EXECUTIVE SUMMARY

At the request and authorization of the Client (CalAtlantic Homes) EEI conducted a Phase I Environmental Site Assessment (ESA) for the property located at 1400 South La Habra Hills Drive, in the City of La Habra, Orange County, California. The purpose of this Phase I ESA was to assess the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment (i.e., *recognized environmental condition* as delineated in ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation E1527-13 [(ASTM E1527-13]). A *de minimis* condition is not considered a *recognized environmental condition.*

The subject property is generally located within the northern half of the West Coyote Hills at the southern terminus of South La Habra Hills Drive, approximately 900 feet south of its intersection with Imperial Highway (90) in the City of La Habra (**Figure 2**). The subject property is comprised of approximately 151-acres, on two parcels, identified by Assessor's Parcel Numbers (APNs) 019-481-03 and 019-481-04 (**Appendix B**). The majority of the property is located on APN 019-481-004 (150.8-acres), while the smaller APN 019-481-03 (0.186-acres) is located near the northwest corner of the property.

The subject property has been occupied by the Westridge Golf Club since the late 1990s. Besides the golf course and driving range areas, the property also includes a multi-story club house parking lot, a maintenance facility, an irrigation pump house and restroom facilities for an 18-hole public golf course. The golf club is located north of the adjoining Westridge residential community. The street address associated with the Westridge Golf Club is 1400 South La Habra Hills Drive. According to the Orange County Assessor, the address 1300 South Beach Boulevard and 1302 West Imperial Highway was historically associated with the property parcel 019-481-04.

Surrounding properties include residential properties to the south, South Beach Boulevard, a small shopping center and residential properties to the west, a shopping center, Southern California Edison (SCE) electrical substation, and residential properties to the north, and Idaho Street to the east followed by residential properties.

The subject property was formerly a part of the 915-acre West Coyote Hills Oil Field operated by Chevron Corporation (Chevron) from the early 1900s through 1995. Oil produced from the property was transferred by pipeline to the Chevron Refinery in El Segundo, California. Natural gas produced from the field was piped to the south to Chevron's former Murphy-Coyote gas processing plant in Fullerton, California. Water produced during oil field operations was re-injected to enhance secondary oil recovery. A total of 23 oils wells were formerly in production at the subject property, and all of the wells have since been abandoned in accordance with California Division of Oil, Gas, and Geothermal Resources (CDOGGR) regulations. Other oil field operational facilities such as tank sites, sumps, pipelines, condensate drips, transformer sites, and a fueling facility were formerly present on the subject property, and were investigated and remediated during development of the Westridge Golf Club in 1996-1997.

In 1992, subsequent to the city's annexation of the property in 1989, Chevron/Pacific Coast Homes prepared the La Habra Hills Specific Plan to create a master planned community on 380 acres of the former oil field property. The remaining 535 acres of the oil field property are located to the south in the City of Fullerton. The La Habra Hills Specific Plan created a plan for the development of four residential neighborhoods, an 18-hole golf course, a 29.5-acre community park, and 2.6 acres of open space. A total of 556 residential units have been constructed and represent buildout of the residential component for the La Habra Specific Plan. The golf course was constructed in the northern portion of the La Habra Hills Specific Plan area.

EEI contacted the City of La Habra Fire Department, Orange County Health Care Agency (OCHCA), California Department of Toxic Substances Control (DTSC), State Water Resources Control Board (SWRCB), and reviewed other State and Federal databases to determine if the subject property, or any adjacent properties, were listed as hazardous waste generators, underground storage tank releases (UST), or as having other environmental concerns (i.e., spill, leak, or above-ground tank).

The former occupant of the subject property **Environmental Golf**, and current occupant **Westridge Golf Club,** were listed under the Hazardous Waste Information System database (HAZNET), which tracks data from hazardous waste manifests received by the California DTSC, related to golf course and maintenance operations. The **Westridge Golf Club** was also listed under the Above-ground Storage Tank (AST) database as the site of a 1,320-gallon capacity tank (type of content not provided), and the OCHCA databases as the site of an AST and as a hazardous waste facility.

The former occupant of the subject property, **Chevron USA, Inc.** (1300 South Beach Boulevard), was listed under several databases related to the former oil field operation. The site was also listed under the OCHCA Industrial Cleanup Program and Local Oversight Program databases (identified as **PLC Land Company, Tracts 15030 and 15031**), as a closed oil field cleanup site with onsite soil reuse areas and a closed UST site.

Two adjacent service stations are located within 100 feet of subject property and include: **Sam's Club Service Station** (1390 South Beach Boulevard, adjoining the northwest portion of the subject property in the adjacent shopping center), and **ARCO Facility No. 06545** (13550 South Beach Boulevard, adjoining the southwest portion). Although these sites have not documented a release; the proximity of the sites to the subject property (i.e. adjacent) indicates a potential vapor encroachment concern. However, as the portion of the subject property adjacent to the **Sam's Club Service Station** is slated for commercial development (and will be largely paved), and the portion of the property adjacent to the Arco Facility No. 06545 is to remain open space (not residential), no additional investigation appears to be warranted at this time.

A review of the California Division of Oil, Gas, and Geothermal Resources Website for oil and gas fields in California and Alaska (CDOGGR) indicated the presence of twenty four (24) oil and gas wells on or immediately adjacent to the subject property (Township 03 South Range 10 West Section 18). The wells are located within the West Coyote Oil Field, and formerly operated by Chevron USA.

EEI requested documents regarding these wells from Ms. Kordelia Jenkins, with the CDOGGR. According to the information reviewed, these wells were drilled as early as the 1920's and were used for oil and gas production until their abandonment under the regulatory guidance of the CDOGGR during the 1960s through the 1990s. Well records currently list the wells as plugged, and indicate they were abandoned properly under the CDOGGR guidelines.

According to the CDOGGR inspector in Cypress, CDOGGR will only require construction review for wells either directly on top of or in close proximity to (i.e., roughly 50 feet) from an existing well. He said many of the existing wells have permanent vents to allow methane gas to escape. However, CDOGGR does not mandate methane testing prior to construction. Included in the documents made available for EEI to review at the CDOGGR office was a note regarding residual oil field contamination - where soils testing conducted during geotechnical boring installation identified petroleum hydrocarbons exceeding OCHCA screening criteria (100 mg/kg Total Petroleum Hydrocarbons (TPH)) in soils samples collected from the boring locations ranging from 2.5 feet to 38 feet.

Previous soil remediation activities and grading phase assessment was performed for Tracts 15030 and 15031, the northern portion of which included the subject property. These tracts (formerly part of Chevron's West Coyote Oil Field) and were proposed for development as residential housing, a golf course, and a reservoir site by a prior developer identified as PLC Land Company.

Remediation activities within Tracts 15030 and 15031 were initiated in December 1996 by Miller Brooks Environmental, Inc. (Miller Brooks). Activities and assessment included removal of previously identified crude oil affected soil, identification of additional impacted areas, and soil sampling to verify that impacted soils were removed during remediation and grading activities.

By 1999, Miller Brooks had prepared four closure reports following the completion of rough grade activities through Tracts 15030 and 15031. The four areas were identified as Closures Phases A through D. The subject property encompasses Closure Phases A (western portion of the golf course) and B (eastern portion of the golf course). Closure Phases C and D were located to the south of the subject property and have since been developed as a residential community. The closure reports were based on information collected during remediation activities conducted by Miller Brooks under the jurisdiction of the California Regional Water Quality Control Board Santa Ana Region (CRWQCB-SA) and the OCHCA.

In a letter dated June 24, 1999, the CRWQCB-SA indicated that after review of the final Closure Report (which completed the full closure of Tracts 15030 and 15031) they believed that the site no longer posed a threat to water quality; therefore, no further action would be necessary at the site. And on July 1, 1999, the OCHCA confirmed the completion of remedial action at the site and that no further action was required at that time.

In December of 1999, Miller Brooks reported on confirmation soil sampling at the former West Coyote Oil Field fuel service station site, currently occupied by the driving range of the golf course. The former oil field fuel service site reportedly consisted of two USTs of unknown volume and one Dispenser Island. Reportedly, in the mid-1980s Chevron USA Production Company (Chevron) removed the USTs dispenser island, associated piping, and impacted soil for offsite disposal (OCHCA Case #99UT043).

A previous Phase II Site Assessment Report (Environmental Science and Engineering, Inc.), was conducted at the site in November 1995, where six borings were drilled within the vicinity of the former fuel station area. Results of laboratory analysis indicated that petroleum hydrocarbons were not detected in four (B2, B3, B4, and B6) of the six borings. And that soil samples collected from soil borings B1 and B5 contained maximum concentrations of 340 milligrams per kilogram (mg/kg) total petroleum hydrocarbons as gasoline (TPH-G), 6,500 mg/kg total petroleum hydrocarbons as diesel (TPH-D), 4,300 total recoverable petroleum hydrocarbons (TRPH), no detectable benzene, 0.190 mg/kg toluene, 0.830 mg/kg ethylbenzene, and 2.0 mg/kg total xylenes.

In June 1999, as part of the oil field cleanup activities, this area was excavated and contaminated soil was transported offsite for disposal. Results of soil sampling, and confirmed by laboratory analysis, at the former fuel service area indicated no detectable TPH-G, no detectable TPH-D, no detectable concentrations of benzene, toluene, ethylbenzene, and total xylenes (BTEX), and a maximum concentration of 51 mg/kg TRPH.

In a Notice of Responsibility dated August 11, 1999, the OCHCA gave formal notification of "responsibility to investigate and remedy the effects of" leaking underground storage tanks at the site. A Miller Brooks Work Plan was approved for supplemental soil sampling. Field activities during the supplemental assessment (i.e. December 1999) included drilling three supplemental confirmation soil borings within the excavation limits of the former fuel service station. Soil samples were collected in each boring at depths of approximately 5 feet above and 5, 10, 15, and 25 feet below the bottom of the original excavation. The supplemental confirmation soil samples collected from the soil borings contained no detectable BTEX, MTBE, or TPH-G. Based on the results of previous confirmation soil sampling and analysis and the results of the supplementary confirmation soil sampling and analysis, it was the opinion of Miller Brooks that no further site assessment or remediation activities were warranted, and that the site met the criteria to be granted environmental closure.

On November 22, 2002, the OCHCA confirmed the completion of site investigation and corrective action for the USTs formerly located at the site and that no further action related to the petroleum release at the site was required.

In September 2015, a Methane Survey was conducted by EEI at the subject property. A total of twenty-eight locations were sampled at a depth of 5 feet bgs for the presence of methane gas using a Landtec GEM 2000 meter. Nineteen of the locations were in the western half of the golf course, either above or in close proximity to the crude oil-impacted soil designated reuse areas. Nine of the locations were in the eastern half of the golf course, in areas of former oil field operations. Of the 28 locations surveyed, only 5 indicated detectable methane concentrations (0.01% or 1,000 ppm). The remaining 23 locations had no detectable concentrations of methane. The screening level for methane utilized during this survey was 0.5% or 5,000 ppm, the level at which Mandatory Procedures for Mitigation are required under the Orange County Fire Agency's *Combustible Soil Gas Hazard Mitigation* guidance document (C-03) dated January 1, 2014.

In addition, EEI collected samples for laboratory analysis at two of the survey locations in order to verify the results of the survey. Based on laboratory analytical results, the two samples (which had indicated a field measurement of 0.1% or 1,000 ppm) contained less than 10 ppm methane. Based on the results of the field survey and laboratory analytical data, methane mitigation did not appear to be warranted at the subject property.

The subject property, identified as **Westridge Golf Course**, was also reported as currently an active OCHCA Industrial Cleanup Program site (Case #15IC004), related to the management of soil in place at the subject property. EEI prepared a Soils Management Plan (SMP) dated September 29, 2015 for the subject property related to known environmental conditions, as well as action for potential unknown environmental conditions that may be encountered during future site improvements for a proposed residential development. The SMP was submitted to the OCHCA for review and comment. On October 29, 2015, the OCHCA responded to EEI regarding the SMP dated September 29, 2015. The OCHCA provided several comments regarding the SMP, and requested that EEI submit an addendum to the SMP that addressed their comments. To address OCHCA comments, EEI prepared and submitted an SMP Addendum dated July 14, 2016. The information provided in the addendum was deemed sufficient and the SMP received final approval by the OCHCA on September 9, 2016.

On March 16, 2016, EEI personnel conducted a site reconnaissance to physically observe the subject property and adjoining properties for conditions indicating a potential environmental concern. Concerns would include any evidence of contamination, distressed vegetation, petroleum-hydrocarbon staining, waste drums, illegal dumping, or improper waste storage and/or handling. Apart from the presence of the abandoned oil wells noted herein, no other evidence of environmental concerns were noted on the remaining portions of the property during our site reconnaissance.

As part of our Phase I ESA, EEI performed a Tier 1 Vapor Encroachment Screen (VES) of the subject property, in accordance with ASTM E2600-10. The purpose was to evaluate whether potential chemicals of concern may migrate as vapors onto the property as a result of contaminated soil and/or groundwater which may be present on or near the property (i.e., a Vapor Encroachment Condition). Based on EEI's Tier 1 Screening evaluation, the past use of the subject property and two sites identified within the AOC, were considered to pose a pVEC., and are summarized below.

1. The subject property was formerly occupied by **Chevron USA, Inc.** and was the site of a former oil well production operation and numerous abandoned oil wells are present on the subject property. During grading of the golf course approximately 430,000 cubic yards of soil containing Total Petroleum Hydrocarbons (TPH) were placed in three designated soil reuse areas beneath the

golf course. The presence of the impacted soil beneath portions of the subject property necessitated a Tier 2 Screening, which is described below in the following section.

2. Two service stations adjoin portions of the subject property and include: **Sam's Club Service Station** (1390 South Beach Boulevard, adjoining the northwest portion of the subject property in the adjacent shopping center), and **ARCO Facility No. 06545** (13550 South Beach Boulevard, adjoining the southwest portion). The proximity of the sites to the subject indicates a potential VEC. However, based on site specific factors, EEI concluded that a VEC can be ruled out for the two service station sites, based on the following:

    - The absence of a documented release;
    - The portion of the subject property located adjacent to the **Sam's Club Service Station** is slated for commercial development (and will be largely paved);
    - The portion of the subject property adjacent to the **Arco Facility No. 06545** is to remain open space (not residential).

The presence of the impacted soil beneath portions of the subject property necessitated a Tier 2 Screening, as defined by ASTM Standard E2600-10. In this case, the Tier 2 Screening consisted of a review of existing data related to the former oil well operation and abandoned oil wells at the subject property. A detailed review of the data was provided in previous sections of this report (i.e. Section 3.7 Previous Reports).

Based on the results of the Tier 2 Screening, EEI concluded that a VEC can be ruled out for the former oil production operation area and soil reuse areas located on the subject property, based on the following:

1. Site-specific invasive testing data collected during previous investigations, which indicated that the soil beneath the property contains crude oil contamination (not refined fuel products) with a lack of significant volatile organic compounds.

EEI performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E1527-13 of APNs 019-481-03 and 019-481-04, the *subject property*. Any exceptions to, or deletions from, this practice are described in **Section 7.0** of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the *subject property*, except for the following:

- *Known or suspected RECs* – are defined by the ASTM E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

  No *known or suspected REC* has been revealed during the preparation of this ESA:

- *Controlled RECs (CRECs)* – are defined by the ASTM E1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)

The following *CREC* has been revealed during the preparation of this ESA.

- The subject property was formerly occupied by **Chevron USA, Inc.**, which operated West Coyote Oil Field. The subject property was identified as a crude oil cleanup site under the OCHCA Industrial Cleanup Program (**OCHCA Case #97IC7, PLC Land Company, Tracts 15030 and 15031, Southeast Quadrant**), that the property underwent a series of investigations, remediation, and onsite soil reuse during the period 1996 through 1999. The case was closed by the CRWQCB-SA and the OCHCA in June and July, 1999, respectively.

  At the time the golf course was constructed, extensive grading occurred in conjunction with the development of the Westridge neighborhood to the south of the golf course. During grading of the golf course approximately 430,000 cubic yards of soil containing Total Petroleum Hydrocarbons (TPH) were placed in three designated soil reuse areas beneath the golf course. However, the grading/compaction that occurred to accommodate the golf course and create the reuse areas were neither suitable for, nor compatible with, residential development. As a result, two of the three reuse areas will need to be removed and replaced, along with surrounding fill soils, and properly compacted prior to final grading and construction.

  Therefore, EEI developed a Soil Management Plan (SMP) which received final approval by the OCHCA on September 9, 2016, for implementation during grading and construction (OCHCA Case #15IC004). The SMP includes post-grading soil matrix and soil vapor sampling to document soil removal/replacement into several new reuse areas, as well as to address concerns regarding potential impacts to future site occupants. Future construction activities at the subject property shall follow the SMP as directed by the OCHCA.

- *Historical Recognized Environmental Conditions (HRECs)* – are defined by the ASTM E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).

  The following *HREC's* have been revealed during the preparation of this ESA.

  - The subject property was identified as a closed UST site related to the former West Coyote Oil Field fuel service station (**OCHCA Case #99UT43), PLC Land Company, Tract 15030**). The case was closed by the OCHCA in December 1999.

- *De Minimis* Conditions – include environmental concerns identified which may warrant discussion but do not qualify as RECs, as defined by the ASTM E1527-13.

  No *de minimis* conditions were identified during the preparation of this ESA.

- Although not considered to be a REC, the following non-scope consideration was identified:

  - Multiple former oil production wells occupy portions of the subject property. The presence of these oil wells should be accounted for during development planning and any potential encroachment upon well locations should be coordinated through the CDOGGR to ascertain current re-abandonment requirements.

1.0 INTRODUCTION

1.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) was to assess the possible presence of *recognized environmental conditions* for the property located at 1400 South La Habra Hills Drive, in the City of La Habra, Orange California (**Figure 1**). *Recognized environmental conditions (RECs)* include property uses that may indicate the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term *RECs* is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that would not be subject to enforcement action by a regulatory agency.

This ESA was performed in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation E1527-13 (ASTM E1527-13).

1.2 Scope of Services

The following scope of services was conducted by EEI:

- A review of readily available documents which included topographic, geologic, and hydrogeologic conditions associated with the subject property.
- A review of readily available maps, aerial photographs and other documents relative to historical subject property usage and development.
- A review of readily available federal, state, county, and city documents and database files concerning hazardous material storage, generation and disposal, active and inactive landfills, existing environmental concerns, and associated permits related to the subject property and/or immediately adjacent sites.
- A site reconnaissance to ascertain current conditions of the subject property.
- Interviews with person(s) knowledgeable of the subject property.
- The preparation of this report which presents our findings, conclusions, and recommendations.

1.3 Reliance

This ESA has been prepared for the sole use of CalAtlantic Homes (Client). This assessment should not be relied upon by other parties without the express written consent of EEI, and the Client. Any use or reliance upon this assessment by a party other than the Client; therefore, shall be solely at the risk of such third party and without legal recourse against EEI, its employees, officers, or directors, regardless of whether the action in which recovery of damages is brought or based upon contract, tort, statute or otherwise.

This assessment should not be interpreted as a statistical evaluation of the subject property, but rather is intended to provide a preliminary indication of onsite impacts from previous site usage and/or the release of hazardous materials. If no significant indicators of the presence of hazardous materials and/or petroleum contamination are encountered during this search, this does not preclude their presence.

The findings in this report are based upon published geologic and hydrogeological information and information (both documentary and oral) provided by the Client, Westridge Golf Course, City of La Habra, Orange County, Environmental Data Resources Inc. (EDR®) (i.e., agency database search), and various state and federal agencies, and EEI's field observations. Some of these data are subject to change over time. Some of these data are based on information not currently observable or measurable, but recorded by documents or orally reported by individuals.

2.0 PHYSIOGRAPHIC SETTING

2.1 Site Description

The subject property is generally located within the northern half of the West Coyote Hills at the southern terminus of South La Habra Hills Drive, approximately 900 feet south of its intersection with Imperial Highway (90) in the City of La Habra, Orange County, California (**Figure 2**). The subject property is comprised of approximately 151-acres, on two parcels, identified by Assessor's Parcel Numbers (APNs) 019-481-03 and 019-481-04 (**Appendix B**). The majority of the property is located on APN 019-481-004 (150.8-acres), while the smaller APN 019-481-03 (0.186-acres) is located near the northwest corner of the property.

The subject property has been occupied by the Westridge Golf Club since the late 1990s. Besides the golf course and driving range areas, the property also includes a multi-story club house parking lot, a maintenance facility, an irrigation pump house and restroom facilities for an 18-hole public golf course. The golf club is located north of the adjoining Westridge residential community. The street address associated with the Westridge Golf Club is 1400 South La Habra Hills Drive. According to the Orange County Assessor, the address 1300 South Beach Boulevard and 1302 West Imperial Highway was historically associated with the property parcel 019-481-04.

Surrounding properties include residential properties to the south, South Beach Boulevard, a small shopping center and residential properties to the west, a shopping center, Southern California Edison (SCE) electrical substation, and residential properties to the north, and Idaho Street to the east followed by residential properties.

The subject property was formerly a part of the 915-acre West Coyote Hills Oil Field operated by Chevron Corporation (Chevron) from the early 1900s through 1995. Oil produced from the property was transferred by pipeline to the Chevron Refinery in El Segundo, California. Natural gas produced from the field was piped to the south to Chevron's former Murphy-Coyote gas processing plant in Fullerton, California. Water produced during oil field operations was re-injected to enhance secondary oil recovery. A total of 23 oils wells were formerly in production at the subject property, and all of the wells have since been abandoned in accordance with California Division of Oil, Gas, and Geothermal Resources (CDOGGR) regulations. Other oil field operational facilities such as tank sites, sumps, pipelines, condensate drips, transformer sites, and a fueling facility were formerly present on the subject property, and were investigated and remediated during development of the Westridge Golf Club in 1996-1997.

In 1992, subsequent to the city's annexation of the property in 1989, Chevron/Pacific Coast Homes prepared the La Habra Hills Specific Plan to create a master planned community on 380 acres of the former oil field property. The remaining 535 acres of the oil field property are located to the south in the City of Fullerton. The La Habra Hills Specific Plan created a plan for the development of four residential neighborhoods, an 18-hole golf course, a 29.5-acre community park, and 2.6 acres of open space. A total of 556 residential units have been constructed and represent buildout of the residential component for the La Habra Specific Plan. The golf course was constructed in the northern portion of the La Habra Hills Specific Plan area.

2.2 Topography

The subject property is located on the United States Geological Survey (USGS) 7.5 Minute La Habra Quadrangle map (USGS, 1981). The map indicates the elevation of the property ranges from approximately 200 feet above mean sea level (amsl) along the northwest portions to roughly 460 feet amsl at the southeast portions. The property is comprised of moderately sloping, hillside terrain, which slopes in a southwesterly direction.

2.3 Regional and Local Geology

The subject property and vicinity is located in the Orange County Coastal Basin, which is west of the Santa Ana Mountains, and within the northwestern portion of the Peninsular Ranges geomorphic province. The Peninsular Ranges geomorphic province, one of the largest geomorphic units in western North America, extends from the Transverse Ranges geomorphic province and the Los Angeles Basin, south to Baja California. The Peninsular Ranges are essentially a series of ranges separated by northwest trending valleys, sub-parallel to faults branching from the San Andreas Fault. The trend of topography is similar to the Coast Ranges, but the geology is similar to the Sierra Nevada, with granitic rock intruding the older metamorphic rocks. The Peninsular Ranges extend into lower California and are bound on the east by the Colorado Desert (CDMG, 2002).

The subject property is located within Seismic Zone 4 of Southern California, with active and potentially-active faults (CDMG, 1998). Major faults in the vicinity of the property include the Newport-Inglewood Fault, the Whittier Fault, and the Elsinore Fault. Additional known faults in the vicinity of the property include the Palos Verde Hills Fault, the Elysian Park Fault, the Sierra Madre Fault, the Cucamonga/San Jose Fault zone, the San Jacinto Fault zone, the San Andreas Fault zone, and the San Clemente Fault. A mapped earthquake fault zone (unnamed) is located on the eastern margin of the property, along Idaho Street (LGC Geotechnical, 2015). No additional faults have been identified as a result of the La Habra quake which occurred in 2014, as it was determined to be a part of the existing Puente Hills fault system located to the north of La Habra (LGC, 2015).

Soil in the vicinity of the subject property has been identified by the United States Department of Agriculture - Natural Resource Conservation Service, online Web Soil Survey database as mainly clay loam of the Anaheim and Sorrento Soil Series at 2 to 50 percent (USDA, 2016). The soils of the Anaheim series are well-drained, moderately deep soils over weathered fine grained sandstone and shale. These soils have rapid to very rapid runoff. The Sorrento series consists of very deep well drained soils that formed in alluvium mostly from sedimentary rocks. These soils have negligible to medium runoff. These soils both have moderate to moderately slow permeability.

2.4 Regional and Local Hydrogeology

According to the CRWQCB-SA (1995) the subject property is located within the La Habra Hydrologic sub area Split of the Anaheim hydrologic area within the Los Angeles San Gabriel River hydrologic unit. In general, groundwater in this unit has been designated as beneficial for domestic/municipal, agricultural, and industrial process supply. Regionally, the predicted groundwater surface flow follows the natural topography to the southwest.

The EEI reviewed the California Department of Water Resources, Water Data Library website (WDL, 2016) for additional information pertaining to groundwater and water supply wells on or close to the subject property. According to the website there is one residential water supply well within a one-quarter mile radius of the subject property (Township 03 South Range 10 West Section 18). The well, identified as State Well No. 03S10W18C001S, is located on the north side of Coyote Creek, approximately 250 feet south of where the creek meets Imperial Highway, and approximately 0.25 miles north-northwest of the

subject property. Data indicated the depth to groundwater at the well ranged between from 55.64 feet to 57.34 feet below ground surface (bgs), as measured in 2010. According to the website, four additional wells are located within the eastern portion of the city of La Habra, greater than one-quarter of a mile from the subject property (WDL, 2016).

Review of the nearest available case closure summary data (Leidos, 2014) for the, Chevron #9-6496 (1950 Imperial Highway), located approximately 1,500 feet (0.30 miles) north of subject property indicated that groundwater is present at depths of approximately 47 feet to 51 feet below ground surface. Groundwater flow direction was estimated to be towards the southeast (Leidos, 2014).

LGC Geotechnical, Inc. (2015), reported groundwater at a depth of 29 feet bgs in one boring location along Beach Boulevard (far western margin of the subject property). However, aside from seepage at a couple of locations, no groundwater was encountered in any of their other boring locations throughout the subject property.

2.5 Hydrologic Flood Plain Information

EEI reviewed the Federal Emergency Management Agency (FEMA, 2016) Flood Insurance Rate Map (FIRM) online database to determine if the subject property was in a flood zone. According to FIRM Number 060059C0036J and 060059C0037J Panel No's 36 and 37 of 539– effective December 6, 2009, the subject property is located within flood Zone X. FEMA defines Zone X as an area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level (**Appendix B**).

3.0 SUBJECT PROPERTY BACKGROUND

3.1 Property Ownership

Information regarding ownership of the subject property was obtained from a Preliminary Title Report (PTR) prepared by First American Title Company, dated September 15, 2014. According to the information reviewed, the current owner of the property, identified as APN 019-481-04, is listed as O2SKY, Inc., A California Corporation. A copy of the PTR is included in **Appendix B.**

3.2 Property History

EEI reviewed readily available information sources to evaluate historic land use in and around the subject site. These information sources include aerial photographs, USGS maps, City of La Habra Planning and Building and Safety Department files. The information sources are reviewed in the following sections.

3.2.1 Environmental Lien and Activity or Use Limitation Search

During EEI's previous Phase I ESA conducted at the subject property (2015), an Environmental Lien and Activity or Use Limitation (AUL) Search on the subject property was obtained from EDR®, an environmental information/database retrieval service. According to the search, environmental liens or AULs were not identified on the subject property.

In addition, the search provided a description of Parcel 1 (Exhibit A), which specifies that neither the right to petroleum resources (oil or oil-related products) on the property, nor the right to drill below 500 feet, is included as part of the property. A copy of the Environmental Lien and AUL Search is included in **Appendix C.**

3.2.2 Historical Use Review

Aerial photographs and historical topographical maps, provided by EDR®, were reviewed to identify historical land development and any surface conditions which may have impacted the subject property. Photographs and historical topographic maps dating between 1898 and 2012 were reviewed. A 2015 aerial photograph was obtained from Google Earth®, a copy of which is included herein (**Figure 2**).
Table 1 summarizes the results of the aerial photograph and historical topographic map review. Copies of the aerial photographs and historical topographic maps provided by EDR®, Inc. are included in **Appendix C**.

Based on the information reviewed, the subject property and adjacent property to the south appeared to be occupied by oil well production operations (graded pads and roads throughout) from at least 1928. Numerous structures were present on the northern portion of the property from 1938 through 1990. In 1994, structures on the northern portion appeared to have been removed and the property appeared vacant. In 2005, the former oil well operations were no longer present, and the property was occupied by a golf course and related structures and parking areas at the central portion. The property appeared in a similar configuration in the 2015 photograph.

TABLE 1
Summary of Historical Use Review

Year	Source and Scale	Comments
1898 1901/ 1902	Topographic Maps 1:62,500/ 1:250,000	Scale of the map did not allow for a detailed review of the subject property. Site vicinity appeared in the northwest portion of Orange County, near Fullerton.
1928/ 1938	Aerial Photograph 1 inch = 500 feet	Subject property and adjacent property to the south appeared to be occupied with roads and cleared areas associated with oil production wells (graded pads and roads throughout the area). In the 1938 photograph, several buildings were located on the northern portion of the property along South Beach Boulevard. Imperial Highway was located in the site vicinity to the north. Agricultural land (orchards) was noted to the north.
1942	Topographic Maps 1:50,000	Subject property and adjacent property to the south appeared with numerous oil wells and unimproved roads throughout. More oil tanks were located to the north west across Highway 39. Surrounding area appeared with concentrated areas of development to the north in La Habra and to the south in Buena Park, and with orchards.
1950/ 1953	Topographic Map 1:24,000	Subject property appeared with several buildings along the northern portion, and numerous oil wells south of the buildings. A commercial development appeared immediately north of the subject property. Oil wells, tanks, and sumps were present on the adjoining property to the south.
1947/ 1953	Aerial Photograph 1 inch = 500 feet	Subject property and adjacent property to the south remained occupied by structures and oil well production operations. Agricultural land remained in the surrounding area to the north.
1963	Aerial Photograph 1 inch = 500 feet	Subject property and adjacent property to the south remained occupied by oil well production operations. Numerous structures were located on the northern portion of the subject property. Similar structural development was located on the adjacent property to the north. Residential development tracts now located to the northwest. A canal appeared to the west of South Beach Boulevard.
1964/ 1972	Topographic Map 1:24,000	Several unimproved roadways appeared with additional structural and street development on the northern portion. Oils wells remained throughout the property and adjacent property. Increased residential development appeared in the surrounding area.

TABLE 1
Summary of Historical Use Review

Year	Source and Scale	Comments
1972/ 1981	Aerial Photograph 1 inch = 500 feet	Subject property, adjacent property and surrounding area appeared as it did in the 1963 photograph.
1981	Topographic Map 1:24,000	Fewer structures appeared on the northern portion of the property. Increased development appeared in the surrounding area.
1990	Aerial Photographs 1 inch = 500 feet	Subject property, adjacent property and surrounding area appeared as it did in the 1981 photograph. Increased development appeared in the surrounding area.
2005/ 2009/ 2010/ 2012	Aerial Photograph 1 inch = 500 feet	Subject property now appeared occupied by a golf course and related structures and parking area at the central portion. Residential development was present on the adjoining property to the south and property to the east and west. A large tract of vacant land was located farther to the south. Several larger commercial buildings and large parking areas were located adjacent to the north.
March 2015	Aerial Photograph Google Earth (Color)	Subject property appeared in its current configuration, as occupied by a golf course and related structures and parking area at the central portion. The golf course appeared to be accessed from the north by La Habra Hills Drive. Residential development bounded the property to the south, east and west. A commercial development was present on the adjacent property to the north.

3.2.3 City/County Directories

Directory listings associated with the subject property address was obtained from EDR®, an environmental information/database retrieval service. The subject address, 1400 South La Habra Hills Drive was listed in directories from 2003 through 2013, as occupied by the Westridge Golf Club. According to the information reviewed, no gas stations, cleaners, automotive shops, and other occupants of potential environmental concern were located on the property. A copy of the City Directory Report is provided in **Appendix C**.

3.2.4 Sanborn Fire Insurance Maps

EEI researched available Sanborn Fire Insurance Maps of the subject property. Sanborn Maps provide detailed information on site structures, uses, and occupancies and were typically utilized by insurance companies to evaluate potential fire risk. EEI requested a Sanborn map search from EDR®, an environmental information/database retrieval service. According to EDR, there is no Sanborn map coverage for the area of the subject property (**Appendix C**).

3.2.5 City of La Habra Building and Safety Division Files

EEI contacted the City of La Habra Building and Safety Division to review any existing records related to development of the subject property. A search for records for the current and historical addresses associated with the subject property (i.e. 1400 South La Habra Hills Drive, 1302 West Imperial Highway and 1300 South Beach Boulevard) was conducted by Ms. Veronica Lopez, Senior Permit Clerk. The following is a summary of the records search.

<u>1302 West Imperial Highway/1300 South Beach Boulevard</u>

Permits were on file dating from August 1980 through 1995. The owner and occupant of the property were listed as Chevron Oil Field Research Co., and Chevron Oil USA. The permits were related to various building constructions including a modular 7-unit office building and

brick storage building (1980), concrete amphitheater (1981), motor generator room, metal storage building, Buildings 5 and 6 (1982), Buildings 1 and 2 (1983), offices, electronic storage trailer (1985), offices/renovation, expansion of Building No. 4516 (1896), service ramp and dock (1991), chilled water systems/roof mounts for new equipment (1995).

Also in 1995, a permit described the demolition of five buildings. A January 2001 permit also listed the "demolition of all buildings on the Chevron site." In June 2001, a permit described onsite improvements for a new shopping center with the owner listed as ICI development.

1400 South La Habra Hills Drive

Permits were on file dating from December 1998 through July 2013. Permits from 1998 and March 1999 described the construction of a golf course and related pump house and comfort stations as well as a club house, for the owner Environmental Golf. In May 1999, the owner was listed as PLC Land Company, and a permit described the construction of a maintenance building for a golf course. The permit noted that it was a metal building with grease interceptor and sand trap. And that a fuel storage tank was not included. In October 1999 through 2013, the owner of the property was listed as Westridge Golf Club. In 1999 and 2003, a patio and an addition to the existing clubhouse were permitted onsite. In 2002, a vent line was installed for a grease trap at the clubhouse, to be enclosed within a 25-foot light post (and labeled no smoking/methane gas in pipe). In 2010, an existing telecommunications facility was modified. In 2012, an unpermitted structure (being used as a club house was removed. The most recent permits on file, dated July and October 2013, were for the addition of new doors and infill wall, and electrical permit for retrofit of LED lights and indicated the owner was Soojin Kwon.

3.3 Regulatory Database Search

EEI reviewed known electronic database listings for possible hazardous waste generating establishments in the vicinity of the subject site, as well as adjacent sites with known environmental concerns. Facilities were identified by county, state, or federal agencies that generate, store, or dispose of hazardous materials. The majority of information in this section was obtained from EDR®, an environmental information/database retrieval service. A copy of the EDR® report is provided in **Appendix D,** along with a description of the individual databases. Following is a list of databases that were reviewed in the preparation of this report.

The former occupant of the subject property (i.e. 1400 South La Habra Hills Drive), **Environmental Golf** was listed under the Hazardous Waste Information System database (HAZNET), which tracks data from hazardous waste manifests received by the California DTSC. The date of the listing was 2000, and the waste category included "aged or surplus organics," and the disposal method was listed as "Transfer Station." The current occupant of the subject property, **Westridge Golf Club** was also listed on the Orange Co. Industrial Site database as well as on the HAZNET database with the date of 2004. The HAZNET waste category was listed as "waste oil/mixed oil" and the disposal method was "recycler." The **Westridge Golf Club** was also listed under the Above-ground Storage Tank (AST) database as the site of a 1,320-gallon capacity tank (type of content not provided).

In addition, the former occupant of the subject property, **Chevron USA, Inc.** (1300 South Beach Boulevard), was listed under the following databases: Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) - No Further Assessment Planned (NFRAP), Federal Resource Conservation Recovery Act (RCRA) hazardous waste generator database, NY Manifest, and Historical Auto Station.

In addition, a listing related to the subject property, identified as **PLC Land Company** (3282 South Beach Boulevard), was reported under the Historical Underground Storage Tank (UST) database. The site was also reported under the Toxics and Criteria Pollutant Emissions Data (EMI) databases. The site was reported as monitored under the South Coast Air Quality Management district in 1987 (Facility No. 19758). Additional information regarding the property and former USTs is provided in **Section 3.7 Previous Assessments**.

3.3.1 Standard Environmental Records

Federal National Priority site list (NPL) – One listing was reported within a one mile radius of the subject property. The site, **McColl Superfund Site** (Rosecrans and Sunny Ridge, 0.78 miles south), was reported as a former petroleum refinery waste disposal area and was listed under the Superfund when EPA pit on the NPL list in September 1982. Based on the regulatory oversight, and site location (greater than one-quarter of a mile from the subject property and situated hydrologically cross- to down-gradient), this site is not considered an environmental concern.

Federal Delisted NPL site list – No listings were reported within a one mile radius of the subject property.

Federal Superfund Enterprise Management System (SEMS) (formerly known as CERCLIS) – No listings were reported within a one-half mile radius of the subject property.

Federal CERCLIS No Further Assessment Planned (NFRAP) site list – The former occupant associated with the subject property, **Chevron Oil Field Research** (identified as 3282/1300 South Beach Boulevard) was reported as the site of a former oil well production operation. According to the EDR report, a preliminary site assessment was conducted in 1985 which indicated the site did not qualify for the NPL and the listing was archived as NFRAP. Additional information regarding the former onsite occupant is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**.

Federal Resource Conservation Recovery Act (RCRA) Corrective Action Sites (CORRACTS) facilities list – No listings were reported within a one mile radius of the subject property.

Federal RCRA non-CORRACTS facilities list – No listings were reported within a one mile radius of the subject property.

Federal RCRA non-CORRACTS Treatment, Storage and Disposal (TSD) facility list (RCRA-TSDF) – No listings were reported within a one-half mile radius of the subject property.

Federal RCRA generators list (RCRA-LQG SQG CESQG) – Several listings were reported within a one-quarter mile radius of the subject property. Generator permits are not generally rationale for environmental concern, unless a release has occurred at the site. One listing, **La First Class Cleaners** (1841 W. Imperial Highway, 0.29 miles north), was listed as the site of a Perchloroethylene release which impacted soil only. The facility was listed as closed. The status of the case was listed as closed, with a closure certification issued by the OCHCA on November 14, 1994. Based on the fact that the case has been closed by a regulatory agency, and location (greater than one quarter mile and not within the critical distance of 100 feet for volatile organic chemicals as defined by ASTM Standard E2600-10), this site is not considered an environmental concern.

None of the other listings were dual listed with a release under the LUST database. However, two of the sites are located adjacent to the subject property and include: **Sam's Club Service**

Station (1390 South Beach Boulevard, adjoining the northwest portion of the subject property in the adjacent shopping center), and **ARCO Facility No. 06545** (13550 South Beach Boulevard, adjoining the southwest portion). Although these sites have not documented a release; the proximity of the sites to the subject property (i.e. adjacent) indicates a potential environmental concern (see **Section 5.0 Vapor Encroachment Screening** for additional information).

The former occupant associated with the subject property, **Chevron Research Facility** (3282/1300 South Beach Boulevard) was reported. Additional information regarding the former onsite occupant is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**.

Federal institutional controls/engineering controls (IC/EC) registries – No listings were reported within a one-half mile radius of the subject property.

Federal Emergency Response Notification System (ERNS) – No listings were reported for the subject property.

3.3.2 State and Regional Sources

State and Tribal equivalent NPL sites – No listings were reported within a one mile radius of the subject property.

State/Tribal equivalent CERCLIS (ENVIROSTOR) sites – Five listings were reported within a one mile radius of the subject property. The first listing was identified as **Chevron Research Facility** (1100 Beach Boulevard), an entity associated which was also a former occupant of the subject property. The location of this particular research facility address was determined to be located approximately 0.29 miles to the north of the subject property and is not considered an environmental concern. Additional information regarding the former onsite occupant (i.e. Chevron) is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**.

The second listing was for **La Habra Westridge Plaza** (1380 South Beach Boulevard, adjacent and to the north of the golf clubhouse), and was reported as the site of a waste oil release that was closed by the OCHCA in August 2001. Based on the fact that the case has been closed by a regulatory agency, this site is not considered an environmental concern.

The remaining three listings were determined to be located greater than one quarter mile from the subject property; and therefore, are not considered an environmental concern. The three listings included: **Chevron Research Facility** (1100 Beach Boulevard (0.29 miles north); **McColl Superfund Site** (Rosecrans and Sunny Ridge (0.78 miles south); and **Rosecrans Meadows** (N. of Rosecrans Avenue, 0.82 miles south).

State and tribal landfill and/or solid waste disposal site lists – No listings were reported within a one-half mile radius of the subject property.

State and tribal leaking underground storage tank lists (LUST) – The occupant associated with the subject property, **PLC Land Company** (3282 South Beach Boulevard) was reported as the site of release case, remediated and closed under the direction of the OCHCA in June 1987 and November 2002. Additional information regarding the closed onsite release case is provided in **Section 3.7 Previous Assessments.**

Seven additional listings (one duplicated) were reported within a one-half mile radius of the subject property. These listings are located greater than one-quarter of a mile from the subject property and/or situated hydrologically cross to down-gradient. Based on this information, the sites are not considered a concern.

Spills Leaks Investigations and Cleanups (SLIC) – One listing was reported within a one-half mile radius of the subject property. The site, **La Habra Marketplace** aka **First Class Cleaners** (1841 W. Imperial Highway, 0.29 miles north), was listed as the site of a Perchloroethylene release which impacted soil only. The facility was listed as closed. The status of the case was listed as closed, with a closure certification issued by the OCHCA on November 14, 1994. Based on the fact that the case has been closed by a regulatory agency, and location (greater than one quarter mile, and not within the critical distance of not within the critical distance of 100 feet for volatile organic chemicals as defined by ASTM Standard E2600-10), this site is not considered an environmental concern.

State and tribal registered storage tank (CA UST) lists – The former occupant associated with the subject property, **Chevron USA** (3282 South Beach Boulevard) was reported. Additional information regarding the former onsite occupant is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**. Four additional listings located within a one-quarter mile radius of the property were reported. Operating permits are not generally considered rationale for environmental concern, unless the facility has a dual listing, or a reported release. Several of the listings have documented a release; however, the sites are located greater than one-eighth of a mile and situated hydrologically cross- to down-gradient from the property. Based on this information, the sites are not considered a concern.

Above-ground storage tank (AST) lists – One listing for the subject property was reported. The **Westridge Golf Club** was listed under the database as the site of a 1,320-gallon capacity tank (type of content not provided). No violations were noted. Additional information regarding the current onsite golf club is provided in **Section 4.2 Subject Property.**

State and Tribal voluntary cleanup sites – No listings were reported within a one-half mile radius of the subject property.

Local Brownfield lists – No listings were reported within a one-half mile radius of the subject property.

Local Lists of Landfill and Solid Waste Disposal Sites – One listing was reported within a one-half mile radius of the subject property. The site, **Replanet LLC** (2101 W. Imperial Highway, 0.30 miles northwest), was determined to be a recycling facility which does not accept hazardous materials. Based on the nature of the operation, this site is not considered and environmental concern.

Local Lists of Hazardous Waste/Contaminated Sites (CA HIST) – One listing was reported within a one mile radius of the subject property, **McColl Superfund Site** (Rosecrans and Sunny Ridge, 0.78 miles south). Based on the regulatory oversight, and site location (greater than one-quarter of a mile from the subject property and situated hydrologically cross- to down-gradient), this site is not considered an environmental concern.

Statewide Environmental Evaluation and Planning System (SWEEPS) UST – One listing was reported within a one-quarter mile radius of the subject property, **Chevron Station #96496** (1950 West Imperial Highway, 0.23 miles north). Based on the absence of a documented release a this

site, and location (greater than one eighth mile, and not within the critical distance of 1,000 feet for petroleum hydrocarbon contamination), this site is not considered an environmental concern.

Historical UST database – The occupant associated with the subject property, **PLC Land Company** (3282 South Beach Boulevard) was reported as the site of former USTs. Additional information regarding the former onsite USTs is provided in **Section 3.7 Previous Assessments.** No other listings were reported.

CA FID UST– One listing was reported within a one-quarter mile radius of the subject property, **Chevron Station #96496** (1950 West Imperial Highway, 0.23 miles north). Based on the absence of a documented release a this site, and location (greater than one eighth mile, and not within the critical distance of 100 feet for volatile organic chemicals contamination as defined by ASTM Standard E2600-10), this site is not considered an environmental concern.

Local Land Records – No listings were reported within a one-half mile radius of the subject property.

Records of Emergency Release Reports – No listings were reported for the subject property.

RCRA NonGen/NLR – The former occupant associated with the subject property, **Chevron USA** (1300 Beach Boulevard) was reported. Additional information regarding the former onsite occupant is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**.

One additional listing was reported within a one-quarter mile radius of the property was reported. The site, **First Class Cleaners** aka **La Habra Marketplace** (1841 W. Imperial Highway, 0.29 miles north), was dual listed the above mentioned SLIC database as the site of a Perchloroethylene release which impacted soil only. The facility was listed as closed. The status of the case was listed as closed, with a closure certification issued by the OCHCA on November 14, 1994. Based on the fact that the case has been closed by a regulatory agency, and location (greater than one quarter mile, and not within the critical distance of 100 feet for volatile organic chemicals as defined by ASTM Standard E2600-10), this site is not considered an environmental concern.

Record of Decision (ROD) – One listing was reported within a one mile radius of the subject property, **McColl Superfund Site** (Rosecrans and Sunny Ridge (0.78 miles south). Based on the regulatory oversight, and site location (greater than one-quarter of a mile from the subject property and situated hydrologically cross- to down-gradient), this site is not considered an environmental concern.

CONSENT – One listing was reported within a one mile radius of the subject property, **McColl Superfund Site** (Rosecrans and Sunny Ridge (0.78 miles south). Based on the regulatory oversight, and site location (greater than one-quarter of a mile from the subject property and situated hydrologically cross- to down-gradient), this site is not considered an environmental concern.

Facility Index Database (FINDS) - The former occupant/address associated with the subject property, **Chevron USA** (3282 South Beach Boulevard) was reported. Additional information regarding the former onsite occupant is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**.

CA BOND EXP PLAN (Hazardous Substances Cleanup Bond Act) – One listing was reported within a one mile radius of the subject property, **McColl Superfund Site** (Rosecrans and Sunny

Ridge (0.78 miles south). Based on the regulatory oversight, and site location (greater than one-quarter of a mile from the subject property and situated hydrologically cross- to down-gradient), this site is not considered an environmental concern.

CA DRYCLEANERS - One listing was reported within a one-quarter mile radius of the subject property. The site, **Crystal Cleaners** (1641 West Imperial Highway, 0.26 miles north) was reported as a dry cleaning and laundry operation which is not dual listed with a release on the SLIC database. Based on the absence of a reported release, and location (greater than one quarter mile, and not within the critical distance of 100 feet for volatile organic chemicals as defined by ASTM Standard E2600-10), this site is not considered an environmental concern.

Toxics and Criteria Pollutant Emissions Data (EMI) - The occupant/address associated with the subject property, **PLC Land Company** (3282 South Beach Boulevard) was reported as monitored under the South Coast Air Quality Management district in 1987 (Facility No. 19758). Additional information regarding the subject property is provided in **Section 3.7 Previous Assessments.**

HIST Cortese – This database is no longer updated. The occupant/address associated with the subject property, **West Coyote Hills** (3282 Beach Boulevard) was reported. Additional information regarding the former onsite occupant is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**. Five additional listings were reported within a one-half mile of the subject property. The nearest listing was for **Chevron Station #96496** (1950 West Imperial Highway, 0.23 miles north). Based on the absence of a documented release a this site, and location (greater than one quarter mile, and not within the critical distance of 30 feet for petroleum hydrocarbon and 100 feet for volatile organic chemicals as defined by ASTM Standard E2600-10), this site is not considered an environmental concern. The four remaining listings were located greater than one-eighth mile from the subject property, and are therefore not considered a concern.

NY Manifest – The former occupant of the property, **Chevron Research Facility** (3282 Beach Boulevard) was reported. NY Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility. Additional information regarding the former onsite oil well operation is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**.

Underground Injection Wells (UIC) - The former occupant of the property, **Chevron USA** (3282 Beach Boulevard) was reported as the site of eight wells, with a status listed as "Plugged." Additional information regarding the former onsite oil well operation is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**.

Enforcement and Compliance History information (ECHO) - The former occupant of the property, **Chevron USA** (3282 Beach Boulevard) was reported as the site of eight wells, with a status listed as "Plugged." Additional information regarding the former onsite oil well operation is provided in **Sections 3.4.5 CDOGGR** and **3.7 Previous Assessments**.

EDR US Historical Auto Station list – One listing was reported within a one-eighth mile radius of the subject property. The listing **Sam's Club #4735 Service** Station (1390 South Beach Boulevard, adjoining the northwest portion of the subject property in the adjacent shopping center). The site has not documented a release; however, the proximity of the site to the subject property indicates a potential environmental concern (see **Section 5.0 Vapor Encroachment Screening**).

EDR US Historical Cleaners – Three listings were reported within a one-eighth mile radius of the subject property. None of the listings are dual listed on any of the other databases. The listings, **Artistic Cleaners** (1361 Harrison Avenue, 0.064 miles east), **Green Cleaners** (13391 Beach Boulevard, 0.4 miles southwest) and **Evergreen Cleaners** (13425 Beach Boulevard, 0.047 miles southwest), appear to be located in residential areas and are likely to be small cleaning businesses. Based on the absence of any dual listings at any of the sites, and apparent nature of the facilities as non-dry cleaning plants, these sites are not considered an environmental concern.

EDR Recovered Government Archives– No listings were reported for the subject property.

Orphan Summary - The EDR® database search report lists a number of sites identified as "orphans." EDR was unable to confirm the physical locations of these sites relative to the subject property or to assess whether they were located within the designated search radii. EEI attempted to locate these "orphan" sites, to the extent possible, using various maps and our knowledge of the site area. Any of the "orphan" sites determined to be within the designated search radii were included in our evaluation of the various listed sites which may have a potential to result in a recognized environmental condition relative to the property.

3.4 Regulatory Agency Review

3.4.1 City of La Habra Fire Department

EEI contacted the City of La Habra Fire Department for information regarding hazardous materials inventory, Business Emergency Plan, or Code Enforcement or Inspections at the subject property. According to the department personnel, the city contracts with the County of Los Angeles Fire Department (CUPA) for fire services as well as underground storage tank (UST) installation and permitting, and hazardous material handling. Therefore, EEI contacted the Los Angeles County Department of Health Services - Public Health Investigation Office (PHI), regarding any record of USTs, hazardous waste storage, hazardous materials responses, leaks or spills on the subject property addresses. According to the PHI, several records associated with the current occupant of the subject property, Westridge Golf Club, were on file with the department. EEI visited the department and a summary of the files reviewed is provided in the following section:

- February 13, 2009 – OCHCA letter indicating that the above ground Petroleum Storage Tank (AST) Facility statement had been reviewed and was complete.
- May 23, 2012 – Inspection and Facility Information Report; Westridge Golf Club. Notes indicated that no violations were observed during the inspection. Hazardous materials included diesel and gasoline fuel (600-gallon each); and waste oil (approximately 300-gallons); pesticides, shop rags, compressed gases; and battery charging station.
- Undated - A Consolidated Contingency Plan Site Map (map details were unavailable).

In addition, EEI contacted the Los Angeles County Department of Public Works (LACDPW) - Environmental Programs Division, to determine if any permits have been issued for any installation or removal of any USTs for the subject property addresses. According to a response letter from department personnel, there were no files on record for the subject property.

3.4.2 Orange County Health Care Agency

EEI reviewed Orange County Health Care Agency (OCHCA) Environmental Health Department databases including the Hazardous Waste Facilities, Industrial Cleanup program, Local Oversight Program (LOP), Non-petroleum USTs, Underground Tank Facilities (UTF) Listing, and Land Fill Sites (maintained by the California Integrated Waste Management Board), to determine if the subject property or any properties within the site vicinity were listed as having an environmental concern. The following is a summary of the databases reviewed.

Above Ground Petroleum Storage Tank /Hazardous Waste Facilities Listings

The occupant of the subject property, **Westridge Golf Club** (1400 South La Habra Hills Drive) was listed on both databases. No additional information was reported. One adjacent property was listed as a hazardous waste facility: **Sam's Club No. 4735** (1390 South Beach Boulevard, adjacent and to the northwest of the golf clubhouse).

Industrial Cleanup Program (ICP)

The subject property was identified as a crude oil cleanup site (ICP) that underwent a series of investigations, remediation, and onsite soil reuse during the period 1996 through 1999 (**Case #97IC7, PLC Land Company, Tracts 15030 and 15031, Southeast Quadrant – Beach Boulevard and Imperial Highway**).

The case was closed by both the OCHCA and the CRWQCB-SA in 1999. Additional information regarding the onsite release case is provided in **Section 3.7 Previous Assessments.**

The subject property, identified as **Westridge Golf Course**, was also reported as the site of an active OCHCA Industrial Cleanup Program site (Case #15IC004), related to the management of soil in place at the subject property. Details regarding the soil management are presented in a SMP prepared by EEI in 2015, and reviewed below in **Section 3.7 Previous Assessments.**

A nearby site, **Chevron Petroleum Tech, Co.** (1100 Beach Boulevard, 0.30 miles north) was listed as the site of a fuel waste cleanup site that was closed by the OCHCA on September 4, 2001. The adjacent property, **La Habra Westridge Plaza** (1380 South Beach Boulevard), was listed as the site of a waste oil release that was closed by the OCHCA in August 2001. Based on the fact that these cases have been closed by a regulatory agency, they are not considered an environmental concern.

Local Oversight Program (LOP)

The subject property was identified as a closed UST site (**Case #99UT43, PLC Land Company, Tract 15030, Former Facility Service Station Site, Former West Coyote Hills Oil Field)**. The case was closed by the OCHCA in 1999. Additional information regarding the former onsite release case is provided in **Section 3.7 Previous Assessments.**

Non-Petroleum Underground Storage Tanks

No listings were reported for the subject property or any adjacent property.

Underground Tank Facilities (UTF)

No listings were reported for the subject property. One adjacent property was listed as a

hazardous waste facility: **Sam's Club No. 4735** (1390 South Beach Boulevard, adjacent and to the northwest of the golf clubhouse).

Land Fill Sites

No listings were reported for the subject property or any adjacent property.

3.4.3 Department of Toxic Substances Control

EEI researched the Department of Toxic Substances Control (DTSC, 2016) online database EnviroStor for listings on or adjacent to the subject property. The subject property was not listed on any of the databases researched. The adjacent property, **La Habra Westridge Plaza** (1380 South Beach Boulevard), was listed as the site of a waste oil release that was closed by the OCHCA in August 2001. Based on the fact that the case has been closed by a regulatory agency, this site is not considered an environmental concern.

3.4.4 State Water Resources Control Board

EEI reviewed the online database GeoTracker, which provides records on LUSTs and Spills, Leaks, Investigation and Cleanup (SLIC) sites, which is maintained by the State Water Quality Control Board (SWRCB, 2016). Neither the subject property nor adjacent property was listed on any of the other databases researched.

Several nearby sites were listed as open LUST cases, and are discussed under the LUST database in **Section 3.3.2**. EEI did not request file reviews for sites previously identified as LUST sites, as information contained in the GeoTracker online files contained sufficient information, in our opinion, for the purposes of this Phase I ESA.

3.4.5 Review of Division of Oil, Gas and Geothermal Resources Files

A review of the California Division of Oil, Gas, and Geothermal Resources Website for oil and gas fields in California and Alaska (CDOGGR, 2016) indicated the presence of twenty four (24) oil and gas wells on or immediately adjacent to the subject property (Township 03 South Range 10 West Section 18). The wells are located within the West Coyote Oil Field. The operator of the wells is listed as Chevron USA, Inc. The Client provided EEI with a map depicting the location of the wells, titled Oil Well State Data, Tentative Tract 17845, prepared by Hunsaker and Associates (H&A). This map is provided along with the User Provided Information in **Appendix E**.

EEI requested documents regarding these wells from Ms. Kordelia Jenkins, with the CDOGGR. EEI reviewed the available documents at the CDOGGR office. According to the information reviewed, these wells were drilled as early as the 1920s and were used for oil and gas production until their abandonment under the regulatory guidance of the CDOGGR during the 1960s through the 1990s. Well records currently list the wells as plugged, and indicate they were abandoned properly under the CDOGGR guidelines.

According to the CDOGGR inspector in Cypress, CDOGGR will only require construction review for wells either directly on top of or in close proximity to (i.e., roughly 50 feet) from an existing well. He said many of the existing wells have permanent vents to allow methane gas to escape. However, CDOGGR does not mandate methane testing prior to construction.

Below is a list of the records made available for EEI to review at the CDOGGR office which included a list of the onsite wells and the date they were abandoned.

- Chevron Murphy-Coyote 258 - Plugged and abandoned February 7, 1997, reabandoned (casing lowered 39 feet and vented), October 14, 1998; Chevron Murphy-Coyote 305 - Plugged and abandoned July 18, 1997; Chevron Murphy-Coyote 344 - Reabandoned (casing raised 43 feet and vented) October 28, 1998; Chevron Murphy-Coyote 315 - Plugged and abandoned September 2, 1998 (casing raised 20 feet); Chevron Murphy-Coyote 342 - Plugged and abandoned February 13, 1997, reabandoned (casing raised 24 feet) September 2, 1998; Chevron Murphy-Coyote 1 - Plugged and abandoned November 20, 1996, reabandoned (casing raised 49.9 feet) October 6, 1997; Chevron Murphy-Coyote 7 - Plugged and abandoned November 20, 1996, reabandoned (casing lowered 43 feet) August 6, 1998; Chevron Murphy-Coyote 90 - Plugged and abandoned November 20, 1996, reabandoned (casing raised 10 feet and vented) May 18, 1999; Chevron Murphy-Coyote 244 - Plugged and abandoned December 9, 1997, reabandoned (casing lowered 63 inches) August 12, 1998; Chevron Murphy-Coyote 364 - Plugged and abandoned July 25, 1996, reabandoned (casing lowered 2.2 feet) October 6, 1997; Chevron Murphy-Coyote 134 - Plugged and abandoned March 17, 1999, reabandoned (casing raised 11 feet and vented) May 18, 1999; Chevron Murphy-Coyote 90 - Plugged and abandoned November 20, 1996, reabandoned (casing raised 10 feet and vented) May 18, 1999; Chevron Murphy-Coyote 91 - Plugged and abandoned February 7, 1997, reabandoned (casing raised 12.7 feet and then lowered 4 feet) August 11, 1998; Chevron Murphy-Coyote 317 - Plugged and abandoned October 26, 1998, reabandoned (casing raised 63 feet and vented) November 3, 1998; Chevron Murphy-Coyote 318 - Plugged and abandoned November 20, 1996, reabandoned (casing raised 10 feet and vented) May 18, 1999; Chevron Murphy-Coyote 319 - Plugged and abandoned January 2, 1962.

3.4.6 National Pipeline Mapping System

EEI reviewed the National Pipeline Mapping System (NPMS) Public Map Viewer, published by the Pipeline and Hazardous Materials Safety Administration (PHMSA, 2016) to determine the possible presence of petroleum pipelines in the vicinity of the subject property. The NPMS Public Map Viewer allows the general public to view maps of transmission pipelines (natural gas and hazardous liquids), LNG plants, and breakout tanks in one selected county. Distribution and gathering systems are not included in NPMS. Based on a review of the NPMS Public Map Viewer, no pipelines are located on or in close proximity to the property.

3.5 Interview with Current Property Owner

EEI contacted the property owner representative, Mr. George Peterson, for information regarding the subject property. Mr. Peterson, on behalf of the property owner, provided the information documented in the following sections.

3.5.1 Past or Present Uses Indicating Environmental Concern

Mr. Peterson stated that the subject property is currently used as a public golf course. Mr. Peterson also stated that the property was used historically used for agriculture and oil well operations.

3.5.2 Environmental Liens or Governmental Notification

Mr. Peterson stated that stated that he is not aware of any environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property. Although not indicated by Mr. Peterson, a statement provided by the property owner, Mr. Soojin Kwon, during EEI's previous Phase I ESA for the subject property (EEI, 2015a), indicated there is a water right/use restriction of up to 500 feet below ground placed on the subject property.

3.5.3 Presence of Hazardous Substances or Environmental Violations

Mr. Peterson stated that he is not aware of the presence of hazardous substances or environmental violations associated with the subject property.

3.5.4 Previous Assessments

Mr. Peterson stated that he was not aware of any previous assessments conducted at the subject property.

3.5.5 Legal Proceedings

Mr. Peterson stated that he is not aware of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property.

3.6 User Specific Information

Pursuant to ASTM E1527-13, EEI provided a Phase I ESA User Specific Questionnaire to the "user" (the person on whose behalf the Phase I ESA is being conducted), Mr. Michael Battaglia, with CalAtlantic Homes. The User Specific Information provided by Mr. Battaglia is documented in the following section. A list of the user specific questions (per ASTM E1527-13) with associated responses is included in **Appendix E**.

3.6.1 Environmental Liens or Activity and Use Limitations

Mr. Battaglia stated that he is not aware of any environmental liens or activity or use limitations (AULs) filed on the property. To supplement this information, Mr. Battaglia provided EEI with a PTR prepared for the subject property by First American Title Company on September 15, 2014.

A review of the PTR confirmed the absence of any environmental liens or AULs associated with the subject property. However, the PTR indicates exceptions to coverage include easements in favor of Chevron U.S.A., Inc., for various rights of access for installation and maintenance of utilities on the subject property. Additionally, the PTR indicates exceptions to coverage include the terms and provisions contained in the document entitled "Hazardous Substances Certificate and Indemnity Agreement" recorded June 30, 2009 as Instrument No. 2009000342971 of Official Records (**Appendix B)**.

3.6.2 Specialized Knowledge

Mr. Battaglia stated that he has no specialized knowledge or experience related to the property or nearby properties (i.e., knowledge of the chemicals or processes used by a type of business).

3.6.3 Valuation Reduction for Environmental Issues

Mr. Battaglia stated that the purchase price for the subject property reasonably reflects the fair market value of the property.

3.6.4 Presence or Likely Presence of Contamination

Mr. Battaglia stated that he is not aware of the presence or likely presence of any contamination on the subject property.

3.6.5 Other

Mr. Battaglia stated that the Phase I ESA is required for due diligence purposes on a land acquisition opportunity and to prepare the property for residential development.

3.7 Previous Assessments

Based on the information provided by the Client, previous site investigation activities have been conducted on the subject property. The following section summarizes the information EEI reviewed.

3.7.1 Miller Brooks Environmental, Inc. (Miller Brooks, 1998), Closure Report, For Soil Remediation Activities at the PLC Land Company, Tract 15030, Closure Phase B, Former West Coyote Hills Oil Field, La Habra, California 90631 (Project No. 245-0001-04), April 2, 1998.

The above referenced report documented soil remediation activities and grading phase assessment at the PLC Land Company (PLC) proposed residential and golf course development, Tracts 15030 and 15031, the northern portion of which included the subject property. These tracts were formerly part of Chevron‘s West Coyote Oil Field. Tracts 15030 and 15031 were being developed as residential housing, a golf course, and a reservoir site. Remediation activities within Tracts 15030 and 15031 were initiated in December 1996.

The report stated that four closure reports would be prepared that followed the completion of rough grade activities through Tracts 15030 and 15031. The four areas were identified as Closures Phases A through D. The subject property encompasses Closure Phases A (western portion of the golf course) and B (eastern portion of the golf course). Closure Phases C and D were located to the south of the subject property and have since been developed as a residential community. Closure Phase B, encompasses the eastern portion of the subject property, and consists of approximately one-third of the total acreage of Tract 15030. The boundaries of Closure Phase B were defined by a SCE substation and a residential development on the north, by Idaho Street on the east, Tract 15030 residential developments on the south, and a golf course access road on the west.

This closure report was based on information collected within Closure Phase B during remediation activities conducted by Miller Brooks under the jurisdiction of the CRWQCB-SA and the OCHCA. The report stated that in 1996 and 1997, the consultant conducted soil remediation and grading phase observations with Closure Phase B, which included removal of previously identified crude oil affected soil, identify additional impacted areas, conduct limited additional soil assessment sampling, and collect confirmation soil samples to verify that impacted soils were removed during remediation and grading activities. The areas of environmental concern previously identified within Closure Phase B included well sites and tank settings.

According to the report, additional areas were identified during grading phase activities which were previously unidentified sites and impacted soil that extended beyond the limits estimated during Phase II site assessment activities. The remediation and grading phase observation activities included identification of 104 oil wells within Tracts 15030 and 15031 (six were within Closure Phase B); four of which did not require remediation. Two of the wells were identified as impacted, remediated, and confirmation soil samples collected. A previously identified tank setting was identified as impacted, remediated, and confirmation soil samples collected. In addition, two previously unidentified sites were located during grading activities, identified as impacted, remediated, and confirmation soil samples collected.

The report stated that abandonment and removal of former oil production facilities, tank settings and other former historical oil field sites within Tract 15030 and 15031 was conducted by others in 1995 and 1996 under the direction of Chevron. The report also stated that oil well abandonment within Tracts 15030 and 15031 were conducted by others under the direction of Chevron and the CDOGGR.

3.7.2 Miller Brooks (1999a), Closure Report, For Soil Remediation Activities at the PLC Land Company, Tract 15030, Closure Phase A, Former West Coyote Hills Oil Field, La Habra, California 90631 (Project No. 245-0001-04), June 1, 1999.

The above referenced report documented soil remediation activities and grading phase assessment at the PLC Land Company (PLC) proposed residential and golf course development, Tracts 15030 and 15031 (i.e. the subject property). The report stated that four closure areas had been designated that followed the completion of rough grade activities through Tracts 15030 and 15031. The four areas were identified as Closures A through D. Closure reports for Phases B, C and D (Miller Brooks, 1998a, 1998b, and 1998d) had been previously submitted, reviewed and approved by the CRWQCB-SA (CRWQCB, 1998a, 1998b, and 1998e) and the OCHCA, Department of Environmental Health (OCHCA, 1998a and 1998b).

Closure Phase A encompasses the western portion of the subject property, and consists of approximately one-third of the total acreage of Tract 15030 and included the western portion of the golf course. The boundaries of Closure Phase A were defined by Beach Boulevard and Chevrons Research Facility on the north, a golf course access road on the east, Tract 15031 residential developments on the south, and the western property boundary and the City of La Mirada on the west.

This closure report was based on information collected within Closure Phase A during remediation activities conducted by Miller Brooks under the jurisdiction of the CRWQCB-SA and the OCHCA. The objectives of site remediation included: (1) monitoring the removal of previously identified environmentally impacted soil; (2) observing grading activities to identify additional impacted areas; (3) conducting limited additional soil assessment sampling where necessary; (4) collecting confirmation soil samples to verify that impacted soils were removed during remediation and grading activities; (5) monitoring the handling of impacted soil; and (6) monitoring and sampling impacted soil placed within three approved Reuse Areas, identified as RUA 1, RUA 2, and RUA 3.. The report stated that abandonment and removal of former oil production facilities, tank settings and other former historical oil field sites within Tract 15030 and 15031 was conducted by others in 1995 and 1996 under the direction of Chevron. The report also stated that oil well abandonment within Tracts 15030 and 15031 were conducted by others under the direction of Chevron and the CDOGGR.

3.7.3 California Regional Water Quality Control Board Santa Ana Region (CRWQCB-SA), Closure Letter for Tract 15030, Phase A at the Former West Coyote Hills Oil Field, City of La Habra, California 90631, dated June 24, 1999.

The letter, addressed to PLC Land Company, indicated that the CRWQCB-SA reviewed the June 1, 1999 submittal of the Closure Report for Tract 15030, Phase A at the former West Coyote Hills Oil Field, prepared and submitted by Miller Brooks Environmental, Inc. The report summarized the remedial and closure activities which were carried out in accordance with the requirements outlined in the previously approved work plan. The letter was the last in a series of four, which completed the full closure of Tracts 15030 and 15031 within the former West Coyote Hills Oil Field. The letter stated that after reviewing the report and the analytical results of the confirmation samples, the CRWQCB-SA believed that the site no longer posed a threat to water quality; therefore, no further action (NFA) would be necessary at the site.

The closure letter stated that it did not relieve PLC Land Company of its responsibility to comply with the rules and regulations set forth by other agencies. A copy of the CRWQCB-SA NFA letter for Tracts 15030 and 15031dated June 24, 1999, is provided in **Appendix F**.

3.7.4 OCHCA, Public Health Division of Environmental Health, Final Case Closure, PLC Land Company, Tracts 15030 and 15031, Southeast Quadrant – Beach Boulevard and Imperial Highway, La Habra, California 90631, OCHCA Case #97IC7; dated July 1, 1999.

The above referenced letter was addressed to Mr. Jeff Rulon with PLC Land Company, and confirmed the completion of remedial action at the above-referenced site. With the provision that the information provided to the OCHCA was accurate and representative of existing conditions, it was the position of the OCHCA that no further action was required at that time. The letter stated that the confirmation of completion was limited in scope and limited to site conditions made known to the agency. It was based on an evaluation of the health threat presented by the inhalation, ingestion, or dermal absorption of the residual contaminants. In addition, the evaluation considered the present and proposed use of the property.

The letter noted that changes in the present or proposed land use may require further site characterization and/or site mitigation activity. The letter stated that the presence of the petroleum hydrocarbons and the potential for residual contamination to cause groundwater contamination at this site was evaluated by the CRWQCB-SA in its letter dated June 24, 1999, which concluded that no further action was required for the site (Tracts 15030 and 15031). The letter advised that it did not relieve PLC Land Company of any liability under the California Health and Safety Code or Water Code for past, present or future operations at the site. Nor did it relieve PLC Land Company of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health. The letter concluded that it was the property owners' responsibility to notify the OCHCA of any changes in future contamination findings or site usage. Depths to groundwater were reported at 100-110 feet below ground in mid-evaluation areas. A copy of the OCHCA NFA letter for Case #97IC7 dated July 1, 1999, is provided in **Appendix F**.

3.7.5 Miller Brooks (1999c), Report of Supplemental Confirmation Soil Sampling, OCHCA, Case #99UT043, PLC Land Company, Tract 15030, Former Facility Service Station Site, Former West Coyote Hills Oil Field, La Habra, California 90631, dated December 1, 1999.

The report documented the supplemental confirmation soil sampling activities at the PLC Land Company, Tract 15030, and former service station site located within the former West Coyote

Hills Oil Field. The site was occupied by the driving range of the golf course. The former oil field fuel service site reportedly consisted of two USTs of unknown volume and one Dispenser Island. Reportedly, in the mid-1980s Chevron USA Production Company (Chevron) removed the USTs dispenser island associated piping, and impacted soil for offsite disposal.

The report outlined a previous Phase II Site Assessment Report (Environmental Science and Engineering, Inc.), conducted at the site in November 1995, where six borings were drilled within the vicinity of the former fuel station area. Results of laboratory analysis indicated that petroleum hydrocarbons were not detected in four (B2, B3, B4, and B6) of the six borings. And that soil samples collected from soil borings B1 and B5 contained maximum concentrations of 340 milligrams per kilogram (mg/kg) total petroleum hydrocarbons as gasoline (TPH-G), 6,500 mg/kg total petroleum hydrocarbons as diesel (TPH-D), 4,300 total recoverable petroleum hydrocarbons (TRPH), no detectable benzene, 0.190 mg/kg toluene, 0.830 mg/kg ethylbenzene, and 2.0 mg/kg total xylenes.

In 1997, as part of the oil field cleanup activities, this area was excavated and approximately 500 cubic yards of contaminated soil was transported offsite for disposal. Excavation confirmation samples were collected and analyzed until all samples were non-detected for TPH-g, TPH-d, TRPH and benzene, toluene, ethylbenzene, and total xylenes (BTEX).

In June 1999, a Closure Report (Miller Brooks, 1999a) presented the results of soil remediation, confirmation sampling and laboratory analysis conducted as part of environmental oversight activities during grading operations at Tract 15030, performed in accordance with the Remedial Action Plan (Miller Brooks, 1997a) and associated amendments approved by the OCHCA, and the CRWQCB-SA. Remediation activities included the excavation, temporary stockpiling, and offsite transport of affected soil to the Waste Management, Inc., Bradley Landfill and Recycling Center, in accordance with the state and federal regulations and the CRWQCB-SA approval. Results of soil sample confirmation laboratory analysis at the former fuel service area indicated no detectable TPH-G, no detectable TPH-D, no detectable concentrations of BTEX, and a maximum concentration of 51 mg/kg TRPH. Approximately 500 cubic yards of impacted soil was excavated and transported offsite for disposal.

In a Notice of Responsibility dated August 11, 1999 (OCHCA, 1999b), the OCHCA gave formal notification of "responsibility to investigate and remedy the effects of" leaking underground storage tanks at the site. A Work Plan (Miller Brooks, 1996b) was prepared and submitted to the OCHCA that proposed soil samples be collected at a depth of approximately 5 feet below the former excavation bottom from three borings drilled within the excavation limits of the former fuel service site. The OCHCA approved the work plan with the recommendation with the recommendation that additional soil samples be collected at depths between 5 and 15 feet below the bottom of the former excavation and 5 feet above the bottom of the former excavation.

Field activities during the supplemental assessment (i.e. December 1999) included drilling three supplemental confirmation soils borings within the excavation limits of the former fuel service station. Soil samples were collected in each boring at depths of approximately 5 feet above and 5, 10, and 15 feet below the bottom of the original excavation and field-screened for petroleum hydrocarbon vapors using a photoionization detector (PID). Based on the results of field hydrocarbon vapor screening, additional soil samples were collected at 20 and 25 feet below the bottom of the original excavation in Boring PLC-SS-CB-1. Groundwater was not encountered during supplemental confirmation soil sampling activities. Soil samples selected for analysis were submitted to a state certified laboratory and analyzed in accordance with the approved work plan for BTEX and methyl tertiary butyl ether (MTBE) using EPA Method 8020, and TPH-G using EPA Method 8015. The consultant concluded that supplemental confirmation soil samples

collected from the soil borings contained no detectable BTEX, MTBE, or TPH-G. No additional areas of concern were identified during the activities associated with the supplemental confirmation soil sampling activities. Based on field observations and the results of laboratory analysis of soil samples collected during the supplemental investigation, no evidence of a significant hydrocarbon discharge was found. Based on the results of previous confirmation soil sampling and analysis and the results of the supplementary confirmation soil sampling and analysis, it was the opinion of Miller Brooks that no further site assessment or remediation activities were warranted, and that the site met the criteria to be granted environmental closure. Based upon the results of the soil sample laboratory analysis soil cuttings generated during drilling operations were reused onsite in landscape areas.

3.7.6 OCHCA, Division of Environmental Health, Remedial Action Completion Certification, UST Case, Former Facility Service Station at Former W. Coyote Hills Oil Field, Tract 15030, 3282 South Beach Boulevard, La Habra, California 90631, OCHCA Case #99UT043; dated November 22, 2002.

The letter confirmed the completion of site investigation and corrective action for the USTs formerly located at the site. The letter stated that the OCHCA found that the site investigation and corrective action carried out at the UST site was in compliance with the agency regulations and that no further action related to the petroleum release at the site was required.

3.7.7 EEI (2015a), Phase I ESA, Standard Pacific Homes, Proposed Residential Development, Westridge Golf Club (1400 South La Habra Hills Drive, APNs 019-481-03 and -04, La Habra, Orange County, California 90631, dated May 6, 2015.

EEI prepared a previous Phase I ESA for the subject property in 2015. At the time of the report, the subject property was in its current configuration. According to the report, RECs revealed during the assessment were related to the former occupant Chevron (i.e. West Coyote Oil Field). The report stated that during grading of the onsite golf course approximately 430,000 cubic yards of soil containing TPH were placed in three designated soil reuse areas beneath the golf course. Based on the reported contamination, the presence of the impacted soil beneath the golf course was considered a potential REC. EEI recommended that a Soil Management Plan (SMP) be developed and submitted to OCHCA for approval and implementation during grading and construction.

At the time of the report, EEI observed areas of concern at the golf club maintenance facilities, which included above ground waste oil and gasoline storage tanks, a chemical storage shed, a grease interceptor (aka clarifier), and a wash area with surface drains present in the vicinity of the maintenance facilities. EEI stated, as this area was to undergo extensive remedial excavation and grading, any soil impacts in this area were to be addressed as part of the SMP. EEI also identified two adjacent service stations are located within 100 feet of subject property and included: Sam's Club Service Station (1390 S. Beach Boulevard, adjacent to the northwest of the golf clubhouse), and ARCO Facility No. 06545 (13550 Beach Boulevard, adjacent to the southwest), details of which are discussed under **Section 3.3**. EEI also indicated the property was the site of a closed UST case (OCHCA Case #99UT43), related to the Former Facility Service Station Site, which was considered to be an HREC. In addition, EEI stated that multiple former oil production wells occupied portions of the subject property. According to EEI the presence of these oil wells should be accounted for during development planning and any potential encroachment upon well locations should be coordinated through the CDOGGR to ascertain current requirements.

3.7.8 EEI (2015b), Results of Limited Methane Screening, Proposed Residential Development, Westridge Golf Course, 1400 S. La Habra Hills Boulevard, La Habra, California 90631, EEI Project No. SPH-71933.2, dated September 25, 2015.

The letter documents the Methane Survey conducted by EEI at the subject property on September 16 and 18, 2015. A total of 28 locations were sampled at a depth of 5 feet bgs for the presence of methane gas using a Landtec GEM 2000 meter. Nineteen of the locations were in the western half of the golf course, either above or in close proximity to the crude oil-impacted soil designated reuse areas. Nine of the locations were in the eastern half of the golf course, in areas of former oil field operations. Of the 28 locations surveyed, only 5 indicated detectable methane concentrations (0.01% or 1,000 ppm). The remaining 23 locations had no detectable concentrations of methane. The screening level for methane utilized during this survey was 0.5% or 5,000 ppm, the level at which Mandatory Procedures for Mitigation are required under the Orange County Fire Agency's *Combustible Soil Gas Hazard Mitigation* guidance document (C-03) dated January 1, 2014.

In addition, EEI collected samples for laboratory analysis at two of the survey locations in order to verify the results of the survey. Based on laboratory analytical results, the two samples (which had indicated a field measurement of 0.1% or 1,000 ppm) contained less than 10 ppm methane. Based on the results of the field survey and laboratory analytical data, methane mitigation did not appear to be warranted at the subject property.

3.7.9 EEI (2015c), Soil Management Plan (SMP), Standard Pacific Homes, Proposed Westridge Residential Development, 1400 S. La Habra Hills Boulevard, La Habra, California 90631, EEI Project No. SPH-71933.2, dated September 29, 2015.

An active OCHCA Industrial Cleanup Program site (Case #15IC004) related to the management of soil in place at the subject property was addressed in the above referenced Soils Management Plan (SMP) prepared by EEI in 2015. The purpose of the above referenced SMP was to provide background information and general worker awareness information related to known environmental conditions, as well as action for potential unknown environmental conditions that may be encountered during future site improvements for a proposed residential development. Future site improvements include surface clearing; mass grading and earthwork; utility trenching; road work; and construction. The SMP dated September 29, 2015, was submitted to the OCHCA for review.

The known environmental conditions included soils impacted with low to moderate levels of crude oil in three designated soil reuse areas. The soils were generated during the investigation, remediation and grading of a portion of the former West Coyote Oil Field, in preparation for construction of the Westridge Golf Course. The SMP also provided general guidance on stockpiling and managing excavated soils impacted by chemicals of concern during site improvements, and general guidance if undocumented materials or contaminated soils are encountered during future grading activities.

On October 29, 2015, the OCHCA responded to EEI regarding the SMP dated September 29, 2015. The OCHCA provided several comments regarding the SMP, and requested that EEI submit an addendum to the SMP that addressed their comments. To address OCHCA comments, EEI prepared and submitted an SMP Addendum dated July 14, 2016. The information provided in the addendum was deemed sufficient and the SMP received final approval by the OCHCA on September 9, 2016. Copies of the OCHCA response letter dated October 29, 2015 and the SMP approval letter dated September 9, 2016 are included in **Appendix G**.

3.8 Other Environmental Issues

3.8.1 Asbestos-Containing Materials

Asbestos, a natural fiber used in the manufacturing of a number of different building materials, has been identified as a human carcinogen. Most friable (i.e., easily broken or crushed) Asbestos-Containing Materials (ACM) were banned in building materials by 1978. By 1989, most major manufacturers had voluntarily removed non-friable ACM (i.e., flooring, roofing, and mastics/sealants) from the market. These materials, however, were not banned completely.

In October 1995, the Federal Occupational Safety and Health Administration (OSHA) redefined the manner by which building materials are classified in regards to asbestos and the also the way these materials are to be handled. Under this ruling, "thermal system insulation and sprayed-on or troweled on or otherwise applied surfacing materials" applied before 1980 are considered presumed asbestos containing materials (PACM). Other building materials such as "floor or ceiling tiles, siding, roofing, transite panels" (i.e., non-friable) are also considered PACM unless tested.

An ACM survey was not conducted at the subject property as part of this Phase I ESA. According to the information reviewed, the golf course facility structures located on the subject property were constructed in 1998, and the remaining portion of the subject property is developed as a golf course. Therefore, the presence of asbestos-containing materials is considered unlikely.

3.8.2 Lead-Based Paint

Lead-Based Paint has been identified by Occupational Safety and Health Administration (OSHA), the United States Environmental Protection Agency (U.S. EPA) and the Department of Housing and Urban Development (HUD) as being a potential health risk to humans, particularly children, based on its effects to the central nervous system, kidneys, and bloodstream. The risk of Lead-Based Paint has been classified by HUD based upon the age and condition of the painted surface. This classification includes the following:

- maximum risk is from paint applied before 1950;
- a severe risk is present from paint applied before 1960;
- a moderate risk is present from paint applied before 1970;
- a slight risk is present from paint applied before 1977; and
- paint applied after 1977 is not expected to contain lead.

According to the information reviewed, the golf course facility structures located on the subject property were constructed in 1998, and the remaining portion of the subject property is developed as a golf course Therefore, the presence of lead based paint is considered unlikely.

3.8.3 Radon

Radon is a radioactive gas which has been identified as a human carcinogen. Radon gas is typically associated with fine-grained rock and soil, and results from the radioactive decay of radium. The U.S. EPA recommends that homeowners in areas with radon screening levels greater than 4 Picocuries per liter (pCi/L) conduct mitigation of radon gas to reduce exposure.

Sections 307 and 309 of the Indoor Radon Abatement Act of 1988 (IRAA) directed the U.S. EPA to list and identify areas of the U.S. with the potential for elevated indoor radon levels. U.S. EPA's Map of Radon Zones (EPA-402-R-93-071) assigns each of the 3,141 counties in the U.S. to one of three zones based on radon potential:

- Zone 1 counties have a predicted average indoor radon screening level greater than 4 pCi/L.
- Zone 2 counties have a predicted average indoor radon screening level between 2 and 4 pCi/L.
- Zone 3 counties have a predicted average indoor radon screening level less than 2 pCi/L.

Based on such factors as indoor radon measurements, geology, aerial radioactivity, and soil permeability; the U.S. EPA has identified Orange County as Zone 2 (i.e., a predicted average indoor radon screening level between 2 and 4 pCi/L). According to the Client, the proposed land use plan for the subject property does not include subgrade substructures. Based on this information, EEI does not consider radon as a significant environmental concern for the subject property.

4.0 SITE RECONNAISSANCE

4.1 Purpose

The purpose of our site reconnaissance was to physically observe the subject property, site structures, and adjoining properties for conditions indicating an existing release, past release, or threatened release of any hazardous substances or petroleum products into structures on the property, or into soil and/or groundwater beneath the property. This would include any evidence of contamination, distressed vegetation, petroleum-hydrocarbon surface staining, waste drums, USTs, ASTs, illegal dumping, or improper waste storage/handling. Detailed information pertaining to our site reconnaissance is provided in the following text.

4.2 Subject Property

On March 16, 2016, EEI personnel conducted a site reconnaissance to visually observe the subject property and adjoining properties for conditions indicating a potential environmental concern. Visual conditions present during the site reconnaissance are documented in the Photographic Log (**Appendix H**), and summarized in **Table 2**.

The subject property is generally located at the southern terminus of South La Habra Hills Drive, approximately 900 feet south of its intersection with Imperial Highway (90) and South Beach Boulevard (Highway 39), in the City of La Habra, Orange County, California (**Figure 2**). The site has been occupied by the Westridge Golf Course since the late 1990's. Besides the golf course and driving range areas, the property also includes a multi-story club house parking lot, a maintenance facility, an irrigation pump house and restroom facilities for an 18-hole public golf course. The golf club is located north of the adjoining Westridge residential community. The property is comprised of approximately 151-acres, on two parcels.

Surrounding properties include residential to the south, South Beach Boulevard, a small shopping center and residential properties to the west, a shopping center, SCE substation, and residential properties to the north, and Idaho Street and residential properties to the east.

Access to the subject property is from the north by La Habra Hills Drive through the main entrance to the Westridge Golf Clubhouse and parking area located at the central portion of the property. The majority of the property is occupied by the golf course area. A golf cart charging area is located on the south side of the clubhouse. A large pond is located on the east side of the clubhouse. A smaller pond is located in the northwest portion of the property. The driving range is located west of the clubhouse entry way. Several restroom structures are located throughout the golf course area of the property.

A maintenance shop is located approximately 900 feet directly west of the clubhouse building. In this area EEI observed an above-ground (AST) waste oil storage tank, and a gasoline AST, and a chemical shed at the west side of the maintenance building. Just to the west, was a wash area with a surface drain (also located on the west side of the building). An irrigation pump house is located along the southern margin of the parking lot. No evidence of improper waste storage, spillage, or surface stains was noted in this area.

EEI noted the use of several chemicals specifically related to golf course maintenance of greens and turf areas. These included two growth regulators (Bayer Primo® and Proxy®) for turf grasses and two fungicides (Syngenta Daconil® and Nufarm ProtectDF®) used on the greens. All were present in container sizes of 5-gallons or less and, based on a review of product use and application information, have half-lives in the environment measured in hours or days. Therefore, the use of these chemicals does not appear to be a significant concern.

Apart from the presence of the AST's and the abandoned oil wells previously noted, no other evidence of environmental concerns including, contamination, distressed vegetation, petroleum-hydrocarbon surface staining, waste drums, USTs, ASTs, illegal dumping, or improper waste storage/handling was noted during the site reconnaissance.

TABLE 2
Summary of Site Reconnaissance

Item	Concerns	Comments
General Housekeeping	No	No concerns observed.
Surface Spills	No	No concerns observed.
Stained Surfaces	No	No concerns observed.
Fill Materials	No	No concerns observed.
Pits/Ponds/Lagoons	No	No concerns observed.
Surface Impoundments	No	No concerns observed.
ASTs/USTs	No	A waste oil AST was noted on the west side of the maintenance building, and a gasoline AST was noted on the north side of the maintenance area parking lot.
Oil Wells	No	Several former oil wells are located throughout the subject property; although they were not apparent during the site reconnaissance.
Distressed Vegetation	No	No concerns observed.
Wetlands	No	No concerns observed.
Electrical Substations	No	No concerns observed.
Areas of Dumping	No	No concerns observed.
Transformers	No	No concerns observed.
Waste/Scrap Storage	No	No concerns observed.
Chemical Use/Storage	No	No concerns observed. Chemical storage related to facility maintenance noted within the maintenance building and related storage building.

4.3 Adjacent Properties

EEI conducted a visual and auto reconnaissance of the adjoining neighborhoods (to the extent practical) to evaluate the potential for offsite impacts that may affect the subject property. These include evidence of chemical storage or usage, surface staining or leakage, distressed vegetation, or evidence of illegal dumping.

Surrounding properties include residential to the south, South Beach Boulevard, a small shopping center and residential properties to the west, a shopping center, SCE substation, and residential properties to the north, and Idaho Street and residential properties to the east.

The adjacent and nearby sites located within a one-eighth mile radius of the subject property, listed as release sites and/or sites of potential concern were discussed in **Section 3.3** *Regulatory Database Search* and are not repeated here.

5.0 VAPOR ENCROACHMENT SCREEN

ASTM Standard E2600-10 Standard Guide for Vapor Encroachment Screening (VES) on Property Involved in Real Estate Transactions was used as guidance for conducting a VES for the subject property. The purpose of the screening is to determine whether a Vapor Encroachment Condition (VEC) exists from chemicals of concern (COC) that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the subject property. The screening involves a two tiered approach to assessing VEC risk as described herein. The VES process includes a review of site conditions (e.g., aerial photographs, city directories, and environmental database information), which is information typically collected during a Phase I ESA, user provided information, and in some instances the use of a third-party vapor encroachment application. The following sections describe the VES performed on the property.

5.1 Site Conditions

The subject property is occupied by the Westridge Golf Club development. The property is comprised of approximately 151-acres with elevations ranging from approximately 200 feet amsl along the northwest portions to roughly 460 feet amsl at the southeast portions. The property is comprised of moderately sloping, hillside terrain, which slopes in a southwesterly direction.

Soil in the vicinity of the subject property has been identified by the USDA-NRCS as mainly clay loam of the Anaheim and Sorrento Soil Series at 2 to 50 percent (USDA). The soils of the Anaheim series are well-drained, moderately deep soils over weathered fine grained sandstone and shale. These soils have rapid to very rapid runoff. The Sorrento series consists of very deep, well drained soils that formed in alluvium mostly from sedimentary rocks. These soils have negligible to medium runoff. These soils both have moderate to moderately slow permeability.

The EEI reviewed the California Department of Water Resources, WDL for additional information pertaining to groundwater and water supply wells on or close to the subject property. According to the website there is one residential water supply well within a one-quarter mile radius of the subject property (Township 03 South Range 10 West Section 18). The well, identified as State Well No. 03S10W18C001S, is located on the north side of Coyote Creek, approximately 250 feet south of where the creek meets Imperial Highway, and approximately 0.25 miles north-northwest of the subject property. Data indicated the depth to groundwater at the well ranged between from 55.64 feet to 57.34 feet below ground surface (bgs), as measured in 2010 (WDL, 2016).

5.2 User Provided Information

To assist EEI in the completion of the VES, Mr. Michael Battaglia, with CalAtlantic Homes, completed a Vapor Encroachment Screen - User Questionnaire (**Appendix I**). The questionnaire provided basic information regarding the use, condition, and proposed development of the subject property.

According to Mr. Battaglia, the proposed development on the property will include a residential development. Mr. Battaglia stated that there has been environmental cleanup at the subject property by a prior land developer. According to Mr. Battaglia, he does not know of any reported instances of gas stations, cleaners, storage tanks, odors, chemicals, or health concerns reported on the property.

5.3 Tier 1 Screening – Search Distance Test/Chemicals of Concern

A Tier 1 Screening includes the search distance test that involves a review of the regulatory database report and available historical records obtained during the Phase I ESA process to make a determination if any known or suspect potentially contaminated properties exist within the Area of Concern (AOC). High risk sites are typically current and former gas stations, former and current dry cleaners, manufactured gas plants, and industrial sites (Brownfields). The AOC is defined as any up gradient sites within the ASTM E1527-13 standard search distances and any cross or down gradient sites within 0.3 miles for solvents and petroleum products.

If the contamination at the known or potentially contaminated sites within the AOC consists of Chemicals of Concern (COCs), then a potential Vapor Encroachment Condition (pVEC) exists, and a Tier 2 Screening evaluation is recommended. If no known or potentially contaminated sites with COCs exist within the AOC, no further inquiry is necessary.

Based on EEI's Tier 1 Screening evaluation, the past use of the subject property and two sites identified within the AOC, were considered to pose a pVEC., and are summarized below.

1. The subject property was formerly occupied by **Chevron USA, Inc.** and was the site of a former oil well production operation and numerous abandoned oil wells are present on the subject property. During grading of the golf course approximately 430,000 cubic yards of soil containing Total Petroleum Hydrocarbons (TPH) were placed in three designated soil reuse areas beneath the golf course. The presence of the impacted soil beneath portions of the subject property necessitated a Tier 2 Screening, which is described below in the following section.

2. Two service stations adjoin portions of the subject property and include: **Sam's Club Service Station** (1390 South Beach Boulevard, adjoining the northwest portion of the subject property in the adjacent shopping center), and **ARCO Facility No. 06545** (13550 South Beach Boulevard, adjoining the southwest portion). The proximity of the sites to the subject indicates a potential VEC. However, based on site specific factors, EEI concluded that a VEC can be ruled out for the two service station sites, based on the following:

    - The absence of a documented release;

    - The portion of the subject property located adjacent to the **Sam's Club Service Station** is slated for commercial development (and will be largely paved);

    - The portion of the subject property adjacent to the **Arco Facility No. 06545** is to remain open space (not residential).

5.4 Tier 2 Screening – Review of Existing Data

The presence of the impacted soil beneath portions of the subject property necessitated a Tier 2 Screening, as defined by ASTM Standard E2600-10. In this case, the Tier 2 Screening consisted of a review of existing data related to the former oil production operation and designated soil reuse areas at the

subject property. A detailed review of the data was provided in previous sections of this report (i.e. Section 3.7 Previous Reports).

5.5 Tier 2 Screening Findings

Based on the results of the Tier 2 Screening, EEI concluded that a VEC can be ruled out for the former oil production operation area and soil reuse areas located on the subject property, based on the following:

1. Site-specific invasive testing data collected during previous investigations, which indicated that the soil beneath the property contains crude oil contamination (not refined fuel products) with a lack of significant volatile organic compounds.

6.0 FINDINGS AND OPINIONS

Based on the information obtained in this ESA, EEI has the following findings and opinions:

- *Known or suspected RECs* – are defined by the ASTM E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

  No *known or suspected REC* has been revealed during the preparation of this ESA:

- *Controlled RECs (CRECs)* – are defined by the ASTM E1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)

  The following *CREC* has been revealed during the preparation of this ESA.

  - The subject property was formerly occupied by **Chevron USA, Inc.**, which operated West Coyote Oil Field. The subject property was identified as a crude oil cleanup site under the OCHCA Industrial Cleanup Program (**OCHCA Case #97IC7, PLC Land Company, Tracts 15030 and 15031, Southeast Quadrant**), that the property underwent a series of investigations, remediation, and onsite soil reuse during the period 1996 through 1999. The case was closed by the CRWQCB-SA and the OCHCA in June and July, 1999, respectively.

    At the time the golf course was constructed, extensive grading occurred in conjunction with the development of the Westridge neighborhood to the south of the golf course. During grading of the golf course approximately 430,000 cubic yards of soil containing Total Petroleum Hydrocarbons (TPH) were placed in three designated soil reuse areas beneath the golf course. However, the grading/compaction that occurred to accommodate the golf course and create the reuse areas was neither suitable for, nor compatible with, residential development. As a result, two of the three reuse areas will need to be removed and replaced, along with surrounding fill soils, and properly compacted prior to final grading and construction.

Therefore, EEI developed a Soil Management Plan (SMP) which received final approval by the OCHCA on September 9, 2016, for implementation during grading and construction (OCHCA Case #15IC004). The SMP includes post-grading soil matrix and soil vapor sampling to document soil removal/replacement into several new reuse areas, as well as to address concerns regarding potential impacts to future site occupants. Future construction activities at the subject property shall follow the SMP as directed by the OCHCA.

- *Historical Recognized Environmental Conditions (HRECs)* – are defined by the ASTM E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).

  The following *HREC's* have been revealed during the preparation of this ESA.

  - The subject property was identified as a closed UST site related to the former West Coyote Oil Field fuel service station (**OCHCA Case #99UT43), PLC Land Company, Tract 15030**). The case was closed by the OCHCA in December 1999.

- *De Minimis* Conditions – include environmental concerns identified which may warrant discussion but do not qualify as RECs, as defined by the ASTM E1527-13.

  No *de minimis* conditions were identified during the preparation of this ESA.

- Although not considered to be a REC, the following non-scope consideration was identified:

  - Multiple former oil production wells occupy portions of the subject property. The presence of these oil wells should be accounted for during development planning and any potential encroachment upon well locations should be coordinated through the CDOGGR to ascertain current re-abandonment requirements.

7.0 DATA GAPS AND DEVIATIONS FROM ASTM PRACTICES

Section 3.2.20 (ASTM E1527-13) defines a data gap as "a lack or inability to obtain information required by the practice despite good faith efforts of the environmental professional to gather such information."

7.1 Historical Data Gaps

Based on the information obtained during the course of this investigation, no historical data gaps were encountered.

7.2 Regulatory Data Gaps

Based on the information obtained during the course of this investigation, no regulatory data gaps were encountered.

7.3 Onsite Data Gaps

Based on the information obtained during the course of this investigation, no onsite data gaps were encountered.

7.4 Deviations from ASTM Practices

Section 12.10 (ASTM E1527-13), states that all deletions and deviations from this practice shall be listed individually and in detail, including Client imposed constraints, and all additions should be listed.

EEI believes that there are no exceptions to, or deletions from, the ASTM E1527-13 Guidelines.

8.0 CONCLUSIONS

EEI performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E1527-13 of APNs 019-481-03 and 019-481-04, the *subject property*. Any exceptions to, or deletions from, this practice are described in **Section 7.0** of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the *subject property*, except for those discussed in **Section 6.0** Findings and Opinions.

APPENDIX A
RESUME OF ENVIRONMENTAL PROFESSIONAL

BERNARD A. SENTIANIN, PG

PRINCIPAL GEOLOGIST

SUMMARY

As Principal Geologist of EEI since 1997, Mr. Sentianin provides consulting and technical services as a project manager, expert witness, and senior geologist for investigation and cleanup efforts at sites impacted by Petroleum Hydrocarbons, heavy metals, pesticides, and chlorinated solvents. As a senior project manager, he has hands on experience designing, installing, and managing large scale projects involving above ground and in-situ bioremediation, soil vapor extraction, sparging, and groundwater extraction/treatment. He has 23 years of environmental project management experience, and over 25 years professional geologic experience. Mr. Sentianin has extensive experience in planning, implementing and evaluating Phase I and Phase II environmental assessments in commercial real estate transactions.

EDUCATION

1985 Bachelor of Science, Geology, California State University, Bakersfield
1989 Master of Science, Geological Sciences, San Diego State University

REGISTRATIONS/CERTIFICATIONS

Professional Geologist No. 5530, State of California.

Prior WORK HISTORY

1991 TO 1997 Senior Geologist, Senior Project Manager
PW ENVIRONMENTAL

Established in-house engineering and consulting services for mid-sized environmental contractor. Established regulatory, vendor, and client contacts. Initiated policies governing technical report content and format and instituted in-house training program for new technical staff. Selected prioritized and procured required support equipment. Actively managed Phase I and Phase II investigation and remediation projects. Reviewed assessment data, prepared feasibility studies, and evaluated remedial alternatives while preparing Remedial Action Plans (RAP) for fuel, heavy metal, and solvent-impacted sites. Prepared health-based risk assessment on large cleanup site adjacent to health care facility. Permitted, implemented, and successfully completed the first in-situ groundwater bioremediation system in Ventura County. Reviewed and implemented numerous Phase I and Phase II environmental site assessments throughout Central and Southern California.

1989 TO 1991 STAFF/Project Geologist
NACHANT ENVIRONMENTAL, INC.
Planned, implemented, and managed environmental site investigations and remediation projects following appropriate regulatory and professional guidelines. Prepared and reviewed project cost proposals, correspondence, regulatory permits, assessment and investigation reports, and remedial action plans.

1987 TO 1989 TEACHING ASSISTANT
SAN DIEGO STATE UNIVERSITY – DEPARTMENT OF GEOLOGICAL SCIENCES AND DEPARTMENT OF ENGINEERING

REPRESENTATIVE PROJECTS

Globe Mills, Sacramento CA - Conducted Phase I and Phase II environmental site assessment, evaluated environmental concerns for adaptive reuse project on behalf of Sacramento Housing and Redevelopment Agency. Coordinated regulatory oversight of the project with Sacramento County Environmental Management Division.

K Street Corridor – Sacramento, CA. Evaluated and conducted Phase I environmental site assessments on three block area of downtown Sacramento, as well as a number of individual properties in other areas within the K Street Corridor, on behalf of the City of Sacramento Downtown Development Group.

Southside Garden and Fremont Mews, Sacramento, CA – Conducted Phase I and Phase II environmental site assessments and evaluated environmental concerns on two community garden projects on behalf of the Capitol Area Development Authority. Coordinated regulatory oversight with Sacramento County Environmental Management Division and the State Office of Environmental Health Hazard Assessment. Prepared and evaluated requests for proposals for cleanup contractors and provided remediation oversight and management. Prepared closure documentation and obtained regulatory signoff form both the Southside Garden and Fremont Mews projects.

Electronics Manufacturing Facility/Fueling Depot, Santa Monica, CA. Performed soil and groundwater investigation, feasibility testing and evaluation of fuel hydrocarbon and chlorinated solvent plumes. Prepared RAP with design criteria for soil vapor extraction. After approval of RAP by State regulators, implemented and successfully completed remediation at site, obtaining closure.

Former Aerospace Facility, Santa Ana, CA. Evaluated existing Phase I And Phase II assessments. Performed soil, soil vapor, and groundwater investigations of chlorinated solvent plumes at multiple locations on site. Modeled and evaluated potential plume source areas. Initiated site specific sampling protocol for chlorinated solvents. Negotiated with lead regulatory agency regarding regional contamination issues and site closure requirements.

Major Land Owner/Developer, San Juan Capistrano, CA. Conducted Phase I and Phase II environmental site assessments at multiple sites in southern Orange County. Evaluated potential environmental concerns related to sand & gravel operations, fueling facilities, ordinance testing facilities, aerospace engineering labs, vehicle maintenance and repair facilities, agricultural operations, and illicit dump sites.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of September 15, 2014 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

O2SKY, INC., A CALIFORNIA CORPORATION

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee as to Parcel(s) 1, an easement as to Parcel(s) 2.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2014-2015, a lien not yet due or payable.

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. Water rights, claims or title to water, whether or not shown by the public records.

4. An easement for pole line and conduits and incidental purposes, recorded March 27, 1953 as Book 2477, Page 639 of Official Records.
   In Favor of: General Telephone Company of California
   Affects: a portion of the land

5. The terms and provisions contained in the document entitled "Agreement" executed by and between Security First National Bank of Los Angeles, as Trustee and Standard Oil Company of California recorded as Book 5549, Page 202 of Official Records.

6. The terms and provisions contained in the document entitled "Notice of Intent to Preserve Mineral Rights" recorded January 22, 1985 as Instrument No. 85-022485 of Official Records.

7. An easement for electric utilities and incidental purposes, recorded October 25, 1990 as Instrument No. 90-566822 of Official Records.
In Favor of: Chevron U.S.A., Inc., a Pennsylvania Corporation
Affects: a portion of said land

The terms and provisions contained in the document entitled "Amendment to Utility Easement" recorded March 19, 1996 as Instrument No. 19960134402 of Official Records.

The terms and provisions contained in the document entitled "Second Amendment and Restatement of Utility Easement" recorded May 8, 1996 as Instrument No. 19960229908 of Official Records.

The terms and provisions contained in the document entitled "Quitclaim Deed" recorded December 29, 1999 as Instrument No. 19990875359 of Official Records.

8. An easement for power lines and incidental purposes, recorded April 15, 1996 as Instrument No. 19960185194 of Official Records.
In Favor of: Chevron U.S.A., Inc., a Pennsylvania Corporation
Affects: a portion of the land

The terms and provisions contained in the document entitled "Quitclaim Deed" recorded October 15, 2003 as Instrument No. 2003001271342 of Official Records.

9. The Terms, Provisions and Easement(s) contained in the document entitled "Grant of Airspace Easement" recorded May 08, 1996 as Instrument No. 19960229907 of Official Records.

10. Easements, Covenants and Conditions contained in the deed from Pacific Coast Homes, a California corporation, as Grantor, to PLC, a California general partnership, as Grantee, recorded May 09, 1996 as Instrument No. Instrument No. 19960234761 of Official Records. Reference being made to the document for full particulars.

10A. The terms and provisions contained in the document entitled "Drainage Easement Agreement" recorded November 10, 1997 as Instrument No. 19970571857 of Official Records.

11. An easement shown and dedicated to the City of La Habra on the Map of Tract No. 15030
For: water line and incidental purposes.

12. An easement shown and dedicated to the City of La Habra on the Map of Tract No. 15030
For: storm drain and incidental purposes.

12A. An easement shown and dedicated to the City of La Habra on the Map of Tract No. 15030

For: sanitary sewer and incidental purposes.

12B. An easement to be reserved by the Homeowners Association shown on the Map of Tract No. 15030

For: ingress-egress and incidental purposes.

Note: the above easement will be omitted from our policy of title insurance when issued to the home buying public and their lender provided a new recorded subdivision does not reflect said easement.

12C. An easement to be granted to the Homeowners Association shown on the Map of Tract No. 15030

For: private storm drain and incidental purposes.

Note: the above easement will be omitted from our policy of title insurance when issued to the home buying public and their lender provided a new recorded subdivision does not reflect said easement.

13. The Terms, Provisions and Easement(s) contained in the document entitled "Easement and Maintenance Agreement" recorded September 16, 1998 as Instrument No. 19980620936 of Official Records.

Partial Assignments and Assumptions of duties under said Easement and Maintenance Agreement were recorded June 17, 1999 as Instrument No. 19990453018; January 4, 2000, as Instrument No. 20000003856; March 30, 2000, as Instrument No. 20000162801; March 30, 2000, as Instrument No. 20000162802; August 21, 2000, as Instrument No. 20000434681; and October 5, 2000, as Instrument No. 20000530846, all of Official Records.

14. An easement for public utilities and incidental purposes, recorded November 16, 1998 as Instrument No. 19980775327 of Official Records.

In Favor of:	Southern California Edison Company, a Corporation
Affects:	a portion of the land

15. An easement for public utilities and incidental purposes, recorded February 4, 1999 as Instrument No. 19990082653 of Official Records.

In Favor of:	Southern California Gas Company, a Corporation, its successors and assigns
Affects:	a portion of the land (Note: The exact location of said easement is undetermined by the record.)

16. An easement for operating, maintaining, repairing, and/or replacing the roadway, controlled-access entry gate and facilities and related Improvements and incidental purposes, recorded April 23, 1999 as Instrument No. 19990297497 of Official Records.

In Favor of:	The Westridge Community Association, a California nonprofit Mutual Benefit Corporation
Affects:	a portion of said land

17. Covenants, conditions, restrictions, easements, assessments, liens, charges, terms and provisions in the document recorded August 13, 1999 as Instrument No. 19990593646 of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, sexual orientation, familial status, disability, handicap, national origin, genetic information, gender, gender identity, gender expression, source of income (as defined in California Government Code § 12955(p)) or ancestry, to the extent such covenants, conditions or restrictions violation 42 U.S.C. § 3604(c) or California Government Code § 12955. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

Note: You may wish to contact the homeowners association referred to in the above document for information regarding assessments, transfer requirements or other matters.

18. The terms and provisions contained in the document entitled "Agreement" recorded December 22, 1999 as Instrument No. 19990865848 of Official Records.

19. An easement for construction, installation, operation and maintenance of 12 KV power lines and related equipment, facilities and appurtenant structures and incidental purposes, recorded December 29, 1999 as Instrument No. 19990875360 of Official Records.

In Favor of:	Chevron U.S.A., a Pennsylvania Corporation
Affects:	that portion of said land as more particularly described therein

20. An easement for electrical supply and communication system and incidental purposes, recorded January 28, 2000 as Instrument No. 20000050302 of Official Records.

In Favor of:	Southern California Edison Company, a Corporation
Affects:	that portion of said land as more particularly described therein

21. An easement for water line purposes and incidental purposes, recorded January 4, 2000, as Instrument No. 20000003856; March 30, 2000, as Instrument No. 20000162801; March 30, 2000, as Instrument No. 20000162802; August 21, 2000, as Instrument No. 20000434681; and October 5, 2000, as Instrument No. 20000530846; all of Official Records.

In Favor of:	The Westridge Community Association, a California Nonprofit Mutual Benefit Corporation
Affects:	various portions of said land as described in said documents

22. An easement for slopes and incidental purposes, recorded January 4, 2000, separate property as Instrument No. 20000003856; March 30, 2000, as Instrument No. 20000162801; March 30, 2000, as Instrument No. 20000162802; August 21, 2000, as Instrument No. 20000434681; and October 5, 2000, as Instrument No. 20000530846; all of Official Records.

In Favor of:	The Westridge Community Association, a California Nonprofit Mutual Benefit Corporation
Affects:	various portions of said land as described in said documents

22A. An easement for water line and incidental purposes, recorded February 15, 2000 as Instrument No. 2000082145 of Official Records.

In Favor of:	the City of La Habra, a Municipal corporation
Affects:	Portion of said land

23. The terms and provisions contained in the document entitled "Agreement Between Adjacent Property Owners" executed by and between Leo David, a married man as his sole and separate property, R. Scott Bell, a married man as his sole and separate property, Dan Wojkowski, a married man as his sole and separate property and Los Angeles Habra Westridge Partners, L.P., a California Limited Partnership and Westridge Golf Club, a California limited liability company recorded June 29, 2001 as Instrument No. 20010436940 of Official Records.

24. The Terms, Provisions and Easement(s) contained in the document entitled "Sewer Line and Storm Drain Easement" recorded November 10, 2003 as Instrument No. 2003001372733 of Official Records.

    Affects: Parcel 2

25. Any facts, rights, interests or claims that may exist or arise by reason of matters, if any, disclosed by that certain Record of Survey filed October 19, 2005 in book 209, page(s) 4 to 10, inclusive .

26. An easement for wall and slope anchorage and incidental purposes, recorded October 29, 2007 as Instrument No. 2007000654859 of Official Records.

In Favor of:	City of La Habra
Affects:	said land more particularly described therein

27. A deed of trust to secure an original indebtedness of $9,200,000.00 recorded June 30, 2009 as Instrument No. 2009000342969 of Official Records.

Dated:	June 26, 2009
Trustor:	Westridge Golf, Inc., a California Corporation, as to an undivided 75% interest and KMC Property, LLC, a California limited liability company, as to an undivided 25% interest
Trustee:	Chicago Title Company
Beneficiary:	Nara Bank

    A document recorded November 27, 2013 as Instrument No. 2013000649291 of Official Records provides that the deed of trust or the obligation secured thereby has been modified.

28. A document entitled "Assignment of Leases and Rents" recorded June 30, 2009 as Instrument No. 2009000342970 of Official Records, as additional security for the payment of the indebtedness secured by the deed of trust recorded June 30, 2009 as Instrument No. 2009000342969 of Official Records.

29. The terms and provisions contained in the document entitled "Hazardous Substances Certificate and Indemnity Agreement" recorded June 30, 2009 as Instrument No. 2009000342971 of Official Records.

30. A deed of trust to secure an original indebtedness of $610,000.00 recorded June 30, 2009 as Instrument No. 2009000342972 of Official Records.

Dated:	June 26, 2009
Trustor:	Westridge Golf, Inc., a California Corporation, as to an undivided 75% interest and KMC Property, LLC, a California limited liability company, as to an undivided 25% interest
Trustee:	Chicago Title Company
Beneficiary:	Nara Bank

Said deed of trust recites that it is subordinate to the trust deed recorded concurrently therewith.

A document recorded January 31, 2012 as Instrument No. 2012000055340 of Official Records provides that BBCN Bank was substituted as trustee under the deed of trust.

The effect of a full reconveyance recorded January 31, 2012 as Instrument No. 2012000055341 of Official Records, which purports to reconvey the above-mentioned Deed of Trust.

No statement is made hereto as to the effect or validity of said reconveyance.

The requirement that this Company be furnished with confirmation from the lender that the Deed of Trust has been released prior to issuance of a policy of title insurance.

31. A document entitled "Assignment of Leases and Rents" recorded June 30, 2009 as Instrument No. 2009000342973 of Official Records, as additional security for the payment of the indebtedness secured by the deed of trust recorded June 30, 2009 as Instrument No. 2009000342972 of Official Records.

32. The terms and provisions contained in the document entitled "Hazardous Substances Certificate and Indemnity Agreement" recorded June 30, 2009 as Instrument No. 2009000342974 of Official Records.

33. Covenants, conditions, restrictions and easements in the document recorded November 25, 2009 as Instrument No. 2009000638650 of Official Records, but deleting any covenant, condition, or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, sexual orientation, familial status, disability, handicap, national origin, genetic information, gender, gender identity, gender expression, source of income (as defined in California Government Code § 12955(p)) or ancestry, to the extent such covenants, conditions or restrictions violation 42 U.S.C. § 3604(c) or California Government Code § 12955. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

34. A certified copy of a judgment or an abstract thereof, recorded December 8, 2011 as Instrument No. 2011000640271 of Official Records.

Court:	Superior
Case No.:	30-2011-00447611
Debtor:	Soo Kwon
Creditor:	Mid Century Insurance Exchange
Amount:	$6,680.31, and any other amounts due thereunder.

35. A certified copy of a judgment or an abstract thereof, recorded November 7, 2012 as Instrument No. 2012000685738 of Official Records.

Court:	Superior
Case No.:	30-2012-00535417-CL-CL-NJC
Debtor:	Young Kwon, individually and dba Finewell Foods, Inc.
Creditor:	CACH, LLC
Amount:	$13,192.53, and any other amounts due thereunder.

Prior to the issuance of any policy of title insurance, the Company will require:

36. With respect to O2Sky, Inc., a California corporation, a California corporation:
a. A certificate of good standing of recent date issued by the Secretary of State of the corporation's state of domicile.
b. A certified copy of a resolution of the Board of Directors authorizing the contemplated transaction and designating which corporate officers shall have the power to execute on behalf of the corporation.
c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   (a) building;
   (b) zoning;
   (c) land use;
   (d) improvements on the Land;
   (e) land division; and
   (f) environmental protection.

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   (a) that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   (b) that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   (c) that result in no loss to You; or
   (d) that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   (a) to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   (b) in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows: For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

Your Deductible Amount	**Our Maximum Dollar Limit of Liability**
Covered Risk 16: 1% of Policy Amount or $2,500.00 (whichever is less)	$10,000.00
Covered Risk 18: 1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19: 1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21: 1% of Policy Amount or $2,500.00 (whichever is less)	$5,000.00

ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)
EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   (a) and use
   (b) improvements on the land
   (c) and division
   (d) environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.

This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.

2. The right to take the land by condemning it, unless:
   (a) a notice of exercising the right appears in the public records on the Policy Date
   (b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking
3. Title Risks:
   (a) that are created, allowed, or agreed to by you
   (b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
   (c) that result in no loss to you
   (d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
   (a) to any land outside the area specifically described and referred to in Item 3 of Schedule A OR
   (b) in streets, alleys, or waterways that touch your land
   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;

   (ii) the character, dimensions, or location of any improvement erected on the Land;

   (iii) the subdivision of land; or

   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters

   (a) created, suffered, assumed, or agreed to by the Insured Claimant;

   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

   (c) resulting in no loss or damage to the Insured Claimant;

   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or

   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is

   (a) a fraudulent conveyance or fraudulent transfer, or

   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;

   (ii) the character, dimensions, or location of any improvement erected on the Land;

   (iii) the subdivision of land; or

   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters

   (a) created, suffered, assumed, or agreed to by the Insured Claimant;

   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

   (c) resulting in no loss or damage to the Insured Claimant;

   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or

   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is

   (a) a fraudulent conveyance or fraudulent transfer, or

   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

First American Title

Privacy Information

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet.
In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site.
There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

Business Relationships

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

Cookies

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive.
FirstAm.com uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

Fair Information Values

Fairness We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.
Public Record We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.
Use We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.
Accuracy We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.
Education We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.
Security We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

HAZARDOUS SUBSTANCES CERTIFICATE AND INDEMNITY AGREEMENT

THIS HAZARDOUS SUBSTANCES AGREEMENT dated June 26, 2009, is made and executed among WESTRIDGE GOLF, INC., whose address is 1400 S. LA HABRA HILLS DR., LA HABRA, CA 90631 and KMC PROPERTY, LLC., whose address is 1400 S. LA HABRA HILLS DR., LA HABRA, CA 90631 (sometimes referred to below as "Borrower" and sometimes as "Indemnitor"); and Nara Bank, Downtown Office, 3731 Wilshire Blvd. #400, Los Angeles, CA 90010 (referred to below as "Lender"). For good and valuable consideration and to induce Lender to make a loan to Borrower, each party executing this Agreement hereby represents and agrees with Lender as follows:

PROPERTY DESCRIPTION. The word "Property" as used in this Agreement means the following Real Property located in ORANGE County, State of California:

See EXHIBIT "A", which is attached to this Agreement and made a part of this Agreement as if fully set forth herein.

The Real Property or its address is commonly known as 1400 SOUTH LA HABRA HILLS DRIVE, LA HABRA, CA 90631. The Assessor's Parcel Number for the Real Property is 019-481-04.

REPRESENTATIONS. The following representations are made to Lender, subject to disclosures made and accepted by Lender in writing:

Use of Property. After due inquiry and investigation, Indemnitor has no knowledge, or reason to believe, that there has been any use, generation, manufacture, storage, treatment, refinement, transportation, disposal, release, or threatened release of any Hazardous Substances by any person on, under, or about the Property.

Hazardous Substances. After due inquiry and investigation, Indemnitor has no knowledge, or reason to believe, that the Property, whenever and whether owned by previous Occupants, has ever contained asbestos, PCBs, lead paints or other Hazardous Substances, whether used in construction or stored on the Property.

No Notices. Indemnitor has received no summons, citation, directive, letter or other communication, written or oral, from any agency or department of any county or state or the U.S. Government concerning any intentional or unintentional action or omission on, under, or about the Property which has resulted in the releasing, spilling, leaking, pumping, pouring, emitting, emptying or dumping of Hazardous Substances into any waters, ambient air or onto any lands or where damage may have resulted to the lands, waters, fish, shellfish, wildlife, biota, air or other natural resources.

AFFIRMATIVE COVENANTS. Indemnitor covenants with Lender as follows:

Use of Property. Indemnitor will not use and does not intend to use the Property to generate, manufacture, refine, transport, treat, store, handle or dispose of any Hazardous Substances, PCBs, lead paint or asbestos.

Compliance with Environmental Laws. Indemnitor shall cause the Property and the operations conducted on it to comply with any and all Environmental Laws and orders of any governmental authorities having jurisdiction under any Environmental Laws and shall obtain, keep in effect and comply with all governmental permits and authorizations required by Environmental Laws with respect to such Property or operations. Indemnitor shall furnish Lender with copies of all such permits and authorizations and any amendments or renewals of them and shall notify Lender of any expiration or revocation of such permits or authorizations.

Preventive, Investigatory and Remedial Action. Indemnitor shall exercise extreme care in handling Hazardous Substances if Indemnitor uses or encounters any. Indemnitor, at Indemnitor's expense, shall undertake any and all preventive, investigatory or remedial action (including emergency response, removal, containment and other remedial action) (a) required by any applicable Environmental Laws or orders by any governmental authority having jurisdiction under Environmental Laws, or (b) necessary to prevent or minimize property damage (including damage to Occupant's own property), personal injury or damage to the environment, or the threat of any such damage or injury, by releases of or exposure to Hazardous Substances in connection with the Property or operations of any Occupant on the Property. In the event Indemnitor fails to perform any of Indemnitor's obligations under this section of the Agreement, Lender may (but shall not be required to) perform such obligations at Indemnitor's expense. All such costs and expenses incurred by Lender under this section and otherwise under this Agreement shall be reimbursed by Indemnitor to Lender upon demand with interest at the Note default rate, or in the absence of a default rate, at the Note interest rate. Lender and Indemnitor intend that Lender shall have full recourse to Indemnitor for any sum at any time due to Lender under this Agreement. In performing any such obligations of Indemnitor, Lender shall at all times be deemed to be the agent of Indemnitor and shall not by reason of such performance be deemed to be assuming any responsibility of Indemnitor under any Environmental Law or to any third party. Indemnitor hereby irrevocably

appoints Lender as Indemnitor's attorney-in-fact with full power to perform such of Indemnitor's obligations under this section of the Agreement as Lender deems necessary and appropriate.

Notices. Indemnitor shall immediately notify Lender upon becoming aware of any of the following:

(1) Any spill, release or disposal of a Hazardous Substance on any of the Property, or in connection with any of its operations if such spill, release or disposal must be reported to any governmental authority under applicable Environmental Laws.

(2) Any contamination, or imminent threat of contamination, of the Property by Hazardous Substances, or any violation of Environmental Laws in connection with the Property or the operations conducted on the Property.

(3) Any order, notice of violation, fine or penalty or other similar action by any governmental authority relating to Hazardous Substances or Environmental Laws and the Property or the operations conducted on the Property.

(4) Any judicial or administrative investigation or proceeding relating to Hazardous Substances or Environmental Laws and to the Property or the operations conducted on the Property.

(5) Any matters relating to Hazardous Substances or Environmental Laws that would give a reasonably prudent Lender cause to be concerned that the value of Lender's security interest in the Property may be reduced or threatened or that may impair, or threaten to impair, Indemnitor's ability to perform any of its obligations under this Agreement when such performance is due.

Access to Records. Indemnitor shall deliver to Lender, at Lender's request, copies of any and all documents in Indemnitor's possession or to which it has access relating to Hazardous Substances or Environmental Laws and the Property and the operations conducted on the Property, including without limitation results of laboratory analyses, site assessments or studies, environmental audit reports and other consultants' studies and reports.

Inspections. Lender reserves the right to inspect and investigate the Property and operations on it at any time and from time to time, and Indemnitor shall cooperate fully with Lender in such inspection and investigations. If Lender at any time has reason to believe that Indemnitor or any Occupants of the Property are not complying with all applicable Environmental Laws or with the requirements of this Agreement or that a material spill, release or disposal of Hazardous Substances has occurred on or under the Property, Lender may require Indemnitor to furnish Lender at Indemnitor's expense an environmental audit or a site assessment with respect to the matters of concern to Lender. Such audit or assessment shall be performed by a qualified consultant approved by Lender. Any inspections or tests made by Lender shall be for Lender's purposes only and shall not be construed to create any responsibility or liability on the part of Lender to any Indemnitor or to any other person.

INDEMNITOR'S WAIVER AND INDEMNIFICATION. Indemnitor hereby agrees to and shall indemnify, defend, and hold harmless Lender and Lender's officers, directors, employees and agents, and Lender's successors and assigns and their officers, directors, employees and agents from and against any and all claims, demands, losses, liabilities, costs, fines, penalties and expenses (including without limitation attorneys' fees at trial and on any appeal or petition for review, consultants' fees, remedial action costs, natural resource damages and diminution in value) incurred by such person (a) arising out of or relating to any investigatory or remedial action involving the Property, the operations conducted on the Property, or any other operations of Indemnitor or any Occupant and required by Environmental Laws or by orders of any governmental authority having jurisdiction under any Environmental Laws, including without limitation any natural resource damages, or (b) arising out of or related to any noncompliance with or violation of Environmental Laws or any applicable permits or approvals, or (c) on account of injury to Lender or any person whatsoever or damage to any property arising out of, in connection with, or in any way relating to (i) the breach of any covenant, representation or warranty contained in this Agreement, (ii) the violation of any Environmental Laws, permits, authorizations or approvals, (iii) the use, treatment, storage, generation, manufacture, transport, release, spill, disposal or other handling of Hazardous Substances on the Property, or (iv) the contamination of any of the Property by, or the presence, release or threatened release of, Hazardous Substances by any means whatsoever (explicitly including without limitation any presently existing contamination of the Property, whether or not previously disclosed to Lender), or (d) pursuant to this Agreement. Indemnitor's obligations under this section shall survive the termination of this Agreement and as set forth below in the Survival section. In addition to this indemnity, Indemnitor hereby releases and waives all present and future claims against Lender for indemnity or contribution in the event Indemnitor becomes liable for cleanup or other costs under any Environmental Laws.

PAYMENT: FULL RECOURSE TO INDEMNITOR. Indemnitor intends that Lender shall have full recourse to Indemnitor for Indemnitor's obligations under this Agreement as they become due to Lender. Such liabilities, losses, claims, damages and expenses shall be reimbursable to Lender as Lender's obligations to make payments with respect thereto are incurred, without any requirement of waiting for the ultimate outcome of any litigation, claim or other proceeding, and Indemnitor shall pay such liability, losses, claims, damages and expenses to Lender as so incurred within thirty (30) days after written notice from Lender. Lender's notice shall contain a brief itemization of the amounts incurred to the date of such notice. In addition to any remedy available for failure to pay periodically such amounts, such amounts shall thereafter bear interest at the Note default rate, or in the absence of a default rate, at the Note interest rate.

SURVIVAL. The covenants contained in this Agreement shall survive (A) the repayment of the Indebtedness, (B) any foreclosure, whether judicial or nonjudicial, of the Property, and (C) any delivery of a deed in lieu of foreclosure to Lender or any successor of Lender. The covenants contained in this Agreement shall be for the benefit of Lender and any successor to Lender, as holder of any security interest in the Property or the indebtedness secured thereby, or as owner of the Property following foreclosure or the delivery of a deed in lieu of foreclosure.

MISCELLANEOUS PROVISIONS. The following miscellaneous provisions are a part of this Agreement:

Amendments. This Agreement, together with any Related Documents, constitutes the entire understanding and agreement of the parties as to the matters set forth in this Agreement. No alteration of or amendment to this Agreement shall be effective unless given in writing and signed by the party or parties sought to be charged or bound by the alteration or amendment.

Attorneys' Fees; Expenses. If Lender institutes any suit or action to enforce any of the terms of this Agreement, Lender shall be entitled to recover such sum as the court may adjudge reasonable as attorneys' fees at trial and upon any appeal. Whether or not any court action is involved, and to the extent not prohibited by law, all reasonable expenses Lender incurs that in Lender's opinion are necessary at any time for the protection of its interest or the enforcement of its rights shall become a part of the Indebtedness payable on demand and shall bear interest at the Note rate from the date of the expenditure until repaid. Expenses covered by this paragraph

include, without limitation, however subject to any limits under applicable law, Lender's attorneys' fees and Lender's legal expenses, whether or not there is a lawsuit, including attorneys' fees and expenses for bankruptcy proceedings (including efforts to modify or vacate any automatic stay or injunction), appeals, and any anticipated post-judgment collection services, the cost of searching records, obtaining title reports (including foreclosure reports), surveyors' reports, and appraisal fees and title insurance, to the extent permitted by applicable law. Indemnitor also will pay any court costs, in addition to all other sums provided by law.

Caption Headings. Caption headings in this Agreement are for convenience purposes only and are not to be used to interpret or define the provisions of this Agreement.

Governing Law. This Agreement will be governed by federal law applicable to Lender and, to the extent not preempted by federal law, the laws of the State of California without regard to its conflicts of law provisions. This Agreement has been accepted by Lender in the State of California.

Choice of Venue. If there is a lawsuit, Indemnitor agrees upon Lender's request to submit to the jurisdiction of the courts of Los Angeles County, State of California.

Joint and Several Liability. All obligations of Indemnitor under this Agreement shall be joint and several, and all references to Indemnitor shall mean each and every Indemnitor. This means that each Indemnitor signing below is responsible for all obligations in this Agreement.

No Waiver by Lender. Lender shall not be deemed to have waived any rights under this Agreement unless such waiver is given in writing and signed by Lender. No delay or omission on the part of Lender in exercising any right shall operate as a waiver of such right or any other right. A waiver by Lender of a provision of this Agreement shall not prejudice or constitute a waiver of Lender's right otherwise to demand strict compliance with that provision or any other provision of this Agreement. No prior waiver by Lender, nor any course of dealing between Lender and Indemnitor, shall constitute a waiver of any of Lender's rights or of any of Indemnitor's obligations as to any future transactions. Whenever the consent of Lender is required under this Agreement, the granting of such consent by Lender in any instance shall not constitute continuing consent to subsequent instances where such consent is required and in all cases such consent may be granted or withheld in the sole discretion of Lender. Indemnitor hereby waives notice of acceptance of this Agreement by Lender.

Notices. Any notice required to be given under this Agreement shall be given in writing, and shall be effective when actually delivered, when actually received by telefacsimile (unless otherwise required by law), when deposited with a nationally recognized overnight courier, or, if mailed, when deposited in the United States mail, as first class, certified or registered mail postage prepaid, directed to the addresses shown near the beginning of this Agreement. Any party may change its address for notices under this Agreement by giving formal written notice to the other parties, specifying that the purpose of the notice is to change the party's address. For notice purposes, Indemnitor agrees to keep Lender informed at all times of Indemnitor's current address. Unless otherwise provided or required by law, if there is more than one Indemnitor, any notice given by Lender to any Indemnitor is deemed to be notice given to all Indemnitors.

Severability. If a court of competent jurisdiction finds any provision of this Agreement to be illegal, invalid, or unenforceable as to any circumstance, that finding shall not make the offending provision illegal, invalid, or unenforceable as to any other circumstance. If feasible, the offending provision shall be considered modified so that it becomes legal, valid and enforceable. If the offending provision cannot be so modified, it shall be considered deleted from this Agreement. Unless otherwise required by law, the illegality, invalidity, or unenforceability of any provision of this Agreement shall not affect the legality, validity or enforceability of any other provision of this Agreement.

Successors and Assigns. Subject to any limitations stated in this Agreement on transfer of Indemnitor's interest, this Agreement shall be binding upon and inure to the benefit of the parties, their successors and assigns. If ownership of the Property becomes vested in a person other than Indemnitor, Lender, without notice to Indemnitor, may deal with Indemnitor's successors with reference to this Agreement and the Indebtedness by way of forbearance or extension without releasing Indemnitor from the obligations of this Agreement or liability under the Indebtedness.

Time is of the Essence. Time is of the essence in the performance of this Agreement.

DEFINITIONS. The following capitalized words and terms shall have the following meanings when used in this Agreement. Unless specifically stated to the contrary, all references to dollar amounts shall mean amounts in lawful money of the United States of America. Words and terms used in the singular shall include the plural, and the plural shall include the singular, as the context may require. Words and terms not otherwise defined in this Agreement shall have the meanings attributed to such terms in the Uniform Commercial Code:

Agreement. The word "Agreement" means this Hazardous Substances Agreement, as this Hazardous Substances Agreement may be amended or modified from time to time, together with all exhibits and schedules attached to this Hazardous Substances Agreement from time to time.

Environmental Laws. The words "Environmental Laws" mean any and all state, federal and local statutes, regulations and ordinances relating to the protection of human health or the environment, including without limitation the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, 42 U.S.C. Section 9601, et seq. ("CERCLA"), the Superfund Amendments and Reauthorization Act of 1986, Pub. L. No. 99-499 ("SARA"), the Hazardous Materials Transportation Act, 49 U.S.C. Section 1801, et seq., the Resource Conservation and Recovery Act, 42 U.S.C. Section 6901, et seq., Chapters 6.5 through 7.7 of Division 20 of the California Health and Safety Code, Section 25100, et seq., or other applicable state or federal laws, rules, or regulations adopted pursuant thereto.

Hazardous Substances. The words "Hazardous Substances" mean materials that, because of their quantity, concentration or physical, chemical or infectious characteristics, may cause or pose a present or potential hazard to human health or the environment when improperly used, treated, stored, disposed of, generated, manufactured, transported or otherwise handled. The words "Hazardous Substances" are used in their very broadest sense and include without limitation any and all hazardous or toxic substances, materials or waste as defined by or listed under the Environmental Laws. The term "Hazardous Substances" also includes, without limitation, petroleum and petroleum by-products or any fraction thereof and asbestos.

Indebtedness. The word "Indebtedness" means all principal, interest, and other amounts, costs and expenses payable under the Note or Related Documents, together with all renewals of, extensions of, modifications of, consolidations of and substitutions for the Note or Related Documents and any amounts expended or advanced by Lender to discharge Indemnitor's obligations or expenses incurred by Lender to enforce Indemnitor's obligations under this Agreement, together with interest on such amounts as provided in this Agreement.

Lender. The word "Lender" means Nara Bank, its successors and assigns.

Note. The word "Note" means the Note executed by WESTRIDGE GOLF, INC.; and KMC PROPERTY, LLC. in the principal amount of $9,200,000.00 dated June 26, 2009, together with all renewals of, extensions of, modifications of, refinancings of, consolidations of, and substitutions for the note or credit agreement.

Occupant. The word "Occupant" means individually and collectively all persons or entities occupying or utilizing the Property, whether as owner, tenant, operator or other occupant.

Property. The word "Property" means all of Indemnitor's right, title and interest in and to all the Property as described in the "Property Description" section of this Agreement.

Real Property. The words "Real Property" mean the real property, interests and rights, as further described in this Agreement.

Related Documents. The words "Related Documents" mean all promissory notes, credit agreements, loan agreements, environmental agreements, security agreements, mortgages, deeds of trust, security deeds, collateral mortgages, and all other instruments, agreements and documents, whether now or hereafter existing, executed in connection with the Indebtedness.

EACH PARTY TO THIS AGREEMENT ACKNOWLEDGES HAVING READ ALL THE PROVISIONS OF THIS AGREEMENT, AND EACH AGREES TO ITS TERMS. NO FORMAL ACCEPTANCE BY LENDER IS NECESSARY TO MAKE THIS AGREEMENT EFFECTIVE. THIS AGREEMENT IS DATED JUNE 26, 2009.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

INSTRUCTIONS FOR COMPLETING THIS FORM

This form complies with current California statutes regarding notary wording and, if needed, should be completed and attached to the document. Acknolwedgents from other states may be completed for documents being sent to that state so long as the wording does not require the California notary to violate California notary law.

- State and County information must be the State and County where the document signer(s) personally appeared before the notary public for acknowledgment.
- Date of notarization must be the date that the signer(s) personally appeared which must also be the same date the acknowledgment is completed.
- The notary public must print his or her name as it appears within his or her commission followed by a comma and then your title (notary public).
- Print the name(s) of document signer(s) who personally appear at the time of notarization.
- Indicate the correct singular or plural forms by crossing off incorrect forms (i.e. ~~he~~/she/~~they,~~ is /~~are~~) or circling the correct forms. Failure to correctly indicate this information may lead to rejection of document recording.
- The notary seal impression must be clear and photographically reproducible. Impression must not cover text or lines. If seal impression smudges, re-seal if a sufficient area permits, otherwise complete a different acknowledgment form.
- Signature of the notary public must match the signature on file with the office of the county clerk.
  - ❖ Additional information is not required but could help to ensure this acknowledgment is not misused or attached to a different document.
  - ❖ Indicate title or type of attached document, number of pages and date.
  - ❖ Indicate the capacity claimed by the signer. If the claimed capacity is a corporate officer, indicate the title (i.e. CEO, CFO, Secretary).
- Securely attach this document to the signed document with a staple.

EXHIBIT "A"

DESCRIPTION

PARCEL 1:

LOT 232 OF TRACT NO. 15030, IN THE CITY OF LA HABRA, COUNTY OF ORANGE, STATE OF CALIFORNIA, ON FILE IN BOOK 766, PAGE(S) 20 THROUGH 34 OF MAPS, RECORDS OF SAID COUNTY.

EXCEPT THEREFROM THAT PORTION OF SAID LOT 232, WHICH LIES NORTHEASTERLY OF THE FOLLOWING DESCRIBED LINE:

COMMENCING AT THE NORTHEASTERLY TERMINUS OF THAT CERTAIN COURSE IN THE BOUNDARY OF SAID LOT HAVING A BEARING OF NORTH 45° 06' 45" EAST AND A DISTANCE OF 1063.70 FEET, SAID COURSE ALSO BEING THE SOUTHEASTERLY RIGHT-OF-WAY LINE OF BEACH BOULEVARD AS SHOWN ON SAID MAP; THENCE ALONG SAID LINE SOUTH 45° 06' 45" WEST 38.75 FEET TO THE TRUE POINT OF BEGINNING OF THE LINE HEREIN DESCRIBED; THENCE TRAVERSING THE INTERIOR OF SAID LOT 232, SOUTH 44° 50' 20" EAST 181.91 FEET; THENCE SOUTH 82° 57' 35" EAST 63.84 FEET TO THE INTERSECTION WITH THAT CERTAIN COURSE IN THE BOUNDARY OF SAID LOT 232 HAVING A BEARING OF NORTH 45° 00' 05" WEST AND A DISTANCE OF 312.54 FEET.

ALSO EXCEPTING THEREFROM ALL OIL, GAS AND OTHER HYDROCARBONS, NON-HYDROCARBON GASES OR GASEOUS SUBSTANCES, ALL GEOTHERMAL RESOURCES AS DEFINED IN SECTION 6903 OF THE CALIFORNIA PUBLIC RESOURCES CODE, AND ALL OTHER MINERALS WHETHER SIMILAR TO THOSE HEREIN SPECIFIED OR NOT, WITHIN OR THAT MAY BE PRODUCED FROM THE PROPERTY, AS RESERVED IN DEED RECORDED OCTOBER 25, 1990 AS INSTRUMENT NO. 90-566821 OF OFFICIAL RECORDS.

ALSO EXCEPTING THEREFROM THE SOLE AND EXCLUSIVE RIGHT FROM TIME TO TIME TO BORE OR DRILL AND MAINTAIN WELLS OR OTHER WORKS INTO OR THROUGH THE PROPERTY AND THE ADJOINING STREETS, ROADS AND HIGHWAYS BELOW A DEPTH OF FIVE HUNDRED (500) FEET FROM THE SURFACE THEREOF FOR THE PURPOSE OF EXPLORING FOR AND PRODUCING ENERGY RESOURCES; AND THE RIGHT TO PRODUCE, INJECT, STORE AND REMOVE FROM AND THROUGH SAID BORES, WELLS OR WORKS, OIL, GAS, WATER AND OTHER SUBSTANCES OF WHATEVER NATURE, INCLUDING THE RIGHT TO PERFORM BELOW SAID DEPTH ANY AND ALL OPERATIONS NECESSARY OR CONVENIENT FOR THE EXERCISE OF SUCH RIGHTS, WITHOUT, HOWEVER, ANY RIGHT TO USE THE SURFACE OF THE PROPERTY OR FOR THE FIRST FIVE HUNDRED (500) FEET BELOW SAID SURFACE OR TO CONDUCT ANY OPERATIONS THEREON OR THEREIN, AS RESERVED IN DEED RECORDED OCTOBER 25, 1990 AS INSTRUMENT NO. 90-566821, OFFICIAL RECORDS.

PARCEL 2:

A NON-EXCLUSIVE EASEMENT FOR STORM DRAIN AND SEWER LINE INSTALLATION AND MAINTENANCE PURPOSES OVER, ACROSS AND THROUGH THAT PORTION OF LOT 232 AS SHOWN ON A MAP OF TRACT NO. 15030, IN THE CITY OF LA HABRA, COUNTY OF ORANGE, STATE OF CALIFORNIA, FILED IN BOOK 766 AT PAGES 20 THROUGH 34, INCLUSIVE OF MISCELLANEOUS MAPS, RECORDS OF SAID COUNTY AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT A POINT ON THE SOUTHEASTERLY RIGHT OF WAY OF BEACH BOULEVARD, 142 FEET WIDE AS SHOWN ON SAID MAP, SAID POINT BEING THE MOST WESTERLY CORNER OF PARCEL 2 AS SHOWN ON A MAP OF PARCEL MAP NO. 2000-140, FILED IN BOOK 325 AT PAGES 7 THROUGH 19, INCLUSIVE, OF PARCEL MAPS, RECORDS OF SAID COUNTY; THENCE ALONG SAID RIGHT OF WAY LINE, SOUTH 45° 06' 45" WEST, A DISTANCE OF 24.89 FEET TO THE TRUE POINT OF BEGINNING OF THE PARCEL HEREIN DESCRIBED; THENCE LEAVING SAID LINE AND TRAVERSING THE INTERIOR OF SAID LOT 232, SOUTH 44° 59' 32" EAST, 200.27 FEET; THENCE NORTH 82° 57' 35" WEST,

DESCRIPTION

23.32 FEET; THENCE NORTH 44° 50′ 20" WEST, 181.91 FEET TO SAID RIGHT OF WAY LINE; THENCE ALONG SAID LINE NORTH 45° 06′ 45" EAST, 13.86 FEET TO THE TRUE POINT OF BEGINNING.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Year	*Target Street*	*Cross Street*	*Source*

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EEI, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 1CB7-43A1-BB1F

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/30/2015 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Federal CERCLIS NFRAP site list

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERCLIS-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 11/07/2015 has revealed that there are 4 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
Not reported	1390 S BEACH BLVD	NW 0 - 1/8 (0.099 mi.)	E24	87

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
Not reported	1361 W HARRISON AVE	ESE 0 - 1/8 (0.064 mi.)	19	63

Summary Details:

Conditions at listing December 1982): The McColl Site is an inactive waste disposal facility covering 8 acres in Fullerton, Orange County, California. The site consists of two distinct areas: 1) the Ramparts, which is in the eastern portion of the site and is surrounded by developed property and residences and 2) the Los Coyotes Area, which is in the western portion and underlies a part of the Los Coyotes Country Club Golf Course. About 200,000 cubic yards of wastes, primarily oil refinery acid sludge and oil field drilling muds, are on-site. The sludge was placed in sumps and covered with drilling muds and other fill materials. The major portion of wastes is acidic and contains sulfur and hydrocarbons. Thewastes have reacted to produce a mixture of complex organic and sulfur-containing compounds, some of which are gases. The odors from some of the gases are easily detected by nearby residents. There is a potential for direct contact with the wastes and for contamination of surface water and ground water. In October 1981, EPA, the State, and potentially responsible parties agreed on a three-phase cleanup plan: Phase I, a complete site investigation; Phase II, a development andevaluation of remedial alternatives; and Phase III, cleanup of the site. Phases I and II have been completed, and excavation of the site has been determined to be the most cost-effective remedy. Status July 1983): Phase III is scheduledto begin in October 1983. The State and EPA are entering into negotiations with potentially responsible parties to compel them to pay for or participate in the remedial action. If negotiations are not successful or timely, the State plans toapply for Federal funding and enter into a Cooperative Agreement with EPA.

Alias Comments: PREVIOUS EPA ID# AZD 981 416 977
Site Description: The McColl Superfund Site (the "Site") is located in Orange County, California on the northwest edge of the City of Fullerton closely bordering the City of Buena Park. The 22 acre Site was the location of 12 disposal pits operated by Eli McColl from 1942 to 1946. During the operation of the disposal pits various oil refining companies disposed of refinery waste, predominantly spent sulfuric acid catalyst sludge. The waste at the site has transformed over time to a predominantly hard black (asphaltic) waste with smaller volumes of viscous waste, contaminated drilling mud, and soils. The hard and viscous waste is characterized as having a low pH, high sulfur content, high concentrations of organic sulfur compounds, aromatic hydrocarbons and aliphatic hydrocarbons. The Los Coyotes Country Club Golf Course was built in 1956/1957, with a portion of the course overlying the covered waste sump area referred to as the Los Coyotes area. That portion of the golf course is currently closed. The McAuley LCX Corporation purchased the Los coyotes Country Club in December 1980. The Ramparts area of the site was never developed. A housing tract borders the site immediately to the east and southeast. The Ralph B. Clark Regional (County) Park is adjacent to the west of the site boundary. The southern boundary of the site is the Los Coyotes golf course. The northern boundary is Rosecrans Avenue. All of the sumps are currently covered by overburden of varying thickness. Surface water flows from the upper reaches of the hills across the site from north to south. The largest of these drainage areas runs from the West Coyote Hills area to the north, into a drainage channel under Rosecrans and onto the site. Once onsite, this channel drains to the low-lying area to the north and west of the Los Coyotes waste pit area. Surface water from the Ramparts portion of the site and the eastern side of the Los Coyotes waste pits drains into a channel at the boundary of the southeastern portion of site and then into the regional surface water collection system. Groundwater near the site is not currently used for public water supply. The nearest municipal well (Coyote Well 12A) is located at the corner of Gilbert and Pioneer, 3,000 feet crossgradient from the site. The regional hydrology consists of the near-surface sediment of the Pleistocene La Habra Formation. Beneath the relatively fine-grained La Habra Formation sediments are the coarser sandy gravels and gravely sands of the Coyote Hills Formation. The sedimentary units dip approximately 10 degrees to the southwest. Groundwater beneath the site is found in multiple shallow perched units and in the regional aquifer approximately 160 to 200 feet below the Site ground surface. The shallow perched units have been designated during the Remedial Investigation alphabetically from the shallowest to the deepest. The McColl Superfund Site served from 1942-1946 as a petroleum refinery waste disposal area. Approximately 72,600 cubic yards of waste were deposited in twelve pits or sumps at the Site and covered with fill. Waste seeps which developed at the surface of the Site in the late 1970s resulted in complaints from nearby residents about odors and potential health impacts. The Site was listed on the EPA National Priorities List (NPL) in September 1982.

MCCOLL (Continued) **1000333926**

This OU01 ROD addresses the source of contamination at the McColl site. An additional investigation is being conducted for groundwater. A Record of Decision addressing OU01 of the McColl Site was completed in April, 1984. The Source Operable Unit Record of Decision (ROD) was signed in 1993 which resulted in the implementation of a contingency remedy: closure through placement of a Resourced Conservation and Recovery Act (RCRA)-equivalent cap and installation of a gas collection and treatment system. The Groundwater Operable Unit ROD was signed on May 9, 1996. This Explanation of Significant Difference (ESD), completed in September of 2005, amends the Groundwater Operable Unit ROD.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 10/15/1997
Comments: The O & M phase began in November 1997 with completion of construction of the RCRA equivalent cap and slurry wall containment system and infiltration controls that comprised the CERCLA remedy. An O and M agreement between U.S. EPA and the oil companies who were identified as Responsible Parties for the McColl site was developed at this time. It has been updated periodically as conditions at the site have changed, requiring fine tuning of the O & M regime.

Background Info:	(RCRA) - equivalent cap and slurry wall containment system as a contingency remedy in the case that solidification of the wastes in place was not found to be feasible. In September 1995, U.S. EPA made the determination that solidification was not technically feasible and made the decision to move forward with the contingency remedy. U.S. EPA subsequently issued the Record of Decision (ROD) for the Source Operable Unit (Source OU) specifying implementation of the RCRA equivalent cap and slurry wall containment system in June 1993. ' During this period, U.S. EPA identified several major oil oil companies (Shell Oil, Union Oil (UNOCAL), Texaco Inc., Atlantic Richfield Company (ARCO) and Phillips Petroleum as Potentially Responsible Parties (PRPs) for the McColl Site. These oil companies subsequently formed a consortium known as the McColl Site Group (MSG) for the purposes of investigation and remediating the site. The property owner, McAuley LCX Corporation, was also named as a PRP for the McColl Site. ' From September 1993 through April 1996, the McColl Site conducted a further remedial investigation at the site in preparation for construction of the cap and slurry wall containment system. Field activiies related to the construction of the remedial measures outlined in the Source OU and Groundwater OU RODs were initiated in June 1996. Onsite construction of the remedy began on March 31, 1977 and was completed in November 1997. The former sump area has been incorporated into the Los Coyotes golf course, a land use

MCCOLL (Continued) **1000333926**

that is highly beneficial to the community.
'

Under CERCLA, U.S. EPA is required to perform a Five-Year Review at each superfund site to determine whether or not the remedy continues to be adequately protective of human health and the environment. U.S. EPA issued the first five-year Review Report for the McColl site on September 30,2002. The Five-Year Report identified several issues relation to operation and maintenance (O & M) which will be reviewed by a committee of stakeholders and implemented prior to the next five-year review. In the mean time, U.S. EPA has initiated measures to de-list the McColl Site from the National Priority List (NPL).

The 22-acre McColl Hazardous Waste Site was an inactive waste disposal facility located in the northwest section of the City of Fullerton, Orange County, California.
'

Housing developments border the site to the northeast, east, and to the south. The Los Coyotes golf course is located to the south of the former McColl Site and there is a regional park on the west border of the site. An operating oil field occupies the open area north of the site.
'

From 1942 through 1946 approximately 72,600 cubic yards of petroleum waste sludge was deposited in twelve sump waste sumps. These sumps were grouped into two areas of the site, identified as the Ramparts area and the Los Coyotes area. During the late 1950's and early 1960's, three sumps in the Ramparts area were covered with bentonite based drilling muds in an attempt to control odors coming from the site. In the late 1950's six of the sumps at the lower end of the property were covered with natural fill materials resulting from construction of the Los Coyotes golf course adjacent to the McColl site. Use of the site as an active disposal area concluded in 1964.
'

The waste materials at the McColl Site became a source of malodorous air emissions of sulfur dioxide (SO2), tetrahydrothiophenes (THTs), benzene, and other hydrocarbons. Inorganic contaminants such as arsenic, lead, nickel, aluminum, beryllium, cadmium, manganese, thallium, selenium, and chromium were found in the groundwater at concentrations near the Maximum Contaminant Levels (MCLs). Organic compounds such as benzene, 1,2-dichloroethane, methylene chloride, and bis (2-ethylhexyl) phthalate were also found in the groundwater.
'

The history of investigation at the site began in 1980 when DTSC and U.S. EPA began a joint investigation of the site. In 1982 the McColl Site was placed on the federal National Priority List (NPL), which made the cleanup activities eligible for funding under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). During the period from 1984 through 1996, several cleanup plans

MCCOLL (Continued) **1000333926**

were proposed for the site. The original cleanup proposal articulated in 1984 was excavation and offsite disposal of the wastes under the jurisdiction of DTSC. However, a court injunction blocked DTSC from implementing this remedy. In 1989 U.S. EPA resumed the role of lead agency. In 1992, U.S. EPA updated the feasibility study and proposed solidification of the wastes in place as the preferred remedial alternative. The 1992 plan also identified installation of a Resource, Recovery and Conservation Act

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

CHEVRON OIL FIELD RESEARCH CO (Continued) **1015732762**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:
Reponsible Party: NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: This site has been included on the National Priority List (NPL). Therefore, to the extent that federal funds are available, the Department will seek federal funds to cover the RI/FS study, remedial action, operation and maintenance and final cleanup. To the extent that federal funds are available, federal funding for remedial action, operation and maintenance as well as the final remedy will be at the 90 percent level. The State must pay a 10 percent share toward the federal funds awarded for those activities. A portion of the Bond fund will be used to meet the State's share. Some of the Bond fund will support certain State-only expenditures. Those State-only expenditures are used to support necessary ground water investigation, operation and maintenance. community relations and removal/remedial action activities, which EPA will not fund, and to support important site activities until federal funding is provided through the State's cooperative agreement with EPA. DHS is utilizing HSA and Bond funds for the EIR since EPA would not authorize federal funds for this activity. In addition, Bond funds will be utilized for the preparation of the RAP since EPA will not fund this State activity. The current estimates for Phase I remediation at the McColl Site range from $25 million to $110 million. DHS will be responsible for 10 percent of the Phase I cleanup remedy. For purposes of this Expenditure Plan, DHS has estimated $110 million for the Phase I cleanup cost. Phase II cleanup costs cannot be estimated until the ground water RI/FS is completed. To ensure timely implementation of the ground water RI/FS, DHS is

MCCOLL SITE (Continued) **S100833447**

projecting a State share for this activity. DHS and EPA will pursure cost recovery of all expenditures from any identified responsibile parties.

Site Description: The McColl site is an inactive waste disposal facility located in the northwestern portion of the City of Fullerton. From 1942 to 1946, acid sludge, a refinery waste resulting from production of aviation fuel, was disposed in a series of twelve waste pits at the site. In the early to mid-1950s, drilling mud from nearby oil fields was used to cover the six eastern pits. In the late 1950s, the six remaining sumps were covered by the construction of the Los Coyotes Golf Course. Approximately 97,100 cubic yards to 265,000 cubic yards of waste and contaminated soil are onsite.

Hazardous Waste Desc: Acidic petroleum sludge is the predominant waste at this site. The waste is characterized by a low pH sulfur content and high concentrations of aromatic and aliphatic hydrocarbons. When disturbed, the waste produces air emissions of sulfur dioxide and volatile hydrocarbons, which include benzene. In addition, the waste contains tetrahydrothiophene, an odor-producing compound.

Threat To Public Health & Env: Ground water contamination from the site has been detected in the shallow and deep aquifers, however, nearby public water supply wells are not contaminated. Also, under disturbed site conditions, there is also a risk from air emissions containing the above noted contaminants. Currently, all wastes are covered with soil, therefore there are no adverse air emissions coming from the site. The site is also completely fenced and guarded to prevent unauthorized access and direct contact with waste materials.

Site Activity Status: A two-phase remediation process is being taken at the McColl site. The first phase will address cleanup of the contaminated soils and waste at the site. The second phase will address ground water contamination at the site. DHS is preparing an environmental impact report (EIR) for the site as required by the Kern County Superior Court Injunction (May, 1985) and a RAP. EPA has conducted additional investigative work (soil contamination study, waste characterization and ground water study). EPA isalso preparing the supplemental re-evaluation of alternatives (SROA) which evaluates three categories of remedial alternatives. The RAP, SROA and proposed plan documents will be released for public comment in late Winter, 1988. These documents will set forth the DHS/EPA proposed remedy for the contaminated soils and waste materials at the site. Because ground water contamination has recently been confirmed, DHS will undertake a full-scale ground water remedial investigation and feasibility study (RI/FS) in early 1989. A separate remedial action will be performed by DHS/EPA to address contaminated ground water.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/17/2015

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

RANCHO LA HABRA
1400 S. LA HABRA HILS DRIVE
LA HABRA, CA 90631

TARGET PROPERTY COORDINATES

Latitude (North):	33.911933 - 33° 54' 42.96''
Longitude (West):	117.966852 - 117° 58' 0.67''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	410617.7
UTM Y (Meters):	3752618.0
Elevation:	366 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640256 LA HABRA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

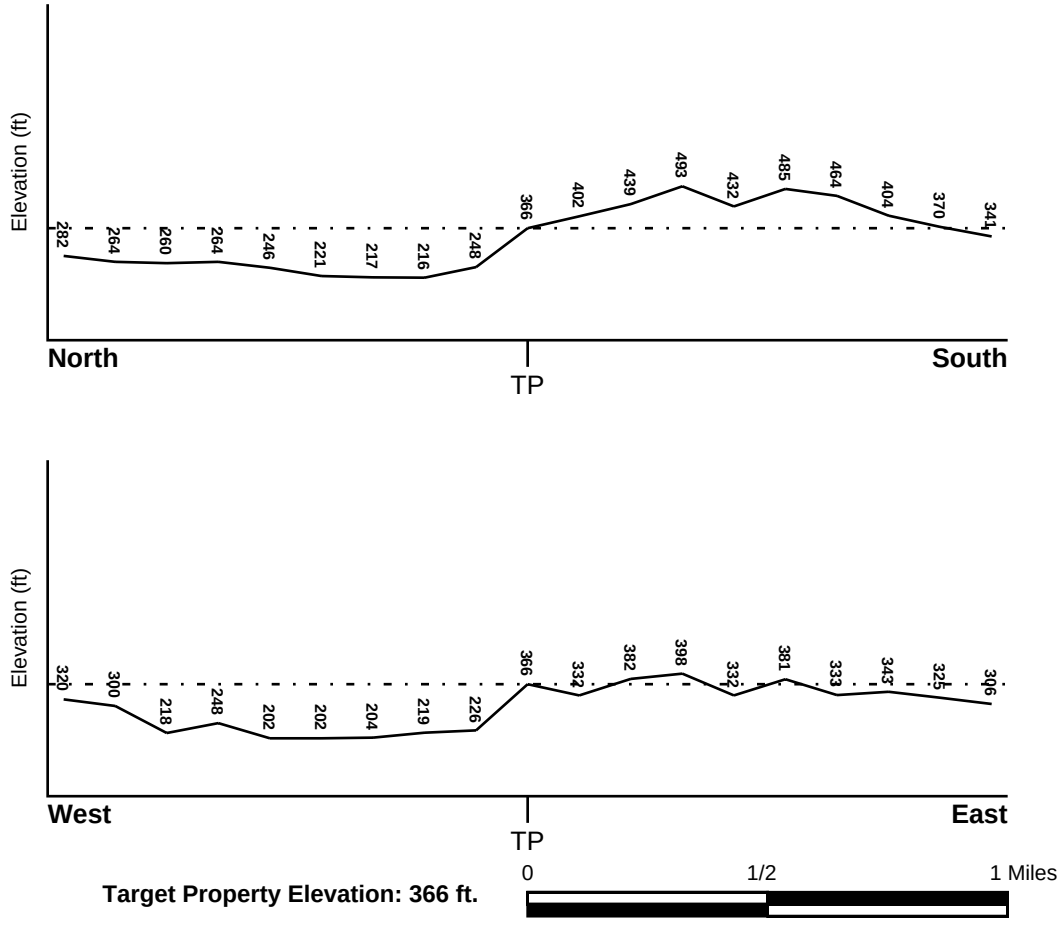

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
ORANGE, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06059C - FEMA DFIRM Flood data

Additional Panels in search area: 06037C - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LA HABRA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
B3	1/4 - 1/2 Mile NNW	Varies
B4	1/4 - 1/2 Mile NNW	Varies
C6	1/2 - 1 Mile North	SSW
7	1/2 - 1 Mile NNE	Not Reported
C8	1/2 - 1 Mile North	S
9	1/2 - 1 Mile ENE	S

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: ANAHEIM

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	25 inches	clay loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: 7.8 Min: 6.1
2	25 inches	29 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: ALO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.1
2	14 inches	22 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.1
3	22 inches	25 inches	weathered bedrock	Not reported	Not reported	Max: 1.4 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: SORRENTO

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	clay loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1
2	11 inches	61 inches	silty clay loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
3	61 inches	72 inches	stratified loamy fine sand to silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 4

Soil Component Name: XERORTHENTS LOAMY

Soil Surface Texture: variable

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 89 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX E
USER PROVIDED INFORMATION/
OIL WELL STATE DATA TENETATIVE TRACT NO. 17845 (H&A)

Project Name: **Rancho La Habra – CAH-71933.1a**

Project Address: **1400 S. La Habra Hills Drive, La Habra, CA**

USER SPECIFIC QUESTIONNAIRE

In order to comply with the ASTM E1527-13 Standard and qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete. Please provide the following information (if available). Your answers will be incorporated into the final Phase I ESA under the section "User-supplied Information."

(1.) Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).
Did a search of *recorded land title records* (or judicial records where appropriate, see NOTE below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law? (NOTE - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

NO

(2.) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Did a search of *recorded land title records* (or judicial records where appropriate, see NOTE above) identify any AULs, such as *engineering controls*, land use restrictions, or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?

NO

(3.) Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (LLP - 40 CFR 312.28).
As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? (self-explanatory)

NO

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

The purchase price reflects the current fair market value of the property.

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

(a.) Do you know the past uses of the *property*?

Yes

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

Yes

(c.) Do you know of spills or other chemical releases that have taken place at the *property*?

Yes

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

Yes

(6.) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Yes

In addition, certain information should be collected, if available, and provided to the e*nvironmental professional* selected to conduct the Phase I. This information is intended to assist the *environmental professional* but is not necessarily required to qualify for one of the *LLPs*. The information includes:

(a) the reason why the Phase I is required,

For due diligence on a land acquisition opportunity and to begin to understand the extent of which work that is to be done to prepare the property for residential development.

(b) the type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.,

(c) Purchase of real property

(d) the complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful),

1400 S La Habra Hills Dr, La Habra, CA 90631

(e) the scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered),

None

(f) identification of all parties who will rely on the Phase I *report*,

CalAtlantic Group, Inc.
Ryland Homes of California, Inc.

*(g)*identification of the site contact and how the contact can be reached,

George Peterson

(h) any special terms and conditions which must be agreed upon by the *environmental professional*, and

No

(i) any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition).

All previous documents available to us have been provided to EEI

CLOSURE REPORT FOR TRACT 15030, PHASE A AT THE FORMER WEST COYOTE HILLS OIL FIELD, CITY OF LA HABRA

Dear Mr. Rulon:

We have reviewed your June 1, 1999 submittal of the Closure Report (report) for Tract 15030, Phase A at the former West Coyote Hills oil field. This report was prepared and submitted by your consultant, Miller Brooks Environmental, Inc. The report summarizes the remedial and closure activities at the above site, which were carried out in accordance with the requirements outlined in the previously approved workplan. This report is the last in a series of four, which completes the full closure of Tracts 15030 and 15031 within the former West Coyote Hills oil field.

After reviewing the report and the analytical results of the confirmation samples, we believe that the site no longer poses a threat to water quality; therefore, no further action will be necessary at this site (Tracts 15030 and 15031). This closure letter does not relieve you of your responsibility to comply with the rules and regulations set forth by other agencies.

If you have any questions, please contact me at (909) 320-2024.

Sincerely,

Ray Akhtarshad

Subject: **Final Case Closure**

Re: PLC Land Company
Tracts 15030 and 15031
SE Quadrant - Beach Blvd & Imperial Highway
La Habra, CA 92631
OCHCA Case # 97IC7

Dear Mr. Rulon:

This letter confirms the completion of remedial action at the above-referenced site. With the provision that the information provided to this Agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

This confirmation of completion is limited in scope. It is limited to site conditions made known to this Agency under the above-referenced case number. It is based on an evaluation of the health threat presented by the inhalation, ingestion, or dermal absorption of the residual contaminants. In addition, this evaluation considered the present and proposed use of the property. Changes in the present or proposed land use may require further site characterization and/or site mitigation activity.

The presence of the petroleum hydrocarbons and the potential for residual contamination to cause groundwater contamination at this site was evaluated by Ray Akhtarshad of the Santa Ana Regional Water Quality Control Board. The Santa Ana Regional Board, in its letter dated June 24, 1999, concluded that no further action is required for this site (Tracts 15030 and 15031) at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health. It is the property owner's responsibility to notify this Agency of any changes in future contamination findings or site usage.

Closure Rationale

OCHCA Case No.: **97IC7** June 25, 1999

Soil Types: Generally sand, with occasional silt, clay and gravel

Depths to Groundwater: 100-110 ft bg in mid-elevation areas; measured

The portion of Chevron's West Coyote oil field included in this rationale is comprised of Phase A within Tract 15030 that is being developed as a golf course, and is the last of four development phases within this property to be remedied. Remedial action on three other portions of the property—that are slated for housing development and a reservoir site—have been completed. Phases D and B were granted OCHCA closure in April 1998 (with the SARWQCB granting Phase D closure in April 1998 and Phase B closure in May 1998); OCHCA granted Phase C closure in October 1998 following SARWQCB's closure for the same in September 1998. Remedial action objectives for this phase include the monitoring of previously known impacted soil, observing grading activities to identify additional impacted areas, conducting additional soil assessment where necessary, collecting confirmation samples to verify successful removal of contaminated soil, monitoring the handling of impacted soil—including the monitoring and sampling of impacted soil placed within approved "reuse areas"—three areas within the proposed golf course that the SARWQCB and OCHCA approved for placement of impacted soil as long as placement of affected soil was in accordance with the SARWQCB's *General Guidelines for the Reuse of Petroleum Contaminated Soil as Construction Fill for Roadway Projects* and OCHCA's approved remedial action plan cleanup standards.

Identification of areas of environmental concern within the Chevron property as a whole was accomplished during various site assessments performed by Dames & Moore and Environmental Science & Engineering from 1990 through 1996. The areas of concern within Phase A include oil wells sites, 'historical sites' (areas utilized as containment sumps for spills, drill mud and oil production discharges, or areas considered as potential containment sites), tank settings, previously unidentified sites uncovered during excavation and grading activities, and miscellaneous locations that include a former garage/repair shop and detention basin berms. A former facility service station site, located in the northern portion of Closure Phase A, used to contain two underground fuel storage tanks (UST) and one dispenser island. These were removed sometime in 1986 and soil impacted with fuel waste was reportedly excavated and transported to the Bradley Landfill in Sun Valley, CA. No permits for the UST are available, nor do records exist of any tank removal at this facility. Because of the reported presence of contamination resulting from the UST release, all information pertaining to this UST facility has been forwarded to Local Oversight Program (LOP) staff who will open an UST case file and proceed to address the UST fuel release.

During the course of investigation within this former Chevron property, all samples were analyzed for total petroleum hydrocarbons by EPA Methods 418.1 or 8015, and selected samples were routinely analyzed for VOC by either EPA Methods 8010/8020 or 8260, semi-volatile organics (including PAHs) by EPA Method 8270, CAM metals by EPA Method 6010, pesticides and PCBs by EPA Method 8080 (in areas where transformers were known to have been located or where pesticides were suspected to have been applied), and pH by EPA Method 9045. In closure Phase C, no pesticides or PCBs were detected. Except for insignificant amounts of some chemicals such as acetone and BETX, isolated occurrences of naphthalene and other unregulated hydrocarbon compounds, as well as some metals with concentrations greater than 10 x STLCs but less than PRGs, no other significant contamination by 8010, 8020, 8240 and 8270 compounds was detected. The range of pH values in soil samples was well within acceptable limits.

Summary of Mitigation Effort. The following summarizes the assessment/mitigation activities conducted in areas of concern within this closure Phase A for the period December 1996 to December 1998.

A. Well Sites

Of the 104 wells drilled within the Chevron West Coyote property, 17 were located within closure Phase A; 6 of these were found to be impacted with TRPH above cleanup criteria. These were excavated to remove impacted material and confirmed by subsequent sampling to have no significant residual contamination. One well site, MC-319, was not assessed during an earlier investigation but was observed and field-screened during grading operations: no impacted soil was identified in this well site.

B. Historical Sites

Ten former 'historical sites' were present within Phase A. Of these, eight were identified as having been impacted by crude oil above cleanup criteria. One of these (HS 106) was addressed during the remediation program on the easterly adjacent Emery Lease property (granted OCHCA closure in December 1997) but was again included in the Phase A remediation and grading activities. Three others (HS 3, HS 6 and HS 7) were encompassed by the '1945 Unit Stock Tank' (a tank setting site) excavation and confirmation sampling, while HS 11 and HS 13 were actually extensions from a previous (Phase C) excavation. With the exception of those included as part of a tank setting site, confirmation sampling of the historical sites showed successful removal of significantly impacted soil.

C. Tank Settings

In addition to the 3 former tank settings known from earlier investigations, 3 others were discovered during remediation/grading activities as having been impacted with crude oil. One tank setting was discovered during trenching activities associated with the installation of a storm drain that extended into and subsequently overlapped another tank setting excavation. Another tank setting (MC-313TS) was an extension of a Phase C excavation that extended into Phase A. All significantly impacted soil from all these tank settings were excavated and verification sampling results indicate successful removal of soil impacted above cleanup criteria.

D. Previously Unidentified Sites

Three previously unknown impacted sites were identified during grading operations. One of these was an extension of an affected area within Phase C. All three sites were excavated and confirmed to contain no significant residual contamination.

E. Miscellaneous Areas

Storm water containment (detention basin) berms were constructed by Chevron parallel to Beach Blvd. in the former locations of 1945 Unit Stock tanks, HS 6 and 7 and well MC-317. Impacted soil from these areas was excavated and utilized in berm construction. Prior to grading activities this impacted soil was assessed, and berm sections identified to

contain TRPH above cleanup levels were removed and placed in one of three designated stockpile areas. Two relatively high TRPH spots (2,900 and 4,500 mg/kg @ 5' bg) were left in place, but these would eventually be at a depth of at least 25' bfg.

From June 1995 through November 1996, Chevron's former field services maintenance area and a power pole site further south were investigated for possible contamination. Soil samples collected from trenches dug in the field maintenance area showed that the former garage/repair shop had soil contaminated by high levels of lead (100 mg/kg Pb) and nickel (590 mg/kg Ni), although other metals, TRPH, TPH and volatile organics were present in insignificant amounts. The transformer on the power pole, on the other hand was reportedly struck by lightning and one surface soil sampling in this location showed that PCBs were present to a depth of 3' bg. After delineating the extent of impact in both areas, contaminated soil was removed and transported under manifest to an approved disposal facility. Verification sampling confirmed that residual Pb and Ni are below 10xSTLCs at a depth of 5' bg, while a maximum concentration of 6 mg/kg residual PCBs is present in the power pole area at a depth of 5' below original grade. The power pole area, after grading, is now situated at a depth of 30' below final grade.

Final Closure Activities. Upon excavation, all crude oil-impacted soil from closure Phases A, B, C and D was transported to SARWQCB-approved stockpile areas located at the northern part of Phase A (Tract 15030) for eventual re-use within the western portion of the designated golf course (Phase A). Three stockpile areas were used, depending of the degree of crude oil impact: Stockpile 1 for <5,000 ppm TRPH; Stockpile 2 for 5,000-20,000 ppm TRPH; and Stockpile 3 for >20,000 ppm TRPH. During placement of impacted soil, the soil piles were disced and hydrated regularly to help the natural degradation of TRPH. When the stockpiled soil was ultimately relocated within the reuse areas, the underlying native soil in stockpile sites was sampled and analyzed for TRPH by EPA Method 418.1 and confirmed to contain no detectable or minimal TRPH.

Placement of stockpiled, crude oil-affected soil in reuse areas was approved by the Regional Board and OCHCA primarily because of the low potential for TRPH to leach from the soil; a minimum of 20 to 25 ft of clean soil cover would be placed above the impacted soil; utility lines within the reuse areas would be within the top 10 ft of soil; and the reuse areas are to have no other development in the future aside from a golf course and ancillary facilities.

Reuse Areas 1 and 2 are located in the driving range of the golf course, while Reuse Area 3 is between the greens of proposed Hole 7 and Hole 2. A licensed surveyor delineated the locations of the reuse areas and provided elevation controls to insure that a minimum of 20 ft of clean soil would cap Reuse Areas 2 and 3, and a minimum of 25 ft of clean cover would be placed in Reuse Area 1. During placement of affected soil in the reuse areas, random soil samples were collected at a ratio of one sample to about 1,000 cubic yards of material, for analysis of TRPH (EPA 418.1), TPH/gasoline and TPH/diesel (EPA 8015M), and BTEX (EPA 8020). When analytical results showed the presence of BTEX, re-analysis by EPA 8260 was conducted for greater analytical accuracy. When contaminant concentrations exceeded cleanup criteria, the affected soil was returned to the temporary stockpile for additional biodegradation. A final tally of analytical data showed that TRPH concentrations in the reuse areas ranged from N.D. to 12,000 mg/kg, except one sample from Reuse Area 2 with 13,000 mg/kg TRPH and another from Reuse Area 3 with 16,862 mg/kg TRPH.

Based on the remedial action accomplished at this site, and the results of confirmation sampling and final field inspections, removal of significantly impacted soil from closure Phase A is deemed complete, leaving site soils with residual contaminant concentrations within approved cleanup goals. With the added safeguard of deep burial (at no less than 20 ft below grade), residual soil contamination poses no significant threat to human health or the environment; it is therefore recommended that no further action be required for this portion (Phases A) of the property. Furthermore, since all the three other development phases (B, C and D) within this property have equally been successfully mitigated in accordance with approved Agency guidelines, it is recommended that this case be closed.

The Santa Ana Regional Water Quality Control Board (SARWQCB) has determined that development Phases B, C and D of the property no longer pose a threat to water quality and granted them closure in 1998. A similar favorable determination has been made for Phase A, and a final closure for the entire development was granted by the Regional Board on June 24, 1999.

Subject: **Soil Management Plan dated September 29, 2015**

Re: Westridge Golf Course
1400 S. La Habra Hills
La Habra, CA 90631
OCHCA Case # 15IC004

Dear Mr. Battaglia:

The Orange County Health Care Agency (OCHCA), Environmental Health has reviewed the subject document prepared by EEI Geotechnical & Environmental Solutions (EEI). Please submit an addendum to the subject soil management plan that addresses the following:

1. The subject document includes a summary of total petroleum hydrocarbon (TPH) data for soil currently contained in Reuse Areas 1 through 3 but, does not indicate if sampling for additional analytes was completed in these areas. Please submit a complete data set for samples collected from soil currently contained in Reuse Areas 1 through 3.

2. The document indicates that a minimum of 20 feet of soil containing <100 milligrams per kilogram (mg/kg) TPH will be used for cover in the proposed reuse areas. Please note, soil from ground surface to 10 feet below ground surface (bgs) cannot contain detectable concentrations of gasoline range TPH (TPHg).

3. Confirmation soil sampling must include analysis for volatile organic compounds (VOCs) where TPHg concentrations exceed 100 mg/kg and must include analysis for semi-volatile organic compounds (SVOCs) where TPH concentrations exceed 1,000 mg/kg.

4. Samples must be collected in brass or stainless steel sleeves. Sampling in glass jars is not permitted.

5. Soil planned for reuse in the upper 10 feet will be evaluated against soil criteria presented in the U.S. EPA Regional Screening Levels and supplemental data provided by the Department of Toxic Substances Control in HERO Note 3. Additionally, any VOC containing soil planned for reuse must be evaluated for potential risks from vapor intrusion.

6. The document does not discuss the anticipated elevation of the bottom of the proposed reuse areas with respect to groundwater elevation.

7. A qualified person must be onsite during grading operations to identify any previously unidentified areas of contamination.

8. Survey data for the extent of Reuse Areas 1 through 3 must be included and used for reference, in addition to confirmation sampling, to verify the proposed removal of contaminated material contained within these areas.

9. The vertical and lateral extent of the proposed burial cells must be surveyed.

10. Figures 3 and 4 and the figure presented in Appendix C should be resubmitted as 11x17 sized sheets.

11. A figure showing the layout of the proposed development must be included.

If you have any questions regarding this matter, please contact the undersigned at (714) 433-6260.

Sincerely,

Re: Westridge Golf Course
1400 S. La Habra Hills
La Habra, CA 90631
OCHCA Case # 15IC004

Dear Mr. Battaglia:

The Orange County Health Care Agency (OCHCA), Environmental Health has reviewed the subject document prepared by EEI Geotechnical & Environmental Solutions (EEI). The addendum mentioned above is sufficient for implementation provided the following issues are addressed:

1. Documentation must be provided to OCHCA for all fill material prior to placement on site.

2. A representative of the OCHCA must be provided the opportunity to witness field and sampling activities associated with this clean-up case. A minimum of 48 hours advance notice is required.

The subject report is dated July 14, 2016; however, the hard copy was not received by this Agency until August 15, 2016. Please ensure that the date of future report submittals more closely reflects the mailing date of the document. In addition, please be reminded that hard copy submittals are required.

If you have any questions regarding this matter, please contact the undersigned at (714) 433-6251.

Sincerely,
