 'Make an overall judgement' may also be seen in the assessment for this syllabus.



As well as understanding the command words for each question, you should also make yourself aware of how many of your marks are for AO1, AO2 and AO3 skills so that you answer the question or complete the project appropriately.

5. Example response

This section takes you through an example essay for Component 2. It will help you to understand what is required when researching and writing your essay. Understanding the different criteria you will be assessed against will help you to structure your essay more effectively.

All information and advice in this section is specific to the example essay being demonstrated. It should give you an idea of how your essay might be viewed by an examiner. In your own essay, you will need to focus carefully on the issue you have chosen to research.

This section is separated as follows:

Component 2 – Essay

Example response	Examiner comments
Topic: *Human Rights* *Are governments effectively working towards limiting hate crimes?* 1 *Imagine participating in a protest and all of a sudden paint is being thrown all over you. That is exactly what happened to Vitalina Koval. She was participating in a protest on International Women's Day on March 2018 in Ukraine when six people from a radical group called "Karpatska Sich" drenched her in red paint. "The paint ended up getting into her eyes and caused chemical burns. Vitalina was attacked for speaking up for her and other's rights at the protest." (Amnesty, 2018, 2) When questioned she stated "I've been attacked so many times but I'm not afraid anymore". What Ms. Koval experienced was a hate crime.* 3 *Hate crime can be defined as "a criminal offence committed against a person, property, or society that is motivated, in whole or in part, by the offender's bias against a race, religion, disability, sexual orientation, or ethnicity/national origin." (National Institute of Justice, 2018, 4) Sadly, crimes like the one committed to Vitalina Koval happen all around the globe. In the United States, "more than 7,100 hate crimes were reported in 2017." (The Guardian, November 2018) In the United Kingdom, the number of hate crime victims reported in 2012 was 7,164. (Who is hosting This, 2019).* *However, the focus of this research is on the issue of whether governments are doing enough to limit hate crimes. It is important to look at what the different governments are doing to deal with the ethical issues associated with the hate crimes against the different religions; social issues, dealing with the LGBTQ+ community; and the cultural issues related to hate crime based on race. The research will be comparing the policies and actions of the different governments in the United States and the United Kingdom, 5 to see what each country is doing to solve the issue and whether the solutions are effective.* *In the United States, there are laws and acts against hate crime at the federal level but each state has its own local laws when dealing with specificities of hate crimes. The National Association for the Advancement of Colored People* 6	1 The title sets up a debate. There is clear potential for contrasting perspectives regarding how effective governments are at limiting hate crimes. 2 The citation is clear; however, the full reference is not easily found in the bibliography. 3 The introduction is presented in an engaging style but the reader as yet does not know what the debate will be about. 4 Again the citation is clear but the reference is not easily found in the bibliography; therefore, referencing is not accurate. (AO3) 5 Outlines the implications of the focal question. The debate is going to be located in the UK and the US. (AO1) 6 The candidate engages with a relevant source and demonstrates reasonable understanding. (AO1)

Example response	Examiner comments
(NAACP) is a non-profit organization that is working to secure equality of rights in order to eliminate discrimination against race. Their argument is that some states do not have comprehensive laws and four states (Georgia, Indiana, Utah, and Wyoming) do not have any hate crimes laws on the books and that needs to change in order to prevent hate crimes. They have stated that "Hate crime totals for the 10 largest cities rose for four straight years to the highest level in a decade". (NAACP, 2018) The above statement argument is credible because the information is coming from an organization that has been around since 1909 advocating for equality of rights. The president of the organization, Derrick Johnson, received training through fellowships with the Congressional Black Caucus Foundation, the George Washington University School of Political Management, and the Massachusetts Institute of Technology. In addition, he is a guest lecturer at Harvard Law School speaking about social movements and also a professor at Tougaloo College. His experience along with the reputation of the organization itself, allows his argument to be seriously taken into consideration. 7 Concurrently, 8 in the United Kingdom, a fact-checking charity organization, "Full Fact, reported that "There was a "clear spike in hate crime" around the time of the EU referendum," and racial and religious offences "were 44% higher in the month following the referendum result compared to the same month in the previous year." This data supports the argument that the government is not doing enough because hate crime rose substantially in the past year. (Full Fact, 2018) The information provided by this organization is considered reliable as they have established a reputation as being objective and without bias. 9 They do not take sides on any issue. Recently, the Guardian newspaper article of Mar 22, 2019, stated that "Anti Muslim hate crimes soared in the UK after the Christchurch shootings. 10 In New Zealand by almost "593%." (Vikram Dodd, 2019) While these sources have argued that government is not doing enough, others like (Home Office, 2018) have made the argument that "Trends over the longer term suggest reductions in the number of hate crime incidents." They	7 The candidate justifies the appropriateness of the source material. The provenenace of the organisation and the credibility of D Johnson are used to support the appropriateness of using this source. (AO1) 8 The use of discursive markers, such as concurrently, help structure the essay and guide the reader through the debate. (AO3) 9 Here the justification of the source is merely assertive. The reader is not told why objectivity makes the source appropriate. 10 By linking the evidence from the 'Full Fact' with the evidence from the 'Guardian' (written by Dodd) the candidate is synthesising source material into a more coherent perspective. The referencing of Dodd is effective and the citation is easily found in the bibliography – see point 23. (AO1/AO3)

Example response	Examiner comments
have indicated that the recent laws being implemented are helping to limit hate crimes.[11] Baroness Susan Williams of Trafford, Minister of State for Countering Extremism and Parliamentary Under Secretary of State, in an article, 'Government Launches New National Hate Crime Awareness Campaign' explained that government is serious about the subject and believes that a better understanding by the populace about what constitute hate crimes should result in tolerance and thus a decrease in this activity. Laws enacted in the UK like the Criminal Justice and Public Order Act Of 1994 and the Racial and Religious Hatred Act of 2006 have served to cover and includes more offences as hate crimes. (Baroness Susan Williams of Trafford, 2018)[12] The United States Department of Justice under President Obama signed into law on October 28, 2009 'Hate Crime Law'. Called The Hate Crimes Prevention Act, which "removed then existing jurisdictional obstacles to prosecutions of a certain race- and religion-motivated violence and added new federal protections against crimes based on gender, disability, gender identity, or sexual orientation". (Hate Crime Laws, 2019) The Act gives the justice department the power to investigate and prosecute anyone who chooses the victim of their crime based on race, colour, gender, disability, etc, etc.. This law is an expansion of the National Defense Authorization Act. Over many years, a number of laws against hate crimes have been created in the United States but unfortunately, there are still too many instances of such crimes.[13] Human Rights Campaign has taken the view that even though there are laws in place, hate crimes continue unabated. 'In 2017, 1,130 hate crimes were based on sexual orientation bias and 119 on gender identity bias. These numbers reflect a five percent increase in reporting of hate crimes motivated by sexual orientation bias and a four percent decrease in reporting of hate crimes motivated by gender identity bias. Hate crimes motivated by anti-religious bias increased 23 percent, largely driven by a 37 percent increase in anti-Jewish hate crimes. The FBI reported that anti-Black hate crimes increased by 16 percent, from 1,739 incidents in 2016 to 2,013 incidents in 2017. Every other racial and ethnic group also saw increases in the number of reported hate crimes in 2017.[14] (Human Rights Campaign, 2018)	[11] The essay moves to the contrasting perspective without a clear discursive marker. The strucuture of the essay is not helping the reader to follow the debate. (AO3) [12] The candidate continues to engage with a range of appropriate sources. However, the understanding of the source material is not always well-developed. (AO1) [13] More evidence is presented but there is no clear development of a perspective. It is not clear which perspective this evidence is supporting. [14] The evidence is relevant but it is presented without explanation. The engagement with the source material lacks development. (AO1)

Example response	Examiner comments
It is a fair point to conclude that both governments have made efforts to limit hate crimes. However much more needs to be done to effectively tackle this monster. Many hates crimes begin with hate speech and this is one area which is complex. In the United States, the first amendment allows for freedom of speech and many people use this right to defend hate speech. They complain that their right to free speech is being curtailed. The government is sometimes conflicted trying to protect free speech and protecting the victims of hate speech. 15	15 There is some limited evaluation of one of the perspectives. Phrases such as 'tackle this monster' are not appropriate and do not demonstrate strong communication skills.
In recent times the rhetoric by the government has not been helpful in limiting hate crimes even though there are still laws in place. With the popularity of smartphones and other electronic devices, we are seeing first-hand the many instances of hate speech and crimes. We are also witnessing the results of such cases brought before the courts. In most cases, there is further public outrage due to the many not guilty verdicts. Today, more than ever before, the media is highlighting these cases of hate crime, people are more aware, more involved in the discussion but hate crimes continue. 16	16 The candidate attempts to consider the implications of the question in terms of communication technology developments. However, there is no citation and the claim made is merely an assertion.
After assessing both sides of the argument put forward, the sad truth is, hate crimes are still happening, far too often and the numbers are frightening. I appreciate the fact that new laws are being made to educate the people but more needs to be done to effectively limit hate crimes. People in both countries live in a climate of hatred. There are too many inflammatory statements especially by those in leadership positions and the intolerance in our discussions only serves to further divide us. There must be a condemnation of all forms of hatred and one of the top priorities of each country's government must be addressing hate crimes. 17	17 The critical comparison of contrasting perspectives is limited with very little engagement with the perspective that governments are being effective.(AO1) The essay has not demonstrated balance in considering contrasting perspectives. (AO2)
When I first started the research, I immediately took the position that more can be done to limit hate crimes. But, as I found information regarding the number of laws, acts, and bills being considered, I became conflicted. Although the argument put forward by Baroness Williams was well supported with evidence it was in the end not enough to change my initial opinion. However, what really swayed me back to my original thought was the fact that yes, bills and acts have been passed but hate crimes continued to soar. 18	18 The essay has a reflective tone and the candidate considers the impact of engaging with contrasting perspectives on their personal viewpoint. (AO2)
This research is limited because the data regarding the number of hate crimes is not accurate. Unfortunately, the government has acknowledged that many hate crimes are not	

Example response	Examiner comments
reported so they are unable to determine an exact number committed each year. However, just because the information does not depict the whole story doesn't mean that the crimes that have been recorded aren't a problem. Based on the statistics given, everyone can agree that something needs to be done because hate crime should not become the norm for any civilized society. 19	19 There is some undeveloped evaluation of statistics in relation to hate crime. However, the intermediary conclusion is not explicitly linked to the question of how effectively governments are at addressing hate crimes. At this point the essay loses focus.
When looking at the global issue of hate crime, there are often more than one perspective to consider but it's important that we view all sides so as to arrive at a full understanding of the issues. One can argue that the United States could be viewed to support the perspective that the government is not effectively tackling hate crimes because cases are rising. Also, there are states that still don't have any hate crime laws. On the other hand, 20 the United Kingdom could be viewed to support the perspective that the government is becoming more effective by introducing the National Hate Crime Awareness Campaign. When all is said and done both can do more to limit hate crimes and the sooner, we find a solution, then we can achieve some measure of global peace. On the evidence presented I conclude that governments are not effectively tackling hate crimes and much more needs to be done. 21	20 The comparison of perspectives is more developed here but does not move beyond being descriptive. (AO1) The use of discursive markers such as, 'on the other hand' are useful, they let the reader know that there is a change of perspective. (AO3) 21 The final conclusion follows on logically from the preceeding essay. However, the candidate never seemed likely to arrive at any other conclusion given the weight of evidence and argument presented to support this particular perspective. (AO1)
Although the range of source material used was credible and relevant it was largely focused on the US and the UK and this is perhaps a limitation of my research. Though I did manage to include some references to New Zealand and Ukraine for the most part my essay lacked a globally diverse range of evidence. Further research that included more diverse countries would help in forming a more widely generalisable conclusion. It would be useful to explore how governments in Africa and Asia are tackling hate crimes so as to arrive at a more holistic conclusion. 22	22 The development of further research is effective. It arises explicitly from a weakness of the essay and is both relevant and well justified. (AO2)
Bibliography Dodd, V. 23 (2019, March 22). Anti-Muslim hate crimes soar in UK after Christchurch shootings. The citation in the essay reads Amnesty 2018 (see point 2) yet the listing in the bibliography is under the name Vitalina. (AO3)

Examiner comments

Overall this is typical of an essay that would gain a middle-range mark.

The essay successfully sets up a debate between two contrasting perspectives which is a fundamental requirement. The title question also raises an issue that has the potential for contrasting perspectives. However, the title refers to how, 'effectively' governments are working towards limiting hate crime and the notion of 'effectively' is never clearly defined. Consequently, the essay does lack some focus.

The implications of the question are explored within the geographical contexts of the US and the UK. The Component 2 Essay should consider the title question beyond the boundaries of one location. However, by locating the debate within just two culturally similar countries, the range is limited.

There is some implicit synthesis of source materials (see point 10). Candidates should not treat each of their source materials in isolation, building perspectives is very much about weaving arguments and evidence together into a coherent whole. The essay could have made clearer links between source materials.

There is a range of relevant source material used to support the perspectives. Throughout the essay several sources are referenced. The candidate partially engages with their material but in some cases does not move beyond presenting data. The link between the source material presented and the title question is not always clear. Having located the debate in the UK and

US understandably the range of source material does not cover diverse global contexts. This decision has prevented the essay from being awarded higher marks.

The essay evaluates the appropriateness of two of the sources used (see point 7). It would have been better to evaluate four sources, two from either side of the debate. The candidate has considered the provenance and credibility of the organisation and key personnel respectively. This has merit, but by only using two criteria to evaluate the appropriateness of the source this limits the range.

There is some comparison of perspectives (see point 20) but this needs further development and does not move beyond description. For higher marks the comparison should really examine the strengths and weaknesses of each perspective before arriving at a final judgement. The essay never really fully supports the perspective that governments are able to effectively tackle hate crimes and this has hampered the essay throughout. This should underline the importance of framing the title question carefully.

The essay has some strong reflective qualities. The impact of r esearch and contrasting perspectives on the candidate's viewpoint are clearly expressed. There is scope for some further detail but the reflective tone is good (see point 18). T he essay also demonstrates some well thought out further research that is clearly linked to the essay and arises out of the limitations of the research identified by the candidate (see point 22).

The essay does not demonstrate a high level of communication skills. The structure of the essay needs to be more balanced. There needs to be a more logical flow to the essay and the candidate needs to use clear discursive markers to guide the reader. That said the essay does present a debate between two contrasting perspectives that is on the whole understandable. Sources are cited throughout but the citations are not easily found in the bibliography. Therefore, referencing is present, but not effective.

How the answer could be improved

To be awarded a higher mark the essay needed to be more focused. A more considered title would have helped. A better title might have been, 'Can legislation be successful in limiting hate crime?'. This would have allowed the candidate to research countries where legislation has been successful in reducing hate crimes and contrasted those with countries where legislation has not reduced hate crimes. By researching different countries' approaches to the problem of hate crime the essay would have developed a global dimension. The original essay is too narrow in its outlook with the focus located within the US and the UK with just a fleeting reference to the Ukraine.

Another way to broaden the perspectives is to take a thematic approach. The syllabus identifies seven themes although you might come up with others. They are culture, economics, the environment, ethics, politics, science and technology. The issue of hate crimes could be explored through the themes of culture (cultural clashes in multicultural society), politics (what is the potential political fallout for leaders who impose new legislation), technology (how has the rise of social media increased the amount of hate crime) or ethics (is freedom from hate crime a human right).

Engagement with the source material is important. The essay is informed by credible and relevant sources but the candidate needed to fully explain their arguments. The candidate puts forward a lot of data but should use the quantitative evidence to further the perspectives. The candidate needed to make more explicit links between the source materials and instead of treating each source in isolation. Synthesising arguments and evidence into a coherent perspective is a key skill and as such would have improved the essay.

The source material is only partially critically evaluated and then only in terms of credibility and provenance. Justifying the source materials you use is important and needs to be done with reference to a wide range of criteria. You should justify why the source you have selected is appropriate but at the same time acknowledge any weaknesses. The essay needed to be systematic in its approach to critical evaluation. You should critically evaluate four different sources, two from each perspective. Consistent citation and a clear bibliography are the fundamentals of successful referencing. This essay needs an effective relationship between the citation and bibliography.

The essay is not balanced. This is probably a result of a poorly defined title. It is important to engage fairly with two contrasting perspectives. A good essay should be presented objectively and you need to engage with perspectives that challenge your existing point of view.

Consider the structure of the essay. The example presented is not well organised and moves between different perspectives without clear signposting. If the essay had been more structured the candidate would have seen more clearly that they gave more emphasis to the one perspective. Use discursive markers such as; 'firstly', 'secondly' or 'finally'. Let the reader know that you are moving to another perspective with signposts such as; 'on the other hand', 'in contrast' or 'conversely'. Use discursive markers to demonstrate links between source materials such as, 'furthermore', 'this is corroborated by' or 'moreover'.

Common mistakes

- Not establishing contrasting perspectives. It is really important to pose a title question that offers the opportunity to build contrasting perspectives. Title questions that begin with 'how' often lead to descriptive essays. For example, 'How will the development of AI robotics impact the workforce?', is unlikely to lead to an essay with a debate between contrasting perspectives.
- No critical evaluation of source material. Sometimes candidates forget to justify the appropriateness of the source material they have selected. It is important to consider the strengths and weaknesses of source material on both sides of the debate and use a range of criteria.
- Essays without a global dimension. Examiners are looking for essays that have perspectives that are informed by evidence and argument that relate to globally diverse countries. Your research material too should be selected from globally diverse sources.
- Essays without reflection. A key part of the essay and indeed the whole course is the skill of reflection. Some candidates miss out a reflective section. It is important to consider what you have learned, how your viewpoint has been affected and suggestions for further research that derive from your essay.

General advice

- Give plenty of thought to the title question. Having chosen a topic that interests you, complete some background research to identify an issue that is contested by different points of view. Only then write your title question.
- Be methodical in your approach to research. Keep a list of all the materials you have found, this will help you have an overview to make sure that the sources are varied and cover diverse geographical contexts. It is also important to note down all research for your referencing.
- Try not to use too many sources, effective research means discarding some materials. It is difficult to engage fully with all your research material if you have too much. The essay is only 1750–2000 words so six relevant and appropriate sources should be enough.
- The essay requires careful planning. You will be assessed against a wide range of criteria and it is important to fulfil all the demands of the component in your essay.

6. Revision

This advice will help you revise and prepare for the examinations. It is divided into general advice and specific advice for each of the papers.

Use the tick boxes ☐ to keep a record of what you have done, what you plan to do or what you understand.

Component 1 – Written Exam

Preparation for the Written Exam (Component 1)

- ☐ Find out when the examination is and plan some practise evaluations. A revision timetable will help you.
- ☐ Find out how long the paper is and how many questions you have to answer.
- ☐ Know the meaning of the command words used in questions and how to apply them to the information given. Highlight the command words in past papers and check what they mean.
- ☐ Make sure you practise lots of past examination questions so that you are familiar with the format of the examination papers. You could time yourself when doing a paper so that you know how quickly you need to work in the real examination.
- ☐ Look at mark schemes to help you to understand how the marks are awarded for each question.
- ☐ Revise the key criteria used to evaluate evidence and argument.
- ☐ Practise analysis and evaluation of arguments. Opinion pieces in newspapers are a useful source for practice papers.

During the examination (Component 1)

- ☐ Read the instructions carefully and answer **all** the questions.
- ☐ Check the number of marks for each question or part question. This helps you to judge how long you should be spending on the response. You don't want to spend too long on some questions and then run out of time at the end.
- ☐ Do not leave out questions or parts of questions.
- ☐ You do not have to answer the questions in the order they are printed in the answer booklet. You may be able to do a later question more easily then come back to an earlier one for another try.
- ☐ Read the two documents carefully. The examination time of 90 minutes includes 15 minutes reading time.
- ☐ Do not assess elements of argument when answering a question about evidence. Question 2 will always be about evidence from Document A.
- ☐ As you read the documents underline or highlight evidence and key aspects of the argument. You could use one colour for evidence and another for argument.
- ☐ Your answers must come from the documents and not your own knowledge.
- ☐ Read each question very carefully. Misreading a question can cost you marks:
  - identify the command words – you could underline or highlight them
  - identify the other key words and perhaps underline them too.
- ☐ Read all parts of a question before starting your answer. Think carefully about what is needed for each part.
- ☐ Answer the question. This is very important. Make sure your answer is responding to what the question asks.

Component 2 – Essay

Before writing the Essay (Component 2)

- [ ] Write down your initial response to the issue so you can reflect on how it has changed or been consolidated when the essay is finished.
- [ ] Look at mark schemes to help you to understand how the marks are awarded.
- [ ] Revise the key criteria used to evaluate evidence and argument.
- [ ] Select an issue that raises different points of view.
- [ ] Select an issue that is globally significant.

Research (Component 2)

- [ ] Keep a research diary and in particular keep track of all the sources that you have researched. This will ensure you have accurate referencing in your essay.
- [ ] Research widely the topic you have chosen. Try and use appropriate sources that are written by globally diverse authors and published by globally diverse organisations.
- [ ] The arguments and evidence you select from your research should relate to different parts of the world.

Writing the Essay (Component 2)

- [ ] Plan the essay carefully so all the assessment criteria are addressed.
- [ ] Cite all sources as you use them and build the bibliography as you go. It is important that you use source material correctly. Quotations should be in quotation marks and clearly cited. All essays are checked for plagiarism (see the Glossary for a definition of plagiarism).
- [ ] Structure the essay so that it includes:
  - an introduction outlining the contrasting perspectives, reasons and evidence
  - different lines of argument (these could be theme based or from different countries)
  - a main conclusion and a reflective section.
- [ ] Remain balanced. Another important aspect of the essay structure is to ensure that both sides of the debate are treated evenly.
- [ ] Do not go over the 2000 word limit. The bibliography is not included in the word count.
- [ ] Proof read the essay carefully.

Component 3 – Team Project

Working with others (Component 3)

- [ ] Listening is a key communication skill. Make sure all members of the team are given the opportunity to voice their opinion.
- [ ] Start a WhatsApp group or something similar for the team. This will provide a useful way to set up meetings and record how the group is functioning.
- [ ] Base your group on a shared interest in a particular topic rather than a friendship group. This is important, as you will have to decide as a team which issue to research.
- [ ] Be flexible. As a team you will have to allocate each member with a specific area of focus from which they will have to argue for their individual solution to the issue the team identified.

Time-management / keeping a log (Component 3)

- [ ] Keep a record of what was discussed and decided at team meetings. Having a clear record of what decisions were taken is a key part of successful collaborative work.
- [ ] Make a note of your initial response to the issue and record any changes of opinion or other thoughts you have as the project progresses. This will be useful for the reflective paper.
- [ ] Record your research. Make a note of all sources used and their relevance to your final solution.

- [ ] All team members will have competing constraints on their time. Schedule meetings in advance and make sure all team members put key milestones in their calendars.

The Presentation (Component 3)

- [ ] The presentation will require effective planning. It needs to be well-organised and effective in arguing for your particular solution.
- [ ] Familiarise yourself with any IT equipment that you plan to use so that you are confident when it comes to delivering the presentation.
- [ ] Your individual presentation must not be longer than 10 minutes in length.
- [ ] Your presentation should be engaging for a person without specialist knowledge of the issue being discussed. Language choices and technical terms should be carefully thought through.
- [ ] Practise the presentation several times before the final delivery. Ensure that the audio and visual elements complement each other rather than compete with each other.

Reflection (Component 3)

- [ ] Your written reflection should be evaluative and not merely a description of what happened.
- [ ] There are two areas that your reflective paper needs to consider. Firstly, you should reflect upon the effectiveness of the team collaboration. Secondly, you should reflect upon your learning. This can include learning about the issue, learning about giving presentations or learning about working collaboratively.
- [ ] The reflective paper has an 800 word limit. You should give equal space to both of the reflective elements mentioned above.

7. Useful websites

The websites listed below are useful resources to help you study for your Cambridge International AS Level Global Perspectives & Research course.

Cambridge Assessment International Education is not responsible for the accuracy or content of information contained in these sites. The inclusion of a link to an external website should not be understood to be an endorsement of that website or the site's owners (or their products/services).

The website pages referenced in this guide of work were selected when the guide was produced. Other aspects of the sites were not checked and only the particular resources are recommended.

Developing critical evaluation skills is an important part of Global Perspectives and Research and there are several websites that offer useful advice and support:

www.nuigalway.ie/academic-skills/criticalthinking/evaluatingargumentsandevidence/#
Evaluating Arguments and Evidence – National University of Ireland Galway.

The Open University.

Developing successful approaches to research is also important:

https://warwick.ac.uk/fac/soc/ier/ngrf/effectiveguidance/research/research_skills
Warwick University.

You should engage with a wide range of research materials that emanate from around the world. Below is a short list of potential sources of information from around the world. This is not an exhaustive list; it is designed to give you a feel for the wide range of source material available:

www.scmp.com/
South China Morning Post.

www.aljazeera.com/
Al Jazeera. News and analysis from the Middle East.

www.e-ir.info/
E-International Relations is an international relations website with unique content aimed at academics, general interest readers and learners.

https://neweralive.na/
The New Era is a daily national newspaper owned by the government of Namibia.

www.cfr.org/
The Council on Foreign Relations is an independent think tank based in the US.

https://apnews.com/
The Associated Press is an independent global news organization dedicated to factual reporting.

www.thejakartapost.com/
The Jakarta Post is a daily English-language newspaper in Indonesia.

8. Glossary

Here are some terms used in Cambridge International AS Level Global Perspectives & Research, along with a short explanation.

Please note you may find more terms while you are reading, researching or looking at past papers. Look them up in a dictionary or ask your teacher and add them to your notes.

Arguments	Consist of one or more reasons that lead to a conclusion.
Assertion	An unsupported claim.
Assumptions	Reasons which are not stated but are still part of an argument.
Claim	A statement that may or may not be true.
Counter-argument	An argument which could be made to challenge another argument.
Global topics	Broad potential areas for study. Learners can use topics as starting points for identifying issues.
Issues	Specific, more narrowly defined areas within a topic that are suitable as subjects for an essay or other piece of work. An issue often has global interest or relevance and can combine specific areas of different topics or themes.
Perspective	A coherent world view which is a response to an issue. A perspective is made up of argument, evidence and assumptions and may be influenced by a particular context.
Plagiarism	Plagiarism is presenting someone else's work as your own, by incorporating it into your work without full acknowledgement.
Rhetoric	Refers to language which is primarily designed to persuade its reader or listener and often relies on stylistic attributes.
Themes	Approaches to topics or issues, for example culture, economics, the environment, ethics, politics, science and technology.

GLOBAL PERSPECTIVES AND RESEARCH

Paper 9239/11
Written Examination

Key messages

It is important that candidates read the paper carefully, paying close attention to the key words, to answer all the questions set. This applies to all questions. For example, in **Question 1(a)**: 'identify' and 'two individual musicians', and in **Question 1(b)**: 'identify', 'three other challenges' and 'cultural heritage'. In **Question 2,** the key words were 'evidence', 'strengths and weaknesses' and 'impact on the argument'; and in **Question 3**: 'perspectives', 'judgement', 'arguments' and 'stronger'.

Candidates managed their time well and allowed more time for **Questions 2** and **3**, which carry higher total marks than **Question 1**. **Question 1** only requires short answers or bullet points, and most candidates responded accordingly.

To achieve higher marks in **Questions 2** and **3**, candidates should develop their points clearly. This involves making a point, illustrating it with information or appropriate quotes from the text, and explaining it in the context of the document. Instead of just stating what a strength or weakness may be, the candidates should also explain how or why it is a strength or weakness. There should also be reflection on the impact of the evidence in **Question 2** and explicit reference to perspectives in **Question 3.**

Candidates will not gain credit for using material from their own knowledge that is not contained within the documents. Copying from the document is acceptable in the identification questions in **Question 1**, but is not appropriate for perspectives, analysis, and evaluation in **Questions 2** and **3**.

The marking approach is closely linked to the Assessment Objectives (AOs) given in the syllabus and the AOs are divided into distinct aspects. Candidates should be aware of what each question is assessing and develop their answers accordingly.

Candidates could improve in the following Assessment Objectives: **AO1b (Explanation)** in **Question 2**, and **AO1b (Perspectives)** and **AO1c (Evaluation of key components)** in **Question 3**.

General comments

Most candidates understood the documents, and many demonstrated a clear grasp of the question requirements. **Question 2** is focussed solely on the evidence in the first document, so candidates should concentrate on this aspect only. Many candidates recognised the need to explain the impact of the evidence on the author's argument in **Question 2**, reaching a reasoned judgement by the end. However, while candidates provided reasons why a piece of evidence was strong or weak, these were rarely developed into clear explanations.

In **Question 3**, it was increasingly common to find attempts to identify and describe perspectives as an introduction to the answers, which is perfectly acceptable practice.

In **Question 3**, stronger responses selected relevant and appropriate key components of argument and compared and evaluated them. These comparisons were most successful when they were direct comparisons.

© 2025

Comments on specific questions

Question 1

Question 1 encourages candidates to fully read and understand the details of both documents before answering the questions. The question paper indicates that approximately 15 minutes should be used for this, which is included within the exam time. These questions are designed to be straightforward, so answering them in order is recommended. The aim of these questions is to ensure that candidates fully understand the meaning of each document.

There are two parts to **Question 1**. **Question 1(a)** refers to Document A and **Question 1(b)** refers to Document B. Candidates are encouraged to answer both questions before proceeding to **Question 2**.

Question 1(a) asked candidates to identify two musicians who have tried to spread the Garifuna language and culture, as given by the author of Document A.

There were only two possible correct answers. Most candidates successfully identified both of them. A few candidates made mistakes by identifying some of the other people mentioned in the document, none of whom are musicians.

Question 1(b) asked candidates to identify three *other* challenges to Nigeria's cultural heritage, as given by the author of Document B, i.e., *not* 'a lack of funding' or 'the mismanagement of cultural resources'. It was important that candidates understood the idea of 'other'. Therefore, responses 'a lack of funding' and 'mismanagement of cultural resources', or ideas related to these two responses, were not correct.

Question 2

This question produced some strong responses. Most candidates correctly assessed the strengths and weaknesses of the evidence used by the author to support their argument. However, explanations for why a piece of evidence was strong or weak were often limited to terms such as 'more trustworthy,' 'expert,' or 'can't be fact-checked'. More development is required for an explanation to be credited under **AO1b**, where candidates must fully explain why a particular piece of evidence supports the claim it is intended to support. For **AO1c**, candidates must explain the impact of the evidence on the author's argument or on the reader. Candidates were better prepared for this part of the question and demonstrated skill in this assessment area. Additionally, some candidates attempted a reasoned summary judgement. The question focused on the analysis of 'evidence,' so answers that related to language or structure were not credited. Common discussion points often included the use of the statistics and survey information in the document.

Candidates were assessed on **Assessment Objective 1 (AO1 – research, analysis, and evaluation)**. The three aspects were: Identifying evidence (**AO1a**), Analysing the strengths and weaknesses of evidence (**AO1b**), and Evaluating evidence (**AO1c**). A score of 5 marks for **AO1a** was common. For **AO1b**, most candidates scored 3 marks but were unable to develop their explanations sufficiently to access the higher mark bands (4 or 5 marks). Marks for **AO1c** were much improved on previous years with many candidates scoring 3 or 4 marks.

A clearly structured approach is:

- Identifying a type of evidence (**AO1a**);
- Giving an example of that type of evidence from the document (**AO1a**);
- Clearly assessing whether it is a strength or weakness (**AO1b**);
- Providing a developed explanation of why it is a strength or weakness (**AO1b**);
- Evaluating the impact of the evidence on the argument or on the reader (**AO1c**).

The following example shows that the candidate identified a strength, quoted it and explained why it was a strength (**AO1a** and **AO1b**):

'One strength of the evidence in Document A is that it was published by a non-profit organization. The evidence for Document A was published by 'National Geographic Society,' which is a reliable and global organization. This is a strength because there are no monetary ties, meaning that the information is reliable and unbiased. This means, they do not favor a certain side which makes the evidence more persuasive and reliable.'

© 2025

For **AO1a,** the evidence is the publisher (the NGS). For **AO1b,** this evidence is declared a 'strength' as it is a 'reliable global organisation'. The explanation of this strength is further explained using a three-pronged approach. Firstly, the candidate notes that it has no monetary ties, as it is a non-profit. Secondly, it has unbiased information and so it does not favour one point of view. Thirdly, it is persuasive and reliable.

For **AO1c – Evaluating evidence**, candidates were expected to evaluate the impact of the evidence on the argument or on the reader. Answers ranged from simple assertions to some evaluation of the impact, to evaluation that included a judgement.

Many candidates scored highly on **AO1c** with more extended and detailed evaluations of the impact of the evidence on the argument. Again, a three-pronged approach was effective, for example:

'One strength is that the author named prestigious institutions such as UNESCO, and quoted people affiliated with them for example 'Andy Palacio, UNESCO Artist of Peace'. This may be considered a strength as it may make the readers understand the phenomenon of disappearing language and how it might be saved. This can be because if people working with institutions like UNESCO believe this is a real problem, it might lead to the readers believing this too. This may make the reader more open minded to the author's argument, and the possible solution presented, because they can see how both people and institutions agree with it.'

In this example, the candidate makes a more extended point and includes three ideas in their evaluation of the impact of the evidence on the argument. Firstly, readers understand the importance of the problem of language disappearing, secondly, readers are more convinced because UNESCO is taking the issue seriously, and finally, readers are more likely to be convinced by the author's argument because both people and institutions agree with it.

Question 3

The question asked candidates to evaluate the arguments of both authors and consider their perspectives. Candidates were also required to provide a judgement on whether Document A was stronger than Document B, Document B was stronger than Document A, or if they were both equally strong. Any of these conclusions are equally valid.

The most common approach was to first identify and describe the perspectives of each document and then directly compare the key components of the arguments throughout the answer. The higher scoring responses achieved this well with analysis and clear evaluation of the relative strengths of each document and were able to make a judgement as to which was stronger. There was no correct answer, and candidates were free to argue for their preferred judgement. It was also possible to evaluate the arguments of both documents separately and then provide a concluding judgement. However, this approach often led to repetition in the conclusion, and a lower mark overall.

Many candidates successfully identified and compared aspects that reflect a strength, such as the expertise of the authors, the level of potential bias, and the amount of supporting evidence provided. Responses achieving the highest marks gave clear examples from the documents and explained the impact on the overall argument, culminating in intermediate judgements. It is important that candidates exemplify the key components using the documents rather than listing pre-learned key components that might apply to any document.

There were two assessment objectives used **– AO1 (Research, analysis, and evaluation)**, which was separated into four aspects: Identify and compare key components of arguments (**AO1a**), Analyse and compare perspectives (**AO1b**), Evaluate arguments (**AO1c**), and provide a judgement about argument and perspective (**AO1d**). The second assessment objective was **AO3 – Communication.**

The highest-scoring responses adopted a structured approach to answering the question by methodically:

- Identifying, describing, and explaining the perspectives of the authors of both documents (**AO1b**),

  and then:

- Identifying and comparing key components of the argument (**AO1a**);
- Evaluating the relative strengths of the key components of the argument using appropriate examples and analysis of impact (**AO1c**);

© 2025

- Giving an intermediate judgement (**AO1d**);
- Coming to a reasoned judgement as to which argument is more convincing in a final conclusion (**AO1d**).

For **AO1b – Analyse and compare perspectives –** marks for this assessment objective were varied as some candidates did not provide any analysis of perspectives. Lower scoring responses simply identified perspectives, often from just one document. However, higher scoring responses compared, described and explained the significance of the perspectives in both documents.

The most challenging aspect of **AO1b** was identifying that the perspectives of each document were quite complex. Document A refers specifically to the use and spread of music to help save the Garifuna language, while Document B refers to specific actions which the Nigerian government needs to take in order to help protect the country's cultural heritage. It was important that candidates identified these clearly. Also, to score higher marks, candidates needed to draw some active comparison between the two perspectives.

The following is an example of a higher scoring response that correctly identified the perspectives of both Document A and B.

'The author of Document A focuses on using music to solve the problem of Garifuna's culture. She mentions their efforts to share the Garifunan culture and language through music and song. Seun Lori-Williams, author of Document B, addresses the importance of protecting cultural heritage, and provides several negative impacts that can be addressed as well as the solutions: for example, the author explained the law on cultural heritage is outdated in Nigeria. The author then provided how fixing the issue can benefit Nigeria, as amending the law can reduce cultural heritage violations by including fines and punishments for damaging heritage.'

The following is an example of a higher scoring response that described those perspectives and then drew an active comparison between them.

'Both Documents A and B are about protecting heritage and culture. However, Document B has the better argument. Document A makes a good argument as to how music, song, and dance can save Garifuna culture and language, but Document A only provides <u>one</u> solution on how to solve the problem. On the other hand, B provides <u>many</u> solutions as to how the government can help to protect Nigerian culture. For example, it explains that if the law on heritage was updated to be stricter, it would protect the culture more.'

For **3AO1a – Identify and compare key components of arguments**, many candidates gained high marks as they were able to compare a range of key components of arguments from both documents. The strongest responses provided a smaller number of well-developed comparisons. This enabled time to be used more effectively to demonstrate and develop other assessment objectives.

For **3AO1c – Evaluate Arguments**, higher scoring responses evaluated the key components of arguments that had been identified with clear illustration from the documents and made balanced reference to both documents. The following is an example of a higher-scoring response that a direct comparison of one key component, the way language is used in the two documents:

'In terms of language, Document A uses a more informal and subjective approach. Using words like 'cool' and 'masterpiece' draws the reader in, making them feel close to the topic, and making the argument more persuasive. Conversely, Document B adopts a more objective and third-person style. This objectivity allows readers to trust what is being said, making the argument more logical and therefore persuasive, but in a different way. However Document A's more audience-friendly approach may outweigh the benefits of objectivity as a thorough understanding of the topic from a closer perspective is essential for readers to get consumed.'

For **3AO1d – Judgement about argument and perspective** higher scoring responses compared key components of the argument throughout their answer. This allowed intermediate judgements to be made when both documents had been evaluated and compared. Candidates then provided a conclusion summarising the intermediate judgements they had made to come to an overall conclusion. The strongest responses concluded with comments which summarised the intermediate conclusions throughout the answer.

For **AO3 – Communication –** higher scoring responses produced a clearly written, well-structured and logical argument focused throughout on the question. Lower scoring responses produced arguments that lacked clarity, had an uneven structure, were in bullet points or did not always link answers to the question.

© 2025

GLOBAL PERSPECTIVES AND RESEARCH

Paper 9239/12
Written Examination

Key messages

It is important that candidates read the paper carefully, paying close attention to the key words, to answer all the questions set. This applies to all questions. For example, in **Question 1(a)**: 'identify', 'three different ways the processes for dealing with child migrants should be changed'; in **Question 1(b)**: 'identify', 'two different ways the GAL program could support child migrants'; in **Question 2**: 'explain,' 'evidence' and 'impact'; and in **Question 3**: 'perspectives', 'judgement' and 'stronger'.

Candidates managed their time well and allowed more time for **Questions 2** and **3**, which carry higher total marks than **Question 1**. **Question 1** only requires short answers or bullet points, and most candidates responded accordingly.

To achieve higher marks in **Questions 2** and **3**, candidates should develop their points clearly. This involves making a point, illustrating it with information or appropriate quotes from the text, and explaining it in the context of the document. Instead of just stating what a strength or weakness may be, the candidates should also explain how or why it is a strength or weakness. There should also be reflection on the impact of the evidence in **Question 2** and explicit reference to perspectives in **Question 3.**

Candidates will not gain credit for using material from their own knowledge that is not contained within the documents. Copying from the document is acceptable in the identification questions in **Question 1**, but is not appropriate for perspectives, analysis, and evaluation in **Questions 2 and 3**.

The marking approach is closely linked to the Assessment Objectives (AOs) given in the syllabus and the AOs are divided into distinct aspects. Candidates should be aware of what each question is assessing so that they may develop their answers accordingly.

Candidates could improve in the following Assessment Objectives: **AO1b (Explanation)** in **Question 2**, and **AO1b (Perspectives)** and **AO1c (Evaluation of key components)** in **Question 3**.

General comments

Most candidates understood the documents, and many demonstrated a clear grasp of the question requirements. **Question 2** is focused solely on the evidence in the first document, so candidates should concentrate on this aspect only. Many candidates recognised the need to explain the impact of the evidence on the author's argument in **Question 2**, reaching a reasoned judgement by the end. However, while candidates often provided reasons why a piece of evidence was strong or weak, these were rarely developed into clear explanations.

In **Question 3**, it was increasingly common to find attempts to identify and describe perspectives as an introduction to the answers, which is perfectly acceptable practice.

In **Question 3**, stronger responses selected relevant and appropriate key components of argument and compared and evaluated them. These comparisons were most successful when they were direct comparisons.

© 2025

Comments on specific questions

Question 1

Question 1 encourages candidates to fully read and understand the details of both documents before starting the questions. The question paper indicates that approximately 15 minutes should be used for this, which is included within the exam time. Answers to **Question 1** are designed to be straightforward, so answering the questions in order is recommended. The aim of these questions is to ensure that candidates fully understand the meaning of each document.

There are two parts to **Question 1**. **Question 1(a)** refers to Document A and **Question 1(b)** refers to Document B. Candidates are encouraged to answer both questions before proceeding to **Question 2**.

Question 1(a) asked candidates to identify three different ways the processes for dealing with child migrants should be changed, as given by the author of Document A.

Most candidates successfully identified three of the possible answers; where candidate missed out on marks, it was usually because they missed key words like 'immediately' which were deemed essential to keep the author's intended meaning. It was much rarer for candidates to give entirely incorrect answers unless they had misunderstood the question.

Question 1(b) asked candidates to identify two different ways the GAL program could support child migrants, as given by the author of Document B. Many candidates scored full marks for this question.

Question 2

There were many strong answers to this question. Most candidates correctly assessed the strengths and weaknesses of the evidence used by the author to support their argument. However, explanations for why a piece of evidence was strong or weak were often limited to terms like 'more trustworthy,' 'expert,' or 'can not be fact-checked'. More development is required for an explanation to be credited under **AO1b**, where candidates must fully explain why a particular piece of evidence supports the claim it is intended to support. For **AO1c**, candidates must explain the impact of the evidence on the author's argument or on the reader. Candidates were well prepared for this part of the question and demonstrated skill in this assessment area. Additionally, some candidates attempted a reasoned summary judgement. The question focused on the analysis of 'evidence,' so answers that related to language or structure were not credited. Common discussion points often included the use of the statistics and first-hand evidence in the document.

Candidates were assessed on **Assessment Objective 1 (AO1 – research, analysis, and evaluation)**. The three aspects were Identifying evidence (**AO1a**), Analysing the strengths and weaknesses of evidence (**AO1b**), and Evaluating evidence (**AO1c**). A score of 5 marks for **AO1a** was common. For **AO1b**, most candidates scored 3 marks but were unable to develop their explanations sufficiently to access the higher mark bands (4 or 5 marks). Marks for **AO1c** were much improved on previous years with many candidates scoring 3 or 4 marks.

A clearly structured approach is:

- Identifying a type of evidence (**AO1a**).
- Giving an example of that type of evidence from the document (**AO1a**).
- Clearly assessing whether it is a strength or weakness (**AO1b**).
- Providing a developed explanation of why it is a strength or weakness (**AO1b**) to support a claim.
- Evaluating the impact of the evidence on the argument or on the reader (**AO1c**).

The following example shows that the candidate identified a weakness, quoted it and explained why it was a weakness (**2AO1a** and **2AO1b):**

The sources of evidence are often not cited and left vague. An example of this is reference to the 'psychologists' statements'. There is no indication of who these psychologists are and if they are even qualified. This vagueness and general lack of cited sources is a major flaw as it impacts the reliability of the claim made by the author that children's 'brains are disrupted' by these experiences as we do not know if the source is reliable in the first place.

© 2025

For **2AO1a,** the evidence being uncited is illustrated accurately by writing about 'the psychologists' statements'. For **AO1b,** this evidence is declared a 'major flaw' so we know it is weak. The explanation of this weakness is explained using a three-pronged approach. Firstly, the candidate notes that there is no citation to say who the psychologists are. Secondly, the candidate notes that this impacts the reliability of the claim made by the author that children's 'brains are disrupted'. Finally, the candidate states that this is because we do not know if those psychologists are reliable in the first place.

For **2AO1c – Evaluating evidence**, candidates were expected to evaluate the impact of the evidence on the argument or on the reader. This ranged from making a simple assertion to some evaluation of the impact, to an evaluation that included a judgement.

Many candidates scored highly on **2AO1c** with more extended and detailed evaluations of the impact of the evidence on the argument. Again, a three-pronged approach was effective, for example:

Something the author does, however is use quotes to increase the emotional appeal of the article to the audience. The author uses a quote from a 14-year-old boy from Guatemala who was separated from his family during the migration process. 'I do not understand why they separated us, they did not give me a chance to say good-bye.' This quote wonderfully reflects the struggles of child migrants who are separated from their families and helps the reader to sympathise with the author's cause.

In this example, the candidate makes a more extended point and includes three ideas in their evaluation of the impact of the evidence on the argument. Firstly, the quote from the boy is a strong emotional piece of evidence, secondly, this reflects the real struggles of child migrants, and finally, this makes the readers sympathise more with the author's cause.

Question 3

The question asked candidates to evaluate the arguments of both authors and consider their perspectives. Candidates were also required to provide a judgement on whether Document A was stronger than Document B, Document B was stronger than Document A, or if they were both equally strong. Any of these conclusions can be equally valid.

The most common approach was to first identify and describe the perspectives of each document and then directly compare the key components of the arguments throughout the answer. The higher scoring responses achieved this well with analysis and clear evaluation of the relative strengths of each document and were able to make a judgement as to which was more convincing. There was no correct answer, and candidates were free to argue for their preferred judgement. It was also possible to evaluate the arguments of both documents separately and then provide a concluding judgement. However, this approach often led to fewer points being made, less direct comparison (which is a requirement of the question), repetition in the conclusion, and a lower mark overall.

Many candidates successfully identified aspects that reflect a strong argument, such as the expertise of the authors, the level of potential bias, and the amount of supporting evidence provided. Responses achieving the highest marks gave clear examples from the documents and explained the impact on the overall argument, culminating in an intermediate judgement. It is important that candidates exemplify the key components using the documents rather than listing pre-learned key components that might apply to any document.

There were two assessment objectives used **– AO1 (Research, analysis, and evaluation)**, which was separated into four aspects: Identify and compare key components of arguments (**AO1a**), Analyse and compare perspectives (**AO1b**), Evaluate arguments (**AO1c**), and Provide a judgement about argument and perspective (**AO1d**). The second assessment objective was **AO3 – Communication.**

The highest-scoring responses adopted a structured approach to answering the question by methodically:

- Identifying, describing, and explaining the perspectives of the authors of both documents (**AO1b**),

and then:

- Identifying and comparing key components of the argument (**AO1a**);
- Evaluating the relative strengths of the key components of the argument using appropriate examples and analysis of impact (**AO1c**);

© 2025

- Giving an intermediate judgement (**AO1d**);
- Coming to a reasoned judgement as to which argument, if either, is stronger in a final conclusion (**AO1d**).

For assessment objective **AO1b –** Analyse and compare perspectives **–** marks were varied as some candidates did not provide any analysis of perspectives. Lower scoring responses simply identified perspectives, often from just one document. Higher scoring responses compared, described and explained the significance of the perspectives in both documents.

The most challenging aspect of **AO1b** was identifying that the perspective was not a simple 'for' or 'against'. The perspectives from Document A and B were more multi-faceted than that.

The following is an example of a higher scoring response that correctly identified the perspectives of Document A and B:

Doc A focuses on the process of immigration in the US and how children go through harsh conditions alone; moreover, the author says how it must be improved for the children. Doc B, on the other hand focuses more on the aftermath of the immigration system and on the children's legal cases and courts and presents a solution of providing legal guardians and supporting volunteers so migrant children do not have to go through harsh conditions.

The following is an example of a higher scoring response that described those perspectives, **3AO1b,** Level 4:

Document A focuses on the poor conditions of child migrants and the subsequent maltreatment that can be mitigated by creating a less vindictive customs operations and allowing whole families to seek asylum. Document B, on the other hand, while admitting that children do get neglected and abused as immigrants, advocates for their legal representation in US courts. The legal system makes sure that they do not get asylum and a fair treatment. So, it must be improved. Here it can be seen that Document A argues for an equitable process of child immigration to prevent them from any harm while Document B advocates for their authorization once they have entered the US as immigrants.

For **3AO1a – Identify and compare key components of arguments**, many candidates gained high marks as they were able to compare a range of key components of arguments from both documents. The strongest responses provided a smaller number of well-developed comparisons. This enabled time to be used more effectively to demonstrate and develop other assessment objectives.

For **3AO1c – Evaluate Arguments**, higher scoring responses evaluated the key components of arguments that had been identified with clear illustration from the documents and made balanced reference to both documents. The following is an example of a higher-scoring response that provided two evaluative points and a direct comparison of the key component, expertise of the authors.

Document B is authored by an 'experienced professional in child welfare' development and 'qualified in child protection' who has seen first-hand how intimidating the court process is for children, hence the audience would deem her an expert on the subject since she is well versed in child protection and is seen as credible enough to opine on the issue. Document A contrastingly is authored by the Associate Director of Vera whose institutional credentials however authoritative are not helpful since her own credentials and relevance to the subject are not made clear in the introduction. This means the reader would deem her to be as lay as themselves on the subject and hence her arguments would be less persuasive since she's not an authority figure on the issue.

For **3AO1d – Judgement about argument and perspective -** higher scoring responses compared key components of the argument throughout their answer. This allowed intermediate judgements to be made when both documents had been evaluated and compared. Candidates then provided a conclusion summarising the intermediate judgements they had made to come to an overall conclusion. The strongest responses concluded with comments which summarised the intermediate conclusions throughout the answer, for example:

All in all, I find Document B to be stronger than Document A since its expert provenance and use demonstrative practical examples render its arguments more persuasive than Document A whose vague provenance and lack of examples are less convincing in terms of its arguments. Even though the

© 2025

perspectives they hold are equally strong, and their lack of cited sources is equally weak. Document B is stronger because of the practicality of its proposed solutions which make its arguments all the more valid.

For **AO3 – Communication**, higher scoring responses produced a clearly written, well-structured and logical argument focused throughout on the question. Lower scoring responses produced arguments that lacked clarity, had an uneven structure, were in bullet points or did not always link answers to the question.

GLOBAL PERSPECTIVES AND RESEARCH

Paper 9239/13
Written Examination

Key messages

It is important that candidates read the paper carefully, paying close attention to the key words, to answer all the questions set. This applies to all questions, but most specifically **Question 2** and **3**. In **Question 2** the key words were 'evidence,' 'explain' and 'impact on the argument'; and in **Question 3**: 'perspectives', 'judgement' and 'more convincing'.

Candidates managed their time well and allowed more time for **Questions 2** and **3**, which carry higher total marks than **Question 1**. **Question 1** only requires short answers or bullet points, and most candidates responded accordingly.

To achieve higher marks in **Questions 2 and 3**, candidates should develop their points clearly. This involves making a point, illustrating it with information or appropriate quotes from the text, and explaining it in the context of the document. Instead of just stating what a strength or weakness may be, the candidates should also explain how or why it is a strength or weakness. There should also be reflection on the impact of the evidence in **Question 2** and explicit reference to perspectives in **Question 3.**

Candidates will not gain credit for using material from their own knowledge that is not contained within the documents. Copying from the document is acceptable in the identification questions in **Question 1**, but is not appropriate for perspectives, analysis, and evaluation in **Questions 2 and 3**.

The marking approach is closely linked to the Assessment Objectives (AOs) given in the syllabus and the AOs are divided into distinct aspects. Candidates should be aware of what each question is assessing and develop their answers accordingly.

Candidates could improve in the following Assessment Objectives: **AO1b (Explanation)** in **Question 2**, and **AO1b (Perspectives)** and **AO1c (Evaluation of key components)** in **Question 3**.

General comments

Most candidates understood the documents, and many demonstrated a clear grasp of the question requirements. **Question 2** is focused solely on the evidence in the first document, so candidates should concentrate on this aspect only. Many candidates recognised the need to explain the impact of the evidence on the author's argument in **Question 2**, reaching a reasoned judgement by the end. However, while candidates often provided reasons why a piece of evidence was strong or weak, these were rarely developed into clear explanations.

In **Question 3**, it was increasingly common to find attempts to identify and describe perspectives as an introduction to the answers, which is perfectly acceptable practice.

In **Question 3**, stronger responses selected relevant and appropriate key components of argument and compared and evaluated them. These comparisons were most successful when they were direct comparisons.

It appears that a small but noticeable minority of candidates this year were not adequately prepared for the assessment requirements of this exam. Some candidates left responses blank, while others wrote about topics unrelated to the examination questions.

© 2025

It is important for the centres to be aware that the Global Perspectives examination requires specific skills that must be explicitly addressed in teaching and learning. It is essential that candidates are supported in developing these skills to ensure they are equipped to meet the demands of the assessment.

Comments on specific questions

Question 1

Question 1 encourages candidates to fully read and understand the details of both documents before starting the questions. The question paper indicates that approximately 15 minutes should be used for this, which is included within the exam time. Answers to **Question 1** are designed to be straightforward, so answering the questions in order is recommended. The aim of these questions is to ensure that candidates fully understand the meaning of each document.

There are two parts to **Question 1**. **Question 1(a)** refers to Document A and **Question 1(b)** refers to Document B. Candidates are encouraged to answer both questions before proceeding to **Question 2**.

Question 1(a) asked candidates to identify two problems with employment in the tourism industry, as given by the author of Document A.

Most candidates successfully identified three of the possible answers. It was rare for candidates to give entirely incorrect answers unless they had misunderstood the question.

Question 1(b) asked candidates to identify three specific changes proposed by the NRDC report, as given by the author of Document B. Many candidates scored full marks for this question part.

Question 2

This question produced some strong responses. Most candidates correctly assessed the strengths and weaknesses of the evidence used by the author to support their argument. However, explanations for why a piece of evidence was strong or weak were often limited to terms such as 'more trustworthy,' 'expert,' or 'can not be fact-checked'. More development is required for an explanation to be credited under **AO1b**, where candidates must fully explain why a particular piece of evidence supports the claim it is intended to support. For **AO1c**, candidates must explain the impact of the evidence on the author's argument or on the reader. Candidates were better prepared for this part of the question and demonstrated skill in this assessment area. Additionally, some candidates attempted a reasoned summary judgement. The question focused on the analysis of 'evidence,' so answers that related to language or structure were not credited. Common discussion points often included the use of the statistics and survey information in the document.

Candidates were assessed on **Assessment Objective 1 (AO1 – research, analysis, and evaluation)**. The three aspects were: Identifying evidence (**AO1a**), Analysing the strengths and weaknesses of evidence (**AO1b**), and Evaluating evidence (**AO1c**). A score of 5 marks for **AO1a** was common. For **AO1b**, most candidates scored 3 marks but were unable to develop their explanations sufficiently to access the higher mark bands (4 or 5 marks). Marks for **AO1c** were much improved on previous years, with many candidates scoring 3 or 4 marks.

A clearly structured approach is:

- Identifying a type of evidence (**AO1a**).
- Giving an example of that type of evidence from the document (**AO1a**).
- Clearly assessing whether it is a strength or weakness (**AO1b**).
- Providing a developed explanation of why it is a strength or weakness (**AO1b**) to support a claim.
- Evaluating the impact of the evidence on the argument or on the reader (**AO1c**).

The following example shows that the candidate identified a weakness, quoted it and explained why it was a weakness (**AO1a** and **AO1b):**

Document A had a series of strengths and weaknesses. Beginning with the strengths, the author of the text is a journalist which means that she has research abilities that lead her to do a thorough investigation. Also, she lives in Cornwall, UK, which is the place and subject from the investigation regarding the mining industry

© 2025

in lithium. This could have facilitated the author to do a high-quality investigation as she could have more contacts that know about the matter.

For **AO1a,** the evidence is the Cornish journalist. For **AO1b,** this evidence is declared a 'strength' as she is a 'journalist with research abilities'. The explanation of this strength is further explained using a three-pronged approach. Firstly, the candidate notes that these research abilities will lead her to do a 'thorough investigation'. Secondly, the candidate notes that she is also from Cornwall, the subject of the document, so this adds to her knowledge. Finally, the candidate states that her 'local contacts' would lead to a high-quality investigation.

For **AO1c – Evaluating evidence**, candidates were expected to evaluate the impact of the evidence on the argument or on the reader. Answers ranged from simple assertions to some evaluation of the impact, to evaluation that included a judgement.

Many candidates scored highly on **AO1c** with more extended and detailed evaluations of the impact of the evidence on the argument. Again, a three-pronged approach was effective, for example:

One strength in Document A is that it contains numbers and statistical data. Throughout the document, there are many facts that the author provides. For example, Document A states, 'Cornish Lithium plans to produce 20,000 – 30,000 tonnes per year from water and rock and expects its first site to open in 2026.' This clearly shows how these numbers are facts. Statistical data proves that the information is accurate and measurable. This convinces the reader and strengthens the overall argument.

In this example, the candidate makes a more extended point and includes three ideas in their evaluation of the impact of the evidence on the argument. Firstly, the 20,000 – 30,000 tonnes per year is strong statistical data. Secondly, numbers tend to be factual, accurate and measurable. Finally, this factual basis will convince the reader which strengthens the argument.

Question 3

The question asked candidates to evaluate the arguments of both authors and consider their perspectives. Candidates were also required to provide a judgement on whether Document A was more convincing than Document B, Document B was more convincing than Document A, or if they were both equally convincing. Any of these conclusions are equally valid.

The most common approach was to first identify and describe the perspectives of each document and then directly compare the key components of the arguments throughout the answer. The higher scoring responses achieved this well with analysis and clear evaluation of the relative strengths of each document and were able to make a judgement as to which was more convincing. There was no correct answer, and candidates were free to argue for their preferred judgement. It was also possible to evaluate the arguments of both documents separately and then provide a concluding judgement. However, this approach often led to fewer points being made, less direct comparison (which is a requirement of the question), repetition in the conclusion, and a lower mark overall.

Many candidates successfully identified aspects that reflect a convincing argument, such as the expertise of the authors, the level of potential bias, and the amount of supporting evidence provided. Responses achieving the highest marks gave clear examples from the documents and explained the impact on the overall argument, culminating in an intermediate judgement. It is important that candidates exemplify the key components using the documents, rather than listing pre-learned key components that might apply to any document.

There were two assessment objectives used. The first assessment object was **AO1 (Research, analysis, and evaluation)**, which was separated into four aspects: Identify and compare key components of arguments (**AO1a**), Analyse and compare perspectives (**AO1b**), Evaluate arguments (**AO1c**), and Provide a judgement about argument and perspective (**AO1d**). The second assessment objective was **AO3 (Communication)**.

The highest-scoring responses adopted a structured approach to answering the question by methodically:

- Identifying, describing, and explaining the perspectives of the authors of both documents (**AO1b**),

and then:

© 2025

- Identifying and comparing key components of the argument (**AO1a**);
- Evaluating the relative strengths of the key components of the argument using appropriate examples and analysis of impact (**AO1c**);
- Giving an intermediate judgement (**AO1d**);
- Coming to a reasoned judgement as to which argument is more convincing in a final conclusion (**AO1d**).

For **AO1b –** Analyse and compare perspectives **–** marks were varied as some candidates did not provide any analysis of perspectives. Lower scoring responses simply identified perspectives, often from just one document. Higher scoring responses compared, described and explained the significance of the perspectives in both documents.

The most challenging aspect of **AO1b** was identifying that the perspective was not a simple 'for' or 'against.' The perspectives of Document A and B were more multi-faceted than that.

The following is an example of a higher scoring response that correctly identified the perspectives of Document A and B:

Document A suggests that mining lithium is very beneficial to the UK and itself but without community support, it will be more of a downfall. Document B suggests that mining lithium is very dangerous to indigenous people and should stop or they should figure out other ways to get it because of the high demand for it.

The following is an example of a higher scoring response that described those perspectives, **3AO1b,** Level 4:

While the author of Document A stands with the positive consequences that lithium mining may have on her city, the author of Document B talks about the negative repercussions this practice will have in Chile's indigenous communities. In Document A, the author emphasizes the positive economic and cultural aspects of lithium mining, as she believes that this method will revive the mining industry in Cornwall and is positive that it will provide good, long-term, well-paid jobs to residents. However, she also argues that lithium mining needs to be controlled and that resident's involvement is a priority. On the other hand, the author of Document B argues that lithium extraction through sedimentary rock is negative for Chile's indigenous communities as it is proven to drain water resources, damage wetlands and endanger ecosystems. She uses different testimonies from community members and data to show the concern of the people. Toward the end, Greenfield recommends some solutions that could be implemented so that the lithium extraction can be completely banned and indigenous communities can be protected.

For **3AO1a – Identify and compare key components of arguments**, many candidates gained high marks as they were able to compare a range of key components of arguments from both documents. The strongest responses provided a smaller number of well-developed comparisons. This enabled time to be used more effectively to demonstrate and develop other assessment objectives.

For **3AO1c – Evaluate Arguments**, higher scoring responses evaluated the key components of arguments that had been identified with clear illustration from the documents and made balanced reference to both documents. The following is an example of a higher-scoring response that provided two evaluative points and a direct comparison of the key component, expertise of the authors.

First, Document A has a two-sided view, a counterargument. It talks about multiple views, showing why lithium mining is good but why it may not be the best idea: 'It is not about how much money is generated, it is about how that money is used and whether it circulates in the local economy.' This shows the author's credibility as it shows his willingness to accept the positive and negative facts. This builds trust for the readers as it proves the author is not biased and is fair and balanced, which strengthens the argument. In contrast, Document B does not have a counterargument; in fact, it is deeply based on the negative side of lithium mining which is clear bias. All the evidence and perspectives come from only one side. This means the author may not be sharing all the information which makes the author less reputable. And this lack of balance and trust weakens the whole argument.

For **3AO1d – Judgement about argument and perspective -** higher scoring responses compared key components of the argument throughout their answer. This allowed intermediate judgements to be made when both documents had been evaluated and compared. Candidates then provided a conclusion summarising the intermediate judgements they had made to come to an overall conclusion. The strongest

© 2025

responses concluded with comments which summarised the intermediate conclusions throughout the answer.

For **AO3 – Communication –** higher scoring responses produced a clearly written, well-structured and logical argument focused throughout on the question. Lower scoring responses produced arguments that lacked clarity, had an uneven structure, were in bullet points or did not always link answers to the question.

GLOBAL PERSPECTIVES AND RESEARCH

Paper 9239/02
Essay

Key messages

Candidates should make links between their research materials and not treat each source in isolation. This is synthesis. By synthesising their source material candidates will build coherent perspectives that respond to their title question.

Themes are approaches to topics or issues, for example culture, economics or health. Candidates should use different themes to analyse the implications of their title questions. In the essay candidates should clearly state and then develop three or four different thematic approaches to their title question.

There is no requirement to offer solutions in this component of Global Perspectives and Research.

General comments

There are still many candidates not addressing all the assessment aspects in their essays. Candidates need to plan carefully to ensure they demonstrate all the skills assessed in this component. There are ten different aspects used for assessment that are split across three assessment objectives; the first five relate to research, analysis and evaluation, the next three relate to reflection and the final two relate to communication. Each aspect is given its own heading in this report.

Most candidates chose issues with global significance that derived from the topics listed in the syllabus. Popular topics for focus were Impact of technologies, Migration and work, Climate change and Social inequality. The essays were for the most part well researched and made for interesting reading.

Comments on specific aspects

Analysis of Question

Candidates should construct a title question that is both concise and sets up a debate between contrasting perspectives. The title question should raise an issue of global significance. The following title questions from this series are all effective: *'Does social media positively influence democracy?', 'Do the benefits of AI outweigh the costs?', 'Should drugs be decriminalized?', 'Is migration beneficial for the host country?'.*

Having constructed an effective title candidates should analyse the implications of their question. This is achieved by considering the title question through different lenses or themes. Each specific lens or theme should be clearly stated by the candidate. Each section of the essay should ideally relate to a specific theme. An example from the essay titled *'Does social media positively influence democracy?'* reads *'The first way the social media's impact on democracy can be considered is by looking at online protest groups.'.* Protest groups is a clear implication of the question that can be used to analyse the question. A second example can be seen in the essay titled *'Should drugs be decriminalized?'*. In this example, the candidate uses 'Economics' which is one of the broad themes detailed on page 14 of the syllabus. '*One of the potential benefits of drug legalization is increased tax revenue, this links to the economic theme.'*.

Candidates should incorporate three or four discrete themes in their essays and the thematic analysis of their title question should be supported by two or three different sources.

Building Perspectives

© 2025

For candidates to achieve in this assessment criterion, their essay must have contrasting perspectives. This reiterates the importance of constructing an effective title. Essays that do not set up a debate will not be able to achieve in this assessment criterion.

Candidates are required to make connections between their source materials by synthesising arguments and evidence together to build coherent perspectives. The abridged example below comes from an essay with the title *'Is the media biased in its reporting?'.* The candidate states clearly that this section of the essay will examine the question through the cultural theme (see Analysis of Question above). The candidate then uses two different studies to develop the point that cultural bias exists amongst media producers. The synthesis is made explicit as the candidate shows the reader how the one source 'concurs with' the other.

'The cultural theme can be used to investigate the question of media bias. The media, unsurprisingly, often have cultural biases. This can be either in underrepresentation or misrepresentation. This can lead to a distorting of public attitudes. Researchers linked with the American University of Southern California published a study on arXiv – an academic archive – of over 300,000 images taken from U.S.–based fashion magazines, movie posters, and advertisements across more than 50 years. Minorities were far less conspicuous than Whites, and when they were present, they were also framed less importantly with more negative affect . . . These differences in representation, according to the USC study, reinforce societal stereotypes and perpetuate systemic biases (Chen et al 2024).

Media representation tends to reinforce cultural biases by perpetuating stereotypes based on race and ethnicity. To this extent, the Oxford Research Encyclopaedia of Communication concurs with the University of California study above that media producers, either unconsciously or knowingly biased, place ethnic minorities in stereotypical positions-for example, Black persons as criminals or Latinos as illegal immigrants. These are not only distorting the realities of the communities but also promulgating an 'ethnic blame discourse' where social issues are being ascribed to minority communities. Such distorted images may shape public opinion and feed prejudice, promoting systemic inequalities (Lichter et al 2020).'.

Range of Sources

Range refers to sources that emanate from different global contexts or present arguments and evidence pertaining to different global contexts. Ideally sources will pertain to or come from four different global contexts. Candidates should clearly state the global context of their material. In the example shown above (see Building Perspectives), from the essay '*Is the media biased in its reporting?*', the US context of the Chen et al 2024 source is made clear by the candidate.

Candidates are also required to use the source material to support perspectives. This requires engaging with the source in a way that uses evidence from the source and explains how the source supports the perspective. The example below comes from the essay titled '*Does social media positively influence democracy?*'. The candidate shows good control over their research material and uses argument and evidence from the relevant source to develop the perspective in support of the title question. The global context of the source is again made clear.

'Ngoka et al (2024 argue that social media can be an effective tool in mobilising voters in countries where political processes are less transparent, participatory, and democratic like Nigeria. Sharing the example of young candidates of University of Nigeria in Nsukka who were effectively mobilised for the presidential campaigns 2023 using WhatsApp, they argue that a positive use of social media can generate constructive effects on the political dynamics of a country. Unlike earlier elections in which the voting turn-out of young people always remained marginal and fluctuated between 35 per cent to 58 per cent, University of Nigeria offers an empirical example of how thousands of candidates were activated in two other campuses of Enugu and Ituku-Ozalla. Ngoka makes an important point here and argues that unlike other countries, social media campaigns in Nigeria was carefully gender-planned as among a total of 48000 to 65000 candidates, a large number was of female candidates, which was testified by their survey with 400 candidates.'

Candidates who use too many sources will not be able to demonstrate engagement. Candidates should be encouraged to be more selective in their research and use six to eight relevant sources with global range to support their essays.

Appropriateness of Sources

The skill of critical evaluation of source material is assessed in all components of the Global Perspectives and Research syllabus. Candidates are not required to critically evaluate every source used and the most

© 2025

successful candidates focused on four key sources. As this is a skills-based syllabus, candidates will achieve more if they use one criterion for critical evaluation per source and fully develop that specific line of interrogation, rather than offering several different lines of evaluation without development. Criteria for evaluation could include quality of evidence, logic of argument, credibility of author or issues of bias and vested interest.

Below is a good example of developed critical evaluation; it comes from the essay titled '*Do the benefits of AI outweigh the costs?*'. The candidate evaluates the expertise or credibility of the author. The example may be considered developed because the expertise of the author is clearly linked to the issue under discussion.

'Evidence taken from this speech by Dr. Ascelin Gordon can be deemed creditable because he has a PhD in physics and experience in high-performance computing, machine learning, and data science. Dr. Ascelin Gordon is an Australian academic who specializes in the fields of biodiversity conservation and environmental sustainability, which means that he has expertise in researching technology's impacts on the environment. This expertise links directly to my title question and the environmental theme.'

Many candidates are still not addressing this aspect of assessment in their essays.

Comparison of perspectives

To further emphasise the importance of an effective title question, if the candidate's essay does not set up a debate between contrasting perspectives they will not be able to achieve in this assessment criterion. There are several ways for candidates to compare perspectives. Firstly, candidates compare perspectives in their introduction (see example below). To gain credit in the introduction candidates are required to juxtapose at least two ideas for each perspective.

Secondly, many of the themes used to analyse the implications of the question will be able to support both perspectives. In the essay referenced earlier (*Is the media biased in its reporting?*), the candidate considered the cultural implications of the question. Having outlined the arguments for cultural bias in the media the candidate then went on to examine the contrasting perspective from a cultural theme, by discussing the opportunities that new media presents for marginalised minority ethnic voices.

Thirdly, it is expected that candidates will compare their perspectives holistically before arriving at their final judgement.

The below example comes from the introduction of an essay with the title '*Should economic sanctions be banned?*'. The candidate partially develops and juxtaposes two ideas from each perspective. It is more common for the candidates to offer more developed and evaluative comparisons at the end of their essay, before the final judgement.

'*Some argue that economic sanctions are detrimental to the human rights of innocent civilians by depriving them of basic necessities such as healthcare which adversely affects the lives of these people. Similarly, opponents of sanctions also believe that they affect not just the targeted country but also the neighbouring ones which disrupt global trade and supply chains. On the other hand, in an increasingly interconnected world, countries find themselves in the need to coerce the behaviour of other countries. For example, the sanctions imposed on Iraq and South Africa have influenced the actions of these nations. Added to that, these economic sanctions can encourage innovation in the receiving country, such as in Iran and Russia, by allowing them to develop ways to curtail its threatening effects. Thus, this essay will assess the impacts of imposing economic sanctions from medical, global trade, political and economic perspectives.*'

Consideration of Contrasting Perspectives

This assessment criterion requires candidates to approach their chosen issue in a balanced and objective way. If the title question raises an issue that the candidate holds a strong viewpoint about, it can be difficult to give due consideration to both perspectives. Sometimes candidates use very loaded language in their treatment of perspectives and make clear their personal viewpoint throughout. This can lead them into not treating each perspective fairly. Generally, candidates demonstrated maturity in their considerations and were able to apply the same levels of research, critical evaluation and word-count to both perspectives.

Reflection and Impact on Personal Viewpoint

Reflection is a skill that is assessed in the majority of components across the Global Perspectives and Research syllabus. Candidates should reflect on how engaging with the contrasting perspectives has

© 2025

impacted their personal viewpoint. Candidates' opinions may have been changed or consolidated. The following example is an extract from the candidate's reflection. It comes from the previously referenced essay titled '*Should economic sanctions be banned?*'. A reflective tone is clearly established, and the candidate sets out how their personal viewpoint has changed. To have reach the highest attainment level the candidate would have needed to make specific reference to a source and develop how it had impacted their viewpoint.

'Prior to this essay, I believed that economic sanctions did more good than harm due to the positive connotation it had. While this is true to an extent, after assessing the information I have researched, I now believe that the disadvantages of economic sanctions outweigh the advantages. The idea that these sanctions encourage self reliance and promote global peace is flawed. This is because sanctions restrict access to the necessary resources and investment needed by the target counties to develop innovative ways to combat the harmful effects.'

Further Research

For this area of assessment candidates are required to identify a specific new area for research and then offer some development of the potential research. To reach the higher attainment levels, candidates should also offer some reasoning as to why this research should be undertaken.

The following example comes from an essay titled '*Does participation in sports improve academic performance?*'. The candidate identifies a new theme (one that had not been considered in the essay) and then develops this with some detail. To have reached the higher attainment levels the candidate would have needed to say why this research would be important.

'I could further this research by focusing on the scientific part of the impacts. For example, I could research types of physical activity involved with sports and how it directly impacts different parts of the brain, and how those functions are related to improving or harming performance in school.'

Several candidates did not address this area of assessment in their essays or offered solutions to the issue. Solutions are required in Component 3 only and are not creditworthy in Component 2.

Structure

Most candidates presented essays with a lucid introduction followed by the main body of the essay and culminating in a supported conclusion. Each theme or implication of the question should be separated with logical paragraphing. Effective use of discourse markers is required to reach the higher attainment levels. Discourse markers include terms such as 'on the other hand, furthermore, in conclusion'. To demonstrate good structure candidates also need to remain focused on their title question. Quite often candidates drift away from their title question. For example, in the essay '*Does social media positively influence democracy?',* the candidate began to discuss the impacts of social media on mental health. Candidates should ensure that their essays are between 1750 – 2000 words. Candidates should not include tables, charts or diagrams in their essays.

Referencing

A Harvard style system of referencing is recommended. This is exemplified in the extract shown above in the 'Building Perspectives' section. The source cited *(Lichter et al 2020)* was referenced in an alphabetically organised bibliography in the form shown below. This can be considered effective referencing.

'Lichter et al (2020). Media and cultural bias: Stereotypes in representation. Oxford Research Encyclopaedia of Communication. Oxford University Press. https://oxfordre.com/communication/display/10.1093/acrefore/9780190228613.001.0001/acrefore-9780190228613-e-502'

Candidates are free to use any system of referencing they choose, and footnote systems are accepted. However, footnotes should only be used for reference details and not extra information or critical evaluation. Candidates need to cite all sources used.

Team Project

Key messages

Overall, the standard of work submitted by the candidates was good, with many candidates demonstrating understanding of the collaborative research process and the key principles of the syllabus. Most candidates engaged meaningfully with their chosen global issues, making efforts in research and reflection on learning and collaboration.

The following key messages are important for centres to note:

There are still adherents to the old syllabus in terms of naming team members and perspectives and demonstrating why the candidate's particular solution is the best. Naming team members and perspectives is not generally an issue, unless the candidate spends a significant amount of the10 minutes on this element. Stating why a particular solution is better than others in the team, though, is not required and time would be better spent developing the candidate's own solution and backing it up with evidence.

A couple of centres presented a joint team presentation which is not allowed to happen for this component. It led to candidates' marks being limited and only the work of each specific candidate being credited, rather than the presentation as a whole. This should be avoided as it leads to candidates getting very low marks.

Another thing that has happened this year is candidates speeding up their voice recordings to fit their presentations into the 10-minute time frame. This could impact marks negatively as the engagement is not the same and things could easily be missed if the pace of the presentation is too fast.

There were a few noisy environments, for example school bells/announcements and general school recess noise. Such interruptions often unsettle the presenters, many of whom are already extremely nervous, causing them to lose the flow of their argument. While it is understood that school life must carry on as normal, the location for presentations and the intrusion of external noise/distraction should be taken into consideration so that candidates who have worked hard can do themselves justice in their presentations.

Centres should be aware that the framing of the question can hinder candidates' performance. For instance, presentation phrased as 'To what extent is Problem X related to Issue Y' does not yield itself to an effective presentation or an effective solution. The most effective presentations were able to concisely identify an issue with detail and support from different countries.

Some centres this year submitted short videos without the candidate presenting, just running through the PowerPoint and then submitting a transcript. This limited candidates' marks as they had not submitted a presentation. This should be avoided in the future.

A significant trend this year was the noticeable use of AI by candidates, particularly in the reflective paper. In most cases, AI was used to polish language rather than to generate content. However, this did not appear to improve the quality of work or lead to higher marks – in some cases it was detrimental as reflective papers did not make sense. Centres need to be aware of this and check work for use of AI before it is submitted.

General comments

Topic selection varied, though familiar topics such as Air/Water/Industrial Pollution, Urbanization, Overpopulation, Human Trafficking, Immigration, Homelessness, and Obesity were all commonly found in this series. Candidates should be encouraged to explore a wide range of topics that interest them. Some

© 2025

topics which were both interesting and well-handled were the use of regenerative farming techniques to combat the impact of climate-caused food insecurity; the impacts of gambling addiction on society; lax food processing regulations on public health; single use plastics in school canteens and the impact of traffic congestion on the economy. It is often clear in both the Presentation and the Reflective Paper to what extent a candidate has been interested in and has engaged with their topic. Generally, those candidates who were invested in and enthused by their topic produced work of a high standard that enabled them to communicate that enthusiasm and investment to their audience. Such candidates often scored well across all the Assessment Objectives.

In general, most candidates made sure their presentation did not exceed 10 minutes, and their reflective Paper did not exceed 800 words. Most of the presentations also made good use of the 10-minute time frame. A few presentations did exceed the time limit, which sometimes negatively impacted the solution mark, while other presentations were well under the time limit and this generally impacted negatively on the development of the argument. Some candidates failed to manage their time effectively and ended up rushing at the end and this also compromised the quality of their solution.

Comments on specific marking criteria

Presentation:

AO1a PROBLEM ANALYSIS:

The importance of the phrasing of research questions cannot be underestimated. The strongest research questions were phrased in such a way as to draw out a level of critical thinking. One-word titles such as 'poverty', 'alcoholism', and 'overpopulation', often tend to elicit descriptive/narrative responses. Some examples of well-considered research questions were 'Is the use of prescription medicine to treat cystic fibrosis ethical?'; 'Do natural resources bring more harm than good to developing nations?; 'How can we solve the destruction of cultural heritage and why is it important that we do?'; and 'From a humanitarian perspective, do economic sanctions work?'.

Careful initial analysis of the problem should be the foundation on which the rest of the presentation is built. While the causes of any problem are important, equally important are the various impacts that the problem has or has had on anyone or anything. If a candidate simply tells the audience what the causes of the problem are, they are only giving their audience a part of the story. The strongest responses considered both the causes and the impact of the chosen problem across different aspects/sectors, both the immediate community and the wider world. Discussion was detailed and considered different areas such as economic, environmental and social impact, with sustained use of detail and data to support the argument throughout the presentation.

Successful presentations took a systematic approach to defining, breaking down and exemplifying the problem. An example of this was a candidate who focused on the extent to which the prison system assists or hinders the rehabilitation of inmates. The candidate explored the problem and looked in depth at its impact both locally and globally. Analysis needs to be sustained and well-supported throughout the presentation to merit four marks.

Less successful presentations defined the problem and perhaps provided some statistical evidence or examples but did not discuss the effect the problem had on people, animals, the environment, or the economy. Another issue was when candidates did not focus on the actual problem and either went straight into a solution or just focused on the benefits of their topic rather than the problem. One example of this was a candidate who focused on the benefits of having rights such as paid maternity leave, rather than the impacts when such rights are lacking – therefore not showing the audience what the issue is.

AO1b RESEARCH:

For the most part, this criterion was well addressed. Candidates consistently demonstrated the ability to conduct independent research. Generally, considerable volumes of research were evident, often very detailed but relying heavily on secondary sources such as articles and papers from the internet. Whilst there was still heavy reliance on statistical data, many candidates diversified their sources by including references from various countries, academic publications, credible media sources and surveys and case studies drawn from the press or from personal experience. A small number decided on primary research, such as carrying out interviews or questionnaires within college or further afield and this was commendable, especially when

© 2025

the data gathered was used effectively to underpin or elaborate on the candidates' arguments. Many candidates demonstrated an ability and willingness to research something very thoroughly.

There were also some poorly researched presentations. Generally, candidates who scored in the lower bands of the mark scheme tended to be those who had carried out minimal research or made very brief reference to research, lacked links between the research and the focus of the presentation, or had relied solely upon research relating to their home state, or country. Candidates should be reminded of the 4-mark descriptor for this AO, specifically the skill of using research from a variety of contexts. As mentioned previously, a range of contexts can be achieved through the use of websites, academic papers and journals, books and news articles, as well as drawing research from a variety of different countries. Another way of achieving a variety of research contexts would be for the candidate to conduct both primary and secondary research. A large number of candidates structured their presentation by tackling the impact of the problem within different contexts – starting with their local community, some then moved out into other areas of their country and then moved to consider specific countries on a global scale. This approach tended to work well, helping to ensure the requirements of AO1b were achieved, as well as forming an effective structure for the presentation.

AO1c EVALUATION OF SOURCES:

This proved to be the most challenging section for candidates. While many presentations were well-researched, the majority lacked any meaningful evaluation or synthesis of sources. Most candidates merely listed citations at the end of their presentations, often on a single slide, without integrating evaluation into their arguments. As a result, the majority of candidates were awarded 1 mark, with some scoring 0 due to the complete absence of any reference to sources.

For 1 mark only, many candidates included a bibliography and directly referred to it briefly. However, there were a few candidates who did not include a bibliography or reference to it at all, not revealing where they got any of their information from. For 2 marks, candidates needed to evaluate at least one of the sources they had used, by discussing for example the credibility, reliability and currency of the source. Some candidates attempted to do this by simply stating that a source could be trusted but then failed to explain why, for instance by discussing the author's credentials, e.g. 'This information comes from X newspaper, which is a trusted source'. The candidates need to say why the source is trusted to achieve marks for evaluation. Some candidates went into detail about the author of the source, but never mentioned that this made it reliable, stopping them for achieving marks for evaluation.

To achieve 3 marks, candidates need to show some evidence of source synthesis. This means comparing/contrasting similar or contradictory information drawn from each source to make a point. If candidates have not first evaluated any of their sources, then even if there is evidence of some synthesis, they will not gain 3 marks. Source synthesis relates to the skill of using information in one source to corroborate or refute information or ideas in another source, so simply stating that 'Both these sources are reliable sources' alone does not count as synthesis.

A candidate presenting on obesity provided a good example of evaluating the credibility of their source/s as well as synthesising two sources. In this example, the candidate contrasted the research of two bodies, which argue alternative ideas behind the rates of obesity around the world.

One candidate presenting on Habitat loss found examples of sources that cross-reference one another: 'This peer-reviewed article was authored by Professor Dasgupta… This source was also referenced in the article written by Paxton (previously mentioned in the presentation), as this piece contained important data on the issue of the economy if habitat loss continues. Both sources highlight the severe consequences that a lack of biodiversity could have…'.

AO1d SOLUTION:

Many candidates did not leave themselves enough time to give detailed evidence for their solution, which limited the marks awarded. Some candidates were still following the old syllabus and came up with an 'innovative' solution which they argued as being better than their team's solution. This is no longer a requirement.
There were very few submissions with comprehensive solutions and analysis of these and even fewer explaining the outcome of the solution elsewhere in detail. Some candidates drew on reports from global organisations detailing in depth the effectiveness of solutions and quantifying lives or money saved for instance. Some solutions missed out on marks due to lack of evidence to support their effectiveness.

© 2025

Some candidates presented one problem and offered multiple solutions, for example a candidate who talked about food waste and offered three solutions: better food planning, buying 'wonky' vegetables, and aerobic digestion. The issue here is that there is not one solution explored in enough depth or with enough support to achieve the top marks. It would be better to focus on one solution and go into detail about where it has been successful elsewhere and why that would be a good solution to the issue locally or globally.

Candidates in the higher scoring range not only proposed feasible interventions but also demonstrated their effectiveness through case studies or success stories. For example, one candidate's solution to elephant killing looked at the impact evidence surrounding 'de-tusking' as a solution, to great effect. Another candidate considered Wetland restoration in Costa Rica with excellent support from similar global projects. Overall, stronger responses effectively linked their solutions to real-world success stories.

AO3a ARGUMENT:

The structure of most candidates' presentations was generally sound with 3 being the most common mark awarded. This was an indication that while there were some well-argued points in parts of the presentation this was not consistently done. Such presentations often lacked the signposting/linkage between ideas and sections to be considered well-argued enough to gain 4 marks.

There were varying approaches to the structure of argument. Candidates could improve by remembering that there are two aspects to this criterion: structure of argument and well-argued points. Many candidates managed to present an argument with some structure and make some well-argued points within that structure. There was a flow to such presentations, they were easy to follow and had a degree of natural progression and order. Some candidates used signposting effectively to produce a well-structured argument. Such candidates often structured their argument very methodically, relying upon key slides and headers, beginning with a clear outline of the issue, exploring it both locally and globally, and then reaching a solution – explaining the justification for and effectiveness of their chosen solution.

While most presentations lacked sustained logical and coherent argumentation to earn the top mark of 5, a few stood out as exceptions. Candidates who excelled on this criterion used clear and often unobtrusive signposting throughout, making their presentations easy to follow with lines of argument that were clear from the outset and developed logically. Ideas and arguments were consistently well-supported with explicit reference to research that had been carried out. One particularly strong candidate did their presentation on the decline of the bee population. They structured their presentation effectively by first exploring the local dimension of the issue, then broadening the scope to examine its global implications, before finally proposing a solution. This logical progression helped to build a clear and compelling narrative, allowing the audience to understand the scale of the problem and the rationale behind the proposed response. One candidate gave a strong sense of being in control of their presentation, making the audience well aware of where the argument was going next by using a combination of signposting phrases, such as 'Now I'm going to talk about…' and rhetorical questions 'A big question that's asked is why do we need…', or by re-focusing attention on their visual presentation, 'Here we can look at…'. This also helped them score well for AO3c.

A commonly chosen way to begin the presentation was to provide an outline of key words/glossary and a breakdown of the perspectives or 'lenses' taken by each of the group members. In some cases, this used up a significant amount of the permitted time and did little to improve the marks of the candidate. Dictionary definitions of commonly understood words are generally unnecessary unless the word is open to misinterpretation, or its definition is likely to play a key role in developing the argument.

AO3b VISUAL SUPPORT:

Most candidates opted to use graphs, charts, diagrams and pictures for their visual information. Many candidates gained a minimum of 2 marks due to their slides having at least some relevance to the topic and more candidates used some images rather than relying on text only which was positive. Candidates who explicitly referred to and actively engaged with the content of at least one of their slides, for instance by talking the audience through a graph or a chart, were awarded 3 marks. Some candidates had several graphs or charts relating directly to the arguments they were developing, and they talked through these in depth, using them to drive their argument forward. This indicated that the visuals had been carefully selected to serve a purpose, and gained the candidates 4 marks. Top-scoring candidates were instantly noticeable and able to use the slides, graphics, maps, charts and other visuals in a meaningful and purposeful way. Those few candidates who adopted a variety of visual approaches and used them to consistently support and drive their arguments forward, as well as communicate their points clearly and engage their audience, were awarded the top mark of 5 for this criterion.

© 2025

Many candidates would benefit from additional guidance on how to select and engage with visual aids, and by practicing their presentations beforehand and receiving feedback on how they can improve. Candidates need to use their visuals strategically to reinforce key points and should always explain their relevance.

AO3c LANGUAGE:

Some candidates struggled to demonstrate real awareness of their audience, and this limited them to lower marks for this criterion. Most candidates began with some form of greeting, such as 'Hello', which was not enough by itself to engage the audience and audience awareness was often not maintained. Phrases like 'you' or 'as you can see' were occasionally used but did not generally translate into a consistent or effective engagement strategy. Too many candidates continue to use an 'essay in speech' style format to deliver their ideas, rather than engaging in a first-person communication that connects with the audience. To score more than 1 or 2 marks for this criterion, candidates need to think about their language, tone and manner of delivery in order to draw their audience in and engage their interest.

Candidates with more effective presentations spoke slowly, made eye contact and referred directly to their audience using personal pronouns, asking questions, anticipating responses and using imperatives to gain their audience's attention. Enthusiasm and confidence made their presentations engaging and interesting. When interacting with the data on visual aids, or discussing specific information for example on graphs, tables and photographs to support an argument, they would say, 'let us look at', or 'as you can see here', thereby engaging the audience with their research and findings. Some candidates made use of rhetorical questions, which can be an effective linguistic tool. However, in some cases this was their sole method of directly addressing the audience and was used perfunctorily, rather than for effect. Other candidates only remembered to consider the presence of the audience when talking through a slide/graph but promptly forgot them for the remainder of the presentation. Effective approaches were those which used a combination of methods of address, including rhetorical questions, asides or comments directly made to the audience, instructions and short statements. One example of a candidate making use of direct address such as, 'I will give you a second to digest the data', rhetorical questions, 'but how can this be addressed?' and collective pronouns, 'if we have a common goal…'.

REFLECTIVE PAPER

For the most part, candidates showed some evaluation of collaboration and learning. Candidates often use the reflective paper to discuss their solutions and the team solutions without any reference to collaboration or learning. This should be avoided as it is using up their word count and does not gain them any marks.

AO2a COLLABORATION:

In this criterion many of the candidates tended to focus on complaints about group dynamics or personal frustrations, instead of analysing of how the group functioned or what was learned from working as a team.

Candidates with the most successful papers realised that they needed to discuss group processes, challenges, and how differences were resolved. Many candidates spoke about setting up online platforms for ease of communication and reflected on how teamwork affected their understanding of the topic. The most effective format in order to encourage evaluation of collaboration seemed to be where candidates stated a method or approach used by their group, for example 'we carried out individual research on solutions and then came back together to share our findings', followed by a clear and explicit statement which evaluated the effectiveness or success of this approach, such as 'by coming back together for feedback, this ensured we did not overlap each other's research, and helped to ensure an open and constructive communication between us all'. One systematic and effective approach can be found in a reflective paper in which the candidate considered three aspects of the team's collaboration: Planning, Communication and Problem Solving. The candidate then proceeded to take issues such as conflict in role assignment or unequal contribution, and then broke it down into the following areas: what happened; its impact on the team; how it was addressed and the effectiveness of how it was addressed.

Less successful reflective papers were those which tended to provide a running commentary of wasted lessons, rehearsals of presentations, groups fallings out, lengthy commutes to school or candidates leaving the class, for example. These reflections were descriptive and tended to lack consideration of collaboration or learning. Some candidates used the reflective paper as a format to voice irritations or describe at length points of conflict with their group members, using it as an opportunity to name the least helpful members of their team. These reflections were descriptive in nature and lacked any real critical consideration thereby keeping the response at 2 marks.

© 2025

AO2b LEARNING:

Candidates often stated what they had learned during the project but failed to evaluate this learning. They did not reflect on the personal impact their learning might have had on them, their opinions, outlook on life or behaviour; or how that learning might be of specific use to them in the future. Learning can refer to what the candidates have learned about the topic they researched, but equally it can refer to what they have learned about themselves, their own skills and personality. Some of the best responses covered both these elements. Some reflective papers included particularly thoughtful and, at times, moving insights into what the candidates had come to understand about serious global issues such as gun crime and climate change. In a few cases, candidates described taking direct action beyond the project, including launching campaigns or engaging in voluntary work to promote social change.

Several candidates expressed that they had come to value the process of working on the project as much as the final outcome. Several recognised the personal growth that came from collaborating with others or being pushed out of their comfort zones. Others reported being challenged to reconsider aspects of American society and politics, particularly in relation to economic systems, social inequality, and gun ownership.

In less successful responses, candidates simply repeated what research they had carried out without considering what they had learned from it and therefore they could not move beyond 2 marks.

GLOBAL PERSPECTIVES AND RESEARCH

Paper 9239/04
Research Report

Key messages

The Cambridge Research Report is assessed against 15 skills-based criteria. To reach the higher attainment levels, candidates need to address all the areas for assessment. Assessment areas most often omitted were the methodology section, critical evaluation of sources and reflection on perspectives. Candidates must set out in their introductions which themes they are using to analyse the implications of their title question. It is also important that candidates outline why these themes have been selected to analyse the question.

It appears many centres provide candidates with a framework to scaffold their reports. Whilst this can be a beneficial practice in preparing candidates, some centres are providing frameworks that are too rigid. Reports from particular centres were identical in their structure and consequently constrained the potential creative thinking of their candidates. Some centres provided frameworks that prevented candidates from addressing all of the assessment criteria, diminishing opportunities for higher attainment.

The Research Proposal Form should be used jointly by teachers and candidates to ensure that the title questions are compatible with the assessment criteria.

General comments

The reports produced by candidates covered a wide range of topics and issues. Popular areas of focus this series were Artificial Intelligence, Genetic Modification Climate Change and Migration. Candidates were able to focus in on contentious issues arising from these topics having completed preliminary research to understand the relevant issues and perspectives. This process, coupled with teacher feedback places candidates in a strong position to construct their title question. The title of the Cambridge Research Report must be in the form of a question.

It should be noted that unlike AS Level coursework, there is no requirement for the report to have a global dimension.

Research Log

Candidates are free to design their own Research Log template. The majority of candidates produced tables with clearly labelled columns in which to record pertinent information and reflections. It is strongly recommended that candidates incorporate a 'future plans' column to ensure that the Research Log has some future orientated goals. Equally important is a column to record candidate reflections on the research decisions and source material. A weekly or fortnightly entry is recommended.

Research Log exemplars are available in the syllabus and other training materials.

There are two Assessment Objectives (AOs) for candidates to address in their Research Logs. In AO1, candidates should be looking forward and setting out objectives and milestones giving a clear indication of planning. AO2 is focused on the skill of reflection, candidates should reflect upon the decisions made and research undertaken. In AO2 candidates should also record source notes.

There were several very detailed Research Logs submitted, these demonstrated clear planning throughout the research process as well as analysis of the research findings and decisions. It should be noted that critical evaluation of research material should not be presented in the Research Log.

© 2025

Questions and Perspectives

A successful research report requires a well thought out title question. The research report needs to set up a debate between contrasting perspectives that respond to an issue raised by the title question. Here are few examples of effective title questions from this series: '*Is physician-assisted dying justifiable?', 'Are carbon taxes effective?', 'Is using AI in education beneficial?'*. These examples all contain two key elements that make them strong title questions. Firstly, they can be answered 'yes' or 'no' and therefore it is clear that the title questions set up a clear debate between contrasting perspectives. The contrasting perspective will be either for or against the title question. Secondly, the example questions are all raising issues that are well documented, therefore enabling the candidate to find a wide range of relevant and credible source material. The title questions shown can all be considered through the lens of different themes. For example, the candidate asking *'Is using AI in education beneficial?'* could consider the question through an economic lens, an ethical lens or an environmental lens, to name just three. It is important that the candidate sets out in the introduction or methodology which themes the report will use to analyse the title question. Candidates must also reflect upon why they have chosen the identified themes and how they will shape the report (see Reflection section below).

Less successful title questions often lack focus or fail to set up a debate. For example, the title *'How does psychology address discrimination and prejudice individually and socially?'* does not suggest a debate and therefore may lead to a descriptive report. Also, the lack of clear parameters makes it uncertain what issue the report will address. '*Is it possible to get away with murder?'*, is a title question that may seem as though it sets up a debate. However, it is evident that the answer to the question is yes. A candidate posing such a question will not be able to find relevant and credible research to support the 'no' perspective. The above title question could have been reformulated as '*Have modern policing methods increased the rate of convictions for murder?'* for example, to allow a debate between contrasting perspectives.

Synthesising research material to build coherent perspectives is a key assessment aspect of the research report. In preparation for demonstrating this skill it is advised that candidates use their Research Logs to make notes of similarities and differences in their research materials. Having done this, candidates will be able to make explicit links between their research materials as they develop arguments and perspectives for and against the title question. This is the skill of synthesis. The extended example below comes from the report titled *'Is physician-assisted dying justifiable?'.* The candidate raises the issue of misdiagnosis via the first source and develops the point via an example from a second source. The two sources are synthesised to build the perspective that argues against physician-assisted dying.

'One of the main medical concerns around the legalization of euthanasia is the possible misdiagnosis of patients and its irreversible consequences. Medical professionals, despite the advances in diagnostic technology, acknowledge that errors in diagnosis can still occur in terminal and debilitating illness. A study by BMJ Quality & Safety Journal made an estimate that approximately '12 million Americans are misdiagnosed annually' with 10 – 20 per cent of these cases involving serious conditions (Singh H, Meyer AND, Thomas EJ, 2021). Whilst this source only focuses on America it provides concrete data to prove that misdiagnosis is a legitimate issue in today's society and could trigger significant consequences if euthanasia was to be legalised.

An article in the BMJ Journal shared a case study which strongly shows the reality of misdiagnosis in euthanasia. In the Netherlands, where euthanasia in psychiatric disorders is legal in certain circumstances, 'a 68-year-old patient, diagnosed with bipolar disorder, requested euthanasia because of tiredness, repeated falls and racing thoughts'. To support her wish, her family and psychiatrist agreed that euthanasia would be the most suited treatment. However after a second opinion was given, the doctors shared their disagreement with the diagnosis of bipolar. After the discontinuation of her psychotropic drugs her mobility and tiredness improved, after reflection the doctors came to the conclusion that her struggle in life could be explained by 'intellectual disability and an attention deficit hyperactivity disorder'. This second opinion supported her to find meaning in life when if no second opinion her life would of be taken due to a simple misdiagnosis (Schmahl O, Oude Voshaar R, van de Poel-Mustafayeva A, Marijnissen R, 2021).'

© 2025

The comparison of perspectives is a skill that should be demonstrated at several points in the research report. Candidates should offer a comparison of perspectives before their intermediary judgements at the end of each thematic section and then offer a more holistic comparison of perspectives before the final judgement is made. The majority of candidates were able to offer a comparison of perspectives in the build up to their final judgement, however many candidates did not demonstrate this skill in the build up to their intermediary judgements. The main reason for this was the omission of intermediary judgements (see Concepts, Research Methods and Judgements below).

To reach the higher attainment levels, candidates need to move beyond a descriptive approach that essentially juxtaposes a summary of each perspective and move to a more evaluative approach that compares the strengths and weaknesses of each perspective.

Sources

As stated above, the research report should set up a debate between contrasting perspectives, therefore it is important that the sources candidates use contain strong lines of argument. Using purely informative sources often leads to descriptive research reports rather than reports that develop clear arguments and perspectives in response to the title question. Candidates should try not to use more than six sources when considering each thematic implication of their title question. Using too many sources prevents the candidate from being able to offer full analysis of each source.

Candidates engaged well with a wide range of source material, much of which was academic and highly credible. However, some candidates still try to use too many sources in their reports. Using too many sources prevents the candidate from being able to offer full analysis of each source.

Critical evaluation is assessed in all components of the Global Perspectives and Research syllabus. There are still many candidates who are not addressing this area of assessment in their research reports. Although many candidates still evaluate their sources in terms of provenance, which is creditworthy, more candidates are demonstrating more focused critical evaluation. To reach the higher levels candidates need to evaluate aspects more specifically related to the arguments or evidence presented by the source, thereby making the critical evaluation explicitly relevant to the title question. The following example comes from a report titled '*Does social media activism lead to social change?'.* The candidate evaluates the problems of using qualitative data to support broader claims. The critical evaluation is developed and made explicitly relevant to the title question.

'*The study also relies heavily on qualitative analysis and case studies, which makes it harder to measure the real, long-term impact of social media activism. While it is clear that viral campaigns raise awareness, there is less evidence that they lead to lasting political change. Its examples are convincing, but the lack of quantitative data limits how broadly its conclusions can be applied. This makes it a useful but slightly narrow perspective in terms of evaluating impact. The conclusions drawn cannot be generalised beyond the specific context the case study pertains to*'.

Concepts, Research Methods and Judgements

As candidates undertake research into their chosen topic area, they will engage with concepts and complex ideas. Using the Research Proposal Form as a framework, teachers and candidates can identify relevant concepts and complex ideas that will inform the research report. Teachers may not be subject specialists in the candidate's chosen research topic area. Therefore, it is important that candidates are able to explain to their teachers how the identified concepts relate to their research report. Although candidates are expected to engage with concepts and complex ideas, they need to make their report accessible to the layperson (see 'Communication' below). If candidates cannot demonstrate a sound grasp of the identified concepts and complex ideas through discussion with a teacher, then they are likely to find it difficult to do that within their report.

In the report referenced above (*Is physician-assisted dying justifiable?*), the candidate utilised the following concepts and complex ideas: Autonomy, Sanctity of Life, Slippery Slope, Hippocratic Oath and Public Policy.

There are still many candidates that do not include a methodology section in their reports. The methodology section assesses a higher order skill that encourages the development of independent enquiry. Candidates should demonstrate an understanding and use of appropriate research methods and methodology. Candidates are often generic in their approach, and references to search engines and data types have no specified relationship to the topic area of the report. To reach the higher attainment levels, candidates need

© 2025

to explain why particular sets of methods are appropriate for specific subject areas. Candidates are expected to engage with the methodology underlying their choice of research methods.

Candidates will often set out their themes in the methodology section and this is perfectly acceptable. However, candidates should not engage with critical evaluation of their source material in this section.

Primary research is not a requirement. It should also be noted that candidates should not be engaging with primary research that may break ethical guidelines or compromise their safety. Teachers should give due consideration to any proposed primary research before giving their approval.

Ideally, the research reports will contain a series of intermediary judgements and a final judgement. It is important that judgements respond directly to the title question posed. Although most research reports contained a final judgement, many did not offer intermediary judgements.

In the research report referenced above (*Are carbon taxes effective?)*, the candidate analysed their title question through three thematic lenses; political, environmental and economic. At the end of each section of the research report, the candidate offered an intermediary judgement that was preceded by a comparison of perspectives (see Questions and Perspectives) pertaining to each identified theme. The comparison of perspectives offered support for the intermediary judgement. The candidate then came to a final judgement in the report's conclusion.

Reflection

Candidates should identify their chosen themes in the introduction and/or methodology. The skill that is being assessed here is the candidate's ability to reflect on why the themes have been selected and how they shape the report. Very few candidates are addressing this in their reports. Below is a strong example of what is required from a research report with the title *'Does Artificial Intelligence pose a threat to marginalised groups?'*. The candidate reflects upon why their themes are important and considers the relationship between them. There are some helpful diagrams on page 15 and 16 of the syllabus that visualise the interplay of topics, themes, issues and perspectives.

'The hypothesis is that generally AI worsens inequality due to biases in training data. The report analyzes themes from healthcare, economic and legal perspectives because their impacts are often realized immediately, as opposed to areas like education or social inclusion, where it can take time for the impacts to show. These themes – healthcare, legal systems, and economic opportunities – cover sectors which have a sizable impact on marginalized groups. For example, healthcare impacts life expectancy and any errors in that could have severe consequences. The legal system oversees patrol, arrests and freedom, and biases in AI could lead to systemic racism and inequality. Exclusion in economic opportunities, which determines livelihoods, can lead to poverty which can widen societal divides. Also, these sectors are interlinked. For example, exclusion from economic opportunities can reduce healthcare access. And biased legal decisions can hinder economic growth. So, by focusing on these themes, I can provide a nuanced and comprehensive analysis of the multifaceted impact AI has. For example, wrong diagnosis in the healthcare sector can have lasting consequences, and in the legal sector it may amplify racism through the 'machine said it, so it must be correct' mentality. Similarly, AI-powered hiring systems can reinforce income inequality and reduce workforce diversity, hindering economic growth and innovation. The report is structured into three sections, one per theme. Each section presents contrasting perspectives, concludes with a summary, and the entire report ends with an overall conclusion and reflection.'

The next area reflection for assessment is the candidate's ability to reflect upon the strengths and limitations of their conclusion. Although many candidates considered strengths or weaknesses of the process behind producing the research report, they did not always reflect explicitly on the strengths and limitations of their conclusions. This is creditworthy but not at the higher assessment levels.

There is no requirement for candidates to offer suggestions for further research. Although ideas for further research implicitly hint at weaknesses within the report, generally any further research suggestions did not link to improving the report's conclusions.

Many candidates are presenting the type of reflection on perspectives seen in components two (Essay) and three (Team Project). This type of reflection focuses on how the perspectives have consolidated or changed the candidate's original point of view. In other cases, candidates offered a descriptive account of what had been learned during the process of producing the report. This is creditworthy, but only at the lower assessment levels.

© 2025

Several candidates offered solutions or future recommendations which is not a requirement.

Communication

There are several strands to this area of assessment. The first assessment area pertains to the report's structure. Candidates need to construct their introductions carefully. The terms and scope of the report that are set out in the introduction should be adhered to in the report. For example, there were cases where candidates stated in the introduction which themes would inform the research report and then didn't refer to them again.

Content pages and headings are not essential, but they do provide a useful framework. Headings, in particular, are an effective way for the reader to navigate the report. Candidates should also use discourse markers, if effectively done these will guide the reader through the report. To achieve at the higher attainment levels candidates must follow the guidance in the syllabus (see page 24) which states, 'the report must be written in continuous prose and must not exceed 5000 words. An accurate word count must be clearly stated.'.

Another communication skill being assessed is how candidates engage with subject specific terminology in a way that makes this accessible to the lay reader. Reports should be written for an audience that does not have expertise in the topic area. Subject specific terminology will be used if candidates engaged with concepts and complex ideas (see Concepts, Research Methods and Judgements above). Making the terminology understandable to the reader through explanations and arguments will demonstrate this aspect of communication skills.

The Harvard referencing system is recommended as it makes it clear to assessors where and how sources are being used to support perspectives. This system has been exemplified in the candidate extract used in the 'Questions and Perspectives' section of this report. It is recognised that different subject areas use different referencing systems and candidates are free to use any appropriate system. Many candidates were able to present effective referencing regardless of which referencing system they chose to use. An effective system is one where each citation has a full reference that is easily located in the bibliography. A full reference means that the reader has enough detail to enable them to find the source without relying on a hyperlink. The references should be set out systematically and logically in the bibliography. The Bibliography should be uploaded as a discrete document and not as part of the Research Log. Also, the Bibliography should not contain critical evaluation of source material.,

GLOBAL PERSPECTIVES & RESEARCH **9239/11**

Paper 1 Written Exam **May/June 2025**

INSERT **1 hour 30 minutes**

INFORMATION

- This insert contains all the resources referred to in the questions.
- You may annotate this insert and use the blank spaces for planning. **Do not write your answers** on the insert.

This document has **4** pages. Any blank pages are indicated.

DC (KAS) 343989/3
© UCLES 2025

The following documents consider issues related to cultural heritage. Read them **both** in order to answer **all** the questions on the paper.

Document A Adapted from: *Can songs save an endangered language?* written by Stephanie Vermillion. Published in 2022 by 'National Geographic Society' (US), a non-profit organization dedicated to funding science and exploration across the planet. The author is a travel and outdoors journalist, filmmaker, and photographer.

For centuries, Central America's Garifuna people have kept their history alive through their ancestors' native language.

Content removed due to copyright restrictions.

This kind of revival is a long, multi-generational road.

Document B Adapted from: *Protection of Cultural Heritage: The Nigerian experience*, written by Seun Lari-Williams and published in 2022 by 'The IP Press', a professional blog about intellectual property (IP) issues. The author is a litigation lawyer in Nigeria and an IP Consultant.

Recently, we have seen news about museums returning stolen artefacts to their country of origin. This has raised the topic of cultural heritage in Nigeria. The Nigerian National Commission for Museums and Monuments (NCMM) is finally receiving much-deserved attention.

According to UNESCO, cultural heritage includes products that can be touched and seen. Some examples are: architecture, paintings, textiles, pottery, books, and sculpture. It also includes aspects of life such as folklore, beliefs, music, dance, traditions, language, and knowledge. Culture is inherited from past generations. Cultural heritage is maintained for the benefit of future generations. Heritage is a source of identity and unity for communities. Cultural heritage can also attract tourists.

Nigeria has a rich cultural heritage, including, drama, music, poetry, and rituals. Places like the Nigerian National Museum and the Centre for Contemporary Art hold many examples of Nigerian heritage. These include paintings, sculptures, coins, and manuscripts.

The cultural heritage of Nigeria faces several challenges. The NCMM manages 51 museums and 65 national monuments and sites. However, Nigeria does not have the resources needed to protect the country's cultural heritage. UNESCO provides international funding and resources to promote culture and protect heritage sites. Nigeria has been managing its cultural heritage for seventy years. Yet, so far, UNESCO's World Heritage List only mentions two places in Nigeria: Osun-Osogbo Sacred Grove and Sukur Cultural Landscape. If Nigeria could get more places onto the list, we could receive more funding.

Colonialism is in the past, but it still impacts cultures and traditions. In colonized nations such as Nigeria, many heritage items were stolen by the colonists. Also, many temples which could have served as interesting heritage sites were destroyed.

Powerful multinational corporations have played a role in the entertainment industry of Nigeria. They have promoted western music and musical instruments, foreign dance styles and dress culture. This has negative impacts on traditional music, dance, and dancers in Nigeria. Also in the fashion industry, traditional clothes are being abandoned.

Another challenge is the mismanagement of cultural resources in Nigeria. This includes thefts from museums, illegal trading, and destruction of cultural heritage. The government, community leaders, academics, and law enforcement agencies do not pay enough attention to these problems. As a result, national monuments and heritage objects are not protected.

The law on cultural heritage is outdated. Nigeria's first law on cultural heritage was the NCMM Act of 1979. The National Assembly of Nigeria is currently discussing this law. Amending the law could reduce cultural heritage violations in Nigeria. The law could include fines and punishments for damaging heritage. Stronger measures and punishments are bound to improve the present situation. They should be welcomed.

Nigeria ranks high when it comes to cultural heritage. This article discussed some of the challenges faced regarding its protection. Nigeria's cultural heritage is vital to the history and culture of its people. However, protecting cultural heritage can be a challenge due to high costs. The Nigerian government should consider raising international awareness about Nigeria's heritage. It should push for recognition of Nigerian items of cultural heritage by UNESCO. Thus, it could gain access to several international funds.

GLOBAL PERSPECTIVES & RESEARCH **9239/11**

Paper 1 Written Exam **May/June 2025**

1 hour 30 minutes

You must answer on the enclosed answer booklet.

You will need: Answer booklet (enclosed)
Insert (enclosed)

INSTRUCTIONS

- Answer **all** questions.
- Follow the instructions on the front cover of the answer booklet. If you need additional answer paper, ask the invigilator for a continuation booklet.

INFORMATION

- The total mark for this paper is 45.
- The number of marks for each question or part question is shown in brackets [ ].
- The insert contains all the resources referred to in the questions.

This document has **4** pages. Any blank pages are indicated.

DC (KAS) 343988
© UCLES 2025

Read **both** documents in the accompanying insert and answer **all** the questions.

You should spend approximately 15 minutes reading **both** documents in the insert before attempting to answer the questions. This is allowed for in the time set for the exam.

Write brief answers to Question 1, using short sentences or bullet points.
Write your answers to Question 2 and Question 3 in continuous prose.

1 Study Documents A and B.

(a) The author of Document A discusses the role of music in saving an endangered language.

Identify **two** individual musicians who have tried to spread the Garifuna language and culture, as given by the author of Document A. [2]

(b) The author of Document B identifies several challenges to the protection of Nigeria's cultural heritage. These include a lack of funding and mismanagement of cultural resources.

Identify **three other** challenges to Nigeria's cultural heritage, as given by the author of Document B. [3]

2 Study Document A.

Assess the strengths and weaknesses of the evidence used by the author of Document A to support her argument that music might save the Garifuna language.

In your answer, include the impact of the evidence on the author's argument. [15]

3 Study Documents A and B.

The two authors present different arguments and perspectives on protecting cultural heritage.

Evaluate the arguments of both authors. In your answer, consider their perspectives and include a reasoned judgement about whether one argument is stronger than the other. [25]

GLOBAL PERSPECTIVES AND RESEARCH **9239/11**

Paper 1 Written Exam **May/June 2025**

MARK SCHEME

Maximum Mark: 45

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2025 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

© Cambridge University Press & Assessment 2025

PUBLISHED

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

© Cambridge University Press & Assessment 2025

GENERIC MARKING PRINCIPLE 5: Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).
GENERIC MARKING PRINCIPLE 6: Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

PUBLISHED

Social Science-Specific Marking Principles
(for point-based marking)

1 Components using point-based marking:

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

a DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
b DO credit alternative answers/examples which are not written in the mark scheme if they are correct
c DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons …).
d DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
e DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
f DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
g DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

© Cambridge University Press & Assessment 2025

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

© Cambridge University Press & Assessment 2025

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

Annotations

Annotation	Meaning
	**Correct, creditworthy point**. Used in Question 1 only.
	**Incorrect point.** Used in Question 1 only
	**Identify type of evidence. (**Without an example) Used in Q2 (AO1a)
	**Example of type of Evidence.** Used in Q2 (AO1a)
	**Strength or weakness of evidence** recognised but with limited explanation**.** Used in Q2 (AO1b)
	**Strength or weakness of evidence** clearly explained. Used in Q2 (AO1b)
	**Impact of evidence** is asserted and not explained. Used in Q2 (AO1c)
	**Shows undeveloped point**. Added to other annotations (EVAL, P, J and U in Q2 and Q3)

© Cambridge University Press & Assessment 2025

Annotation	Meaning
EVAL	**Evaluation of impact of evidence** on argument/perspective and includes a judgement**.** Used in Q2 (AO1c)
K	**Identification of key component of argument.** Used in Q3 (AO1a)
C	**Comparison of key components** from both documents. Used in Q3 (AO1a)
P	**Identification of perspectives** with limited description**.** Used in Q3 (AO1b)
PD	**Analyses by comparing and describing perspectives in both documents.** Used in Q3 (AO1b)
PE	**Analyses by comparing and explaining perspectives in both documents.** Used in Q3 (AO1b)
ND	**Unsupported evaluation of argument.** Used in Q3 (AO1c)
EVAL	**Evaluation of argument** in both documents**.** Used in Q3 (AO1c)
U	**Unsupported judgement.** Used in Q3 (AO1d)
J	**Supported judgement.** Used in Q3 (AO1d). Can also be used in Q2
S	**Structured argument** Used in Q3 (AO3)
NAQ	**Not answering the question.**
REP	**Repetition.** When repeating a point as a summary or simply stating another example that does not develop the evaluation.
SEEN	To show that answers/pages have been assessed.
	**On Page Comment.** Used where necessary to clarify a decision.

© Cambridge University Press & Assessment 2025

Instructions for examiners

The total mark for this paper is 45. **Question 1** assesses AO1 skills.

Question 2 assesses AO1 skills. **Question 3** assesses AO1 and AO3 skills.

Question 1 is points marked using ✓ or ✗. Answers to Question 1 can be brief, using short sentences or bullet points.

Answers to **Question 2 and Question 3** should be written in continuous prose.

For **Question 2 and Question 3** annotate clearly in the left-hand margin according to the specific instructions provided.

Refer to the marking grid at the end of each question to award a mark based on the annotations for each aspect (e.g. AO1a). Record the mark for each aspect (e.g. AO1a) in the right-hand marking panel on RM Assessor.

Indicative content or exemplar responses are provided as a guide. Inevitably, the mark scheme cannot cover all responses that candidates may make for all the questions. In some cases, candidates may make responses which the mark scheme has not predicted. These answers should nevertheless be credited according to their relevance and quality.

The definition of **perspective** used in this syllabus is: a perspective is a coherent world view which is a response to an issue. It is made up of argument, evidence, assumptions and may be influenced by a particular context.

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
1(a)	**The author of Document A discusses the role of music in saving an endangered language.** **Identify two individual musicians who have tried to spread the Garifuna language and culture, as given by the author of Document A.** The question assesses AO1. Answers to **Question 1** can be brief, using short sentences or bullet points. Show a correct answer with ✓ in the text, up to a maximum of two marks. • Andy Palacio • Kevin Ramirez • (either first name or family name or both is acceptable) Do **not** accept: • Alvin Laredo (a tour guide, but nothing says he is a musician) • The Garifuna Collective (a group of musicians) • Liliana Sanchez (a linguist) • Battle of the Drums (a music competition) • Another set of musicians (unnamed group)	**2**

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
1(b)	The author of Document B identifies several challenges to the protection of Nigeria's cultural heritage. These include a lack of funding and mismanagement of cultural resources. Identify **three other** challenges to Nigeria's cultural heritage, as given by the author of Document B. The question assesses AO1. Answers to **Question 1** can be brief, using short sentences or bullet points. Show a correct answer with ✓ in the text, up to a maximum of three marks. • **Colonialism** / Items stolen by **colonists** / Past losses or destruction of **heritage sites** / **temples** • Western Influence / Multi National Corporations / Traditional culture is replaced by external cultures (western music, dress, culture) / **traditional** clothes are being abandoned. • Outdated laws (challenge to protection, not directly to heritage) • Not enough access to **UNESCO** resources / not enough sites on **UNESCO** list / needs more sites on the **UNESCO** list • Nigeria does not have the resources needed to protect the • country's cultural heritage, (because there are large number of museums and sites) *(NOTE: "resources" could refer to more than just funding)* Do **not** accept: • Amending the law (response to challenge/solution) • Including fines and punishments (response to challenge) • Raising awareness (possible solution) • Lack of funding (already mentioned in the question) • Mismanagement of cultural resources (e.g. theft, illegal trading, destruction) (already mentioned in the question) • "Destruction of cultural heritage" • Theft (other than by colonists)	**3**

© Cambridge University Press & Assessment 2025

Question	Answer	Marks

Instructions for Question 2

The question assesses AO1. (Research, analysis and evaluation)

Answers should be written in continuous prose. There is no requirement for candidates to use technical terms to access any level and candidates will NOT be rewarded for their use unless they link them directly to the assessment made. Annotate clearly in the left-hand margin according to the instructions provided below.

There are three aspects to consider when marking the answer:

- **Identify evidence (AO1a).** Candidates should identify a range of types of evidence and give examples. Annotate with **T** if no example given or **EG** if type is given **and** exemplified.

T	**Identify type of evidence.** (Without an example)
EG	**Example of type of evidence.**

- **Analyse strengths and weaknesses of evidence (AO1b).** Candidates should analyse both strengths and weaknesses of a range of evidence used by the author including an explanation. For **limited** explanation use **+** for strength and **–** for weakness. For clear explanation use **EXP**

+	**Strength of evidence** recognised but with limited explanation**.**
-	**Weakness of evidence** recognised but with limited explanation**.**
EXP	**Strength or weakness of evidence** clearly explained.

© Cambridge University Press & Assessment 2025

Question	Answer	Marks

- **Evaluate evidence (AO1c).** Impact of evidence may be **asserted** and not explained **(A)** Evaluation may be **attempted** but not explained **(I ^)** (**I** and **^** are two separate annotations on RM). Candidates may **explain** the impact of evidence on the author's argument/perspective (**I**) and include a **judgement** of its effectiveness. **(I J)**

A	**Impact of evidence** is asserted and not explained.
I ^	**Shows undeveloped point of evaluation.** Evaluation attempted but not explained.
I	**Evaluation of impact of evidence** on argument/perspective**.**
I J	**Evaluation of impact of evidence** on argument/perspective and includes judgement**.**

© Cambridge University Press & Assessment 2025

Marking grid for Question 2

Examiners should allocate a mark for each aspect (AO1a, AO1b, AO1c), using the mark descriptors and required annotations.

AO1a Identify evidence	**Mark**	**Annotations**
Identifies a wide range of different types of evidence with examples	5	4 **EG** or more
Identifies a range of different types of evidence with examples	4	3 **EG**
Identifies a limited range of different types of evidence with examples	3	2 **EG**
Identifies a limited range of evidence, using different types **or** examples	2	2**T** **or** 1**EG**
Identifies one type of evidence	1	1**T**
Identification of evidence is not present. No creditable material.	0	No **T** or No **EG**

AO1b Analyse strengths and weaknesses of evidence	**Mark**	**Annotations**
Analyses strengths and weaknesses of a wide range of evidence with clear explanation	5	2 **+** (or more) and 2 **–** (or more) with 2 or more **EXP**
Analyses strengths and weaknesses of a range of evidence with clear explanation	4	2 **+** and 1 **–** (**or opposite**) with 1 (or more) **EXP**
Analyses strengths and weaknesses of a range of evidence with limited explanation	3	2 **+** and 1 **–** (**or opposite**) with 0 **EXP**
Analyses strengths or weaknesses of a range of evidence with limited explanation	2	[2**+**] **or** [2**-**] **or** [1**+** **and** 1**-**]
Explanation of strengths **or** weaknesses of evidence is limited	1	[1**+**] **or** [1**-**]
No analysis is present. No creditable material	0	No **+** **or** **–** **or** **EXP**

© Cambridge University Press & Assessment 2025

AO1c Evaluate evidence	**Mark**	**Annotations**
Evaluation includes explanation of the impact of evidence on the argument/ perspective and makes a range of reasoned judgements	5	**2 I** (or more) **and I J**
Evaluation includes explanation of the impact of evidence on the argument/ perspective and make a reasoned judgement	4	**2 I** (or more)
Evaluation includes an explanation of the impact of evidence on the argument/ perspective	3	**1 I**
Evaluation is attempted but lacks clarity, and the impact of evidence on the argument/perspective is not explained	2	**1 I ^** (or more)
The impact of evidence on the argument/perspective is asserted and not explained	1	**1 A** (or more)
No evaluation is present. No creditable material	0	No **A, I^, I or I J**

© Cambridge University Press & Assessment 2025

AO1 Research, analysis and evaluation

Question	Answer	Marks
2	**Assess the strengths and weaknesses of the evidence used by the author of Document A to support her argument that music might save the Garifuna language.** **In your answer, include the impact of the evidence on the author's argument.** **Indicative content** No set answer is expected, and examiners should be flexible in their approach. Candidates may include some of the indicative content below. • *[annotated example]* **Good use of a range of relevant sources:** The author provides information and views from a range of **relevant and reliable sources**. **(+)** For information about endangered languages, she quotes UNESCO and Liliana Sanchez a linguist and professor. For information about the campaign to save the Garifuna culture and language through music, she turns to Alvin Laredo, (Garifuna tour guide) Andy Palacio (Garifuna singer and UNESCO Artist of Peace) and Kevin Ramirez (Garifuna musician and producer) **(EG).** These sources are reliable as they have relevant first-hand experience of the topic being discussed, which makes them experts in these questions as they have more experience than the author herself. **(EXP).** This in turn gives the reader confidence that the author she is not just presenting her own ideas and opinion, but that she is presenting a well-supported argument with backing and corroboration from reliable sources, because the reader can see that all the people mentioned are very close to the topic, and therefore the reader will believe what they say. **(I)** **Indicative list of possible strengths and weaknesses** This list is **not** exhaustive, and candidates may make other useful and correct comments about the evidence in the document	**15**

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
2	**Strengths** • **Place of Publication – Authoritative publication:** *National Geographic is a well-known organisation.* • **Place of Publication – Neutral publication**. *National Geographic is a non-profit, so may have no vested interest.* • **Background of Author** - *Experience in travel, therefore, knows about different societies.* • **Historical background** *(back to the 1600s) - helps reader to understand the context very clearly.* • **Use of figures** to illustrate scale of problem, *e.g. only 100 000 Garifuna speakers remain.* • Reference to **well-known and credible organisations** *e.g. UNESCO* • **Named sources**, e.g. *linguist Liliana Sanchez.* • **Credible sources,** *e.g. Andy Palacio is recognised as UNESCO Artist of Peace.* • Testimony from **relevant people with first-hand experience,** e.g. *Alvin Laredo is a Garifuna tour guide from Belize, Andy Palacio is a Garifuna musician. Kevin Ramirez is a Garifuna musician and producer based in New York,* • **Expert relevant academic sources,** e.g. *Liliana Sanchez is a professor at a named Uni (Illinois) who gives an expert opinion.* • The author provides **background information** to give the reader an understanding of how the Garifuna culture and language developed and then became endangered. • **Some direct quotes**, *e.g. "If you're losing your language, you're losing your roots"; "I'm Black, but the Black Americans didn't embrace me because I spoke Spanish. I spoke Spanish, but Latinos didn't embrace me because I'm Black."* • **Clear definitions** e.g. of Punta Rock, *"Traditional punta relies heavily on drums and maracas. It echoes the music of African ancestors. Punta rock is similar, but with a keyboard, electric guitar, and horns. It is the perfect mix for the world stage."* • **Relevant references to the connection between language and culture:** *Ramirez struggled with his identity. "I'm Black, but the Black Americans didn't embrace me because I spoke Spanish."* • **Relevant anecdotal evidence** from Kevin Ramirez about the difficulties he faced as an immigrant and how Garifuna music helped him to find an identity.	

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
2	**Weaknesses** • The **author's background** as a travel journalist and photographer is not strong on its own. She depends on others to provide her with views, information, and anecdotes. She is not a not a musician, not a musicologist, not an expert. • Some **vague** dates and time references: "*1600s", "late 1700s", "for two decades", "around that time"* • Some information is **not recent**, *e.g. UNESCO status in 2001, Garifuna Collective in 2007.* • Some information is **not dated**, e.g. *foundation of the Battle of the Drums* • Some **unidentified experts**, e.g. *"Linguists estimate that…"* • **Limited** use of **statistics** (only one: *100 000)* • **Estimated evidence, which may not be correct** e.g. *Linguists estimate that only 100 000 Garifuna speakers remain.* • **Rounded** or **vague figures**: *only 100 000 Garifuna speakers remain.* • **Unexplained ideas**: it is not explained how *"exile, decades of modernization, and intermarriage between cultures lead to loss of Garifuna Speakers"; "They help elementary and high schools in Belize teach the Garifuna culture and language through music and song."* • Some **reported speech** where **quotation** would be more convincing, e.g*. Liliana …. says that at-risk languages can be saved if they are used.* • **Some unspecified references: "***one of today's top Garifuna record labels"; "international music awards""* • Some **unexplained or vague** ideas, *'The Collective put Garifuna on the international map''; "history is passed down, not just by words, but by song and dance"; "make Garifuna Cool"* Some **unnamed or unspecified people***., e.g., "Another set of musicians…"*

Question	Answer	Marks

Instructions for Question 3

The question assesses AO1 (Research, analysis and evaluation) and AO3 (Communication).

Answers should be written in continuous prose. There is no requirement for candidates to use technical terms to access any level and candidates will NOT be rewarded for their use unless they link them directly to the assessment made.

A perspective is made up of argument, evidence and assumptions and may be influenced by a particular context.

Annotate clearly in the left-hand margin according to the instructions provided below.

There are five aspects to consider when marking the answer:

- **Identify and compare key components of arguments (AO1a).** Candidates should identify a range of key components of arguments from both documents. Annotate with **K** if key component is identified for one document and **C** if key component is compared for both documents.

K	**Identification of key component of argument** for one document
C	**Comparison of key components** from both documents.

- **Analyse and compare perspectives (AO1b).** Candidates should analyse by identifying, describing and explaining the perspectives given in both documents. **Identification only** (**P ^**), identification with **limited description** (**P**), **comparing** and **describing** in **both** documents (**PD**) and **comparing** and **explaining** in **both** documents (**PE**).

P ^	**Identification of perspectives** with no description**.**
P	**Identification of perspectives** with limited description**.**
PD	**Analyses by comparing and describing perspectives in both documents.**
PE	**Analyses by comparing and explaining perspectives in both documents.**

© Cambridge University Press & Assessment 2025

Question	Answer	Marks

- **Evaluate arguments (AO1c).** Candidates should aim to evaluate key components of arguments with clearly illustrated and balanced reference to **both documents**. Evaluation may be **unsupported** (asserted) (**ND**). Evaluation includes illustration with reference to both documents. (**EVAL**)

ND	**Unsupported evaluation of argument.**
EVAL	**Evaluation of argument** in both documents**.**

- **Judgement about argument and perspective (AO1d).** Candidates should aim to give a reasoned and supported answer which includes intermediate conclusions and a main conclusion. The judgement may be **unsupported** (**U ^ or U**)**, partly supported** (**J ^**) **or clearly reasoned and supported** (**J**)

U ^	**Unsupported judgement –** stated only
U	**Unsupported judgement –** with reasoning
J ^	**Partly supported judgement** - with reasoning
J	**Supported judgement –** with reasoning

- **Communication (AO3)** A candidate should aim to produce a clearly expressed, well-structured and logical argument that is focused throughout on the question.

Structure should include introduction, clear paragraphs and conclusion, should flow and answer the question. Each paragraph should follow on logically and contain a separate point. Each new idea should be clearly indicated - preferably in a new paragraph.

"Logical" means that it is easy to follow the argument as there are no sudden changes of direction leading to confusion in the reader.

No annotation is required except **NAQ** to show not linking to the question. **The mark should be selected by using the guidance that follows the mark tables. Choose the most appropriate descriptor in the marking grid.**

NAQ	**Not answering the question**

© Cambridge University Press & Assessment 2025

Marking grid for Question 3 - AO1 Research, analysis and evaluation

AO1a Identify and compare key components of arguments	**Mark**	**Annotations**
Compares a wide range of key components of arguments from both documents	5	3 **C** or more
Compares a range of key components of arguments from both documents	4	2 **C**
Compares a limited range of key components of arguments from both documents	3	1 **C**
Identifies key components of arguments with no comparison	2	2 **K** or more
Limited identification of key components of arguments with no comparison	1	1 **K**
No identification of arguments. No creditable material	0	No **K, C**

AO1b Analyse and compare perspectives	**Mark**	**Annotations**
Analyses by comparing and explaining the perspectives given in both documents	5	**1 PE** or more
Analyses by comparing and describing the perspectives given in both documents	4	**1 PD** or more
Identifies and compares both perspectives but with limited description	3	**2 P** (one for **each** Doc)
Identifies one perspective but with limited description	2	**P**
Identifies one perspective with no description	1	**P ^**
No identification of perspectives. No creditable material	0	**No P^, P, PD or PE**

© Cambridge University Press & Assessment 2025

AO1c Evaluate arguments	**Mark**	**Annotations**
Evaluation of key components of arguments is illustrated by clear, balanced reference to both documents	5	**4 or more EVAL** (2 or more for each Doc)
Evaluation of key components of arguments is illustrated by clear reference to both documents but lacks balance	4	**3 or more EVAL** (at least one for each Doc)
Evaluation of key components of arguments with limited reference to both documents	3	**2 EVAL** (both docs) or 1 **EVAL** and **1 ND** (both docs)
Evaluation of arguments is unsupported (asserted) but refers to both documents	2	**2 ND** refers to both Docs
Evaluation of arguments is unsupported (asserted) and only refers to one document	1	**1 ND**
No evaluation is present. No creditable material	0	No **ND or EVAL**

AO1d Judgement about argument and perspective	**Mark**	**Annotations**
Judgement is clearly reasoned and supported. Includes intermediate conclusions and a main conclusion	5	**J or J ^** intermediate **and J** in the final conclusion
Judgement is clearly reasoned and supported. Includes **either** intermediate conclusion(s) **or** a main conclusion	4	**J** intermediate **or** in the final conclusion
Judgement is reasoned but is only partly supported. Includes **either** intermediate conclusion(s) **or** a main conclusion	3	**J ^** intermediate **or** in the final conclusion
Judgement is reasoned but not supported	2	**U**
Judgement is stated without reasons or support	1	**U ^**
No judgement is made. No creditable material	0	**No U^, U, J^ or J**

© Cambridge University Press & Assessment 2025

AO3 Communication

Communication	Mark	Guidance
Produces a clearly written, well-structured and logical argument that is focused throughout on the question	5	Meets the descriptor – and contains no **NAQ**
Produces a clearly written, well-structured argument that links to the question	4	Meets the descriptor
Produces a clearly written argument with uneven structure that links to the question	3	Meets the descriptor
Produces an argument that lacks clarity and structure and does not always link to the question	2	Meets the descriptor
Communication is cursory or descriptive and lacks structure	1	Meets the descriptor
No creditable material	0	Meets the descriptor - **NAQ** throughout

Examiners should allocate a mark for each aspect (AO1a, AO1b, AO1c, AO1d and AO3), using the mark descriptors and required annotations.

© Cambridge University Press & Assessment 2025

Guidance for awarding marks for AO3 in Question 3.

Note: 'clearly written' refers to the content and the ease of being able to follow the candidates' argument. It should be thought of as: "**clearly expressed**".

The quality of handwriting should not be considered as a factor when awarding marks. This is not what clearly written means in the descriptors.

If a candidate makes little attempt to answer the question and there are several instances of NAQ (e.g. was very descriptive or wrote an essay on their own opinion of the subject matter) the **maximum** score is **2 marks.**

If a candidate writes very little/ wrote in bullet points/has limited content that addresses the question the **maximum score** is **2 marks.**

If a candidate makes no attempt to develop an argument **at all**, the **maximum** score is 1 mark.

If a candidate writes in continuous prose, expressed themselves clearly and addressed the question, **start at 3 marks –** then consider if it better fits the descriptions above or below 3 marks. If the answer is **not** clearly expressed or **focussed mainly on one document**, it lacks clarity **and** has uneven structure and may only be worth **2 marks.**

If the answer has an introduction, clear paragraphs, considers **both documents in a balanced way,** reaches **a judgement** and generally links to the question it could be worth **4 marks.**

If the answer contains the criteria for 4 marks above, **is logical and has no irrelevant content (No NAQ)** it could be worth **5 marks**.

Question	Answer	Marks
3	**The two authors present different arguments and perspectives on protecting cultural heritage.** **Evaluate the arguments of both authors. In your answer, consider their perspectives and include a reasoned judgement about whether one argument is stronger than the other.** No set answer is expected, and examiners should be flexible in their approach. Candidates may include some parts of the following indicative content. **Indicative content – Perspectives** • *[annotated example]* Both authors start from a similar viewpoint, that cultural heritage should be protected, and both focus on a specific cultural heritage. However, the loss of heritage is in a different context in the two documents. The difference between their two perspectives is that Doc A focuses on culture being lost by communities living abroad, whereas Doc B focuses on culture being lost within a country. Stephanie Vermillion (Doc A) focusses on a heritage of the Garifuna people, lost due mainly to exile and the impact of diaspora, **(PD)** whereas Seun Lari-Williams (Doc B) concentrates on national heritage within Nigeria, lost to impacts caused by incomers and lack of interest. **(PD)** • Though Doc A is written by someone from outside the culture (Stephanie Vermillion), she makes the argument more personal by concentrating on views and experiences of Garifuna people themselves; suggesting that they have found the solution and may be on the way to success. Stephanie may believe that saving a language through music is an important way of preserving cultural heritage. She may think that cultural heritage is one of the most important things we need to do for societies which struggle to survive in a globalising world. **(PE)** On the other hand in Doc B, Seun Lari-Williams presents his own view, as a Nigerian, from within the culture. However, he keeps the perspective more general and less personal, providing more detail on the causes of loss, suggesting that there needs to be a range of official approaches to addressing the problem. He believes this as he has studied how Nigerian cultural artefacts have been lost or damaged, so he has experience of this and he wants to change this, and he has studied how this change could occur. Lari-Williams has looked in detail at the loss of cultural heritage in Nigeria and believes that changes to the law are necessary to help halt this loss. **(PE)**	**25**

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
3	**Indicative content - Arguments** No set answer is expected, and examiners should be flexible in their approach. At each point of comparison, **candidates may argue that either Document is stronger, or they are equally strong**. Candidates may include some of the following indicative content. • *[annotated example]:* **Named Sources:** Stephanie Vermillion (Doc B) makes more use of information and views from **named sources;** about relevant details of the campaign to save the Garifuna culture and language, from Alvin Laredo, and Kevin Ramirez, as well as general information about endangered languages from an expert: Liliana Sanchez a linguist and professor. This supports her argument that music can save an endangered culture. **(EVAL)** However, Seun Lari-Williams (Doc B) argument is less well-supported. **(C)** He refers to bodies such as UNESCO but depends on his own knowledge for most information about Nigeria, providing no sources for the majority of the information and views provided. So, the reader is less clear about whether the information provided in Doc B is reliable. **(EVAL)** The use of a range of named sources makes Doc A stronger than Doc B. **(J)** **Indicative list of components of the argument.** This list is **not** exhaustive, and candidates may make other useful and correct comments about components of the argument. • **Background of the author**: Doc B is written by Seun Lari-Williams, a Nigerian litigation lawyer and IP Consultant. This gives him the ability to see, personal experience and knowledge of the situation in Nigeria. Whereas Stephanie Vermillion (Doc A) is a travel journalist without stated links to Central America or the Garifuna people. • **Place of publication:** Doc B appears in a blog about IP issues, which does not seem to have much connection to the topic. Doc A appears in National Geographic, which is perhaps more closely relevant to the subject. • **Date of publication and of evidence:** Both docs were published in 2022, so both quite recent. However, Doc A does not include any recently dated evidence. Doc B mentions news reported "recently" but does not elaborate on this and does not include any other dates. • **Definitions of ideas and concepts:** Doc B has clear definitions and examples of "cultural heritage" including Nigeria's "rich heritage"; Doc A defines "punta rock" and also gives examples of "Garifuna culture" • **Use of named sources:** Doc A has individual people as named sources: Alvin Laredo (tour guide), Liliana Sanchez (academic), Andy Palacio (musician), Kevin Ramirez (musician). There are no individual named sources in Doc B.	

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
3	• **References to named places:** Only two places are mentioned in Doc B: Osun-Osogbo Sacred Grove and Sukur Cultural Landscape. There are multiple geographical references in Doc A. • **Reference to international organisations:** Both docs refer to UNESCO. • **Historical background information** Doc A has clearer background, explaining about history of exile of Garifuna people. Doc B tells us colonialism is in the past but gives little detail about this. • **Limited geographical scope:** Both Docs focus primarily on one culture or country, but Doc A does also refer to other areas of North and Central America. Doc B makes only passing reference to "colonised countries such as Nigeria": other countries in Africa are not mentioned at all. • **Some broad and unsupported claims:** Doc B claims that "Heritage is a source of identity and unity for communities. Cultural heritage can also attract tourists". Doc A claims that "the Collective put Garifuna on the international map". Neither of these is well supported. • **Use of quantitative data:** There is not much of this in either document. Doc A mentions a rounded number: 100 000 Garifuna Speakers. Doc B mentions 51 museums and 65 national monuments and sites. • **Some clear explanations:** Though the two documents concentrate on different aspects of the issue, they both provide clear explanations: Doc A explains the ways music is being used to revive the Garifuna language; Doc B explains the challenges to Nigerian cultural heritage. • **Some vague or unspecified examples:** Doc A mentions "one of today's top Garifuna record labels" but does not name it. Doc B mentions "temples which could have served as interesting heritage sites" but does not name them. • **Some ideas or concepts are not explained, elaborated or exemplified**, especially in Doc B, where it is claimed that western fashion has reduced the use of traditional clothes. • **Clear call to action:** Doc B makes it clear what action should be taken (last paragraph). Doc A is less clear about this. • **Lack of Counterargument:** Neither provides any counterargument nor opposing perspective on their argument. • **Style of Writing:** Doc B is written in a mostly formal and factual style, while Doc A includes more informal language. "you're losing your roots"; "cool"; "punta rock did just that" and relates to the reader in a more familiar and emotive way, e.g. "Will music Save the Garifuna language? Time will tell."	

© Cambridge University Press & Assessment 2025

Question	Answer	Marks
3	**Indicative content - Judgement** *[annotated example]* A candidate may conclude that Doc B is stronger because Seun Lari-Williams' provenance is stronger, he is based in Nigeria, has local knowledge, and understands the history and current situation from an insider's point of view; whereas Doc A is written by a journalist who is providing others' views to make her argument. **(J)** A candidate may conclude that Doc A is stronger because Stephanie Vermillion provides more varied evidence from a range of different sources, with personal insights from Garifuna people. Meanwhile, Doc B provides a range of evidence, often in the form of lists, with no sources for much of the information about Nigeria. Neither Doc A or Doc B is stronger, they have a similar narrow focus on one culture, without a global view. Both blame colonialism for loss of cultural heritage. At the same time they are focussed on very different contexts of loss of cultural heritage, one in diaspora and one internal and at state level.

The documents below consider issues related to medical ethics and priorities. Read them both in order to answer all the questions on the paper.

Document A: adapted from 'Robot niche expands in senior care', an article written by Mai Iida, published in the *Japan Times* in 2013. The author is a journalist.

Japan's population is ageing rapidly. So, more practical and affordable robots are being developed to help senior citizens handle daily tasks and to cope with a predicted shortage of caregivers (care workers).

The Japanese government estimates that the number of people in Japan aged 65 years or above will rise by around 7 million between 2010 and 2025, when they will be 30% of the overall population. The government predicts that around 2.5 million caregivers will be required to look after the elderly. The government also reports that many caregivers have to give up work. This is because 70% of them suffer from back pain due to constantly lifting the elderly between beds and wheelchairs.

The government has allocated ¥2.4 billion ($24 million) in the 2013 budget to help develop nursing care robots and increase their use. The Japanese Ministry of Economy, Trade and Industry (METI) will give substantial financial help to 24 companies to develop 'nursing care robot equipment'. This includes the development of a device to help carry the elderly, a mobile flush lavatory and a wireless sensor to help track senior citizens who wander off.

The deputy director of METI's industrial machinery division noted that high prices have been a major problem in introducing nursing care robots for the elderly, with some of the machines costing over ¥10 million. He said, 'We aim to offer cheap robots widely, costing between ¥100,000 and ¥200,000. By 2018, the subsidised production should greatly increase and so people will be able to afford them. We aim to achieve a situation where every senior citizens' home will have at least one robot.'

The evidence of using communication robots so far has been very positive. At the Fuyouen senior citizens' home in Yokohama, a humanoid 40 cm-tall robot sings, dances and plays games and quizzes with the residents. The caregivers at the home noticed that these robots have a positive psychological effect, bringing smiles to the faces of even clinically-depressed residents. An 88-year-old resident said, 'I learned a lot from him.' A 92-year-old resident told a baby seal robot, 'You're so cute, look at me!' It responded by moving its head and legs, squealing and blinking its eyes.

Referring to these communication robots, the head of the Fuyouen home said, 'I find them very effective.' He also hopes that practical robots will be developed to help caregivers lift and carry elderly residents. 'I think caring, and the warmth of physical contact can never be replaced by robots. But with many in the nursing care industry suffering from back pain, I am hoping that robots will be developed to enable caregivers to work longer.' One caregiver said that if practical robots are developed to interact with human beings, this will widen the nursing care services they can offer.

Given this evidence, it is clear that there is an increasing need to design more practical and affordable robots to help senior citizens with daily tasks, as well as to cope with a projected shortage of caregivers. So, we need to recognise the benefits that these robots will bring.

© UCLES 2020

Document B: adapted from 'Legal and Ethical Issues relating to Healthcare Robots', an online article written by Dr Catherine Easton in 2013, on the UK-based Society of Computers and Law website. The author is a UK university lecturer in Law.

Robots can now provide a realistic solution to certain aspects of healthcare provision. Robotic mobility aids, such as wheelchair robots and manipulator arms, are used in physical therapy. Also, emotional and psychological support can be given by systems designed to help children's rehabilitation through interaction and storytelling.

The time has now come that we need to look at legal and ethical issues relating to the use of robotics in healthcare, because of their planned rapid development and the risk that this brings. Robot development has been driven by the growing ageing population and a global need to cut the cost of health care. The US Government's '*Roadmap for US Robotics*' highlights the potentially significant economic benefits from using robotics in healthcare. Over a hundred US hospitals advertise robotic surgery, often focusing on its benefits, but overlooking potential risks.

Firstly, there are problems of safety standards and legal responsibility. Safety standards need to be flexible to keep up with technology. In 2005 the International Standards Organisation set safety standards for non-medical personal care robots. Also, when Professor Asaro presented research at the 2007 International Conference on Robotics and Automation, he said legal responsibility for healthcare robots could be the same as for any other manufactured product. However, in healthcare it is more difficult to predict the behaviour of the humans with whom the robot is interacting, especially children. Also, who is responsible if a robotic system malfunctions and a patient, medical practitioner or equipment is damaged? It is possible to blame designers, programmers, medical staff and even the patient.

Another problem is of trust. Robots in the healthcare environment will not be successful if they are not fully trusted by both patients and practitioners. Patients need to feel comfortable with the technology and be able to rely upon it. In Japan, where over 23% of the population is aged 65 and above, there is a great shortage of care workers. Even in Japan, which has led the way in robotic development, responses to robot aides have not been entirely positive. Certain systems have been removed from hospitals for ethical reasons due to patients' lack of trust and their desire for human interaction.

Finally, there is a problem of psychological bonding. When patients use robots daily, they can project human qualities onto the robots and feel a bond. In terms of ethics, a patient who feels a personal attachment to a robot may become distressed if the robot's behaviour changes. Researchers from MIT speaking at the We Robot Conference, University of Miami, argued that if a robot is damaged or even reprogrammed this could have a detrimental effect on the mental well-being of its user. So, healthcare workers need to be aware of the possible problems of patients bonding with robots.

These problems of legal responsibility, safety standards, trust and psychological bonding need to be solved before healthcare robotics can provide a realistic solution. So, in the meantime, questions need to be raised about the ethics of using healthcare robots.

Paper 1 Written Exam **For examination from 2023**

MARK SCHEME

Maximum Mark: 45

Specimen

This document has **12** pages. Any blank pages are indicated.

© UCLES 2020

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

© UCLES 2020

Social Sciences and Humanities Subject-Specific Marking Principles
(for point-based marking)

1 Components using point-based marking

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

a DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term).
b DO credit alternative answers/examples which are not written in the mark scheme if they are correct.
c DO credit answers where candidates give more than one correct answer in one prompt/ numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require n reasons (e.g. State two reasons …).
d DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
e DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
f DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. corrasion/corrosion).

2 Presentation of mark scheme

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;), bullet points (•) or figures in brackets (1) separate different points.

3 Annotation

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

© UCLES 2020

Instructions for examiners

The total mark for this paper is 45.

Question 1 assesses AO1 skills.
Question 2 assesses AO1 skills.
Question 3 assesses AO1 and AO3 skills.

Question 1 is points marked. Answers to Question 1 can be brief, using short sentences or bullet points.

Answers to Question 2 and Question 3 should be written in continuous prose.

For Question 2 and Question 3, award a mark for each aspect of each AO separately using the marking grids. To use the marking grid, start from the top level for each aspect and read down until you meet the level that suits the response.

Indicative content or exemplar responses are provided as a guide. Inevitably, the mark scheme cannot cover all responses that candidates may make for all of the questions. In some cases candidates may make responses which the mark scheme has not predicted. These answers should nevertheless be credited according to their quality.

The definition of **perspective** used in this syllabus is: a perspective is a coherent world view which is a response to an issue. It is made up of argument, evidence, assumptions and may be influenced by a particular context.

© UCLES 2020

Question	Answer	Marks
1(a)	**The author of Document A mentions different types of robot.** **Identify <u>two</u> robots that are already being used.** The question assesses AO1. Answers to Question 1 can be brief, using short sentences or bullet points. Show a correct answer with ✓ in the text up to a maximum of two marks. *Any **two** of the following:* • 40 cm-tall humanoid robot • Baby seal robot • Communication robot Do not accept: • Practical robots (examples of nursing care robots such as carry, flush, track, as these are being developed so are not currently in use)	**2**
1(b)	**The author of Document B refers to a range of ethical issues with using healthcare robots.** **Identify <u>three</u> ethical issues mentioned by the author.** The question assesses AO1. Answers to Question 1 can be brief, using short sentences or bullet points. Show a correct answer with ✓ in the text up to a maximum of three marks. *Any **three** of the following:* • Potential risks • Psychological bonding • Lack of trust • Desire for human interaction • Can cause distress • Detrimental effect on mental well-being Do not accept: • Lack of legal responsibility (these are legal issues not ethical ones) • Problems of safety standards (these are safety issues not ethical ones)	**3**

Marking grids for Question 2

Examiners should allocate a mark for each aspect of AO1 (AO1a, AO1b, AO1c), using the mark descriptors.

AO1 Research, analysis and evaluation

AO1a Identify evidence	**Mark**
Identifies a wide range of different types of evidence with examples	5
Identifies a range of different types of evidence with examples	4
Identifies a limited range of different types of evidence with examples	3
Identifies a limited range of evidence, using different types **or** examples	2
Identifies one piece of evidence	1
Identification of evidence is not present. No creditable material.	0

AO1b Analyse strengths and weaknesses of evidence	**Mark**
Analyses strengths and weaknesses of a wide range of evidence with clear explanation	5
Analyses strengths and weaknesses of a range of evidence with clear explanation	4
Analyses strengths and weaknesses of a range of evidence with limited explanation	3
Analyses strengths **or** weaknesses of a range of evidence with limited explanation	2
Explanation of strengths **or** weaknesses of evidence is limited	1
No analysis is present. No creditable material	0

AO1c Evaluate evidence	**Mark**
Evaluation includes explanation of the impact of evidence on the argument/perspective and makes a wide range of reasoned judgements	5
Evaluation includes explanation of the impact of evidence on the argument/perspective and makes reasoned judgements	4
Evaluation includes an explanation of the impact of evidence on the argument/perspective	3
Evaluation is attempted but lacks clarity, and the impact of evidence on the argument/ perspective is not explained	2
The impact of evidence on the argument/perspective is asserted and not explained	1
No evaluation is present. No creditable material	0

© UCLES 2020

Question	Answer	Marks
2	**Assess the strengths and weaknesses of the evidence used by the author of Document A to support their claims about the development of robotic healthcare equipment.** **In your answer include the impact of the evidence on the author's argument.** The question assesses AO1. Answers to Question 2 should be written in continuous prose. Use the **Marking grids for Question 2** to assess Question 2. There is no requirement for candidates to use technical terms to access any level and candidates will NOT be rewarded for their use unless they link them directly to the assessment made. No set answer is expected, and examiners should be flexible in their approach. Candidates may include some of the following indicative content. **Indicative content** **Strengths** • [Example only] **Evidence from first-hand sources:** (Head of the Fuyouen senior citizens' home, caregivers and two residents of the home.) All have experience of using communication robots and explain how useful they are as they have the ability to see. This gives the reader confidence that the author's argument is supported by reliable sources who know what they are talking about. • **Use of expert sources:** e.g. deputy director of METI and use of official sources e.g. Japanese government. • **Plausible evidence:** e.g. projected growth of caregivers required. • **Use of statistics:** e.g. '30% of the overall population ...' and '... allocated ¥2.4 billion ...' • **Selection of evidence:** the author has no apparent vested interest as she is reporting the story as a journalist. • **Motive to be accurate:** as a journalist she would aim to preserve her reputation and that of the Japan Times. **Weaknesses** • **Lack of representativeness:** e.g. experience of the one reported care home may not be typical in Japan or in the wider world. • **Lack of balance:** e.g. limited evidence of drawbacks of using robots in care homes. Selected evidence is for the use of robots in care homes. • **Absence of context for quantitative data:** e.g. population statistics (Without knowing the total population of Japan we do not know whether 30% of the overall population is a high or low number.) • **Some vague statistics:** e.g. robots costing between ¥100 000 and ¥200 000 which is a wide range. • **Some estimated statistics:** e.g. The Japanese government estimates that the number of people over 65 will rise by about 7 million ... • **Unreliable sources:** e.g. elderly residents may not have a detailed understanding of the value of the robots.	**15**

Marking grids for Question 3

Examiners should allocate a mark for each aspect of AO1 (AO1a, AO1b, AO1c, AO1d) and AO3, using the mark descriptors.

AO1 Research, analysis and evaluation

AO1a Identify and compare key components of arguments	**Mark**
Compares a wide range of key components of arguments from both documents	5
Compares a range of key components of arguments from both documents	4
Compares a limited range of key components of arguments from both documents	3
Identifies key components of arguments with no comparison	2
Limited identification of key components of arguments with no comparison	1
No identification of arguments. No creditable material	0

AO1b Analyse and compare perspectives	**Mark**
Analyses by comparing and explaining the perspectives given in both documents	5
Analyses by comparing and describing the perspectives given in both documents	4
Identifies and compares both perspectives but with limited description	3
Identifies one perspective but with limited description	2
Identifies one perspective with no description	1
No identification of perspectives. No creditable material	0

AO1c Evaluate arguments	**Mark**
Evaluation of key components of arguments is illustrated by clear, balanced reference to both documents	5
Evaluation of key components of arguments is illustrated by clear reference to both documents but lacks balance	4
Evaluation of key components of arguments with limited reference to both documents	3
Evaluation of arguments is unsupported (asserted) but refers to both documents	2
Evaluation of arguments is unsupported (asserted) and only refers to one document	1
No evaluation is present. No creditable material	0

© UCLES 2020

AO1d Judgement about argument and perspective	**Mark**
Judgement is clearly reasoned and supported. Includes intermediate conclusions and a main conclusion	5
Judgement is clearly reasoned and supported. Includes **either** intermediate conclusion(s) **or** a main conclusion	4
Judgement is reasoned but is only partly supported. Includes **either** intermediate conclusion(s) **or** a main conclusion	3
Judgement is reasoned but not supported	2
Judgement is stated without reasons or support	1
No judgement is made. No creditable material	0

AO3 Communication

Communication	**Mark**
Produces a clearly written, well-structured and logical argument that is focused throughout on the question	5
Produces a clearly written, well-structured argument that links to the question	4
Produces a clearly written argument with uneven structure that links to the question	3
Produces an argument that lacks clarity and structure and does not always link to the question	2
Communication is cursory or descriptive and lacks structure	1
No creditable material	0

© UCLES 2020

Question	Answer	Marks
3	**The two authors present different arguments and perspectives about the development of robotic healthcare equipment.** **Evaluate the arguments of both authors. In your answer, consider their perspectives and include a reasoned judgement about whether one argument is stronger than the other.** The question assesses AO1 and AO3. Answers to Question 3 should be written in continuous prose. Use the **Marking grids for Question 3** to assess Question 3. There is no requirement for candidates to use technical terms to access any level and candidates will NOT be rewarded for their use unless they link them directly to the assessment made. By perspective we mean a coherent world view in response to an issue. A perspective is different from a theme. No set answer is expected, and examiners should be flexible in their approach. Candidates may include some of the following indicative content. **Indicative content – Perspectives** Doc A has a limited perspective as it only considers the use of robots in healthcare in Japan, in particular in one named care home. Doc B is more international with reference to the US as well as Japan and includes evidence from the International Conference on Robotics and Automation. Doc A only considers the positive outcomes of using robots in healthcare and has a definitive conclusion which lacks balance. Doc B gives the benefits of robots in healthcare but then considers the counterargument relating to legal, safety and ethical concerns leading to a more open conclusion. **Indicative content – Arguments** No set answer is expected, and examiners should be flexible in their approach. At each point of comparison, candidate may argue that either Document is stronger, or they are equally strong. Candidates may include some of the following indicative content. [Examples only]: **Provenance:** The author of Doc B (Easton) is a UK university lecturer. Her academic credentials (she has a doctorate) and the reliable place of publication (Society of Computers and Law website) strengthen the argument, because we trust academic expertise. Whereas the author of Doc A (Mai Lida) is a journalist with no specified academic background or specialism in robotics, which makes it weaker. Therefore, Doc B is stronger than Doc A as it has a stronger provenance. **Global scope:** Doc B has a wider scope with reference to US, Japan and an international conference whereas Doc A is narrowly focussed on Japan.	**25**

Question	Answer	Marks
3	**Sources of evidence:** Both Doc A and Doc B draw evidence from other sources. Doc A uses more first-hand evidence (e.g. care home residents and caregivers) whereas Doc B uses more expert sources like Professor Asaro. **Structure of argument:** Both Doc A and Doc B have clear conclusions and a well-structured argument. **Language style:** Doc A has more emotional appeal, including quotations and the human factor which could be more convincing to some readers. Doc B has a more academic style that appears to be more serious and focussed on detailed concerns that some readers would find stronger than Doc A. **Counter argument:** Doc B has a counterargument whereas Doc A is one sided (looking only at benefits) **Use of statistics:** Doc A uses more statistical evidence, which although rounded and estimated is stronger than the more qualitative statements made by the author of Doc B. **Indicative content – Judgement** A candidate may conclude that Document B is stronger as it has a clear academic structure and a reliable provenance. It has a wider global scope than Document A and addresses a counterargument which Document B doesn't. A candidate may conclude that Document A has a stronger argument as it has more emotional appeal by including first-hand evidence and personal reflections on equipment that has a benefit to residents and carers. It also uses more statistical information that adds more support to the reliability of the argument, making it stronger overall. A candidate may conclude that both documents have their strengths and weaknesses and, on balance, both arguments are valid and so neither is particularly stronger than the other. Both have clear conclusions and a structured argument. Both use official government sources to give strength to their argument.

Cambridge Assessment International Education

Syllabus

Cambridge International AS & A Level Global Perspectives & Research 9239

Use this syllabus for exams in 2023, 2024 and 2025.
Exams are available in the June and November series.
Exams are also available in the March series in India only.

Version 1

Cambridge Pathway

Why choose Cambridge International?

Cambridge International prepares school students for life, helping them develop an informed curiosity and a lasting passion for learning. We are part of the University of Cambridge.

Our Cambridge Pathway gives students a clear path for educational success from age 5 to 19. Schools can shape the curriculum around how they want students to learn – with a wide range of subjects and flexible ways to offer them. It helps students discover new abilities and a wider world, and gives them the skills they need for life, so they can achieve at school, university and work.

Our programmes and qualifications set the global standard for international education. They are created by subject experts, rooted in academic rigour and reflect the latest educational research. They provide a strong platform for students to progress from one stage to the next, and are well supported by teaching and learning resources.

We review all our syllabuses regularly, so they reflect the latest research evidence and professional teaching practice – and take account of the different national contexts in which they are taught.

We consult with teachers to help us design each syllabus around the needs of their learners. Consulting with leading universities has helped us make sure our syllabuses encourage students to master the key concepts in the subject and develop the skills necessary for success in higher education.

Our mission is to provide educational benefit through provision of international programmes and qualifications for school education and to be the world leader in this field. Together with schools, we develop Cambridge learners who are confident, responsible, reflective, innovative and engaged – equipped for success in the modern world.

Every year, nearly a million Cambridge students from 10 000 schools in 160 countries prepare for their future with the Cambridge Pathway.

'We think the Cambridge curriculum is superb preparation for university.'

Christoph Guttentag, Dean of Undergraduate Admissions, Duke University, USA

Quality management

Cambridge International is committed to providing exceptional quality. In line with this commitment, our quality management system for the provision of international qualifications and education programmes for students aged 5 to 19 is independently certified as meeting the internationally recognised standard, ISO 9001:2015. Learn more at **www.cambridgeinternational.org/ISO9001**

Any textbooks endorsed to support the syllabus for examination from 2023 are suitable for use with this syllabus.

1 Why choose this syllabus?

Key benefits

The best motivation for a student is a real passion for the subject they're learning. By offering students a variety of Cambridge International AS & A Levels, you can give them the greatest chance of finding the path of education they most want to follow. With over 50 subjects to choose from, students can select the ones they love and that they're best at, which helps motivate them throughout their studies.

Following a Cambridge International AS & A Level programme helps students develop abilities which universities value highly, including:

- a deep understanding of their subjects
- higher order thinking skills – analysis, critical thinking, problem solving
- presenting ordered and coherent arguments
- independent learning and research.

Cambridge International AS & A Level Global Perspectives & Research develops a set of transferable skills. These include critical thinking, deconstructing and differentiating arguments, evaluating claims and developing strong reasoning. Learners can apply these skills across a range of subjects and complex real-world issues. These skills equip students well for progression to higher education or directly into employment.

Our approach in Cambridge International AS & A Level Global Perspectives & Research encourages learners to be:

confident, explaining, analysing and evaluating global issues and communicating arguments

responsible, researching extensively and selecting suitable material from a globally diverse range of sources, directing their own learning

reflective, developing a critical awareness of their personal standpoint and how that impacts on their response to different opinions and diverse ways of thinking

innovative, thinking creatively to propose solutions to issues

engaged, working collaboratively to develop each individual's potential in pursuit of a common goal.

'Cambridge students develop a deep understanding of subjects and independent thinking skills.'

Principal, Rockledge High School, USA

International recognition and acceptance

Our expertise in curriculum, teaching and learning, and assessment is the basis for the recognition of our programmes and qualifications around the world. Every year thousands of students with Cambridge International AS & A Levels gain places at leading universities worldwide. Our programmes and qualifications are valued by top universities around the world including those in the UK, US (including Ivy League universities), Europe, Australia, Canada and New Zealand.

UK NARIC, the national agency in the UK for the recognition and comparison of international qualifications and skills, has carried out an independent benchmarking study of Cambridge International AS & A Level and found it to be comparable to the standard of AS & A Level in the UK. There is no similarly focussed subject to AS & A Level Global Perspectives & Research in the UK.

Cambridge International AS & A Level Global Perspectives & Research is interdisciplinary and has a strong focus on the acquisition of skills.

Cambridge International AS Level Global Perspectives & Research makes up the first half of the Cambridge International A Level course and provides a foundation for the study of Global Perspectives & Research at Cambridge International A Level. Depending on local university entrance requirements, it may permit or assist progression directly to university courses in a range of subjects. It is also suitable as part of a course of general education.

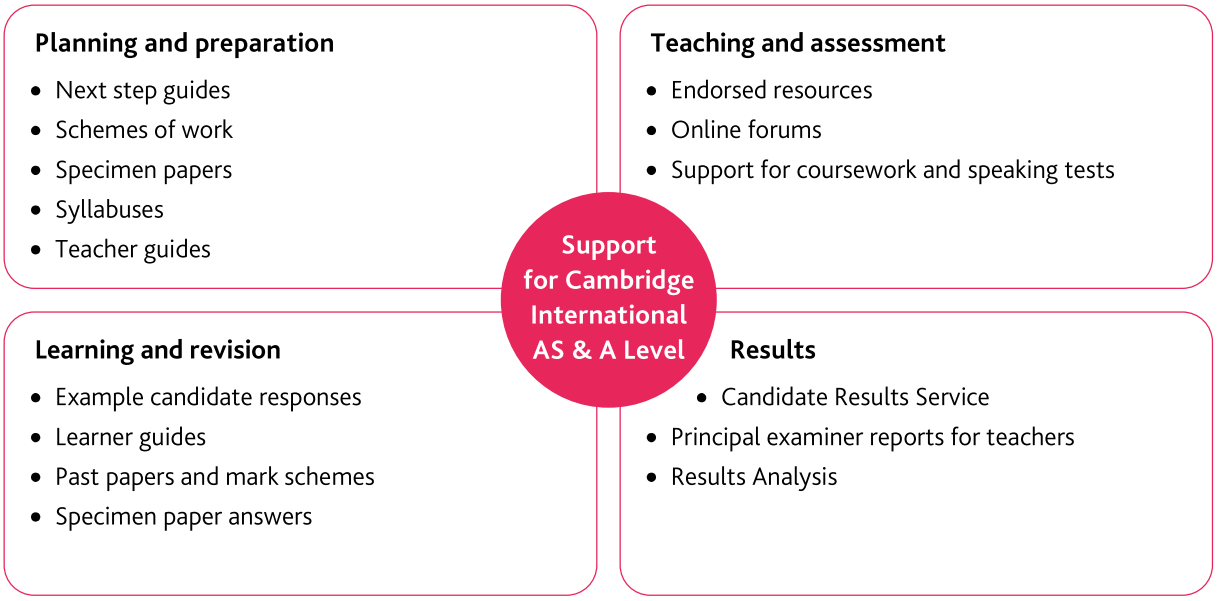
The skills developed by Cambridge International A Level Global Perspectives & Research provide a foundation for a wide range of courses in higher education. Equally it is suitable as part of a course of general education.

For more information about the relationship between the Cambridge International AS Level and Cambridge International A Level see the 'Assessment overview' section of the Syllabus overview.

We recommend learners check the Cambridge recognitions database and university websites to find the most up-to-date entry requirements for courses they wish to study.

Learn more at **www.cambridgeinternational.org/recognition**

'The depth of knowledge displayed by the best A Level students makes them prime targets for America's Ivy League universities.'



Yale University, USA

Supporting teachers

We provide a wide range of resources, detailed guidance and innovative training and professional development so that you can give your students the best possible preparation for Cambridge International AS & A Level. To find out which resources are available for each syllabus go to our School Support Hub.

The School Support Hub is our secure online site for Cambridge teachers where you can find the resources you need to deliver our programmes. You can also keep up to date with your subject and the global Cambridge community through our online discussion forums.

Find out more at **www.cambridgeinternational.org/support**

Sign up for email notifications about changes to syllabuses, including new and revised products and services at **www.cambridgeinternational.org/syllabusupdates**

Professional development

We support teachers through:

- Introductory Training – face-to-face or online
- Extension Training – face-to-face or online
- Enrichment Professional Development – face-to-face or online

Find out more at **www.cambridgeinternational.org/events**

- Cambridge Professional Development Qualifications

Find out more at **www.cambridgeinternational.org/profdev**

Supporting exams officers

We provide comprehensive support and guidance for all Cambridge exams officers. Find out more at: **www.cambridgeinternational.org/eoguide**

2 Syllabus overview

Aims

The aims describe the purposes of a course based on this syllabus.

The aims are to enable students to:

- acknowledge and understand the diversity of perspectives on global issues
- develop the ability to evaluate claims and evidence
- make independent judgements supported by reasoning and evidence, and understand the importance of justifying their own opinions
- become effective researchers, using appropriate sources to support judgements and understanding of research processes
- develop their ability to reflect on their own learning and judgements and on their work with others
- develop a range of effective written and spoken communication skills.

Skills overview

Cambridge International AS & A Level Global Perspectives & Research develops learners' thinking skills of analysis, evaluation and synthesis through considering a range of global topics. Learners will develop skills of independent enquiry and learn about appropriate research methods and methodology.

Learners will be encouraged to develop research, reasoning and communication skills systematically, using an approach called the Critical Path. This approach helps them to interrogate information, explore different perspectives and communicate personal reflections.

Learners are encouraged to work both independently and collaboratively, with respect for and understanding of different cultures and perspectives.

This is a skills-based subject and schools can make their own selection of global topics to study. Learners can draw upon knowledge and understanding gained from studying other subjects. Learners will develop skills that are interdisciplinary and highly transferable to other subjects.

Cambridge Assessment International Education is an education organisation and politically neutral. The contents of this syllabus, examination papers and associated materials do not endorse any political view. We endeavour to treat all aspects of the exam process neutrally.

'Cambridge International AS & A Levels prepare students well for university because they've learnt to go into a subject in considerable depth. There's that ability to really understand the depth and richness and the detail of a subject. It's a wonderful preparation for what they are going to face at university.'

US Higher Education Advisory Council

Assessment overview

Component 1

Written Exam 1 hour 30 minutes

45 marks

Written exam consisting of three compulsory questions based on sources provided with the exam paper.

The source documents present perspectives on an issue of global significance.

Candidates analyse and evaluate arguments, interrogate evidence and compare perspectives.

Externally assessed

36% of the AS Level

18% of the A Level

Component 2

Essay

40 marks

Candidates research a global issue of their own choice from topics studied during the course, exploring different perspectives.

Candidates devise their own essay title and write an essay in continuous prose of 1750-2000 words.

Externally assessed

32% of the AS Level

16% of the A Level

Component 3

Team Project

40 marks

Candidates work in teams to identify a local problem that has global relevance. Each team member researches the problem from a distinct perspective and suggests a solution based on their research findings.

Each candidate prepares two pieces of work for individual submission. Candidates submit:

Presentation (30 marks)

Each candidate presents their individual research and proposed solution to the problem in a presentation. Team presentations are not permitted.

Reflective paper (10 marks)

Each candidate writes a paper that reflects on the effectiveness of their team's collaboration and on their own learning.

Externally assessed

32% of the AS Level

16% of the A Level

Component 4

Cambridge Research Report

85 marks

Candidates undertake independent research on a topic of their own choice. They devise and develop a research question and then conduct personal research to answer that question.

Candidates submit:

Research report (75 marks)

Each candidate writes a research report of up to 5000 words. The topic content and the style of writing should not be highly technical, it should be aimed at a non-specialist reader.

Research log (10 marks)

Each candidate records their progress in a research log.

Externally assessed

50% of the A Level

Information on availability is in the **Before you start** section.

There are three routes for Cambridge International AS & A Level Global Perspectives & Research:

	Route	Component 1	Component 2	Component 3	Component 4
1	**AS Level only** (Candidates take all AS components in the same exam series)	✓	✓	✓	
2	**A Level** (staged over two years) Year 1 AS Level*	✓	✓	✓	
	Year 2 Complete the A Level				✓
3	**A Level** (Candidates take all components in the same exam series)	✓	✓	✓	✓

* Candidates carry forward their AS Level result subject to the rules and time limits described in the *Cambridge Handbook*.

Candidates following an AS Level route are eligible for grades a–e. Candidates following an A Level route are eligible for grades A*–E.

Assessment objectives

The assessment objectives (AOs) are:

AO1 Research, analysis and evaluation

- identify and analyse arguments, evidence and perspectives
- synthesise and evaluate arguments, evidence and perspectives
- locate through research a range of appropriate sources and perspectives
- use research to support judgements about arguments and perspectives
- design and manage a personal research project using and evaluating appropriate research methods and methodology (A Level only)
- select and analyse appropriate concepts, arguments, perspectives and evidence from a range of source materials and use these in the personal research report (A Level only)

AO2 Reflection

- acknowledge different perspectives and evaluate their impact on the learner's own standpoint
- consider the extent and limits of the learning and research that has been undertaken
- reflect on and evaluate the effectiveness of collaboration with others (AS Level only)
- reflect on and justify the scope, nature and limitations of the learner's own research report (A Level only)

AO3 Communication

- produce structured, written arguments using appropriate terms and referencing where applicable
- produce a structured presentation using language appropriate for the audience (AS Level only)
- communicate information visually in order to engage an audience (AS Level only)

Weighting for assessment objectives

The approximate weightings allocated to each of the assessment objectives (AOs) are summarised below.

Assessment objectives as a percentage of each qualification

Assessment objective	Weighting in AS Level %	Weighting in A Level %
AO1 Research, analysis and evaluation	65	65
AO2 Reflection	15	20
AO3 Communication	20	15
Total	100	100

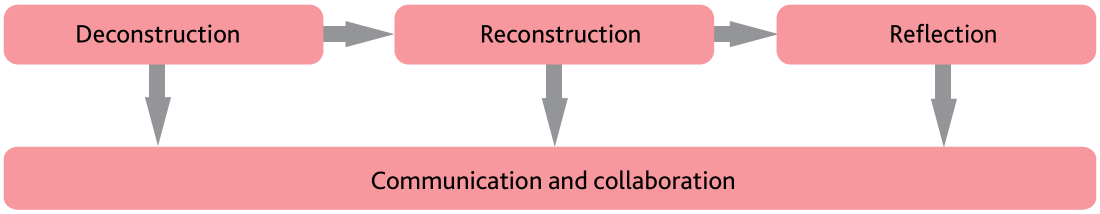
Assessment objectives as a percentage of each component

Assessment objective	Weighting in components %			
	Component 1	Component 2	Component 3	Component 4
AO1 Research, analysis and evaluation	89	63	40	65
AO2 Reflection	–	22	25	20
AO3 Communication	11	15	35	15
Total	100	100	100	100

3 Approaches to teaching and learning

This syllabus gives you the flexibility to design a course that will interest, challenge and engage your learners. Where appropriate you are responsible for selecting topics, resources and examples to support your learners' study. These should be appropriate for the learners' age, cultural background and learning context as well as complying with your school policies and local legal requirements.

Cambridge International AS Level Global Perspectives & Research is a skills-based syllabus which uses global issues as a context for study. Following this syllabus will equip students with the skills to be effective, active participants in a rapidly changing intellectual and technical environment. Importantly, this syllabus also prepares and encourages learners to work with confidence both independently and collaboratively, with respect for and understanding of different cultures.



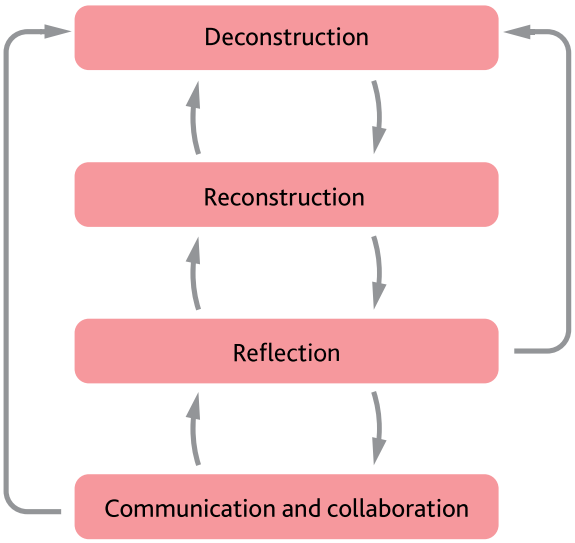
Cambridge International A Level Global Perspectives & Research encourages the development of independent enquiry and an understanding and use of appropriate research methods and methodology. When following this course, learners need to become fully engaged in a research process of their own. The course provides further development and practice of the higher-order thinking skills of analysis, evaluation and synthesis.

The Critical Path

To encourage learners to think critically, this syllabus presents an approach to analysing and evaluating arguments and perspectives called the Critical Path. The Critical Path is distinctive to Cambridge International AS and A Level Global Perspectives & Research and provides a central unifying concept linking all parts of the syllabus.

The Critical Path offers a systematic approach to teaching and learning where learners develop the ability to deconstruct and reconstruct arguments about global issues through personal research and interrogation of evidence. By reflecting on the implications of their research and the personal judgements it leads them to make, students learn to communicate their findings and ideas through a range of appropriate formats.

The Critical Path



Visit the online Learning Area to find support for both learners and teachers: **https://learning.cambridgeinternational.org/**. Teachers can log into the area to access resources and course content. It also allows learners around the world to collaborate between schools, countries and cultures, helping to foster genuine global perspectives.

Developing skills using the Critical Path

The Critical Path is an approach to teaching and learning that provides a systematic way for learners to develop the skills of research, reasoning and communication. These valuable thinking and reasoning skills are useful for a range of subjects and can also be used in higher education and a wide range of careers.

As a teaching and learning tool, the Critical Path provides an effective approach to interrogating information, exploring different perspectives and communicating personal reflections. For students, the Critical Path is best seen as a sequence of repeated steps, which need to be practised.

The Critical Path as a learning process

To follow are examples of the sort of questions that teachers and learners might think about at each stage of the Critical Path.

Stages of the Critical Path	Example questions to promote thinking and learning
Deconstruction: conduct a detailed analysis and evaluation of a point of view	**Which different perspectives are represented?** Identify and compare different perspectives on an issue made up of arguments, claims, views, beliefs and evidence. **What are the key components of the argument or claim?** Differentiate between fact, argument, opinion, rant, speculation, prediction, explanation, hypothesis, account and belief. Identify conclusions, reasons (premises), assumptions (stated and unstated), assertions (and counter-assertions) and supporting evidence. **What are the implications of the conclusions, arguments, reasoning or claims?** Suggest the consequences of the conclusions, arguments, reasoning or claims. **What are the strengths and weaknesses of arguments, reasoning or claims?** Evaluate the strengths and weaknesses in the arguments, reasoning or claims. Assess the use of analogy and identify any errors in the reasoning. **How strong is the evidence?** Identify whether evidence gives strong or weak support to the conclusion or claim. Consider the reliability of the evidence and suggest other evidence required to substantiate or refute claims or counterclaims.

Stages of the Critical Path	Example questions to promote thinking and learning
Reconstruction: carry out research, identify, group together and evaluate evidence and sources for and against competing points of view	**What evidence is there to support different perspectives?** Use research to identify the range of perspectives on the issue and the support there is for each perspective. **What sources are used to support different perspectives and how acceptable are they?** Identify, synthesise and evaluate a range of sources. Consider the credibility and relevance of each source in providing arguments and evidence for each perspective. **Does the evidence lead to a single conclusion?** Research and evaluate alternative arguments and perspectives. Make a reasoned and balanced judgement based on evidence. **What is the context of the arguments?** Explain the context in which the arguments have been made.
Reflection: explore the impact of research on personal perspectives	**What was your personal viewpoint before carrying out research?** Reflect on initial personal perspectives before any research or thinking has been done. **How does your own viewpoint relate to the perspectives identified in the research?** Evaluate personal viewpoints against alternative perspectives on issues. **What impact has the research had on any views you had before?** Evaluate the impact of alternative perspectives on your personal viewpoint. **Why has the research had an effect on your previous views?** Justify the reasons why personal perspectives have changed as a result of research. **What additional research might be useful?** Identify and justify possible future research directions.
Communication and collaboration: communicate views, information and research effectively and convincingly; work with others as part of a group	**How can I work with others to identify problems and devise effective solutions?** Find ways of working together and maximising each person's potential in pursuit of a common goal. **How effective was our work together?** Identify the strengths and weaknesses of your teamwork. Consider what made the collaboration effective or ineffective in relation to the team's goal. Make suggestions for improving teamwork in the future. **How can arguments be made effectively and persuasively?** Communicate your reasoning in a well-structured, clear and effective manner using appropriate written or spoken conventions. **How should research findings be communicated to a non-specialist audience?** Define and use appropriate terms consistently. Cite and reference sources in an appropriate and recognisable way. **What is the most appropriate way to present to an audience?** Select and organise material for a listening audience. Choose the most appropriate audio or visual media to support the arguments being made. Prepare and use a range of effective presentational methods to reinforce arguments and ideas.

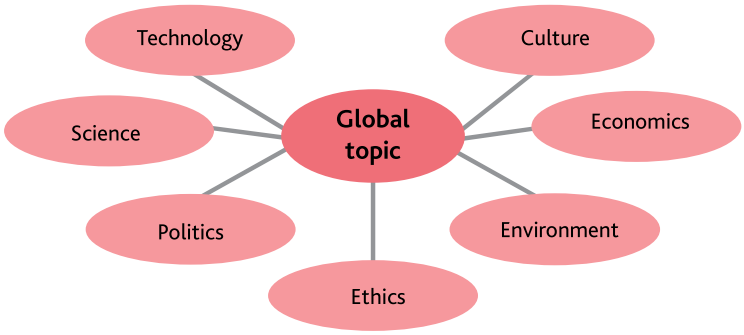
The skills of the Critical Path can be mapped to each component, as shown below:

Component	Skill				
	Deconstruction	Reconstruction	Reflection	Communication	Collaboration
1 Written exam	✓	✓		✓	
2 Essay	✓	✓	✓	✓	
3 Team Project	✓	✓	✓	✓	✓
4 Cambridge Research Report	✓	✓	✓	✓	

Global topics, themes, issues and perspectives (AS Level)

The syllabus includes a broad range of global topics and themes which together provide meaningful and stimulating contexts for skills development. By engaging with these topics and themes, learners can begin to develop the skills necessary to become active global participants – with a capacity and disposition for understanding and acting on global matters.

Learners will practise the Critical Path approach by identifying and studying global issues arising from at least three topics from the list below.



Global topics

Animal rights
Arts in an international context
Changing identities
Climate change
Crime
Cultural heritage
Demographic changes
Distribution of wealth
Economics of food
Endangered cultures
Energy
Environmental priorities
Ethical foreign policies
Ethics of food
Globalisation
Global inequality
Health issues
Human rights
Impact of technology
Industrial pollution
International aid
International law
Media and communication
Medical ethics and priorities
Migration and work
Political power and resistance
Quality of life
Scientific innovation
Social change and development
Social inequality
Sport in an international context
Sustainable futures
Tourism
Transport
Urbanisation

Global topics, themes, issues and perspectives (AS Level) continued

Themes

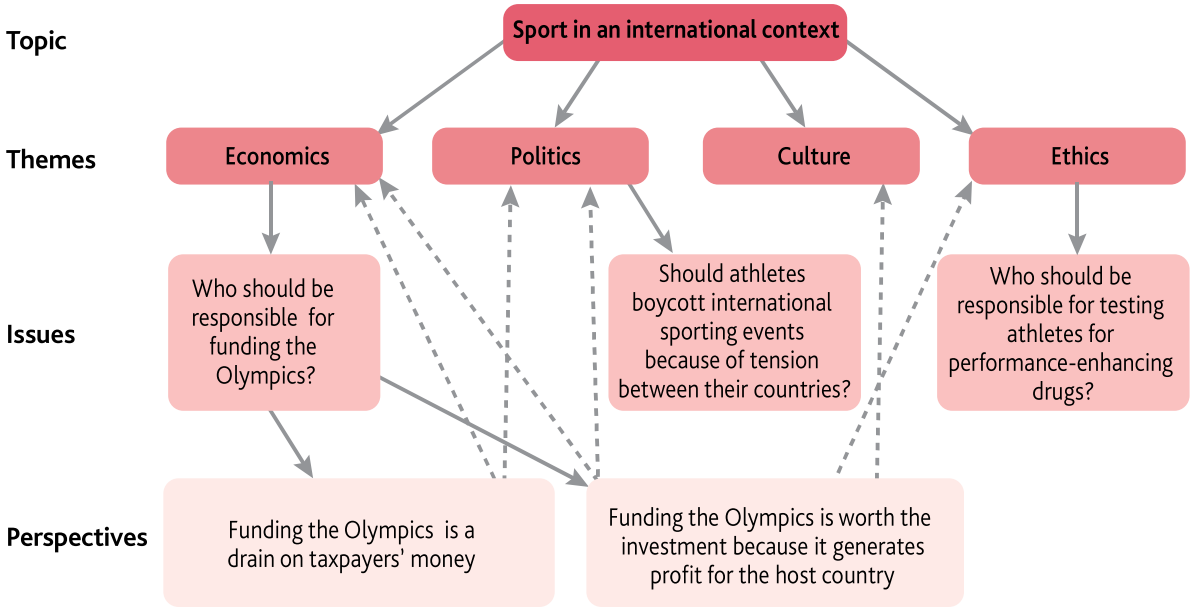
Learners research global topics through relevant themes. The number of themes will vary from topic to topic. Themes are not the same as perspectives. For details see Key terms below.

Global issues and perspectives

Exploring a global topic through different themes will reveal a range of global issues, which in turn will help learners to identify different perspectives.

Example 1

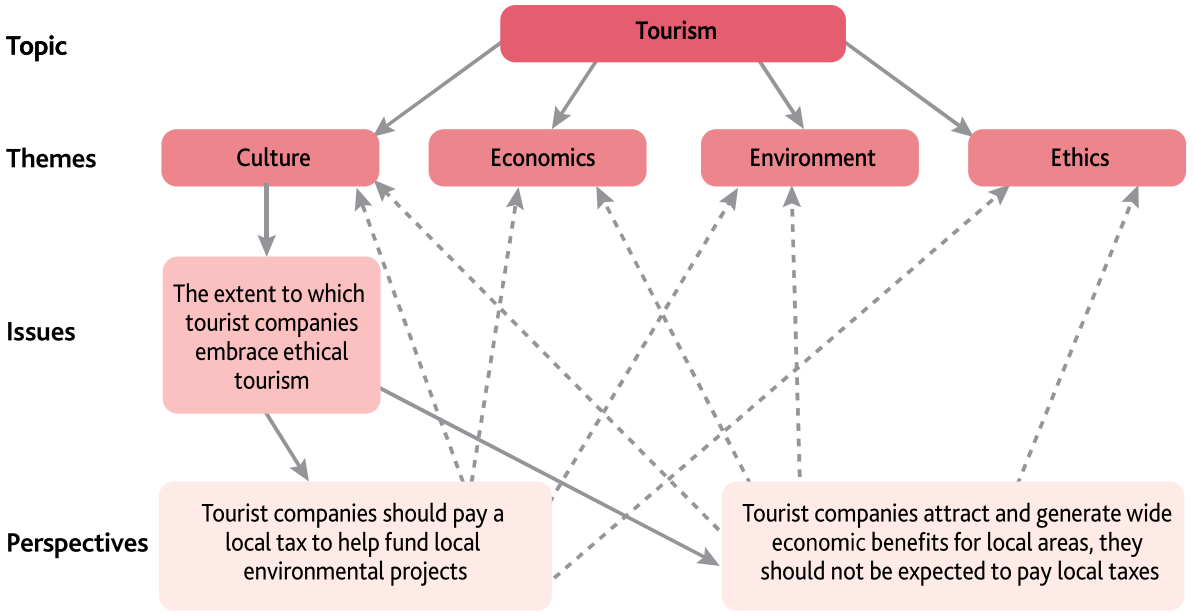
Consider the topic 'Sport in an international context' through the themes of economics, politics, culture and ethics. Global issues emerge, such as who should be responsible for funding events such as the Olympics? Different perspectives could emerge from this issue, for example:



Perspective 1: Funding Olympic events is a drain on taxpayers' money. This perspective may be based on different arguments about the value of the Olympics, the needs of the taxpayer, the possible economic benefits, and the political popularity or unpopularity of spending public money. Behind this perspective may be assumptions and beliefs about the importance of international sport relative to the costs of the Olympics.

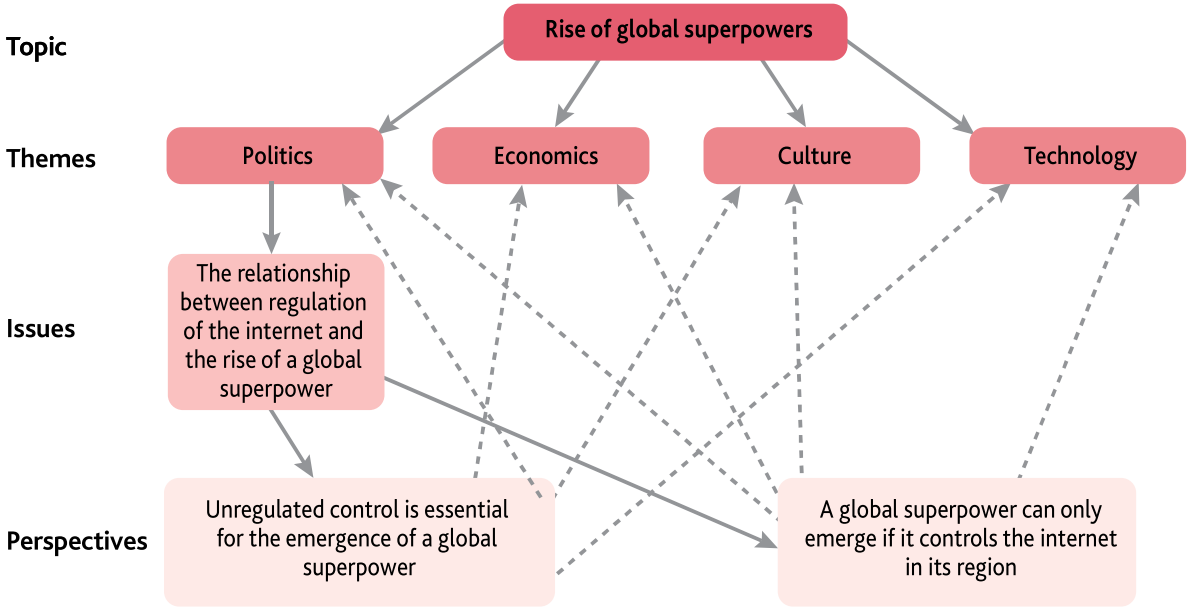
This perspective draws on the themes of economics and politics.

Perspective 2: Funding Olympic venues is worth the investment and a good use of taxpayers' money because of the profit the venues produce after the event. The key word in this perspective is 'worth' and the assumption that the Olympics is worth the investment for the resulting economic and financial benefits and for the political prestige it brings to the host country. Behind this perspective there is a general outlook on the funding of the Olympics which contains different assumptions, views, justifications and beliefs to those associated with Perspective 1.



This perspective draws on the themes of economics, politics, culture and ethics.

Global topics, themes, issues and perspectives (AS Level) continued



To follow are two other examples of how themes, issues and perspectives might be connected.

Example 2

Global topics, themes, issues and perspectives (AS Level) continued

Example 3

Key terms

Global topics are broad potential areas for study. Learners can use topics as starting points for identifying issues.

Themes are approaches to topics or issues, for example culture, economics, the environment, ethics, politics, science and technology. A specific thematic approach to an issue can help to identify a perspective on that issue.

Issues are specific, more narrowly defined areas within a topic that are suitable as subjects for an essay or other piece of work. An issue often has global interest or relevance and can combine specific areas of different topics or themes.

A **perspective** is a coherent world view which is a response to an issue. A perspective is made up of argument, evidence and assumptions and may be influenced by a particular context.

Arguments consist of one or more reasons that lead to a conclusion. These reasons may be supported by **evidence**: facts or other data which can be **primary** (first-hand information) or **secondary** (which may be based on primary evidence but are not from the situation itself). Learners will make judgements about arguments they find and create arguments of their own.

Assumptions are reasons which are not stated but are still part of an argument.

The **provenance** of a source includes its author and where or when it was written.

4 Details of the assessment

Component 1 – Written Exam

Written paper, 1 hour 30 minutes, 45 marks

This component is an externally set assessment, marked by Cambridge International.

Component 1 contains three questions based on two source documents provided with the exam paper. The source documents may present different perspectives on an issue of global significance.

Candidates answer **all** the questions.

Question 1 (5 marks) is a structured question based on two source documents. Candidates are required to read both sources and answer short questions that require candidates to demonstrate AO1 skills.

Question 2 (15 marks) requires a longer response based on one of the source documents. Candidates are required to focus on the evidence in the document and demonstrate AO1 skills.

Question 3 (25 marks) requires a longer, essay response based on the two source documents. Candidates are required to focus on the arguments and perspectives given in the documents and provide a reasoned judgement, demonstrating AO1 and AO3 skills.

Candidates are assessed on their thinking and reasoning skills focused on analysing and evaluating arguments, interrogating evidence and contexts and comparing perspectives centred on global issues. Candidates are not assessed on their knowledge and understanding of the specific issues represented in the source material.

In carrying out a critical and comparative analysis of the source material, candidates are assessed on their ability to:

- identify evidence, analyse its strengths and weaknesses and evaluate the evidence (AO1)
- identify and compare key components of arguments (AO1)
- analyse and compare perspectives (AO1)
- evaluate arguments and make judgements about arguments and perspectives (AO1)
- communicate clearly and logically (AO3).

Written Exam: the role of the teacher

The Written Exam is a skills-based exam which does not require candidates to have been taught specific content or to have prior knowledge of the specific global topic. The global issue in the source documents in the exam paper provides a context for the assessment of the skills associated with AO1: Research, analysis and evaluation.

Teachers therefore need to provide opportunities for candidates to practise and develop these skills during the course. There should be regular opportunities to discuss and debate global issues related to the topics, so that candidates learn to consider a variety of different perspectives.

Teachers should prepare candidates for the types of questions they are likely to experience in the Written Exam by using specimen and past papers and their related mark schemes. These can be obtained from the Cambridge International websites **www.cambridgeinternational.org** and **www.cambridgeinternational.org/support**

There is also an online AS course available on our online Learning Area
https://learning.cambridgeinternational.org/

Component 2 – Essay

40 marks, externally marked

Candidates write an essay of 1750–2000 words on a global issue of their own choice from topics studied during the course.

Candidates must choose an essay title that is a single question. The choice of essay question must provide opportunities to develop globally contrasting perspectives.

In their research, candidates should identify and explore the context and basis of arguments that respond to the question from different global perspectives. They should identify globally contrasting perspectives, understand the arguments, reasoning or claims upon which these perspectives are based and offer a critical view of them. Sources selected should offer firmly supported judgements or conclusions. Evaluation of sources and perspectives should form a substantial element of candidates' essays. Candidates should reach a personal, supported view on the question.

In the essay, candidates should demonstrate AO1, AO2 and AO3 skills. They will be assessed on their ability to:

- analyse their chosen question (AO1)
- synthesise arguments to build contrasting perspectives (AO1)
- select and refer to a range of sources (AO1)
- assess and justify the appropriateness of the sources selected (AO1)
- compare and evaluate contrasting perspectives (AO1)
- reflect on the impact of alternative perspectives on their viewpoint (AO2)
- suggest further relevant research (AO2)
- write a clear, structured essay using effective referencing (AO3).

The essay must be written in continuous prose and include a list of sources used. Quotations must be fully referenced. The essay must be 1750–2000 words and an accurate word count must be clearly stated on each essay. The word count excludes the title, references and citations. Work beyond the 2000 word maximum will not be marked. The essay must be submitted electronically.

Essay: the role of the teacher

A class may work together to carry out background research on a global issue, but each candidate must devise their own question. Teachers should support candidates in formulating appropriate questions.

Candidates should be given sufficient time to plan and prepare their research. During this preparation, teachers should support each candidate to:

- understand the nature of the task
- identify a suitable issue to research
- formulate an appropriate global question
- develop a suitable approach to the research
- develop organisational skills
- cite and reference their sources
- focus on reconstruction and reflection
- write effectively and concisely to stay between 1750 and 2000 words
- include an accurate word count.

continued

Teachers should support candidates in formulating an appropriate global question. The question should:

- be phrased as a question, not as a statement or generic topic area to discuss
- allow for the analysis of at least two globally contrasting perspectives. Questions that focus on an exclusively local or national issue or perspective are unlikely to be appropriate
- enable candidates to make well-supported judgements
- be about an issue which genuinely interests the candidate.

Further support in formulating appropriate and effective global questions can be found in the online AS course available on our online Learning Area **https://learning.cambridgeinternational.org/**

Supervising coursework

A general discussion on the progress of coursework is a natural part of the teacher–candidate relationship, as it is for other parts of the course. If plans and first drafts are completed under teacher supervision, the teacher can be sure of the authenticity of the final coursework. Candidates can draft and redraft work, but teachers should only give brief summative comments on progress during this drafting phase.

Coursework must be a candidate's own, unaided work. Teachers can support candidates by reviewing their work before it is handed in for final assessment. You can do this orally or through written feedback. Teachers' advice should be kept at a general level so that the candidate leads the discussion and makes the suggestions for any amendments. Teachers must not give detailed advice to individual candidates or groups of candidates on how their work can be improved to meet the assessment criteria. You should not correct or edit draft coursework.

For further information about supervising coursework, see the *Cambridge Handbook* for the relevant year of assessment at **www.cambridgeinternational.org/eoguide**

Authenticity and academic honesty

It is the centre's responsibility to make sure all assessed work is the candidate's original work. Candidates must not submit someone else's work as their own, or use material produced by someone else without citing and referencing it properly. Teachers should make candidates aware of the academic conventions governing quotation and reference to the work of others, and teach candidates how to use them.

A candidate taking someone else's work or ideas and passing them off as his or her own is an example of plagiarism. Cambridge International use plagiarism detection software packages. It is the teacher's responsibility to prevent plagiarism from happening and to detect it if it does happen. For more information, search for 'Preventing plagiarism – guidance for teachers' on our website at **www.cambridgeinternational.org**

At the time of submission, the candidate must sign a statement of originality confirming that they are submitting their own work. The teacher countersigns it to confirm that they believe it is the candidate's work.

Submitting candidates' work

The essay is externally marked by Cambridge International. Candidates' work must be submitted electronically. The deadlines and methods for submission are in the *Administrative Guide*. This is available from the Exams Officers' Guide section of our website: **www.cambridgeinternational.org/eoguide**

Component 3 – Team Project

Presentation and reflective paper, 40 marks, externally marked

Candidates must work in teams of two to five members to identify a local problem that has global relevance. Each team works together to identify the problem to research. The team must outline their local problem in a single statement that allows the team members to address contrasting perspectives on the problem. The scope of the research should be sufficiently broad to enable teams to explore the problem from local and global perspectives. Teachers should support teams in formulating an appropriate statement.

Candidates allocate areas for each team member to research. Each team member is expected to argue from their distinct perspective for an effective and workable solution to the problem.

Each candidate is required to give a presentation about their research and preferred solution. They are also required to write a reflective paper in which they reflect on the effectiveness of the collaboration undertaken by the team and on their individual learning. Their learning may be about the problem itself, the research skills they have developed, and/or presentation skills.

Presentation

30 marks

Each candidate will give a presentation about their research and preferred solution (10 minutes maximum). The presentation may be either:

- a live recording of the candidate

or

- a presentation with a recorded voiceover by the candidate

Candidates should demonstrate AO1 and AO3 skills.

Live recording

It is important that the presentation is recorded in one session and in an area that is quiet with no background noise to ensure what the candidate is saying can be heard.

The presentation should be supported by audio and/or visual materials appropriate to the live presentation and delivered to an audience. The size of the audience can be determined by the centre but must include at least three people, one of whom must be the class teacher.

Presentation with recorded voiceover

For a presentation with a recorded voiceover, candidates should create a presentation using appropriate presentational software and attach an audio recording of themselves speaking to their presentation. It is important that the recording is carried out in an area that is quiet with no background noise to ensure what the candidate is saying can be heard.

There does not need to be a live audience. Candidates should use language appropriate for the presentation and sustain the language throughout. The presentation should contain appropriate audio and visual elements.

A presentation (10 minutes maximum) must be submitted for each candidate. Team presentations must **not** be submitted for assessment.

Candidates will be assessed on how their presentation displays the following skills:

- individual analysis of the problem identified by the team (AO1)
- range of research undertaken (AO1)
- evaluation of sources (AO1)
- justification for their individual solution (AO1)
- production of a well-argued, well-organised argument (AO3)
- use of visual information (AO3)
- use of language to address the audience. (AO3)

The presentation should:

- be engaging to a non-specialist audience
- include audio and visual elements in an effective way
- use appropriate terms and cite references clearly and accurately.

The presentations must be submitted to Cambridge International along with the audio and/or visual materials used and a verbatim transcript of the presentation. The running time for the presentation must not exceed 10 minutes. Work beyond the maximum running time will not be included in the assessment. Teachers must ensure that the quality of any recording will permit accurate marking of the work.

Reflective paper

10 marks

Each candidate will write a reflective paper (maximum 800 words) focusing on how effectively the team worked together, what could be improved, and any changes to their personal views shaped by the collaborative experience. Candidates should demonstrate AO2 skills.

Candidates will be assessed on their:

- reflection on the effectiveness of the team collaboration (AO2)
- reflection on the learning (AO2).

For each candidate, submit the following pieces of work to Cambridge International:

1 Recording of the live presentation OR presentation with recorded voiceover
2 Audio and/or visual materials to support a live presentation
3 A transcript of the presentation
4 The reflective paper.

A statement of originality must be included for each candidate.

Team Project: the role of the teacher

The teacher should take an active role in creating teams. The maximum team size is five, the minimum two. Teams of three or four candidates work together well and often find it easier to agree on what problem to research.

Teachers should support each candidate and team in:

- understanding the nature of the task
- formulating an appropriate research topic
- developing a means through which candidates can research different perspectives
- developing organisational skills
- citing and referencing their sources
- focusing on reflection and communication
- developing clear oral arguments
- working collaboratively towards the same shared outcome.

Teachers should note that the use of audio and/or visual materials does not need to be extensive but rather should be fit for purpose and reflective of working in the twenty-first century.

The presentation and reflective paper must be each candidate's own, unaided work. Once candidates start researching and producing their presentations, they may seek assistance from the teacher, but advice should be kept at a general level so that the candidates lead the discussions and make the suggestions for any amendments. Teachers must not give detailed advice to individual candidates or groups of candidates on how their work can be improved to meet the assessment criteria.

There is also an online AS Level course available on our online Learning Area **https://learning.cambridgeinternational.org/**

Teachers must not:

- offer or provide detailed subject guidance to candidates or teams
- undertake any research on behalf of candidates
- prepare or write any subject-specific notes or drafts for candidates
- correct any part of a candidate's notes used for their presentation
- prepare any part of a candidate's presentation
- produce any part of the transcript to accompany a candidate's oral commentary
- suggest amendments to, or make comments on, any part of a candidate's presentation or reflective paper.

For further information about supervising coursework, see the *Cambridge Handbook* for the relevant year of assessment at **www.cambridgeinternational.org/eoguide**

Authenticity and academic honesty

It is the centre's responsibility to make sure all assessed work is the candidate's original work. Candidates must not submit someone else's work as their own, or use material produced by someone else without citing and referencing it properly. Teachers should make candidates aware of the academic conventions governing quotation and reference to the work of others, and teach candidates how to use them.

A candidate taking someone else's work or ideas and passing them off as his or her own is an example of plagiarism. Cambridge International use plagiarism detection software packages. It is the teacher's responsibility to prevent plagiarism from happening and to detect it if it does happen. For more information, search for 'Preventing plagiarism – guidance for teachers' on our website at **www.cambridgeinternational.org**

At the time of submission, the candidate must sign a statement of originality confirming that they are submitting their own work. The teacher countersigns it to confirm that they believe it is the candidate's work.

Submitting candidates' work

All materials for Component 3 must be submitted electronically. The deadlines, details of acceptable formats for presentations, and methods for submission are in the *Administrative Guide*. This is available from the Exams Officers' Guide section of our website: **www.cambridgeinternational.org/eoguide**

Component 4 – Cambridge Research Report

Research report, 85 marks, externally marked

For the Cambridge Research Report, candidates complete a research project on a topic and question of their own choice. The project comprises a report of up to 5000 words, supported by a research log.

The report and log are externally marked by Cambridge International.

Research report – 75 marks
Research log – 10 marks

The report must be based around a single question that lends itself to in-depth research. The report should be written for a non-specialist audience.

Throughout their research, candidates must keep a research log and submit it with their report. The log must be a **separate** document to the report. In their log, candidates should record information relating to the research process and reflect on their research findings and decisions.

For the Cambridge Research Report, candidates should demonstrate AO1, AO2 and AO3 skills. Candidates will be assessed on their ability to:

- use a research log to record, plan and reflect on research (AO1, AO2)
- reflect on research findings and decisions (AO2)
- analyse their research question (AO1)
- use appropriate research methods (AO1)
- select and analyse relevant concepts (AO1)
- use and assess sources to support arguments and perspectives (AO1)
- build and compare contrasting perspectives (AO1)
- reflect on how alternative perspectives have influenced their argument (AO2)
- make judgements which are supported by evidence (AO1)
- reflect on their conclusions (AO2)
- structure their report effectively, use accurate terminology and use complete and appropriate citation and referencing (AO3).

The report must be written in continuous prose and must not exceed 5000 words. An accurate word count must be clearly stated. The title and bibliographical references are **not** included in the word count. Work beyond the 5000 word maximum will not be marked.

The report must include a bibliography and full bibliographical references must be given for any quotations. The format and referencing conventions used should be appropriate to the subject discipline/s.

Each candidate must also complete a research proposal form, and this must be reviewed internally. The research proposal is not externally marked by Cambridge International, but it must be submitted with the materials sent for assessment. For further guidance, see the section 'Initial preparation and research proposal' below.

Initial preparation and research proposal

Candidates are advised to choose a topic that engages them strongly and is of real importance to them. Candidates should develop initial ideas for their research and teachers must support candidates in developing a suitable research question. Each candidate must write a research proposal and discuss this with their teacher. The research proposal should outline:

- the research question
- the key concepts which are relevant to the question
- an outline of the debate to be addressed
- examples of sources which will be used.

The teacher must review the research proposal to confirm whether the concepts and debate are relevant and that the research question chosen gives the candidate scope to meet the assessment criteria.

The title of the report must take the form of a question. Formulating a good research question takes time and careful consideration. The report should explain how and why the question was developed. For example, why is the question worth asking, and how did it develop during the research process?

Candidates should also consider the key concepts associated with their research question and area of research. The key concepts are the terms or ideas which are relevant to the topic they have chosen. For example, for a project on the representation of women in poetry, key concepts might be gender and feminism. Or, for a project which investigates different explanations for the movement of fluids in science, key concepts might be the conservation of energy and Brownian motion.

Candidates must discuss their research proposal with their teacher, to ensure that their research question, concepts, initial thoughts on how they intend to argue for or against the question, and sources are appropriate. Teachers should support candidates in developing their ideas and approve the research proposal form.

It is important that candidates spend sufficient time on this preparatory stage.

Download the research proposal form from the samples database at **www.cambridgeinternational.org/samples**. For each candidate, a completed research proposal form, with comments from the teacher, must be submitted to Cambridge International along with the materials for assessment.

For further guidance on the initial preparation and the research proposal, see the *Teacher Guide* or go to our School Support Hub **www.cambridgeinternational.org/support**

Cambridge Research Report: the role of the teacher

The teacher's role is to ensure an understanding of the task, monitor progress, and respond to requests for advice on research and writing in general, but not to guide specific content.

The teacher will need to help each candidate to decide on the subject and scale of their research. The teacher must review the research proposal to confirm the topic is suitable and provides enough opportunities to meet the assessment criteria but is not too large, nor too complex. In the initial stage when topics are being selected, teachers might arrange workshops for candidates to discuss subject specific issues and approaches. As topics are refined and questions developed, workshops might also be used to share ideas.

The teacher is responsible for formally approving each candidate's research proposal. Teachers should do this before the candidate starts work on their research. Teachers should be satisfied that the research does not raise safety issues for the candidates. Information on safeguarding is available in the *Our standards* section of our public website. We recommend that teachers read the booklet *Safeguarding: The Protection of Children and Vulnerable Adults*.

Throughout the research process the teacher should support each candidate to:

- identify an appropriate topic and develop a suitable research question
- consider alternative perspectives on the question
- consider whether enough evidence exists in relation to the topic and question
- select research methods that are appropriate for the project
- consider research ethics and conventions in relation to specific research questions
- consider the timescale and overall planning
- keep a research log.

In the production of the report, teachers should support candidates to:

- use appropriate terms, referencing and citation techniques
- consider critically the research methods and sources used
- communicate effectively and clearly in an extended piece of writing.

Research must be the candidate's own unaided work and findings must be the result of personal reflection and judgement. The work may be supported by ongoing workshops and classes. Candidates may also consult with a subject-specific teacher if they are carrying out research into a specialist topic. However, the report needs to address a non-specialist audience. Teachers should monitor candidates' progress by discussion of their research log. It is a teacher's responsibility to verify that the work is that of the candidate working alone.

Further support can be found in our online Learning Area **https://learning.cambridgeinternational.org/**

Teachers/subject-specific consultants must **not**:

- teach specific topics or offer their own information and views on topics
- undertake any research for a candidate
- correct any part of a candidate's notes or drafts
- prepare any part of a candidate's report.

Evidence

The research report must be evidence-based. Evidence is likely to be primary evidence and/or secondary evidence. Primary evidence is first-hand information and can come from a range of sources, such as historical documents, literary texts, artefacts and data gathered from scientific observation, as well as interviews and surveys. Secondary evidence includes material such as the arguments and opinions of specialists which reflect on or synthesise primary evidence. Candidates should be aware of and explore the strengths and potential weaknesses of all types of evidence.

Research methods and methodology

Candidates should select research methods that are appropriate for their chosen topic. The research can be based on primary and/or secondary evidence, depending on the subject matter and the approach. The types of research methods that might be used are:

- reviewing the secondary literature in the field
- close analysis of texts
- producing evidence through other qualitative research methods (e.g. ethnography, interviews, focus groups)
- analysis and evaluation of statistical or other numerical data
- producing evidence through other quantitative research methods (e.g. surveys, experiments)
- a mixture of the methods above.

The study of the reasons why particular sets of methods are appropriate for specific academic subject areas is known as research methodology. Candidates are expected to engage with the methodology underlying their choice of research methods, and consider the impact of their choice on their report.

Candidates should be taught:

- research and organisational skills
- a broad understanding of research methods and research methodology
- how to select and use appropriate concepts for their chosen research topic
- appropriate ways of citing and referencing sources
- the meaning and significance of academic honesty and plagiarism.

In their research report, candidates must explain their choice and use of appropriate research methods, and consider the methodology which has informed this. Candidates should explain how they carried out the research.

Research log

Candidates must use a research log throughout the research process to record information, plan actions and reflect on research findings and decisions. Decisions could include the wording of their research question, their choice of methods, and judgements made during the research based on their findings. Candidates do not need to record all their actions and thinking in their log. The log could contain reminders of things to check, ongoing evaluation of the research, and reflections on how their thinking or their research question may have changed as a result of feedback from the teacher.

The log must be submitted for assessment and must be a separate document to the report. It can be written in note form or a mixture of notes and continuous prose. The log is not included in the 5000 word limit of the report but it should not be seen as a way to extend that word limit.

For further guidance on the log, including length and format, see the *Teacher Guide*.

Perspectives

A candidate's research question should lead to the discussion of different perspectives. A perspective is a coherent world view which is a response to an issue. A perspective is made up of argument, evidence and assumptions, and may be influenced by a particular context. It should be clear from the research question that it will be possible to analyse and evaluate different perspectives.

For example, a candidate may want to choose industrialisation as their research topic. There are different opinions about industrialisation. Some argue in favour of industrialisation because industrial production can manufacture goods more efficiently. However, others argue against it because of the pollution it generates. Each of these views can be supported by different kinds of evidence. The argument for industrialisation based on its efficiency might be backed up by quantitative evidence of rates of production and profitability. The arguments against industrialisation because of the pollution it causes, might be supported by observational evidence of its impact on the natural environment. Each of these views also make different assumptions: unstated reasons which lead them to value different kinds of evidence and come to different conclusions. In each case, the combination of the arguments, evidence and assumptions makes up a distinctive perspective. A judgement between them can, however, be reached by the careful and sympathetic evaluation of the differing yet well-established views.

The research question should lead directly to an assessment of the perspectives. It would not be suitable for a research question to be simply 'Industrialisation' because that is a not a question. The title 'Has industrialisation been environmentally damaging?' is a question, but it would not be suitable because it suggests a one-sided, preconceived view and does not lead directly to a debate. However, an appropriate question and report title would be 'Is industrialisation a good thing?', because this question could lead to establishing and evaluating different perspectives.

For further guidance, see the *Teacher Guide*.

Structuring and presenting the Cambridge Research Report

The report should contain an introduction, main body and conclusion. It may include sub-headings and must include references. The report needs to be organised so that the argument is well communicated and easy to follow.

Candidates must acknowledge where specific ideas and information come from. They should use an appropriate referencing and citation system related to the academic discipline in which they are working. Many reports will adopt the Harvard, Chicago or APA referencing systems. Whatever referencing system candidates choose, they must use it consistently.

Authenticity and academic honesty

It is the centre's responsibility to make sure that all assessed work is the candidate's original work. If plans and first drafts are completed under teacher supervision, teachers can be sure of the authenticity of the final report. Teachers should not correct or edit draft coursework. Candidates can draft and redraft work, but teachers should only give brief summative comments on progress during this drafting phase. A general discussion on the progress of the report is a natural part of the teacher–candidate relationship, as it is for other parts of the course.

Candidates must not submit someone else's work as their own, or use material produced by someone else without citing and referencing it properly. Teachers should make candidates aware of the academic conventions governing quotation and reference to the work of others and teach candidates how to use them.

A candidate taking someone else's work or ideas and passing them off as his or her own is an example of plagiarism. Cambridge International use plagiarism detection software packages. It is the teacher's responsibility to prevent plagiarism from happening in the first place, and to detect it if it does happen. For more information, search for 'Preventing plagiarism – guidance for teachers' on our website at **www.cambridgeinternational.org**

At the time of submission, the candidate must sign a statement of originality confirming that they are submitting their own work. The teacher countersigns it to confirm that they believe it is the candidate's work.

Submitting candidates' work

All candidates' research reports and research logs are marked by Cambridge International. All work must be submitted electronically.

The deadlines and methods for submission are given in the *Administrative Guide*. This is available from the Exams Officers' Guide section of our website: **www.cambridgeinternational.org/eoguide**

For each candidate, submit the following pieces of work to Cambridge International:

1 Cambridge Research Report
2 Research log
3 Research proposal form.

Command words

Command words and their meanings help candidates know what is expected from them in the exam. The table below includes command words used in the assessment for this syllabus. The use of the command word will relate to the subject context.

Command word	What it means
Assess	make an informed judgement
Compare	identify/comment on similarities and/or differences
Contrast	identify/comment on differences
Demonstrate	show how or give an example
Develop	take forward to a more advanced stage or build upon given information
Evaluate	judge or calculate the quality, importance, amount, or value of something
Explain	set out purposes or reasons / make the relationships between things evident / provide why and/or how and support with relevant evidence
Identify	name/select/recognise
Justify	support a case with evidence/argument

Phrases such as 'To what extent …?' and 'Make an overall judgement' may also be seen in the assessment for this syllabus.

5 What else you need to know

This section is an overview of other information you need to know about this syllabus. It will help to share the administrative information with your exams officer so they know when you will need their support. Find more information about our administrative processes at **www.cambridgeinternational.org/eoguide**

Before you start

Previous study

We recommend that learners starting this course should have completed a course in English equivalent to Cambridge IGCSE™ or Cambridge O Level First Language English.

Guided learning hours

We design Cambridge International AS & A Level syllabuses based on learners having about 180 guided learning hours for each Cambridge International AS Level and about 360 guided learning hours for a Cambridge International A Level. The number of hours a learner needs to achieve the qualification may vary according to local practice and their previous experience of the subject.

Availability and timetables

All Cambridge schools are allocated to one of six administrative zones. Each zone has a specific timetable.

You can view the timetable for your administrative zone at **www.cambridgeinternational.org/timetables**

You can enter candidates in the June and November exam series. If your school is in India, you can also enter your candidates in the March exam series.

Check you are using the syllabus for the year the candidate is taking the exam.

Private candidates cannot enter for this syllabus. For more information, please refer to the *Cambridge Guide to Making Entries*.

Combining with other syllabuses

Candidates can take this syllabus alongside other Cambridge International syllabuses in a single exam series. The only exceptions are:

- Cambridge International Project Qualification 9980
- Syllabuses containing Global Perspectives within the syllabus title at the same level

Group awards: Cambridge AICE

Cambridge AICE (Advanced International Certificate of Education) is a group award for Cambridge International AS & A Level. It allows schools to offer a broad and balanced curriculum by recognising the achievements of learners who pass exams in a range of different subjects.

Learn more about Cambridge AICE at **www.cambridgeinternational.org/aice**

Making entries

Exams officers are responsible for submitting entries to Cambridge International. We encourage them to work closely with you to make sure they enter the right number of candidates for the right combination of syllabus components. Entry option codes and instructions for submitting entries are in the *Cambridge Guide to Making Entries*. Your exams officer has a copy of this guide.

Exam administration

To keep our exams secure, we produce question papers for different areas of the world, known as administrative zones. We allocate all Cambridge schools to one administrative zone determined by their location. Each zone has a specific timetable. Some of our syllabuses offer candidates different assessment options. An entry option code is used to identify the components the candidate will take relevant to the administrative zone and the available assessment options.

Support for exams officers

We know how important exams officers are to the successful running of exams. We provide them with the support they need to make your entries on time. Your exams officer will find this support, and guidance for all other phases of the Cambridge Exams Cycle, at **www.cambridgeinternational.org/eoguide**

Retakes and carry forward

Candidates can retake Cambridge International AS Level and Cambridge International A Level as many times as they want to. Information on retake entries is at **www.cambridgeinternational.org/entries**. To confirm what entry options are available for this syllabus, refer to the *Cambridge Guide to Making Entries* for the relevant series.

Candidates can carry forward the result of their Cambridge International AS Level assessment from one series to complete the Cambridge International A Level in a following series, subject to the rules and time limits described in the *Cambridge Handbook*.

Regulations for carrying forward entries for staged assessment (Cambridge International AS & A Level) can be found in the *Cambridge Handbook* for the relevant year of assessment at **www.cambridgeinternational.org/eoguide**

Marks achieved in Component 3, Team Project, can be carried forward on their own to future series, subject to the requirements set out in the *Cambridge Handbook*. This can be done by making entries for either of the following options:

- AS Level only awarding: the AS Level entry option, where components 1 and 2 are taken and the marks of Component 3 have been carried forward.

or

- A Level awarding: the A Level entry option, where components 1, 2 and 4 are taken and the marks of Component 3 have been carried forward.

The marks from the specific entry options listed above cannot be used as a staged route to complete a full A Level. For information, refer to the *Cambridge Handbook* for the relevant year of assessment at **www.cambridgeinternational.org/eoguide**

Equality and inclusion

We have taken great care to avoid bias of any kind in the preparation of this syllabus and related assessment materials. In our effort to comply with the UK Equality Act (2010) we have taken all reasonable steps to avoid any direct and indirect discrimination.

The standard assessment arrangements may present barriers for candidates with impairments. Where a candidate is eligible, we may be able to make arrangements to enable that candidate to access assessments and receive recognition of their attainment. We do not agree access arrangements if they give candidates an unfair advantage over others or if they compromise the standards being assessed.

Information on access arrangements is in the *Cambridge Handbook* at **www.cambridgeinternational.org/eoguide**

Language

This syllabus and the related assessment materials are available in English only.

After the exam

Grading and reporting

Grades A*, A, B, C, D or E indicate the standard a candidate achieved at Cambridge International A Level. A* is the highest and E is the lowest grade.

Grades a, b, c, d or e indicate the standard a candidate achieved at Cambridge International AS Level. 'a' is the highest and 'e' is the lowest grade.

'Ungraded' means that the candidate's performance did not meet the standard required for the lowest grade (E or e). 'Ungraded' is reported on the statement of results but not on the certificate. In specific circumstances your candidates may see one of the following letters on their statement of results:

- Q (PENDING)
- X (NO RESULT).

These letters do not appear on the certificate.

If a candidate takes a Cambridge International A Level and fails to achieve grade E or higher, a Cambridge International AS Level grade will be awarded if both of the following apply:

- the components taken for the Cambridge International A Level by the candidate in that series included all the components making up a Cambridge International AS Level
- the candidate's performance on the AS Level components was sufficient to merit the award of a Cambridge International AS Level grade.

On the statement of results and certificates, Cambridge International AS & A Levels are shown as General Certificates of Education, GCE Advanced Subsidiary Level (GCE AS Level) and GCE Advanced Level (GCE A Level).

'Cambridge International A Levels are the 'gold standard' qualification. They are based on rigorous, academic syllabuses that are accessible to students from a wide range of abilities yet have the capacity to stretch our most able.'

Director of Studies, Auckland Grammar School, New Zealand

How students, teachers and higher education can use the grades

Cambridge International A Level

Assessment at Cambridge International A Level has two purposes:

- to measure learning and achievement
  The assessment:
  - confirms achievement and performance in relation to the knowledge, understanding and skills specified in the syllabus.

- to show likely future success
  The outcomes:
  - help predict which students are well prepared for a particular course or career and/or which students are more likely to be successful
  - help students choose the most suitable course or career.

Cambridge International AS Level

Assessment at Cambridge International AS Level has two purposes:

- to measure learning and achievement
  The assessment:
  - confirms achievement and performance in relation to the knowledge, understanding and skills specified in the syllabus.

- to show likely future success
  The outcomes:
  - help predict which students are well prepared for a particular course or career and/or which students are more likely to be successful
  - help students choose the most suitable course or career
  - help decide whether students part way through a Cambridge International A Level course are making enough progress to continue
  - guide teaching and learning in the next stages of the Cambridge International A Level course.

Grade descriptions

Grade descriptions are provided to give an indication of the standards of achievement candidates awarded particular grades are likely to show. Weakness in one aspect of the examination may be balanced by a better performance in some other aspect.

Grade descriptions for Cambridge International A Level Global Perspectives & Research will be published after the first assessment of the A Level in 2023. Find more information at **www.cambridgeinternational.org/alevel**

Changes to this syllabus for 2023, 2024 and 2025

The syllabus has been reviewed and revised for first examination in 2023.

You must read the whole syllabus before planning your teaching programme.

Changes to syllabus content	• Small-scale changes to the *Approaches to teaching and learning* section: – definition of key terms has been clarified – list of global topics has been updated. • The learner attributes have been updated. • A glossary of standard command words has been added.
Changes to assessment (including changes to specimen papers)	• The aims and assessment objectives have been updated: – collaboration is no longer part of AO3. AO3 is now called 'Communication' – reflection on the effectiveness of collaboration is now part of AO2. • The number of marks for components has increased. • The weighting of assessment objectives has changed: – less emphasis on AO1 – more emphasis on AO3 in Component 3 – more emphasis on AO2 in Component 4. • The weighting of components has changed: Component 1 is now slightly more heavily weighted in the AS Level. • In Component 1, candidates now need to read both source texts for Question 1. • Component 3: – candidates now have an option to deliver either a live presentation to an audience, or a presentation with a recorded voiceover by the candidate – maximum length of the presentation has been increased to 10 minutes – candidates are now assessed on reflection and evaluation of the effectiveness of collaboration with others – the reference to being innovative has been removed – candidates no longer need to identify and describe a team solution. • Component 4: – research reports are now externally assessed, with separate marks for the research log and the research report – the oral explanation and justification (viva) of the research report has been discontinued – the Outline Proposal Form has been discontinued – candidates must submit a research proposal form at the same time as the research report and log. • The mark schemes have been revised for all components.

In addition to reading the syllabus, you should refer to the updated specimen papers. The specimen papers will help your students become familiar with exam requirements and command words in questions. The specimen mark schemes explain how students should answer questions to meet the assessment objectives.

Any textbooks endorsed to support the syllabus for examination from 2023 are suitable for use with this syllabus.

‘While studying Cambridge IGCSE and Cambridge International A Levels, students broaden their horizons through a global perspective and develop a lasting passion for learning.’

Cambridge Assessment International Education

Cambridge International AS & A Level

GLOBAL PERSPECTIVES & RESEARCH **9239/01**

Paper 1 Written Exam **For examination from 2023**

SPECIMEN PAPER **1 hour 30 minutes**

0123456789

You must answer on the enclosed answer booklet.

You will need: Answer booklet (enclosed)
Insert (enclosed)

INSTRUCTIONS

- Answer **all** questions.
- Follow the instructions on the front cover of the answer booklet. If you need additional answer paper, ask the invigilator for a continuation booklet.

INFORMATION

- The total mark for this paper is 45.
- The number of marks for each question or part question is shown in brackets [ ].
- The insert contains all the resources referred to in the questions.

This document has **2** pages.

© UCLES 2020

Read **both** documents in the accompanying insert and answer **all** the questions.

You should spend approximately 15 minutes reading **both** documents in the insert before attempting to answer the questions. This is allowed for in the time set for the exam.

Write your answers to Question 2 and Question 3 in continuous prose.

Medical ethics and priorities

1 **(a)** The author of Document A mentions different types of robot.

Identify **two** robots that are already being used. [2]

(b) The author of Document B refers to a range of ethical issues with using healthcare robots.

Identify **three** ethical issues mentioned by the author. [3]

2 Assess the strengths and weaknesses of the evidence used by the author of Document A to support their claims about the development of robotic healthcare equipment.

In your answer include the impact of the evidence on the author's argument. [15]

3 The two authors present different arguments and perspectives about the development of robotic healthcare equipment.

Evaluate the arguments of both authors. In your answer, consider their perspectives and include a reasoned judgement about whether one argument is stronger than the other. [25]

CAMBRIDGE
International Education

Globally recognised qualifications

Success in Cambridge qualifications opens doors to universities worldwide. Universities tell us they value the deep subject knowledge, independent research and critical thinking skills that Cambridge qualifications bring. This guide summarises the key admissions requirements for study in popular destinations for Cambridge students. It also highlights some of the higher education institutions that recognise Cambridge qualifications. For a more comprehensive list, search our recognition database at www.cambridgeinternational.org/recognition-search

Destination	Key admissions information	Recognising institutions include:
Argentina 	Most universities recognise Cambridge qualifications from IGCSEs to the AICE Diploma. Cambridge qualifications can earn exemptions, for example from proof of English language ability, or direct entry purposes.	• Instituto Tecnológico de Buenos Aires • Universidad Argentina de la Empresa • Universidad Austral • Universidad de San Andrés • Universidad Torcuato Di Tella.
Australia 	All universities under the Universities Australia umbrella, including the Group of Eight coalition of top universities, recognise Cambridge qualifications. Typically, three A Level passes at minimum Grade C are required for entry to university, while three or four AS Level passes at minimum of Grade C or D are needed for pathway programmes. International students also need to meet English language requirements.	• Australian National University • University of Queensland • University of Sydney • University of Melbourne • University of New South Wales.
Canada 	Over 60 Canadian universities recognise Cambridge qualifications. Students with at least two A Levels can apply to Canadian universities and colleges, but students must check before applying as admissions criteria vary by institution and course.	• Concordia University • McGill University • University of Alberta • University of British Columbia • University of Saskatchewan.
China's mainland 	Cambridge International A Level qualifications give access to many English degree programmes offered by universities on China's mainland. Typically, two to three A Levels at Grade E and above will meet minimum entry requirements. Depending on subject choice, mathematics and one science subject (physics, biology or chemistry) are required for science or STEM (science, technology, engineering, and mathematics) related majors. Scholarship opportunities are offered on a merit or need basis for Cambridge International A Level qualifications. Please check with the relevant university for detailed information. Cambridge IGCSE™ or Cambridge International AS & A Level English at a certain grade will normally satisfy the English language requirement. Bear in mind that some universities require English language certificates to be obtained within a certain time period. For degree programmes in Chinese, universities will also require international students to provide a Chinese language test certificate at HSK 4 or 5 level.	• Peking University • Tsinghua University • Business School, Renmin University of China • Fudan University • Shanghai Jiao Tong University • Zhejiang University International Business School.

Please always check entry criteria directly with universities before applying.

Globally recognised qualifications continued

Destination	Key admissions information	Recognising institutions include:
Colombia 	Most universities recognise Cambridge IGCSEs and Cambridge International AS & A Levels, which can also earn exemptions from proof of English language ability.	· Universidad de los Andes · Universidad Javeriana · Universidad Icesi · Universidad Pontificia Bolivariana · Universidad del Norte.
Egypt 	For the majority of courses, most universities require eight IGCSE subjects at minimum Grade C, plus one A Level subject at minimum Grade D (eight IGCSEs + one A Level or eight IGCSEs + two AS Levels). Subject-specific requirements apply depending on the chosen field of study. Students must also pass the Ministry of Education exams in Arabic, Religious Studies and Social Studies.	· Supreme Council of Universities · Heliopolis University · American University in Cairo.
Germany 	Studying in Germany requires three independent academic A Level subjects with a minimum Grade C. AS Levels cannot be considered instead of an A Level. Subject-specific requirements also apply, depending on the chosen field of study, and on the requirements set by the university. Certain vocational subjects are also accepted for a specific range of courses. Read more on our recognition web page for Germany. You can find full details on the anabin database of the Central Office for Foreign Education (ZAB) at https://anabin.kmk.org/anabin.html (German only).	· Ludwig-Maximilians-Universität München · Freie Universität Berlin · RWTH Aachen · Universität zu Köln · Friedrich-Alexander-Universität, Erlangen-Nürnberg · SDI München.
Hong Kong, SAR China 	Hong Kong universities are very familiar with Cambridge qualifications. Typically, universities ask for three A Levels, with some universities accepting two AS Levels or five/six IGCSEs as equivalent to one of the three A Levels. Language subjects normally are not included in one of the three A Level subjects for admission purposes. Please check with the relevant university for detailed information. Cambridge IGCSE English Language or English Literature provides the required proof of linguistic ability at a number of universities.	· Hong Kong University of Science and Technology · University of Hong Kong · Chinese University of Hong Kong · City University of Hong Kong · Hong Kong Polytechnic University.
India 	Association of Indian Universities, the nodal agency that awards equivalence to foreign qualifications in India, has granted equivalence to Cambridge International A Levels, Cambridge IGCSE and Cambridge O Levels. Private candidates are not awarded equivalence. Universities typically require three A Levels. Entry to professional courses through national entrance tests have higher requirements.	· University of Delhi · University of Calcutta · University of Hyderabad · University of Mumbai · University of Bangalore · Indian Institute of Technology.
Ireland 	Cambridge qualifications are accepted by all Irish universities. Cambridge International A Levels with Grade C or above are required, together with IGCSEs at Grade C. The requirement is normally a total of six distinct subjects (A Levels and IGCSEs combined). Admission is competitive, and higher minimum requirements and subject-specific grades may apply depending on the course and university. This will be indicated on the university's website. Cambridge IPQ is recognised and will score as a Cambridge International AS Level.	· Trinity College Dublin · University College Cork · University College Dublin · University of Galway.
Japan 	Leading public and private universities offer English-based degree programmes, and most such programmes accept Cambridge qualifications for entry. Many of those universities require three Cambridge International A Levels to apply to their courses, and some accept IGCSEs and AS Levels with a combination of one or more A Levels. Read more on our recognition web page for Japan.	· International Christian University · Kyushu University · Nagoya University · Sophia University · The University of Tokyo · Tohoku University.

Destination	Key admissions information	Recognising institutions include:
Malaysia 	Public and private universities are very familiar with Cambridge qualifications – many students apply successfully to private universities, but places are limited in state universities. Typical admissions requirements are three A Levels, but as criteria vary by institution and course students should check before applying.	• University of Malaya • Universiti Sains Malaysia • Universiti Teknologi Malaysia • Universiti Teknologi PETRONAS • Taylor's University.
Netherlands 	Cambridge qualifications are recognised by universities in the Netherlands Students applying to a research university must achieve three IGCSEs at Grade C and above and three A Levels at Grade C and above in six different subjects (for competitive courses, higher and/or additional requirements may apply). Students applying to universities of applied sciences must achieve at least four IGCSEs at Grade C and above and two AS Levels at Grade C and above in six different subjects.	• Delft University of Technology • Leiden University • University of Amsterdam • Saxion University of Applied Sciences • Utrecht University • Radboud University.
New Zealand 	All New Zealand universities recognise Cambridge qualifications. Cambridge International AS or A Level: a minimum of 120 points on the New Zealand Cambridge tariff from any syllabus groups which are broadly equivalent to those in the list of approved subjects for the National Certificate of Educational Achievement (NCEA), and Grade D or above from at least three different syllabus groups (excluding Thinking Skills). Plus literacy (Grade E or above in AS Level English Language, English Language and Literature, English Literature or English General Paper) and numeracy (Grade D or above in IGCSE or GCSE Mathematics or any mathematics subject passed at AS Level).	• University of Auckland • University of Canterbury • Victoria University of Wellington • Waikato Institute of Technology.
Pakistan 	Cambridge qualifications are widely recognised by universities across Pakistan, and by the government of Pakistan. Qualification equivalence is established by the Ministry of Education and can change – students should check entry criteria for both the individual institution and course before applying.	• National University of Sciences and Technology • University of Health Sciences • University of Engineering and Technology Lahore • Dow Medical College.
Singapore 	Cambridge qualifications are widely recognised by universities in Singapore. The application process for public universities is highly competitive – Cambridge students will generally need at least four very strong International A Level grades. Some universities may ask for standardised test.	• National University of Singapore • Nanyang Technological University • Singapore Management University.
South Africa 	Cambridge qualifications are widely accepted by universities in South Africa. Students need to qualify for a certificate of exemption issued by Universities South Africa (USAf), a requirement to pursue first degree studies in South Africa. You can find grading and subject grouping requirements for the exemption at: www.cambridgeinternational.org/recognition	• University of Cape Town • University of Pretoria • Stellenbosch University • University of the Western Cape.

Please always check entry criteria directly with universities before applying.

Destination	Key admissions information	Recognising institutions include:
Spain 	Study in Spain requires five IGCSE/O Level subjects at Grade C or above plus at least three A Levels with a minimum of 48 UCAS tariff points. Up to a maximum of four AS & A Level qualifications can be submitted, i.e., two A Levels + two AS Levels, three A Levels, three A Levels + one AS Level or four A Levels. You can find information on applying with international qualifications at: https://unedasiss.uned.es/home	· ESCP Europe Business School – Madrid campus · IE University – Madrid and Segovia campuses.
UAE 	The UAE Ministry of Education recognises Cambridge qualifications for university entrance. Students must have a Grade E or above in at least five IGCSEs or O Levels, plus two AS Levels or one A Level at Grade D or above.	· American University of Sharjah · Khalifa University · American University in Dubai · University of Sharjah · Zayed University.
UK 	Cambridge qualifications are recognised by UK universities. Universities typically require three A Levels. Different courses require different grades and subject combinations, so students should check entry criteria for both the individual institution and course before applying.	· University of Oxford · University of Cambridge · Imperial College London · University College London · The University of Manchester.
USA 	Cambridge qualifications are widely recognised by US universities, including Ivy League and Ivy Plus institutions. As entry requirements, exemption options, and/or credit arrangements can vary, students should check entry criteria for both the individual institution and course before applying.	· Stanford University · Harvard University · Caltech · University of Chicago · Princeton University.

Applying to university with Cambridge qualifications

Key advice for students

- **Check admissions criteria before applying:** Admissions criteria vary between institutions and courses, and are subject to change. In countries such as the US and Canada, students with good grades in Cambridge qualifications may also be eligible for course credits or advanced standing, reducing the length and cost of their studies.
- **Confirm language requirements:** Students planning to follow an academic course delivered in English may have to demonstrate a specific level of English language proficiency as part of the admissions process. Cambridge qualifications are often accepted as evidence of such proficiency.
- **Research target destinations:** Students planning to study in a different country/region will also need to undertake detailed research into issues ranging from visa requirements to local culture.

Over **2400** institutions worldwide in 95 countries/regions accept Cambridge qualifications

Over **1000** US universities accept Cambridge qualifications, including all the Ivy League

Useful resources

Recognition database

Search our online directory to find out which universities worldwide recognise Cambridge qualifications, and see their entry criteria. Go to: www.cambridgeinternational.org/recognition-search

Country-specific guidance

We publish a range of Destination brochures to give students advice on applying to institutions in countries including Australia, Canada, India, Pakistan, South Africa, the UK and US. You can also find videos on our website filmed in popular student destinations, with advice from admissions officers and former Cambridge students.

Foreword

At Cambridge International, we are committed to providing a high level of support for school leaders and teachers delivering Cambridge programmes. The *Implementing the Curriculum with Cambridge* guide is one of the cornerstones of this support and sets out our approach to teaching Cambridge at your school.

It provides a rich resource for school leaders to design, develop and implement the curriculum using Cambridge programmes and qualifications. It sets out some of the principles that underpin an effective curriculum and highlights considerations for school leaders, drawing on case studies and examples.

Nevertheless, at Cambridge, we recognise that the most important work in designing and implementing a school's curriculum is done by its leaders and teachers. It is you who ensure that any programme is adapted to your context, culture and ethos, and is tailored to your students' needs.

This flexibility is a fundamental principle of a Cambridge education. We do not believe that a common prescription is suitable for all countries and contexts. The result of a successful education is so much more than qualifications. It is well-rounded, curious and independent young people, ready to go out and make a difference to the world. We hope our learner attributes can contribute to this by encouraging teachers to focus on the strategies and habits needed for life-long learning within and beyond the taught curriculum.

At the time of writing this foreword, in July 2020, the education world has undergone tremendous disruption as a result of the Covid-19 pandemic. From school closures, to the cancelling of examinations worldwide, no part of our profession has been untouched. When the outbreak struck, the education community adapted swiftly. Schools around the world immediately began teaching and learning remotely, and Cambridge International developed a new system for awarding grades in the June 2020 series. Throughout this process, I've been struck by the strength of collaboration between ourselves and the global community of Cambridge schools, all equally determined to minimise the disruption to learners and allow them to continue their educational journeys.

The consequences of the pandemic are likely to be felt for many years to come. However, the essential building blocks to providing a well-designed and supported curriculum will remain the same.

Notwithstanding the disruption to education in 2020, the world of international education continues to evolve, and we are evolving our support to schools, reflecting our approach to education. The Cambridge family of organisations, including Cambridge University Press and Cambridge English, are working closer than ever together to ensure that we can offer our schools the best possible range of resources and guidance. We have also welcomed CEM into the Cambridge family, to offer formative baseline assessments to support every stage of the Cambridge Pathway.

Whether teaching in school or remotely, this guide is intended to help you make sense of your curriculum and plan for its development.

It should serve as a guide to the wide range of resources – subject syllabuses, learner and teacher support – from which schools can draw in building and delivering a curriculum appropriate to their learners' needs. At the same time, it sets out and explains the principles which we believe should underpin an effective school curriculum – principles based not on ideology but on our own research and that of others – and discusses how these principles can be applied in practice.

Introduction

This guide will help school principals, school leaders, and others responsible for the educational programme in a school to design, develop, implement and evaluate the curriculum where Cambridge programmes and qualifications are followed.

Schools require well-designed and well-supported curricula to achieve their educational vision and aims. These aims usually include academic excellence, fulfilling the potential of every learner and nurturing the competencies learners need to succeed in higher education, the world of work and to lead fulfilled lives.

The guide focuses on the curriculum as a whole. It:

- identifies fundamental principles that we believe schools need to engage with while they design, implement and evaluate their curriculum
- considers practices that support these principles
- explains our programmes and the support we offer in detail
- highlights where to find more specific information

Schools are responsible for their own curriculum; our role at Cambridge is to support school leaders make informed decisions. The Cambridge pathway provides a coherent curriculum structure made up of four stages – from Primary to Advanced. Each stage builds on the previous one in a carefully aligned instructional system. Some schools choose to adopt the whole Cambridge continuum, others choose to offer one or two stages, while many schools combine Cambridge with other national and international programmes. This guide is relevant to all of these approaches.

The principles and practices outlined in this guide are based on our experience of listening to what schools want to achieve through their curriculum, and are informed by research-based best practice.

Every school is a unique community with its own identity and will be at a different stage in its evolution; some will be starting up while others will be evaluating where they are with a view to improving provision and practice. This guide is written with this fact in mind.

Curriculum, pedagogy and assessment are inherently linked. Hence, this guide focuses on curriculum within the context of the broader school policies and practices in which it is embedded. Developing the curriculum involves building school capacity, structure and operations to support it. This guide relates to all of these facets of effective schools.

Cambridge has produced two other guides and a series of resources that complement and further develop many of the points made in this guide.

1. Developing your school with Cambridge
2. Developing the Cambridge learner attributes
3. Other resources in our teaching and learning area including education briefs and getting started with guides.

1. Curriculum planning: An overview

This chapter considers what the curriculum is and how it should be derived from the school's educational vision. It highlights the fact that qualifications form only part of the curriculum. Every school is unique and school leaders must consider how to support its implementation, which may necessitate changes to a school's structure and operations. We introduce some fundamental principles that need to be considered in the curriculum design process. Chapter 2 of the learner attributes guide provides further guidance.

1.1 What is curriculum?

Across the world, the term curriculum is used in several different ways.

In some countries, 'curriculum' has a holistic meaning encompassing not only subjects, but also the connections between subjects, teaching methods and all aspects of schooling that define the learner's experience. In other countries, a narrower interpretation is used, referring either to a prescribed range of courses (the curriculum in Year 6 contains eight different subjects) or a specific learning programme across different years (the chemistry curriculum at secondary level). This guide uses the following definitions:

- A **school curriculum** refers to the combination of subjects studied within a school year and in sequential years as the learner moves through the educational system provided by the school.
- A **subject curriculum** refers to the content and skills contained within a syllabus applied across sequential stages of student learning. These stages normally refer to school year levels, and therefore a particular age of learner.
- **Co-curricular curriculum** refers to valued educational activities that support learning beyond the school curriculum, which the school encourages and supports.
- The **experienced curriculum** refers to the learning students actually receive as a result of the whole educational experience the school provides. This includes the impact of the school curriculum, teaching approaches, the co-curricular curriculum and the learning environment. It includes both the planned and unplanned or unintended outcomes of the curriculum.

The wider learning experience:

Planning the school curriculum in terms of subjects and qualifications is only part of the process. The experienced curriculum in an excellent school provides a learning experience that is more than the sum of the qualifications, subjects and activities that are visible on the school schedule. This is because careful attention in curriculum design and implementation is given to learning within, across and between the subjects and activities. All teachers and school staff support the development of the learner attributes and other qualities identified in the school's vision. Breadth, balance and coherence need to be built in by design. The school's vision and aims will include personal and social outcomes as well as academic ones. Learning does not begin or end in classrooms, but permeates the school environment and broader community.

What learners actually experience may not be the same as the written objectives of the curriculum – it will be the consequence of a complex web of interdependent parts including:

- the school's vision and values
- teaching quality
- learner motivation and prior knowledge
- school leadership, environment and culture
- the school's curriculum and subject curricula
- assessment practices and expectations
- the school's internal structures and operations.

Appendices

Therefore, the experienced curriculum is necessarily unique to each school, and designing or re-evaluating a curriculum is a complex and challenging task. Schools should regularly evaluate their outcomes against intentions, ensuring that they are optimising learners' educational experiences in line with the school's vision and mission.

School vision, mission and plan:

The school vision is a compelling sense of the future direction of the school. It should inspire commitment from the whole school community and be widely shared.

Most schools also have a mission statement, which is a written declaration defining the school's educational purpose. Educational aims might be included in the mission statement or listed separately. Together with the vision and mission, they provide focus and guidance on what the priorities are.

The school strategic plan gives practical direction to the vision, mission statement and aims. This should include a statement headlining longer-term priorities/ objectives of up to five years ahead, and a detailed one-year implementation plan.

Curriculum planning:

Table 1 below outlines some of the many questions that schools need to address when planning the school curriculum. It shows that these decisions must be based on the school's vision, mission and educational aims, taking into consideration school structures and building school capacity.

> "The school vision is a compelling sense of the future direction of the school. It should inspire commitment from the whole school community and be widely shared."

Table 1: Curriculum planning within a school context: Some critical questions

School Vision and Strategic Planning – achieving the desired learning outcomes	
Building school capacity	**Structure and operation**
Learners What are the expected academic, personal and social outcomes? Which skills and competencies should learners acquire through the curriculum? How will the curriculum motivate, engage and challenge learners? Is the curriculum relevant to the needs of learners – now and in the future? What attributes are being modelled for learners across the school?	Designing a curriculum Which Cambridge programmes and subjects will be included and how will these complement other educational programmes and qualifications offered by the school? Does the curriculum reflect the school's vision and context? How will learning within local or national contexts be developed in the curriculum? How will the school support learners who do not have English as a first language? Which subjects will be taught in English? (In bi-lingual schools)

School Vision and Strategic Planning – achieving the desired learning outcomes	
Building school capacity	**Structure and operation**
Teachers Which pedagogical and assessment practices should lie at the centre of teaching and learning? What teacher professional development is required to ensure effective planning and delivery of the curriculum? How will teachers be encouraged to self-reflect on their current teaching practices and the learning achievement of their students based on meaningful evidence? Is there provision for teachers to undertake relevant professional qualification courses to enhance their professional learning and the quality of student learning experiences? How will teacher professional development remain relevant and targeted?	Qualifications Will the school offer national as well as Cambridge qualifications? Is progression from one level to the next coherent? Will there be any scheduling or organisational difficulties if dual qualifications are offered? Will these combinations of qualifications support learners applying to higher education (in secondary schools)?
Leadership and Management Does the school have an effective governance structure with clear roles and responsibilities? What role do school administrators have in the delivery of the curriculum and in supporting teachers? How do leaders know that effective teaching and real learning are taking place in classrooms? How is the school measuring the impact of the curriculum? And what are they doing with this information? Are effective collegial and collaborative team structures and dynamics operating school-wide and within subject/learning areas? Are inter-school networking opportunities available for teachers and school leaders to support the implementation and development of the curriculum? How will the school engage with/use professional learning networks? Has the leadership team communicated the school vision to all stakeholders appropriately and effectively?	Timetabling How many subjects will be studied and for how many hours in each subject? How will this vary from one year to the next as learners progress through the school? Will the curriculum be fixed (compulsory) or provide a measure of learner subject choice? How will such flexibility be balanced against the school's current resourcing and staffing provisions?

School Vision and Strategic Planning – achieving the desired learning outcomes	
Building school capacity	**Structure and operation**
School and the community What involvement will school support groups and other community groups have? What contributions can these groups make in the development of the curriculum? How can the resources of the local community be linked into the school curriculum?	Facilities What facilities will be required to accommodate the requirements of specialist subjects? Does the school provide appropriate learning environments for studying all subjects in the curriculum?
	Resourcing What financial provision is available for delivering the curriculum, in terms of teaching resources, teacher support and administrative requirements? Does the school have effective communication and co-ordination systems and structures for implementing, managing and refining the curriculum?

1.2 Principles fundamental to successful curriculum design and implementation

Cambridge schools operate in a wide range of contexts with differing demands and expectations. The curriculum is at the heart of schools' strategies to raise achievement and improve outcomes for all learners. While some schools will prefer to offer a curriculum made up entirely of combinations of Cambridge courses, combining these to form a programme of study, other schools will select individual subject syllabuses and combine them with qualifications and educational programmes from other national or international providers.

We believe that certain principles are fundamental to successful curriculum design and implementation in all situations:

1. The school curriculum should deliver a broad, balanced and consistent programme of learning with clear and smooth progression routes designed for the needs of all learners.

When planning the school curriculum, the school leadership must choose both the subjects to be studied for each year, as well as a sequential programme from one year to the next. Time and resource limitations mean that school leaders must carefully prioritise and make choices when planning a curriculum. Different societal or cultural norms will influence this process of prioritisation and there is no one-size-fits-all solution.

Certain considerations are, however, universally significant:

- The **values and educational aims** of the school must guide all decisions about the curriculum. Normally this results in a balance of subjects and activities covering different educational processes, objectives and content, developing a holistic set of skills and knowledge.
- **Quality** is more important than quantity. It can be tempting to add more subjects and/or content to the curriculum, with the noble intention of maximising learning. Too much content, however, does not allow time to support depth of understanding and the practice students need for deep learning. Less can actually be more.
- **Progression** through the curriculum must be consistent. The curriculum should give learners the understanding, knowledge and skills they need to allow them to progress to the next educational stage.

- A spiral approach to skill development is supported. Each successive stage revisits critical learning areas and builds on them, respecting the learners' developmental stage.

In addition to these universal considerations, other aspects for a school to consider include:

- Consistency – This is concerned with progression in knowledge and skills from one stage to the next. Do the different stages align? Are learners appropriately prepared and challenged at each stage? It is reasonable to expect changes in emphasis and approach as learners become more mature. Consistency does not mean that the curriculum will stay the same, but it is important for changes to be planned rather than unintentional.
- Balance – The concept of breadth and balance will be illuminated by the school's vision and educational aims. A balanced curriculum normally includes mathematics, languages, sciences, technology, humanities, creative arts and physical education. A broad curriculum allows learners to experience, acquire and develop essential and valued learning from a variety of contexts. It may be that some disciplines, for example information technology, are infused in the teaching of other subjects rather than being taught as a discrete subject. There is still the need for a clear identification of these activities, supported by a written curriculum that helps define precisely who is responsible for their development. It is also important that literacy and numeracy are supported by teachers of all subjects, not just in languages and mathematics.
- Preparation for higher education – In the senior years of schooling, some narrowing of the curriculum may be expected as learners prepare for specific qualifications required for progression to higher education. Learners should still be expected to take part in activities and programmes that are complementary to the academic qualifications they are preparing for, and the school should provide a breadth of activity and engagement in support of the school's mission.

- Combining curricula – The school is combining Cambridge qualifications with others, it is important to consider compatibility issues. It may be that other qualifications or programmes of study incorporate different approaches to teaching, learning and assessment from those described in this guide. This will require careful planning and coordination to ensure that any differences are clearly understood and accommodated.
- Effectiveness – Cambridge's syllabuses, teacher support material, teacher professional development and assessments are designed by subject experts to support a smooth progression from primary to upper secondary, but it is up to the school to make it happen. It is essential that schools create their own schemes of work and lessons plans to make the Cambridge syllabuses locally relevant and make sure teachers are teaching these effectively. The curriculum is locally constructed in the school.

2. The instructional system is well aligned and coherent

A well-designed instructional system is more than the sum of its parts. A curriculum is coherent when the prescribed content, textbooks, resources, and approaches to teaching and assessment are aligned and reinforce one another.

The learning experiences should be thoughtfully sequenced to respect students' developmental stages. The content of the curriculum, the pedagogical approach and the assessment approach must also be aligned in order to maximise learner development and achievement.

Cambridge syllabuses, teacher support material, endorsed textbooks and Cambridge professional development opportunities are designed to ensure alignment of the curriculum and pedagogy. Cambridge assessments are designed to ensure that they are valid, only assessing what is clearly defined in the syllabus assessment objectives.

Figure 1: An aligned instructional system

3. The curriculum supports the development of learners and teachers who are confident, responsible, reflective, innovative and engaged.

To help schools develop good learning habits, Cambridge has developed the learner and teacher attributes (see table 8 in chapter 3). Learning habits describe how students and teachers approach a given situation, environment or challenge. They include a combination of values, attitudes, knowledge, skills and strategies and assume competence – the skilled and appropriate application of the attribute.

Many schools have additional learner attributes, reflecting their school mission, and the way that the attributes are used varies widely. The ● **Developing the Cambridge learner attributes** guide provides a comprehensive resource for schools to consult.

4. Each subject curriculum should provide learners and teachers with inspiring and relevant content and an appropriate breadth and depth of subject knowledge.

Subject curricula should be formulated chronologically in a learning spiral so they provide appropriate progression from one stage of education to the next. The knowledge, understanding and skills acquired at each year level forms the foundation for learning at the next. In order to develop a deep level of understanding, while building a solid foundation for future progression, learners need to revisit and practice important knowledge and skills repeatedly in a number of different contexts. In planning the curriculum, time for this needs to be allowed so that depth of coverage is supported, reinforcing prior learning and creating links to new learning.

Cambridge offers subject curricula that are based on specified educational standards appropriate to the learners' development stage across the years of schooling. We work closely with universities and other higher education providers around the world to ensure they recognise our qualifications and that our qualifications provide the best possible preparation for students to do well in their studies once they get into University.

5. The school curriculum should recognise the language background of learners and provide them with the support they need to access the curriculum.

Schools almost always have learners with a range of exposure to and competence in different languages. This reality must be reflected in curriculum planning and in a coherent language policy reflecting the school's situation.

Language needs to be prioritised in the curriculum. Learners need to have excellent skills in their native or first language as this will directly influence their cognitive development in all subject areas. They also need to have excellent English language skills in order to access the curriculum if it is taught through the medium of English.

Students attending international schools are often learning the curriculum through the medium of English, so developing a high level of English language competence will help them learn. It is also critical that students continue to develop their first or best language. Language development helps develop student identity, international understanding and the Cambridge learner attributes.

All Cambridge qualifications are assessed in English. Learners must therefore develop sufficient skills in reading and writing in English to be able to take Cambridge assessments. However, they also need English speaking and listening skills to be able to learn effectively. Learning through English becomes an integral component of study. Schools develop a range of strategies that allow learners to progressively advance these skills prior to taking examinations. One such strategy is for all teachers to be 'language aware' - planning language support in their classes, and enabling them to be language teachers as well as teachers of their own subject disciplines.

Cambridge supports schools who want to use bilingual education programmes. This is where two or more languages are used as the medium of instruction for non-language subjects. Learners study some non-language school subjects, such as maths or geography, mainly through a second or third language, and some subjects through their first language. The understanding of bilingual education is linked to other educational concepts such as content and language integrated learning (CLIL). Here, in content classes, learners develop subject knowledge and new language skills at the same time. If dual national and international qualifications are being offered, the curriculum may specify subjects that will be taught through either English or the first language, that is, in a bilingual curriculum design. To find out more about our approach to bilingual education visit www.cambridgeinternational.org/bilingual

> "We are aware that most learners completing our programmes and qualifications are operating in a language that which is not their first language. Examiners apply a positive marking approach, looking to award marks when a learner has demonstrated understanding."

We are aware that most learners completing our programmes and qualifications are operating in a language that which is not their first language. Examiners apply a positive marking approach, looking to award marks when a learner has demonstrated understanding. Learners are not penalised for spelling and grammatical errors except in the assessment of languages which are testing language skills.

6. Assessment has a number of purposes that are essential to the educational process.

These purposes include assessment for learning (providing feedback in support of the learning process), and summative assessment (determining a learner's level of performance).

Assessment is an integral component of each subject's curriculum. Pedagogy and assessment are inseparable in the teaching and learning process, as development in one reciprocates change in the other. Assessment for learning practices are essential teaching strategies that inform teachers and learners about the current level of understanding and skill acquisition during the actual teaching phase, providing guidance and feedback for subsequent teaching. Summative assessment is carried out at the end of a period of learning and its

Appendices

purpose is to judge what standard the learner has reached. The final assessments in many Cambridge qualifications are high stakes because results influence progression onto the next stage of education or higher education, and can be used to make external judgements (for example by a university) of the learner's level of performance.

7. Clear and meaningful educational standards are essential to ensure accurate measurement of progress and achievement and allow for international benchmarking and comparability.

Clear standards are necessary for defining learning expectations, measuring progress, setting targets, comparing performance and certifying attainment. They are also critical to help teachers understand learners' strengths and weaknesses and to help learners understand their own learning progression. Assessment of specific and transparent educational standards enables the benchmarking of learner achievement on a local (school), national and international scale. Cambridge uses a number of different standards in relation to our syllabuses and assessments that are considered in detail in our code of practice document. Our teaching resources and endorsed textbooks exemplify these. For information on our school leader and school teacher standards see here and on our school self-evaluation standards see here. Cambridge ensures that all its high-stakes summative assessments are valid, reliable and fair, while adhering to the highest technical standards.

8. Teachers are the most powerful influence on student learning.

Reflective practice supported by professional development is an essential and continuous part of a teacher's life.

Curriculum is intertwined with pedagogy and effective teaching practice is a necessary condition for effective curriculum implementation. Teachers make the curriculum real by translating learning and assessment objectives, syllabus aims, subject content and school policy into meaningful learning experiences. The learner attributes apply to both teachers and learners, as teachers are required to exemplify the processes and practices expected of learners.

Systematic teacher professional development (PD) is therefore a critical tool to enhance both student learning and school performance. Cambridge provides a range of PD opportunities and resources aligned to the different backgrounds and levels of experience of teachers.

These support the teaching of Cambridge programmes and qualifications and the development of pedagogical skills. They help teachers to become confident, responsible, reflective, innovative and engaged. There are also numerous other excellent PD options that teachers can follow. Professional development should not be confined to Cambridge offerings, but does need to be consistent with the principles described in this guide.

One purpose of PD is supporting evidence-based reflective practice in day-to-day teaching. One of the best ways of achieving this is through teachers working collaboratively in professional learning communities and networks of local schools, but they can also draw on the wider international Cambridge community. Digital communications such as the internet let us easily, efficiently and economically share experiences, ideas and initiatives across the community, with our common goal of improving the quality of teaching and learning for all.

Experienced teachers are encouraged to become Cambridge teacher trainers and examiners. Being an examiner or trainer is a most effective way of developing teachers' own practice, helping to improve professional practice within their school as well as contributing to the wider Cambridge International community.

9. The pedagogy required to optimise learning using Cambridge curricula requires the active engagement of the learner.

Good teaching practice is not something that can be easily prescribed, and there are important cultural and local influences that will help to define what 'good' means. One universal principle fundamental to all effective approaches is that the learner must be actively engaged in their own learning.

Knowledge and understanding cannot be transmitted from the teacher to the learner. The learner's existing mental models must be challenged and extended. Teachers have to constantly listen to the voice of the learner, both in the classroom and in the work they produce, and engage with it to support learning

and understanding. This process helps learners become independent, as they start to model the teacher's approach.

Active learning requires teachers to lead learning, not just be facilitators of learning. This involves constantly monitoring the impact of their instructional approaches and adjusting what they do based on feedback. They need to build meaningful links in learners' minds between prior and newly acquired knowledge and understanding, while providing appropriate challenge.

10. Strong leadership is a necessary condition for sustained school improvement and curriculum development.

School leaders contribute in a variety of ways to the design and successful implementation of the school curriculum. Schools are a complex web of interdependent parts, and responsibilities of school leadership include getting the best out of both individuals and the system, and developing the system to better achieve the school's mission.

Excellent school leaders create the conditions to realise teachers' potential. Teachers should themselves be viewed as leaders. They lead in the classroom by making the curriculum real to learners and creating opportunities for student learning. Teachers, as reflective practitioners, can also play an important role in school improvement and become positive agents of institutional change.

11. Curriculum development involves an ongoing process of evidence gathering and evaluation.

Schools are in a constant state of development, evolving as they respond to changing internal needs and externally imposed requirements. Conducting regular reviews of the school curriculum, and the effectiveness of its implementation and delivery, should be a priority. School leaders and teachers need to be concerned with measuring the impact of the curriculum. Is it actually delivering what it intends? How do we know? What are the perceptions of students? Such reviews are fundamental elements of the annual school management cycle – a process of goal setting, monitoring, evidence collecting and evaluation leading to affirmation or refinement of the school's strategic plan.

12. The curriculum needs to ensure all learners fulfil their potential.

Effective schools can be defined as those that successfully progress the learning and development of all of their students, regardless of intake characteristics, beyond the normal development curve. Schools support all learners to fulfil their potential and overcome any barriers to learning they encounter.

> “Effective schools can be defined as those that successfully progress the learning and development of all of their students.”

2. Designing the school curriculum

This chapter provides guidance to those who are responsible for designing the school curriculum using Cambridge programmes and qualifications. The chapter describes the Cambridge pathway, giving an overview of the structure of Cambridge programmes from Primary to Advanced. It discusses the practical implications of introducing a curriculum, including timetabling and adapting to different local requirements for the formal years of schooling. Finally, this chapter shows how Cambridge programmes can be used to support the development of bilingualism.

Flexibility is a key feature of Cambridge programmes. Educational needs are not the same everywhere. Cambridge offers a rich menu from which to select, not a total package which schools have to adopt. Schools can use Cambridge alongside local educational programmes and qualifications to meet their needs and requirements.

2.1 The Cambridge Pathway

The Cambridge Pathway is made up of four stages and is characterised as follows:

- Each subject programme builds on the previous stage, providing a coherent curriculum progression. This staged approach helps learners develop knowledge, conceptual understanding, skills and attitudes.
- It is important to distinguish between the written Cambridge programmes, as defined in the documentation and syllabuses, and the taught curriculum in the school, representing the local expression of the programmes. Each subject programme is intended to be adapted to the local context and teachers are able to create a programme of study that includes local content and case studies. This enhances the quality of teaching and learning, and ensures the curriculum reflects national culture and heritage.
- Cambridge's international qualifications are pitched at three levels. The end of upper secondary (IGCSE or O Level) provides an international standard that allows students to access Cambridge AS and A Levels or alternative university preparation courses. In some contexts, students can enter university foundation programmes directly with IGCSE qualifications. At advanced level, the AS standard represents the entrance standard for universities in many countries, with A Level offering advanced placement or credit. In other countries, A Level is preferred or required for direct university entry.

Table 2: An overview of the Cambridge Pathway and Cambridge Programmes

Cambridge programme	Subjects	Assessment
Cambridge Primary		
Typically for 5–11 year olds. The curriculum frameworks provide comprehensive learning objectives. These provide a structure for teaching and learning and a reference against which learners' progress and understanding can be checked. No part of the curriculum is compulsory, so schools can select the elements that are right for their learners. Develops the skills, knowledge and understanding that will prepare learners for a smooth transition to Cambridge Lower Secondary.	A six-stage programme that provides curriculum frameworks and support materials for each of the following subjects: • Art & Design • Digital literacy • English • English as a second language • Cambridge Global Perspectives • Computing • Mathematics • Music • Physical education • Science Each stage reflects the teaching targets for a school year. The curriculum frameworks are divided into content areas called 'strands'. For English, for example, the strands include reading, writing and speaking and listening.	An optional testing structure, with assessments that provide an international benchmark enabling teachers to: • identify learner strengths and weaknesses, both for individual learners and class groups, and use the information to help inform teaching • provide learners with a statement of achievement if they choose to do Cambridge Primary Checkpoint at the end of their primary schooling. Cambridge Primary Progression tests From stage 3 to stage 6 of the curriculum in English, English as a second language, mathematics and science. Can be given when the teacher feels the class is ready. Marked by teachers in school. Cambridge Primary Checkpoint Cambridge provides diagnostic tests for the end of the Primary programme for English, English as a second language, mathematics and science. Cambridge marks the tests and provides feeback on the strengths and weaknesses of each learner. Cambridge Primary Global Perspectives is assessed through a Team Project. This is marked by teachers and moderated by Cambridge. We provide assessment guidance for art & design, computing, digital literacy, music and physical education.

Cambridge programme	Subjects	Assessment
Cambridge Lower Secondary		
Typically for 11 to 14 year-olds. The curriculum frameworks provide comprehensive learning objectives. These build on the foundations of Cambridge Primary and help learners to progress smoothly to Cambridge Upper Secondary. No part of the curriculum is compulsory, so schools can select the elements that are right for their learners.	A three-stage programme that provides curriculum frameworks and support materials for each of the following subjects: • Art & Design • Digital literacy • English • English as a second language • Cambridge Global Perspectives • Computing • Mathematics • Music • Physical education • Science Each stage reflects the teaching targets for a school year. The curriculum frameworks are divided into content areas called 'strands'. For English, for example, the strands include reading, writing and speaking and listening.	An optional testing structure, with assessments that provide an international benchmark enabling teachers to: • identify learner strengths and weaknesses, both for individual learners and class groups, and use the information to help inform teaching • provide learners with a statement of achievement if they choose to do Cambridge Lower Secondary Checkpoint at the end of their Lower Secondary schooling. Cambridge Lower Secondary Progression Tests are available for each stage of the curriculum in English, English as a second language, mathematics and science. Can be given when the teacher feels the class is ready. Marked by teachers in school. Cambridge Lower Secondary Checkpoint Cambridge provides diagnostic tests for the end of the Lower Secondary programme for English, English as a second language, mathematics and science. Cambridge marks the tests and provides feeback on the strengths and weaknesses of each learner. Cambridge Lower Secondary Global Perspectives is assessed through a Research Report. This is marked by teachers and moderated by Cambridge. We provide assessment guidance for art & design, computing, digital literacy, music and physical education.

Cambridge programme	Subjects	Assessment
Cambridge Upper Secondary		
Typically for 14-16 year-olds, the syllabuses for qualifications within this programme describe the knowledge, understanding and skils learners will develop and explain how these will be assessed. Cambridge Upper Secondary provides excellent preparation for the next stage of a Cambridge International education, Cambridge Advanced, as well as other progression routes.	Designed as a two-year programme but can be taken in one year or over three years. Offers over 70 IGCSE courses and over 40 O Level courses. Schools can offer almost any combination of subjects (with a few restrictions known as 'barred combinations'). Learners receive a certificated grade for each subject they take.	Cambridge IGCSE assessment takes place at the end of the course. There is a range of types of assessment, including written, oral, coursework and practical assessment. In mathematics, science and English as a second language there is a tiered structure with the option to enter candidates for Core or for Extended tier, [see page 22 on tiering]. Grades are awarded from A*–G (or from 9–1 if available in the administrative zone/subject). The grade set is capped at Grade C (Grade 5 for 9–1 grading) for Core candidates. Cambridge O Level assessment takes place at the end of the course. There is a range of types of assessment, including written, oral, a limited amount of coursework and practical assessment. Grades are awarded from A*–E. Cambridge O Levels are no longer available to schools in administrative zones 1, 2 and 6. There is more information on administrative zones at www.cambridgeinternational.org/help

Cambridge programme	Subjects	Assessment
Cambridge Advanced		
Typically for 16–19 year olds, Cambridge Advanced builds on the foundations of Cambridge Upper Secondary and leads to entry to universities worldwide. The focus is on helping learners to develop deep understanding and independent learning and critical thinking skills, which universities value highly. The syllabuses for qualifications within this progarmme describe the knowledge, understanding and skils learners will develop and explain how these will be assessed.	Offers a choice of 50 different subjects and schools can offer almost any combination. A staged approach is available in almost all subjects. An AS Level contains half the content of the corresponding A Level and is normally completed in one year. This allows for flexibility, as learners can complete AS Levels as qualifications in their own right or as the first half of an A Level. The Pre-U programme is available to schools in the United Kingdom. Schools outside the UK need special approval before they can offer Cambridge Pre-U subjects.	Cambridge International AS & A Levels use a range of assessment types, including formal written examinations, orals, practicals and coursework. A level grades range from A* to E. They are directly comparable in standard to A levels awarded in the United Kingdom. Assessment of Pre-U Principal Subjects is at the end of a two-year course. There is a range of nine grades, D1–P3.

There is much more specific information, including details of all the courses available at each stage, in the *Cambridge Prospectus*, available here.

2.2 Cambridge Primary

Designed for 5–11 year olds, Cambridge Primary is structured through curriculum frameworks in 10 subjects including English, English as a second language, mathematics, science and Cambridge Global Perspectives. Each framework is divided into six stages, normally taught over one year each, but they can be covered over shorter or longer time periods depending on the school's circumstances. No subject in the Cambridge Primary programme is compulsory, so schools can select the elements that are right for their learners. Cambridge provides a wide range of support for teachers to help them deliver each curriculum in their context.

The curriculum frameworks are structured by the key 'strands' of learning in each subject. The learning objectives in each strand then clearly show the teaching targets for each stage. Cambridge regularly and systematically reviews each curriculum framework to make sure that primary learners develop a solid foundation in each subject and are well prepared to progress to Cambridge Lower Secondary.

Cambridge Primary English is intended for first language learners who have well-developed oral language skills before they begin school. Therefore, learners are expected to produce language orally and in writing from the earliest stages. This curriculum provides a foundation in language and literacy on which later stages of education can be built. With its emphasis and early focus on literary analysis and critical reading skills, it promotes an understanding of how different language features are used and the impact these have on the reader. It fosters literary appreciation and prepares learners to become skilled users of the language in many contexts.

Primary English as a second language is designed to prepare learners to become skilled users of English as a second language for practical purposes, including

Contents

Annotated bibliography and other resources
Glossary
Appendices

using English for functional communication and learning other curriculum subjects. It is designed for speakers of other first languages who are learning English as a second (or additional) language. It has been developed in conjunction with Cambridge Assessment English and is based on the Council of Europe's Common European Framework of Reference for Languages (CEFR), used across the world to map learners' progress in English (see page 28). The curriculum can be used to support the implementation of bilingual and multilingual education programmes, where subjects are taught through two or more languages.

The **mathematics** curriculum framework explores principles, patterns, systems, functions and relationships, so that learners can apply their mathematical knowledge and develop a holistic understanding of the subject. It is structured in three content areas: Number, Geometry and Measure, Statistics and Probability. Thinking and Working Mathematically underpins all of the other areas of learning to assist learners in considering the processes involved when solving problems.

Our Computing curriculum introduces learners to block-based programming and how to write clear instructions that computers can use. This helps them to understand how software drives what happens inside each piece of computer hardware.

Computing has five content areas: Computational thinking, Programming, Managing Data, Networks and Digital Communication, and Computer Systems.

The **science** curriculum framework has six strands: A skills strand Thinking and Working Scientifically, Four content strands - Biology, Chemistry, Physics and, Earth and Space, A context strand - Science in Context. In every part of the programme learners think and work scientifically and do hands-on science using everyday equipment. This helps learners to develop an understanding of scientific investigations including considering ideas, evaluating evidence, planning, investigating, recording and analysing data. The content in the Biology, Chemistry, Physics and, Earth and Space strands introduce learners to the main areas of science, while the Science in Context strand also places these in a broader cultural and historical context.

Cambridge Primary Global Perspectives develops the skills of research, analysis, evaluation, reflection, collaboration and communication. The skills are taught

through a wide range of topics using personal, local and global perspectives. It strengthens the links across the other subjects in the primary programme and provides an interdisciplinary approach to learning. Flexible delivery options are a key characteristic of the programme and it can be taught as a weekly lesson, integrated into other subjects or through occasional full days of activities.

Find out more about how the Cambridge Global Perspectives primary programme is taught and assessed.

The art, digital literacy, music and physical education curricula have unique features. The art curriculum has learning objectives that describe the concepts and approaches that apply to artists of all ages and levels of expertise. For this reason, the same learning objectives are used to structure learning from Stage 1 to Stage 6. The digital literacy curriculum covers digital skills that students need today but they will also acquire knowledge and understanding about safety and wellbeing online that will equip them for the future. The music curriculum emphasises musical exploration with opportunities for learners to perform and present their music at every stage of development. The focus is on play and on

Appendices

responding to music which leads to an increasing awareness of self and personal musicality. The physical education curriculum is a vital part of a balanced Cambridge school curriculum. Regular exercise improves both physical and mental health and there is growing evidence that it improves academic performance across the curriculum. Establishing good patterns of exercise in primary schools also provides learners with the foundation of an active and healthy lifestyle for life.

Cambridge Primary testing:

Cambridge Primary includes two voluntary testing options: Progression Tests and Primary Checkpoint. These are used by schools globally to monitor their learners' progress and attainment against an international benchmark.

Cambridge Primary Progression Tests can be used whenever a class is ready to be assessed on their learning from a stage of the curriculum framework. Once teachers have marked the tests, they can use the unique analysis tools provided by Cambridge to produce detailed reports from the results. These highlight the strengths and weaknesses of learners so teachers can make targeted improvements to teaching and learning. Learners' results can be compared against their class, school or other schools around the world, and on a year-by-year basis.

Primary Checkpoint is for learners at the end of the final year of Cambridge Primary. It provides evidence of readiness for the next stage of education, assessing skills, knowledge and understanding. English, English as a second language, mathematics and science are all assessed through written tests provided and marked by Cambridge. Cambridge Primary Global Perspectives is assessed through a Team Project which is marked by teachers and moderated by Cambridge.

For more information see here.

2.3 Cambridge Lower Secondary

Designed for 11–14 year olds, Cambridge Lower Secondary builds on the learning from Cambridge Primary and prepares learners for Cambridge Upper Secondary study. As with the primary programme, no part is compulsory and schools can select which elements will be most useful for their learners. There are three stages in the curriculum framework for each subject. These are commonly taught over one year for each stage, but they can be taught over shorter or longer time periods, depending on the school's circumstances.

Cambridge regularly and systematically reviews each curriculum framework to make sure that lower secondary learners build on their learning in primary and are effectively prepared for Cambridge Upper Secondary qualifications.

Cambridge Lower Secondary English is intended for first language learners, or those with an equivalent competence in English. Learners build on their understanding and use of language features and become more sophisticated in using language effectively in a range of oral and written contexts. They also continue to develop their literary analysis and critical reading skills. This programme provides learners with the language and literacy skills they need for further study and life. In addition it prepares them for Cambridge Upper Secondary qualifications in English literature, language and drama.

Cambridge Lower Secondary English as a Second Language continues seamlessly from the primary curriculum, developing independent users of English (B1 and B2 on the CEFR see page 28). This programme provides learners with the English language skills they need to access Cambridge Upper Secondary qualifications through English. In addition, learners can continue their studies to Cambridge IGCSE English as a second language.

The **mathematics** curriculum continues to emphasise Thinking and Working Mathematically. Algebra is formally introduced, building on concepts from the Number strand in the Primary programme, alongside Number, Geometry and Measure and Statistics and Probability. This programme leads to upper secondary qualifications in mathematics. It also provides learners with the numeracy and statistical literacy needed for life as well as further study in a wide range of subjects (such as sciences and social sciences).

Our computing curriculum furthers learners knowledge of programming languages by introducing text-based software. Learners will explore algorithms using flowcharts and pseudocode, spreadsheets and databases, data transfer across networks and new technologies such as Artificial Intelligence.

Appendices

The science curriculum framework builds further understanding of Biology, Chemistry, Physics, Earth and Space and, Thinking and Working Scientifically. All of the science disciplines are taught in each stage so that learners develop an integrated view of science. The emphasis on scientific investigations continues from primary with learners being introduced to specialist scientific equipment, where available. This programme prepares learners for all of the scientific qualifications available at upper secondary level.

Cambridge Lower Secondary Global Perspectives continues to use a range of topics to develop the skills of research, analysis, evaluation, reflection, collaboration and communication. Learners identify a wider range of personal, local and global perspectives and begin to evaluate why these may be different. As with the primary programme, it is designed to be delivered flexibly through specific lessons, existing subjects or full days of activities. The skills developed prepare learners for all upper secondary subjects and they can continue to study Cambridge Global Perspectives at Upper Secondary. For more information, see here.

The art, digital literacy, music and physical education have a smooth transition from the Primary programme. The art curriculum continues to include the same learning objectives as primary cross Stages 7 to 9. The digital literacy curriculum emphasises that staying safe is an important aspect of all digital activity. Learners develop online skills that enable them to protect themselves and their devices, and to demonstrate concern and respect for others. The music curriculum allows learners to experiment with a wide variety of possible musical paths. This will help each learner to develop a personal affinity to music as well as find ways to express their unique musical personality. The physical education curriculum develops a wide variety of age-appropriate physical activities, including games, team sports, gymnastics and dance. Through these activities learners develop a foundation of an active and healthy lifestyle for life.

Cambridge Lower secondary testing:

Cambridge Progression Tests and Cambridge Lower Secondary Checkpoint allow schools using Cambridge Lower Secondary to monitor their learners' progress and attainment against an international benchmark.

Cambridge Lower Secondary Progression Tests are available as paper or onscreen tests which can be taken when a class has completed a stage of the curriculum framework. Once the tests are marked (by teachers, with some auto-marking for the onscreen version) the unique analysis tools provided by Cambridge will use the results to provide detailed reports. These highlight the strengths and weaknesses of learners so teachers can make targeted improvements to teaching and learning. Learners' results can be compared against their class, school or other schools around the world, and on a year-by-year basis.

Lower Secondary Checkpoint is for learners who have completed the Cambridge Lower Secondary curricula. It provides evidence of readiness for the next stage of education, assessing skills, knowledge and understanding. English, English as a second language, mathematics and science are all assessed through written tests provided and marked by Cambridge. Cambridge Lower Secondary Global Perspectives is assessed through an individual Research Report which is marked by teachers and moderated by Cambridge. For more information see here.

2.4 Cambridge Upper Secondary

The Cambridge Upper Secondary programme has an extensive range of subjects available at Cambridge IGCSE or Cambridge O Level. This diverse range allows teachers to design either a broad and balanced curriculum, or a more specialised one, depending on their educational aims. Some schools opt for a specialised programme with a number of compulsory subjects (including English language, mathematics and science) and only a few, if any, learner electives. Others give learners more choice. It is recommended that learners are offered some choice, to allow them to follow their interests and talents, but there may be higher costs for staff, and perhaps specialist rooms and equipment, as more subjects are offered.

What is a Cambridge IGCSE?

IGCSE stands for International General Certificate of Secondary Education. Over 70 subjects are available. Schools can offer almost any combination of subjects and each subject is certificated separately.

- A Cambridge IGCSE is the formal recognition of a learner's achievement at the end of a particular subject course. The content of the course is based on

Contents

5 Cambridge International Resources and Support Services
References
Annotated bibliography and other resources
Glossary
Appendices

an international curriculum developed for 14–16 year olds (although it can be studied by younger or older learners).

- The content of each course is created to suit a wide variety of schools and to avoid cultural bias. It helps to develop creative thinking, enquiry and problem-solving skills and supports the development of the Cambridge learner attributes.
- Each qualification is made up of a number of assessments (called components), the majority of which take place at the end of the course. The methods of assessment include written papers, orals, coursework and practicals.
- Learners have to pass a particular combination of these assessments to achieve the qualification. Some syllabuses offer learners and teachers different assessment options through which to achieve the qualification. This broadens opportunities for students to demonstrate their learning, particularly when their first language is not English.
- In the UK, Cambridge IGCSE is accepted as an equivalent to the GCSE.
- The Cambridge IGCSE grades awarded are A*–G, with A* being the highest. They are designed to cover a wide ability range. Cambridge IGCSE is also available graded 9–1 in certain subjects and administrative zones – grade 7 is aligned to grade A and grade 4 is aligned to grade C.

The main differences between Cambridge IGCSE and qualifications offered by other providers as well as UK GCSEs, are in the syllabus content and methods of assessment:

- Several Cambridge IGCSE subjects have an optional coursework element, whereas with most GCSE and equivalent qualifications offered by other providers, coursework is not an option and where there is coursework, it is compulsory.
- The content of Cambridge IGCSE subjects is tailored to the multicultural, multilingual audience they serve, in a way the GCSE content or the content of IGCSEs offered by other providers is not.
- All UK GCSEs from 2019 will be graded 9-1, where IGCSEs are offered as A*-G. For some zones and subjects, IGCSEs are also available graded 9-1.
- Cambridge provides time-zone variation of papers for its IGCSEs. This ensures that students who sit examinations before others cannot compromise the security of the examinations while examinations are timetabled at sensible local times.

What is a Cambridge O Level?

O Level stands for Ordinary Level, and is an internationally recognised qualification equivalent to the UK General Certificate of Secondary Education (GCSE) and Cambridge IGCSE. Over 40 subjects are available to schools, except those in administrative zones 1, 2 and 6.

- A Cambridge O Level is the formal recognition of a learner's achievement at the end of a particular subject course. The content of the course is based on an international curriculum developed for 14–16 year olds (although it can be studied by younger or older learners).
- The qualifications were developed from the academically focused O Level introduced in the UK in the 1950s and replaced in 1988 in the UK by the GCSE.
- The content of each Cambridge O Level syllabus is designed especially for an international market, and is sensitive to the needs of different countries. In many instances, IGCSEs and O Levels share the same content, have common assessments and share common assessment standards.
- Each qualification is made up of a number of assessments (called components), the majority of which take place at the end of the course. The methods of assessment include written papers, orals and practicals, and for some subjects, coursework.
- Learners have to pass a particular combination of these assessments to achieve the qualification. Some of the syllabuses offer learners and teachers different assessment options to achieve the qualification. This broadens opportunities for students to demonstrate their learning, particularly when their first language is not English.

- In the UK, Cambridge O Level is accepted as an equivalent to the GCSE.
- Cambridge O Level assessment standards are aligned to those of the Cambridge IGCSE, and are equivalent on a subject-for-subject, grade-for-grade basis. The grades awarded are A* to E, with A* being the highest.

The main difference between Cambridge O Level and GCSE and Cambridge IGCSE is the grade range: O Levels are graded on an A*–E scale, whereas Cambridge IGCSEs are on an A*–G scale (and 9–1 grade scale for certain subjects and administrative zones). O Levels, therefore, do not provide as many grades recording student performance at lower levels of attainment. The grades are consistent so an A* or C grade in either represents the same level of performance and both IGCSE and O Level provide an excellent preparation for students going onto Cambridge Advanced.

Syllabus content and assessments are often shared for Cambridge O Level and Cambridge IGCSE, although in several subjects the assessment model at Cambridge IGCSE additionally includes coursework options.

Science specifics

In Cambridge Lower Secondary, the curriculum is called 'science' but in Cambridge Upper Secondary there are important choices to make. Schools may choose to offer biology, chemistry and physics as separate subjects. In this case, learners can take all three or specialise in one or two of them. These 'separate sciences' have the greatest amount of content and offer the very best preparation for Cambridge Advanced science. Separate sciences are available at both Cambridge IGCSE and Cambridge O Level and are extremely popular with schools. At IGCSE level, Co-ordinated Science is also offered. This has two-thirds of the content of each of the separate sciences and is known as a double award, meaning that it is worth two IGCSEs. This still offers good preparation for Cambridge Advanced science and many learners will progress to taking one or more sciences after IGCSE through this route. Some schools offer Co-ordinated Science as the only science option. At both IGCSE and O Level, Combined Science is also offered. This has one third of the content of each of the separate sciences. It is a good choice for learners who need to complete their general science education at this level but do not plan to take sciences further.

> "Schools know their own students best. Streaming them into either the core pathway or the core and extended pathway will clearly impact their future options."

'Core' and 'supplement' tiering

Cambridge IGCSE science subjects, mathematics and English as a second language offer two curriculum options. These are referred to as 'core' and 'extended' or 'supplement' curriculum options. Everyone entering for the subject has to complete the core curriculum, but the extended curriculum can be studied in addition. Students who complete core and extended will be assessed on the full A* - G scale. Students who complete the core can attain grades in the range of C to G.

The extended curriculum provides an opportunity to study the subject in more depth and experience wider coverage of the content. The use of tiering means that questions are set at appropriate levels of demand for the ability range of students taking the tier. Strong candidates can access more demanding material that will prepare them better for studying the discipline at a higher level, including AS or A Level. The extended material, however, can prove to be too cognitively demanding for weaker students while the core is designed to provide a well-rounded education accessible by all. Use of tiering supports a positive assessment experience for all students, to allow everyone to demonstrate what they know, understand and can do.

A school may decide that all learners will study the extended as well as the core, and schools are encouraged to ensure all students are appropriately challenged. Schools know their own students best. Streaming them into either the core pathway or the core and extended pathway will clearly impact their future options. Some students may be struggling because of gaps in their previous teaching, so providing extra support may make it possible for them to access the extended material. The option to enter some candidates for the core examination papers remains until the entry deadline so the decision does not have to be made when the course is first taught.

Alternative course options in IGCSE

Apart from English language, there are several other Cambridge Upper Secondary subjects that have alternative courses (detailed at the end of this guide in the appendices). This flexibility helps teachers identify and select specific courses to meet their teaching requirements.

Some alternative subject courses have particular restrictions ('barred combinations') when it comes to the exams. For example, learners cannot take Cambridge IGCSE Mathematics and Cambridge IGCSE International Mathematics in the same exam series. These restrictions do not mean it is not possible to offer both courses; only that learners cannot undertake the exams or associated assessments of the barred combinations in the same exam series.

Length of study and number of courses

Learners usually study Cambridge IGCSE and Cambridge O Level over one or two years and a few schools offer IGCSE over three years (see section 2.8 on fitting the Cambridge pathway to years of schooling). In many schools, learners study eight or nine subjects, and occasionally more, over a period of two years. In others, learners study a reduced number of subjects, typically about five or six, over one year. Reducing the Cambridge Upper Secondary programme to a one-year period has a direct influence on the balance of the curriculum, as the curriculum will be narrower for any individual learner studying fewer subjects. Some schools allow very able learners to study for exams in selected subjects a year early.

2.5 Cambridge Advanced

By the time learners begin studying the Cambridge Advanced programme, they often want to specialise more, depending on their current interests, ambitions for higher learning and potential career paths. However, it is still possible to study a wide range of different subjects at this level, creating a broad programme of study, and the co-curricular programme can add breadth and balance to the educational experience.

'Planning a Cambridge International AS & A Level Programme' below sets out some different approaches and gives detailed guidance on how teachers can use the programme flexibly to suit their needs. However, in most Cambridge schools it is typical for learners to study three or four subjects. Working at a more advanced level they will need more curriculum time in class for each subject as well as more independent study time. Teachers may decide to include this independent study time on the learner's timetable but it should not normally need teacher time.

What are Cambridge International AS & A Level?

A Level stands for Advanced Level and AS Level stands for Advanced Subsidiary Level. An AS Level contains half the content of the corresponding A Level and is normally completed in one year. This allows for flexibility, as learners can complete AS Levels as qualifications in their own right or as the first half of an A Level, for which they are allowed to carry forward their AS result. Some learners

Glossary
Appendices

take all the assessments for their full A Level at the end of the second year (see the 'Planning a Cambridge International AS & A Level programme' below).

Cambridge International AS & A Level are the names of the qualifications that formally recognise a learner's achievement at the end of a particular subject course. The content of the course is more in-depth and demanding than Cambridge IGCSE or O Level. It is based on an international curriculum developed for 16–19 year olds preparing for higher education.

The assessment standards of Cambridge International A Levels are aligned to those of UK A Levels and are equivalent on a subject-for-subject, grade-for-grade basis. The grades awarded are A* to E, with A* being the highest. There is no A* grading in the certification of Cambridge International AS Levels. Cambridge International A & AS Levels are viewed as equivalent to AS & A Level qualifications taken by learners in the UK.

The main differences between Cambridge International AS & A Level qualifications and the UK AS & A Level qualifications are in the syllabus content and mode of assessment:

- Cambridge offers a staged approach no longer available in the UK. For most subjects, the Cambridge AS Level can either be taken as an end-point qualification in its own right, normally after one year of study, or AS Level components can contribute directly to the A Level in a linear examination normally taken at the end of two years along with the other A Level components. Candidates can also build on their AS Level results to count into their A Level result. Cambridge has preserved the staged approach because of the flexibility it provides. In most parts of the world, the AS Level standard represents the level required for direct university entry. Many universities also like to use AS Level results as evidence of student attainment in their admissions process.
- The context or examples used in Cambridge AS and A Level syllabuses and assessments are designed to be culturally sensitive and to provide an international context.
- There is a wider range of subjects available at Cambridge International AS and A Level, for example the wide range of languages offered.
- Cambridge provides time-zone variation of papers for AS and A Level. This ensures that students who sit examinations before others cannot compromise the security of the examinations while examinations are timetabled at sensible local times.

Planning a Cambridge International AS & A Level programme

There are three different approaches for planning and scheduling Cambridge International A Level (see table 3 on next page). Each approach will have a different effect on the structure of the school curriculum and the school timetable.

Before schools decide on which of the three approaches they might allow, it is important for them to check the requirements of universities and other higher education institutions where their learners are likely to want to go. Universities in some countries require three full A Levels for their most popular courses – Approaches 1 or 2 could work for these. Approach 3, AS only, has the potential to provide the broadest and most balanced curriculum but the compromise is less specialisation. This may however be ideal in countries where AS Levels are accepted on their own.

Table 3: Cambridge International AS and A Level options

Approach 1	Approach 2	Approach 3
A 'non-staged' assessment route. Learners take all papers of the Cambridge International A Level course in the same examination series, usually at the end of the second year of study.	A 'staged' assessment route. Learners take the Cambridge International AS Level in Year 1 and/or Year 2 and complete the final Cambridge International A Level in the second series.	Cambridge International AS Level only. Learners take the Cambridge International AS Level exams only. The syllabus content for Cambridge International AS Level is half of a Cambridge International A Level programme.
A learner who successfully completes the non-stage option will normally have studied three or four Cambridge International A Level courses.	A learner who successfully completes the staged assessment option might have outcomes that include: • three Cambridge international A Levels and one AS Level (first example below) • two Cambridge International A Levels and Four AS Levels (second example below) • three Cambridge International A Levels and two AS Levels (third example below).	A learner who successfully completes the Cambridge Internaitonal AS Level only assessment option might have studied eight Cambridge International AS Level courses, completing four in each year. This could represent a broad and balanced curriculum but with less specialisation and depth.

In the first example below, the learner has selected a programme that will result in three Cambridge International A Levels in History, Geography and French and one AS Level in Global Perspectives & Research.

Curriculum level	Subjects selected for study			
First year	AS Level Global Perspectives	AS Level History	AS Level Geography	AS Level French
Second year		A Level History	A Level Geography	A Level French

In the second example on the next page the learner has selected a programme that will result in two Cambridge International A Levels in Mathematics and Economics. They have broadened their programme by selecting an additional two AS Level subjects in the final year. Together with their first year AS Level subjects, they will achieve four Cambridge International AS Level qualifications: English Literature, Biology, Art and Design and Global Perspectives & Research.

Annotated bibliography and other resources
Glossary
Appendices

Curriculum level	Subjects selected for study			
First year	AS Level Literature - English	AS Level Mathematics	AS Level Biology	AS Level Economics
Second year	AS Level Art & Design	A Level Mathematics	AS Level Global Perspectives	A Level Economics

In the third example below, the learner has selected a more specialised programme, resulting in three Cambridge International A Levels supported by two Cambridge International AS Level awards. In this case, Cambridge International AS Level Business reinforces the mathematics–economics combination, with a possible career in the financial world in mind. On the other hand, this could be criticised as being over-specialised, and it might be preferable for the learner to select a different sort of discipline, for example art or Global Perspectives.

Curriculum level	Subjects selected for study			
First year	AS Level Literature - English	AS Level Mathematics	AS Level Biology	AS Level Economics
Second year	A Level Literature – English	A Level Mathematics	AS Level Business	A Level Economics

Learners need guidance to ensure their intended course of study provides the learning and qualifications they need, either for admission into higher level studies or for pursuing a particular career. As mentioned, it is very important to consider admission requirements for both national and international universities and other higher learning institutions, when constructing curriculum and qualification pathways and guiding learners on subjects to choose.

What is Cambridge Pre-U?

Cambridge Pre-U is a qualification designed by Cambridge to help schools equip learners with the skills they need to succeed at university. The qualification formally recognises a learner's achievement at the end of a particular subject course. It is based on a curriculum that promotes deep understanding of subjects through specialisation.

Learners can take Cambridge Pre-U qualifications separately, and receive grades for each one, or choose three Principal Subjects to achieve the Cambridge Pre-U Diploma. To achieve the Diploma, they also need to complete Global Perspectives & Research, a qualification that gives learners the chance to develop independent thinking, research and communication skills.

- Cambridge Pre-U Principal Subjects are assessed at the end of the two-year course.
- Cambridge Pre-U Principal Subjects are recognised by UK universities as equivalent to A Levels.
- Cambridge Pre-U qualifications have an extended grade range at the top to recognise outstanding achievement. The grades awarded are reported on a nine-grade scale, reflecting three broad bands of achievement: Distinction, Merit and Pass. Each band is sub-divided into three grades: Distinction 1, 2, 3 (D1, D2, D3), Merit 1, 2, 3 (M1, M2, M3) and Pass 1, 2, 3 (P1, P2, P3). Each subject a learner takes at Cambridge Pre-U receives a separate grade, for example, D3.

Cambridge Pre-U is not time-zoned and schools outside the UK need special approval before they offer it. Schools considering offering Cambridge Pre-U outside the UK should contact Cambridge at **info@cambridgeinternational.org**

2.6 Alternative approaches to English language development and demonstrating English language proficiency

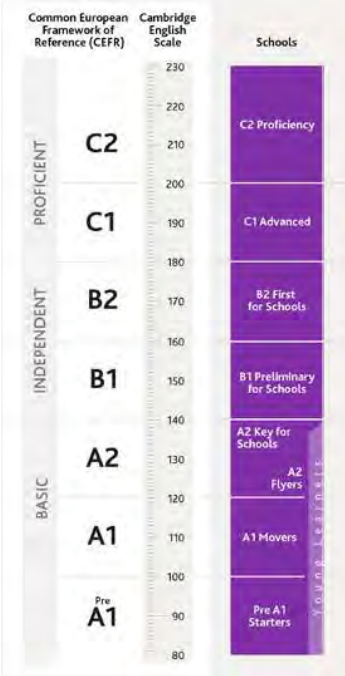
Cambridge International offers English as a school subject, with pathways designed for first language, bilingual learners and learners who have English as a second language. Our sister organisation, Cambridge Assessment English (Cambridge English, part of Cambridge Assessment), also offers a range of English language qualifications that are widely accepted by universities, governments and employers around the world.

Both Cambridge International English as a second language and Cambridge English qualifications reference language attainment against The Common European Framework of Reference for Languages (CEFR), a widely used international standard for describing language ability. CEFR describes language ability on a six-point scale, from A1 for beginners, up to C2 for those who have mastered a language. This makes it easy for anyone involved in language teaching and testing, such as teachers or learners, to see the level of different qualifications. It also means that employers and educational institutions can easily compare Cambridge International and Cambridge English language qualifications to other exams in their country.

Cambridge International English as a Second Language is designed primarily for schools where part or all of the curriculum [not just English] is taught through the medium of English. English as a second language is available as one of the subject choices at each stage of the Cambridge Pathway from Primary to Upper Secondary. Schools receive a syllabus, support and assessment materials that are consistent with all Cambridge International courses and reporting and assessment approaches are also consistent so English as a second language fits in seamlessly with the rest of the Cambridge International curriculum.

Cambridge International English as a second language programmes

Cambridge International offers a progressive set of learning objectives designed to prepare learners to become skilled users of English as a second language through the Primary and Lower Secondary programmes. The learning objectives are organised into five strands, which together support the development of knowledge, skills and understanding. The *Use of English* strand articulates the linguistic features learners need to be able to understand and use when engaging with the language productively and receptively in the *Reading, Writing, Speaking* and *Listening* strands. By identifying aspects of the curriculum which are reflected in the CEFR text and level descriptors, guidance is provided as to how the curriculum aligns to the CEFR levels. This is where appropriate, as some learning objectives are not addressed by the CEFR but considered important for supporting language learning at Primary and Lower Secondary level. The Cambridge Checkpoint tests at the end of Primary and Lower Secondary provide teachers and learners with feedback on their achievement in reading, writing, listening and use of English.



IGCSE English as a second language also aligns to CEFR but, as with primary and lower secondary, additional learning objectives considered important for a school curriculum at this stage are included. Cambridge IGCSE English as a Second Language (E2L) aims to develop communication skills in listening, speaking, reading and writing, enabling learners to become independent users of English, and to be able to use English to communicate effectively in a variety of practical contexts. Learners will be presented with a variety of stimuli that will build up their skills in reading and writing. They will learn to select relevant details, understand the difference between what is directly stated and implied, and practise writing for different purposes and audiences. They will listen to a range of spoken material, including talks and conversations, in order to develop listening skills. They will also engage in conversations on a variety of topics, and develop their skills in responding to different situations and audiences with a degree of accuracy and clarity.

Cambridge English Language programmes for schools

Cambridge English programmes are often most appropriate for contexts where English is the only subject being taught through the medium of English in the school and close CEFR alignment is considered a high priority. Its in-depth examinations are targeted at specific levels of the Common European Framework of Reference for Languages (CEFR), with clear progression pathways from one level to the next. Cambridge English qualifications encourage development of all four language skills. See here for more information.

Figure 2: Cambridge Assessment English Language Assessments Programmes for Schools

Meeting University English language admission requirements

For learners planning to gain entry into universities in English-speaking countries, the English language component of their learning programme is really important. Universities set their own admission criteria for courses and these are usually available on their websites. In order to demonstrate English language proficiency for degree courses, some universities will accept a good grade in IGCSE English as a second language, others require IGCSE First Language English. In the United Kingdom, for example, some universities require a Secure English Language Test [SELT], such as the International English Language Testing System (IELTS) assessed by Cambridge English. There is more information on English language university admissions requirements here.

2.7 Timetabling the curriculum

Although it is important to start the curriculum planning process by designing a school curriculum that delivers the school's mission, schools will also need to consider practical timetabling issues. These are largely determined by school context, local laws and practices, and the scale of the school budget to support resourcing. This section aims to briefly consider some of these.

The school context, vision and educational aims will influence a number of timetabling decisions including:

- the length of the school day, the number of days' schooling a week and the length of the school year
- how much flexibility is built into the curriculum to allow learners to select options and, where applicable, options within subjects
- the extent and nature of co-curricular activities and expectations or requirements for learner participation in these
- the inclusion of any additional courses or programmes that do not end in some form of external assessment, such as religious education, values education, cultural or heritage courses, student leadership and career experience programmes, and decisions about whether or not these are compulsory
- whether multi-levelling is introduced so that learners in different year groups can be scheduled in the same class depending on their needs
- whether there will be setting by ability within a year group in some subjects such as mathematics, so that several parallel classes are run in the same timetable slots

The timetable has to be developed within the resource constraints of the school. These constraints include:

- number of teaching and support staff
- staff contracts stipulating conditions and expectations
- subject expertise and experience of teaching staff

Contents
Introduction
1 Curriculum planning: An overview
2 Designing the school curriculum
3 Approaches to teaching and learning
4 Leadership, curriculum evaluation and building school capacity
5 Cambridge International Resources and Support Services
References
Annotated bibliography and other resources
Glossary
Appendices

- availability of classrooms and specialist rooms – for example, science laboratories and technology rooms
- availability of resources for language support, special educational needs and gifted learning programmes

When constructing the timetable, curriculum planners must decide how much teaching time to allocate to each subject. This can be expressed in hours per week, but because schools operate different annual calendars, it is often better calculated as hours per year. This equates to the number of periods per week multiplied by the duration of these allocated periods and the number of weeks in the school year. Some schools operate timetables on a 10-day (two-weekly) cycle or some other system of rotation, for example an eight-day cycle. This can create flexibility. Most schools use a regular weekly cycle.

Table 4: Factors influencing timetable decisions

Internal influences	External influences
Organisation structure	Cambridge programme requirements
Resources including staff and facilities	Cambridge qualification requirements
Compulsory subjects or options (degree of learner choice)	Recommended hours a week for each subject
English language capability of learners	National curriculum and qualification requirements
Multi-levelling or fixed school years	External agency requirements, for example, ministry of education
Co-curriculum. Addiitonal courses and activities outside core curriculum	University admissions criteria
Employment contracts	Requirement to take exams in English
	Core vs supplementary subject options

The guided learning hours recommended for Cambridge International programmes are shown opposite.

Table 5: Recommended guided learning hours

Programme	Subject suggested teaching hours
Cambridge Primary	**Art & design** 30 hours per year (about 1 hour per week) **Computing** 22–45 hours per year (about 0.5 – 1.5 hours per week) **Digital literacy** 30 hours per year (about 1 hour per week) **English** 120–150 hours per year (about 4–5 hours per week) **English as second language** 120–150 hours per year (about 4–5 hours per week) **Global Perspectives** Refer to page 15 of the Teacher Guide as teaching time is dependent on the context and how it is implemented at each school **Mathematics** 120–150 hours per year (about 4–5 hours per week) **Music** 30 hours per year (about 1 hour per week) **Physical education** 60–90 hours per year (about 2–3 hours per week) **Science** 45–60 hours per year (about 1.5–2.5 hours per week)
Cambridge Lower Secondary	**Art & design** 45 hours per year (about 1.5 hours per week) **Computing** 45 hours per year (about 1.5 hours per week) **Digital literacy** 30 hours per year (about 1 hour per week) **English** 120–150 hours per year (about 4–5 hours per week) **English as second language** 120–150 hours per year (about 4–5 hours per week) **Global Perspectives** Refer to page 15 of the teacher guide as teaching time is dependent on the context and how it is implemented at each school **Mathematics** 120–150 hours per year (about 4–5 hours per week) **Music** 45 hours per year (about 1.5 hours per week) **Physical education** 60–90 hours per year (about 2–3 hours per week) **Science** 90 hours per year (about 3 hours per week)
Cambridge Upper Secondary	About 130* hours per Cambridge IGCSE or O Level subject before taking the assessments.
Cambridge Advanced	• Staged option 180* hours per Cambridge AS Level subject, further 180 hours per subject to complete the Cambridge A Level. • Non-staged option 360* hours per Cambridge A Level, normally spread over two years.

** Includes teaching time and directed study. Does not include the independent study the learner is expected to carry out. It is recommend that learners are given opportunities for independent study outside of normal timetabled lessons for Cambridge Upper Secondary and Cambridge Advanced courses.*

There are many models for constructing a timetable. However, timetabling should take into account not only providing a schedule of lessons for particular learners in a year group, but also the practical considerations of having the right staff and the right rooms and facilities available for them to take place. The following simplified example is based on practice in one Cambridge school and is intended to illustrate one approach. Detailed consideration of different timetable options is beyond the scope of this guide.

Table 6: Example of school timetable

Period	Time of day	Year 8 class	Year 12 class
1	8:00–8:40	English	Art Business Studies IT
2	8:40–9:20	Arabic	
Break			
3	09:40–10:20	Religious Studies	Mathematics
4	10:20–11:00	Mathematics	
5	11:00–11:40	Science	English
6	11:40–12:20		
Lunch			
7	13:00–13:40	Physical Education	Chemistry/History/Geography
8	13:40–14:20		Second Language (French, Mandarin, Spanish)
9	14:20–15:00	Geography	

In this timetable, the day is divided into nine teaching periods of 40 minutes. For the Year 8 level (typically 12–13 year olds studying a blend of Cambridge Upper Secondary and the school's own curriculum) most periods are single periods of 40 minutes in length. Periods can be combined to form double periods which allow an extended amount of time for particular subjects or activities. For example, the double period for science gives the time needed to carry out practical experiments, and for physical education it includes the time needed for changing.

In Year 12, (typically 16–17 year olds studying for Cambridge AS Levels) subjects are mostly scheduled with double periods, providing 80 minutes for each lesson. Each subject has equal amounts of allocated teaching time, with three double periods and one single period throughout the week, equating to four hours and 40 minutes per subject per week. Because of the greater degree of specialisation at this level, it is possible for the school to schedule subjects to be taught at the same time (for example chemistry, history and geography in the example given above) if no learners want to study more than one of the combinations of subjects timetabled together.

Some schools have longer school days for older learners so that more time is available. This could be every school day or specific days. Extending the day to accommodate the curriculum is a way of increasing the amount of teaching time for subjects, or increasing the number of subjects on offer. Depending on a learner's choice of subjects, they may have study periods allocated in the school day to work on projects or to study in the library. This is consistent with the aim of creating independent and responsible learners but will also depend on the school's ability to provide the facilities learners need and the school's attitude to learners' time management.

The length of timetabled periods can have an impact on the types of pedagogy used in the classroom. Teachers will often adapt their teaching style and the types of activities they create to fit the available lesson duration. There is a tendency for shorter periods to become dominated by whole class instruction. Longer lessons can become wasteful if teachers have not planned and prepared enough work to fill the entire lesson. The school's quality assurance programme

should ensure that teachers have the right amount of time for engaging and effective lessons. Ideally, there should be enough time for the teacher to run several different activities which collectively fulfil the prescribed requirements of the syllabus or curriculum.

2.8 Teaching Cambridge Programmes in school systems with different requirements for the formal years of schooling

The Cambridge pathway has 13 stages and typically, a stage is covered in one year. However, in some countries, schools teach Cambridge stages in shorter or longer time periods, due to differences in the number of formal schooling years. Schools can also choose to teach some Cambridge programmes over different lengths than those most commonly adopted to meet local needs. Cambridge programmes are designed to be flexible and the following examples illustrate how some schools or regions adapt the Cambridge pathway to suit their own circumstances and needs:

Case Study 1:

The Cambridge continuum in 12 years: the experience in Southern Africa

Countries in Southern Africa typically have 12 rather than 13 years of formal schooling. Students start school aged 6 years old in grade 1. Secondary school usually starts at grade 8, when students are 13 years old. Some schools choose to base their school curriculum around Cambridge while others offer Cambridge alongside the national curriculum. In primary and lower secondary it is the norm for Cambridge to be used to complement national curriculum requirements or the school's own curriculum offer. In the IGCSE and A level years some schools choose to use Cambridge as an alternative to the national curriculum while others allow students to complete both providing extra lessons and support for Cambridge preparation.

Most Cambridge schools teach IGCSE over two years in grade 10 and 11 and sit final IGCSE assessments when students on average are 16 years old, while a few schools offer IGCSE over 18 months. Typically, students go on to do Cambridge

Case Study 1 *continued*

AS Level qualifications in the final year of school (grade 12). In some countries, IGCSE is considered the equivalent of the local school leaving certificate and schools teach up to this level. In others, AS Level is accepted as the equivalent to matriculation and the entry standard required for universities. A few schools also offer a post matriculation year grade 13 for students to do the full A Level programme (AS plus A2).

Some schools choose to accelerate Cambridge. This usually involves starting secondary school one year early at grade 7. Students complete Lower Secondary in grade 7 and 8, completing Cambridge Secondary 1 Checkpoint assessments at the end of grade 8 before moving to IGCSE which is taught in grades 9 and 10. Students then go on to do the A Level over two years. Students then have time to do AS Levels over two years (which also might also include resitting some IGCSEs). For students aspiring to the full A Level [AS and A2] they can do the staged AS to A2 route or the full A Level over two years and still graduate in grade 12. Completing the full A Level will help students who want to go to competitive universities overseas and also provides additional points strengthening their application to universities in southern Africa.

A few schools offer very flexible pathways at the secondary level. Students who perform particularly well are allowed to take IGCSE courses over one year, usually in subjects they plan to take through to the full A Level. In a few cases, students can take IGCSEs over three years. This degree of flexibility requires a timetable built around individual student needs and strengths and which can be challenging for schools.

Case Study 2:

The Cambridge Pathway in 12 years: Case study example of Saudi Arabia and Bahrain

Schools in Saudi Arabia and in Bahrain deliver a 12 year programme from the age of 6 to 18. It is not permitted to begin Grade 1 at the age of 5, nor can a school be licensed to deliver a 13 year programme ending at the age of 19. This leaves schools with the challenge of delivering the 13 year Cambridge Pathway in 12 years.

Case Study 2 *continued*

Figure 3 (below) shows three different ways that schools structure the Cambridge Pathway from Primary to Advanced.

In all structures, candidates sit for Cambridge IGCSE, Cambridge International AS & A Level at the same age and Grade or Year; IGCSE – Grade 10 (Year 11 in the UK), AS – Grade 11 (Year 12 in the UK), A Level – Grade 12 (Year 13 in the UK).

Age of compulsory education in the Middle East

Year of external asssessment

Figure 3: Three different structures used for teaching the Cambridge Pathway.

Structure 1*

Age	Cambridge Stage	Year/Grade in KSA
5-6	Cambridge Primary (1)	KG2
6-7	Cambridge Primary (2)	1
7-8	Cambridge Primary (3)	2
8-9	Cambridge Primary (4)	3
9-10	Cambridge Primary (5)	4
10-11	Cambridge Primary (6) (Cambridge Primary Checkpoint)	5
11-12	Cambridge Lower Secondary (7)	6
12-13	Cambridge Lower Secondary (8)	7
13-14	Cambridge Lower Secondary (9) (Cambridge Lower Secondary Checkpoint)	8
14-15	Cambridge IGCSE Year 1 (10)	9
15-16	Cambridge IGCSE Year 2 (11)	10
16-17	Cambridge International AS & A Level Year 1 (12)	11
17-18	Cambridge International AS & A Level Year 2 (13)	12

Structure 2

Age	Cambridge Stage	Year/Grade in KSA
6-7	Cambridge Primary (1)	1
7-8	Cambridge Primary (2)	2
8-9	Cambridge Primary (3)	3
9-10	Cambridge Primary (4)	4
10-11	Cambridge Primary (5+6)* (Cambridge Primary Checkpoint)	5
11-12	Cambridge Lower Secondary (7)	6
12-13	Cambridge Lower Secondary (8)	7
13-14	Cambridge Lower Secondary (9) (Cambridge Lower Secondary Checkpoint)	8
14-15	Cambridge IGCSE Year 1 (10)	9
15-16	Cambridge IGCSE Year 2 (11)	10
16-17	Cambridge International AS & A Level Year 1 (12)	11
17-18	Cambridge International AS & A Level Year 2 (13)	12

** See Structure 2 information on the next page*

Structure 3

Age	Cambridge Stage	Year/Grade in KSA
6-7	Cambridge Primary (1)	1
7-8	Cambridge Primary (2)	2
8-9	Cambridge Primary (3)	3
9-10	Cambridge Primary (4)	4
10-11	Cambridge Primary (5)	5
11-12	Cambridge Primary (6) (Cambridge Primary Checkpoint)	6
12-13	Cambridge Lower Secondary (7+8)**	7
13-14	Cambridge Lower Secondary (9) (Cambridge Lower Secondary Checkpoint)	8
14-15	Cambridge IGCSE Year 1 (10)	9
15-16	Cambridge IGCSE Year 2 (11)	10
16-17	Cambridge International AS & A Level Year 1 (12)	11
17-18	Cambridge International AS & A Level Year 2 (13)	12

Case Study 2 *continued*

In **Structure 1**, schools begin delivering Cambridge Primary in the equivalent of reception i.e. KG2 (the second year of Kindergarten), and begin Cambridge Primary stage 2 in Grade 1 at the age of 6. Although this structure is designed according to Cambridge's recommended age guidelines, it is challenging to implement. The main challenge is that most new enrolments at Grade 1 (which usually accounts for over 50% of students) are from children that had no prior formal education experience, making stage 2 of the Cambridge Primary programme a challenge to teach. By using this structure, candidates sit for the Cambridge Primary Checkpoint in Grade 5 (equivalent to Year 6 in the UK) and Lower Secondary Checkpoint in Grade 8 (equivalent to Year 9 in the UK).

In **Structure 2**, schools begin delivering Cambridge Primary in Grade 1 (equivalent to Year 2 in the UK), and compress the Cambridge Primary Programme into 5 years. This is typically done by covering Stage 4 and 50% of Stage 5 of the Cambridge Primary curriculum in Grade 4, and covering the remaining 50% of Stage 5 and Stage 6 in Grade 5. By using this structure, candidates sit for the Cambridge Primary Checkpoint in Grade 5 (equivalent to Year 6 in the UK) and Lower Secondary Checkpoint in Grade 8 (equivalent to Year 9 in the UK).

Structure 3 is the most common way the Cambridge Pathway is delivered. Schools begin delivering Cambridge Primary in Grade 1, and teach the six stages in six years. This way, any new students joining the school during primary, don't face the challenge of having to cover more content in a shorter period. They then compress Cambridge Lower Secondary by teaching the three stages of the curriculum in two years. They achieve this by delivering Stage 7 and 50% of Stage 8 in Grade 7, and the remaining 50% of Stage 8 together with Stage 9 in Grade 8 (as shown in Table 7).

Table 7 compression stages 7-9 into two years

Stage 7	Stage 8	Stage 9
Grade 7	Grade 8	

Case Study 2 *continued*

Example of Structure 3

A school in Bahrain covers the content of all three stages effectively in approximately 64 teaching weeks (32 in Grade 7, 32 in Grade 8) by delivering 9 periods a week for science (chemistry x 3, biology x 3, physics x 3), eight periods a week for English, and eight periods a week for mathematics (each period is 45 minutes). This school has found the planning templates Cambridge provides as an effective tool to support planning the delivery of these three stages – in particular the long-term planning templates with learning objectives. The cumulative grade distribution at IGCSE for School A is higher than the country's average – an indication that this structure has worked effectively for their students.

Case Study 3:

Covering the Cambridge Primary programme in five years at HLC International School, Karanai, India

HLC serves students aged 2.5 to 18 years old (from Kindergarten to pre-university). It bases its curriculum around the Cambridge Pathway, offering Primary and Secondary Checkpoints, IGCSE, AS and A Levels. The school strongly emphasises and supports inclusion and diversity and strives to develop the whole person through five initiatives. Supporting inclusion and diversity [Elina]; Differentiated instruction based on evidence [Kognify]; Global citizenship [Karthauyam]; collaboration and sport [Explorers]; and community learning [Militvaa]. The school was one of the first Ashoka Changemaker schools in the world.

One challenge the school faces is that the school system in India is based on 12 rather than 13 years of schooling. In order to cover the six stages of Cambridge Primary in five years, the school has re-organised the stages - placing some a year earlier. Some stages are introduced in the final year of Kindergarten so that students are accelerated into the programme. Teachers have taken the Cambridge curriculum and carefully planned their schemes of work for each year with progression in mind. Expectations for progression for all students are high and students are supported through the Elina and Kognify initiatives.

Case Study 4:

Teaching Cambridge IGCSE in One year at the RDFZ Chaoyang Branch School in Beijing

RDFZ Chaoyang Branch School (RDFZ CBS) is a secondary school. It is a branch of RDFZ, which is affiliated to Renmin University of China under the jurisdiction of the Ministry of Education. The school offers the best of Chinese education together with an international programme that complements the local requirements. In addition to the mandatory Chinese curriculum, RDFZ CBS provides a range of international courses, some compulsory, but many are voluntary. The school strives for academic excellence and the development of broader skills and competencies supporting the development of individual interests.

The main component of the Senior 1 programme (Year 10) are Cambridge IGCSEs. They are intensively taught over the course of nine months from September to May. All of the students are Chinese nationals so are second language English speakers. Students must study English, either English as a second language (or literature for the more able), mathematics and a science - they can choose from biology, chemistry, environmental management or physics). Students can then pick an additional three option subjects from a choice of: accounting, art & design, biology, business studies, chemistry, drama, economics, environmental management, ICT, music, or physics. Examination results are pleasing typically with 48% receiving A* or A.

The timetable is made up of 45, 40-minute periods in a week. All students do eight lessons of English and weaker students also do 5 lessons of extra English (taught by bilingual teachers). All other Cambridge IGCSE subjects are taught in five lessons per week. Students must also complete all compulsory elements of the Chinese curriculum. This includes Chinese language & literature, Chinese music, Chinese art, PE, Chinese history, geography, PE, political science and counselling. Students also have to do two extra-curricular activities after school on a Tuesday and a Thursday. They choose from over 100 activities which are offered by the staff.

Case Study 5:

A broad and balanced curriculum offer at the International School of Brunei

The International school of Brunei (ISB) is an inclusive and not-for-profit co-educational day and boarding school serving approximately 1,400 students aged 2-18 through the early years, primary and secondary sections. The student body comprises over forty different nationalities. The school emphasises academic success and the self-development of students through involvement in a wide range of sport, music, art, drama and outdoor education and is a non-selective school, with a wide range of abilities and aptitudes.

CLICK AND HOLD TO ENLARGE

The curriculum for students between the ages of 13 and 16 (years 9, 10 and 11 in the UK system) is designed around the IGCSE. A student's compulsory (core) curriculum requirement is made up of English, mathematics, coordinated science or two single sciences, and a language.

Case Study 5 *continued*

To widen the curriculum offer, and create the flexibility that the ability range requires, the school starts vertical option blocks in Year 9. Under this system, options are chosen and these run for one year, with the recommended Cambridge time allocation. This creates a range of benefits: minority subjects run as choices across much bigger student totals comprising three year groups, international student movement is better accommodated through the one year cycle and the problem of subjects being over-subscribed is eradicated as the system is not a 'one-off'.

Furthermore, it greatly helps to create additional subject challenge for the higher ability Year 9 and 10 students outside the normal l examination cycle. In addition, due to the overall time savings (six hours per week), accrued through early IGCSE study, the school is able to offer a wider range of enrichment opportunities based on staff interest and expertise, which are scheduled on the main timetable and viewed as part of the formal curriculum and not as extra-curricular. These run after school and in lunchtimes.

In terms of student welfare, it could be argued that there is a benefit to spreading the examinations over three years, rather than confining them all to the end of Year 11. Through this system, students are able to study a broader and more balanced curriculum, allowing them more opportunity to explore areas of personal interest and develop a wider range of skills and understanding. Physical education and a school based course on 'essentials for learning and life' are also taken by all and are non-examinable. These are not shown in the diagram.

2.9 Curriculum models for bilingual and multilingual schools

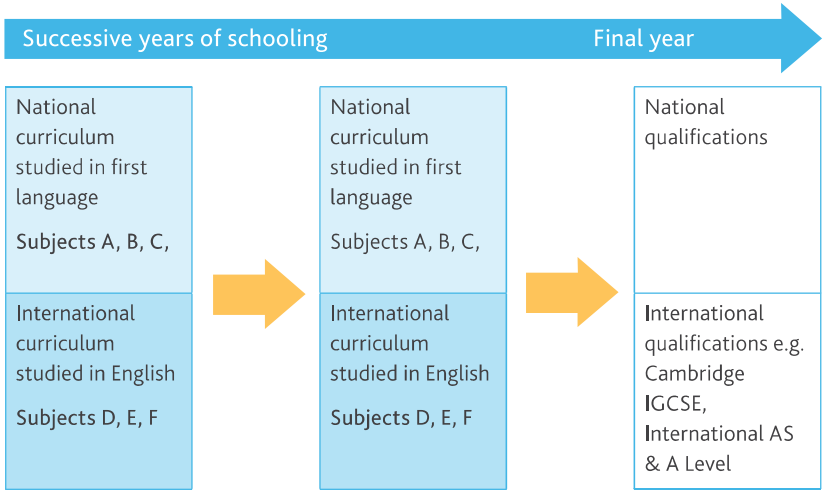
Many schools find it ideal to use Cambridge programmes and qualifications for the English-medium (second-language) strand of a bilingual (or trilingual) education programme. They then use their own national curriculum and qualifications for the first-language strand of the programme.

There are many ways of organising bilingual education and the best approach will depend on the school vision and practical considerations, including resources, suitable teaching staff, environment and the exposure of learners to English language outside the school.

A bilingual/multilingual curriculum model is based on how many subjects are taught and learnt through each language and over how much time.

For example, some schools:

• begin in a small way by teaching one module or project in English	Short-term	Low intensity
• prepare learners by immersing them in English for a short period, e.g. through overseas student exchanges, or by teaching all curriculum subjects in English for one school term	Short-term	High intensity
• teach one or two content subjects in English over several years	Long-term	Low intensity
• teach a substantial part of the curriculum in English over several years	Long-term	High intensity



Fundamental to all these approaches is having teachers who are able to teach their content through the medium of English. Cambridge recommends content and language integrated learning (CLIL) as a methodology to support this process. This means teachers are supporting students in learning the language they need to achieve in their subjects. Schools will need a training strategy to allow local teachers to build up their second-language skills so they can teach their subject through the medium of English unless teachers are already well prepared.

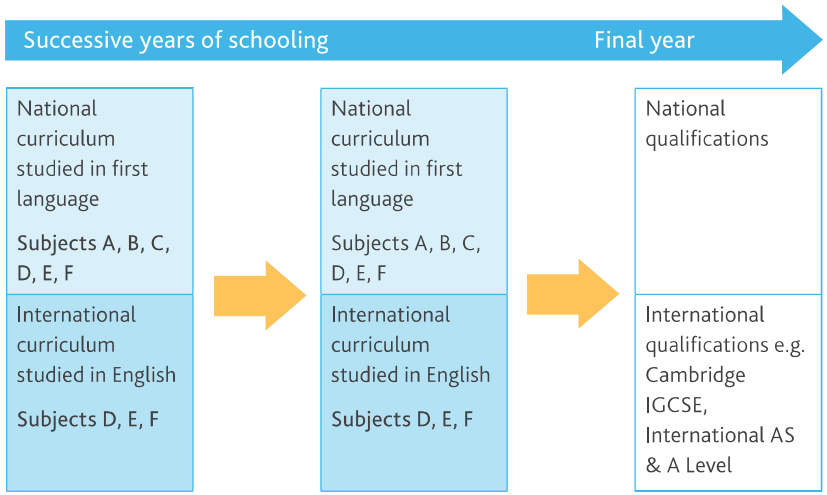
Bilingual education usually requires meeting the needs of two curricula – a national (or sometimes regional) curriculum and an international curriculum. How do schools organise the timetable?



There are two key approaches.

Approach A: Split curriculum

In Approach A, learners study some subjects as part of the national curriculum and other subjects as part of an international curriculum. In this way the problem of double timetabling is avoided. This model is only possible if equal official recognition is given to the qualifications taken in both curricula.

Approach B: Shared subject currciulum

In Approach B, learners study some subjects in both the first language and English. This could allow learners to take both national qualifications and Cambridge qualifications. They study the remaining subjects in the first language. The common subjects (D E F) could be taught using:

1. **An integrated curriculum**. Teachers should first compare the national curriculum against the Cambridge curriculum for a subject. This will allow them to identify areas of overlap and difference and help them work out what they need to teach in total. Then they can teach the integrated curriculum:
   - **either** in the same class using one bilingual teacher or two team-teachers, one for each language/curriculum. In this way, the same teaching and learning can enable learners to take two qualifications – the national qualification in the first language and the Cambridge qualification in English.

References
Annotated bibliography and other resources
Glossary
Appendices

- or rotating classes/weeks/topics/terms/years between the first language and English. Sometimes the learning is rotated or sandwiched over several years. In this way, learning starts in the early years with the national curriculum through the first language, then switches for a period of years to the Cambridge curriculum, when this 'learning in English' period allows learners to work towards international qualifications, before returning to national curriculum priorities in the final years.

An integrated curriculum means that learning is streamlined for the benefit of the learner – the learner just goes to one timetabled class for a subject. However, this does require curriculum mapping, planning and teacher coordination.

2. **Two separate curricula.** The national and Cambridge curricula for a subject are covered in separate classes and languages, with no mapping of areas of overlap/difference.

If the curricula are separate, the learner is probably aware they are going to a national curriculum class and then to a separate Cambridge (e.g. IGCSE) class. Also, some of the learning may be duplicated. However, this may be easier for the school to organise if it is difficult to map the two curricula, if there is not enough overlap between curricula, or if there is a language barrier which prevents teachers coordinating to produce and teach a single, integrated curriculum.

Curriculum mapping for a subject
Curriculum mapping builds an intergrated, flexible sequence for learning by comparing two curricula and identifying common and different topics and skills

Learners in all Cambridge schools need to be able to complete their studies and undertake assessments in subjects through the medium of English. This can be challenging for learners with English as a second language, but there are educational advantages in supporting language development and bilingualism. Not only are learners better prepared for participation in the modern global world, bilingualism also helps support individual cognitive development.

Even if a school is not running a bilingual education programme, there are other ways of developing 'language awareness' in international English-medium schools in order to help support bilingualism or multilingualism. An effective language policy can help to achieve this. Cambridge is committed to supporting schools to develop and implement strategies successfully to support learners in multilingual settings. Cambridge ensures that assessments are fair to learners who do not have English as a first language.

Case Study 6:

Supporting the development of multi-lingualism and global perspectives in the Netherlands

A number of state schools in the Netherlands complement the national curriculum with Cambridge programmes, usingthe support of Nuffic. Nuffic is an independent, Dutch, not-for-profit organisation dedicated to supporting institutions in the Netherlands with educational and other programmes that foster international co-operation, awarness and language development. Two examples are the Christelijke Scholengemeenschap [CS] Vincent van Gogh in Assen and the Sintermeerten College, Heerlen.

CS Vinvent Van Gogh supports the development of critical thinking, global awareness and English proficiencey by requiring all students to complete Cambridge IGCSE and AS Level Global Perspectives and IGCSE English as a Second Language. Cambridge Global Perspectives is taught as a separate class and IGCSE English as a Second language is integrated into regular English lessons. Global Perspectives fits in particularly well with the international scope of the school's bilingual education, as well as nurturing important research skills and IGCSE English as a Second Language is an ideal way to show that students have reached CEFR B2, as well as a good extra certificate for students at the end of Year 3.

Sintermeerten college requires all students in the bilingual programme to take Cambridge Global Perspectives at IGCSE and AS Level. Cambridge Global Perspectives has been successful at supporting the development of English language and research skills and provides a stimulating and relevant course for bilingual students. The school has recently introduced IGCSE History as an option to challenge the more capable students and they have found this course challenging because of the level of English demanded. The school is considering other Cambridge options, for example AS English and possibly a science.

3. Approaches to teaching and learning

This chapter considers approaches to instruction that have the highest impact on students' learning and performance and support the development of the Cambridge learner and teacher attributes.

Further reading about the ideas in this chapter is available in:

- The *Developing the Cambridge learner attributes* guide
- Chapter 4 of the '*Developing your school with Cambridge*' guide and;
- Other resources in the '*Teaching Cambridge at your schoo*l' area of the Cambridge International website

3.1 The Cambridge teacher

Excellent teaching – including the development of the learner attributes – is the single most significant factor impacting on learners' academic performance and personal growth that a school can influence. Successful schools, and successful school systems, develop and nurture highly skilled teachers who are encouraged to be creative professionals working in a collaborative culture.

It is important to stress that there is no single recipe for excellent teaching, and that different schools, operating in different countries and cultures, will have strong traditions that should be respected. However, there is a growing, evidence-based consensus that a certain number of powerful practices and approaches help learners fulfil their potential and be prepared for modern life.

Understanding cannot be transmitted from one person to another; it is always constructed in learners' minds. In order to develop a learner's understanding, their existing mental models must be challenged and extended. Teachers have to listen to the voice of the learner, in the classroom and as evidenced in the work they produce, and engage with it to support learning to help the learner develop their own understanding. This process helps to develop independent learners as they start to model the teacher's approach.

The most effective teaching practices and learning environments challenge learners' thinking beyond what they could achieve independently. The role of the teacher is to support (sometimes referred to as 'scaffold') student learning in what Vygotsky (1978) described as the 'zone of proximal development'. This is the area of challenge beyond what the learner can manage on their own but achievable with the help of a skilled other person. As a collection of practices and principles, Cambridge International describes this as 'active learning'. The word 'active' refers to learners' being actively engaged in learning rather than passive recipients of teaching. Teachers also need to be active leaders of learning rather than transmitters of knowledge or facilitators of learning. This involves constantly challenging student thinking, monitoring the impact of their instructional approaches and adjusting what they do based on feedback. See the '*Getting started with Active Learning* guide'.

Teaching and learning strategies

Teachers need to employ a variety of teaching strategies in the classroom. This will normally include carefully-designed individual learning activities, group work and whole-class instruction. The key element is the quality of learner engagement and the opportunities provided for feedback between the learner and teacher to guide the next learning steps. Whole class instruction can be a highly effective instructional approach if it includes discussion and learners have the opportunity to respond and contribute.

Teachers should apply assessment practices that regularly inform them whether learners are reaching their objectives. These assessment techniques also allow learners to understand where they are on their learning journey and how they can improve (see the '*Getting started with Assessment for Learning* guide').

Teachers as role models

Outstanding teachers model the Cambridge learner attributes. They are confident, responsible, reflective, innovative and engaged because they:

- **Have mastery of their subject area**. They can relate concepts and skills in such a way that students learn to understand and appreciate the nature of the academic discipline they are studying, and what constitutes excellence for the developmental stage they are teaching.
- **Teach for understanding as well as coverage**. They have the ability to engage with learners' mental ideas about the really important concepts, and take them on a journey of discovery. This approach requires learners to revisit concepts over an extended period of time and within different contexts. This spiralling strategy reinforces learning and leads to deeper levels of understanding.
- **Connect learning to the real world**. They connect learning to other topics in the subject, other disciplines and the experience of learners – making learning relevant.
- **Scaffold learning**. Teachers need to constantly challenge student thinking in the proximal zone of development. The optimal level of performance for a learner is the level that they can reach when they receive expert support, as distinct from the functional level, which they can achieve independently. Scaffolding learning helps to close this gap.
- **Have a learning rather than a performance orientation**. Chris Watkins (2010) points out that too many schools and teachers are more concerned about students looking good rather than learning well. There is considerable evidence that learning to learn is an effective strategy at raising student performance and preparing them to be independent, self-regulated learners equipped for modern life.
- **Are able to model problem solving and consider themselves as mentors as much as teachers**. They are concerned with the holistic development of the learner and understand the critical role that attitudes, emotions and self-confidence play in learning. They communicate a love of learning and believe every learner can achieve.
- **Understand, and can apply, assessment for different purposes**. They have an excellent grasp of summative assessment practices, but they also understand how to use assessment to support student learning. This is the process of identifying what the learner has or has not achieved in order to plan the next steps in learning and provide appropriate support.
- **Use a variety of different teaching strategies and activities**. This includes whole class instruction, collaborative group work and creative assignments and activities, as well as overseeing individual learning.
- **Are reflective and creative practitioners** engaged in ongoing effective professional learning.
- **Are collaborative and supportive of their colleagues**, the school and the school's community.

In order to support schools, Cambridge has developed a set of teacher standards which define the key professional characteristics and practices that teachers should develop to enable effective student learning in Cambridge schools. The standards can help to provide benchmarks against which teachers and their schools can evaluate their current practice and plan future development. They can show how the Cambridge Teacher and Cambridge Leader attributes are demonstrated in practice and they can contribute to the development of a shared frame of reference within which schools can work to improve the quality of teaching and leadership. The standards are flexible and have been developed so that they can be used to best effect in each school context providing a benchmark of what Cambridge considers to be teacher quality. See here:

3.2 The Cambridge learner and teacher attributes

Schools want their learners to combine both a deep understanding of their own culture and nation, with the skills to be global learners who are able to contribute and adapt to the uncertainties of the modern world. Cambridge introduced the learner/teacher attributes (Table 8), which recognise that a

Appendices

meaningful curriculum is more than a collection of different subjects. Learners need to develop the academic abilities, life skills and attitudes needed to be successful in higher education and in the world of work.

The purpose of the Cambridge learner and teacher attributes is to support the development of five powerful and highly desirable learning habits that will inspire students to love learning and help them to lead fulfilled and successful lives. Students who demonstrate the attributes habitually and skilfully employ a broad range of cognitive skills and socio-emotional skills (including personality qualities such as resilience, self-motivation and self-regulation) towards effectively managing their performance.

Table 8: Learner and teacher attributes

	Cambridge learners	Cambridge teachers
Confident	Confident in working with information and ideas – their own and those of others. Cambridge learners are confident, secure in their knowledge, unwilling to take things for granted and ready to take intellectual risks. They are keen to explore and evaluate ideas and arguments in a structured, critical and analytical way. They are able to communicate and defend views and opinions as well as respect those of others.	Confident in teaching their subject and engaging each student in learning. Cambridge teachers know their subject well and know how to teach it. They seek to understand their students and their educational needs. They strive to communicate a love of learning and to encourage students to engage actively in their own learning.
Responsible	Responsible for themselves, responsive to and respectful of others. Cambridge learners take ownership of their learning, set targets and insist on intellectual integrity. They are collaborative and supportive. They understand that their actions have impacts on others and on the environment. They appreciate the importance of culture, context and community.	Responsible for themselves, responsive to and respectful of others. Cambridge teachers are highly professional in their approach to teaching, and they are collaborative and supportive. They understand that their actions will help shape future generations and they are concerned about the holistic development of every individual they teach.
Reflective	Reflective as learners, developing their ability to learn. Cambridge learners understand themselves as learners. They are concerned with the processes as well as the products of their learning and develop the awareness and strategies to be life-long learners.	Reflective as learners themselves, developing their practice. Cambridge teachers are themselves learners, seeking to build on and develop their knowledge and skills through a virtuous circle of reflection on practice – involving research, evaluation and adaptation. They support students to become independent and reflective learners.
Innovative	Innovative and equipped for new and future challenges. Cambridge learners welcome new challenges and meet them resourcefully, creatively and imaginatively. They are capable of applying their knowledge and understanding to solve new and unfamiliar problems. They can adapt flexibly to new situations requiring new ways of thinking	Innovative and equipped for new and future challenges. Cambridge teachers are creative, experimenting with new ideas and pursuing an enquiring approach in their teaching. They are open to new challenges, being resourceful, imaginative, and flexible. They are always ready to learn and apply new skills and techniques.
Engaged	Innovative and equipped for new and future challenges. Cambridge teachers are creative, experimenting with new ideas and pursuing an enquiring approach in their teaching. They are open to new challenges, being resourceful, imaginative, and flexible. They are always ready to learn and apply new skills and techniques.	Engaged intellectually, professionally and socially, ready to make a difference. Cambridge teachers are passionate about learning within and beyond the classroom, sharing their knowledge and skills with teachers in the wider educational community.

Appendices

These attributes are not intended to be exhaustive. Schools may want to supplement them with others derived from the school's vision. To make the learner attributes more meaningful, school leaders should actively engage the school community with them, helping people understand why they matter and how they fit in with the school mission.

Subject curricula are more than subsets of knowledge to be taught and assessed by teachers and learned by students. They are the basis for the teaching and learning programmes that teachers use to express and deliver their wider expectations of learners. When planning lessons, teachers can build in opportunities for students to participate in learning activities and events that help grow and advance the development of learner attributes – consistent with the active learning approach described in the previous section.

The learner attributes apply across the curriculum and need to be supported both through the school's curriculum and co-curricular programmes.

When designing the school curriculum, it is important to ensure a breadth and balance of subjects and educational activities that contribute to cognitive, creative and psychomotor development. Some subjects lend themselves particularly well to collaborative work, creative expression and developing learner research skills, whether individual or collaborative (for example Cambridge Global Perspectives).

Having a rich selection of co-curricular activities will provide learners with opportunities to develop the inter- and intra-personal skills described in the attributes.

The school's environment, culture and the unacknowledged learning that permeates the school community beyond the classroom, will also have an important role in nurturing these attributes. Hence, the whole school community needs to be engaged with them.

In every school there will be some discrepancy between planned learning outcomes and the experience learners actually receive. It is extremely important to monitor and evaluate the experienced curriculum to see if what learners actually experience corresponds to what was intended. School evaluation procedures involving learners, teachers and parents can provide insightful feedback (see Chapter 4).

> "Becoming a reflective learner also requires being confident, responsible, innovative and engaged."

3.3 Becoming a reflective learner

The reflective attribute highlights the importance of learners understanding themselves as learners. This requires them to constantly reflect on their learning and accurately judge their own progress. They are able to employ a range of strategies to overcome the learning challenges they will inevitably face. Becoming a reflective learner also requires being confident, responsible, innovative and engaged. All of the learner attributes are interconnected.

Contents

5 Cambridge International Resources and Support Services
References
Annotated bibliography and other resources
Glossary
Appendices

Reflective learners:

- are effective at planning and managing their work and performance and accurately evaluating their progress
- understand themselves as learners and the nature of the knowledge they are learning
- apply their understanding to performance, constantly monitor what they are doing and produce appropriate responses
- are able to think both critically and creatively so as to overcome barriers to learning and engage with subject content deeply
- learn from mistakes and see failure as a learning opportunity
- are emotionally resilient when confronted with setbacks
- are confident, but not arrogant, in working with others and sharing ideas
- care about the learning of others and realise that learning is social and collective.

While most schools would agree that learning how to become a reflective learner is critical, many assume that learners will develop these skills independently and so it is not considered as part of the curriculum.

All teachers should prioritise and understand their role in helping students to learn how to learn. Some schools have tried to teach learning/reflective/study skills as an extra course. Separate classes tend not to be very successful because learning strategies and reflective practice are best developed in the context of the learning students experience in their classes.

Effective learners understand that learning is an active process involving questioning, discovery of barriers, devising strategies to overcome the barriers, constantly evaluating progress and changing what they do if it does not work.

Less effective learners often take a passive approach. When trying to revise, for example, they read and re-read books and their notes, trying to absorb the material. This is based on the false premise that understanding can be transmitted from a text (or a person) to the memory.

Active learning has to be deliberately practised in different contexts, and supported by the school and individual teachers who understand and model the practices themselves. This will not happen unless it is emphasised as a curriculum competence and supported by structures and systems that emphasise:

- clearly identifying learning aims and objectives in each subject
- the development of concepts (and therefore language) that help individuals understand and describe the learning process they are going through
- emphasising a holistic understanding of each academic discipline, building bridges between what is learned in one context and in another
- ongoing professional development for teachers and the creation of professional learning communities that support teaching practice.

Reflection and learning to learn are considered in more detail in chapter 3 of the '*Developing the Learner Attributes*' guide.

3.4 Disciplinary and inter-disciplinary approaches

Schools usually, and for good reason, design the school curriculum around the provision of a balance of different subjects appropriate for each age group. However, there are many areas of overlap between subjects. The school curriculum should therefore enable students to develop a holistic understanding of themselves as learners, and to reflect on the similarities and differences between different subject approaches.

The main reason for including academic disciplines in the curriculum is that they nurture the ability to think critically and solve problems with applications that are not easily acquired from everyday experience. Michael Young describes this as 'powerful knowledge' (see Young, 2013). The humanities, social sciences, science, mathematics, languages and the arts - when well taught and appropriately assessed - all develop the ability to think critically and creatively. They do this in ways that are not easily transferable to other contexts.

In order for students to become effective critical and creative thinkers in everyday life, they need to be able to reflect on and apply approaches they learn

in academic disciplines in an interdisciplinary way. Interdisciplinary understanding is extremely important. It refers to the ability - and confidence - to navigate between disciplines, make connections and develop a holistic appreciation of knowledge that provides new perspectives.

Disciplinary understanding needs to be the foundation on which a rigorous interdisciplinary approach is based. Without this foundation, learning can lead to superficial coverage and confusion. Teachers, backed by a supportive curriculum, can help make connections in students' minds between what they learn in one context and another.

Excellent schools support the development of interdisciplinary understanding by expecting teachers to plan collaboratively. Teachers need to understand what their colleagues are teaching to a particular year group in order to make connections with their own classes. Some schools identify interdisciplinary links in the curriculum. This may be done in an informal way with individual teachers sharing their teaching plans in the staff room, or during meetings scheduled for this purpose. One simple example of this would be where students have learned some statistical skills in mathematics, and the geography teacher makes them apply this knowledge to their geography coursework, thereby reinforcing the concepts.

Another way of reinforcing interdisciplinary links is to have curriculum coordinators examining the learning across particular age groups, helping to identify and support meaningful connections. This complements the work of heads of department, who oversee coherence and consistency within a vertical subject curriculum.

Curriculum planning is very important when it comes to choosing the activities, courses and qualifications that will enable learners to draw on their experiences across the curriculum in order to think in interdisciplinary ways. Learners need to be challenged, required to produce extended project work and make presentations on their findings, working collectively and individually on different assignments. This is the approach adopted in Cambridge Global Perspectives.

Cambridge Global Perspectives

Cambridge Global Perspectives is an interdisciplinary programme, offered at Cambridge Primary, Lower Secondary, IGCSE, AS & A Level.

Cambridge Global Perspectives focuses on the nature of argument and evidence, encourages understanding and respect for the perspectives of others, and develops a range of skills needed for success in higher education and the world of work in the 21st century.

Students learn to appreciate a variety of alternative perspectives on global issues where ideas and interests compete and there are no easy answers. They learn how to evaluate different arguments, in particular the evidence and reasoning used to support them, as well as to improve the quality of their own arguments. These important skills are transferable to learners' other subjects.

Through studying global topics, learners gain an international context in which they can develop their skills. Students develop flexible, reflective, creative and critical thinking. They learn how to research issues, arriving at well-reasoned and evidence-based conclusions. Students also learn to work collaboratively with others and effectively communicate and critique ideas so that they become more confident, responsible, reflective, innovative and engaged.

Cambridge Global Perspectives can be taught as a stand-alone subject. However, schools can also opt to use Cambridge Global Perspectives as the curriculum core. This places it at the heart of the school curriculum and emphasises its interdisciplinary nature. Teachers of other subjects would be made aware of its learning and assessment objectives and, where applicable, support them in the teaching of their own subject. Learner research and project work would be coordinated, with subject-expert teachers acting as mentors across the curriculum.

3.5 Using conceptual frameworks to support learning

Concepts are a way of categorising things to make sense of a complex and diverse world. Through this grouping we create a shared framework for understanding, communication and action. Each school subject involves a large number of concepts. Substantive concepts are part of the substance or content

Glossary
Appendices

knowledge in a subject, for example in geography these might include 'river', 'trade', 'city' or 'ecosystem'. Second-order concepts shape the key questions asked in a subject and organise the subject knowledge, for example second-order concepts in history might include 'cause and consequence', 'change and continuity', 'similarity and difference' and 'historical significance'. There will often be an overlap of substantive concepts between subjects. A student might learn about 'renewable energy' in science, geography, economics and politics. There may even be some overlap of second-order concepts, for example 'change' in both history and geography. It is the particular combination of substantive and second-order concepts that makes each discipline distinct and unique.

A threshold concept is one that, once understood, modifies learners' understanding of a particular field and helps them to make progress to the next level. It helps them to go through a 'doorway' into a new way of understanding a topic or subject (Meyer and Land, 2003).

Part of effective teaching, supported by effective curriculum and assessment planning, is identifying which concepts are most important or 'key' for a particular developmental stage of learning. Cambridge syllabuses help scaffold learning through identifying important concepts. However, teachers need to adapt these to their own circumstances and incorporate them into their lesson planning and instructional design. Thinking carefully about key concepts can help teachers and heads of Department to better understand their subject discipline, and to support their learners 'progress.

Key concepts help create an understanding of the structure of a discipline, providing opportunities to link, review and put knowledge into context. This helps learners to progress, as well as to think and behave as a skilled mathematician, historian, chemist etc. A key concept will often link one topic to another, for example in economics, the concept of 'opportunity cost' links other areas of the curriculum such as production possibility frontier and the theory of comparative advantage.

For more guidance see the '*Getting started with Key Concepts*' guide.

3.6 Collaboration

Students need to learn to function effectively as team members and leaders, as this is an important ability in life and the workplace. They also need to learn to solve problems collaboratively. The Organisation for Economic Co-operation and Development (OECD, 2013, p. 6) defines collaboration as follows:

'Collaborative problem-solving competency is the capacity of an individual to effectively engage in a process whereby two or more agents attempt to solve a problem by sharing the understanding and effort required to come to a solution and pooling their knowledge, skills and efforts to reach that solution.'

Collaborative problem-solving requires teamwork where individuals actively, responsibly and productively work towards a shared goal. Individual responsibilities may change as progress or obstacles are met. The skills required to be an effective collaborator are different from those required to be a good

Appendices

individual learner. Students need to be able to define the problem and ensure they have a joint understanding of what is being asked, think critically as a group, communicate and reflect on how well the group is progressing towards solving the problem. Collaboration is not the same as cooperation and this distinction needs to be understood by teachers planning group work.

Schools that focus on the learner attributes have a responsibility to provide opportunities for collaborative learning through well-planned learning activities. Many academic disciplines can provide such learning opportunities through collaboration, including social science fieldwork and science practicals, or project work in courses like Cambridge Global Perspectives and enterprise. The co-curricular programme provides opportunities for group work and collaboration.

3.7 Information literacy and using information & communications technology [ICT] in the classroom

Effectively using ICT resources is another essential skill all learners need to develop. Over the past decade, the use of digital technologies in classrooms has continued to expand. Desktops, laptops, tablets and smart phones are commonly used for learning, as educators find ways to employ today's technologies in school classrooms across all subjects. Including ICT-based resources and activities in teaching programmes can be challenging, but it is vital for today's generation of learners as they use ICT resources to access, process, evaluate and communicate information and data.

It is essential that ICT is used to support good classroom practice. Any technology used must enhance carefully planned teaching and learning goals - not replace them. One example of this is when teachers use technology, e.g. an interactive whiteboard, to develop understanding of new ideas in a way that engages the whole class as active participants rather than as another medium for the teacher to lecture. Cambridge offers professional development qualification courses and qualifications that focus on the optimum use of ICT in classrooms. See here for more information.

With an abundance of information on the internet information literacy has become critically important. Knowing how to access information is one skill but even more important is the ability to critically engage with the information and make balanced judgements about its meaning and reliability. This ability requires an understanding of the nature of the data and the area of knowledge to which it relates. For this reason information literacy needs to be at the heart of each discipline and an area of interdisciplinary inquiry. Information literacy, for example, is as the heart of Cambridge Global Perspectives.

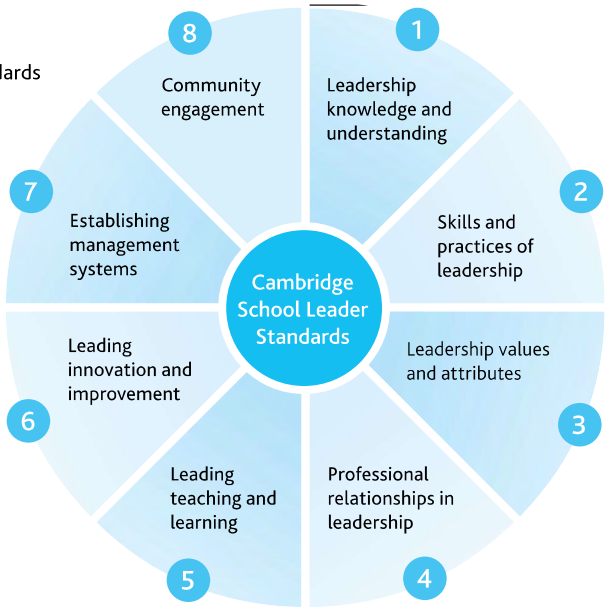
4. Leadership, curriculum evaluation and building school capacity

This chapter considers the critical role played by school leadership in planning, implementing and evaluating the curriculum. The final section of the chapter considers ways of measuring the impact of interventions or changes in practice in order to make judgements about progress.

4.1 Leadership

Schools offering Cambridge International's programmes and qualifications operate using many different administrative structures. Many are state funded, while others are independent. Some schools are privately owned and commercial, while others are run by school boards and are not-for-profit. No matter what the structure, this chapter aims to highlight leadership principles and practices that are most likely to support the development of an effective school.

Effective schools are schools that:



- successfully progress the learning of all of their students, regardless of background, beyond their normal expected developmental rate of growth.
- ensure the educational experience students actually receive, including the impact of the school curriculum, teaching approaches, the co-curriculum and the learning environment, closely aligns to the school vision and educational aims.

Schools will assign different management responsibilities to different individuals within the senior administration team. All schools need to have an individual in the school, normally the principal or school head, who is the senior educational leader. In some schools, this role is separate from the school business head or chief executive, who is responsible for school administration. In other contexts, the business head is line managed by the principal, who has overall responsibility for the school. The focus of this chapter is very much on the role of the senior educational leader.

The Cambridge School Leader Standards define the key professional characteristics and practices that leaders should develop to enable effective teaching and student learning in Cambridge schools. Teachers cannot achieve and sustain high quality outcomes for all students without effective leadership and so the Cambridge School Leader Standards identify and support the challenges of achieving such leadership. They confirm what successful leadership practice looks like and help leaders to determine areas and priorities for their own professional development.

The Standards are divided into eight headings (see figure 3) and 40 standards statements which are detailed and concrete. These enable users to understand how to demonstrate achievement in individual standards.

Figure 3: Cambridge School Leader Standards

Instructional leadership

The Cambridge School Leader Standards place a clear emphasis on the role of the educational leader as an instructional leader.

Instructional leadership focuses on the quality of instruction and maintaining a focus on learning. Robinson's [2007] study of the leadership styles and behaviours that had the greatest impact on student outcomes, concluded that: *"The more leaders focus their professional relationships, their work and their learning on the core business of teaching and learning, the greater their influence on student outcomes."*

Robinson [2011] goes onto identify 5 key functions 'student centred' leaders engage in:

1. Establishing Goals and Expectations. This includes creating a positive and inclusive school climate focused on a culture of learning.
2. Resourcing Strategically. The focus is on using resources in strategic ways to maximum impact to optimise student learning.
3. Ensuring Quality Teaching.
4. Leading Teacher Learning and Development. Professional learning opportunities are focused on improving instructional impact.
5. Ensuring an Orderly and Safe Environment so that everyone in the school, students and staff, feel safe and supported.

> "Everyone in the school community - heads of department, heads of year, teachers and other educators, parents and students, are empowered to play an appropriate leadership role."

In effective schools, the principal is a strong instructional leader. Moreover, leadership is widely distributed as it is viewed more as a process than a position of responsibility. Everyone in the school community - heads of department, heads of year, teachers and other educators, parents and students, are empowered to play an appropriate leadership role.

School administrators (including the principal, heads of department and heads of year) are responsible for building school capacity in a way that allows teachers to realise their full potential.

A number of the school's senior administrators should be actively involved with teachers, observing teaching and learning, and engaging in a professional discussion with teachers about what is happening in the classroom. This professional link can become a very powerful motivational force for teaching professionals, and critical for senior administrators in developing a deep appreciation of what is actually happening in the school.

Administrators need to support teachers so that they can concentrate on student learning and planning teaching. They are responsible for ensuring that the right structure is in place, and that there are enough appropriately qualified staff to deliver the curriculum. Roles and responsibilities need to be well defined and clearly communicated. Ideally, planning time is built into teachers' schedules so that they can work collaboratively in teams (in academic departments or year groups) on developing learning activities. Where possible and practical, teachers should be encouraged to visit each other's class and provide peer support to their colleagues. This is particularly important in developing less experienced teachers and a very cost-effective form of professional development.

Teachers also play a leadership role, in that they are involved in creating, implementing, monitoring, reviewing and refining practices and systems, and then measuring impact in order to improve student learning. Nurturing and using teacher talent in this way creates a virtuous circle of motivation, desire to learn more, commitment and enhanced practice. Working collaboratively to resolve collective challenges can also create a shared sense of purpose and a powerful instrument of change.

Listening to the learner voice is crucial to understanding their perspective on the curriculum and how it is implemented.

Leadership and management functions relating to the curriculum include:

1	Curriculum planning and evaluation
2	Teacher recruitment and evaluation
3	Professional development (PD).
4	Development and implementation of quality assurance policies and procedures.
5	Managing change
6	Involvement with the school and local community.
7	Management of the assessment process and relationships with Cambridge (exams officer).
8	Timetable (considered in the previous chapter).
9	Student admissions, progression through the school and guidance on to higher education.
10	Measuring impact

4.2 Curriculum planning and evaluation

Periodic curriculum evaluation, focused on evidenced-based judgement with a view to improving practice, will help ensure that the curriculum is accomplishing its purpose. Evidenced-based evaluation processes will help to measure what achievements have been made and to identify what needs more work. Table 9 identifies some of the key questions that evaluations should address, although this is by no means a complete list.

Table 9: Some essential questions for curriculum planning and evaluation

Area for review	Examples of questions
Curriculum planning	Does the school's curriculum: • deliver the most appropriate programme of study to support the school's mission and educational aims? • deliver a balanced, coherent and consistent programme of learning with clear and smooth progression routes designed for the needs of learners? • appropriately challenge all ability levels? • recognise the language background of learners and provide them with the support they need to access the curriculum? • provide sufficient opportunity for learner choice? • provide pathways that enable learners to achieve the entrance or admission requirements for university, higher education courses and employment?
Quality assurance policies and practices	• Are your quality assurance policies and practices fit for purpose, clear in their intent and easily understood? • How do you know that the school's quality assurance policies are being adhered to? • What areas need additional quality assurance policies and practices?

4. Leadership, curriculum evaluation and building school capacity

Area for review	Examples of questions
Teacher evaluation Fulfilling Cambridge (and other qualification) subject requirements Effective delivery of learning and meeting learner needs	• Are the stated aims of the curriculum being addressed within the teaching programme? • Are teachers teaching to the syllabus correctly, covering all the prescribed content and skills? • Is there evidence that teachers are using a variety of appropriate teaching strategies and learning activities? • Are the assessment objectives and methodology for assessment being respected? • Are coursework components being correctly implemented and supported? • Is there evidence that teachers are using formative assessment appropriately to inform their teaching practice? • Is there evidence that teachers are differentiating their practice to the needs of individual learners? • Do learning activities provide opportunities for the development of the desired skills and learner attributes? • How are the views of learners taken into account? • Is there a process of lesson observation with supportive feedback to effect improvements in teaching and learning? • Are lessons supported with sufficient resources, suitable for the level of study? • Do lessons include topics of national relevance by structuring and delivering content in local contexts?
Professional development	• Are all teachers engaging in suitable professional development activities to ensure successful implementation of the desired curriculum? • Is your professional development programme meeting the specific needs of teachers and the requirements of the strategic plan? • Is the balance between internal and external professional development opportunities appropriate? • What evidence do you have that the professional development programme is positively influencing classroom practice or learner achievement?

Area for review	Examples of questions
Resources and facilities	• Are facilities and administrative resources appropriate to support teaching programmes? • Do learners and teachers have access to appropriate library/ media centre and IT resources? • Are appropriate student welfare and learning support services provided? • Do you have appropriate facilities for the security of examination material?
Formal examinations and qualifications	• Do you have an exams officer to manage the administration of any Cambridge exams you offer? • Is there a process in place to make sure the exams officer carries out their duties in line with Cambridge requirements? • Are the Cambridge (and national) examination requirements and procedures being strictly adhered to? • Are the mechanisms for checking accuracy in, and completeness of, learner data sufficient? • Are the policies regarding authenticity of learners' work being followed? • Are the systems for entering, storing and exchanging learner records secure, with appropriate back-up and retrieval safeguards?
Communication and evaluation methodology	• How can you improve your evaluation procedures to get more meaningful or accurate information? • How is this information shared or disseminated to other stakeholders? • How can the school become more effective in making use of this information to refine and further develop the curriculum? • Is there effective communication and exchange of information with external agencies, for example, Cambridge, other qualification organisations, ministries and other governmental agencies? • Are learner and teacher schedules (timetables) and calendars of events accurate, clear and informative?

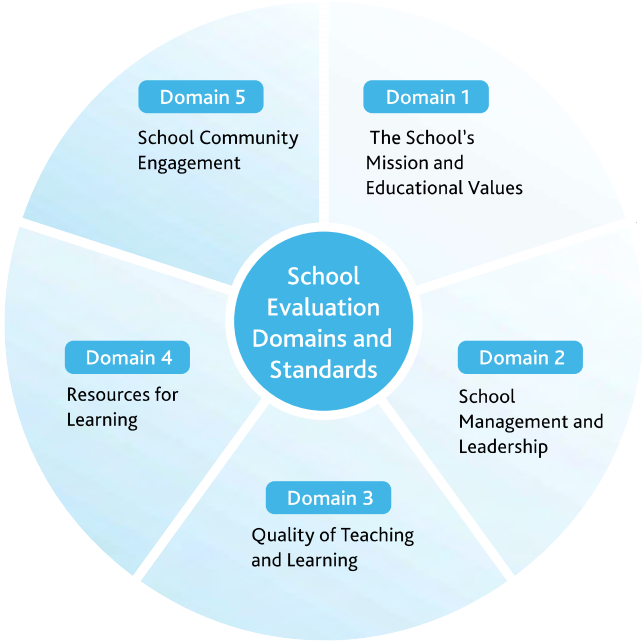
Many schools use recognised evaluation/accreditation frameworks to support the process of curriculum and whole-school evaluation. These will provide their own list of questions, processes and criteria. Often these are external, provided by national authorities or accreditation agencies. What is important is that they lead to school improvement and that the whole school community is involved in relevant evaluation and development activities so that everyone takes ownership of the process.



Larger scale school-wide evaluations are very time consuming. For this reason they are conducted only occasionally. It is important that smaller evaluation cycles are built into the regular operations of the school so that evaluation and development are seen as an ongoing process.

Cambridge offers a school self-evaluation service that can contribute powerful insights as part of a broader evaluation strategy. The Cambridge instrument investigates five domains [see figure 4]. These are centred on research-based indictors of effective schools including:

- high academic standards and expectations
- a school climate that focuses on achievement
- instructional leadership
- high performing teachers
- students with a strong self-efficacy and confidence as learners
- parents with high aspirations and expectations
- learning resources that are fit for purpose
- excellent school governance that includes responsible financial management.

> “Cambridge offers a school self-evaluation service that can contribute powerful insights as part of a broader evaluation strategy.”

Figure 4: Cambridge School Evaluation Domains

The self-evaluation process provides an opportunity for schools to engage with their three main stakeholders - students, teachers and parents. It allows them to collect data that will help them reflect on their performance, design improvement strategies and track progress over time. See more here.

4.3 Teacher recruitment and evaluation

As good teaching is such a powerful influence on student learning, nothing is more important than ensuring teaching is as consistently excellent as it can possibly be. Schools should recruit teachers who share the school's vision and, ideally, display the teacher/learner attributes. The best way to improve teaching

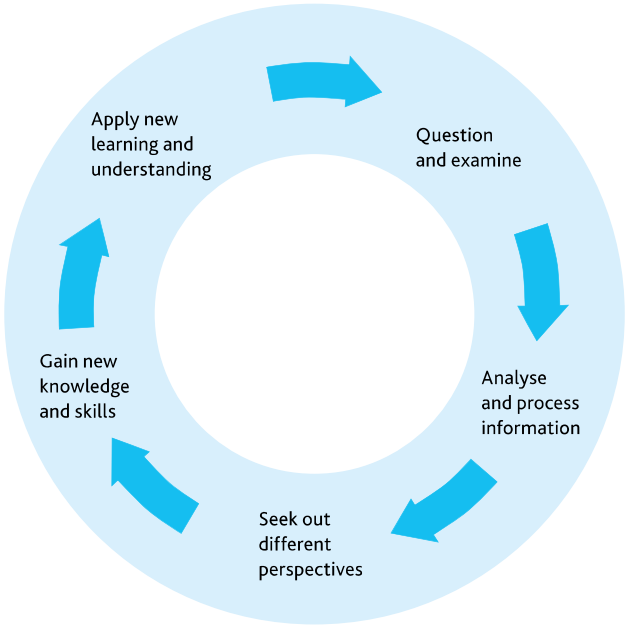
practice is to conduct well-designed teacher evaluation and professional development, while building a culture where it is valued and understood.

Teacher evaluation is a very important quality assurance process. Schools will operate different systems, often prescribed by national authorities. While the summative element of judgement or appraisal is important, the formative aspect is even more so. The most effective forms of evaluation allow teachers to self-reflect against elements of clearly-defined criteria. These criteria include the Cambridge Teacher Standards and the learner/teacher attributes, as well as performance criteria in terms of learner results and value added to student learning. Reflective practice, one of the key concepts in the learner/teacher attributes, is reinforced.

Many schools also involve learners in providing feedback to teachers, whether formally or informally. Learner evaluations of their classes, when they are carefully designed and non-threatening, are a powerful practice that provides valuable formative feedback to teachers.

Teacher evaluation needs to relate closely to the school's professional development programme. This ensures that professional development supports areas identified for development during the evaluation process.



Chapter 6 of the '*Developing your school with Cambridge*' guide provides more information.

4.4 Professional development [PD]

Professional development (PD) includes a wide range of activities and practices that support ongoing and evidenced-based reflective practice (see Figure 5: The reflective cycle). This involves participants in:

- reflecting on current practice through the teacher evaluation process, which will identify PD priorities
- working with peers to share ideas and to observe, record and give feedback on classroom experiences
- reviewing relevant resources to introduce and become familiar with new concepts
- accessing recognised local or international educational expertise to enhance understanding
- planning, trialling, evaluating and modifying new practices and resources
- using collaborative support structures and processes, including peer critiquing and online services.

Figure 5: The reflective cycle

PD needs are likely to span the following areas:

- subject and resource support, including familiarisation with subject content, learning activities and skill acquisition and development
- enhancing understanding of pedagogic and assessment practices and their planning and integration into teaching programmes

Appendices

- building professional capacity through collaboration with other teaching professionals in the school and through inter-school subject cluster groups or networking
- opportunities to upgrade professional qualifications, with the potential to become teacher-trainers or examiners, or to contribute in other ways that advance the introduction of the curriculum and the uptake of the associated new pedagogy and assessment methodology.

PD needs will be situational. Teachers new to the profession and/or to Cambridge programmes will need close support by experienced colleagues and to attend appropriately targeted training. Experienced teachers will want to improve their professional practice by completing advanced PD programmes, doing PD qualifications, and by becoming involved in professional communities of practice. These resources, courses and professional collaborations stimulate participants to reflect on their experience of working in a school environment and to evaluate their practice.

In this way, participants to reflect on their experience of working within a school environment through stimulus from resources, courses and professional collaboration. Reflective PD encourages individuals to develop action plans and experiment with new strategies. This experimentation gives them additional experiences on which they can reflect, and more opportunities for professional growth.

PD opportunities should not just be for teachers. The school leadership team and teaching support staff will also contribute to the successful implementation of the curriculum and will therefore benefit from relevant and constructive professional development.

For more information about our professional development services see chapter 5 in this guide and Chapter 7 of the '*Developing your school with Cambridge*' guide.

4.5 Developing and implementing quality assurance policies and procedures

Policies and procedures should provide teachers and learners (and where appropriate, parents) with clear direction, guided by the school's mission and aims. They need to be understood by the school community and enforced through quality assurance practices, including teacher evaluation. These resources, courses and professional collaborations stimulate participants to reflect on their experience of working in a school environment and to evaluate their practice.

In addition to the teacher evaluation policy, those that relate to the curriculum usually include:

Language policy: Every school will have its own language profile, so it is important that this is reflected in a policy that recognises the language needs of different groups of learners and teachers. It will consider the solution to questions including: How will English as a second language be supported? How will learners be encouraged to develop their first or best language? What responsibilities do teachers have to support language learning?

Assessment policy: How often are internal summative grading and reporting conducted? What are the grading procedures and how does this relate to the criterion system used by Cambridge and/or other qualifications taught in the school? How is assessment for learning supported? What can learners and parents expect from teachers in terms of reporting and detailed feedback on specific assignments and over specified lengths of time?

Homework policy: What are the expectations? How is this organised to ensure classroom learning is supported?

Special Educational Needs and Gifted and Talented policy: What are the expectations for teachers to differentiate so that all learners are appropriately challenged? How does the school support learners with specific needs?

Co-curricular expectations: What does the school provide for learners beyond regular classes? How does this fit in with teacher contracts and expectations? How does the school work with the local community to support learner participation in activities that it cannot provide itself, or are better provided outside the school?

Discipline policy: What is the code of conduct for teachers and the code of conduct for learners? How is the code of conduct supported and enforced?

What support does the school provide to learners who display discipline problems?

For further information see chapter 3 of the '*Developing your school with Cambridge*' guide.

4.6 Managing change

Introducing Cambridge curricula for the first time will present challenges, particularly if teaching staff are not familiar with the programmes or do not have a background of relevant experience. The high value Cambridge places on teachers becoming creative professionals means that preparation is vital. In other words, we expect teachers to develop their own schemes of work and apply the syllabus to the needs of their learners in the context of the school. To a lesser extent, this is also true for experienced staff who will also need time to plan and refresh their lesson plans, recognising that every class of learners is unique.

Teachers new to Cambridge will be involved in:

- becoming familiar with subject requirements, including assessments, and planning how to satisfy those requirements
- writing or rewriting schemes of work and producing new teaching material
- accessing and evaluating subject resources, for example, textbooks, websites and workbooks
- planning and trialling teaching strategies and assessment practices.

Teachers should be supported so that they have enough time to prepare properly and have access to professional development. One option is to have a 'pre-implementation year', to give teachers the opportunity to review, prepare, practice and evaluate the new material and approaches before full implementation. The opportunity to trial units of work and practise assessment tasks will help to build teachers' confidence and develop a sense of purpose towards the new curriculum.

Mentoring and team teaching are excellent strategies to help manage curriculum change and development. Experienced teachers can support less experienced colleagues and can also lead professional development activities within the school. Team teaching allows teachers to share expertise, provide professional support and learn new skills. While the content in different academic disciplines is different, many of the teaching and assessment principles and practices are often similar, so inter-departmental collaboration can also be very productive. Finally, we recommend working with another school that has experience of Cambridge to support teachers during a time of change. This can be very useful in smaller schools where there may only be one subject teacher at each school level.

> "Teachers should be supported so that they have enough time to prepare properly and have access to professional development."

4.7 Involving the local community

It is very useful if parents understand the curriculum, and the choices that learners have to make at different stages. Parent information sessions with question and answer sessions can support school communications.

Parents should support the development of the Cambridge learner attributes at home. Schools can encourage this by using the school reporting process to map learners' progress against these broader attributes, explaining their significance. In the same way that it can be beneficial for staff evaluation to include self-reflection, learners will also benefit from an element of self-evaluation in reporting. Some schools require students to write their own self-evaluations as part of the reporting process. Other schools conduct parent / student conferences where the student leads the discussion. For an example of this see case study 9 on page 43 of the *learner attributes guide*.

To understand the wider world, learners must first develop a deep appreciation of their local context and culture. Participating in community activities can enrich the curriculum, but can also benefit learners by giving them insights into career options through links with local businesses. Becoming aware of post-school options can help learners choose the subjects they want to study, enabling them to be responsible for their next steps in learning. It can also increase motivation levels and encourage greater participation in classroom activities. Community service can support the development of the learner attributes and help nurture a sense of social responsibility.

4.8 Administering our assessments (exams officers)

The exams officer is the person appointed by the head of centre to act on behalf of the school, with specific responsibility for administering Cambridge exams. We provide detailed support and training for exams officers managing our assessment processes. For more information please see here.

4.9 Student admissions, progression through the school and guidance on to higher education.

Transparency is key in student admissions. The school's policies and selection criteria must be clearly published on the school website and in other relevant documentation. For instance, if potential students must pass an entry test, the requirements must be freely available for students and parents to understand.

Once a student has been accepted, it is important to provide the appropriate level of challenge at each stage of the students' education as described in chapter one and two. The choice of subjects at IGCSE/O Level can be vitally important. If a student decides they wish to study medicine but they did not take chemistry IGCSE, they would be unable to undertake A Level study in the subject and therefore unable to pursue their chosen pathway. It is recommended that students study English, mathematics, at least one science, at least one humanities and one language in IGCSE plus other subjects as appropriate for future career paths. For those wishing to pursue higher education in science, engineering and medicine, all three science subjects in IGCSE would provide good foundations.

At A Level, subject choice becomes even more important. In the UK, the Russell Group universities publish a guide called 'Informed Choices'. This guide gives a list of what they refer to as 'facilitating subjects' as well as guidance on some of the subjects considered less desirable. Mathematics is regarded highly by all subject disciplines. The sciences, history and English literature are all regarded as facilitating subjects. If you wish to study economics, most universities require A Level mathematics rather than A Level economics.

It is recommended that those staff who are involved in advising students on subject choice and on their university/college applications look at the information available on the Cambridge Assessment International Education website. The recognitions database provides a tool for students to search by country and qualification to see where their qualifications are accepted worldwide and if they are given credit in institutions in North America.

General guidance and resources are provided here.

Information on the entry requirements and admissions processes of top destination countries can be accessed here.

4:10 Understanding and measuring impact

Measuring impact is critical to evaluation, and thereby to developing practice and improving student learning. Without measuring impact, how will we know if curriculum revisions or new approaches to teaching and learning have made a difference to our learners' progress and attainment? This section looks at how leadership in schools can answer these questions by introducing the concept of effect size and focusing on three areas in particular:

1. Improvements in student progress and attainment.
2. Changes in teacher self-efficacy.
3. Impact on student self-efficacy.

Impact focus 1: Improvements in student progress and attainment

Measuring effect sizes is one way of helping school leaders and teachers understand the impact of changes they have introduced on student progress and

Contents

3 Approaches to teaching and learning
4 Leadership, curriculum evaluation and building school capacity
5 Cambridge International Resources and Support Services
References
Annotated bibliography and other resources
Glossary
Appendices

teacher and student self-efficacy. If teaching strategies or the curriculum are changed in some way, calculating effect sizes helps determine not just if learning and self-efficacy have improved, but by how much. Effect size is a useful way of quantifying or measuring the size of any difference between two groups or data sets helping school leaders and teachers understand the impact of any changes they have introduced and understand what has the maximum benefit for learners and teachers.

An effect size is found by calculating the standardised mean difference between two data sets or groups. In essence, this means we are looking for the difference between two averages, whilst taking into account the spread of values around those averages at the same time. Case study 6 below illustrates this through providing a worked example:

Case Study 6:

Using effect size to measure improvements in student progress following an intervention

Ultimately, as school leaders and teachers, we are interested in the impact of a specific educational intervention or change on student outcomes. We want to know how much progress our learners have made, as well as what they been able to attain or achieve.

Consider the following scenario:
Over the course of a term, a teacher has worked hard with her learners on understanding 'what success looks like' for any given task or activity. She has stressed the importance of everyone being clear about the criteria for success, before learners embark upon the chosen task and plan their way through it. She has even got to the point where learners have been co-authors of the assessment rubrics used, so that they have been fully engaged in the intended outcomes throughout and can articulate what is required before they have even started. The teacher is happy with developments so far, but has it made a difference to student progress? Has learning increased beyond what we would normally expect for an average student over a term anyway?

Case Study 6 *continued*

Here is an extract from the teacher's mark-book:

Student	Sept Task	Nov Task
Katya	13	15
Maria	15	20
Joao	17	23
David	20	18
Mushtaq	23	25
Caio	25	38
Cristina	28	42
Tom	30	35
Hema	32	37
Jennifer	35	40

Before we start analysing this data, we must note the following:

- The task given in September was at the start of the term – the task in November was towards the end of the term.
- Both tasks assessed similar skills, knowledge and understandings in the student. The November task needs to be as close as possible to the September task in assessing the same construct.
- The maximum mark for each was 50.
- The only variable that has changed over the course of the term is the approach to teaching and learning by the teacher. All other things are equal.

With that in mind, looking at the extract above, what conclusions might you draw as an external observer?

Appendices

Case Study 6 *continued*

You might be thinking something along the lines of:

"Mushtaq and Katya have made some progress, but not very much… Caio and Cristina appear to have done particularly well… David, on the other hand, appears to be going backwards!"

What can you say about the class as a whole?

Calculating effect sizes:

What if we were to apply the concept of 'effect sizes' to the class results above, so that we could make some more definitive statements about the impact of the interventions over the given time period? Remember, we are doing so in order to understand the size of the effect on student progress.

Let's start by understanding how it is calculated. An effect size is found by calculating the standardised mean difference between two data sets or groups. In essence, this means we are looking for the difference between two averages, whilst taking into account the spread of values (in this case, marks) around those averages at the same time.

As a formula, and from our scenario above, it looks like the following:

Effect Size = Average class mark after intervention – Average class mark (before intervention) Spread standard deviation of the class

In words: the average mark achieved by the class before the teacher introduced her intervention strategies is taken away from the average mark achieved by the class after the intervention strategies. This is then divided by the standard deviation of the class as a whole. The standard deviation is merely a way of expressing by how much the members of a group (in this case, student marks in the class) differ from the average value (or mark) for the group.

Case Study 6 *continued*

Inserting our data into a spreadsheet helps us calculate the effect size as follows:

	A	B	C
1	Student	September Task	November Task
2	Katya	13	15
3	Maria	15	20
4	Joao	17	23
5	David	20	18
6	Mushtaq	23	25
7	Caio	25	38
8	Cristina	28	42
9	Tom	30	35
10	Hema	32	37
11	Jennifer	35	40
12			
13	Average mark	23.8 =AVERAGE(B2:B11)	29.3 =AVERAGE(C2:C11)
14	Standard deviation	7.5 =STDEV(B2:B11)	10.11 =STDEV(C2:C11)
15			
16			Standard deviation overall 8.8 =AVERAGE(B14:C14)

Therefore, the effect size for this class = (29.3-23.8)/8.8 = 0.62

But what does this mean?

Case Study 6 *continued*

Interpreting effect sizes to understand impact

In pure statistical terms, a 0.62 effect size means that the average student mark, after the intervention by the teacher, is 0.62 standard deviations above the average student mark before the intervention.

We can state this in another way: the post-intervention average mark now exceeds 61% of the student marks previously.

Going further, we can also say that the average student mark, post intervention, would have placed a student in the top 4 in the class previously. You can see this visually in the table above where 29.3 (the class average after the teacher's interventions) would have been between Cristina's and Tom's marks in the September task.

We know from results' analyses of the Program for International Student Assessment (PISA) and the Trends in International Mathematics and Science Study (TIMMS) that, across the world, a year's schooling on average leads to an effect size of 0.4. John Hattie and his team at The University of Melbourne reached similar conclusions when looking at over 900 meta-analyses of classroom and whole-school interventions to improve student learning – 240 million learners later, the result was an effect size of 0.4 on average for all these strategies. What this means, then, is that any teacher achieving an effect size of greater than 0.4 is doing better than expected (than the average) over the course of a year. From the example given in case study 6, not only are the learners making better than expected progress, they are also doing so in just one term.

Impact focus 2: teacher self-efficacy

Teacher self-efficacy is a term we use to refer to a teacher's level of confidence in their ability to guide learners to success. It captures the idea that, both individually and collectively, teachers believe they can have a highly positive effect on student learning and attainment, regardless of a student's socio-economic background and the level of motivation s/he brings to the learning environment.

This level of confidence can be found by asking teachers to self-report against questions (or items), such as:

1. How much, in your current practice, do you feel you can gauge/measure student understanding of what you have taught?
2. To what extent, in your current practice, do you feel you can use a variety of assessment strategies?
3. How well, in your current practice, do you feel you can implement a variety of active learning strategies?
4. How much, in your current practice, do you feel you can motivate learners who show little or no interest in school work?

A teacher's responses to such questions, before an intervention or change is put in place, can then be compared with their responses afterwards. Allocating a numerical code to the response options, e.g. 0 = No influence; 1 = Some influence; 2 = A lot of influence, etc, enables statistical analysis and the calculation of effect sizes (see above). An exemplar questionnaire, for adaptation by the school, can be found in the appendices.

Impact focus 3: student self-efficacy

Linked closely to the above is the idea of student self-efficacy, which refers to a learner's level of confidence about their ability to be successful within a given context (task, subject, etc) – both now and in the future. Learners with strong self-efficacy are more likely to challenge themselves when faced with difficult situations or tasks and be intrinsically motivated. They willingly exert a high degree of effort in order to be successful, and see failure as a learning opportunity or something that is within their control. Such learners tend also to recover quickly from setbacks, and, ultimately, are likely to achieve their personal goals. One of the main reasons Cambridge developed the learner attributes was to support the development of student self-efficacy.

1 Curriculum planning: An overview
2 Designing the school curriculum
3 Approaches to teaching and learning
4 Leadership, curriculum evaluation and building school capacity
5 Cambridge International Resources and Support Services
References
Annotated bibliography and other resources
Glossary
Appendices

The level of a student's sense of efficacy can be found by asking them to self-report against questions/descriptors/items, such as the following:

1. I can succeed at anything if I try hard enough.
2. If I practised every day, I could develop any skill.
3. Once I have decided to accomplish something that is important to me, I keep trying, even if it is harder than I originally thought.
4. When I am struggling and taking longer to complete something difficult, I focus on my learning and change my approach, instead of feeling discouraged.
5. I believe that the brain can be developed, just like a muscle.
6. I think that, no matter who you are, you can significantly improve your level of capability.

Once more, a student's responses to such questions, before an intervention or change is put in place, can then be compared with their responses afterwards. Allocating a numerical code to the response options, *e.g. 0 = Not like me at all; 1 = A little like me; 2 = Like me; 3 = A lot like me*, etc, thereby enables statistical analysis and the calculation of effect sizes (see above).

An exemplar questionnaire, for adaptation by the school, can be found in the appendices.

Considerations on measuring impact

In reality, measuring and using effect sizes is not a perfect tool as the assumptions made about similar tasks and identifying only one variable as changing are not fully achievable. That said, calculating effect size provides one set of data to measure impact and needs to be part of a broader discussion and analysis.

Much of this analysis will be qualitative, trying to understand why some students have done better than others and trying to make sense of patterns in the data. School leaders and teachers must look at the data carefully and intelligently in order to understand 'why'. Why did some learners do better than others? Why did some not make any progress at all? In what areas has student attainment or self-efficacy improved, stayed the same or got worse? Its most important function is to support collaborative work and discussion around student learning and progress, helping departments and teachers to work out a common language, high expectations and a clear focus around improving student outcomes.

John Hattie's work (2010 and 2012, see annotated bibliography) provides insightful guidance to schools about what they should prioritise based on effect sizes from international research. Another valuable study is by the Education Endowment Foundation / Sutton Trust (see annotated bibliography).

5. Cambridge International Resources and Support Services

This chapter highlights the range of support services and resources we offer to schools that are implementing Cambridge programmes. It gives an overview of the different types of support available and points to where to find more detailed information. The chapter also sets out the next steps for schools planning to introduce Cambridge or to expand their Cambridge offer.

We offer a range of support materials and services for teachers. These are aimed both at helping them effectively deliver our programmes and at meeting their professional development needs. All teachers can access this support, regardless of whether their school curriculum is wholly or partially based on Cambridge programmes.

For Upper Secondary and Advanced programmes, all our support can be accessed through the School Support Hub:
www.cambridgeinternational.org/support

For our Primary programme, all our support can be accessed via the Primary support site: https://primary.cambridgeinternational.org

And for our Lower Secondary programme, all our support can be accessed via the Lower Secondary support site:
https://lowersecondary.cambridgeinternational.org

There are four major areas of support:

1. curriculum materials and resources
2. professional development
3. school improvement services and consultancy
4. help with expanding a school's Cambridge offer or becoming a Cambridge school.

5.1 Curriculum materials and resources

Our new School Support Hub for Cambridge Upper Secondary and Advanced programmes has now replaced the Teacher Support site, making it easier for teachers to find and download the assessment and teaching support materials that they need to deliver Cambridge programmes. We provide a wide range of resources to support teaching and learning, including schemes of work, past papers, mark schemes, example candidate responses and examiner reports.

All registered Cambridge schools teaching our Cambridge Upper Secondary and Cambridge Advanced stages should make use of the School Support Hub regularly to find the resources they need.

The School Support Hub includes online teacher forums, which are a great way to keep up to date with the global Cambridge community. Cambridge teachers can use them to ask questions about their syllabus and get help and ideas from other teachers and subject experts.

Teachers can also use the 'Community Resources' area to upload their own resources to share with other Cambridge teachers, or download materials that others have uploaded to use in lessons.

www.cambridgeinternational.org/support

Assessment tools for Primary and Lower Secondary.

We provide dedicated online support to schools registered to offer Cambridge Primary and Cambridge Lower Secondary. For Primary and Lower Secondary programmes, Progression Tests are end-of-stage tests available for English, English as a Second Language, Mathematics and Science. They are designed to measure learners' progress and identify their strengths and weaknesses. For the Lower Secondary programme you can choose between paper-based and on-screen versions, depending on which is most suitable for your learners and your school.

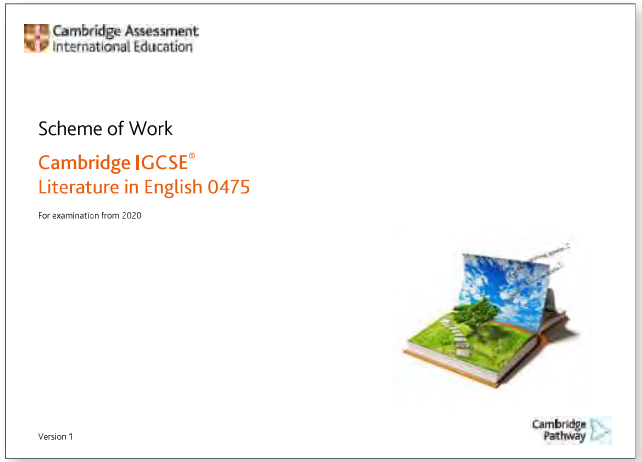
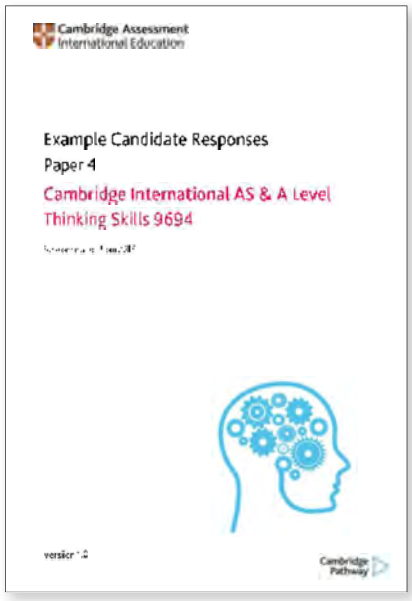
Curriculum Support

Schemes of work are medium-term course plans that are available for many of our subjects. They provide suggested teaching sequences and activities for the classroom. We have designed our schemes of work to be as flexible as possible and teachers choose which approach to take.



Teacher guides - some subjects have teacher guides which provide extra guidance to help teachers plan their lessons effectively, taking into account the language needs of learners. There are also suggestions to help prepare Upper Secondary and Advanced learners for their final assessment.



Learner guides are for teachers to share with Upper Secondary and Advanced learners to help them plan their revision programme and better understand what to expect in the examinations.

Resource Plus

Resource Plus is a collection of additional teaching and learning resources designed to help Cambridge teachers deliver challenging concepts and skills in some of our most popular syllabuses. Resource Plus materials have been created by subject experts to give you the confidence to teach new syllabus content, deliver engaging lessons, and clearly explain concepts that can be difficult for learners to understand. Some resources provide teaching support for the syllabus as a whole, while others cover individual areas in depth. More information can be found at: www.cambridgeinternational.org/resourceplus

For our Upper Secondary and Advanced qualifications there are also example candidate responses. These booklets use examples of candidates' work to show how different levels of performance (high, middle, low) relate to the subject's curriculum and assessment objectives. Each answer is annotated with examiner comments on the awarded mark and any mistakes the candidate has made. The examiner explains how the candidate could have improved their answer, and lists common mistakes made in this question across all candidates who sat the

Appendices

exam. They help teachers to understand the standard required to achieve marks, beyond the guidance of the mark scheme.

Endorsed resources

In addition to the resources produced by Cambridge International, we also endorse resources from a range of publishers. Endorsed resources go through a rigorous quality-assurance process to make sure they closely reflect the curriculum framework or syllabus and are appropriate for Cambridge schools worldwide. Resources may be 'endorsed for full syllabus coverage' or endorsed to cover specific sections, topics or approaches.

http://www.cambridgeinternational.org/support-and-training-for-schools/endorsed-resources/

Exam preparation materials

Past question papers: We publish past papers for each subject. These give learners the opportunity to practice at answering different types of question.

Examiner reports: Our principal examiners write detailed reports describing learners' overall performance on each part of the question. The reports give insight into common misconceptions shown by learners, which teachers can address in lessons.

Grade thresholds: These show the minimum number of marks learners needed to achieve in order to be awarded a particular grade.

Mark schemes: These help teachers understand how marks are awarded for each question and what examiners look for when they mark.

Coming soon: Test Maker - a new online service allowing teachers to compile customised test papers using a large bank of past exam questions

For more information go to www.cambridgeinternational.org/support
see also: ● https://vimeo.com/259843531

5.2 Professional development

The overarching aim of Cambridge professional development is to work with schools to transform classroom practice in order to improve student outcomes.

We offer a coherent framework of training and professional development for teachers in Cambridge schools, designed to meet the needs of teachers who have different levels of experience. The support we offer for teachers includes courses and resources aimed at developing the knowledge and skills teachers need to deliver specific programmes and qualifications, and others that are more general, aimed at developing teaching strategies, skills and reflective practice.

We offer courses, seminars and conferences, face-to-face and online training events and webinars. Our online courses are delivered via our virtual learning environment and help teachers to build links and exchange ideas with other Cambridge schools internationally.

Teaching Cambridge programmes and qualifications

We offer three levels of programme-specific and qualification-specific professional development, which we are continually developing and expanding:

Introductory level

Introductory Training is for teachers who are new to Cambridge programmes and qualifications. It introduces teachers to Cambridge programmes, syllabuses and curriculum frameworks and enables them to teach our syllabuses with greater confidence. We strongly recommend this training to teachers who are new to Cambridge or new to a specific qualification.

Teachers will typically learn about:

- Cambridge Assessment International Education
- the aims and structure of Cambridge programmes, syllabuses and curriculum frameworks
- assessment aims and objectives
- question papers, marking exercises and examiner feedback (only applicable for Cambridge Upper Secondary and Cambridge Advanced qualification training)

Contents
Introduction
1 Curriculum planning: An overview
2 Designing the school curriculum
3 Approaches to teaching and learning
4 Leadership, curriculum evaluation and building school capacity
5 Cambridge International Resources and Support Services
References
Annotated bibliography and other resources
Glossary
Appendices

- Progression Tests, Cambridge Primary Checkpoint and Cambridge Lower Secondary Checkpoint tests
- teaching ideas and approaches, endorsed resources that are available to support teaching.

This training is available face-to-face and online. All of our online training can be accessed on our **Professional Development Learning Community** website.

Extension level

Extension Training is for teachers who have some experience of teaching Cambridge programmes and qualifications. The training in this area enables teachers to engage with our syllabuses and curriculum frameworks in greater depth and build confidence in their delivery. We recommend this training to teachers who have attended Introductory Training and/or have been teaching Cambridge programmes and qualifications for at least one year or one exam cycle.

Teachers will:

- review syllabus and curriculum framework design and the assessment aims
- learn about any major updates to our syllabuses or curriculum frameworks
- extend their understanding of the assessment process through reviewing past question papers, marking exercises, examiner feedback as well as developing practice questions for Cambridge O Level, Cambridge IGCSE, Cambridge International AS & A Level and Cambridge Pre-U
- explore Progression Tests, Cambridge Primary Checkpoint and Cambridge Lower Secondary Checkpoint
- create schemes of work and curriculum resources
- share a range of approaches to teaching and learning.

Enrichment level

Enrichment Professional Development is for teachers and school leaders who have been teaching or implementing Cambridge programmes and qualifications for at least a year and would like to develop their practice in specific areas. This level of our training encourages teachers to reflect on, and take greater responsibility for their teaching, as well as become more innovative in their classroom practice.

There are three different strands to our offer at this level. Teachers and school leaders can choose to focus on:

- skills, concepts or ideas (subject based)
- skills, concepts or ideas (not subject-based)
- a particular aspect of a syllabus or curriculum framework.

This training is available face-to-face, online or a blend of both.

Examples of Enrichment Professional Development include Active Learning and Assessment for Learning, The Inclusive Classroom, and Developing your Leadership with Cambridge.

For a list of forthcoming courses, as well as details of how to enrol, go to: **http://www.cambridgeinternational.org/cambridge-professional-development/events-and-training-calendar/**

Cambridge Professional Development Qualifications

Cambridge Professional Development Qualifications (Cambridge PDQs) transform professional learning for practising teachers and leaders. They provide formal recognition and reward for a school's commitment to establishing a culture of ongoing teacher and school leader development.

Specifically, Cambridge PDQs:

- meet the needs and priorities of the individual and the school
- scaffold school-based professional development
- enhance professional thinking and practice to improve the quality of learning
- provide international benchmarks for professional learning, leading to valuable certification and progression
- energise professional learning communities.

5.3 School improvement services

School Self-Evaluation

Effective schools successfully progress the learning and development of all of their students, regardless of background, beyond their normal expected rate of growth. To support the progress of their students, many schools regularly review their performance to identify ways in which they can become more effective.

As part of this review process, schools often base their evaluations on evidence from practice. This means that any decisions about how to improve school performance are informed by data.

We have developed a range of surveys that form the basis of a school self-review. Schools can use these to collect feedback from the school's key stakeholder groups: parents, students and teachers. Each of the surveys is based around a set of standards for School Self-Evaluation, which have been developed by Cambridge International and tailored specifically for Cambridge schools. The standards are grouped into five key areas, or domains. Each domain contains a set of standards which help to define the features of an effective school.

Once the school has conducted the surveys, Cambridge will produce a report on the results that combines and compares responses from parents, students and teachers. We will then schedule a video conference or face-to-face meeting with the school leadership team. This meeting is an opportunity to discuss the report's findings, decide on any areas for further analysis, and identify the next steps in the school improvement process. For full details visit:
www.cambridgeinternational.org/support-and-training-for-schools/school-improvement/

School consultancy

We can provide local support and guidance for teachers and school leaders involved in implementing the Cambridge curriculum. By working closely together, we are able to respond to specific needs and provide a more personalised experience. We can also help identify solutions or processes to address any specific problems or challenges. For longer term support, we can work together to develop and implement a more formalised programme. Specific areas might include:

- school improvement planning
- improving the quality of teaching and learning
- teacher appraisal and development
- student assessment and tracking
- resourcing the school
- mobilising the school community.

To talk to Cambridge International about further support, please email:
info@cambridgeinternational.org with 'Local support request' in the email subject line.

For more information, see:
www.cambridgeinternational.org/school-improvement

5:4 Expanding the Cambridge offer or becoming a Cambridge school

For Cambridge schools interested in taking on additional Cambridge qualifications and programmes,, please contact us at:
info@cambridgeinternational.org

To find out more about how to become a Cambridge school, please refer to the registration process here:
www.cambridgeinternational.org/i-want-to/join-cambridge/

The measuring impact session has drawn extensively on the influential work of the academics John Hattie and Robert Coe. The following resources can be used to develop understanding further:

Hattie, J. (2012).
Visible Learning for Teachers – Maximising Impact on Learning. Routledge.
London and New York.

Coe, R. (2002).
It's the Effect Size, Stupid. What effect size is and why it is important. Paper presented at the Annual Conference of The British Educational Research Association, University of Exeter, England, 12-14 September, 2002. A version of the paper is available online:
http://www.leeds.ac.uk/educol/documents/00002182.htm

The Centre for Evaluation and Monitoring, University of Durham, has produced a very useful effect size calculator: http://www.cem.org/effect-size-calculator. Note that it also calculates a confidence interval for any effect size generated. Confidence intervals are useful in helping you understand the margin for error of an effect size you are reporting for your class. These are particularly important when the sample size is small, which will inevitably be the case for most classroom teachers.

Annotated bibliography and other resources

This guide has presented an overview of the issues and questions that you will need to consider in developing your curriculum. In this section we identify a few texts and other resources and links for schools interested in exploring ideas further. We recommend these because they are relevant, research-based and obtainable. They would make a good initial collection for a staff room resource centre easily accessible to all teachers. They are good starting points, from which you can follow your particular interests, but represent only a few of the wide range available. We encourage schools to share any literature and resource material they have found useful through the teacher support community. We have divided texts and resources into sub sections but most cross over boundaries and are relevant to more than one category.

Curriculum planning and Teaching

Approaches to Learning and Teaching series [2017 / 2018]. Various Authors. Cambridge University Press
This series of books have been written in collaboration with Cambridge Assessment International Examinations. Each book focuses on a different subject and gives examples of effective teaching approaches translating theory into practice.
See: http://www.cambridge.org/gb/education/subject/teaching-practice-and-professional-development/approaches-learning-and-teaching

English, F. (2010).
Deciding what to teach and test: Developing, aligning and auditing the curriculum.
3rd Ed. Thousand Oaks, CA: Corwin Press.

Addresses the fundamentals of curriculum design in the context of a standards-based environment, with guidance and useful tools, e.g. for curriculum mapping from a United States perspective.

Flinders, D. and Thornton, S. (2009).
The Curriculum Studies Reader.
3rd Ed. Abingdon: Routledge.

A comprehensive survey of historical and contemporary keynote writing on the curriculum, balanced with concrete examples of innovative curriculum and an examination of contemporary topics, e.g. globalisation.

Kelly, A. V. (2009).
The Curriculum: Theory and Practice.
6th Ed. London: SAGE.

Summarises and explains the main aspects of curriculum theory aimed at experienced readers, and shows how these can and should be translated into practice, in order to create an educational and democratic curriculum for all schools at all levels.

Law, E. and Nieveen, N. (Eds.) (2010).
Schools as curriculum agencies: Asian and European perspectives on school-based curriculum development.
Rotterdam: Sense.

Contemporary concepts of school-based curriculum development and case studies of practice in a range of Asian and European nations, exploring commonalities and differences.

McCormick, R. and Paechter, C. (Eds.) (1999).
Learning and Knowledge.
London: SAGE.

Learning as knowledge construction and the implications of this for the nature of knowledge and for the way it is acquired, e.g. learning within domains and different subject perspectives.

Marsh, C. J. (2009).
Key Concepts for Understanding Curriculum.
4th Ed. Abingdon: Routledge.

An evaluation of major international curriculum concepts and practices including planning, development and management, teaching perspectives, collaborative design and involvement, and ideology.

Myatt, M. (2018)
The Curriculum: Gallimaufry to coherence.
Melton: John Catt Educational Ltd.

An informative, straightforward and concise book whose argument is clear; a proper and demanding curriculum is the entitlement of every child and this book explores how educators can make this a reality. Covering a large amount of information on the curriculum, from cognitive science to individual subject commentaries, this book weaves theory and day-to-day practice together. Anyone involved in curriculum planning would find this a useful resource.

Priestly, M. and Biesta, G. (2014)
Reinventing the Curriculum. New Trends in Curriculum Policy and Practice.
Bloomsbury Academic.

Divided into two halves the first half of this book focuses on Scotland's Curriculum for Excellence (CfE) with contributions from authors discussing and commenting on its defining aspects of developing responsible citizens, effective contributors, confident individuals and successful learners. In the second half of the book the CfE is placed within an international context to highlight recent trends in curriculum policy. Despite a focus on English speaking countries, this book offers all readers useful ways of thinking critically about the direction and tensions of curriculum policy.

Turner, S. (2016)
Secondary Curriculum and Assessment Design.
Bloomsbury Education.

Written from a UK perspective and drawing on ideas from current UK educationalists, this book offers a step by step approach to designing a curriculum and assessment model at both a whole school and subject level. Reflective questions throughout the chapters aim to consolidate the thinking of the reader regarding areas such as the purpose of a curriculum, its key principles and which key researchers the reader aligns themselves most closely with.

Westbury, I. and Milburn, G. (2007).
Rethinking Schooling.
Abingdon: Routledge.

A critical selection of seminal articles from the Journal of Curriculum Studies by international experts. Themes include classrooms and teaching, pedagogy, science and history education, school and curriculum development, and students' lives in schools.

Wiggins, G. and McTighe, J. (2005).
Understanding by Design.
2nd Ed. Alexandria, VA: ASCD.

A backwards design process in which the curriculum planner starts by identifying clear learning outcomes and relevant facets of understanding, and makes explicit the essential questions to be explored.

Young, M., and Lambert, D. (2014)
Knowledge and the Future School.
New York: Bloomsbury Academic.

This book introduces important arguments about the role of knowledge, the work of schools and what a good education involves. It offers a way of thinking for anyone developing a curriculum and places 'powerful knowledge' as an underlying curriculum principle.

Effective schooling

Brighouse, T. and Woods, D. (1999).
How to improve your school.
Abingdon: Routledge.

Focuses on how ideas and intentions can be turned into direct actions that will help a school improve its performance and effectiveness, looking at effective schools and how they have achieved their goals, leadership within schools, teaching and learning effectively, making critical interventions to secure improvement and how schools involve others to support improvement.

Brighouse, T. and Woods, D. (2008).
What makes a good school now?
London: Continuum.

Draws upon extensive work on school improvement over the last 15 years, and is set in the real context of the many changes and new agendas that are a feature of schools today.

Brown, C. and Poortman, C. (2018)
Networks for Learning. Effective Collaboration for teacher, School and System Improvement.
Abingdon: Routledge

This book explores the nature and impact of Professional Learning Networks (PLNs) evaluating different case studies from the Netherlands, Sweden, UK, Canada, Australia and New Zealand, each case study with a different focus such as research networks to child support teams. Each chapter is dedicated to a case study and designed to get the reader reflecting upon how they would engage with and use networks to enhance and sustain school improvement.

Crossley, D. (2013)
Sustainable School Transformation. An Inside-Out School Led Approach.
London: Bloomsbury

Argues change comes for within the school itself. This book draws on numerous international case studies from Finland, Canada, Australia, USA and UK to highlight good practice for sustained improvement as well as lessons learnt. Themes discussed include use of data to inform, approaches to accountability and the importance of community.

Coe, R., Aloisi, C., Higgins, S., and Major, L. (2014).
What makes great teaching? Available online at:
https://www.suttontrust.com/wp-content/uploads/2014/10/What-Makes-Great-Teaching-REPORT.pdf

Review of findings from over 200 evidence-based articles.

Hattie, J. (2009).
Visible learning: A Synthesis of over 800 Meta-Analyses Relating To Achievement.
Oxford: Routledge.

Hattie and colleagues have researched the most powerful influences on achievement in schools. This books presents a synthesis of over 800 meta-analyses and is one of the largest collections of evidence about what works in schools to improve learning. See also Hattie, J. (2012). Visible learning for teachers. London: Routledge. See also Hattie, J. (2015) Visible Learning into Action: International Case Studies of Impact.

Knight, O. and Benson, D. (2014)
Creating Outstanding Classrooms. A whole-school approach.
Abingdon: Routledge

A self-titled 'training manual' the focus of this handbook is to develop excellent teaching and learning through teaching for understanding and being acutely aware of the learner experience. Topics range from curriculum planning, language progression and assessment models; case studies help to link the theory to practice.

MacBeath, J. and Mortimore, P. (Ed.) (2004).
Improving School Effectiveness.
Buckingham: Open University Press.

Reviews findings from seminal international work to analyse school effectiveness, its measurement, and impact for teachers, parents and pupils.

Measures of Effective Teaching project (MET)
www.metproject.org/reports.php

A number of resources are available on the website, primarily focused on measuring teaching effectiveness. Research base entirely in the USA.

Mercer, N. and Hodgkinson, S. (Ed.) (2010).
Exploring Talk in School.
London: SAGE.

Classroom talk is essential for guiding the development of understanding and for learners to understand their teachers and their peers in constructing knowledge. This book considers the practical steps teachers can take to develop effective classroom interaction, looking at: classroom communication and managing social relations; talk in science classrooms; using critical conversations in studying literature; exploratory talk and thinking skills; talking to learn and learning to talk in the mathematics classroom; the 'emerging pedagogy' of the spoken word.

Rose, R. (Ed) (2010)
Confronting Obstacles to Inclusion. International responses to developing inclusive education.
Abingdon: Routledge

This book opens up an international dialogue on the challenges of, and approaches to, developing an inclusive education. Each author puts forward their own views, which deliberately introduces varying perspectives and interpretations of inclusion.

Rudduck, J. and Flutter, J. (2004).
How to Improve Your School.
London: Continuum.

Focuses on those who are most affected by changes in education policy and systems – the learners. Based upon and distilling empirical evidence from a number of research projects, this is an account of contemporary schooling from the learners' perspective. The research indicates that we need to see pupils differently, to re-assess their capabilities and reflect on what they are capable of being and doing.

Bilingualism and learning

Baker, C. (2011).
Foundations of Bilingual Education and Bilingualism.
5th Ed.
Bristol: Multilingual Matters.

A comprehensive introduction to bilingualism and bilingual education, covering all the crucial issues in bilingualism at individual, group and national levels. The 6th edition (2017) updates on technological advances, issues of assessment, identity and bilingualism. There are updated international examples of policy, research and practice.

Chadwick, T. (2012).
Language Awareness in Teaching: A Toolkit for Content and Language Teachers. Cambridge: Cambridge International Examinations and Cambridge University Press.

Aimed primarily at those who teach learners for whom English is not their first language, this Toolkit helps teachers to develop language awareness and support through classroom approaches and coordination with other teachers.

Coyle, D., Hood, P. and Marsh, D. (2010).
CLIL: Content and Language Integrated Learning.
Cambridge: Cambridge University Press.

This is a comprehensive overview of CLIL, from theory to practice, for both language and content-subject teachers, providing guidance on the development of learning activities and materials, teaching approaches, assessment and evaluation.

Cummins, J. and Early, M. (2011).
Identity Texts: The Collaborative Creation of Power in Multilingual Schools.
Stoke on Trent: Trentham Books.

Identity texts describes a variety of creative work by children, led by classroom teachers: collaborative inquiry, literary narratives, dramatic and multimodal performances. This book shows how identity texts have proved to be an effective and inspirational way of engaging learners in multilingual schools around the world.

García, O. (2009).
Bilingual Education in the 21st Century: A Global Perspective.
Oxford: Wiley-Blackwell.

Provides an overview of bilingual education theories and practices throughout the world, and extends traditional conceptions of bilingualism and bilingual education to include global and local concerns in the 21st century. García questions assumptions regarding language, bilingualism and bilingual education, and proposes a new theoretical framework and alternative views of teaching and assessment practices.

Mehisto, P. (2012).
Excellence in Bilingual Education: A Guide for School Principals.
Cambridge: Cambridge International Examinations and Cambridge University Press.

The first guide available to focus on the development and organisation of a bilingual education programme from the perspective of the school leader, providing international perspectives on planning and partners, leadership, learners, teachers and parents. This is a practical guide to support implementation, and evaluation and improvement of practice.

Mehisto, P. and Genesee, F. (2015).
Building Bilingual Education Systems: Forces, Mechanisms and Counterweights.
Cambridge: Cambridge University Press.

In order to provide practical knowledge that is crucial to creating and implementing successful bi/trilingual education systems this book draws on case studies and the lessons learnt from them, practical tools and practitioner stories.

Mehisto, P., Marsh, D. and Frigols, M.-J. (2008).
Uncovering CLIL: Content and Language Integrated Learning in Bilingual and Multilingual Education.
Oxford: Macmillan.

This handbook gives many practical insights into CLIL, at each stage in the cycle of reflective practice, helping teachers to know why and how to facilitate CLIL.

School Leadership

Harris, J., Carrington, S. and Ainscow, M. (2018)
Promoting Equity in Schools. Collaboration, Inquiry and Ethical Leadership.
Abingdon: Routledge

Set against a backdrop of high stakes testing, competition between schools, parental choice and school autonomy in Australia, the agenda of this book is to find ways of promoting equity in schools to break the link between disadvantage and

Contents

educational failure and the implications this has for ethical leadership. The collaborative enquiry builds on international research, shares findings from student voice, use of school data, and examines factors that act as barriers to equity.

Fullan, M. (2007).
Leading in a Culture of Change.
San Francisco: Jossey-Bass.

How leaders in all types of organisations can accomplish their goals and become exceptional leaders. Draws on the most current ideas about and theories of effective leadership, with case examples of change, and analyses five core competencies for successful leadership of complex change: attending to a broader moral purpose; keeping on top of the change process; cultivating relationships; sharing knowledge, and setting a vision and context for creating coherence in organisations.

Macbeath, J. and Cheng, Y. C. (Eds.) (2008).
Leadership for Learning: International Perspectives.
Rotterdam: Sense Publishers.

Considers the impact of globalisation on school leadership and the importance of distributed leadership making schools into learning organisations. Examples are taken from 12 countries in different parts of the world.

MacBeath, J. and Dempster, N. (2009).
Connecting Leadership and Learning: Principles for Practice.
Abingdon: Routledge.

Five key principles for practice, tested by teachers, school leaders and learners, across cultural and language boundaries, are explored in school and classroom practice: a focus of learning; an environment for learning; a learning dialogue; shared leadership; internal and external accountability.

Robinson, V. [2011]
Student centered leadership.
Jossey – Bass USA.

Focuses on leadership that improves student outcomes.

Wiliam, D. (2016)
Leadership for Teacher Learning
Florida: Learning Sciences International

Includes a critique of methods of meta-analysis, explanation of the file-drawer problem and logic models.

Wise, C., Bradshaw, P. and Cartwright, M. (Eds.) (2013).
Leading Professional Practice in Education.

Focuses on leading learning and learner leadership, change processes and distributed leadership, and leading professional development, exploring the application of theory in authentic practice in a range of school contexts.

Assessment and assessment for learning

Black, P. et al. (2003).
Assessment for Learning: Putting it into Practice.
Maidenhead: Open University and McGraw-Hill.

Based on a two-year research project involving 36 teachers in UK schools in Medway and Oxfordshire, the specific assessment for learning practices that teachers found fruitful are described. The underlying ideas about learning illustrated by these developments are explored. The problems that teachers encountered when implementing the new practices in their classroom are discussed, with guidance for school management about promoting and supporting such changes.

Christodoulou, D. (2016)
Making Good Progress? The future of Assessment for learning.
Oxford: Oxford University Press

This book highlights the flaws of assessment and suggests alternative ways of assessing learning and the implications this has on teaching methods. Deliberate practice, a knowledge based curriculum and suggested principles behind formative and summative assessments are some of the areas highlighted in this book.

Education Endowment Foundation (2018)
Metacognition and self-regulated learning guidance report.

An accessible overview of existing research with guidance on how to translate this into practice. This report is for senior leaders and classroom teachers who are interested in how research can improve their teaching.

Gardner, J. (Ed.) (2006)
Assessment and Learning.
London: SAGE.

A comprehensive overview of assessment to support

Contents

learning, practice-based theory on assessment for learning, and formative assessment to support individual development and motivate learners. Research-informed insights and practical examples come from a wide variety of international contexts.

Harlen, W. (2007).
Assessment of Learning.
London: SAGE.

A critical review of how learners' achievements are assessed for a range of purposes, from reporting progress to selection and qualification. It considers the relationship between learning outcomes and assessment, the use of assessment for target setting and evaluation, and the role of teachers' judgements.

James, M. et al. (2007).
Improving Learning How to Learn.
Abingdon: Routledge.

Focuses on the conditions within schools, and across networks of schools, that are conducive to the promotion, in classrooms, of learning how to learn as an extension of assessment for learning.

Murchan, D, and Shiel, G. (2017)
Understanding and Applying Assessment in Education.
London: SAGE

A comprehensive guide on current practice and trends in assessment. Whilst primarily aimed at new teachers, this book is ideal for anyone wanting to get to grips with the nature of assessment in schools. Topics covered range from theoretical constructs of assessment to implementing assessment for learning in the classroom to assessment planning and policy at a whole school level.

Stobart, G. (2008).
Testing Times: The uses and abuses of assessment.
Abingdon: Routledge

Assessment is a social activity is one of the main themes of this book critically discussing a range of assessment practices and their consequences for teaching and learning. Suggestions of how to reclaim assessment and ensure it is used for legitimate reasons conclude this book.

Swaffield, S. (Ed.) (2008).
Unlocking Assessment: Understanding for Reflection and Application.
Abingdon: Routledge.

This book explores the values, principles, research and theories that underpin our understanding and practice of assessment. It provides practical suggestions and examples, and addresses key points about the future development of assessment. Complex but crucial ideas and issues are made accessible, so that teachers can be more confident and proactive in shaping assessment in their classrooms, in ways that support learning and avoid unintentional harmful consequences.

Weeden, P., Winter, J. and Broadfoot, P. (2002).
Assessment: What's in it for Schools?
Abingdon: Routledge.

Shows how theory can best be put into practice, using as little jargon as possible. Issues discussed include: how skills of reflection, self-evaluation and personal target setting can impact on learning; how far learners are able to evaluate their own performance and what schools can do in the short, medium and long term to promote more effective learning.

Wiliam, D. (2011).
Embedded formative assessment.
Bloomington: Solution Tree.

Wiliam outlines five key strategies of formative assessment: clarifying, sharing and understanding learning intentions and criteria for success; engineering effective classroom discussions, activities and learning tasks that elicit evidence of learning; providing feedback that moves learners forward; activating learners' instructional resources for one another; activating learners as the owners of their learning. Through a summary of the research evidence he shows the impact of each of the above strategies, and offers many practical techniques that teachers can use to incorporate the strategies into their classroom practice.

Wylie, E.C. et al. (2012).
Improving formative assessment practice to empower student learning.
Thousand Oaks, CA: Corwin SAGE.

This practical guide can be used by individual teachers or collaboratively as a study guide in a professional learning community. Case studies provide examples of formative assessment in practice, along with examples of teachers implementing changes in their practice. Readers are encouraged to select a specific aspect of formative assessment to investigate, explore relevant personal practice relevant to that aspect, implement necessary changes, reflect on those changes, and continue the change process.

School evaluation

Hopkins, D. (1989).
Evaluation for School Development.
Buckingham: Open University Press.

Provides a practice-focused guide to school evaluation, its methods, approaches and impact.

MacBeath, J. and McGlynn, A. (2002).
Self-Evaluation: What's in it for Schools?
London: RoutledgeFalmer.

Makes school self-evaluation accessible, and through case studies helps schools and teachers to develop self-confidence in working with evaluation tools. Discusses the concerns and issues of schools to propose challenging ideas for the future.

Ofsted (2012).
School Inspection Handbook (UK).
www.ofsted.gov.uk/resources/school- inspection-handbook
(page 23ff).

In Part 2, the evaluation schedule, grade descriptors for each of the key areas: the achievement of pupils at the school, the quality of teaching in the school, the behaviour and safety of pupils at the school, the quality of leadership in, and management of, the school are given. This might form the basis from which a school could develop its own self-evaluation schedule.

Professional development

Alexandrou, A., and Swaffield S. (Eds.) (2014)
Teacher Leadership and Professional Development.
Abingdon: Routledge.

Both leadership and professional development are central to school improvement. This book brings these two areas together to explore the role of teachers as leaders and raises the question of what difference this makes to student learning. Authors write primarily about their own experiences and research in the UK and USA but a wider international perspective is acknowledged.

Craft, A. (2002).
Continuing Professional Development: A Practical Guide for Teachers and Schools. 2nd Ed.
London: RoutledgeFalmer

For teachers and school leaders to develop understanding of professional and institutional development and of the principles of appraisal and review; to review their own professional development; develop and apply criteria for evaluating the quality and value of professional development; and identify appropriate areas for future development.

Colwell, J. and Pollard, A. (2015)
Readings for Reflective Teaching in Early Education
London: Bloomsbury

This book describes itself as a 'portable library', which is made up from a collection of 88 key readings from important contemporary and seminal publications on early years teaching and learning.

Gilchrist, G. (2018).
Practitioner enquiry: Professional development with impact for teachers, schools and systems.
London: Routledge.

An introduction to all aspects of practitioner enquiry, including case studies from schools.

Hargreaves, A. and Fullan, M. (2012).
Professional Capital: Transforming Teaching in Every School.
New York: Teachers College Press.

Presents action guidelines for classroom teachers and school leaders to transform the culture of teaching and teacher development.

Kennedy, A. (2005)
Models of Continuing Professional Development: a framework for analysis

An analysis of the potential nine models of teacher professional development has for transformative practice and professional autonomy. This article draws on international literature and uses specific examples from Scotland to raise the issues of purpose and power in continued professional development.

Moon, J. (2004).
A Handbook of Reflective and Experiential Learning.
Abingdon: RoutledgeFalmer.

Guide to understanding and using reflective and experiential learning, with practical ideas, tools, activities and photocopiable resources for classroom practice.

O'Leary, M. (2014)
Classroom observation: A guide to the effective observation of teaching and learning.
London: Routledge

Whilst not a tool-kit as such, this book explores the role of classroom observation in teaching. It is situated within the academic literature, but also including practical techniques.

O'Leary, M. (2017)
Reclaiming Lesson Observation. Supporting excellence in teacher learning.
Abingdon: Routledge.

The contributors to this book come from varying educational contexts in the UK, each putting forward their own experiences of lesson observation. The experiences elaborated upon in this book range from the process of transitioning from graded to un-graded observations, an analysis of observation feedback, suggestions for embedding coaching into the observation process and an evaluation of lesson study. This is a useful book to inform reflections on the purpose and outcomes of current models of observation that take place in schools.

Pollard, A. et al. (2008).
Reflective Teaching.
London: Continuum.

The textbook for reflective classroom professionalism, summarising latest research, analysing key topics and principles, and providing resources for continuing professional development.

Pollard, A. (Ed.) (2002).
Readings for Reflective Teaching.
London: Continuum.

This book is a 'portable library' of 120 essential readings for the reflective practitioner, concerning teaching and learning.

Impact

Bassey, M. (1999).
Case study research in educational settings.
Buckingham: Open University Press.

Introduction to using the case study approach in education.

Baumfield, V., Hall, E., and Wall, K. (2013).
Action research in education: Learning through practitioner enquiry (2nd Edn.).
London: Sage Publications Ltd.

A guide to practitioner enquiry, with examples from teachers and guidance on data collection methods.

Churches, R. & Dommett, E. (2016).
Teacher-led research: Designing and implementing randomised controlled trials and other forms of experimental research.
Camarthen, UK: Crown House Publishing.

A guide to all aspects of conducting RCTs in an education context.

Cohen, L., Manion, L., and Morrison, K. (2017).
Research methods in education (8th ed.).
London: Routledge.

A guide to key data collection methods such as questionnaires and interviews.

Denscombe, M. (2017).
The good research guide for small-scale social research projects (6th Edn).
London: Open University Press.

An introduction to strategies and methods for research.

Education Endowment Foundation (EEF)
https://educationendowmentfoundation.org.uk/

The website summarises research on education initiatives. The DIY evaluation tool gives a step-by-step approach to generating effect sizes. https://v1.educationendowmentfoundation.org.uk/uploads/pdf/EEF_DIY_Evaluation_Guide_(2013).pdf

White, R., and Gunstone, R. (1992).
Probing understanding.
London: The Falmer Press.

Techniques for investigating students' learning in detail.

Glossary

Active learning

Learning which engages students and challenges their thinking, using a variety of activities.

Assessment for learning

Essential teaching strategies during learning to help teachers and students evaluate progress in terms of understanding and skill acquisition, providing guidance and feedback for subsequent teaching and learning.

Backwash effect

The impact of an examination on teaching and learning, by influencing the design of the learning programme and activities.

Balanced curriculum

A school curriculum with a complementary range, combination and weighting of subjects. This normally includes mathematics, languages, sciences, technology, humanities, creative arts and physical education.

Benchmarking

Measuring performance against an established standard.

Bilingual education

Teaching and learning in two or more languages, developing both subject and language knowledge and skills.

Broad curriculum

Every student experiences a wide range of different subjects and learning activities.

Cambridge community

Schools using Cambridge educational programmes [currently about 10,000 schools worldwide, located in approximately 160 countries].

Cambridge Handbook

The official document detailing the regulations for running Cambridge examinations and assessments. It details the responsibilities of Centres and forms part of the customers' contract with Cambridge.

Co-curriculum

Valued educational activities that support learning beyond the school curriculum, which the school encourages and supports.

Component

A component is an assessable part of a subject examination, not certificated as a separate entity, e.g. a written paper or a practical.

Concept

A mental representation of a class of things. A concept may refer to concrete or abstract things.

Content and language integrated learning (CLIL)

In a CLIL approach to bilingual education, students develop their subject knowledge and language skills at the same time using specific teaching and learning strategies.

Core subject

A subject which is an essential part of the curriculum, typically English, Mathematics and Science.

An alternative meaning is a subject (like Global Perspectives) which becomes a focus of learning in other subjects enhanced by interdisciplinary approaches and connections with other subjects.

Coursework

Classroom assignments undertaken by learners as prescribed in the syllabus. Normally assessed by the learner's teacher according to criteria set by Cambridge. The work is moderated within the school and then by Cambridge.

Glossary

Creative development
Enabling learners to develop their imagination and original thinking in solving problems and producing ideas, images, artefacts, performances and actions which have value to themselves and others.

Critical thinking
The ability, underlying all rational discourse and enquiry, to assess and evaluate analytically particular assertions or concepts in the light of either evidence or wider contexts.

Curriculum
An overall description of the aims, content, organisation, methods and evaluation of the learning programme and the factors influencing the quality of learning.

The term curriculum is often used in different contexts and different ways (please see page 5 for examples).

Curriculum framework
The systematic structure of the curriculum as set out in document(s) specifying the way in which learning and assessment is to be organised.

Curriculum mapping
Documents all the interrelationships within the curriculum, e.g. what is to be learned, how and when.

Differentiated learning
Adapting one's teaching to suit the needs of different learners for their current level of understanding and performance, by providing appropriate learning activities, support, and assessment, so that all students in the group can learn effectively (see 'Scaffolding learning').

Directed study
Learning in which the teacher as expert authority sets out and transmits the knowledge to be learned.

Distributed leadership
Builds capacity in schools by giving teachers the responsibility for leading in areas of pedagogy, curriculum development and the social and emotional wellbeing of learners.

Dual qualifications
Cambridge and national qualifications.

Educational aims
Statements of the broad purposes or intentions of the curriculum or learning programme.

E-learning
Learning that takes place using electronic media, for example online.

ESOL
English for speakers of other languages.

Exams officer
The person appointed by the principal to act on behalf of the school with responsibility for the day-to-day administration of its Cambridge examination cycle.

Experienced curriculum
What students actually learn from their whole educational experience, including both planned and unintended outcomes, as a result of all their activities in the learning environment.

First language
The language that the learner mainly uses, from childhood and at home.

Formal assessment
Planned and structured measurement of learning.

Glossary

Formative assessment

Provides students with developmental feedback on their progress during the learning programme and informs the design of their next steps in learning.

Guided learning hours

The average amount of teacher-learner contact time a school typically needs to allocate for students to be well-prepared for a qualification.

Higher education

Courses in universities and colleges beyond upper secondary school, e.g. degrees.

Impact

The effect that one thing has on another thing. In schools, this could be the effect a new marking technique has on student progress.

Inclusion

Refers to integrating learners in the regular school system (and class) as opposed to placing a learner in a special school or class. Learners with special educational needs are provided with the technical, assistive or personal supports needed.

Interpersonal skills

Skills used to interact effectively with people on a day to day basis, e.g. communication, empathy

Intrapersonal skills

Skills used to reflect on, manage and develop your own thinking, behaviour and progress.

Long-term planning

Preparation for learners' progress and development over a year or more.

Management cycle

An iterative process in which school leaders set goals, implement actions, monitor and evaluate progress and outcomes in relation to the school's strategic plan.

Metacognition

In simple terms, metacognition is being aware of and in control of one's own mental processes.

Mission statement

A formal statement of the education purpose of the school.

Moderation

The process of checking that assessment standards have been applied correctly, consistently and fairly, and making adjustments if necessary to ensure that all assessments are aligned to the standards.

Multi-levelling

Assessments specifically targeted at different levels of ability.

Multilingual curriculum

Specifies subjects that will be taught in either English or the native language(s).

Non-staged assessment

All the assessment components are taken in one examination session.

Partnership in learning

Active and sustained cooperation between individuals and between institutions to achieve clear shared aims and objectives.

Pedagogy

The theory and practice of teaching and learning.

Pre-university qualifications

Provide the preparation and recognition for entry into higher education, e.g. Cambridge International A levels.

Glossary

Professional development (PD)

Teachers continuously and systematically reflect on and improve their professional thinking and practice, engaging in appropriate learning opportunities to improve and upgrade their knowledge and skills.

Programme of study

A planned schedule of teaching and learning activities, relating to the curriculum framework and qualification.

Progression route

Movement of the student from one stage of learning to another in a systematic and planned sequence.

Psychomotor development

Learning and developing skills incorporating physical movement and coordination.

Qualification

The formal certificated recognition of a student's achievement at the end of a particular course, based on successful performance demonstrated through assessed evidence.

Reflective practice

The process through which the teacher continuously learns from the experience of planning, practice, assessment and evaluation and can improve the quality of teaching and learning over time.

Scaffold learning

The teacher provides appropriate guidance and support to enable students to build on their current level of understanding progressively to acquire confidence and independence in using new knowledge or skill.

Scheme of assessment

The set of examination components through which a learner's achievement in relation to a particular qualification is determined.

Scheme of work

A set of planned units of learning relating to a topic, subject or stage.

School curriculum

Refers to the combination of subjects studied within a school year and in sequential years as the learner moves through the educational system provided by the school.

Second language

A language other than the national or official language of a country.

Self-regulation

The ability to monitor and control our own thoughts, emotions and behaviour.

Shared subject curriculum

Students study selected subjects in both the first language and in English which could lead to the awarding of both national and Cambridge qualifications.

Spiral approach

Areas of learning are revisited systematically within a planned curriculum so that the learner can engage in more depth and detail and acquire related knowledge and skills.

Split curriculum

Students study two curricula, some subjects are studied as part of the national curriculum and others as part of an international curriculum.

Staged assessment

Assessments are arranged throughout the period of learning.

Student-centred learning

In designing the learning activities, the teacher focuses on the needs, abilities and interests of the learner in relation to the learning outcomes.

Glossary

Subject curriculum

The content and skills contained within a syllabus applied across sequential stages of student learning. These stages normally refer to school year levels, and therefore a particular age of learner.

Teacher Support

The framework of courses, resources and guidance that Cambridge provides to help teachers develop their understanding of and practice with Cambridge programmes.

Timetable

A schedule listing the times and durations of lessons across a specific period of time, often a week. This is sometimes referred to as the teaching schedule.

Vision

The school's vision is a compelling sense of the future direction of the school that should be widely shared and inspire commitment.

Zone of proximal development

The difference between what a learner can achieve when they receive expert support and what they can achieve independently.

School years and age ranges

In this guide we refer to school years. The table below gives you an idea of how these school years correspond to learner ages from a sample of school systems in different countries.

Age	UK school year system	Malaysia school year system	New Zealand school year system	Pakistan grade system	US grade system
0–4	Nursery/Pre-school	Pre-school playgroup	Early childhood education	Pre-school	Pre-kindergarten 3-4
4–5	Reception	Kindergarten	Early childhood education	Pre-school	Pre-kindergarten 4-5
5–6	Year 1	Kindergarten	Year 1	Grade 1	Kindergarten
6–7	Year 2	Standard 1	Year 2	Grade 2	Grade 1
7–8	Year 3	Standard 2	Year 3	Grade 3	Grade 2
8–9	Year 4	Standard 3	Year 4	Grade 4	Grade 3
9–10	Year 5	Standard 4	Year 5	Grade 5	Grade 4
10–11	Year 6	Standard 5	Year 6	Grade 6	Grade 5
11–12	Year 7	Standard 6	Year 7	Grade 7	Grade 6
12–13	Year 8	Form 1	Year 8	Grade 8	Grade 7
13–14	Year 9	Form 2	Year 9	Grade 8	Grade 8
14–15	Year 10	Form 3	Year 10	Grade 9	Grade 9
15–16	Year 11	Form 4	Year 11	Grade 10	Grade 10
16–17	Year 12	Form 5	Year 12	Grade 11	Grade 11
17–18	Year 13	Form 6	Year 13	Grade 12	Grade 12

Cambridge IGCSE subjects with alternative courses

The list below details the subjects we offer with a number of alternative courses. For example, in mathematics we offer a Cambridge IGCSE with an investigation paper and one without. This flexibility means you can select the course that best meets your learners' needs. Some of our alternative subject courses have particular restrictions (barred combinations) when it comes to the exams.

Cambridge IGCSE science courses
Cambridge IGCSE Combined Science
Cambridge IGCSE Co-ordinated Sciences (Double award)
Cambridge IGSCE Biology
Cambridge IGSCE Chemistry
Cambridge IGCSE Physics
Cambridge IGCSE Physical Science
Cambridge IGCSE Agriculture
Cambridge IGCSE Environmental Management
Cambridge IGCSE Food & Nutrition
Cambridge O Level science courses
Cambridge O level Physics
Cambridge O level Chemistry
Cambridge O level Biology
Cambridge O level Combined Science
Cambridge O level Agriculture
Cambridge O level Food & Nutrition

Cambridge O Level science courses
Cambridge O level Physics
Cambridge O level Chemistry
Cambridge O level Biology
Cambridge O level Combined Science
Cambridge O level Agriculture
Cambridge O level Food & Nutrition
Cambridge IGCSE mathematics courses
Cambridge IGCSE Mathematics
Cambridge IGCSE Mathematics - Additional
Cambridge IGCSE International Mathematics
Cambridge O Level mathematics courses
Cambridge O Level Mathematics
Cambridge O Level Mathematics - Additional
Cambridge IGCSE computing courses
Cambridge IGCSE Computer Science
Cambridge IGCSE Information and Communication Technology
Cambridge O Level computing courses
Cambridge O Level Computer Science

For a full list of the subjects, including different language options, we offer across our programmes and qualifications please see the latest Cambridge prospectus available at www.cambridgeinternational.org

Student Self-Efficacy Questionnaire

Read the statements below and circle the response that best describes you. Be honest.
There are no right or wrong answers. Please keep for reference at a later date.

Student name: Class: Date:

	0 = Not like me at all 1 = A little like me		2 = Like me 3 = A lot like me	
1. I can learn what is taught in the class.	0	1	2	3
2. I can succeed at anything if I try hard enough.	0	1	2	3
3. If I practised every day, I could develop any skill.	0	1	2	3
4. Once I have decided to accomplish something that is important to me, I keep trying, even if it is harder than I originally thought.	0	1	2	3
5. I am confident that I will achieve the goals that I set for myself.	0	1	2	3
6. When I am struggling and taking longer to complete something that I find difficult, I focus on my learning and change approach, instead of feeling discouraged	0	1	2	3
7. I will succeed in whatever career path I choose.	0	1	2	3
8. I will succeed in whichever college/university course I choose.	0	1	2	3
9. I believe hard work always pays off in the end.	0	1	2	3
10. My ability/capacity grows with effort and hard work I am prepared to put in.	0	1	2	3
11. I believe that the brain can be developed, just like a muscle.	0	1	2	3
12. I think that, no matter who you are, you can significantly improve your level of capability.	0	1	2	3
	Total =			

Glossary

i. Ability: talent, skill, or proficiency in a particular area.
ii. Goal: the object of a person's ambition or effort; an aim or desired result.
iii. Skill: the ability to do something well; expertise.
iv. Capability: the power or ability to do something.

Teacher Self-Efficacy Questionnaire

Read the statements below and circle the response that best describes you. The statements have been phrased to encourage you to think about your current approach or attitude towards them. Be honest, therefore, and, remember, there are no right or wrong answers. Please retain for reference at a later date.

Teacher name: Date:

	0 = Nothing 1 = Some influence		
1. How much, in your current practice, do you feel you can support the students in your class that are having the most difficulty?	0	1	2
2. How much, in your current practice, do you feel you can help your students think critically?	0	1	2
3. How much, in your current practice, do you feel you can motivate students who show little or no interest in school work?	0	1	2
4. How much, in your current practice, do you feel you can help students believe they can do well in school work?	0	1	2
5. How well, in your current practice, do you feel you respond to difficult questions from your students?	0	1	2
6. How much, in your current practice, do you feel you can help your students value learning?	0	1	2
7. How much, in your current practice, do you feel you can gauge/measure student understanding of what you have taught?	0	1	2
8. To what extent, in your current practice, do you feel you can craft effective questions for your students?	0	1	2
9. How much, in your current practice, do you feel you can do to foster student creativity?	0	1	2
10. How much, in your current practice, do you feel you can do to improve the understanding of a student who is struggling?	0	1	2
11. How much, in your current practice, do you feel you can do to adjust your lessons to the appropriate level for individual students?	0	1	2
12. To what extent, in your current practice, do you feel you can use a variety of assessment strategies?	0	1	2
13. To what extent, in your current practice, do you feel you can provide an alternative explanation when students are confused?	0	1	2
14. How much, in your current practice, do you feel you can assist families in helping their children do well in school?	0	1	2
15. How well, in your current practice, do you feel you can implement a variety of active learning strategies?	0	1	2
16. How well, in your current practice, do you feel you can provide appropriate challenges for high-achieving students?	0	1	2
	Total =

Cambridge Standard Terms of School Registration

1 Length of Agreement

1.1 The agreement between the District with respect to the School and Cambridge (the "**Agreement**") will come into effect on the Commencement Date. It is understood that any rights or privileges granted under this Agreement are granted to the District solely with respect to the School, and not with respect to any other schools or facilities administered, controlled or owned by the District.

1.2 The Agreement will continue until and including the first 30th of September after the Commencement Date (the "**Initial Term**") whereupon, subject to Clause 1.4, it shall continue thereafter for a further period of twelve (12) months from the 1st of October in that and each subsequent year, unless terminated earlier in accordance with Clause 12. Each subsequent year following the Initial Term shall constitute a separate term (the "**Extended Term**") and separate agreement. In no event may this Agreement be extended beyond the maximum term, if any, permitted for contracts of this type under applicable law.

1.3 Cambridge may, at its sole discretion, issue new Cambridge Standard Terms of School Registration at the commencement of each [1] Extended Term, which shall become the governing terms of this Agreement. The District shall be entitled to reject the new Agreement by written notice to Cambridge within thirty (30) days of the date of publication of such new Cambridge Standard Terms of School Registration, and this Agreement shall terminate immediately upon receipt of such notice. Should Cambridge not receive any such written notice within thirty (30) days of the date of publication of such new Cambridge Standard Terms of School Registration, the new amendments shall be deemed accepted.

1.4 For the avoidance of doubt, if a School fails to meet the registration quality standards for a School, as may be defined by Cambridge from time to time, Cambridge may at its discretion choose either (a) withdraw registration from the School not meeting quality standards, while continuing registration for any other School within the District that continues to meet quality standards, all without terminating this Agreement (b) not to renew this Agreement at the inception of each renewal or (c) to terminate this Agreement earlier in accordance with Clause 12.

1.5 [2] This Agreement contains the entire agreement between the District and Cambridge and

The provisions of the Handbook are hereby fully incorporated into and form part of the Agreement.. Per Email 12/2/25

supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between them, whether written or oral, relating to its subject matter, and the provisions of the following documents, as may be amended from time to time without notice by Cambridge (or by CEM in the case of the CEM EULA), are hereby fully incorporated into and form part of the Agreement:

1.5.1 terms of this Agreement (the "**Terms**")

1.5.2 the Handbook;

1.5.3 the Letter of Approval and any addenda or annexes thereto;

1.5.4 the relevant Fees List;

1.5.5 if any Learners are to take CEM assessments, the CEM End-User Licence Agreement for Monitoring Systems (the "CEM EULA") will apply. The CEM EULA can be accessed through the following hyperlink: https://www.cem.org/gdpr . Accessing and using the CEM assessments will be considered acceptance of the CEM EULA; and,

1.5.6 such other regulations, policies, and notices as issued by Cambridge from time to time.

1.6 If for any reason Cambridge has not issued the District with any of the documents listed in Clause 1.5, the District must contact Cambridge immediately for a replacement.

1.7 Each party agrees that it shall have no remedies in respect of any statement, representation, assurance or warranty (whether made innocently or negligently) that is not set out in this Agreement. Each party agrees that it shall have no claim for innocent or negligent misrepresentation or negligent misstatement based on any statement in this Agreement.

1.8 These standard terms will be interpreted in accordance with Clause 18.

2 Obligations of the District

2.1 The District confirms it has received, read and understood the materials listed in Clause 1.5 prior to the Agreement being formed.

2.2 The District represents and warrants to Cambridge that (a) it has provided to Cambridge all available written materials and guidance regarding procurement policies applicable to the District, and (b) it has complied with requirements and procedures to be complied with or performed by the District related to procurement and in particular related to competitive bidding and exemptions thereto.

2.3 The District will:

2.3.1 carry out its obligations as set out in the Agreement, ~~including all documents referred to in Clause 1.5, and~~ in particular will carry out the duties of a Centre, with respect to the School, as set out in the Handbook;

2.3.2 hold and administer the Syllabuses and Assessments at the School's Premises in accordance with the Agreement and in particular, the Handbook;

2.3.3 obey Cambridge's reasonable instruction in particular in relation to security arrangements relating to Assessments and the administration of Assessments generally;

2.3.4 not engage in any conduct which, in the opinion of Cambridge is or could be prejudicial to the business or marketing of Cambridge's products and services;

2.3.5 obtain and keep in place the relevant licenses and permissions necessary in the country and region in which the District or School is located in order to perform its obligations under the Agreement; and,

2.3.6 comply with all laws, statutes, and regulations of a governmental nature applicable in the country and region in which the District or School is located relating to the operation of the School and the administration of the Assessments; and

2.3.7 comply with all policies as issued by Cambridge from time to time, including without limitation any policies on data protection, child protection, health and safety and fire safety.

2.4 The District is not entitled to offer the Syllabuses or the Assessments to any school or facility administered, controlled or owned by the District, other than the School, nor to any third party directly or through any sales agent, school, sub-licensee or third party.

2.5 In the event of a breach of Clause 2.3, Cambridge will have, without prejudice to any other right or remedy available to it in law or in equity, the right to treat this as a material breach incapable of remedy for the purposes of Clause 12.2.

2.6 The District will provide Cambridge with a full list of all the School's Premises within fourteen (14) days of the Commencement Date and will not be entitled to offer the Syllabuses or the Assessments at any other location without Cambridge's prior written permission.

2.7 ~~The District acknowledges that Cambridge shall list the School and the approved School's Premises as a Cambridge International School and/or Cambridge Early Years Centre (as applicable) on Cambridge's external website, to enable prospective parents to view all~~

Per Section 20 of the Sample Contract

approved Cambridge Schools.

2.8 The District will supply Cambridge and its Representatives with such information and support as may be reasonably required by Cambridge, and without cost to Cambridge, and allow Cambridge and its Representatives to audit and inspect extracts of the records and files of the District in relation to the School in such manner as Cambridge sees fit for the purpose of ensuring the District is complying with its obligations under the Agreement.

2.9 The District will permit Cambridge and its Representatives to enter and conduct inspections in accordance with the Handbook.

2.10 In the event that the District withdraws from its role in delivering an Assessment, the District shall take all reasonable steps to protect the interests of Learners.

3 Rights and Obligations of Cambridge

3.1 ~~Cambridge will provide the Services for the duration of the Agreement in accordance with the terms of the Agreement. Cambridge warrants that the Services will conform to this Agreement and the Handbook.~~

3.2 ~~Cambridge may list details of the School (including the School's full name and the physical address at all of the School's Premises) on Cambridge's external website. The list shall contain details of all Cambridge International Schools and Cambridge Early Years Centres registered with Cambridge from time to time.~~

3.3 Cambridge will be entitled at its absolute discretion, and without liability to the District, to alter the form, style, content or substance of the Syllabuses, Assessments, Qualifications and Certificates.

3.4 ~~Cambridge will be entitled at its sole discretion and at any time to alter any of the documents set out in Clause 1.5.~~

3.5 ~~Cambridge shall benefit from the rights set out in this Agreement, and in particular those rights set out in the Handbook.~~

4 Payment

4.1 ~~The District will pay the Fees to Cambridge in accordance with this Clause 4.~~

4.2 ~~The District shall:~~

4.2.1 ~~pay all fees as stated on the Fees List;~~

4.2.2 ~~pay for any additional services purchased through any password-protected Cambridge website; and~~

4.2.3 ~~pay any fees in respect of any invoices that Cambridge issues to the District from time to~~

Add- The District will comply providing that Cambridge is in compliance with insurance requirements and Tennessee Code Annotated, 49-5-413.

Number: 5 Author: Rachel Cabrera Subject: Cross-Out Date: 10/29/2025 9:28:47 AM -04'00'

time, in accordance with the terms of the invoice.

4.3 The District agrees to pay all invoices from Cambridge by the due date identified on the invoice unless no such date is stated on the invoice, in which case, the District shall pay the invoice within thirty (30) days of the invoice date.

4.4 The Fees List may be published by Cambridge on CIE Direct, emailed to the District or provided in hard copy. In all cases, this will be deemed sufficient notice to the District of the Fees contained in the Fees List.

4.5 If the District fails to pay any sum due by the due date then Cambridge will be entitled, without prejudice to any other right or remedy it may have, to:

4.5.1 cancel or suspend the delivery of the Services, provided Cambridge will have given fourteen (14) days written notice thereof; and,

4.5.2 charge the School interest at a rate of eight per cent (8%) above the Bank of England's base rate per annum from time to time or the maximum rate permitted by applicable law, whichever is less, payable daily from the date payment was due until payment is made; or

4.5.3 terminate the Agreement.

4.6 The District will make all payments in such manner as may be agreed in writing by Cambridge and the District from time to time or if no such agreement is stated, then by electronic transfer to such bank account as may be notified by Cambridge to the District from time to time.

4.7 The parties agree that the District will bear all costs that are due or payable to any national, provincial or municipal authority in relation to the Agreement.

4.8 Each payment payable to Cambridge hereunder will be paid by the District without any right of set-off or deduction for any Taxes.

4.9 In the event that the District is obliged to withhold any part of the sums due to Cambridge, including but not exclusively for tax, the amount of the payment due to Cambridge will be increased such that the sum received by Cambridge will be that which it would have received had there been no such withholding.

4.10 Notwithstanding Clauses 4.8 and 4.9, the District will:

4.10.1 remit to the appropriate tax authorities, in a timely manner, all Taxes required to be withheld from payment to Cambridge; and,

4.10.2 provide Cambridge with an official receipt

Number: 1 Author: Rachel Cabrera Subject: Cross-Out Date: 10/29/2025 9:29:07 AM -04'00'

issued by such authorities for payment of such Taxes within thirty (30) days of such payment.

4.11 For the avoidance of doubt, any delay (regardless of how long) by Cambridge in issuing any invoice to the District will not limit or extinguish Cambridge's right against the District to recover any unpaid Fees or other charges due to Cambridge.

5 Data Protection

5.1 For the purposes of this Agreement, the District is engaging Cambridge as a "**School Official**", as defined in 34 CFR § 99.31(a)(1)(i)(B), to perform the Services on behalf and at the direction of the District. In view of the foregoing, and in relation to the provision of the Services, the District may provide, or direct Cambridge to receive or create documents or data that may include Personal Information of Learners such as records, files, or other Learner Data that could, alone or combination, identify an individual Learner (collectively "**Educational Records**"). As used in this Agreement, the term Educational Records does not include data, documents, or other information that has been de-identified, or is, or has been rendered, anonymous.

5.2 The District is the controller of the Educational Records processed by Cambridge for the purposes of providing the Services as a School Official under this Agreement, and, as controller of such data, the District is responsible for providing any documents, data, or information required for the performance of the Services in a manner that complies with applicable data protection laws. In addition to the above, each Party undertakes that it will comply with all applicable federal and local student data privacy laws in the processing of Learner Data or Educational Records as may be required for the performance of its obligations under this Agreement, including the Family Educational Rights and Privacy Act.

5.3 Notwithstanding the foregoing, Cambridge will also comply with the United Kingdom Data Protection Act 1998, 2018 and the General Data Protection Regulations (EU) 2016/679 (together, the "**Data Protection Legislation**") in the processing of Personal Information, as well as "**Personal Data**" and "**Sensitive Personal Data**" each as defined in the Data Protection Legislation, insofar as such processing is subject to the Data Protection Legislation and is necessary in order for Cambridge to fulfil its obligations under the Agreement. Further, Cambridge will comply with the provisions regarding data protection contained within the Handbook.

5.4 All Learner Data and Educational Records are and will remain the property of the District. In its role as a School Official, Cambridge will receive, collect, and use such data under the control and direction of the District for the

Number: 1 Author: Rachel Cabrera Subject: Cross-Out Date: 10/29/2025 9:29:30 AM -04'00'

purpose of providing the Services and otherwise fulfilling its obligations under this Agreement.

5.5 Cambridge is prohibited from selling Learner Data or Educational Records, or otherwise using or disclosing the same to third parties for advertising or general commercial purposes. Further, Cambridge will not disclose Learner Data or Educational Records to any third parties unless or until directed to do so by the District or a Learner. Cambridge will notify the District of any third party requests for access to Learner Data or Educational records, and will refer any such third party requests to the District. The District will fully co-operate and provide all assistance reasonably requested by Cambridge in order to enable Cambridge to respond to any third party request for access to Learner Data or Educational Records, including requests made under the Data Protection Legislation. The obligations in this Clause will continue following termination of this Agreement however caused. Cambridge is authorized to share Learner Data with Learners, and in the case of minors, with Learner's legal guardians subject to applicable law. Cambridge is authorized to send Learner Data to certain scholarship-awarding institutions, universities, colleges or other higher education institutions at the request of Learner, and in the case of minors, at the Learner's legal guardian's request.

5.6 Notwithstanding the above, Cambridge may use or disclose de-identified or anonymous data for the purposes of research, development, and improvement of the Services. In such case, Cambridge agrees that it (a) will not attempt to re-identify any de-identified or anonymous data, and (b) will not disclose any de-identified or anonymous data to any third party unless that third party has agreed in writing not to attempt to re-identify the de-identified or anonymous data.

5.7 Each Party will use commercially reasonable efforts to secure all Learner Data and Educational Records in its possession or control, including ensuring that persons handling such data have sufficient skills, training, and authorization to do so. Further, each Party will (a) promptly notify the other if it becomes aware of or suspects any unauthorized use or disclosure of the Learner Data or Educational Records in either Party's possession or control, and (b) will assist the other Party in any efforts to investigate and respond to any such unauthorized access or use as is reasonably necessary.

5.8 Cambridge is entitled to terminate this Agreement on notice if the District breaches any of its obligations in this Clause.

5.9 The provisions of this Clause survive

Number: 1 Author: Rachel Cabrera Subject: Comment on Text Date: 11/3/2025 11:31:24 AM
Change- Either party is entitled to terminate this Agreement on notice if there is a breach in any of its obligations in the Clause.

termination or expiry of this Agreement.

6 Marketing of the Syllabuses and Assessments

6.1 The District may promote and market the Syllabuses and the Assessments within the geographical boundaries of such District according to the terms set out in the Handbook as amended from time to time or in such manner as Cambridge may reasonably agree.

6.2 In connection with the promotion and marketing of the Syllabuses and the Assessments, the District will:

6.2.1 make clear, in all its dealings, and in particular with parents, Learners and prospective Learners, its relationship with Cambridge, including that the District is not acting as an agent for Cambridge;

6.2.2 provide Cambridge with copies of updates to any promotional materials containing reference to Cambridge or the Assessments (with accompanying English translation where the materials are created in any other language) prior to use;

6.2.3 limit any promotional material containing reference to Cambridge or the Assessments to those Qualifications specified and authorised by Cambridge for the District to offer; and

6.2.4 ensure that all such promotion and marketing complies with this Clause 6.

7 Publicity and Branding

7.1 The District and its Staff shall not, other than in accordance with the Handbook or otherwise without the prior written consent of Cambridge, use Cambridge's name or brand in any promotion or marketing or announcement or the endorsement of the Services.

7.2 In the event of a breach of this Clause 7, Cambridge will have, without prejudice to any other right or remedy available to it in law or in equity, the right to treat this as a material breach incapable of remedy for the purposes of Clause 12.2.1

8 Intellectual Property

8.1 The District acknowledges and agrees that all Intellectual Property Rights in the name Cambridge Assessment, Cambridge Assessment International Education, Cambridge English Language Assessment, University of Cambridge, and all associated symbols, markings and logos, and in the Syllabuses, Assessments, Certificates, Courses, Qualifications, Materials and any other data or other documents or information produced or owned by Cambridge are and will remain vested in Cambridge.

8.2 The District may not reproduce the

Assessments, Syllabuses or Materials except as specifically authorised by Cambridge.

8.3 The District acknowledges and agrees that the licence to use Cambridge Intellectual Property Rights as set out in the Handbook is limited to the programmes and Qualifications specified in the ~~Letter of Approval~~ and for no other purpose.

8.4 The District acknowledges and agrees that the word "Cambridge" in the context of education is synonymous and associated with Cambridge Assessment International Education and its parent undertaking, namely Cambridge University Press & Assessment, a division of the University of Cambridge, and that by entering into the Agreement, the District expressly and specifically assigns any interest it has or may have in the word or use of "Cambridge" to Cambridge.

8.5 The District will not use Cambridge's Intellectual Property Rights or the Cambridge Marks generally, other than as expressly provided in the Handbook.

8.6 In the event that the District fails to comply with this Clause 8, Cambridge may terminate the Agreement by notice in writing with immediate effect and may at its option, seek injunctive relief or damages.

9 Confidentiality

9.1 All Confidential Information will remain the property of Cambridge, and all Educational Records will remain the property of the District. At the expiration or termination of this Agreement, the District shall return all Confidential Information to Cambridge, together with all copies and translations thereof, and Cambridge will return all Educational Records and Learner Data to the District, except that Cambridge may retain certain copies thereof for the purposes of assessment validation as well as providing such Educational Records or Learner Data, at the direction of the District, to third parties including but not limited to colleges, universities, or other institutions for admissions purposes.

9.2 The District will not during the duration of the Agreement nor thereafter disclose or use any Confidential Information save to the extent as may be reasonably necessary for the fulfilment of its duties and obligations under the Agreement or as may be required by law.

9.3 Except as it may be directed to do so by the District, and in accordance with Clause 5, above, during the duration of this Agreement and continuing thereafter, Cambridge will not disclose any Learner Data or Educational Records publicly or to any third party except where such disclosure is reasonably necessary

Number: 1 Author: Rachel Cabrera Subject: Cross-Out Date: 10/29/2025 9:30:40 AM -04'00'
Contract

for Cambridge to fulfil its duties and obligations under this Agreement, or as may be required by law.

9.4 The District will not, either from the date of the Agreement and any time thereafter, divulge or communicate or permit to be disclosed or communicated to any unauthorised person, company, business entity, the media/social media or any other organisation or person, any aspect of any complaint, investigation or corrective action involving or taken by Cambridge or any other Confidential Information.

10 Freedom of Information

10.1 The parties acknowledge that Cambridge is subject to the requirements of the UK Freedom of Information Act 2000 as amended from time to time (the "FOIA") and the District agrees that it shall provide all necessary assistance as may be reasonably requested by Cambridge at its own expense to enable Cambridge to comply with its obligations under the FOIA.

10.2 Notwithstanding the generality of Clause 10.1, the District shall provide Cambridge within 5 Business Days of receipt of a request for assistance with such information in its possession or power as may be reasonably requested in order to assist Cambridge to comply with its obligations under the FOIA.

11 Indemnity and Liability

~~11.1 The District shall, to the maximum extent permitted by applicable law, defend, indemnify and keep indemnified Cambridge and its officer, directors, employees and agents from and against all claims, demands, actions and proceedings made or brought against Cambridge and all damages, losses (including loss of profit and loss of reputation, loss or damage to property, injury to or death of any person and loss of opportunity to deploy resources elsewhere), expenses, liabilities, judgements, settlements, damages and costs (including interest, penalties and legal and other professional costs and expenses) whether or not foreseeable at the date of entering into this Agreement incurred or suffered by Cambridge as a direct or indirect result of any act or omission of, negligence of or breach of the Agreement by the District or its or their Representatives.~~

~~11.2 The District shall, to the maximum extent permitted by applicable law, indemnify Cambridge from and against all local, municipal, county and state taxes to which Cambridge becomes subject as a result Cambridge entering into and performing its obligations under this Agreement, excluding only taxes levied on net income.~~

~~11.3 The District shall be solely responsible for ensuring it fully complies with any and all~~

Number: 2 Author: Rachel Cabrera Subject: Comment on Text Date: 11/3/2025 11:35:04 AM

Add- Providing that the request does not violate the Family Educational Rights and Privacy Act (FERPA).

requirements of any applicable national, regional or municipal regulation, legislation and procedure regarding all matters concerning this Agreement and Cambridge shall in no way be held liable for breaches by the District of any such requirements and, in any case, the District agrees irrevocably and unconditionally to indemnify Cambridge in full and on demand and keep Cambridge so indemnified in respect of all consequences of the District's non-compliance with any such requirements.

11.4 Should the District fail to comply with the requirements of Clause 11.2 Cambridge has the right to immediately terminate this Agreement.

11.5 SUBJECT TO CLAUSE 11.6, CAMBRIDGE SHALL NOT BE LIABLE TO THE DISTRICT FOR:

11.5.1 LOSS OF PROFIT OR REVENUE;

11.5.2 LOSS OF DATA;

11.5.3 LOSS OR REDUCTION OF ANTICIPATED SAVINGS;

11.5.4 LOSS OF OR DAMAGE TO GOODWILL;

11.5.5 LOSS OF OR DAMAGE TO REPUTATION;

11.5.6 LOSS OR RESTRICTION OF OPPORTUNITY; OR

11.5.7 ANY CONSEQUENTIAL OR INDIRECT LOSS OR DAMAGE, COSTS OR EXPENSES WHATSOEVER, HOWSOEVER ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT,

WHICH IS SUFFERED OR INCURRED BY THE DISTRICT AS A RESULT OF ANY BREACH BY CAMBRIDGE OF THE TERMS OF THIS AGREEMENT.

11.6 Nothing in this Agreement shall limit or exclude either party's liability for circumstances where liability may not be so limited by law.

11.7 SUBJECT TO CLAUSE 11.6, THE TOTAL LIABILITY OF CAMBRIDGE TO THE DISTRICT UNDER OR IN CONNECTION WITH THIS AGREEMENT, WHETHER ARISING IN CONTRACT, TORT, NEGLIGENCE, BREACH OF STATUTORY DUTY OR OTHERWISE SHALL NOT EXCEED THE SUM OF $10,000.

11.8 The payments due under this Agreement have been negotiated and agreed on the basis that Cambridge may limit its liability to the District as set out in this Agreement and the District confirms that it shall itself bear or insure against any loss for which Cambridge has limited its liability under this Agreement.

Number: 1 Author: Rachel Cabrera Subject: Cross-Out Date: 10/29/2025 9:36:47 AM -04'00'

11.9 EXCEPT AS EXPRESSLY SET OUT IN SECTION 3.1 OF THIS AGREEMENT, ALL WARRANTIES, CONDITIONS, TERMS AND UNDERTAKINGS, EXPRESS OR IMPLIED, WHETHER BY STATUTE, COMMON LAW, CUSTOM, TRADE OR USAGE, COURSE OF DEALINGS OR OTHERWISE, INCLUDING AS TO QUALITY, PERFORMANCE OR FITNESS OR SUITABILITY FOR PURPOSE, IN RESPECT OF ANY SERVICE TO BE PROVIDED BY CAMBRIDGE UNDER THIS AGREEMENT ARE EXCLUDED TO THE FULLEST EXTENT PERMITTED BY LAW.

12 Termination

12.1 Either party is entitled to terminate the Agreement immediately by written notice to the other if:

12.1.1 an event occurs that is expressed to be a terminable event under this Agreement, including but not limited to a Force Majeure event;

12.1.2 an encumbrancer takes possession or a receiver is appointed over any of the property or assets of the other party;

12.1.3 the other party makes any voluntary arrangement with its creditors or becomes subject to an administration order, voluntarily files or acquiesces in the filing of a petition for bankruptcy or an involuntary petition is filed against the other party which is not dismissed within 60 days thereafter;

12.1.4 the other party goes into liquidation (except for the purposes of an amalgamation or reconstruction and in such manner that the institution resulting therefrom effectively agrees to be bound by or assume the obligations imposed on the other party under the Agreement);

12.1.5 anything analogous to any of the foregoing under the law of any jurisdiction occurs in relation to either of the parties; or,

12.1.6 the other party ceases, or threatens to cease, to carry on business.

12.2 Cambridge will be entitled to terminate the Agreement immediately by written notice to the District if:

12.2.1 the District commits a material breach of the Agreement, which Cambridge in its reasonable opinion deems incapable of remedy, or in the case of a breach capable of remedy, the District fails to remedy the same within thirty (30) days after receipt of a written notice giving full particulars of the breach and requiring it to be remedied;

12.2.2 the District is subject to any governmental

Number: 1 Author: Rachel Cabrera Subject: Cross-Out Date: 10/29/2025 9:36:57 AM -04'00'

authority intervention or permission that is subsequently withdrawn or revoked during the duration of the Agreement;

12.2.3 the District or its Staff in any way bring into disrepute, or act in any way that Cambridge reasonably feels might bring into disrepute, the name, reputation and interests of Cambridge, its employees, directors, officers, other people associated with Cambridge, or its products or services;

12.2.4 the District fails to administer the Assessments or examinations in accordance with Cambridge's regulations or suffers a serious security breach compromising the integrity of Cambridge's examinations, or otherwise fails to act in accordance with the Handbook;

12.2.5 the District fails to pay any bill from Cambridge within thirty (30) days of the invoice date;

12.2.6 the District at any time challenges the validity of the Intellectual Property Rights of Cambridge or the University of Cambridge; or,

12.2.7 at any time there is a material change in the membership of the School or District which in the reasonable view of Cambridge materially affects the ability of the District to perform its obligations under the Agreement or where the change in membership is as a result of a competitor of Cambridge obtaining an interest in the School.

12.3 Either party may terminate the Agreement at any time by giving six (6) months' notice in writing.

12.4 Any waiver by either party of breach of any provision of the Agreement will not be considered as a waiver of any subsequent breach of the same or any other provision thereof.

12.5 The rights to terminate the Agreement given by this Clause 12 will be without prejudice to any right or remedy of either party in respect of the breach concerned (if any) or any other breach.

13 Consequences of Termination

13.1 Upon termination of the Agreement for any reason:

13.1.1 outstanding monies due by one of the parties to the other will become immediately payable by the other;

13.1.2 each party will honour any outstanding services due to the other at the date of termination;

13.1.3 any Clauses which expressly or by implication have effect after termination will continue in full force and effect, including Clauses 2.2.3, 6, 7, 8, 9, 10, 11 and 13;

13.1.4 all licences granted hereunder will terminate

Number: 1 Author: Rachel Cabrera Subject: Cross-Out Date: 10/29/2025 9:37:26 AM -04'00'

and the District shall immediately remove all reference to Cambridge or Cambridge Marks from its literature and cease to refer to itself as a Cambridge International School or Cambridge Early Years Centre;

13.1.5 the District shall return all property and equipment belonging to Cambridge, including but not limited to any plaques and certificates of registration and all Confidential Information; and,

13.1.6 subject as otherwise provided herein and to any rights or obligations which may have accrued prior to termination, neither party will have any further obligation to the other under the Agreement.

13.2 The District will not make any attempt to register Entries after either party has given written notice of termination of the Agreement, including for the avoidance of doubt, notice of termination under Clause 12.3.

14 Changes to the Agreement

14.1 Cambridge reserves the right to alter the Handbook and any of its other documentation, with any changes taking immediate effect unless otherwise stated. Cambridge will use reasonable endeavours to communicate any such changes to the District but for the avoidance of doubt, any delay or failure to do so will not delay or invalidate the coming into effect of such changes.

15 General

15.1 The District shall:

15.1.1 comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and anti-corruption ("**Relevant Requirements**");

15.1.2 not engage in any activity, practice or conduct which would violate the Relevant Requirements;

15.1.3 have and shall maintain in place throughout the term of this Agreement its own policies and procedures, including but not limited to adequate procedures, to ensure compliance with the Relevant Requirements and will enforce them where appropriate; and

15.1.4 promptly report to Cambridge any request or demand for any undue financial or other advantage of any kind received by the District in connection with the performance of this

Number: 1	Author: Rachel Cabrera	Subject: Cross-Out	Date: 10/29/2025 9:37:42 AM -04'00'
Number: 2	Author: Rachel Cabrera	Subject: Cross-Out	Date: 10/29/2025 9:39:12 AM -04'00'

Agreement,

and breach of this Clause 15.2 shall be deemed a material breach incapable of remedy under Clause 12.2.1.

15.2 The District will not be entitled to perform any of its obligations through any other company or entity or to assign, mortgage, charge or dispose of any of its rights hereunder, or sub-contract or otherwise delegate any of its obligations hereunder.

15.3 The District will ensure that that it does not hold itself out in any way as acting as an agent or representative of Cambridge, including in any agreements or communications with third parties.

15.4 If either party is affected by Force Majeure it will notify the other party immediately of the nature and extent of the Force Majeure and neither party will be deemed to be in breach of the Agreement by reason of any delay in performance, or non-performance, of any of its obligations hereunder to the extent that such delay or non-performance is due to any Force Majeure notified the other party, and the time for performance of that obligations will be extended accordingly. Should the Force Majeure event continue in excess of thirty (30) consecutive or cumulative days, either party may terminate with immediate effect.

15.5 ~~The Agreement supersedes all previous agreements and understandings between the parties with respect to its subject and may not be modified except by an instrument in writing signed by the duly authorised representatives of the parties.~~

15.6 Each party acknowledges that in entering into the Agreement, it does not do so on the basis of, and does not rely on, any representation or warranty or other provision except as expressly provided herein. However, nothing in the Agreement purports to exclude liability for any fraudulent statement or act.

15.7 Nothing contained in the Agreement will be construed to imply a partnership, or employer and employee or principal and agent relationship between the parties and neither party will have any right, power or authority to create any obligations, express or implied on behalf of the other.

15.8 No person who is not party to the Agreement will have any right enforce any terms of the Agreement, except for parties entitled hereunder to indemnity.

15.9 Each party warrants to the other party that it has full power and authority to enter into the Agreement.

15.10 A party's failure to exercise or delay in exercising a right or remedy provided by the

Number: 1 Author: Rachel Cabrera Subject: Cross-Out Date: 10/29/2025 9:40:38 AM -04'00'

Agreement or by law does not constitute a waiver of the right or remedy or a waiver of other rights or remedies; a waiver of a breach of any of the terms of the Agreement or of a default under the Agreement does not constitute a waiver of any other breach or default and will not affect the other terms of the Agreement and a waiver of a breach of any of the terms of the Agreement or of a default under the Agreement will not prevent a party from subsequently requiring compliance with the waived obligation.

15.11 If any provision of the Agreement will be held to be unlawful, invalid or unenforceable, in whole or in part, under any enactment or rule of law, such provision or part will to that extent be severed from the Agreement and rendered ineffective as far as possible without modifying or affecting the legality, validity or enforceability of the remaining provisions of the Agreement which will remain in full force and effect.

16 Law and Jurisdiction

16.1 ~~This Agreement shall be interpreted and construed in accordance with and governed by the laws of the United States of America and the State of New York without regard to its conflict of laws provisions. In the event of an inconsistency between the laws of the United States of America and the State of New York, the laws of the United States of America shall govern this Agreement. Any controversy or claim arising out of or relating to this contract, or the breach thereof, shall be settled by arbitration located in New York, NY administered by the American Arbitration Association in accordance with its Commercial Arbitration Rules, and judgment on the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof.~~

16.2 ~~The District hereby expressly and irrevocably grants a limited waiver of sovereign immunity for the purposes of resolving any dispute arising from this Agreement, whether arising from an alleged breach of contract, or alleged tortious conduct, or otherwise.~~

"**Commencement Date**" means the date that Cambridge receives cleared funds in its bank account for the payment of the registration programme fee from the District;

"**Confidential Information**" means any information which has been designated as confidential by Cambridge or that ought to be considered confidential (however it is conveyed or on whatever media it is stored) including information that relates to the business, affairs, properties, assets, trading practices, services,

	developments, trade secrets, Intellectual Property Rights, know-how, personnel, contractors and suppliers of Cambridge and all personal data and sensitive personal data within the meaning of the Data Protection Legislation;
"**District**"	means the school district party to this Agreement, acting through its school board or other duly constituted governing authority;
"**Entry**"	means a Learner submitted for a Qualification;
"**Extended Term**"	means each separate period following the Initial Term that runs from 1 October to 30 September each year and for the entirety of the year unless terminated earlier in accordance with these terms;
"**Fees**"	means sums payable by the District to Cambridge for the provision of the Services and that will be described in the Fees List;
"**Fees List**"	means the list of Fees applicable to the District as provided by Cambridge and amended from time to time;
"**Force Majeure**"	means, in relation to either party, any circumstance beyond the reasonable control of that party including (insofar as beyond such control but without prejudice to the generality of the foregoing expression), without limitation any strike, lock-out or other form of industrial action, war, riot, civil commotion, malicious damage, compliance with law or governmental order, rule, regulation or direction, accident, breakdown of plant or machinery, fire, flood, storm or Act of God;
"**Handbook**"	means the Cambridge publication entitled "Cambridge Handbook", which sets out the rules for administering Cambridge Qualifications and

	Assessments and the obligations between Cambridge and schools, as amended by Cambridge from time to time. If the School is approved by Cambridge to offer Cambridge Early Years, the term 'Handbook' will also refer to the 'Cambridge Early Years Handbook' which would be applicable to that programme in place of the standard 'Cambridge Handbook';
"**Intellectual Property Rights**"	means all intellectual property rights throughout the world for the full term of the rights concerned, including, in the case of Cambridge, the Cambridge Marks, whether or not registered and whether or not registrable, including without limitation copyright, database rights, patents, rights in inventions, know-how and technical information, design rights, design patents, registered designs, trade marks (including business and brand names, domain names, devices and logos) and the right to apply for any of the foregoing anywhere in the world;
"**Learner**"	means a candidate for a Qualification entered through aSchool or, if the School is approved to offer Early Years (and as applicable in the context of this Agreement), a child enrolled for the Early Years programme;;
"**Learner Data**"	means any data created, collected, or provided, by the District, Cambridge, a Learner, or a Learner's parent(s) or guardian(s), that is descriptive of or could otherwise be used to identify a Learner, except that anonymous or de-identified data does not constitute Learner Data;
"**Letter of Approval**"	means the School Approval letter identified on its face as such which is sent by Cambridge to the District confirming which Schools are deemed registered;

"**Materials**"	means any administrative materials produced by Cambridge in printed or electronic form, relating to the Syllabuses, Modules or Assessments;
"**Module**"	means a component part of a Qualification;
"**Personal Information**"	means any information which relates to a living individual who can be identified from that information directly, or from that information in combination with other information in the possession of the District or Cambridge;
"**Qualification**"	means a qualification offered by Cambridge to the District so that the District may offer them to Learners at the School;
"**Representative**"	means any agent, officer, employee (whether full- or part-time, permanent, temporary or casual), professional advisor or sub-contractor;
"**School**"	refers to the school or schools that have signed the Letter of Approval, or have otherwise been recognized by Cambridge as approved to offer one or more Qualifications, and will be read as meaning the same as Centre when reading any documents produced by Cambridge that refer to a Centre;
"**School's Premises**"	means premises available to the School, and which are used for the purposes of examination administration;
"**Series**"	means a group of examinations in the same range with the same closing date for entries;
"**Services**"	means those services provided by Cambridge to Districts or to Schools as described in the Cambridge Handbook and made available to the District on a Cambridge password-protected website;
"**Staff**"	means all employees,

	officers, agents, advisors or contractors of the District;
"**Syllabuses**"	means the curriculum content prepared by Cambridge which comprise the Qualifications;
"**Taxes**"	means withholding or other taxes, duties or other amounts.

18.2 The interpretation and construction of the Agreement will be subject to the following provisions:

18.2.1 a reference to any statute, enactment, order, regulation or other similar instrument will be construed as a reference to the statute, enactment, order, regulation or instrument as subsequently amended or re-enacted;

18.2.2 as far as is possible, any Schedule or Appendix to the Agreement will be interpreted consistently with the main body of the Agreement. If there is a conflict between them, the main body of the Agreement will take precedence over any Schedule or Appendix;

18.2.3 the headings to Clauses are for ease of reference only and will not affect the interpretation or construction of the Clauses;

18.2.4 reference to "days" mean ordinary calendar days unless otherwise specified; and,

18.2.5 where the context allows, references to the singular include the plural and vice versa.

18.3 The use of the word 'including', the phrase 'in particular', and similar expressions only illustrate specific examples and are not intended to limit in any way whatsoever the interpretation or construction of the Agreement or any other words in the Agreement.

19 Language

19.1 The Agreement is made only in the English language. If the Agreement is translated into any other language, the English language version shall prevail.

19.2 Any notice, instrument, certificate or other communication given under or in connection with the Agreement will be in the English language, or accompanied by a certified English translation. If such notice, instrument, certificate or other communication is translated into any other language, the English language version shall prevail.

Hi Rachel,

I'd like to check in on the status of the RFP. Do you have an update? Also, I believe I have access to the platform where information for this lies. Can you help me with that too?

Happy New Year by the way 😊

Hi Joette,

Absolutely, and thank you as well for taking the time to meet. I hope we were able to address and clarify your concerns. Per our discussion, I would like to confirm that Cambridge agrees to the sample contract as written. I have updated Sections 1 and 3 in accordance with our conversation. At this point, the start date will remain flexible.

Thank you,

Hi Joette,

My colleague from the Law Department is available on Tuesday, December 16th at 2pm EST to provide any clarifications. Does that time work for you all? I do want to make clear that the County's indemnity language and limitation of liability clauses are non-negotiable and will remain as written. We do not want to waste your time or your legal team's time; however, we are happy to clarify or explain any portions of the document as needed.

Thank you,
Rachel Cabrera

Hi Joette,

I apologize for the delay. We are unable to revise the indemnification language in the sample contract. We have included a provision stating that each party's maximum liability for direct damages will not exceed the amount paid by the District to the Contractor; however, we cannot modify or limit the indemnification owed to the County by the Contractor.

To proceed, Cambridge will need to confirm whether you can accept the indemnification language as presented in the sample contract. If helpful, I would be glad to arrange a meeting with our Law Department and your legal team to discuss this further.

Thank you,

Rachel,

We understand and accept that Knox cannot indemnify Cambridge. As a separate issue, we wonder if the indemnity given by Cambridge can be subject to a cap on liability, rather than being uncapped?

Hi Joette,

Thank you for your prompt response. I have updated the Sample Contract and the redlined Terms and Conditions accordingly.

However, neither the County nor the District has the authority to indemnify a contractor. Therefore, the language in the Sample Contract must remain unchanged in those sections, and this requirement is non-negotiable. If Cambridge is unwilling to accept this language, your proposal will be deemed non-responsive and will no longer be eligible for award.

Thank you,
Rachel Cabrera

Subject: [External]RE: [External]RE: [External]FW: RFP 3688- Exceptions

Hi Rachel,

Thank you again for the message and for the time to communicate with colleagues.

For the termination language, may we suggest the following language: *"Termination of this Agreement shall not affect the ability of any student enrolled at the time of termination to complete their course(s) (including any applicable assessments) pursuant to the terms and conditions in place at enrollment. The provisions of the Handbook and all applicable fees shall continue to apply."*

Clause 1.5, as amended, will need to be a complete sentence.
Suggested: "*The provisions of the Handbook are hereby fully incorporated into and form part of the Agreement.*"

Clause 2.3.1
Should read: "carry out its obligations as set out in the Agreement, including the Handbook, and in particular will carry out the duties of a Centre, with respect to the School, as set out in the Handbook."

In respect of liability and indemnity, it is requested that the indemnity that Cambridge gives in respect of gross negligence (i) applies mutually and (ii) is subject to a cap. May we ask that the indemnity can be brought within the scope of the overall cap on liability, which will bring this agreement in line with the terms of the previous agreement?

Please let me know if there is anything else that we can provide.

Thank you!

Together, we shape the learners who will shape the world.

From: Rachel Cabrera <Rachel.Cabrera@knoxcounty.org>
Sent: Friday, November 21, 2025 8:27 AM
To: Joette Viggiano <joette.viggiano@cambridge.org>
Subject: Re: [External]FW: RFP 3688- Exceptions

Hi Joette,

I hope you are having a great Friday.

I have removed the strikethrough in Section 1.5.2 of Cambridge's Standard Terms and Conditions and updated Section 2.3.1 accordingly.

Regarding the termination clause, I have revised the sample contract to provide 60 business days' notice for both parties to ensure fairness. Additionally, I included the following language:

> *"Termination of this Agreement shall not affect the ability of any student enrolled at the time of termination to complete their course(s) pursuant to the terms and conditions in place at enrollment."*

For the indemnity and liability section, under state law, the County and District do not have the authority to indemnify a contractor. Therefore, the language in the sample contract must remain unchanged in these sections.

Finally, IT has confirmed approval for you to retain the student assessment results for verification purposes.

I will need email confirmation of Cambridge's agreement in order to proceed with the evaluation.

Thank you,

Rachel Cabrera

Sent: Monday, November 10, 2025 5:53 PM
To: Rachel Cabrera <Rachel.Cabrera@knoxcounty.org>
Subject: [External]FW: RFP 3688- Exceptions

Hi Rachel,

Our team has the following points to address:

1. **Incorporation of the Handbook**. We note that, as per your email, the Handbook is included in the terms furnished as part of Cambridge's bid, and is therefore intended to be incorporated into the contact between us. We notice that some of the changes to our Standard Terms appear to contradict that position (for example, the deletion of clauses 1.5.1 and 2.3.1), so propose amending as necessary to ensure that the correct position is correctly reflected.
2. **Termination rights**. The combined effect of the Sample Contract and our Standard Terms (as redlined by Knox) is that Cambridge's only right to terminate is with 120 days' notice. We are uncomfortable with Cambridge's lack of rights to terminate on a shorter notice period upon specific events, and propose that the termination rights for cause set out in clauses 12.1 and 12.2 of our Standard Terms (which includes market-standard provisions such as terminating for the other party's insolvency or material breach of the contract plus further rights that Cambridge has in its contracts with all of its schools worldwide, including its District contracts in the US) are incorporated into the contract. Further, it is not acceptable to Cambridge that Knox could terminate for convenience on 30-days'notice given the nature of our services i.e. provision on examinations. For example, we send out exam papers over a month ahead of an exam being taken. Termination on such short notice would therefore be detrimental to the students and therefore we need to retain the position in Clause 12.3 of our Standard Terms (mutual 6 months' notice for termination for convenience).
3. **Indemnity and liability**. The current liability position is that each party's liability is limited to the amount paid by Knox under the contract, except in respect of indemnities and confidentiality, which are uncapped. In addition, Cambridge indemnifies Knox against any losses arising out of any grossly negligent act or occurrence or any intentional omission or commission. This position would only be acceptable if the indemnity referred to: (i) applies mutually to each party; and (ii) is subject to a cap. We could accept that the cap for this indemnity is at a higher level than the general liability cap if Knox want to suggest something for Cambridge's consideration. We consider that these changes will bring the liability more in line with the position previously agreed between the parties.
4. **Return/deletion of student data**. Cause 23 of your Sample Contract requires Cambridge to delete or return all confidential information within 30 days of termination of the contract. We will need to retain certain information (specifically student assessment results) so that we are able to verify the results in the future if, for an example, an employer or a university were to request this through our verification of results service. If we had to delete student results from our system this is likely to be detrimental to students. We therefore propose carving this data out of the deletion/return requirement.
5. **Next steps**. If you can confirm that the above points are acceptable then we will produce a markup incorporating these changes.

We look forward to hearing from you.

Hi Joette,

I have consulted with the Law Department. To move forward in the evaluation process for RFP 3688 Advanced Academic Programs, Cambridge must review and agree to language in the attached sample Contract. I have redlined the Terms and Conditions that you sent and attached them to this email. We would incorporate the redlined Terms and Conditions into our Contract along with the proposal you submitted and the Handbook you sent me. The schools do not have the authority to sign additionally documents, agreements or Standard Terms and Conditions. Therefore, should Cambridge be awarded a Contract for Advanced Academic Programs all requirements of the program must be addressed in the Contract including security requirements for program materials. Any additional documents would have to be routed through the Board of Education and County Commission for approval which is lengthy process. Please let me know if you or your legal team have any questions and whether Cambridge agrees to the sample Contract attached.

Thank you,

Subject: [External]RE: RFP 3688- Exceptions

Hi Rachel,

Thank you for your email. We have reviewed Tab VIII (Exceptions) and have notice that some of the language included was incorrect. Apologies for this oversight. Please find a revised Tab VIII document with updates to: (i) section 3.9 on Contract Execution; and (ii) section 3.26 (Pricing) plus a copy of Cambridge's Standard Terms and Conditions that are now referenced in our revised section 3.9 response. As per our revised response there is no need for us to provide an LOA.

Updated language for Tab VIII Exceptions:

3.9 Contract Execution:

Cambridge International understands and accepts that Knox County will draft a Contract upon award of this proposal. However, as explained in our clarification question Cambridge is a global provider of specialist exam services, we require that our contract includes essential terms

specific to our services—such as exam security protocols—which may not be covered in you standard agreement and it is these terms that form the basis of our contracts with many U.S. districts. We attach here our Standard Terms and Conditions and these will need to be incorporated into any contract that we sign with Knox if we are successful.

3.26 Pricing:

Pricing has been outlined in Tab VI (Proposed Cost) in detail. Cambridge International has provided fixed pricing for the first 12-month period of this contract, as outlined in Tab VI.

Please let me know if there is anything else. Thank you!

Joette Viggiano

Subject: RFP 3688- Exceptions

Hi Joette,

After doing a cursory review of the proposal you submitted for Advanced Academic Programs, I noticed there were some exceptions taken. We are still in the evaluation process for Request for Proposal Advanced Academic Programs. However, the County will need to review the Letters of Agreement referenced in the exceptions before moving forward in the evaluation process.

Please send me a copy of the LOA.

Thank you,

Rachel Cabrera

KNOX COUNTY GOVERNMENT

AND

UNITED ELEVATOR SERVICES, LLC.

This Contract made and entered into this _____ day of _____, 2026 by and between **Knox County Government** through its governing body and authorized representative, hereinafter referred to as **"Knox County" and United Elevator Services, LLC. Company.** hereinafter referred to as **"Contractor."**

Whereas, County may request future quote bids for the provision of Elevators and Services for Knox County Government, (The Interlocal Purchasing System – TIPS Cooperative 25050201);

Whereas, Contractor submitted a Bid in accordance with said requested specifications, the response of which is the most responsible and responsive bid meeting specifications accepted by Knox County;

Whereas, Contractor agrees and undertakes to provide Elevators and Services to Knox County, as set forth in the TIPS Cooperative 25050201, for future goods and services by Contractor. Further, in accordance with the lawful directions of the Knox County Government, the Contractor agrees in all respects, to be governed by the TIPS Cooperative 25050201 specifications and the Contractor's response.

Now, therefore in consideration of mutual covenants and promises contained herein, the parties hereto wish to enter into this contract to set forth their respective rights and obligations and do mutually agree that;

Witnesseth:

1. **Terms of this contract.** This contract commences on the 1st day of March 2026 and ends the last day of the cooperative renewal date, unless terminated in conformity with the terms of this contract as contained in paragraphs 7 and 8.

2. **Payment.** Knox County shall pay Contractor the amount as agreed upon TIPS Cooperative 25050201 for Elevator Services.

Pursuant to all payments being subject to the County's review and approval. The Contractor shall receive, upon the need of the County, written notification to proceed.

3. **Placement of Orders.** Knox County departments and agencies will place orders with the Knox County Procurement Division. Knox County Procurement will issue purchase orders to the Contractor. Only purchase orders issued by Knox County Procurement shall be honored.

4. Invoicing and reporting requirements. Contractor shall invoice Knox County upon the successful completion of all aspects of a particular job. Contractor is hereby cautioned that it can take a minimum of 30 days to process invoices.

As several different departments may use this contract, please adhere to the following guidelines:

For KCSMO mail all invoices to:

Knox County Schools Maintenance & Operations
Purchasing Supervisor
900 East Fifth Avenue
Knoxville, Tennessee 37917

For Knox County Departments mail all invoices to:

The address listed on the Purchase Order for the ordering department.

5. Pricing and Escalation. Contractor warrants that the unit pricing stated in TIPS Cooperative 25050201 shall remain firm from the first day of the contract period.

6. Safety. The successful vendor shall exercise all safety measures associated with the services to be performed under this contract and hereby warrants that all employees working under this contract have been trained in the proper and safe practices of Elevator Services and related duties.

7. Termination. Knox County may terminate this contract with or without cause, upon written notice of not less than thirty calendar days. Upon termination, County will pay for services satisfactorily completed but not yet invoiced. Contractor shall not perform additional work without the expressed written permission of Knox County. The agencies utilizing this Contract may also terminate their individual participation by written notice.

Should the Contractor fail to provide Elevator Services as detailed herein, Knox County will communicate the **problem(s) to the Contractor** verbally and keep a written record as to what the problem(s) are and when the contractor was contacted. **The Contractor shall have 72 hours** to rectify the problems. If the same or other problems persist or reoccur, Knox County may terminate the contract.

8. Appropriations. In the event no funds are appropriated by Knox County for Elevator Services in any fiscal year or insufficient funds exist to provide the services, then the contract shall expire upon the expenditure of previously appropriated funds or the end of the current fiscal year, whichever occurs first, with no obligations owed to or by either party.

9. **Independent contractor.** Contractor and Contractor's employees shall serve as independent contractors and County shall not be in any manner responsible for any payment, insurance, or incurred liability.

10. **Compliance with all federal, state, and municipal laws.** Contractor is assumed to be familiar with and agrees to observe and comply with all federal, state, and local laws, statutes, ordinances, and regulations in any manner affecting the provision of Structural Stabilization Services, and all instructions and prohibitive orders issued regarding this work and shall obtain all necessary permits.

11. **Criminal background check.** Contractor agrees to comply with Tennessee Code Annotated Section 49-5-413. As required under the statute, Contractor will provide fingerprinting and criminal history records checks, conducted by the Tennessee Bureau of Investigation and the Federal Bureau of Investigation, for all employees, subcontractor personnel and students that will enter the grounds of any of the schools (previously defined as premises) in performance of the Services in this contact before permitting the employee, subcontractor personnel or student to have contact with students or enter school grounds when students are present. Criminal background checks are the expense of the Contractor. If the employee or subcontractor personnel has previously had a criminal history check in accordance with Tennessee Code Annotated Section 49-5-413, Contractor shall provide a copy of the criminal background check to the Knox County and this will serve as compliance with said requirement.

12. **Severability clause.** If any provision of this contract is declared illegal, void, or unenforceable the remaining provisions shall not be affected but shall remain in force and in effect.

13. **Prohibition against assignment.** Contractor shall not assign this contract to any party, company, partnership, incorporation, or person without prior specific written consent of Knox County.

14. **Jurisdiction.** This Contract shall be governed by the laws of the State of Tennessee both as to interpretation and performance. The Chancery Court and/or the Circuit Court of Knox County, Tennessee, shall have exclusive and concurrent jurisdiction of any disputes, which arise hereunder.

15. **Right to inspect.** Knox County reserves the right to make periodic inspections of the manner and means the services are performed.

16. **Nondiscrimination and non-conflict statements.** Contractor agrees that no person on the grounds of handicap, age, race, color, religion, sex or national origin, shall be excluded from participation in, or be denied benefits of, or be otherwise subjected to discrimination in the performance of this contract, or in the employment practices of Contractor. Contractor shall upon request show proof of such non-discrimination, and shall post in conspicuous places available to all employees and applicants notices of non-discrimination.

17. Books and records. Contractor shall maintain all books, documents, accounting records and other evidence pertaining to the service under this contract and make such materials available at their offices at all reasonable times during the contract period and for five (5) years from the date of the final payment under the contract for inspection by Knox County or by any other governmental entity or agency participating in the funding of this contract, or any authorized agents thereof; copies of said records to be furnished if requested. Such records shall not include those books, documents and accounting records that **represent the Contractor's costs** of manufacturing, acquiring or delivering the products and services governed by this contract.

18. Limitations of liability. In no event shall Knox County be liable for any indirect, incidental, consequential, special or exemplary damages or lost profits, even if Knox County has been advised of the possibility of such damages.

19. Contractor shall indemnify, defend, save and hold harmless, Knox County, its officers, agents and employees from all suits, claims, actions or damages of any nature brought because of, arising out of, or due to breach of the **contract by Contractor**, its subcontractors, agents or employees or due to any negligent act or occurrence or omission or **commission of Contractor**, its subcontractors, agent, or employees.

20. Delivery. Contractor shall render Elevator Services for Knox County in accordance with the **Contractor's** schedule and coordinated with Knox County or its designee.

21. Contract documents. It is mutually agreed by both parties that the following documents are made part of this contract and are incorporated herein by reference:

a. Tips Cooperative 25050201 for Elevator Services
b. Certificate of Insurance
c. Criminal History Affidavit
d. Performance and Payment Bonds (if required, by project)

It is agreed that this contract, represents the **entire contract** between the parties and no prior representations, promises, and agreements, oral or otherwise, not embodied herein, shall be of any force or effect.

In witness whereof, the parties hereto have caused this contract to be executed on the day and year first above written.

All proposals shall be received electronically, or otherwise sealed, by: June 20, 2025 AT 3:00 P.M. LOCAL TIME

Access to Solicitation Documents:
Solicitation documents are located online at http://tips.ionwave.net. If you encounter a problem while accessing the solicitation, please contact TIPS at the contact information provided for assistance.

Piggybacking Notice:
This IDIQ Solicitation is intended for the use of public entities and qualifying non-profit entities who join TIPS, now and in the future, ("TIPS Members") to piggyback upon and utilize as their own solicitation for legal procurement purposes. TIPS Contracts are

established through free, full and open competition as described by the laws of TIPS jurisdiction and are available for piggy-back by other government entities anywhere in the United States, subject to each entities' jurisdictional law and regulation. For the purpose of enhanced accessibility, potential cost savings, increased flexibility and choice, and to ensure adequate coverage of requirements for Region 8 Education Service Center and TIPS Members, multiple awards are anticipated.

TIPS Administration Fee:
TIPS collection of fees is required pursuant to Texas Government Code Section 791.011 et. seq. The TIPS Administration Fee for this contract shall be 2% of the amount paid by the TIPS Member for each TIPS Sale, less shipping cost, bond cost, and taxes, if identifiable.

Incorporation of Solicitation:
If Vendor proposes and is awarded, the specifications, terms, and conditions of this solicitation shall be incorporated by reference into the final, awarded TIPS Contract.

TIPS Contract Jurisdictional Limitations:
Depending on different entities' and jurisdictions' laws and regulations, TIPS Member Customers may be prohibited from utilizing TIPS as a procurement method for any specific procurement or procurement-type. TIPS makes no representations about when a TIPS procurement will be appropriate for any particular expenditure. It is always up to the TIPS Member customer to determine whether a TIPS procurement is appropriate under their applicable laws and policies.

Vendor Questions & Pre-Bid Meeting Requests:
Substantive questions will be received until June 6, 2025 at 12:00 p.m. local time. Questions about the specific solicitation shall be submitted to bids@tips-usa.com with the subject line "TIPS 250502 Elevators and Servicing (Part 1) – Vendor Question". Vendor-specific questions about the process will often be answered directly. However, substantive questions that are not properly addressed in the solicitation information will be properly published to all vendors as an addendum or "Question & Answer" document.

Pre-Bid Meetings are not mandatory and, if requested, TIPS reserves the right to determine whether a Pre-Bid meeting shall be held. Pre-Bid Meetings may be requested by any proposer on or before May 15, 2025 by emailing bids@tips-usa.com with the subject line "TIPS 250502 Elevators and Servicing (Part 1) – Pre-Bid Meeting Request".

Anticipated Schedule of Solicitation Events:
These anticipated dates are subject to change at TIPS' discretion. TIPS reserves the right to extend the proposal deadline for any reason.

Posting Date	May 1, 2025	8:00 A.M. Local Time
Proposal Deadline	June 20, 2025	3:00 P.M. Local Time
Proposal Opening	June 20, 2025	3:00 P.M. Local Time
Proposal Review Begins	June 20, 2025	3:01 P.M. Local Time
Proposals Award	July 24, 2025	8:30 A.M. Local Time
Award Notifications	July 24, 2025	12:00 P.M. Local Time

Estimated Contract Value:
The estimated value for the life of the contract for all awarded vendors combined is $147,636.10. This is an estimate and is not a guarantee of the minimum or maximum value of the contract because TIPS cannot speculate on TIPS Members' future needs or budget allocations as they relate to this solicitation.

II. TIPS

The Interlocal Purchasing System ("TIPS") is a department of Texas Region 8 Education Service Center, a government entity. TIPS, a governmental entity and a national purchasing cooperative operating under the Interlocal Cooperation Act[1], seeks to provide a valuable and necessary solution to public entities and qualifying non-profits by performing the legal public procurement solicitation process and awarding compliant contracts to qualified vendors. When permitted by TIPS Members' law and policy, instead of public entities and qualifying non-profits expending time, money, and resources on the extensive legal competitive procurement process, the use of TIPS, allows public entities to quickly select and purchase their preferred products or services from qualified, evaluated Vendors on an as-needed basis. TIPS evaluates and scores all responsive, properly submitted proposals. Recommendations for award will be made to the Region 8 Education Service Center Board of Directors. Awards are ratified or rejected at the monthly meeting of Region 8 ESC Board of Directors, or as delegated by the Board of Directors. TIPS utilizes a value approach and bases its award recommendations on several factors mandated by the Texas Education Code section §44.031. The factors are allotted points as described herein. TIPS reserves the right to assign or deduct any number of points in any given category if warranted due to insufficient response or Vendor stipulated exceptions and limitations.

III. PROPOSAL GUIDANCE

1. TIPS strongly encourages all interested vendors to respond using the TIPS IonWave Electronic eBid System for proposal submission. The online submission has many safeguards built into the system that will notify proposers of mistakes or missing information. These safeguards will significantly minimize the potential for Vendor disqualification. If you encounter trouble with the TIPS IonWave eBid System, please contact TIPS.
2. If it is determined that Vendor cannot utilize the TIPS IonWave eBid System, Vendor must email bids@tips-usa.com seeking a manual submission packet which TIPS will send to you via US Mail or FedEx within two business days of receiving your request. All manual responses must be sealed in an envelope and must be physically received by TIPS at the TIPs Contact information provided herein and by the deadline provided herein.
3. If you are viewing this document, you have likely already logged into the TIPS IonWave eBid System. If not, you need to register/login to the TIPS IonWave eBid System online at https://tips.ionwave.net/ and follow these instructions.
4. Once logged in, confirm that your Supplier Profile properly lists your accurate entity-name, EIN, d/b/a's, and contact information, matching your current W9. If it does not, either correct it, or disable the inaccurate profile and create a correct profile before proceeding.
5. Next, confirm that all emails issued by the following domains can be received by your entity's email servers to ensure that you do not miss vital messages: "@tips-usa.com", @tipsconstruction.com", and "ionwave.net"
6. Once that review/update is complete, Vendor shall carefully read through all bid Event Details, Bid Notes, Attachments, Addenda, Instructions, and Attribute Questions before submitting questions to TIPS.
7. TIPS recommends starting Vendor's proposal response by answering the required "Attribute" questions within the IonWave eBid System. These responses are required and it is beneficial to start with the Attribute questions as some of the bid Attachments are only required depending on your responses to those questions.
8. Once Vendor has completed the Attribute Questions, Vendor must download, properly complete, and upload into the correct "Response Attachments" location all required Attachments for Part 1.
9. Once Vendor has completed the Attribute Questions and uploaded all required Attachments for Part 1, Vendor must submit the proposal before the legal Proposal Deadline. The system will notify you of errors and allow you to correct those errors where you would otherwise risk unintentional disqualification through paper submission.
10. Proposals may be retracted, amended, and resubmitted by the proposer on the electronic eBid System at any time prior to the legal deadline.
11. If an addendum is posted, you will receive an email notification and you are required to login to the IonWave eBid System to address the Addendum.
12. TIPS reserves the right to reject any or all proposals, to accept any proposals, and to waive any informality in the proposal process provided waiver is equally applied to all proposers and another proposer is not prejudiced by the waiver.
13. If Vendor has proposed deviations to TIPS' standard terms, there is an Attribute Question where Vendor can assert that it has proposed negotiations. If Vendor responds to that attribute question asserting deviations, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document Vendor Agreement and instruct Vendor to include all requested negotiations as redline edits for TIPS consideration. This is the only proper way to submit proposed deviations for TIPS consideration. TIPS reserves the right to accept, decline, or modify Vendor's requested negotiated terms. For this reason, asserting deviations or negotiations may ultimately delay or prevent award.
14. Withdrawal of proposals will not be allowed for a period of 90 days following the opening unless approved by TIPS in writing.

[1] See Texas Government Code, Chapter 791.

15. If a Vendor desires to protest a process or decision by TIPS, the Vendor must follow the following process: http://www.tips-usa.com/assets/documents/docs/letters/Protest_Procedures_for_Vendor.pdf

Proposal Format

All responses should be direct, concise, complete, and unambiguous.

1. Attribute Questions.
Vendor must respond carefully and accurately to all "Attributes" within the IonWave eBid System.

2. Completion of Attachments.

Pricing Form 1 (Part 1)
If responding to Part 1, this Pricing Form 1 (Part 1) must be downloaded from this location, reviewed, properly completed as instructed, and uploaded to the "Response Attachments" location entitled "Pricing Form 1 (Part 1)."

Pricing Form 2 (Part 1)
If responding to Part 1, this Pricing Form 2 (Part 1) must be downloaded from this location, reviewed, properly completed as instructed, and uploaded to the "Response Attachments" location entitled "Pricing Form 2 (Part 1)."

Alternate or Supplemental Pricing Documents (Part 1)
Optional. If responding to Part 1, when completing Pricing Form 1 (Part 1) & Pricing Form 2 (Part 1), you direct TIPS to view additional, alternate, or supplemental pricing documentation, you may upload that Part 1 documentation at the "Response Attachments" location entitled "Alternate or Supplemental Pricing Documents (Part 1)."

Vendor Agreement (Part 1)
The Vendor Agreement must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Vendor Agreement (Part 1). If Vendor has proposed deviations to the Vendor Agreement (Part 1), Vendor may assert so in the Attribute Questions and those shall be addressed during evaluation.

Vendor Agreement Signature Form (Part 1)
If responding to Part 1, this Vendor Agreement (Part 1) must be downloaded from this location, reviewed, Vendor Name placed in the line provided at the top, and uploaded to the "Response Attachments" location entitled "Vendor Agreement (Part 1)." If Vendor has proposed deviations to the Vendor Agreement, Vendor may leave the signature line of this page blank and assert so in the Attribute Questions and those shall be addressed during evaluation.

Reference Letters
Vendor is required to upload three Reference Letters from three separate customers as described herein. Vendor will be scored on the aggregate Reference Letters received from customers as described in the solicitation. Vendor must provide three current letters (issued within the 12-months preceding the date on which the solicitation was posted) from its customers verifying Vendor's customer service and reputation as described herein. (Ex. if the solicitation/bid posted on February 4, 2024, the letters must be dated on or after February 1, 2023). The letters must be issued from customers who have received goods or services from the Vendor or its current corporate officials, on entity/company letterhead, must specify its customer experience with Vendor, and must be signed by an authorized representative of the customer.

Required Confidentiality Claim Form
The Required Confidentiality Claim Form must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Required Confidentiality Claim Form. This is the only way for Vendor to assert confidentiality of any information submitted.

Conflict of Interest Questionnaire – Form CIQ
Do not upload this form unless you have a reportable conflict with TIPS. There is an Attribute entitled "Conflict of Interest Questionnaire Requirement" immediately followed by an Attribute entitled "Conflict of Interest Questionnaire Requirement – Form CIQ – Continued." Properly respond to those Attributes and only upload this form if applicable/instructed. If upload is required based on your response to those Attributes, the Conflict of Interest Questionnaire – Form CIQ must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Conflict of Interest Questionnaire – Form CIQ.

Disclosure of Lobbying Activities – Standard Form - LLL
Do not upload this form unless Vendor has reportable lobbying activities. There are Attributes entitled, "2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment – Continued." Properly respond to those Attributes and only upload this form if applicable/instructed. If upload is required based on your response to those Attributes, the Disclosure of Lobbying Activities – Standard Form - LLL must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Disclosure of Lobbying Activities – Standard Form – LLL.

Current Form W-9
Vendor must upload their current IRS Tax Form W-9. The legal name, EIN, and d/b/a's listed should match the information provided herein exactly. This form will be utilized by TIPS to properly identify your entity.

Certificates & Licenses (Supplemental Vendor Information Only)
Optional. If Vendor would like to display any applicable certificates or licenses (including HUB certificates) for TIPS and TIPS Member Customer consideration, Vendor may upload those at the "Response Attachments" section requesting "Certificates & Licenses (Supplemental Vendor Information Only)." These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Vendor's Warranties, Terms, and Conditions (Supplemental Vendor Information Only)
Optional. If Vendor would like to display any standard warranties, terms, or conditions which are often applicable to their offerings for TIPS and TIPS Member Customer consideration, Vendor may upload those at the "Response Attachments" section requesting "Vendor's Warranties, Terms, and Conditions (Supplemental Vendor Information Only)." These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Supplemental Vendor Information (Supplemental Vendor Information Only)
Optional. If Vendor would like to display or include any brochures, promotional documents, marketing materials, or other Vendor Information for TIPS and TIPS Member Customer consideration, Vendor may upload those at the "Response Attachments" section requesting "Supplemental Vendor Information (Supplemental Vendor Information Only)." These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Vendor Logo (Supplemental Vendor Information Only)
Optional. If Vendor desires that their logo be displayed on their public TIPS profile for TIPS and TIPS Member viewing, Vendor may upload that logo at the "Response Attachments" section requesting "Vendor Logo (Supplemental Vendor Information Only)." These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

IV. SPECIFICATIONS

Category: Elevators and Servicing

Nothing herein is seeking services that are considered a public work/construction. This is a solicitation for goods and non-"public work" services only.

Specifications.
It is the intention of TIPS, as a Department of Region 8 ESC, to contract with quality vendors to supply elevators, elevator parts, and related non-construction services to public entity and qualifying non-profit TIPS Members in the United States. Proposals shall include, but not be limited to: elevator units, elevator components, elevator maintenance services, elevator repairs, modernization services, elevator inspections, elevator accessories, and elevator cleaning services. Proposals should include all listings of elevators, elevator parts, and related non-construction services that Vendor seeks to offer under the contract. Do not propose offerings that are not considered elevators, elevator parts, and related non-construction services. Accessories and parts to support elevators should be submitted. Servicing of elevators or any service related to elevators that Vendor seeks to offer under this contract should be submitted.

V. VENDOR PART 1 PRICING SUBMISSION

Pricing.
Please carefully read all of the following before submitting any pricing questions. All goods and service pricing shall be firm and calculable at the time of any TIPS Sale and must conform and comply with the Vendor's original pricing model as proposed in response to this solicitation. "To-Be-Determined" pricing is prohibited.

Submission of Goods/Items Pricing

TIPS permits Vendors to utilize either or both of the two goods/items pricing proposal options (and sub-options) identified below with the "Discount-Off Catalog" option being much more optimal, usable, and preferred to the "Cost-Plus Markup Option." With either or both options, Vendor is able to update their pricing and add/remove items during the life of the contract. It is Vendor's responsibility to ensure that all items listed, whether by description, product number, SKU, UPC or other, fall within the scope of this solicitation category. Please carefully read the description of both goods/items pricing options directly below:

- **Discount-Off Catalog Method**
  This goods/items pricing proposal method is highly preferred over the "Cost-Plus Markup Method" because it is versatile and allows Vendor to efficiently add and update its goods/items pricing and does not automatically prohibit federal fund purchases. Vendor is asked in the attribute questions within the eBid System to propose a minimum discount off of their catalog pricing. Please note that Vendor's "Minimum Percentage Discount Offered" proposed in the attribute questions shall apply to goods proposed with the exception of limited goods/services specifically identified and excluded from this discount in Vendor's original proposal such as a specific item-type with a limited profit margin. Vendor is asked in the attribute questions within the eBid System to propose a minimum discount off of their catalog pricing. Any discount from 0% to 100% is an appropriate response. A 0% discount is permitted. Then, under this pricing proposal method, Vendor is permitted to provide its "Catalog Pricing" to TIPS in a number of ways, described below. Please carefully read the following definition of "Catalog Pricing" which is broad and flexible to the usability benefit of the Vendor.

  "**Catalog Pricing**" is defined as, "The then available list of goods or services, in the most current listing regardless of date, that takes the form of a catalog, price list, price schedule, shelf-price or other viewable format that:

  A. is regularly maintained by the manufacturer or Vendor of an item; and

  B. is either published or otherwise available for review by TIPS or a customer during the purchase process;

  C. to which the Minimum Percentage Discount proposed by the proposing Vendor may be applied.

  Under the "Discount-Off Catalog Method, Vendor may supply TIPS its "Catalog Pricing" through any of the following methods. Please open the solicitation attachment entitled "Pricing Form 1" at this time and scroll through Sections A and B as you read this explanation.

  Options for Providing Goods/Items "Catalog Pricing" to TIPS:

  1. **Section "A" of Pricing Form 1 – Providing "Catalog Pricing" through Line-Item Pricing:** If Vendor desires to list the goods/items that you sell by line-item, you are welcome to do so in Section "A" of Pricing Form 1. You are welcome to modify the columns and column titles as long as TIPS can identify the item's name and "catalog price." Please note that if you are awarded with this type of pricing submission, you will be able to update the pricing and add/remove items as long as you honor any applicable discounts originally proposed.

  2. **Section "B" of Pricing Form 1 – (1) Catalog Pricing is Included in Proposal:** If Vendor already has "Catalog Pricing" documents or files compiled, Vendor may check this box and include a note directing TIPS to please view those documents/files. (Ex. X – Please see "Catalog Pricing" in uploaded document entitled "2022-2023 Vendor Catalog.") Please note that if you are awarded with this type of pricing submission, you will be able to update the pricing and add/remove items as long as you honor any applicable discounts originally proposed.

  3. **Section "B" of Pricing Form 1 – (2) Link to Catalog Pricing:** If Vendor already has "Catalog Pricing" published at an online location, Vendor may check this box and include the link to their online "Catalog Pricing." If a login is required to access the "Catalog Pricing" located at that link, please provide that login information in the cell to the right. (Ex. X – Please see "Catalog Pricing" at www.tips-usa.com, login information is Username: TIPS Password: 123456.) Please note that if you are awarded with this type of pricing submission, you will be able to update the online pricing and add/remove items as long as you honor any applicable discounts originally proposed.

4. **Section "B" of Pricing Form 1 – (3) Vendor Shall Provide "Catalog Pricing" Upon Request:** If Vendor does not have comprehensive "Catalog Pricing" documents or links readily available, Vendor may check this box ensuring that such required "Catalog Pricing" will be provided upon request. Per the following example, this option is viable but may slow down the TIPS Sale process as follows. (Ex. Vendor is awarded and is making its first TIPS Sale to Sunny ISD, Sunny ISD sends its TIPS PO to TIPS for pricing compliance review. TIPS will then request that Vendor provide documentation of "Catalog Pricing" for the line items included in the PO before TIPS can process the PO and send to Vendor for fulfillment.) Please note that if you are awarded with this type of pricing submission, you will always be able to provide the most current pricing for each item but you will still be required to honor any applicable discounts originally proposed.

- **<u>Cost-Plus Markup Method</u>**

This goods/items pricing proposal method is not recommended because many TIPS Members are prohibited from utilizing Vendors with a Cost-Plus Markup Pricing submission, especially when using federal funds. Vendor cannot be listed as federally compliant for TIPS purposes if Vendor utilizes this method. If Vendor has read through the entirety of the "Discount-Off Catalog Method" description above and has determined that none of those options are a possibility, then Vendor may use this method which will require Vendor to propose a maximum mark-up percentage in this proposal and then provide TIPS with proof of cost for each item at the time of each TIPS Sale.

Options for Selecting Cost-Plus Markup Method:

1. **Section "C" of Pricing Form 1:** If Vendor desires to utilize this method, Vendor may enter its maximum markup percentage the cell provided in Section "C" of Pricing Form 1. Please note that this is a maximum percentage and you may always have a lesser markup on a TIPS Sale. You will be required to provide proof of cost to TIPS for every item sold under the TIPS Contract. (Ex. Vendor is awarded and is making its first TIPS Sale to Sunny ISD, Sunny ISD sends its TIPS PO to TIPS for pricing compliance review. TIPS will then request that Vendor provide documentation of Vendor's cost for the line items included in the PO before TIPS can process the PO and send to Vendor for fulfillment.) Please note that if you are awarded with this type of pricing submission, you will always be able to provide the most current cost for each item but you will not be permitted to sell it to TIPS Members for a greater markup than what Vendor provides herein.

Submission of Service Pricing

Please note that Vendor's "Minimum Percentage Discount Offered" proposed in the attribute questions shall apply to services proposed with the exception of limited goods/services specifically identified and excluded from this discount in Vendor's original proposal such as vendor travel passed through at actual cost or GSA allowable rates. If Vendor does not seek to offer services under this contract, Vendor may type "N/A" on Pricing Form 2 and submit. If Vendor desires to offer services under this TIPS Contract, if awarded, the "Catalog Pricing" for those services must be included, or properly added, to Vendor's TIPS "catalog pricing" proposed herein. All services must be provided in some unit cost (Ex. Per Hour, Per Person, Per Day, etc.). TIPS now restates the definition of "Catalog Pricing" below for convenience:

"**Catalog Pricing**" is defined as, "The then available list of goods or services, in the most current listing regardless of date, that takes the form of a catalog, price list, price schedule, shelf-price or other viewable format that:

D. is regularly maintained by the manufacturer or Vendor of an item; and

E. is either published or otherwise available for review by TIPS or a customer during the purchase process;

F. to which the Minimum Percentage Discount proposed by the proposing Vendor may be applied.

Under the "Discount-Off Catalog Method, Vendor may supply TIPS its "Catalog Pricing" through any of the following methods. Please open the solicitation attachment entitled "Pricing Form 1" at this time and scroll through Sections A and B as you read this explanation.

Options for Providing Services "Catalog Pricing" to TIPS:

1. **Pricing Form 2 – Providing Service "Catalog Pricing" through Line-Item Pricing:** If Vendor desires to list the services that Vendor sells by line-item, Vendor is welcome to do so in Pricing Form 2. You are welcome to modify the columns and column titles as long as TIPS can identify the service being offered by name, unit-type, and the "catalog price" of the service. Please note that if you are awarded with this type of pricing submission, you will be able to update the pricing and add/remove services within the category as long as you honor any applicable discounts originally proposed.

2. **Service Catalog Pricing is Included in Proposal:** If Vendor already has service "Catalog Pricing" documents, links, or files compiled, Vendor may include a note on Pricing Form 2 directing TIPS to please view those documents/links/files. (Ex. X – Please see "Service "Catalog Pricing" in uploaded document entitled "2022-2023 Vendor Service Pricing.") Please note that if you are awarded with this type of pricing submission, you will be able to update the pricing and add/remove services within this category as long as you honor any applicable discounts originally proposed.

Additional Pricing Terms

1. **Maintaining and Updating TIPS Pricing During Contract.** Vendor agrees and understands that for each TIPS Contract that it is awarded, Vendor submitted, agreed to, and received TIPS' approval for specific pricing, discounts, and other pricing terms and incentives which make up Vendor's TIPS Pricing for that TIPS Contract ("TIPS Pricing"). Vendor may update their pricing during the life of the contract by highlighting the pricing changes and emailing pricing updates to bids@tips-usa.com for TIPS consideration/approval. Through this process, Vendor may: (1) add or remove items; (2) add or remove manufacturer/brands, and; (3) increase or decrease item pricing, as long as "catalog pricing" (or "cost" in very limited circumstances as described herein) is provided to TIPS upon request and Vendor honors all applicable discounts originally proposed. Vendor hereby certifies that Vendor shall only offer goods and services through this TIPS Contract if those goods and services are included in or added to Vendor's TIPS Pricing and approved by TIPS. TIPS reserves the right to review Vendor's pricing update requests as specifically as line-item by line-item to determine compliance. However, Vendor contractually agrees that all submitted pricing updates shall be within the original terms of the Vendor's TIPS Pricing (scope, proposed discounts, price increase limitations, and other pricing terms and incentives originally proposed by Vendor) such that TIPS may accept Vendors price increase requests as submitted without additional vetting at TIPS discretion.

2. **Brands.** If a name brand is included in this solicitation, proposals on any reputable manufacturers regularly produced equipment of such items of a similar nature or similar use which are substantively equivalent will be considered.

3. **TIPS Fee Considered.** Vendor confirms that all TIPS Pricing will not show adding the TIPS Administration Fee as a charge or line-item in a TIPS Sale.

4. **Vendor's Self-Imposed Pricing Limitations.** Within Vendor's TIPS Pricing, Vendor may include express, written limitations on geographical regions, volume of order, expediency, etc., for TIPS consideration and approval, as long as Vendor honors their applicable TIPS Pricing, proposed discounts, the terms and conditions of this Contract, and the terms and conditions of any Supplemental Agreement entered into directly with the customer TIPS Member. (Example: If Vendor sells nationally but a specific product can only be sold in Texas. Or, if Vendor can offer Members a greater discount if they purchase 50 items or more in one purchase, etc.)

5. **Shipping Cost, Bond Cost, and Taxes.** TIPS fees are not assessed to Vendors for shipping cost, required bond cost, or any taxes that may be applicable as long as they can be identified as separate line-items. For that reason, TIPS encourages Vendors not to include shipping price, bond price, or taxes within the TIPS "catalog pricing" for an item. If it is included in the TIPS price, TIPS will have no way to differentiate and the TIPS Administration fee will be assessed on the total.

VI. PART 1 PROPOSAL SCORING AND EVALUATION

TIPS evaluates and scores all responsive, properly submitted proposals. Recommendations for award will be made to the Region 8 Education Service Center Board of Directors. Awards are ratified or rejected at the monthly meeting of Region 8 ESC Board of Directors, or as delegated by the Board of Directors. TIPS utilizes a value approach and bases its award recommendations on several factors mandated by the Texas Education Code section §44.031. The factors are allotted points as described herein. TIPS reserves the right to assign or deduct any number of points in any given category if warranted due to insufficient response or Vendor stipulated exceptions and limitations. TIPS reserves the right to reject any or all proposals or any part of any proposal. TIPS is the sole arbiter of scoring. TIPS reserves the right to award multiple vendors for each solicitation.

The following evaluation criteria are mandated for consideration by Texas Education Code § 44.031 (b).

1. **Purchase Price**: **(22) Points.** Vendor shall submit, pursuant to the instructions included herein, specific pricing, discounts, and other pricing terms and incentives which make up Vendor's "TIPS Pricing." Points will be assigned based on the specific pricing as it relates to the current market, the discounts, and the other pricing terms and incentives proposed by Vendor.
2. **Reputation of Vendor and Vendor's Offerings: (3) Points.** Points will be assigned based on Vendor's references, to be submitted as instructed herein, any past history with Vendor, and any other information available to TIPS regarding Vendor's reputation.
3. **Quality of Vendor's Offerings: (21.5) Points.** Points will be assigned based on Vendor's references, to be submitted as instructed herein, any past history with Vendor, and any other information available to TIPS regarding the quality of Vendor's goods.
4. **Total Long-Term Cost to TIPS/TIPS Members to Acquire the Vendor's Offerings: (10) Points.** Points will be assigned based on Vendor's response to the Attribute entitled, "Honoring Vendor's Minimum Discount Percentage." If Vendor responds, "Yes", agreeing to honor their proposed TIPS Minimum Percentage Discount for the duration of the contract, Vendor will be awarded the maximum 10 points. A "No" response refusing to honor that proposed discount will be awarded 0 points.
5. **Extent to Which the Offerings Meet the Needs: (21.5) Points.** Points will be assigned based on whether the offerings proposed by Vendor fall within the scope of and meet the TIPS Member needs described in this solicitation.
6. **Vendor's Past Relationship: (10) Points.** Points will be assigned based on Vendor's past relationship with TIPS as an awarded TIPS Vendor. No past relationship with TIPS as an awarded TIPS Vendor will score 5 points, a poor past relationship with TIPS as an awarded TIPS Vendor will score 0-4 points, and a good past relationship with TIPS as TIPS Awarded Vendor will score 6-10 points.
7. **Impact on the Ability of TIPS Members to Comply with Laws and Rules Relating to Historically Underutilized Businesses ("HUB's"): (2) Points.** Points are assigned if, where applicable herein, Vendor agrees that if they anticipate subcontracting under this award, they will abide by the required affirmative steps provided in 2 CFR 200. Please see the corresponding Attribute Questions regarding, "Subcontracting and Affirmative Steps for Small and Minority Businesses, Women's Business Enterprises, and Labor Surplus Area Firms." A response that Vendor does anticipate subcontracting but does not agree to the federal subcontracting practices will give Vendor 0 points for this category and deem Vendor unacceptable to receive federal funds under this contract, any other responses accurate responses will give Vendor 2 points for this category.
8. **Experience: (10) Points.** Points will be assigned based on the number of years proposing Vendor has been operating the proposing business in this capacity as presented in response to the corresponding attribute question seeking the same. <2 years will receive 1 point, 2-3 years will receive 5 points, 4-5 years will receive 8 points, and > 5 years will receive 10 points.
9. **Residency: 0 Points.** For a contract for goods and services, other than goods and services related to telecommunications and information services, building construction and maintenance, or instructional materials, whether the vendor or the vendor's ultimate parent company or majority owner: A. has its principal place of business in this state; or B. employs at least 500 persons in this state. Vendor's response to the corresponding attribute question will be considered, as required by law, but no points shall be assigned because federal funds may be utilized by TIPS Members, and residency is a prohibited criterion under federal regulation.

PROPOSERS FALLING BELOW AN 70-POINT THRESHOLD WILL NOT BE CONSIDERED FOR AN AWARD.

VII. TERMS & CONDITIONS

1. **Incorporation of Solicitation.** As previously stated, if Vendor proposes and is awarded, the specifications, terms, and conditions of this solicitation shall be incorporated by reference into the final, awarded TIPS Contract. In the event of conflict between the terms herein and the final Vendor Agreement, the terms and conditions which are in the best interest of governmental/qualifying non-profit TIPS Members shall control at TIPS sole discretion.

2. **Deviations.** If Vendor has proposed deviations to TIPS' standard terms, there is an Attribute Question where Vendor can assert that it has proposed negotiations. If Vendor responds to that attribute question asserting deviations, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document Vendor Agreement and instruct Vendor to include all requested negotiations as redline edits for TIPS consideration. This is the only proper way to submit proposed deviations for TIPS consideration. TIPS reserves the right to accept, decline, or modify Vendor's requested negotiated terms. For this reason, asserting deviations or negotiations may ultimately delay or prevent award.

3. **Term of the Agreement.** If awarded, the resulting Agreement with TIPS is for approximately three years with a one-year, consecutive option for renewal as described herein. Renewal options are not automatic and shall only be effective if offered by TIPS at its sole discretion. If TIPS offers a renewal option, the Vendor will be notified via email issued to Vendor's then-listed Primary Contact. The renewal option shall be deemed accepted by Vendor unless Vendor notifies TIPS of its objection to the renewal option in writing and confirms receipt by TIPS.

   Actual Effective Date: Agreement is effective upon signature by authorized representatives of both Parties. The Effective Date does not affect the "Term Calculation Start Date."

   Term Calculation Start Date: To keep the contract term consistent for all vendors awarded under a single TIPS contract, Vendor shall calculate the foregoing term as starting on the last day of the month that "Award Notifications" are anticipated as published in the Solicitation, regardless of the actual Effective Date.

   Example of Term Calculation Start Date: If the anticipated "Award Date" published in the Solicitation is May 22, 2023, but extended negotiations delay award until June 27, 2023 (Actual Effective Date), the Term Calculation Start Date shall be May 31, 2023 in this example.

   Contract Expiration Date: To keep the contract term consistent for all vendors awarded under a single TIPS contract, the term expiration date shall be three-years from the Term Calculation Start Date.

   Example of Contract Expiration Date: If the anticipated "Award Date" published in the Solicitation is May 22, 2023, but extended negotiations delay award until June 27, 2023 (Actual Effective Date), the Term Calculation Start Date shall be May 31, 2023 and the Contract Expiration Date of the resulting initial "three-year" term, (which is subject to an extension(s)) will be May 31, 2026 in this example.

   Option(s) for Renewal: Any option(s) for renewal shall begin on the Contract Expiration Date, or the date of the expiration of the prior renewal term where applicable, and continue for the duration specified for the renewal option herein.

   Example of Option(s) for Renewal: In this example, if TIPS offers a one-year renewal and the Contract Expiration Date is May 31, 2026, then the one-year renewal is effective from May 31, 2026 to May 31, 2027.

   TIPS may offer to extend Vendor Agreements to the fullest extent the TIPS Solicitation resulting in this Agreement permits.

4. **Termination.** If awarded, TIPS reserves the right to terminate the resulting agreement for cause or no cause for convenience with a thirty (30) days prior written notice. This Agreement may be terminated for cause by either party if the other party breaches the terms or materially defaults on the performance of any of its duties or obligations set forth herein ,provided that such default is not cured within thirty (30) days, or as otherwise may be agreed to by both parties, after written notice is given to the defaulting party by the non-defaulting party which specifies the faulty performance and acceptable means of correction. In such event, termination of the Agreement shall be effective as of the date specified in such notice of such termination. Upon termination, all TIPS Sale orders previously accepted by Vendor shall be fulfilled and Vendor shall be paid for all TIPS Sales executed pursuant to the applicable terms. All TIPS Sale orders presented to Vendor but not fulfilled by Vendor, prior to the actual termination of this agreement shall be honored at the option of the TIPS Member. TIPS shall submit to Vendor an invoice for any outstanding TIPS Administration Fees and approved expenses and Vendor shall pay such fees and expenses within 30 calendar days of receipt of such valid TIPS invoice. Vendor acknowledges and agrees that continued participation in TIPS is subject to TIPS' sole discretion and that any Vendor may be removed from the TIPS program at any time with or without cause. This termination clause does not affect TIPS Sales Supplemental Agreements pursuant to this term regarding termination and the Survival Clause term.

5. **TIPS Pricing.** Vendor agrees and understands that for each TIPS Contract that it holds, Vendor submitted, agreed to, and received TIPS' approval for specific pricing, discounts, and other pricing terms and incentives which make up Vendor's TIPS Pricing for that TIPS Contract ("TIPS Pricing"). Vendor confirms that Vendor will not add the TIPS Administration Fee as a charge or line-item in a TIPS Sale. Vendor hereby certifies that Vendor shall only offer goods and services through this TIPS Contract if those goods and services are included in or added to Vendor's TIPS Pricing and approved by TIPS. TIPS reserves the right to review Vendor's pricing update requests as specifically as line-item by line-item to determine compliance. However, Vendor contractually agrees that all submitted pricing updates shall be within the original terms of the Vendor's TIPS Pricing (scope, proposed discounts, price increase limitations, and other pricing terms and incentives originally proposed by Vendor) such that TIPS may accept Vendors price increase requests as submitted without additional vetting at TIPS discretion. Any pricing quoted by Vendor to a TIPS Member or on a TIPS Quote shall never exceed Vendor's TIPS Pricing for

any good or service offered through TIPS. Vendor certifies by signing this agreement that Vendor's TIPS Pricing for all goods and services included in Vendor's TIPS Pricing shall either be equal to or less than Vendor's current pricing for that good or service for any other customer. TIPS Pricing price increases and modifications, if permitted, will be honored according to the terms of the solicitation and Vendor's proposal, incorporated herein by reference.

6. **Initiation of TIPS Sales.** If awarded, when a public entity initiates a purchase with Vendor under this resulting contract, if the Member inquires verbally or in writing whether Vendor holds a TIPS Contract, it is the duty of the Vendor to verify whether the Member is seeking a TIPS purchase. Once verified, Vendor must include the TIPS Contract Number on all purchase communications and sales documents exchanged with the TIPS Member.

7. **TIPS Sales and Supplemental Agreements.** If awarded, when making a sale under this awarded contract, the terms of the specific TIPS order, including but not limited to: shipping, freight, insurance, delivery, fees, bonding, cost, delivery expectations and location, returns, refunds, terms, conditions, cancellations, order assistance, etc., shall be controlled by the purchase agreement (Purchase Order, Contract, Invoice, etc.) (hereinafter "Supplemental Agreement") entered into between the TIPS Member Customer and Vendor only. TIPS is not a party to any Supplemental Agreement. All Supplemental Agreements shall include Vendor's Name, as known to TIPS, and TIPS Contract Name and Number. Vendor accepts and understands that TIPS is not a legal party to TIPS Sales and Vendor is solely responsible for identifying fraud, mistakes, unacceptable terms, or misrepresentations for the specific order prior to accepting. Vendor agrees that any order issued from a customer to Vendor, even when processed through TIPS, constitutes a legal contract between the customer and Vendor only. When Vendor accepts or fulfills an order, even when processed through TIPS Vendor is representing that Vendor has carefully reviewed the order for legality, authenticity, and accuracy and TIPS shall not be liable or responsible for the same. In the event of a conflict between the terms of this TIPS Vendor Agreement document and those contained in any attachment, the provisions set forth herein shall control unless otherwise agreed to by the Parties in writing.

8. **Payment for TIPS Sales.** TIPS Members may make payments for TIPS Sales directly to Vendor, Vendor's Authorized Reseller, or as otherwise agreed to in the applicable Supplemental Agreement after receipt of the invoice and in compliance with applicable payment statutes. Regardless of how payment is issued or received for a TIPS Sale. Vendor is responsible for all reporting and TIPS Administration Fee payment requirements as required by the TIPS Contract.

9. **Right of Refusal.** If awarded, Vendor has the right not to sell to a TIPS Member under the awarded agreement at Vendor's discretion unless otherwise required by law.

10. **Reporting TIPS Sales**. If awarded, Vendor must report all TIPS Sales to TIPS. If a TIPS sale is initiated by Vendor receiving a TIPS Member's purchase order from TIPS directly, Vendor may consider that specific TIPS Sale reported. Otherwise, with the exception of TIPS Automated Vendors, who have signed an exclusive agreement with TIPS regarding reporting, all TIPS Sales must be reported to TIPS by either: (1) Emailing the purchase order or similar purchase document (with Vendor's Name, as known to TIPS, and the TIPS Contract Name and Number included) to TIPS at tipspo@tips-usa.com with "Confirmation Only" in the subject line of the email within three business days of Vendor's acceptance of the order, or; (2) Within 3 business days of the order being accepted by Vendor, Vendor must login to the TIPS Vendor Portal and successfully self-report all necessary sale information within the Vendor Portal and confirm that it shows up accurately on your current Vendor Portal statement. No other method of reporting is acceptable unless agreed to by the Parties in writing. Failure to report all sales pursuant to this provision may result in immediate cancellation of Vendor's TIPS Contract(s) for cause at TIPS' sole discretion. Please refer to the TIPS Accounting FAQ's for more information about reporting sales and if you have further questions, contact the Accounting Team at accounting@tips-usa.com.

11. **TIPS Administration Fees.** The collection of administrative fees by TIPS, a government entity, for performance of these procurement services is required pursuant to Texas Government Code Section 791.011 et. seq. The administration fee ("TIPS Administration Fee") is the amount legally owed by Vendor to TIPS for TIPS Sales made by Vendor. The TIPS Administration Fee amount is typically a set percentage of the amount paid by the TIPS Member for each TIPS Sale, less shipping cost, bond cost, and taxes if applicable and identifiable, which is legally due to TIPS, but the exact TIPS Administration Fee for this Contract is published herein. TIPS Administration Fees are due to TIPS immediately upon Vendor's receipt of payment, including partial payment, for a TIPS Sale. The TIPS Administration Fee is assessed on the amount paid by the TIPS Member, not on the Vendor's cost or on the amount for which the Vendor sold the item to a dealer or Authorized Reseller. Upon receipt of payment for a TIPS Sale, including partial payment (which renders TIPS Administration Fees immediately due), Vendor shall issue to TIPS the corresponding TIPS Administration Fee payment as soon as possible but not later than thirty-one calendar days following Vendor's receipt of payment. Vendor shall pay TIPS via check unless otherwise agreed to by the Parties in writing. Vendor shall include clear documentation with the issued payment dictating to which sale(s) the amount should be applied. Vendor may create a payment report within their TIPS Vendor Portal which is the preferred documentation

dictating to which TIPS Sale(s) the amount should be applied. Failure to pay all TIPS Administration Fees pursuant to this provision may result in immediate cancellation of Vendor's TIPS Contract(s) for cause at TIPS' sole discretion as well as the initiation of collection and legal actions by TIPS against Vendor to the extent permitted by law. Any overpayment of participation fees to TIPS by Vendor will be refunded to the Vendor within ninety (90) days of receipt of notification if TIPS receives written notification of the overpayment not later than the expiration of six (6) months from the date of overpayment and TIPS determines that the amount was not legally due to TIPS pursuant to this agreement and applicable law. Any notification of overpayment received by TIPS after the expiration of six (6) months from the date that TIPS received the payment will render the overpayment non-refundable. Region 8 ESC and TIPS reserve the right to extend the six (6) month deadline if approved by the Region 8 ESC Board of Directors. TIPS reserves all rights under the law to collect TIPS Administration Fees due to TIPS pursuant to this Agreement.

12. **Confidentiality of Vendor Data.** Vendor understands and agrees that by signing this Agreement, all Vendor Data is hereby released to TIPS, TIPS Members, and TIPS third-party administrators to effectuate Vendor's TIPS Contract except as provided for herein. The Parties agree that Vendor Data is accessible by all TIPS Members as if submitted directly to that TIPS Member Customer for purchase consideration. If Vendor otherwise considers any portion of Vendor's Data to be confidential and not subject to public disclosure pursuant to Chapter 552 Texas Gov't Code (the "Public Information Act") or other law(s) and orders, Vendor must have identified the claimed confidential materials through proper execution of the Confidentiality Claim Form which is required to be submitted as part of Vendor's proposal resulting in this Agreement and incorporated by reference. The Confidentiality Claim Form included in Vendor's proposal and incorporated herein by reference is the sole indicator of whether Vendor considers any Vendor Data confidential in the event TIPS receives a Public Information Request. If TIPS receives a request, any responsive documentation not deemed confidential by you in this manner will be automatically released. For Vendor Data deemed confidential by you in this manner, TIPS will follow procedures of controlling statute(s) regarding any claim of confidentiality and shall not be liable for any release of information required by law, including Attorney General determination and opinion. In the event that TIPS receives a written request for information pursuant to the Public Information Act that affects Vendor's interest in any information or data furnished to TIPS by Vendor, and TIPS requests an opinion from the Attorney General, Vendor may, at its own option and expense, prepare comments and submit information directly to the Attorney General stating why the requested information is exempt from disclosure pursuant to the requirements of the Public Information Act. Vendor is solely responsible for submitting the memorandum brief and information to the Attorney General within the time period prescribed by the Public Information Act. Notwithstanding any other information provided in this solicitation or Vendor designation of certain Vendor Data as confidential or proprietary, Vendor's acceptance of this TIPS Vendor Agreement constitutes Vendor's consent to the disclosure of Vendor's Data, including any information deemed confidential or proprietary, to TIPS Members or as ordered by a Court or government agency, including without limitation the Texas Attorney General. Vendor agrees that TIPS shall not be responsible or liable for any use or distribution of information or documentation by TIPS Members or as required by law.

13. **Conflicts of Interest.** Vendor confirms that they have not offered, given, or accepted, nor intend to give at any time hereafter any economic opportunity, future employment, gift, loan, gratuity, special discount, trip, favor, service to the other in connection with this Agreement. Vendor affirms that, to the best of Vendor's knowledge, its proposal has been arrived at independently, and is awarded without collusion with anyone to obtain information or gain any favoritism that would in any way limit competition or give an unfair advantage over other vendors in the award of this Agreement. Vendor agrees that it will/has disclosed any necessary affiliations with Region 8 Education Service Center and the TIPS Department, if any, through the Conflict of Interest attachment provided in the solicitation.

14. **Volume of TIPS Sales.** Nothing in this Agreement or any TIPS communication may be construed as a guarantee that TIPS or TIPS Members will submit any TIPS orders to Vendor at any time.

15. **Exclusivity.** Any award under this solicitation is non-exclusive and TIPS reserves the right to award multiple vendors or not award any vendors. TIPS reserves the right to re-issue a solicitation or solicit the same or similar solicitation categories for additional similar awards at any time at TIPS sole discretion.

16. **Best and Final Offer.** Vendor's proposal shall be their best and final offer although deviations may be addressed and Vendor's TIPS Pricing may be updated as provided for herein.

17. **LIMITATION OF LIABILITY – Waiver.** BY SUBMITTING A PROPOSAL, OFFERER EXPRESSLY AGREES TO WAIVE ANY CLAIM IT HAS OR MAY HAVE AGAINST BOTH THE INTERLOCAL PURCHASING SYSTEM REGION 8 EDUCATION SERVICE CENTER, ITS DIRECTORS, OFFICERS, ITS TRUSTEES, OR AGENTS ARISING OUT OF OR IN CONNECTION WITH (1) THE ADMINISTRATION, EVALUATION, RECOMMENDATION OF ANY PROPOSAL; (2) ANY REQUIREMENTS UNDER THE SOLICITATION, PROPOSAL PACKAGE, OR RELATED

DOCUMENTS; (3) THE REJECTION OF ANY PROPOSAL OR ANY PART OF ANY PROPOSAL; AND/OR (4) THE AWARD OF AN AGREEMENT, IF ANY. NEITHER REGION 8 ESC NOR TIPS SHALL BE RESPONSIBLE OR LIABLE FOR ANY COSTS INCURRED BY PROPOSERS OR THE SELECTED CONTRACTOR IN CONNECTION WITH RESPONDING TO THE SOLICITATION, PREPARING FOR ORAL PRESENTATIONS, PREPARING AND SUBMITTING A PROPOSAL, ENTERING OR NEGOTIATING THE TERMS OF AN AGREEMENT, OR ANY OTHER EXPENSES INCURRED BY A PROPOSER. THE PROPOSER OR SELECTED CONTRACTOR IS WHOLLY RESPONSIBLE FOR ANY SUCH COSTS AND EXPENSES AND SHALL NOT BE REIMBURSED IN ANY MANNER BY REGION 8 ESC OR TIPS.

Public Notices Successions

PUBLIC NOTICE

IN THE MATTER OF

THE SUCCESSION OF

OUIDA MAE LOCKWOOD SWENSON

NO. P-98316 DIV. 25

19TH JUDICIAL DISTRICT COURT

PARISH OF EAST BATON ROUGE

STATE OF LOUISIANA

NOTICE OF APPLICATION FOR AUTHORITY TO SELL IMMOVABLE PROPERTY AT PRIVATE SALE

NOTICE IS GIVEN that CYNTHIA LOUSTEAU, Testamentary Executrix of the SUCCESSION OF OUIDA MAE LOCKWOOD SWENSON has, pursuant to the provisions of the Louisiana Code of Civil Procedure, article 3281, petitioned this Honorable Court for authority to sell at private sale, for the price of SEVEN HUNDRED NINETY-FIVE THOUSAND AND NO/100 DOLLARS ($795,000.00), the Succession's undivided one-half (1/2) interest in and to the following described property:

One certain lot or parcel of ground, together with all the buildings and improvements thereon, and with all of the rights, ways, privileges, servitudes and appurtenances thereunto belonging, or in anywise appertaining, situated in the Parish of East Baton Rouge, State of Louisiana, in Sections 63 and 64, T8S, R1E, and being designated as LOT KK-13 as show on map prepared by R. L. Bennett, Registered Land Surveyor, dated May 6, 1977, and being entitled "Final Plat Kenilworth Way Map Showing the Resubdivision of a Portion of the Kenilworth Prop., Inc. Property Located in Sec. 63 & 64, T-8-S, R-1-E, East Baton Rouge Parish, Louisiana, for Richard McDowell", a copy of said map being on file and of record in the office of the Clerk and Recorder for East Baton Rouge Parish in Map Book 169, page 355, said LOT KK-13 measuring Two Hundred Forty-six and 99/100 (246,99) feet front on Kenilworth Parkway by a depth on its southerly sideline along Highland Road of Two Hundred Six and 90/100 (206,90) feet, a depth on its northerly sideline of One Hundred Forty-two and 63/100 (142.63) feet, and measuring Two Hundred Fifty-Seven and 38/100 (257.38) feet across its rear; subject to a Seven and 5/10 (7.5) foot servitude across the rear and a Five (5) foot sidewalk servitude across the front. Being the same property acquired by Wayne Douglas Swenson, Sr. and Ouida Mae Lockwood Swenson by act dated June 28, 1977 and recorded as Original 362, Bundle 9218.

The property herein is presently designated by the municipal number 120 Kenilworth Parkway, Baton Rouge, Louisiana 70808.

NOW THEREFORE, in accordance with law, notice is hereby given that CYNTHIA LOUSTEAU, Testamentary Executrix, proposes to sell the aforesaid immovable property, at private sale, for the price and upon the terms aforesaid, and the heirs, legatees, and creditors are required to make opposition, if any they have or can, to such sale, within seven (7) days, including Sundays and holidays, from date whereon the last publication of this notice appears.

PUBLIC NOTICE

OFFICIAL NOTICE OF THE INTENT OF THE LOUISIANA STATE UNIVERSITY ECONOMIC DEVELOPMENT DISTRICT TO LEVY AND COLLECT A 1% SALES AND USE TAX AND A 1% HOTEL OCCUPANCY TAX WITHIN THE LOUISIANA STATE UNIVERSITY ECONOMIC DEVELOPMENT DISTRICT

The Louisiana State University Economic Development District **("District")**, a political subdivision of the State of Louisiana **("State")**, is an economic development district established by the State Legislature pursuant to R.S. 33:9038.76 **("Enabling Act")**, subject to the provisions of Chapter 27 of Title 33 of the Louisiana Revised Statutes of 1950, as amended (La. R.S. 33:9038.29 through 33:9038.42, inclusive) (collectively, **"Acts"**), and other constitutional and statutory authority.

Pursuant to the Acts, the District is empowered to levy and collect up to two percent (2%) of sales and use taxes, or up to two percent (2%) of hotel occupancy taxes, or any combination of such taxes, above and in addition to any other ad valorem taxes, sales taxes, or hotel occupancy taxes, or combination of such taxes, then in existence or permitted to be in existence in the District.

The public is hereby notified that the Board of Commissioners of the District, the governing authority of the District **("Board")**, intends to adopt a resolution authorizing the levy and collection of (a) a one percent (1%) tax upon the sale at retail, the use, the lease or rental, the consumption and storage for use or consumption of tangible personal property and on sales of services in the District and (b) a one percent (1%) hotel occupancy tax within the District commencing July 1, 2025 (collectively, **"New Tax"**).

The projects approved and funded by the District utilizing the New Tax will create economic development benefits to the City of Baton Rouge and the State of Louisiana.

PURSUANT TO LA. R.S. 38:9038.76, THE PUBLIC IS HEREBY NOTIFIED THAT THE BOARD OF COMMISSIONERS OF THE DISTRICT WILL MEET IN OPEN AND PUBLIC SESSION TO HOLD A PUBLIC HEARING TO HEAR ANY OBJECTIONS BY THE PUBLIC TO THE PROPOSED LEVY OF THE NEW TAX AND TO CONSIDER APPROVING THE LEVY AND COLLECTION OF THE NEW TAX BY ADOPTING THE ABOVE DESCRIBED RESOLUTION AT ITS MEETING TO BE HELD ON THURSDAY, MAY 22, 2025, 1:30 P.M., AT THE LSU FOUNDATION, THIRD-FLOOR TRAINING ROOM, 3796 NICHOLSON DRIVE, BATON ROUGE, LA 70802.

Louisiana Public Facilities Authority

On motion of Trustee Guidry, seconded by Trustee Cheramie, the following resolution was adopted:

RESOLUTION

A resolution making certain findings with respect to and authorizing the issuance of not exceeding $159,000,000 aggregate principal amount of Louisiana Public Facilities Authority Revenue Bonds (Acadiana Renaissance Charter Academy Project) in one or more series, on a taxable or tax-exempt basis; approving the form and authorizing the execution and delivery of a Trust Indenture, a Loan Agreement and a Bond Purchase Agreement for the Bonds; approving the distribution of a Preliminary Limited Offering Memorandum and a final Limited Offering Memorandum for said Bonds; approving the sale of the Bonds; ratifying the publication of a Notice of Sale of Bonds and a Notice of Public Hearing; authorizing the execution of other documents in connection therewith; authorizing the officers and trustees of the Authority to do all things necessary to effectuate this resolution; and providing for other matters in connection with the foregoing.

WHEREAS, the Louisiana Public Facilities Authority (the "Authority") is a public trust and public corporation of the State of Louisiana (the "State") created and existing pursuant to the provisions of Chapter 2-A of Title 9 of the Louisiana Revised Statutes of 1950, as amended (the "Act"), and is authorized and empowered by law, including particularly the provisions of the Act, to issue its revenue bonds for the purpose of financing, acquiring, constructing, purchasing, equipping, maintaining, installing, leasing, subleasing, holding, extending, enlarging, remodeling, storing, operating, repairing and administering educational services and facilities; and

WHEREAS, the Authority adopted a resolution on March 12, 2025, authorizing the execution of a preliminary agreement between the Authority and Friends of Lafayette Charter Foundation, Inc., a Louisiana nonprofit corporation (the "Borrower"), authorizing the issuance of revenue bonds in one or more series, on a taxable or tax-exempt basis pursuant to the Act and authorizing the form of and publication of a Notice of Sale of Bonds and a Notice of Public Hearing; and

WHEREAS, the State Bond Commission (the "Commission") on April 22, 2025, granted its approval of the issuance by the Authority of its revenue bonds in the aggregate principal amount of not exceeding $159,000,000 in one or more series; and

WHEREAS, the Borrower has requested that the Authority issue in one or more series not exceeding $159,000,000 Louisiana Public Facilities Authority Revenue Bonds (Acadiana Renaissance Charter Academy Project) Series 2025 (the "Bonds") for the purposes of (i) financing the acquisition of buildings and other improvements constructed on leased land upon which is located the Acadiana Renaissance Charter Academy (the "School"), a kindergarten through twelfth grade, tuition free, public charter school in Youngsville, Louisiana (the "Project"), (ii) funding one or more reserve funds, and (iii) paying the costs of issuance of the Bonds (collectively, the "Project"), pursuant to an Trust Indenture (the "Indenture"), between the Authority and Regions Bank (the "Trustee"), the proceeds of which Bonds are to be loaned to the Borrower pursuant to a Loan Agreement between the Authority and the Borrower (the "Loan Agreement"); and

WHEREAS, multiple separate limited liability companies of which Red Apple Development, LLC is the sole member (collectively, the "Ground Lessor") own the parcels of land on which the School is located (the "Land") and at delivery of the Bonds, it is expected that they will lease the Land and the School located thereon to the Borrower which will sublease the land and lease the Project to Lafayette Charter Foundation, Inc. (the "Operator") which will have a leasehold interest in the Project pursuant to which it will make rental payments under one or more agreements providing for such lease and sublease (collectively, the "Facilities Lease and Ground Sublease Agreement"); and

WHEREAS, pursuant to the Loan Agreement, the Borrower will agree to make payments in an amount sufficient to make timely payments of principal of, premium, if any, and interest on the Bonds and to pay such other amounts as are required by the Loan Agreement; and

WHEREAS, all requirements of the Commission evidenced by its rules and regulations, including but not limited to notice to local legislators, have been complied with; and

WHEREAS, the Authority is authorized under the provisions of the Act and other constitutional and statutory authority to issue and sell the Bonds for such purposes and the Authority has determined that it is most advantageous to the Authority and necessary for it to issue its revenue bonds as hereinafter provided for such purposes; and

WHEREAS, the Authority has determined that the issuance and sale of the Bonds and the use of the proceeds thereof as described herein will be in furtherance of the public purposes intended to be served by the Act; and

WHEREAS, all consents and approvals required to be given by public bodies in connection with the authorization, issuance and sale of the Bonds as authorized by the Indenture and as required by the Act have been or will be secured prior to the delivery of the Bonds; and

WHEREAS, Herbert J. Sims & Co., Inc. (the "Underwriter"), has prepared and submitted to the Operator, the Borrower, and the Authority a Preliminary Limited Offering Memorandum and will prepare and submit to the Operator, the Borrower and the Authority a final Limited Offering Memorandum for use in connection with the offer and sale of the Bonds; and

WHEREAS, the Underwriter proposes to arrange for the purchase of the Bonds in accordance with the terms of a bond purchase agreement by and among the Underwriter, the Borrower, the Operator and the Authority (the "Bond Purchase Agreement") with respect to the Bonds; and

WHEREAS, the Authority now desires to fix the details necessary with respect to the issuance and sale of the Bonds, to authorize the execution and delivery of the Loan Agreement, the Indenture and the Bond Purchase Agreement, to ratify the publication of a Notice of Public Hearing and a Notice of Sale of Bonds, to authorize the sale of the Bonds, and to provide for the execution of certain instruments, documents and certificates in connection therewith; and

NOW, THEREFORE, BE IT RESOLVED by the Louisiana Public Facilities Authority that:

SECTION It is the public purpose and within the power and authority vested in the Authority under the Act to provide funds for the financing of the Project through the issuance of the Bonds as limited and special revenue obligation bonds of the Authority. The financing of the Project through the issuance of the Bonds will foster and be in furtherance of the objectives of the Act by providing for and assisting in furthering the educational purposes of the State and its inhabitants.

SECTION The Authority hereby authorizes the issuance of the Bonds as Louisiana Public Facilities Authority Revenue Bonds (Acadiana Renaissance Charter Academy Project) with an appropriate series designation for the purposes of (i) financing the acquisition of Acadiana Renaissance Charter Academy, a kindergarten through twelfth grade, tuition free, public charter school in Youngsville, Louisiana, (ii) funding one or more reserve funds, and (iii) paying the costs of issuance of the Bonds. The Bonds shall be issued in the total aggregate principal amount of not exceeding $159,000,000 and shall be issued as fully registered bonds in the denomination of $100,000 or any integral multiple of $5,000 in excess thereof, shall mature not later than June 15, 2059, and shall bear interest at a fixed or variable rate not to exceed 7.13% per annum on a tax-exempt or taxable basis, all as set forth in the Indenture.

SECTION The Authority hereby authorizes the sale of the Bonds to the Underwriter pursuant to the terms of the Bond Purchase Agreement to be entered into by and among the Underwriter, the Borrower, the Operator and the Authority. The sale of all or a portion of the Bonds to the Underwriter at a price of not less than 90% of the principal amount thereof (inclusive of underwriter's discount in an amount not exceeding 3% of the principal amount thereof) is hereby approved.

SECTION The form, terms and provisions of the Indenture and the Loan Agreement are hereby approved in substantially the same form as submitted to the Authority and filed with the official minutes of the Authority, all of the provisions of which are hereby made a part of this resolution, with such additions, omissions and changes as may be approved by bond counsel to the Authority. The Chairman or Vice Chairman and the Secretary-Treasurer or an Assistant Secretary of the Authority be and they are hereby authorized, empowered and directed to execute the Indenture, the Loan Agreement and the Bond Purchase Agreement for, on behalf of and in the name of the Authority, in accordance with the provisions and requirements of the Act.

The Bonds are issued under and secured by the Indenture which provides a complete description of the pledged property and revenues constituting the Trust Estate, as defined in the Indenture (which includes, among other things, all of the Authority's rights, title and interest in and to payments under the Loan Agreement and mortgages on the facilities and assignments of leases and rents by the Borrower and by the Ground Lessor in favor of Regions Bank), the nature and extent of the security, a statement of the terms and conditions on which the Bonds are issued and secured; the rights, duties and obligations of the Authority, the rights, duties and immunities of the Trustee, and the rights of the owners of the Bonds.

The Bonds are hereby expressly authorized to be signed by the Chairman or Vice Chairman of the Authority, said signatures shall be attested by the signature of the Secretary-Treasurer or an Assistant Secretary of the Authority, and the signatures of the Chairman or Vice Chairman and Secretary-Treasurer or Assistant Secretary may be evidenced by their facsimile signatures.

The Bonds are limited and special obligations of the Authority and do not constitute or create an obligation, general or special, debt, liability or moral obligation of the State or of any political subdivision thereof, within the meaning of any constitutional or statutory provisions whatsoever, and neither the faith or credit nor the taxing power of the State or of any political subdivision thereof is pledged to the payment of the principal of, premium, if any, or the interest on the Bonds. The Bonds are not general obligations of the Authority (which has no taxing power and receives no funds from any governmental body), but they are limited and special revenue obligations of the Authority payable from the income, revenues and receipts derived or to be derived from payments made pursuant to the Loan Agreement and the Borrower's lease of the Project to the Operator, and are further secured by the Multiple Indebtedness Leasehold Mortgages, Assignment and Pledge of Leases and Rents and Security Agreements by the Borrower in favor of the Mortgagee and the Multiple Indebtedness Mortgages, Assignment and Pledge of Leases and Rents and Security Agreement by the Ground Lessor in favor of the Mortgagee.

SECTION The Authority hereby ratifies the publication of (i) the Notice of Public Hearing on the website of the Authority on April 2, 2025, and (ii) the Notice of Sale of Bonds in The Advocate and The Bond Buyer on April 23, 2025.

SECTION This Board of Trustees does hereby authorize the distribution by the Underwriter of a Preliminary Limited Offering Memorandum and a final Limited Offering Memorandum in connection with the sale of the Bonds; provided, however, that neither this Board of Trustees nor the Authority makes any representation or warranty, either express or implied, as to the accuracy or completeness of the information contained therein (other than under the heading "INTRODUCTION – Authority to Issue," "THE ISSUER" and "ABSENCE OF MATERIAL LITIGATION - The Issuer"). The Chairman or Vice Chairman of this Board of Trustees is hereby authorized, empowered and directed to execute and deliver the Limited Offering Memorandum to the Underwriter in accordance with the terms of the Bond Purchase Agreement.

SECTION The Chairman or Vice Chairman and Secretary-Treasurer or Assistant Secretary of the Authority shall have prepared and shall execute for and on behalf of the Authority the Bonds, and shall deliver the same to the Trustee for authentication. The Trustee shall, upon authentication of the Bonds, deliver the same in one or more series to the Underwriter in accordance with the Indenture and the Bond Purchase Agreement and shall receive from the Underwriter for the account of the Authority the purchase price and shall hold the proceeds of the Bonds in the funds and accounts as prescribed in the Indenture. The Trustee is hereby requested and authorized to authenticate the Bonds.

SECTION The Chairman or the Vice Chairman and the Secretary-Treasurer or an Assistant Secretary of the Authority are hereby further authorized and directed, for and on behalf of the Authority, to accept, receive, execute, seal, attest and deliver all such documents, certificates and other instruments as are required, necessary, convenient and appropriate in connection with the authorization, issuance, sale and delivery of the Bonds, the Indenture and the Loan Agreement, including, but not limited to, the Tax Regulatory Agreement by and among the Authority, the Trustee, the Borrower and the Operator, and to take such further action as may be required by the Commission or bond counsel to the Authority or appropriate or required by law in connection with the authorization, issuance, sale and delivery of the Bonds. Said officers are hereby further authorized and directed to approve for, on behalf of, and in the name of the Authority any changes, additions or deletions in any of the documents, instruments or certificates referred to in this resolution, provided that all such changes, additions or deletions, if any, shall be approved by bond counsel to the Authority and shall be consistent with the authority provided by the Act. The signatures of the said Chairman, Vice Chairman, Secretary-Treasurer or Assistant Secretary upon such documents set forth above, or as may be otherwise required for or necessary, convenient or appropriate to the financing described in this resolution, are deemed to be conclusive evidence of their due exercise of the authority vested in them hereunder.

SECTION The Chairman or Vice Chairman of the Authority are hereby further authorized to take such action as is necessary, on the advice of bond counsel to the Authority, to effectuate and implement this resolution including the publication hereof as required by the Act.

SECTION ~~By virtue of the Authority's application~~ for, acceptance and utilization ~~of the benefits of the State~~ Bond Commission's approval, the Authority ~~understands and agrees that such approval~~ is expressly conditioned ~~upon, and further understands, agrees and~~ binds itself, its successors and ~~assigns, to full and continuing compliance~~ with the "State Bond Commission ~~Policy on Approval of Proposed~~ Use of Swaps, or other forms of Derivative Products, Hedges, Etc.," adopted by the Commission on July 20, 2006, as to the borrowing and other matters subject to the approval, including approval under said Policy of the implementation or use of any swaps or other products or enhancements covered thereby.

SECTION This resolution shall be published one time in the official journal of the Authority.

SECTION This resolution shall become effective immediately.

This resolution having been submitted to a vote, the vote thereon was as follows:

Member	Yea	Nay	Absent	Abstaining
Ronald H. Bordelon	X			
Craig A. Cheramie	X			
David W. Groner	X			
Casey R. Guidry	X			
Dannye W. Malone	X			
Heather C. Songy	X			
Matthew T. Valliere				X

This resolution declared adopted on this 30th day of April, 2025.

(Other items of business not pertinent to the foregoing resolution and the documents mentioned therein may be found in the official minutes of the Board of Trustees of the Authority.)

Upon motion duly made, seconded and unanimously carried, the meeting was adjourned.

I, the undersigned, do hereby certify that I am an Assistant Secretary of the Board of Trustees of the Louisiana Public Facilities Authority (the "Authority"), a public trust duly organized and existing under and by virtue of the laws of the State of Louisiana, and as such Assistant Secretary I have access to all records of the Authority.

I do hereby further certify that at a meeting of the Board of Trustees of the Authority duly called, held and convened, according to law, on April 30, 2025 a quorum being present and voting thereon, the above and foregoing Resolution was unanimously adopted and that said Resolution is a full true and correct copy of the said Resolution as it appears on the records of the Authority; that the same has not been revoked or amended and is now in full force and effect.

IN WITNESS WHEREOF, I have hereunto set my hand and attached the seal of the Authority this 30th day of April, 2025.

LAURENT LAIRYS Abaca Press via Sipa USA

Top-seeded Aryna Sabalenka won 28 of her 36 first-serve points to beat Peyton Stearns 6-2, 6-4 in the Mutua Madrid Open on Tuesday.

Sabalenka, Swiatek, Keys reach Madrid QFs

Field Level Media

No. 1 seed Aryna Sabalenka of Belarus sailed past American foe Peyton Stearns 6-2, 6-4 on Tuesday to reach the quarterfinals of the Mutua Madrid Open.

Sabalenka headlines an intriguing final eight at the WTA 1000 event, which will also feature a duel between No. 2 seed Iga Swiatek of Poland and No. 5 Madison Keys of the U.S. after they took care of business Tuesday.

Sabalenka saved 12 of 13 break points, including 10-for-10 in the first set, while winning 28 of her 36 first-serve points (77.8 percent).

It marked the World No. 1's 28th match victory this year, which leads the WTA Tour by one over Jessica Pegula.

As she searches for her second WTA 1000 title of 2025 following last month's triumph in Miami, Sabalenka will face Ukrainian No. 24 seed Marta Kostyuk in the quarterfinals. Kostyuk was a 6-3, 6-2 winner over Russia's Anastasia Potapova in the Round of 16.

Swiatek fended off a push from Russian 13th seed Diana Shnaider and won 6-0, 6-7 (3), 6-4 on Tuesday.

Swiatek felt she moved better and put greater spin on her shots during the third set, when she won all five of her service games and 14 of 19 first-service points.

"In second set it got pretty windy, and I didn't move my legs properly," Swiatek said after the match. "I played some shots like not being ready, you know, so for sure that kind of kept my rhythm off. And then Diana also used her chances, and she was more proactive than in the first set. So I think it was a mix of different things."

Australian Open champion Keys eased past No. 19 seed Donna Vekic of Croatia 6-2, 6-3. Keys saved 2 of 3 break points while converting 5 of 8 break-point opportunities against Vekic.

Keys faces a tall task in the quarterfinals against her Polish counterpart. Swiatek is 4-2 against Keys all-time.

"I think obviously you look at matches that you won and you figure out why you won them, and you look at matches why you lost, and you try to figure out what you did wrong or what she did really well that day and then you try to come up with a game plan," Keys said of facing Swiatek.

"I think obviously it's a little bit different when you're on a surface that she loves (clay) and she does really well on and all of that. I think you have to take that into account and just kind of go one step further with that and just try to figure out how do you kind of elevate your game a little bit more because I think you have to."

Also Tuesday, No. 17 seed Elina Svitolina of Ukraine beat Greece's Maria Sakkari 6-3, 6-4, and Japan's Moyuka Uchijima overcame No. 21 seed Ekaterina Alexandrova of Russia 6-4, 7-6 (5).

The quarterfinals will also see No. 4 seed Coco Gauff take on No. 7 seed Mirra Andreeva of Russia. Gauff and Andreeva won their Round of 16 matches Monday before a nationwide power outage occurred in Spain, postponing the tournament.

SVEN HOPPE dpa via Sipa USA

For the second consecutive year, Francisco Cerundolo, seen here on April 18, defeated Alexander Zverev to advance to the quarterfinals of the Madrid Open. On Tuesday, Cerundolo won 50 of his 70 total service points to dispatch the top-seeded Zverev 7-5, 6-3.

Cerundolo downs top seed Zverev in Madrid Open

Field Level Media

No. 20 seed Francisco Cerundolo of Argentina dismissed top seed Alexander Zverev of Germany 7-5, 6-3 on Tuesday to advance to the quarterfinals of the Madrid Open.

Cerundolo defeated Zverev in the Round of 16 at this ATP Masters 1000 event for the second year in a row. He is 3-0 against Zverev all-time, including a quarterfinal victory over him in Buenos Aires earlier this season.

"I'm super happy because I know he loves playing here. He told me last year when I beat him," Cerundolo said post-match. "He's an incredible player. I have a great relationship with him, so super happy to get another win and to be in the quarterfinals again."

Cerundolo won 50 of his 70 total service points (71.4 percent) and went 7-for-7 on points at the net. Zverev managed only six winners with 23 unforced errors.

After he ended Zverev's seven-match winning streak, Cerundolo's next task will be to face Czech No. 22 seed Jakub Mensik, who is on a nine-match winning streak dating to his ATP 1000 title in Miami last month.

Mensik breezed past Kazakhstan's Alexander Bublik 6-3, 6-2 in just 56 minutes in their Round of 16 match. Bublik was caught on camera facetiously asking the chair umpire, "Remember when tennis was easy? ... Now this guy (Mensik) is not even Top 5, not even Top 10. (Expletive) is that?"

In the same region of the draw, No. 14 seed Casper Ruud of Norway knocked out No. 3 seed Taylor Fritz of the United States 7-5, 6-4, in the late match of the day. Ruud had a 27-19 edge in total winners and also won 9 of 10 points at the net.

Ruud will face No. 9 seed Daniil Medvedev of Russia in the quarterfinals after Medvedev rallied past American No. 31 Brandon Nakashima 3-6, 6-1, 6-4.

The rest of the matches Tuesday were Round of 32 affairs, as the tournament plays catch-up after a nationwide power outage Monday interrupted the event.

British No. 5 seed Jack Draper advanced when his opponent, No. 30 seed Matteo Berrettini of Italy, retired after Draper took the first set 7-6 (2).

Australian sixth seed Alex de Minaur defeated Canadian No. 29 Denis Shapovalov 6-3, 7-6 (3), while No. 10 Lorenzo Musetti of Italy topped No. 17 Stefanos Tsitsipas of Greece 7-5, 7-6 (3).

Two more Americans advanced to the Round of 16 when No. 11 seed Tommy Paul outlasted No. 24 Karen Khachanov of Russia 6-3, 3-6, 6-2, and No. 16 seed Frances Tiafoe swept Frenchman Alexandre Muller 6-3, 6-3.

Canadian lucky loser Gabriel Diallo remained alive when he charged past Great Britain's Cameron Norrie 2-6, 6-4, 6-4.

Then playing for Kansas, Lagerald Vick whips a pass around K-State's Xavier Sneed and Dean Wade during a 2019 Big 12 game men's basketball game at Bramlage Coliseum in Manhattan.

Two former Kansas Jayhawks sign up for KU's alumni entry in summertime TBT

BY GARY BEDORE
gbedore@kcstar.com

Former University of Kansas men's basketball guards Nick Timberlake and Lagerald Vick on Tuesday became the first two players to commit to playing for JHX Hoops, KU's alumni entry in The Basketball Tournament (TBT 2025).

JHX Hoops will co-host the TBT's Kansas City Regional with Kansas State's alumni team, Purple Reign. The regional will be held July 19-23 at Kansas City's Municipal Auditorium.

Additional roster announcements will be made in coming weeks.

This will be the third straight summer Vick plays for KU's alumni team, formerly known as Mass Street.

Vick has averaged 10.7 points and 3.3 rebounds per game in TBT in the last two years, helping lead the Kansas alumni to back to back regional final appearances.

Vick spent four years at Kansas (2015-19). He began his professional career in Taiwan in 2019 and has since played professionally across South America and New Zealand.

Timberlake will be making his TBT debut for JHX Hoops. He competed at KU in 2023-24. He spent spent his first professional season playing in Portugal and England.

The winner of the Kansas City Regional will advance to TBT's quarterfinals on July 28. The semifinals will be held on July 31, and TBT's $1 million championship will be played on Aug. 3.

For the first time, TBT will give each host team the opportunity to have home court advantage for the quarterfinals, semifinals and the $1 million championship game. Should two regional hosts face off, the tiebreaker will be determined by which host sells 4,000 tickets first.

For more information on this year's TBT or JHX Hoops, visit tbthoops.com.

Gary Bedore: 816-234-4068, @garybedore

No KU Jayhawks or KSU Wildcats are invited to NBA pre-draft events this year

BY GARY BEDORE
gbedore@kcstar.com

Kansas Jayhawks seniors Hunter Dickinson, Dajuan Harris, Zeke Mayo and Shakeel Moore will not be attending the 2025 NBA G League Elite camp Friday through Sunday at Wintrust Arena in Chicago.

Their names, as well as the names of Kansas State men's hoops players Coleman Hawkins and David N'Guessan, were not among the 45 pro prospects asked to participate in strength and agility drills and 5-on-5 games. Those 45 will also have their measurements taken in front of scouts, front office executives and coaches at the weekend event.

Seventy-five pro prospects were asked to attend the 2025 NBA Draft Combine, which runs Sunday through May 18 in the Windy City.

Incoming KU senior wing Melvin Council Jr., a transfer from St. Bonaventure who has entered his name in the 2025 NBA Draft, was not invited to either pre-draft event. He has until May 28 to remove his name from the draft if he wishes to play a final season of college basketball at KU.

Missouri's Tamar Bates and Caleb Grill received invitations to the G League camp Monday with Big 12 players Keshon Gilbert and Curtis Jones of Iowa State; Caleb Love of Arizona; Chance McMillan of Texas Tech; and Joson Sanon of Arizona State.

If the two Tigers fare well at G League camp, they could be extended invitations to stay in Chicago for the Combine.

Player agents are free to set up workouts with individual NBA teams in advance of the NBA Draft, slated for June 25-26 in Brooklyn.

Texas Tech's Darrion Williams and St. John's R.J. Luis, who are in both the draft pool and transfer portal, have been invited to attend the NBA Draft Combine Sunday through May 18 in Chicago. Both are considering KU as transfer destinations.

Big 12 players who have been invited to the 2025 NBA Combine include: Carter Bryant, Arizona; Egor Demin, BYU; VJ Edgecombe, Baylor; Javon Small, West Virginia and Milos Uzan, Houston.

There is still a slight chance KU's Mayo, a 6-4 senior from Lawrence, could return for a fifth college season. He has entered his name in the NCAA transfer portal with a no-contact tag in case the NCAA approves a proposed rule granting fourth-year players a fifth season.

Gary Bedore: 816-234-4068, @garybedore

DOMINICK WILLIAMS dowilliams@kcstar.com

Kansas Jayhawks guard Zeke Mayo celebrates after hitting a 3-pointer in the second half of the Big 12 Championship quarterfinal game vs. the Arizona Wildcats on Thursday, March 13, 2025 at T-Mobile Center.

Hearings and Minutes

(CD4054958)
NOTICE OF HEARING
CASE CD 2025-001499

BEFORE THE CORPORATION COMMISSION OF THE STATE OF OKLAHOMA

APPLICANT: SURGE ENERGY TECHNOLOGIES, LC RELIEF SOUGHT: VERTICAL DRILLING AND SPACING UNITS LEGAL DESCRIPTION: E/2 SE/4 NE/4 AND E/2 NE/4 SE/4 OF SECTION 8 AND W/2 OF SECTION 9, TOWNSHIP 3 NORTH, RANGE 1 EAST, GARVIN COUNTY, OKLAHOMA

NOTICE IS HEREBY GIVEN that Applicant requests that the Commission enter an order:

(a) vacating Order No. 105748, insofar as said order established 160-acre drilling and spacing units for the production of gas and gas condensate from the McLish and Oil Creek common sources of supply underlying the NW/4 of said Section 9, Township 3 North, Range 1 East, Garvin County, Oklahoma;

(b) vacating Order No. 127830, insofar as said order established 40-acre drilling and spacing units for the production of oil and gas from the Pennsylvanian Sands and the Bromide Sands of supply underlying the E/2 SW/4 of said Section 9, Township 3 North, Range 1 East, Garvin County, Oklahoma;

(c) establishing 160-acre drilling and spacing units for the production of gas and gas condensate from the Permian, Cisco, Hoxbar, Bromide, McLish, Oil Creek and Arbuckle common sources of supply underlying the E/2 SE/4 NE/4 and E/2 NE/4 SE/4 of Section 8, Township 3 North, Range 1 East, Garvin County, Oklahoma, and the SW/4 NW/4, W/2 SE/4 NW/4, NW/4 SW/4 and W/2 NE/4 SW/4 of Section 9, Township 3 North, Range 1 East, Garvin County, Oklahoma. Applicant further requests that the order to be entered in this cause be made effective on some date prior to the date of the hearing; and

(d) establishing 100-acre drilling and spacing units for the production of gas and gas condensate from the Permian, Cisco, Hoxbar, Bromide, McLish, Oil Creek and Arbuckle common sources of supply underlying the N/2 NW/4 and E/2 SE/4 NW/4 and the S/2 SW/4 and E/2 NE/4 SW/4 of Section 9, Township 3 North, Range 1 East, Garvin County, Oklahoma. Applicant further requests that the order to be entered in this cause be made effective on some date prior to the date of the hearing.

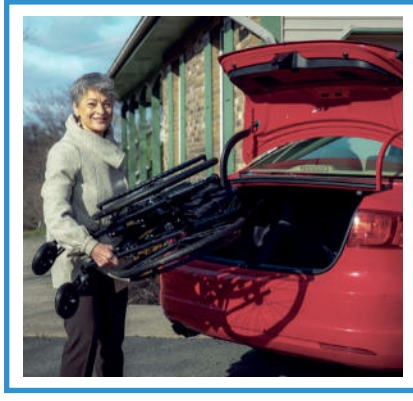
The World's Lightest Wheelchair

For those of us who've found daily activities becoming more challenging, there's a remarkable breakthrough in mobility that's changing lives. This ultra-lightweight wheelchair is nothing like the bulky and heavy models of yesterday weighing over 35lbs! - imagine gliding effortlessly through your garden again, joining your family at the park, or meeting friends for coffee, all without worry of fatigue or dependency. Why not take that first step toward renewed freedom? Your next chapter of independence is here.

Throughout the ages, there have been significant advancements in mobility aids. From canes to walkers, rollators, and scooters, these devices were created to help those with mobility issues maintain their independence. However, there haven't been any truly revolutionary new products in this field until now. Until now, that is, because a team of engineers has developed something that's set to change the game. They've created the world's lightest wheelchair, weighing only 13.5 lbs, a personal mobility solution that's been called a game-changer. It's called the **Featherweight Wheelchair**, and there is nothing out there quite like it.

The first thing you'll notice about the **Featherweight Wheelchair** is how light it is! This is the world's lightest wheelchair at 13.5lbs, making it possible for anyone to lift into a vehicle. It's modern design and custom color options make it very lightweight, durable, and great to look at.



Why take our word for it? Call now, and **receive $50 Off** when you purchase a **Matte Black Featherweight Wheelchair! Only $599!** Mention CODE 50FEATHER to start your journey towards effortless mobility.

Jennifer F. us
Verified Buyer

★★★★★ **Lightweight wheelchair**

It's so light weight that it's no problem to lift in and out of the back of my car. It's also easy to set up and collapse down. It is very compact and the wheels come off for compact packing alongside luggage or groceries etc. My Mom finds it very comfortable to ride in as well and enjoys the look. We both love it.

★★★★★ **Lightweight wheelchair**

It's so light weight that it's no problem to lift in and out of the back of my car. It's also easy to set up and collapse down. It is very compact and the wheels come off for compact packing alongside luggage or groceries etc. My Mom finds it very comfortable to ride in as well and enjoys the look. We both love it.

NFL POWER RANKINGS

Where do all 32 teams stand with draft complete?

Nate Davis
USA TODAY

Among the prominent players to watch in 2025 will be, from left, Patrick Mahomes, Travis Hunter and Aaron Rodgers.
ILLUSTRATION BY SPENCER HOLLADAY; PHOTOS BY IMAGN IMAGES AND GETTY IMAGES

NFL power rankings with the 2025 draft now complete (previous rank in parentheses):

1. Philadelphia Eagles (1): Even coming off a dominant Super Bowl triumph over an active dynasty, it very much feels like this team is positioned to achieve even more – which may be especially true given executive vice president/general manager Howie Roseman somehow winds up with a player like LB Jihaad Campbell joining the roster at the end of the draft's first round. Rich and richer, etc., etc.

2. Baltimore Ravens (3): Perhaps you don't love the choice of second-round OLB Mike Green philosophically – which is especially puzzling for an organization that now appears appropriately poised to part with K Justin Tucker after drafting a new one. Yet it's also hard to deny that a team that's gone 25-9 over the past two regular seasons seems to be picking up steam, especially given QB Lamar Jackson's amazing knack for continuous improvement.

3. Los Angeles Rams (4): Once and future kings? Three years removed from winning the Super Bowl, the new-look Rams were the only team to challenge Philly in the playoffs. Now they've swapped out WR Cooper Kupp for Davante Adams, added more fresh talent to the defense, and are set up to replace QB Matthew Stafford (if need be) with multiple first-round selections in 2026.

4. Kansas City Chiefs (5): Speaking of that aforementioned dynasty, if ever a perennial contender coming off a 17-3 season, its ninth straight division title and fifth Super Bowl berth in six seasons felt vulnerable ... well, maybe that notion has actually already passed? Whenever he's physically ready, first-round LT Josh Simmons seems capable of stabilizing QB Patrick Mahomes' blind side for a very long time. Mahomes' comfort level should be further improved by the return of WR Rashee Rice, even if he has to serve a suspension, from injury. The road to the AFC crown still very much runs through Arrowhead.

5. Buffalo Bills (2): This slightly subdued ranking is less a suggestion that they're dropping but more an acknowledgment that the other closely packed Super Bowl aspirants have improved more significantly – not to mention the likelihood that the AFC East probably won't be the cakewalk it's been in recent years. But we don't mind you passing on wide receivers in the draft, Brandon Beane.

6. Washington Commanders (6): A team that did a notably poor job of drafting prior to the arrival of GM Adam Peters and HC Dan Quinn in 2024 now seems to be steadily building a strong foundation, yet shouldn't need to be overly reliant on its latest crop of rookies in 2025.

7. Detroit Lions (7): Hard to argue with any draft that strongly resources the trenches. The biggest question in Motown remains how well the two-time defending NFC North champs transition to two new coordinators.

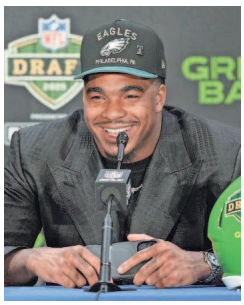
8. Green Bay Packers (8): As good as they were in 2024, the sum of the parts seemed greater than the whole in what was something of a mirrored outcome compared to the 2023 team. But the newest part, first-round WR Matthew Golden, and the apparent retention of another, Pro Bowl CB Jaire Alexander, could be signs that the "Go Pack Go" you heard throughout draft weekend could continue deep into the upcoming season.

9. Tampa Bay Buccaneers (9): They're quite obviously capable of running the NFC South for the foreseeable future. But do they have the juice to consistently make deep playoff runs, especially after picking another receiver (Emeka Egbuka) in the first round when difference-makers for the defensive front seven seemed readily available?

10. Houston Texans (18): Sure seems as if they'll need to mount an exceptional effort ... to *not* win the AFC South in 2025. That might explain some of their willingness to make so many fundamental changes to the offense, modifications surely aimed at much bigger objectives than obtaining another divisional crown.

11. Los Angeles Chargers (10): The 49ers reached the Super Bowl in their second season under Jim Harbaugh (of course, they also qualified for the conference championship round in their first). For the Bolts to match those 2013 Niners in Year 2, they'll need to leverage the advantage of their hefty continuity while hoping Harbs can help the roster's young core truly blossom.

12. Cincinnati Bengals (13): Their draft wasn't especially inspiring. But this club's primary obstacles still seem to be issues that must be solved from within – giving DE Trey Hendrickson the raise he deserves and avoiding another disastrous September start, problems that threaten to become disastrously intertwined.



13. Denver Broncos (17): It's easy (and justifiable) to link their quick turnaround to HC Sean Payton and QB Bo Nix. It also seems a bit easy to lose sight of what an elite defense this could be, especially with the arrival of first-round DB Jahdae Barron.

14. San Francisco 49ers (11): We're eight seasons into the John Lynch-Kyle Shanahan regime – half ending outside the playoffs, the other half extending at least as far as the NFC title game. Despite a significant offseason recalibration, the Niners seem too good to miss the postseason again ... assuming they don't get swamped by another litany of injuries.

15. Seattle Seahawks (12): Speaking of recalibrating, they could have five new starters on offense, most notably QB Sam Darnold and Kupp. If first-year coordinator Klint Kubiak can balance the unit – meaning sustained emphasis on the run, which is what HC Mike Macdonald wants – feasible chance they don't wind up a tiebreaker shy of the playoffs again.

16. Pittsburgh Steelers (26): Despite an ongoing offseason of uncertainty, no one should suggest switching out Russell Wilson for Aaron Rodgers – assuming he ever signs a contract – is a lateral move at quarterback. Forward lateral? Maybe. But if the Steelers truly hope to punctuate another 9-8 season with a long-awaited postseason win, the most important components could be third-round RB Kaleb Johnson and a young offensive line that needs to fully coalesce.

17. Arizona Cardinals (15): A team that (quietly?) doubled its win total from four to eight in 2024 has basically left an 11th-ranked offense untouched while overhauling a 21st-ranked defense. What it means is TBD, though it would be easier to back the Cards as a dangerous 2025 dark horse if they weren't stuck in a division that's probably the league's roughest top to bottom.

Jihaad Campbell is the latest Georgia Bulldog drafted by the Super Bowl champion Eagles. KIRBY LEE/IMAGN IMAGES

18. Minnesota Vikings (14): Admittedly, they were devalued at this time a year ago – basically universally – given the unknown at quarterback. And while the totality of talent on the roster (and coaching staff) might be in sharper focus now, the unknown at quarterback remains.

19. Chicago Bears (16): Did you know they haven't won a playoff game in 14 years? Perhaps the organizational penchant for disarray quells what looks like a very good team on paper – for the second year in a row. But let's give highly recommended rookie HC Ben Johnson and his new staff a year to settle in before they're forced to prove these aren't the same old Bears.

20. New England Patriots (19): Whereas Johnson is an unproven commodity as a head coach, Mike Vrabel most certainly is not. Aside from his return to the sideline, the Pats' 22 starters in 2025 may look at least 50% different from last year's 4-13 edition. Don't be surprised if this is also a formula for the victory column to undergo a twofold upgrade.

21. Las Vegas Raiders (30): The marriage of an excellent draft headlined by RB Ashton Jeanty, a veteran infusion on defense, arrival of Geno Smith to settle the quarterback position and – perhaps most important – new head coach Pete Carroll's competitive culture should make the Silver and Black a far more competitive operation in 2025, if one that still has an uphill battle to escape last place in the AFC West.

22. Dallas Cowboys (20): Their draft was solidly promising – and Jerry Jones and Co. definitely seemed to follow the "best player available" axiom rather than drafting for need. That said, the Cowboys have more work to do on this roster heading into next season and could be a team especially focused on reeling in some of the more notable free agents who have taken their time picking new destinations.

23. Carolina Panthers (23): If QB Bryce Young can maintain his trend line from the second half of last season – eminently reasonable given his young weapons and HC Dave Canales – a defense that ranked dead last in 2024 may be the primary factor hindering this team from possibly contending within this division. However, getting DE Derrick Brown back from his knee injury could be a game changer ... literally.

24. Miami Dolphins (21): Gotta commend them for targeting big guys in the draft ... yet unclear if they targeted the optimal ones. The secondary still looms as a problematic issue, especially with the presumption CB Jalen Ramsey is on his way out of South Florida. It adds up to the daunting prospect of QB Tua Tagovailoa having to potentially drop back 40 times per game.

25. New York Jets (25): Clearly, the expectations in 2024 were too outsized (raises hand). Maybe the expectations in 2025 are too downsized (slowly raising hand?). But a largely measured approach to free agency and the draft signal an encouraging start for a new regime that seems fixated on keeping the main thing the main thing.

26. Jacksonville Jaguars (24): The arrival – at significant cost – of 2024 Heisman Trophy winner Travis Hunter could make them a curiosity they haven't been since joining the league 30 years ago. But rookie HC Liam Coen must do for QB Trevor Lawrence what he did for Baker Mayfield in Tampa if the Jags are to become legitimately relevant again.

27. Atlanta Falcons (22): Maybe they finally solved their years-long pass rush deficiencies. Maybe they paid way too exorbitantly to do it. Maybe this roster will just be hopelessly out of kilter as long as its backup quarterback is making nearly $30 million (or more) annually.

28. New York Giants (32): This draft will doubtless ultimately be defined by the success or failure of first-round QB Jaxson Dart. But it sure appears like a strong haul – even if the results aren't immediately apparent in the win column for the team with the league's toughest schedule (based on opponents' 2024 winning percentages) in 2025.

29. Cleveland Browns (27): Their surprising approach to the 2025 draft suggests they're far more focused on the 2026 draft – and consequently worth wondering how far Joe Flacco or Shedeur Sanders or Otto Graham could carry this offense as currently constructed.

30. Indianapolis Colts (28): The uncertainty at quarterback combined with the loss of two starting offensive linemen render this a worrisome situation. Should help on both fronts that first-round TE Tyler Warren landed in Indy's lap.

31. Tennessee Titans (31): History shows that a team drafting a quarterback No. 1 overall is going to struggle, though maybe it helps that Cam Ward won't be saddled with the same weighty expectations Caleb Williams carried last year in Chicago. Simply limiting the turnovers that so often put this defense in bad spots in 2024 would be a good start for Ward.

32. New Orleans Saints (29): The murky situation around Derek Carr's injured throwing shoulder significantly clouds the outlook of a team that will otherwise be at the mercy of a highly inexperienced group of quarterbacks ... even if second-rounder Tyler Shough, who's almost 26, just left college after seven years.

Senators look into fans' streaming frustration

Chris Bumbaca
USA TODAY

Sen. Ted Cruz, R-Texas, is chairman of the Senate committee on Commerce, Science, and Transportation.
JACK GRUBER/USA TODAY NETWORK VIA IMAGN IMAGES

WASHINGTON – To watch live sports at home in 2025, between all of the apps and channels and streams that games air on thanks to billion-dollar rights deals, it can feel like being in a NASA control room.

Now Congress wants to be involved.

On May 6 on Capitol Hill, the Senate Commerce Committee – which has jurisdiction over the telecommunications that professional sports leagues use to broadcast games – interviewed representatives from the NBA, MLB and the NHL about sports' embrace of streaming, which creates a segmented market that is pricier for consumers.

"This is a growing problem," committee chairman Sen. Ted Cruz, R-Texas, said after the hearing. "Fans are understandably upset that it's really hard to watch your home team, figure out what app or what network, how to watch it. It's fractured right now. It's expensive right now."

Notably, the NFL did not attend the hearing despite Cruz's April 17 letter to Commissioner Roger Goodell requesting his or a league representative's presence. The NFL did not respond to a prior request from USA TODAY Sports for comment asking if the league intended to send a representative.

"I wish they had come," Cruz said. "I think the issues that were discussed apply to them just like they apply to the leagues that were here."

The main lines of questioning during the lightly attended meeting – nine of the 25 committee members showed up and most stayed for only brief periods – revolved around whether the leagues are not taking advantage of the antitrust legislation afforded to them through the Sports Broadcasting Act of 1961. The leagues said that because they can operate as one entity during media rights negotiations, they can pool resources to create a cheaper and more accessible model for fans.

John Bergmayer, the fourth witness and the legal director of the nonprofit group Public Knowledge, said fans feel like they finally broke free of the cable bundle only to watch it reform thanks to streaming platforms.

"Streaming is no longer an afterthought, and policymakers, content creators, tech platforms, and sports leagues need to take steps to ensure that shifts in the media, technology, and sports landscapes benefit viewers, and lead to cheaper and more convenient options," Bergmayer said during his opening statement.

The subject of local blackouts came up early, with MLB executive vice president of media and business development Kenny Gersh saying each club has the right to distribute on cable in its market and that 29 of the 30 clubs also have a direct-to-consumer (DTC) option for streamers. But the collapse of the Regional Sports Network (RSN) market has created an upheaval for leagues.

"As we continue to have flux in the system, we're going to have to continue to evaluate," NHL senior executive vice president of media and international strategy David Proper said.

Many of the Democratic senators, including ranking member Maria Cantwell, D-Washington, Ben Ray Lujan, D-New Mexico, and Ed Markey, D-Massachusetts, used their time to lambaste President Donald Trump's proposed cuts of National Public Radio and PBS.

Sen. Amy Klobuchar, D-Minnesota, explicitly asked NBA president of global content and media distribution Bill Koenig about the league's valuation of the WNBA in its media rights negotiations.

"We're mindful of the growing popularity of the WNBA," said Koenig, who added that the new media rights deals – valued at $76 billion – included upside provisions. For example, the revenue sharing that comes from advertising numbers stands to benefit the WNBA, he said.

Sen. Marsha Blackburn, R-Tennessee, used her five minutes to grill Koenig about the Daryl Morey "Hong Kong" freedom tweet from nearly six years ago and wanted to know what broadcast rights in China are worth. She also inquired about internet piracy and its impact on streaming.

Sen. Bernie Moreno, R-Ohio, encouraged the leagues to find solutions on their own rather than compelling Congress to be involved and regulate the leagues further, while Sen. Eric Schmitt, R-Missouri, relied on his experience of trying to stream St. Louis Cardinals games as an example of the plight fans go through to watch their teams.

"People do care about this a lot," Schmitt said.

Cantwell was interested in whether the leagues have specific data or metrics about fan complaints.

"It's certainly something we hear," Gersch said.

Cantwell floated a mandate for teams to make their games free in local markets backed by advertising revenue, a more traditional model. She doesn't want the simple act of watching a sporting event to be hijacked by a larger consumer experience like having to buy an annual subscription to a streaming service such as Prime Video or Peacock.

"There's just too much here where they can just think about the dollar instead of thinking about the true consumer experience," she said.

"In return for the very public benefits that teams and leagues receive," Bergmayer said, demonstrating the difference from other entertainment products, "there should be an obligation to make sure that games are widely accessible."

Cruz said the hearing was meant to be an informational, fact-finding exercise and he was pleased to that end.

A specific remedy, despite multiple legislative avenues, Cruz said, remains up in the air.

"It shouldn't be insanely complicated or insanely expensive to cheer on your hometown team," he said.

LEGAL NOTICES

IN THE UNITED STATES BANKRUPTCY COURT FOR THE DISTRICT OF DELAWARE

In re: DANIMER SCIENTIFIC, INC., *et al.*, Debtors.[1] | Chapter 11, Case No. 25 – 10518 (MFW) | (Jointly Administered)

NOTICE OF BAR DATES FOR FILING PROOFS OF CLAIM

TO ANY CREDITORS OF THE ABOVE-CAPTIONED ENTITIES (THE "*DEBTORS*"):

On May 5, 2025, the United States Bankruptcy Court for the District of Delaware (the "***Court***") entered an order (the "***Bar Date Order***") in the above-captioned chapter 11 cases (the "***Chapter 11 Cases***") establishing certain claims bar dates.[2]

THE BAR DATES. The Bar Date Order establishes the following bar dates for filing claims in these Chapter 11 Cases (collectively, the "***Bar Dates***"):

The General Bar Date. Pursuant to the Bar Date Order, except as described below, all entities holding claims, whether secured, unsecured priority (including Section 503(b)(9) Claims) or unsecured nonpriority, against the Debtors that arose prior to March 18, 2025 (the "***Petition Date***") must file proofs of claim by the General Bar Date (*i.e.*, by June 9, 2025 at 5:00 p.m., Eastern Time). With respect to Section 503(b)(9) Claims, the filing of a proof of claim shall be deemed to satisfy the procedural requirements for the assertion of such administrative claims.

The Governmental Bar Date. Pursuant to the Bar Date Order, except as described below, all governmental units holding claims against the Debtors (whether secured, unsecured priority or unsecured nonpriority) that arose before the Petition Date must file proofs of claim by the Governmental Bar Date (*i.e.*, by September 15, 2025 at 5:00 p.m., Eastern Time).

The Rejection Bar Date. Any entity whose claims arise out of the rejection of an executory contract or unexpired lease pursuant to a Court order (a "***Rejection Order***") or by operation of section 365(d)(4) of the Bankruptcy Code, including secured claims, unsecured priority claims and unsecured nonpriority claims that arose or are deemed to have arisen prior to the Petition Date, must file a proof of claim on or before the later of (a) the General Bar Date and (b) 5:00 p.m., Eastern Time, on the date that is 30 days after service of the Rejection Order.

The Amended Schedules Bar Date. If the Debtors amend or supplement their schedules of assets and liabilities (the "***Schedules***") to reduce the undisputed, non-contingent and liquidated amount of a claim against the Debtors, to change the nature or classification of a claim against the Debtors or to add a new claim to the Schedules, any affected entities that dispute such changes must file a proof of claim or amend any previously filed proof of claim in respect of the amended scheduled claim on or before the later of: (a) the General Bar Date; and (b) 5:00 p.m., Eastern Time, on the date that is 30 days after the date that notice of the applicable amendment to the Schedules is served on the entity.

FILING CLAIMS

1. **WHO MUST FILE.** Subject to the terms set forth in the Bar Date Order and described above for holders of claims subject to the Governmental Bar Date, Rejection Bar Date and the Amended Schedules Bar Date, the following entities must file proofs of claim on or before the General Bar Date:
(a) any entity (i) whose prepetition claim against the Debtors is not listed in the Debtors' Schedules or is listed as disputed, contingent or unliquidated and (ii) that desires to participate in these Chapter 11 Cases or share in any distributions in these Chapter 11 Cases; and
(b) any entity that believes that its prepetition claim is improperly classified in the Schedules or is listed in an incorrect amount and that desires to have its claim allowed in a classification or amount different from the classification or amount identified in the Schedules.

2. **WHAT TO FILE.** Parties asserting claims against the Debtors that arose before the Petition Date must use the copy of the proof of claim form (the "***Proof of Claim Form***") available on the Debtors' case website hosted by Stretto, Inc. ("***Stretto***") at https://cases.stretto.com/danimerscientific.

3. **WHEN AND WHERE TO FILE.** Entities must (i) deliver the Proof of Claim Form in person or by courier service, hand delivery or mail so it is received on or before the applicable Bar Date at the following address: Danimer Scientific, Inc., et al. Claims Processing, c/o Stretto, 410 Exchange, Suite 100, Irvine, CA 92602, or (ii) deliver it electronically using the interface available on Stretto's website at https://cases.stretto.com/danimerscientific on or before the applicable Bar Date.

Forms will be deemed filed when actually received by the Debtors' claims agent, Stretto. ***Forms may not be delivered via facsimile or electronic mail transmission.*** Any facsimile or electronic mail submissions will not be accepted and will not be deemed filed until a claim is submitted by one of the methods described above.

Forms will be collected, docketed and maintained by Stretto. If you want to receive acknowledgment of Stretto's receipt of a form, you must submit by the applicable Bar Dates and concurrently with submitting your original form (a) a copy of the original form and (b) a self-addressed, postage prepaid return envelope. Additionally, if you submit a Proof of Claim Form through Stretto's website interface, you will receive an email confirmation of your submission.

All forms must be signed by the claimant or, if the claimant is not an individual, by an authorized agent of the claimant. The form must be written in English, be denominated in United States currency and conform substantially with the Proof of Claim form. The Proof of Claim Form must set forth with specificity the legal and factual basis for the alleged claim. You must attach to your completed form any documents on which the claim is based (or, if such documents are voluminous, attach a summary) or an explanation as to why the documents are not available.

Any entity asserting claims against multiple Debtors must file a separate form with respect to each Debtor. In addition, any entity filing a claim must identify on its form the particular Debtor against which the entity asserts its claim. Any claim filed under the joint administration case, Danimer Scientific, Inc., Case No. 25-10518 (MFW), or that otherwise fails to identify a Debtor shall be deemed as filed only against Debtor Danimer Scientific, Inc.. If an entity lists more than one Debtor on any one form, the relevant claims shall be treated as filed only against the first listed Debtor.

CONSEQUENCES OF FAILURE TO FILE A CLAIM. Any entity that is required to file a Proof of Claim Form pursuant to the Bar Date Order, but fails to properly do so by the applicable Bar Date, shall not be treated as a creditor or claimant (as applicable) with respect to such claim for the purposes of voting and distribution in the above-captioned cases and shall be forever barred, estopped and enjoined from asserting any such claim against the Debtors or their estates or property.

ADDITIONAL INFORMATION. If you require additional information, you may contact Stretto (i) by telephone at (855) 469-1505 (toll-free) or 1-657-232-7988 (international), (ii) by email at teamdanimerscientific@stretto.com, or (iii) by submitting an inquiry on Stretto's website at https://cases.stretto.com/danimerscientific. Copies of the Bar Date Order and other information regarding the Debtors' Chapter 11 Cases are available for inspection free of charge on Stretto's website at https://cases.stretto.com/danimerscientific.

A HOLDER OF A POSSIBLE CLAIM AGAINST THE DEBTORS SHOULD CONSULT AN ATTORNEY REGARDING ANY MATTERS NOT COVERED BY THIS NOTICE, INCLUDING WHETHER THE HOLDER SHOULD FILE A PROOF OF CLAIM FORM.

The Debtors in these Chapter 11 Cases and the last four digits of their respective federal tax identification numbers are: Danimer Scientific, Inc. (4518); Danimer Bioplastics, Inc. (0734); Danimer Scientific Holdings, LLC (0521); Danimer Scientific Kentucky, Inc. (6771); Danimer Scientific Manufacturing, Inc. (0122); Danimer Scientific, L.L.C. (7346); Meredian Bioplastics, Inc. (5822); Meredian Holdings Group, Inc. (7239); Meredian, Inc. (7507); and Novomer, Inc. (4173). The location of the Debtors' corporate headquarters is: 140 Industrial Boulevard, Bainbridge, Georgia, 39817.

[2] Capitalized terms not otherwise defined herein shall have the meanings given to them in the Bar Date Order.

This announcement is neither an offer to purchase nor a solicitation of an offer to sell Shares (as defined below). The Offer (as defined below) is made solely by the Offer to Purchase, dated May 5, 2025, and the related Letter of Transmittal, and any amendments thereto, and is being made to all holders of Shares. Purchaser (as defined below) is not aware of any state where the making of the Offer is prohibited by administrative or judicial action pursuant to any valid state statute. If Purchaser becomes aware of any valid state statute prohibiting the making of the Offer, Purchaser will make a good faith effort to comply with such statute. If, after such good faith effort, Purchaser cannot comply with such state statute, the Offer will not be made to nor will tenders be accepted from or on behalf of the holders of Shares in such state. In any jurisdiction where securities, blue sky or other laws require that the Offer be made by a licensed broker or dealer, the Offer shall be deemed to be made on behalf of Purchaser by one or more registered brokers or dealers licensed under the laws of such jurisdiction.

Notice of Offer to Purchase for Cash Up to 4,000,000 Shares of Common Stock of AT&T INC. at $26.38 Net Per Share by TRC CAPITAL INVESTMENT CORPORATION

TRC Capital Investment Corporation, a corporation under the laws of the Province of Ontario, Canada ("Purchaser"), is offering to purchase up to 4,000,000 shares of common stock, $1.00 par value per share (the "Shares"), of AT&T Inc., a Delaware corporation (the "Company"), at $26.38 per share, net to the seller in cash, upon the terms and subject to the conditions set forth in the Offer to Purchase, dated May 5, 2025, and in the related Letter of Transmittal (the "Offer"). The offer is not conditioned upon the tender of any minimum number of Shares.

THE OFFER, PRORATION PERIOD AND WITHDRAWAL RIGHTS WILL EXPIRE AT ONE MINUTE AFTER 11:59 P.M., NEW YORK CITY TIME, ON JUNE 3, 2025, UNLESS THE OFFER IS EXTENDED OR EARLIER TERMINATED.

Shares tendered pursuant to the Offer may be withdrawn at any time prior to one minute after 11:59 p.m., New York City time, on June 16, 2025, (the "Expiration Date") unless the Offer is extended, and, if not yet accepted for payment by the Purchaser, may also be withdrawn after June 16, 2025. If more than 4,000,000 Shares are validly tendered prior to the Expiration Date and not properly withdrawn, the Purchaser will, upon the terms and subject to the conditions of the Offer, accept for payment and pay for only 4,000,000 Shares on a pro rata basis, with adjustments to avoid purchases of fractional Shares. The information required to be disclosed pursuant to the Securities Exchange Act of 1934, as amended, is contained in the Offer to Purchase and is incorporated herein by reference. The Offer to Purchase and the related Letter of Transmittal and other relevant materials will be mailed upon request to record holders of Shares and furnished to brokers, dealers, banks, trust companies and similar persons whose names, or the names of whose nominees, appear on the Company's shareholder list or, if applicable, who are listed as participants in a clearing agency's security position listing, for subsequent transmittal to beneficial owners of Shares. The Offer to Purchase and Letter of Transmittal contain important information which should be read before any decision is made with respect to the Offer. Requests for copies of the Offer to Purchase, the Letter of Transmittal and all other tender offer materials may be directed to the Information Agent, as set forth below, and copies will be furnished promptly. Questions or requests for assistance may be directed to the Information Agent. The Information Agent for the Offer is: CNRA FINANCIAL SERVICES INC. 101 St. Clair Avenue West, Suite 1908, Toronto, Canada M4V 0A2. Call: (416) 861-9466.

NOTARY PUBLIC - OREGON
COMMISSION NO. 1044188
MY COMMISSION EXPIRES JANUARY 10, 2028

Nicholas Bjork
Notary Public, State of OR
No. 1044188
My commission expires on January 10, 2028

· Perform traffic counting and intersection evaluations.

AREA 6: LAND SURVEYING

· Prepare topographic, boundary, and control surveys;

· Provide construction staking;

· Assist with monument preservation and restoration (including locating, referencing, installing monuments);

· Prepare survey maps and records including topographic, record-of-survey, right-of-way, survey control, and LCR's;

· Provide all field notes, records, adjustment data, and both raw and final measurements and coordinates; and

· Have knowledge of Washington State Plane Coordinate System and coordinate transformation techniques and parameters.

AREA 7: PAVEMENT PRESERVATION

· Provide PAVER software technical support and advanced training;

· Prepare pavement designs and recommendations, including analyzing traffic loads over a 20+-year design life;

· Analyze Portland Cement (PCC) roadway designs and make recommendations;

· Diagnose unique pavement distresses and provide design recommendations;

· Provide analysis of county-performed structural testing results with an FWD (falling weight deflectometer) and provide recommendations;

· Make visual inspections of pavements;

· Assist in developing a quality control program to monitor performance of surface treatments; and

· Analyze ground-penetrating radar reports for pavement treatments or design.

AREA 8: PARKS AND RECREATION MASTER PLANNING AND LANDSCAPE DESIGN

· Prepare conceptual, preliminary, and final landscape designs and planting plans;

· Design neighborhood, community, and regional parks, including play structures, pedestrian facilities, parking, restroom facilities, etc.;

· Develop interpretive signage;

· Design irrigation systems;

· Plan and design trails and open spaces;

· Plan and design sports and other special facilities;

· Evaluate parks and recreation-related buildings and structures;

· Prepare comprehensive park, recreation and natural resource plans;

· Prepare bicycle and pedestrian master plans; and

· Coordinate and facilitate public involvement.

AREA 9: STREAM HYDRAULICS, RESTORATION AND FISH HABITAT ENHANCEMENT

· Evaluate fluvial geomorphology;

· Assess habitat (riparian, wetland, and in-stream);

· Provide stream reconnaissance;

· Perform hydrologic, hydraulic and water quality modeling, design of stormwater facilities, stream reach and sub-basin analysis; stream stabilization design;

· Provide hydraulic analysis, engineering review and permitting support for Clark County's Flood Hazard Areas Ordinance and National Flood Insurance Program requirements using a certified floodplain manager;

· Stream corridor design, which may include streambed and bank protection or stabilization, calculate shear stresses and scour, develop streambed stone gradations, scour countermeasure, and stream grading;

· Design aquatic habitat;

· Provide bank stabilization and bioengineering designs;

· Design, support construction and monitor fish passage projects; and

· Perform cost-benefit analysis for habitat restoration projects.

AREA 10: ENVIRONMENTAL DOCUMENTATION AND PERMITTING

· Provide environmental documentation and permitting support for project

managers/coordinators. Advise managers and coordinators of environmental documentation and permitting requirements for projects;

· Develop permit application narratives, documents and exhibits; meet with agency personnel, property owners, and other consultants as required in obtaining permits;

· Conduct wetland delineations, critical/sensitive area assessments, and rare plant surveys;

· Ensure NEPA and SEPA procedures are followed during planning and designing phase of projects; develop NEPA and SEPA documents that are appropriately sized to the project impacts;

· Conduct Biological Assessments, Phase I and Phase II Environmental Site Assessments (Hazardous Waste), noise assessments, air quality analysis (i.e. project level conformity, hotspot analysis) and other specialized environmental discipline reports as necessary for NEPA procedures;

· Develop mitigation plans using Washington Department of Ecology (Ecology), US Army Corps (USACE), Washington Department of Fish and Wildlife (WDFW), and Clark County Community Development guidelines, along with developing planting plans for wetland and habitat mitigation;

· Prepare JARPA packages for permit application submittals to Ecology, USACE, WDFW, and Clark County Community Development;

· Develop permit application submittals and narratives to comply with county Wetlands and Fish and Wildlife Habitat Conservation Areas and Shoreline Master Program (Titles 40.445 and 40.460).

AREA 11: ARCHAEOLOGICAL/CULTURAL RESOURCES

· Perform Clark County Archaeological Predeterminations;

· Perform Cultural Resource Surveys;

· Perform Historic Property Surveys;

· Provide Archaeological Monitoring;

· Prepare Inadvertent Discovery Plans;

· Have knowledge of WSDOT and DAHP standards, Section 106 of National Historic Preservation Act, Washington State Executive Order 21-02, and Section 4(f) of the Transportation Act;

· Meet the minimum professional qualifications as defined by the Professional Qualifications Standards from the Secretary of the Interior's Standards and Guidelines for Archaeology and Historic Preservation (CFR 36 Part 61); and

· Obtain Excavation Permits from DAHP or other agencies.

AREA 12: RAILROAD ENGINEERING AND ON-TRACK SAFETY

· Prepare plans, specifications and estimates for railroad repairs;

· Provide inspection and construction management for railroad projects;

· Respond to derailment, track damage and other incidents;

· Coordinate with the FRA and the WUTC;

· Provide on-track safety services including training county employees;

· Inspect tracks, bridges, and grade crossings;

· Update safety crossing database;

· Review crossing permits; and

· Update track charts.

AREA 13: FORESTRY ENGINEERINGAND ARBORICULTURE CONSULTING

· Conduct Unit Layout & Mapping.

· Conduct Timber Cruising.

· Conduct Stocking Inventories.

· Conduct Riparian Buffer Layout.

· Supervise Logging Contracts.

· Provide Sustainable Forest Land Management Planning.

· Provide support for Urban Forestry Planning and Permitting.

· Assist with Forest Practice Permitting

· Provide certified arborist services, including tree health and survival evaluations, Tree Protection Plan preparation, and construction monitoring.

Evaluation of Applicant Qualifications

Submitted SOQ materials may be used to evaluate a firm's capabilities for upcoming county project work (less than $200,000). Selection of firms for project work may include a review of:

· key personnel

· firm experience within specific technical area

· responsiveness and ability to meet schedule

· familiarity with local, state and federal standards

· availability to respond to physical job sites in Clark County

SOQ materials may be used to develop a short list of qualified firms followed by an interview process for selection of the most qualified firm. When deemed necessary by the County, more project detail will be provided to applicants prior to any interview process. Submitted SOQs will not be used in evaluations for projects where the estimated cost is above $200,000. Projects where the estimated work exceeds $200,000 will be advertised as a separate Request for Proposal.

Schedule

· Issue 2025 Request for Qualifications May 1, 2025

· SOQs Due (County to begin use for selection in project work) June 15, 2025

Published May 2, 5, 7, 9, 12, 14, 16, 19, 21, 23, 28, 30; Jun. 2, 4, 6, 9, 11 & 13, 2025.

MEDFORD WATER COMMISSION

WATER MANAGEMENT & CONSERVATION PLAN
Bids Due 2:00 pm, June 11, 2025
REQUEST FOR PROPOSALS

Notice is hereby given that Medford Water Commission (Medford Water), by and through its Board of Water Commissioners, will receive proposals until 2:00 p.m., Local Time, Wednesday, June 11, 2025 for the following services:

WATER MANAGEMENT & CONSERVATION PLAN (WMCP) AND CONSOLIDATED WATER SYSTEM MASTER PLAN CONSULTING SERVICES

This solicitation and selection will be conducted using the Qualification Based Selection (QBS) process. Proposals packages received after the time established for receiving proposals will not be considered. Facsimile packages are not acceptable. All proposals shall be submitted as set forth in the Proposal Instructions and must contain a signed Proposal Submission Form. Medford Water is not responsible for proposals presented in any manner, format or to any delivery point other than as required by the Request for Proposals (RFP) Document.

NOTE: RFP Documents will be available electronically for download at http://www.medfordwater.org at no charge on the date specified in "Section II - Schedule" of this RFP. On the homepage under the "Doing Business" dropdown, select "Bids, RFPs and RFQ's". Find the RFP titled **"WATER MANAGEMENT & CONSERVATION PLAN (WMCP) AND CONSOLIDATED WATER SYSTEM MASTER PLAN CONSULTING SERVICES",** then select 'Click here for documents' in the Plans row. Contact Mark Depner, Purchasing & Contract Administrator at mark.depner@medfordwater.org or (541) 774-2459 to register and obtain the login password. Printed RFP documents will not be mailed by Medford Water. Respondents should check the website regularly until the RFP due date and time to avoid missing any addenda, which will only be available online. Respondents who obtain their RFP documents only from plan centers, or by means other than the Medford Water website, are responsible for ensuring they have all addenda; they will not be registered or appear on the list of plan-holders and will not receive notifications from Medford Water regarding this RFP.

A voluntary pre-proposal conference for all firms interested in submitting a proposal will be held at 11:00 a.m., Tuesday, May 13, 2025, through a Microsoft Teams meeting. This meeting may be used to provide additional information and to answer questions about the required services, Medford Water expectations, and the evaluation process. Statements made by Medford Water's representatives at the meeting are not binding upon Medford Water unless confirmed by Written Addendum; any change to, or interpretation of, the RFP document by Medford Water shall be accomplished by Written Addendum.

https://teams.microsoft.com
Teams Meeting ID: 218 088 464 576 9 Passcode: 2yk3ug9L
or dial in by phone: (971)337-2445 / phone conference ID: 322052558#

The single point of contact for questions regarding the RFP, proposal process, clarification, award process, protests, or any other issues that arise, is Brian Runyen, Engineering Manager at (541) 774- 2428 or brian.runyen@medfordwater.org.

Each proposer must sign and submit the Proposal Submission Form which contains a statement as to whether the proposer is a resident, as defined in ORS 279A.120. Proposers will be selected to provide services based upon proposals evaluation; Medford Water does not guarantee any amount of work as a result of this RFP. Medford Water reserves the right to reject any or all Proposals and to waive irregularities or informalities in a proposal or in the opening and may cancel the procurement in accordance with ORS 279B.100. A sample contract is included as Exhibit A; award of the contract will be subject to approval of the Board of Water Commissioners.

Dated this 1st day of May, 2025.

END OF FIRST TIME PUBLISHED

CONSTRUCTION

CLACKAMAS RIVER WATER

TAYLOR TERRACE PAVING
Bids Due 2:00 pm, May 13, 2025
INVITATION TO BID
PROJECT 22-2315

Sealed bids marked **"Taylor Terrace Paving"** will be received by Karin Holzgang, Contracts Coordinator, at the Clackamas River Water Office, located at 16770 SE 82nd Drive, Clackamas, Oregon 97015. Bids must be received at the location noted above no later than **2:00 PM** Pacific Time on **Tuesday, May 13th, 2025**, at which time the bids will be publicly opened and read. There will be a remote option for the bid opening. Remote access information will be posted on the CRW website at https://crwater.com/contracting-opportunities/ at least seven days prior to the bid opening. All Bidders must submit a list of their first-tier subcontractors, as required by ORS 279C.370, in a separate envelope no later than 4:00 PM Pacific time that same day. Any and all bids received after the deadline for submission, or for which the list of first-tier subcontractors has not been submitted by the deadline for disclosure of first-tier subcontractors, shall be declared "non-responsive" and shall not be considered for award. A contract will be awarded or bids rejected within 30 calendar days after the opening.

Bid Opening

1. Bids will be opened by CRW staff in the CRW Board Room at the date and time stipulated above.

2. The bid opening may be attended in person in the Board Room or viewed by Zoom meeting. Information on connecting to the Zoom meeting will be found on the CRW website at https://crwater.com/contracting-opportunities/ at least seven days prior to the bid opening.

3. Bid results will be available on the CRW website at https://crwater.com/contracting-opportunities/.

of the discipline area should be emphasized.

4. Respondent's Capabilities - Provide information on projects the firm or team members have worked on that demonstrate the firm's capabilities.

5. Resumes - Resumes for key staff members may be included.

6. Page Limit - Statements of qualification for each discipline area should number no more than ten (10) pages, excluding cover sheet and resumes.

7. All SOQs should be in .pdf format.

Request for Qualifications - Clark County, Washington

Below are the discipline areas for which SOQs are being solicited, as well as examples of the manner of service that may be requested in each discipline area.

AREA 1: CIVIL DESIGN

· Prepare alternative analyses, plans, specifications and cost estimates;

· Provide utility coordination, QA/QC, peer review and value engineering;

· Support construction with site visits and review of submittals;

· Provide Project Management support; and

· Assist with preparation of grants and coordination with granting agencies.

AREA 2: CONSTRUCTION MANAGEMENT

· Manage the advertisement, bid and award of capital and preservation construction projects;

· Oversee contractor operations for compliance with contract, plans, specifications and related documents;

· Manage change conditions, claims and protests including documentation and agency response;

· Prepare payments to contractors;

· Maintain documentation to local, state and federal standards;

· Coordinate utilities; and

· Review and recommend changes to design plans and specifications to address constructability, staging, access, etc.

AREA 3: STRUCTURAL ENGINEERING

· Prepare Type, Size and Location (TS&L) documents as required by WSDOT Highways and Local Programs;

· Provide load rating analysis (including over size and overweight loads);

· Develop designs for bridges, culverts, headwalls, inlet structures, rail retrofits, retaining walls, and sound walls;

· Make seismic analysis of existing structures and design of retrofits;

· Understand and able to follow WSDOT, AASHTO, and FHWA design standards;

· Evaluate scour and design mitigation using HEC-18 and HEC-23;

· Have experience with in-service bridge inspection and WSDOT and FHWA documentation; and · Provide support for emergency response.

AREA 4: GEOTECHNICAL ENGINEERING

· Review existing information and maps to characterize soil conditions;

· Identify slope stability hazards and be able to measure and monitor slope stability and landslide movement;

· Prepare exploration plans, perform borings and samplings, acquire necessary permits, prepare and implement traffic control plans;

· Measure and monitor groundwater elevations;

· Provide groundwater analysis and modeling;

· Test soil samples for engineering properties;

· Prepare reports with findings, conclusions and recommendations;

· Complete geotechnical design for retaining walls, foundations, and trench shoring;

· Perform seismic risk analyses and analysis of subsidence due to construction;

· Evaluate geotechnical considerations for trenching, pipe-jacking, and micro-tunneling;

· Provide geotechnical design for full depth reclamation roadway projects;

· Provide bridge foundation design and substructure recommendations; and

· Provide bridge slope stability and scour analysis required information.

AREA 5: TRAFFIC ENGINEERING

· Provide traffic modeling and transportation planning;

· Prepare designs for signals and Intelligent Transportation Systems;

· Develop signing and striping plans;

· Provide detour plans and incident management;

· Design railroad crossings and railroad signals;

· Assist with neighborhood traffic management;

· Evaluate roadway and intersection safety;

· Provide circulation planning and roadway alignment studies;

· Evaluate transportation concurrency;

· Provide ESAL (Equivalent Single Axel Load) training;

· Develop ITS asset inventory and management;

· Provide grant scoping and cost estimates for roundabout and signalized intersections;

· Review and comment on geometric layouts of single and multi-lane roundabouts;

· Provide roundabout and signal intersection control evaluations; and

· Perform traffic counting and intersection evaluations.

AREA 6: LAND SURVEYING

· Prepare topographic, boundary, and control surveys;

· Provide construction staking;

· Assist with monument preservation and restoration (including locating, referencing, installing monuments);

· Prepare survey maps and records including topographic, record-of-survey, right-of-way, survey control, and LCR's;

· Provide all field notes, records, adjustment data, and both raw and final measurements and coordinates; and

· Have knowledge of Washington State Plane Coordinate System and coordinate transformation techniques and parameters.

AREA 7: PAVEMENT PRESERVATION

· Provide PAVER software technical support and advanced training;

· Prepare pavement designs and recommendations, including analyzing traffic loads over a 20+-year design life;

· Analyze Portland Cement (PCC) roadway designs and make recommendations;

· Diagnose unique pavement distresses and provide design recommendations;

· Provide analysis of county-performed structural testing results with an FWD (falling weight deflectometer) and provide recommendations;

· Make visual inspections of pavements;

· Assist in developing a quality control program to monitor performance of surface treatments; and

· Analyze ground-penetrating radar reports for pavement treatments or design.

AREA 8: PARKS AND RECREATION MASTER PLANNING AND LANDSCAPE DESIGN

· Prepare conceptual, preliminary, and final landscape designs and planting plans;

· Design neighborhood, community, and regional parks, including play structures, pedestrian facilities, parking, restroom facilities, etc.;

· Develop interpretive signage;

· Design irrigation systems;

· Plan and design trails and open spaces;

· Plan and design sports and other special facilities;

· Evaluate parks and recreation-related buildings and structures;

· Prepare comprehensive park, recreation and natural resource plans;

· Prepare bicycle and pedestrian master plans; and

· Coordinate and facilitate public involvement.

AREA 9: STREAM HYDRAULICS, RESTORATION AND FISH HABITAT ENHANCEMENT

· Evaluate fluvial geomorphology;

· Assess habitat (riparian, wetland, and in-stream);

· Provide stream reconnaissance;

· Perform hydrologic, hydraulic and water quality modeling, design of stormwater facilities, stream reach and sub-basin analysis; stream stabilization design;

· Provide hydraulic analysis, engineering review and permitting support for Clark County's Flood Hazard Areas Ordinance and National Flood Insurance Program requirements using a certified floodplain manager;

· Stream corridor design, which may include streambed and bank protection or stabilization, calculate shear stresses and scour, develop streambed stone gradations, scour countermeasure, and stream grading;

· Design aquatic habitat;

· Provide bank stabilization and bioengineering designs;

· Design, support construction and monitor fish passage projects; and

· Perform cost-benefit analysis for habitat restoration projects.

AREA 10: ENVIRONMENTAL DOCUMENTATION AND PERMITTING

· Provide environmental documentation and permitting support for project managers/coordinators. Advise managers and coordinators of environmental documentation and permitting requirements for projects;

· Develop permit application narratives, documents and exhibits; meet with agency personnel, property owners, and other consultants as required in obtaining permits;

· Conduct wetland delineations, critical/sensitive area assessments, and rare plant surveys;

· Ensure NEPA and SEPA procedures are followed during planning and designing phase of projects; develop NEPA and SEPA documents that are appropriately sized to the project impacts;

· Conduct Biological Assessments, Phase I and Phase II Environmental Site Assessments (Hazardous Waste), noise assessments, air quality analysis (i.e. project level conformity, hotspot analysis) and other specialized environmental discipline reports as necessary for NEPA procedures;

· Develop mitigation plans using Washington Department of Ecology (Ecology), US Army Corps (USACE), Washington Department of Fish and Wildlife (WDFW), and Clark County Community Development guidelines, along with developing planting plans for wetland and habitat mitigation;

· Prepare JARPA packages for permit application submittals to Ecology, USACE, WDFW, and Clark County Community Development;

· Develop permit application submittals and narratives to comply with county Wetlands and Fish and Wildlife Habitat Conservation Areas and Shoreline Master Program (Titles 40.445 and 40.460).

AREA 11: ARCHAEOLOGICAL/CULTURAL RESOURCES

· Perform Clark County Archaeological Predeterminations;

· Perform Cultural Resource Surveys;

· Perform Historic Property Surveys;

· Provide Archaeological Monitoring;

· Prepare Inadvertent Discovery Plans;

· Have knowledge of WSDOT and DAHP standards, Section 106 of National Historic Preservation Act, Washington State Executive Order 21-02, and Section 4(f) of the Transportation Act;

· Meet the minimum professional qualifications as defined by the Professional Qualifications Standards from the Secretary of the Interior's Standards and Guidelines for Archaeology and Historic Preservation (CFR 36 Part 61); and

· Obtain Excavation Permits from DAHP or other agencies.

AREA 12: RAILROAD ENGINEERING AND ON-TRACK SAFETY

· Prepare plans, specifications and estimates for railroad repairs;

· Provide inspection and construction management for railroad projects;

· Respond to derailment, track damage and other incidents;

· Coordinate with the FRA and the WUTC;

· Provide on-track safety services including training county employees;

· Inspect tracks, bridges, and grade crossings;

· Update safety crossing database;

· Review crossing permits; and

· Update track charts.

AREA 13: FORESTRY ENGINEERINGAND ARBORICULTURE CONSULTING

· Conduct Unit Layout & Mapping.

· Conduct Timber Cruising.

· Conduct Stocking Inventories.

· Conduct Riparian Buffer Layout.

· Supervise Logging Contracts.

· Provide Sustainable Forest Land Management Planning.

· Provide support for Urban Forestry Planning and Permitting.

· Assist with Forest Practice Permitting

· Provide certified arborist services, including tree health and survival evaluations, Tree Protection Plan preparation, and construction monitoring.

Evaluation of Applicant Qualifications

Submitted SOQ materials may be used to evaluate a firm's capabilities for upcoming county project work (less than $200,000). Selection of firms for project work may include a review of:

· key personnel

· firm experience within specific technical area

· responsiveness and ability to meet schedule

· familiarity with local, state and federal standards

· availability to respond to physical job sites in Clark County

SOQ materials may be used to develop a short list of qualified firms followed by an interview process for selection of the most qualified firm. When deemed necessary by the County, more project detail will be provided to applicants prior to any interview process. Submitted SOQs will not be used in evaluations for projects where the estimated cost is above $200,000. Projects where the estimated work exceeds $200,000 will be advertised as a separate Request for Proposal.

Schedule

· Issue 2025 Request for Qualifications May 1, 2025

· SOQs Due (County to begin use for selection in project work) ~~June 15, 2025~~

· ***Amended Due Date of June 17th, 2025, by 3:00 p.m.***

Published May 2, 5, 7, 9, 12, 14, 16, 19, 21, 23, 26, 28, 30; Jun. 2, 4, 6, 9, 11 & 13, 2025.

DESCHUTES COUNTY FACILITIES

A/E SERVICES DOWNTOWN CAMPUS PLAN
Proposals Due 2:00 pm, June 5th, 2025
REQUEST FOR PROPOSALS

Deschutes County requests proposals from qualified firms for design services to develop a campus plan for the Deschutes County Downtown Campus located in Bend, Oregon. The successful proposer will engage with campus stakeholders to develop goals and objectives for the downtown campus, provide case studies of relevant civic campuses, and develop a design framework for the campus. The final deliverable will be a single report that details future development opportunities, anticipates growth, and establishes a clear vision for the services provided on the campus with near-term, mid-term, and longterm plans with conceptual cost estimates.

There will be a MANDATORY Pre-Proposal Meeting on May 15th, 2025 at 11:00 a.m. in the DeArmond Room of the Deschutes Services Building located at 1300 NW Wall Street, Bend, OR 97703. This RFP is available electronically through Deschutes.org/rfps and future notices regarding this solicitation, including solicitation addendum/a, will be posted to the same website. Questions and inquiries should be directed to Eric Nielsen, Capital Improvement Manager, eric.nielsen@deschutes.org, 541-330-8252. Sealed proposals shall be received no later than 2:00 p.m., current local time, June 5th, 2025 at:

Mailing:
Deschutes County Facilities
ATTN: Eric Nielsen
P.O. Box 6005
Bend OR, 97708-6005

Physical Drop-Off Address:
Deschutes County Facilities
ATTN: Eric Nielsen
14 NW Kearney Avenue
Bend, OR, 97703

Deschutes County may reject any proposal not in compliance with prescribed procedures and requirements and may reject for good cause any and all proposals upon a finding that it is in the public interest to do so. Deschutes County is not responsible for any costs of any proposers incurred while submitting proposal; all proposers who respond to solicitations do so solely at their own expense.

SKAMANIA COUNTY

BUNDLED BRIDGES PREVENTATIVE MAINTENANCE PROJECT
Bids Due 10:00 am, May 29, 2025
INVITATION TO BID
FEDERAL AID# BHOS-2030(011)
CRP #2024-02

Skamania County (COUNTY) is seeking qualifications from engineering consulting services to design and facilitate the resurface, repair of superstructure, and other methods of preventative maintenance on 104 Salmon Falls, 105 Hatchery, and 210 Moore bridges. Deliverables include:

Preliminary Engineering (PE):

· Permitting - environmental, archeological etc.

· Surveying, Right-of-Way / Easement research and needs determination

· Plans, Specifications, and Estimates (PS&E), stamped by professional engineer registered in the State of Washington

· Stamped Contract development including Special Provisions

The COUNTY may supplement the consultant agreement to include future phases (RW, CN) including:

Right-of-Way (RW) :

· If ROW is needed - Appraisals and Reviews, Acquisitions, Relocation and Property Management according to the Uniform Relocation Act and detailed in WSDOT's Right-of-Way Manual and Lag Manual.

Construction Phase (CN):

· Record of Materials, RAM reviews, Buy America, Build America Buy America, CMOs, etc.

· Construction inspection and oversight, project management assistance, closure etc.

The anticipated timeline for the project is from June 2025 through December 2028. The county needs to obligate the Construction Phase by August 2026. Additional information for this RFQ is available online at

Request for Qualifications ? Skamania County

https://www.skamaniacounty.org/departments-offices/public-works/request-for-qualifications

The contract type is **Local Agency Professional Service Negotiated Hourly Rate Consultant Agreement**.

The DBE goal for this project is 16%.

Submittals are due no later than 10:00 A.M. Thursday, May 29, 2025. Submittals will not be accepted after that time and date. Consultant qualifications requirements, special provisions, how the consultant submittals will be evaluated, and schedule for the procurement process are available at the agency's website link above. Any questions regarding this project should be directed to Sadi' Stouder-Pettenger at 509-427-3910 or sadi@co.skamania.wa.us.

"Skamania County, in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252,42 U.S.C. 2000d to 2000d-4) and the Regulations, hereby notifies all bidders that will affirmatively ensure that any contract entered into pursuant to this advertisement, disadvantaged business enterprises will be afforded full and fair opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color, or national origin in consideration for an award.

Skamania County in accordance with Section 504 of the Rehabilitation Act (Section 504) and the Americans with the Americans with Disabilities Act (ADA), commits to nondiscrimination on the basis of disability, in all of its programs and activities. This material can be made available in an alternate format by emailing Sadi' Stouder- Pettenger at sadi@co.skamania.wa.us or by calling 509.427.3910.

Published Apr. 25, 28, 30; May 2, 5, 7, 9, 12, 14, 16, 18, 21, 23 & 28.

☐ All (Active and Expired Profiles)

Search Results Display Options

Maximum number of profiles to be returned at a time:

Show All

Note: "Show All" shows as many profiles as you're allowed to receive, which may increase that limit to 5000. But due to a database restriction, adding "one-to-many" fields to the profile list (next item), lowers the limit to 1000. Choosing HTML Import format,below, automatically sets "Show All".

Show the following fields in the profile list:

```
Name of Firm; Contact; Address and City, State Zip;
Capabilities Narrative; E-mail Address
```

Edit the columns to be displayed

Font Size (these usually affect all formats except HTML Import as text):

○ Tiny ○ Small ◉ Normal ○ Large ○ XLarge

Format. Show the search results in:

○ Table format

◉ HTML Export format
Save As...: ○ .text ◉ .xls (spreadsheet)
If importing into Windows Excel 2007 or later, answer Yes to the format/suffix dialog.

○ Mail-merge format
Delimiter: ◉ comma ○ comma and blank ○ tab

○ Vertical format (useful for mobile users)

Dear Vendor,

The Interlocal Purchasing System (TIPS) is required under Federal regulations to notify SBA vendors of our procurement solicitations. You were registered on the United States Small Business Administration website under one or more of the following NAICS Codes, 423830,333921,238290 which include the topic of this Solicitation.

The Interlocal Purchasing System (TIPS) has available now, at the link below, Solicitation 250502 Elevators and Servicing (2 Part with JOC. You are invited to participate.

https://tips.ionwave.net/HomePage.aspx

Please note that there is no specific project to award. TIPS utilizes IDIQ Contracts, where IDIQ is an abbreviation of the term "Indefinite Delivery/Indefinite Quantity". This is a type of contract that provides an indefinite quantity of supplies or services during a fixed period of time or for the life of the awarded agreement. This solicitation was issued as a prospective award for a pricing agreement to be used when a TIPS Member entity needs the goods or services offered under the agreement.

Thank you,

Jessica Monreal

Dear MBDA,

The Interlocal Purchasing System (TIPS) is required under Federal regulations to work with the MBDA in an effort to notify potential vendors of our procurement solicitations.

You are invited to notify and encourage the companies you assist to participate in these opportunities. TIPS present procurement solicitations are available at the following link:

https://www.tips-usa.com/rfp.cfm.

Thank you,

Jessica Monreal

TIPS VENDOR AGREEMENT (Part 1)

TIPS RFP 250502 Elevators and Servicing (PART 1)

The following Vendor Agreement ("Agreement") creates a legal agreement between The Interlocal Purchasing System ("TIPS"), a government purchasing cooperative and Department of Texas Region 8 Education Service Center and (INSERT ENTITY NAME):

United Elevator Services, LLC

(ENTER ENTITY NAME)

its owners, agents, subsidiaries, and affiliates (together, "Vendor") (individually, "Party", and collectively the "Parties") and this agreement shall exclusively govern the contractual relationship ("Agreement") between the Parties for Part 1 of the related solicitation opportunity. If Vendor proposes and is awarded on Part 2, a separate Part 2 Vendor Agreement shall control Part 2 terms.

TIPS, a governmental entity and a national purchasing cooperative seeks to provide a valuable and necessary solution to public entities and qualifying non-profits by performing the public procurement solicitation process and awarding compliant contracts to qualified vendors. Then, where the law of a customer's jurisdiction allows, instead of public entities and qualifying non-profits expending time, money, and resources on the extensive public procurement process, the use of TIPS allows public entities to quickly select and purchase their preferred products or services from qualified, competitively evaluated vendors through cooperative purchasing.

1. **Purpose.** The purpose of this Agreement is to identify the terms and conditions of the relationship between TIPS and Vendor. Public entities and qualifying non-profits that properly join or utilize TIPS ("TIPS Members") may elect to "piggyback" off of TIPS' procurements and agreements where the laws of their jurisdiction allow. TIPS Members are not contractual parties to this Agreement although terms and conditions of this Agreement may ensure benefits to TIPS Members.
ex
2. **Authority.** The Parties agree that the signatories below are individual authorized to enter into this Agreement on behalf of their entity and that they are acting under due and proper authority under applicable law.

3. **Definitions.**

    a. **TIPS Pricing:** The specific pricing, discounts, and other pricing terms and incentives which Vendor submitted and TIPS approved for each respective TIPS Contract awarded to Vendor and all permissible, subsequent pricing updates submitted by Vendor and accepted by TIPS, if any.

    b. **Authorized Reseller:** A reseller or dealer authorized and added by a Vendor through their online TIPS Vendor Portal to make TIPS sales according to the terms and conditions herein.

4. **Entire Agreement.** This Agreement resulted from TIPS posting a Part 1 "TIPS Solicitation" (RFP, RCSP, RFQ, or other) and Vendor submitting a proposal in response to that posted TIPS Solicitation for evaluation and award. The Parties agree that this Agreement consists of the provisions set forth herein and: (1) The Part 1 TIPS solicitation document resulting in this Agreement; (2) Any Part 1 addenda or clarifications issued in relation to the TIPS solicitation; (3) All Part 1 solicitation information provided to Vendor by TIPS through the TIPS eBid System; (3) Vendor's entire Part 1 proposal response to the TIPS solicitation including all accepted required attachments, acknowledged notices and certifications, accepted negotiated terms, pricing, accepted responses to questions, and accepted written clarifications of Vendor's proposal, and; any properly included attachments to this Agreement. All documentation and information listed is hereby incorporated by reference as if set forth herein verbatim. In the event of conflict between the terms herein and one of the incorporated documents the terms and conditions herein shall control.

5. **Vendor's Specific Warranties, Terms, and License Agreements.** Because TIPS serves public entities and non-profits throughout the nation all of which are subject to specific laws and policies of their jurisdiction, as a matter of standard practice, TIPS does not typically accept a Vendor's specific "Sale Terms" (warranties, license agreements, master agreements, terms and conditions, etc.) on behalf of all TIPS Members. TIPS may permit Vendor to attach those to this Agreement to display to interested customers what terms may apply to their Supplemental Agreement with Vendor (if submitted by Vendor for that purpose). However, unless this term of the Agreement is negotiated and modified to state otherwise, those specific Sale Terms are not accepted by TIPS on behalf of all TIPS Members and each Member may choose whether to accept, negotiate, or reject those specific Sale Terms, which must be reflected in a separate agreement between Vendor and the Member in order to be effective.

6. **Vendor Identity and Contact Information.** It is Vendor's sole responsibility to ensure that all identifying vendor information (name, EIN, d/b/a's, etc.) and contact information is updated and current at all times within the TIPS eBid System and the TIPS Vendor Portal. It is Vendor's sole responsibility to confirm that all e-correspondence issued from tips-usa.com, ionwave.net, and tipsconstruction.com to Vendor's contacts are received and are not blocked by firewall or other technology security. Failure to permit receipt of correspondence from these domains and failure to keep vendor identity and contact information current at all times during the life of the contract may cause loss of TIPS Sales, accumulating TIPS fees, missed rebid opportunities, lapse of TIPS Contract(s), and unnecessary collection or legal actions against Vendor. It is no defense to any of the foregoing or any breach of this Agreement that Vendor was not receiving TIPS' electronic communications issued by TIPS to Vendor's listed contacts.

7. **Initiation of TIPS Sales.** When a public entity initiates a purchase with Vendor, if the Member inquires verbally or in writing whether Vendor holds a TIPS Contract, it is the duty of the Vendor to verify whether the Member is seeking a TIPS purchase. Once verified, Vendor must include the TIPS Contract Number on all purchase communications and sales documents exchanged with the TIPS Member.

8. **TIPS Sales and Supplemental Agreements.** The terms of the specific TIPS order, including but not limited to: shipping, freight, insurance, delivery, fees, bonding, cost, delivery expectations and location, returns, refunds, terms, conditions, cancellations, order assistance, etc., shall be controlled by the purchase agreement (Purchase Order, Contract, Invoice, etc.) (hereinafter "Supplemental Agreement") entered into between the TIPS Member Customer and Vendor only. TIPS is not a party to any Supplemental Agreement. All Supplemental Agreements shall include Vendor's Name, as known to TIPS, and TIPS Contract Name and Number. Vendor accepts and understands that TIPS is not a legal party to TIPS Sales and Vendor is solely responsible for identifying fraud, mistakes, unacceptable terms, or misrepresentations for the specific order prior to accepting. Vendor agrees that any order issued from a customer to Vendor, even when processed through TIPS, constitutes a legal contract between the customer and Vendor only. When Vendor accepts or fulfills an order, even when processed through TIPS, Vendor is representing that Vendor has carefully reviewed the order for legality, authenticity, and accuracy and TIPS shall not be liable or responsible for the same. In the event of a conflict between the terms of this TIPS Vendor Agreement and those contained in any Supplemental Agreement, the provisions set forth herein shall control unless otherwise agreed to and authorized by the Parties in writing within the Supplemental Agreement.

9. **Right of Refusal.** Vendor has the right not to sell to a TIPS Member under the awarded agreement at Vendor's discretion unless otherwise required by law.

10. **Reporting TIPS Sales**. Vendor must report all TIPS Sales to TIPS. If a TIPS sale is initiated by Vendor receiving a TIPS Member's purchase order from TIPS directly, Vendor may consider that specific TIPS Sale reported. Otherwise, with the exception of TIPS Automated Vendors, who have signed an exclusive agreement with TIPS regarding reporting, all TIPS Sales must be reported to TIPS by either: (1) Emailing the purchase order or similar purchase document (with Vendor's Name, as known to TIPS, and the TIPS Contract Name and Number included) to TIPS at tipspo@tips-usa.com with "Confirmation Only" in the subject line of the email within three business days of Vendor's acceptance of the order, or; (2) Within 3 business days of the order being accepted by Vendor, Vendor must login to the TIPS Vendor Portal and successfully self-report all necessary sale information within the Vendor Portal and confirm that it shows up accurately on your current Vendor Portal statement. No other method of reporting is acceptable unless agreed to by the Parties in writing. Failure to report all sales pursuant to this provision may result in immediate cancellation of Vendor's TIPS Contract(s) for cause at TIPS' sole discretion. Please refer to the TIPS Accounting FAQ's for more information about reporting sales and if you have further questions, contact the Accounting Team at accounting@tips-usa.com.

11. **TIPS Administration Fees.** The collection of administrative fees by TIPS, a government entity, for performance of these procurement services is required pursuant to Texas Government Code Section 791.011 et. seq. The administration fee ("TIPS Administration Fee") is the amount legally owed by Vendor to TIPS for TIPS Sales made by Vendor. The TIPS Administration Fee amount is typically a set percentage of the amount paid by the TIPS Member for each TIPS Sale, less shipping cost, bond cost, and taxes if applicable and identifiable, which is legally due to TIPS, but the exact TIPS Administration Fee for this Contract is published in the corresponding solicitation and is incorporated herein by reference. TIPS Administration Fees are due to TIPS immediately upon Vendor's receipt of payment, including partial payment, for a TIPS Sale. The TIPS Administration Fee is assessed on the amount paid by the TIPS Member, not on the Vendor's cost or on the amount for which the Vendor sold the item to a dealer or Authorized Reseller. Upon receipt of payment for a TIPS Sale, including partial payment (which renders TIPS Administration Fees immediately due), Vendor shall issue to TIPS the corresponding TIPS Administration Fee payment as soon as possible but not later than thirty-one calendar days following Vendor's receipt of payment. Vendor shall pay TIPS via check unless otherwise agreed to by the Parties in writing. Vendor shall include clear documentation with the issued payment dictating to which sale(s) the amount should be applied. Vendor may create a payment report within their TIPS Vendor Portal which is the preferred documentation dictating to which TIPS Sale(s) the amount should be applied. Failure to pay all TIPS Administration Fees pursuant to this provision may result in immediate cancellation of Vendor's TIPS Contract(s) for cause at TIPS' sole discretion as well as the initiation of collection and legal actions by TIPS against Vendor to the extent permitted by law. Any overpayment of participation fees to TIPS by Vendor will be refunded to the Vendor

within ninety (90) days of receipt of notification if TIPS receives written notification of the overpayment not later than the expiration of six (6) months from the date of overpayment and TIPS determines that the amount was not legally due to TIPS pursuant to this agreement and applicable law. Any notification of overpayment received by TIPS after the expiration of six (6) months from the date that TIPS received the payment will render the overpayment non-refundable. Region 8 ESC and TIPS reserve the right to extend the six (6) month deadline if approved by the Region 8 ESC Board of Directors. TIPS reserves all rights under the law to collect TIPS Administration Fees due to TIPS pursuant to this Agreement.

12. **Term of the Agreement.** This Agreement with TIPS is for approximately three years with a one-year, consecutive option for renewal as described herein. Renewal options are not automatic and shall only be effective if offered by TIPS at its sole discretion. If TIPS offers a renewal option, the Vendor will be notified via email issued to Vendor's then-listed Primary Contact. The renewal option shall be deemed accepted by Vendor unless Vendor notifies TIPS of its objection to the renewal option in writing and confirms receipt by TIPS.

    Actual Effective Date: Agreement is effective upon signature by authorized representatives of both Parties. The Effective Date does not affect the "Term Calculation Start Date."

    Term Calculation Start Date: To keep the contract term consistent for all vendors awarded under a single TIPS contract, Vendor shall calculate the foregoing term as starting on the last day of the month that "Award Notifications" are anticipated as published in the Solicitation, regardless of the actual Effective Date.

    Example of Term Calculation Start Date: If the anticipated "Award Date" published in the Solicitation is May 22, 2023, but extended negotiations delay award until June 27, 2023 (Actual Effective Date), the Term Calculation Start Date shall be May 31, 2023 in this example.

    Contract Expiration Date: To keep the contract term consistent for all vendors awarded under a single TIPS contract, the term expiration date shall be three-years from the Term Calculation Start Date.

    Example of Contract Expiration Date: If the anticipated "Award Date" published in the Solicitation is May 22, 2023, but extended negotiations delay award until June 27, 2023 (Actual Effective Date), the Term Calculation Start Date shall be May 31, 2023 and the Contract Expiration Date of the resulting initial "three-year" term, (which is subject to an extension(s)) will be May 31, 2026 in this example.

    Option(s) for Renewal: Any option(s) for renewal shall begin on the Contract Expiration Date, or the date of the expiration of the prior renewal term where applicable, and continue for the duration specified for the renewal option herein.

    Example of Option(s) for Renewal: In this example, if TIPS offers a one-year renewal and the Contract Expiration Date is May 31, 2026, then the one-year renewal is effective from May 31, 2026 to May 31, 2027.

    TIPS may offer to extend Vendor Agreements to the fullest extent the TIPS Solicitation resulting in this Agreement permits.

13. **TIPS Pricing.** Vendor agrees and understands that for each TIPS Contract that it holds, Vendor submitted, agreed to, and received TIPS' approval for specific pricing, discounts, and other pricing terms and incentives which make up Vendor's TIPS Pricing for that TIPS Contract ("TIPS Pricing"). Vendor confirms that Vendor will not add the TIPS Administration Fee as a charge or line-item in a TIPS Sale. Vendor hereby certifies that Vendor shall only offer goods and services through this TIPS Contract if those goods and services are included in or added to Vendor's TIPS Pricing and approved by TIPS. TIPS reserves the right to review Vendor's pricing update requests as specifically as line-item by line-item to determine compliance. However, Vendor contractually agrees that all submitted pricing updates shall be within the original terms of the Vendor's TIPS Pricing (scope, proposed discounts, price increase limitations, and other pricing terms and incentives originally proposed by Vendor) such that TIPS may accept Vendors price increase requests as submitted without additional vetting at TIPS discretion. Any pricing quoted by Vendor to a TIPS Member or on a TIPS Quote shall never exceed Vendor's TIPS Pricing for any good or service offered through TIPS. TIPS Pricing price increases and modifications, if permitted, will be honored according to the terms of the solicitation and Vendor's proposal, incorporated herein by reference.

14. **Indemnification of TIPS.** **VENDOR AGREES TO INDEMNIFY, HOLD HARMLESS, AND DEFEND TIPS, TIPS MEMBERS, TIPS OFFICERS, TIPS EMPLOYEES, TIPS DIRECTORS, AND TIPS TRUSTEES (THE "TIPS INDEMNITEES") FROM AND AGAINST ALL CLAIMS AND SUITS BY THIRD-PARTIES FOR DAMAGES, INJURIES TO PERSONS (INCLUDING DEATH), PROPERTY DAMAGES, LOSSES, EXPENSES, FEES, INCLUDING COURT COSTS, ATTORNEY'S FEES, AND EXPERT FEES, ARISING OUT OF OR RELATING TO VENDOR'S PERFORMANCE UNDER THIS AGREEMENT (INCLUDING THE PERFORMANCE OF VENDOR'S OFFICERS, EMPLOYEES, AGENTS, AUTHORIZED RESELLERS, SUBCONTRACTORS, LICENSEES, OR INVITEES), REGARDLESS OF THE NATURE OF THE CAUSE OF ACTION, INCLUDING WITHOUT LIMITATION CAUSES OF ACTION BASED UPON COMMON, CONSTITUTIONAL, OR STATUTORY LAW OR BASED IN**

WHOLE OR IN PART UPON ALLEGATIONS OF NEGLIGENT OR INTENTIONAL ACTS OR OMISSIONS ON THE PART OF VENDOR, ITS OFFICERS, EMPLOYEES, AGENTS, AUTHORIZED RESELLERS, SUBCONTRACTORS, LICENSEES, OR INVITEES. NO LIMITATION OF LIABILITY FOR DAMAGES FOR PERSONAL INJURY OR PROPERTY DAMAGE ARE PERMITTED OR AGREED TO BY TIPS. APART FROM THIS INDEMNIFICATION PROVISION REQUIRING INDEMNIFICATION OF THE TIPS INDEMNITEES' ATTORNEY'S FEES AS SET FORTH ABOVE, RECOVERY OF ATTORNEYS' FEES BY THE PREVAILING PARTY IS AUTHORIZED ONLY IF AUTHORIZED BY TEX. EDUC. CODE § 44.032(F).

15. **Indemnification and Assumption of Risk – Vendor Data.** **VENDOR AGREES THAT IT IS VOLUNTARILY PROVIDING DATA (INCLUDING BUT NOT LIMITED TO: VENDOR INFORMATION, VENDOR DOCUMENTATION, VENDOR'S PROPOSALS, VENDOR PRICING SUBMITTED OR PROVIDED TO TIPS, TIPS CONTRACT DOCUMENTS, TIPS CORRESPONDENCE, VENDOR LOGOS AND IMAGES, VENDOR'S CONTACT INFORMATION, VENDOR'S BROCHURES AND COMMERCIAL INFORMATION, VENDOR'S FINANCIAL INFORMATION, VENDOR'S CERTIFICATIONS, AND ANY OTHER VENDOR INFORMATION OR DOCUMENTATION, INCLUDING WITHOUT LIMITATION SOFTWARE AND SOURCE CODE UTILIZED BY VENDOR, SUBMITTED TO TIPS BY VENDOR AND ITS AGENTS) ("VENDOR DATA") TO TIPS. FOR THE SAKE OF CLARITY, AND WITHOUT LIMITING THE BREADTH OF THE INDEMNITY OBLIGATIONS IN SECTION 14 ABOVE, VENDOR AGREES TO PROTECT, INDEMNIFY, AND HOLD THE TIPS INDEMNITEES HARMLESS FROM AND AGAINST ANY AND ALL LOSSES, CLAIMS, ACTIONS, DEMANDS, ALLEGATIONS, SUITS, JUDGMENTS, COSTS, EXPENSES, FEES, INCLUDING COURT COSTS, ATTORNEY'S FEES, AND EXPERT FEES AND ALL OTHER LIABILITY OF ANY NATURE WHATSOEVER ARISING OUT OF OR RELATING TO: (I) ANY UNAUTHORIZED, NEGLIGENT OR WRONGFUL USE OF, OR CYBER DATA BREACH INCIDENT AND VIRUSES OR OTHER CORRUPTING AGENTS INVOLVING, VENDOR'S DATA, PRICING, AND INFORMATION, COMPUTERS, OR OTHER HARDWARE OR SOFTWARE SYSTEMS, AND; (II) ALLEGATIONS OR CLAIMS THAT ANY VENDOR DATA INFRINGES ON THE INTELLECTUAL PROPERTY RIGHTS OF A THIRD-PARTY OR VENDOR.**

16. **Procedures Related to Indemnification.** In the event that an indemnity obligation arises, Vendor shall pay all amounts set forth in Section 14 and 15 above (including any settlements) and – if it has accepted its indemnity obligation without qualification – control the legal defense to such claim or cause of action, including without limitation attorney selection, strategy, discovery, trial, appeal, and settlement, and TIPS shall, at Vendor's cost and expense (with respect to reasonable out of pocket costs and expenses incurred by TIPS which shall be reimbursed to TIPS by Vendor), provide all commercially reasonable assistance requested by Vendor. In controlling any defense, Vendor shall ensure that all assertions of governmental immunity and all applicable pleas and defenses shall be promptly asserted.

17. **Indemnity for Underlying Sales and Supplemental Agreements.** Vendor shall be solely responsible for any customer claims or any disputes arising out of TIPS Sales or any Supplemental Agreement as if sold in the open-market. The Parties agree that TIPS shall not be liable for any claims arising out of Vendor's TIPS Sales or Supplemental Agreements, including but not limited to: allegations of product defect or insufficiency, allegations of service defect or insufficiency, allegations regarding delivery defect or insufficiency, allegations of fraud or misrepresentation, allegations regarding pricing or amounts owed for TIPS sales, and/or allegations regarding payment, over-payment, under-payment, or non-payment for TIPS Sales. Payment/Drafting, overpayment/over-drafting, under-payment/under-drafting, or non-payment for TIPS Sales between customer and Vendor and inspections, rejections, or acceptance of such purchases shall be the exclusive respective obligations of Vendor/Customer, and disputes shall be handled in accordance with the terms of the underlying Supplemental Agreement(s) entered into between Vendor and Customer. Vendor acknowledges that TIPS is not a dealer, subcontractor, agent, or reseller of Vendor's goods and services and shall not be responsible for any claims arising out of alleged insufficiencies or defects in Vendor's goods and services, should any arise.

18. **Confidentiality of Vendor Data.** Vendor understands and agrees that by signing this Agreement, all Vendor Data is hereby released to TIPS, TIPS Members, and TIPS third-party administrators to effectuate Vendor's TIPS Contract except as provided for herein. The Parties agree that Vendor Data is accessible by all TIPS Members as if submitted directly to that TIPS Member Customer for purchase consideration. If Vendor otherwise considers any portion of Vendor's Data to be confidential and not subject to public disclosure pursuant to Chapter 552 Texas Gov't Code (the "Public Information Act") or other law(s) and orders, Vendor must have identified the claimed confidential materials through proper execution of the Confidentiality Claim Form which is required to be submitted as part of Vendor's proposal resulting in this Agreement and incorporated by reference. The Confidentiality Claim Form included in Vendor's proposal and incorporated herein by reference is the sole indicator of whether Vendor considers any Vendor Data confidential in the event TIPS receives a Public Information Request. If TIPS receives a request, any responsive documentation not deemed confidential by you in this manner will be automatically released. For Vendor Data deemed confidential by you in this manner, TIPS will follow procedures of controlling statute(s) regarding any claim of confidentiality and shall not be liable for any release of information required by law, including Attorney General determination and opinion. In the event that TIPS receives a written request for information pursuant to the Public Information Act that affects Vendor's interest in any information or data furnished to TIPS by Vendor, and TIPS requests an opinion from the Attorney General, Vendor may, at its own option and expense, prepare comments and submit information directly to the Attorney General stating why the requested information is exempt from disclosure pursuant to the requirements of the Public Information Act. Vendor is solely responsible for submitting the memorandum brief and information to the Attorney General

within the time period prescribed by the Public Information Act. Notwithstanding any other information provided in this solicitation or Vendor designation of certain Vendor Data as confidential or proprietary, Vendor's acceptance of this TIPS Vendor Agreement constitutes Vendor's consent to the disclosure of Vendor's Data, including any information deemed confidential or proprietary, to TIPS Members or as ordered by a Court or government agency, including without limitation the Texas Attorney General. Vendor agrees that TIPS shall not be responsible or liable for any use or distribution of information or documentation by TIPS Members or as required by law.

19. **Vendor's Authorized Resellers.** TIPS recognizes that many vendors operate in the open market through the use of resellers or dealers. For that reason, TIPS permits Vendor to authorize Authorized Resellers within its Vendor Portal and make TIPS Sales through the Authorized Reseller(s). Once authorized by Vendor in the Vendor Portal, the Authorized Reseller(s) may make TIPS sales to TIPS Members. However, all purchase documents must include: (1) Authorized Reseller's Name; (2) Vendor's Name, as known to TIPS, and; (3) Vendor's TIPS Contract Name and Number under which it is making the TIPS Sale. Either Vendor or Reseller may report the sale pursuant to the terms herein. However, Vendor agrees that it is legally responsible for all reporting and fee payment as described herein for TIPS Sales made by Authorized Resellers. The TIPS Administration Fee is assessed on the amount paid by the TIPS Member, not on the Vendor's cost or on the amount for which the Vendor sold the item to a dealer or Authorized Reseller. The Parties intend that Vendor shall be responsible and liable for TIPS Sales made by Vendor's Authorized Resellers. Vendor agrees that it is voluntarily authorizing this Authorized Reseller and in doing so, Vendor agrees that it is doing so at its own risk and agrees to protect, indemnify, and hold TIPS harmless in accordance with Sections 14-17 above related to Authorized Reseller TIPS Sales made pursuant to this Agreement or purporting to be made pursuant to this Agreement that may be asserted against Vendor whether rightfully brought or otherwise. The Parties further agree that it is no defense to Vendor's breach of this Agreement that an Authorized Reseller caused Vendor of breach this Agreement.

20. **Circumvention of TIPS Sales**. When a public entity initiates a purchase with Vendor, if the Member inquires verbally or in writing whether Vendor holds a TIPS Contract, it is the duty of the Vendor to verify whether the Member is seeking a TIPS purchase. Any request for quote, customer communication, or customer purchase initiated through or referencing a TIPS Contract shall be completed through TIPS pursuant to this Agreement. Any encouragement or participation by Vendor in circumventing a TIPS sale being completed may result in immediate termination of Vendor's TIPS Contract(s) for cause as well as preclusion from future TIPS opportunities at TIPS sole discretion.

21. **State of Texas Franchise Tax.** By signature hereon, Vendor hereby certifies that Vendor is not currently delinquent in the payment of any franchise taxes owed to the State of Texas under Chapter 171 of the Texas Tax Code.

22. **Termination.**

A) Termination for Convenience. TIPS may, by written notice to Vendor, terminate this Agreement for convenience, in whole or in part, at any time by giving thirty (30) days' written notice to Vendor of such termination, and specifying the effective date thereof.

B) Termination for Cause. If Vendor fails to materially perform pursuant to the terms of this Agreement, TIPS shall provide written notice to Vendor specifying the default. If Vendor does not cure such default within thirty (30) days, TIPS may terminate this Agreement, in whole or in part, for cause. If TIPS terminates this Agreement for cause, and it is later determined that the termination for cause was wrongful, the termination shall automatically be converted to and treated as a termination for convenience.

C) Vendor's Termination. If TIPS fails to materially perform pursuant to the terms of this Agreement, Vendor shall provide written notice to TIPS specifying the default ("Notice of Default"). If TIPS does not cure such default within thirty (30) days, Vendor may terminate this Agreement, in whole or in part, for cause. If Vendor terminates this Agreement for cause, and it is later determined that the termination for cause was wrongful, the termination shall automatically be converted to and treated as a termination for convenience.

D) Upon termination, all TIPS Sale orders previously accepted by Vendor shall be fulfilled and Vendor shall be paid for all TIPS Sales executed pursuant to the applicable terms. All TIPS Sale orders presented to Vendor but not fulfilled by Vendor, prior to the actual termination of this agreement shall be honored at the option of the TIPS Member. TIPS shall submit to Vendor an invoice for any outstanding TIPS Administration Fees and approved expenses and Vendor shall pay such fees and expenses within 30 calendar days of receipt of such valid TIPS invoice. Vendor acknowledges and agrees that continued participation in TIPS is subject to TIPS' sole discretion and that any Vendor may be removed from the TIPS program at any time with or without cause. This

termination clause does not affect TIPS Sales Supplemental Agreements pursuant to this term regarding termination and the Survival Clause term.

E) Vendor hereby waives any and all claims for damages, including, but not limited, to consequential damages or lost profits, that might arise from TIPS' act of terminating this Agreement.

23. Survival Clause. It is the intent of the Parties that this Agreement and procurement method applies to any TIPS Sale made during the life of this Agreement even if made on or near the Contract Expiration Date as defined herein. Thus, all TIPS Sales, including but not limited to: leases, service agreements, license agreements, open purchase orders, warranties, and contracts, even if they extend months or years past the TIPS Contract Expiration Date, shall survive the expiration or termination of this Agreement subject to the terms and conditions of the Supplemental Agreement between Customer and Vendor or unless otherwise specified herein.

24. Audit Rights. Due to transparency statutes and public accountability requirements of TIPS and TIPS Members, Vendor shall at their sole expense, maintain documentation of all TIPS Sales for a period of three years from the time of the TIPS Sale. In order to ensure and confirm compliance with this agreement, TIPS shall have authority to conduct audits of Vendor's TIPS Pricing or TIPS Sales with thirty-days' notice unless the audit is ordered by a Court Order or by a Government Agency with authority to do so without said notice. Notwithstanding the foregoing, in the event that TIPS is made aware of any pricing being offered to eligible entities that is materially inconsistent with Vendor's TIPS Pricing, TIPS shall have the ability to conduct the audit internally or may engage a third- party auditing firm to investigate any possible non-compliant conduct or may terminate the Agreement according to the terms of this Agreement. In the event of an audit, the requested materials shall be reasonably provided in the time, format, and at the location acceptable to TIPS. TIPS agrees not to perform a random audit the TIPS transaction documentation more than once per calendar year, but reserves the right to audit for just cause or as required by any governmental agency or court with regulatory authority over TIPS or the TIPS Member. These audit rights shall survive termination of this Agreement for a period of one (1) year from the effective date of termination.

25. Conflicts of Interest. The Parties confirm that they have not offered, given, or accepted, nor intend to give at any time hereafter any economic opportunity, future employment, gift, loan, gratuity, special discount, trip, favor, service to the other in connection with this Agreement. Vendor affirms that, to the best of Vendor's knowledge, this Agreement has been arrived at independently, and is awarded without collusion with anyone to obtain information or gain any favoritism that would in any way limit competition or give an unfair advantage over other vendors in the award of this Agreement. Vendor agrees that it has disclosed any necessary affiliations with Region 8 Education Service Center and the TIPS Department, if any, through the Conflict of Interest attachment provided in the solicitation resulting in this Agreement.

26. Volume of TIPS Sales. Nothing in this Agreement or any TIPS communication may be construed as a guarantee that TIPS or TIPS Members will submit any TIPS orders to Vendor at any time.

27. Compliance with the Law. The Parties agree to comply fully with all applicable federal, state, and local statutes, ordinances, rules, and regulations applicable to their entity in connection with the programs contemplated under this Agreement.

28. Severability. If any term(s) or provision(s) of this Agreement are held by a court of competent jurisdiction to be invalid, void, or unenforceable, then such term(s) or provision(s) shall be deemed restated to reflect the original intention of the Parties as nearly as possible in accordance with applicable law and the remainder of this Agreement, and the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated, unless such holding causes the obligations of the Parties hereto to be impossible to perform or shall render the terms of this Agreement to be inconsistent with the intent of the Parties hereto.

29. Force Majeure. If by reason of Force Majeure, either party hereto shall be rendered unable wholly or in part to carry out its obligations under this Agreement through no fault of its own then such party shall give notice and full particulars of Force Majeure in writing to the other party within a reasonable time after occurrence of the event or cause relied upon. Upon delivering such notice, the obligation of the affected party, so far as it is affected by such Force Majeure as described, shall be suspended during the continuance of the inability then claimed but for no longer period, and such party shall endeavor to remove or overcome such inability with all reasonable dispatch. In the event that Vendor's obligations are suspended by reason of Force Majeure, all TIPS Sales accepted prior to the Force Majeure event shall be the legal responsibility of Vendor and the terms of the TIPS Sale Supplemental Agreement shall control Vendor's failure to fulfill for a Force Majeure event.

30. Immunity. Vendor agrees that nothing in this Agreement shall be construed as a waiver of sovereign or government immunity; nor constitute or be construed as a waiver of any of the privileges, rights, defenses, remedies, or immunities available to Region 8 Education Service Center or its TIPS Department. The failure to enforce, or any delay in the enforcement of, any privileges, rights, defenses,

remedies, or immunities available to Region 8 Education Service Center or its TIPS Department under this Agreement or under applicable law shall not constitute a waiver of such privileges, rights, defenses, remedies, or immunities or be considered as a basis for estoppel.

31. **Insurance Requirements.** Vendor agrees to maintain the following minimum insurance requirements for the duration of this Agreement. All policies held by Vendor to adhere to this term shall be written by a carrier with a financial size category of VII and at least a rating of "A-" by A.M. Best Key Rating Guide. The coverages and limits are to be considered minimum requirements and in no way limit the liability of the Vendor(s). Any immunity available to TIPS or TIPS Members shall not be used as a defense by the contractor's insurance policy. Only deductibles applicable to property damage are acceptable, unless proof of retention funds to cover said deductibles is provided. "Claims made" policies will not be accepted. Vendor's required minimum coverage shall not be suspended, voided, cancelled, non-renewed or reduced in coverage or in limits unless replaced by a policy that provides the minimum required coverage except after thirty (30) days prior written notice by certified mail, return receipt requested has been given to TIPS or the TIPS Member if a project or pending delivery of an order is ongoing. Upon request, certified copies of all insurance policies shall be furnished to the TIPS or the TIPS Member. Vendor agrees that when Vendor or its subcontractors are liable for any damages or claims, Vendor's policy, shall be primary over any other valid and collectible insurance carried by the Member or TIPS.

General Liability:	$1,000,000 each Occurrence/Aggregate
Automobile Liability:	$300,000 Includes owned, hired & non-owned
Workers' Compensation:	Statutory limits for the jurisdiction in which the Vendor performs under this Agreement. If Vendor performs in multiple jurisdictions, Vendor shall maintain the statutory limits for the jurisdiction with the greatest dollar policy limit requirement.
Umbrella Liability:	$1,000,000 each Occurrence/Aggregate

32. **Waiver.** No waiver of any single breach or multiple breaches of any provision of this Agreement shall be construed to be a waiver of any breach of any other provision. No delay in acting regarding any breach of any provision shall be construed to be a waiver of such breach.

33. **Binding Agreement.** This Agreement shall be binding and inure to the benefit of the Parties hereto and their respective heirs, legal successors, and assigns.

34. **Headings.** The paragraph headings contained in this Agreement are included solely for convenience of reference and shall not in any way affect the meaning or interpretation of any of the provisions of this Agreement.

35. **Choice of Law and Venue.** This Agreement shall be governed by, construed, and enforced in accordance with the laws of the State of Texas. Any proceeding, claim, action, or alternative dispute resolution arising out of or relating to this Agreement or involving TIPS shall be brought in a State Court of competent jurisdiction in Camp County, Texas, or if Federal Court is legally required, a Federal Court of competent jurisdiction in the Eastern District of Texas, and each of the Parties irrevocably submits to the exclusive jurisdiction of said court in any such proceeding, waives any objection it may now or hereafter have to venue or to convenience of forum, agrees that all claims in respect of the proceeding shall be heard and determined only in any such court, and agrees not to bring any proceeding arising out of or relating to this procurement process or any contract resulting from or and contemplated transaction in any other court. The Parties agree that either or both of them may file a copy of this paragraph with any court as written evidence of the knowing, voluntary and freely bargained for agreement between the Parties irrevocably to waive any objections to venue or to convenience of forum.

36. **Relationship of the Parties.** Nothing contained in this Agreement shall be construed to make one Party an agent of the other Party nor shall either party have any authority to bind the other in any respect, unless expressly authorized by the other party in writing. The Parties are independent contractors and nothing in this Agreement creates a relationship of employment, trust, agency or partnership between them.

37. **Assignment.** No assignment of this Agreement or of any duty or obligation of performance hereunder, shall be made in whole or in part by a Party hereto without the prior written consent of the other Party. Written consent of TIPS shall not be unreasonably withheld.

38. **Minimum Condition and Warranty Requirements for TIPS Sales.** All goods quoted or sold through a TIPS Sale shall be new unless clearly stated otherwise in writing. All new goods and services shall include the applicable manufacturers minimum standard warranty unless otherwise agreed to in the Supplemental Agreement.

39. **Minimum Customer Support Requirements for TIPS Sales.** Vendor shall provide timely and commercially reasonable support for TIPS Sales or as agreed to in the applicable Supplemental Agreement.

40. **Minimum Shipping Requirements for TIPS Sales.** Vendor shall ship, deliver, or provide ordered goods and services within a commercially reasonable time after acceptance of the order. If a delay in delivery is anticipated, Vendor shall notify the TIPS Member as to why delivery is delayed and provide an updated estimated time for completion. The TIPS Member may cancel the order if the delay is not commercially acceptable or not consistent with the Supplemental Agreement applicable to the order.

41. **Minimum Vendor License Requirements.** Vendor shall maintain, in current status, all federal, state, and local licenses, bonds and permits required for the operation of the business conducted by Vendor. Vendor shall remain fully informed of and in compliance with all ordinances and regulations pertaining to the lawful provision of goods or services under the TIPS Agreement. TIPS and TIPS Members reserve the right to stop work and/or cancel a TIPS Sale or terminate this or any TIPS Sale Supplemental Agreement involving Vendor if Vendor's license(s) required to perform under this Agreement or under the specific TIPS Sale have expired, lapsed, are suspended or terminated subject to a 30-day cure period unless prohibited by applicable statue or regulation.

42. **Minimum Vendor Legal Requirements.** Vendor shall remain aware of and comply with this Agreement and all local, state, and federal laws governing the sale of products/services offered by Vendor under this contract. Such applicable laws, ordinances, and policies must be complied with even if not specified herein.

43. **Minimum Site Requirements for TIPS Sales (*when applicable to TIPS Sale*).**

Cleanup: When performing work on site at a TIPS Member's property, Vendor shall clean up and remove all debris and rubbish resulting from their work as required or directed by the TIPS Member or as agreed by the parties. Upon completion of work, the premises shall be left in good repair and an orderly, neat, clean and unobstructed condition.

Preparation: Vendor shall not begin a project for which a TIPS Member has not prepared the site, unless Vendor does the preparation work at no cost, or until TIPS Member includes the cost of site preparation in the TIPS Sale Site preparation includes, but is not limited to: moving furniture, installing wiring for networks or power, and similar pre-installation requirements.

Registered Sex Offender Restrictions: For work to be performed at schools, Vendor agrees that no employee of Vendor or a subcontractor who has been adjudicated to be a registered sex offender will perform work at any time when students are, or reasonably expected to be, present unless otherwise agreed by the TIPS Member. Vendor agrees that a violation of this condition shall be considered a material breach and may result in the cancellation of the TIPS Sale at the TIPS Member's discretion. Vendor must identify any additional costs associated with compliance of this term. If no costs are specified, compliance with this term will be provided at no additional charge.

Safety Measures: Vendor shall take all reasonable precautions for the safety of employees on the worksite, and shall erect and properly maintain all necessary safeguards for protection of workers and the public. Vendor shall post warning signs against all hazards created by the operation and work in progress. Proper precautions shall be taken pursuant to state law and standard practices to protect workers, general public and existing structures from injury or damage.

Smoking: Persons working under Agreement shall adhere to the TIPS Member's or local smoking statutes, codes, ordinances, and policies.

44. **Payment for TIPS Sales.** TIPS Members may make payments for TIPS Sales directly to Vendor, Vendor's Authorized Reseller, or as otherwise agreed to in the applicable Supplemental Agreement after receipt of the invoice and in compliance with applicable payment statutes. Regardless of how payment is issued or received for a TIPS Sale, Vendor is responsible for all reporting and TIPS Administration Fee payment requirements as stated herein.

45. **Marketing.** Vendor agrees that any logos, images, photos, writing, audio, clip art, music, data, promotional documents, or any other information or intellectual property ("Vendor Property") approved or provided by Vendor for TIPS' use are either the exclusive property of Vendor, or Vendor has all necessary rights, license, and permissions to allow TIPS use of Vendor Property. Vendor permits TIPS to use their name and logo to identify Vendor as a TIPS Awarded Vendor on the TIPS website only. All other use of Vendor's Property by TIPS shall require prior written Vendor approval. Any Vendor use of TIPS' logos, images, photos, writing, audio, clip art, music, data, promotional documents, or any other information or intellectual property ("TIPS Property") or reference to TIPS in marketing outreach requires Vendor to obtain prior written authorization from marketing@tips-usa.com which will not be unreasonably withheld. Vendor must execute a TIPS Marketing Waiver before specific, written authorization will be granted. For any marketing

outreach taken by Vendor without proper TIPS' authorization and execution of the TIPS Marketing Waiver, **Vendor shall indemnify and hold harmless TIPS and its employees, officers, agents, representatives, contractors, assignees, designees, and TIPS Members from any and all claims, damages, and judgments involving:**

i. **Infringement of patent, copyright, trade secrets, trade or services marks, and any other intellectual or intangible property rights and/or claims arising from the Vendor's (including Vendor's officers', employees', agents', authorized resellers', subcontractors', or invitees') unauthorized use or distribution of Vendor Property.**
ii. **Violations of privacy and data laws; and**
iii. **Unauthorized use or distribution of TIPS Property.**

46. **Tax Exempt Status of TIPS Members.** Most TIPS Members are tax exempt entities and the laws and regulations applicable to the specific TIPS Member customer shall control.

47. **Automatic Renewal Limitation for TIPS Sales.** No TIPS Sale may incorporate an automatic renewal clause that exceeds month to month terms with which the TIPS Member must comply. All renewal terms incorporated into a TIPS Sale Supplemental Agreement shall only be valid and enforceable when Vendor received written confirmation of acceptance of the renewal term from the TIPS Member for the specific renewal term. The purpose of this clause is to avoid a TIPS Member inadvertently renewing an Agreement during a period in which the governing body of the TIPS Member has not properly appropriated and budgeted the funds to satisfy the Agreement renewal. Any TIPS Sale Supplemental Agreement containing an "Automatic Renewal" clause that conflicts with these terms is rendered void and unenforceable.

48. **Choice of Law Limitation for TIPS Sales.** Vendor agrees that if any "Choice of Law" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause must provide that the "Choice of Law" applicable to the TIPS Sale agreement/contract between Vendor and TIPS Member shall be the state where the TIPS Member operates unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Choice of Law" clause that conflicts with these terms is rendered void and unenforceable.

49. **Venue Limitation for TIPS Sales.** Vendor agrees that if any "Venue" provision is included in any TIPS Sale Agreement/contract between Vendor and a TIPS Member, that clause must provide that the "Venue" for any litigation or alternative dispute resolution shall be in the state and county where the TIPS Member operates unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Venue" clause that conflicts with these terms is rendered void and unenforceable.

50. **Indemnity Limitation for TIPS Sales.** Texas and other jurisdictions restrict the ability of governmental entities to indemnify others. Vendor agrees that if any "Indemnity" provision which requires the TIPS Member to indemnify Vendor is included in any TIPS sales agreement/contract between Vendor and a TIPS Member, that clause must either be stricken or qualified by including that such indemnity is only permitted, "to the extent permitted by the laws and constitution of [TIPS Member's State]" unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing an "Indemnity" clause that conflicts with these terms is rendered void and unenforceable.

51. **Arbitration Limitation for TIPS Sales.** Vendor agrees that if any "Arbitration" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause may not require that the arbitration is mandatory or binding. Vendor agrees that if any "Arbitration" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause provides for only voluntary and non-binding arbitration unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Arbitration" clause that conflicts with these terms is rendered void and unenforceable.

In Witness Whereof, the parties hereto, each acting under due and proper authority, have signed this Agreement.

TIPS VENDOR AGREEMENT SIGNATURE FORM

TIPS 250502 Elevators and Servicing (Part 1)

Vendor Name: United Elevator Services, LLC

Vendor Address: PO Box 1308

City: Knoxville State: TN Zip Code: 37901

Supplier Response

Event Information

Number: 250502
Title: Elevators and Servicing (2 PART with JOC)
Type: Request for Proposal
Issue Date: 5/1/2025
Deadline: 6/20/2025 03:00 PM (CT)
Notes: This is a solicitation issued by The Interlocal Purchasing System (TIPS), a department of Texas Region 8 Education Service Center. It is an Indefinite Delivery, Indefinite Quantity ("IDIQ") solicitation. It will result in contracts that provide, through adoption/"piggyback" an indefinite quantity of supplies/services, during a fixed period of time, to TIPS public entity and qualifying non-profit "TIPS Members" throughout the nation. Thus, there is no specific project or scope of work to review. Rather this solicitation is issued as a prospective award for utilization when any TIPS Member needs the goods or services offered during the life of the agreement.

This is a two part solicitation. Part 1 is solicited for TIPS sales that are not considered a "public work" construction project. Part 1 permits the sale of goods and non-construction/non-"public work" services such as maintenance and minor repairs. Part 2 Job Order Contract (JOC) is solicited for projects considered by your TIPS Member Customers to be a "public work" construction project. The determination of whether or not a TIPS sale amounts to a "public work" construction project requiring a Part 2 JOC contract is made by the TIPS Member Customer at the time of each TIPS sale. Thus, Vendors are encouraged to respond to both Parts 1 and 2 in case your TIPS Member Customers require that a sale be made under one Part or the other. However, responding to both Parts is not required.

IF YOU CURRENTLY HOLD TIPS CONTRACT 220502 ELEVATORS PART 1, PART 2, OR BOTH ("220502"), YOU MUST RESPOND TO THIS SOLICITATION TO PREVENT LAPSE OF CONTRACT UNLESS YOU HOLD ANOTHER CURRENT TIPS CONTRACT THAT COVERS ALL OF YOUR ELEVATOR OFFERINGS. THIS AWARDED CONTRACT WILL REPLACE YOUR EXPIRING TIPS CONTRACT 220502. IF YOU HOLD ANOTHER TIPS CONTRACT OTHER THAN 220502 WHICH COVERS ALL OF YOUR ELEVATOR OFFERINGS AND YOU ARE SATISFIED WITH IT, THERE IS NO NEED TO RESPOND TO THIS SOLICITATION UNLESS YOU PREFER TO HOLD BOTH CONTRACTS.

Requested Attachments

Vendor Agreement (Part 1)

250502 Vendor Agreement (Part 1).pdf

If responding to Part 1, the Vendor Agreement must be downloaded from the “Attachments” section of the IonWave eBid System, reviewed, Vendor Name placed in the line provided at the top, and uploaded to this location. If Vendor has proposed deviations to the Vendor Agreement (Part 1), Vendor may assert so in the Attribute Questions and those shall be addressed during evaluation.

Vendor Agreement Signature Form (Part 1)

250502 Vendor Agreement Signature Form (Part 1) SIGNED.pdf

If responding to Part 1 the Vendor Agreement Signature Form (Part 1) must be downloaded from the “Attachments” section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location. If Vendor has proposed deviations to the Vendor Agreement (Part 1), Vendor may leave the signature line of this page blank and assert so in the Attribute Questions and those shall be addressed during evaluation.

Pricing Form 1 (Part 1)

250502 Pricing Form 1 (Part 1) FILLED OUT.xlsx

If responding to Part 1, Pricing Form 1 (Part 1) must be downloaded from the “Attachments” section of the IonWave eBid System, reviewed, properly completed as instructed, and uploaded to this location.

Pricing Form 2 (Part 1)

Copy of 250502 Pricing Form 2 (Part 1) FILLED OUT.xlsx

If responding to Part 1, Pricing Form 2 (Part 1) must be downloaded from the “Attachments” section of the IonWave eBid System, reviewed, properly completed as instructed, and uploaded to this location.

Required Confidentiality Claim Form

250502 Required Confidentiality Claim Form SIGNED.pdf

The Required Confidentiality Claim Form must be downloaded from the “Attachments” section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location. This is the only way for Vendor to assert confidentiality of any information submitted.

(3) Required Customer Reference Letters

TIPS Ref Letter.pdf

Whether responding to Part 1, Part 2, or both. Vendor is required to upload three Customer Reference Letters from three separate customers as described herein. Vendor will be scored on the aggregate Reference Letters received from customers as described in the solicitation. Vendor must provide three current letters (issued within the 12 months preceding the date on which the solicitation was posted) from its customers verifying Vendor's customer service and reputation as described herein. (Ex. if the solicitation/bid posted on February 4, 2024, the letters must be dated on or after February 1, 2023). The letters must be issued from customers who have received goods or services from the Vendor or its current corporate officials, on entity/company letterhead, must specify its customer experience with Vendor, and must be signed by an authorized representative of the customer. TIPS Reference Forms from past bids will no longer be accepted.

Alternate or Supplemental Pricing Documents (Part 1)

No response

Optional. If responding to Part 1, when completing Pricing Form 1 (Part 1) & Pricing Form 2 (Part 1), you direct TIPS to view additional, alternate, or supplemental pricing documentation, you may upload that Part 1 documentation.

Current Form W-9

2025 W-9.pdf

Vendor must upload their current IRS Tax Form W-9. The legal name, EIN, and d/b/a's listed should match the information provided herein exactly. This form will be utilized by TIPS to properly identify your entity.

Vendor Agreement (Part 2)

250502 Vendor Agreement (Part 2).pdf

If responding to Part 2, the Vendor Agreement (Part 2) must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location. If Vendor has proposed deviations to the Vendor Agreement (Part 2), Vendor may assert so in the Attribute Questions and those shall be addressed during evaluation.

Vendor Agreement Signature Form (Part 2)

250502 Vendor Agreement Signature Form (Part 2) SIGNED.pdf

If responding to Part 2, the Vendor Agreement Signature Form (Part 2) must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location. If Vendor has proposed deviations to the Vendor Agreement (Part 2), Vendor may leave the signature line of this page blank and assert so in the Attribute Questions and those shall be addressed during evaluation.

Part 2 Required Bonding Capacity Letter

2025 0616 United Elevator Ref Ltr.pdf

If proposing on Part 2, Vendor is required to upload a Bonding Capacity Letter from its surety, as described herein, at this location. Please see the attachment entitled "Instructions and Sample - Part 2 Required Bonding Capacity Letter" for complete instructions. . On Part 2, Vendor will be scored on the aggregate bonding capacity displayed in the accepted letter. Vendor must provide a current letter (issued on or after the first day of the month preceding the date on which the solicitation was posted) from its surety verifying Vendor's bonding capacity as described herein. (Ex. if the solicitation/bid posted on February 4, 2022, the letter must be dated on or after January 1 2022. The letter must be issued from Vendor's Surety companies, on surety company letterhead, must specify the maximum bonding capacity of the Vendor, and must be signed by an authorized representative of the surety company. The issuing surety must be authorized to do business in the State of Texas and must be listed on the Department of the Treasury's Listing of Approved Sureties (Department Circular 570).

Supplemental Vendor Information (Supplemental Vendor Information Only)

No response

Optional. If Vendor would like to display or include any brochures, promotional documents, marketing materials, or other Vendor Information for TIPS and TIPS Member Customer consideration, Vendor may upload those at this location. These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Certificates & Licenses (Supplemental Vendor Information Only)

No response

Optional. If Vendor would like to display any applicable certificates or licenses (including HUB certificates) for TIPS and TIPS Member Customer consideration, Vendor may upload those at this location. These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Vendor's Warranties, Terms, and Conditions (Supplemental Vendor Information Only) *No response*

Optional. If Vendor would like to display any standard warranties, terms, or conditions which are often applicable to their offerings for TIPS and TIPS Member Customer consideration, Vendor may upload those at this location. These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Vendor Logo (Supplemental Vendor Information Only) 2009 logo.bmp

Optional. If Vendor desires that their logo be displayed on their public TIPS profile for TIPS and TIPS Member viewing, Vendor may upload that logo at this location. These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Disclosure of Lobbying Activities - Standard Form - LLL *No response*

Do not upload this form unless Vendor has reportable lobbying activities. There are Attributes entitled, "2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment – Continued." Properly respond to those Attributes and only upload this form if applicable/instructed. If upload is required based on your response to those Attributes, the Disclosure of Lobbying Activities – Standard Form - LLL must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to this location.

Conflict of Interest Questionnaire - Form CIQ *No response*

Do not upload this form unless you have a reportable conflict with TIPS. There is an Attribute entitled "Conflict of Interest Questionnaire Requirement" immediately followed by an Attribute entitled "Conflict of Interest Questionnaire Requirement – Form CIQ – Continued." Properly respond to those Attributes and only upload this form if applicable/instructed. If upload is required based on your response to those Attributes, the Conflict of Interest Questionnaire – Form CIQ must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded at this location.

Bid Attributes

1	**Disadvantaged/Minority/Women Business & Federal HUBZone** Some participating public entities are required to seek Disadvantaged/Minority/Women Business & Federal HUBZone ("D/M/WBE/Federal HUBZone") vendors. Does Vendor certify that their entity is a D/M/WBE/Federal HUBZone vendor? If you respond "Yes," you must upload current certification proof in the appropriate "Response Attachments" location. NO
2	**Historically Underutilized Business (HUB)** Some participating public entities are required to seek Historically Underutilized Business (HUB) vendors as defined by the Texas Comptroller of Public Accounts Statewide HUB Program. Does Vendor certify that their entity is a HUB vendor? If you respond "Yes," you must upload current certification proof in the appropriate "Response Attachments" location. No
3	**National Coverage** Can the Vendor provide its proposed goods and services to all 50 US States? No

4 States Served

If Vendor answered "No" to the question entitled "National Coverage," please list all states where vendor can provide the goods and services proposed directly below. Your response may dictate which potential TIPS Member customers consider purchasing your offerings.

Entire state of Tennessee with select coverage areas in Kentucky, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Alabama, and Mississippi.

5 Description of Vendor Entity and Vendor's Goods & Services

If awarded, this description of Vendor and Vendor's goods and services will appear on the TIPS website for customer/public viewing.

In business since 1958, United Elevator Services, LLC is an independent family owned, non-union, full-service company. We offer new installations, preventative maintenance control plans, modernizations, and repairs on elevators and accessibility equipment (residential and commercial).

30 **Search Words Identifying Vendor**

Please list all search words and phrases to be included in the TIPS database related to your entity. ***Do not*** list words which are not associated with the bid category/scope (See bid title for general scope). This will help users find you through the TIPS website search function. You may include product names, manufacturers, specialized services, and other words associated with the scope of this solicitation.

Elevator, Elevators, Elevator Maintenance, Elevator Service, Elevator Repair, Elevator Installation, Elevator Upgrade, Elevator Modernization, Accessibility Lift, Accessibility Lifts, Accessibility Lift Maintenance, Accessibility Lift Service, Accessibility Lift Repair, Accessibility Lift Installation, New Construction, Modernization

31 **Certification of Vendor Residency (Required by the State of Texas)**

Does Vendor's parent company or majority owner:

(A) have its principal place of business in Texas; ***or*** (B) employ at least 500 persons in Texas?

Texas Education Code Section 44.031 requires that this information be considered in evaluation for certain contracts. However, Vendor response does not affect points, scoring, or potential award.

No

32 **Vendor's Principal Place of Business (City)**

In what city is Vendor's principal place of business located?

Knoxville, Tennessee

33 **Vendor's Principal Place of Business (State)**

In what state is Vendor's principal place of business located?

Tennessee

34 **Vendor's Years in Business**

How many years has the business submitting this proposal been operating in its current capacity and field of work?

67

35 **Certification Regarding Entire TIPS Agreement for Part 1 and Part 2 Contracts**

This is a two part solicitation. Part 1 is solicited for TIPS sales that are not considered a "public work" construction project. Part 1 permits the sale of goods and non-construction/non-"public work" services such as maintenance and minor repairs. Part 2 Job Order Contract (JOC) is solicited for projects considered by your TIPS Member Customers to be a "public work" construction project. The determination of whether or not a TIPS sale amounts to a "public work" construction project requiring a Part 2 JOC contract is made by the TIPS Member Customer at the time of each TIPS sale. Thus, Vendors are encouraged to respond to both Parts 1 and 2 in case your TIPS Member Customers require that a sale be made under one Part or the other. However, responding to both Parts is not required. If Vendor responds and is awarded to both Parts, Vendor will have one contract for Part 1 and a separate contract for Part 2.

Vendor agrees that, if awarded, Vendor's final TIPS Contract(s), for either Part 1, Part 2, or both Parts, will consist of the provisions set forth in the corresponding finalized TIPS Vendor Agreement, Vendor's responses to these attribute questions, and: (1) The TIPS solicitation document resulting in the Agreement; (2) Any addenda or clarifications issued in relation to the corresponding TIPS solicitation; (3) All solicitation information provided to Vendor by TIPS through the TIPS eBid System; (3) Vendor’s entire proposal response to the corresponding TIPS solicitation including all accepted required attachments, acknowledged notices and certifications, accepted negotiated terms, accepted pricing, accepted responses to questions, and accepted written clarifications of Vendor’s proposal, and; any properly included attachments to the TIPS Contract.

Does Vendor agree?

Yes, Vendor agrees

36 **Minimum Percentage Discount Offered to TIPS Members on all Part 1 Goods and Services (READ CAREFULLY)**

Please read thoroughly and carefully as an error on your response can render your Part 1 contract award unusable. If you are not proposing on Part 1, you must still respond to proceed but it will not apply to you unless you decide to propose and are awarded on Part 1.

TIPS Members often turn to TIPS Contracts for ease of use and to receive discounted pricing.

If awarded on Part 1, what is the minimum percentage discount that you can offer TIPS Members off of all Part 1 goods and service pricing (whether offered through Pricing Form 1, Pricing Form 2, or in another accepted format) that you offer? Only limited goods/services specifically identified and excluded from this discount in Vendor's original proposal may be excluded from this discount.

Vendor must respond with a percentage from 0%-100%. The percentage discount that you input below will be applied to your Part 1 "Catalog Pricing", as defined in the solicitation, for all TIPS Sales made during the life of the contract. You cannot alter this percentage discount once the solicitation legally closes. You will always be required to discount every TIPS Sale by the percentage included below with the exception of limited goods/services specifically identified and excluded from this discount in Vendor's original proposal. If you add goods or services to your "Catalog Pricing" during the life of the contract, you will be required to sell those new items with this discount applied.

Example: In this example, you enter a 10% minimum percentage discount below. In year-one of your TIPS Contract, your published Part 1 "Catalog Pricing" (website/store/published pricing) for "Material A" is $100 and for "Material A Maintenance Service" is $100. In this example, you must sell those items under the Part 1 TIPS Contract at the proposed 10% discounted price of: "Material A" - $90, "Material A Maintenance Service" - $90. In year two of your TIPS Contract, you update your Part 1 "Catalog Pricing" with the market. You add "Material B" to your "Catalog Pricing" for $200 and have increased the price of "Material A" to $110 and the price of "Material A Maintenance Service" to $110. In this example, after the Part 1 "Catalog Pricing" update, you must still sell those items under the Part 1 TIPS Contract at the proposed 10% discounted price of: "Material A" - $99, "Material A Maintenance Service" - $99, and "Material B" - $180.00.

With the exception of limited goods/services specifically identified and excluded from this discount in Vendor's original proposal, if you cannot honor the discount on all Part 1 goods and items now included or which may be added in the future with certainty, then you should offer a lesser discount percentage below.

If awarded on Part 1, what is the minimum percentage discount that you can offer TIPS Members off of all Part 1 goods and service pricing (whether offered through Pricing Form 1, Pricing Form 2, or in another accepted format) that you offer?

0%

37 **Honoring Vendor's Part 1 Minimum Percentage Discount**

Vendor is asked in these Attribute Questions to provide a Minimum Percentage Discount offered to TIPS Members on all Part 1 goods and services sold under the TIPS Contract. If proposing on Part 1, points will be assigned for your response and scoring of your Part 1 proposal will be affected. On your Part 1 evaluation, a "YES" answer will be awarded the maximum 10 points and a "NO" answer will be awarded 0 points. If you are not proposing on Part 1, you must still answer to proceed but this term will not apply to you or affect your scoring unless you decide to propose and are awarded on Part 1.

If awarded on Part 1, does Vendor agree to honor the Minimum Percentage Discount off of their TIPS "Catalog Pricing" that Vendor proposed for all TIPS Sales made for the duration of the TIPS Contract?

Yes, Vendor agrees

38 **Volume and Additional Discounts**

In addition to the Part 1 Minimum Percentage Discount proposed herein, does Vendor ever expect and intend to offer additional, greater, or volume discounts to TIPS Members?

If proposing on Part 1, point(s) may be assigned for your response in the Part 1 category of "Pricing" during scoring and evaluation. If you are not proposing on Part 1, you must respond to proceed but no points will be assigned for your response.

Yes

39 **Part 1 "Catalog Pricing" and Pricing Requirements**

This is a requirement of the Part 1 TIPS Contract and is non-negotiable. If you are not proposing on Part 1, you must still agree to proceed but it will not apply to you unless you decide to propose and are awarded on Part 1.

In this solicitation and resulting contract, Part 1 "Catalog Pricing" shall be defined as:

"The then available list of goods or services, in the most current listing regardless of date, that takes the form of a catalog, price list, price schedule, shelf-price or other viewable format that:

A. is regularly maintained by the manufacturer or Vendor of an item; and

B. is either published or otherwise available for review by TIPS or a customer during the purchase process;

C. to which the Minimum Percentage Discount proposed by the proposing Vendor may be applied.

If awarded on Part 1 of this TIPS Contract, for the duration of the contract, Vendor agrees to provide, upon request, their then current "Catalog Pricing." Or, in limited circumstances where Vendor has proposed the Percentage Mark-Up method of pricing in this proposal, proof of Vendor's "cost" may be accepted by TIPS in place of catalog pricing.

YES

40 **REQUIRED FOR PART 2 - Vendor's Regular Hours RS Means Coefficient**

What is Vendor's Regular Hours RS Means Coefficient? **If you do not intend to propose on Part 2, you may enter a "0" in order to continue.**

The RS Means Price Book is a unit price book adjusted for different geographic areas by using the City Cost Index for each location. You may visit https://www.rsmeans.com for more information.

You must review the TIPS Part 2 RS Means JOC Pricing Explanation & Rubric under the "Attachments" tab prior to responding herein.

To propose the RS Means Price Book pricing exactly, Vendor would insert a 1.0 as their Regular Hours RS Means Coefficient below, to propose a 5% discount off of the RS Means Price Book Vendor would insert a .95 as their Regular Hours RS Means Coefficient below. To see the full scoring rubric and use TIPS scoring calculator, please view the TIPS RS Means JOC Pricing Explanation & Rubric under the "Attachments" tab.

Insert Vendor's Regular Hours RS Means Coefficient below. **If you do not intend to propose on Part 2, you may enter a "0" in order to continue.**

1.05

41 **REQUIRED FOR PART 2 - Vendor's After-Hours RS Means Coefficient**

What is Vendor's After-Hours RS Means Coefficient? **If you do not intend to propose on Part 2, you may enter a "0" in order to continue.**

The RS Means Price Book is a unit price book adjusted for different geographic areas by using the City Cost Index for each location. You may visit https://www.rsmeans.com for more information.

You must review the TIPS Part 2 RS Means JOC Pricing Explanation & Rubric under the "Attachments" tab prior to responding herein.

The most common After-Hours RS Means Coefficient is "time-and-a-half" of the standard RS Means Unit Price Book. For example, if Vendor's Regular Hours Coefficient above is .95, Vendor would assert an After-Hours RS Means Coefficient of 1.45 for "time-and-a-half" pricing. To see the full scoring rubric and use TIPS scoring calculator, please view the TIPS RS Means JOC Pricing Explanation & Rubric under the "Attachments" tab.

Insert Vendor's After-Hours RS Means Coefficient below. **If you do not intend to propose on Part 2, you may enter a "0" in order to continue.**

1.55

42 **REQUIRED FOR PART 2 - Vendor's Percentage Markup of Items not Pre-Priced within the RS Means Price Book**

Here, Vendor must enter a percentage, not a coefficient. **If you do not intend to propose on Part 2, you may enter a "0" in order to continue.**

If Vendor sells items which cannot be found in the RS Means Price Book, at what Percentage Markup does Vendor agree to sell those Non Pre-Priced items? This is a maximum Percentage Markup and Vendor may always offer customers a lesser markup.

Example: In this example, Vendor is selling a project to a TIPS Member school district and some of the contract pricing for special materials cannot be verified because it cannot be found in the RS Means Price book. Vendor may sell those specialty items to the Member this percentage markup from cost. In this example, if one of the specialty items cost Vendor $100 from the manufacturer and Vendor proposed a Percentage Markup of 30% here, then Vendor could sell the item to the TIPS Customer for $130.00 or less in this example.

Vendor must provide TIPS with manufacturer documentation reflecting the cost of any non pre-priced item at the time of the TIPS sale so that TIPS can verify that the proposed percentage markup is being honored.

What is Vendor's Percentage Markup of items not Pre-Priced within the RS Means Price Book? **If you do not intend to propose on Part 2, you may enter a "0" in order to continue.**

35%

43

REQUIRED FOR PART 2 - TIPS Pricing and Line Item Estimate Pricing Requirements

This is a requirement of the Part 2 TIPS Contract and is non-negotiable. If you are not proposing on Part 2, you must still agree to proceed but it will not apply to you unless you decide to propose and are awarded on Part 2.

Vendor must respond to the required pricing attributes above seeking RS Means coefficients and a percentage markup if seeking to propose on Part 2.

If awarded on Part 2 of this TIPS Contract, for the duration of the contract, Vendor agrees to provide a RS Means line-item estimate to TIPS for each anticipated Part 2 TIPS project or sale. Or, in limited circumstances in contracts where Xactimate pricing is also expressly permitted and Vendor also submits Xactimate pricing under Part 2, Vendor may instead provide an Xactimate line-item estimate to TIPS. However, Vendor agrees that when a TIPS Member Customer seeks a quote for a Part 2 TIPS sale, Vendor will always supply a line-item estimate to TIPS for review and approval.

Yes, Vendor agrees

44

EXCEPTIONS & DEVIATIONS TO TIPS STANDARD TERMS AND CONDITIONS

Vendor agrees that, if awarded, Vendor's final TIPS Part 1 and/or Part 2 Contract will consist of the provisions set forth in the finalized TIPS Vendor Agreement, Vendor's responses to these attribute questions, and: (1) The corresponding TIPS solicitation document resulting in this Agreement; (2) Any addenda or clarifications issued in relation to the corresponding TIPS solicitation; (3) All solicitation information provided to Vendor by TIPS through the TIPS eBid System; (3) Vendor’s entire proposal response to the corresponding TIPS solicitation including all accepted required attachments, acknowledged notices and certifications, accepted negotiated terms, accepted pricing, accepted responses to questions, and accepted written clarifications of Vendor’s proposal, and; any properly included attachments to the TIPS Contract. In the event of conflict between the terms of the finalized Vendor Agreement and one of the incorporated documents the terms and conditions which are in the best interest of governmental/qualifying non-profit TIPS Members shall control at TIPS sole discretion.

If Vendor responds, "No, Vendor does not agree" to this Attribute, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration. This is the only proper way to submit proposed deviations for TIPS consideration. TIPS reserves the right to accept, decline, or modify Vendor's requested negotiated terms. For this reason, answering "No, Vendor does not agree" may ultimately delay or prevent award.

Does Vendor agree with TIPS standard terms and conditions as presented in the TIPS solicitation document (RFP, RCSP, RFQ, or other) and the TIPS Vendor Agreement document?

Yes, Vendor agrees

45	**TIPS Sales Reporting Requirements** **This is a requirement of the TIPS Contract and is non-negotiable.** By submitting this proposal, Vendor certifies that Vendor will properly report all TIPS sales. With the exception of TIPS Automated Vendors, who have signed an exclusive agreement with TIPS regarding reporting, all TIPS Sales must be reported to TIPS by either: (1) Emailing the purchase order or similar purchase document (with Vendor's Name, as known to TIPS, and the TIPS Contract Name and Number included) to TIPS at tipspo@tips-usa.com with "Confirmation Only" in the subject line of the email within three business days of Vendor's acceptance of the order, or; (2) Within 3 business days of the order being accepted by Vendor, Vendor must login to the TIPS Vendor Portal and successfully self-report all necessary sale information within the Vendor Portal and confirm that it shows up accurately on your current Vendor Portal statement. No other method of reporting is acceptable unless agreed to by the Parties in writing. Failure to report all sales pursuant to this provision may result in immediate cancellation of Vendor's TIPS Contract(s) for cause at TIPS' sole discretion.
46	**TIPS Administration Fee Requirement and Acknowledgment** **This is a requirement of the TIPS Contract and is non-negotiable.** The collection of fees by TIPS, a government entity, for performance of these procurement services is required pursuant to Texas Government Code Section 791.011 et. seq. The TIPS Administration Fee is the amount legally owed by Vendor to TIPS for TIPS Sales made by Vendor. The TIPS Administration Fee amount is typically a set percentage of each TIPS Sale legally due to TIPS, but the exact TIPS Administration Fee for this Contract is published in the corresponding RFP or RCSP document. TIPS Administration Fees are due to TIPS immediately upon Vendor's receipt of payment, including partial payment, for a TIPS Sale. By submitting a proposal, Vendor agrees that it has read, understands, and agrees to the published TIPS Administration Fee amount, calculation, and payment requirements. By submitting a proposal Vendor further confirms that all TIPS Pricing includes the TIPS Administration Fee and Vendor will not show adding the TIPS Administration Fee as a charge or line-item in any TIPS Sale.
47	**TIPS Member Access to Vendor Proposal & Documentation** **This is a requirement of the TIPS Contract and is non-negotiable.** Notwithstanding any other information provided in this solicitation or Vendor designation of certain documentation as confidential or proprietary, Vendor's submission of this proposal constitutes Vendor's express consent to the disclosure of Vendor's comprehensive proposal, including any information deemed confidential or proprietary, **to TIPS Members**. The proposing Vendor agrees that TIPS shall not be responsible or liable for any use or distribution of information or documentation to TIPS Members or by TIPS Members. By submitting this proposal, Vendor certifies the foregoing.

48	**Non-Collusive Bidding Certificate** **This is a requirement of the TIPS Contract and is non-negotiable.** By submission of this proposal, the Vendor certifies that: 1) This proposal has been independently arrived at without collusion with any other entity, bidder, or with any competitor; 2) This proposal has not been knowingly disclosed and will not be knowingly disclosed, prior to the opening of bids, or proposals for this project, to any other bidder, competitor or potential competitor: 3) No attempt has been or will be made to induce any other person, partnership or corporation to modify, submit, or not to submit a bid or proposal; and 4) The person signing this bid or proposal certifies that they are duly authorized to execute this proposal/contract on behalf of Vendor and they have fully informed themselves regarding the accuracy of the statements contained in this certification, and under the penalties being applicable to the bidder as well as to the person signing in its behalf;
49	**Antitrust Certification Statements (Tex. Government Code § 2155.005)** **This is a requirement of the TIPS Contract and is non-negotiable.** By submission of this bid or proposal, Vendor certifies under penalty of perjury of the laws of the State of Texas that: (1) I am duly authorized to execute this proposal/contract on my own behalf or on behalf of the company, corporation, firm, partnership or individual (Vendor) identified herein; (2) In connection with this proposal, neither I nor any representative of Vendor has violated any provision of the Texas Free Enterprise and Antitrust Act, Tex. Bus. & Comm. Code Chapter 15; (3) In connection with this proposal, neither I nor any representative of the Vendor has violated any federal antitrust law; (4) Neither I nor any representative of Vendor has directly or indirectly communicated any of the contents of this bid to a competitor of the Company or any other company, corporation, firm, partnership or individual engaged in the same line of business as the Company.
50	**Limitation on Out-of-State Litigation - Texas Business and Commerce Code § 272** **This is a requirement of the TIPS Contract and is non-negotiable.** Texas Business and Commerce Code § 272 prohibits a construction contract, or an agreement collateral to or affecting the construction contract, from containing a provision making the contract or agreement, or any conflict arising under the contract or agreement, subject to another state's law, litigation in the courts of another state, or arbitration in another state. If included in Texas construction contracts, such provisions are voidable by a party obligated by the contract or agreement to perform the work. By submission of this proposal, Vendor acknowledges this law and ***if Vendor enters into a construction contract with a Texas TIPS Member*** under this procurement, Vendor certifies compliance.

51 **Required Confidentiality Claim Form**

This is a requirement of the TIPS Contract and is non-negotiable.

TIPS provides the required TIPS Confidentiality Claim Form in the "Attachments" section of this solicitation. Vendor must execute this form by either signing and waiving any confidentiality claim, or designating portions of Vendor's proposal confidential. If Vendor considers any portion of Vendor's proposal to be confidential and not subject to public disclosure pursuant to Chapter 552 Texas Gov't Code or other law(s) and orders, Vendor must have identified the claimed confidential materials through proper execution of the Confidentiality Claim Form.
If TIPS receives a public information act or similar request, any responsive documentation not deemed confidential by you in this manner will be automatically released. For Vendor documents deemed confidential by you in this manner, TIPS will follow procedures of controlling statute(s) regarding any claim of confidentiality and shall not be liable for any release of information required by law, including Attorney General determination and opinion.

Notwithstanding any other Vendor designation of Vendor's proposal as confidential or proprietary, Vendor's submission of this proposal constitutes Vendor's agreement that proper execution of the required TIPS Confidentiality Claim Form is the only way to assert any portion of Vendor's proposal as confidential.

52 **Non-Discrimination Statement and Certification**

This is a requirement of the TIPS Contract and is non-negotiable.

In accordance with Federal civil rights law, all U.S. Departments, including but not limited to the USDA, USDE, FEMA, are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by federal funds (not all bases apply to all programs).
Vendor certifies that Vendor will comply with applicable Non-Discrimination and Equal Opportunity provisions set forth in TIPS Member Customers' policies and other regulations at the local, state, and federal levels of governments.

☑ Yes, I certify

53 **Limitation of Vendor Indemnification and Similar Clauses**

This is a requirement of the TIPS Contract and is non-negotiable.

TIPS, a department of Region 8 Education Service Center, a political subdivision, and local government entity of the State of Texas, is prohibited from indemnifying third-parties (pursuant to the Article 3, Section 52 of the Texas Constitution) except as otherwise specifically provided for by law or as ordered by a court of competent jurisdiction. Article 3, Section 52 of the Texas Constitution states that "no debt shall be created by or on behalf of the State … " and the Texas Attorney General has opined that a contractually imposed obligation of indemnity creates a "debt" in the constitutional sense. Tex. Att'y Gen. Op. No. MW-475 (1982). Thus, contract clauses which require TIPS to indemnify Vendor, pay liquidated damages, pay attorney's fees, waive Vendor's liability, or waive any applicable statute of limitations must be deleted or qualified with ''to the extent permitted by the Constitution and Laws of the State of Texas."

Does Vendor agree?

☑ Yes, I Agree

54 **Alternative Dispute Resolution Limitations**

This is a requirement of the TIPS Contract and is non-negotiable.

TIPS, a department of Region 8 Education Service Center, a political subdivision, and local government entity of the State of Texas, does not agree to binding arbitration as a remedy to dispute and no such provision shall be permitted in this Agreement with TIPS. Vendor agrees that any claim arising out of or related to this Agreement, except those specifically and expressly waived or negotiated within this Agreement, may be subject to non-binding mediation at the request of either party to be conducted by a mutually agreed upon mediator as prerequisite to the filing of any lawsuit arising out of or related to this Agreement. Mediation shall be held in either Camp or Titus County, Texas. Agreements reached in mediation will be subject to the approval by the Region 8 ESC's Board of Directors, authorized signature of the Parties if approved by the Board of Directors, and, once approved by the Board of Directors and properly signed, shall thereafter be enforceable as provided by the laws of the State of Texas.

Does Vendor agree?

Yes, Vendor agrees

55 **No Waiver of TIPS Immunity**

This is a requirement of the TIPS Contract and is non-negotiable.

Vendor agrees that nothing in this Agreement shall be construed as a waiver of sovereign or government immunity; nor constitute or be construed as a waiver of any of the privileges, rights, defenses, remedies, or immunities available to Region 8 Education Service Center or its TIPS Department. The failure to enforce, or any delay in the enforcement, of any privileges, rights, defenses, remedies, or immunities available to Region 8 Education Service Center or its TIPS Department under this Agreement or under applicable law shall not constitute a waiver of such privileges, rights, defenses, remedies, or immunities or be considered as a basis for estoppel.

Does Vendor agree?

☑ Yes, Vendor agrees

56 **Payment Terms and Funding Out Clause**

This is a requirement of the TIPS Contract and is non-negotiable.

Vendor agrees that TIPS and TIPS Members shall not be liable for interest or late-payment fees on past-due balances at a rate higher than permitted by the laws or regulations of the jurisdiction of the TIPS Member.

Funding-Out Clause: Vendor agrees to abide by the applicable laws and regulations, including but not limited to Texas Local Government Code § 271.903, or any other statutory or regulatory limitation of the jurisdiction of any TIPS Member, which requires that contracts approved by TIPS or a TIPS Member are subject to the budgeting and appropriation of currently available funds by the entity or its governing body.

Does Vendor agree?

☑ Yes, Vendor agrees

57 **Certification Regarding Prohibition of Certain Terrorist Organizations (Tex. Gov. Code 2270)**

Vendor certifies that Vendor is not a company identified on the Texas Comptroller's list of companies known to have contracts with, or provide supplies or services to, a foreign organization designated as a Foreign Terrorist Organization by the U.S. Secretary of State.

Does Vendor certify?

Yes, Vendor certifies

58 **Certification Regarding Prohibition of Boycotting Israel (Tex. Gov. Code 2271)**

If (a) Vendor is not a sole proprietorship; (b) Vendor has ten (10) or more full-time employees; and (c) this Agreement or any agreement with a TIPS Member under this procurement has value of $100,000 or more, the following certification shall apply; otherwise, this certification is not required. Vendor certifies, where applicable, that neither the Vendor, nor any affiliate, subsidiary, or parent company of Vendor, if any, boycotts Israel, and Vendor agrees that Vendor and Vendor Companies will not boycott Israel during the term of this Agreement. For purposes of this Agreement, the term "boycott" shall mean and include refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory but does not include an action made for ordinary business purposes.

When applicable, does Vendor certify?

Yes, Vendor certifies

59 **Certification Regarding Prohibition of Contracts with Certain Foreign-Owned Companies (Tex. Gov. Code 2274)**

Certain public entities are prohibited from entering into a contract or other agreement relating to critical infrastructure that would grant Vendor direct or remote access to or control of critical infrastructure in this state, excluding access specifically allowed by a customer for product warranty and support purposes.

Vendor certifies that neither it nor its parent company nor any affiliate of Vendor or its parent company, is (1) owned by or the majority of stock or other ownership interest of the company is held or controlled by individuals who are citizens of China, Iran, North Korea, Russia, or a designated country; (2) a company or other entity, including governmental entity, that is owned or controlled by citizens of or is directly controlled by the government of China, Iran, North Korea, Russia, or a designated country; or (3) headquartered in China, Iran, North Korea, Russia, or a designated country.

For purposes of this certification, "critical infrastructure" means "a communication infrastructure system, cybersecurity system, electric grid, hazardous waste treatment system, or water treatment facility." Vendor certifies that Vendor will not grant direct or remote access to or control of critical infrastructure, except for product warranty and support purposes, to prohibited individuals, companies, or entities, including governmental entities, owned, controlled, or headquartered in China, Iran, North Korea, Russia, or a designated country, as determined by the Governor.

When applicable, does Vendor certify?

Yes, Vendor certifies

60 **Certification Regarding Prohibition of Discrimination Against Firearm and Ammunition Industries (Tex. Gov. Code 2274)**

If (a) Vendor is not a sole proprietorship; (b) Vendor has at least ten (10) full-time employees; and (c) this Agreement or any Supplemental Agreement with certain public entities have a value of at least $100,000 that is paid wholly or partly from public funds; (d) the Agreement is not excepted under Tex. Gov. Code 2274 and (e) the purchasing public entity has determined that Vendor is not a sole-source provider or the purchasing public entity has not received any bids from a company that is able to provide this written verification, the following certification shall apply; otherwise, this certification is not required.

Vendor certifies that Vendor, or association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary parent company, or affiliate of these entities or associations, that exists to make a profit, does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association and will not discriminate during the term of this contract against a firearm entity or firearm trade association.

For purposes of this Agreement, “discriminate against a firearm entity or firearm trade association” shall mean, with respect to the entity or association, to: “(1) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association; (2) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or (3) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association.”

“Discrimination against a firearm entity or firearm trade association” does not include: “(1) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and (2) a company’s refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship to comply with federal, state, or local law, policy, or regulations or a directive by a regulatory agency, or for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity’s or association’s status as a firearm entity or firearm trade association.”

When applicable, does Vendor certify?

Yes, Vendor certifies

61 **Certification Regarding Termination of Contract for Non-Compliance (Tex. Gov. Code 552.374)**

If Vendor is not a governmental body and (a) this Agreement or any Supplemental Agreement with a public entity has a stated expenditure of at least $1 million in public funds for the purchase of goods or services by certain public entities; or (b) this Agreement or any Supplemental Agreement results in the expenditure of at least $1 million in public funds for the purchase of goods or services by certain public entities in their fiscal year, the following certification shall apply; otherwise, this certification is not required.

As required by Tex. Gov. Code 552.374, the following statement is included in the RFP and the Agreement (unless the Agreement is (1) related to the purchase or underwriting of a public security; (2) is or may be used as collateral on a loan; or (3) proceeds from which are used to pay debt service of a public security of loan): “The requirements of Subchapter J, Chapter 552, Government Code, may apply to this solicitation and Agreement and the Vendor agrees that this Agreement and any applicable Supplemental Agreement can be terminated if Vendor knowingly or intentionally fails to comply with a requirement of that subchapter.”

Pursuant to Chapter 552 of the Texas Government Code, Vendor certifies that Vendor shall: (1) preserve all contracting information related to this Agreement as provided by the records retention requirements applicable to TIPS or the purchasing TIPS Member for the duration of the Agreement; (2) promptly provide to TIPS or the purchasing TIPS Member any contracting information related to the Agreement that is in the custody or possession of Vendor on request of TIPS or the purchasing TIPS Member; and (3) on completion of the Agreement, either (a) provide at no cost to TIPS or the purchasing TIPS Member all contracting information related to the Agreement that is in the custody or possession of Vendor, or (b) preserve the contracting information related to the Agreement as provided by the records retention requirements applicable to TIPS or the purchasing TIPS Member.

When applicable, does Vendor certify?

Yes, Vendor certifies

62 **Certification Regarding Prohibition of Boycotting Certain Energy Companies (Tex. Gov. Code 2274)**

If (a) Vendor is not a sole proprietorship; (b) Vendor has ten (10) or more full-time employees; and (c) this Agreement or any Supplemental Agreement with certain public entities has a value of $100,000 or more that is to be paid wholly or partly from public funds, the following certification shall apply; otherwise, this certification is not required.

Vendor certifies that Vendor, or any wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of these entities or business associations, if any, do not boycott energy companies and will not boycott energy companies during the term of the Agreement or any applicable Supplemental Agreement.

For purposes of this certification the term “company” shall mean an organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, that exists to make a profit.

The term “boycott energy company” shall mean “without an ordinary business purpose, refusing to deal with, terminating business activities with, or otherwise taking any action intended to penalize, inflict economic harm on, or limit commercial relations with a company because the company (a) engages in the exploration, production, utilization, transportation, sale, or manufacturing of fossil fuel-based energy and does not commit or pledge to meet environmental standards beyond applicable federal and state law, or (b) does business with a company described by paragraph (a).” (See Tex. Gov. Code 809.001).

When applicable, does Vendor certify?

Yes, Vendor certifies

63 **Felony Conviction Notice - Texas Education Code 44.034**

Texas Education Code, Section 44.034, Notification of Criminal History, Subsection (a), states, "a person or business entity that enters into a contract with a school district must give advance notice to the district if the person or an owner or operator of the business entity has been convicted of a felony. The notice must include a general description of the conduct resulting in the conviction of a felony.”

Subsection (b) states, "a school district may terminate a contract with a person or business entity if the district determines that the person or business entity failed to give notice as required by Subsection (a) or misrepresented the conduct resulting in the conviction. The district must compensate the person or business entity for services performed before the termination of the contract.”

Subsection (c) states, "This section does not apply to a publicly held corporation.

Vendor certifies one of the following:

A. My firm is a publicly held corporation; therefore, this reporting requirement is not applicable, or;

B. My firm is not owned nor operated by anyone who has been convicted of a felony, or;

C. My firm is owned or operated by the following individual(s) who has/have been convicted of a felony.

If Vendor responds with Option (C), Vendor is required to provide information in the next attribute.

B. My firm is not owned nor operated by felon.

64 **Felony Conviction Notice - Texas Education Code 44.034 - Continued**

If Vendor selected Option (C) in the previous attribute, Vendor must provide the following information herein:

1. Name of Felon(s)

2. The Felon(s) title/role in Vendor's entity, and

3. Details of Felon(s) Conviction(s).

No response

65 **Conflict of Interest Questionnaire Requirement**

Vendor agrees that it has looked up, read, and understood the current version of Texas Local Government Code Chapter 176 which generally requires disclosures of conflicts of interests by Vendor hereunder if Vendor:

(1) has an employment or other business relationship with a local government officer of our local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of our local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of our local governmental entity.

(4) Any other financial, commercial, or familial relationship with our local government that may warrant reporting under this statute.

Does Vendor certify that it has NO reportable conflict of interest?

Yes, Vendor certifies - VENDOR HAS NO CONFLICT

66 **Conflict of Interest Questionnaire Requirement - Form CIQ - Continued**

If you responded "No, Vendor does not certify - VENDOR HAS CONFLICT" to the Conflict of Interest Questionnaire question above, you are required by law to fully execute and upload the form attachment entitled "Conflict of Interest Questionnaire - Form CIQ." If you accurately claimed no conflict above, you may disregard the form attachment entitled "Conflict of Interest Questionnaire - Form CIQ."
Have you uploaded this form if applicable?

Not Applicable

67 **Upload of Current W-9 Required**

Vendors are required by TIPS to upload a current, accurate W-9 Internal Revenue Service (IRS) Tax Form for your entity. This form will be utilized by TIPS to properly identify your entity.

You must confirm that you are responding to this solicitation under your legal entity name. Go now to your Supplier Profile in this eBid System and confirm that your profile reflects your "Legal Name" as it is listed on your W9.

68 **Regulatory Good Standing Certification**

Does Vendor certify that its entity is in good standing will all government entities and agencies, whether local, state, or federal, that regulate any aspect of Vendor's field of work or business operations?

If Vendor selects "No", Vendor must provide explanation on the following attribute question.

Yes, Vendor certifies

69	**Regulatory Good Standing Certification - Explanation - Continued** If Vendor responded to the prior attribute that "No", Vendor is not in good standing, Vendor must provide an explanation of that lack of good standing here for TIPS consideration. *No response*

70	**Instructions Only - Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion** **Instructions for Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion** 1. By answering yes to the next Attribute question below, the vendor and prospective lower tier participant is providing the certification set out herein in accordance with these instructions. 2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and / or debarment. 3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances. 4. The terms “covered transaction,” “debarred,” “suspended,” “ineligible,” “lower tier covered transaction,” “participants,” “person,” “primary covered transaction,” “principal,” “proposal” and “voluntarily excluded,” as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations. 5. The prospective lower tier participant agrees by submitting this form that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated. 6. The prospective lower tier participant further agrees by submitting this form that it will include this clause titled “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction” without modification in all lower tier covered transactions and in all solicitations for lower tier covered transactions. 7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List. 8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings. 9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible or voluntarily excluded from participation in this transaction, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and / or debarment.

71

Suspension or Debarment Certification

Read the instructions in the attribute above and then answer the following accurately.

Vendor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

Does Vendor certify?

Yes, Vendor certifies

72

Vendor Certification of Criminal History - Texas Education Code Chapter 22

Texas Education Code Chapter 22 requires entities that contract with school districts to provide services to obtain criminal history record information regarding covered employees. Contractors must certify to the district that they have complied. Covered employees with disqualifying criminal histories are prohibited from serving at a school district pursuant to this law.

DEFINITIONS

Covered employees: Employees of a contractor or subcontractor who have or will have continuing duties related to the service to be performed at the District and have or will have direct contact with students. The District will be the final arbiter of what constitutes direct contact with students.

Disqualifying criminal history: Any conviction or other criminal history information designated by the District, or one of the following offenses, if at the time of the offense, the victim was under 18 or enrolled in a public school: (a) a felony offense under Title 5, Texas Penal Code; (b) an offense for which a defendant is required to register as a sex offender under Chapter 62, Texas Code of Criminal Procedure; or (c) an equivalent offense under federal law or the laws of another state.

Vendor certifies:

NONE (Section A): None of the employees of Vendor and any subcontractors are covered employees, as defined above. If this box is checked, I further certify that Contractor has taken precautions or imposed conditions to ensure that the employees of Vendor and any subcontractor will not become covered employees. Contractor will maintain these precautions or conditions throughout the time the contracted services are provided under this procurement.

OR

SOME (Section B): Some or all of the employees of Vendor and any subcontractor are covered employees. If this box is checked, I further certify that: (1) Vendor has obtained all required criminal history record information regarding its covered employees. None of the covered employees has a disqualifying criminal history; (2) If Vendor receives information that a covered employee subsequently has a reported criminal history, Vendor will immediately remove the covered employee from contract duties and notify the purchasing entity in writing within 3 business days; (3) Upon request, Vendor will provide the purchasing entity with the name and any other requested information of covered employees so that the purchasing entity may obtain criminal history record information on the covered employees; (4) If the purchasing entity objects to the assignment of a covered employee on the basis of the covered employee's criminal history record information, Vendor agrees to discontinue using that covered employee to provide services at the purchasing entity.

Which option does Vendor certify?

Yes, I certify - NONE (Section A)

73 **Certification Regarding "Choice of Law" Terms with TIPS Members**

Vendor agrees that if any "Choice of Law" provision is included in any sales agreement/contract between Vendor and a TIPS Member, that clause must provide that the "Choice of Law" applicable to the sales agreement/contract between Vendor and TIPS Member shall be the state where the TIPS Member operates unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Choice of Law" clause that conflicts with these terms is rendered void and unenforceable.

If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration.

Does Vendor agree?

Yes, Vendor agrees

74 **Certification Regarding "Venue" Terms with TIPS Members**

Vendor agrees that if any "Venue" provision is included in any sales agreement/contract between Vendor and a TIPS Member, that clause must provide that the "Venue" for any litigation or alternative dispute resolution is shall be in the state and county where the TIPS Member operates unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a "Venue" clause that conflicts with these terms is rendered void and unenforceable.

If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration.

Does Vendor agree?

Yes, Vendor agrees

75 **Certification Regarding "Automatic Renewal" Terms with TIPS Members**

Vendor agrees that no TIPS Sale may incorporate an "Automatic Renewal" clause that exceeds month to month terms with which the TIPS Member must comply. All renewal terms incorporated into a TIPS Sale Supplemental Agreement shall only be valid and enforceable when Vendor received written confirmation of acceptance of the renewal term from the TIPS Member for the specific renewal term. The purpose of this clause is to avoid a TIPS Member inadvertently renewing a Supplemental Agreement during a period in which the governing body of the TIPS Member has not properly appropriated and budgeted the funds to satisfy the Agreement renewal. Any TIPS Sale Supplemental Agreement containing an "Automatic Renewal" clause that conflicts with these terms is rendered void and unenforceable.

If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration.

Does Vendor agree?

Yes, Vendor agrees

76

Certification Regarding "Indemnity" Terms with TIPS Members

Texas and other jurisdictions restrict the ability of governmental entities to indemnify others. Vendor agrees that if any "Indemnity" provision which requires the TIPS Member to indemnify Vendor is included in any sales agreement/contract between Vendor and a TIPS Member, that clause must either be stricken or qualified by including that such indemnity is only permitted, "to the extent permitted by the laws and constitution of [TIPS Member's State]" unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing an "Indemnity" clause that conflicts with these terms is rendered void and unenforceable.

If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration.

Does Vendor agree?

Yes, Vendor agrees

77

Certification Regarding "Arbitration" Terms with TIPS Members

Vendor agrees that if any "Arbitration" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause may ***not*** require that the arbitration is mandatory or binding. Vendor agrees that if any "Arbitration" provision is included in any TIPS Sale agreement/contract between Vendor and a TIPS Member, that clause provides for only voluntary and non-binding arbitration unless the TIPS Member expressly agrees otherwise. Any TIPS Sale Supplemental Agreement containing a “Arbitration” clause that conflicts with these terms is rendered void and unenforceable.
If Vendor disagrees, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document version of the Vendor Agreement and will be instructed to include all requested negotiations as redline edits for TIPS consideration.

Does Vendor agree?

Yes, Vendor agrees

78

2 CFR PART 200 AND FEDERAL CONTRACT PROVISIONS EXPLANATION

TIPS and TIPS Members will sometimes seek to make purchases with federal funds. In accordance with 2 C.F.R. Part 200 of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (sometimes referred to as “EDGAR”),Vendor's response to the following questions labeled "2 CFR Part 200 or Federal Provision" will indicate Vendor's willingness and ability to comply with certain requirements which may be applicable to TIPS purchases paid for with federal funds, if accepted by Vendor.

Your responses to the following questions labeled "2 CFR Part 200 or Federal Provision" will dictate whether TIPS can list this awarded contract as viable to be considered for a federal fund purchase. **Failure to certify all requirements labeled "2 CFR Part 200 or Federal Provision" will mean that your contract is listed as not viable for the receipt of federal funds. However, it will not prevent award.**

If you do enter into a TIPS Sale when you are accepting federal funds, the contract between you and the TIPS Member will likely require these same certifications.

79	**2 CFR Part 200 or Federal Provision - Prohibition of Cost Plus** Contracts paid with federal funds which exceed the simplified acquisition threshold currently set at $250,000 (2 CFR 200.320), which is the inflation adjusted amount determined by the Civilian Agency Acquisition Council and the Defense Acquisition Council and the Defense Acquisition Regulations Council (Councils) as authorized by 41 U.S.C. 1908, may not utilize a cost plus percentage of cost and percentage of cost method of contract pricing. Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members for a TIPS Sale resulting from this procurement process which exceeds the simplified acquisition threshold, Vendor shall not utilize a cost plus a percentage of cost and percentage of cost method of contract pricing for that expenditure. If Vendor fails to certify and proposes a Cost Plus Markup Method of pricing anywhere in their proposal, Vendor will **not** be listed as federally/EDGAR compliant for TIPS purposes. Does Vendor certify? Yes, Vendor agrees.
80	**2 CFR Part 200 or Federal Provision - Vendor Willingness to Accept Federal Funds** This certification is not required by federal law. However, TIPS Members are public entities and qualifying non-profits which often receive federal funding and grants (ESSER, CARES Act, EDGAR, etc.) ***Accepting such funds often requires additional required certifications and responsibilities for Vendor.*** The following attribute questions include these required certifications. Your response to this questions, the following certifications, and other factors will determine whether your contract award will be deemed as eligible for federal fund expenditures by TIPS Members. If awarded, is Vendor willing to accept payment for goods and services offered under this contract paid for by a TIPS Member with federal funds? Yes
81	**2 CFR Part 200 or Federal Provision - Contracts** Contracts for more than the simplified acquisition threshold currently set at $250,000 (2 CFR § 200.320), which is the inflation adjusted amount determined by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) as authorized by 41 U.S.C. 1908, must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate. Notice: Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members reserve all rights and privileges under the applicable laws and regulations with respect to this procurement in the event of breach of contract by either party. Does vendor agree? Yes, Vendor agrees

82

2 CFR Part 200 or Federal Provision - Termination

Termination for cause and for convenience by the grantee or subgrantee including the manner by which it will be effected and the basis for settlement. (All contracts in excess of $10,000)

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members reserve the right to terminate any agreement in excess of $10,000 resulting from this procurement process for cause after giving the vendor an appropriate opportunity and up to 30 days, to cure the causal breach of terms and conditions. ESC Region 8 and TIPS Members reserve the right to terminate any agreement in excess of $10,000 resulting from this procurement process for convenience with 30 days notice in writing to the awarded vendor. The Vendor would be compensated for work performed and goods procured as of the termination date if for convenience of the ESC Region 8 and TIPS Members. Any award under this procurement process is not exclusive and the ESC Region 8 and TIPS reserves the right to purchase goods and services from other vendors when it is in the best interest of the ESC Region 8 and TIPS.

Does vendor agree?

Yes, Vendor agrees

83

2 CFR Part 200 or Federal Provision - Clean Air Act

Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended—Contracts and subgrants of amounts in excess of $150,000 must contain a provision that requires the non-Federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).
Pursuant to the Clean Air Act, et al above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members require that the proposer certify that during the term of an award by the ESC Region 8 and TIPS Members resulting from this procurement process the vendor agrees to comply with all of the above regulations, including all of the terms listed and referenced therein.
Does vendor agree?

Yes, Vendor agrees

84

2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment

Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)—Contractors that apply or bid for an award exceeding $100,000 must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award.

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members require the proposer certify that during the term and during the life of any contract with ESC Region 8 and TIPS Members resulting from this procurement process the vendor certifies that it is in compliance with all applicable provisions of the Byrd Anti-Lobbying Amendment (31 U.S.C. 1352).

Does Vendor agree?

Yes, Vendor agrees

85

2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment - Continued

Applicable to Grants, Subgrants, Cooperative Agreements, and Contracts Exceeding $100,000 in Federal Funds

Submission of this certification is a prerequisite for making or entering into this transaction and is imposed by the Byrd Anti-Lobbying Amendment (31 U.S.C. 1352). This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of congress, or an employee of a Member of Congress in connection with the awarding of a Federal contract, the making of a Federal grant, the making of a Federal loan, the entering into a cooperative agreement, and the extension, continuation, renewal, amendment, or modification of a Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, “disclosure Form to Report Lobbying,” in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all covered subawards exceeding $100,000 in Federal funds at all appropriate tiers and that all subrecipients shall certify and disclose accordingly.

Does Vendor certify that it has NOT lobbied as described herein?

Yes, Vendor certifies - NO Reportable Lobbying

86

2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment - Continued

If you answered "No, Vendor does not certify - Lobbying to Report" to the above attribute question, you must download, read, execute, and upload the attachment entitled "Disclosure of Lobbying Activities - Standard Form - LLL", as instructed, to report the lobbying activities you performed or paid others to perform.

87

2 CFR Part 200 or Federal Provision - Federal Rule

Compliance with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15). (Contracts, subcontracts, and subgrants of amounts in excess of $100,000)

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, ESC Region 8 and TIPS Members requires the proposer certify that in performance of the contracts, subcontracts, and subgrants of amounts in excess of $250,000, the vendor will be in compliance with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15).

Does vendor certify compliance?

Yes, Vendor certifies

88

2 CFR Part 200 or Federal Provision - Procurement of Recovered Materials

A non-Federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include: (1) procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; (2) procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

Does vendor certify that it is in compliance with these provisions?

Yes, Vendor certifies

89

2 CFR Part 200 or Federal Provision - Rights to Inventions

If the Federal award meets the definition of “funding agreement” under 37 CFR §401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that “funding agreement,” the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, “Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements,” and any implementing regulations issued by the awarding agency.
Pursuant to the above, when the foregoing applies to ESC Region 8 and TIPS Members, Vendor certifies that during the term of an award resulting from this procurement process, Vendor agrees to comply with all applicable requirements as referenced in the Federal rule above.
Does vendor certify?

Yes, Vendor certifies

90

2 CFR Part 200 or Federal Provision - Domestic Preferences for Procurements and Compliance with Buy America Provisions

As appropriate and to the extent consistent with law, TIPS Member Customers, to the greatest extent practicable under a Federal award, may provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). Vendor agrees that the requirements of this section will be included in all subawards including all contracts and purchase orders for work or products under this award, to the greatest extent practicable under a Federal award. For purposes of 2 CFR Part 200.322, “Produced in the United States” means, for iron and steel products, that all manufacturing processes, from the initial melting stag through the application of coatings, occurred in the United States. Moreover, for purposes of 2 CFR Part 200.322, “Manufactured products” means items and construction materials composed in whole or in part of non-ferrous metals such as aluminum, plastics and polymer-based products such as polyvinyl chloride pipe, aggregates such as concrete, glass, including optical fiber, and lumber.

Vendor certifies that it is in compliance with all applicable provisions of the Buy America Act. Purchases made in accordance with the Buy America Act must still follow the applicable procurement rules calling for free and open competition. For purposes of 2 CFR Part 200.322,

“Produced in the United States” means, for iron and steel products, that all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.

“Manufactured products” means items and construction materials composed in whole or in part of non-ferrous metals such as aluminum; plastics and polymer-based products such as polyvinyl chloride pipe; aggregates such as concrete; glass, including optical fiber; and lumber.

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, Vendor certifies that to the greatest extent practicable Vendor will provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products).

Does Vendor Certify?

Yes, Vendor certifies

91

2 CFR Part 200 or Federal Provision - Ban on Foreign Telecommunications

ESC 8 and TIPS Members are prohibited from obligating or expending Federal financial assistance, to include loan or grant funds, to: (1) procure or obtain, (2) extend or renew a contract to procure or obtain, or (3) enter into a contract (or extend or renew a contract) to procure or obtain, equipment, services, or systems that use “covered telecommunications” equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. “Covered telecommunications” equipment is telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities), and physical security surveillance of critical infrastructure and other national security purposes, and video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities) for the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes detailed in 2 CFR § 200.216.

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, Vendor certifies that Vendor will not purchase equipment, services, or systems that use “covered telecommunications”, as defined by 2 CFR §200.216 equipment or services as a substantial or essential component of any system, or as critical technology as part of any system.

Does vendor certify?

Yes, Vendor certifies

92

2 CFR Part 200 or Federal Provision - Contract Cost & Price

For contracts more than the simplified acquisition threshold currently set at $250,000, a TIPS Member may, in very rare circumstances, be required to negotiate profit as a separate element of the price pursuant to 2 C.F.R. 200.324(b). Under those circumstances, Vendor agrees to provide information and negotiate with the TIPS Member regarding profit as a separate element of the price. However, Vendor certifies that the total price charged by the Vendor shall not exceed the Vendor's TIPS pricing and pricing terms proposed.

Does Vendor certify?

Yes, Vendor certifies

93

2 CFR Part 200 or Federal Provision - Equal Employment Opportunity

Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members on any federally assisted construction contract, the equal

opportunity clause is incorporated by reference here.

Does Vendor Certify?

Yes, Vendor certifies

94

2 CFR Part 200 or Federal Provision - Davis Bacon Act Compliance

Texas Statute requires compliance with Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146- 3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non- Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

Pursuant to state and federal requirements, Vendor certifies that it will be in compliance with all applicable Davis-Bacon Act provisions if/when applicable.

Does Vendor certify?

Yes, Vendor certifies

95

2 CFR Part 200 or Federal Provision - Contract Work Hours and Safety Standards

Where applicable, all contracts awarded by ESC 8 and TIPS Members in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.
Pursuant to the above, when federal funds are expended by ESC Region 8 and TIPS Members, Vendor certifies that during the term of an award for all contracts resulting from this procurement process, Vendor will be in compliance with all applicable provisions of the Contract Work Hours and Safety Standards Act.

Does Vendor certify?

Yes, Vendor certifies

96

2 CFR Part 200 or Federal Provision - FEMA Fund Certification & Certification of Access to Records

If and when Vendor accepts a TIPS purchase paid for in full or part with FEMA funds, Vendor certifies that:

(1) Vendor agrees to provide the TIPS Member, the FEMA Administrator, the Comptroller General of the United States, or any of their authorized representatives access to and rights to reproduce any books, documents, papers, and records of the Contractor which are directly pertinent to this contract, or any contract resulting from this procurement, for the purposes of making audits, examinations, excerpts, and transcriptions. This right also includes timely and reasonable access to Vendor's personnel for the purpose of interview and discussion relating to such documents. Vendor agrees to provide the FEMA Administrator or an authorized representatives access to construction or other work sites pertaining to the work being completed under the contract. Vendor acknowledges and agrees that no language in this contract or the contract with the TIPS Member is intended to prohibit audits or internal reviews by the FEMA Administrator or the Comptroller General of the United States.

(2) The Vendor shall not use the Department of Homeland Security's seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre-approval.

(3) The Vendor will comply with all applicable Federal law, regulations, executive orders, FEMA policies, procedures, and directives.

(4) The Federal Government is not a party to this contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract.

(5) The Vendor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to the Vendor's actions pertaining to this contract.

Does Vendor certify?

Yes, Vendor certifies

97

2 CFR Part 200 or Federal Provision - Certification of Compliance with the Energy Policy and Conservation Act

When appropriate and to the extent consistent with the law, Vendor certifies that it will comply with the Energy Policy and Conservation Act (42 U.S.C. 6321 et seq; 49 C.F.R. Part 18) and any state mandatory standards and policies relating to energy efficiency which are contained in applicable state energy conservation plans issued in compliance with the Act.

Does Vendor certify?

Yes, Vendor certifies

98

2 CFR Part 200 or Federal Provision - Certification of Compliance with Never Contract with the Enemy

Where applicable, all contracts awarded by ESC 8 and TIPS Members in excess of $50,000.00, within the period of performance, and which are performed outside of the United States, including U.S. territories, are subject to the regulations implementing Never Contract with the Enemy in 2 CFR part 183. Per 2 CFR part 183, in the situation specified, ESC 8 and TIPS Members shall terminate any contract or agreement resulting from this procurement which violates the Never Contract with the Enemy regulation in 2 CFR part 183, including if Vendor is actively opposing the United States or coalition forces involved in a contingency operation in which members of the the Armed Forces are actively engaged in hostilities. Vendor certifies that it is neither an excluded entity under the System for Award Management (SAM) nor Federal Awardee Performance and Integrity Information System (FAPIIS) for any contract terminated due to Never Contract with the Enemy as a Termination for Material Failure to Comply.

Does Vendor certify?

Yes, Vendor certifies

99

2 CFR Part 200 or Federal Provision - Certification of Compliance with EPA Regulations

For contracts resulting from this procurement, in excess of $100,000.00 and paid for with federal funds, Vendor certifies that Vendor will comply with all applicable standards, orders, regulations, and/or requirements issued pursuant to the Clean Air Act of 1970, as amended (42 U.S.C. 1857(h)), Section 508 of the Clean Water Act, as amended (33 U.S.C. 1368), Executive Order 117389 and Environmental Protection Agency Regulation, 40 CFR Part 15.

Does Vendor certify?

Yes, Vendor certifies

100

2 CFR Part 200 or Federal Provision - Record Retention Requirements

For contracts resulting from this procurement, paid for by ESC 8 or TIPS Members with federal funds, Vendor certifies that Vendor will comply with the record retention requirements detailed in 2 CFR § 200.334. Vendor certifies that Vendor will retain all records as required by 2 CFR § 200.334 for a period of three years after final expenditure or financial reports, as applicable, and all other pending matters are closed.

Does Vendor certify?

Yes, Vendor certifies

101

2 CFR Part 200 or Federal Provision - Subcontracting and Affirmative Steps for Small and Minority Businesses, Women's Business Enterprises, and Labor Surplus Area Firms.

Do you ever anticipate the possibility of subcontracting any of your work under this award if you are successful?

If you respond "Yes", you must respond to the following attribute question accurately. If you respond "No", you may skip the following attribute question.

~~YES~~ Vendor corrected to response to 'NO' via email on 6.25.25.

102	**2 CFR Part 200 or Federal Provision - If "Yes" Response to Above Attribute - Continued - Subcontracting and Affirmative Steps for Small and Minority Businesses, Women's Business Enterprises, and Labor Surplus Area Firms.** **Only respond to this question if you responded "Yes" to the attribute question directly above. Skip this question if you responded "No" to the attribute question directly above.** Does Vendor certify that it will follow the following affirmative steps? Federal Regulation 2 CFR §200.321 Contracting with small and minority businesses, women's business enterprises, and labor surplus area firms. (a)The non-Federal entity must take all necessary affirmative steps to assure that minority businesses, women's business enterprises, and labor surplus area firms are used when possible. (b) Affirmative steps must include: (1) Placing qualified small and minority businesses and women's business enterprises on solicitation lists; (2) Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources; (3) Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises; (4) Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises; (5) Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce ; and (6) Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs(1) through (5) of this section. Does Vendor certify? *No response*
103	**ACKNOWLEDGMENT & BINDING CORPORATE AUTHORITY** By submitting this proposal, the individual(s) submitting on behalf of the Vendor certify that they are authorized by Vendor to complete and submit this proposal on behalf of Vendor and that this proposal was duly submitted on behalf of Vendor by authority of its governing body, if any, and within the scope of its corporate powers. Vendor further certifies that it has read, examined, and understands all portions of this solicitation including but not limited to all attribute questions, attachments, solicitation documents, bid notes, and the Vendor Agreement(s). Vendor certifies that, if necessary, Vendor has consulted with counsel in understanding all portions of this solicitation.

RE: Reference Letter for United Elevator

To whom it may concern:

Please accept this reference for United Elevator who provided goods and services to Knox County Schools. They have provided elevator services including installations, monthly maintenance, and compliance inspections for Knox County Schools in 2024-25 as well as several years prior. We understand they have submitted a proposal to Education Service Center Region 8 and TIPS Cooperative.

Knox County Schools has been a customer of United Elevator for several years, and they have always exceeded commitments and expectations. We plan to continue to partner with them and would highly recommend United Elevator to TIPS public entity and non-profit members.

Thank you,

Lori Hall, Operations Supervisor
Knox County Schools
Maintenance & Operations Department

To whom it may concern

I am writing this letter to recommend United Elevator Services, LLC as a candidate for your TIPS program. They have proven to be dependable and consistently exceed expectations as a vendor for doing work in my schools. Their ability to analyze challenges, develop solutions, and collaborate with us makes them an asset to my workplace. The employees are friendly and very knowledgeable.

If you are looking for a company that is hardworking, dependable, and can-do problem-solving skills, I highly encourage you to consider United Elevator Services, LLC to be a member of your organization. Please do not hesitate to contact me if you need further insights.

Sincerely,

Mary Kington

TIPS CONTRACT 250502

REQUIRED CONFIDENTIALITY CLAIM FORM

(VENDOR MUST COMPLETE THE FOLLOWING VENDOR INFORMATION)

Vendor Entity Name: United Elevator Services, LLC

Vendor Authorized Signatory Name: Shawn Lyness

Vendor Authorized Signatory Title: Sales Manager

Vendor Authorized Signatory Email: shawnl@unitedelevator.com

Vendor Address: PO Box 1308

City: Knoxville State: TN Zip Code: 37901

Vendor agrees that it is voluntarily providing its data (including but not limited to: Vendor information, Vendor documentation, Vendor's proposal, Vendor pricing submitted or provided to TIPS, TIPS contract documents, TIPS correspondence, Vendor logos and images, Vendor's contact information, Vendor's brochures and commercial information, Vendor's financial information, Vendor's certifications, and any other Vendor information or documentation submitted to TIPS by Vendor and its agents) (Hereinafter, "Vendor Data") to TIPS. Vendor understands and agrees that TIPS is a government entity subject to public information laws including but not limited to Texas Government Code (TGC) Chapter 552. Vendor agrees that regardless of confidentiality designations herein, Vendor's submission of a proposal constitutes Vendor's consent to the disclosure and release of Vendor's Data and comprehensive proposal, including any information deemed confidential or proprietary herein, to and by TIPS Members.

Notwithstanding the foregoing permissible release to TIPS Members, if Vendor considers any portion of Vendor's proposal to be otherwise confidential and not subject to public disclosure pursuant to public information laws, including but not limited to TGC Chapter 552, Vendor must properly execute ***Option 1 only*** below, attach to this PDF all documents and information that Vendor deems confidential, and upload the consolidated documentation. Regardless of the Option selected below, this form must be completed and uploaded to the "Response Attachments" section of the eBid System entitled "Required Confidentiality Claim Form." Execution and submission of this form is the sole indicator of whether Vendor considers any Vendor Data confidential in the event TIPS receives a request, a Public Information Request, or subpoena. If TIPS receives a request, any responsive documentation not deemed confidential by you through proper execution of Option 1 of this form will be automatically released. For information deemed confidential by you through proper execution of Option 1 of this form, TIPS will follow procedures of controlling statute(s) regarding withholding that documentation and shall not be liable for any release of information required by law, including Attorney General opinion or court order.

(VENDOR MUST COMPLETE ONE OF THE TWO OPTIONS AND UPLOAD IN THE EBID SYSTEM)

OPTION 1 – DESIGNATING CONFIDENTIAL MATERIALS – YES, VENDOR HAS ATTACHED CONFIDENTIAL MATERIALS

(Confirm each bullet point and sign below)

- Vendor claims some Vendor Data confidential to the extent permitted by TGC Chapter 552 and other applicable law.
- Vendor attached to this PDF all potentially confidential Vendor Data and listed the number of attached pages below.
- Vendor's authorized signatory has signed below and shall upload this document in the proper location in the eBid System.
- Vendor agrees that TIPS shall not be liable for any release of confidential information required by law.

Number of pages attached deemed confidential: _____

Authorized Signature: _____

OPTION 2 – WAIVER OF CONFIDENTIALITY – NO, VENDOR HAS NOT ATTACHED CONFIDENTIAL MATERIALS

(Confirm each bullet point and sign below)

By signing for Option 2 below, Vendor expressly waives any confidentiality claim for all Vendor Data submitted in relation to this proposal and resulting contract. Vendor confirms that TIPS may freely release Vendor Data submitted in relation to this proposal or resulting contract to any requestor. Vendor agrees that TIPS shall not be responsible or liable for any use or distribution of Vendor Data by TIPS or TIPS Members.

- Vendor's authorized signatory has signed below and shall upload this document in the proper location in the eBid System.
- Vendor agrees that TIPS shall not be liable for any release of confidential information required by law.

Authorized Signature: Shawn Lyness

THE INTERLOCAL PURCHASING SYSTEM ("TIPS")

A department of TIPS Lead Agency:

TEXAS REGION 8 EDUCATION SERVICE CENTER ("Region 8 ESC")

TIPS RCSP 250502 Elevators and Servicing JOC (PART 2)

I. NOTICE TO PROPOSERS.

Contact Information:
TIPS/Region 8 ESC
4845 US Hwy. 271 North
Pittsburg, Texas 75686
Toll Free: (866) 839-8477
Email: bids@tips-usa.com
Website: www.tips-usa.com

Part 2 Notice: This solicitation document applies to Part 2 of this opportunity only. All terms, conditions, information, and notices are applicable to Part 2. If you have questions about whether to respond to Part 1, Part 2, or both Parts 1 & 2, please carefully review the attachment entitled "TIPS Informational – Do I Respond to Part 1, Part 2, or Both?"

TIPS Solicitation:
TIPS RCSP 250502 Elevators and Servicing JOC
This solicitation document is a Request for Competitive Sealed Proposals as permitted in Texas Government Code § 2269. Regardless of potential informal or erroneous references to other solicitation terms such as: "solicitation", "bid", "request for competitive sealed proposal", "RFP", etc., this solicitation is the method of procurement identified at this location. This solicitation is for the sale of installation or construction projects considered a "public work" and whether a sale is classified as a "public work" is within the sole discretion of the purchasing TIPS Member entity based on the scope of work and applicable law.

Proposal Deadline:
All proposals shall be received electronically, or otherwise sealed, by: June 20, 2025 AT 3:00 P.M. LOCAL TIME

Access to Solicitation Documents:
Solicitation documents are located online at http://tips.ionwave.net. If you encounter a problem while accessing the solicitation, please contact TIPS at the contact information provided for assistance.

Piggybacking Notice:

This IDIQ Solicitation is intended for the use of public entities and qualifying non-profit entities who join TIPS, now and in the future, ("TIPS Members") to piggyback upon and utilize as their own solicitation for legal procurement purposes. TIPS Contracts are established through free, full and open competition as described by the laws of TIPS jurisdiction and are available for piggy-back by other government entities anywhere in the United States, subject to each entities' jurisdictional law and regulation. For the purpose of enhanced accessibility, potential cost savings, increased flexibility and choice, and to ensure adequate coverage of requirements for Region 8 Education Service Center and TIPS Members, multiple awards are anticipated.

TIPS Administration Fee:
TIPS collection of fees is required pursuant to Texas Government Code Section 791.011 et. seq. The TIPS Administration Fee for this contract shall be 2% of the amount paid by the TIPS Member for each TIPS Sale, less shipping cost, bond cost, and taxes, if identifiable.

Incorporation of Solicitation:
If Vendor proposes and is awarded, the specifications, terms, and conditions of this solicitation shall be incorporated by reference into the final, awarded TIPS Contract.

TIPS Contract Jurisdictional Limitations:
Depending on different entities' and jurisdictions' laws and regulations, TIPS Member Customers may be prohibited from utilizing TIPS as a procurement method for any specific procurement or procurement-type. TIPS makes no representations about when a TIPS procurement will be appropriate for any particular expenditure. It is always up to the TIPS Member customer to determine whether a TIPS procurement is appropriate under their applicable laws and policies.

Vendor Questions & Pre-Bid Meeting Requests:
Substantive questions will be received until June 6, 2025 at 12:00 p.m. local time. Questions about the specific solicitation shall be submitted to bids@tips-usa.com with the subject line "TIPS 250502 Elevators and Servicing (Part 2) – Vendor Question". Vendor-specific questions about the process will often be answered directly. However, substantive questions that are not properly addressed in the solicitation information will be properly published to all vendors as an addendum or "Question & Answer" document.

Pre-Bid Meetings are not mandatory and, if requested, TIPS reserves the right to determine whether a Pre-Bid meeting shall be held. Pre-Bid Meetings may be requested by any proposer on or before May 15, 2025 by emailing bids@tips-usa.com with the subject line "TIPS 250502 Elevators and Servicing (Part 2) – Pre-Bid Meeting Request".

Anticipated Schedule of Solicitation Events:
These anticipated dates are subject to change at TIPS' discretion. TIPS reserves the right to extend the proposal deadline for any reason.

Posting Date	May 1, 2025	8:00 A.M. Local Time
Proposal Deadline	June 20, 2025	3:00 P.M. Local Time
Proposal Opening	June 20, 2025	3:00 P.M. Local Time
Proposal Review Begins	June 20, 2025	3:01 P.M. Local Time
Proposals Award	July 24, 2025	8:30 A.M. Local Time
Award Notifications	July 24, 2025	12:00 P.M. Local Time

Estimated Contract Value:
The estimated value for the life of the contract for all awarded vendors combined is $147,636.10. This is an estimate and is not a guarantee of the minimum or maximum value of the contract because TIPS cannot speculate on TIPS Members' future needs or budget allocations as they relate to this solicitation.

II. TIPS

The Interlocal Purchasing System ("TIPS") is a department of Texas Region 8 Education Service Center, a government entity. TIPS, a governmental entity and a national purchasing cooperative operating under the Interlocal Cooperation Act[1], seeks to provide a valuable and necessary solution to public entities and qualifying non-profits by performing the legal public procurement solicitation process and awarding compliant contracts to qualified vendors. When permitted by TIPS Members' law and policy, instead of public entities and qualifying non-profits expending time, money, and resources on the extensive legal competitive procurement process, the use of TIPS, allows public entities to quickly select and purchase their preferred products or services from qualified, evaluated Vendors on an as-needed basis. TIPS evaluates and scores all responsive, properly submitted proposals. Recommendations for award will be made to the Region 8 Education Service Center Board of Directors. Awards are ratified or rejected at the monthly meeting of Region 8 ESC Board of Directors, or as delegated by the Board of Directors. TIPS utilizes a value approach and bases its award recommendations on several factors mandated by the Texas Education Code section §44.031. The factors are allotted points as described herein. TIPS reserves the right to assign or deduct any number of points in any given category if warranted due to insufficient response or Vendor stipulated exceptions and limitations.

III. PROPOSAL GUIDANCE

1. TIPS strongly encourages all interested vendors to respond using the TIPS IonWave Electronic eBid System for proposal submission. The online submission has many safeguards built into the system that will notify proposers of mistakes or missing information. These safeguards will significantly minimize the potential for Vendor disqualification. If you encounter trouble with the TIPS IonWave eBid System, please contact TIPS.
2. If it is determined that Vendor cannot utilize the TIPS IonWave eBid System, Vendor must email bids@tips-usa.com seeking a manual submission packet which TIPS will send to you via US Mail or FedEx within two business days of receiving your request. All manual responses must be sealed in an envelope and must be physically received by TIPS at the TIPs Contact information provided herein and by the deadline provided herein.
3. If you are viewing this document, you have likely already logged into the TIPS IonWave eBid System. If not, you need to register/login to the TIPS IonWave eBid System online at https://tips.ionwave.net/ and follow these instructions.
4. Once logged in, confirm that your Supplier Profile properly lists your accurate entity-name, EIN, d/b/a's, and contact information, matching your current W9. If it does not, either correct it, or disable the inaccurate profile and create a correct profile before proceeding.
5. Next, confirm that all emails issued by the following domains can be received by your entity's email servers to ensure that you do not miss vital messages: "@tips-usa.com", @tipsconstruction.com", and "ionwave.net"
6. Once that review/update is complete, Vendor shall carefully read through all bid Event Details, Bid Notes, Attachments, Addenda, Instructions, and Attribute Questions before submitting questions to TIPS.
7. TIPS recommends starting Vendor's proposal response by answering the required "Attribute" questions within the IonWave eBid System. These responses are required and it is beneficial to start with the Attribute questions as some of the bid Attachments are only required depending on your responses to those questions.
8. Once Vendor has completed the Attribute Questions, Vendor must download, properly complete, and upload into the correct "Response Attachments" location all required Attachments for Part 2.
9. Once Vendor has completed the Attribute Questions and uploaded all required Attachments for Part 2, Vendor must submit the proposal before the legal Proposal Deadline. The system will notify you of errors and allow you to correct those errors where you would otherwise risk unintentional disqualification through paper submission.
10. Proposals may be retracted, amended, and resubmitted by the proposer on the electronic eBid System at any time prior to the legal deadline.
11. If an addendum is posted, you will receive an email notification and you are required to login to the IonWave eBid System to address the Addendum.
12. TIPS reserves the right to reject any or all proposals, to accept any proposals, and to waive any informality in the proposal process provided waiver is equally applied to all proposers and another proposer is not prejudiced by the waiver.
13. If Vendor has proposed deviations to TIPS' standard terms, there is an Attribute Question where Vendor can assert that it has proposed negotiations. If Vendor responds to that attribute question asserting deviations, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document Vendor Agreement and instruct Vendor to include all requested negotiations as redline edits for TIPS consideration. This is the only proper way to submit proposed deviations for TIPS consideration. TIPS reserves the right to accept, decline, or modify Vendor's requested negotiated terms. For this reason, asserting deviations or negotiations may ultimately delay or prevent award.
14. Withdrawal of proposals will not be allowed for a period of 90 days following the opening unless approved by TIPS in writing.
15. If a Vendor desires to protest a process or decision by TIPS, the Vendor must follow the following process: http://www.tips-usa.com/assets/documents/docs/letters/Protest_Procedures_for_Vendor.pdf

[1] See Texas Government Code, Chapter 791.

Proposal Format

All responses should be direct, concise, complete, and unambiguous.

1. **Attribute Questions.**
   Vendor must respond carefully and accurately to all "Attributes" within the IonWave eBid System.

2. **Completion of Attachments & Required Uploads.**

   Part 2 Required Bonding Capacity Letter
   If Proposing on Part 2, Vendor is required to upload a Bonding Capacity Letter from its surety as described herein. Please see the attachment entitled "Instructions and Sample – Part 2 Required Bonding Capacity Letter" for complete instructions. On Part 2, Vendor will be scored on the aggregate bonding capacity displayed in the accepted letter. Vendor must provide a current letter (issued on or after the first day of the month preceding the date on which the solicitation was posted) from its surety verifying Vendor's bonding capacity as described herein. (Ex. if the solicitation/bid posted on February 4, 2022, the letter must be dated on or after January 1 2022. The letter must be issued from Vendor's Surety companies, on surety company letterhead, must specify the maximum bonding capacity of the Vendor, and must be signed by an authorized representative of the surety company. The issuing surety must be authorized to do business in the State of Texas and must be listed on the Department of the Treasury's Listing of Approved Sureties (Department Circular 570).

   Vendor Agreement (Part 2)
   If responding to Part 2, the Vendor Agreement (Part 2) must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Vendor Agreement (Part 2). If Vendor has proposed deviations to the Vendor Agreement (Part 2), Vendor may assert so in the Attribute Questions and those shall be addressed during evaluation.

   Vendor Agreement Signature Form (Part 2)
   If responding to Part 2, the Vendor Agreement Signature Form (Part 2) must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Vendor Agreement Signature Form (Part 2). If Vendor has proposed deviations to the Vendor Agreement (Part 2), Vendor may leave the signature line of this page blank and assert so in the Attribute Questions and those shall be addressed during evaluation.

   Reference Letters
   Vendor is required to upload three Reference Letters from three separate customers as described herein. Vendor will be scored on the aggregate Reference Letters received from customers as described in the solicitation. Vendor must provide three current letters (issued within the 12-months preceding the date on which the solicitation was posted) from its customers verifying Vendor's customer service and reputation as described herein. (Ex. if the solicitation/bid posted on February 4, 2024, the letters must be dated on or after February 1, 2023). The letters must be issued from customers who have received goods or services from the Vendor or its current corporate officials, on entity/company letterhead, must specify its customer experience with Vendor, and must be signed by an authorized representative of the customer.

   Required Confidentiality Claim Form
   The Required Confidentiality Claim Form must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Required Confidentiality Claim Form. This is the only way for Vendor to assert confidentiality of any information submitted.

   Conflict of Interest Questionnaire – Form CIQ
   Do not upload this form unless you have a reportable conflict with TIPS. There is an Attribute entitled "Conflict of Interest Questionnaire Requirement" immediately followed by an Attribute entitled "Conflict of Interest Questionnaire Requirement – Form CIQ – Continued." Properly respond to those Attributes and only upload this form if applicable/instructed. If upload is required based on your response to those Attributes, the Conflict of Interest Questionnaire – Form CIQ must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Conflict of Interest Questionnaire – Form CIQ.

   Disclosure of Lobbying Activities – Standard Form - LLL

Do not upload this form unless Vendor has reportable lobbying activities. There are Attributes entitled, "2 CFR Part 200 or Federal Provision - Byrd Anti-Lobbying Amendment – Continued." Properly respond to those Attributes and only upload this form if applicable/instructed. If upload is required based on your response to those Attributes, the Disclosure of Lobbying Activities – Standard Form - LLL must be downloaded from the "Attachments" section of the IonWave eBid System, reviewed, properly completed, and uploaded to the "Response Attachments" section requesting the Disclosure of Lobbying Activities – Standard Form – LLL.

Current Form W-9
Vendor must upload their current IRS Tax Form W-9. The legal name, EIN, and d/b/a's listed should match the information provided herein exactly. This form will be utilized by TIPS to properly identify your entity.

Certificates & Licenses (Supplemental Vendor Information Only)
Optional. If Vendor would like to display any applicable certificates or licenses (including HUB certificates) for TIPS and TIPS Member Customer consideration, Vendor may upload those at the "Response Attachments" section requesting "Certificates & Licenses (Supplemental Vendor Information Only)." These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Vendor's Warranties, Terms, and Conditions (Supplemental Vendor Information Only)
Optional. If Vendor would like to display any standard warranties, terms, or conditions which are often applicable to their offerings for TIPS and TIPS Member Customer consideration, Vendor may upload those at the "Response Attachments" section requesting "Vendor's Warranties, Terms, and Conditions (Supplemental Vendor Information Only)." These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Supplemental Vendor Information (Supplemental Vendor Information Only)
Optional. If Vendor would like to display or include any brochures, promotional documents, marketing materials, or other Vendor Information for TIPS and TIPS Member Customer consideration, Vendor may upload those at the "Response Attachments" section requesting "Supplemental Vendor Information (Supplemental Vendor Information Only)." These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

Vendor Logo (Supplemental Vendor Information Only)
Optional. If Vendor desires that their logo be displayed on their public TIPS profile for TIPS and TIPS Member viewing, Vendor may upload that logo at the "Response Attachments" section requesting "Vendor Logo (Supplemental Vendor Information Only)." These supplemental documents shall not be considered part of the TIPS Contract. Rather, they are Vendor Supplemental Information for marketing and informational purposes only.

IV. SPECIFICATIONS

Category: Elevators and Servicing

Nothing herein is seeking services that are considered architectural and engineering services. This is a solicitation for "public works" construction projects.

Specifications.
It is the intention of TIPS, as a Department of Region 8 ESC, to contract with quality vendors to supply installation and construction of elevators and servicing to public entity and qualifying non-profit TIPS Members in the United States. Proposals shall include, but not be limited to: elevator installation, modernization of elevator systems, elevator construction projects, repair and replacement of elevator shafts and associated equipment, elevator retrofitting, elevator upgrades to meet ADA or other regulatory standards, and associated site work necessary for elevator construction projects. Proposals should include all listings of elevators and servicing installation and construction projects that Vendor seeks to offer under the contract. Do not propose offerings that are not considered elevators and servicing installation and construction projects.

Vendor shall furnish all necessary labor, materials, tools, supplies, equipment, transportation, supervision, management and shall perform all operations necessary and required for the TIPS sale. All work shall be performed in accordance with the requirements set forth in any Supplemental Agreement with a TIPS Member Customer.

ENGINEERING AND ARCHITECTURAL SERVICES
It is impermissible in Texas and some other jurisdictions for engineering and architectural services (A&E) to be procured or provided through an interlocal cooperative contract such as this one. The TIPS Member Customer, if required by law, must engage independent A&E providers according to the laws of their jurisdiction.

V. JOB ORDER CONTRACTING

Texas Government Code § 2269 permits Job Order Contracting as a method of procurement. Job Order Contracting is a solicitation method utilized to obtain competitive, fixed-price, multi-year construction contracts based on established or published unit prices via a unit price book or a price list with a coefficient applied to those unit prices. TIPS utilizes the RS Means Unit Price Book for this purpose. This solicitation is for the sale of installation or construction projects considered a "public work" and whether a sale is classified as a "public work" is within the sole discretion of the purchasing TIPS Member entity based on the scope of work and applicable law.

Job Order Contracting Definitions:

City Cost Index: Is a pricing index published by the Unit Price Book (UPB) allowing the comparison of the national average cost of construction to the cost of the same project in a specific location.

Coefficient: Is the Vendor's coefficient multiplier that is applied to the UPB. It will include all overhead items such as office, safety equipment, vehicles and fuel, computers, communication devises, printers, programs, insurance maintenance, two percent TIPS management fee, final site cleanup and all contingencies.

Job Order: Is a line item estimate taken from a job order proposal using the coefficient and UPB which upon agreement to by the TIPS member becomes a lump sum fixed price contract and a notice to proceed for the stated scope attached to the purchase order.

Job Order Contracting (JOC): Is a variable term indefinite delivery, indefinite quantity contract for construction services on an on-call basis through negotiated line item delivery orders (job orders) to include, under State of Texas law, minor construction, repair, renovation, alterations, and maintenance projects. It is based upon the Vendor's coefficient multiplier that is applied to UPB. When the line items are agreed upon, it becomes a lump sum firm fixed price contract for that negotiated scope of services.

Job Order Proposal: Is Vendor's line-item proposal to the TIPS Member for a specific TIPS project. It will contain a line-item estimate for the project pursuant to the RS Means Price Book and Vendor's applicable coefficients.

Non Pre-priced Items: Items that cannot be found or reasonably compared to listed line items in the applicable UPB. Vendor must provide TIPS with manufacturer documentation reflecting the cost of any non pre-priced item at the time of the TIPS sale so that TIPS can verify that the proposed percentage markup is being honored.

VI. VENDOR PART 2 PRICING SUBMISSION

Required RS Means Price Book Pricing:

Texas Government Code § 2269 permits Job Order Contracting as a method of procurement. Job Order Contracting is a solicitation method utilized to obtain competitive, fixed-price, multi-year construction contracts based on established or published unit prices via a unit price book or a price list with a coefficient applied to those unit prices. TIPS utilizes the RS Means Unit Price Book for this purpose. The RS Means Unit Price Book is a unit price book adjusted for different geographic areas by using the City Cost Index for each location. You may visit https://www.rsmeans.com for more information. TIPS Member Customers often have to designate either Davis Bacon Act wage rates or similar wage rates for their construction contracts. The RS Means Unit Price Book accounts for local wage rates and the contractor must comply with RS Means and any additional wage rate requirements of the TIPS Member Customer.

It is urgent that Vendor understands the coefficients and percentage proposed and can price TIPS sales within those limitation for the duration of Vendor's Contract. In response to the corresponding attribute questions, Vendor must propose: (1) Vendor's Regular Hours RS Means Coefficient; (2) Vendor's After-Hours RS Means Coefficient, and; (3) Vendor's Percentage Markup of Items not Pre-Priced within the RS Means Price Book.

Vendor must correctly and timely respond to the attribute questions within the IonWave eBid System seeking Vendor's RS Means Coefficients and Non Pre-Priced Percentage or Vendor will be disqualified.

Vendor must carefully read the TIPS RS Means JOC Pricing Explanation and Rubric attachment. The TIPS RS Means JOC Pricing Explanation and Rubric attachment may be found under the "Attachments" tab in the IonWave eBid System. It is provided to assist Vendors in responding the required pricing attribute questions seeking Vendor's required RS Means Coefficients and Non Pre-Priced

Percentage. Do not submit pricing questions until you have thoroughly reviewed this explanation and rubric. Do not upload the form as it is informational only.

Vendor's Regular Hours RS Means Coefficient;

To propose the RS Means Price Book pricing exactly, Vendor would insert a 1.0 as their Regular Hours RS Means Coefficient below, to propose a 5% discount off of the RS Means Price Book Vendor would insert a .95 as their Regular Hours RS Means Coefficient below. To see the full scoring rubric and use TIPS scoring calculator, please view the TIPS RS Means JOC Pricing Explanation & Rubric under the "Attachments" tab.

Vendor's After-Hours RS Means Coefficient, and;

The most common After-Hours RS Means Coefficient is "time-and-a-half" of the standard RS Means Unit Price Book. For example, if Vendor's Regular Hours Coefficient above is .95, Vendor would assert an After-Hours RS Means Coefficient of 1.45 for "time-and-a-half" pricing. To see the full scoring rubric and use TIPS scoring calculator, please view the TIPS RS Means JOC Pricing Explanation & Rubric under the "Attachments" tab.

Vendor's Percentage Markup of Items not Pre-Priced within the RS Means Price Book.

If Vendor sells items which cannot be found in the RS Means Price Book, this will be the Percentage Markup at which Vendor agrees to sell those Non Pre-Priced items. This is a maximum Percentage Markup and Vendor may always offer customers a lesser markup. Vendor must provide TIPS with manufacturer documentation reflecting the cost of any non pre-priced item at the time of the TIPS sale so that TIPS can verify that the proposed percentage markup is being honored.

Example: In this example, Vendor is selling a project to a TIPS Member school district and some of the contract pricing for special materials cannot be verified because it cannot be found in the RS Means Price book. Vendor may sell those specialty items to the Member this percentage markup from cost. In this example, if one of the specialty items cost Vendor $100 from the manufacturer and Vendor proposed a Percentage Markup of 30% here, then Vendor could sell the item to the TIPS Customer for $130.00 or less in this example.

Additional Pricing Terms

1. **TIPS Pricing and Line Item Estimate Pricing Requirements.** If awarded on this TIPS Contract, for the duration of the contract, Vendor shall provide a RS Means line-item estimate to TIPS for each anticipated TIPS project or sale. When a TIPS Member Customer seeks a quote or proposal for a TIPS sale, Vendor shall always supply a line-item estimate to TIPS for review and approval.

2. **Maintaining and Updating TIPS Pricing During Contract.** Vendor agrees and understands that for each TIPS Contract that it is awarded, Vendor submitted, agreed to, and received TIPS' approval for specific pricing, discounts, and other pricing terms and incentives which make up Vendor's TIPS Pricing for that TIPS Contract ("TIPS Pricing"). Vendor hereby certifies that Vendor shall only offer goods and services through this TIPS Contract if those goods and services fall within the scope of the TIPS Contract and are priced according to Vendor's TIPS Pricing. TIPS reserves the right to review Vendor's proposals and quotes line-item by line-item to determine compliance. However, Vendor contractually agrees that all TIPS quotes and proposals shall be within the original terms of the Vendor's TIPS Pricing (scope, coefficients, percentage markups, and other pricing terms and incentives originally proposed by Vendor) such that TIPS may approve Vendor's quotes and proposals without additional vetting at TIPS discretion.

3. **Brands.** If a name brand is included in this solicitation, proposals on any reputable manufacturers regularly produced equipment of such items of a similar nature or similar use which are substantively equivalent will be considered.

4. **TIPS Fee Considered.** Vendor confirms that all TIPS Pricing includes the TIPS Administration Fee and Vendor will not show adding the TIPS Administration Fee as a charge or line-item in a TIPS Sale.

5. **Vendor's Self-Imposed Pricing Limitations.** Within Vendor's TIPS Pricing, Vendor may include express, written limitations on geographical regions, volume of order, expediency, etc., for TIPS consideration and approval, as long as Vendor honors their applicable TIPS Pricing, proposed coefficients/percentage markups, the terms and conditions of this Contract, and the

terms and conditions of any Supplemental Agreement entered into directly with the customer TIPS Member. (Example: If Vendor sells nationally but a specific product can only be sold in Texas).

6. **Shipping Cost, Bond Cost, and Taxes.** TIPS fees are not assessed to Vendors for shipping cost, required bond cost, or any taxes that may be applicable as long as they can be identified as separate line-items. For that reason, TIPS encourages Vendors not to include shipping price, bond price, or taxes within the TIPS "catalog pricing" for an item. If it is included in the TIPS price, TIPS will have no way to differentiate and the TIPS Administration fee will be assessed on the total.

VII. PART 2 PROPOSAL SCORING AND EVALUATION

TIPS evaluates and scores all responsive, properly submitted proposals. Recommendations for award will be made to the Region 8 Education Service Center Board of Directors. Awards are ratified or rejected at the monthly meeting of Region 8 ESC Board of Directors, or as delegated by the Board of Directors. TIPS utilizes a value approach and bases its award recommendations on several factors mandated by the Texas Education Code section §44.031 and Texas Government Code §2269. The factors are allotted points as described herein. TIPS reserves the right to assign or deduct any number of points in any given category if warranted due to insufficient response or Vendor stipulated exceptions and limitations. TIPS reserves the right to reject any or all proposals or any part of any proposal. TIPS is the sole arbiter of scoring. TIPS reserves the right to award multiple vendors for each solicitation.

1. **Purchase Price**: **(28) Points.** Vendor must correctly and timely respond to the attribute questions within the IonWave eBid System seeking Vendor's RS Means Coefficients and Non Pre-Priced Percentage or Vendor will be disqualified. Vendor shall submit, pursuant to the instructions included herein: (1) Vendor's Regular Hours RS Means Coefficient; (2) Vendor's After-Hours RS Means Coefficient, and; (3) Vendor's Percentage Markup of Items not Pre-Priced within the RS Means Price Book, which make up Vendor's "TIPS Pricing". Points will be assigned exactly as displayed in the TIPS RS Means JOC Pricing Explanation and Rubric attachment which Vendor is required to review.
2. **Experience: (27) Points.** Points will be assigned based on the number of years proposing Vendor has been operating the proposing business in this capacity as presented in response to the corresponding attribute question seeking the same. <2 years will receive 5-10 points depending on their bonding capacity proposed. If Vendor has <2 years' experience and bonding is less than $100,000.00, Vendor will receive 5 points or less. If Vendor has <2 years' experience and bonding is more than $100,000.00, Vendor will receive 6-10 points. 2-3 years will receive 15 points, 4-5 years will receive 20 points, and > 5 years will receive 27 points.
3. **Reputation of Vendor and Vendor's Offerings: (25) Points.** Points will be assigned based on Vendor's references, to be submitted as instructed herein, reference inquiry response from provided references, and any past history with Vendor, and any other information available to TIPS regarding Vendor's reputation.
4. **Vendor's Financial Capability: (18) Points.** Points will be assigned based on Vendor's bonding capacity letter, to be submitted as instructed herein. Aggregate bonding capacity greater than $2,000,000.00 will receive maximum points. Bonding capacity less than $25,000.00 will receive no points. All other amounts will be scaled accordingly: $25,000 – 5 points; $100,000 – 10 points; $250,000 – 12 points; $500,000 – 14 points; $750,000 – 15 points; $1,000,000 – 16 points; $1,250,000 – 16.5 points; $1,500,000 – 17 points; $1,750,000 – 17.5 points; $2,000,000 – 18 points.
5. **Impact on the Ability of TIPS Members to Comply with Laws and Rules Relating to Historically Underutilized Businesses ("HUB's"): (2) Points.** Points are assigned if, where applicable herein, Vendor agrees that if they anticipate subcontracting under this award, they will abide by the required affirmative steps provided in 2 CFR 200. Please see the corresponding Attribute Questions regarding, "Subcontracting and Affirmative Steps for Small and Minority Businesses, Women's Business Enterprises, and Labor Surplus Area Firms." A response that Vendor does anticipate subcontracting but does not agree to the federal subcontracting practices will give Vendor 0 points for this category and deem Vendor unacceptable to receive federal funds under this contract, any other responses accurate responses will give Vendor 2 points for this category.
6. **Residency: 0 Points.** For a contract for goods and services, other than goods and services related to telecommunications and information services, building construction and maintenance, or instructional materials, whether the vendor or the vendor's ultimate parent company or majority owner: A. has its principal place of business in this state; or B. employs at least 500 persons in this state. Vendor's response to the corresponding attribute question will be considered, as required by law, but no points shall be assigned because federal funds may be utilized by TIPS Members, and residency is a prohibited criterion under federal regulation.

PROPOSERS FALLING BELOW AN 70-POINT THRESHOLD WILL NOT BE CONSIDERED FOR AN AWARD.

VIII. TERMS & CONDITIONS

1. **Incorporation of Solicitation.** As previously stated, if Vendor proposes and is awarded, the specifications, terms, and conditions of this solicitation shall be incorporated by reference into the final, awarded TIPS Contract. In the event of conflict between the terms herein and the final Vendor Agreement, the terms and conditions which are in the best interest of governmental/qualifying non-profit TIPS Members shall control at TIPS sole discretion.

2. **Deviations.** If Vendor has proposed deviations to TIPS' standard terms, there is an Attribute Question where Vendor can assert that it has proposed negotiations. If Vendor responds to that attribute question asserting deviations, after this solicitation legally closes and TIPS begins evaluating Vendor's file, TIPS will provide Vendor with a draft Word Document Vendor Agreement and instruct Vendor to include all requested negotiations as redline edits for TIPS consideration. This is the only proper way to submit proposed deviations for TIPS consideration. TIPS reserves the right to accept, decline, or modify Vendor's requested negotiated terms. For this reason, asserting deviations or negotiations may ultimately delay or prevent award.

3. **Term of the Agreement.** If awarded, the resulting Agreement with TIPS is for approximately two years with an option for renewal for an additional two consecutive one-year terms. The first renewal year shall be automatic unless Vendor notifies TIPS of its objection to the first one-year renewal. The second one-year renewal shall only be effective if offered by TIPS at its sole discretion. If TIPS offers the second renewal option, the Vendor will be notified via email issued to Vendor's then-listed Primary Contact. The renewal option shall be deemed accepted by Vendor unless Vendor notifies TIPS of its objection to the renewal option in writing and confirms receipt by TIPS.

   Actual Effective Date: Agreement is effective upon signature by authorized representatives of both Parties. The Effective Date does not affect the "Term Calculation Start Date."

   Term Calculation Start Date: To keep the contract term consistent for all vendors awarded under a single TIPS contract, Vendor shall calculate the foregoing term as starting on the last day of the month that "Award Notifications" are anticipated as published in the Solicitation, regardless of the actual Effective Date.

   Example of Term Calculation Start Date: If the anticipated "Award Date" published in the Solicitation is May 22, 2023, but extended negotiations delay award until June 27, 2023 (Actual Effective Date), the Term Calculation Start Date shall be May 31, 2023 in this example.

   Contract Expiration Date: To keep the contract term consistent for all vendors awarded under a single TIPS contract, the term expiration date shall be two-years from the Term Calculation Start Date.

   Example of Contract Expiration Date: If the anticipated "Award Date" published in the Solicitation is May 22, 2023, but extended negotiations delay award until June 27, 2023 (Actual Effective Date), the Term Calculation Start Date shall be May 31, 2023 and the Contract Expiration Date of the resulting initial "two-year" term, (which is subject to an extension(s)) will be May 31, 2025 in this example.

   Option(s) for Renewal: Any option(s) for renewal shall begin on the Contract Expiration Date, or the date of the expiration of the prior renewal term where applicable, and continue for the duration specified for the renewal option herein.

   Example of Option(s) for Renewal: In this example, if TIPS offers the second one-year renewal, and the Contract Expiration Date following the first automatic renewal is May 31, 2026, then the one-year renewal is effective from May 31, 2026 to May 31, 2027.

   TIPS may offer to extend Vendor Agreements to the fullest extent the TIPS Solicitation resulting in this Agreement permits.

4. **Termination.** If awarded, TIPS reserves the right to terminate the resulting agreement for cause or no cause for convenience with a thirty (30) days prior written notice. This Agreement may be terminated for cause by either party if the other party breaches the terms or materially defaults on the performance of any of its duties or obligations set forth herein ,provided that such default is not cured within thirty (30) days, or as otherwise may be agreed to by both parties, after written notice is given to the defaulting party by the non-defaulting party which specifies the faulty performance and acceptable means of correction. In such event, termination of the Agreement shall be effective as of the date specified in such notice of such termination. Upon termination, all TIPS Sale orders previously accepted by Vendor shall be fulfilled and Vendor shall be paid for all TIPS Sales executed pursuant to the applicable terms. All TIPS Sale orders presented to Vendor but not fulfilled by Vendor, prior to the actual termination of this agreement shall be honored at the option of the TIPS Member. TIPS shall submit to Vendor an invoice for any outstanding TIPS Administration Fees and approved expenses and Vendor shall pay such fees and expenses within 30

calendar days of receipt of such valid TIPS invoice. Vendor acknowledges and agrees that continued participation in TIPS is subject to TIPS' sole discretion and that any Vendor may be removed from the TIPS program at any time with or without cause. This termination clause does not affect TIPS Sales Supplemental Agreements pursuant to this term regarding termination and the Survival Clause term.

5. **TIPS Pricing.** Vendor agrees and understands that for each TIPS Contract that it holds, Vendor submitted, agreed to, and received TIPS' approval for specific pricing, discounts, and other pricing terms and incentives which make up Vendor's TIPS Pricing for that TIPS Contract ("TIPS Pricing"). Vendor confirms that Vendor will not add the TIPS Administration Fee as a charge or line-item in a TIPS Sale. Vendor hereby certifies that Vendor shall only offer goods and services through this TIPS Contract if those goods and services are included in or added to Vendor's TIPS Pricing and approved by TIPS. TIPS reserves the right to review Vendor's pricing update requests as specifically as line-item by line-item to determine compliance. However, Vendor contractually agrees that all submitted pricing updates shall be within the original terms of the Vendor's TIPS Pricing (scope, proposed discounts, price increase limitations, and other pricing terms and incentives originally proposed by Vendor) such that TIPS may accept Vendors price increase requests as submitted without additional vetting at TIPS discretion. Any pricing quoted by Vendor to a TIPS Member or on a TIPS Quote shall never exceed Vendor's TIPS Pricing for any good or service offered through TIPS. Vendor certifies by signing this agreement that Vendor's TIPS Pricing for all goods and services included in Vendor's TIPS Pricing shall either be equal to or less than Vendor's current pricing for that good or service for any other customer. TIPS Pricing price increases and modifications, if permitted, will be honored according to the terms of the solicitation and Vendor's proposal, incorporated herein by reference.

6. **Initiation of TIPS Sales.** If awarded, when a public entity initiates a purchase with Vendor under this resulting contract, if the Member inquires verbally or in writing whether Vendor holds a TIPS Contract, it is the duty of the Vendor to verify whether the Member is seeking a TIPS purchase. Once verified, Vendor must include the TIPS Contract Number on all purchase communications and sales documents exchanged with the TIPS Member.
