

RIB ROCK

LANDSCAPE BLOCK

Ascension Medical Group

Ascension Medical Group

COUNTY MATERIALS CORPORATION

RIB ROCK

Rib Rock™ Landscape Block can easily construct walls from 6 feet to 20 feet high with additional site-specific engineering. Each block is manufactured with an interlocking design for easy installation and enhanced security. Manufactured to hold back a lot of earth, Rib Rock units are the perfect solution for demanding projects that require lasting strength and enhanced durability.

Available in Gray as a standard color. Custom staining may be done onsite by an installer. Refer to County Materials' Rib Rock Landscape Block Technical Data Sheet on Staining and Sealing.

Rib Rock Landscape Block – GRAY (Dry Stack Texture)

more about this product

The color photos shown in this catalog were prepared with careful attention to accuracy. However, colors shown may vary from actual hues and should only be used as a guide. Refer to actual product samples for final color selection. Because concrete units are manufactured with high quality, naturally-mined aggregates and materials, variations in color or shading should be expected in products that are manufactured at different times and in units having different shapes. This color or shading variation is acceptable in the industry.

RIB ROCK™ Landscape Block

Rib Rock Landscape Block – GRAY (Dry Stack Texture)

RIB ROCK™ Top Block

The **Top Block** can be used to finish off the top of a wall, in place of a cap, if a cap is not required. This allows the ability to fill the back of the top block with soil for planting, or landscape rocks. Either will create an aesthetically pleasing look for any application (See pages 4 and 5 for more information on available units & sizes).

Installation

Rib Rock Keyblock Installation

- Short Key Block are used on outside radius and on corners because you gain length due to the 2" set back on every block.
- Long Key Block are used on inside radius because you lose length due to the 2" set back on every block.

8 Foot Wall or Higher (Rib Rock)

6 Foot Wall (Rib Rock)

Curves

Note: Site conditions may require Geogrid at 6'. Refer to site specific Engineering section

Engineering

Over-size Rib Rock Landscape block can easily make walls up to 6 feet high. For walls over this height, geogrid and site specific engineering will be required. Terracing is another alternative to reach desired wall heights with little or no need for soil reinforcement. Engineering may still be required for local specifications and proper permitting.

Engineering is available for over-size wall projects in the lower 48 states. Call a County Materials' representative at (800) 242-7733 for information.
