Subject: Sustainable Groundwater Management Act
Scope of Engineering Services and Budget

Dear Mr. Saykali:

Stetson Engineers Inc. (Stetson) is pleased to provide the scope of work and budget below to continue to support the City of La Habra's (City) efforts to implement the requirements of the Sustainable Groundwater Management Act (SGMA) in the La Habra Basin. As you are aware, Stetson has been providing professional engineering services supporting the City's documentation of its groundwater management program in the La Habra Basin under State law since 2013. Stetson is prepared to continue to commit its highly qualified professional staff to assist in current SGMA compliance tasks.

The Basin 8-1 Alternative Plan was submitted to the California Department of Water Resources (DWR) on December 22, 2016 and approved on July 17, 2019. Per SGMA requirements, the Basin 8-1 Alternative Plan must be updated and resubmitted to DWR by January 1, 2022. Additionally, the portion of the Alternative Plan related to the La Habra-Brea management area must be updated to address comments provided by DWR.

The scope of work for Stetson to support the City includes: Development of a Basin Water Budget, Evaluation of Undesirable Results, Establishment of Sustainable Management Criteria and Management Actions, Development of a Monitoring Network, Preparation of the Alternative Plan Update, Coordination with Orange County Water District (OCWD), and Coordination with the City and Brea. These tasks are discussed below.

Mr. Elias Saykali
July 30, 2021
Page 2

Scope of Work

Task 1: Develop Water Budget

Stetson will develop a basin wide water budget by evaluating inflows and outflows in the La Habra-Brea Management Area. Stetson will utilize studies previously conducted by Stetson and others. Recent available surface water, groundwater, and precipitation data will be collected to update Stetson's data files. The data will be reviewed to develop the appropriate inflow and outflow components of the water budget. A balanced hydrologic period will be analyzed to account for dry and wet precipitation periods. Geographical Information System (GIS) maps will be used to evaluate current land use and recharge areas. The water budget will also be used to reevaluate the sustainable yield of the La Habra-Brea Management Area.

Budget \$12,000

Task 2 Evaluate Undesirable Results

Stetson will evaluate and document the presence or absence of undesirable results using the six sustainability indicators defined by SGMA:

- Chronic lowering of groundwater levels
- Loss of groundwater in storage
- Degradation of water quality
- Sea water intrusion
- Land subsidence
- Depletion of interconnected groundwaters

Stetson will conduct a search of State and other databases for datasets on land subsidence, interconnected surface waters, and groundwater dependent ecosystems and will evaluate the presence of sea water intrusion. Additionally, Stetson will utilize data obtained for prior groundwater analysis for the City and collect and evaluate water quality data and groundwater level data in the La Habra-Basin management area to update Stetson's data files.

Budget \$6,000

Task 3 Develop Sustainable Management Criteria and Management Actions

After evaluation of the presence or absence of undesirable results in Task 2, Stetson will establish sustainable management criteria to use as basin tool to track sustainability in the La Habra-Brea Management Area. Sustainable management criteria may include a sustainability goal, minimum thresholds, measurable objectives, and interim milestones,

as necessary. Management actions to maintain sustainable conditions and the absence of undesirable results in the basin will be established and documented. Stetson will also determine if it is appropriate to use groundwater levels as a proxy for measuring other basin conditions (i.e. groundwater in storage).

Budget \$8,000

Task 4 – Develop a Monitoring Network

Stetson will incorporate the results of the Phase 1 Monitoring Program evaluation previously authorized by the City to develop a new monitoring program. The program may include additional existing wells or future construction of new monitoring wells and/or a new sampling schedule to satisfy SGMA monitoring network requirements and follow best practices. This task does not include field measurements of groundwater levels or collection of water quality samples, which were proposed, but not authorized, as Phase 2 of the Monitoring Program.

Budget \$5,000

Task 5 – Preparation of Alternative Plan

Stetson will incorporate the results of Task 1 through Task 4 above into a revised Alternative Plan update for the La Habra-Brea Management Area. The Alternative Plan Update will satisfy SGMA requirements and address all DWR comments on the existing Alternative Plan.
