Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D003
Waste Description:	REACTIVE WASTE
Waste Code:	D004
Waste Description:	ARSENIC
Waste Code:	D005
Waste Description:	BARIUM
Waste Code:	D006
Waste Description:	CADMIUM
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D009
Waste Description:	MERCURY
Waste Code:	D010
Waste Description:	SELENIUM
Waste Code:	D011
Waste Description:	SILVER
Waste Code:	D018
Waste Description:	BENZENE
Waste Code:	D019
Waste Description:	CARBON TETRACHLORIDE
Waste Code:	D020
Waste Description:	CHLORDANE
Waste Code:	D021
Waste Description:	CHLOROBENZENE
Waste Code:	D022
Waste Description:	CHLOROFORM
Waste Code:	D027
Waste Description:	1,4-DICHLOROBENZENE
Waste Code:	D028
Waste Description:	1,2-DICHLOROETHANE

SAFETY-KLEEN OF CALIFORNIA INC (Continued) **1000357880**

Waste Code: D029
Waste Description: 1,1-DICHLOROETHYLENE

Waste Code: D030
Waste Description: 2,4-DINITROTOLUENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D036
Waste Description: NITROBENZENE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND

SAFETY-KLEEN OF CALIFORNIA INC (Continued) **1000357880**

F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F037
Waste Description: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

Waste Code: F038
Waste Description: PETROLEUM REFINERY SECONDARY (EMULSIFIED) OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE AND/OR FLOAT GENERATED FROM THE PHYSICAL AND/OR CHEMICAL SEPARATION OF OIL/WATER/SOLIDS IN PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH WASTES INCLUDE, BUT ARE NOT LIMITED TO, ALL SLUDGES AND FLOATS GENERATED IN INDUCED AIR FLOTATION (IAF) UNITS, TANKS AND IMPOUNDMENTS, AND ALL SLUDGES GENERATED IN DAF UNITS. SLUDGES GENERATED IN STORMWATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND F037, K048, AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

Waste Code: K048
Waste Description: DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K049
Waste Description: SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.

SAFETY-KLEEN OF CALIFORNIA INC (Continued) **1000357880**

Waste Code: K050
Waste Description: HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K051
Waste Description: API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K052
Waste Description: TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K157
Waste Description: WASTEWATERS (INCLUDING SCRUBBER WATERS, CONDENSER WATERS, WASHWATERS, AND SEPARATION WATERS) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

Waste Code: P011
Waste Description: ARSENIC OXIDE AS2O5 (OR) ARSENIC PENTOXIDE

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P022
Waste Description: CARBON DISULFIDE

Waste Code: P029
Waste Description: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

Waste Code: P068
Waste Description: HYDRAZINE, METHYL- (OR) METHYL HYDRAZINE

Waste Code: P098
Waste Description: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

Waste Code: P105
Waste Description: SODIUM AZIDE

Waste Code: P106
Waste Description: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

Waste Code: P120
Waste Description: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

Waste Code: U001
Waste Description: ACETALDEHYDE (I) (OR) ETHANAL (I)

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U003
Waste Description: ACETONITRILE (I,T)

Waste Code: U007
Waste Description: 2-PROPENAMIDE (OR) ACRYLAMIDE

Waste Code: U012
Waste Description: ANILINE (I,T) (OR) BENZENAMINE (I,T)

SAFETY-KLEEN OF CALIFORNIA INC (Continued) **1000357880**

Waste Code: U019
Waste Description: BENZENE (I,T)

Waste Code: U021
Waste Description: [1,1'-BIPHENYL]-4,4'-DIAMINE (OR) BENZIDINE

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U034
Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U041
Waste Description: EPICHLOROHYDRIN (OR) OXIRANE, (CHLOROMETHYL)-

Waste Code: U043
Waste Description: ETHENE, CHLORO- (OR) VINYL CHLORIDE

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U052
Waste Description: CRESOL (CRESYLIC ACID) (OR) PHENOL, METHYL-

Waste Code: U056
Waste Description: BENZENE, HEXAHYDRO- (I) (OR) CYCLOHEXANE (I)

Waste Code: U057
Waste Description: CYCLOHEXANONE (I)

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U071
Waste Description: BENZENE, 1,3-DICHLORO- (OR) M-DICHLOROBENZENE

Waste Code: U072
Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

Waste Code: U080
Waste Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Waste Code: U105
Waste Description: 2,4-DINITROTOLUENE (OR) BENZENE, 1-METHYL-2,4-DINITRO-

Waste Code: U106
Waste Description: 2,6-DINITROTOLUENE (OR) BENZENE, 2-METHYL-1,3-DINITRO-

Waste Code: U112
Waste Description: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

Waste Code: U117
Waste Description: ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)

Waste Code: U122
Waste Description: FORMALDEHYDE

SAFETY-KLEEN OF CALIFORNIA INC (Continued) **1000357880**

Waste Code: U134
Waste Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U159
Waste Description: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U183
Waste Description: BENZENE, PENTACHLORO- (OR) PENTACHLOROBENZENE

Waste Code: U188
Waste Description: PHENOL

Waste Code: U196
Waste Description: PYRIDINE

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U211
Waste Description: CARBON TETRACHLORIDE (OR) METHANE, TETRACHLORO-

Waste Code: U218
Waste Description: ETHANETHIOAMIDE (OR) THIOACETAMIDE

Waste Code: U219
Waste Description: THIOUREA

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U228
Waste Description: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Waste Code: U404
Waste Description: U404

STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Commercial Offsite Facility Types: Solvent Recovery, Treatment Facilities, Used Oil / Antifreeze
Quarterly Update: QUARTERLY UPDATE: Quarterly Update Period: July through September 2021 DTSC issued a Technical Completeness Determination Letter on July 9, 2021 to Safety Kleen Newark on their RCRA Permit Renewal Application and determined to be technical complete. A public comment period was held from July 13 2021 through August 30, 2021 on the draft Permit. No comments were received during the comment period. DTSC issued a RCRA-Equivalent Renewal Permit on September 3, 2021 which authorized Safety Kleen Newark to continue their treatment and storage operations in tanks and containers. The Permit is effective on September 3, 2021 and expires on September 2, 2031. DTSC also filed a Notice of Determination with the Governor's Office of Planning Research State Clearinghouse for the Addendum Negative Declaration. FACILITY DESCRIPTION/ HISTORY Evergreen Oil, Inc. (EOI) is located at 6880 Smith Avenue, Newark, Alameda County on a 7-acre site zoned MG (General Industrial) within an urbanized area surrounded by industrial sites. The EOI facility was built in 1985 on a previously undeveloped parcel. The facility stores and treats hazardous waste in tanks and containers including used oil, RCRA and non-RCRA oily waste waters, waste antifreeze, RCRA fuel and contaminated petroleum products. EOI is now called Safety-Kleen of California, Inc. PERMITTING REGULATORY DESCRIPTION/ HISTORY State Hazardous Waste Permit was issued on October 10, 1985 to store and recycle used oil and for storage and transfer of antifreeze. A Class 3 Permit Modification was issued on May 9, 2002. The facility is authorized to store and treat hazardous waste in tanks and containers including used oil, RCRA and non RCRA oily waste waters, waste antifreeze, RCRA fuel and contaminated petroleum products. The RCRA permit was issued on 12/01/04. The permit decision was appealed on January 4, 2005. On September 21, 2005, DTSC

SAFETY-KLEEN OF CALIFORNIA INC (Continued) **1000357880**

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

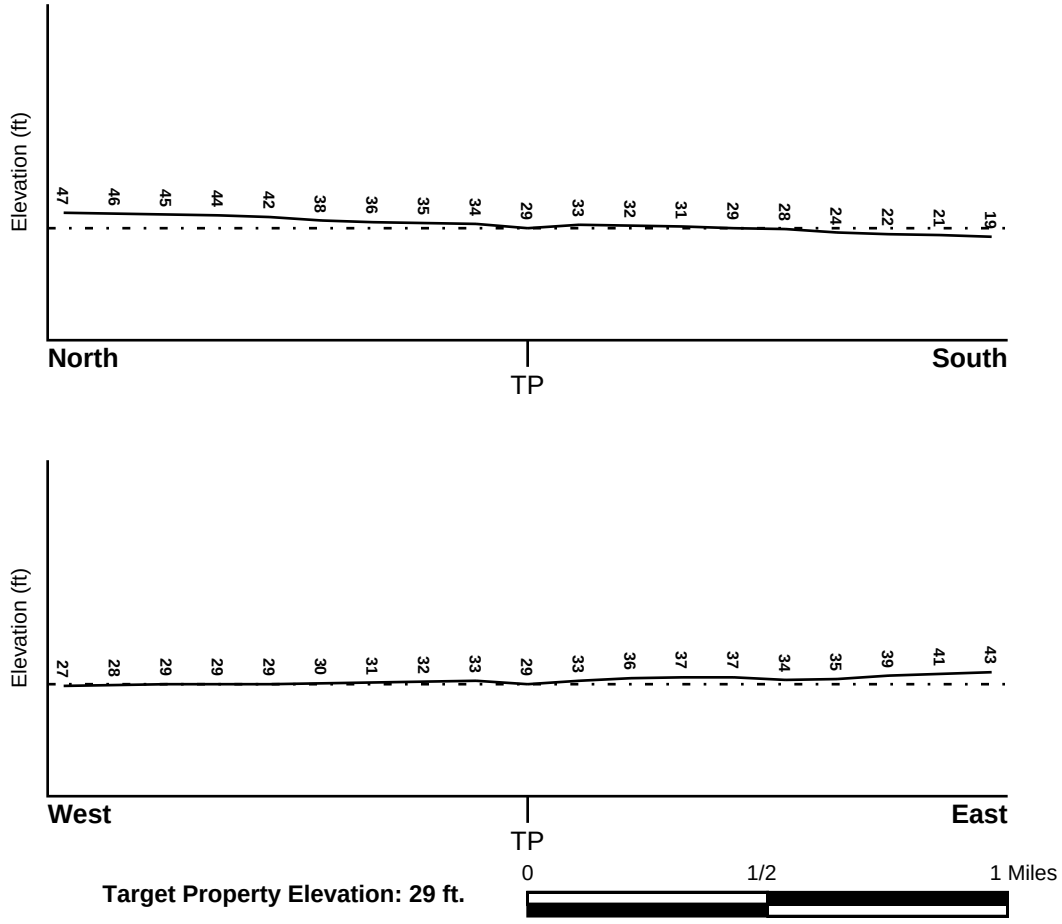
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 29 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06001C0442G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06001C0461G	FEMA FIRM Flood data

06001C0463G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NEWARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Danville

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	20 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	20 inches	53 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	53 inches	79 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties*. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

Please be advised that any provision contained in this document, or in a document that is attached, linked or referenced in this document, that under applicable law illegally discriminates against a class of individuals based

upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of March 18, 2022 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Extended Loan Policy - 2006

ALTA Extended Owner Policy - 2006

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

OHANA LAND COMPANY, LLC

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2022-2023, a lien not yet due or payable.

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. An easement for water lines, sanitary sewers, natural gas lines, electrical lines and incidental purposes, recorded October 14, 1969 as Book/Reel 2495, Page/Image 540 of Official Records.
   In Favor of: City of Newark, a municipal corporation, in Resolution No. 1786, abandoning portions of Moores Avenue and Timber Street
   Affects: Parcel 1

4. An easement for right at any time, and from time to time, to excavate for, install, replace (of the initial or any other size), maintain and use such pipe lines as second party shall from time to time elect for conveying gas, oil, petroleum products, or any other liquids, gases, or substances which can be transported through a pipe line, with necessary and proper valves and other appliances and fittings, and devices for controlling electrolysis for use in connection with said pipe lines, together with adequate protection and incidental purposes, recorded November 29, 1979 as Instrument No. 1979-242804 of Official Records.
   In Favor of: Pacific Gas and Electric Company, a California corporation
   Affects: As described therein

5. An easement for right to construct and maintain traffic signal equipment, detection loops and their appurtenances and incidental purposes, recorded April 17, 1985 as Instrument No. 1985-075172 of Official Records.
   In Favor of: City of Newark, a municipal corporation
   Affects: As described therein

6. An easement for landscape planting and irrigation and incidental purposes, recorded September 20, 1990 as Instrument No. 1990-251114 of Official Records.
   In Favor of: City of Newark, a municipal corporation
   Affects: As described therein

7. The terms, provisions and easement(s) contained in the document entitled "Landscape Maintenance Agreement" recorded April 1, 2003 as Instrument No. 2003-190703 of Official Records.

   The location of the easement cannot be determined from record information.

8. The fact that the land lies within the boundaries of the Newark Redevelopment Project No. 2, as disclosed by various documents of record.

9. Rights of the public in and to that portion of the Land lying within any Road, Street, Alley or Highway.

10. Water rights, claims or title to water, whether or not shown by the Public Records.

11. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

12. Rights of parties in possession.

Prior to the issuance of any policy of title insurance, the Company will require:

13. With respect to OHANA LAND COMPANY, LLC, a California limited liability company:
a. A copy of its operating agreement and any amendments thereto;
b. If it is a California limited liability company, that a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) be recorded in the public records;
c. If it is a foreign limited liability company, that a certified copy of its application for registration (LLC-5) be recorded in the public records;
d. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, that such document or instrument be executed in accordance with one of the following, as appropriate:
(i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such document must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
(ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
e. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require

14. An ALTA/NSPS survey of recent date which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. General and special taxes and assessments for the fiscal year 2021-2022.

First Installment:	$4,937.25, PAID
Penalty:	$0.00
Second Installment:	$4,937.25, PAID
Penalty:	$0.00
Tax Rate Area:	11-045
A. P. No.:	092A-2585-031

   Affects: Parcel 1

2. General and special taxes and assessments for the fiscal year 2021-2022.

First Installment:	$2,821.91, PAID
Penalty:	$0.00
Second Installment:	$2,821.91, PAID
Penalty:	$0.00
Tax Rate Area:	11-046
A. P. No.:	092A-2585-012-01

   Affects: Parcel 2

3. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) COMMERCIAL STRUCTURE known as 38683 TIMBER STREET, NEWARK, CALIFORNIA.

   Affects: Parcel 1

4. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) COMMERCIAL STRUCTURE known as 38600 CEDAR BOULEVARD, NEWARK, CALIFORNIA.

   Affects: Parcel 2

5. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

6. We find no outstanding voluntary liens of record affecting subject property. Disclosure should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any possible security interest in the subject property.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA STANDARD COVERAGE POLICY – 1990
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;

d. improvements on the Land;
e. land division; and
f. environmental protection.
This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$5,000

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II,[t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

[PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.

4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:
[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the

Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

First American Title™

Privacy Notice

Effective: October 1, 2019

Notice Last Updated: January 1, 2022

This Privacy Notice describes how First American Financial Corporation and its subsidiaries and affiliates (together referred to as "First American," "we," "us," or "our") collect, use, store, and share your information with the exception that a subsidiary or affiliate has their own privacy policy, that policy governs. This Privacy Notice applies to information we receive from you offline only, as well as from third parties, when you interact with us and/or use and access our services and products ("Products"). For more information about our privacy practices, including our online practices, please visit https://www.firstam.com/privacy-policy/. The practices described in this Privacy Notice are subject to applicable laws in the places in which we operate.

What Type Of Information Do We Collect About You? We collect a variety of categories of information about you. To learn more about the categories of information we collect, please visit https://www.firstam.com/privacy-policy/.

How Do We Collect Your Information? We collect your information: (1) directly from you; (2) automatically when you interact with us; and (3) from third parties, including business parties and affiliates.

How Do We Use Your Information? We may use your information in a variety of ways, including but not limited to providing the services you have requested, fulfilling your transactions, comply with relevant laws and our policies, and handling a claim. To learn more about how we may use your information, please visit https://www.firstam.com/privacy-policy/.

How Do We Share Your Information? We do not sell your personal information. We only share your information, including to subsidiaries, affiliates, and to unaffiliated third parties: (1) with your consent; (2) in a business transfer; (3) to service providers; and (4) for legal process and protection. To learn more about how we share your information, please visit https://www.firstam.com/privacy-policy/.

How Do We Store and Protect Your Information? The security of your information is important to us. That is why we take commercially reasonable steps to make sure your information is protected. We use our best efforts to maintain commercially reasonable technical, organizational, and physical safeguards, consistent with applicable law, to protect your information.

How Long Do We Keep Your Information? We keep your information for as long as necessary in accordance with the purpose for which it was collected, our business needs, and our legal and regulatory obligations.

Your Choices We provide you the ability to exercise certain controls and choices regarding our collection, use, storage, and sharing of your information. You can learn more about your choices by visiting https://www.firstam.com/privacy-policy/.

International Jurisdictions: Our Products are offered in the United States of America (US), and are subject to US federal, state, and local law. If you are accessing the Products from another country, please be advised that you may be transferring your information to us in the US, and you consent to that transfer and use of your information in accordance with this Privacy Notice. You also agree to abide by the applicable laws of applicable US federal, state, and local laws concerning your use of the Products, and your agreements with us.

We may change this Privacy Notice from time to time. Any and all changes to this Privacy Notice will be reflected on this page, and where appropriate provided in person or by another electronic method. YOUR CONTINUED USE, ACCESS, OR INTERACTION WITH OUR PRODUCTS OR YOUR CONTINUED COMMUNICATIONS WITH US AFTER THIS NOTICE HAS BEEN PROVIDED TO YOU WILL REPRESENT THAT YOU HAVE READ AND UNDERSTOOD THIS PRIVACY NOTICE.

For California Residents

If you are a California resident, you may have certain rights under California law, including but not limited to the California Consumer Privacy Act of 2018 ("CCPA"). All phrases used in this section shall have the same meaning as those phrases are used under California law, including the CCPA.

Right to Know. You have a right to request that we disclose the following information to you: (1) the categories of personal information we have collected about or from you; (2) the categories of sources from which the personal information was collected; (3) the business or commercial purpose for such collection and/or disclosure; (4) the categories of third parties with whom we have shared your personal information; and (5) the specific pieces of your personal information we have collected. To submit a verified request for this information, go to our online privacy policy at www.firstam.com/privacy-policy to submit your request or call toll-free at 1-866-718-0097. You may also designate an authorized agent to submit a request on your behalf by going to our online privacy policy at www.firstam.com/privacy-policy to submit your request or by calling toll-free at 1-866-718-0097

Right of Deletion. You also have a right to request that we delete the personal information we have collected from and about you. This right is subject to certain exceptions available under the CCPA and other applicable law. To submit a verified request for deletion, go to our online privacy policy at www.firstam.com/privacy-policy to submit your request or call toll-free at 1-866-718-0097. You may also designate an authorized agent to submit a request on your behalf by going to our online privacy policy at www.firstam.com/privacy-policy to submit your request or by calling toll-free at 1-866-718-0097.

Verification Process. For either a request to know or delete, we will verify your identity before responding to your request. To verify your identity, we will generally match the identifying information provided in your request with the information we have on file about you. Depending on the sensitivity of the information requested, we may also utilize more stringent verification methods to verify your identity, including but not limited to requesting additional information from you and/or requiring you to sign a declaration under penalty of perjury.

Notice of Sale. We do not sell California resident information, nor have we sold California resident information in the past 12 months. To the extent any First American affiliated entity has a different practice, it will be stated in the applicable privacy policy. We have no actual knowledge of selling the information of minors under the age of 16.

Right of Non-Discrimination. You have a right to exercise your rights under California law, including under the CCPA, without suffering discrimination. Accordingly, First American will not discriminate against you in any way if you choose to exercise your rights under the CCPA.

Notice of Collection. To learn more about the categories of personal information we have collected about California residents over the last 12 months, please see "What Information Do We Collect About You" in https://www.firstam.com/privacy-policy. To learn about the sources from which we have collected that information, the business and commercial purpose for its collection, and the categories of third parties with whom we have shared that information, please see "How Do We Collect Your Information", "How Do We Use Your Information", and "How Do We Share Your Information" in https://www.firstam.com/privacy-policy.

Notice of Sale. We have not sold the personal information of California residents in the past 12 months.

Notice of Disclosure. To learn more about the categories of personal information we may have disclosed about California residents in the past 12 months, please see "How Do We Use Your Information" and "How Do We Share Your Information" in https://www.firstam.com/privacy-policy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Engeo Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 6289-4502-8585

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRES (2)

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE
FOR CLIENT

To evaluate the potential for possible environmentally related impacts and site contamination the following information is requested. This questionnaire is to be completed by the user of the phase one environmental site assessment, or their authorized representative.

PART I

1. Property address and Assessor's Parcel Number (APN):

38600 Cedar Blvd., Newark; 92A-2585-12-1 and 92A-2585-31.

2. Current property owner (name, address, voice/fax number):

Ohana Land Company, LLC

3. Date current property owner assumed title of property:

Unknown

4. Current property development/improvements:

Heavy construction equipment sales/parts/service

5. Past property use, development/improvements:

Unknown

6. Neighboring property uses:

Industrial, residential, commercial, motel

PART II

Unk: unknown

1.	Are you aware of any environmental cleanup liens against the *property* that are filed under federal, tribal, local or state law?	☐ Yes	☒ Unk	
2.	Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state or local law?	☐ Yes	☒ Unk	
3.	Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐ Yes	☒ No	
4.	If a property transaction is occurring in conjunction with this environmental assessment, does the purchase price of this *property* reasonably reflect the fair market value of the *property*?	☐ Yes	☒ Unk	
5.	If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property?*	☐ Yes	☐ No	☒ N/A
6.	Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a) do you know of specific chemicals that are present or once were present at the *property*? (b) do you know of spills or other chemical releases that have taken place at the *property*? (c) do you know of any environmental cleanups that have taken place at the *property*?	☐ Yes	☒ Unk	
7.	Based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?	☐ Yes	☒ Unk	

If a "Yes" response was provided to any of the above questions, please provide details below:

I certify that the information herein is true and correct to the best of my knowledge as of the date signed below.

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE
FOR KEY SITE MANAGER

To evaluate the potential for possible environmentally related impacts and site contamination the following information is requested. This questionnaire is to be preferably completed by the current property owner, or owner representative, leasing agent, or other person having good knowledge of the uses and physical characteristics of the property (Key Site Manager).

PART I

1. Property Address/Location and Assessor's Parcel Number (APN):

38600 Cedar Blvd., Newark; 92A-2585-12-1 and 92A-2585-31

2. Current property owner (name, address, voice/fax number):

Ohana Land Company, LLC

3. Date current property owner assumed title of property:

2009

4. Current property development/improvements:

Heavy construction equipment sales/parts/service

5. Past property use, development/improvements:

Unknown

6. Neighboring property uses:

Industrial, residential, commercial, motel

PART II - The following questions should be answered to the best of your knowledge.

Unk: unknown

1. Is/has the *property* or any adjoining property used/been used for industrial purposes?	☒ Yes	☐ No
2. Has the *property* or any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	☐ Yes	☒ Unk
3. Are there currently, or have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal in volume or 50 gal in the aggregate, stored on or used at the *property* or at the facility?	☒ Yes	☐ No
4. Has undocumented soil been brought onto the property at any time? If yes, estimated quantity is _____ cubic yards.	☐ Yes	☒ Unk
5. Has soil been brought onto the property that originated from a contaminated site or that is of an unknown origin?	☐ Yes	☒ Unk
6. Are there currently, or have there been previously, any pits, ponds, or lagoons located on the *property* in connection with waste treatment or waste disposal?	☐ Yes	☒ Unk
7. Is there currently, or has there been previously, any stained soil on the *property*?	☒ Yes	☐ No
8. Are there currently, or have there been previously, any registered or unregistered storage tanks (above or underground) located on the *property*?	☒ Yes	☐ No
9. Are there currently, or have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the *property* or adjacent to any structure located on the *property*?	☐ Yes	☒ Unk
10. Are there currently, or have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?	☐ Yes	☒ Unk
11. Are there any domestic, irrigation or monitoring wells on the property?	☒ Yes	☐ No
12. If the *property* is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?	☐ Yes	☒ No
13. Have you been informed of the past or current existence of *hazardous substances* or *petroleum products* or environmental violations with respect to the *property* or any facility located on the *property*?	☒ Yes	☐ No
14. Have there been any *environmental site assessments* of the *property* or facility that indicated the presence of *hazardous substances* or *petroleum products* on, or contamination of, the *property* or recommended further assessment of the *property*?	☒ Yes	☐ No
15. Have there been any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any *hazardous substance* or *petroleum products* involving the *property*?	☐ Yes	☒ No
16. Has there been any past agricultural use of the *property*, such as orchards or seed crop cultivation?	☐ Yes	☒ Unk
17. Have any *hazardous substances* or *petroleum products*, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the *property*?	☐ Yes	☒ Unk
18. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	☐ Yes	☒ Unk

If a "Yes" response was provided to any of the above questions, please provide details below:

#1: Heavy construction equipment sales/parts/service

#3: See #1

#7: Previous fuel and waste oil spill. Mitigated.

#8: Five USTs removed 1989.

#11: Existing monitoring wells (two off-site), associated with former USTs.

#13: Soil, groundwater, and soil gas impacts documented (see ENGEO reports).

#14: See #13.

I certify that the information herein is true and correct to the best of my knowledge as of the date signed below.

SPECIALIZATIONS
- Environmental Assessments and Remediation
- Environmental Restoration
- Water Quality Studies
- Water Wells/Hydrogeology

Since 1985, Shawn has been managing groundwater supply evaluations, hydrogeologic studies, chemical assessments, Phase I and II Site Assessments, UST site investigations, risk-based corrective action (RBCA), VOC remediation, and agricultural impact evaluations. He serves as Principal-in-Charge or Project Manager with extensive expertise in environmental and hazardous materials projects involving groundwater, hydrology, contaminant fate and transport, and complex remediation programs. A renowned expert in his field, Shawn has successfully solved many difficult environmental challenges to achieve desired project outcomes.

SELECT PROJECT EXPERIENCE

Heritage Fields, Great Park Neighborhoods—Irvine, CA
Principal in Charge. Shawn provided principal oversight of the preparation of over 50 phase I and Phase II Environmental Site Assessments for the former El Toro Marine Corps Air Station (MCAS). The site is currently under development as a large-scale mixed-use development including several schools, residential subdivisions, recreational facilities and commercial development. Shawn also provided consultation regarding environmental site characterization and remediation at the site.

Hanover Cannery Park Project No. 14-473—San Jose, CA
Principal in Charge. Shawn provided principal oversight and review of the Phase I ESA, and soil, groundwater, and soil gas sampling. The historical use of the site resulted in chlorinated solvent impacts to groundwater and soil gas. Results were communicated to the client as well as the oversight regulatory agency to come with the proposed remediation. The project consists of redeveloping an approximately 9-acre commercial/industrial property listed on the California Regional Water Quality Control Board's GeoTracker database as an open site assessment cleanup program site. Elevated concentrations of VOCs (specifically PCE and TCE) have been previously detected in soil, groundwater, and soil gas at the property.

Mission Village—Valencia, CA
Principal in Charge. Shawn provided principal oversight of multiple phase I/II environmental site assessments and site remediation. The project site consists of a large scale, residential and mixed-use subdivision, which was a former oil/gas production field, with more than 40 abandoned oil/gas wells.

Vita Pakt—Covina, CA
Principal in Charge. Shawn provided principal oversight of phase I/II environmental site assessments and risk evaluations. The approximately 5.9-acre site formerly operated as fruit processing and dehydration business (ceased operation by 2016) and is planned to be redeveloped into residential housing. Subsurface soil gas impacts were identified in association with past operations.

Innovation at Warm Springs—Fremont, CA
Principal in Charge. Shawn provided oversight of the preparation of Phase I and II ESAs, along with a Preliminary Endangerment Assessment (PEA) for a new elementary school site. The approximately 109-acre site is currently occupied by a parking lot, warehouse buildings, agricultural fields, and UPRR railroad tracks. The southern portion of the Property was a part of the former auto manufacturing and distribution facility jointly owned by Toyota and General Motors. The northern portion of the Property has been used for agricultural purposes since at least the late 1930s. Additionally, railroad tracks are present along the eastern boundary of the Property.

Former gasoline ASTs existed on the Property, along with a pump station and fuel dispensers, which were removed in 2010. The former car wash area also had a wastewater recovery system, which included oil/water separators, clarifiers, and interceptor tanks. One UST was located in the southeast portion of the agricultural fields, which was removed in 2004. Four 10,000-gallon diesel and gasoline USTs were formerly located in the southwestern portion of the Property in the haul-away parking lot area. Mixed-use redevelopment is planned for the Property. A phase II ESA was recommended for the Site, including soil and groundwater sampling.

277 Fairchild 228/236 Evandale Ave—Mountain View, CA
Principal in Charge. Shawn provided oversight of soil, groundwater and soil gas characterizations, risk evaluations and Response Action Plan preparation under USEPA oversight. The site is within the Middlefield-Ellis-Whisman (MEW) Superfund site, contaminated with chlorinated solvents from legacy semiconductor plant operations. On-going remedial activities included soil vapor extraction, groundwater treatment using bioaugmentation, and groundwater/soil gas monitoring. The proposed site development consists of detached single-family homes and townhomes.

The Rivers—West Sacramento, CA
Principal in Charge. Shawn provided oversight of during the preparation of a Removal Action Workplan (RAW) in coordination with CAL-EPA DTSC. The property is a proposed charter school site. ENGEO performed environmental site characterization work to address residual pesticide contamination die to historic termiticide applications. A Removal Action Workplan was developed under the oversight of CAL-EPA to excavate and remove the pesticide impacted soils. Remedial activities were completed in 2018 and DTSC issued a “no further action” letter.

Sparklizing Cleaners and Laundry—Fremont, CA
Group Leader, Principal in Charge, Project Manager. Shawn provided principal review and data analysis for this former dry cleaning facility, which had released tetrachloroethylene (PCE) to site soil and groundwater.

The project site consists of a dry-cleaning facility located within a commercial/retail center. Dry-cleaning operations have been conducted at the facility since 1974 and have resulted in chlorinated solvent impacts to soil and groundwater beneath the site. As a result, the CRWQCB opened a Spills, Leaks, Investigations, and Cleanups (SLIC) case and the site was referred to the Alameda County Water District (ACWD) for lead agency oversight. A series of soil and

groundwater investigations identified a source area beneath the drycleaner suite and an adjoining retail suite. ENGEO prepared a Corrective Action Plan (CAP) and coordinated the in-situ chemical oxidation program, which consisted of injecting 35,000 gallons of potassium permanganate to the subsurface to oxidize chlorinated solvents. The project is currently in the post remediation monitoring phase.

Pleasant Hill BART Station—Walnut Creek, CA
Principal in Charge. Shawn provided oversight, data analysis and consultation during the preparation of a Phase II Environmental Site Assessment. The property is an existing BART station that encompasses 20 acres, including the platform/station area, electrical facilities, a parking garage and additional paved parking areas.

Westshore—Richmond, CA
Project Manager. Shawn conducted Phase I and II Site Assessments, risk evaluations and prepared a soil management plan. The property was a former automotive manufacturing plant proposed for a multi-unit condominium development, including a 6-story podium structure to include five residential floors with 269 units and one parking floor.

Rancho Miramonte—Chino, CA
Principal in Charge. Shawn performed Principal review of ENGEO's environmental documents for this large former dairy facility, proposed for a large-scale detached single-family residential subdivision. Issues with the site included former leaking USTs, nitrate impacts from manure disposal, and surface water impairments. The project was approved for development by the County Environmental Health Department.

Hercules Property—Hercules, CA
Project Manager. Shawn provided oversight of a Phase I Environmental Site Assessment, site asbestos survey, site characterization, and demolition observation/contaminant assessment. The project area consists of ±167 acres located near and along the southeastern shore of San Pablo Bay in Hercules. The property was once a portion of a 1300-acre manufacturing facility that was operated by DuPont from 1879 to 1913 and Hercules Incorporated from 1913 to 1979. The planned development includes single/multi-family residential development with some commercial components.

Highlands Ranch—Pittsburgh, CA
Principal in Charge. Shawn provided oversight, data analysis, and collaboration with RWQCB personnel. The project site consists of a 140-acre portion of the former Chevron Los Medanos Tank Farm located in Pittsburg, California. The site was historically occupied by 24 crude oil tanks and four wax ponds. Remediation of the crude oil tank and wax pond locations was conducted according to a remedial action plan (RAP) and oversight was provided by the CRWQCB. Remediation was performed over a period of four months and consisted of excavating approximately 110,000 cubic yards of impacted soil and placing the material in windrows for ex-situ bioremediation.

PHASE II ENVIRONMENTAL SITE ASSESSMENT

We are pleased to submit this phase II environmental site assessment (ESA) for soil, groundwater, and soil gas characterization at the subject property (Property), located at 38600 Cedar Boulevard in Newark, California (Figure 1).

BACKGROUND

The Property is approximately 3.5 acres in area and consists of two parcels identified with Assessor's Parcel Numbers (APNs) 92A-2585-12-1 and 92A-2585-31. The Property is an open Leaking Underground Storage Tank (LUST) case with the Alameda County Water District (ACWD) and the San Francisco Bay Regional Water Quality Control Board (RWQCB); *Nortrax West (T0600100516)*.

The Property is designated as medium density residential under the City's current general plan, permitting 14 to 30 homes per net acre. The proposed development is consistent with the City's housing element and provides seventy-six (76) three-story townhomes at an approximate density of 20 homes per acre designing around and accommodating the many existing underground utilities in their current location.

This assessment was performed to address remaining impediments to closure and future development, which included additional soil, groundwater, and soil gas testing near the former underground storage tanks (USTs, Figure 2). Further sampling of the existing eight groundwater monitoring wells was also part of the scope.

BACKGROUND

Nortrax West (GeoTracker case ID T0600100516) is the open cleanup case pertaining to the Property. The Property has been occupied by various construction and agricultural equipment rental, sales, and/or repair businesses throughout its history. The first known tenant was International Harvester Company. The site was purchased by the Horton family in the 1970s. Between 1975 and 1979, the western warehouse was constructed. Horton Equipment Company operated at the Property until 1985, at which time Empire Tractor and Equipment Company began leasing the site. Nortrax purchased Empire in 2001 and were subsequently purchased by Papé Machinery in 2005, which remains the current tenant.

The following summarizes relevant past documentation and reports associated with the Property.

One 10,000-gallon diesel underground storage tank (UST), one 10,000-gallon gasoline UST, and two 550-gallon diesel USTs were formerly located in the eastern area of the 38683 Timber Street parcel. A former 550-gallon waste oil tank was located in the southern area of the parcel, south of the building, near Cedar Boulevard. The 10,000-gallon gasoline UST, 10,000-gallon diesel UST, 550-gallon diesel UST, and 550-gallon waste oil tank were known to exist when the Property was purchased by the current owner in the 1970s. An additional 500-gallon diesel UST was discovered during the UST removal in 1989. Four groundwater monitoring wells (MW-1 through MW-4) were first installed in the vicinity of the known fuel USTs in 1986, in accordance with ACWD regulations for USTs. Soil samples were collected from the unsaturated zone at depths targeted near the bottom of each nearest UST (7 to 13 feet bgs). This initial sampling did not detect total petroleum hydrocarbons (TPH) above laboratory reporting limits.

A semi-annual groundwater monitoring event in March 1988 did not indicate significant concentrations of TPH or VOCs. However, a subsequent semi-annual groundwater monitoring event conducted in October 1988 reported 1/16th inch of light non-aqueous phase liquid, reportedly diesel, in the sample collected from MW-2. The sample from MW-2 had a concentration of 230,000 µg/L of TPH as gasoline (TPH-g). An UST release report was filed by the Newark Fire Department with ACWD. The 500-gallon diesel UST was ordered to be emptied immediately and removed. All USTs were removed from the site in April 1989 under oversight of the Fire Department and ACWD. During tank excavations and removals, the additional 500-gallon diesel UST was discovered. In total, five tanks were removed, and visibly contaminated soil was excavated for disposal (Ramboll, 2016).

Quarterly groundwater monitoring was conducted intermittently between 1991 and 1993, 1997 and 1998, and in 2001, which indicated that contamination was not sufficiently remediated. According to the site history section on GeoTracker, TPH-g was detected in groundwater at concentrations up to 4,300 µg/L in 1992. In 1993, total petroleum hydrocarbons as diesel (TPH-d) were detected in groundwater in concentrations up to 120,000 µg/L. Methyl tert-butyl ether (MTBE) was either non-detect or detected at very low levels in soil and groundwater. Chlorinated volatile organic compounds (VOCs) were also detected onsite. Tetrachloroethylene (PCE) was detected in groundwater at a concentration of 160 µg/L; 1,1-trichloroethane (TCA) was detected up to 180 µg/L; and 1,1, -Dichloroethane (DCA) was detected up to 57 µg/L (Ramboll, 2016).

Hydro Analysis, Report of Subsurface Investigation, Nortrax West, 38600 Cedar Boulevard, Newark, California; November 16, 2004.

Hydro Analysis, Inc. conducted an investigation in 2004 to delineate the horizontal and vertical extent of groundwater impacts and to potentially install additional groundwater monitoring wells. Fourteen borings were installed on site and downgradient to the south of the site to depths of 20 feet bgs. Soil samples were collected at 5 and 10 feet in the borings and 15 feet in select borings. All soil samples were analyzed for TPH, BTEX, and MTBE. Select samples were analyzed for VOCs. Grab groundwater samples were collected at each location and analyzed for TPH, BTEX, MTBE, and VOCs. Two deeper groundwater samples were collected at 55 to 60 feet bgs from CPT locations and analyzed for TPH, BTEX, MTBE, and VOCs. Results of the soil sampling in the vicinity of the former fuel UST cluster reported low concentrations of TPH-g and TPH-d in shallow samples and low concentrations of BTEX in the 5 feet bgs sample. Soil

sampling in the vicinity of the former waste oil UST reported low concentrations of TPH and BTEX. Downgradient soil samples did not report TPH or BTEX above reporting limits. Low concentrations of PCE were reported in deeper samples in the vicinity of the former waste oil UST. 1,1-DCA was detected in the 15 feet bgs sample. The only exceedance of regulatory screening criteria for all soil samples was the concentration of TPH-d in the 5 feet bgs sample. Results of groundwater samples reported low concentrations of TPH-d in the vicinity of the former fuel UST cluster. Low concentrations of TPH, BTEX, and VOCs were also detected in samples collected in the vicinity and downgradient of the former waste oil UST. In general, concentrations of TPH and VOCs were consistent with those reported during periodic groundwater monitoring events at the site. TPH, MTBE, BTEX, or VOCs were not detected in deep groundwater samples from the Newark Aquifer.

Hydro Analysis, Report of Subsurface Investigation, Nortrax West, 38600 Cedar Boulevard, Newark, California; November 30, 2007.

A 2007 monitoring well installation was performed at the request of ACWD to determine the lateral extent of the VOC contamination. Four additional monitoring wells were installed at the site upgradient, cross gradient, and downgradient of the former waste oil UST. Soil samples were collected at 5-foot intervals to 20 feet bgs and analyzed for TPH, BTEX, MTBE, and VOCs. No concentrations of TPH or BTEX were detected in soil samples with the exception of one low TPH-d concentration. Low VOC concentrations were detected at two of the locations. No concentrations of TPHs or VOCs were above regulatory screening criteria. Groundwater sampling indicated low concentrations of TPH-d in two well locations and no other TPH, BTEX, or MTBE above reporting limits within the remaining. All four monitoring wells had at least one detection of a VOC, including low concentrations of PCE, 1,1,1-TCA, TCE, 1,1-DCA, and cis-1,2-DCE. PCE was detected in all four monitoring wells (Ramboll, 2016).

TRC; First Semi-Annual 2018 Groundwater Monitoring Report; 38600 Cedar Boulevard, Newark, California; June 22, 2018

The TRC report documents groundwater sampling performed in the summer of 2018. Groundwater monitoring was performed for wells MW-1 through MW-8. For wells MW-2 and MW-4, located in the upgradient portion of the site, analyses detected no TPH-g, benzene, ethylbenzene, xylenes, MTBE, or naphthalene. With the exception of one detection of TPH-d at 2,400 µg/L in MW-3, analyses detected no analytes exceeding respective MCLs.

Wells MW-1 and MW-5 through MW-8 are located in the downgradient portion of the Site. With the exception of 170 µg/L of TPH-mo at MW-1, analyses detected no concentrations of TPH-g, TPH-d, TPH-mo, BTEX, MTBE, or naphthalene in any of the downgradient wells.

Stantec, Documentation of Shallow Soil Sample Collection and Soil Vapor Sampling; 38600 Cedar Boulevard; Newark, California; October 18, 2018

Based on ACWD direction, Stantec attempted to redevelop three wells, MW-1 through MW-3. Only MW-2 was able to be redeveloped because MW-1 and MW-3 had bends in the wells. At the time of the report, Stantec was in discussion with ACWD to determine a path forward to repairing and redeveloping the damaged wells. One soil sample was obtained at 10 feet bgs. PCE was detected at 0.023 mg/kg. No VOCs, TPHs, or PAHs were detected. One soil vapor well was installed at the same location and analyzed for VOCs and helium. 1,1-DCE, carbon disulfide, 1,1-DCA, cis-1,2-DCE, 1,1,1-TCA, TCE, and PCE were detected. 1,1-DCA, TCE, and

PCE were detected above their respective ESLs.

Stantec proposed to install six additional soil vapor wells and the redevelopment of monitoring wells MW-1 and MW-3.

ENGEO, Phase II Environmental Site Assessment, 38600 Cedar Boulevard, Newark, California, August 28, 2020; Project No. 15799.001.000.

ENGEO conducted a phase II environmental site assessment in August 2020 to further address subsurface impacts, which included additional soil and soil gas testing near the former waste oil UST, further delineation of soil vapor impacts, and assessment and sampling of the existing eight monitoring wells.

Soil sampling included collection of a total of 16 samples from four boring locations at depths of 1, 5, 10, and 15 feet bgs. The samples were analyzed for TPH-g, VOCs, TPH-d, TPH-mo, and metals.

Grab groundwater sampling included collection of three samples from the five attempted boring locations (GW-1 through GW-5). Locations GW-3 and GW-5 did not exhibit sufficient recharge during sample collection. The three samples were analyzed for TPH-g, VOCs, TPH-d, and TPH-mo. Monitoring wells MW-1 through MW-7 were sampled and submitted for the same analyses as the grab groundwater samples.

Thirteen soil gas wells were also installed on the Property. Seven wells were installed as nested wells near the former waste oil tank at depths of 6 and 10 feet bgs and the remaining six soil vapor probes were installed to 6 feet bgs.

The soil samples exhibited detections of chromium, lead, nickel, and zinc. TPH-g, TPH-d, and TPH-mo were detected in various samples. One VOC, tert-butanol, was detected in three samples. All concentrations were below SFBRWQCB residential ESLs, with the exception of TPH-d.

The grab groundwater samples contained low concentrations of VOCs including PCE, TCE, cis-1, 2-DCE, 1,1-DCA, and isopropyl benzene, at concentrations below RWQCB Priority Maximum Contaminant Levels (MCLs). TPH was not detected above laboratory reporting limits. The monitoring well samples contained low concentrations of VOCs including PCE, TCE, cis-1,2-DCE, 1,1-DCE, vinyl chloride, 1,1-DCA, and 1,1,1-trichloroethane. MW-1 exhibited exceedances of PCE, TCE, cis-1,2-DCE, vinyl chloride, and 1,1-DCA, with respect to MCLs. PCE was additionally reported in exceedance of its screening levels in MW-7. Cis-1,2-dichloroethene was reported in exceedance of its MCL screening level in MW-7. TPH-g was reported at 209 µg/L in MW-1, below the MCL. Minor concentrations of TPH-d were reported in MW-2 and MW-3, both below the MCL. TPH-mo was not detected above laboratory reporting limits in any samples. Groundwater impacts appear to be localized to the immediate vicinity of the former waste oil tank and continue to attenuate based on historical monitoring events.

The soil gas samples exhibited various VOC detections. PCE, TCE, cis-DCE, and vinyl chloride were detected in a majority of the samples. PCE was in exceedance of RWQCB residential ESLs[1] in all except one sample (SG-10), at concentrations ranging between 27 and 36,000 micrograms per cubic meter (µg/m^3). TCE was in exceedance of ESLs for sample locations SG-2@6', SG-2@10', SG-3@10', SG-4@6', SG-4@10', SG-5@6', and SG-5@10', at concentrations ranging between 35 and 6,600 µg/m^3. Cis-1,2-DCE was reported in exceedance of its ESL at SG-4@10', SG-5@6', and SG-5@10', at concentrations ranging between 7,000 and 33,000 µg/m^3. Vinyl chloride was reported in exceedance of its ESL at SG-5@6' (1,900 µg/m^3) and SG-5@10' (2,000 µg/m^3). Other VOCs detected in samples exceeding ESLs included 1,1,2-trichloroethane, 1,1-DCA, benzene, carbon tetrachloride, chloroform, and naphthalene. TPH-g was reported in exceedance of its ESL for SG-1@6', SG-1@10', SG-2@10', SG-3@6', SG-4@10', SG-5@6' and SG-5@10'. Overall, soil gas impacts appear to the most concentrated in the vicinity of the former waste oil UST. Tables A through D provide a summary of the 2020 ENGEO data results.

ACWD - Request for Soil Gas Investigation, September 22, 2021.

In a September 2021 letter to Ohana Land Company, LLC (former Property owner), ACWD requested that an additional soil vapor and indoor air investigation be conducted. ACWD cited the soil gas results of ENGEO's previous phase II investigation, noting that the elevated VOC concentrations may pose a risk to human health. ACWD noted that the extent of VOC contamination in soil vapor should be defined onsite and offsite, and any potential vapor intrusion to indoor air pathways should be evaluated. Depending on the results of the investigation, a Corrective Action Plan to remediate and/or mitigate the soil vapor impact may be required.

ENGEO, Supplemental Environmental Assessment Work Plan, 38600 Cedar Boulevard, Newark, California; November 23, 2021 (Revised March 3, 2022). Project No. 15799.002.000.

ENGEO prepared a work plan to address remaining impediments to closure as part of ACWD's request. The following scope of work was proposed.

- Collection of soil gas samples from the existing 14 soil gas wells SV-1 and SG-1 through SG-13 for analysis of VOCs.
- Installation of eight additional permanent soil gas wells on the Property, including six on-site and two off-site along the southern side of Cedar Boulevard for analysis of VOCs.
- Collection of groundwater samples from monitoring wells MW-1 through MW-7 for analysis of TPH-g, VOCs, TPH-d, and TPH-mo (wells MW-8 could not be located and appeared to have been buried or damaged due to recent City of Newark landscape and sidewalk improvements).

2022 FIELD EXPLORATIONS

Additional drilling and sampling events took place in 2022 on July 13, July 15, August 5, August 23, and August 26. Prior to drilling, an ENGEO representative contacted the USA North Service Alert in addition to a private utility locator to facilitate notification to operators of

[1] San Francisco Bay Regional Water Quality Control Board ESLs for Subslab/ Soil Gas Vapor Intrusion ESL Levels, Residential (Interim Final 2019, Rev 1).

underground utilities at the Property. Drilling activities were performed by a C-57-licensed drilling contractor, utilizing Geoprobe® direct-push technology. All work was performed by an ENGEO environmental professional under the supervision of a registered professional engineer. See attached figure for sample locations (Figure 2).

Monitoring Well Sampling

Monitoring wells were sampled during the 2022 exploration. Monitoring wells MW-1 through MW-7 were purged of three well casing volumes and sampled using a peristaltic pump. Groundwater parameters were measured during purging to verify stabilization. MW-8 could not be located and has been buried or damaged due to recent City of Newark landscape and sidewalk improvements. The groundwater samples were then placed in laboratory-provided sample containers and submitted to Torrent Laboratory, Inc., for analysis of the following.

- TPH-g and VOCs (EPA Method 8260)
- TPH-d and TPH-mo (EPA Method 8015)

Soil Gas Sampling

The nine soil gas wells and the re-install of SG-10 were installed as shown on Figures 2 and 3. All 10 soil gas wells were installed to 6 feet below the ground surface. Twenty-seven total soil gas samples were collected. SG-2@10' was not able to be recovered as the well was destroyed.

All of the soil gas samples were recovered in accordance with Department of Toxic Substances Control (DTSC) *Final Advisory Active Soil Gas Investigations* (July 2015). The general sampling procedures are described as follows:

- The soil gas monitoring probes consisted of ¼-inch-diameter Teflon® tubing equipped with a filter at the base of tubing. Soil gas wells were installed with a direct-push rig, which was advanced with an approximately 2.5-inch-diameter boring, then were hand augered to a diameter of 4.5 inches. The well borings extended to a depth of 6 and 10 feet below the ground surface (bgs) for the wells installed in 2020 and 6 feet bgs for the wells installed in 2022, with a 1-foot sand layer at the base. A 2-inch bentonite seal surrounded the tubing within the well boring.
- After the 48-hour equilibration time elapsed, soil gas samples were collected from the wells. The sample train was connected to the well tubing by threading the permanent Swagelok® fitting on the well casing onto the manifold. The sample train consisted of a stainless-steel twin SUMMA manifold with a built-in flow controller set to 150 milliliters per minute (ml/min).
- Prior to connecting the sample train to the well casing, a shut-in test was performed to assess for potential leaks. The shut-in test consisted of capping the end of the manifold, then applying a vacuum with the purge canister, closing the purge valve, and observing the vacuum gauge for 2 minutes to determine if there was a drop in vacuum.
- Once the sample train was connected to the well casing, three well volumes of soil gas were purged from each well prior to sampling at a flow rate of 150 ml/min. After purging was completed, the purge valve on the manifold was closed and the vacuum canister removed. Samples were collected by opening the sample canister valve and allowing the sample canister to extract soil gas until the vacuum in the sample canister reached approximately

5 inches of mercury. The leak detection compound 1,1-difluoroethane (1,1-DFA) was applied by wrapping a doused rag around the manifold fittings during sample collection.

- Sample canisters were labeled with a unique identification number, sampling time, and/or pre- and post-sample vacuum readings. The soil gas samples were submitted to Torrent Laboratory, Inc., for analysis of TPH-g (EPA Method TO-3M), VOCs (EPA Test Method TO-15), and fixed gases (ASTM D-1946) for the samples collected in 2020. The samples collected in 2022 were analyzed for VOCs (EPA Test Method TO-15), and the newly installed wells were tested for fixed gases (ASTM D-1946).
- Soil gas wells were retained at the Property. A flush-mount well box was installed at the ground surface for each of the wells.

Monitoring Well Sampling Results

The 2022 monitoring well samples contained low concentrations of VOCs, including PCE, TCE, and cis-1,2-DCE, 1,1-DCA, and 1,1,1-trichloroethane (1,1,1-TCA). Both MW-1 and MW-7 exhibited exceedances of PCE and cis-1,2-DCE with respect to MCLs.

TPH-g was reported at 136 micrograms per liter (µg/L) in 2022, below the applicable ESL. Minor concentrations of TPH-d were reported in MW-6 and MW-7, both below the MCL. TPH-mo was not detected above laboratory reporting limits.

We were unable to locate MW-8 during our field explorations in both 2020 and in 2022; however, previous sampling data indicates MW-8 has not exhibited concentrations above MCLs and is stable. A summary of well sample results is provided in Table C. Laboratory results are presented in Appendix A.

Soil Gas Sampling Results

Review of the soil gas results found detectable VOCs in all of the 19 samples. Chlorinated hydrocarbons PCE, TCE, cis-1,2-dichloroethene (cis-1,2-DCE), chloromethane, chloroethane, 1,1,1-trichloroethane, 1,1-dichloroethane, 1,2,4-trichlorobenzene, 1,1,2-trichloroethane (1,1-DCA), carbon tetrachloride, vinyl chloride, benzene, chloroform, ethyl benzene, and hexachlorobutadiene were detected in all but one sample. Samples with residential ESL exceedances are shown in Table B.

FINDINGS AND CONCLUSIONS

Soil Samples

Previous soil sampling conducted at the Property have not identified residual soil impacts of significance. No soil mitigation appears necessary for the Property; however, we anticipate a Soil Management Plan (SMP) will be prepared for future site development to address potential unforeseen subsurface impacts.

Grab Groundwater Samples

The 2020 grab groundwater samples did not exhibit TPH-g, TPH-d, TPH-mo, or VOCs in exceedance of RWQCB ESL MCLs. Monitoring wells MW-1 and MW-7, both within the vicinity of the former waste oil UST, exhibited concentrations of PCE above the MCL (5 µg/L) at

concentrations of 61 and 10 µg/L, respectively. TCE, cis-1,2-DCE, vinyl chloride, and 1,1-DCA were also detected in concentrations exceeding MCLs for MW-1. cis-1,2-DCE was detected above the MCL for MW-7. We were unable to locate MW-8 to further assess downgradient impacts; however, PCE, the primary constituent of concern, was reported at 2 µg/L in TRC's 2018 monitoring event, below the MCL, at MW-8. Impacts appear to be localized to the immediate vicinity of the former waste oil tank and continue to attenuate.

Monitoring Well Samples

The 2022 groundwater samples did not exhibit TPH-g, TPH-d, TPH-mo, or VOCs in exceedance of RWQCB ESL MCLs. Monitoring wells MW-1 and MW-7, both within the vicinity of the former waste oil UST, exhibited concentrations of PCE above the MCL (5 µg/L) at concentrations of 61 and 10 µg/L, respectively. TCE, cis-1,2-DCE, vinyl chloride, and 1,1-DCA were also detected in concentrations exceeding MCLs for MW-1. cis-1,2-DCE was detected above the MCL for MW-7. We were unable to locate MW-8 to further assess downgradient impacts; however, PCE, the primary constituent of concern, was reported at 2 µg/L in TRC's 2018 monitoring event, below the MCL, at MW-8. Impacts appear to be localized to the immediate vicinity of the former waste oil tank and continue to attenuate based on historic monitoring events. Figure 3 provides the approximate area of residual impacts based on PCE concentrations above MCLs. No further groundwater monitoring is recommended for the Property.

Soil Gas Samples

Numerous VOCs were detected in soil gas samples exceeding ESLs including tetrachloroethylene (PCE), trichloroethylene (TCE), vinyl chloride, 1,1-dichloroethane, 1,1,2-trichloroethane (1,1-DCA), 1,2,4-trichlorobenzene, cis-1,2-dichloroethene (Cis-1,2-DCE), benzene, chloroform, ethyl benzene, and hexachlorobutadiene. Elevated concentrations of PCE were detected in 23 of the 27 samples.

These impacts appear to the most concentrated in the vicinity of the former waste oil UST, and there is some evidence of reductive de-chlorination occurring within the plume. Figure 3 provides an approximation of soil vapor plume, based on the data available, for PCE concentrations in exceedance of ESLs.

RECOMMENDATIONS

Former Leaking Underground Tank (LUST) Closure

The area of the former diesel/gasoline fuel tank area in the southeastern area of the Property appears to meet applicable *RWQCB Low Threat Closure Policy* criteria, as the source has been removed and groundwater concentrations are stable/decreasing. No additional monitoring or mitigation appears necessary for petroleum-related constituents; however, elevated PCE has been detected in soil gas within this area (SG-11), which may require further assessment and/or mitigation. No further groundwater monitoring is recommended for the Property.

Soil Gas Impacts - Former Waste Oil Tank

PCE concentrations in exceedance of the ESL have been noted for a number of the soil gas sampling locations. Based on current data, an approximate PCE vapor plume delineation was developed, as depicted on Figure 4. The plume extends from the area of the former waste oil tank location toward the north. Based on the soil gas samples recovered along Cedar Boulevard (SG-14, SG-15), no significant soil gas concentrations exist to the south of the Property; therefore, the plume is limited to the subject Property.

A soil vapor extraction (SVE) system will likely be required across portions of the southern-central area to mitigate the noted PCE impacts. A remedial action workplan (RAW) should be prepared to address SVE methodology and goals. A long-term vapor intrusion mitigation (VIMS) system will likely be required for structures overlying the vapor plume to address residual post-remediation impacts.

Sincerely,

ENGEO Incorporated

Notes:
Results are shown in µg/m³ (micrograms per cubic meter) or percent (fixed gases only).
NA = not analyzed
ND = not detected
'--' means screening level not reported
BOLD indicates the concentration was detected above laboratory reporting limits.
Highlighted values exceed residential screening criteria with 0.3 attenuation factor.
Highlighted values exceed residential screening criteria with 0.001 attenuation factor.

<XX = the constiuent was reported below the reporting limit for that consituent

Dear Monica Kunzel:

Torrent Laboratory, Inc. received 6 sample(s) on July 15, 2022 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

Kathie Evans
Project Manager

July 22, 2022
Date

Date: 7/22/2022

Client: Engeo (San Ramon)

Project: Cedar Boulevard

Work Order: 2207108

CASE NARRATIVE

Unless otherwise indicated in the following narrative, no issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Laboratory, Inc.

Torrent LABORATORY, INC.

Sample Result Summary

Report prepared for: Monica Kunzel
Engeo (San Ramon)

Date Received: 07/15/22
Date Reported: 07/22/22

MW-1 2207108-001

Parameters:	Analysis Method	DF	MDL	PQL	Results	Unit
TPH Gasoline	8260TPH	1	29	50	136	ug/L
1,1-Dichloroethane	SW8260B	1	0.12	0.50	3.3	ug/L
cis-1,2-Dichloroethene	SW8260B	1	0.15	0.50	19	ug/L
1,1,1-Trichloroethane	SW8260B	1	0.16	0.50	3.8	ug/L
Trichloroethylene	SW8260B	1	0.15	0.50	3.1	ug/L
Tetrachloroethylene	SW8260B	1	0.24	0.50	32	ug/L

MW-2 2207108-002

Parameters:	Analysis Method	DF	MDL	PQL	Results	Unit

All compounds were non-detectable for this sample.

MW-4 2207108-003

Parameters:	Analysis Method	DF	MDL	PQL	Results	Unit

All compounds were non-detectable for this sample.

MW-5 2207108-004

Parameters:	Analysis Method	DF	MDL	PQL	Results	Unit
cis-1,2-Dichloroethene	SW8260B	1	0.15	0.50	0.59	ug/L
Trichloroethylene	SW8260B	1	0.15	0.50	0.51	ug/L
Tetrachloroethylene	SW8260B	1	0.24	0.50	3.2	ug/L

MW-6 2207108-005

Parameters:	Analysis Method	DF	MDL	PQL	Results	Unit
TPH Gasoline	8260TPH	1	29	50	51.2	ug/L
cis-1,2-Dichloroethene	SW8260B	1	0.15	0.50	2.3	ug/L
Trichloroethylene	SW8260B	1	0.15	0.50	1.1	ug/L
Tetrachloroethylene	SW8260B	1	0.24	0.50	2.4	ug/L

MW-7 2207108-006

Parameters:	Analysis Method	DF	MDL	PQL	Results	Unit
TPH Gasoline	8260TPH	1	29	50	66.1	ug/L
1,1-Dichloroethane	SW8260B	1	0.12	0.50	1.2	ug/L
cis-1,2-Dichloroethene	SW8260B	1	0.15	0.50	13	ug/L
1,1,1-Trichloroethane	SW8260B	1	0.16	0.50	0.73	ug/L
Trichloroethylene	SW8260B	1	0.15	0.50	1.3	ug/L
Tetrachloroethylene	SW8260B	1	0.24	0.50	6.3	ug/L

Laboratory Qualifiers and Definitions

DEFINITIONS:

Accuracy/Bias (% Recovery) - The closeness of agreement between an observed value and an accepted reference value.
Blank (Method/Preparation Blank) -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
Duplicate - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
Laboratory Control Sample (LCS ad LCSD) - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
Matrix - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
Matrix Spike (MS/MSD) - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
Method Detection Limit (MDL) - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ) - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
Precision (%RPD) - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
Surrogate (S) or (Surr) - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
Tentatively Identified Compound (TIC) - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
Units: the unit of measure used to express the reported result - **mg/L** and ***mg/Kg*** (equivalent to PPM - parts per million in **liquid** and ***solid***), **ug/L** and ***ug/Kg*** (equivalent to PPB - parts per billion in **liquid** and ***solid***), **ug/m3**, ***mg/m3***, **ppbv** and ***ppmv*** (all units of measure for reporting concentrations in air), **%** (equivalent to 10000 ppm or 1,000,000 ppb), **ug/Wipe** (concentration found on the surface of a single Wipe usually taken over a 100cm2 surface)

LABORATORY QUALIFIERS:

B - Indicates when the analyte is found in the associated method or preparation blank
D - Surrogate is not recoverable due to the necessary dilution of the sample
E - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.
H- Indicates that the recommended holding time for the analyte or compound has been exceeded
J- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative
NA - Not Analyzed
N/A - Not Applicable
ND - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.
NR - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added
R- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts
S- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative
X -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

Sample Receipt Checklist

Client Name: Engeo (San Ramon)

Project Name: Cedar Boulevard

Work Order No.: 2207108

RE: Cedar Boulevard

Work Order No.: 2207124

Dear Monica Kunzel:

Torrent Laboratory, Inc. received 1 sample(s) on July 15, 2022 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

Kathie Evans
Project Manager

July 22, 2022
Date

Date: 7/22/2022

Client: Engeo (San Ramon)

Project: Cedar Boulevard

Work Order: 2207124

CASE NARRATIVE

Unless otherwise indicated in the following narrative, no issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Laboratory, Inc.

Laboratory Qualifiers and Definitions

DEFINITIONS:

Accuracy/Bias (% Recovery) - The closeness of agreement between an observed value and an accepted reference value.
Blank (Method/Preparation Blank) -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
Duplicate - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
Laboratory Control Sample (LCS ad LCSD) - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
Matrix - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
Matrix Spike (MS/MSD) - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
Method Detection Limit (MDL) - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ) - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
Precision (%RPD) - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
Surrogate (S) or (Surr) - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
Tentatively Identified Compound (TIC) - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
Units: the unit of measure used to express the reported result - **mg/L** and ***mg/Kg*** (equivalent to PPM - parts per million in **liquid** and ***solid***), **ug/L** and ***ug/Kg*** (equivalent to PPB - parts per billion in **liquid** and ***solid***), **ug/m3**, ***mg/m3***, **ppbv** and ***ppmv*** (all units of measure for reporting concentrations in air), **%** (equivalent to 10000 ppm or 1,000,000 ppb), **ug/Wipe** (concentration found on the surface of a single Wipe usually taken over a 100cm2 surface)

LABORATORY QUALIFIERS:

B - Indicates when the analyte is found in the associated method or preparation blank
D - Surrogate is not recoverable due to the necessary dilution of the sample
E - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.
H- Indicates that the recommended holding time for the analyte or compound has been exceeded
J- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative
NA - Not Analyzed
N/A - Not Applicable
ND - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.
NR - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added
R- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts
S- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative
X -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

Sample Receipt Checklist

Client Name: Engeo (San Ramon)

Project Name: Cedar Boulevard

RE: Cedar Boulevard

Work Order No.: 2207125

Dear Monica Kunzel:

Torrent Laboratory, Inc. received 16 sample(s) on July 15, 2022 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

Kathie Evans
Project Manager

July 22, 2022
Date

Date: 7/22/2022

Client: Engeo (San Ramon)

Project: Cedar Boulevard

Work Order: 2207125

CASE NARRATIVE

Unless otherwise indicated in the following narrative, no issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Laboratory, Inc.

SAMPLE RESULTS

Report prepared for: Monica Kunzel
Engeo (San Ramon)

Date/Time Received: 07/15/22, 5:37 pm
Date Reported: 07/22/22

Client Sample ID:	SG-13	**Lab Sample ID:**	2207125-016A
Project Name/Location:	Cedar Boulevard	**Sample Matrix:**	Air
Project Number:	15799.004.000		
Date/Time Sampled:	07/13/22 / 14:10	**Certified Clean WO # :**	
Canister/Tube ID:	A12193	**Received PSI :**	11.9
Collection Volume (L):		**Corrected PSI :**	
SDG:			

Prep Method:	TO15-P	**Prep Batch Date/Time:**	7/18/22	12:00:00PM
Prep Batch ID:	1143357	**Prep Analyst:**	BPATEL

Laboratory Qualifiers and Definitions

DEFINITIONS:

Accuracy/Bias (% Recovery) - The closeness of agreement between an observed value and an accepted reference value.
Blank (Method/Preparation Blank) -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
Duplicate - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
Laboratory Control Sample (LCS ad LCSD) - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
Matrix - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
Matrix Spike (MS/MSD) - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
Method Detection Limit (MDL) - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ) - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
Precision (%RPD) - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
Surrogate (S) or (Surr) - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
Tentatively Identified Compound (TIC) - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
Units: the unit of measure used to express the reported result - **mg/L** and ***mg/Kg*** (equivalent to PPM - parts per million in **liquid** and ***solid***), **ug/L** and ***ug/Kg*** (equivalent to PPB - parts per billion in **liquid** and ***solid***), **ug/m3**, ***mg/m3***, **ppbv** and ***ppmv*** (all units of measure for reporting concentrations in air), **%** (equivalent to 10000 ppm or 1,000,000 ppb), **ug/Wipe** (concentration found on the surface of a single Wipe usually taken over a 100cm2 surface)

LABORATORY QUALIFIERS:

B - Indicates when the analyte is found in the associated method or preparation blank
D - Surrogate is not recoverable due to the necessary dilution of the sample
E - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.
H- Indicates that the recommended holding time for the analyte or compound has been exceeded
J- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative
NA - Not Analyzed
N/A - Not Applicable
ND - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.
NR - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added
R- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts
S- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative
X -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

Sample Receipt Checklist

Client Name: Engeo (San Ramon)

Project Name: Cedar Boulevard

RE: Cedar Blvd

Work Order No.: 2208064 Rev: 1

Dear Monica Kunzel:

Torrent Laboratory, Inc. received 2 sample(s) on August 05, 2022 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

Kathie Evans
Project Manager

August 12, 2022
Date

Date: 8/12/2022

Client: Engeo (San Ramon)

Project: Cedar Blvd

Work Order: 2208064

CASE NARRATIVE

Unless otherwise indicated in the following narrative, no issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Laboratory, Inc.

REVISIONS

Report revised to include oxygen data.

Rev. 1 (9/2/22)

Torrent LABORATORY, INC.

Laboratory Qualifiers and Definitions

DEFINITIONS:

Accuracy/Bias (% Recovery) - The closeness of agreement between an observed value and an accepted reference value.
Blank (Method/Preparation Blank) -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
Duplicate - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
Laboratory Control Sample (LCS ad LCSD) - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
Matrix - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
Matrix Spike (MS/MSD) - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
Method Detection Limit (MDL) - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ) - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
Precision (%RPD) - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
Surrogate (S) or (Surr) - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
Tentatively Identified Compound (TIC) - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
Units: the unit of measure used to express the reported result - **mg/L** and ***mg/Kg*** (equivalent to PPM - parts per million in **liquid** and ***solid***), **ug/L** and ***ug/Kg*** (equivalent to PPB - parts per billion in **liquid** and ***solid***), **ug/m3**, ***mg/m3***, **ppbv** and ***ppmv*** (all units of measure for reporting concentrations in air), **%** (equivalent to 10000 ppm or 1,000,000 ppb), **ug/Wipe** (concentration found on the surface of a single Wipe usually taken over a 100cm2 surface)

LABORATORY QUALIFIERS:

B - Indicates when the analyte is found in the associated method or preparation blank
D - Surrogate is not recoverable due to the necessary dilution of the sample
E - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.
H- Indicates that the recommended holding time for the analyte or compound has been exceeded
J- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative
NA - Not Analyzed
N/A - Not Applicable
ND - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.
NR - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added
R- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts
S- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative
X -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

Sample Receipt Checklist

Client Name: Engeo (San Ramon)

Project Name: Cedar Blvd

Work Order No.: 2208064

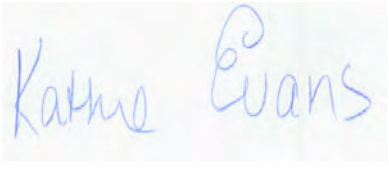
RE: 38600 Cedar Blvd



Work Order No.: 2208230

Dear Monica Kunzel:

Torrent Laboratory, Inc. received 9 sample(s) on August 26, 2022 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

Kathie Evans
Project Manager

September 02, 2022
Date

Date: 9/2/2022

Client: Engeo (San Ramon)

Project: 38600 Cedar Blvd

Work Order: 2208230

CASE NARRATIVE

Unless otherwise indicated in the following narrative, no issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Laboratory, Inc.

Laboratory Qualifiers and Definitions

DEFINITIONS:

Accuracy/Bias (% Recovery) - The closeness of agreement between an observed value and an accepted reference value.
Blank (Method/Preparation Blank) -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
Duplicate - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
Laboratory Control Sample (LCS ad LCSD) - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
Matrix - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
Matrix Spike (MS/MSD) - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
Method Detection Limit (MDL) - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ) - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
Precision (%RPD) - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
Surrogate (S) or (Surr) - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
Tentatively Identified Compound (TIC) - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
Units: the unit of measure used to express the reported result - **mg/L** and ***mg/Kg*** (equivalent to PPM - parts per million in **liquid** and ***solid***), **ug/L** and ***ug/Kg*** (equivalent to PPB - parts per billion in **liquid** and ***solid***), **ug/m3**, ***mg/m3***, **ppbv** and ***ppmv*** (all units of measure for reporting concentrations in air), **%** (equivalent to 10000 ppm or 1,000,000 ppb), **ug/Wipe** (concentration found on the surface of a single Wipe usually taken over a 100cm2 surface)

LABORATORY QUALIFIERS

B - Indicates when the analyte is found in the associated method or preparation blank
D - Surrogate is not recoverable due to the necessary dilution of the sample
E - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.
H- Indicates that the recommended holding time for the analyte or compound has been exceeded
J- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative
NA - Not Analyzed
N/A - Not Applicable
ND - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.
NR - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added
R- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts
S- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative
X -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

Sample Receipt Checklist

Client Name: Engeo (San Ramon)

Project Name: 38600 Cedar Blvd

Work Order No.: 2208230

Date and Time Received: 8/26/2022 2:48:00PM

Received By: Lorna Imbat

Physically Logged By: Lorna Imbat

Checklist Completed By: Lorna Imbat

Carrier Name: Client Drop Off

Chain of Custody (COC) Information

Chain of custody present?	Yes
Chain of custody signed when relinquished and received?	Yes
Chain of custody agrees with sample labels?	Yes
Custody seals intact on sample bottles?	Not Present

Sample Receipt Information

Custody seals intact on shipping container/cooler?	Not Present
Shipping Container/Cooler In Good Condition?	Yes
Samples in proper container/bottle?	Yes
Samples containers intact?	Yes
Sufficient sample volume for indicated test?	Yes

Sample Preservation and Hold Time (HT) Information

All samples received within holding time?	Yes
Container/Temp Blank temperature in compliance?	Temperature: °C
Water-VOA vials have zero headspace?	No VOA vials submitted
Water-pH acceptable upon receipt?	N/A

pH Checked by: n/a

pH Adjusted by: n/a

MEMORANDUM

DATE: 2 May 2023

NAME:	COMPANY:	EMAIL:
Cedar Blvd Townhomes LLC c/o Caden Proctor	**Waymark Development**	caden@waymarkdev.com

FROM: Josh Roper, PE, LEED® AP
Matthew Hsiung

SUBJECT: **38600 Cedar Boulevard, Newark, CA**
Environmental Review of Construction Noise and Vibration

PROJECT: 22-0336

This memo discusses construction noise and vibration for the townhome project at 38600 Cedar Boulevard in Newark, California. The project consists of approximately 72 to 74 three-story residential units in sixteen buildings with common outdoor use space. The site is adjacent to Interstate 880. Existing residences are located across Cedar Boulevard, and a motel is located to the southeast. Construction at the site is expected to commence around October 2023 and be complete around April of 2026.

Noise and vibration levels from construction activities will vary significantly depending on the type of equipment being used, the process, and the location. Construction will not include pile driving. Interior roads to the site may use vibratory rollers, and demolition is expected to use jackhammers. Tasks/phases are expected to consist of the following: site demolition and preparation, grading, utilities, home construction, and landscaping. The Noise section of Newark's General Plan Tune Up EIR, dated 13 August 2013, identifies the following typical levels for construction equipment:

Construction Equipment	Typical Noise Level (dBA) at 50 Feet	Construction Equipment	Typical Noise Level (dBA) at 50 Feet
Air Compressor	81	Jackhammer	88
Backhoe	80	Loader	85
Compactor	82	Paver	89
Concrete Mixer	85	Pneumatic Tool	85
Concrete Pump	71	Pump	76
Concrete Vibrator	76	Roller	74
Dozer	85	Saw	76
Generator	81	Scraper	89
Impact Wrench	85	Truck	88

Noise – The following noise reduction measures will be implemented to minimize the impact of construction noise onto offsite receivers:

- Construction activity will generally be limited to the hours of 7 AM to 7 PM Monday through Friday. Noise from construction activity occurring outside these hours will be limited to the levels outlined in Municipal Code section 17.24.100-3.
- The contractor shall require properly maintained mufflers on construction vehicles.
- To the extent feasible, stationary construction equipment and staging areas shall be located as far as possible from adjacent residences and the motel.
- The contractor shall consider temporary noise barriers between noisy activities and adjacent residences and the motel.
- To the extent feasible, construction should proceed from Cedar Boulevard towards Intestate 880, and from south to north, so that constructed buildings will help shield residences from equipment and construction activities.
- The contractor will designate a "noise disturbance coordinator" who would be responsible for responding to any local complaints about construction noise.
- Signs will be posted at the construction site to notify the neighborhood of permitted days and hours of activities, and to provide a day-time telephone number for the noise disturbance coordinator.

Vibration – The City has requested that the project review the potential for construction vibration from vibration-intensive activities such as jackhammers and vibratory rollers near sensitive receptors and compare levels with FTA vibration annoyance criteria included in Action EH7.E of the Newark General Plan Tune Up EIR. The document identifies the following groundborne vibration levels for construction equipment:

Construction Equipment	Approximate Velocity at 25 Feet (VdB)	Approximate PPV at 25 Feet (inch/sec)
Large Bulldozer	87	0.089
Jackhammer	79	0.035
Small Bulldozer	58	0.003
Loaded Trucks	86	0.076
Vibratory Roller	94	0.210
Human Annoyance (Daytime)	78 to 90*	-
Structural Damage	-	0.2 to 0.5**

* Depending on affected land use. For residential 78 VdB, for offices 84 VdB, workshops 90 VdB.

** Depending on affected building structure, for timber and masonry buildings 0.2 in/sec, for reinforced-concrete, steel, or timber 0.5 in/sec.

The site appears to be over 100 feet from the nearest residences across Cedar Boulevard and planned internal roadway/parking areas appear to be approximately 10 feet from the nearest portion of the adjacent motel building to the southeast. Offsetting the vibration levels identified in the tables above for distance, and comparing both residences and the motel building with the 78 VdB annoyance criteria and 0.2 PPV threshold for possible damage, results in the following:

- Limit large bulldozers and loaded trucks to 50 feet and farther from the motel building(s)
- Limit jackhammering to 30 feet and farther from the motel building(s)
- Limit the use of vibratory rollers to 85 feet and farther from the motel building(s)

Please call with any questions.

Subject: **38600 Cedar Boulevard – Newark, CA**
Environmental Noise Assessment
Salter Project 22-0336

Dear Caden:

This report summarizes our environmental noise assessment for the 38600 Cedar Boulevard project in Newark, California. The project consists of approximately 72 to 74 three-story residential units in sixteen buildings with common outdoor use space. The site is relatively flat and located adjacent to Interstate 880 (I-880). The site is currently being used as a construction machinery lot with auto shops located to the northwest. The purpose of this study is to address compliance with the City of Newark requirements. Following is a summary of our findings:

1. Sound rated windows and doors will be needed to reduce environmental noise in residences to the Code requirement of DNL[1] 45 dB[2] or lower indoors, due to exterior sources.
    a. Estimates indicate that sound insulation ratings up to STC[3] 42, with upgraded exterior walls, will be needed at the façade of homes nearest to and fronting I-880.
    b. With the inclusion of an 18-foot tall noise barrier along I-880, initial estimates suggest that windows and exterior doors will need to be STC 30 to 38 at the lower floors of the homes façade fronting I-880.

---

1 DNL (Day-Night Average Sound Level) – A descriptor for a 24-hour A-weighted average noise level. DNL accounts for the increased acoustical sensitivity of people to noise during the nighttime hours. DNL penalizes sound levels by 10 dB during the hours from 10 PM to 7 AM. For practical purposes, the DNL and CNEL are usually interchangeable. DNL is sometimes written as L_{dn}.

2 A-Weighted Sound Level – The A-weighted sound pressure level, expressed in decibels (dB). Sometimes the unit of sound level is written as dB(A). A weighting is a standard weighting that accounts for the sensitivity of human hearing to the range of audible frequencies. People perceive a 10 dB increase in sound level to be twice as loud.

3 STC (Sound Transmission Class) – A single-number rating defined in ASTM E90 that quantifies the airborne sound insulating performance of a partition under laboratory conditions. Increasing STC ratings correspond to improved airborne sound insulation.

2. Estimates indicate that an 18-foot tall noise barrier along I-880 will need to be constructed to reduce traffic noise in outdoor use spaces close to I-880 to approximately DNL 65 dB.
3. Since windows will need to be closed to meet the interior noise criterion, the mechanical design should meet ventilation requirements with windows in the closed position.

ACOUSTICAL CRITERIA

City of Newark General Plan

The Noise Element of the City of Newark General Plan adopted 12 December 2013 contains land use compatibility guidelines for environmental noise in the community. Table 1 summarizes these guidelines for multi-family residential land use.

Table 1: Summary of Table EH-2 – Noise Compatibility Guidelines for Newark

DNL Value in Decibels Multi-Family Residential	Compatibility for Community Noise environments
65 dB or less	Normally Acceptable: Specified land use is satisfactory based upon the assumption that any buildings involved are of normal conventional construction, without any special noise insulation requirements.
60 to 70 dB	Conditionally Acceptable: New construction or development should be undertaken only after a detailed analysis of the noise reduction requirements is made and the needed noise insulation features are included in the design. Conventional construction, but with closed windows and fresh air supply systems or air conditioning will normally suffice.
70 to 75 dB	Normally Unacceptable: New construction or development should generally be discouraged. If new construction does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design.
Greater than 75 dB	Clearly Unacceptable: New construction or development generally should not be undertaken.

Additionally, the Noise Element includes the following policies and acoustic goals:

Policy EH-7.4

Plan for and implement strategies to maintain exterior noise levels that are consistent with the noise compatibility guidelines in Table EH-2. For residential areas, this limit is DNL 60 dB for outdoor living areas. Where this level is exceeded due to freeways, arterials, and/or railroads, the construction of berms, walls, buffer zones, and other noise-reduction measures to reduce noise to the greatest extent feasible will be required.

Policy EH-7.5

Use site planning and architectural design to protect occupants of new buildings from excessive noise, per California State Noise Insulation Standards (California Code of Regulations, Title 24) and Chapter 35 of the Uniform Building Code (UBC). For example, site planning should place bedrooms and other noise-sensitive rooms away from exterior noise sources and architectural design should use double-paned windows and other insulating measures to reduce interior noise.

California Building Code

Consistent with the City's General Plan Policy EH-7.5, the California Building Code (CBC), part of the California Code or Regulations, includes acoustical requirements for interior sound levels in habitable rooms of multi-family housing. In summary, the CBC limits interior noise levels to DNL 45 dB or lower due to exterior noise sources.

NOISE ENVIRONMENT

To quantify the existing noise environment, two multi-day monitors continuously logged sound levels at the site between 11 and 13 July 2022. Table 2 and Figure 1, attached, summarize measured existing noise levels and approximate locations measured at the site.

Table 2: Existing Noise Environment

Site	Location	DNL
LT-1	Interstate 880 Monitor Approximately 100' south of I-880 centerline, 10' above grade	80 dB
LT-2	Cedar Boulevard Monitor Approximately 30' north of Cedar Boulevard centerline, 10' above grade	74 dB

The analysis and recommendations section below estimates the noise levels at the various building facades using our measured data and data measured recently at other sites using CadnaA computer modeling software. We understand a traffic study has not been prepared for the project. Estimates include a 1 decibel increase in noise levels across the site to account for future traffic increases.[4]

ANALYSIS AND RECOMMENDATIONS

Interior Noise

Exterior building assemblies will need to be sound-rated to reduce environmental noise to the DNL 45 dB criterion indoors. Preliminary estimates suggest that window and exterior door sound insulation ratings up to STC 42, with upgraded exterior walls, will be needed at the façade of homes nearest to and facing I-880. Figures 2 to 4 show the preliminary STC ratings needed to meet the acoustic criteria, which include shielding from an 18-foot tall noise barrier adjacent to I-880. As shown, preliminary sound insulation ratings at the first and second floors of homes near I-880 are in the range of STC 32 to 38 and STC ratings will decrease at homes farther from I-880. These preliminary recommendations will need to be updated as the design continues and floor plans and elevations are finalized. The preliminary estimates are based on the following:

- Approximate room and window/door sizes shown in PPR Submittal drawings dated 20 June 2022
- An assumption that bedrooms will be carpeted and other rooms will either be carpeted or have hard-surfaced flooring
- Ventilation and exhaust systems will not compromise sound insulation of the exterior wall assemblies (this will need to be coordinated with the mechanical engineer as the design continues)
- Exterior walls are assumed to be single-stud assemblies with batt insulation in stud cavities, plywood sheathing, and stucco or lap siding on the exterior with a layer of gypsum board on the interior. At the façade facing I-880, upgraded walls should include a second layer of gypsum board on the unit interior and framing should be staggered stud or the interior gypsum board should be mounted on sound isolation clips (e.g., Pliteq GenieClip, Kinetics Isomax, or Pac International RSIC)
- Additional details will need to be developed to address other possible paths for noise transfer, such as attic vents

Sound insulation ratings should be for the complete assembly, including glass and frame, and should be based on laboratory test reports of similar sized samples from an NVLAP accredited lab. Since windows will need to be closed to meet the interior noise criteria, the mechanical design should meet ventilation requirements with windows in the closed position.

[4] The California Department of Transportation assumes a traffic volume increase of three percent per year, which corresponds to a 1 dB increase in DNL over a ten-year period.

Exterior Noise – Outdoor Use Spaces

Outdoor use space is expected to include a promenade and park along I-880, and various landscaped areas around the buildings. Without noise reduction measures, estimated future outdoor sound levels at these spaces would be up to approximately DNL 80 dB, and will depend on distance to and shielded from I-880. It will not be feasible to reduce traffic noise to the City's exterior noise goal of DNL 60 dB at this site. Estimates suggest that incorporating an approximately 18-foot tall noise barrier along I-880 will reduce traffic noise to DNL 65 dB and below at outdoor use spaces across the site. The height should be with respect to the freeway elevation, or yard elevation, whichever is higher. The barrier should extend the length of the site and wrap the ends, returning towards Cedar Boulevard. Details will need to be developed as the design continues.

Effective noise barriers may be comprised of various materials including CMU, plaster, wood (enhanced fencing), glass or plastic. They should be solid from bottom to top with no cracks or gaps and should have a minimum surface density of approximately three pounds per square foot.

Please let us know if you have any questions.

EXECUTIVE SUMMARY

This report summarizes the results of the Traffic Impact Study (TIS) conducted for the proposed development to be located at 38600 Cedar Boulevard in the City of Newark, California. The project proposes to replace the existing commercial use with an approximately 3.45-acre residential development consisting of 76 townhomes (note for the purposes of this study, 80 units were analyzed as part of the capacity, queuing, and vehicle-miles traveled assessments to be conservative). The purpose of this report is to provide summaries of traffic impacts to the surrounding transportation system.

The purpose of this TIS is to evaluate the impacts on the transportation infrastructure due to the addition of the traffic from the proposed project. The report includes evaluations and recommendations concerning project site access and on-site circulation, vehicle-miles travelled (VMT) impacts, and capacity and queuing impacts at nearby intersections.

TJKM evaluated the impacts on the transportation infrastructure due to the addition of traffic from the proposed project at five study intersections during the weekday morning (a.m.) and weekday afternoon (p.m.) peak hours under six study scenarios. The study intersections were evaluated under No Project and Plus Project scenarios for Existing, Background, and Cumulative Conditions.

Project Trip Generation

TJKM expects the project will generate 562 additional daily trips than the existing development, of which 31 (six inbound, 25 outbound) trips generated during the a.m. peak hour and 33 (24 inbound, nine outbound) trips generated during the p.m. peak hour.

Vehicle Miles Traveled (VMT) Analysis

Project VMT contributions were assessed and are expected to have a **less than significant** impact.

Existing Conditions Capacity Analysis

Under this scenario, all intersections operate at an acceptable level of service (LOS) D or better during both peak hours.

Existing plus Project Conditions Capacity Analysis

Under this scenario, all intersections are anticipated to continue to operate at an acceptable level of LOS D or better during both peak. Based on the City of Newark thresholds impact criteria, the project is expected to have a **less than adverse** impact at the study intersections under this scenario.

Background Conditions Capacity Analysis

Under this scenario, the intersection at Mowry Avenue and Alpenrose Court (Intersection 3) operates at unacceptable LOS F during the p.m. peak hour, and the intersection at Cedar Boulevard and Smith Avenue (Intersection 4) operates at unacceptable LOS E during the a.m. peak hour. The remaining intersections operate at acceptable LOS D or better during both peak hours.

Background plus Project Conditions Capacity Analysis

Under this scenario, the intersection at Mowry Avenue and Alpenrose Court (Intersection 3) continues to operate at unacceptable LOS F during the p.m. peak hour, and the intersection of Cedar Boulevard and Smith Avenue (Intersection 4) continues to operate at unacceptable LOS E during the a.m. peak hour. These two intersections experience an increase in overall vehicular delay by 0.3 seconds or less with project traffic. The remaining intersections continue operate at acceptable LOS D or better during both peak hours. Based on the City of Newark thresholds impact criteria, the project is expected to have **less than adverse** impact at the study intersections under this scenario.

Cumulative Conditions Capacity Analysis

Under this scenario, the intersection at Cedar Boulevard and Mowry Avenue (Intersection 2) operates at unacceptable LOS E during both peak hours. The intersection at Mowry Avenue and Alpenrose Court (Intersection 3) continues to operate at unacceptable LOS F during the p.m. peak hour, and the intersection at Cedar Boulevard and Smith Avenue (Intersection 4) continues to operate at unacceptable LOS F during the a.m. peak hour. The remaining intersections continue operate at acceptable LOS D or better during both peak hours.

Cumulative plus Project Conditions Capacity Analysis

Under this scenario, the intersection at Cedar Boulevard and Mowry Avenue (Intersection 2) continues to operate at unacceptable LOS E during both peak hours. The intersection at Mowry Avenue and Alpenrose Court (Intersection 3) continues to operate at unacceptable LOS F during the p.m. peak hour, and the intersection at Cedar Boulevard and Smith Avenue (Intersection 4) continues to operate at unacceptable LOS F during the a.m. peak hour. These three intersections experience an increase in overall vehicular delay by 3.8 seconds or less with project traffic. The remaining intersections continue to operate at acceptable LOS D or better during both peak hours. Based on the City of Newark thresholds impact criteria, the project is expected to have **less than adverse** impact at all the study intersections under this scenario.

Site Access and On-Site Circulation

Access to the proposed project would be via full access driveway at the north leg of the Cedar Boulevard and Moores Avenue (Intersection 1) intersection. Bicycle and pedestrian access are acceptable, including sidewalks, signalized pedestrian crossings, and bicycle lanes, leading to the project site. Site access and circulation are expected to be **adequate**.

Parking

The project site plan (dated April 21, 2023) shows a supply of 190 parking spaces for the 76 townhomes. The proposed parking supply of 152 garage, 26 head-in, eight head-in compact, and four parallel spaces is expected to be **sufficient**.

Queuing and Driveway Analysis

Traffic associated with the project increases the 95th percentile queues for all left or right turn pockets at the study intersections by 21 feet for less during the peak hours. The 95th percentile queues at the project's driveway are expected to extended less than one car length during all "plus Project" scenarios. Thus, the project is expected to have **less than adverse** impact at all the study intersections.

Pedestrian, Bicycle and Transit Impacts

The proposed project does not conflict with existing and planned pedestrian or bicycle facilities and will add very few trips to existing transit facilities. Existing transit capacity is expected to be able to accommodate additional demand generated by the development. Therefore, the impacts to pedestrian, bicycle, and transit facilities are **less than significant**.

Signal Warrant Assessment for the Intersection of Cedar Boulevard and Smith Avenue

Under Background and Cumulative conditions, the intersection of Cedar Boulevard and Smith Avenue (Intersection 4), which is the only unsignalized study intersection, will begin to operate at unacceptable levels of service during the a.m. peak hour. These conditions occur regardless of the proposed development. In order to preliminarily assess if a traffic signal would be warranted at this location, Warrant 3 (referred to as the "Peak Hour" warrant) from the California Manual on Uniform Traffic Control Devices (CA-MUTCD) was utilized. Based on the results, a signal is not warranted at Intersection 4.

Recommendations

The following items are recommended with respect to the intersection of Cedar Boulevard / Moores Avenue (Intersection 1) as part of the project:

- Crosswalks (including pedestrian signal heads and push buttons) be installed along the newly proposed north leg (the site entrance) and along the west leg of the intersection.
- A tactile surface for the existing curb ramp be provided at the northeast corner of the intersection.

As illustrated on current plans (dated April 2023), these recommendations are being pursued as part of the application.

1.0 INTRODUCTION

This report summarizes the results of the Traffic Impact Study (TIS) conducted for the proposed residential development at 38600 Cedar Boulevard in the City of Newark, California. The applicant proposes to replace an existing construction equipment store of approximately 33,000 square feet with 76 townhomes (note for the purposes of this study, 80 units were analyzed to be conservative).

1.1 Study Intersections and Scenarios

TJKM evaluated traffic conditions at five study intersections during the a.m. and p.m. peak hours for a typical weekday. The study intersections were approved by the City of Newark staff. The peak periods observed were between 7:00-9:00 a.m. and 4:00-6:00 p.m. The study intersections and associated traffic controls are as follows:

1. Cedar Boulevard/Moores Avenue (Signal)
2. Cedar Boulevard/Mowry Avenue (Signal)
3. Mowry Avenue/Alpenrose Court (Signal)
4. Cedar Boulevard/Smith Avenue (One-Way Stop)
5. Cedar Boulevard/Central Avenue (Signal)

Figure 1 illustrates the study intersections and the vicinity map of the proposed project. **Figure 2** shows the proposed site plan.

This study addresses the following two traffic scenarios:

- **Existing Conditions** – This scenario evaluates the study intersections based on existing traffic volumes, lane geometry and traffic controls.
- **Existing plus Project Conditions** – This scenario is identical to Existing Conditions, but with the addition of traffic from the proposed project.
- **Background Conditions** – This scenario evaluates the study intersections based on background traffic volumes, lane geometry, and traffic controls.
- **Background plus Project Conditions** – This scenario is identical to Background Conditions, but with the addition of traffic from the proposed project.
- **Cumulative Conditions** – This scenario evaluates the study intersections based on cumulative (year 2040) traffic volumes, lane geometry, and traffic controls.
- **Cumulative plus Project Conditions** – This scenario is identical to Cumulative Conditions, but with the addition of traffic from the proposed project.

Figure 2: Site Plan

2.0 STUDY METHODOLOGY

Traffic impacts related to the proposed project were evaluated for both compliance with applicable regulatory documents and environmental significance as defined in the California Environmental Quality Act (CEQA). In accordance with the Technical Advisory published by the Governor's Office of Planning and Research (OPR), a qualitative Vehicle-Miles Traveled (VMT) analysis forms the basis of the CEQA analysis for the proposed project. Effective as of July 1, 2020, intersection level of service (LOS) can no longer be used to determine significant impacts for CEQA purposes.

2.1 Vehicles Miles Traveled

This study includes a quantitative analysis of VMT generated by the proposed project. California Senate Bill (SB) No. 743 is intended to reduce greenhouse gas emissions and particulates, encourage infill development and a diversity of uses instead of sprawl, and promote multi-modal transportation networks.

As of October 2022, the City of Newark has not adopted VMT procedures standards, so OPR guidelines were used.

2.1.1 VMT Screening Criteria

The adopted guidelines include the following screening criteria for identifying projects that can be presumed to have a less than significant impact:

- projects exempt from CEQA analysis,
- small projects,
- local serving projects,
- projects in transit priority areas, and
- projects in low VMT areas.

2.1.2 VMT Significance Standards

Under OPR guidelines, a residential project would have a significant impact on VMT if it would generate residential VMT per capita higher than 85 percent of the City of Newark's average.

2.2 Level of Service Analysis Methodology

LOS standards are no longer used for identifying impacts under CEQA, however level of service analysis is still used for determining consistency with adopted agency plans and standards. Where standards refer to significant environmental impacts, this analysis instead identifies these as significant inconsistencies with adopted plans.

LOS is a qualitative measure that describes operational conditions as they relate to the traffic stream and perceptions by motorists and passengers. The LOS generally describes these conditions in terms of such factors as speed and travel time, delays, freedom to maneuver, traffic interruptions, comfort, convenience, and safety. The operational LOS are given letter designations from A to F, with A representing the best operating conditions (free-flow) and F the worst (severely congested flow with high delays). Intersections generally are the capacity-controlling locations with respect to traffic operations on arterial and collector streets.

Each of the study intersections was analyzed using *Synchro,* Version 11, software using the methodology presented in the Transportation Research Board's (TRB) Highway Capacity Manual (HCM) 6th Edition. The LOS assessment under all scenarios is based on current traffic controls and lane geometries unless otherwise specified. Of note, as requested by the City, the peak hour factors utilized for all other scenarios in this report were assumed as 1.0.

2.2.1 Signalized Intersections Methodology

The study intersections under traffic signal control were analyzed using the HCM 6th Edition methodology for signalized intersections described in Chapter 19. This methodology determines LOS based on average control delay per vehicle for the overall intersection during peak hour intersection operating conditions. Control delay includes initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay. **Table 1** summarizes the relationship between the control delay and LOS for signalized intersections.

The LOS methodology is described for Signalized intersections in detail in **Appendix A**.

2.2.2 Stop-Controlled Intersections Methodology

The study intersections under one/two-way stop control and all-way stop control were analyzed using the HCM 6th Edition methodology described in Chapter 20 and 21, respectively. LOS ratings for stop-sign controlled intersections are based on the average control delay expressed in seconds per vehicle.

At one- or two-way stop controlled intersections, the control delay is calculated for each movement, not for the intersection as a whole. For approaches composed of a single lane, the control delay is computed as the average of all movements in that lane. The weighted average delay for the entire intersections is presented for all-way stop controlled intersections.

Table 2 summarizes the relationship between delay and LOS for unsignalized intersections. The delay ranges for unsignalized intersections are lower than for signalized intersections as drivers expect less delay at unsignalized intersections.

The LOS methodology is described for unsignalized intersections in detail in **Appendix A**.

Table 1: Level of Service Definitions for Signalized Intersections

Level of Service	Description
A	Very low control delay, up to 10 seconds per vehicle. Progression is extremely favorable, and most vehicles arrive during the green phase. Many vehicles do not stop at all. Short cycle lengths may tend to contribute to low delay values.
B	Control delay greater than 10 and up to 20 seconds per vehicle. There is good progression or short cycle lengths or both. More vehicles stop causing higher levels of delay.
C	Control delay greater than 20 and up to 35 seconds per vehicle. Higher delays are caused by fair progression or longer cycle lengths or both. Individual cycle failures may begin to appear. Cycle failure occurs when a given green phase does not serve queued vehicles, and overflow occurs. The number of vehicles stopping is significant, though many still pass through the intersection without stopping.
D	Control delay greater than 35 and up to 55 seconds per vehicle. The influence of congestions becomes more noticeable. Longer delays may result from some combination of unfavorable progression, long cycle lengths, or high volumes. Many vehicles stop, the proportion of vehicles not stopping declines. Individual cycle failures are noticeable.
E	Control delay greater than 55 and up to 80 seconds per vehicle. The limit of acceptable delay. High delays usually indicate poor progression, long cycle lengths, and high volumes. Individual cycle failures are frequent.
F	Control delay in excess of 80 seconds per vehicle. Unacceptable to most drivers. Oversaturation, arrival flow rates exceed the capacity of the intersection. Many individual cycle failures. Poor progression and long cycle lengths may also be contributing factors to higher delay.

Source: Transportation Research Board's (TRB) Highway Capacity Manual (HCM), 6th Edition

Table 2: Level of Service Definitions for Stop-Controlled Intersections

Level of Service	Description
A	Very low control delay less than 10 seconds per vehicle for each movement subject to delay.
B	Low control delay greater than 10 and up to 15 seconds per vehicle for each movement subject to delay.
C	Acceptable control delay greater than 15 and up to 25 seconds per vehicle for each movement subject to delay.
D	Tolerable control delay greater than 25 and up to 35 seconds per vehicle for each movement subject to delay.
E	Limit of tolerable control delay greater than 35 and up to 50 seconds per vehicle for each movement subject to delay.
F	Unacceptable control delay in excess of 50 seconds per vehicle for each movement subject to delay.

Source: TRB's HCM, 6th Edition

2.2.3 Impact Criteria/Level of Service Standards

Based on City of Newark Guideline thresholds, a project would result in an adverse impact on traffic conditions at a signalized intersection if for either peak hour:

a) The level of service at the intersection degrades from an acceptable LOS D or better under no-project conditions to an unacceptable LOS E or F under project conditions;
b) The level of service at the intersection is an unacceptable LOS under no-project conditions and the addition of project trips causes the average delay at the intersection to increase by four (4) or more seconds

An adverse impact by the City of Newark standards is said to be satisfactorily mitigated when measures are implemented that would restore intersection level of service to no project conditions or better.

3.0 EXISTING CONDITIONS

This section describes existing conditions in the immediate project site vicinity, including roadway facilities, bicycle and pedestrian facilities, and available transit service. In addition, existing traffic volumes and operations are presented for the study intersections, including the results of LOS calculations.

3.1 Existing Setting and Roadway System

Important roadways in the immediate vicinity of the project site are discussed below:

Interstate 880 (I-880) is a north-south freeway that extends from Oakland to San Jose through Santa Clara County and Alameda County. Within the vicinity of the project site, I-880 is an eight-lane freeway with three general-purpose lanes and one high-occupancy vehicle (HOV) lane in each direction

Mowry Avenue is an east-west, six-lane divided arterial with a raised median. It extends from Mission Boulevard in the east to its termination in the City of Newark to the west. Mowry Avenue connects the cities of Newark and Fremont and facilitates traffic to and from Interstate 880 and Mission Boulevard (State Route 238). The posted speed limit on Mowry Avenue is 35 mph within the project vicinity. . Access to the project site from I-880 is provided via ramps at Mowry Avenue.

Cedar Boulevard is a north-south, four-lane arterial road with a raised median along some portions. It extends from the intersection with Stevenson Boulevard in the north to its termination at Haley Street within the City of Newark. The posted speed limit on Cedar Boulevard is 35 mph within the project vicinity.

Alpenrose Court is a two- to four-lane local roadway with a raised median south of Mowry Avenue. It extends from Newpark Mall Road in the south to its termination point, approximately 215 feet north of Mowry Avenue. Alpenrose Court provides access to Newpark Mall and other retail and restaurant and uses. Alpenrose Court does not have a posted speed limit.

Moores Avenue is an east-west, two-lane undivided collector road. It extends from Cedar Boulevard in the east to Cherry Street within the City of Newark. It primarily provides access to single-family homes. Moores Avenue features unsignalized intersections, except at Cedar Boulevard. There is no posted speed limit on Moores Avenue for the entire length of the roadway.

Smith Avenue is an east-west, two-lane undivided collector road. It extends from Cedar Boulevard in the east, to its termination in the west, within the City of Newark. It provides access to single-family homes, an elementary school, a church, and park, between Cedar Boulevard and Cherry Street, and industrial land uses west of Cherry Street. Smith Avenue features unsignalized intersections, except at Cherry Street. The posted speed limit on Smith Avenue is 25 mph.

3.2 Existing Pedestrian Facilities

Walkability is the ability to travel easily and safely between various origins and destinations without having to rely on automobiles or other motorized travel. The ideal "walkable" community includes wide sidewalks, a mix of land uses such as residential, employment, and shopping opportunities, a limited number of conflict points with vehicle traffic, and easy access to transit facilities, and services.

Pedestrian facilities are comprised of crosswalks, sidewalks, pedestrian signals, and off-street paths, which provide safe and convenient routes for pedestrians to access destinations such as institutions, businesses, public transportation, and recreation facilities.

In the immediate project vicinity, sidewalks exist on both sides of surrounding roadways. Cedar Boulevard provides continuous sidewalks on both sides between Stevenson Boulevard and Haley Street, with a gap on the east side for 350 feet north of Smith Avenue and for a quarter of a mile north of Central Avenue. Continuous sidewalks exist on both sides of Moores Avenue and Smith Avenue between Cherry Street and Cedar Boulevard, and on both sides of Mowry Avenue in the project study area. A continuous sidewalk exists on the west side of Alpenrose Court. ADA-compliant curb ramps connect sidewalks at all study intersections with the exception of some approach legs, which have curb ramps but do not provide textured warning surfaces for visually impaired pedestrians. Crosswalks are present at the study intersections, with pedestrian signals at all signalized intersections. There are adequate pedestrian facilities in the project vicinity. **Figure 3** illustrates the existing pedestrian facilities in the project vicinity.

3.3 Existing Bicycle Facilities

Bicycle facilities include the following:

- Bike Paths (Class I) – Paved trails that are separated from roadways.
- Bike Lanes (Class II) – Lanes on roadways designated for use by bicycles through striping, pavement legends, and signs.
- Bike Routes (Class III) – Designated roadways for bicycle use by signs or other markings may or may not include additional pavement width for cyclists.

The following facilities were identified:

Class II Bike Lanes

- Cedar Boulevard between Balentine Drive and Central Avenue

Class III Bike Routes

- Cedar Boulevard between Stevenson Boulevard and Balentine Drive

Figure 4 illustrates the existing bicycle facilities in the project vicinity.

3.4 Existing Transit Facilities

AC Transit, which operates local and express buses throughout Alameda County and Contra Costa County, provides bus service in the project vicinity. The nearest Bay Area Rapid Transit (BART) station is the Fremont BART station, which is 3.5 miles (walking distance) from the project site and can be accessible by AC transit bus service within the project study area. The nearest bus stop is located at the intersection of Cedar Boulevard and Moores Avenue, which provides access to the project site.

Routes 200, 232, 620, 626 and 628 are accessible at the bus stops located at the project site. These routes also connect to Union City and Fremont BART stations through various residential neighborhoods in north Newark.

BART provides commuter heavy-rail service to the San Francisco Peninsula with communities in the East Bay and South Bay. The project is located at about 3.5 miles (walking distance) west of the Fremont BART station. The Fremont BART station serves two regional train routes, connecting Richmond in the north, San Francisco/Daly City in the northwest, and San Jose in the south. Weekday peak commute headways are between 20 and 30 minutes. Currently, access to the Fremont BART station is from the west side of the train tracks, via the Walnut Avenue and Mowry Avenue underpass.

Table 3 describes the services and frequency of all AC Transit routes operating in the project vicinity. **Figure 5** illustrates the existing transit service system map in the City of Newark.

Table 3: Existing Transit Services

Route	From	To	via	Weekdays		Weekends	
				Operating Hours	Headway (minutes)	Operating Hours	Headway (minutes)
200	Fremont BART	Union City BART	Mowry Ave., NewPark Mall, Central Ave., Newark Blvd., and Decoto Rd.	7:00 a.m. – 11:00 p.m.	20-30	7:00 a.m. – 11:00 p.m.	20-30
232	NewPark Mall	Fremont BART	Cedar Blvd., Paseo Padre Pkwy., Union City BART, and Mission Blvd.	7:00 a.m. – 7:00 p.m.	30+	7:00 a.m. – 7:00 p.m.	30+
620	Cedar Blvd/Stevenson Blvd	Newark Jr. High School	Cedar Blvd., Central Ave., Sycamore St., Thornton Ave., Newark Ave., and Lafayette Ave.	7:41 a.m. – 3:31 p.m.	60+	-	-
626/ 628	Lido Faire Shopping Center	Newark Memorial High School	Balentine Dr., Cedar Blvd., Newark Blvd., and Central Ave.	7:48 a.m. – 3:57 p.m.	-	-	-

3.5 Existing Peak Hour Traffic Volumes and Lane Configurations

TJKM evaluated the existing operations of the study intersections for the highest one-hour volumes during weekday morning and evening peak periods. TJKM collected new turning movement counts for vehicles, bicycles, and pedestrians during the weekday a.m. peak period (7:00-9:00 a.m.) and p.m. peak period (4:00-6:00 p.m.) at the study intersections, on Tuesday, September 20, 2022.

Appendix B includes all data sheets for the collected vehicle, bicycle, and pedestrian counts at the study intersections.

The City of Newark provided current signal timing sheets for the study intersections. **Figure 6** illustrates the existing lane geometry, and traffic controls at the study intersections. **Figure 7** illustrates the existing a.m. and p.m. peak hour vehicle turning movement volumes at the study intersections.

Peak hour factors of 1.00 were applied at all study intersections under Existing Conditions.

3.6 Intersection Level of Service Analysis – Existing Conditions

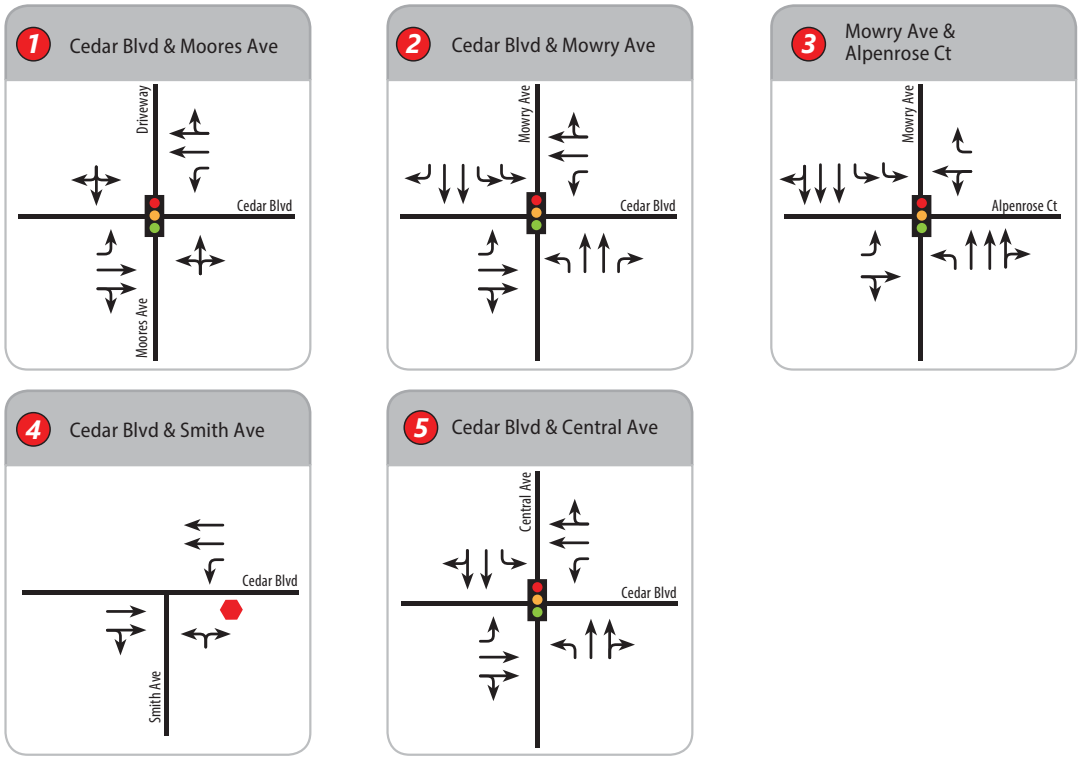
Table 4 summarizes the results of the LOS analysis using the *Synchro*, version 11, software program under Existing Conditions. Intersections that operated at LOS E or F are shown in red.

Under this scenario, all of the study intersections operate at an acceptable LOS D or better during both a.m. and p.m. peak hours.

Appendix C contains detailed level of service calculation sheets for Existing Conditions.

Table 4: Intersection Level of Service Analysis – Existing Conditions

#	Study Intersections	Control	Method	Peak Hour[1]	Existing Conditions	
					Average Delay[2]	LOS[3]
1	Cedar Boulevard/Moores Avenue	Signal	HCM 2000	AM	3.5	A
				PM	4.6	A
2	Cedar Boulevard/Mowry Avenue	Signal	HCM 6th	AM	24.6	C
				PM	25.5	C
3	Mowry Avenue/Alpenrose Court	Signal	HCM 2000	AM	15.3	B
				PM	19.9	B
4	Cedar Boulevard/Smith Avenue	One-Way Stop	HCM 6th	AM	20.4	C
				PM	13.0	B
5	Cedar Boulevard/Central Avenue	Signal	HCM 6th	AM	23.3	C
				PM	24.8	C



Notes:

[1]AM – morning peak hour, PM – evening peak hour

[2]Delay – Measured in seconds per vehicle. For signalized and all-way stop controlled intersections, the delay represents the average control delay for all turning movements. For one- and two-way stop controlled intersections, the delay represents the worse average control delay for a given approach.

4.0 EXISTING PLUS PROJECT CONDITIONS

This analysis scenario presents the impacts of the proposed residential development at the study intersections and surrounding roadway system. This scenario is similar to Existing Conditions but with the addition of traffic from the proposed project.

4.1 Project Description

The proposed project site is at the north quadrant of the Cedar Boulevard and Moores Avenue intersection in the City of Newark. The project proposes to replace an existing construction and landscaping retail use with 78 attached townhomes. A driveway at the north leg of the Cedar Boulevard and Moores Avenue intersection facilitates full project access.

4.2 Project Trip Generation

TJKM developed estimated project trip generation for the proposed project based on published trip generation rates from the Institute of Transportation Engineers' (ITE) Trip Generation Manual, 11th Edition (2021). The proposed trip generation includes the reduction of trips based on the existing land uses at the project site. The number of trips generated by the existing construction machinery rental and retail uses were determined based on existing conditions driveway counts conducted on Tuesday, September 20, 2022. TJKM used published trip rates for ITE Land Use Code 215 (Single-Family Attached Housing).

Table 5 shows the trip generation calculation for the proposed project. The proposed project is expected to generate 562 net new daily trips, including 31 (six inbound, 25 outbound) net new a.m. peak hour trips and 33 (24 inbound, nine outbound) net new p.m. peak hour trips.

Table 5: Project Trip Generation

Land Use	Size[1]	*Daily*		*AM Peak*					*PM Peak*				
		Rate	*Trips*	*Rate*	*In: Out*	*In*	*Out*	*Total*	*Rate*	*In: Out*	*In*	*Out*	*Total*

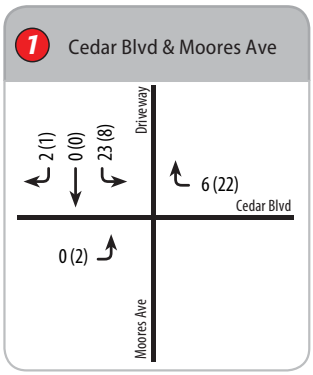
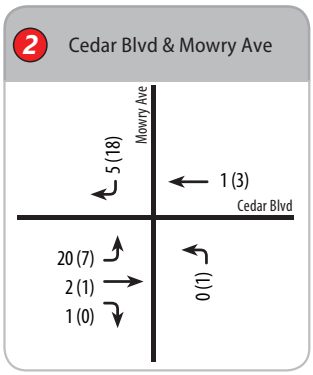
4.3 Project Trip Distribution and Assignment

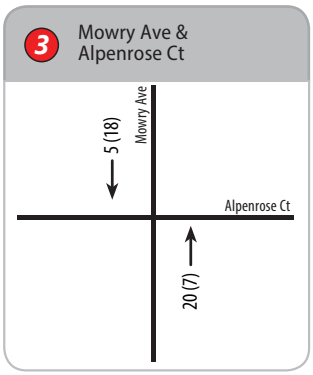
Trip distribution is a process that determines in what proportion vehicles would be expected to travel between the project site and various destinations outside the project study area. Assignment determines the various routes that vehicles would take from the project site to each destination using the estimated trip distribution.



Trip distribution assumptions for the proposed project were developed based on the existing travel patterns and TJKM's knowledge of the study area.



The distribution assumptions are as follows:



- 30 percent to/from I-880 south of Newark
- 30 percent to/from I-880 north of Newark
- 15 percent to/from Mowry Avenue east of Cedar Boulevard
- 10 percent to/from Cedar Boulevard south of Mowry Avenue
- 10 percent to/from Central Avenue west of Cedar Boulevard
- 5 percent to/from Mowry Avenue west of Cedar Boulevard

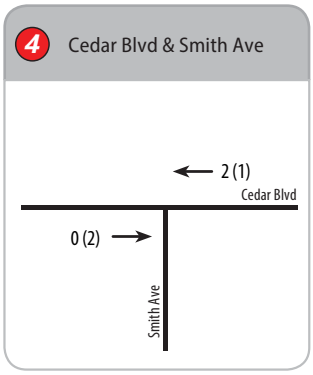


Figure 8 illustrates the trip distribution percentages and trip assignment project volumes developed for the proposed project. The assigned project trips were added to traffic volumes under "No Project" scenarios to generate "Plus Project" traffic volumes.

4.4 Intersection Level of Service Analysis – Existing plus Project Conditions

Under Existing plus Project Conditions, lane geometries and traffic flow are the same as Existing Conditions, with the addition of project trips. **Figure 9** shows projected turning movement volumes at the study intersections for Existing plus Project Conditions.

Table 6 summarizes the intersection LOS analysis results for Existing plus Project Conditions. The results for Existing Conditions are included for comparison purposes, along with the projected increases in control delay. Intersections that operated at LOS E or F are shown in red.

Under this scenario, all of the study intersections are anticipated to continue to operate at an acceptable LOS D or better during both a.m. and p.m. peak hours.

Based on the City of Newark criteria, the project expects to have a **less than adverse** impact at the study intersections under Existing plus Project Conditions.

Appendix D contains detailed level of service calculation sheets for Existing plus Project Conditions.

Table 6: Intersection Level of Service Analysis – Existing plus Project Conditions

#	Study Intersections	Control	Method	Peak Hour[1]	Existing Conditions		Existing plus Project Conditions		Change in Delay[4]

5.0 BACKGROUND CONDITIONS ANALYSIS

This section details expected traffic conditions at the study intersections under Cumulative Conditions.

5.1 Background Peak Hour Traffic Volumes and Lane Configurations

TJKM evaluated the Background operations of the study intersections for the highest one-hour volumes during weekday morning and evening peak periods. Background traffic conditions are the same as Existing Conditions with the addition of project-generated trips from three approved projects within the City of Newark and their associated roadway improvements. **Figure 10** illustrates the Background Conditions traffic volumes at the study intersections.

The approved projects and their land uses are below:

- Phase 1 Newpark Mall Place Costco (Retail),
- Phase 1 Newpark Mall Place (Residential), and
- 37660 Timber Street (Senior Housing).

The following roadway improvements were considered in association with the abovementioned projects:

- The addition of a second westbound right turn lane and allowing the movement to operate under overlap phase at the intersection of Mowry Avenue and Alpenrose Court (Intersection 3).

Peak hour factors of 1.00 were applied at all study intersections under Background Conditions.

5.2 Intersection Level of Service Analysis – Background Conditions

Table 7 summarizes the results of the LOS analysis at the study intersections for the Background Conditions scenario. Existing Conditions. Intersections that operated at LOS E or F are shown in red.

Under this scenario, three of the study intersections operate at an acceptable LOS D or better during both a.m. and p.m. peak hours. The intersection at Mowry Avenue and Alpenrose Court (Intersection 3) operates at unacceptable LOS F during the p.m. peak hour, and the intersection at Cedar Boulevard and Smith Avenue (Intersection 4) operates at unacceptable LOS E during the a.m. peak hour.

Appendix E contains the detailed level of service analysis worksheets for Background Conditions.

Table 7: Intersection Level of Service Analysis – Background Conditions

#	Study Intersections	Control	Method	Peak Hour[1]	Background Conditions	
					Average Delay[2]	LOS[3]
1	Cedar Boulevard/Moores Avenue	Signal	HCM 2000	AM	3.7	A
				PM	5.2	A

6.0 BACKGROUND PLUS PROJECT CONDITIONS

This analysis scenario presents the impacts of the proposed residential development at the study intersections and surrounding roadway system. This scenario is similar to Background Conditions but with the addition of traffic from the proposed project.

6.1 Intersection Level of Service Analysis – Background plus Project Conditions

Figure 11 shows projected turning movement volumes at the study intersections for Background plus Project Conditions.

Table 8 summarizes the intersection LOS analysis results for Background plus Project Conditions. The results for Background Conditions are included for comparison purposes, along with the projected increases in control delay. Intersections that operated at LOS E or F are shown in red.

Under this scenario, three of the study intersections will operate at an acceptable LOS D or better during both a.m. and p.m. peak hours. The intersection at Mowry Avenue and Alpenrose Court (Intersection 3) continues to operate at unacceptable LOS F during the p.m. peak hour, and the intersection of Cedar Boulevard and Smith Avenue (Intersection 4) continue to operate at unacceptable LOS E during the a.m. peak hour. These two intersections experience an increase in overall vehicular delay by 0.3 seconds or less with project traffic. The remaining intersections continue to operate at acceptable LOS D or better.

Based on the City of Newark criteria, the project expects to have a **less than adverse** impact at the study intersections, under Background plus Project Conditions.

Appendix F contains detailed level of service calculation sheets for Background plus Project Conditions.

Table 8: Intersection Level of Service Analysis – Background plus Project Conditions

#	Study Intersections	Control	Method	Peak Hour[1]	Background Conditions		Background plus Project Conditions		Change in Delay[4]

7.0 CUMULATIVE CONDITIONS ANALYSIS

This section details expected traffic conditions at the study intersections under Cumulative Conditions. The Cumulative conditions reflect conditions in the year 2040.

7.1 Intersection Level of Service Analysis – Cumulative Conditions

TJKM developed the cumulative baseline traffic volumes based on growth rates from the Alameda County Transportation Commission's (ACTC) Countywide Travel Demand Model and the addition of project-generated trips from three approved projects within the City of Newark. **Figure 12** illustrates the Cumulative Conditions traffic volumes at the study intersections.

The approved projects and their land uses are below:

- Phase 1 Newpark Mall Place Costco (Retail),
- Phase 1 Newpark Mall Place (Residential), and
- 37660 Timber Street (Senior Housing).

The following roadway improvements were considered in association with the abovementioned projects:

- The addition of a second westbound right turn lane and allowing the movement to operate under overlap phase at the intersection of Mowry Avenue and Alpenrose Court (Intersection 3).

Peak hour factors of 1.00 were applied at all study intersections under Cumulative Conditions.

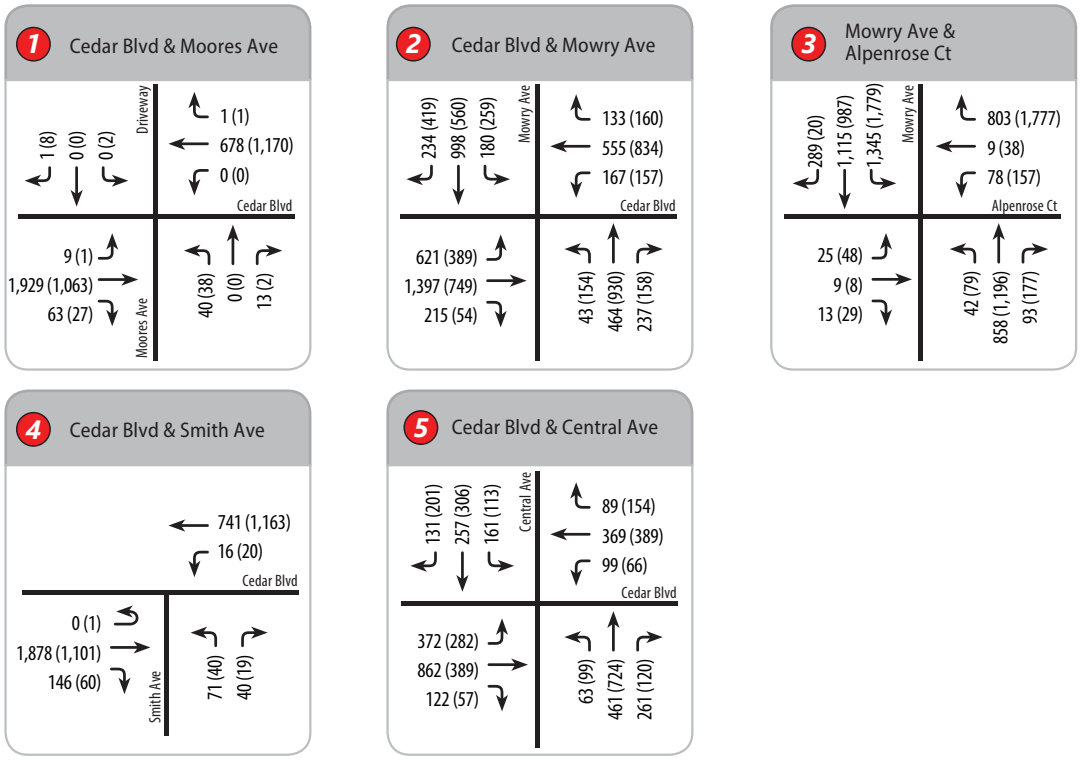
Table 9 summarizes the results of the LOS analysis at the study intersections for the Cumulative Conditions scenario. Intersections that operated at LOS E or F are shown in red.

Under this scenario, two of the study intersections operate at an acceptable LOS D or better during both a.m. and p.m. peak hours. The intersection at Cedar Boulevard and Mowry Avenue (Intersection 2) operates at unacceptable LOS E during both peak hours. The intersection at Mowry Avenue and Alpenrose Court (Intersection 3) operates at unacceptable LOS F during the p.m. peak hour, and the intersection at Cedar Boulevard and Smith Avenue (Intersection 4) operates at unacceptable LOS F during the a.m. peak hour.

Appendix G contains the detailed level of service analysis worksheets for Cumulative Conditions.

Table 9: Intersection Level of Service Analysis – Cumulative Conditions

#	Study Intersections	Control	Method	Peak Hour[1]	Cumulative Conditions	
					Average Delay[2]	LOS[3]
1	Cedar Boulevard/Moores Avenue	Signal	HCM 2000	AM	5.0	A
				PM	4.2	A
2	Cedar Boulevard/Mowry Avenue	Signal	HCM 6th	AM	76.3	E
				PM	68.4	E
3	Mowry Avenue/Alpenrose Court	Signal	HCM 2000	AM	28.6	C
				PM	131.7	F
4	Cedar Boulevard/Smith Avenue	One-Way Stop	HCM 6th	AM	176.5	F
				PM	26.6	D
5	Cedar Boulevard/Central Avenue	Signal	HCM 6th	AM	34.5	C
				PM	31.0	C



Notes:

[1]AM – morning peak hour, PM – evening peak hour

[2]Delay – Measured in seconds per vehicle. For signalized and all-way stop controlled intersections, the delay represents the average control delay for all turning movements. For one- and two-way stop controlled intersections, the delay represents the worse average control delay for a given approach.

8.0 CUMULATIVE PLUS PROJECT CONDITIONS

This analysis scenario presents the impacts of the proposed residential development at the study intersections and surrounding roadway system. This scenario is similar to Cumulative Conditions but with the addition of traffic from the proposed project.

8.1 Intersection Level of Service Analysis – Cumulative plus Project Conditions

Figure 13 shows projected turning movement volumes at the study intersections for Cumulative plus Project Conditions.

Table 10 summarizes the intersection LOS analysis results for Cumulative plus Project Conditions. The results for Cumulative Conditions are included for comparison purposes, along with the projected increases in control delay. Intersections that operated at LOS E or F are shown in red.

Under this scenario, two of the study intersections will operate at an acceptable LOS D or better during both peak hours. The intersection at Cedar Boulevard and Mowry Avenue (Intersection 2) continues to operate at unacceptable LOS E during both peak hours. The intersection at Mowry Avenue and Alpenrose Court (Intersection 3) continues to operate at unacceptable LOS F during the p.m. peak hour, and the intersection at Cedar Boulevard and Smith Avenue (Intersection 4) continues to operate at unacceptable LOS F during the a.m. peak hour. These three intersections experience an increase in overall vehicular delay by 3.8 seconds or less with project traffic.

Based on the City of Newark criteria, the project expects to have a **less than adverse** impact at the study intersections, under Cumulative plus Project Conditions.

Appendix H contains detailed level of service calculation sheets for Cumulative plus Project Conditions.

Table 10: Intersection Level of Service Analysis – Cumulative plus Project Conditions

#	Study Intersections	Control	Method	Peak Hour[1]	Cumulative Conditions		Cumulative plus Project Conditions		Change in Delay[4]
					Average Delay[2]	LOS[3]	Average Delay[2]	LOS[3]

9.0 VEHICLE MILES TRAVELED

This section provides an analysis of potential project impacts due to Vehicle-Miles Traveled (VMT) attributable to the project.

Compliance with Senate Bill (SB) 743, enacted statewide on July 1, 2020, includes replacement of level of service (LOS) with VMT for purposes of assessing traffic impacts for a proposed development. The guidance related to the change in methodology is discussed in Section 15064.3 of the California Environmental Quality Act (CEQA) guidelines. Lead agencies have discretion to choose the most appropriate methodology to evaluate a project's VMT, including whether to express the change in absolute terms, per capita, per household, or any other measure.

9.1 Vehicle Miles Traveled Analysis Methodology

Traffic impacts related to a proposed project are to be evaluated for both compliance with applicable regulatory documents and environmental significance as defined in the CEQA guidelines. The Governor's Office of Planning and Research's (OPR) *Technical Advisory* (December 2018) provides guidance to analysts and local jurisdictions for implementing VMT as a metric for determining the transportation impact for land use projects. The OPR guidelines state that for analysis purposes, "VMT" refers to automobile VMT, specifically passenger vehicles and light trucks. Heavy truck traffic is typically excluded.

As of October 2022, the City of Newark has not adopted VMT procedures standards, so the OPR Guidelines were used. Under OPR guidelines, a residential project would have a significant impact on VMT if it would generate residential VMT per capita higher than 85 percent of the City of Newark's average.

9.2 Vehicle Miles Traveled Analysis Screening

The OPR guidelines include a screening process that describes five criteria in which a project would be exempted from the VMT analysis requirement:

- projects exempt from CEQA analysis,
- small projects,
- local serving projects,
- projects in transit priority areas, and
- projects in low VMT areas.

It should be noted that even if a project satisfies one or more of the screening criteria, lead agencies may still require a VMT analysis if there is evidence that the project has characteristics that might lead to a significant amount of VMT.

The project does not satisfy the requirements for screening criteria 1-5.

9.3 VMT Forecasting and Analysis Results

TJKM conducted VMT analysis for the proposed residential development at 38600 Cedar Boulevard. The project site is located south of Interstate 880 and north of Cedar Boulevard. The project consists of 80 townhomes on a site previously occupied by commercial uses.

OPR guidance on VMT analysis for residential projects require a base year condition model run along with baseline plus project model run to extract VMT data for the Travel Analysis Zone (TAZ) that the project is located in. The project is located in TAZ #934 in the Alameda County Transportation Commission (ACTC) model; land uses stemming from this project was added to the land use input file and the ACTC model was ran to generate VMT metrics for this project.

Currently, TAZ #934 contains 279 households and 843 population. The 2020 Census average ratio of population to household for the City of Newark was used to calculate the total population for the project (3.34 people per household). Using this ratio, 80 housing units from this project will add 267 persons to the TAZ. **Table 11** shows the land use changes for the base year plus project run.

Table 11: Land Use Changes for Base Year

TAZ	Households	Population	Single Family Dwelling Units	Multi Family Dwelling Units
#934	+80	+270	+0	+80

The land uses stemming from this project was added to the land use input file and the ACTC model was run to generate VMT metrics for this project. **Table 12** summarizes the ACTC model results.

Table 12: Home Based VMT Per Capita Comparison (South Alameda County Average)

TAZ	Base Year Average Daily VMT per Resident (per ACTC Model)	City of Newark Average (per ACTC Model)	15% Below Regional Average (per ACTC Model)	Base Year Plus Project Average Daily VMT per Resident (per ACTC Model run)
#934	23.24	22.60*	19.21	18.43

The existing base year per capita VMT for TAZ #934 is 23.24. Coding the project into the TAZ results in a VMT per capita of 18.43, a decrease of 4.81. For residential projects, OPR guidance establishes a significance threshold of 15 percent below the City of Newark's average VMT per capita. The City of Newark has an average VMT per capita of 22.60, so its significance threshold is 19.21. Since 18.43 is lower than the 85% threshold of 19.21 for the City of Newark, the project would produce an **insignificant** impact on VMT.

Appendix I contains the ACTC Model outputs.

10.0 ADDITIONAL ANALYSIS

The following sections provide additional analyses of other transportation issues associated with the project site, including:

- Site access and on-site circulation;
- Parking analysis;
- Queueing and Driveway analysis;
- Pedestrian, bicycle and transit access and impacts;
- Signal Warrant Assessment for the Intersection of Cedar Boulevard and Smith Avenue.

The majority of the analyses in these sections are based on professional judgment in accordance with the standards and methods employed by traffic engineers. Although operational issues are not considered CEQA impacts, they do describe traffic conditions that are relevant to describing the project environment.

10.1 Site Access and On-Site Circulation

This section analyzes site access and internal circulation for vehicles, pedestrians, and bicycles, based on the site plan presented on **Figure 2** (dated April 2023). TJKM reviewed internal and external access for the project site for vehicles, pedestrians, and bicycles and on-site vehicle circulation.

Site access is provided via an existing, full access driveway on Cedar Boulevard, at the north leg of the Cedar Boulevard and Moores Avenue intersection. Pedestrian access to the project site is provided via existing sidewalks on both sides of Cedar Boulevard and Moores Avenue. Bicycle access is facilitated via existing Class II bike lanes along Cedar Boulevard. Two bus stops exist at the intersection of Cedar Boulevard and Moores Avenue, providing direct transit access to the project site.

The project proposes to provide pedestrian pathways at the northern and southern project frontages, along with internal sidewalks, which connect the residences to the pathways and to sidewalks on Cedar Boulevard. The project proposes internal roadways ranging between 24 and 26 feet wide, which will facilitate two-way internal traffic. Emergency vehicle access is provided via an emergency access driveway on Cedar Boulevard, at the southeast quadrant of the project site. Garbage trucks will access the residences via the driveway at Cedar Boulevard and Moores Avenue and the proposed internal roadways.

Overall, the vehicle, pedestrian, and emergency access, as well as on-site circulation is **adequate**.

10.2 Parking Analysis

This section discusses vehicle parking for the proposed project and includes an assessment of whether the proposed parking supply is adequate based on the proposed project size.

Based on the project site plan dated April 2023 (**Figure 2**), 152 garage, 26 head-in, eight head-in compact, and four parallel parking spaces are provided for the residential development. The garage parking spaces are accessible via driveways at each residence, and the remaining parking spaces are along the internal roadways.

Per the City Municipal Code, Section 17.23.040 ("Required Parking Spaces"), the required number of on-site parking stalls is:

Unit Type	Spaces per Unit
Studio	1.5
One Bedroom	1.5
Two-or-More Bedrooms	2.0
Guest Parking	0.5

Based on Table 17.23.040 for "Multi-Unit Building"

The City Municipal Code also states the following:

- Projects located outside a radius of 100 feet of RS and RL districts, or separated by an arterial street from single-family homes, or with driveway aprons, or located within a Specific Plan shall require 1.25 spaces per unit.
- Old Town Specific Plan Area: Minimum of 1.25 per unit; maximum of two per unit. No additional guest parking required.
- For projects with ten or fewer dwelling units, one space per unit must be within a garage.
- For projects with more than ten dwelling units, one space per unit must be covered.
- Guest parking shall be clearly marked as reserved for guests and available with unrestricted access.

Based on a conservative interpretation of the Code, each residential unit would require 2.0 spaces for residents and 0.5 spaces for guests. As such, 152 residential parking spaces and 38 guest parking spaces are required (totaling 190 total spaces on site).

The proposed parking supply of 152 garage, 26 head-in, eight head-in compact, and four parallel spaces is expected to be **sufficient**.

10.3 Queuing and Driveway Analysis

Queuing Analysis at Study Intersections

TJKM conducted a vehicle queuing analysis for all exclusive left turn or right-turn pockets at the study intersections where project traffic is added under Existing plus Project Conditions.

The 95th percentile queues were analyzed using *Synchro,* version 11, software. Detailed calculations are included in the LOS appendices corresponding to each analysis scenario.

Table 13 summarizes the 95th percentile queue lengths at the study intersections under Existing and Existing plus Project Conditions scenarios. As illustrated, the proposed project increases the queue length by a maximum of 21 feet, which is approximately 0.84 car-lengths.

Table 13: 95th Percentile Queues at Turn Pockets Affected by Project Traffic

#	Intersection	Lane Group	Storage Length per Lane	Existing Conditions		Existing plus Project Conditions		Change	
				AM	PM	AM	PM	AM	PM
1	Cedar Boulevard/Moores Avenue	EBL	100	10	4	10	7	0	3
		WBL	150	0	4	0	4	0	0
2	Cedar Boulevard/Mowry Avenue	EBL	200	**320**	**298**	**341**	**305**	21	7
		WBL	235	190	189	194	191	4	2
		NBL	125	70	**156**	71	**159**	1	3
		NBR	130	115	55	117	55	2	0
		SBL	195	77	131	79	133	2	2
3	Mowry Avenue/Alpenrose Court	NBL	170	44	71	44	71	0	0
		SBL	260	101	121	101	122	0	1
5	Cedar Boulevard/Central Avenue	EBL	125	**244**	**266**	**244**	**266**	0	0
		WBL	120	**120**	87	**122**	88	2	1
		NBL	180	80	116	80	116	0	0
		SBL	130	**172**	**136**	**172**	**136**	0	0

Notes: Storage length and 95th percentile queue is expressed in feet per lane, **Bold** indicates overflow

Queuing Analysis at Project Driveway

TJKM conducted a vehicle queuing analysis at the project driveway at the intersection of Cedar Boulevard and Moores Avenue. The 95th percentile queues were analyzed using *Synchro* version 11 software for the project driveway.

Table 14 summarizes the 95th percentile queue lengths at the project driveway under the plus Project scenarios. Under all "plus Project" scenarios, the 95th percentile queues at the outbound approach of project driveways are expected to be minimal (less than one car length or 25 feet).

Table 14: 95th Percentile Queues at Project Driveways

Intersection	Control	Existing plus Project Conditions		Background plus Project Conditions		Cumulative plus Project Conditions	
		AM	PM	AM	PM	AM	PM
Cedar Boulevard /Moores Avenue	Signalized	<25'	<25'	<25'	<25'	<25'	<25'

Notes:

[1]Reported values of 95th percentile queues are for the outbound movements at the project driveways

10.5 Pedestrian, Bicycle, and Transit Impacts

10.5.1 Pedestrian Impacts

An impact to pedestrians occurs if the proposed project disrupts existing pedestrian's facilities; or creates inconsistencies with planned pedestrian facilities or adopted pedestrian system plans, guidelines, policies, or standards. The project may produce a moderate amount of pedestrian trips, which would be accommodated by existing adequate pedestrian facilities. The project is not expected provide any disruptions or inconsistencies with pedestrian facilities or plans. Therefore, the impact to pedestrian facilities is **less than significant**.

Of note, with the construction of the site entrance, the Moores Avenue / Cedar Boulevard intersection (Intersection 1) will be converted from three-legged to four-legged. With this modification, it is recommended that a crosswalk (including pedestrian signal heads and push buttons) be installed across the new site entrance (north leg) and across the west leg of the intersection. Furthermore, it is recommended that a tactile surface for the existing curb ramp be provided at the northeast corner of the intersection. As illustrated in **Figure 2**, these recommendations are being plans as part of the development.

10.5.2 Bicycle Impacts

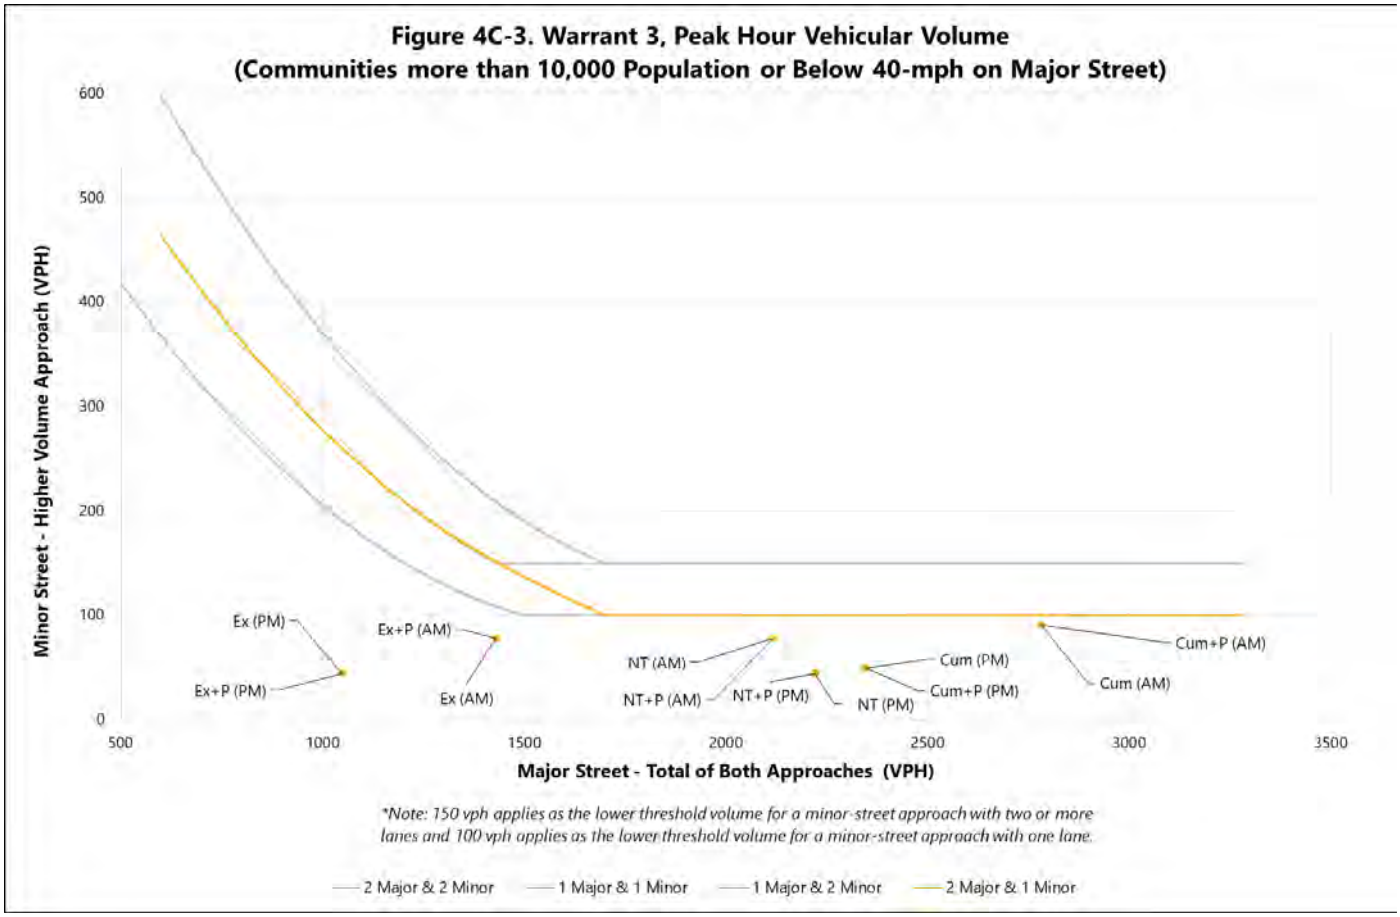
An impact to bicyclists occurs if the proposed project disrupts existing bicycle facilities; or creates inconsistencies with planned bicycle facilities or adopted bicycle system plans, guidelines, policies, or standards. The proposed project will have adequate bicycle access to the project site from the existing bike facilities and does not propose any roadway changes along the project frontage. Therefore, the impact to bicycle facilities is **less than significant**.

10.5.3 Transit Impacts

A proposed project is considered to have a significant impact on transit if it conflicts with existing or planned transit facilities, or is expected to generate additional transit trips and does not provide adequate facilities for pedestrians and bicyclists to access transit routes and stops.

Pedestrians and bicyclists can access the closest transit stops, shown in **Figure 3**, via a continuous path of sidewalks and adequate bicycle facilities. Additional trips generated by the proposed project could be accommodated by the existing bus stops along Cedar Boulevard along the project frontage.

The project does not propose changes to transit facilities in the project study area. Therefore, impacts to transit service are expected to be **less than significant**.



10.6 Signal Warrant Assessment for the Intersection of Cedar Boulevard and Smith Avenue.

Under Background and Cumulative conditions, the intersection of Cedar Boulevard and Smith Avenue (Intersection 4), which is the only unsignalized study intersection, will begin to operate at unacceptable levels of service during the a.m. peak hour. These conditions occur regardless of the proposed development. In order to preliminarily assess if a traffic signal would be warranted at this location, Warrant 3 (referred to as the "Peak Hour" warrant) from the California Manual on Uniform Traffic Control Devices (CA-MUTCD) was utilized to assess all "Plus Project" scenarios.

With respect to Warrant 3, the need for a traffic control signal shall be considered when the plotted points representing the vehicles per hour on the major-street (both approaches) and the corresponding vehicles per hour on the higher-volume minor-street approach (one direction only) for one hour of an average day falls above the applicable figure shown in the CA-MUTCD (either Figure 4C-3 or 4C-4) for the combination of approach lanes.

For the purpose of assessment, the geometry was assumed to be categorized as "Two or More Lanes on the Major Street and One Lane on the Minor Street;" Figure 4C-3 was used given that the speed limit of Cedar Boulevard is 35 mph in the project vicinity. Additionally, it should be noted that the CA-MUTCD does allow for a reduction in side-street right turn volume depending on configuration and engineering judgment. A conservative 50 percent right turn reduction was assumed for the purposes of this analysis. The reduction was based off the Right Turn on Red estimation from *Synchro*, which indicated that approximately 22 out of 40 (55 percent) and 15 out of 19 (79 percent) right turns were able to find gaps in mainline traffic along Cedar Boulevard and make a right turn during the a.m. and p.m. peak hours, respectively, under the Cumulative Plus Project scenario. The results for the "plus Project" scenarios are illustrated in **Figure 14**. Based on the results, a signal is not warranted at Intersection 4.

Figure 14: CA-MUTCD Warrant 3 Assessment for Intersection 4

Appendix A – Level of Service Methodology

APPENDIX A

LEVEL OF SERVICE

The description and procedures for calculating capacity and level of service are found in Transportation Research Board, *Highway Capacity Manual 6*. *Highway Capacity Manual 6* represents the latest research on capacity and quality of service for transportation facilities.

Quality of service requires quantitative measures to characterize operational conditions within a traffic stream. Level of service is a quality measure describing operational conditions within a traffic stream, generally in terms of such service measures as speed and travel time, freedom to maneuver, traffic interruptions, and comfort and convenience.

Six levels of service are defined for each type of facility that has analysis procedures available. Letters designate each level, from A to F, with level-of-service A representing the best operating conditions and level-of-service F the worst. Each level of service represents a range of operating conditions and the driver's perception of these conditions. Safety is not included in the measures that establish service levels.

A general description of service levels for various types of facilities is shown in Table A-I.

Table A-I

Level of Service Description

Facility Type	**Uninterrupted Flow**	**Interrupted Flow**
	Freeways Multi-lane Highways Two-lane Highways Urban Streets	Signalized Intersections Unsignalized Intersections Two-way Stop Control All-way Stop Control
LOS		
A	Free-flow	Very low delay.
B	Stable flow. Presence of other users noticeable.	Low delay.
C	Stable flow. Comfort and convenience starts to decline.	Acceptable delay.
D	High density stable flow.	Tolerable delay.
E	Unstable flow.	Limit of acceptable delay.
F	Forced or breakdown flow.	Unacceptable delay

Urban Streets

The term “urban streets” refers to urban arterials and collectors, including those in downtown areas.

Arterial streets are roads that primarily serve longer through trips. However, providing access to abutting commercial and residential land uses is also an important function of arterials.

Collector streets provide both land access and traffic circulation within residential, commercial and industrial areas. Their access function is more important than that of arterials, and unlike arterials their operation is not always dominated by traffic signals.

Downtown streets are signalized facilities that often resemble arterials. They not only move through traffic but also provide access to local businesses for passenger cars, transit buses, and trucks. Pedestrian conflicts and lane obstructions created by stopping or standing buses, trucks and parking vehicles that cause turbulence in the traffic flow are typical of downtown streets.

The speed of vehicles on urban streets is influenced by three main factors, street environment, interaction among vehicles and traffic control. As a result, these factors also affect quality of service.

The street environment includes the geometric characteristics of the facility, the character of roadside activity and adjacent land uses. Thus, the environment reflects the number and width of lanes, type of median, driveway density, spacing between signalized intersections, existence of parking, level of pedestrian activity and speed limit.

The interaction among vehicles is determined by traffic density, the proportion of trucks and buses, and turning movements. This interaction affects the operation of vehicles at intersections and, to a lesser extent, between signals.

Traffic control (including signals and signs) forces a portion of all vehicles to slow or stop. The delays and speed changes caused by traffic control devices reduce vehicle speeds, however, such controls are needed to establish right-of-way.

The average travel speed for through vehicles along an urban street is the determinant of the operating level of service. The travel speed along a segment, section or entire length of an urban street is dependent on the running speed between signalized intersections and the amount of control delay incurred at signalized intersections.

Level-of-service A describes primarily free-flow operations. Vehicles are completely unimpeded in their ability to maneuver within the traffic stream. Control delay at signalized intersections is minimal.

Level-of-service B describes reasonably unimpeded operations. The ability to maneuver within the traffic stream is only slightly restricted, and control delays at signalized intersections are not significant.

Level-of-service C describes stable operations, however, ability to maneuver and change lanes in midblock location may be more restricted than at level-of-service B. Longer queues, adverse signal coordination, or both may contribute to lower travel speeds.

Level-of-service D borders on a range in which in which small increases in flow may cause substantial increases in delay and decreases in travel speed. Level-of-service D may be due to adverse signal progression, inappropriate signal timing, high volumes, or a combination of these factors.

Level-of-service E is characterized by significant delays and lower travel speeds. Such operations are caused by a combination of adverse progression, high signal density, high volumes, extensive delays at critical intersections, and inappropriate signal timing.

Level-of-service F is characterized by urban street flow at extremely low speeds. Intersection congestion is likely at critical signalized locations, with high delays, high volumes, and extensive queuing.

The methodology to determine level of service stratifies urban streets into four classifications. The classifications are complex, and are related to functional and design categories. Table A-II describes the functional and design categories, while Table A-III relates these to the urban street classification.

Once classified, the urban street is divided into segments for analysis. An urban street segment is a one-way section of street encompassing a series of blocks or links terminating at a signalized intersection. Adjacent segments of urban streets may be combined to form larger street sections, provided that the segments have similar demand flows and characteristics.

Levels of service are related to the average travel speed of vehicles along the urban street segment or section.

Travel times for existing conditions are obtained by field measurements. The maximum-car technique is used. The vehicle is driven at the posted speed limit unless impeded by actual traffic conditions. In the maximum-car technique, a safe level of vehicular operation is maintained by observing proper following distances and by changing speeds at reasonable rates of acceleration and deceleration. The maximum-car technique provides the best base for measuring traffic performance.

An observer records the travel time and locations and duration of delay. The beginning and ending points are the centers of intersections. Delays include times waiting in queues at signalized intersections. The travel speed is determined by dividing the length of the segment by the travel time. Once the travel speed on the arterial is determined, the level of service is found by comparing the speed to the criteria in Table A-IV. Level-of-service criteria vary for the different classifications of urban street, reflecting differences in driver expectations.

description of levels of service for signalized intersections can be found in Table A-V.

Table A-V

Description of Level of Service for Signalized Intersections

Level of Service	Description
A	Very low control delay, up to 10 seconds per vehicle. Progression is extremely favorable, and most vehicles arrive during the green phase. Many vehicles do not stop at all. Short cycle lengths may tend to contribute to low delay values.
B	Control delay greater than 10 and up to 20 seconds per vehicle. There is good progression or short cycle lengths or both. More vehicles stop causing higher levels of delay.
C	Control delay greater than 20 and up to 35 seconds per vehicle. Higher delays are caused by fair progression or longer cycle lengths or both. Individual cycle failures may begin to appear. Cycle failure occurs when a given green phase doe not serve queued vehicles, and overflow occurs. The number of vehicles stopping is significant, though many still pass through the intersection without stopping.
D	Control delay greater than 35 and up to 55 seconds per vehicle. The influence of congestions becomes more noticeable. Longer delays may result from some combination of unfavorable progression, long cycle lengths, or high volumes. Many vehicles stop, the proportion of vehicles not stopping declines. Individual cycle failures are noticeable.
E	Control delay greater than 55 and up to 80 seconds per vehicle. The limit of acceptable delay. High delays usually indicate poor progression, long cycle lengths, and high volumes. Individual cycle failures are frequent.
F	Control delay in excess of 80 seconds per vehicle. Unacceptable to most drivers. Oversaturation, arrival flow rates exceed the capacity of the intersection. Many individual cycle failures. Poor progression and long cycle lengths may also be contributing factors to higher delay.

Source: *Highway Capacity Manual 6*

The use of control delay, which may also be referred to as signal delay, was introduced in the 1997 update to the *Highway Capacity Manual*, and represents a departure from previous updates. In the third edition, published in 1985 and the 1994 update to the third edition, delay only included stopped delay. Thus, the level of service criteria listed in Table A-V differs from earlier criteria.

Unsignalized Intersections

The current procedures on unsignalized intersections were first introduced in the 1997 update to the *Highway Capacity Manual* and represent a revision of the methodology published in the 1994 update to the 1985 *Highway Capacity Manual*. The revised procedures use control delay as a measure of effectiveness to determine level of service. Delay is a measure of driver discomfort, frustration, fuel consumption, and increased travel time. The delay experienced by a motorist is made up of a number of factors that relate to control, traffic and incidents. Total delay is the difference between the travel time actually experienced and the reference travel time that would result during base conditions, *i. e.*, in the absence of traffic control, geometric delay, any incidents, and any other vehicles. Control delay is the increased time of travel for a vehicle approaching and passing through an unsignalized intersection, compared with a free-flow vehicle if it were not required to slow or stop at the intersection.

Two-Way Stop Controlled Intersections

Two-way stop controlled intersections in which stop signs are used to assign the right-of-way, are the most prevalent type of intersection in the United States. At two-way stop-controlled intersections the stop-controlled approaches are referred as the minor street approaches and can be either public streets or private driveways. The approaches that are not controlled by stop signs are referred to as the major street approaches.

The capacity of movements subject to delay are determined using the "critical gap" method of capacity analysis. Expected average control delay based on movement volume and movement capacity is calculated. A level of service designation is given to the expected control delay for each minor movement. Level of service is not defined for the intersection as a whole. Control delay is the increased time of travel for a vehicle approaching and passing through a stop-controlled intersection, compared with a free-flow vehicle if it were not required to slow or stop at the intersection. A description of levels of service for two-way stop-controlled intersections is found in Table A-VI.

Table A-VI

Description of Level of Service for Two-Way Stop Controlled Intersections

Level of Service	Description
A	Very low control delay less than 10 seconds per vehicle for each movement subject to delay.
B	Low control delay greater than 10 and up to 15 seconds per vehicle for each movement subject to delay.
C	Acceptable control delay greater than 15 and up to 25 seconds per vehicle for each movement subject to delay.
D	Tolerable control delay greater than 25 and up to 35 seconds per vehicle for each movement subject to delay.
E	Limit of tolerable control delay greater than 35 and up to 50 seconds per vehicle for each movement subject to delay.
F	Unacceptable control delay in excess of 50 seconds per vehicle for each movement subject to delay.

Intersection Summary	
HCM 6th Ctrl Delay	25.5
HCM 6th LOS	C

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

TECHNICAL MEMORANDUM

Date:	May 23, 2023	
To:	Brain Steele	Waymark Development
	Caden Proctor	Waymark Development
CC:	Carmelisa Lopez	City of Newark
	Jayson Imai	City of Newark
From:	Steven Matthew Dauterman, PE, PTOE, RSP[1]	TJKM
	Chris D. Kinzel, PE, TE	TJKM
Subject:	***Cedar/Smith Signal Warrant and Fair Share Assessment***	

This memorandum summarizes the findings of an in-depth signal warrant assessment and fair share assessment for the intersection of Cedar Boulevard and Smith Avenue in the City of Newark and in conjunction with two proposed developments along Cedar Boulevard (38478 Cedar Boulevard by Robson Homes [herein referred to as the Robson Development] and 38600 Cedar Boulevard by Waymark [herein referred to as the Waymark Development]).

This memorandum is intended to provide supplemental analyses with respect to the third iteration of a Traffic Impact Study (TIS) that was conducted by TJKM Transportation Consultants for the Waymark Development (titled *Cedar Boulevard Townhomes* and last revised on April 21, 2023) and based on a meeting between the Waymark team, TJKM, and City staff on May 11, 2023. At the meeting, the City had requested a more thorough investigation that utilized an identical methodology with a previous signal warrant assessment that was conducted for the intersection by Hexagon Transportation Consultations in association with the Robson Development. TJKM requested the latest copy of the Robson Development TIS/ signal warrant assessment; both were provided to TJKM by City staff on May 12, 2023.

This memorandum supports the following conclusions:

- Consistent with the Hexagon signal warrant assessment, Warrant 1 ("Eight-Hour Vehicular Volume Warrant") as discussed in Chapter 4C ("*Traffic Control Signals – General*") of the *California Manual of Traffic Control Devices* (CA-MUTCD) is likely not satisfied under existing conditions.
- Under 2040 Cumulative Conditions, there is some likelihood that Warrant 1 may be satisfied.
- Under 2022 Existing Conditions, consistent with the Hexagon signal warrant assessment, CA-MUTCD Signal Warrant 2 ("Four-Hour Vehicular Volume Warrant") would not be satisfied. This finding does not change when accounting for additional traffic generated by either the Robson or Waymark developments or both.

- Under 2040 Cumulative Conditions, CA-MUTCD Warrant 2 is anticipated to be satisfied. These conditions would occur regardless of any additional traffic generated by the Robson or Waymark developments or both.
- Under 2022 Existing Conditions, CA-MUTCD Signal Warrant 3 ("Peak-Hour Vehicular Volume Warrant") would exceed the volume thresholds during the weekday morning commuter (a.m.) peak hour. These conditions would occur regardless of any additional traffic generated by the Robson or Waymark developments or both. This trend continues under 2040 Cumulative Conditions.
    - The CA-MUTCD stipulates that "*[t]his signal warrant shall be applied only in unusual cases, such as office complexes, manufacturing plants, industrial complexes, or high-occupancy vehicle facilities that attract or discharge large numbers of vehicles over a short time*." Given the location of the intersection and surrounding community, the intent of Warrant 3 (i.e., for "unusual cases") does not appear to be satisfied. The applicability of Warrant 3 in this case is questioned.
- Under 2022 Existing Conditions, CA-MUTCD Signal Warrants 4 ("Pedestrian Volume Warrant") and 5 ("School Crossing Volume Warrant") are not satisfied. These conditions are unlikely to be changed with the construction of the Robson or Waymark developments or both. Further, this trend is expected to continue under 2040 Cumulative Conditions.
- Under 2022 Existing Conditions, CA-MUTCD Signal Warrant 7 ("Crash Experience Warrant") is not satisfied. This warrant was not assessed under 2040 conditions, given that it is supposed to be based on historical crashes.
- Traffic generated by the Robson and Waymark developments account for an insignificant increase in utilization at the subject intersection.
    - The Robson development is expected to increase utilization by 23 a.m. and 28 p.m. peak hour trips, respectively. This development is expected to account for 1.91 percent of expected regional growth by 2040.
    - The Waymark development is expected to increase utilization by 2 a.m. and 3 p.m. peak hour trips. This development is expected to account for 0.19 percent of expected regional growth by 2040.
    - Added project trips from both developments were only assigned to Cedar Boulevard; as such, they are not expected to increase side-street traffic volumes (which plays a critical role in the determination of CA-MUTCD Warrants 1, 2, and 3).

ANALYSIS METHODOLOGY AND PARAMETERS

Signal Warrant Assessment

Signal warrant analyses are based off of the Federal Highway Administration's (FHWA) 2009 edition of the Manual on Uniform Traffic Control Devices (MUTCD). Guidelines for nine separate signal warrants are discussed specifically in Chapter 4C, *Traffic Control Signal Needs Studies*, by which only one warrant needs to be satisfied to support the installation of a traffic control signal and additional warrants met would further support the appropriateness of installation. That said, satisfaction of one or more warrants shall not itself require installation of a traffic signal; a traffic signal should be both warranted and justified.

The State of California has adopted and has modified the federal guidelines to meet the needs of the State. This assessment uses the *California Manual of Traffic Control Devices* (CA-MUTCD).

As discussed in a meeting with City staff on May 11, 2023, TJKM was requested to provide a more in-depth investigation that utilized an identical methodology with a previous signal warrant assessment that was conducted for the intersection by Hexagon Transportation Consultations in association with the Robson Development. TJKM requested the latest copy of the Robson Development TIS/ signal warrant assessment; both were provided to TJKM by City staff on May 12, 2023.

The Hexagon analysis (titled *Signal Warrant Analysis for the Intersection at Cedar Boulevard & Smith Avenue in Newark, CA* and dated September 24, 2021) is provided in **Appendix A**. The traffic counts utilized as the base of this analysis are provided in **Appendix B**. Excerpts utilized from the Robson TIS are provided in **Appendix C**. Excerpts utilized from the Waymark TIS are provided in **Appendix D**.

Consistent with the Hexagon signal warrant assessment, this memo analyzes six of the nine warrants:

- Warrant 1 – Eight-Hour Vehicular Volume;
- Warrant 2 – Four-Hour Vehicular Volume;
- Warrant 3 – Peak-Hour Vehicular Volume;
- Warrant 4 – Pedestrian Volume;
- Warrant 5 – School Crossing Volume;
- Warrant 7 – Crash Experience.

Consistent with the Hexagon signal warrant assessment and/or per requests by City staff, the analysis assumed the following parameters:

- Cedar Boulevard is considered the Major Street;
- Smith Avenue is considered the Minor Street;
- The thresholds for "two or more lanes for moving traffic on the major street" and "one lane for moving traffic on the minor street" were used;

- An 85th percentile speed of above 40 miles per hour (mph) is to be used in lieu of the posted speed limit.
  - This impacts which thresholds are used for Warrants 1, 2, and 3.
- A very conservative right-turn reduction (RTR) of zero percent was applied to the minor street (i.e., none at all).
  - In the third iteration of the Waymark TIS, a conservative 50 percent RTR was applied to the minor street to account for gaps in traffic flow, pursuant CA-MUTCD 4C.01.08-09. Previous estimations for RTR were approximated to average around 67% using *Synchro* (this was done by converting the intersection to a signal and determining the expected right-turn-on-red reduction (RTOR) values from the Highway Capacity Manual (HCM) 2000 methodology). Though not used in this study, justification was asked to be provided for the previous 50% RTR; the *Synchro* HCM 2000 analysis worksheets are provided in **Appendix E**.

Fair Share Assessment

In order to determine the potential fair share contribution needed from the Robson and Waymark developments, the California Department of Transportation's (Caltrans) method for calculating equitable mitigation measures was utilized as per Caltrans' *Guide for the Preparation of Traffic Impact Studies* (December 2002).

The following equations where used:

$$P = \frac{T}{T_b - T_e} \qquad \text{(Eq. 1)}$$

$$C = (P)(C_t) \qquad \text{(Eq. 2)}$$

where,

- P = the equitable share for the proposed project's traffic impact.
- T = the vehicle trips generated by the project during the peak hour.
- T_b = the forecasted traffic volume on an impacted highway at the time of general plan build-out.
- T_e = the traffic volume existing on the impacted highway facility.
- C = the equitable cost of traffic mitigation for the proposed project.
- C_t = the total cost estimate for improvements necessary to mitigate the forecasted traffic demand on the impacted highway facility.

CA-MUTCD SIGNAL WARRANT EVALUATION

Warrant 1: Eight-Hour Vehicular Volume

Warrant 1 is satisfied when for each of any eight hours of an average day, the traffic volumes given in the tables shown below exist on the major-street and on the higher-volume minor-street approaches to the intersection. Therefore, if the vehicles per hour given in both of the 100 percent columns in the CA-MUTCD Table 4C-1 exist on the major-street and the higher-volume minor-street approaches, respectively, to the intersection and satisfy either Condition A or Condition B, for each of any eight hours of an average weekday, then Warrant 1 is satisfied.

> **Condition A – Minimum Vehicular Volume**: The vehicles per hour given in both of the 100 percent columns in the CA-MUTCD Table 4C-1 must exist on the major-street and the higher-volume minor-street approaches, respectively, to the intersection; or
>
> **Condition B – Interruption of Continuous Traffic**: The vehicles per hour given in both of the 100 percent columns in the CA-MUTCD Table 4C-1 must exist on the major-street and the higher-volume minor-street approaches, respectively, to the intersection.

However, if the 100 percent requirements cannot be satisfied, then the 80 percent columns may be used "only after an adequate trial of other alternatives that could cause less delay and inconvenience to traffic has failed to solve the traffic problems." Under the 80 percent column requirements, a combination of Condition A and Condition B must be met. The vehicles per hour given in both of the 80 percent columns must exist on the major-street and the higher-volume minor-street approaches, respectively, and must satisfy both Condition A and Condition B.

> **Condition A – Minimum Vehicular Volume**: The vehicles per hour given in both of the 80 percent columns in the CA-MUTCD Table 4C-1 must exist on the major-street and the higher-volume minor-street approaches, respectively, to the intersection; and
>
> **Condition B – Interruption of Continuous Traffic**: The vehicles per hour given in both of the 80 percent columns in the CA-MUTCD Table 4C-1 must exist on the major-street and the higher-volume minor-street approaches, respectively, to the intersection.

Therefore, if the vehicles per hour (vph) given in both of the 100 percent columns in the CA-MUTCD Table 4C-1 exist on the major-street and the higher-volume minor-street approaches, respectively, to the intersection and satisfy either Condition A or Condition B, for each of any eight hours of an average weekday, then Warrant 1 is satisfied. The 80 percent columns may be used in place of the 100% columns when a combination of Conditions A and B is satisfied.

If the posted speed limit or 85th-percentile speed on the major street exceeds 40 mph, or if the intersection lies within the built-up area of an isolated community having a population of less than 10,000, then the traffic volumes in the 70 percent and 56 percent columns in Table 4C-1 may be used in place of the 100 percent and 80 percent columns, respectively.

As noted previously, the analysis herein assumes the thresholds for two lanes for moving traffic on the major street and one lane for moving traffic on the minor street for the evaluation of the warrant. Additionally, given that the supposed 85th-percentile speed along Cedar Boulevard is above 40 mph, the 70 percent thresholds were utilized for the purposes of this assessment. The specific volumes requirements used in this study for Conditions A and B were taken from the CA-MUTCD Table 4C-1, as illustrated in **Table 1**.

Table 1: Warrant 1 – Eight Hour Vehicular Volume Thresholds (CA-MUTCD Table 4C-1)

Condition A - Minimum Vehicular Volume

1	1	750	600	525	420	75	60	53	42
2 or more	1	900	720	630	504	75	60	53	42
2 or more	2 or more	900	720	630	504	100	80	70	56
1	2 or more	750	600	525	420	100	80	70	56

Notes:
a. Basic minimum hourly volume.
b. Used for a combination of A and B after adequate trial of other remedial measures.
c. May be used when the major-street speed exceeds 40 mph or in isolated community with a population of less than 10,000.
d. May be used for a combination of Conditions A and B after adequate trial of other remedial measures when the major-street speed exceeds 40 mph or in an isolated community with a population of less than 10,000.

The four hours of turning movement counts, collected in 2022, were utilized in the assessment of the warrant. It is noted that the full assessment of the warrant does require at least eight hours of data, however additional data is not anticipated to change the conclusions of the assessment at this time. Of the four hours analyzed as illustrated in **Table 2**, none satisfy Condition A and only two satisfy Condition B; thus, it is not expected that the Warrant 1 would be met under existing conditions given that any additional hours would likely experience less utilization of the intersection due to being outside the peak periods.

In order to analyze 2040 Cumulative Conditions, the 2022 volumes were grown to 2040 by applying inherent growth factors. These factors were calculated based on the ratio between the 2022 and 2040 peak hour traffic volumes at the subject intersection from the Waymark TIS (1.99 for the a.m. hours and 2.27 for the p.m. hours). As illustrated in **Table 2**, only two of the four hours analyzed would satisfy Condition A and all four would satisfy Condition B. Thus, there is a likelihood that Warrant 1 may be satisfied under 2040 cumulative conditions.

Table 2: Warrant 1 Assessment

				Either Condition A or B Must be Satisfied

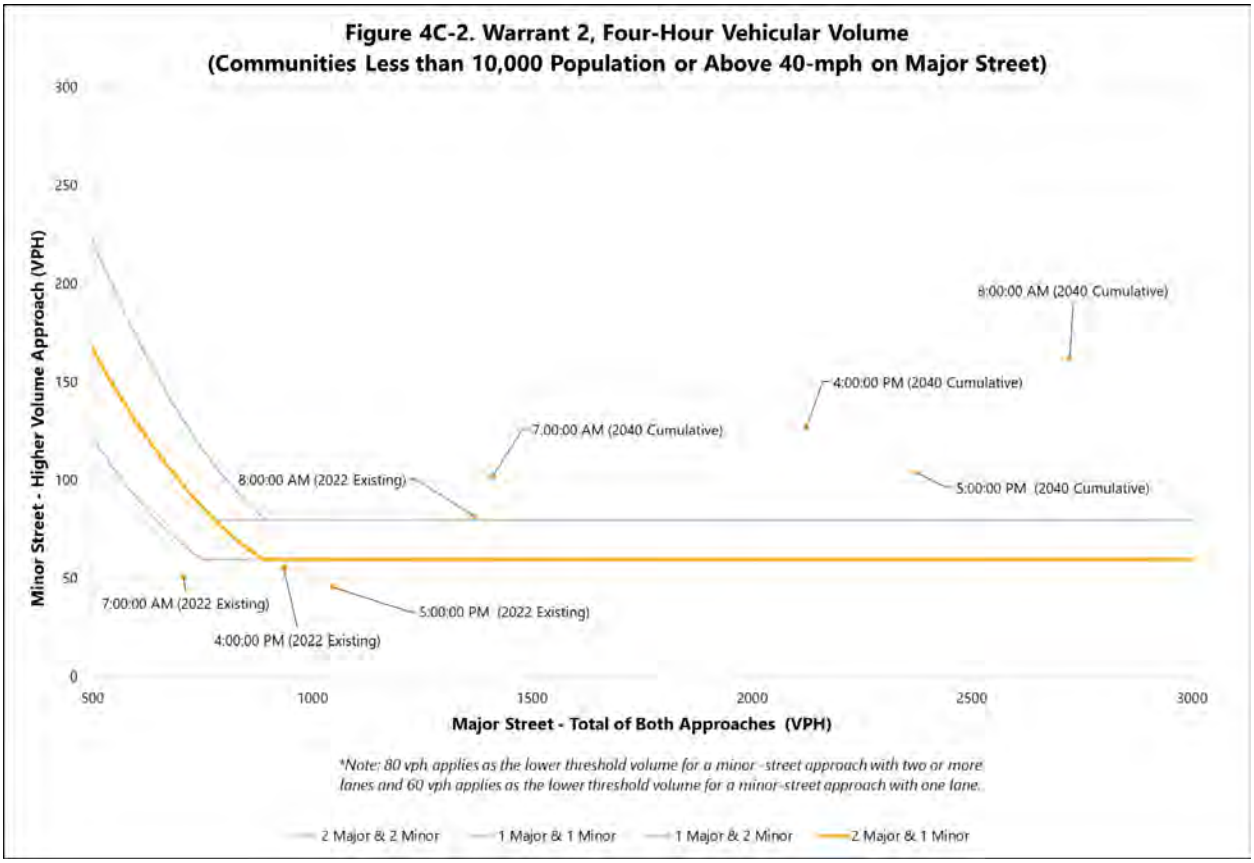
Y- Threshold is Satisfied

N- Threshold is Not Satisfied

Warrant 2: Four-Hour Vehicular Volume

Warrant 2 is intended to be applied at intersections where the volume of intersection traffic is the principal reason to consider the installation of a traffic control signal. The warrant satisfied when the plotted points representing the vehicles per hour on the major-street (total of both approaches) and the corresponding vehicles per hour on the higher-volume minor-street approach (one direction only), for each of any four hours of an average day, all fall above either CA-MUTCD Figure 4C-1 or Figure 4C-2 (depending on applicability) for the combination of approach lanes.



If the posted speed limit or the 85th-percentile speed on the major street exceeds 40 mph, or if the intersection lies within the build-up area of an isolated community having a population of less than 10,000, Figure 4C-2 is used.

Given that the supposed 85th-percentile speed along Cedar Boulevard is above 40 mph, Figures 4C-2 is applicable in the evaluation of warrant. The four hours of turning movement counts, collected in 2022, were utilized in the assessment of the warrant, as illustrated in **Figure 1**. As illustrated, only one of the four hours analyzed under the existing conditions would be above the volume thresholds. As such, a Warrant 2 is not satisfied under existing conditions. This finding does not change when accounting for additional traffic generated by either the Robson or Waymark developments or both (as added project traffic would only add traffic to the major street).

In order to analyze 2040 Cumulative Conditions, the 2022 volumes were grown to 2040 by applying inherent growth factors. These factors were calculated based on the ratio between the 2022 and 2040 peak hour traffic volumes at the subject intersection from the Waymark TIS (1.99 for the a.m. hours and 2.27 for the p.m. hours). As illustrated in **Figure 1**, all four of the hours analyzed under the cumulative conditions would be above the volume thresholds. As such, a Warrant 2 is satisfied under

cumulative conditions. This finding does not change when accounting for additional traffic generated by either the Robson or Waymark developments or both (as added project traffic would only add traffic to the major street).

Figure 1: Warrant 2 Assessment

Warrant 3: Peak-Hour Vehicular Volume

Warrant 3 is intended for use at a location where traffic conditions are such that for a minimum of one hour of an average day, the minor-street traffic suffers undue delay when entering or crossing the major street. Per the CA-MUTCD, the warrant "shall be applied only in unusual cases, such as office complexes, manufacturing plants, industrial complexes, or high-occupancy vehicle (HOV) facilities that attract or discharge large numbers of vehicles over a short time"

The need for a traffic control signal shall be considered if the criteria in either of the following two categories are met:

A. Warrant 3 is satisfied when, for the same one hour of an average day, the total delay on one minor-street approach (one direction only) controlled by a STOP sign equals or exceeds four vehicle-hours for a one-lane approach or five vehicle-hours for a two-lane approach; the

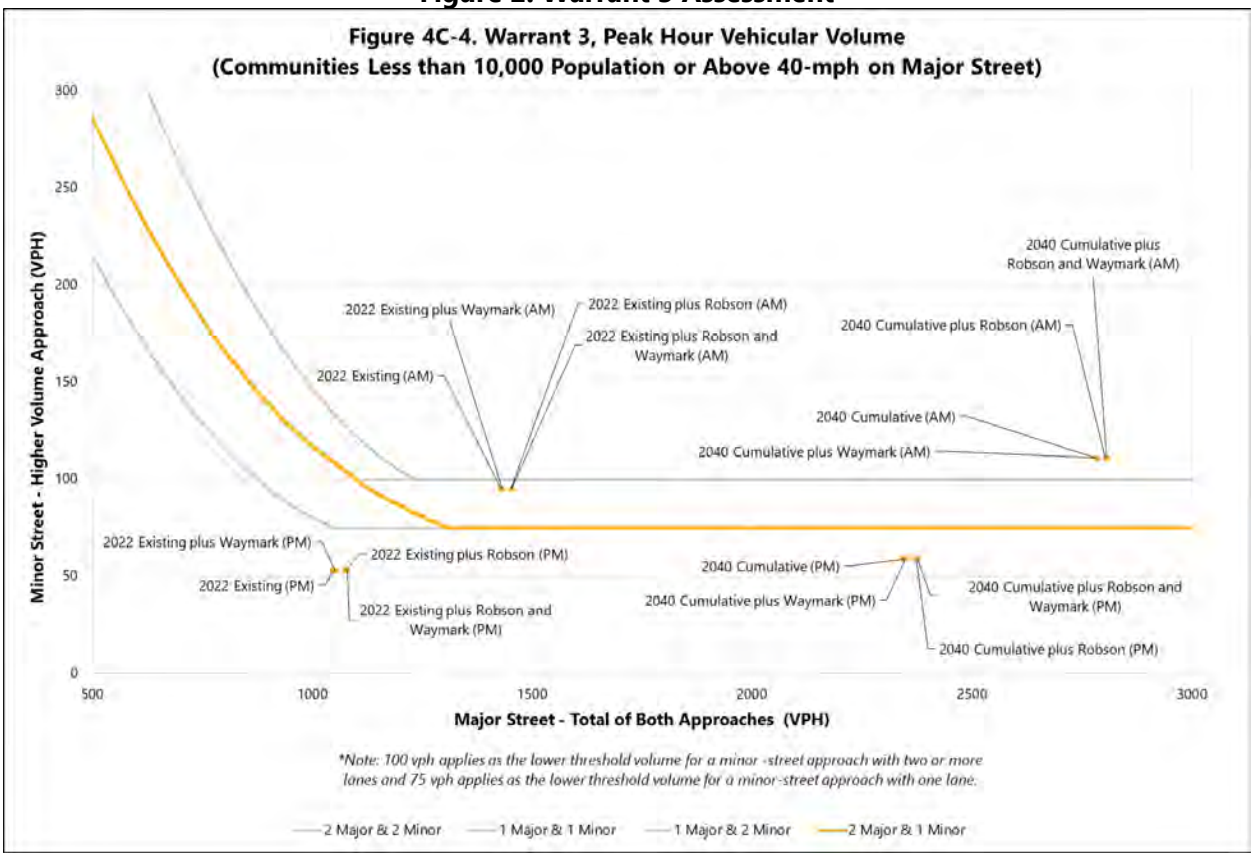
volume on the same minor-street approach equals or exceeds 100 vehicles per hour for one moving lane of traffic or 150 vehicles per hour for two moving lanes; and the total entering volume serviced during the hour equals or exceeds 650 vehicles per hour for intersections with three approaches or 800 vehicles per hour for intersections with four or more approaches; or

B. Warrant 3 is satisfied when the plotted points representing the vehicles per hour on the major-street (both approaches) and the corresponding vehicles per hour on the higher-volume minor-street approach (one direction only) for one hour of an average day falls above either CA-MUTCD Figure 4C-3 or Figure 4C-4 (depending on applicability) for the combination of approach lanes.

If the posted speed limit or the 85th-percentile speed on the major street exceeds 40 mph, or if the intersection lies within the build-up area of an isolated community having a population of less than 10,000, Figure 4C-4 is used.

Given that the supposed 85th-percentile speed along Cedar Boulevard is above 40 mph, Figure 4C-2 is applicable in the evaluation of warrant. The eight analysis scenarios were assessed as part of Warrant 3. Data for each scenarios was based on a combination of the Robson and Waymark TISs.

- 2022 Existing
- 2022 Existing plus Robson
- 2022 Existing plus Waymark
- 2022 Existing plus Robson and Waymark
- 2040 Cumulative
- 2040 Cumulative plus Robson
- 2040 Cumulative plus Waymark
- 2040 Cumulative plus Robson and Waymark



The traffic volumes by scenario are illustrated in **Table 3**, and the assessment is illustrated in **Figure 2**. As illustrated under 2022 existing conditions. The a.m. peak hour would exceed the volume thresholds on Figure 4C-2. This finding does not change when accounting for additional traffic generated by either the Robson or Waymark developments or both (as added project traffic would only add traffic to the major street). This trend is also consistent under 2040 cumulative conditions.

As noted previously, the CA-MUTCD stipulates that "*[t]his signal warrant shall be applied only in unusual cases, such as office complexes, manufacturing plants, industrial complexes, or high-occupancy vehicle facilities that attract or discharge large numbers of vehicles over a short time.*" Given the location of the intersection and surrounding community, the intent of Warrant 3 (i.e., for "unusual cases") does not appear to be satisfied. The applicability of Warrant 3 in this case is questioned.

Table 3: Warrant 3 Assessment Volumes

Scenario	Major	Minor
2022 Existing (AM)	1,429	95
2022 Existing (PM)	1,048	53
2022 Existing plus Robson (AM)	1,452	95
2022 Existing plus Robson (PM)	1,076	53
2022 Existing plus Waymark (AM)	1,431	95
2022 Existing plus Waymark (PM)	1,051	53
2022 Existing plus Robson and Waymark (AM)	1,454	95
2022 Existing plus Robson and Waymark (PM)	1,079	53
2040 Cumulative (AM)	2,781	111
2040 Cumulative (PM)	2,345	59
2040 Cumulative plus Robson (AM)	2,804	111
2040 Cumulative plus Robson (PM)	2,373	59
2040 Cumulative plus Waymark (AM)	2,783	111
2040 Cumulative plus Waymark (PM)	2,348	59
2040 Cumulative plus Robson and Waymark (AM)	2,806	111
2040 Cumulative plus Robson and Waymark (PM)	2,376	59

Figure 2: Warrant 3 Assessment

Warrant 4: Pedestrian Volume

Warrant 4 is satisfied when the pedestrian volume crossing the major street at the study intersection meets either of the following criteria:

A. For each of any four hours of an average day, the plotted points representing the vehicles per hour on the major street (total of both approaches) and the corresponding pedestrians per hour crossing the major street (total of all crossings) all fall above the curve in Figure 4C-5; or
B. For one hour (any four consecutive 15-minute periods) of an average day, the plotted point representing the vehicles per hour on the major street (total of both approaches) and the corresponding pedestrians per hour crossing the major street (total of all crossings) fall above the curve in Figure 4C-7.

If the posted or statutory speed limit or the 85th-percentile speed on the major street exceeds 35 mph, or if the intersection lies within the built-up area of an isolated community having a population of less than 10,000, Figure 4C-6 may be used in place of Figure 4C-5 to evaluate Criterion A and Figure 4C-8 may be used in place of Figure 4C-7 to evaluate Criterion B.

Warrant 4 shall not be applied at locations where the distance to the nearest traffic control signal or STOP sign controlling the street that pedestrians desire to cross is less than 300 feet, unless the proposed traffic control signal will not restrict the progressive movement of traffic.

The minimum thresholds for all four figures are illustrated in **Table 4**.

Table 4: Warrant 4 – Minimum Pedestrian Thresholds (CA-MUTCD Figures 4C-5 to 4C-8)

Minimum Pedestrian Thresholds	Condition A: Four Hours (Pedestrians/Hour)	Condition B: One Hour (Pedestrians/Hour)
Figures 4C-5 and Figure 4C-7	107	133
Figures 4C-6 and Figure 4C-8	75	93

Given that the supposed 85th-percentile speed along Cedar Boulevard is above 40 mph, Figures 4C-6 and FC-8 are applicable in the evaluation of warrant.

Based on the 2022 counts, only five pedestrians were observed crossing Cedar Boulevard during the four-hour count collection; thus, Warrant 4 is not satisfied under existing conditions. Further, with the inclusion of the Robson and Waymark developments, the amount of foot-traffic crossing Cedar Boulevard is not expected to substantially change to a point where Warrant 4 would be triggered.

Warrant 5: School Crossing

Warrant 5 is applicable where schoolchildren crossing the major street are the principal reason for a traffic control signal installation. A minimum of 20 schoolchildren (referring to students in elementary school through high school) are required to cross the road during the highest crossing hour to satisfy the warrant.

The warrant shall not be applied at locations where the distance to the nearest traffic control signal along the major street is less than 300 feet, unless the proposed traffic control signal will not restrict the progressive movement of traffic. Of further note, before a decision is made to install a traffic control signal, consideration shall be given to the implementation of other remedial measures, such as warning signs and flashers, school speed zones, school crossing guards, or a grade-separated crossing.

Based on the 2022 counts, only five pedestrians were observed crossing Cedar Boulevard during the four-hour count collection. TJKM could not verify if any of these pedestrians were schoolchildren, however to total amount being below the threshold to satisfy the Warrant 5. With the inclusion of the Robson and Waymark developments, the amount of foot-traffic crossing Cedar Boulevard may increase, but not by enough to meet the threshold where Warrant 5 would be triggered.

Warrant 7: Crash Experience

Warrant 7 is applicable where the severity and frequency of crashes are the principal reasons to consider the installation of a traffic control signal. This warrant is valid when all the following criteria are met:

A. Adequate trial of alternatives with satisfactory observance and enforcement has failed to reduce the crash frequency;
B. Five or more reported crashes, of types susceptible to correction by a traffic control signal, have occurred within a 12-month period. Each crash should involve personal injury or property damage apparently exceeding the applicable requirements for a reportable crash; and
C. For each of any eight hours of an average day, the vehicles per hour given in both of the 80 percent columns of Condition A in the CA-MUTCD Table 4C-1, or the vehicles per hour in both of the 80 percent columns of Condition B in the CA-MUTCD Table 4C-1 exists on the major-street and the higher-volume minor-street approach, respectively, to the intersection, or the volume of the pedestrian traffic is not less than 80 percent of the requirements specified in Warrant 4. These major-street and minor-street volumes shall be for the same eight hours. On the minor street, the higher volume shall not be required to be on the same approach during each of the eight hours.

TJKM is not aware of any safety trial or enforcement campaigns occurring at the intersection.

With respect to crash history, TJKM requested the reported collision history for an 11-year period (January 1, 2011, to December 31, 2022) at the subject intersection from the Statewide Integrated Traffic Records System (SWITRS) database using the University of California at Berkeley's (UC Berkeley) Transportation Injury Mapping System (TIMS). Based on the TIMS network, it appears that only five major collisions have been reported at the subject intersection (all of these collisions did not occur within the same 12-month period and two reported collisions are not susceptible to correction with the installation of a signal [both involved parked vehicles]). Crash diagrams are provided in **Appendix F**.

Due to Warrant 7 requiring that all three criteria be met, Warrant 7 is not satisfied under 2022 existing conditions.

Of note, this warrant was not assessed under 2040 conditions, given that it is supposed to be based on historical crashes.

FAIR SHARE EVALUATION

As noted in the signal warrant evaluation, a signal is warranted under 2040 future conditions (as per Warrant 2) and may be considered warranted under 2022 existing and 2040 future conditions (as per Warrant 3). In order to account for the contribution of traffic generated by both the Robson and Waymark developments, a fair share analysis was conducted for the subject intersection. "Fair Share" is defined as the percent contribution of project traffic to the growth from Existing Conditions to Cumulative plus Project Conditions.

The Robson development is expected to generate 23 a.m. and 28 p.m. new peak hour trips. The Waymark development is expected to generate 2 a.m. and 3 p.m. new peak hour trips. **Table 4** shows the fair share for a.m. plus p.m. peak hour volumes at these eight intersections. As illustrated, the Robson fair share is anticipated at approximately 1.91%, whereas Waymark's fair share is anticipated at 0.19%.

Currently, it is anticipated that the rough order of magnitude (ROM) cost to install a traffic signal at the subject intersection would be between $600,000 and $750,000. As such, the fair share contribution for both developments (assuming the higher end) would be approximately $15,000 and $2,000, respectively.

Table 4: Fair Share Analysis

Scenarios	Existing	Robson Project Trips	Waymark Project Trips	Cumulative plus Project Trips	Growth	Robson Fair Share	Waymark Fair Share
	(A)	***(B)***	***(C)***	***(D)***	***(E) = (D - A)***	***(F) = (B / E)***	***(G) = (C / E)***
AM Peak Hour	1,524	23	2	2,894	1,370	1.68%	0.15%
PM Peak Hour	1,101	28	3	2,407	1,306	2.14%	0.23%
Combined	***2,625***	***51***	***5***	***5,301***	***2,676***	***1.91%***	***0.19%***

Notes:

(A) Based on 2022 existing volumes from the Waymark TIS.
(B) Based on the Robson TIS
(C) Based on the Waymark TIS.
(D) Based on the 2040 cumulative volumes from the Waymark TIS plus both the Robson and Waymark trip assignments.

Appendix A – Hexagon Signal Warrant Assessment (2021)

HEXAGON TRANSPORTATION CONSULTANTS, INC.

Memorandum

Date: September 24, 2021

To: Jayson Imai, City of Newark

From: Gary Black
Daniel Choi

Subject: Signal Warrant Analysis for the Intersection at Cedar Boulevard & Smith Avenue in Newark, CA

Hexagon Transportation Consultants, Inc. has completed a signal warrant analysis to determine the need for a change in traffic control for the intersection of Cedar Boulevard & Smith Avenue in Newark, California. Vehicular traffic volumes were collected for 24-hours in September 2021 along each approach to the intersection. Peak-hour turning movement counts (7:00-9:00 AM and 4:00-6:00 PM), which included pedestrian crossing movements, were also collected at the intersection. Roadway volume counts and peak-hour turning movement counts can be found in Attachment A.

The intersection was evaluated for the following signal warrants found in the 2014 California Manual on Uniform Traffic Control Devices (CA MUTCD):

- Warrant 1 – Eight-Hour Vehicular Volume
- Warrant 2 – Four-Hour Vehicular Volume
- Warrant 3 – Peak Hour
- Warrant 4 – Pedestrian Volume
- Warrant 5 – School Crossing
- Warrant 7 – Crash Experience

For the signal warrant analysis, Cedar Boulevard was considered the major street, and Smith Avenue was considered the minor road. The MUTCD notes that the satisfaction of a traffic signal warrant or warrants shall not itself require the installation of a traffic signal. Therefore, the analysis presented in this memo is for informational purposes for City of Newark staff to determine whether a traffic signal should be installed at the intersection.

Warrant 1- Eight-Hour Vehicular Volume

The Eight-Hour Vehicular Volume warrant (Warrant 1) consists of two parts: A) the minimum vehicular volume and B) the interruption of continuous traffic. The first part is intended for locations where a large volume of intersection traffic is the principal reason to consider the installation of a traffic signal. The second part is intended for locations where part A is not satisfied and where traffic volume on a major street is so heavy that minor street traffic suffers excessive delay or conflict entering the street.

The minimum volumes needed to meet Warrant 1 is shown on Table 4C-1 in the 2014 CAMUTCD (see below). The warrant should be applied to each of any 8 hours of an average day. Since a

speed study determined that the 85th percentile speed along Cedar Boulevard exceeds 40 mph, 70% volumes are used for the analysis.

Table 4C-1. Warrant 1, Eight-Hour Vehicular Volume

Condition A—Minimum Vehicular Volume

Number of lanes for moving traffic on each approach		Vehicles per hour on major street (total of both approaches)				Vehicles per hour on higher-volume minor-street approach (one direction only)			
Major Street	Minor Street	100%[a]	80%[b]	70%[c]	56%[d]	100%[a]	80%[b]	70%[c]	56%[d]
1	1	500	400	350	280	150	120	105	84
2 or more	1	600	480	420	336	150	120	105	84
2 or more	2 or more	600	480	420	336	200	160	140	112
1	2 or more	500	400	350	280	200	160	140	112

Condition B—Interruption of Continuous Traffic

Number of lanes for moving traffic on each approach		Vehicles per hour on major street (total of both approaches)				Vehicles per hour on higher-volume minor-street approach (one direction only)			
Major Street	Minor Street	100%[a]	80%[b]	70%[c]	56%[d]	100%[a]	80%[b]	70%[c]	56%[d]
1	1	750	600	525	420	75	60	53	42
2 or more	1	900	720	630	504	75	60	53	42
2 or more	2 or more	900	720	630	504	100	80	70	56
1	2 or more	750	600	525	420	100	80	70	56

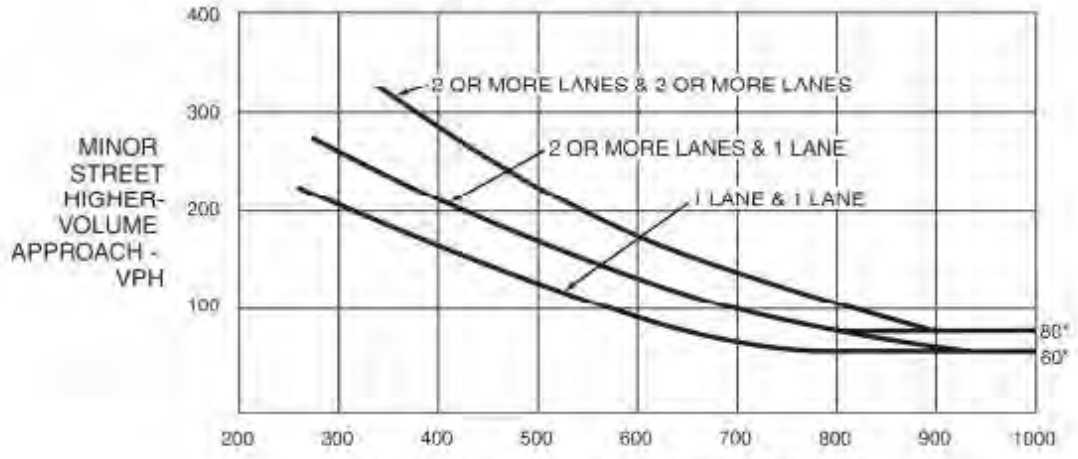
[a] Basic minimum hourly volume
[b] Used for combination of Conditions A and B after adequate trial of other remedial measures
[c] May be used when the major-street speed exceeds 40 mph or in an isolated community with a population of less than 10,000
[d] May be used for combination of Conditions A and B after adequate trial of other remedial measures when the major-street speed exceeds 40 mph or in an isolated community with a population of less than 10,000

Warrant 1 would be met under the following conditions:

a) Part A is met under the 100% basic minimum hourly volume (70% when major-street approach exceeds 40 mph)
b) Part B is met under the 100% basic minimum hourly volume (70% when major-street approach exceeds 40 mph)
c) Parts A and B are met under the 80% basic minimum hourly volume (56% when major-street approach exceeds 40 mph)

The vehicular volumes collected finds that **Warrant 1 is not met** during any 8 hours at the intersection. The signal warrant worksheet can be found in Attachment B.

Warrant 2- Four-Hour Vehicular Volume



The Four-Hour Vehicular Volume warrant (Warrant 2) is intended for locations where volume of intersecting traffic is the principal reason to consider the installation of a traffic signal. The hourly volume of the total of both major street approaches should be plotted against the minor street

approach volume for any four hours of an average day. Since a speed study determined that the 85th percentile speed along Cedar Boulevard exceeds 40 mph, 70% volumes are used for the analysis.

For Warrant 2 to be met, the plotted point of any four hours of an average day should be above the "2 OR MORE LANES & 1 LANE" line of Figure 4C-2 in the 2014 CAMUTCD (see below).

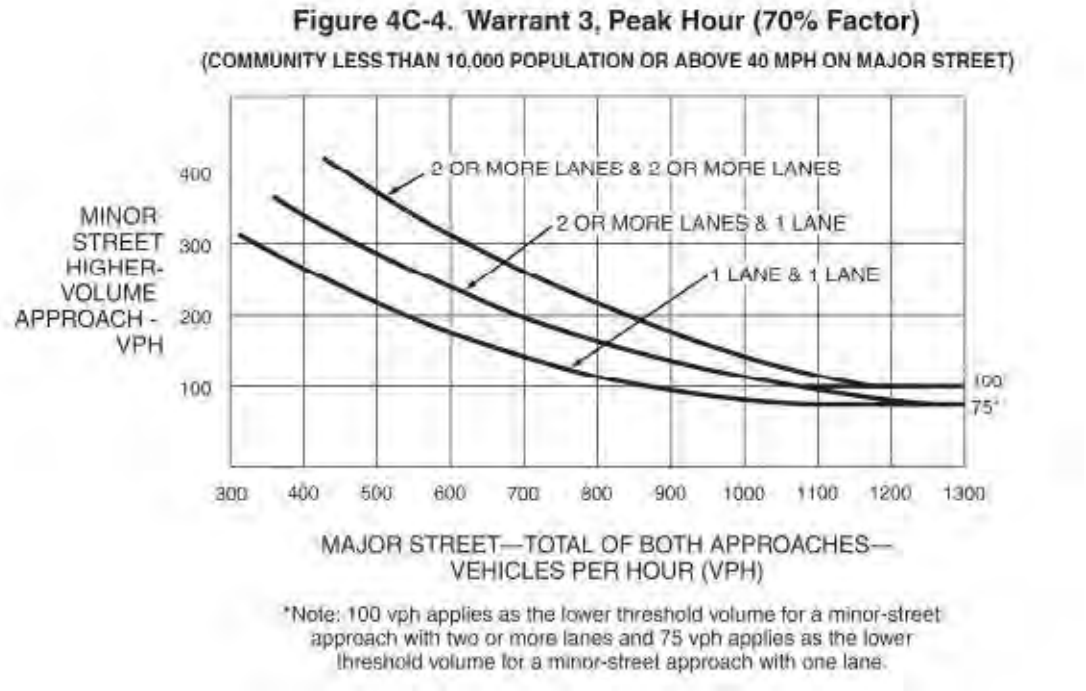
Figure 4C-2. Warrant 2, Four-Hour Vehicular Volume (70% Factor)

(COMMUNITY LESS THAN 10,000 POPULATION OR ABOVE 40 MPH ON MAJOR STREET)

*Note: 80 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 60 vph applies as the lower threshold volume for a minor-street approach with one lane.

Based on the plotted points of the roadway vehicular volumes collected, **Warrant 2 is not met** during any 4 hours at the intersection. The signal warrant worksheet can be found in Attachment B.

Warrant 3- Peak Hour



The Peak Hour signal warrant (Warrant 3) is intended for use at locations where traffic conditions are such that for a minimum of 1 hour of an average day, the minor street approach suffers undue delay when entering or crossing the major street. Warrant 3 consists of two parts and would be met when either part meets the warrant conditions. The two parts are as follows:

Part A: All three conditions of Part A must be met:

1) The total stopped time delay experienced by the traffic on one minor-street approach (one direction only) controlled by a STOP sign equals or exceeds: 4 vehicle-hours for a one-lane approach and
2) The total volume on the same minor-street approach (one direction only) equals or exceeds 100 vehicles per hour for one moving lane of traffic and
3) The total entering volume serviced during the hour equals or exceeds 650 vehicles per hour for intersections with three approaches

Part B: The plotted point of representing the vehicles per hour on the major street (total of both approaches) and the corresponding vehicles per hour on the minor street approach should be above the "2 OR MORE LANES & 1 LANE" line of Figure 4C-2 in the 2014 CAMUTCD (see below).

Since a speed study determined that the 85th percentile speed along Cedar Boulevard exceeds 40 mph, 70% volumes are used for the analysis.

Part B of **Warrant 3 is met** during the peak hour at the intersection. The signal warrant worksheet can be found in Attachement B. It should be noted that the analyses conducted for the 37478 Cedar Boulevard (Robson Homes development) project found that using factored volumes based on historical counts would meet the peak-hour warrant. Since the peak-hour warrant is met, the installation of a traffic signal at the intersection should be considered.

Warrant 4- Pedestrian Volume

The Pedestrian Volume signal warrant (Warrant 4) is intended for use at locations where traffic volumes on a major street is so heavy that pedestrians experience excessive delay in crossing the major street. Warrant 4 consists of two parts and would be met when both parts meet the warrant conditions. The two parts are as follows:

Part 1: Either condition in Part 1 must be met:

1) The plotted point of representing the vehicles per hour on the major street (total of both approaches) and the corresponding vehicles per hour on the minor street approach of any four hours in an average day should be above line on Figure 4C-6 in the 2014 CAMUTCD
2) The plotted point of representing the vehicles per hour on the major street (total of both approaches) and the corresponding vehicles per hour on the minor street approach of the peak hour in an average day should be above line on Figure 4C-8 in the 2014 CAMUTCD

The plotted points have a minimum pedestrian threshold of 75 and 93 pedestrians crossing the major streets, for the any four hours and peak hour, respectively.

Part 2: Either condition in Part 2 must be met:

1) The distance to the nearest traffic signal along the major street is greater than 300 ft
2) The proposed traffic signal will not restrict progressive traffic flow along the major street.

Peak-hour turning movement counts found that no pedestrians crossed the major street during the peak hours. Since no pedestrians crossed the major street during the peak hours, it can be concluded that **Warrant 4 is not met** at the intersection. The proposed Robson Homes project could generate a small number of pedestrian trips at this intersection. The Birch Grove Park, Birch Grove Elementary School, and businesses along Cherry Street are located west of the intersection and would require any pedestrian trips to cross Cedar Boulevard. However, the addition of project-generated trips would not generate enough pedestrian trips to meet the minimum thresholds of Warrant 4.

Warrant 5- School Crossing

The School Crossing signal warrant (Warrant 5) is intended for application where the fact that schoolchildren cross the major street is the principal reason to consider installing a traffic control signal. Consideration shall be given to other remedial measures such as warning signs, school speed zones, and school crossing guards before a traffic control signal should be considered.

As discussed above, turning movement counts found that no pedestrians crossed the major street during the peak hours. Therefore, it can be concluded **Warrant 5 is not met** at the intersection.

Warrant 7- Crash Experience

The Crash Experience signal warrant (Warrant 7) is intended for application where the severity and frequency of crashes are the principal reasons to consider installing a traffic signal. Warrant 7 would be met when all of the following conditions are met:

a) Adequate trial of alternatives with satisfactory observance and enforcement has failed to reduce the crash frequency and
b) Five or more reported crashes of types susceptible to correction by a traffic control signal, have occurred within a 12-month period, each crash involving personal injury or property damage apparently exceeding the applicable requirements for a reportable crash and
c) For each of any 8 hours of an average day, the vehicles per hour (vph) given in both of the 80 percent columns of Condition A in Table 4C-1, or the vph in both of the 80 percent columns of Condition B in Table 4C-1 exists on the major-street and the higher-volume minor-street approach, respectively, to the intersection, or the volume of pedestrian traffic is not less than 80 percent of the requirements specified in the Pedestrian Volume warrant. These major-street and minor-street volumes shall be for the same 8 hours. On the minor street, the higher volume shall not be required to be on the same approach during each of the 8 hours.

The engineering and traffic study for Cedar Boulevard, between Central Avenue and Moores Avenue found that a total for four accidents occurred along the corridor between 2012 and 2016. One of these accidents occurred at the Cedar Boulevard & Smith Avenue intersection. Recent data from the Statewide Integrated Traffic Records System (SWITRS) found that two accidents have occurred at the intersection in the last ten years.

Warrant 7 is not met because all three conditions of the warrant are not met for this intersection. The signal warrant worksheet can be found in Attachment B.

Conclusions

The MUTCD provides signal warrants to provide guidance on when a traffic signal should be considered at an unsignalized intersection. Warrants 1, 2, 3, 4, 5, and 7 were evaluated for the intersection of Cedar Boulevard and Smith Avenue. The analysis finds that only the peak-hour signal warrant (Warrant 3) is met based on roadway volume data. Warrants 1, 2, 4, 5, and 7 are not met based on roadway volume data, peak-hour turning movement counts, and historical crash data. Since the peak-hour warrant is met, the installation of a traffic signal at the intersection should be considered.

Signal Warrant Worksheets

Figure 4C-101 (CA). Traffic Signal Warrants Worksheet (Sheet 1 of 5)

COUNT DATE Sept 14, 2021

DIST ____ CO ____ RTE ____ PM ____

CALC ____ DATE ____

CHK ____ DATE ____

Major St: Cedar Blvd

Minor St: Smith Ave

Critical Approach Speed 44 mph

Critical Approach Speed ____ mph

Speed limit or critical speed on major street traffic > 40 mph..... ☑ } RURAL (R)

In built up area of isolated community of < 10,000 population..... ☐ } or

☐ URBAN (U)

WARRANT 1 - Eight Hour Vehicular Volume SATISFIED YES ☐ NO ☑

(Condition A or Condition B or combination of A and B must be satisfied)

Condition A - Minimum Vehicle Volume 100% SATISFIED YES ☐ NO ☑

80% SATISFIED YES ☐ NO ☑

	MINIMUM REQUIREMENTS (80% SHOWN IN BRACKETS)				7A	8A	1P				6P	Hour
	U	R	U	R								
APPROACH LANES	1		2 or More									
Both Approaches Major Street	500 (400)	350 (280)	600 (480)	~~420~~ (336)	759	1272	689	968	1651	1165	956	827
Highest Approach Minor Street	150 (120)	~~105~~ (84)	200 (160)	140 (112)	53	104	42	124	117	54	38	33

Condition B - Interruption of Continuous Traffic 100% SATISFIED YES ☐ NO ☑

80% SATISFIED YES ☐ NO ☑

	MINIMUM REQUIREMENTS (80% SHOWN IN BRACKETS)											Hour
	U	R	U	R								
APPROACH LANES	1		2 or More									
Both Approaches Major Street	750 (600)	525 (420)	900 (720)	~~630~~ (504)								
Highest Approach Minor Street	75 (60)	~~53~~ (42)	100 (80)	70 (56)								

Combination of Conditions A & B SATISFIED YES ☐ NO ☑

REQUIREMENT	CONDITION	✓	FULFILLED
TWO CONDITIONS SATISFIED 80%	A. MINIMUM VEHICULAR VOLUME		Yes ☐ No ☑
	AND, B. INTERRUPTION OF CONTINUOUS TRAFFIC		
AND, AN ADEQUATE TRIAL OF OTHER ALTERNATIVES THAT COULD CAUSE LESS DELAY AND INCONVENIENCE TO TRAFFIC HAS FAILED TO SOLVE THE TRAFFIC PROBLEMS			Yes ☐ No ☑

The satisfaction of a traffic signal warrant or warrants shall not in itself require the installation of a traffic control signal.

Figure 4C-101 (CA). Traffic Signal Warrants Worksheet (Sheet 2 of 5)

WARRANT 2 - Four Hour Vehicular Volume **SATISFIED* YES ☐ NO ☑**

Record hourly vehicular volumes for any four hours of an average day.

APPROACH LANES	One	2 or More	8A	2P	3P	4P / Hour
Both Approaches - Major Street		X	1272	1362	1651	1165
Higher Approach - Minor Street	X		104	124	117	54

*All plotted points fall above the applicable curve in Figure 4C-1. (URBAN AREAS)	Yes ☐ No ☐
OR, All plotted points fall above the applicable curve in Figure 4C-2. (RURAL AREAS)	Yes ☐ No ☑

WARRANT 3 - Peak Hour **SATISFIED YES ☑ NO ☐**
(Part A or Part B must be satisfied)

PART A **SATISFIED YES ☐ NO ☑**

(All parts 1, 2, and 3 below must be satisfied for the same one hour, for any four consecutive 15-minute periods)

1. The total delay experienced by traffic on one minor street approach (one direction only) controlled by a STOP sign equals or exceeds four vehicle-hours for a one-lane approach, or five vehicle-hours for a two-lane approach; AND	Yes ☐ No ☑
2. The volume on the same minor street approach (one direction only) equals or exceeds 100 vph for one moving lane of traffic or 150 vph for two moving lanes; AND	Yes ☑ No ☐
3. The total entering volume serviced during the hour equals or exceeds 800 vph for intersections with four or more approaches or 650 vph for intersections with three approaches.	Yes ☑ No ☐

PART B **SATISFIED YES ☑ NO ☐**

APPROACH LANES	One	2 or More	3P / Hour
Both Approaches - Major Street		X	1651
Higher Approach - Minor Street	X		117

The plotted point falls above the applicable curve in Figure 4C-3. (URBAN AREAS)	Yes ☐ No ☐
OR, The plotted point falls above the applicable curve in Figure 4C-4. (RURAL AREAS)	Yes ☑ No ☐

The satisfaction of a traffic signal warrant or warrants shall not in itself require the installation of a traffic control signal.

Figure 4C-101 (CA). Traffic Signal Warrants Worksheet (Sheet 3 of 5)

WARRANT 4 - Pedestrian Volume
(Parts 1 and 2 Must Be Satisfied)

SATISFIED YES ☐ NO ☒

Part 1 (Parts A or B must be satisfied)

	Hours - - ->				
A.	Vehicles per hour for any 4 hours				
	Pedestrians per hour for any 4 hours	0	→	→	→

Figure 4C-5 or Figure 4C-6
SATISFIED YES ☐ NO ☒

	Hours - - ->				
B.	Vehicles per hour for any 1 hour				
	Pedestrians per hour for any 1 hour	0	→	→	→

Figure 4C-7 or Figure 4C-8
SATISFIED YES ☐ NO ☒

Part 2 **SATISFIED YES ☑ NO ☐**

AND, The distance to the nearest traffic signal along the major street is greater than 300 ft	Yes ☑ No ☐
OR, The proposed traffic signal will not restrict progressive traffic flow along the major street.	Yes ☑ No ☐

WARRANT 5 - School Crossing
(Parts A and B Must Be Satisfied)

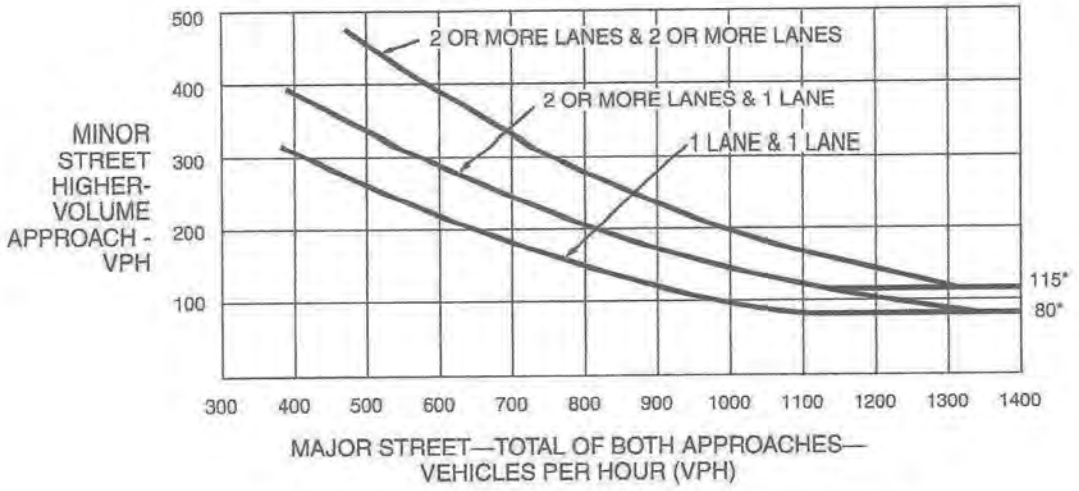
SATISFIED YES ☐ NO ☒

Part A
Gap/Minutes and # of Children

SATISFIED YES ☐ NO ☒

		Hour
Gaps vs Minutes	Minutes Children Using Crossing	
	Number of Adequate Gaps	
School Age Pedestrians Crossing Street / hr		

Gaps < Minutes YES ☐ NO ☐
AND Children > 20/hr YES ☐ NO ☒



AND, Consideration has been given to less restrictive remedial measures.	Yes ☐ No ☒

Part B **SATISFIED YES ☑ NO ☐**

The distance to the nearest traffic signal along the major street is greater than 300 ft	Yes ☑ No ☐
OR, The proposed signal will not restrict the progressive movement of traffic.	Yes ☑ No ☐

The satisfaction of a traffic signal warrant or warrants shall not in itself require the installation of a traffic control signal.

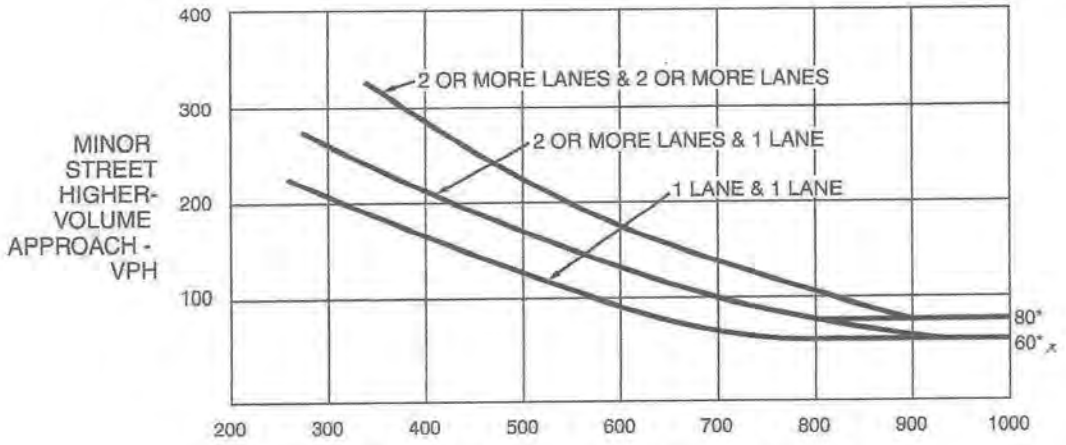


Figure 4C-1. Warrant 2, Four-Hour Vehicular Volume

*Note: 115 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 80 vph applies as the lower threshold volume for a minor-street approach with one lane.

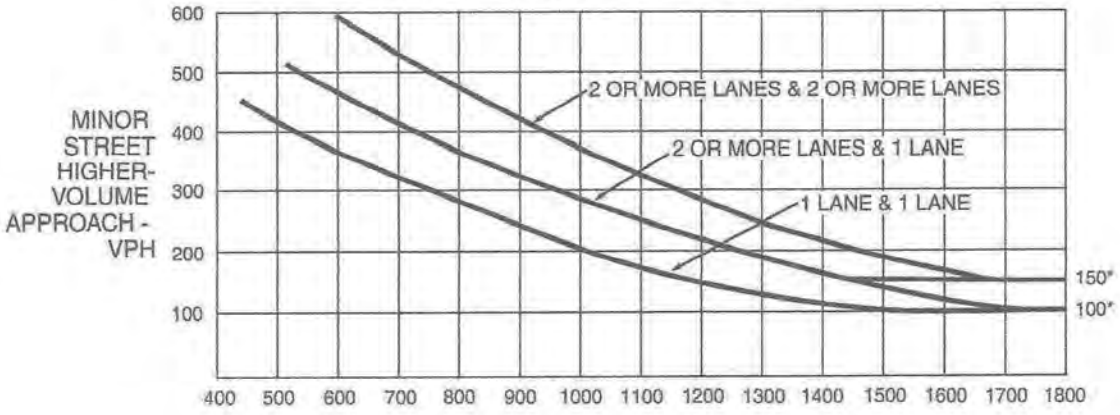

Figure 4C-2. Warrant 2, Four-Hour Vehicular Volume (70% Factor)

(COMMUNITY LESS THAN 10,000 POPULATION OR ABOVE 40 MPH ON MAJOR STREET)

*Note: 80 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 60 vph applies as the lower threshold volume for a minor-street approach with one lane.

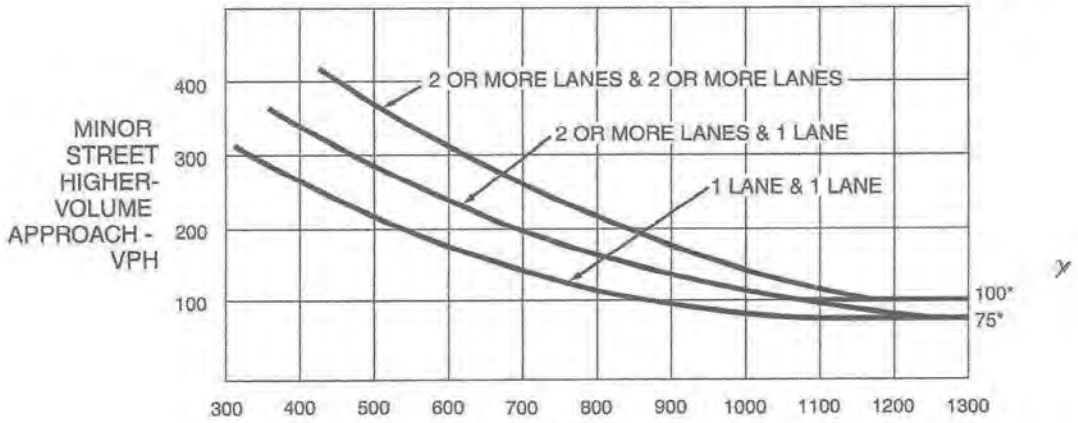

Figure 4C-3. Warrant 3, Peak Hour

*Note: 150 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 100 vph applies as the lower threshold volume for a minor-street approach with one lane.

Figure 4C-4. Warrant 3, Peak Hour (70% Factor)

(COMMUNITY LESS THAN 10,000 POPULATION OR ABOVE 40 MPH ON MAJOR STREET)

*Note: 100 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 75 vph applies as the lower threshold volume for a minor-street approach with one lane.

6. Other Transportation Issues

This chapter presents other transportation issues associated with the project. These include an analysis of:

- Signal warrants
- Intersection queuing analysis
- Site access and circulation
- Truck access and circulation
- Parking analysis
- Potential impacts to pedestrian, bicycle, and transit facilities

The analyses in this chapter are based on professional judgement in accordance with the standards and methods employed by traffic engineering professionals. Although operational issues are not considered CEQA impacts, they do describe traffic conditions that are relevant to describing the effects of added project traffic.

Signal Warrant Analysis

A signal warrant check (*MUTCD 2014 edition, Section 4C, Warrant 3*) was conducted for the unsignalized study intersection of Cedar Boulevard and Smith Avenue based on the peak-hour traffic warrant. The minor street threshold is 100 vehicles for a single lane minor road.

For the signal warrant analysis, Cedar Boulevard was considered the major street, while Smith Avenue was considered the minor road. Additionally, the City has recently conducted a speed study along Cedar Boulevard that shows the average vehicle speed along Cedar Boulevard in the vicinity of the intersection is 44 mph. Therefore, 70% factor values were used for the evaluation of signal warrants. The analysis revealed that the signal warrant is met under the Existing AM (Factored) and Cumulative AM peak hour scenarios. The project would not add any trips to the minor road approach and would add a small number of trips relative to the existing and estimated future volume along Cedar Boulevard. The project would not change traffic operations at this intersection in any noticeable way. The peak-hour signal warrant calculation sheets can be found in Appendix E.

Since the peak-hour signal warrant was met under the existing (factored) scenario, a supplemental signal warrant analysis was conducted in September 2021 to provide city staff with information to determine whether a signal should be installed. The following signal warrants were analyzed using data collected in September 2021:

- Warrant 1 – Eight-Hour Vehicular Volume
- Warrant 2 – Four-Hour Vehicular Volume

- Warrant 3 – Peak Hour
- Warrant 4 – Pedestrian Volume
- Warrant 5 – School Crossing
- Warrant 7 – Crash Experience

The supplemental signal warrant analysis memo to City of Newark staff can be found in Appendix F. The MUTCD notes that the satisfaction of a traffic signal warrant or warrants shall not itself require the installation of a traffic control signal. Therefore, the analysis presented in the signal warrant analyses is for informational purposes for City of Newark staff to determine whether a traffic signal should be installed at the intersection.

The results of the supplemental signal warrant analysis finds that the peak-hour warrant (Warrant 3) is met. Warrants 1, 2, 4, 5, and 7 are not met based on roadway volume data, peak-hour turning movement counts, and historical crash data. Since the peak-hour warrant is met, the installation of a traffic signal at the intersection should be considered.

Recommendation: The project should coordinate with city staff to determine whether a signal should be installed at the intersection of Cedar Boulevard & Smith Avenue.

Intersection Queueing Analysis

The operations analysis is based on vehicle queuing for turning movements where the project would add at least 10 new peak-hour trips (see Table 9). The following turn movements were examined as part of the queuing analysis for this project:

- Left turn from southbound Cedar Boulevard to eastbound Mowry Avenue (AM)
- Right turn from westbound Mowry Avenue to northbound Cedar Boulevard (PM)

Locations where the vehicular queues would be deficient are discussed below.

Cedar Boulevard and Mowry Avenue

Under all scenarios, the Cedar Boulevard and Mowry Avenue intersection was calculated to have insufficient storage for the southbound left turn movement during the AM peak hour. Since the southbound left turn movement exceeds the storage capacity during the heaviest cycles under existing conditions, the City of Newark should consider adding additional storage for the southbound left turn pocket at Cedar Boulevard and Mowry Avenue. A portion of the existing median could be removed to accommodate additional storage space.

Under existing and cumulative conditions, the project would add one vehicle to the southbound left turn maximum queue. The applicant should discuss with the City of Newark whether the left-turn pocket length should be extended.

Recommendation: Since the project would add trips to a left-turn pocket that already has insufficient storage capacity during the heaviest cycles, the project should discuss with the City of Newark whether the left turn pocket should be extended.

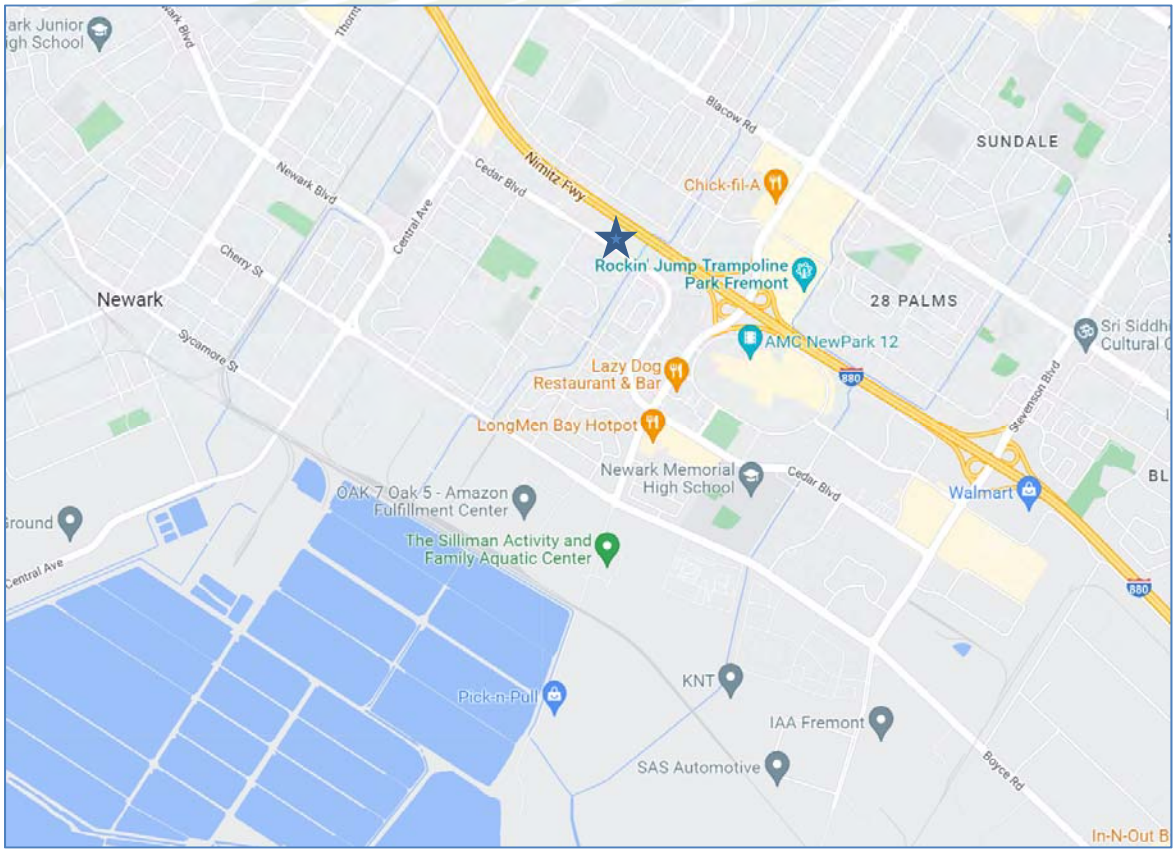
TJKM VISION THAT MOVES YOUR COMMUNITY

TECHNICAL MEMORANDUM

Date: October 14, 2022

To: Cara Carlucci, LSA

Project No.: 006-113 Cedar TIS



From: Arthur Chen & Chris Kinzel, TJKM

Jurisdiction: City of Newark

Subject: **Cedar Townhomes VMT Analysis Memo**

TJKM conducted a VMT (Vehicle Miles Traveled) analysis for the proposed Cedar Townhomes housing project located in the city of Newark. The project site is located near Interstate 880 and Mowry Avenue interchange north of Cedar Blvd. The project proposes infrastructure and roadway improvements in addition to constructing 80 townhome style units on a site previously occupied by commercial uses. Figure 1 shows the project location.

Figure 1 – Project Location Map

VEHICLE MILES TRAVELED (VMT)

This study evaluates project-related VMT as outlined in the Office of Planning and Research guidelines regarding SB 743. The methodology and implementation guidelines were adopted by the Alameda County Transportation Commission in July 2020. As of October 2022, the City of Newark has not adopted VMT procedures standards, so the ACTC standards were used.

The Governor's Office of Planning and Research (OPR) Technical Advisory (December 2018) provides guidance to analysts and local jurisdictions for implementing VMT as a metric for determining the transportation impact for land use projects. The OPR guidelines state that for analysis purposes, "VMT" refers to automobile VMT, specifically passenger vehicles and light trucks. Heavy truck traffic is typically excluded.

The ACTC guidelines include a screening process that describes five scenarios in which a project would be exempted from a VMT analysis requirement: 1) projects exempt from CEQA analysis, 2) small projects, 3) local serving projects, 4) projects in transit priority areas, and 5) projects in low VMT areas. It should be noted that even if a project satisfies one or more of the screening criteria, lead agencies may still require a VMT analysis if there is evidence that the project has characteristics that might lead to a significant amount of VMT. The project does not satisfy the requirements for screening criteria 1-4.

Under the ACTC VMT methodology, a low VMT area is defined as a city or unincorporated portion within one of the ACTC subregions where home-based VMT per resident is at least 15 percent below the countywide or where the commute VMT per employee is at least 15 percent below the regional average. A conservative reading of the methodology would indicate that when the citywide average VMT per resident is above the countywide average, projects cannot be screened out based on location, and a VMT analysis must be completed. In such cases, the appropriate significance thresholds based on countywide or regional average would be applied. The methodology also permits the applicable average VMT for the subject municipality or unincorporated ACTC subregion to be utilized instead of the countywide or regional average, if it is less stringent. As the existing residential VMT per capita in the City of San Ramon is higher than the Contra Costa countywide average, a VMT analysis is required for this project.

Under ACTC guidelines, a residential project would have a significant impact on VMT if it would generate residential VMT per capita higher than 85 percent of the South Alameda County average.

1. Screening Criteria and Methodology

ACTC guidance (OPR Technical Memo, December 2018) on VMT analysis for residential projects require a base year condition model run along with baseline plus project model run to extract VMT data for the TAZ that the project is located in. The project is located in TAZ #934 in the ACTC model; land uses stemming from this project was added to the land use input file and the ACTC model was ran to generate VMT metrics for this project.

2. VMT Forecasting and Analysis

The project consists of 80 townhome style multi-family housing units. Currently, TAZ #934 contains 279 households and 843 population. The 2020 Census average ratio of population to household for the City of Newark was used to calculate the total population for the project (3.34 people per household). Using this ratio, 80 housing units from this project will add 267 persons to the TAZ. **Table 1** shows the land use changes for the base year plus project run.

Table 1: Land Use Changes for Base Year

TAZ	Households	Population	Single Family Dwelling Units	Multi Family Dwelling Units
#934	+80	+270	+0	+80

A base year plus project model run was conducted with the land use changes added. The ACTC model results are summarized in **Table 2.**

Table 2: Home Based VMT Per Capita Comparison (South Alameda County Average)

TAZ	Base Year Average Daily VMT per Resident (per ACTC Model)	Regional Average (per ACTC Model)	15% Below Regional Average (per ACTC Model)	Base Year Plus Project Average Daily VMT per Resident (per ACTC Model run)
#934	23.24	22.60*	19.21	18.43

**Note: The regional average VMT used for VMT thresholds is for the City of Newark area*

The existing base year per capita VMT for TAZ #934 is 23.24. Coding the project into the TAZ results in a VMT per capita of 18.43**,** a decrease of 4.81. For residential projects, ACTC establishes a significance threshold of 15 percent below the subject municipality's average residential VMT, or below the countywide average VMT, whichever is less stringent. Alameda County has a higher VMT per capita than the Newark, so the average VMT per capita for the City was used as the VMT significance benchmark. Since 18.43 is lower than the 85% threshold of 19.21 for the City of Newark project would produce an **insignificant** impact on VMT.

TJKM will be happy to respond to questions or comments on this Technical Memorandum. ACTC Model outputs can be found in Appendix A.

Appendix A – ACTC Model VMT Outputs

ACTC Model Outputs

TAZ	Total Population	VMT Production	VMT per Capita

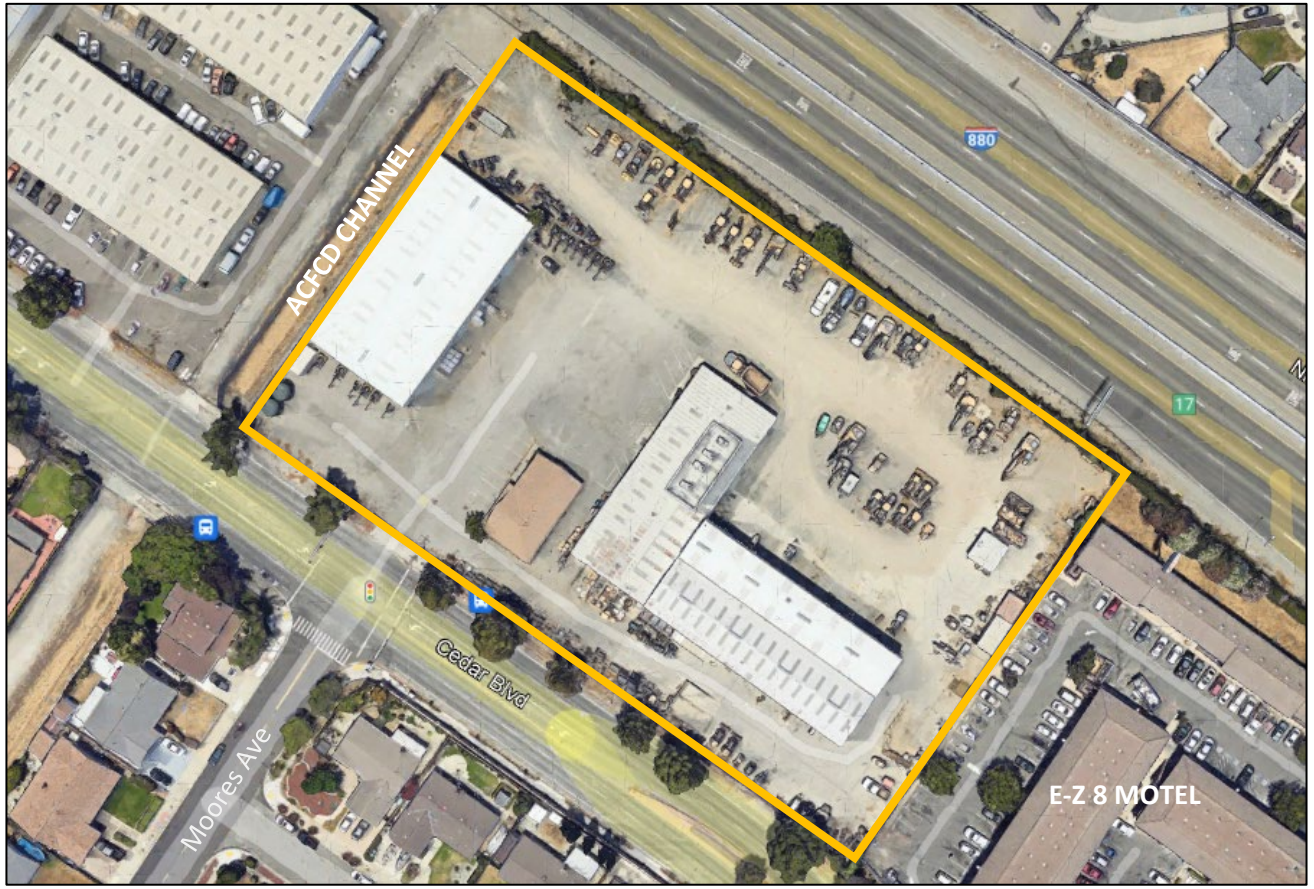
Waymark Townhomes Project

September 14, 2023
City Council Meeting
Carmelisa Lopez, Senior Planner

Requested Entitlements

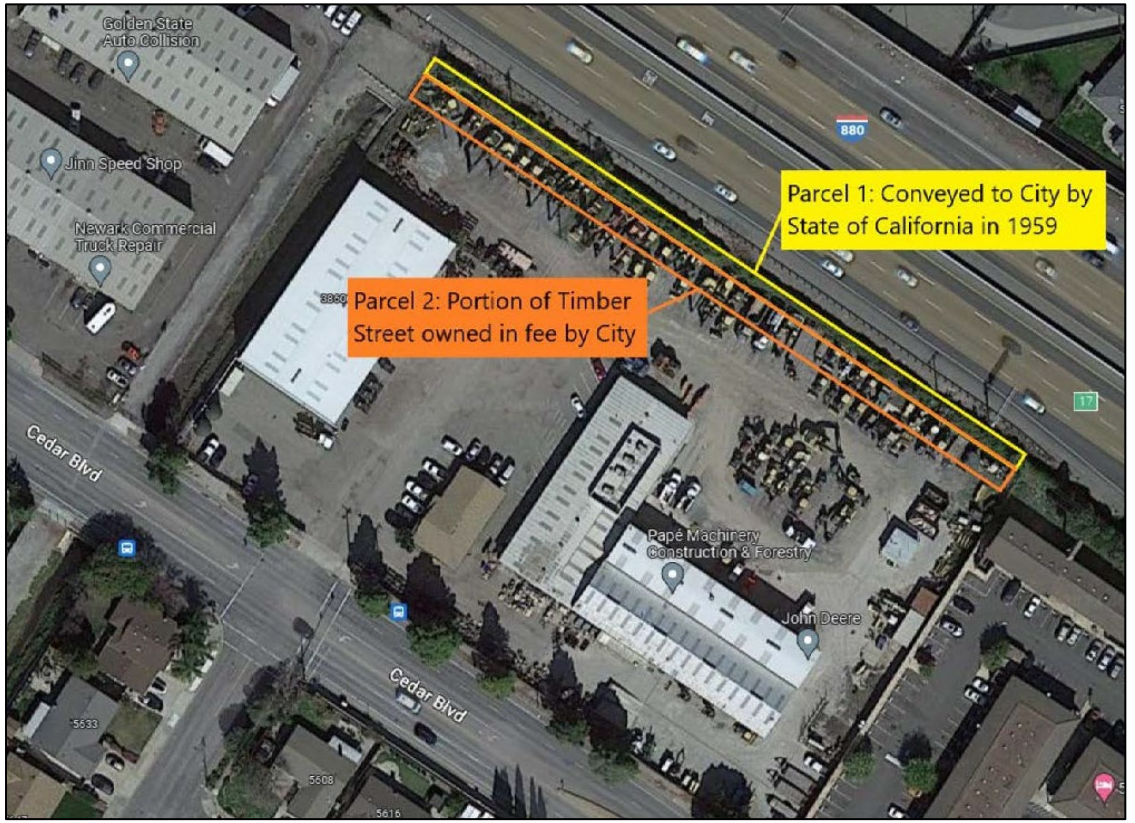
The applicant and owner, Waymark Development, requests approval of the following entitlements for the proposed project:

1. Design Review for the design of the site, buildings, and associated improvements
2. Minor Use Permit to allow a building height over 35 feet and a sound wall over 6 feet tall
3. Vesting Tentative Map to create one common lot and 76 condominium units



Site Information

- 3.72-acre site
- Bounded by a flood control channel, I-880, a motel, and Cedar Blvd
- Surrounded mostly by residential uses
- Robson Homes project recently entitled northwest of site



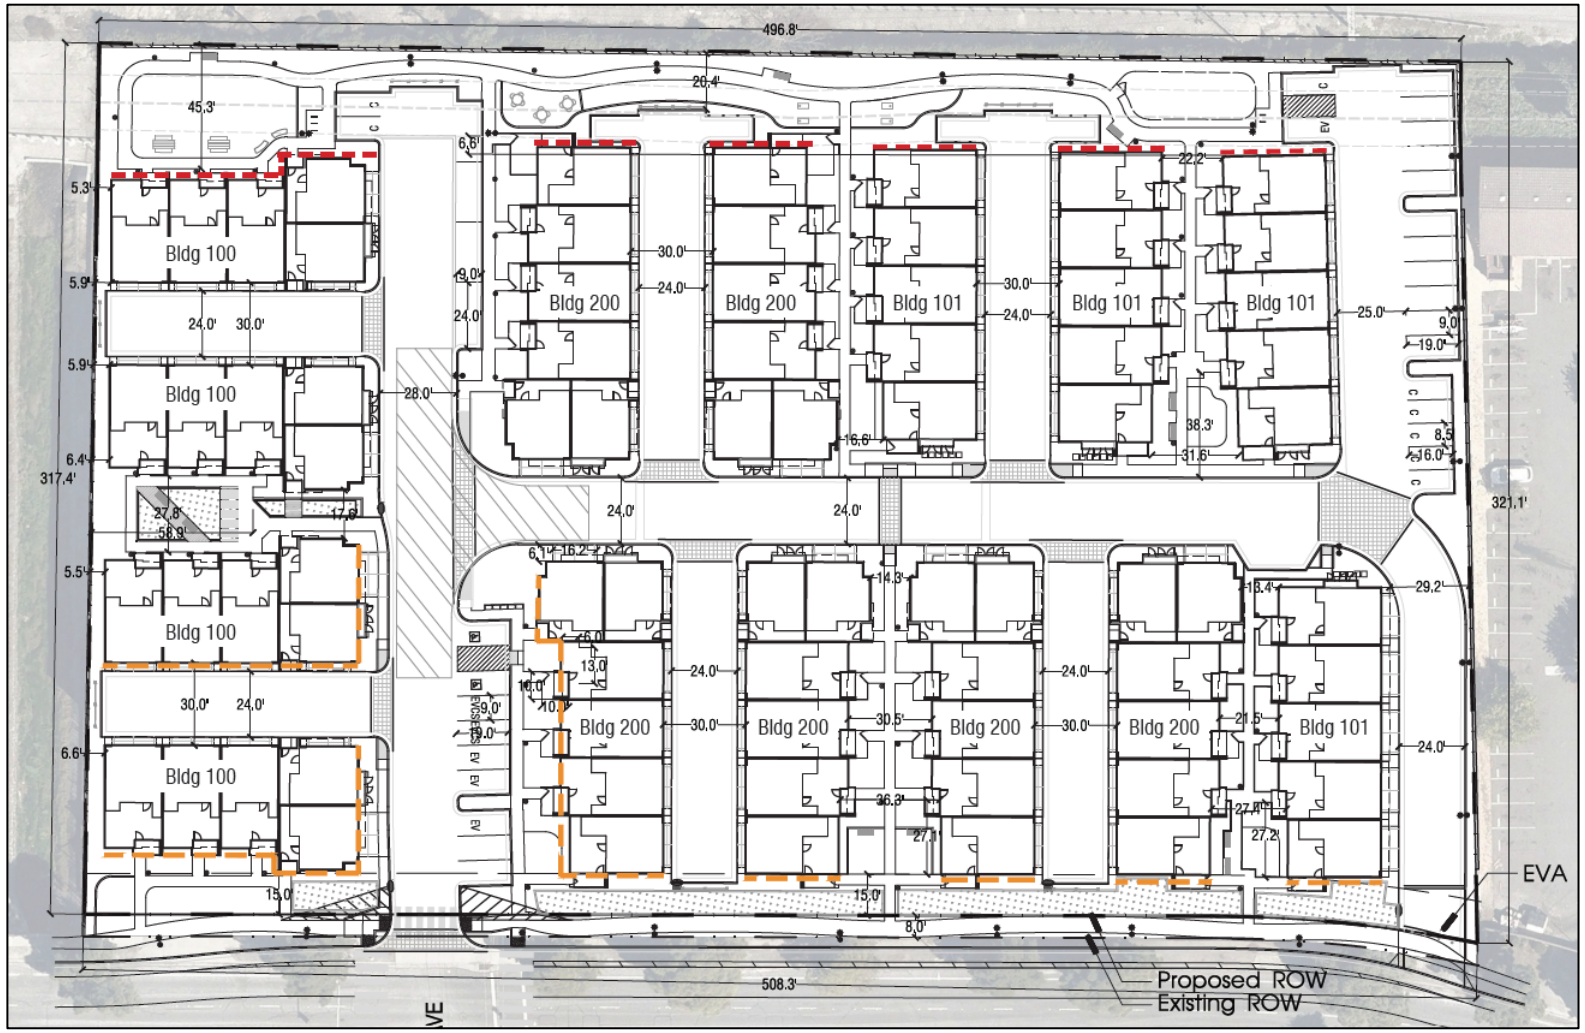
Site Information

- Site was most recently occupied by a commercial use (Pape Machinery)
- Contains three commercial buildings and paved areas for circulation, parking, and storage

Sale of City Property

- Site includes portions of excess City right-of-way and a street remnant of Timber Street
- On Feb. 23, 2023, the City Council approved the City Manager to execute a PSA to complete the sale of the parcels to the property owner
- PSA requires sale to be completed within 120 days after project approval

Project Proposal



- The applicant proposes to construct 76 townhouses within 14 buildings
- Each building will contain 5-6 townhouses
- Proposed density of 20 units per net acre
- The two parcels and former City property (once sale is completed) will be merged to create one common lot and 76 condominium units

Site Plan

Enhanced street elevation

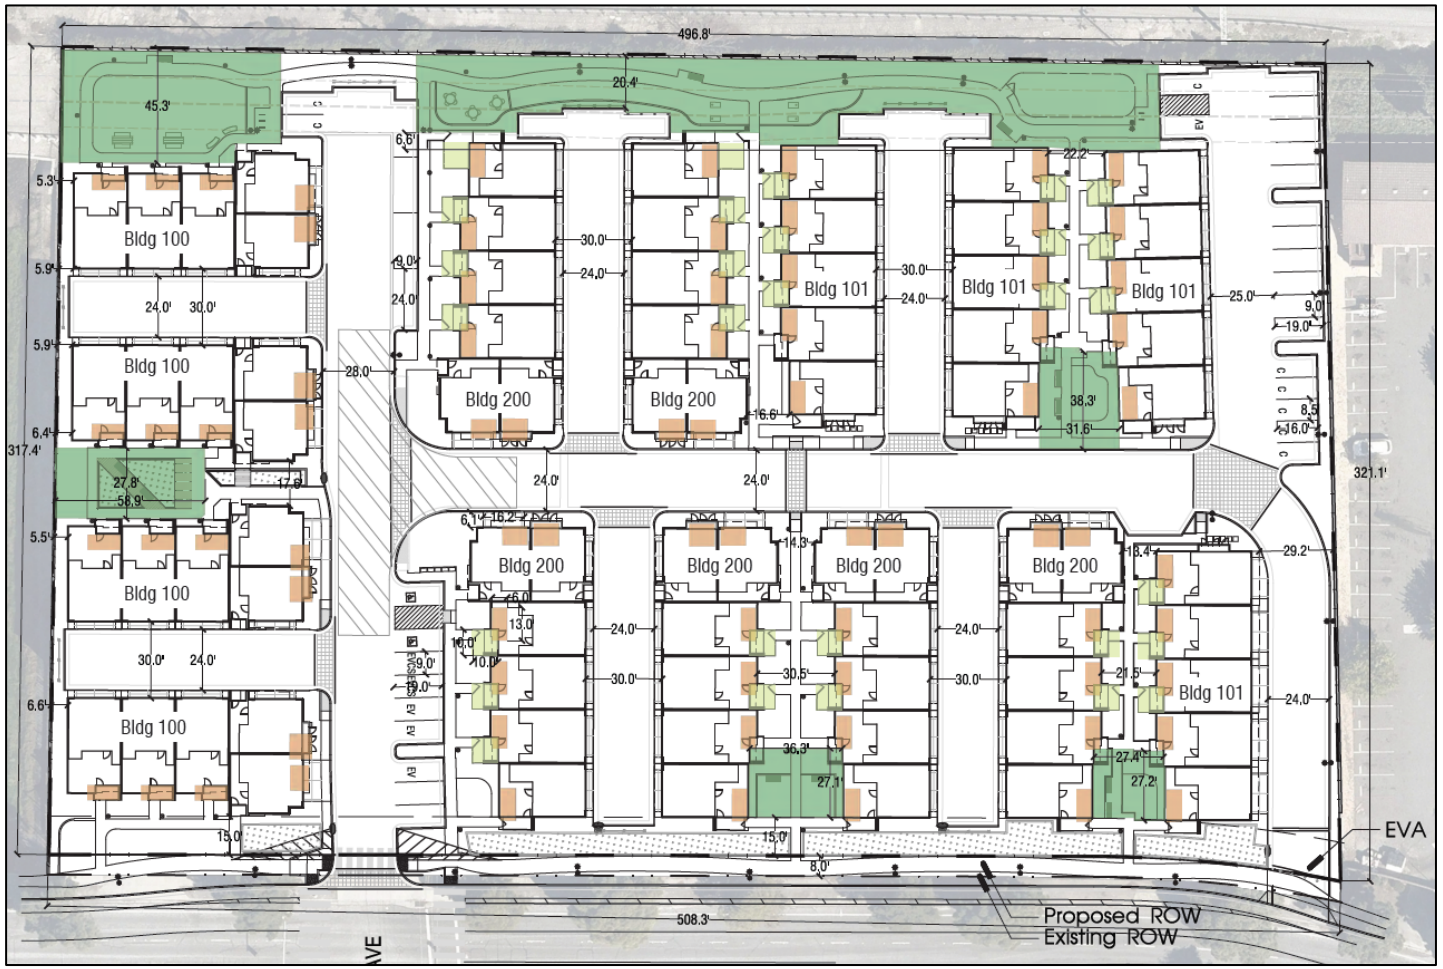
Enhanced Elevation at Third Floor

Proposed Residences

Floor Plans	3
Stories	3
Building Height	36’ to 37’
Habitable Floor Area	1,334 to 1,823 sq. ft.
Bedrooms	3 to 4
Bathrooms	2.5 to 3
Private Open Space	Decks and porches
Parking Spaces	2 within garage

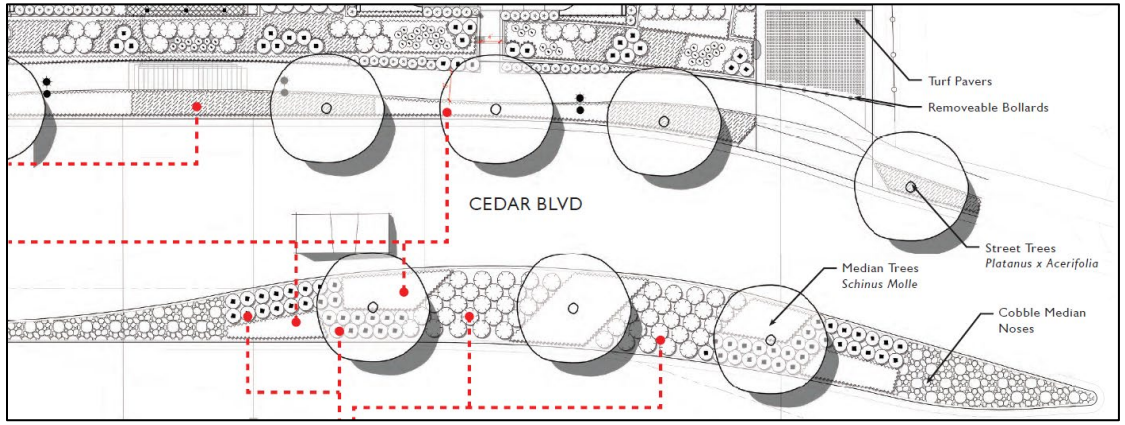
Proposed Residences

- Three floor plans
- Buildings will have 5-6 units each
- Three color schemes
- Elevations facing main entrance to site, Cedar Blvd, and I-880 will be “enhanced”



Open Space

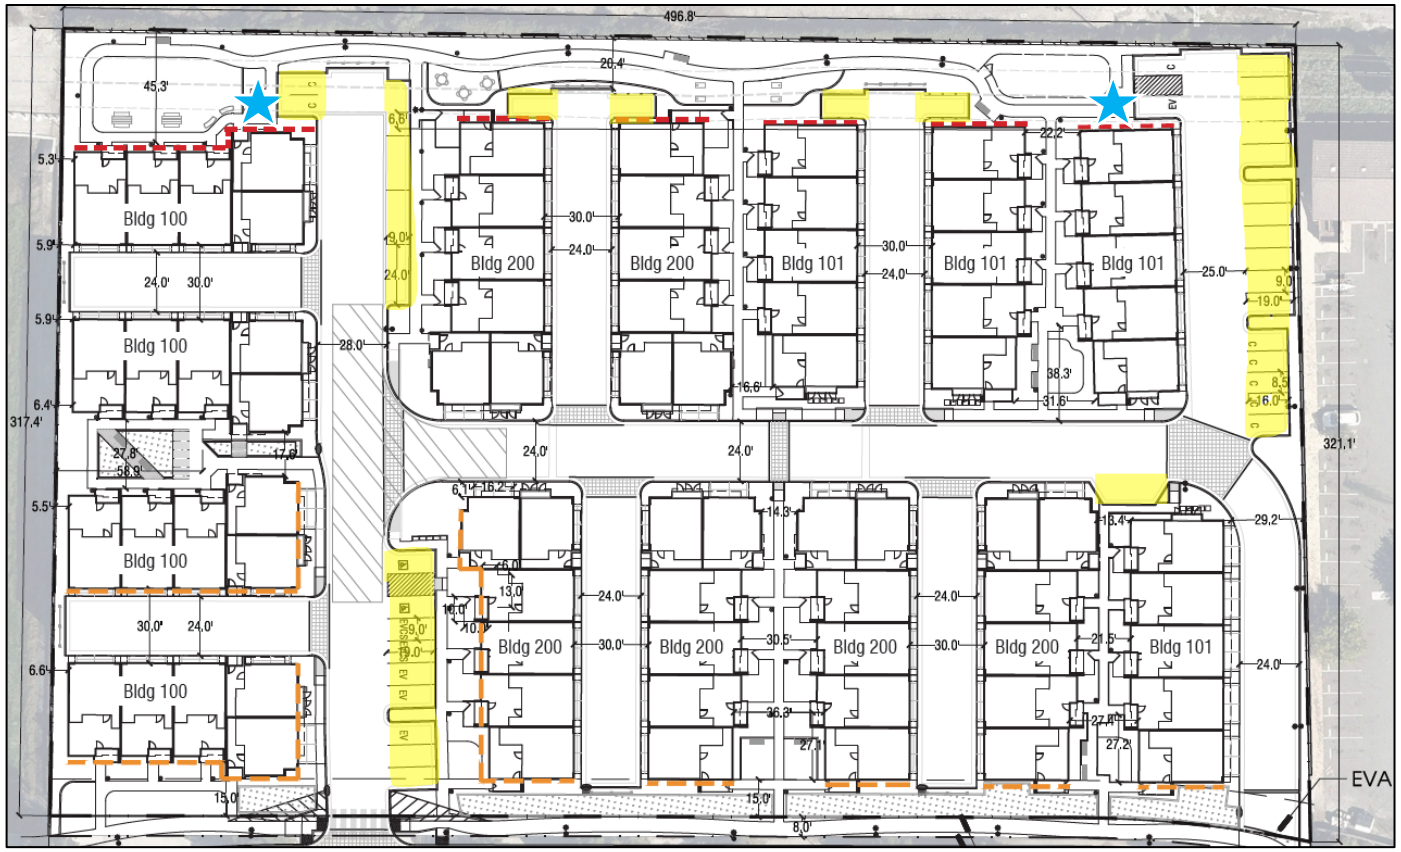
- 22,803 sq. ft. total
- Private: Decks and patios within residence
- Common: Flexible green space, dog play area, courtyards with seating, boardwalks over bioretention areas



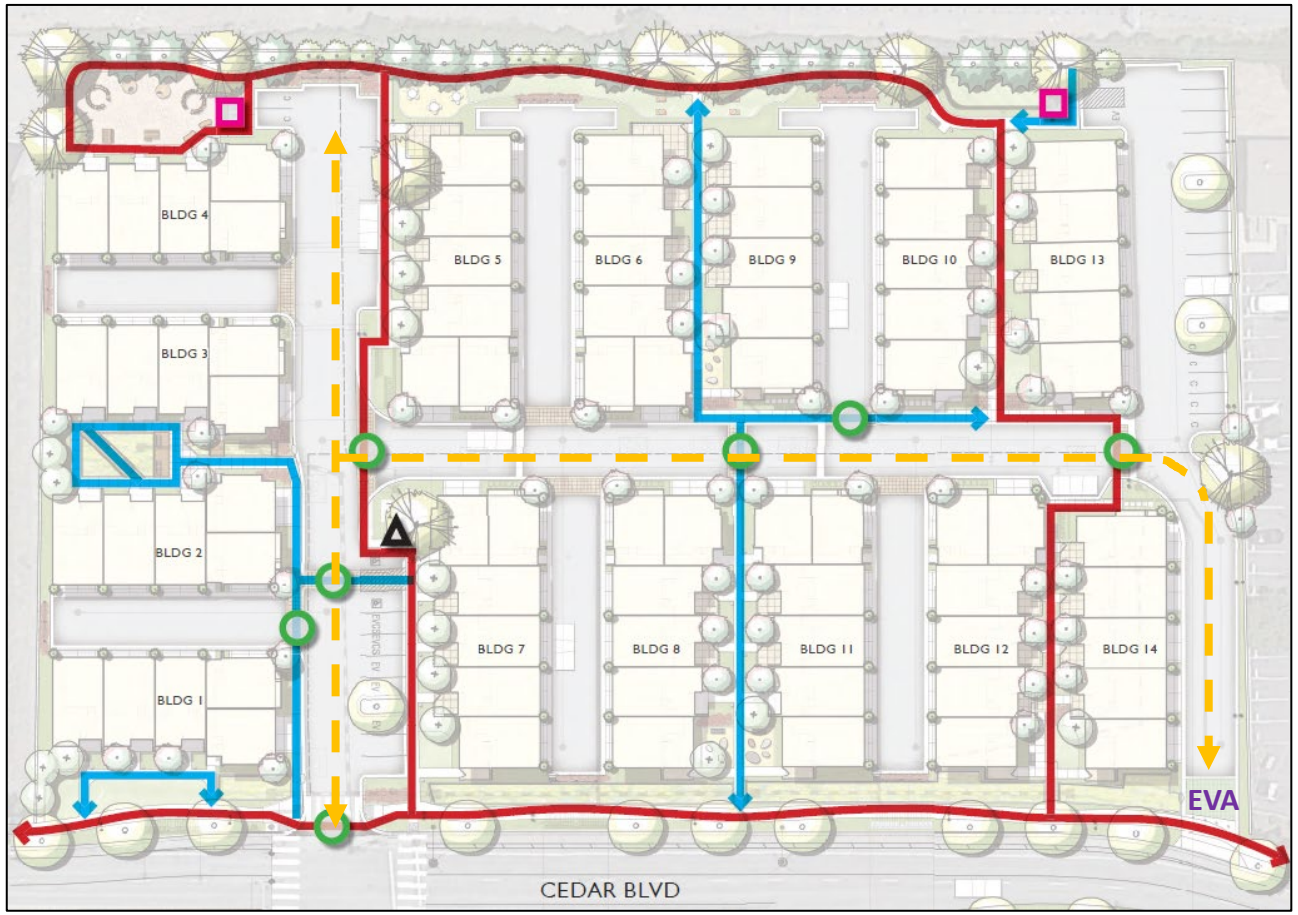
Landscaping

- Diverse landscape palette
- Along site perimeter, walkways, sidewalks, and open space areas
- “Enhanced” landscaping along Cedar Blvd
- Turf cell paving and removable bollards at EVA

Cedar Blvd Streetscape



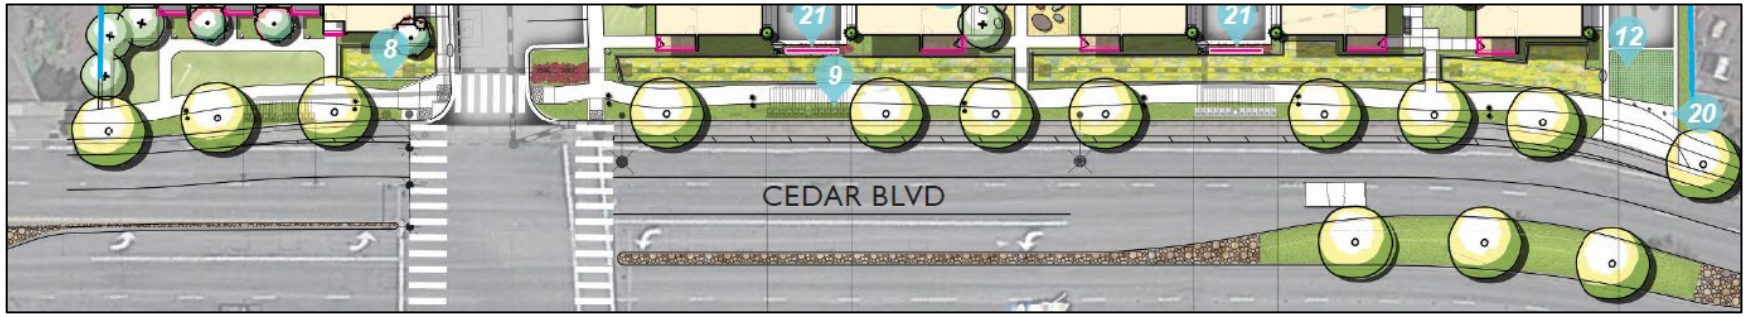
- Front entries of residences adjacent to Cedar Blvd will face Cedar Blvd
- Low brick-capped stucco walls to screen patio areas and alleys
- Street trees and a meandering sidewalk



Parking

- 190 parking spaces proposed
  - Two spaces within each garage
  - 38 guest spaces on-street and within parking areas
- Bicycle storage area in each garage
- Bicycle racks at rear open space areas

Access & Circulation



- Entrance at Cedar Blvd & Moores Ave
- EVA provided at southeast corner of site on Cedar Blvd
- Private road and alleys will lead directly to each garage
- Proposed sidewalks, walkways and enhanced crossings

Offsite Improvements

Several offsite improvements proposed such as:

1. Crosswalk restriping at Cedar Blvd and Moores Ave
2. Widening of Cedar Blvd along site frontage to accommodate two travel lanes, a bike lane and buffer, parkway strip, and meandering sidewalk
3. Extension of landscape median and new landscape median on Cedar Blvd
4. Traffic signal and crosswalk improvements at Cedar Blvd & Smith Ave intersection

Community Meeting

- On April 17, 2023, the Applicant held a community meeting at Pape Machinery located on the project site
- Notices sent to property owners within a 500-foot radius and interested parties
- Three community members attended and were generally supportive of project
- No written comments received

General Plan & Zoning Code

- Proposed density of 20 units per acre is permitted in the Medium Density Residential designation of the General Plan
- Townhouses are permitted in the RM Residential Medium Density zoning district
- Project consistent with all applicable General Plan policies and zoning standards

Requested Entitlements

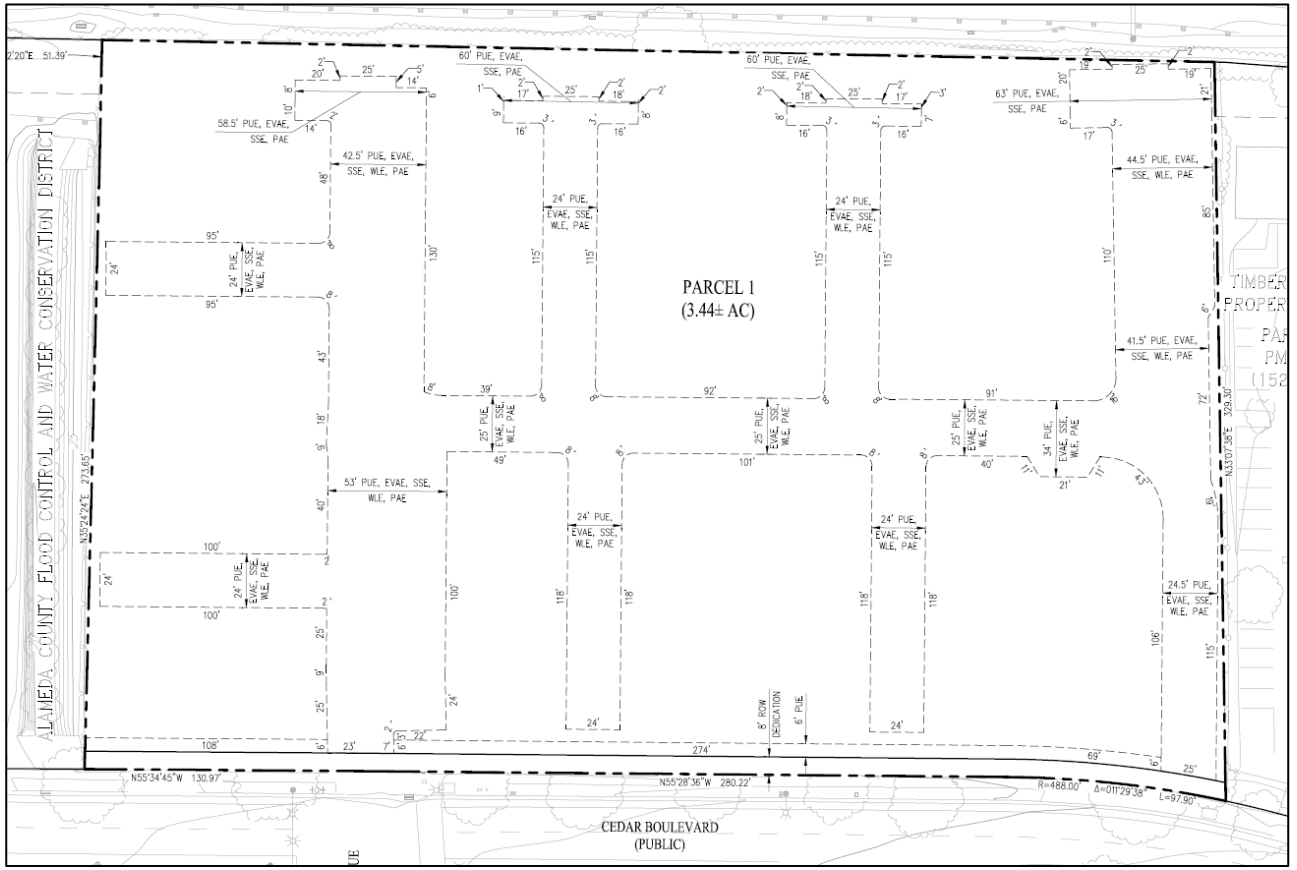
1. Design Review for the design of the site, buildings, and associated improvements
2. Minor Use Permit to allow a building height over 35 feet and wall over 6 feet tall
3. Vesting Tentative Map to create one common lot and 76 condominium units

Design Review

- Building design is a blend of Spanish and Mediterranean styles
- Buildings are well articulated with a variety of colors, materials, and decorative elements
- Elevations facing main entrance to site, Cedar Blvd, and I-880 will be “enhanced”
- Landscaping and open spaces areas complement the residences and will enhance overall site appearance

Minor Use Permit for Building Height

- Applicant requests a maximum building height of 37 ft.
- MUP required for building heights over 35 ft. in RM zoning district
- Pitched tile roofs are necessary to achieve architectural style
- Parapet flat roofs are also necessary to screen roof-mounted equipment



Minor Use Permit for Wall Height

- Applicant requests an up to 18’ tall sound wall along rear and side property lines
  - 18’ along rear property line
  - Steps down from 18’ to 10’ from rear to front of property
- Sound wall required to meet General Plan Policy EH-7.4 to reduce outdoor noise levels in residential areas
- Will reduce exterior noise levels to 65 dB

Vesting Tentative Map

- Applicant requests approval of Vesting Tentative Tract Map 8665 to create 1 common lot and 76 condominium units
- Includes various easements for access and utilities
- 8’ wide right-of-way dedication for Cedar Blvd

Environmental Review

- A CEQA analysis was prepared in accordance with CEQA Guidelines
- Determined the project is exempt from further environmental review pursuant to CEQA Guidelines Sections 15183 and 15168 and California Public Resources Code Section 21083.3
- The analysis demonstrated that the project is:
  - Within the development assumptions analyzed in 2013 General FEIR
  - Consistent with the General Plan
- Project must comply with all applicable mitigation measures in FEIR

Planning Commission Meeting

- The Planning Commission (PC) reviewed the project on July 25, 2023
- Comments received regarding the property, City's housing requirements, sound wall maintenance, and the impact of new development on traffic and pedestrian safety
- The PC and staff responded to the questions by providing info on the state housing requirements, the City's Housing Element, and the transportation analyses prepared for the project
- After consideration of the info presented and comments received, the PC voted 5-0 to recommend approval

Recommendation

Staff recommends that the City Council approve the Project by taking the following action:

Adopt a Resolution finding the project exempt from further environmental review pursuant to CEQA and approving a Design Review, Minor Use Permit, and Vesting Tentative Map for a 76-unit residential development located at 38600 Cedar Boulevard (APNs 92A-2585-12-1, 92A-2585-31).

STAFF REPORT

Item F. 1.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Nicholas Cuevas, Recreation and Community Services Manager
SUBJECT	Presentation of programs and services delivered by the City of Newark's Clark W. Redeker Newark Senior Center and adopt a resolution approving the revised guidelines and procedures for the Senior Citizen Standing Advisory Committee.

SUMMARY AND RECOMMENDATION

Staff recommends that the City Council receive the presentation of programs and services delivered by the City of Newark's Clark W. Redeker Newark Senior Center and adopt a resolution approving changes to the Senior Citizen Standing Advisory Committee name and handbook.

BACKGROUND

The Senior Citizen Standing Advisory Committee ("Committee") researches senior issues within the City of Newark and identifies those needs that require assistance. The Committee makes recommendations to the City Council and provides information to Newark's senior citizens. It is not a decision-making body. The Committee meets at 10:00 a.m. on a quarterly basis on the third Thursday at the Clark W. Redeker Newark Senior Center located at 7401 Enterprise Drive in Newark.

The Senior Citizen Standing Advisory Committee Handbook ("Handbook") outlines the role of the committee and its members, explains City government and transparency, explains the logistics of its meetings, and describes the application and selection process for its members. The Handbook is intended to be a training resource for new appointees. The Handbook was last revised in May 2020, and needs to be updated. A draft has been prepared and was circulated to existing committee members for feedback and no comments were submitted to City staff.

DISCUSSION/ANALYSIS

Staff thoroughly reviewed the Handbook and drafted amendments to provide a clearer understanding of the Committee's role within the City of Newark and better outline the responsibilities and expectations of Committee Members.

Apart from making general formatting adjustments, the following sections were introduced or modified within the Handbook:

Name Change:

- The Committee's name is recommended to be modified from "Senior Citizen Standing Advisory Committee" to "Senior Advisory Committee." This adjustment aligns our Committee title with current practices and eliminates any potential misconception that U.S. citizenship is a requirement for committee membership.

Committee Membership:

- **Selection Process:** The Committee shall be made up of no less than five (5) committee members and no more than nine (9) Committee members, excluding the City Council representative.
  - Presently, the Committee comprises no less than eight (8) Committee Members and no more than twelve (12) Committee members, plus a City Council Representative.
    - The Committee has encountered difficulties in reaching a formal quorum during its recent meetings. This shift in Committee Members is expected to facilitate the attainment of a quorum more effortlessly and help prevent any delays in conducting official business.

Role of Committee Members:

- **Active Participation:** The Committee members are encouraged to be active participants at the Clark W. Redeker Newark Senior Center and act as community ambassadors to support the needs of Newark seniors.
  - This change encourages Committee Members to actively participate in Clark W. Redeker Newark Senior Center to understand better the needs of their peers and seniors in the community and by providing valuable feedback to program staff.
  - Staff encourages all Committee members to participate in the City of Fremont's Family and Aging Services Community Ambassador Program for Seniors. The CAPS program will provide committee members with the necessary tools to help Newark seniors connect to local resources.
- **Attendance Requirements:**
  - Language has been included to clarify attendance requirements and the process for reporting absences to the Committee Chairperson or City Staff. The existing handbook lacks specific information regarding the permissible number of absences from missed meetings.
  - Staff recommends the following new language:
    - A Committee member who is unable to attend a meeting is responsible for notifying the Committee Chairperson or City staff assigned to the committee. A Committee Member that does not provide notification of absence from three consecutive meetings will be subject to removal from the committee, at the Chairperson’s discretion.

Committee Meetings:

- **Meeting Frequency:** The Committee meets on a quarterly basis compared to the previous monthly format, or as otherwise decided by the Chairperson, at the Clark W. Redeker Newark Senior Center. In compliance with state open-meeting laws (Brown Act), the meetings of these bodies are open to the public.
- **Noticing and Venue:** Updated locations are the Clark W. Redeker Newark Senior Center, David W. Smith City Hall, and on the city website Newark.org at least 72 hours prior to the scheduled regular meeting pursuant to Government Code

Section 54954.2.

During the Council meeting, staff will provide an overview of services and programming offered at the Clark W. Redeker Newark Senior Center and will be able to answer any questions from the Council. Following the presentation, staff will recommend that the Council adopt the attached resolution approving the name change of the Committee and updated Handbook.

FISCAL IMPACT

There is no fiscal impact associated with this action.

~~Advisory Committees play an important role in City government by assisting and advising the City Council in formulating policy. The specific role and procedures will vary for different committees. Committees are formed by City Council resolution to address specific projects, populations or areas of concern.~~

~~This handbook describes the guidelines and procedures to be observed in the conduct of the Senior Citizen Standing Advisory Committee of the City of Newark.~~

~~*B. Appointment of Committees*~~

~~The City Council appoints citizens to serve on committees. Any person interested in serving on a City advisory body~~ **City Government**

The City of Newark operates under a Council-Manager form of government. Elected by the residents, the City Council is the City's official legislative and policy-making body. The City Council is ultimately responsible to the residents for the manner in which City business is conducted.

The City Council is comprised of a Mayor elected at-large to a two-year term and four Council Members elected at-large to four-year terms on a staggered basis.

The City Council appoints a City Manager to be the chief administrator. The City Manager is responsible for administrative matters, such as the preparation of the budget, direction and evaluation of City programs and services, and enforcement of all laws and ordinances. The City Manager also establishes administrative policies and coordinates department activities.

The City Council appoints members of the Planning Commission and various advisory committees and contracts for the City Manager and City Attorney. The City Attorney is legal advisor to the City Council, City Manager, and all City departments. It is the responsibility of the City Attorney to ensure that all ordinances, resolutions, and contracts approved by the City Council are in accordance with applicable laws.

Open Government

The City of Newark is committed to creating an open Government. We work together to ensure the public trust and establish a system of transparency, public participation, and collaboration. Openness will strengthen our community and promote efficiency and effectiveness in the City of Newark.

COMMITTEE MEMBERSHIP

Application Process

When a vacancy occurs, it is publicized and any person, 55 years or older, residing within the City of Newark, who is interested in serving on the Senior Advisory Committee is invited to complete an application ~~form~~ and submit it to the City Clerk~~,~~ by the established deadline. The applications are then forwarded to the Mayor who makes the appointment with City Council confirmation. Applications remain on file for one year. ~~When a committee is formed or vacancy occurs, it is publicized and applications of persons interested in serving on a particular body are forwarded to the City Council. The City Council makes the appointment. Applicants are required to reside within the City. (2/94, 5/2020)~~

Formatted: Font: 12 pt
Formatted: Font: 12 pt

~~C. Term of Office~~

The term of office of Committee members shall be for two years~~. (2/94, 3/98, 1/2011)~~

Formatted: Font: 12 pt

~~III. ASSIGNMENT TO THE COMMITTEE~~

~~The City Council will make a formal written assignment to the Committee. The assignment will include the process, the end product(s), and a proposed time deadline for completing the assignment. The City Council~~

will further clarify the assignment and extend time deadlines or for the unexpired term if requested by the Committee. This assignment and the deadline are set forth in the Assignment at the front of this handbook. Any change or expansion of the assignment or deadline will occur only with the approval of the City Council. (2/94)

IV. MEETINGS

A. Meeting Schedule

The committee needs to establish its regular meeting schedule at the first meeting. Attendance offilling an unexpected vacancy. Committee members is critical to the effective completion of the Assignment.

Committees meet on a regular basis, usually once or twice a month. City Council policy requires that meetings be heldcan request reappointment at the City Administration Building or at other City facilities. In compliance with state open meetings laws (Brown Act), the meetings of these bodies are open to the public. A member who is unable to attend a meeting is responsible for notifying the Committeeend of their terms. Once a vacancy occurs, the Chairperson or City staff assignedmay choose to assistreduce the committee at the earliest possible time. Attendance atmaximum number of Committee meetings is critical; thus, members may be removed for failure to meet attendance requirements. (See Attendance)

B. Appointment of Chairperson and Vice Chairperson

Where the assignment requires, the City Council may name a Chairperson and Vice Chairperson or permit election of these officers by the Committee. Normally, if a City Council Member sits on a Committee, the Council Member will chair the Committee. The Chairperson and Vice Chairperson will serve in that capacity for the duration of the Committee. A Committee member may qualify to be elected as Vice Chairperson only after he/she has served on the Committee six months or longer. (2/94)

C. Procedural Rules

The Chairperson shall oversee the Committee's performance. The Chairperson will be directly responsible to the City Council.

The Chairperson shall also be responsible for:

- Calling meetings, preparing agendas, and presiding at same;

Formatted: Font: 12 pt

Formatted: Font: 12 pt

Formatted: Font: 12 pt

Formatted: Justified, Indent: Left: 0", Tab stops: Not at -0.79" + -0.5" + 0.38" + 0.75" + 1.13"

- ~~Providing ample opportunity for members to express themselves by engendering an atmosphere conducive to frank and open discussions;~~

- ~~Keeping Committee members well informed of their mandated purpose and on target regarding time requirements;~~

- ~~Attending City Council and Planning Commission meetings on request to report progress and coordinate efforts with other committees; and~~

- ~~Setting deadlines for work to be completed and checking from time to time with members who have been assigned work to see that work is progressing toward completion.~~

~~The Vice Chairperson of the Committee shall act in the absence of the Chairperson~~ and ~~generally conduct meetings and perform functions as listed herein. In the absence of both Chairperson and Vice Chairperson, a City staff person will conduct the meeting. (2/94)~~

Formatted: Font: 12 pt

~~A majority of the total appointed Committee membership shall constitute a quorum. In the event the assignment requires a vote, a quorum is necessary to vote on any action. A simple democratic majority vote of those voting shall decide a question before the Committee. City staff will~~therefore, not ~~vote on Committee recommendations. The Committee shall strive to reach a consensus of the Committee's entire membership rather than a bare majority of the quorum present when making a recommendation to the City Council or Planning Commission. (1/2011)~~fill the vacancy.

Formatted: Indent: Left: 0", Tab stops: Not at -0.79" + -0.5" + 0.38" + 0.75" + 1.13"

Formatted: Font: 12 pt

Formatted: Font: 12 pt

~~*D. Committee Records*~~

~~Committee agendas, minutes, and other necessary records will be maintained by the City staff assigned to assist the Committee.~~

~~V. ATTENDANCE~~

~~*A. Attendance Expectations*~~

~~Attendance of Committee members is essential for adequate consideration of the material before the Committee.~~ **Legal Compliance**

~~Reading minutes and preparatory material cannot replace participation in Committee meetings. Committee members must commit themselves to meeting attendance. If during the Committee assignment circumstances arise which make attendance difficult, the Committee member should~~

Formatted: Font: 12 pt

resign from the Committee. (If a member resigns early, his/her concern about attendance will be respected in future applications for Committee assignments.)

Committee members are asked to contact the Committee Chairperson or City staff assigned to assist the Committee before the meeting if they must miss a meeting.

B. Termination from Committee Membership

If a Committee member misses two consecutive meetings or three meetings within a six month period, he/she may be dropped from Committee membership. (10/2010)

VI. CITY STAFF ASSISTANCE

The Committee will have available such assistance of City staff as may be required to perform its assignment. The staff assignments and administrative procedures will be under the general direction and supervision of the City Manager.

VII. COMMITTEE REPORT

When the Assignment requires a report, this report should reflect a consensus of the Committee. A consensus means willingness to go along with the recommendation although it does not meet all of the members' desires. If a minority of the Committee remains strenuously opposed to the Committee recommendation, they may present a minority report on the recommendation. City staff may also submit an independent report.

~~VIII. BROWN ACT COMPLIANCE~~

~~*A. Policy*~~

It is the policy of the Brown Act that public boards, commissions, committees, task forces, and other multi-member bodies created by local agencies in this State exist to aid in the conduct of the people's business. It is the intent of the law that their actions be taken openly and that deliberations be conducted openly.

The agenda will bear a brief general description of each item of business to be transacted or discussed at the meeting. The description will be of sufficient detail to inform the public of the general nature of the subject matter of the item so that the public may seek further information on items of interest. The description will focus on the substance of the matter rather than the contemplated action.

If a Committee member or staff member intends to bring up an item for discussion or action, it is to be included on the posted agenda unless the item qualifies as an exception as outlined below:

a. The Committee makes a determination that "the need to take action" arose after the agenda was posted. This determination requires the affirmative votes of at least two-thirds of the members or an unanimous vote if less than two-thirds of the members are present. If the Committee is able to make such a determination, a motion will be made, seconded, and voted upon, and that action along with a brief explanation will state the need for action and the reason that the need arose after the agenda was posted.

In general, if either the members or staff knew of the need for action before the agenda was posted and the item was not included on the agenda for reasons of scheduling convenience or oversight, then the member could not properly determine that the need arose after the agenda was posted.

b. The Committee determines that an emergency situation exists. A motion will be made, seconded, and the vote and action taken, along with a brief explanation of the emergency, will be included in the minutes of that meeting. This determination requires the affirmative vote of a majority of the members present.

Any matter not on the agenda and brought up by a member of the public during a Committee meeting, may be placed on a future Committee agenda if appropriate to the Committee's ~~Assignment~~assignment. The Committee will defer discussion and action on such matters while providing a procedure for responding to the public.

DRAFT

~~B. Meetings Generally~~

~~The Brown Act requires that a Committee, by formal minute action, provide the time for holding regular meetings.~~

~~A Committee may adjourn or continue any regular or adjourned regular meeting to a time and place specified in the order of adjournment or continuance. A copy of Notice of Adjournment or Continuance shall be conspicuously posted on or near the place where the regular or adjourned regular meeting was held.~~

~~When a regular or adjourned regular meeting is adjourned, the resulting adjourned regular meeting is a regular meeting for all purposes.~~

~~The agenda for each regular Committee meeting and each adjourned regular meeting will be posted in places visible to the public at least 72 hours prior to the meeting.~~

~~These places, as designated by the City Council, are as follows:~~

~~1) David W. Smith City Hall (Bulletin Board), 37101 Newark Boulevard~~
~~2) City website newark.org/departments/city-managers-office/agendas-and-minutes~~

- ~~The~~ Calling and presiding over the meetings
- Providing ample opportunity for members to conduct frank and open discussions
- Setting deadlines for work/assignments to be completed
- Keeping members informed of their purpose and checking in with members to confirm work is progressing toward completion
- Attending other Committee meetings to report progress of the Senior ~~Citizen Standing~~ Advisory Committee, if requested

Formatted: Font: 12 pt

Active Participation

The Senior Advisory Committee ~~agenda will also be posted~~members are encouraged to be active participants at the Clark W. Redeker Newark Senior Center~~. (5/2020)~~ and act as community ambassadors to support the needs of Newark seniors.

Committee members will identify and work to understand senior needs in the City of Newark and assist with bringing resources to address Newark seniors. Committee recommendations should be limited to areas

Formatted: Font: 12 pt
Formatted: Font: 12 pt
Formatted: Indent: Left: 0", Tab stops: Not at -0.79" + -0.5" + 0.38" + 0.75" + 1.13"
Formatted: Font: 12 pt

that are not provided for, have not recently been communicated or are not being met by other public, non-profit or private agency programs available to Newark residents.

The Committee may recommend program ideas or procedural changes for staff and policies for the City Council; members will be expected to provide any information which they feel is pertinent to the well-being of Newark seniors.

The Committee is not a decision-making body. Final decisions on meeting the needs of seniors in the City of Newark are the responsibility of the City Council.

Formatted: Font: 12 pt

A Committee member who is unable to attend a meeting is responsible for notifying the Committee Chairperson or City staff assigned to the committee. A Committee member that does not provide notification of absence from three consecutive meetings will be subject to removal from the committee, at the Chairperson's discretion.

Reading minutes and preparatory material cannot replace participation in Committee meetings. Therefore, attendance at Committee meetings is critical; hence, members may be removed from the Committee for failure to meet attendance requirements.

Formatted: Font: 12 pt

Staff Representatives

Typically, two staff from the Recreation & Community Services Department are assigned to the Senior Advisory Committee by the Recreation & Community Services Department Director to assist the Committee members in accomplishing their objectives. Staff are responsible for preparing and posting agendas per the procedures and timelines below.

COMMITTEE MEETINGS

The Committee meets on a quarterly basis, or as otherwise decided by the Chairperson, at the Clark W. Redeker Newark Senior Center.

Formatted: Font: 12 pt

~~A record of these postings will be maintained, per the Citywide Record Retention Schedule. It will include a declaration of the time and place of each posting. (2/94, 1/2011, 5/2020)~~In compliance with state open-meeting laws (Brown Act), the meetings of these bodies are open to the public.

Noticing and Venue

Agendas are posted at locations established by City Council resolution. Current locations are the Clark W. Redeker Newark Senior Center, David W. Smith City Hall, and on the city website Newark.org at least 72 hours prior to the scheduled regular meeting pursuant to Government Code Section 54954.2. Pursuant to Government Code 54957.5, supplemental materials distributed less than 72 hours before the meeting, to a majority of the Senior Advisory Committee, will be made available for public inspection at the meeting at the Clark W. Redeker Newark Senior Center, 7401 Enterprise Drive. Materials prepared by City staff and distributed during the meeting are available for public inspection at the meeting or after the meeting if prepared by some other person.

Courtesy and Decorum

In order to have a welcoming atmosphere during the meetings, it is important that all Committee members and the general public observe some simple rules of decorum.

These rules are not meant to stifle conversation or the expressing of opinions, but rather to ensure that all members are able to focus on the business at hand. Committee members and the general public should act in a courteous and considerate manner at all times and should be respectful of others, regardless of their opinions.

Public Records

The agenda, meeting reports, minutes, audio or video and other official records of the meetings are public records per the California Public Records Act.

Actions Taken by Committee

Informal actions require no vote and generally take the form of the Chairperson providing direction after input from Committee members. Informal actions would include suggesting to or requesting information from City staff. Another example is suggesting that a Committee member report on a future agenda topic.

Formal Actions

Most commonly, formal action is taken by establishing a quorum, consideration of a motion and voting. A majority of the total appointed Committee members shall constitute a quorum. A quorum is necessary to vote on any action. City staff and the Chairperson will not vote on Committee recommendations.

All formal actions must be listed on the agenda and require a motion and a vote in the affirmative, including:

- Approval of the minutes
- Recommendations and requests to the City Manager
- Recommendations and requests to the City Council
- Creation of a Subcommittee
- Continuing an agenda item to a future date

When a quorum does not exist and formal action is on the agenda, the item will be continued to the next meeting, unless the Chairperson decides not to continue the item due to timeliness or relevance.

INTRODUCTION

City Government

The City of Newark operates under a Council-Manager form of government. Elected by the residents, the City Council is the City's official legislative and policy-making body. The City Council is ultimately responsible to the residents for the manner in which City business is conducted.

The City Council is comprised of a Mayor elected at-large to a two-year term and four Council Members elected at-large to four-year terms on a staggered basis.

The City Council appoints a City Manager to be the chief administrator. The City Manager is responsible for administrative matters, such as the preparation of the budget, direction and evaluation of City programs and services, and enforcement of all laws and ordinances. The City Manager also establishes administrative policies and coordinates department activities.

The City Council appoints members of the Planning Commission and various advisory committees and contracts for the City Manager and City Attorney. The City Attorney is legal advisor to the City Council, City Manager, and all City departments. It is the responsibility of the City Attorney to ensure that all ordinances, resolutions, and contracts approved by the City Council are in accordance with applicable laws.

Open Government

The City of Newark is committed to creating an open Government. We work together to ensure the public trust and establish a system of transparency, public participation, and collaboration. Openness will strengthen our community and promote efficiency and effectiveness in the City of Newark.

COMMITTEE MEMBERSHIP

Application Process

When a vacancy occurs, it is publicized and any person, 55 years or older, residing within the City of Newark, who is interested in serving on the Senior Advisory Committee is invited to complete an application and submit it to the City Clerk by the established deadline. The applications are then forwarded to the Mayor who makes the appointment with City Council confirmation. Applications remain on file for one year.

Selection Process

The Committee shall be made up of no less than five (5) Committee members and no more than nine (9) Committee members, excluding the City Council representative. The term of office of Committee members shall be for two years or for the unexpired term if filling an unexpected vacancy. Committee members can request reappointment at the end of their terms. Once a vacancy occurs, the Chairperson may choose to reduce the maximum number of Committee members and therefore, not fill the vacancy.

Legal Compliance

It is the policy of the Brown Act that public boards, commissions, committees, task forces, and other multi member bodies created by local agencies in this State exist to aid in the conduct of the people's business. It is the intent of the law that their actions be taken openly and that deliberations be conducted openly.

The agenda will bear a brief general description of each item of business to be transacted or discussed at the meeting. The description will be of sufficient detail to inform the public of the general nature of the subject matter of the item so that the public may seek further information on items of interest. The description will focus on the substance of the matter rather than the contemplated action.

If a Committee member or staff member intends to bring up an item for discussion or action, it is to be included on the posted agenda unless the item qualifies as an exception as outlined below:

a. The Committee makes a determination that "the need to take action" arose after the agenda was posted. This determination requires the affirmative votes of at least two-thirds of the members or an unanimous vote if less than two-thirds of the members are present. If the Committee is able to make such a determination, a motion will be made, seconded, and voted upon, and that action along with a brief explanation will state the need for action and the reason that the need arose after the agenda was posted.

   In general, if either the members or staff knew of the need for action before the agenda was posted and the item was not included on the agenda for reasons of scheduling convenience or oversight, then the member could not properly determine that the need arose after the agenda was posted.

b. The Committee determines that an emergency situation exists. A motion will be made, seconded, and the vote and action taken, along with a brief explanation of the emergency, will be included in the minutes of that meeting. This determination requires the affirmative vote of a majority of the members present.

Any matter not on the agenda and brought up by a member of the public during a Committee meeting, may be placed on a future Committee agenda if appropriate to the Committee's assignment. The Committee will defer discussion and action on such matters while providing a procedure for responding to the public.

Any questions regarding the application of the Brown Act should be directed to the City Clerk or the City Attorney.

ROLE OF COMMITTEE MEMBERS

Chairperson

The City Council shall appoint a Council Member to serve as the City Council representative and Chairperson to the Committee. The Council Member is not a voting member. In the event the Chairperson will be absent from a meeting, they may elect a Vice Chairperson to Chair that meeting.

The Chairperson shall oversee the Committee's performance and be directly responsible to the City Council.

The Chairperson shall also be responsible for:

- Calling and presiding over the meetings
- Providing ample opportunity for members to conduct frank and open discussions
- Setting deadlines for work/assignments to be completed
- Keeping members informed of their purpose and checking in with members to confirm work is progressing toward completion
- Attending other Committee meetings to report progress of the Senior Advisory Committee, if requested

Active Participation

The Senior Advisory Committee members are encouraged to be active participants at the Clark W. Redeker Newark Senior Center and act as community ambassadors to support the needs of Newark seniors.

Committee members will identify and work to understand senior needs in the City of Newark and assist with bringing resources to address Newark seniors. Committee recommendations should be limited to areas that are not provided for, have not recently been communicated or are not being met by other public, non-profit or private agency programs available to Newark residents.

The Committee may recommend program ideas or procedural changes for staff and policies for the City Council; members will be expected to provide any information which they feel is pertinent to the well-being of Newark seniors.

The Committee is not a decision-making body. Final decisions on meeting the needs of seniors in the City of Newark are the responsibility of the City Council.

A Committee member who is unable to attend a meeting is responsible for notifying the Committee Chairperson or City staff assigned to the committee. A Committee member that does not provide notification of absence from three consecutive meetings will be subject to removal from the committee, at the Chairperson's discretion.

Reading minutes and preparatory material cannot replace participation in Committee meetings. Therefore, attendance at Committee meetings is critical; hence, members may be removed from the Committee for failure to meet attendance requirements.

Staff Representatives

Typically, two staff from the Recreation & Community Services Department are assigned to the Senior Advisory Committee by the Recreation & Community Services Department Director to assist the Committee members in accomplishing their objectives. Staff are responsible for preparing and posting agendas per the procedures and timelines below.

COMMITTEE MEETINGS

The Committee meets on a quarterly basis, or as otherwise decided by the Chairperson, at the Clark W. Redeker Newark Senior Center. In compliance with state open-meeting laws (Brown Act), the meetings of these bodies are open to the public.

Noticing and Venue

Agendas are posted at locations established by City Council resolution. Current locations are the Clark W. Redeker Newark Senior Center, David W. Smith City Hall, and on the city website Newark.org at least 72 hours prior to the scheduled regular meeting pursuant to Government Code Section 54954.2. Pursuant to Government Code 54957.5, supplemental materials distributed less than 72 hours before the meeting, to a majority of the Senior Advisory Committee, will be made available for public inspection at the meeting at the Clark W. Redeker Newark Senior Center, 7401 Enterprise Drive. Materials prepared by City staff and distributed during the meeting are available for public inspection at the meeting or after the meeting if prepared by some other person.

Courtesy and Decorum

In order to have a welcoming atmosphere during the meetings, it is important that all Committee members and the general public observe some simple rules of decorum.

These rules are not meant to stifle conversation or the expressing of opinions, but rather to ensure that all members are able to focus on the business at hand. Committee members and the general public should act in a courteous and considerate manner at all times and should be respectful of others, regardless of their opinions.

Public Records

The agenda, meeting reports, minutes, audio or video and other official records of the meetings are public records per the California Public Records Act.

Actions Taken by Committee

Informal actions require no vote and generally take the form of the Chairperson providing direction after input from Committee members. Informal actions would include suggesting to or requesting information from City staff. Another example is suggesting that a Committee member report on a future agenda topic.

Formal Actions

Most commonly, formal action is taken by establishing a quorum, consideration of a motion and voting. A majority of the total appointed Committee members shall constitute a quorum. A quorum is necessary to vote on any action. City staff and the Chairperson will not vote on Committee recommendations.

All formal actions must be listed on the agenda and require a motion and a vote in the affirmative, including:

- Approval of the minutes
- Recommendations and requests to the City Manager
- Recommendations and requests to the City Council
- Creation of a Subcommittee
- Continuing an agenda item to a future date

When a quorum does not exist and formal action is on the agenda, the item will be continued to the next meeting, unless the Chairperson decides not to continue the item due to timeliness or relevance.

Action Items for Council Consideration

Name Change:

The Committee's name is recommended to be modified from "Senior Citizen Standing Advisory Committee" to "Senior Advisory Committee." This adjustment aligns our Committee title with current practices and eliminates any potential misconception that U.S. citizenship is a requirement for committee membership.

Committee Membership: Selection Process

The Committee shall be made up of no less than five (5) committee members and no more than nine (9) Committee members, excluding the City Council representative. Presently, the Committee comprises no less than eight (8) Committee Members and no more than twelve (12) Committee members, plus a City Council Representative.

Action Items for Council Consideration

Role of Committee Members:

Active Participation

The Committee Members are encouraged to be active participants at the Clark W. Redeker Newark Senior Center and act as community ambassadors to support the needs of Newark seniors.

Action Items for Council Consideration

Role of Committee Members: Attendance Requirements

Language has been included to clarify attendance requirements and the process for reporting absences to the Committee Chairperson or City Staff. The existing handbook lacks specific information regarding the permissible number of absences from missed meetings.

Staff recommends the following new language:

- A Committee member who is unable to attend a meeting is responsible for notifying the Committee Chairperson or City staff assigned to the committee
- A Committee Member that does not provide notification of absence from three consecutive meetings will be subject to removal from the Committee, at the Chairperson's discretion.

Action Items for Council Consideration

Committee Meetings:

- **Meeting Frequency:** The Committee meets on a quarterly basis compared to the previous monthly format, or as otherwise decided by the Chairperson, at the Clark W. Redeker Newark Senior Center. In compliance with state open-meeting laws (Brown Act), the meetings of these bodies are open to the public.
- **Noticing and Venue:** Updated locations are the Clark W. Redeker Newark Senior Center, David W. Smith City Hall, and on the city website Newark.org at least 72 hours prior to the scheduled regular meeting pursuant to Government Code Section 54954.2.

Thank you!

RESOLUTION NO. XX

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF NEWARK APPROVING THE REVISED GUIDELINES AND PROCEDURES FOR THE SENIOR CITIZEN STANDING ADVISORY COMMITTEE

WHEREAS, Staff, having assessed the current functioning of the Senior Citizen Standing Advisory Committee and identified opportunities for enhancement, recommends the implementation of these changes to optimize the committee's impact on Newark's senior population; and

WHEREAS, Staff recommends a name change from Senior Citizen Standing Advisory Committee to Senior Advisory Committee; and

WHEREAS, the Committee shall consist of no fewer than five (5) and no more than nine (9) members, with the exception of the City Council representative, aiming to establish a balanced and effective group. This adjustment in membership facilitates the ability of a quorum required for official meetings, thus enabling the committee to convene and make informed decisions; and

WHEREAS, Committee member's attendance requirements were better clarified, including how to report absences to the Committee Chairperson or City Staff; and

WHEREAS, the Committee now convenes quarterly, departing from the prior monthly schedule, or as determined by the Chairperson, at the Clark W. Redeker Newark Senior Center, thereby facilitating more focused and impactful discussion; and

WHEREAS, updated locations for meetings encompass the Clark W. Redeker Newark Senior Center, David W. Smith City Hall, and the city website Newark.org, all announced at least 72 hours before regular meetings as stipulated by Government Code Section 54954.2; and

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Newark that the Senior Citizen Standing Advisory Committee handbook be amended.

I HEREBY CERTIFY the foregoing resolution was introduced at a regular meeting of the City Council of the City of Newark held on September 14, 2023, by XX who moved its adoption and passage, which motion was carried after being duly seconded, and passed by the following vote:

AYES:

NOES: None

ABSENT: None

SECONDED:

APPROVED:

s/
Mayor

ATTEST:

s/SHEILA HARRINGTON
City Clerk

APPROVED AS TO FORM:

s/KRISTOPHER J. KOKOTAYLO
City Attorney

STAFF REPORT

Item G. 1.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Sheila Harrington, City Clerk
SUBJECT	Adopt a resolution approving the Mayor's appointment to the Senior Citizen Standing Advisory Committee

Two vacancies occurred on the Senior Citizen Standing Advisory Committee over the Summer. Elwood "Woody" Ballard resigned effective August 1, 2023, and Susan Johnson's seat was considered vacated when she relocated out of the City of Newark. The vacancies reduce the committee to 7 members, which currently has a minimum membership of 8. In a separate staff report on this agenda, staff suggests changing the membership to no less than five (5) committee members and no more than nine (9) Committee members, excluding the City Council representative.

The City Clerk advertised the vacancy and applications were received from Shirley R. Ferrante and Linda Mapes. Mayor Hannon will announce his selection at the City Council Meeting.

It is recommended that the City Council adopt a resolution approving the appointment to the Senior Citizen Standing Advisory Committee for a term to expire on April 14, 2025.
