July 7, 2022

To Whom it may concern;

This narrative is intended to provide additional information related to the construction and installation of a sales yard for Artisan. The project location is between the existing building and existing asphalt pad on the SE corner of the building, using premium decorative materials to further add to the facility's aesthetic. It is my hope that we will be able to move forward with the project as outlined.

Service and Description of project:

Once completed this project will serve Artisan, and includes installing a concrete pad and fencing to limit viewability of on hand products for sale and viewing by customers and received products awaiting customer pickup.

Purpose of project:

The project will allow for outside storage of products both available for viewing and sale as well as storage for received products, while hiding them from the view of passer byes and limiting the opportunistic removal of products by unauthorized persons.

What will be stored:

Storage will include both for viewing and sale items as well as previously ordered products awaiting customer pickup. The materials may include any materials which are not required to be indoors due to potential damage from weather. These items might include, but are not limited to: decking, railings, windows, siding, block products, soffit and fascia, exterior stone, and exterior trim.

Example of product to be used on fencing:

The fencing will be similar in nature to the existing siding on the building, consisting of IPE boards stained to the same color as the building. (see below)

Sincerely,

Jeremy Fischer
