

Coronavirus Mitigation

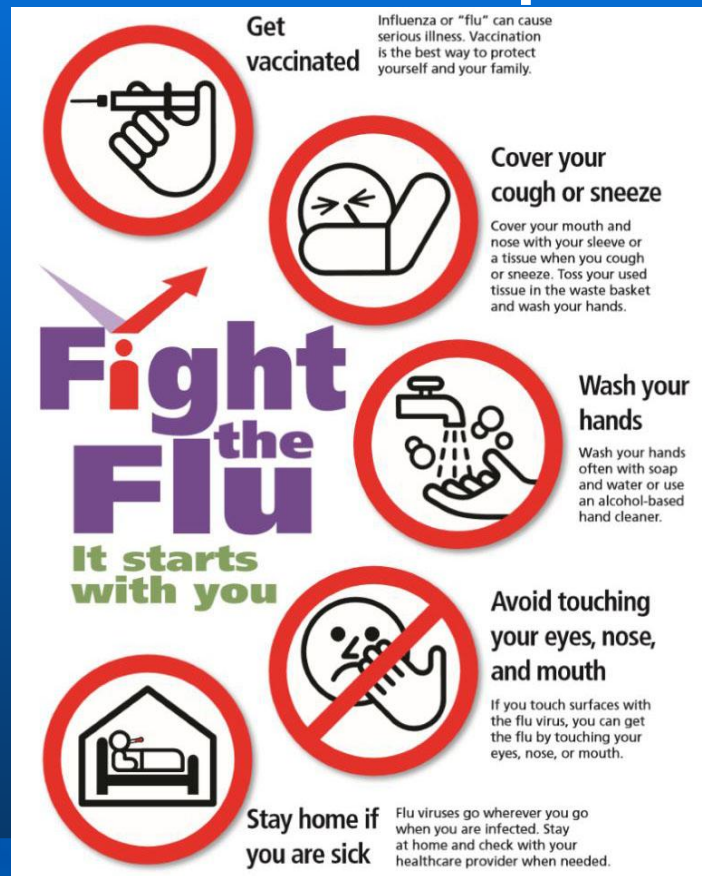

How do you know if you are sick?

Symptoms may appear 2-14 days after exposure.

- Fever 100 or higher
- Cough
- Shortness of breath

Prevention & Preparation

Fight the Flu
It starts with you

Get vaccinated
Influenza or "flu" can cause serious illness. Vaccination is the best way to protect yourself and your family.

Cover your cough or sneeze
Cover your mouth and nose with your sleeve or a tissue when you cough or sneeze. Toss your used tissue in the waste basket and wash your hands.

Wash your hands
Wash your hands often with soap and water or use an alcohol-based hand cleaner.

Avoid touching your eyes, nose, and mouth
If you touch surfaces with the flu virus, you can get the flu by touching your eyes, nose, or mouth.

Stay home if you are sick
Flu viruses go wherever you go when you are infected. Stay at home and check with your healthcare provider when needed.

MAPS Pandemic Plan

- Reviewed in early February
- Daily modifications
- Ever changing from hour to hour, day to day
