RE: Upgrade Smarter: Buy 3 DXi Controllers, Get 1 Free

Dear Valued Customer,

Now is the ideal time to upgrade your irrigation control system with Toro® DXi™ Central Control. For a limited time, customers in Southern California can take advantage of an exclusive promotion available through SiteOne GreenTech: purchase three DXi controllers and receive a fourth controller free. The free unit must be equal to or less in value than the lowest-cost controller purchased, and there is no limit to the number of times this offer can be redeemed.

This program runs from March 16, 2026 through October 15, 2026, with all claims required to be submitted by October 19, 2026. Designed to support system modernization, this promotion provides a cost-effective opportunity to replace aging infrastructure, improve water efficiency, and enhance operational reliability with a proven central control platform.

To participate, simply purchase qualifying DXi controllers through your local SiteOne GreenTech branch. Your SiteOne representative can assist with product selection, ordering, and redemption details.

Take advantage of this limited-time opportunity to modernize your irrigation system with Toro DXi.

Sincerely,

A handwritten signature in blue ink, appearing to read "Craig Gaines".
