CITY OF NEWARK
CITY COUNCIL

City Administration Building, City Council Chambers

37101 Newark Boulevard, Newark, CA 94560 | (510) 578-4266 | E-mail: city.clerk@newark.org

AGENDA

Thursday, September 14, 2023
7:00 P.M.

A. ROLL CALL

B. PRESENTATIONS

1. Proclamation for Newark Days
2. Proclaiming September as National Preparedness Month
3. Commending the Deaf Plus Adult Community
4. Introduction of employee(s)
5. Presentation of Certificates of Appreciation for the Senior Advisory Committee

C. PUBLIC COMMENT

The public is invited to address the City Council on any item not listed on the agenda. Public Comments are generally limited to 5 minutes per speaker. Please note that State law prohibits the Council from acting on non-agenda items.

D. CONSENT CALENDAR

Consent Calendar items are considered to be routine and may be approved by one motion. There will be no separate discussion on these items unless there is a request by a Council Member, a staff member, or a member of the public to remove an item for separate discussion and action.

1. Approval of Audited Demands
2. Approval of July 27, 2023, minutes
3. Report on administrative actions during August recess

4. Adopt a resolution accepting completion of Smith Avenue Sinkhole Repairs, Project No. 1358, by Mountain Cascade, Inc., terminating emergency contracting actions pursuant to Public Contract Code Section 22050 and amending the 2022-2024 Biennial Budget for Fiscal Year 2024; exempt from CEQA review per CEQA Guidelines Section 15301

5. Adopt a resolution approving side letter agreements to the Memorandum of Understanding with the Newark Association of Miscellaneous Employees (NAME) and to the Memorandum of Understanding with the Newark Police Association (NPA) to provide that NPA serve as the sole and exclusive bargaining representative for the Vehicle Abatement Officer classification.

E. PUBLIC HEARINGS

1. Public Hearing to consider approval of a Resolution finding the project exempt from further environmental review pursuant to CEQA and approving a Design Review, Minor Use Permit, and Vesting Tentative Map for a 76-unit residential development located at 38600 Cedar Boulevard (APNs 92A-2585-12-1, 92A-2585-31).

F. OTHER BUSINESS

1. Presentation of programs and services delivered by the City of Newark's Clark W. Redeker Newark Senior Center and adopt a resolution approving the revised guidelines and procedures for the Senior Citizen Standing Advisory Committee.

G. CITY COUNCIL MATTERS

City Council Members report on attendance at intergovernmental agency meetings, conferences, and seminars since the last meeting. City Council Members may also announce upcoming events and coordinate attendance; report on local events attended since the last meeting; and make brief comments on issues of concern.

1. Adopt a resolution approving the Mayor's appointment to the Senior Citizen Standing Advisory Committee

H. CITY MANAGER UPDATES

I. CLOSED SESSION

1. Closed session for conference with Labor Negotiators pursuant to California Government Code Section 54957.6. Agency designated representatives: City Manager Benoun, Assistant City Manager Hovorka, Human Resources Director Ingham-Watters, and Labor Attorney; Employee Group: the Newark Police Association

J. ADJOURNMENT

MEETING INFORMATION

Members of the public may attend the meeting in person, virtually via Zoom, or watch it via YouTube or Cable Channel 26. The ability to participate and observe via Zoom, YouTube or Cable Channel 26 is predicated on those technologies being available and functioning without technical difficulties. Should those platforms not be available, or become non-functioning, or should the City Council otherwise encounter technical difficulties that make those platforms unavailable, the City Council will proceed with business in person unless otherwise prohibited by law.

How to view the meeting remotely:
Livestream online at YouTube: https://www.youtube.com/@cityofnewark3077/streams
Copy/paste the YouTube URL into your browser if the link does not automatically open.

How to participate in the meeting remotely, via Zoom Webinar:
From a PC, Mac, iPad, iPhone or Android device: https://us06web.zoom.us/j/87158324007
From a telephone dial 1- 669-900-9128, Webinar ID 871 5832 4007

Provide live, remote public comments, when the Mayor calls for comments. Use the raise your hand feature in Zoom to be called upon by the City Clerk.

For frequently asked Zoom questions, please go to Agendas and Minutes and select the Frequently Asked Questions link.

No question shall be asked of a council member, city staff, or an audience member except through the Mayor. No person shall interrupt the meeting. Any person who refuses to carry out instructions given by the Mayor for the purpose of maintaining order may be guilty of an infraction and may result in removal from the meeting.

Council Meeting Access/Materials:
The agenda packet is available for review at Agendas and Minutes. The packet is typically posted to the City website the Friday before the meeting, but no later than 72 hours before the meeting.

Pursuant to Government Code 54957.5, supplemental materials distributed less than 72 hours before this meeting, to a majority of the City Council, will be made available for public inspection at this meeting and will be posted at https://www.newark.org/departments/city-manager-s-office/agendas-minutes and will concurrently be made available for public inspection during regular business hours at the David W. Smith City Hall, 37101 Newark Boulevard, Newark CA. Materials prepared by City staff and distributed during the meeting are available for public inspection at the meeting or after the meeting if prepared by some other person. Documents related to closed session items or are exempt from disclosure will not be made available for public inspection. For those persons who require special accommodations, please contact the City Clerk at least two days prior to the meeting atCity Clerk or 510-578-4266.

STAFF REPORT

Item B. 1.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Sheila Harrington, City Clerk
SUBJECT	Proclamation for Newark Days

Newark Days is a four-day festival held to commemorate the birthday of the City of Newark. A proclamation has been prepared and members of the Newark Days Committee will accept it at the City Council meeting.

Attachments

Proclamation

PROCLAMATION NO. 1898

NEWARK DAYS

WHEREAS, the Newark Days Committee annually celebrates the birth date of our City during the month of September; and

WHEREAS, this is a time to celebrate the community of Newark in all its aspects; and

WHEREAS, this is a time when all Newark residents are encouraged to explore our rich heritage and a time to recognize the multi-cultural contributions of divergent people who have come together to create a common sense of community; and

WHEREAS, this is also a time when we encourage Newark residents to pause and reflect on the values that we represent as a community so succinctly stated in our Newark Days Celebration motto, "People, Pride, and Progress";

NOW, THEREFORE, I, Michael K. Hannon, Mayor of the City of Newark, on behalf of the Newark City Council, do hereby proclaim September 14-17, 2023, as

NEWARK DAYS

in Newark.

IN WITNESS THEREOF, I have hereunto set forth my hand and caused the Official Seal of the City of Newark, State of California, to be affixed this Fourteenth Day of September, Two Thousand Twenty-three.

MICHAEL K. HANNON
Mayor

STAFF REPORT

Item B. 2.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Lenka Hovorka, Assistant City Manager
SUBJECT	Proclaiming September as National Preparedness Month

National Preparedness Month is an observance each September to raise awareness about the importance of preparing for disasters and emergencies that could happen at any time. Emergency Services Coordinator Rich Martinez will be at the meeting to accept the proclamation.

Attachments

Proclamation No. 1900

PROCLAMATION NO. 1900

NATIONAL PREPAREDNESS MONTH

WHEREAS, National Preparedness Month is a nationwide coordinated effort sponsored by the Department of Homeland Security each September to increase public awareness of emergencies in homes, businesses, and schools; and

WHEREAS, this national effort aims to encourage Americans to prepare and to persuade individuals to take action; and

WHEREAS, during the month of September, residents are encouraged to take this opportunity to make themselves and their families better prepared for emergencies and to stay informed by registering on ACAlert.org for emergency notifications; and

WHEREAS, being prepared includes creating an emergency Go kit containing items that will allow individuals and their families to survive for up to a week in the event of an emergency and recommend a Go kit for home, car, and workplace; and

WHEREAS, throughout the year the City of Newark and the City CERT program promote emergency preparedness by providing public education to the community and providing emergency preparedness information on the City's website; and

WHEREAS, the Newark CERT has conducted monthly emergency preparedness trainings for their members and for the community and has participated in community events encouraging emergency volunteerism.

NOW, THEREFORE, I, Michael K. Hannon, Mayor of the City of Newark, on behalf of the Newark City Council, do hereby proclaim September 2023, as

NATIONAL PREPAREDNESS MONTH

in Newark and encourage all residents to be better prepared for emergencies.

IN WITNESS THEREOF, I have hereunto set forth my hand and caused the Official Seal of the City of Newark, State of California, to be affixed this Fourteenth Day of September, Two Thousand Twenty-three.

MICHAEL K. HANNON
Mayor

STAFF REPORT

Item B. 3.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Sheila Harrington, City Clerk
SUBJECT	Commending the Deaf Plus Adult Community

The Deaf Plus Adult Community (DPAC) is a nonprofit organization, located in the city of Newark, that serves deaf adults with disabilities (deafplus). A commendation has been prepared to honor DPAC for the support that they provide to help the deafplus community access employment, education, and community services.

Attachments

Commendation

COMMENDATION

DEAF PLUS ADULT COMMUNITY

WHEREAS, in 2007, a small volunteer group launched the beginnings of Deaf Plus Adult Community; and

WHEREAS, today, Deaf Plus Adult Community (DPAC) is an integrated adult day program that serves deaf adults with disabilities ("deafplus") in the Greater San Francisco Bay Area; and

WHEREAS, Deaf Plus Adult Community provides a safe space in their spacious communal center in Newark, California, for deafplus adults to gather, build relationships, and explore their identities through recreational, educational, and social opportunities; and

WHEREAS, the goal of Deaf Plus Adult Community is to provide the communication and support necessary to gain access to employment, education, and community services; and

WHEREAS, through education, advocacy and outreach, Deaf Plus Adult Community works to address the social isolation faced by deafplus adults;

NOW, THEREFORE, I, Michael K. Hannon, Mayor of the City of Newark, on behalf of the Newark City Council, do hereby commend

DEAF PLUS ADULT COMMUNITY

for all that they do to give deafplus individuals and their families the opportunity to experience hope, love, respect, and support.

IN WITNESS THEREOF, I have hereunto set my hand and caused the Official Seal of the City of Newark, State of California, to be affixed this Twenty-seventh Day of July, Two Thousand Twenty-three.

MICHAEL K. HANNON
Mayor

STAFF REPORT

Item B. 4.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Sheila Harrington, City Clerk
SUBJECT	Introduction of employee(s)

The following employees will be introduced at the City Council meeting: Cathreene Ingham-Watters, Human Resources Director, Esther Jung, Associate Civil Engineer, Vibha Deshmukh, Associate Civil Engineer, Tianna Jones, Administrative Support Specialist II, and Bengil Ranillo, Accounting Assistant.

STAFF REPORT

Item B. 5.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Sheila Harrington, City Clerk
SUBJECT	Presentation of Certificates of Appreciation for the Senior Advisory Committee

The Senior Citizen Standing Advisory Committee (Committee) researches senior issues within the City of Newark and identifies those needs which require assistance. The Committee makes recommendations to the City Council and provides information that they feel is pertinent to the well-being of Newark's senior citizens. Certificates of Appreciation have been prepared for the Committee members in honor of their past and future service to the community. The current committee consists of Glen Wickizer, Rick Arellano, Kathleen Lemos, Sandra Arellano, Eileen McDonald, Stanley Keiser, and Olga Borjon.

Minutes

Draft

Thursday, July 27, 2023
7:00 P.M.

A. ROLL CALL

Mayor Hannon called the meeting to order at 7:03 p.m. Vice Mayor Collazo, Council Members Bucci, Freitas, and Jorgens were present.

B. PRESENTATIONS

1. Commending the Deaf Plus Adult Community

   Mayor Hannon announced that the presentation would be rescheduled for a future meeting.

2. Introduction of employee(s)

   Mayor Hannon introduced Panhasak Bun, Police Officer.

C. PUBLIC COMMENT

No one requested to speak.

D. CONSENT CALENDAR

City Manager Benoun requested the removal of item D.7. for separate consideration.

Vice Mayor Collazo moved, Council Member Bucci seconded, to approve Consent Calendar Items D.1 through D.6, and D.8 to D.9 that the resolutions and ordinances be numbered consecutively, and that reading of the titles suffice for adoption. The motion passed, 5 AYES.

1. Approval of Audited Demands

2. Approval of July 13, 2023, minutes

3. Adopt a resolution amending the 2022-2024 Biennial Budget and Capital Improvement Plan for Fiscal Year 2024 for solid waste management program specialty contractual services by R3 Consulting Group, Inc.
   Resolution No. 11548
   Contract No. 22044

4. Adopt a resolution authorizing the City Manager to execute Contractual Services Agreements, in a form approved by the City Attorney, with BKF Engineers and NCE for on-call pavement engineering and management services
   Resolution No. 11549
   Contract No. 23057 BKF
   Contract No. 23058 NCE

5. Adopt a resolution approving a Salary Schedule in conformance with California Code of Regulations, Title 2, Section 570.5
   Resolution No. 11550

6. Adopt a resolution authorizing the City Manager to execute an agreement with Faro Technologies Incorporated for the Focus Premium Three-Dimensional Scanner and amend the 2022-2024 Biennial Budget and Capital Improvement Plan for FY 2024
   Resolution No. 11551

7. Adopt a resolution authorizing the acceptance of the State of California grants for Quiet Zone Safety Improvement in the amount of $2,000,000 and for Broadband Improvements in the amount of $1,800,000 and amend the 2022-2024 Biennial Budget and Capital Improvement Plan
Removed from Consent Calendar separate consideration

8. Adopt a resolution (1) adding multiple positions to the Employee Classification Plan; (2) adding and deleting multiple positions from the 2022-2024 Biennial Budget and Capital Improvement Plan for Fiscal Year 2024; (3) approving a Side Letter amending the Memorandum of Understanding between the City of Newark and Newark Association of Miscellaneous Employees; (4) amending the Compensation and Benefit Plan for Management, Supervisory and Professional Employees; (5) approving an amendment to the City's Salary Schedule; and (6) amending the 2022-2024 Biennial Budget and Capital Improvement Plan
Resolution No. 11552

9. Adopt a resolution finding that emergency conditions exist that do not permit a delay resulting from a competitive solicitation for bids and authorizing the City Manager to take necessary action to negotiate and award an emergency construction contract and expenditure for the repair of a roadway sinkhole and storm drain on Smith Avenue and amendment of the 2022-2024 Biennial Budget for Fiscal Year 2024; exempt from CEQA review per CEQA Guidelines Section 15301
Resolution No. 11553

NONCONSENT

7. Adopt a resolution authorizing the acceptance of the State of California grants for Quiet Zone Safety Improvement in the amount of $2,000,000 and for Broadband Improvements in the amount of $1,800,000 and amend the 20222024 Biennial Budget and Capital Improvement Plan
Resolution No. 11554

Council Member Freitas announced he would recuse himself due an economic conflict of interest in real properties that are a source of income in proximity to the Quiet Zone Safety Improvements. Council Member Freitas exited the City Council Chambers.

Council Member Jorgens stated that the grants with the State of California did not impact the office of his employer, a State Assembly Member.

City Manager Benoun gave the staff report recommending approval.

Council Member Bucci thanked Assembly Member Alex Lee for his assistance in acquiring the grants. He stated that the Broadband Community meeting will be held on August 25, 2023 at 2 pm.

Moved by Council Member Bucci, seconded by Council Member Jorgens to adopt a resolution. The motion passed 4 AYES, 1 RECUSED.

Council Member Freitas returned to the City Council Chambers.

E. PUBLIC HEARINGS

1. Hearing to consider adoption of a resolution approving Development Impact Fee amendments to the Master Fee Schedule for Fiscal Year 2024
Resolution No. 11555

City Manager Benoun stated that the Master Fee Schedule was undergoing a comprehensive review and would be presented to the City Council at a future meeting. He recommended increases to the Development Impact Fees based on the Engineering News Record Cost Construction Index.

Mayor Hannon opened the public hearing at 7:19 p.m.

No one requested to speak.

Mayor Hannon closed the public hearing at 7:19 p.m.

Moved by Council Member Freitas, seconded by Vice Mayor Collazo to adopt a resolution. The motion passed, 5 AYES.

2. Hearing to consider property owners' objections and adopt a resolution confirming the Superintendent of Streets' Report concerning weed abatement

assessments
Resolution No. 11556

City Manager Benoun gave the staff report recommending approval.

Mayor Hannon opened the public hearing at 7:20 p.m.

No one requested to speak.

Mayor Hannon closed the public hearing at 7:21 p.m.

Moved by Council Member Bucci, seconded by Vice Mayor Collazo to adopt a resolution. The motion passed, 5 AYES.

F. OTHER BUSINESS

1. Resolution approving an amendment to the Employment Agreement with City Manager David J. Benoun to serve as City Manager and an amendment to the 2022-2024 Biennial Budget and Capital Improvement Plan for Fiscal Year 2024
Resolution No. 11557

City Attorney Kokotaylo gave the staff report recommending approval.

Council Member Bucci stated City Manager Benoun has done a great job.

Vice Mayor Collazo thanked City Manager Benoun for his round the clock service.

Mayor Hannon stated that City Manager Benoun is an outstanding leader.

Moved by Council Member Bucci, seconded by Vice Mayor Collazo to adopt a resolution. The motion passed, 5 AYES.

G. CITY COUNCIL MATTERS

Council Member Bucci welcomed Officer Bun. He announced that Super Mario Brothers would play for Movie Night at the Community Center on Saturday. He stated that his friend Griffin Daily, announced his colon cancer diagnosis and he recommended that anyone 45 or older get screened.

Vice Mayor Collazo recommended people stay up to date on pneumonia vaccines and shared her experience with pneumonia. She welcomed Officer Bun. She noted that the city of Vallejo Police Department was understaffed and she felt safe here. She announced that OMT and Tortilla Soup would perform at Groovin at the Grove. Shop Newark.

Council Member Freitas stated that the Volunteer Recognition Ceremony was held last week. He thanked all of the volunteers for their service. He thanked City Manager Benoun for his service and noted that with 4 ½ years of service, he was one of the senior city managers in Alameda County.

Mayor Hannon congratulated Vice Mayor Collazo for the Mariachi Festival success. The Newark Optimist Club is hosting a garage sale this Saturday to benefit Relay for Life. The City Council holds an August Recess and will not meet again until September. September is the city of Newark's birthday.

H. CITY MANAGER UPDATES

City Manager Benoun stated that August 1 is National Night Out and Newark Days begins on September 14.

Assistant City Manager Hovorka stated that the Parks Master Plan and the Active Transportation Plan Updates will have a table at the Newark Days Community Information Faire. The Broadband Masterplan online survey was reopened until August 21. A Pop-up Recreation event will be held at Birch Grove Park on August 3 and a Family Fun Run at Lakeshore Park on August 18.

I. CLOSED SESSION

J. ADJOURNMENT

Mayor Hannon adjourned the meeting at 7:40 p.m.

STAFF REPORT

Item D. 3.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Sheila Harrington, City Clerk
SUBJECT	Report on administrative actions during August recess

At the December 8, 2022, meeting the City Council adopted Resolution No. 11,446 authorizing the City Manager, or Acting City Manager, to act on certain administrative matters, which should not be deferred until the next regularly scheduled meeting of the City Council. The City Council directed the City Manager to report to the City Council after the recess on all such actions.

It is recommended that the City Council, by motion, affirm the City Manager's, or Action City Manager's, action on the matters listed in Exhibit.

08/30/2023	Amendment to Contractual Services Agreement with Surf to Snow Environmental Resource Management, Inc.	C22053

MEMORANDUM

POLICE DEPARTMENT | CITY OF NEWARK

DATE: **August 1, 2023,**

TO: **David Benoun, City Manager**

FROM: **Gina L. Anderson, Chief of Police**

SUBJECT: **Sun Ridge Systems Software Support Services Agreement**

On May 23, 2013, City Council awarded a contract to Sun Ridge Systems, Inc. for a computer aided dispatch/records management (CAD/RMS), and mobile software system for the police department. This contract also included a software support services agreement to maintain our system for the duration if its useful life. The annual agreement is effective August 29, 2023, through August 28, 2024, and covers all our Sun Ridge Systems, Inc. public safety software systems. The budgeted amount is $70,641.00. Once the agreement is approved, it will be routed via DocuSign for signatures.

RECOMMENDATION

Staff recommends the City Manager sign the software support services agreement for fiscal year 2023 – 2024.

Pursuant to Newark Resolution No. 11,446 adopted December 8, 2022, authorizing the City Manager or his designee to act upon certain administrative matters on behalf of the City during the city council summer recess of August 2023, I, David J. Benoun, hereby authorize the acceptance of an agreement with Sun Ridge Systems for software support services for fiscal year 2023 – 2024. City attorney has reviewed and approved the agreement.

David J. Benoun, City Manager

8-8-23

Date

Sun Ridge Systems Software Support Services Agreement

This is a description of the software support, maintenance, and update/upgrade services to be provided by Sun Ridge Systems, Inc. ("SRS") to the City of Newark, CA ("Licensee") as part of a Software Support Services Agreement ("Agreement"). This Agreement covers all RIMS public safety software (Software) licensed by the Licensee and is effective on August 29, 2023.

Under this agreement SRS agrees to provide the following services to Licensee:

1. **Coverage Hours.** SRS will provide a toll-free phone number and dedicated email address for support purposes during normal service hours. *Normal service hours are defined as Monday-Friday, 8AM-5PM PST, except for New Year's Day, Martin Luther King Day, Presidents Day, Memorial Day, July 4th, Labor Day, Veterans Day, Thanksgiving Day, Day after Thanksgiving, and Christmas Day ("common holidays").*

   However, for instances where the Licensee's system is completely inoperable due to an SRS software problem ("critical problems") preventing basic system operation, service will be available 24 hours, 7 days a week, common holidays included. Examples of critical problems include:

   - RIMS is down/not responding on multiple workstations
   - Cannot create a call for service (CAD Incident)
   - Cannot issue a case number
   - Unable to access NCIC
   - Other issues that will not allow the user to complete critical tasks

   Licensee will have taken reasonable measures prior to contacting SRS support during non-service hours including:

   - Verified that the issue is not related to just 1 workstation
   - Restarted the workstation in question
   - Contacted in-house IT support if the issue is related to network or server errors
   - Verified the issue is critical enough that it cannot wait until normal support hours

2. **SRS Response to reported problems.** SRS agrees to provide service and assistance as expeditiously as possible as follows:

   a. Most problems will be resolved with the initial phone call or email.
   b. For problems that cannot be immediately resolved, SRS will work to resolve the problem based on the severity of the problem *and* the urgency reported by Licensee.

      - For critical problems, SRS personnel will work with Licensee until the situation is resolved.

      - For problems that are not critical problems that have a lesser though continuing impact on operations of Licensee SRS will endeavor to provide a solution or workaround within 72 hours of the problem being reported to SRS by the Licensee.
      - For other problems SRS may, at its discretion, either issue a near term "fix release" of the product or include the fix in the next scheduled product update.

3. **Licensee equipment and software responsibilities.** Licensee agrees to allow SRS to remotely connect to Licensee's system when a problem is reported. SRS uses BeyondTrust remote access software for secure installation and follow-on support services. BeyondTrust software provides superior security and does so over an ordinary internet connection via an SRS server that hosts a BeyondTrust security hardware device.

   If Licensee does not allow unattended access, the SRS response to a service request may be delayed until a responsible party of the Licensee allows access. Once remote access is obtained, SRS will examine data files, investigate reported problems, and provide updates and corrections as necessary.

4. **Provision of software updates.** SRS will provide all new enhanced and updated versions of software licensed to Licensee at no additional cost. This software will be provided with detailed installation instructions for installation by Licensee. If desired, Licensee may retain SRS to perform any installation at additional cost to be determined on a per case basis. Updates are distributed via download from the SRS ftp web site. SRS will not be obligated to provide service for release versions that are more than two annual release versions older than the current release.

5. **Cost.** The cost of the services and software to be provided under this Agreement in the amount of $70,641.00.

6. **Late Payment.** In addition to any other amounts for which Licensee is liable under this Agreement, Licensee agrees to pay to SRS a late charge equal to one percent (1%) of the amount due if Licensee fails to pay SRS any amount that is due and owing pursuant to this Agreement within sixty (60) days after Licensee's receipt of an invoice from SRS or (60) days after the expiration of the previous Agreement, whichever comes later. In addition, any invoiced amounts that are due and owing under this Agreement which Licensee fails to pay to SRS within ninety (90) days after Licensee's receipt of an invoice from SRS shall thereafter bear interest at the rate of twelve percent (12%) per annum or the highest interest rate allowed by applicable law, whichever is less.

7. **Term**. The term of this Agreement shall be one year from the date stated in the initial paragraph and shall be annually renewed for another year upon payment of invoice. Payment for the year is due in advance the day the services begin. Non-payment of the support invoice within 60 days as described in Section 6 shall be cause for terminating or suspending the Agreement at the discretion of SRS.

8. **Termination.** Licensee may terminate this Agreement with or without cause upon ninety (90) days written notice to SRS. If terminated, Licensee is entitled to a prorated refund for the service days not consumed beginning on the last day of the month the written notice is received by SRS to the end of the remaining term of the Agreement.

9. **Limitations**. SRS agrees to provide support only for public safety application software provided by SRS. Other software used by Licensee (word processing, spreadsheet, etc.) is not included in this Agreement. PC and network operating system software and Microsoft SQL Server database system software is similarly not included, although SRS may assist Licensee in isolating problems to this software. (SRS reserves the right to charge for diagnostic services in the event it is determined that

the reported issue is not attributable to RIMS.) Also specifically excluded is responsibility for administration, support, or maintenance of Licensee' server, computer network, operating systems, or database (Microsoft SQL Server).

Licensee may request that SRS provide support services outside the limitations of this Support Services Agreement. If SRS agrees to provide any requested additional support services, such support services will be provided at SRS's current rate and under terms and conditions that SRS may require.

This Agreement does not include equipment maintenance or assistance in diagnosing hardware problems including but not limited to PCs, printers, network, scanners, and other computer peripheral devices with the exception that SRS will assist Licensee in determining whether a problem is RIMS application software in nature.

CITY OF NEWARK

Memo

DATE: August 28, 2023

TO: David Benoun, City Manager

VIA: Soren Fajeau, Public Works Director

FROM: James Scanlin, Environmental Services Manager

SUBJECT: Amendment to Contractual Services Agreement with Surf to Snow Environmental Resource Management, Inc.

Attached is an amendment to the Consultant Services Agreement with Surf to Snow Environmental Resource Management, Inc. (Surf to Snow) to add $65,000.00 for a new not-to-exceed amount of $120,120, modify the scope of services, and revise the termination date to June 30, 2024.

After releasing a request for proposals and evaluating the submittals the City selected Surf to Snow to conduct stormwater compliance inspections of industrial and commercial facilities. The term of the contract was for one year with the option to extend for two additional one-year periods. The contract term ended on June 30, 2023.

The City is required by the terms of the Municipal Regional Stormwater Permit to conduct stormwater compliance inspections of commercial and industrial facilities every fiscal year. Surf to Snow has satisfactorily completed the scope of services for Fiscal Year 2023. Funding is available in the Storm Drain Maintenance/NPDES account. The Agreement, Resolution, and First Amendment are attached.

RECOMMENDATION:
Pursuant to Newark Resolution No. 11446, Adopted December 8, 2022, authorizing the City Manager or his designee to act upon certain administrative matters on behalf of the City during the City Council summer recess of August 2023, I, David Benoun, hereby authorize the acceptance of the First Amendment to the Agreement with Surf to Snow Environmental Resource Management, Inc.

David J. Benoun, City Manager

By

FIRST AMENDMENT TO THE CONTRACTUAL SERVICES AGREEMENT BETWEEN THE CITY OF NEWARK AND SURF TO SNOW ENVIRONMENTAL RESOURCES, INC.

This First Amendment to Contractual Services Agreement between the City of Newark, a municipal corporation, ("City") and Surf to Snow Environmental Resources, Inc., ("Consultant") dated July 28, 2022 (the "Agreement"), is entered into as of August 30, 2023 for the provision of Municipal Stormwater Inspection Services.

RECITALS

WHEREAS, the City and Surf to Snow Environmental Resources, Inc. ("Consultant") entered into an Agreement between City and Consultant for Municipal Stormwater Inspection Services effective July 28, 2022 (Agreement); and

WHEREAS, Consultant has satisfactorily completed the scope of services in the Municipal Stormwater Inspection Services Agreement; and

WHEREAS, Municipal Stormwater Inspections are required by the City's Municipal Regional Stormwater Permit to be conducted annually; and

WHEREAS, the City intends, upon mutual written agreement by both parties to renew the agreement for an additional year as provided for in the Agreement.

NOW, THEREFORE, in consideration of the foregoing recitals and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

(1) Notwithstanding Section 1 of the Agreement, the parties hereby agree to add additional funding in the amount of $65,000.00 to the Agreement for a new not to exceed the amount of $120,120.00.
(2) Notwithstanding Section 3 of the Agreement, the parties hereby agree to revise the payment schedule of the Agreement to the payment schedule as contained in Exhibit B.
(3) Notwithstanding Section 16 of the Agreement, the parties hereby agree to revise the Term/Termination date of the agreement to June 30, 2024.

The First Amendment of the Agreement for Municipal Stormwater Inspection Services has been executed by the parties as of the date first set forth above.

City of Newark

CONTRACTUAL SERVICES AGREEMENT
CONSULTANTS

This Service Agreement (hereinafter "Agreement") is made and entered into this 1st day of August , 2022 by and between the **CITY OF NEWARK**, a municipal corporation ("City"), and Surf to Snow Environmental Research Management, Inc., a California corporation ("Consultant"), collectively the "Parties".

W I T N E S S E T H:

WHEREAS, City requested proposals to perform Municipal Stormwater Inspection Services.

WHEREAS, in response to City's request, Consultant submitted a proposal (hereinafter "Proposal"), now on file with the City Public Works Department and incorporated herein by reference; and, after negotiations, Consultant agreed to perform the "Services" more particularly described in Exhibit "A" ("Services"), in return for the compensation described in this Agreement and Exhibit "B".

WHEREAS, in reliance upon Consultant's documentation of its qualifications, as set forth in the Proposal, City finds that Consultant has demonstrated the requisite qualifications, experience, training, and expertise to perform the requested Services.

NOW, THEREFORE, the Parties hereto agree as follows:

1. **CONSULTANT'S SERVICES.** Consultant shall perform Services described, and in the time, place, and manner specified in Exhibit "A" in accordance with the terms and conditions of this Agreement. In the event of a conflict in or inconsistency between the terms of this Agreement and Exhibit "A", the Agreement shall control.

2. **TIME FOR PERFORMANCE.** Time is of the essence in the performance of Services under this Agreement and Consultant shall generally adhere to the schedule set forth in Exhibit "A"; provided, that City shall grant reasonable extensions of time for the performance of such Services occasioned by governmental reviews of Consultant's work product or other unavoidable delays occasioned by circumstances, provided, further, that such unavoidable delays shall not include strikes, lockouts, work stoppages, or other labor disturbances conducted by, or on behalf of, Consultant's officers or employees. Any Services for which times for performance are not specified in this Agreement shall be commenced and completed by Consultant in a reasonably prompt and timely manner based upon the circumstances and direction communicated to Consultant.

Consultant acknowledges the importance to City of City's performance schedule and agrees to put forth its best professional efforts to perform its Services under this Agreement in a manner consistent with that schedule. City understands, however, that Consultant's performance must be governed by sound professional practices.

DocuSign Envelope ID: 9A883508-28E4-49ED-A88D-3373245BFD7D

3. **COMPENSATION.**

A. **"Not to Exceed" Compensation.** City shall compensate Consultant for all Services performed by Consultant hereunder in an amount based upon Consultant's hourly or other rates set forth in Exhibit "B". The payments specified in Exhibit "B" shall be the only payments to be made to Consultant for Services rendered pursuant to this Agreement.

Notwithstanding the foregoing, the combined total of compensation and costs payable hereunder shall not exceed the sum of Fifty-Five Thousand One Hundred Twenty Dollars ($55,120.00) unless the performance of services and/or reimbursement of costs and expenses in excess of said amounts have been approved in advance of performing such services and/or incurring such costs and expenses by City, evidenced in writing as Additional Services by Task Order (see Section 4. Additional Services of this Agreement).

B. **Method of Billing.** To request payment, Consultant shall submit monthly invoices to City identifying Services performed and the charges therefore (including an identification of personnel who performed Services, hours worked, hourly rates, and reimbursable expenses), based upon Consultant's billing rates (set forth on Exhibit "B" hereto).

Consultant shall submit all billings for said Services to City in the manner specified in Exhibit "B"; or, if no manner is specified in Exhibit "B", then according to the usual and customary procedures and practices which Consultant uses for billing clients similar to City.

Invoices shall be sent to:

City of Newark
Public Works Department
37101 Newark Blvd.
Newark, CA 94560

Upon completion of Services, City shall sign off and acknowledge that all terms and conditions have been satisfactorily met; upon which, unless waived by City in writing, Consultant shall prepare an itemized statement, briefly describing by task and/or labor category the items billed.

C. **Payment.** Upon receipt of invoice, City shall make payments to Consultant on a monthly basis, or at such other times as may be specified in Exhibit "B", for Services, which are performed in accordance with this Agreement to the satisfaction of City.

D. **Consultant's Failure to Perform.** In the event that Consultant performs Services that do not comply with the requirements of this Agreement, Consultant shall, upon receipt of written notice from City, re-perform the services (without additional compensation to Consultant). If Consultant's failure to perform in accordance with this Agreement causes damages to City, Consultant shall reimburse City for the damages incurred (which may be charged as an offset to Consultant's payment).

4. **ADDITIONAL SERVICES.** In the event City desires the performance of additional services not otherwise included within Services, such services shall be authorized by

written Task Order approved in advance of the performance thereof. Such Task Order shall include a description of the services to be performed thereunder, the maximum compensation and reimbursement of costs and expenses payable therefore, the time of performance thereof, and such other matters as the Parties deem appropriate for the accomplishment of such services. Except to the extent modified by a Task Order, all other terms and conditions of this Agreement shall be deemed incorporated in each such task order.

5. INDEPENDENT CONSULTANT. At all times during the term of this Agreement, Consultant shall be, and is an independent consultant and shall not be an employee or agent of City. Consultant shall not be entitled to any benefit, right, or compensation other than that provided in this Agreement. City shall have the right to control Consultant only insofar as the results of Consultant's Services; however, City shall not have the right to control the means by which Consultant accomplishes Services rendered pursuant to this Agreement.

Except as City may specify in writing, Consultant shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Consultant shall have no authority, express or implied, pursuant to this Agreement to bind City to any obligation whatsoever.

6. PERSONNEL. Consultant understands that, in entering into this Agreement, City has relied upon Consultant's ability to perform in accordance with its representations regarding the qualifications of Consultant, including the qualifications of its Authorized Representative, its designated personnel, and its subconsultants, if any, identified in the Proposal. Therefore, Consultant shall not replace its Authorized Representative, or any of the designated personnel or subconsultants identified in the Proposal, without the prior written consent of City. All Services shall be performed by, or under, the direct supervision of Consultant's Authorized Representative.

In the event that City, in its sole discretion, at any time during the term of this Agreement, desires the removal of any of Consultant's designated personnel or subconsultants, Consultant shall, immediately upon receiving notice from City of such desire of City, cause the removal of such person or persons.

7. FACILITIES AND EQUIPMENT. Consultant shall, at its sole cost and expense, furnish all facilities and equipment which may be required for furnishing Services.

8. INFORMATION AND DOCUMENTATION.

A. Information from City. City has made an effort to provide Consultant with all information necessary for Consultant's performance of Services. If Consultant believes additional information is required, Consultant shall promptly notify City and City will provide to Consultant all relevant non-privileged information in City's possession.

B. Consultant's Accounting Records. Consultant shall maintain all accounting records related to this Agreement in accordance with generally accepted accounting principles and state law requirements, and in no event for less than four (4) years. Consultant's accounting records shall include, at a minimum, all documents which support Consultant's costs and expenses related to this Agreement, including personnel, subconsultants' invoices and

payments, and reimbursable expenses. Consultant's accounting records shall be made available to City within a reasonable time after City's request, during normal business hours.

C. **Ownership of Work Product.** All original documents prepared by Consultant (including its employees and subconsultants) for this Agreement ("Work Product"), whether complete or in progress, are the property of City and shall be given to City at the completion of Consultant's Services, or upon demand of City. Consultant shall have a right to make and keep copies of the Work Product except for any confidential information. Consultant shall not reveal the Work Product or the confidential information contained in the Work Product, or make it available, to any third party without the prior written consent of City.

9. **CONFLICTS OF INTEREST PROHIBITED.** Consultant (including its employees, agents, and subconsultants) shall not maintain or acquire any direct or indirect interest that conflicts with the performance of this Agreement. Consultant shall comply with all requirements of the Political Reform Act (California Government Code Section 81000, *et seq.*) and other laws relating to conflicts of interest, including: (a) Consultant shall not make or participate in a decision made by City if it is reasonably foreseeable that the decision may have a material effect on Consultant's economic interest, and (b) if required by law, Consultant shall file financial disclosure forms with the City Clerk. If Consultant maintains or acquires a conflicting interest, any contract with City (including this Agreement) involving Consultant's conflicting interest may be terminated by City.

10. **NONDISCRIMINATION.** Consultant shall comply with all applicable federal, state, and local laws regarding nondiscriminatory employment practices, whether or not said laws are expressly stated in this Agreement. Consultant shall not discriminate against any employee or applicant because of race, color, religious creed, national origin, physical disability, mental disability, medical condition, marital status, sexual orientation, sex, age, or any other basis, as defined in California Civil Code Section 51.

11. **COMPLIANCE WITH LAW AND STANDARD OF CARE.** Consultant shall comply with all applicable legal requirements including all federal, state, and local laws (including ordinances and resolutions), whether or not said laws are expressly stated in this Agreement. Consultant shall perform Services using a standard of care equal to, or greater than, the degree of skill and diligence ordinarily used by reputable professionals, with a level of experience and training similar to Consultant, performing under circumstances similar to those required by this Agreement.

12. **INSURANCE.** Consultant shall procure and maintain for the duration of this Agreement insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the work hereunder by the Consultant, his agents, representatives, subconsultants, or employees.

A. **Verification of Coverage.**

Consultant shall furnish City with original certificates of insurance and amendatory endorsements or copies of the applicable policy language effecting coverage required by this clause. The certificates and endorsements for each insurance policy are to be

signed by a person authorized by that insurer to bind coverage on its behalf. All certificates and endorsements are to be received and approved by City before work commences. City reserves the right to require and obtain complete, certified copies of all required insurance policies and endorsements at any time. Failure to exercise this right at any time shall not constitute a waiver of right to exercise later. Consultant shall immediately furnish City with certificates of renewal for each policy that is renewed during the term of this Agreement.

B. Minimum Scope of Insurance.

Coverage shall be at least as broad as:

1. Insurance Services Office Form Number CG 00 01 covering Commercial General Liability on an occurrence basis, including products and completed operations, property damage, bodily injury, and personal and advertising inquiry; and

2. Insurance Services Office Form Number CA 00 01 covering Code 1 (any auto), or Code 8 (hired) and Code 9 (non-owned) if consultant has no owned autos; and

3. Workers' Compensation insurance as required by the State of California, with Statutory Limits, and Employer's Liability Insurance; and

4. Errors and Omissions Liability insurance appropriate to the Consultant's profession. Architects' and Engineers' coverage is to be endorsed to include contractual liability.

C. Minimum Limits of Insurance.

It shall be a requirement under this Agreement that any available insurance proceeds broader than or in excess of the specified minimum Insurance coverage requirements and/or limits shall be available to the Additional Insured. Furthermore, the requirements for coverage and limits shall be (1) the minimum coverage and limits specified in this Agreement; or (2) the broader coverage and maximum limits of coverage of and Insurance policy or proceeds available to the named Insured; whichever is greater.

Consultant shall maintain limits no less than:

1. General Liability: (including products-completed operations, property damage, bodily injury, and personal and advertising injury)	**$2,000,000** per occurrence for bodily injury, personal injury, and property damage. If a general aggregate limit applies, either the general aggregate limit shall apply separately to this project/location or the general aggregate limit shall be twice the required occurrence limit.
2. Automobile Liability:	**$1,000,000** per accident for bodily injury and property damage.
3. Employer's Liability:	**$1,000,000** per accident for bodily injury or disease.
4. Errors and Omissions Liability:	**$1,000,000** per occurrence or claim; **$2,000,000** aggregate.

D. Deductibles and Self-Insured Retentions.

Any deductibles or self-insured retentions must be declared to and approved by the City. At the option of City, either: (1) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects to City, its officers, officials, directors, employees, contractors, agents, and volunteers, or (2) Consultant shall provide a financial guarantee satisfactory to City guaranteeing payment of losses and related investigations, claim administration, and defense expenses in an amount specified by the City.

E. Claims Made Policies.

For all "claims made" coverage, in the event that Consultant changes insurance carriers Consultant shall purchase "tail" coverage or otherwise provide for continuous coverage covering the Term of this Agreement and not less than five (5) years thereafter. Proof of such "tail" or other continuous coverage shall be required at any time that the Consultant changes to a new carrier.

F. Wasting Policies.

No policy required by this paragraph 12 shall include a "wasting" policy limit (i.e. limit that is eroded by the cost of defense).

G. Remedies.

In addition to any other remedies City may have if Consultant fails to provide or maintain any insurance policies or policy endorsements to the extent and within the time herein required, City may, at its sole option exercise any of the following remedies, which are alternatives to other remedies City may have and are not the exclusive remedy for Consultant's breach:

1. Obtain such insurance and deduct and retain the amount of the premiums for such insurance from any sums due under the Agreement;

2. Order Consultant to stop work under this Agreement or withhold any payment that becomes due to Consultant hereunder, or both stop work and withhold any payment, until Consultant demonstrates compliance with the requirements hereof; and/or

3. Terminate this Agreement.

H. Acceptability of Insurers.

Insurance is to be placed with insurers with a current A.M. Best's rating of no less than A:VII, unless otherwise acceptable to the City. All insurance companies providing coverage to Consultant shall be insurance organizations authorized by the Insurance Commissioner of the State of California to transact the business of insurance in the State of California.

I. Other Insurance Provisions.

The general liability and automobile liability policies are to contain, or be endorsed to contain, the following provisions:

1. Additional Insureds. City, its officers, officials, directors, employees and volunteers ("Additional Insureds") are to be covered as insureds with respect to liability arising out of work or operations performed by or on behalf of Consultant; including materials, parts or equipment furnished in connection with such work or operations.

2. Primary Coverage. For any claims related to Services, Consultant's insurance coverage shall be primary insurance as respects City, its officers, officials, directors, employees, and volunteers. Any insurance or self-insurance maintained by City, its officers, officials, directors, employees, or volunteers shall be excess of Consultant's insurance and shall not be contribute with it. Consultant's policy will not seek contribution from the City's insurance or self-insurance.

3. Notice of Cancellation. Each insurance policy required above shall provide that coverage and shall not be canceled during the term of this Agreement without notice to the City.

4. Civil Code § 2782. Coverage shall not extend to any indemnity coverage for the active negligence of the additional insured in any case where an agreement to indemnify the additional insured would be invalid under Subdivision (b) of Section 2782 of the California Civil Code.

5. Deductibles and Self-Insured Retentions (SIR). All deductibles and self-insured retentions must be disclosed to the City for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named Insured or the City.

6. Subconsultants. Consultant shall include all subconsultants as insureds under its policies or shall require and verify separate certificates and endorsements have been obtained for each subconsultant. All coverages for subconsultants shall be subject to all of the requirements stated herein.

7. Waiver of Subrogation. With respect to Workers' Compensation and Employer's Liability Coverage, the insurer shall agree to waive all rights of subrogation against City, its officers, officials, directors, employees, and volunteers for losses arising from work performed by Consultant for City.

8. Coverage is Material Element. Maintenance of proper insurance coverage in conformity with the provision of this paragraph 12 is a material element of this Agreement and failure to maintain or renew coverage or to provide evidence of coverage or renewal may be treated by City as a material breach of this Agreement.

9. Variation. The City Risk Manager may approve a variation in these insurance requirements upon a determination that the coverage, scope, limits, and form of such insurance are either not commercially available or that City's interests are otherwise fully protected. Any variation granted shall be done in writing and shall be made a part of this Agreement as Appendix "A".

13. REPORTING DAMAGES. If any damage (including but not limited to death, personal injury or property damage) occurs in connection with the performance of this Agreement, Consultant shall immediately notify the City Risk Manager's office by telephone at 510-578-4428, and Consultant shall promptly submit to the City's Risk Manager and the City's Administrator (see paragraph 18, hereinbelow) a written report (in a form acceptable to City) with the following information: (a) name(s) and address(es) of the injured or deceased person(s), (b) name(s) and address(es) of witnesses, (c) name(s) and address(es) of Consultant's insurance company(ies), and (d) a detailed description of the damage(s) and whether any City property was involved.

14. INDEMNIFICATION/SAVE HARMLESS. To the fullest extent permitted by law, the Consultant shall: (1) immediately defend, and (2) indemnify City, its, officers, officials, directors, employees, and volunteers from and against all liabilities regardless of nature or type arising out of or resulting from Consultant's performance of Services, or any negligent or wrongful act or omission of Consultant or Consultant's officers, employees, agents, or subconsultants. Liabilities subject to the duties to defend and indemnify include, without limitation all claims, losses, damages, penalties, fines, and judgments; associated investigation and administrative expenses; defense costs, including but not limited to reasonable attorneys' fees; court costs; and costs of alternative dispute resolution. Consultant's obligation to indemnify applies unless it is adjudicated that its liability was caused by the sole active negligence or sole willful misconduct of an indemnified party. If it is finally adjudicated that liability is caused by the comparative active negligence or willful misconduct of an indemnified party, Consultant's indemnification obligation shall be reduced in proportion to the established comparative liability of the indemnified party.

In the event that Consultant or any employee, agent, or subconsultant of Consultant providing services under this Agreement is determined by a court of competent jurisdiction or the California Public Employees Retirement System (PERS) to be eligible for enrollment in PERs as an employee of City, Consultant shall indemnify, defend, and hold harmless City for the payment of any employee and/or employer contributions for PERS benefits on behalf of Consultant or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of City.

The duty to defend is a separate and distinct obligation from Consultant's duty to indemnify. Consultant shall be obligated to defend, in all legal, equitable, administrative, or special proceedings, with counsel approved by City immediately upon tender to Consultant of the claim in any form or at any stage of an action or proceeding, whether or not liability is established. An allegation or determination of comparative active negligence or willful misconduct by an indemnified party does not relieve the Consultant from its separate and distinct obligation to defend City. The obligation to defend extends through final judgment, including exhaustion of any appeals. The defense obligation includes an obligation to provide independent defense counsel if Consultant asserts that liability is caused in whole or in part by the negligence or willful misconduct of the indemnified party. If it is finally adjudicated that liability was caused by the sole active negligence or sole willful misconduct of an indemnified party, Consultant may submit a claim to City for reimbursement of reasonable attorneys' fees and defense costs.

The review, acceptance or approval of Consultant's work or work product by any indemnified party shall not affect, relieve or reduce Consultant's indemnification or defense obligations. This paragraph survives completion of Services or the termination of this contract. The provisions of this paragraph are not limited by and do not affect the provisions of this contract relating to insurance.

Consultant/Subconsultant's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnification obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

15. LICENSES, PERMITS, ETC. Consultant represents and warrants to City that it has all licenses, permits, qualifications, and approvals of whatsoever nature that are legally required for Consultant to practice its profession. Consultant represents and warrants to City that Consultant shall, at its sole cost and expense, keep in effect at all times during the term of this Agreement any licenses, permits, and approvals which are legally required for Consultant to practice its profession. In addition to the foregoing, Consultant shall obtain and maintain during the term hereof a valid City of Newark Business License.

16. TERM/TERMINATION.

A. The term of this Agreement shall commence upon the date first hereinabove written and shall expire on June 30, 2023. At the end of the term, the City may

renew this Agreement for two (2) one-year terms as authorized by the by the Public Works Director, City Manager, or City Council.

B. Notwithstanding the provisions of paragraph 16 section A above, City may terminate this Agreement at any time and without cause upon written notification to the Consultant. Consultant may cancel this Agreement upon thirty (30) day's written notice to City and shall include in such notice the reasons for cancellation. In the event of such termination, City shall compensate Consultant for Services rendered and reimburse Consultant for costs and expenses incurred, to the date of termination, calculated in accordance with the provisions of paragraph 3. In ascertaining the Services actually rendered to the date of termination, consideration shall be given both to completed work and work in process of completion. Nothing herein contained shall be deemed a limitation upon the right of City to terminate this Agreement for cause, or otherwise to exercise such rights or pursue such remedies as may accrue to City hereunder.

17. CONTRACT ADMINISTRATION. This Agreement shall be administered by the Public Works Director of the City of Newark ("Administrator"). All correspondence shall be directed to or through the Administrator or his/her designee.

18. NOTICES. Written notices required or convenient hereunder shall be delivered personally or by depositing the same with the United States Postal Service, first class (or equivalent) postage prepaid and addressed, in the case of Consultant, to:

SURF TO SNOW ENVIRONMENTAL RESOURCE MANAGEMENT, INC.	**CITY OF NEWARK**
Elizabeth Frantz	PUBLIC WORKS DIRECTOR
Chief Operating Officer	**Administrator**
Address: Surf to Snow 696 San Ramon Valley Blvd. #368 Danville, CA 94526 Attn: Elizabeth Frantz	City of Newark Attn: Public Works Director 37101 Newark Boulevard Newark, CA 94560

19. PARAGRAPH HEADINGS. Paragraph headings used herein are for convenience only and shall not be deemed to be a part of such paragraphs and shall not be construed to change the meaning thereof.

20. EXHIBITS. All exhibits referred to herein are attached hereto and are by this reference incorporated herein.

21. SEVERABILITY. If any term of this Agreement (including any phrase, provision, covenant, or condition) is held by a court of competent jurisdiction to be invalid or unenforceable, the Agreement shall be construed as not containing that term, and the remainder of this Agreement shall remain in full force and effect; provided, however, this paragraph shall not be applied to the extent that it would result in a frustration of the Parties' intent under this Agreement.

DocuSign Envelope ID: 9A883508-28E4-49ED-A88D-3373245BFD7D

22. **GOVERNING LAW, JURISDICTION, AND VENUE.** The interpretation, validity, and enforcement of this Agreement shall be governed by and interpreted in accordance with the laws of the State of California. Any suit, claim, or legal proceeding of any kind related to this Agreement shall be filed and heard in a court of competent jurisdiction in the County of Alameda.

23. **ATTORNEY'S FEES.** In the event any legal action is commenced to enforce this Agreement, the prevailing party is entitled to reasonable attorney's fees, costs, and expenses incurred.

24. **ASSIGNABILITY.** Neither Consultant nor City shall subconsult, assign, sell, mortgage, hypothecate, or otherwise transfer their respective interests or obligations in this Agreement without the express prior written consent of the non-transferring party.

25. **MODIFICATIONS.** This Agreement may not be modified orally or in any manner other than by an agreement in writing signed by both Parties.

26. **WAIVERS.** Waiver of breach or default under this Agreement shall not constitute a continuing waiver of a subsequent breach of the same or any other provision of this Agreement.

27. **ENTIRE AGREEMENT.** This Agreement, including all documents incorporated herein by reference, comprises the entire integrated understanding between the Parties concerning the Services. This Agreement supersedes all prior negotiations, agreements, and understandings regarding this matter, whether written or oral. The documents incorporated by reference into this Agreement are complementary; what is called for in one is binding as if called for in all.

28. **SIGNATURES.** The individuals executing this Agreement represent and warrant that they have the right, power, legal capacity, and authority to enter into and to execute this Agreement on behalf of the respective legal entities of Consultant and City. This Agreement shall inure to the benefit of and be binding upon the Parties hereto and their respective successors and assigns.

29. **COVENANT AGAINST CONTINGENT FEES.** Consultant hereby warrants that Consultant has not employed or retained any company or person, other than a *bona fide* employee working for Consultant, to solicit or secure this Agreement, and Consultant has not paid or agreed to pay any company or person, other than a *bona fide* employee, any fee, commission, percentage, brokerage fee, gift, or any other consideration contingent upon or resulting from the award or formation of this Agreement. For breach or violation of this warranty, City shall have the right to annul this Agreement without liability or, at City's discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement the day and year first hereinabove written.

EXHIBIT A

SCOPE OF SERVICES

Consultant Stormwater Inspection services required pertain to the Municipal Regional Stormwater NPDES Permit Order No. R2-2022-0018 (MRP).

MRP C.3. Inspections
Consultant to provide inspection services and related duties pertaining to MRP C.3. Operation and Maintenance (O&M) Verification Inspections of sites with stormwater treatment and hydromodification management measures. Consultant will conduct inspections of approximately 10-15 Regulated Projects. Out of those inspections, approximately 50% will require a second inspection and 10-15% will require a third inspection. As the number of Regulated Projects with installed stormwater management measures increases, the number of required annual inspections will increase as well, with the target number of inspections equal to about one-third of the total number of Regulated Projects. Vault-based stormwater management measures within the City are inspected by third-party inspectors, as allowed under MRP C.3. Review of these third-party inspections is included under this scope.

MRP C.4. Inspections
Consultant to provide inspection services and related duties pertaining to MRP C.4., inspections of Best Management Practices at industrial and commercial facilities. Consultant will conduct an average of 90 first inspections on a yearly basis. Out of these it is expected that approximately 10-15% will require a second inspection and approximately 5% will require a third inspection. City staff will provide the anticipated inspection list to Contractor each year of the contract. However, the inspection list may be modified on occasion in response to business opening/closure or complaints.

Related tasks include, but are not limited to:

- Review of O&M/Inspection records
- Scheduling of inspections and interfacing with business owners/site representatives
- Knowledge of and adherence to City's Enforcement Response Plans for MRP Provisions C.3. and C.4.
- Completion of County-wide standard SSBIR/SSFIR forms
- Collection of geographic information system (GIS) mapping data for each stormwater management measure
- Distribution of appropriate informational literature provided by the City
- Resolution of active or potential violations or deficiencies
- Documentation and reporting as required by City representatives

MRP C.5 Illicit Discharge Response

Consultant to provide on-call illicit discharge and spill response services. The Consultant follow all applicable safety and injury and illness prevention protocols and the City's Enforcement Response Plan if called up on to investigate reported spills, develop actions plans, assist with spill containment, assist with recordkeeping and time tracking, conduct follow-up work, or other activities as required by the City.

Pricing Summary

MRP Provision C.3 O&M Verification Inspections (Unit Rate)

Units	Unit Rate	Number of Locations per Year	Fiscal Y1 Estimated Total
C.3 O&M Inspection (Initial)	$ 315.00	12.00	$ 3,780.00
C.3 O&M Inspection (1st Re-Insp)	$ 250.00	6.00	$ 1,500.00
C.3 O&M Inspection (2nd Re-Insp)	$ 250.00	1.00	$ 250.00
C.3 Inspection Total			**$ 5,530.00**

MRP Provision C.4 Business Inspections (Unit Rate)

Units	Unit Rate	Number of Locations per Year	Fiscal Y1 Estimated Total
C.4 Business Inspection (Initial)	$ 315.00	90.00	$ 28,350.00
C.4 Business Inspection (1st Re-Insp)	$ 250.00	11.00	$ 2,750.00
C.4 Business Inspection (2nd Re-Insp)	$ 250.00	1.00	$ 250.00
C.4 Inspection Total			**$31,350.00**

Spill & Discharge Response (Unit Rate)

Task	Unit Rate	Number of Locations per Year	Fiscal Y1 Estimated Total
Illicit Discharge - Typical Spill Response	$ 714.00	9.00	$ 6,426.00
Illicit Discharge - Emergency Weekend/After-Hours Spill Response	$ 1,329.00	1.00	$ 1,329.00
Spill & Discharge Response Total			**$ 7,755.00**

Post-Inspection Reporting & Deliverables (T&M)

Task	Fiscal Y1 Estimated Total
Monthly Reporting	$ 720.00
Weekly Reporting	$ 3,120.00
Post-Inspection Reporting & Deliverable Total	**$ 3,840.00**

Project Management & QAQC (T&M)

Task	Fiscal Y1 Estimated Total
Project Management & QAQC	$ 5,790.00
Communication with City (meetings/calls)	$ 855.00
Project Management & QAQC Total	**$ 6,645.00**

Estimated Year 1 Total	**$55,120.00**

T&M Rates

Labor Category	Normal Hourly Rates	Weekend/ After Hours Hourly Rate
Contract Manager	$ 165.00	$ 247.50
Assistant PM/Field POC	$ 120.00	$ 180.00
QSD	$ 140.00	$ 210.00
QSP	$ 110.00	$ 165.00
DI	$ 95.00	$ 142.50
GIS	$ 98.00	$ 147.00

Assumptions

1 Initial C.3/C.4 inspection units include time for research, scheduling, onsite inspection, reporting, & time to collect GIS data for the City's database. Assume total of 3 hours per inspection on average.

2 C.3/C.4 re-inspection units include time for research, scheduling, onsite inspection, & reporting. Assume total of 2.5 hours per inspection on average.

3 Assume 90 initial C.4 inspections yearly. Assume 12% need 2nd inspection. Assume 5% need 3rd inspection.

4 Assume 12 initial C.3 inspections yearly. Assume 50% need 2nd inspection. Assume 12% need 3rd inspection.

5 Assume 10 spill responses yearly. Assume 4 hours per inspection per site, 1.5 hours follow up per site, & 60 miles roundtrip. The Weekend/After-Hours Spill Response rate includes 1.5xhourly rate for inspection & assumes follow up after inspection occurs during normal working hours.

6 Assume QA/QC required for each inspection/spill response report. Assume 0.25 hours per report.

7 Assume project support active for 6-7 months of the year. Assume 2 hours per month of PM time will be required during these active months.

8 Assume up to 3 meetings with the City yearly (kickoff meeting, meeting to discuss database, & meeting 60 days prior to end of contract term).

9 T&M and Unit Rates are an average rate for the 3-year duration. If performance period extends beyond 3 years, rates will be subject to increase.

Electronic Record and Signature Disclosure		

ELECTRONIC RECORD AND SIGNATURE DISCLOSURE

From time to time, City of Newark (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through the DocuSign system. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to this Electronic Record and Signature Disclosure (ERSD), please confirm your agreement by selecting the check-box next to 'I agree to use electronic records and signatures' before clicking 'CONTINUE' within the DocuSign system.

Getting paper copies

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after the signing session and, if you elect to create a DocuSign account, you may access the documents for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a $0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

Withdrawing your consent

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. Further, you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.

How to contact City of Newark:

You may contact us to let us know of your changes as to how we may contact you electronically, to request paper copies of certain information from us, and to withdraw your prior consent to receive notices and disclosures electronically as follows:
To contact us by email send messages to: sheila.harrington@newark.org

To advise City of Newark of your new email address

To let us know of a change in your email address where we should send notices and disclosures electronically to you, you must send an email message to us at sheila.harrington@newark.org and in the body of such request you must state: your previous email address, your new email address. We do not require any other information from you to change your email address.

If you created a DocuSign account, you may update it with your new email address through your account preferences.

To request paper copies from City of Newark

To request delivery from us of paper copies of the notices and disclosures previously provided by us to you electronically, you must send us an email to sheila.harrington@newark.org and in the body of such request you must state your email address, full name, mailing address, and telephone number. We will bill you for any fees at that time, if any.

To withdraw your consent with City of Newark

To inform us that you no longer wish to receive future notices and disclosures in electronic format you may:

i. decline to sign a document from within your signing session, and on the subsequent page, select the check-box indicating you wish to withdraw your consent, or you may;

ii. send us an email to sheila.harrington@newark.org and in the body of such request you must state your email, full name, mailing address, and telephone number. We do not need any other information from you to withdraw consent.. The consequences of your withdrawing consent for online documents will be that transactions may take a longer time to process..

Required hardware and software

The minimum system requirements for using the DocuSign system may change over time. The current system requirements are found here: https://support.docusign.com/guides/signer-guide-signing-system-requirements.

Acknowledging your access and consent to receive and sign documents electronically

To confirm to us that you can access this information electronically, which will be similar to other electronic notices and disclosures that we will provide to you, please confirm that you have read this ERSD, and (i) that you are able to print on paper or electronically save this ERSD for your future reference and access; or (ii) that you are able to email this ERSD to an email address where you will be able to print on paper or save it for your future reference and access. Further, if you consent to receiving notices and disclosures exclusively in electronic format as described herein, then select the check-box next to 'I agree to use electronic records and signatures' before clicking 'CONTINUE' within the DocuSign system.

By selecting the check-box next to 'I agree to use electronic records and signatures', you confirm that:

- You can access and read this Electronic Record and Signature Disclosure; and
- You can print on paper this Electronic Record and Signature Disclosure, or save or send this Electronic Record and Disclosure to a location where you can print it, for future reference and access; and
- Until or unless you notify City of Newark as described above, you consent to receive exclusively through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you by City of Newark during the course of your relationship with City of Newark.

RESOLUTION NO. 11,393

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF NEWARK AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACTUAL SERVICES AGREEMENT WITH SURF TO SNOW ENVIRONMENTAL RESOURCE MANAGEMENT, INC., FOR MUNICIPAL STORMWATER INSPECTION SERVICES

WHEREAS, the State of California has issued to the City of Newark Waste Discharge Requirements and a National Pollutant Discharge Elimination System (NPDES) Permit (No. CAS612008) for the discharge of stormwater runoff from the municipal separate stormwater system; and

WHEREAS, the City is required by the terms of the Permit to conduct inspections of stormwater treatment systems and industrial and commercial facilities to ensure that the systems are operating properly and that the facilities are implementing appropriate best management practices; and

WHEREAS, the City issued Requests for Proposals ("RFP") for Municipal Stormwater Inspection Services; and

WHEREAS, a total of three responses to the RFP were received and based on staff's evaluation, Surf to Snow Environmental Resource Management, Inc., and Wood Environment & Infrastructure Solutions, Inc. were determined to be the most qualified firms and provided the two highest ranking proposals; and

WHEREAS, both firms have demonstrated the ability to successfully fulfill the City's needs;

WHEREAS, an agreement with Wood Environment & Infrastructure Solutions, Inc. in an amount not to exceed $40,000.00 and in a form approved by the City Attorney will be approved at staff level.

NOW THEREFORE, BE IT RESOLVED that the City Council of the City of Newark hereby authorizes the City Manager to execute an agreement with Surf to Snow Environmental Resource Management, Inc. (S2S Agreement) in an amount not to exceed $55,120.00 in a form approved by the City Attorney; and

BE IT FURTHER RESOLVED that the City Manager is authorized to take all actions necessary to effectuate the intent of this Resolution.

I HEREBY CERTIFY the foregoing resolution was introduced at a regular meeting of the City Council of the City of Newark held on July 28, 2022, by Council Member Freitas who moved its adoption and passage, which motion was carried after being duly seconded, and passed by the following vote:

AYES:	Council Members Bucci, Freitas, Vice Mayor Hannon
NOES:	None
ABSENT:	Council Member Collazo, Mayor Nagy
SECONDED:	Council Member Bucci

APPROVED:

City Attorney

STAFF REPORT

Item D. 4.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Alex Tat, Senior Civil Engineer
SUBJECT	Adopt a resolution accepting completion of Smith Avenue Sinkhole Repairs, Project No. 1358, by Mountain Cascade, Inc., terminating emergency contracting actions pursuant to Public Contract Code Section 22050 and amending the 2022-2024 Biennial Budget for Fiscal Year 2024; exempt from CEQA review per CEQA Guidelines Section 15301

SUMMARY AND RECOMMENDATION

Following the July 27, 2023 City Council emergency declaration in response to roadway and storm drain damage on Smith Avenue fronting Birch Grove Primary Elementary School, the City contracted with Mountain Cascade, Inc. to perform the emergency repairs. Mountain Cascade, Inc. has completed the work in conformance with the specifications of the contract at a total cost not to exceed $95,000.

Staff recommends that the City Council accept completion of Smith Avenue Sinkhole Repairs, Project No. 1358, by Mountain Cascade, Inc., authorize an amendment of the 2022-2024 Biennial Budget for Fiscal Year 2024 to allocate an additional $15,000 of unallocated Capital Improvement Fund Reserves to the project to cover anticipated construction cost increases and terminate emergency contracting actions pursuant to Public Contract Code Section 22050.

BACKGROUND

The formation of a roadway sinkhole on Smith Avenue directly fronting Birch Grove Primary Elementary School created the need for emergency roadway and storm drain repairs.

The City of Newark's Purchasing Ordinance and the California Public Contract Code require repair of public improvements of this magnitude to follow a competitive formal bid process unless there is an emergency. Following the formal bidding process would have resulted in significant delays for the work required to repair the storm drain main and roadway, causing health and safety concerns. Therefore, at the July 27, 2023 City Council meeting, the City Council made a finding and adopted Resolution No. 11,553, declaring that an emergency existed as a result of the damage to the storm drain and roadway on Smith Avenue fronting Birch Grove Primary Elementary School and that the public interest and necessity demanded the immediate expenditure of public money to safeguard life, health or property, and authorized the City Manager to sign documents necessary for the repair without competitive bidding. In addition, the City Council approved the allocation of $80,000 of Capital Improvement Fund Reserves to

Smith Avenue Sinkhole Repairs, Project No. 1358.

Per Section 22050 of the California Public Contract Code, if the Council adopts a resolution finding that an emergency exists, staff is required to provide a report to the City Council at each subsequent regularly scheduled meeting thereafter on the status of the actions related to the emergency expenditure until Council declares an end to the emergency.

DISCUSSION/ANALYSIS

The City contacted a total of six contractors to provide quotes and their upcoming availability to perform the emergency repair work - Ranger Pipelines, Sanco, Moreno Brothers, Rosas Brothers Construction, GradeTech, Inc., and Mountain Cascade, Inc. The City contracted with Mountain Cascade, Inc. because they were the only qualified contractor immediately available to provide the emergency roadway and storm drain repairs.

The repair work consisted of excavating below the roadway surface, sealing the damaged storm drain joint, pouring a concrete field collar around the joint, backfilling the excavated area with slurry and aggregate base, reconstructing damaged concrete curb and gutter, and restoring the asphalt concrete pavement. Despite staff's desire and attempts to complete the work earlier, the roadway and storm drain repairs unfortunately occurred after the start of Newark Unified District's 2023-24 school year; however, due in most part to close coordination between Public Works Engineering and Maintenance staff, Police, the contractor, and Birch Grove Primary Elementary School administration, disruptions to morning drop-off and afternoon pick-up operations were kept to a minimum.

Mountain Cascade, Inc. has completed the work in conformance with the specifications of the contract. Staff is currently working with the contractor to finalize costs associated with the disposal of excavated material; however, based on preliminary estimates, staff does not anticipate the final cost of the project to exceed $95,000.

Staff recommends that the City Council accept completion of Smith Avenue Sinkhole Repairs, Project No. 1358, by Mountain Cascade, Inc., authorize an amendment of the 2022-2024 Biennial Budget for Fiscal Year 2024 to allocate an additional $15,000 of unallocated Capital Improvement Funds to the project to cover anticipated construction cost increases and terminate emergency contracting actions pursuant to Public Contract Code Section 22050.

FISCAL IMPACT

Staff recommends amending the 2022-2024 Biennial Budget and Capital Improvement Fund for Fiscal Year 2024 to allocate an additional $15,000 of Capital Improvement Fund Reserves to the Smith Avenue Sinkhole Repairs, Project No. 1358, thereby increasing the total project budget from $80,000 to $95,000, to cover anticipated construction cost increases.

ENVIRONMENTAL/PLANNING COMMISSION REVIEW

The repair and maintenance of existing facilities is categorically exempt under the California Environmental Quality Act (CEQA) section 15301 (Existing Facilities).

Resolution Ending Emergency

RESOLUTION NO.

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF NEWARK ACCEPTING COMPLETION OF SMITH AVENUE SINKHOLE REPAIRS, PROJECT NO. 1358, BY MOUNTAIN CASCADE, INC., TERMINATING EMERGENCY CONTRACTING ACTIONS PURSUANT TO PUBLIC CONTRACT CODE SECTION 22050 AND APPROVING AN AMENDMENT OF THE 2022-2024 BIENNIAL BUDGET FOR FISCAL YEAR 2023-2024

WHEREAS, Public Contract Code Section 22050 allows public agencies to repair or replace a public facility without competitive bidding, provided that the legislative body makes a finding and adopts a resolution by a four-fifths vote that an emergency exists and that the emergency will not permit a delay resulting from a competitive solicitation for bids and that the action is necessary to respond to the emergency; and

WHEREAS, Public Contract Code Section 22050 also requires local agency governing bodies to terminate emergency contracting actions at the earliest possible date that conditions warrant so that regular noticed bidding can resume; and

WHEREAS, damage to the storm drain main along Smith Avenue eroded the surrounding roadway subgrade, causing a sinkhole to form directly adjacent to Birch Grove Primary Elementary School, requiring immediate repair to address health and public safety concerns; and

WHEREAS, the public interest and necessity demanded the immediate expenditure of public money to safeguard life, health and property; and

WHEREAS, on July 27, 2023, the City Council adopted Resolution No. 11,553 declaring that an emergency existed because of the damage to the storm drain and roadway on Smith Avenue fronting Birch Grove Primary Elementary School and that the public interest and necessity demanded the immediate expenditure of public money to safeguard life, health, or property, and authorized the City Manage to execute all documents and take all actions necessary for the repair without competitive bidding; and

WHEREAS, Resolution No. 11,553 approved an amendment of the 2022-2024 Biennial Budget and Capital Improvement Plan to allocate $80,000 of Capital Improvement Funds to the Smith Avenue Sinkhole Repairs project account for Project No. 1358; and

WHEREAS, the City entered into a contract with Mountain Cascade, Inc. to provide the necessary emergency roadway and storm drain repairs on a time and materials fee basis; and

WHEREAS, on August 21, 2023, Mountain Cascade, Inc. completed the work in conformance with the specifications of the contract at a total cost not to exceed $95,000; and

WHEREAS, said work has been completed to the satisfaction of the City Engineer.

NOW THEREFORE, BE IT RESOLVED that the City Council of the City of Newark hereby finds that the above recitals are true and accurate and hereby incorporated by reference.

BE IT FURTHER RESOLVED that the City Council of the City of Newark does hereby accept the improvements for Smith Avenue Sinkhole Repairs, Project 1358. in a final contract amount not to exceed $95,000.

BE IT FURTHER RESOLVED that the City Council of the City of Newark does hereby authorize the release of bonds guaranteeing completion of the work.

BE IT FURTHER RESOLVED that the City Council of the City of Newark does hereby authorize the filing of a Notice of Completion with the Office of the County Recorder of Alameda County, California.

BE IT FURTHER RESOLVED that the City Council of the City of Newark does hereby authorize the City to issue payment including the release of a final retention payment to Mountain Cascade, Inc. for the completion of Smith Avenue Sinkhole Repairs, Project 1358, pursuant to the contract.

BE IT FURTHER RESOLVED pursuant to Public Contract Code Section 22050 that the emergency contracting actions related to the Smith Avenue sinkhole as identified in Resolution No. 11,553 are hereby terminated.

BE IT FURTHER RESOLVED that the City Council hereby approves an amendment of the 2022-2024 Biennial Budget and Capital Improvement Plan to allocate an additional $15,000 of Capital Improvement Funds to project account 1358 as follows:

	Account	Description	Amount
TO:	610.90.094.940.6221.CIP1358	Smith Avenue Sink Hole Repairs	$15,000
FR:	610.3000	Unappropriated Fund Balance	$15,000

STAFF REPORT

Item D. 5.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Cathreene Ingham-Watters, Human Resources Director
SUBJECT	Adopt a resolution approving side letter agreements to the Memorandum of Understanding with the Newark Association of Miscellaneous Employees (NAME) and to the Memorandum of Understanding with the Newark Police Association (NPA) to provide that NPA serve as the sole and exclusive bargaining representative for the Vehicle Abatement Officer classification.

SUMMARY AND RECOMMENDATION

The classification of Vehicle Abatement Officer is currently represented by the Newark Association of Miscellaneous Employees (NAME). However, the Vehicle Abatement Officer is assigned to the Newark Police Department; as such, following staff engaging in meet and confer with NAME and the Newark Police Association (NPA), staff recommends that the NPA be the sole representative for the Vehicle Abatement Officer classification.

Staff recommends that the City Council adopt a resolution approving side letters between the City and NAME and between the City and NPA to provide that the job classification of Vehicle Abatement Officer will no longer be represented by NAME and will instead be represented by the NPA.

BACKGROUND

The Vehicle Abatement Officer is assigned to the Newark Police Department. In that role, the Vehicle Abatement Officer reports to individuals within the police department and is responsible for duties as assigned within the department. Currently, there are no employee classifications within NAME except for the Vehicle Abatement Officer that are assigned to the police department. As such, the Vehicle Abatement Officer classification should logically be represented by NPA along with other employee classifications that are assigned to the police department.

DISCUSSION/ANALYSIS

The City and NAME have met and conferred regarding the removal of the Vehicle Abatement Officer classification as solely represented by NAME. NAME has agreed to a side letter removing the Vehicle Abatement Officer classification as a represented classification (Exhibit A).

Additionally, the City and NPA have met and conferred regarding the representation of

the Vehicle Abatement Officer classification and the NPA has agreed via a side letter to accept representation of the classification (Exhibit B).

Upon Council approval, the side letters will take effect and the Vehicle Abatement Officer classification will no longer be represented by NAME and will be represented by NPA. The change in representation will have no impact on salary but will allow the Vehicle Abatement Officer to receive an initial appointment uniform allowance and monthly uniform allowance.

FISCAL IMPACT

Although there is no fiscal impact to the salary schedule for the Vehicle Abatement Officer classification from NAME to NPA, there is an additional fiscal impact of an initial appointment uniform allowance and monthly uniform allowance of $100.

37101 Newark Boulevard
Newark, CA 94560

To: Newark Association of Miscellaneous Employees Executive Board

From: David Benoun, City Manager
Lenka Hovorka, Assistant City Manager

Date: August 28, 2023

This will serve as a side letter to the City of Newark (City) and the Newark Association of Miscellaneous Employees (NAME) July 1, 2022 – June 30, 2025 Memorandum of Understanding (MOU). The purpose of this side letter is to address representation of the classification of Vehicle Abatement Officer.

The City and Association have met and conferred and agreed to the following amendments below to provide that NAME will no longer be the sole and exclusive bargaining representative for the Vehicle Abatement Officer classification. This side letter will become effective upon approval by the City Council.

The City and NAME agree to the following amendments to the MOU:

1. Remove "Vehicle Abatement Officer" from Attachment A, the list of "Regular Full-Time/ Part-Time Classifications".
2. Remove the following row from the table in Attachment B, "Salary List":

	Step Code	***FY 2023***	***FY 2024***	***FY 2025***
Vehicle Abatement Officer	1	$32.08	$32.01	$32.97
	2	$32.62	$33.60	$34.61
	3	$34.26	$35.29	$36.35
	4	$35.96	$37.04	$38.15
	5	$37.77	$38.90	$40.07

City of Newark

City Manager's Office
37101 Newark Boulevard
Newark, CA 94560

To: Newark Police Association Executive Board

From: David Benoun, City Manager
Lenka Hovorka, Assistant City Manager

Date: August 28, 2023

This will serve as a side letter to the City of Newark (City) and the Newark Police Association (NPA) July 1, 2019 - June 30, 2022 Memorandum of Understanding (MOU), revised July 28, 2022 to extend the MOU term through June 30, 2025. The purpose of this side letter is to address representation of the classification of Vehicle Abatement Officer.

The City and Association have met and conferred and agreed to the following amendments below to provide that NPA serve as the sole and exclusive bargaining representative for the Vehicle Abatement Officer classification. This side letter will become effective upon approval by the City Council.

The City and NPA agree to the following amendments to the MOU:

1. Add "Vehicle Abatement Officer" to Section III. DEFINTIONS, Subsection G

2. Repeal and replace Section VII. UNIFORM ALLOWANCE, Subsection A in its entirety as follows:

A. <u>Police Officer, Police Sergeant, Community Service Officer, Animal Control Officer, and Vehicle Abatement Officer</u>

1. Upon appointment to the classification of Police Officer, Community Service Officer, Animal Control Officer, or Vehicle Abatement Officer a full-time regular employee shall be reimbursed by the City for the purchase of City-approved uniform and equipment up to an amount equal to the maximum of the annual uniform allowance in effect on the date of appointment to Police Officer, Community Service Officer, Animal Control Officer, or Vehicle Abatement Officer. Reimbursement shall be made upon receipt of evidence of purchase.

2. Upon completion of 12 months of continuous active employment or upon reinstatement, Police Officers and Police Sergeants shall receive a monthly uniform allowance of $100.

DocuSign Envelope ID: AFD37C4C-C888-4E74-91A0-EB92EEA82452

3. Upon completion of 12 months of continuous active employment or upon reinstatement, Community Service Officers Animal Control Officers, and Vehicle Abatement Officers shall receive a monthly uniform allowance of $100.

4. If the employment of a Police Officer, Community Service Officer, Animal Control Officer, or Vehicle Abatement Officer is terminated before completion of the probationary period or 18 months of service, whichever is longer, uniforms and equipment purchased by the City through reimbursement pursuant to Provision VII.A.3. above shall be returned to the City.

3. Add "Vehicle Abatement Officer" to the positions listed in Section XII. HOLIDAYS, Subsection B.

4. Repeal and replace Section XXVII. WORK SCHEDULES, Subsection B in its entirety as follows:

B. Animal Control Officer, Community Service Officer, and Vehicle Abatement Officer

1. Animal Control Officers, Community Service Officers, and Vehicle Abatement Officers will normally be assigned to a Four-Ten Work schedule. The Police Chief may authorize a different work schedule if such change is needed to achieve management objectives.

2. During any permitted meal periods, Animal Control Officers, Community Service Officers, and Vehicle Abatement Officers assigned to Patrol Division will be on an on-duty status and shall be available to respond to requests for police services.

5. Add "Vehicle Abatement Officer" to Attachment A, the list of "Regular Full-Time/Part Time Classifications".

6. Add the following row to the table in Attachment A.3

VEHICLE ABATEMENT OFFICER	$5548.40	$5824.00	$6101.33	$6420.27	$6742.67
	$32.01	$33.60	$35.20	$37.04	$38.90

7. Add the following row to the table in Attachment A.4

VEHICLE ABATEMENT OFFICER	$5714.80	$5999.07	$6300.67	$6612.67	$6945.47
	$32.97	$34.61	$36.35	$38.15	$40.07

RESOLUTION NO.

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF NEWARK APPROVING SIDE LETTER AGREEMENTS WITH NEWARK ASSOCIATION OF MISCELLANEOUS EMPLOYEES AND NEWARK POLICE ASSOCIATION REGARDING THE REPRESENTATION OF THE VEHICLE ABATEMENT OFFICER CLASSIFICATION.

WHEREAS, the City of Newark maintains the job classification of Vehicle Abatement Officer; and

WHEREAS, the Newark Association of Miscellaneous Employees ("NAME") serves as the sole an exclusive representative for the Vehicle Abatement Officer classification; and

WHEREAS, the Vehicle Abatement Officer classification is the only classification represented by NAME that is assigned to the Newark Police Department; and

WHEREAS, the City and NAME have met and conferred regarding the removal the Vehicle Abatement Officer classification and NAME no longer serving as the sole and exclusive bargaining representative; and

WHEREAS, the City and the Newark Police Association ("NPA") have met and conferred regarding the representation of the Vehicle Abatement Office classification and NPA has agreed to serve as the sole and exclusive bargaining representative.

NOW THEREFORE, BE IT RESOLVED that the City Council of the City of Newark hereby approves and authorizes the City Manager to execute the Side Letter Agreement between the City of Newark and the Newark Association of Miscellaneous Employees, as attached in Exhibit A, and the Side Letter Agreement between the City of Newark and the Newark Police Association as it relates to the classification of the Vehicle Abatement Officer, as attached in Exhibit B.

STAFF REPORT

Item E. 1.

DATE	09/14/2023
TO	Honorable Mayor and City Council Members
FROM	Carmelisa Lopez, Senior Planner
SUBJECT	Public Hearing to consider approval of a Resolution finding the project exempt from further environmental review pursuant to CEQA and approving a Design Review, Minor Use Permit, and Vesting Tentative Map for a 76-unit residential development located at 38600 Cedar Boulevard (APNs 92A-2585-12-1, 92A-2585-31).

SUMMARY AND RECOMMENDATION

Waymark Development (the "Applicant") submitted an application for a 76-unit townhouse development and associated improvements on a 3.72-acre site located at 38600 Cedar Boulevard (the "Project site") (the "Project").

The Project site is zoned RM Residential Medium Density with a General Plan designation of Medium Density Residential. The site currently contains existing commercial buildings and site improvements and is surrounded by commercial, industrial, and residential uses. The site consists of two parcels and portions of excess City right-of-way and a street remnant of Timber Street (formerly Cedar Road) located between the two parcels and Interstate 880 (I-880) (see Attachment 1). Pursuant to a Purchase Sale Agreement (PSA) between the City and property owner, Cedar Boulevard Townhomes, LLC, executed in February 2023, the purchase of the City property must be completed within 120 days after the City Council's approval of the Project.

The Project includes 14 residential buildings with five to six townhouses each (see Attachment 2, Exhibit C). The townhouses will have three floor plan options ranging from 1,334 to 1,823 square feet (sq. ft.) in habitable area and include 3 to 4 bedrooms, 2.5 to 3 bathrooms, decks and patios, and a two-car garage. The Project includes several onsite improvements such as private roads and alleys, interconnected paths and sidewalks, 22,803 sq. ft. of open space, landscaping throughout the site and along Cedar Boulevard, and 190 parking spaces (152 residential parking spaces and 38 guest parking spaces). The Project also includes several off-site improvements such as widening of Cedar Boulevard along the site frontage to accommodate two travel lanes, a bike lane and bike buffer, parkway strip and a meandering sidewalk and new and extended landscape medians on Cedar Boulevard.

The proposed townhouse development is permitted in the RM zoning district. The proposed density of 20 units per net acre complies with the required density for both the RM zoning district and General Plan designation. As proposed and conditioned, the

Project also complies with all applicable zoning regulations and is consistent with all applicable General Plan policies.

The Project requires Design Review for the design of the site, buildings, and associated improvements and a Vesting Tentative Map to merge the Project site consisting of two parcels and former City property into one common lot and 76 condominium units. The Project also requires a Minor Use Permit to allow a building height over 35 feet and a sound wall height over six feet. The proposed buildings are up to 37 feet in height due to the proposed roof styles which are necessary to achieve the proposed architectural design and screen roof-mounted equipment. The proposed sound wall is 18 feet tall along the rear property line and will step down from a height of 18 to 10 feet from the rear to the front of the site along the side property lines. The proposed wall height is required to reduce exterior noise levels within the Project site down to 65 decibels to comply with General Plan Policy EH-7.4.

Staff recommends that the City Council adopt a Resolution finding the project exempt from further environmental review pursuant to CEQA and approving DR2022-011 and MUP2022-026, a Design Review, Minor Use Permit, and Vesting Tentative Map for a 76-unit residential development located at 38600 Cedar Boulevard (APNs 92A-2585-12-1, 92A-2585-31), based on the recommended findings and subject to the recommended conditions of approval.

BACKGROUND

The Project site is a rectangular-shaped site consisting of two parcels (APNs 92A-2585-12-1, 92A-2585-31). The site also includes portions of excess City right-of-way and a street remnant of Timber Street (formerly Cedar Road) located between the two parcels and I-880, totaling approximately 12,054 sq. ft. (see Attachment 1). On February 23, 2023, the City Council authorized the City Manager to execute a PSA with the property owner to complete the sale and conveyance of the City property, at fair market value, to be incorporated into the Project. The PSA requires that the purchase of the City property be completed within 120 days after the City Council's approval of the Project, or such earlier date as mutually agreed upon by the City and property owner.

The site is bounded by an Alameda County Flood Control & Water Conservation District (ACFCWCD) flood control channel to the northwest, I-880 to the northeast, a motel (E-Z 8 Motel) to the southeast, and Cedar Boulevard to the southwest. The site is surrounded by commercial, industrial, and residential uses. A residential development proposed by Robson Homes northwest of the flood control channel was recently approved by the City Council in May 2023.

The site is zoned RM Residential Medium Density with a General Plan designation of Medium Density Residential. The zoning for this site and properties north of Cedar Boulevard were rezoned to RM in the mid-2010's to facilitate the conversion of the uses on these properties to residential. Since the zoning amendment was adopted, various medium-density residential projects have been approved and constructed northwest of the Project site.

Project Proposal

The Applicant proposes to merge the two parcels and former City property to create one 3.72-acre common lot and 76 condominium units (see Attachment 2, Exhibit C). The proposed lot will include various easements for utilities and access and an 8-foot-wide right-of-way dedication for Cedar Boulevard. The Project includes private and public open space areas with various recreational amenities, 190 parking spaces for residents and guests, and several off-site improvements.

A total of 76 alley-loaded townhouses are proposed within 14 residential buildings containing five to six townhouses each. The proposed density is 20 units per net acre. The habitable floor area of each residence ranges from 1,334 to 1,823 sq. ft and will include private open space areas and two-car garages. The features of the proposed residences are provided in Table 1 below.

Table 1. Proposed Residences	
Floor Plans	3
Number of Floors	3
Building Height	36' to 37'
Habitable Floor Area	1,334 to 1,823 sq. ft.
Bedrooms	3 to 4
Bathrooms	2.5 to 3
Private Open Space	Decks and porches
Parking Spaces	2 within garage

Building Design

The proposed architectural style is a blend of Spanish and Mediterranean styles, creating a cohesive design that is both functional and complementary to the surrounding neighborhoods. The proposed floor plans and elevations provide a variety of massing, wall breaks, colors, and materials. The front entrances to the residences along the Project frontage also face Cedar Boulevard.

The building materials proposed include stucco, brick, and concrete “S” tiles for the roof. The buildings will be painted earth-toned colors and the tile roofs and various architectural features such as decorative entries, garage doors, and building-mounted exterior lighting will have complimentary finishes in dark brown, green, and blue colors. “Enhanced” elevations with varying materials, colors, and decorative elements are also proposed on the elevations facing Cedar Boulevard, the main entrance to the neighborhood, and I-880.

Open Space and Landscaping

The Project includes a total of 22,803 sq. ft. of open space area. The residences include a total of 5,995 sq. ft. of private open space consisting of second floor balconies. Some residences also have ground floor patios. The 16,808 sq. ft. of common open space is mostly located along the rear property line and include various recreational amenities such as a flexible green space and a dog play area (see Attachment 2, Exhibit C). Five smaller open space areas are located throughout the site and include a play area, flexible green space, courtyards with seating, and boardwalks over bioretention areas.

Landscaping is proposed throughout the site along the site perimeter, pedestrian walkways and sidewalks, and in the open space areas. The landscaping includes a diverse palette of trees, shrubs, and ground cover. Turf cell paving and decorative removable bollards are proposed at the emergency vehicle access (EVA) proposed at the southeast corner of the site adjacent to Cedar Boulevard. The streetscape along Cedar Boulevard includes street trees and a meandering sidewalk that will connect to the sidewalk that will be installed as part of the residential development recently entitled northwest of the site. The Project is also conditioned to include enhanced landscaping along the Project frontage that will require review and approval by the Community Development Director prior to the submittal of the improvement plans.

Fences and Walls

The Project includes an 18-foot-tall precast concrete sound wall with a stucco finish and plant pockets for vines. The sound wall will be constructed along the rear property line and wrap around the side property lines, stepping down from a height of 18 to 10 feet from the rear to the front of the site. The wall will assist with reducing highway noise levels for the Project as will be discussed later in the report. Fences and walls are also proposed throughout the development including stucco walls with brick caps for some patio areas and to screen alleys from the public right-of-way, wood rail fences in the open space area at the rear of the site, black metal railings for balconies, and a black metal fence to enclose the dog play area.

Parking

Multi-unit buildings are required to provide two parking spaces for a unit with two or more bedrooms and 0.5 guest parking spaces per unit pursuant to Newark Municipal Code (NMC) Section 17.23.040. Therefore, the Project requires a total of 190 parking spaces: 152 parking spaces for residents and 38 parking spaces for guests. Additionally, a maximum of 25 percent (48 parking spaces) may be compact parking spaces pursuant to NMC Section 17.23.090.D.2.

With a total of 190 parking spaces proposed, the Project complies with the parking requirement. Each townhouse will include a two-car parking garage for a total of 152 residential parking spaces. A total of 38 guest parking spaces is proposed throughout the site as head-in and parallel parking spaces on the private roads and within the parking areas along the eastern property line and near the main entrance to the site. Seven of the guest parking spaces will be compact parking spaces.

Short-term and long-term bicycle parking are also required for the Project. Pursuant to NMC Section 17.23.070, the Project is required to provide at least 10 short-term bicycle spaces and 16 long-term bicycle spaces. The Project includes a long-term bicycle storage area within each garage and five bicycle racks (each with a two-bicycle capacity). Three bicycle racks are proposed next to the play area and two bicycle racks are proposed next to the dog play area, both at the rear of the site.

Access and Circulation

The Project site will be accessed via a two-way driveway from the signalized intersection at Cedar Boulevard and Moores Avenue. A private road leading from the Cedar Boulevard and Moores Avenue intersection will serve as the central spine and alleyways will branch out to provide direct access to the two-car garages on the ground level of each townhouse. An EVA is proposed at the southeast corner of the site adjacent to Cedar Boulevard which will only be accessible to emergency vehicles. Removable bollards will block access to this EVA when not in use.

Pedestrian circulation throughout the site will be provided via sidewalks and interconnected walkways. “Enhanced” walkways are proposed for walkways crossing roads and parking areas for the safety of pedestrians.

Utilities & Off-Site Improvements

The Project will include the off-site improvements below. The proposed improvements are illustrated on the Tract 8665 Vesting Tentative Map plans included as pages 19 to 26 in Attachment 2, Exhibit C of this report.

1. Widening of Cedar Boulevard on its northeast side along the site frontage that will accommodate two travel lanes, a bike lane and bike buffer, a parkway strip behind the curb, and a meandering sidewalk;
2. Extension of the existing Cedar Boulevard landscape median island toward the north to create a dedicated left turn pocket at the Cedar Boulevard and Moores Avenue intersection;
3. Utility relocation, including streetlights, fire hydrants, water meters, joint trench boxes as well as the existing storm drainage inlet behind the curb line located at the Project’s entrance;
4. Relocation of the existing traffic signal heads and pole in the southeast quadrant of the Cedar Boulevard and Moores Avenue intersection behind the new curb line;
5. New directional curb ramps at the Project entrance and new crosswalks on the eastern and northern legs of the Cedar Boulevard and Moores Avenue intersection;
6. Crosswalk restriping on the southern leg of the intersection to match the new directional curb ramp locations and pedestrian push button location and in the northeastern half of Cedar Boulevard to match the proposed lane widths;
7. Installation of a new Cedar Boulevard landscape median north of Moores Avenue intersection to create a dedicated left turn pocket into the Project’s entrance. The landscape median will connect to the new landscape median that will be constructed with the adjacent residential development that was recently entitled;

and

8. A traffic signal and crosswalk improvements at the Cedar Blvd and Smith Ave intersection. The adjacent residential development recently entitled is similarly conditioned to provide the traffic signal improvements at Cedar Boulevard and Smith Avenue. The Project includes a condition of approval that states that if, at the time of final map approval, the Applicant of the adjacent residential development has already provided guarantee(s) or other appropriate improvement security for the traffic signal, the Project will not be required to install the traffic signal (see Attachment 2, Exhibit B).

DISCUSSION/ANALYSIS

General Plan/Zoning Conformity

The Medium Density Residential General Plan designation is intended for garden apartments and condominiums, townhomes, row houses, four-plexes to eight-plexes, and older areas that contain a mix of multi-family and single-family homes within this range. These areas tend to be multi-family in character but retain some of the characteristics of suburban neighborhoods. Densities in areas within this designation range from 14 to 30 units per net acre. This designation is implemented through RM Residential Medium Density zoning district.

Pursuant to NMC Section 17.07.020, multi-unit development is permitted in the RM zoning district. The Project is a townhouse development with a proposed density of 20 units per net acre, where a minimum density of 14 to 30 units per acre is required. Therefore, the proposed use is permitted and complies with the required density of both the RM zoning district and Medium Density Residential designation of the General Plan.

As proposed and conditioned, the Project complies with all applicable zoning regulations such as building height, parking, and open space. The Project is also consistent with all applicable General Plan policies such as Policy LU-1.10 (Vacant and Underutilized Sites) which encourages the development of Newark's remaining underutilized sites for their highest and best use and Policy LU-2.2 (Context-Sensitive Design) which requires that new structures are aesthetically compatible with existing structures and the surrounding context and contribute positively to the visual quality of neighborhoods. The Project's consistency with applicable General Plan policies is further discussed in Attachment 2, Exhibit A of this report.

Requested Entitlements

Design Review

Pursuant to NMC Section 17.34.020, design review is required for all projects that require a permit for new construction, reconstruction, rehabilitation, alteration, or other improvements to the exterior of a structure, site, or a parking area. Design review ensures that new development supports the goals and objectives of the General Plan and other adopted plans and guidelines.

The proposed architectural style is a blend of Spanish and Mediterranean styles, creating a cohesive design that is both functional and complementary to the surrounding neighborhoods. The proposed building designs are well articulated and feature a variety of colors, materials, and decorative elements to create interesting facades and an attractive neighborhood and streetscape. The front entrances to the residences along the Project frontage are also oriented toward Cedar Boulevard. Further, “enhanced” elevations with varying materials, colors, and decorative elements are proposed on the elevations facing Cedar Boulevard, the main entrance to the neighborhood, and I-880. The proposed landscaping and open space areas complement the buildings and will enhance the overall appearance of the site.

When conducting design review, projects shall be evaluated to ensure that they satisfy the criteria in NMC Section 17.34.060 to the extent that they apply. Based on staff’s analysis, the required findings can be made in the affirmative and are provided in Attachment 2, Exhibit A of this report.

Minor Use Permit for Building Height and Sound Wall Height

The Applicant requests approval of a Minor Use Permit (MUP) to allow a maximum building height of 37 feet. Pursuant to NMC Section 17.07.030, the maximum building height within the RM zoning district is 75 feet, but building heights over 35 feet require an MUP. The proposed buildings are over 35 feet in height due to the proposed roof styles, a combination of parapet flat roofs and low-pitched roofs (4:12 to 5:12) with concrete “S” tiles. Pitched tile roofs are common in Spanish and Mediterranean architectural styles and are necessary to achieve the proposed architectural design. The parapet flat roofs are also necessary to screen roof-mounted equipment.

Pursuant to NMC Section 17.17.040, fences, walls, hedges, and related structures are limited to a maximum of six feet when located outside of the front yard or four feet of a street side lot line. A wall height greater than six feet may be approved with an MUP. The Applicant requests approval of an MUP to construct an 18-foot-tall sound wall along the rear property line that will wrap around the side property lines, stepping down from a height of 18 to 10 feet from the rear to the front of the site to comply with General Plan Policy EH-7.4. This policy requires the noise levels in residential areas to be limited to 60 decibels (dB), or to the greatest extent feasible when levels are exceeded due to freeways and other noise-reduction measures. The environmental noise assessment prepared for the Project (see Attachment 2, Exhibit D, Appendix E-2) recommended an 18-foot-tall sound wall along I-880 to reduce exterior noise levels down to 65 dB. The sound wall is proposed as recommended in the assessment.

Based on staff’s analysis, the criteria for approval of an MUP for a proposed wall height over six feet and building height greater than 35 feet can be made in the affirmative and are provided in Attachment 2, Exhibit A of this report.

Vesting Tentative Map

The Applicant has submitted Vesting Tentative Tract Map 8665 which proposes to

merge the 3.72-acre site consisting of two parcels and former City property into one common lot and 76 condominium units (see Attachment 2, Exhibit C). The proposed lot will include easements for emergency vehicle access, public access, public utilities, sanitary sewer, and water lines. An 8-foot-wide right-of-way dedication for Cedar Boulevard is also proposed at the front of the site. Pursuant to California Government Code Section 66474, a legislative body of a city or county shall deny approval of a tentative map if it makes any of the findings in this code section.

The proposed vesting tentative map is consistent with the General Plan in that the property is developed by street and parcel improvements in conformance with applicable goals and policies. The proposed vesting tentative map will meet the density requirement of the RM zoning district and land use designation. As proposed and conditioned, the vesting tentative map also complies with all applicable zoning regulations and is consistent with all applicable General Plan policies. The site is physically suitable for the development type and proposed density of development. Further, the Project was reviewed pursuant to the California Environmental Quality Act, as will be discussed in the next section, and determined that it is eligible for a CEQA exemption and therefore exempt from further environmental review.

Based on staff's analysis and as discussed, the findings provided in Attachment 2, Exhibit A support the approval of Vesting Tentative Tract Map 8665.

Community Meeting

The Applicant held a community meeting on April 17, 2023 at 6:00 pm at Pape Machinery located on the Project site. Notices were sent to property owners within 500 feet of the site inviting them to attend the meeting. The notice also included the Applicant's contact information in the event a property owner could not attend and wanted to set up a separate time to meet and discuss the Project. There was a total of three members of the public at the meeting. During the meeting, the Applicant presented the Project and answered questions about the proposed development. One member of the public was generally supportive of the Project. The other two members of the public reviewed the presentation materials but did not provide any verbal comments. No written comments were received.

Required Noticing

Pursuant to NMC Sections 17.31.060 and 17.35.050, on August 29, 2023, the City published a public hearing notice in The Tri City Voice and mailed a public hearing notice to all property owners within a minimum 500-foot radius of the site. All neighborhood and community organizations that filed a written request for notice of projects in the area where the site is located and all persons and groups who filed a written request for notice regarding the specific application also received a notice.

FISCAL IMPACT

As described in NMC Chapter 3.24, the City has established fees that are imposed upon projects for the purpose of mitigating the impacts that the projects have upon the City's ability to provide public facilities. Based on the Fiscal Year 2023-2024 fee schedule, the Project would be subject to the following impact fees:

- **Park Impact**: $22,414.32/unit
- **Public Safety**: $4,298/unit
- **Community Service/Facilities**: $2,877.89/unit
- **Transportation**: $3,219.93/townhome unit. Since the proposed traffic signal is identified as a priority improvement by the City, the Applicant will receive a Transportation Impact Fee credit for the total cost of the traffic signal improvements not to exceed $500,000 (see Condition of Approval nn.4 in Attachment 1, Exhibit C). If the applicant of the adjacent residential development (Robson Homes) has already provided guarantee(s) or other appropriate improvement security for the proposed traffic signal, the Applicant will not be required to install the traffic signal and therefore will not receive a Transportation Impact Fee credit.
- **Housing Impact**: $24.95/sq. ft. for the first 1,000 sq. ft. and $10.00/sq. ft. above 1,000 sq. ft.
- **Art in Public Places**: $270/unit
- **Community Development Maintenance Fee**: 0.5% of construction value

The Applicant will be responsible for remitting the respective impact fees in effect at the time, prior to the issuance of any building permits for the Project. The collection of the impact fees is also included in the conditions of approval for the Project (see Attachment 2, Exhibit B).

ENVIRONMENTAL/PLANNING COMMISSION REVIEW

California Environmental Quality Act

Staff retained the consultant services of M-Group to determine if the Project is eligible for an exemption under the California Environmental Quality Act (CEQA). The CEQA analysis prepared by M-Group, dated July 2023, in accordance with the CEQA Guidelines evaluates the environmental impacts from the Project, included as Attachment 2, Exhibit D of this report. The CEQA analysis demonstrated that the Project is eligible for the following CEQA exemptions:

- **Consistency with Program EIR** – Pursuant to CEQA Guidelines Section 15168 and California Public Resources Code Section 21083.3, the Final Environmental Impact Report (FEIR) for the 2013 General Plan provides for streamlining and/or tiering provisions. The CEQA analysis demonstrated that the Project will not result in substantial changes or involve new information that would warrant preparation of a subsequent EIR because the level of development proposed is within the development assumptions analyzed in the FEIR. No further environmental review is required.
- **Community Plan Exemption** – Pursuant to CEQA Guidelines Section 15183 and California Public Resources Code Section 21083.3, the Project is eligible for streamlined environmental review. The Project is consistent with the General Plan and will not result in significant environmental impacts that were not previously

identified as significant project-level, cumulative or off-site effects in the FEIR. The Project is exempt from further environmental review because it is consistent with the General Plan.

As discussed in the analysis, the Project is required to comply with applicable mitigation measures identified in the FEIR and conditions of approval (see Attachment 2, Exhibit C) and is subject to uniformly applied development standards. With the implementation of the required mitigation measures and conditions of approval, the Project will not result in a substantial increase in the severity or significant impacts that were previously identified in the FEIR, nor will the Project introduce any new significant impacts that were not previously identified. Therefore, there will be no additional environmental impacts beyond those analyzed in the FEIR.

Planning Commission

The Planning Commission considered the Project at a regular public hearing held on July 25, 2023. Two members of the public were in attendance. Staff and the Applicant presented and answered questions from the Planning Commission and the member of the public who provided comments.

The comments from the member of the public included questions about the property, rezoning history of properties along this section of Cedar Boulevard to RM Residential Medium Density, Newark's housing requirements, traffic, and maintenance of the proposed sound wall along I-880. Comments also included concerns regarding the amount of new development in Newark and its impact on traffic and pedestrian safety. The Planning Commission and staff provided information on the rezoning history of Cedar Boulevard, the Regional Housing Needs Allocation (RHNA) and the Housing Element process, the traffic and signal warrant studies prepared for the Project, and the Applicant’s responsibility to maintain the proposed sound wall and contact Caltrans regarding their requirements. The Applicant also provided details on when they started pursuing the purchase of the Project site to when they submitted the entitlement application to the City.

After consideration of staff and the Applicant’s presentations, public comments, and discussions, the Planning Commission voted 5-0 to recommend City Council approval of the Project.

RESOLUTION NO. ____

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF NEWARK FINDING THE PROJECT EXEMPT FROM FURTHER ENVIRONMENTAL REVIEW PURSUANT TO CEQA AND APPROVING DR2022-011 AND MUP2022-026, A DESIGN REVIEW, MINOR USE PERMIT, AND VESTING TENTATIVE MAP FOR A 76-UNIT RESIDENTIAL DEVELOPMENT LOCATED AT 38600 CEDAR BOULEVARD (APNS 92A-2585-12-1, 92A-2585-31)

WHEREAS, Waymark Development LLC (the "Applicant"), has filed with the City of Newark an application for a Design Review, Minor Use Permit, and Vesting Tentative Map to construct a 76-unit townhouse development on a 3.72-acre site located at 38600 Cedar Boulevard (APNs 92A-2585-12-1, 92A-2585-31) (the "Property") (the "Project" as illustrated in **Exhibit C**); and

WHEREAS, the Applicant proposes to demolish the commercial buildings and site improvements; and

WHEREAS, the Property includes portions of excess City right-of-way and a street remnant of Timber Street (formerly Cedar Road) (the "City Property") located between the two parcels and Interstate 880 ("I-880"), totaling approximately 12,054 square feet. On February 23, 2023, the City Council authorized the City Manager to execute a Purchase Sale Agreement (the "PSA") with the property owner to complete the sale and conveyance of the City property, at fair market value, to be incorporated into the Project. The PSA requires that the purchase of the City property be completed within 120 days after the City Council's approval of the Project, or such earlier date as mutually agreed upon by the City and property owner; and

WHEREAS, the Applicant seeks Design Review approval, which pursuant to Newark Municipal Code ("NMC") Section 17.34.020 is required for all projects that require a permit for new construction, reconstruction, rehabilitation, alteration, or other improvements to the exterior of a structure, site, or a parking area; and

WHEREAS, the Applicant seeks a Minor Use Permit ("MUP") for a proposed sound wall of up to 18 feet tall along the rear property line that will wrap around the side property lines, stepping down from a height of 18 to 10 feet from the rear to the front of the property, which pursuant to NMC Section 17.17.040, requires an MUP to allow a wall height greater than six feet; and

WHEREAS, the Applicant seeks an MUP for a proposed building height of 37 feet, which pursuant to NMC Section 17.07.030, requires an MUP for building heights over 35 feet in the Residential Medium Density zoning district; and

WHEREAS, the Applicant seeks approval of Vesting Tentative Tract Map 8665 pursuant to California Government Code Section 66474 to allow for the construction of the Project. Vesting

Tentative Tract Map 8665 includes the merger of the two existing parcels and City property (approximately 12,054 square feet) into one 3.72-acre common lot and 75 condominium units. Vesting Tentative Tract Map 8665 includes easements for emergency vehicle access, public access, public utilities, sanitary sewer, and water lines and an 8-foot-wide right-of-way dedication for Cedar Boulevard at the front of the Project site; and

WHEREAS, a CEQA analysis was prepared as set forth in **Exhibit D** to evaluate the environmental impacts of the Project in accordance with the California Environmental Quality Act (the "CEQA") Guidelines. With implementation of the applicable mitigation measures identified in the Final Environmental Impact Report (the "FEIR") for the 2013 General Plan and conditions of approval as set forth in **Exhibit B**, the CEQA analysis determined and demonstrated that the Project is exempt from further environmental review pursuant to CEQA Guidelines Sections 15168 and 15183 and California Public Resources Code Section 21083.3 because the level of development proposed is within the development assumptions analyzed in the FEIR and the Project is consistent with the General Plan; and

WHEREAS, the Planning Commission held a duly noticed public hearing on July 25, 2023, and after fully considering the Project, entitlements, staff report, findings of fact, conditions of approval, public comments, and all other testimony and evidence presented at the public hearing, recommended City Council approval of the Project; and

WHEREAS, pursuant to NMC Sections 17.31.060 and 17.35.050, a public hearing notice was published in The Tri-City Voice on August 29, 2023 and mailed as required for a public hearing before the City Council at, or after, 7:00 p.m. on September 14, 2023; and

WHEREAS, the City Council held a duly noticed public hearing on September 14, 2023, and after fully considering the Project, entitlements, staff report, findings of fact, conditions of approval, public comments, and all other testimony and evidence presented at the public hearing; and

WHEREAS, the City Council finds that the staff report, exemptions from CEQA, and standards for approval reflect the City's independent judgement and analysis of the Project; and

WHEREAS, the City Council finds that the Project conforms with the City's General Plan and Zoning Code for which are incorporated herein by reference and are available for review at City Hall during normal business hours and on the City's website; and

WHEREAS, the City Council finds that the Project satisfies the requisite findings of fact necessary for approval as further explained in the staff report and the findings of fact associated with this Resolution, as identified in **Exhibit A**.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Newark as follows:

Section 1. That the forgoing recitals are true and correct and made part of this Resolution.

Section 2. That the Project is exempt from further environmental review pursuant to CEQA Guidelines Sections 15168 and 15183 and California Public Resources Code Section 21083.3

because the level of development proposed is within the development assumptions analyzed in the FEIR and the Project is consistent with the General Plan.

Section 2. That the City Council hereby makes the necessary findings and determinations required by the NMC to approve a Design Review, Minor Use Permit, and Vesting Tentative Map for the Project, as further explained in the staff report and findings of fact for approval as set forth in **Exhibit A** attached hereto and incorporated herein by this reference.

Section 3. Based on the findings and determinations, the City Council hereby approves DR2022-011 and MUP2022-026 for a Design Review, Minor Use Permit, and Vesting Tentative Map for a 76-unit townhouse development on a 3.72-acre site located at 38600 Cedar Boulevard (APNs 92A-2585-12-1, 92A-2585-31), subject to the Conditions of Approval, as further set forth in **Exhibit B** attached hereto and incorporated herein by this reference.

This Resolution was introduced at the City of Newark City Council's September 14, 2023 regular meeting by Council Member _____, seconded by Council Member _____, and passed as follows:

Alameda County Assessor's Parcel Numbers APNs 92A-2585-12-1, 92A-2585-31

Design Review (NMC Section 17.34.060)

When conducting design review, the project shall be evaluated to ensure it satisfies the criteria below to the extent applicable.

A. *The overall design of the project including its scale, massing, site plan, exterior design, and landscaping will enhance the appearance and features of the project site and surrounding natural and built environment.*

The proposed architectural design is a blend of Spanish and Mediterranean styles, creating a cohesive design that is both functional and complementary to the surrounding neighborhoods. The proposed building designs are well articulated and feature a variety of colors, materials, and decorative elements to create interesting facades that will enhance the neighborhood and streetscape. The front entrances to the residences along the Project frontage are also oriented toward Cedar Boulevard. Further, "enhanced" elevations with varying materials, colors, and decorative elements are proposed on the elevations facing Cedar Boulevard, the main entrance to the neighborhood, and I-880.

The proposed landscaping and open space areas complement the buildings and enhance the Project site and the surrounding natural and built environment. The common open space areas include various amenities such as flexible green space, a dog play area, courtyards with seating, and boardwalks over bioretention areas. The landscaping for the Project features a diverse palette of trees, shrubs, and ground cover. Planting pockets with accent plantings are proposed along the sidewalks and walkways within the site. Turf cell paving and decorative removable bollards are proposed at the emergency vehicle access (EVA) at the southeast corner of the site adjacent to Cedar Boulevard. The streetscape along Cedar Boulevard includes street trees and a meandering sidewalk that will connect to the sidewalk that will be installed as part of the residential development proposed by Robson Homes recently entitled northwest of the Project site. The Project has also been conditioned to include enhanced landscaping along the Project frontage that will require review and approval by the Community Development Director prior to the submittal of the improvement plans.

This finding can be made in the affirmative.

B. *The project design is appropriate to the function of the project and will provide an attractive and comfortable environment for occupants, visitors, and the general community.*

The proposed homes are three stories with habitable floor areas ranging from 1,334 to

1,823 square feet (sq. ft.). The proposed floor plans and elevations provide a variety of massing, wall breaks, colors, and materials. A large open space area is proposed at the rear of the Project site and includes various recreational amenities such as a flexible green space and a dog play area. Smaller pockets of open space areas are also proposed throughout the site and include various amenities such as a play area, flexible green space and courtyards with seating, and boardwalks over bioretention areas. All open space areas will be available for the enjoyment of the future residents and guests.

The Project also includes sidewalks and interconnected walkways as well as "enhanced" walkways for road crossings to facilitate internal pedestrian circulation and connections to open space areas and streets. Further, the proposed streetscape along Cedar Boulevard will enhance Cedar Boulevard with new street trees and a meandering sidewalk that would connect to the sidewalk that will be installed as part of the residential development recently entitled northwest of the Project site. The landscaping proposed along the Project frontage will also require review and approval by the Community Development Director prior to the submittal of the improvement plans to ensure the installed enhances the streetscape and improves the overall site and neighborhood. This finding can be made in the affirmative.

C. Project details, materials, signage and landscaping, are internally consistent, fully integrated with one another, and used in a manner that is visually consistent with the proposed architectural design.

The proposed buildings include attractive and high-quality colors and materials such as stucco, brick and an earth-toned color palette. The proposed landscaping includes a diverse palette of trees, shrubs, and ground cover that complement the building and site design and are fully integrated with the overall design of the Project. This finding can be made in the affirmative.

D. The design of streetscapes, including street trees, lighting, and pedestrian furniture, is consistent with the intended character of the area.

The zoning for this site and properties north of Cedar Boulevard were rezoned to Residential Medium Density in the mid-2010's to facilitate the conversion of the uses on these properties to residential. Since the zoning amendment was adopted, medium-density residential development has been approved and constructed northwest of the Project site along Cedar Boulevard such as a residential development known as Cedar Townhomes on Cedar Boulevard and Robertson Avenue. A residential development proposed by Robson Homes was also recently approved by the City Council in May 2023. Further, an existing single-family residential neighborhood is located across the Project site on the other side of Cedar Boulevard. With the exception of a few properties with existing commercial, school, and church uses, the Project site is generally surrounded by residential uses.

The proposed streetscape design is consistent with the intended character of the area. As mentioned previously, the proposed streetscape along Cedar Boulevard includes street trees and a meandering sidewalk that will connect to the residential development recently entitled northwest of the Project site. The Project also includes offsite improvements that will enhance and be compatible with the character of the area such as the widening of Cedar

Boulevard on the northeast side along the Project site frontage to accommodate travel lanes, a bike lane and bike buffer, and a parkway strip, traffic signal and crosswalk improvements at the Cedar Boulevard and Smith Avenue intersection, and traffic median improvements in front of the Project site on Cedar Boulevard. These streetscape improvements will adhere to the City's streetscape standards. This finding can be made in the affirmative.

E. Parking areas are designed and developed to buffer surrounding land uses; compliment pedestrian-oriented development; enhance the environmental quality of the site, including minimizing stormwater run-off and the heat-island effect; and achieve a safe, efficient, and harmonious development.

The City's off-street parking requirement is satisfied by the provision of 152 residential parking spaces (a two-car garage for each unit) and 38 guest parking spaces throughout the site including head-in and parallel parking spaces on the private roads and within the parking areas onsite. The parking spaces will be accessed via a driveway on Cedar Boulevard and the private streets and alleys throughout the Project site. Pedestrian circulation is achieved via sidewalks and interconnected pathways throughout the Project site. "Enhanced" walkways are proposed for walkways crossing roads and parking areas for the safety of pedestrians.

Landscaping along the site perimeter and throughout the site and planting pockets along the sidewalks and walkways within the site will screen the parking areas from Cedar Boulevard and help reduce the heat island effect and stormwater run-off. Low stucco walls with brick caps are also proposed at various locations along the Project frontage to screen the alleys from Cedar Boulevard. Further, bioretention areas will also be installed within open space areas and along the Project frontage to minimize stormwater run-off.

This finding can be made in the affirmative.

F. Lighting and lighting fixtures are designed to complement buildings, be of appropriate scale, provide adequate light over walkways and parking areas to create a sense of pedestrian safety, and avoid creating glare.

The Project includes exterior wall-mounted lighting on the ground level of the proposed residences, pole-mounted lighting along Cedar Boulevard and throughout the site, and bollard lighting along the walkways. To ensure pedestrian safety, the proposed lighting will provide adequate light at building entrances, garages, walkways, and parking areas. The Project is conditioned to require all exterior lighting to not create glare off-site and comply with all applicable regulations in NMC Section 17.17.060. This finding can be made in the affirmative.

G. Landscaping is designed to be compatible with and enhance the architectural character and features of the buildings on site, and help relate the building to the surrounding landscape.

The Project includes landscaping around the site boundaries, open space areas, parking areas, and along the sidewalks and walkways throughout the site. The proposed landscaping will enhance the pedestrian experience as they travel throughout the site as well as

pedestrians walking on the sidewalks along the Project frontage. The diverse landscaping palette is compatible with the proposed architectural design, allowing them to relate to the surrounding landscape. The Project is required to conform to all state and local landscaping regulations and water conservation standards. This finding can be made in the affirmative.

Minor Use Permit for Building Height (NMC Section 17.35.060)

The decision-maker must make all of the following findings in order to approve or conditionally approve a use permit application:

A. The proposed use is allowed within the applicable zoning district and complies with all other applicable provisions of this title and all other titles of the Municipal Code.

The proposed townhouse development with a proposed density of 20 units per net acre is allowed pursuant to NMC Section 17.07.020. As proposed and conditioned, the Project complies with all applicable zoning regulations such as building height, parking, and open space. This finding can be made in the affirmative.

B. The proposed use is consistent with the general plan and any applicable specific plan.

The Project has a Medium Density Residential General Plan designation which is intended for garden apartments and condominiums, townhomes, row houses, four- to eight-plexes, and older areas that contain a mix of multi-family and single-family homes within this range. These areas tend to be multi-family in character but retain some of the characteristics of suburban neighborhoods. Densities in areas within this designation range from 14 to 30 units per net acre. The Applicant is proposing a townhouse development with a density of 20 units per net acre, which is consistent with the General Plan designation.

The Project is consistent with many of Newark's General Plan goals, policies, and actions including, but not limited to:

- **Policy LU-1.10 Vacant and Underutilized Sites** – Encourage the development of Newark's remaining vacant and underutilized sites for their highest and best use, consistent with the designations shown on the General Plan Diagram. Future growth in the city should generally be directed to the areas identified in this General Plan. The Project proposes the envisioned land use and density for the Medium Density Residential General Plan land use designation, the land use designation for this property.

- **Policy LU-2.2 Context-Sensitive Design** – Require that new structures, additions, and major renovations are aesthetically compatible with existing structures and the surrounding context, and contribute positively to the visual quality of neighborhoods. The Project is designed to be both functional and complementary to the surrounding neighborhoods to ensure aesthetic compatibility with existing structures and the surrounding area.

- **Policy LU-4.12 Fences and Gates** – Ensure that fences, gates, railings, walls, and other site elements intended to provide safety, security, and privacy are designed to be

compatible with each other, with adjacent structures, and with the neighborhood context. Fence, wall, or hedge designs which obscure lines of sight for motorists, or create potential conflicts between pedestrians and cars, should be avoided. The proposed fences, walls, and other site elements are designed to complement the building and site design and blend harmoniously with the neighborhood context.

- **Policy T-2.2 Pedestrian Facilities** – Work to close gaps in the pedestrian network and improve sidewalk connectivity between residential and commercial areas. Develop curbs, gutters, sidewalks on all remaining Newark streets not yet fully improved to encourage safe, convenient pedestrian travel. The proposed vesting tentative map includes an eight-foot-wide public-right-of-way dedication for street and utility improvements and streetscape enhancements. The Project also includes a meandering sidewalk along the Project frontage that would connect to the sidewalk that will be installed as part of the residential development recently entitled northwest of the Project site.

- **Action T-5.A Traffic Study Requirements** – Require traffic studies for major new developments to determine projected impacts on the transportation system, and the measures required to maintain adopted levels of service (LOS). The Traffic Impact Assessment prepared for the Project (see appendices in **Exhibit D**) concluded that traffic generated by the Project will not cause an increase in vehicle miles traveled that will exceed applicable thresholds and will have less than adverse impacts on al the intersections studied. A traffic signal warrant assessment (see appendices in **Exhibit D**) was also prepared and concluded a traffic signal should be installed at the intersection of Cedar Boulevard and Smith Avenue. The Applicant has discussed these improvements with the City and included them as part of the Project.

- **Action EH-4.J Phase I Assessments** – Require a Phase I Environmental Site Assessment (ESA) when a property is changed from an existing use to a more sensitive use (for example, industrial to residential). If potential hazardous materials issues are identified, ensure they are investigated and that sites are cleaned to regulatory agency standards prior to development. A Phase I ESA was prepared for the Project (see the appendices in **Exhibit D**) was used for the environmental analysis (see **Exhibit D**) for the Project. As conditioned, the Project will be cleaned to regulatory agency standards as required by the applicable regulatory agencies.

- **Policy EH-7.4 Residential Noise Standard** – Exterior – Plan for and implement strategies to maintain exterior noise levels that are consistent with the noise compatibility guidelines in Table EH-2. For residential areas, this limit is 60 dBA Ldn for outdoor living areas. Where this level is exceeded due to freeways, arterials, and/or railroads, the construction of berms, walls, buffer zones, and other noise-reduction measures to reduce noise to the greatest extent feasible will be required. The proposed 18-foot-tall sound wall along the rear property line that will wrap around the side property lines will reduce exterior noise levels up to 65 dB, which is the extent feasible due to the adjacent freeway.

- **2015 Housing Element Update Housing Priority #2** – Assist in the development of

housing opportunities and accessibility for all economic levels in the City. The Project will create 76 market-rate residential units. The Applicant will also pay the Affordable Housing Impact Fee for the Project at building permit issuance which will go into the Housing Impact Fee that will be used to fund the City's affordable housing initiatives and programs.

Based on this analysis, this finding can be made in the affirmative.

C. The proposed use will not be adverse to the public health, safety, or general welfare of the community, nor detrimental to surrounding properties or improvements.

The Project includes demolition of the existing buildings and site improvements onsite and construction of 76 townhouses within 14 buildings and associated improvements. The Project has been designed to be both functional and complementary to the surrounding neighborhoods and includes a diverse landscape palette that complements the building and site design. The Project will be accessed via a two-way driveway at the Cedar Boulevard and Moores Avenue intersection and an Emergency Vehicle Access Point (EVA) proposed at the southeast corner of the site adjacent to Cedar Boulevard. Clearly marked walkways and vehicular driveways and aisles are also proposed throughout the site to ensure pedestrians and vehicles can travel throughout the site in a safe and efficient manner. The construction of the buildings and site improvements will require compliance with all applicable local and state regulations such as the California Building Code and Fire Code.

The Applicant requests approval of a Minor Use Permit (MUP) to allow a maximum building height of 37 feet. Pursuant to NMC Section 17.07.030, the maximum building height within the RM zoning district is 75 feet, but building heights over 35 feet require an MUP. The proposed buildings are over 35 feet in height due to the proposed roof styles, a combination of parapet flat roofs and low-pitched roofs (4:12 to 5:12) with concrete "S" tiles. Pitched tile roofs are common in Spanish and Mediterranean architectural styles and are necessary to achieve the proposed architectural design. The parapet flat roofs are also necessary to screen roof-mounted equipment.

The Project provides a new housing opportunity in Newark and enhances the site's overall appearance and the surrounding neighborhood. The Applicant is also required to pay development impact fees such as the Housing Impact Fee and Community Service/Facilities fees to help pay for the costs of providing public services to the new development and specifically for the Housing Impact Fee, help fund the City's affordable housing initiatives and programs.

Therefore, the use will not be adverse to the public health, safety, or general welfare of the community nor detrimental to surrounding properties or improvements. This finding can be made in the affirmative.

D. Tax revenue generated by the development will exceed the city's cost of the service demand as a result of the development or a compelling community benefit will be provided.

The Project will redevelop a commercial site with a residential use which will increase the City's property tax base by increasing the property's value. This finding can be made in the affirmative.

E. The proposed use complies with any design or development standards applicable to the zoning district or the use in question unless waived or modified pursuant to the provisions of this title.

As discussed previously and illustrated in the Project plans (see **Exhibit C**), the Project complies with all applicable design and development standards in the Zoning Code. This finding can be made in the affirmative.

F. The design, location, size, and operating characteristics of the proposed activity are compatible with the existing and reasonably foreseeable future land uses in the vicinity.

The Project site is in the RM Residential Medium Density zoning district which allows multi-unit development such as townhouses. The proposed density of 20 units per net acre also complies with the required density of 14 to 30 units per net acre in this zoning district. The site is surrounded by commercial, industrial, and residential uses. Several residential uses are located within the Project vicinity such as the single-family residential neighborhood located on the southwest side of Cedar Boulevard, a residential development recently entitled with a similar housing type (three-story, alley-loaded single-family residences and two-unit townhouses) that will be located northwest of the ACFCWCD flood control channel, and existing residential uses with similar housing types along Cedar Boulevard to the northwest and southeast known as Cedar Townhomes and the Prima Subdivision, respectively. Therefore, the design, location, size, and operating characteristics of the proposed Project are compatible with the existing and foreseeable future land uses in the vicinity. This finding can be made in the affirmative.

G. The site is physically suitable for the type, density, and intensity of use being proposed, including access, utilities, and the absence of physical constraints.

The Project site complies with all applicable standards for development within the RM Residential Medium Density zoning district. A multi-unit development is permitted by right. Staff reviewed the Project including the use change from commercial to residential and the project components such as site design, access and circulation, and utilities. Staff also reviewed the proposed entitlement requests. Based on staff's analysis as detailed in the staff report and this exhibit, the site is physically suitable for the type, density, and intensity of use being proposed. This finding can be made in the affirmative.

Minor Use Permit for Additional Wall Height (NMC Sections 17.17.040 and 17.35.060)

Fences, walls, hedges, and related structures are limited to a maximum of six feet when located outside of the front yard or four feet of a street side lot line. Pursuant to NMC Section 17.17.040, a wall height greater than six feet may be approved with a Minor Use Permit if in compliance with the following:

A. The additional fence height will not impair the provision of adequate light, air, circulation, and visual openness around adjacent residential structures.

The Project includes an 18-foot-tall precast concrete sound wall along the rear property line that wraps around the side property lines, stepping down from a height of 18 to 10 feet from the rear to the front of the Project site. The proposed sound wall is required to comply with General Plan Policy EH-7.4 which requires the noise levels in residential areas to be limited to 60 decibels (dB), or to the greatest extent feasible when levels are exceeded due to freeways and other noise-reduction measures. The environmental noise assessment prepared for the Project (see **Exhibit D**) recommended an 18-foot-tall sound wall along I-880 to reduce exterior noise levels up to 65 dB. The sound wall is proposed as recommended in the assessment. While the additional height may block natural light, the proposed wall will reduce noise from and screen the adjacent highway (I-880), which will benefit future residents. Based on this analysis, this finding can be made in the affirmative.

B. The additional fence height will not detract from the overall appearance of the neighborhood.

The 18-foot-tall section of the sound wall is proposed at the rear of the property and will abut I-880 and match the existing walls along the I-880 corridor. The height of the proposed sound wall steps down along the side property lines from the rear to the front of the Project site to a height typical for side yards on residential properties. The proposed streetscape along Cedar Boulevard includes new street trees and a meandering sidewalk. The additional height for the proposed sound wall will not detract from the overall appearance of the neighborhood. This finding can be made in the affirmative.

C. The additional fence height is not detrimental to the health, safety, and welfare of people living in the neighborhood.

The additional height for the proposed wall will be a sound barrier for the residents living in the neighborhood, reducing exterior noise levels to the extent feasible. The additional height will not be detrimental to the health, safety, and welfare of people living in the neighborhood. This finding can be made in the affirmative.

Pursuant to NMC Section 17.35.060, the decision-maker must make all of the following findings in order to approve or conditionally approve a use permit application:

A. The proposed use is allowed within the applicable zoning district and complies with all other applicable provisions of this title and all other titles of the Municipal Code.

The proposed density of 20 units per net acre is permitted pursuant to NMC Section 17.07.020. As proposed and conditioned, the Project complies with all applicable zoning regulations. This finding can be made in the affirmative.

B. The proposed use is consistent with the general plan and any applicable specific plan.

The Project has a Medium Density Residential General Plan designation and densities in areas within this designation range from 14 to 30 units per net acre. The Applicant is proposing a townhouse development a density of 20 units per net acre and therefore is consistent with the General Plan designation. As discussed previously, the Project is consistent with all applicable General Plan goals, policies, and actions.

C. The proposed use will not be adverse to the public health, safety, or general welfare of the community, nor detrimental to surrounding properties or improvements.

As discussed previously, the Project has been designed to be both functional and complementary to the surrounding neighborhoods, includes a diverse landscape palette that complements the building and site design, and will require compliance with all applicable local and state regulations such as the California Building Code and Fire Code. The Project will be accessed via a two-way driveway at the Cedar Boulevard and Moores Avenue intersection and an EVA proposed at the southeast corner of the site adjacent to Cedar Boulevard. Clearly marked walkways and vehicular driveways and aisles are also proposed throughout the site to ensure pedestrians and vehicles can travel throughout the site in a safe and efficient manner.

The Applicant requests approval of an MUP to construct an 18-foot-tall precast concrete sound wall along the rear property line that wraps around the side property lines, stepping down from a height of 18 to 10 feet from the rear to the front of the Project site. As discussed previously, the proposed sound wall is required to comply with General Plan Policy EH-7.4 and will reduce exterior noise levels up to 65 dB.

The Project will provide housing opportunities in Newark and enhance the overall appearance of the site and surrounding neighborhood. The Applicant is also required to pay development impact fees to help pay for the costs of providing public services to the new development.

Therefore, the use will not be adverse to the public health, safety, or general welfare of the community nor detrimental to surrounding properties or improvements. This finding can be made in the affirmative.

D. Tax revenue generated by the development will exceed the city's cost of the service demand as a result of the development or a compelling community benefit will be provided.

As discussed previously, the Project will redevelop a commercial site with a residential use. This change in use will increase the City’s property tax base by increasing the value of the property. This finding can be made in the affirmative.

E. The proposed use complies with any design or development standards applicable to the zoning district or the use in question unless waived or modified pursuant to the provisions of this title.

As discussed previously and illustrated in the Project plans (see **Exhibit C**), the Project complies with all applicable design and development standards in the Zoning Code. This finding can be made in the affirmative.

F. The design, location, size, and operating characteristics of the proposed activity are compatible with the existing and reasonably foreseeable future land uses in the vicinity.

The Project, multi-unit development with a density of 20 units per net acre, is permitted in the RM Residential Medium Density zoning district, the zoning district for the Project site. which allows multi-unit development such as townhouses. As discussed previously, several residential uses are located within the Project vicinity. A residential development recently entitled with a similar housing type will also be constructed northwest of the ACFCWCD flood control channel. Therefore, the design, location, size, and operating characteristics of the proposed Project are compatible with the existing and foreseeable future land uses in the vicinity. This finding can be made in the affirmative.

G. The site is physically suitable for the type, density, and intensity of use being proposed, including access, utilities, and the absence of physical constraints.

As discussed previously, the Project site complies with all applicable zoning standards and the proposed use, a multi-unit development, is permitted by right. Based on staff's analysis of the Project as detailed in the staff report and this exhibit, the site is physically suitable for the type, density, and intensity of use being proposed. This finding can be made in the affirmative.

Vesting Tentative Map (California Government Code Section 66474)

A legislative body of a city or county shall deny approval of a tentative map if it makes any of the following findings:

A. That the proposed map is not consistent with applicable general and specific plans as specified in Government Code Section 65451.

The General Plan includes numerous goals and policies pertaining to land use and design, growth management, circulation, community facilities and utilities, open space and conservation, health, safety, and noise. The proposed vesting tentative map is required to abide by all applicable goals and policies included in the adopted General Plan. Generally, the proposed vesting tentative map is consistent with the General Plan in that the property is developed by street and parcel improvements in conformance with applicable goals and policies. The Project is consistent with many of Newark's General Plan goals, policies, and actions as discussed in the Minor Use Permit section above. This finding can be made in the negative.

B. That the design or improvement of the proposed subdivision is not consistent with applicable general and specific plans.

The Project meets the density requirement of 14 to 30 units per net acre specified for the RM Residential Medium Density zoning district and the Medium Density Residential General Plan land use designation. The Project will be constructed per the approved plans and satisfy the conditions of approval included in this resolution (provided in **Exhibit B**). Further, the Project includes an eight-foot-wide street dedication which will contribute towards public improvements and help improve pedestrian connectivity on Cedar Boulevard. Therefore, the proposed vesting tentative map is consistent with the General Plan. This finding can be made in the negative.

C. That the site is not physically suitable for the type of development.

The Project site is a rectangular-shaped site consisting of two parcels. The site also includes portions of excess City right-of-way and a street remnant of Timber Street (formerly Cedar Road) located between the two parcels and Interstate 880 (I-880) that will be purchased by the property owner to be included with the Project site within 120 days of Project approval, or such earlier date as mutually agreed upon by the City and property owner. The site is bounded by a ACFCWCD flood control channel to the northwest, I-880 to the northeast, a motel (EZ 8 Motel) to the southeast, and Cedar Boulevard to the southwest. The site is surrounded by commercial, industrial, and residential uses. A residential development proposed by Robson Homes northwest of the flood control channel was recently approved by the City Council in May 2023. The site is generally flat and currently contains several commercial buildings and paved areas for circulation and parking. The site is surrounded by commercial, industrial, and residential uses. Based on the technical studies prepared for the Project (see the appendices attached to **Exhibit D**), the site is physically suitable for the proposed residential development and with the implementation of the conditions of approval in **Exhibit B**. This finding can be made in the negative.

D. That the site is not physically suitable for the proposed density of development.

The Project will meet the density requirement of 14 to 30 units per net acre specified for the RM Residential Medium Density zoning district and the Medium Density Residential General Plan land use designation. Therefore, this finding can be made in the negative.

E. That the design of the subdivision or the proposed improvements are likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat.

Staff retained the consultant services of M-Group to determine if the Project is eligible for an exemption under the California Environmental Quality Act (CEQA). The CEQA analysis prepared by M-Group dated July 2023 in accordance with CEQA Guidelines evaluates the environmental impacts from the Project (see **Exhibit D**). The analysis demonstrated that the Project is exempt from further environmental review pursuant to CEQA Guidelines Sections 15168 and 15183 and California Public Resources Code Section 21083.3. With the implementation of the required mitigation measures and conditions of approval (see **Exhibit B**), the analysis demonstrated that the Project is consistent with the General Plan and will not result in significant environmental impacts that were not previously identified as significant project-level, cumulative or offsite effects

in the Final Environmental Impact Report (FEIR) for the 2013 General Plan. Therefore, as conditioned, the design of the proposed vesting tentative map and the proposed improvements are not likely to cause substantial environmental damage nor substantially injure fish or wildlife or their habitat. This finding can be made in the negative.

F. That the design of the subdivision or type of improvements is likely to cause serious public health problems.

The Alameda County Fire Department (ACFD), Building Inspection Division, Engineering Division, Planning Division, and Police Department have reviewed the proposed map. Outside agencies that may be affected by the proposed development have also reviewed the proposed map. The applicant has incorporated the recommendations from each department, division, and agency as part of the project design. The Project includes conditions of approval (see **Exhibit B**) that must be addressed at various stages of the Project. Therefore, the map is consistent with all applicable provisions of the City's Subdivision Ordinance, the Subdivision Map Act, the California Fire Code, the California Building Code, and the applicable development standards of the Zoning Code. This finding can be made in the negative.

G. That the design of the subdivision or the type of improvements will conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision.

As conditioned, the Project does not conflict with any easements or be in a public right-of-way. The proposed vesting tentative map includes easements for emergency vehicle access, public access, public utilities, sanitary sewer, and water lines. The private streets, courts, parking areas, and common open spaces areas will be maintained through an agreement between future residents, managed by a homeowner's association. Therefore, as conditioned, the design of the proposed map does not conflict with easements, acquired by the public at large, for access through or use of property within the proposed subdivision, in that such easements presently exist and such access will be retained, as currently provided within the Project and to adjacent public streets. This finding can be made in the negative.

EXHIBIT B: CONDITIONS OF APPROVAL

DR2022-011, MUP2022-026
38600 Cedar Boulevard
Alameda County Assessor's Parcel Numbers 92A-2585-12-1, 92A-2585-31

Planning Division

a. All conditions of approval for this project shall be printed on the approved project plans.

b. The owner of the project site, Cedar Blvd Townhomes, LLC, in coordination with the applicant, shall comply with the Purchase and Sale Agreement for the sale of the two City-owned segments located between the project site and Interstate 880. Per the Purchase and Sale Agreement, the Closing Date is 120 days after the City Council's approval of the project, or such earlier date as mutually agreed by both parties.

c. The project shall implement the mitigation measures from the LSA Air Quality and Greenhouse Gas Analysis dated November 7, 2022, or as amended. Prior to the issuance of a building permit, the applicant shall submit documentation showing how the project will implement the mitigation measures to the Community Development Director for review and approval.

d. The project shall implement the recommendations from the Salter Environmental Noise Assessment dated November 11, 2022, or as amended, and Salter Environmental Review of Construction Nosie Memo dated March 10, 2023, or as amended, to meet the City's noise standards. Prior to the issuance of a building permit, the applicant shall submit documentation showing how the project will implement the recommendations to the Community Development Director for review and approval.

e. The applicant is responsible for coordinating any work related to the bus stop at Cedar Boulevard and Moores Avenue (Stop ID# 51102) with AC Transit such as removal and relocation of any bus stop poles.

f. Compact parking spaces shall be labeled "compact" pursuant to NMC §17.23.090.D (Parking Area Design and Development Standards).

g. The applicant shall contact the agencies with rights to the easements on the Project site and confirm what structures and improvements are permitted within the easements prior to submittal of the improvement plans. If any modifications to the project plans are required after consultation with these agencies, the modifications shall be submitted to the Community Development Director for review and approval prior to building permit submittal.

h. The proposed short-term bicycle parking shall comply with all applicable regulations in NMC §17.23.070 (Bicycle Parking).

i. A long-term bicycle parking space shall be included in the garage of each unit and shall not obstruct the required dimensions of the garage parking spaces. Long-term bicycle parking shall comply with all applicable regulations in NMC §17.23.070 (Bicycle Parking).

j. The proposed outdoor recreational amenities such as play structures and equipment shall substantially match the approved project plans. Any proposed modifications shall be submitted to the Community Development Director for review and approval prior to building permit submittal.

k. The landscape plans submitted for building permit review shall substantially match the approved project plans and shall demonstrate compliance with NMC Chapter 17.21 (Landscaping) and §17.23.090 (Parking Area Design and Development Standards). The landscaping along the Cedar Boulevard frontage including landscaping between the buildings and public right-of-way and in the open space areas visible from the public right-of-way shall be enhanced landscaping and shall require review and approval by the Community Development Director prior to submittal of the improvement plans.

l. Trees between the buildings along Cedar Boulevard and the public right-of-way shall be a minimum 24-inch box size.

m. The sound wall proposed along the rear property line adjacent to Interstate 880 (I-880) shall match or complement the existing walls along the I-880 corridor.

n. Mechanical and electrical equipment such as air conditioners (AC) units shall not be placed in the front or street side yard. If equipment is placed in any other location that makes it visible to public view, the equipment shall be properly screened with solid material pursuant to the regulations in NMC §17.17.100 (Screening) and be approved by the Community Development Director.

o. All exterior utility pipes and meters shall be painted to match and/or complement the color of the adjoining building surface, as approved by the Community Development Director.

p. All exterior lighting shall comply with all applicable regulations in NMC §17.17.060 (Lighting and Illumination) and NMC Chapter 17.23 (Parking and Loading). All exterior lighting shall be directed on-site so as not to create glare off-site, as required by the Community Development Director.

q. The site and its improvements shall be maintained in a neat and presentable condition, to the satisfaction of the Community Development Director. This shall include, but not be limited to, repainting surfaces damaged by graffiti and site clean-up. Graffiti removal/repainting and site cleanup shall occur on a continuing, as needed basis. Any vehicle or portable building brought on the site during construction shall remain graffiti free.

r. Parking lot cleaning with sweeping or vacuum equipment shall not be permitted between 7:00 p.m. and 7:00 a.m.

s. The covenants, conditions, and restrictions (CC&Rs) filed for this development shall include the following provisions:

1. There shall be no short-term rentals which is a rental of the unit or room(s) within a unit for a period of 30 consecutive calendar days or less.

2. Garages shall only be used for automobile parking incidental storage, and similar uses and shall not be used as living space. This restriction shall not apply when a garage conversion is proposed to accommodate an accessory dwelling unit (ADU) or junior ADU (JADU) in conformance with State regulations in effect.

3. No refuse, garbage or recycling shall be stored outdoors. Waste and recycling containers shall be stored within the garage but may not obstruct required parking areas.

4. All residents shall have access to and use of the common open space areas. Private improvements within common open space areas are prohibited except as shown on approved project drawings.

5. The homeowner's association shall be responsible for maintenance and repair of all outdoor recreational amenities such as play structures and equipment.

6. The homeowner's association shall be responsible for maintenance of all common open space areas including, but not limited to, the dog area and park areas.

7. The homeowner's association shall be responsible for maintenance of all parking lots, including landscaped areas, driveways, and loading areas. The parking lots shall be free of refuse, debris, or other accumulated matter and shall be kept in good repair at all times.

8. Guest parking spaces shall be clearly marked as reserved for guests and available with unrestricted access.

9. Exterior changes including, but not limited to, paint, landscaping, hardscape, and windows and doors, are prohibited unless expressly approved by the City.

t. Prior to the issuance of a building permit, any changes to the approved color elevations, floor plans, and/or fence and wall details shall be reviewed and approved by the Community Development Director.

u. With the exception of the proposed sound wall, fences and walls within the required front yard of the Project site shall be limited to a maximum of three feet in height pursuant to NMC §17.17.040 (Fences and Freestanding Walls).

v. Prior to the issuance of a building permit, the roof material as submitted by the applicant as part of this application shall be reviewed and approved by the Community Development Director. All roof material shall consist of fire-retardant shake roof, concrete tile, or a roof of similar noncombustible material. Mansard roofs with the above material may be used to

screen tar and gravel roofs. All roofs shall be of Class C fire resistant construction or better. Composition shingles shall be Presidential-style or of comparable quality, subject to the review and approval of the Community Development Director.

w. Prior to the issuance of a building permit, the applicant shall submit a "Will Serve" letter, or equivalent document, demonstrating approval of the project and agreeance to provide garbage, refuse and recycling services from Republic Services to the Community Development Director. Any revisions to the proposed garbage, refuse and recycling service pick up plan shall require review and approval by the Community Development Director. No refuse, garbage or recycling shall be stored outdoors.

x. Prior to the issuance of a Certificate of Occupancy for an individual unit, roll-up garage doors with automatic garage door openers shall be provided for such unit.

y. Prior to the issuance of a Certificate of Occupancy, the parking areas within and applicable to the specific construction phase shall be installed and striped as shown on the approved site plan.

z. Prior to the issuance of grading and site work permit(s), mailbox locations and designs shall be approved by the Community Development Director and Newark Postmaster, in that order. The mailbox compartments of centralized mailboxes shall identify the individual dwelling units with permanent, easily legible lettering.

aa. Prior to final inspection and utility release for each unit, the applicant shall pre-wire each unit for satellite and cable television connections, as required by the Community Development Director. The exterior connections for the pre-wire shall be made to the roof and or on a side elevation of the home, not facing a street, just under the building eave, with the satellite mounting location either on the underside of the soffit or on the fascia board.

bb. All signs shall be submitted for the review and approval of the Community Development Director. All signs shall comply with NMC Chapter 17.25 (Signage Standards).

cc. During project construction, if historic, archeological, or Native American materials or artifacts are identified, work within a 50-foot radius of such find shall cease and the City shall retain the services of a qualified archeologist and/or paleontologist to assess the significance of the find. If such find is determined to be significant by the archeologist and/or paleontologist, a resource protection plan conforming to CEQA §15064.5 shall be prepared by the archeologist and/or paleontologist and approved by the Community Development Director. The plan may include, but would not be limited to, removal of resources or similar actions. Project work may be resumed in compliance with such plan. If human remains are encountered, the County Coroner shall be contacted immediately, and the provisions of State law carried out.

dd. Construction site trailers and buildings located on-site shall be used for office and storage purposes only and shall not be used for living or sleeping quarters. Any vehicle or portable building brought on the site during construction shall remain graffiti free.

ee. Measures to respond to and track complaints pertaining to construction noise shall include: (1) a procedure and phone numbers for notifying the City of Newark Building Inspection Division and Newark Police Department (during regular construction hours and off-hours); and (2) a sign posted on-site pertaining to the permitted construction days and hours and complaint procedures and who to notify in the event of a problem. The sign shall also include a listing of both the City and construction contractor's telephone numbers (during regular construction hours and off-hours).

ff. Prior to the issuance of a building permit, the applicant shall pay all applicable impact fees in the amount in effect at the time. If the applicant is eligible for a Transportation Impact Fee credit pursuant to Condition "nn" as determined by the City Engineer, the Transportation Impact Fee will be adjusted accordingly as determined by the City Engineer.

gg. The approval or conditional approval of the tentative map shall expire 24 months from the date the map was approved or conditionally approved pursuant to NMC §16.08.070 (Tentative Map). The approved or conditionally approved map may be granted additional period(s) of time as permitted by the Subdivision Map Act.

hh. Any permit granted under NMC Title 17 (Zoning) shall automatically expire if it is not exercised or extended within two years of its approval pursuant to NMC §17.31.130 (Expiration and Extension).

Engineering Division

ii. The project shall conform to Vesting Tentative Map – Tract 8665, Sheets 1 through 8, and all conditions of approval set forth herein. Approval of the Vesting Tentative Map shall expire according to the provisions of the State Subdivision Map Act and any amendments thereto and applicable provisions of the Newark Municipal Code consistent with the State Subdivision Map Act.

jj. The final map shall designate and/or dedicate emergency vehicle access ways, private vehicle access ways, open space/recreational easements, public utility easements, and other easement as may be required over the common area. The final easement geometry shall be subject to the approval of the City Engineer.

kk. The development will require approval of a final tract map filed in accordance with the State Subdivision Map Act and the City of Newark Subdivision Ordinance. The final map shall be recorded prior to the issuance of any building permits.

ll. The final map and complete tract improvement plans shall be submitted to the Engineering Division for review to ensure conformance with relevant codes, policies, and other requirements of the Newark Municipal Code and City of Newark street improvement standards. These plans shall be prepared by a qualified person licensed by the State of California to do such work. The plans shall be drawn to an appropriate scale as required by the City Engineer.

mm. Prior to approval of the final map, the applicant shall enter into a Subdivision Improvement Agreement with the City and guarantee all necessary public and private street improvements and other common area improvements within the subdivision and beyond the map boundary in accordance with the tract improvement plans to be approved by the City Engineer.

nn. The applicant shall dedicate right-of-way and install complete street improvements for Cedar Boulevard as shown on the Vesting Tentative Map exhibits and as described below:

Cedar Boulevard

1. The applicant shall dedicate 8 feet of right-of-way and install street improvements including, but not limited to, project driveways, landscape median, public sidewalks, pavement widening, curb and gutter removal and replacement, curb ramps, frontage landscaping, grind and overlay to the median, pavement striping and signage, street lighting, undergrounding existing overhead utilities, fire hydrants, landscape and irrigation facilities, utility connections, removal of existing street trees to facilitate street improvements, and other related improvements. The Cedar Boulevard median, north of Moores Avenue, shall be connected to the landscape median installed by the adjacent development.

2. A modified City standard Type-S driveway cut shall be constructed at the project entrance on Cedar Boulevard.

3. The applicant shall install a traffic signal at the intersection of Cedar Boulevard and Smith Avenue. Traffic Signal plans shall be prepared, reviewed, and approved as part of the tract improvement plans. The applicant shall submit complete traffic signal plans, inclusive of a pole schedule with the first submittal of the improvement plan set. The applicant shall identify long lead items. City will endeavor to prioritize the review and approval of the long lead items. Within 45 days of City approval of the long lead items, the applicant shall order or otherwise contract for the delivery and installation of the items and submit to the City a written confirmation of contract or order invoice. The applicant shall in good faith effort have the traffic signal operational prior to issuance of the first Certificate of Occupancy for any residential unit. For the purposes of clarity, this condition is not intended to restrict the proposed model homes.

   The adjacent residential development to the west of this project is similarly conditioned to provide the traffic signal improvements at Cedar Boulevard and Smith Avenue. If, at the time of final map approval, the other developer has already provided guarantee(s) or other appropriate improvement security for the traffic signal, the project will not be required to install the traffic signal, the project will not be eligible for any traffic impact fee (TIF) reimbursement and the normal traffic impact fees will need to be paid during Building Permit issuance.

   If the traffic signal is not operational prior to issuance of the first Certificate of

Occupancy for any residential unit due to manufacturing or delivery delays of the long lead items for either developer, the applicant and the City Engineer shall discuss an alternative option to implement until the traffic signal is operation. The alternative option is subject to approval by the City Engineer. All costs to fund the alternative option shall be funded by the applicant.

4. The traffic signal at the intersection of Cedar Boulevard and Smith Avenue is identified as a priority improvement by the City and the applicant that installs the traffic signal is entitled to a traffic impact fee credit for the total cost of the traffic signal improvements not to exceed $500,000. The final scope and cost of the traffic signal improvement is subject to review and approval by the City Engineer.

   The traffic signal shall be operational prior to the issuance of the first Certificate of Occupancy for any residential unit. If this project installs the traffic signal, the applicant is eligible for a waiver of Transportation Impact Fees and cash, with a cap of up to $500,000 (final cost of traffic signal cost subject to review and approval by the City Engineer). The cash portion is calculated as total traffic signal approved cost minus the project's Transportation Impact Fees. The applicant will receive the cash portion upon the traffic signal turn-on.

   The traffic impact fee cost for each building permit will be deducted from the approved total credit of up to $500,000 until depleted.

   Since the traffic signal improvement work is considered a "public works" project under Labor Code section 1720 and public funds will be paid, in whole or in part, for the traffic signal improvements, the applicant will be required payment of prevailing wages to workers employed for the construction of the traffic signal improvement work.

5. Existing streetlights along Cedar Boulevard shall be upgraded to LED heads. A photometrics plan showing that at least a 0.12fc coverage is provided with the LED heads.

6. Any decorative pavement features for the Cedar Boulevard driveway shall be placed behind the right-of-way.

7. The applicant shall coordinate with AC Transit regarding whether to relocate the bus stop west of the Moores Avenue intersection on Cedar Boulevard. The location of the bus stop, as approved by AC Transit, shall be shown on the improvement plans prior to final map approval. No approval is required for the bus stop staying in the as-is location with the project. The applicant shall provide to the City correspondence(s) to confirm the discussions with AC Transit relating to this condition.

oo. Prior to final map approval, the applicant shall apply and receive approval for a conditional letter of map revision based on fill (CLOMR- F) from the Federal Emergency Management

Agency (FEMA). The CLOMR-F shall be based upon the project grading plan and shall conclude that the structures for human occupancy will be removed from the special flood hazard area (SFHA). Prior to occupancy of any buildings within the SFHA, the developer shall apply and receive approval of a letter of map revision based on fill (LOMR-F) from FEMA. On July 1, 2023, FEMA temporarily suspended the processing of CLOMR-Fs and LOMR-Fs. If, prior to final map approval, the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the CLOMR-F application to FEMA shall be deferred and applied for as soon as the temporary suspension is lifted. If, prior to occupancy, the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the applicant shall provide complete Elevation Certificates demonstrating that the property for occupancy is outside the Special Flood Hazard Area. Prior to tract acceptance, if the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the applicant shall submit the LOMR-F application package to the City or enter into a deferred agreement with the City for preparing and processing the LOMR-F application package once FEMA lifts the suspension. For either option, the cost of the preparation and fees associated with the FEMA LOMR-F application shall be paid for by the applicant.

pp. Prior to final map approval, existing buildings within the project boundary shall be demolished. Applicant shall apply and receive a building permit and obtain a permit final for the demolition.

qq. The applicant shall install private streets and common area improvements including, but not be limited to driveways, drive aisles, parking facilities, utilities, recreational areas and facilities, storm water treatment facilities, screen walls, fencing, and all landscape areas. All private streets and common area improvements in the development shall be designed and constructed to City standards, are subject to review and approval by the City Engineer and shall be included with the tract improvement plans.

rr. The applicant shall obtain grading and site work permit(s) from Building Inspection Division for the site grading (rough grading and/or fine grading) and private structures including, but not limited to, project privacy sound wall, play structures, mailboxes, trellis bus shelter, and low retaining walls.

ss. Prior to the building permit issuance for the privacy sound wall along I-880, the applicant shall contact the California Department of Transportation (Caltrans) and confirm if an encroachment permit is required for installation of the project privacy wall and any other required improvements within or adjacent to the Interstate-880 right-of-way. Applicant shall either demonstrate to the satisfaction of the Chief Building Official that no encroachment permit is required or obtain such encroachment permit if one is required.

tt. Concurrent with approval of the final map, the applicant shall effectuate the removal of any existing easements encumbering the property that conflict with areas proposed for improvement. Elimination or modification of existing easements on the site requires the approval from the respective utility district or company and the City of Newark. If, with good faith effort exercised by the applicant, the approval from the utility districts or company cannot be obtained prior to final map approval, the elimination or modification

of the respective existing easement can be deferred to prior to the issuance of the building permit(s) affected by the easement, subject to the approval of the City Engineer.

uu. All improvements at the 'A' Street and Cedar Boulevard driveway entrance shall conform to the City's Sight Visibility Ordinance, Newark Municipal Code Chapter 10.36. Prior to Final Map approval, all building architecture and other above-ground improvements shall be located and designed as necessary to comply with this ordinance.

vv. Prior to the issuance of the initial grading or any building permits for this project, the applicant shall submit a Storm Water Pollution Prevention Plan for the review and approval of the City Engineer. The plan shall include sufficient details to show how storm water quality will be protected during both: (1) the construction phase of the project and (2) the post construction, operational phase of the project. The construction phase plan shall include Best Management Practices from the California Storm Water Quality Best Management Practices Handbook for Construction Activities. The specific storm water pollution prevention measures to be maintained by the contractor shall be printed on the plans. The operational phase plan shall include Best Management Practices appropriate to the uses conducted on the site to effectively prohibit the entry of pollutants into storm water runoff from this site including, but not limited to, trash and litter control, pavement sweeping, periodic storm water inlet cleaning, landscape controls for fertilizer and pesticide applications, labeling of storm water inlets with a permanent thermoplastic stencil with the wording "No Dumping - Drains to Bay," and other applicable practices.

ww. The provided Preliminary Stormwater Treatment Plan is approved in concept only. Final approval is subject to the applicant providing the necessary plans, details, and calculations that demonstrate the plan complies with the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2022-0018, revised July 1, 2022, issued to the City of Newark by the Regional Water Quality Control Board, San Francisco Bay Region.

xx. The property owner shall enter into a Stormwater Treatment Measures Maintenance Agreement, which will be recorded against the property. The applicant's project engineer shall provide all required exhibits associated with the agreement.

yy. The applicant shall submit detailed grading and drainage plans for review and approval by the City Engineer and the Alameda County Flood Control and Water Conservation District. These plans must be based upon a City benchmark and need to include pad and finish floor elevations of each proposed structure, proposed on-site property grades, proposed elevations at property line, and sufficient elevations on all adjacent properties to show existing drainage patterns. All on-site pavement shall drain at a minimum of one percent. The applicant shall ensure that all upstream drainage is not blocked and that no ponding is created by this development. Any construction necessary to ensure this shall be the applicant's responsibility.

Hydrology and hydraulic calculations shall be submitted for review and approval by the City Engineer and the Alameda County Flood Control District prior to approval of the final map. The calculations shall show that the City and County freeboard requirements will be

satisfied.

zz. All stormwater treatment measures are subject to review and approval by the Alameda County Mosquito Abatement District. The applicant shall modify the grading and drainage and stormwater treatment design as necessary to satisfy any imposed requirements from the District.

aaa. The entire site shall be equipped with full trash capture devices approved by the Regional Water Quality Control Board – San Francisco Bay Region and the Mosquito Abatement District, for 100% trash capture at all on-site and adjoining off-site storm drain inlets. All on-site trash capture devices shall be permanently maintained by the HOA. Acceptable off-site trash capture devices can be found on the City's website at https://www.newark.org/departments/public-works/engineering-division/stormwater-program.

bbb. The applicant shall ensure that a water vehicle for dust control operations and a pick-up or vacuum type street sweeper to remove tracked dirt and debris from adjacent streets is kept readily available at all times during construction at the City Engineer's direction.

ccc. The applicant shall implement the following measures for the duration of all construction activity to minimize air quality impacts:

1. Watering should be used to control dust generation during demolition of structures and break-up of pavement.

2. All trucks hauling demolition debris from the site shall be covered.

3. Dust-proof chutes shall be used to load debris into trucks whenever feasible. Watering should be used to control dust generation during transport and handling of recycled materials.

4. All active, unpaved construction areas shall be watered at least twice daily and more often during windy periods; active areas adjacent to the existing land uses shall be kept damp at all times or shall be treated with non-toxic stabilizers or dust palliatives.

5. All trucks hauling soil, sand, and other loose materials shall be covered or require all trucks to maintain at least 2 feet of freeboard.

6. All unpaved access roads, parking areas, and staging areas at construction sites shall be paved, watered two times daily, or treated with (non-toxic) soil stabilizers.

7. All paved access roads, parking areas, and staging areas at construction sites with visible mud or dirt track-out shall be swept daily with water sweepers; water sweepers shall vacuum up excess water to avoid runoff-related impacts to water quality.

8. Limit traffic speeds on unpaved roads to 15 mph.

9. Install sandbags or other erosion control measures to prevent silt runoff to public roadways.

10. Replant vegetation in disturbed areas as quickly as possible.

11. Minimize idling time (5 minutes maximum).

12. Maintain properly tuned equipment.

These measures shall be incorporated into the grading specifications as well as the best management practices of the storm water pollution prevention plan and shall be implemented to the satisfaction of the City Engineer.

ddd. Where a grade differential of more than a 1-foot is created along the boundary parcel lines between the proposed development and adjacent property, the applicant shall install a masonry retaining wall unless a slope easement is approved by the City Engineer. Said retaining wall shall be subject to review and approval of the City Engineer.

eee. Prior to or concurrently with the first submittal of the final map and improvement plans, the applicant shall provide specific recommendations to mitigate identified seismic hazards discussed in the City's Geotechnical Consultant's letter dated June 14, 2023. The applicant's Geotechnical Consultant shall submit a letter-report addressing the items identified in the June 14, 2023 letter to the City for review by the City's Geotechnical Consultant. The applicant shall pay for all costs associated with the geotechnical peer review per the City's Master Fee Schedule.

fff. The applicant's geotechnical consultant shall review and approve all geotechnical aspects of the project building plans (i.e. site preparation and grading, site drainage improvements and design parameters for foundations) to ensure that their recommendations have been properly incorporated.

ggg. The applicant's geotechnical consultant shall inspect, test (as needed), and approve all geotechnical aspects of the project construction. The inspections shall include, but not necessarily be limited to: site preparation and grading, site surface and subsurface drainage improvements, and excavations for foundations prior to the placement of steel and concrete. The results of these inspections and the as-built conditions of the project shall be described by the geotechnical consultant in a letter and submitted to the City Engineer for review and approval prior to final project approval.

hhh. The applicant shall submit a detailed soils report prepared by a qualified engineer, registered with the State of California. The report shall address in-situ and import soils in accordance with the City of Newark Grading and Excavation Ordinance, Chapter 15.50. The report shall include recommendations regarding pavement sections for all public and

private streets. Grading operations shall be in accordance with recommendations contained in the soils report and shall be completed under the supervision of an engineer registered in the State of California to do such work.

iii. Prior to issuance of a Certificate of Occupancy or release of utilities for any building, vehicle access ways and parking facilities serving said building shall be paved in accordance with the recommendation of a licensed engineer based on a Traffic Index of 5.0 and striped as shown on the approved site plan. Minimum asphalt concrete thickness for the vehicle access ways shall be 4 inches. This condition is not intended to cover vehicle access ways or parking facilities project wide, only those specific areas which are necessary for each individual building and consistent with an approved construction phasing plan filed with Building Inspection Division.

jjj. Prior to issuance of a Certificate of Occupancy or release of utilities for each phase of dwelling units to be delivered, the on-site drive aisles and uncovered parking facilities serving such phase shall be installed and striped as shown on the approved plans. All on-site uncovered parking facilities and drive aisles shall be drained at a minimum slope of 1.0% for asphalt surfaces and 0.3% for Portland cement concrete surfaces.

kkk. The applicant shall remove the existing joint utility pole and anchor pole and underground existing overhead lines along the Cedar Boulevard frontage. The overhead alignment on the Moores Avenue right-of-way shall be undergrounded from the project to the next overhead pole near Wintergreen Drive. Additionally, the applicant shall underground existing overhead lines along the northern boundary and within the project site. All existing overhead lines between the subdivisions on both sides of the Alameda County Flood Control channel shall be removed.

lll. All new utilities including, but not limited to, electric, telephone and cable television services shall be provided underground for all buildings in the development in accordance with the City of Newark Subdivision Standards. As shown on the approved entitlement drawings, pad mounted electrical transformers shall be installed with an appropriate public utility easement and shall be screened properly from the roadways.

mmm. All improvement plans are subject to review and approval by the Alameda County Water District (ACWD), Union Sanitary District (USD), Alameda County Flood Control and Water Conservation District (ACFC&WCD), and Pacific, Gas & Electric Company (PG&E). Any modifications to the site design provided with the vesting tentative map as necessary to satisfy requirements from individual utilities or districts are the sole responsibility of the applicant. The applicant shall coordinate with Pacific, Gas & Electric Co. for the design of the underground utility improvements for the proposed development as soon as practical following vesting tentative map approval.

nnn. The joint trench and street light plans shall be submitted by the applicant with the first tract improvement plan check and approved prior to final map approval.

ooo. Multiple street cuts and openings (i.e. greater than two street cuts or openings) as a result of utility connections and other necessary street openings on Cedar Boulevard shall be resurfaced (grind and overlay) from curb to curb between the two furthest utility cuts to the satisfaction of the City Engineer. All pavement restoration and resurfacing shall be completed concurrent with site development.

ppp. The applicant shall repair and/or replace any public improvements along the Cedar Boulevard right-of-way and private improvements along the exterior boundary of the site damaged as a result of construction activity to the satisfaction of the City Engineer.

qqq. The applicant shall provide all required paper and digital submittals of the project final map, tract improvement plans, and as-built plans as required by the City Engineer, including, but not necessarily limited to the following: (1) One full-sized mylar copy and an electronic copy of the recorded final map; (2) Two full-sized reproducible copy, four half-sized reproducible copy, and electronic copies of the approved improvement plans in a format approved by the City Engineer; (3) Electronic copies and one mylar set of the as-built tract improvement plans. All digital copies of the final map and improvement plans shall be prepared in accordance with Union Sanitary District digital submittal standards.

rrr. The applicant shall establish a Homeowner's Association (HOA) consisting of all property owners of lands in the development at the time of incorporation and in the future for the purpose of maintaining the association's property, common drive aisles, common area parking facilities, common area stormwater treatment facilities, common area landscaping, and landscaping in the adjacent public rights-of-way (excluding any landscaping/ improvements in medians, or otherwise included in the LLD), and for paying for lighting (if any), common garbage collection services (if any), security patrol services (if any), and other functions of a Homeowner's Association. Common areas within the development shall be owned and/or maintained by the Homeowner's Association as described in the covenants, conditions, and restrictions (CC&Rs). Each property owner shall automatically become a member of the association in accordance with the Developer's phasing plan and shall be subject to its share of common expenses incurred by the Homeowner's Association in accordance with the budget reviewed and approved by the Department of Real Estate. The Homeowner's Association shall be incorporated prior to the sale of any individual lots and/or prior to acceptance of tract improvements, whichever occurs first.

sss. Prior to City Council approval of the final map(s), any declaration of covenants, conditions, and restrictions (CC&Rs) governing the maintenance and operation of this development shall be reviewed and approved by the Community Development Director at his/her discretion after review and recommendations by the City Attorney. Said covenants, conditions and restrictions shall be available in the project sales office at all times. Approval of the covenants, conditions and restrictions shall not make the City a party to enforcement of same. The CC&Rs shall run with the land and therefore be binding on parties with leasehold interests. The CC&Rs shall be written to require homeowners to require renters to comply with the CC&Rs, and a copy of the CC&Rs shall be given to each renter. The CC&Rs shall require the HOA to properly budget for a pavement maintenance program for on-site pavement. Prior to tract acceptance, the applicant shall provide the City

a copy of the recorded CC&Rs.

ttt. The applicant shall at its own cost, have an initial Homeowner's Association budget prepared which initial budget shall be reviewed and approved by the California Department of Real Estate. The Homeowner's Association budget shall set forth the monthly assessment costs.

uuu. The Homeowner's Association shall be responsible for trash and litter control and sweeping of all private streets within the development. All private storm drain systems and all associated trash capture devices shall be cleaned on a regularly scheduled basis as detailed in the required Stormwater Treatment Measures Maintenance Agreement.

vvv. The Homeowner's Association shall be required to contract with a professional association management firm to handle all necessary maintenance operations. Documentation of such contract shall be submitted to the City of Newark prior to the issuance of the first Certificate of Occupancy for a residential unit in the project. All commonly owned facilities shall be properly maintained in a manner consistent with the CC&Rs and project requirements. (For the purposes of clarity, this condition is not intended to restrict the proposed model homes, anticipated to be lots 115-117.)

www. The applicant shall prepare a disclosure statement to all property owners indicating that the project site is located within a seismic hazard zone for liquefaction. The disclosure statement shall indicate that the buildings have been designed to current code requirements. The disclosure statement shall also indicate that the buildings, site improvements, and utilities are subject to damage during an earthquake and that the buildings may be uninhabitable after an earthquake. This disclosure statement is subject to review and approval of the City Engineer prior to the issuance of the first Certificate of Occupancy for any residential unit.

xxx. The applicant is to provide a complete set of as-built improvement plans and a copy of the project geotechnical report and recorded Final Map to the Homeowners Association prior to tract acceptance.

yyy. The CC&Rs shall contain a provision that prohibits the amendment of those provisions of the CC&Rs, identified in these Conditions of Approval, without the City's approval.

zzz. The following language shall be included in the CC&Rs:

Rights of City: Notwithstanding anything to the contrary in this Master Declaration, no amendment hereto which deals with any of the following matters shall be effective without the prior written consent of the Director of the City's Community Development Department, such consent not to be unreasonably withheld: (i) Any amendment, the design or purpose of which is to eliminate an obligation of the Association to maintain, manage and repair the Common Area or to lower the standards for maintaining and repairing such Common Area below that of other typical professionally managed and professionally landscaped common interest subdivisions in the City that are substantially similar to the

Project in terms of product type; (ii) Any amendment with regard to the fundamental purpose for which the Project was created (e.g., a change from residential use to a different use);(iii) Any material amendment to Sections….(sections required by condition of approval to be listed), and all defined terms therein, each of which were required as a condition of approval for the Project.(note: will need to define "Project.")

Enforcement by City: If the Association fails to Maintain the Common Area, or if the Association fails to enforce any of the provisions in which the City has interest, the City, as an intended third party beneficiary of the provisions of this Master Declaration, shall have the right, but not the duty, to compel performance of such provisions in any manner provided by law or in equity and in any manner provided in this Master Declaration. If the City determines that the Association has not performed required maintenance of a Common Area improvement, then the City shall provide the Association with written notice explaining the work that needs to be performed. If the Association does not complete the work within sixty (60) days of delivery of the written notice (or if the Association has not commenced the work within such period if the maintenance work cannot reasonably be completed within such period), then the City may enter and perform the required maintenance work. The City shall invoice the Association for the City's actual costs to perform the maintenance work. Association shall pay the City's invoice within thirty (30) days of the delivery of the invoice.

aaaa. The Declarant shall provide educational materials provided by City of Newark on stormwater pollution prevention to all residents as part of the builder disclosure package or otherwise within (3) three months of the initial sale of each home.

bbbb. Each initial buyer shall sign an acknowledgment that he/she has read the articles and bylaws of the Homeowner's Association and the CC&Rs governing the operation and maintenance of the development.

cccc. Street names and an addressing scheme shall be developed during the final map and improvement plan review process in accordance with the City of Newark's Street Numbering and Naming Ordinance (Chapter 12.12). This area of Newark has a "flower/shrub" theme for street names. The applicant may request a different theme for street names, which will be subject to review and approval by the City Engineer.

dddd. A signpost with a sign having an area of at least 15-inches by 21-inches shall be installed at or near the project entrances. The sign shall indicate "Private Property. Not dedicated for public use."

eeee. Reflective address signs shall be provided at each court to help identify the location of a residential unit for accurate first response. Signs shall be subject to review and approval by the City Engineer and the Fire Marshal.

Landscape Division

ffff. Prior to approval of the final map, the applicant shall petition the City Council to participate in a Landscaping and Lighting District for the perpetual maintenance of the median landscaping, lighting system, and stormwater trash capture devices along the project frontage on Cedar Boulevard. Maintenance activities will be performed by the City of Newark or its contractors through the Landscaping and Lighting District. All property owners within the vesting tentative map boundary shall be assessed annually in accordance with requirements established with the Landscaping and Lighting District. The applicant shall deposit sufficient funds for the City to hire a consultant to prepare the Engineer's Report, which shall be approved by the City Council. Prior to issuance of the first Certificate of Occupancy for any residential unit, the City Council shall adopt a resolution for the formation of the Landscaping and Lighting District. The applicant shall record an indenture advising all prospective property owners in the project that their properties are included in a Landscape and Lighting District for maintenance of landscaping, lighting, and related improvements installed as part of the project.

gggg. All landscape maintenance on-site and along the project frontage, including the right-of-way planter strips along Cedar Boulevard but excluding the median landscaping, shall be the responsibility of the Homeowners Association. The applicant shall enter into a Landscape Maintenance Agreement prior to approval of the final map. The applicant shall be permitted to assign the obligations to the HOA and shall thereafter be released from any ongoing obligations under such Agreement. The Landscape Maintenance Agreement shall run with the land and be binding to the Homeowners Association as successors.

hhhh. Prior to final map approval, landscape plans for work within the public right-of-way, dedicated easement areas, and all common areas shall be included with the tract improvement plans and approved by the City Engineer. The plans shall be prepared by a licensed landscape architect in accordance with the City of Newark requirements, standard details, and the State of California Model Water Efficient Landscape Ordinance (MWELO).

iiii. Prior to the release of utilities or issuance of any Certificate of Occupancy for a given project phase, all landscaping and irrigation systems associated with that phase, including all frontage and median landscaping, shall be completed or guaranteed by a cash deposit filed with the City in an amount to cover the remainder of the work.

jjjj. Prior to installation by the applicant, applicant shall submit a plan with plant species, location, container size, quality and quantity of all landscaping plants and materials within the public right-of-way, and such plan shall be reviewed and approved by the City Engineer. All street trees shall be a minimum of 24-inch box specimen. Plant replacements shall be to an equal or better standard than originally approved subject to approval by the City Engineer.

kkkk. Any above ground utility structures along Cedar Boulevard, including backflow prevention devices, and appurtenances, shall be installed within the applicant's property line and a minimum of 10 feet behind street face of curbs on Cedar Boulevard. The backflow prevention devices shall have a green painted security cage to protect it from vandalism. These locations shall be screened with landscaping to the satisfaction of the City Engineer. The landscape screen shall not interfere with the utility companies' or City Fire Department's access.

Fire Department

llll. Fire sprinkler and fire alarm systems shall be provided for the buildings.

Building Inspection Division

mmmm. The buildings and parking shall be designed to 11A.

Police Department

nnnn. The development shall comply with Chapter 15.06, Security Code, of the Newark Municipal Code and Section 510, Emergency Responder Radio Coverage, of the California Fire Code.

oooo. The Police Department highly recommends installation of community safety cameras in common areas where the residential units would be most susceptible to criminal activity. This would include parking areas, exterior pathways and exterior doors. The community safety cameras could be operated and controlled by individual owners, the Building Management or the Owners' Association.

pppp. The proposed development should comply with the City of Newark street numbering system and tie in with the existing area street numbering. Additionally, the proposed buildings should display the street address in a manner clearly visible from the adjacent roadway and parking areas in order to facilitate public safety personnel's ability to quickly identify its location during emergency responses.

qqqq. Individual residence numbering should be in a systematic method, specific to each unit in a non-repeating manner (i.e. no two units in the development with the same unit number). Additionally, street addresses should be displayed to front and rear garage area of each residence. Maps with unit numbering of the entire development should be placed in easy to find locations (preferably at entrances to the development and the buildings) in order to aid public safety personnel's ability to identify specific units during emergency responses.

Environmental Conditions of Approval

rrrr. The following conditions of approval have been identified in the Environmental Checklist for Streamlined Review Pursuant to California Public Resources Code Section 21083.3 and CEQA Guidelines Sections 15168 and 15183, dated July 2023 to ensure implementation of applicable mitigation measures and policies set forth in the 2013

General Plan and the 2013 General Plan Environmental Impact Report. The applicant shall implement all conditions of approval as part of the Project:

AES-1: All exterior lighting shall comply with all applicable regulations in NMC §17.17.060 (Lighting and Illumination) and NMC Chapter 17.23 (Parking and Loading). All exterior lighting shall be directed on-site so as not to create glare off-site, as required by the Community Development Director.

AQ-1: Consistent with the Bay Area Air Quality Management District (BAAQMD) Basic Construction Mitigation Measures, the following controls are required to be included as specifications for the proposed project and implemented at the construction site to control for fugitive dust and exhaust as follows:

1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

2. All haul trucks transporting soil, sand, or other loose material off site shall be covered.

3. All visible mud or dirt tracked-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour.

5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible.

6. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

7. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California Airborne Toxics Control Measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

8. All construction equipment shall be maintained and properly tuned in accordance with manufacturers' specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.

9. A publicly-visible sign shall be posted with the telephone number and person to contact at the City of Newark regarding dust complaints. This person shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

AQ-2: During construction of the proposed project, the project contractor shall ensure all off-road diesel-powered construction equipment of 50 horsepower or more used for the project construction at a minimum meets the California Air Resources Board Tier 3 emissions standards with level 3 diesel particulate filters or equivalent.

AQ-3: The following measures shall be required to reduce toxic air contaminants (TACs) and particulate matter indoors to a level sufficient to achieve compliance with BAAQMD health risk thresholds:

1. The project applicant shall provide an HVAC system with a control efficiency sufficient to result in a reduction of a minimum 85 percent of particulates of 10 microns or less, such as Minimum Efficiency Reporting Value (MERV)-9 filters or greater, for indoor air filtration systems. The ventilation system shall be certified to achieve the stated performance effectiveness from indoor areas.

2. The project applicant shall locate all air intakes as far away from Interstate 880 (I-880) as feasible.

3. The project applicant shall disclose to potential occupants of the project that the proximity of the project site to the freeway could result in increased long-term health risks. The disclosure shall indicate the specifications for the installed air filtration system.

BIO-1:To avoid and minimize potential impacts to nesting birds including passerines and raptors, the following measures shall be implemented:

1. Grading or removal of potentially occupied habitat should be conducted outside the nesting season, which occurs between approximately February 1 to August 31.

2. If grading between August 31 and February 1 is infeasible and groundbreaking must occur within the nesting season, a pre-construction nesting bird survey (migratory species, passerines, and raptors) of the potentially occupied habitat (trees, shrubs, grassland) shall be performed by a qualified biologist within 7 days of groundbreaking. If no nesting birds are observed no further action is required and grading shall occur within one week of the survey to prevent "take" of individual birds that could begin nesting after the survey.

3. If active bird nests (either passerine and/or raptor) are observed during the pre-construction survey, a disturbance-free buffer zone shall be established around the occupied habitat until the young have fledged, as determined by a qualified biologist.

4. The radius of the required buffer zone can vary depending on the species, (i.e., 75-100 feet for passerines and 200-500 feet for raptors), with the dimensions of any required buffer zones to be determined by a qualified biologist in consultation with CDFW.

5. To delineate the buffer zone around the occupied habitat, construction fencing shall be placed at the specified radius from the nest within which no machinery or workers shall intrude.

6. Biological monitoring of active nests shall be conducted by a qualified biologist to ensure that nests are not disturbed and that buffers are appropriate, adjusted by a qualified biologist as needed to avoid disturbance.

7. No construction or earth-moving activity shall occur within any established nest protection buffer prior to September 1 unless it is determined by a qualified ornithologist/biologist that the young have fledged (that is, left the nest) and have attained sufficient flight skills to avoid project construction zones, or that the nesting cycle is otherwise completed.

BIO-2: Prior to any tree removal or alteration, the applicant shall obtain a tree removal permit from the City of Newark Public Works Department and implement tree planting requirements in accordance with development review.

CUL-1: During project construction, if historic, archaeological or Native American materials or artifacts are identified, work within 50 foot radius of such find shall cease and the City shall retain the services of a qualified archeologist and/or paleontologist to assess the significance of the find. If such a find is determined to be significant by the archeologist and/or paleontologist, a resource protection plan conforming to CEQA §15064.5 shall be prepared by the archeologist and/or paleontologist and approved by the Community Development Director. The plan may include, but would not be limited to, removal of resources and similar actions. Project work may be resumed in compliance with such a plan. If human remains are encountered, all ground disturbing activities near or in any area potentially overlying adjacent human remains shall cease, the County Coroner shall be contacted immediately, and the provisions of State law carried out.

GEO-1: Prior to or concurrently with the first submittal of the final map and improvement plans, the applicant shall provide specific recommendations to mitigate identified seismic hazards discussed in the City's Geotechnical Consultant's letter dated June 14, 2023. The applicant's Geotechnical Consultant shall submit a letter-report addressing the items identified in the June 14, 2023, letter to the City for review by the City's Geotechnical Consultant. The applicant shall pay for all costs associated with the geotechnical peer review per the City's Master Fee Schedule.

GEO-2: Prior to or concurrently with the first submittal of the final map and improvement plans, the applicant shall provide specific recommendations to mitigate impacts of expansive soils on the site. The applicant's Geotechnical Consultant shall submit a letter-report addressing expansive soils on the site, to the City for review by the City's Geotechnical Consultant. The applicant shall pay for all costs associated with the geotechnical peer review per the City's Master Fee Schedule.

GHG-1: The project shall include and show on the plans a minimum of 10 percent of the parking spaces as electric vehicle (EV) charging stations consistent with current California Green Buildings Standards Code (CALGreen) Tier 2 standards.

HAZ-1: Prior to issuance of any demolition permit, the applicant/project developer shall have a qualified environmental professional complete testing on structures to be removed for the presence of actionable quantities of asbestos materials, lead based paint and other contaminants. These materials shall be remediated by a licensed contractor and disposed of in an appropriately licensed landfill. Necessary permits shall be obtained from the Alameda County Fire Department, Newark Building Inspection Division, the Bay Area Air Quality Management District and other agencies, as applicable. All work shall be performed in accordance with state and federal OSHA standards. Worker safety plans shall be included for all demolition or deconstruction plans.

HAZ-2: The Project applicant shall implement the following actions:

1. Copies of the Phase I ESA shall be filed with the Alameda County Water District, Newark Community Development Department, the Newark Public Works Department and the Hazardous Materials Bureau of the Alameda County Fire Department.
2. Prior to the issuance of the grading permit, the applicant shall prepare a Soil and Water Management Plans (SWMPs) for the Project site as the Phase I ESA identifies actionable levels of soil and/or water contamination on the site. The SWMPs shall be prepared by a state-certified environmental professional and shall include, at minimum, a description of soils to be graded or disturbed as part of the project, detailed soil and water sampling to identify the extent of the contaminants, describe site remediation activities and procedures for removing the contaminants, and location(s) for disposal of contaminated material. The applicant shall obtain necessary permits for implementation of the site remediation and shall also provide evidence to the City of Newark, prior to the issuance of the grading permit, demonstrating that the RECs have been resolved to the satisfaction of the applicable regulatory agencies for future residential land use. Permits and closure letters shall be obtained from appropriate agencies if site remediation is found.
3. Prepare a plan/s to deal with de-watering of the site and safe disposal of contaminated groundwater in the event of groundwater contamination on the site or vicinity. These plans shall be prepared by qualified environmental hazard consultants and approved by the Newark Community Development Director, or their designee, prior to grading permit issuance, and required permits shall be obtained from appropriate agencies for all site investigation and remediation.

HYD-1: Preliminary Stormwater Treatment Plan is approved in concept only. Final approval is subject to the applicant providing, prior to the issuance of the grading permit, the necessary plans, details, and calculations that demonstrate the plan complies with the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2022-0018, revised July 1, 2022, issued to the City of Newark by the Regional Water Quality Control Board, San Francisco Bay Region.

HYD-2: Prior to issuance of a building permit, the applicant shall prepare a Stormwater Treatment Measures Maintenance Agreement for post-construction water quality. The Agreement shall be reviewed and accepted by the City Engineer prior to Project Construction on the site.

HYD-3: The Project's development, including streets and surface improvements, shall be placed above the 100-year flood elevation as confirmed by the City Engineer.

HYD-4: Prior to final map approval, the applicant shall apply and receive approval for a conditional letter of map revision based on fill (CLOMR- F) from the Federal Emergency Management Agency (FEMA). The CLOMR-F shall be based upon the project grading plan and shall conclude that the structures for human occupancy will be removed from the special flood hazard area (SFHA). Prior to occupancy of any buildings within the SFHA, the developer shall apply and receive approval of a letter of map revision based on fill (LOMR-F) from FEMA. On July 1, 2023, FEMA temporarily suspended the processing of CLOMR-Fs and LOMR-Fs. If, prior to final map approval, the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the CLOMR-F application to FEMA shall be deferred and applied for as soon as the temporary suspension is lifted. If, prior to occupancy, the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the applicant shall provide complete Elevation Certificates demonstrating that the property for occupancy is outside the Special Flood Hazard Area. Prior to tract acceptance, if the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the applicant shall submit the LOMR-F application package to the City or enter into a deferred agreement with the City for preparing and processing the LOMR-F application package once FEMA lifts the suspension. In either options, the cost of the preparation and fees associated with the FEMA LOMR-F application shall be paid for by the applicant.

HYD-5: The applicant shall submit detailed grading and drainage plans for review and approval by the City Engineer and the Alameda County Flood Control and Water Conservation District. These plans must be based upon a City benchmark and need to include pad and finish floor elevations of each proposed structure, proposed on-site property grades, proposed elevations at property line, and sufficient elevations on all adjacent properties to show existing drainage patterns. All on-site pavement shall drain at a minimum of one percent. The applicant shall ensure that all upstream drainage is not blocked and that no ponding is created by this development. Any construction necessary to ensure this shall be the applicant's responsibility.

Hydrology and hydraulic calculations shall be submitted for review and approval by the City Engineer and the Alameda County Flood Control District prior to approval of the final map. The calculations shall show that the City and County freeboard requirements will be satisfied.

NOI-1: The following noise reduction measures will be implemented to minimize the impact of construction noise onto offsite receivers:

1. Construction activity shall be limited to the hours of 7 AM to 7 PM Monday through

Friday and 10 AM to 6 PM on Sundays and holidays. Noise from construction activity occurring outside these hours will be limited to the levels outlined in the Newark Municipal Code Section 17.24.10.A.3.

2. The contractor shall require properly maintained mufflers on construction vehicles.

3. To the extent feasible, stationary construction equipment and staging areas shall be located as far as possible from adjacent residences and the motel.

4. The contractor shall implement temporary noise barriers between noisy activities and adjacent residences and the motel.

5. To the extent feasible, construction should proceed from Cedar Boulevard towards Intestate 880, and from south to north, so that constructed buildings will help shield residences from equipment and construction activities.

6. The contractor will designate a "noise disturbance coordinator" who would be responsible for responding to any local complaints about construction noise.

7. Signs will be posted at the construction site to notify the neighborhood of permitted days and hours of activities, and to provide a day-time telephone number for the noise disturbance coordinator.

NOI-2: Mechanical equipment noise as a result of the Project shall be limited to no more than 70 dBA between the hours of 7 a.m. and 9 p.m., and 60 dBA between the hours of 9 p.m. and 7 a.m in accordance with NMC Section 17.24.100.A.2.

NOI-3: Exterior building assemblies shall be sound-rated to reduce environmental noise to the DNL 45 dB criterion indoors. Sound insulation ratings should be for the complete assembly, including glass and frame, and should be based on laboratory test reports of similar sized samples from a National Voluntary Laboratory Accreditation Program (NVLAP) accredited lab. Since windows will need to be closed to meet the interior noise criteria, the mechanical design should meet ventilation requirements with windows in the closed position. The building assemblies shall be reviewed and accepted to meet the aforementioned criteria during the building permit process.

NOI-4: The height of the 18-foot tall retaining wall to the rear of the Project site adjacent to I-880 that would serve as a noise barrier shall be measured with respect to the freeway elevation, or yard elevation, whichever is higher. The barrier shall extend the length of the site and wrap the ends, returning towards Cedar Boulevard and shall be solid from bottom to top with no cracks or gaps and have a minimum surface density of approximately three pounds per square foot to reduce traffic noise levels in Project related outdoor spaces to DNL 65 dB or below. The barrier shall step down along the side property lines from a height of 18 feet to 8 feet, as shown in Figure 2 of the Environmental Noise Assessment, prepared by Salter, November 11, 2022.

NOI-5: Limit the use of the following construction equipment to the following distances from the motel building located toward the south of the Project site.

1. Large bulldozers and loaded trucks to a minimum of 50 feet.

2. Jackhammering to a minimum of 30 feet.

3. vibratory rollers to a minimum of 85 feet.

TRAN-1: The applicant shall dedicate right-of-way and install complete street improvements for Cedar Boulevard as shown on the Vesting Tentative Map exhibits and as described below:

Cedar Boulevard

The applicant shall install a traffic signal at the intersection of Cedar Boulevard and Smith Avenue. Traffic Signal plans shall be prepared, reviewed, and approved as part of the improvement plans. The applicant shall submit complete traffic signal plans, inclusive of a pole schedule with the first submittal of the improvement plan set. The applicant shall identify long lead items. City will endeavor to prioritize the review and approval of the long lead items. Within 45 days of City approval of the long lead items, the applicant shall order or otherwise contract for the delivery and installation of the items and submit to the City a written confirmation of contract or order invoice. The applicant shall in good faith effort have the traffic signal operational prior to issuance of the first Certificate of Occupancy for any residential unit. For the purposes of clarity, this condition is not intended to restrict the proposed model homes.

The adjacent residential development to the west of this project is similarly conditioned to provide the traffic signal improvements at Cedar Boulevard and Smith Avenue. If, at the time of final map approval, the other developer has already provided guarantee(s) or other appropriate improvement security for the traffic signal, the project will not be required to install the traffic signal, the project will not be eligible for any traffic impact fee (TIF) reimbursement and the normal traffic impact fees will need to be paid during Building Permit issuance.

If the traffic signal is not operational prior to issuance of the first Certificate of Occupancy for any residential unit due to manufacturing or delivery delays of the long lead items for either developer, the applicant and the City Engineer shall discuss an alternative option to implement until the traffic signal is operation. The alternative option is subject to approval by the City Engineer. All costs to fund the alternative option shall be funded by the applicant.

UTIL-1: Prior to the issuance of a building permit, the applicant shall pay the applicable impact fees, including, but not limited to, the Housing Impact Fee and Transportation Impact Fee, in the amount in effect at the time. If the applicant is eligible for a Transportation Impact Fee credit as determined by the City Engineer, the Transportation

Impact Fee will be adjusted accordingly as determined by the City Engineer.

General Conditions

ssss. All proposed changes from approved exhibits shall be submitted to the Community Development Director for review and approval.

tttt. The applicant hereby agrees to defend, indemnify, and save harmless the City of Newark, its Council, boards, commissions, officers, employees and agents, from and against any and all claims, suits, actions, liability, loss, damage, expense, cost (including, without limitation, attorneys' fees, costs and fees of litigation) of every nature, kind or description, which may be brought by a third party against, or suffered or sustained by, the City of Newark, its Council, boards, commissions, officers, employees or agents to challenge or void the permit granted herein or any California Environmental Quality Act determinations related thereto.

uuuu. In the event that any person should bring an action to attack, set aside, void or annul the City's approval of this project, the applicant shall defend, indemnify and hold harmless the City and/or its agents, officers and employees from any claim, action, or proceeding against the City and/or its agents, officers and employees with counsel selected by the applicant (which shall be the same counsel used by applicant) and reasonably approved by the City. Applicant's obligation to defend, indemnify and hold harmless the City and/or its agents, officers and employees shall be subject to the City's compliance with Government Code §66474.9.

vvvv. The Conditions of Project Approval set forth herein may include certain fees, dedication requirements, reservation requirements and other exactions. Pursuant to Government Code §66020(d)(1), these Conditions constitute written notice of a statement of the amount of such fees, and a description of the dedications, reservations and other exactions. The developer is hereby further notified that the 90-day approval period in which the developer may protest these fees, dedications, reservations and other exactions, pursuant to Government Code §66020(a), has begun. If the developer fails to file a protest within this 90-day period complying with all of the requirements of §66020, the developer will be legally barred from later challenging such exactions.

Project Summary

Site Area: ± 3.44 Acres
Vacated Timber ST: ± 0.28 Acres
Total Area: ± 3.72 Acres

Total Units: 76 Homes
- (20) Plan 1, 1,334 SF - 3 Bedroom, 2.5 Bath
- (10) Plan 2, 1,612 SF - 3 Bedroom/Den, 2.5 Bath
- (46) Plan 3, 1,823 SF - 4 Bedroom, 3 Bath

Density: 22.0 Homes per Acre
Density including Timber ST: 20.4 Homes per Acre

Parking:
Required: 190 Spaces (2.5 spaces per home)
- (76) Units x 2.0 Spaces =152 Spaces
- (76) Guest x 0.5 Spaces =38 Spaces

Provided: 190 Spaces (2.5 spaces per home)
- Garage: 152 Spaces
- Head In: 26 Spaces (9' x 19')
- Parallel: 5 Spaces (8' x 19')
- Compact: 7 Spaces (8.5' x 16')

Lot Coverage: Provided - 34.8%

Maximum building height: 75'
Proposed building height: 37'

Proposed landscaped area: 48,244 SF
Uncovered parking area: 6,720 SF

Enhanced street elevation
Enhanced Elevation at Third Floor

Notes:

1. Site plan is for conceptual purposes only.
2. Site plan must be reviewed by planning, building, and fire departments for code compliance.
3. Base information per civil engineer.
4. Civil engineer to verify all setbacks and grading information
5. Building Footprints might change due to the final design elevation style.
6. Open space area is subject to change due to the balcony design of the elevation.
7. Building setbacks are measured from property lines to building foundation lines.

(2) PERPENDICULAR STANDARD SPACES MINIMUM DIMENSIONS: 9 FEET BY 19 FEET.
(3) PERPENDICULAR COMPACT SPACES MINIMUM DIMENSIONS: 8.5 FEET BY 16 FEET.
(4) ACCESSIBLE SPACES MINIMUM DIMENSIONS: 9 FEET BY 19 FEET.

CHAPTER 17.07.030: DEVELOPMENT STANDARDS RESIDENTIAL DISTRICTS

STANDARD	RESIDENTIAL MEDIUM DENSITY (RM)
A. LOT AND DENSITY STANDARDS	
MAXIMUM DENSITY (UNITS/NET ACRE)	22
MINIMUM LOT SIZE	6000-SQ. FEET
MINIMUM LOT WIDTH	60-FEET
MINIMUM LOT DEPTH	100-FEET
MINIMUM FRONTAGE ON A PUBLIC STREET	40-FEET
B. BUILDING FORM AND LOCATION	
MAXIMUM HEIGHT (FT)*	75-FEET
C. SETBACKS	
FRONT	15-FEET
INTERIOR SIDE	5-FEET
STREET SIDE	8-FEET
REAR	10-FEET
DISTANCE BETWEEN MAIN STRUCTURES	10-FEET
D. LOT COVERAGE, LANDSCAPE, AND OPEN SPACE STANDARDS	
MAXIMUM LOT COVERAGE (% OF LOT)	55
MINIMUM LANDSCAPING (% OF LOT)	25
MINIMUM OPEN SPACE (SQ FT PER RESIDENTIAL UNIT)	300

*HEIGHTS OVER 35 FEET IN THE RESIDENTIAL MEDIUM DENSITY DISTRICT SHALL REQUIRE A MINOR USE PERMIT.

LAND USE SUMMARY

LAND USE	AREA (AC±)
MULTIFAMILY RESIDENTIAL	1.78
WATER QUALITY	0.09
CEDAR BLVD. RIGHT-OF-WAY DEDICATION	0.09
PRIVATE STREETS	1.07
OPEN SPACE	0.69
TOTAL AREA	**3.72**

TITLE REPORT

FIRST AMERICAN TITLE COMPANY
ORDER NO. 01313-625291-ROW
DATED AUGUST 30, 2022

EXCEPTIONS AND EXCLUSIONS:

(#) INDICATES TITLE REPORT ITEM NUMBER

(1) THROUGH (2) REFER TO PROPERTY TAXES, INCLUDING ANY PERSONAL PROPERTY TAXES AND ANY ASSESSMENTS. THESE ITEMS CANNOT BE PLOTTED.

(3) AN EASEMENT FOR WATER LINES, SANITARY SEWERS, NATURAL GAS LINES, ELECTRICAL LINES AND INCIDENTAL PURPOSES, RECORDED OCTOBER 14, 1969 AS BOOK/REEL 2495, PAGE/IMAGE 540 OF OFFICIAL RECORDS.

IN FAVOR OF: CITY OF NEWARK, A MUNICIPAL CORPORATION, IN RESOLUTION NO. 1786, ABANDONING PORTIONS OF MOORES AVENUE AND TIMBER STREET
AFFECTS: PARCEL 1
THIS ITEM IS PLOTTED HEREON. SEE SAID DOCUMENT FOR FULL PARTICULARS.

(4) AN EASEMENT FOR RIGHT AT ANY TIME, AND FROM TIME TO TIME, TO EXCAVATE FOR, INSTALL, REPLACE (OF THE INITIAL OR ANY OTHER SIZE), MAINTAIN AND USE SUCH PIPE LINES AS SECOND PARTY SHALL FROM TIME TO TIME ELECT FOR CONVEYING GAS, OIL, PETROLEUM PRODUCTS, OR ANY OTHER LIQUIDS, GASES, OR SUBSTANCES WHICH CAN BE TRANSPORTED THROUGH A PIPE LINE, WITH NECESSARY AND PROPER VALVES AND OTHER APPLIANCES AND FITTINGS, AND DEVICES FOR CONTROLLING ELECTROLYSIS FOR USE IN CONNECTION WITH SAID PIPE LINES, TOGETHER WITH ADEQUATE PROTECTION AND INCIDENTAL PURPOSES, RECORDED NOVEMBER 29, 1979 AS INSTRUMENT NO. 1979-242804 OF OFFICIAL RECORDS.

IN FAVOR OF: PACIFIC GAS AND ELECTRIC COMPANY, A CALIFORNIA CORPORATION
AFFECTS: AS DESCRIBED THEREIN
THIS ITEM IS PLOTTED HEREON. SEE SAID DOCUMENT FOR FULL PARTICULARS.

(5) AN EASEMENT FOR RIGHT TO CONSTRUCT AND MAINTAIN TRAFFIC SIGNAL EQUIPMENT, DETECTION LOOPS AND THEIR APPURTENANCES AND INCIDENTAL PURPOSES, RECORDED APRIL 17, 1985 AS INSTRUMENT NO. 1985-075172 OF OFFICIAL RECORDS.

IN FAVOR OF: CITY OF NEWARK, A MUNICIPAL CORPORATION
AFFECTS: AS DESCRIBED THEREIN
THIS ITEM IS PLOTTED HEREON. SEE SAID DOCUMENT FOR FULL PARTICULARS.

(6) AN EASEMENT FOR LANDSCAPE PLANTING AND IRRIGATION AND INCIDENTAL PURPOSES, RECORDED SEPTEMBER 20, 1990 AS INSTRUMENT NO. 1990-251114 OF OFFICIAL RECORDS.

IN FAVOR OF: CITY OF NEWARK, A MUNICIPAL CORPORATION
AFFECTS: AS DESCRIBED THEREIN
THIS ITEM IS PLOTTED HEREON. SEE SAID DOCUMENT FOR FULL PARTICULARS.

(7) THE TERMS, PROVISIONS AND EASEMENT(S) CONTAINED IN THE DOCUMENT ENTITLED "LANDSCAPE MAINTENANCE AGREEMENT" RECORDED APRIL 1, 2003 AS INSTRUMENT NO. 2003-190703 OF OFFICIAL RECORDS.

THE LOCATION OF THE EASEMENT CANNOT BE DETERMINED FROM RECORD INFORMATION.
THIS ITEM CANNOT BE PLOTTED.

(8) THE FACT THAT THE LAND LIES WITHIN THE BOUNDARIES OF THE NEWARK REDEVELOPMENT PROJECT NO. 2, AS DISCLOSED BY VARIOUS DOCUMENTS OF RECORD.
THIS ITEM CANNOT BE PLOTTED.

(9) RIGHTS OF THE PUBLIC IN AND TO THAT PORTION OF THE LAND LYING WITHIN ANY ROAD, STREET, ALLEY OR HIGHWAY. THIS ITEM CANNOT BE PLOTTED.

(10) WATER RIGHTS, CLAIMS OR TITLE TO WATER, WHETHER OR NOT SHOWN BY THE PUBLIC RECORDS. THIS ITEM CANNOT BE PLOTTED.

(11) ANY FACTS, RIGHTS, INTERESTS OR CLAIMS WHICH WOULD BE DISCLOSED BY A CORRECT ALTA/NSPS SURVEY. THIS ITEM CANNOT BE PLOTTED.

(12) RIGHTS OF PARTIES IN POSSESSION. THIS ITEM CANNOT BE PLOTTED.

WATER CONSERVATION STATEMENT

1. THE PLANT LIST IS PRELIMINARY IN NATURE. SPECIES SHALL BE ADDED AND SUBTRACTED TO FULFILL THE DESIGN AND HORTICULTURAL REQUIREMENTS AS NECESSARY.
2. THE IRRIGATION SYSTEM SHALL BE DESIGNED WITH WATER CONSERVATION IN MIND WHILE ACHIEVING THE GOAL OF EFFECTIVELY AND EFFICIENTLY PROVIDING THE LANDSCAPE WITH WATER BY MEANS OF SPRAY IRRIGATION TO THE SHRUBS/GROUNDCOVER AREAS AND BUBBLERS TO THE TREES.
3. A STATE-OF-THE-ART IRRIGATION CONTROLLER SHALL BE SPECIFIED FOR THIS PROJECT TO CONTROL THE WATER ALLOCATED TO EACH VALVE GROUPED PER INDIVIDUAL HYDROZONE (BASED ON PLANT TYPE AND EXPOSURE).
4. FINAL LANDSCAPE PLAN WILL BE IN COMPLIANCE WITH THE CALIFORNIA MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (CA WELO). PLANS WILL BE SIGNED BY THE LANDSCAPE ARCHITECT WITH THE REQUIRED WELO STATEMENTS INCLUDED.

38600 CEDAR BOULEVARD RESIDENTIAL DEVELOPMENT PROJECT
CEQA ENVIRONMENTAL CHECKLIST FOR STREAMLINED REVIEW

Project Title:	38600 Cedar Boulevard Residential Development Project	
Lead Agency:	City of Newark 37101 Newark Boulevard Newark, CA 94560	
Contact Person:	Carmelisa Lopez, Senior Planner Phone: (510) 578-4215 Email: carmelisa.lopez@newark.org	
Project Location:	38600 Cedar Boulevard, City of Newark, Alameda County, California APNs 92A-2585-12-1 and 92A-2585-31	
Property Sponsor and Owner(s):	Property Owner: Cedar Boulevard Townhomes, LLC 2801 West Coast Highway 270 Newport Beach, CA 92663 925.321.6327	Project Applicant: Brian Steele Waymark Development LLC 3223 Crow Canyon Road Suite 200 San Ramon, CA 94583 925.321.6327
General Plan Designation:	Medium Density Residential (14-30 dwelling units/acre)	
Zoning:	Residential Medium Density (RM)	
Description of Project:	The Project consists of demolition of the existing commercial buildings on an approximately 3.72-acre site and construction of 76 three-story townhomes and associated improvements. The townhomes would range in floor area from 1,334 to 1,823 square feet (sf) with two-car garages and approximately 5,995 sf of private open space in total. Associated improvements would include interior roads for circulation and approximately 16,808 sf of common open space predominantly located at the rear of the site along Interstate-880 (I-880). There would be two access points to the development: one access point from Cedar Boulevard connecting to Moores Avenue and an emergency vehicle access point on the southwestern end of the site along Cedar Boulevard.	
Surrounding land uses and setting; briefly describe the project's surroundings:	The site is surrounded by existing urban uses with commercial development to the northwest on a site that is proposed for residential development consisting of single family-residences and two-unit attached townhouses. An engineered flood control channel, owned and operated by the Alameda County Flood Control and Water Conservation District, separates the Project site from the potentially residential property described above to the northwest. I-880 is located to the northeastern side of the Project site, a motel (EZ 8 Motel) is located to the southern side of the Project site, single-family residences are located to the southwest across Cedar Boulevard.	
Other public agencies whose approval is required (e.g. permits, financial, or participation agreements):	San Francisco Regional Water Quality Control Board (SFRWQCB) Alameda County Water District (ACWD) Alameda County Flood Control and Water Conservation District (ACFCWCD) Alameda-Contra Costa Transit District (AC Transit) California Department of Transportation (Caltrans) Union Sanitary District (USD)	
Have California Native American tribes requested	The City conducted notification within the statutory timeframe provided by Public Resources Code §21080.3.1. Notices were sent to tribes by mail and via email	

consultation pursuant to Public Resources Code section 21080.3.1?	on February 8, 2023. One response from the Confederated Villages of Lisjan Nation was received on February 9, 2023, with a request for additional information regarding the Project site that was provided to the Tribal representative on February 10, 2023. To date, July 2023, the City of Newark has not received any further communication from the above referenced tribe and has not received responses requesting consultation from any other tribes contacted.

1. INTRODUCTION

This California Environmental Quality Act (CEQA) Analysis evaluates environmental impacts from the proposed 38600 Cedar Boulevard Residential Development Project, which consists of the demolition of the existing commercial buildings on the approximately 3.72-acre site and construction of 76 three-story townhomes and associated improvements (hereinafter referred to as the "Project"). Documentation herein has been prepared by the City of Newark as the lead agency as defined in Section 15367 of the CEQA Guidelines and in full accordance with the procedural and substantive requirements of CEQA Guidelines. This CEQA Analysis uses streamlining and tiering in accordance with CEQA Guidelines Section 15183 for consistency with the General Plan and the certified Environmental Impact Report (EIR).

2. PROJECT DESCRIPTION

The Project site is located at 38600 Cedar Boulevard (Assessor Parcel Numbers 92A-2585-12-1and 92A-2585-31) in the city of Newark, Alameda County, along Interstate 880 (I-880), which defines the northeastern edge of the city. State Route 84 (SR-84) borders the city to the northwest and San Francisco Bay is located to the west of the city. The city of Fremont borders Newark to the South (**Figure 1: Regional Location**).

2.1. VICINITY SETTING

The Project site is bordered by I-880 to the northeast and Cedar Boulevard to the southwest and is located approximately one-third of a mile northwest of the intersection of I-880 and Mowry Avenue, which is the location of an interchange, allowing access to and from I-880; Mowry Avenue crosses I-880 with an overpass.

The land uses surrounding the project site comprise several commercial buildings to the northwest of the Project site on a site that is proposed for residential development consisting of single family-residences and two-unit attached townhouses. An engineered flood control channel, owned and operated by the Alameda County Flood Control and Water Conservation District, separates the Project site from the potentially residential property described above to the northwest. A motel (EZ 8 Motel) is located to the southern side of the Project site, and single-family residences are located to the southwest across Cedar Boulevard. The City's current General Plan, adopted in 2013, designated parcels immediately to the northwest and southeast of the Project site as Medium Density Residential and High Density Residential, respectively. Land across Cedar Boulevard to the southwest of the project site is designated Low Density Residential. (**Figure 2: Project Vicinity**).

2.2. PROJECT SITE SETTING

The Project site carries a Medium Density Residential land use designation and is zoned Residential Medium Density (RM) (**Figure 3 Land Use and Zoning**). The Medium Density Residential land use designation allows for 14-30 units per net acre and is intended for garden apartments and condominiums, townhomes, row houses, 4 to 8-plexes, and older areas that contain a mix of multi-family and single-family homes within the 14-30 units per net acre density range. This land use designation is implemented by the RM zoning applicable to the Project site. The Project site is a part of the Cedar Boulevard Industrial to Residential Conversion area identified as Site "G" in the City of Newark Housing Element Update 2015 as part of the Regional Housing Needs Assessment (RHNA).

The 3.72-acre Project site consists of two parcels and contains multiple easements. The Project site also includes portions of excess City right-of-way and a street remnant of Timber Street (formerly Cedar Road) between the Project site and I-880. The excess City right-of-way parcel is located to the west of I-880 and is approximately 4,610 sf in area. The street remnant of the Timber Street parcel is located along the easterly boundary of the Project site and is approximately 7,444 sf in area. On February 23, 2023, the City of Newark City Council authorized the City Manager to execute the Purchase Sale Agreement (PSA) to complete the sale and conveyance of the City property to the property owner of the Project site to be incorporated into the Project. Pursuant to the PSA (executed on February 23, 2023), the purchase of the City property must be completed within 120 days after the City Council's approval of the Project, or such earlier date as mutually agreed upon by the City and property owner.

The Project site is currently developed with three buildings totaling 34,219 square feet. A warehouse building, constructed in 1979, is located on the northwest side, an L-shaped garage building occupied by a garage and offices and a ranch style office building, both constructed in 1962, are located in the southeastern portion of the Project site.

The garage building is occupied by a garage and offices. The warehouse and the garage buildings are clad in corrugated metal sheets with metal roof and are utilitarian buildings. The ranch style office is so called because of the style of the building. It is a one story, wood framed building with very shallow-pitched cross hip and gable roofs. The building is finished in stucco with stone cladding at the entry and horizontal wood under the gable ends of the composition shingle roof. The remainder of the site is occupied by a parking lot and is devoid of vegetation and trees with the exception of shrubbery along the rear property boundary. Grown coniferous trees are located in the Cedar Boulevard right-of-way at the front of the Project site, which is fenced in with a metal fence with plastic planks to this (southwest) side.

The Project site is accessed via one, two-way driveway, which is located in line with Moores Avenue that meets Cedar Boulevard on its southwest side. A bus stop served by AC Transit is located at the front of the Project site, near the Cedar Boulevard and Moores Avenue intersection. Sidewalks and Class II[1] bicycle lanes are located on both sides of Cedar Boulevard fronting the Project site.

The Project site has been historically used for construction and agricultural equipment rental, sales, and/or repair businesses and is currently used as a construction and forestry equipment rental facility. Five underground storage tanks (USTs) were removed from the site in 1989. Currently, there are hazardous materials, petroleum-containing products, and other features of potential environmental concern identified on the site, including but not limited to, two active concrete above-ground storage tanks (ASTs) which contained diesel and used waste oil, and four empty ASTs that formerly contained oil and petroleum products. The uses of the Project site have led to hazardous materials contamination on the site. The Project site is included on the Cortese List[2] as a hazardous waste materials site with open Leaking Underground Storage (LUST) and Program Clean Up cases (Case No. NORTRAX WEST T0600100516 and Case No. NORTAX WEST SCP T10000020483, respectively), as identified on the State Water Resources Control Board's GeoTracker Database with ongoing site assessment activities[3].

2.3. PROJECT DESCRIPTION

The 38600 Cedar Boulevard Residential Development Project proposes demolition of all existing buildings, pavement, and improvements on the Project site and construction of 76 alley-loaded three-story, three- and four-bedroom residential units that would range in floor area from 1,334 sf to 1,823 sf on the approximately 3.72-acre site (Project). The 76 residential units would be provided in a grouping of five- and six-plex buildings. The Project would include 190 parking spaces, a two-car garage for each residential unit totaling 152 garage parking spaces and a total of 38 surface parking spaces for guests that would include six electric vehicle (EV) spaces. These spaces would be located near the front entrance and the southeastern corner of the Project site. Each residential garage would also be EV-ready. The Project's energy supply would be required to be electric with high-efficiency appliances. The proposed buildings would feature high-performance windows and Cool Roofs[4]. Additionally, the Project would include sustainability features consisting of low flow fixtures, solar-ready homes and drought tolerant landscaping.

The residences would provide a total of 5,995 sf in private open space consisting of second floor balconies. Additionally, the Project proposes first (ground) floor patios with the residences. 16,808 sf of common open

1 Lanes on roadways designated for use by bicycles through striping, pavement legends, and signs.
2 The provisions in Government Code Section 65962.5, pursuant to which hazardous waste materials sites are compiled, are commonly referred to as the Cortese List. A property is considered on the Cortese List if it appears on one or more lists or databases maintained by state regulatory agencies.
3 As defined by the State Water Resources Control Board site assessment activities include, but are not limited to, identification of the contaminants and the investigation of their potential impacts, determination of the threats/impacts to water quality, evaluation of the risk to humans and ecology, delineation of the nature and extent of contamination, delineation of the contaminant plume(s), and development of the Site Conceptual Model.
4 Cool Roofs are designed to reflect more sunlight than a conventional roof, absorbing less solar energy.

space would be provided predominantly along the rear property line of the Project site. There would be some common open space in five other locations on site, as shown in **Figure 3. Site Plan**. New landscaping including trees, shrubs, and groundcover would be provided near the entrance to the site and along pedestrian walkways between the buildings. Pedestrian bollard lights would be provided along the interior walkways and downward light fixtures would be located at each of the garage entrances to the residential units. Additionally, downward pole lighting would be located predominantly along the periphery of the Project site as shown in **Sheet L-3** of the Project plans (**Appendix G**).

As shown in **Figure 3. Site Plan**, the Project would be accessed via a two-way driveway into the site from the signalized intersection at Cedar Boulevard and Moores Avenue. Site circulation would consist of a private internal road that would serve as the central spine and continue as an Emergency Vehicle Access (EVA) out to Cedar Boulevard at the southwestern end of the Project site. 24'-0" wide alleyways would branch out from the central spine to provide access to the 14 residential buildings via two-car garages on the ground floor of each residential unit. Landscaped pedestrian walkways would provide access to the front doors of the residences as shown in **Sheet L-1** of the Project Plans (**Appendix A**) with the walkways between the buildings on the southwest side of the central spine extending out to Cedar Boulevard.

As mentioned above, the site contains multiple easements, which would be addressed in the site design. The easements that would remain on the site are located within the driveway into the site and within the proposed open space at the rear of the Project site.

Off-Site Improvements.

The Project would include the following off-site improvements:

- Widening of Cedar Boulevard on its northeast side along the Project site frontage that would accommodate a 12-foot travel lane, an 11-foot travel lane, a 2-foot bike buffer, and a 5-foot bike lane with a four-to six-foot wide parkway strip behind the curb and 6-foot wide separated meandering sidewalk included in the street section.

- Extension of the existing Cedar Boulevard landscape median island toward the north to create a dedicated left turn pocket at the Cedar Boulevard-Moores Avenue intersection.

- Relocation behind the new curb line of existing utilities including streetlights, fire hydrants, water meters, joint trench boxes as well as the existing storm drainage inlet located at the proposed Project's entrance.

- Relocation behind the new curb line of existing traffic signal heads and pole in the southeast quadrant of the Cedar Boulevard-Moores Avenue intersection.

- New directional curb ramps at the Project entrance and new crosswalks on the eastern and northern legs of the Cedar Boulevard-Moores Avenue intersection.

- Restriping of crosswalk on the southern leg of the intersection to match the new directional curb ramp locations and pedestrian push button location and in the northeastern half of Cedar Boulevard to match the proposed lane widths.

- Installation of a new Cedar Boulevard landscape median north of Moores Avenue intersection to create a dedicated left turn pocket into the project entrance. The landscape median will connect to the new landscape median that will be constructed with the adjacent project.

- A traffic signal and crosswalk improvements at the Cedar Boulevard and Smith Avenue intersection, in accordance with condition of approval (COA) TRAN-1. Traffic signal plans shall be prepared, reviewed, and approved as part of the Project's improvement plans. The adjacent residential development to the west of the Project site is similarly conditioned to provide the traffic signal improvements at Cedar Boulevard and Smith Avenue. If, at the time of final map approval, the

applicant of the adjacent residential development has already provided guarantee(s) or other appropriate improvement security for the traffic signal, the Project will not be required to install the traffic signal.

Existing curb and gutter along the Project Frontage and an existing power pole and guy wire at the Cedar Boulevard-Moores Avenue intersection would be removed for the road widening and existing overhead lines will be undergrounded to the nearest existing power pole on Moores Avenue. Existing overhead lines along the project's easterly property line (adjacent to the I-880 freeway) will also be undergrounded and existing power poles removed.

2.4. CONSTRUCTION

For the purposes of this analysis, it is assumed that construction of the Project would begin in the fourth quarter of 2023 and would take approximately one and a half years to complete. Construction would include demolition, site preparation & grading, utility & building construction, paving, and landscaping/architectural finishes. Construction vehicles would access the site via Cedar Boulevard with construction traffic routed along to and from I-880 via Mowry Avenue to Cedar Boulevard. Construction staging areas will be determined at the time of construction.

Demolition.

This construction phase would include demolition and removal of existing buildings, pavement, service utilities, and above ground storage tanks. The Project proposes to reuse the material that can be reused on site; the demolition material that cannot be used would be hauled off to the Fremont Recycling and Transfer facility on Boyce Road in Fremont. Demolition equipment would include, but not be limited to, concrete saws, excavators, and dozers. Demolition is anticipated to take approximately one month to be completed.

Site Preparation and Grading.

Site preparation and grading would follow demolition activity to allow for the proposed residential development and associated improvements. Grading onsite would result in 9,000 cubic yards of cut and 9,000 cubic yards of fill. As such, the site preparation activities would not result in the export of material. Construction equipment required to accomplish this phase of the construction would include dozers, tractors, loaders, backhoes, excavators, and graders. Site preparation and grading is anticipated to take approximately three weeks to complete.

Utility and Building Construction.

This phase would include construction of the proposed residential buildings and installation of utilities and would require the use of cranes, forklifts, generator sets, welders, tractors, loaders, and backhoes to be accomplished. This phase is anticipated to take approximately one year to be completed.

Street Paving

This phase would entail final street paving across the site that would require the use of cement/mortar mixers, pavers, and rollers. Street paving is anticipated to take approximately one month to be completed.

Architectural Finishes and Landscaping.

This phase would conclude Project construction and would require the use of air compressors for construction equipment. This phase is anticipated to be completed in two months.

2.5. PUBLIC OUTREACH

The applicant provided notice of a community meeting ten days in advance via mail to property owners within 500 feet radius of the Project site. The meeting was conducted on the Project site on April 17, 2023. Three people attended the meeting and received information, but no written comments were submitted.

2.6. ENTITLEMENTS

The Project applicant has requested the following entitlements:

1. Vesting Tentative Map to create one lot and 76 condominium units;
2. Design Review of the proposed buildings and site improvements; and
3. Minor Use Permit for buildings heights above 35’-0” and fences/walls above 6’-0”.

3. APPLICABLE CEQA PROVISIONS AND FINDINGS

The following discussion presents the relevant provisions of CEQA to which the proposed 38600 Cedar Boulevard Residential Development Project complies. It provides an overview of the Community Plan Exemption, determination of consistency with the City's program level Environmental Impact Report (EIR) for the General Plan (referred to as "General Plan Tune Up" in the 2013 FEIR) and the Final Environmental Impact Report (FEIR), 2013. A description of how the Project complies with each provision is presented below. Finally, this section concludes with the CEQA finding and determination that the project is exempt from further environmental review.

3.1. GENERAL PLAN EIR (2013 FEIR)

The City of Newark General Plan that was adopted in 2013 serves as the document that guides future development citywide and expresses the community's development goals and public policies relative to land uses. The General Plan EIR (2013 FEIR) assesses potentially significant environmental impacts associated with implementation of the General Plan. The 2013 FEIR was prepared in order to provide the public, responsible agencies, and decision makers with information about the probable environmental effects of adoption and implementation of the General Plan. The 2013 FEIR serves as a programmatic document that is intended to be used to evaluate subsequent projects and activities within the planning area. The findings of the 2013 FEIR are presented below in Section 4 for each environmental category.

3.2. CONSISTENCY WITH PROGRAM EIR (CEQA GUIDELINES SECTION 15168)

The City of Newark certified the 2013 FEIR, a program level EIR, that includes an analysis of the development potential of the 38600 Cedar Boulevard site. The 2013 FEIR provides for streamlining and/or tiering opportunities under CEQA Guidelines Section 15168. CEQA Guidelines Section 15168(c) states that "later activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared."

3.3. APPLICABILITY OF THE 38600 CEDAR BOULEVARD RESIDENTIAL DEVELOPMENT PROJECT TO 15168

The proposed 38600 Cedar Boulevard Residential Development Project is a "later activity" of the program EIR. Section 4 of this CEQA Analysis provides an assessment of the Project's environmental impacts relative to what was analyzed in the 2013 FEIR. As described in Section 4, the Project, does not result in environmental effects that were not previously examined. As such, pursuant to CEQA Guidelines Section 15162 and 15163, no subsequent or supplemental EIR is required. In accordance with CEQA Guidelines Section 15168(c)(2), the City can "approve the activity as being within the scope of the project covered by the program EIR, and no new environmental document would be required."

CEQA Guidelines Section 15168(c)(3) states that "an agency shall incorporate all feasible mitigation measures and alternatives developed in the program EIR into later activities in the program." Section 6 of this CEQA analysis identifies the relevant environmental conditions of approval that will be required of the proposed Project to demonstrate compliance with mitigation measures set forth in the program level EIR, and policies, programs, and goals of the City of Newark General Plan.

As described below in Section 4, for each environmental resource topic in the Environmental Checklist, with implementation of mitigation measures, the proposed project would not result in significant impacts beyond those analyzed in the 2013 FEIR. In addition, the project is subject to the payment of Development Impact Fees, which are collected to offset incremental increases in demands for public services and infrastructure from implementation of the General Plan.

3.4. GENERAL PLAN/COMMUNITY PLAN EXEMPTION (CEQA GUIDELINES SECTION 15183)

California Public Resources Code Section 21083.3 and CEQA Guidelines Section 15183 allow a streamlined environmental review process for projects that are consistent with the densities established by existing zoning, community plan, or general plan policies for which an EIR was certified.

Section 15183 (a) “mandates that projects which are consistent with the development density established by existing zoning, community plan, or general plan policies for which an EIR was certified shall not require additional environmental review, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site. This streamlines the review of such projects and reduces the need to prepare repetitive environmental studies.”

Section 15183(b) specifies that “in approving a project meeting the requirements of Section 15183, a public agency shall limit its examination of environmental effects to those which the agency determines, in an initial study or other analysis:

1) Are peculiar to the project or the parcel on which the project would be located;

2) Were not analyzed as significant effects in a prior EIR on the zoning action, general plan, or community plan, with which the project is consistent;

3) Are potentially significant off-site impacts and cumulative impacts which were not discussed in the prior EIR prepared for the general plan, community plan or zoning action; or

4) Are previously identified significant effects which, as a result of substantial new information which was not known at the time the EIR was certified, are determined to have a more severe adverse impact than discussed in the prior EIR.”

Section 15183(c) specifies that if an impact is not peculiar to the parcel or to the project, has been addressed as a significant effect in the prior EIR, or can be substantially mitigated by the imposition of uniformly applied development policies or standards, then an additional EIR need not be prepared for the project solely on the basis of that impact.

Section 15183(d) further states that the streamlining provisions of this section “shall apply only to projects that meet the following conditions:

(1) the project is consistent with a community plan adopted as part of a general plan, a zoning action which zoned or designated the parcel on which the project would be located to accommodate a particular density of development, or a general plan of a local agency; and

(2) an EIR was certified by the lead agency for the zoning action, the community plan, or the general plan.”

3.5. APPLICABILITY OF THE 38600 CEDAR BOULEVARD RESIDENTIAL DEVELOPMENT PROJECT TO 15183

The proposed 38600 Cedar Boulevard Residential Development Project is consistent with the General Plan land use designation and zoning for the site, as outlined below, and meets the streamlining provisions under CEQA Guidelines Section 15183(d)(1):

(d)(1)(A) The project is consistent with a community plan adopted as part of a general plan.

The City of Newark General Plan was approved and the EIR (SCH Number 2013012052) was certified on November 12, 2013, by City Council Resolution Number 10,415. The Project is located in the eastern part of Newark on a site that carries a Medium Density Residential land use designation and is zoned Residential Medium Density (RM). The Medium Density Residential land use designation allows for 14-30 units per net acre and is intended for garden apartments and condominiums, townhomes, row houses, 4 to 8-plexes, and older areas that contain a mix of multi-family and single-family homes within the 14-30 units per net acre density range.

Consistent with the density and intent of the Medium Density Residential land use designation, the Project proposes construction of 76 alley-loaded three-story, three- and four-bedroom residential units (townhomes) upon demolition of all existing buildings, pavement, and improvements on the Project site. The Project site is also a part of the Cedar Boulevard Industrial to Residential Conversion area identified as Site “G” in the City

of Newark Housing Element Update 2015 as part of the Regional Housing Needs Assessment (RHNA) for development as an infill site within the range of densities proposed and planned for in the City's General Plan.

(d)(1)(B) The project is consistent with a zoning action which zoned or designated the parcel on which the project would be located to accommodate a particular density of development.

The Project is subject to and consistent with the applicable development standards and zoning requirements within the General Plan and the City of Newark Zoning Code (Title 17 of the Newark Municipal Code). The Project meets applicable policies and actions of the General Plan and the applicable development standards within the Zoning Code.

(d)(1)(C) The project is consistent with the City of Newark General Plan.

As described above, The Project is proposed and would be developed consistent with the density and intent of the Medium Density Residential designation of the City's General Plan. The proposed Project is consistent with applicable General Plan policies, including, but not limited to:

- Policy LU-1.7 Executive Housing. Develop and maintain a range of housing types in the city, including executive housing which provides residents with opportunities for "move up" housing within the city.

- Policy LU-2.2 Context-Sensitive Design. Require that new structures, additions, and major renovations are aesthetically compatible with existing structures and the surrounding context, and contribute positively to the visual quality of neighborhoods.

- Policy LU-2.4 Buffering from Transportation Facilities. Ensure that the design of new residential development near rail lines, truck routes, freeways, or major thoroughfares includes setbacks, landscape screening, and other provisions to minimize exposure to negative impacts such as noise and air pollution.

- Policy LU-2.8 Relating Density to Transit Service. Allow higher residential densities in areas with more frequent and reliable public transit service, and ensure that public transit services are expanded in areas where growth is projected.

- Policy HW-2.1 Promoting Walking and Bicycling. Promote walking and bicycling as a healthier and more appealing alternative to driving for short-distance trips. This should include improved safety features such as marked crosswalks, high-visibility road markings, crossing islands, curb extensions, and other improvements that improve pedestrian safety. It should also include streetscape, landscaping, and bike lane improvements that make walking and bicycling more comfortable and pleasant.

- Policy T-2.2 Pedestrian Facilities. Work to close gaps in the pedestrian network and improve sidewalk connectivity between residential and commercial areas. Develop curbs, gutters, and sidewalks on all remaining Newark streets not yet fully improved to encourage safe, convenient pedestrian travel. Where appropriate, include marked crosswalks at intersections and install pedestrian countdowns at traffic signals to facilitate safe pedestrian movement across City streets.

3.6. CEQA DETERMINATION AND SUMMARY OF FINDINGS

As summarized above and presented herein, the proposed 38600 Cedar Boulevard Residential Development Project is eligible for the following CEQA exemptions:

Consistency with Program EIR. The City of Newark 2013 FEIR provides for streamlining and/or tiering provisions under CEQA Guidelines Section 15168. This CEQA Analysis demonstrates that the Project would not result in substantial changes or involve new information that would warrant preparation of a subsequent EIR because the level of development proposed is within the development assumptions analyzed in the program level EIR (2013 FEIR). No further environmental review is required.

Community Plan Exemption. Streamlined environmental review per Section 15183 of the CEQA Guidelines and California Public Resources Code Section 21083.3. The Project is consistent with the General Plan and will not result in significant environmental impacts that were not previously identified as significant project-level, cumulative or offsite effects in the 2013 FEIR. The Project is exempt from further CEQA review since it is consistent with the General Plan.

Findings Summary

As described herein, the proposed 38600 Cedar Boulevard Residential Development Project is within the scope of development projected under the General Plan for which an EIR was certified in 2013. The proposed Project will implement applicable mitigation measures identified in the 2013 FEIR. In addition, the Project would be required to comply with applicable conditions of approval and subject to uniformly applied development standards. With implementation of required mitigation measures and conditions of approval, the Project would not result in a substantial increase in the severity or significant impacts that were previously identified in the program level EIR, nor would the Project introduce any new significant impacts that were not previously identified. Therefore, there would be no additional environmental impacts beyond those analyzed in the 2013 FEIR.

3.7. ENVIRONMENTAL CONDITIONS OF APPROVAL

The Project shall incorporate all feasible mitigation measures set forth in findings of fact for prior applicable Environmental Impact Reports (EIR). The following EIRs have been determined by the City to be applicable to the Project:

- City of Newark General Plan EIR (SCH Number 2013012052)

In each impact section of the Evaluation of Environmental Impacts, applicable mitigation measures from the findings of fact for the certified EIR are identified. Section 6 of this CEQA Analysis identifies relevant conditions of approval for the Project derived from mitigation measures, policies, and implementing programs established in the City's General Plan and the certified 2013 FEIR.

Conditions of approval have been identified throughout the following analysis to ensure implementation of applicable mitigation measures and policies set forth in the General Plan and its EIR. The 38600 Cedar Boulevard Residential Development Project applicant has reviewed, accepted, and shall implement all conditions of approval as part of the Project.

4. EVALUATION OF ENVIRONMENTAL EFFECTS

This section examines the Project's potential environmental effects within the parameters outlined in CEQA Guidelines Section 15183(b). The "Prior EIRs" (as defined in CEQA Guidelines Section 15183(b)(3)) is the City of Newark General Plan EIR (2013 FEIR), inclusive of all impact determinations, significance thresholds and mitigation measures identified therein.

Th evaluation builds from the Appendix G Environmental Checklist and has been modified to reflect the parameters outlined in CEQA Guidelines Section 15183(b). The checkboxes in the evaluation below indicate whether the proposed Project would result in environmental impacts, as follows:

- **New Significant Impact –** The proposed Project would result in a new significant impact that was not previously identified in the 2013 FEIR.

- **Substantial Increase in Severity of Previously Identified Significant Impact in GP EIR –** The proposed Project's specific impact would be substantially greater than the specific impact described in the 2013 FEIR.

- **Substantial Change Relative to GP EIR –** The proposed Project would involve a substantial change from analysis conducted in the 2013 FEIR.

- **Equal or Less Severity of Impact than Previously Identified in GP EIR –** The severity of the specific impact of the proposed Project would be the same as or less than the severity of the specific impact described in the 2013 FEIR.

Where the severity of the impacts of the proposed Project would be the same as or less than the severity of the impacts described in the 2013 FEIR, the checkbox for Equal or Less Severity of Impact Previously Identified in FEIR is checked. Where the checkbox for Substantial Increase in Severity of Previously Identified Significant Impact in FEIR or New Significant Impact is checked, there are significant impacts that are:

- Peculiar to project or project site (CEQA Guidelines Section 15183[b][3]);

- Not analyzed as significant impacts in the previous EIRs, including off-site and cumulative impacts (CEQA Guidelines Section 15183[b][2]);

- Due to substantial changes in the project (CEQA Guidelines Section 15162[a][1]);

- Due to substantial changes in circumstances under which the project will be undertaken (CEQA Guidelines Section 15162[a][2]); or

- Due to substantial new information not known at the time the EIRs were certified (CEQA Guidelines Sections 15162[a][3] and 15183[b][4]).

As described herein, the proposed Project will be required to comply with all applicable mitigation measures identified in the 2013 FEIR.

This evaluation hereby incorporates by reference the 2013 FEIR discussion and analysis of all environmental topics. The 2013 FEIR significance thresholds have been consolidated and abbreviated in this Checklist; a complete list of the significance thresholds can be found in the 2013 FEIR.

The 2013 FEIR is a program level document that considers the combined effects of implementing several related projects. As such, the analyses presented in the 2013 FEIR represent a cumulative analysis of environmental impacts that may occur from buildout of the General Plan.

4.1. AESTHETICS

Except as provided in Public Resources Code Section 21099, would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Have a substantial adverse effect on a scenic vista?	☐	☐	☐	☒
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	☐	☐	☐	☒
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Architectural Plan Set, prepared by WHA Architects, Planners, Designers., dated April 21, 2023.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to aesthetics in Chapter 4.1 in the Plan Area incorporating the City of Newark and determined the following:

- Impact AES-1: The proposed Plan would not have a substantial adverse effect on a scenic vista and the impact of the proposed Plan on scenic vistas subject to the City of Newark Municipal Code (NMC), Chapter 17.16.220 Design Guidelines and implementation of General Plan Policies LU-4.13, LU-4.14 and POS-1.6. This impact is considered to be less than significant.

- Impact AES-2: The proposed Plan would not substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings, within a State scenic highway and the proposed Plan would have no impact on these resources.

- Impact AES-3: The proposed Plan would result in a significant impact to the visual character of the Southwest Newark Residential and Recreational Focus Area and there is no feasible mitigation which would reduce impacts to a less-than significant level. This impact would be significant and unavoidable. A statement of overriding consideration was adopted with certification of the 2013 FEIR.

- Impact AES-4: The Plan would not create a new source of substantial light or glare which would adversely affect day or nighttime views in the area subject to compliance with NMC regulations intended to limit adverse light and glare impacts and the implementation of General Plan Policies LU-4.7 and PROS-3.5. This impact is considered less than significant.

General Plan Policies and Actions would render most impacts less than significant, however not all impacts may be reduced to less than significant levels. A statement of overriding consideration was adopted with the certification of the 2013 FEIR.

Project Consistency with the 2013 FEIR

4.1(a) (Scenic Vistas) No Change Relative to the 2013 FEIR: The 2013 FEIR determined that there are no designated scenic vistas within the City and the General Plan does not identify any specific vistas or views for special protection in the future. However, views of the Coyote Hills to the northeast, of Mission Peak to the east, and of the East Bay Hills to the east and southeast are available from open spaces within the Plan Area. The 2013 FEIR concluded impacts to scenic vistas would be less than significant with implementation of the General Plan.

The Project proposes the construction of 76 three-story residential units that would replace the existing one-story buildings on the Project site consistent with the use and density contemplated by the General Plan. The closest open spaces to the project site are Byington Park on Central Avenue and Birch Grove Park on Birch Street. There could potentially be distant views of the hills to the east from these open spaces, however, these views are obscured by existing development. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.1(b) (Scenic Highways) No Change Relative to the 2013 FEIR: The 2013 FEIR determined that there are no State designated scenic highways in or adjacent to Newark. Accordingly, the Project will have no impact on scenic resources within a state scenic highway. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.1(c) (Scenic Quality) No Change Relative to the 2013 FEIR: The 2013 FEIR determined that there would be significant and unavoidable impacts related to scenic quality in the Southwest Newark Residential and Recreational Focus Area. The Project site is located away from this area near the eastern edges of the city, adjacent to I-880. The 3.72-acre Project site is zoned Residential Medium Density (RM) and would be developed with a total of with 76 residential units at a density of 20.43 units per acre that is within the allowable density of 14-30 units per acre in the RM zoning district. The Project would be required to comply with Policy LU-4.12 of the City's General Plan regarding fences and gates that would be required to be compatible with adjacent structures and with the neighborhood context. Through the design review process, the Project would also be required to comply with Policy LU-2.2 regarding context-sensitive design such that the Project would be aesthetically compatible with existing structures and the surrounding context, and would contribute positively to the visual quality of neighborhoods. The Project would not have any substantial adverse effect on scenic vistas as discussed in 4.1(a) above and would not conflict with General Plan Policy LU-4.14 that speaks to the protection and enhancement of panoramic views and vistas of horizon features such as Coyote Hills, Mission Peak, the East Bay and Peninsula Hills, and San Francisco Bay. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.1(d) (Lighting and Glare) No Change Relative to the 2013 FEIR: The 2013 FEIR determined that future development under the General Plan may create new sources of light and glare, but determined that in the urbanized context of Newark this increase would not substantially and adversely affect daytime or nighttime views. The 2013 FEIR identified compliance with the NMC regulations intended to limit adverse light and glare impacts and the implementation of General Plan Policies LU-4.7 and PROS-3.5 as the means to address adverse light and glare impacts.

Proposed exterior lighting would be in conformance with Policy LU-4.7 and applicable provisions of the NMC implemented through a standard condition of Design Review approval such that it is directed on-site and not create glare off-site. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The Project would not result in any substantial new or more severe impacts to aesthetics relative to what was identified in the 2013 FEIR. The Project would be required to comply with City of Newark regulations that implement General Plan policies, including Zoning Code standards intended to limit adverse light and glare impacts captured in the following environmental condition of approval:

COA AES-1: All exterior lighting shall comply with all applicable regulations in NMC §17.17.060 (Lighting and Illumination) and NMC Chapter 17.23 (Parking and Loading). All exterior lighting shall be directed on-site so as not to create glare off-site, as required by the Community Development Director.

4.2. AGRICULTURAL AND FORESTRY RESOURCES

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	☐	☐	☐	☒
d) Result in the loss of forest land or conversion of forest land to non-forest use?	☐	☐	☐	☒
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; and California Department of Conservation Farmland Mapping and Monitoring Program.

General Plan EIR Findings

The 2013 General Plan Tune Up EIR determined under Chapter 7.1 that implementation of the General Plan would not result in any potentially significant impacts to agricultural and forestry resources because the city is located in a highly urbanized sector of Alameda County. There are no forest resources or timberland resource zones in Newark or the surrounding area, and there is no active timberland production in the general vicinity of the Plan Area. And conversion to nonagricultural uses of portions of the Plan Area that are in agricultural use would not make a cumulatively considerable contribution to the loss of agricultural lands in the surrounding area.

Project Consistency with the 2013 FEIR

4.2(a-e) (Farmland, Agricultural Land, Forest Land) No Change Relative to the 2013 FEIR: The 2013 FEIR determined that buildout would result in a less than significant impact to agricultural resources. The Project site is highly developed with existing buildings and paving. It does not contain farmland or forest land pursuant to Section 12220(g) of the Public Resources Code. As the Project is within the scope of development projected under the General Plan/Specific Plan and the 2013 FEIR, there would be no additional impacts to agricultural and forestry resources beyond those analyzed in the 2013 FEIR.

Conclusion

The Project would not result in any new or more severe impacts to agricultural and forestry resources relative to what was identified in the 2013 FEIR. The Project consists of development within an urban context that would not impact agricultural or forestland resources and is consistent with the City's General Plan. No environmental conditions of approval related to agriculture and forestry resources are required.

4.3. AIR QUALITY

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☒	☐
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	☐	☐	☒	☐
c) Exposure of sensitive receptors to substantial pollutant concentrations?	☐	☐	☒	☐
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	☐	☐	☒	☐

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Air Quality and Greenhouse Gas Analysis, prepared by LSA, November 7, 2022.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to air quality in Chapter 4.2 of the General Plan Tune Up EIR and determined the following:

- Impact AIR-1: Buildout of the proposed project (General Plan) would not be consistent with the Bay Area Clean Air Plan (2010) because the projected vehicle miles traveled (VMT) increase from the build out would be greater than the projected population increase. Although the General Plan contains goals, policies and actions to address future increase in VMT and criteria air pollutants, the impact would be significant and unavoidable, and there are no available mitigation measures. A statement of overriding consideration was adopted with certification of the 2013 FEIR.

- Impact AIR-2 and AIR-3: Subsequent land use activities associated with implementation of the proposed project (General Plan) would generate an increase in operational and construction related emissions of criteria air pollutants in the Plan area. However, they would not violate any air quality standard or contribute substantially to an existing or projected air quality violation with implementation of General Plan Policies CS-5.1 to CS-5.5, T-1.1 to T-1.3, T-1.6, T-2.1 to T-2.11, T-3.1 to T-3.9, T-4.1 to T-4.9, LU-1.1 to LU-1.4, and LU-4.2 as they relate to operational emissions, and compliance with Bay Area Air Quality Management District (BAAQMD) Basic Control Measures pursuant to General Plan Action HW-1.G, and Action HW-1.I as they relate to construction emissions. This impact is considered less than significant.

- Impact AIR-3: Subsequent land use activities associated with implementation of the proposed project (General Plan) would not result in significant impacts with respect to the placement of sensitive receptors proximate to major sources of air pollution or the siting of new sources of air pollution proximate to sensitive receptors in the City subject to implementation of General Plan Policies LU-2.4 and LU-2.C, and Action HW-1.F. This impact is considered less than significant.

- Impact AIR-4: Subsequent land use activities associated with implementation of the proposed project (General Plan) would not result in significant impact with regard to creating or exposing a substantial number of people to objectionable odors subject to implementation of General Plan Action HW-1.H, as applicable. This impact is considered less than significant.

Implementation of the General Plan would result in potentially significant air quality impacts. General Plan Policies and Actions would render most impacts less than significant, however not all impacts may be reduced to less than significant levels. A statement of overriding consideration was adopted with the certification of the 2013 FEIR.

Project Consistency with the 2013 FEIR

4.3(a) (Conflict with Plan) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR found that build out of the General Plan would result in significant and unavoidable impacts on air quality. The 2013 FEIR determined that while the General Plan would support the primary goals of the 2010 Bay Area Clean Air Plan, buildout of the proposed Plan would not be consistent with the Clean Air Plan because the projected vehicle miles traveled (VMT) increase from buildout of the proposed Plan would be greater than the projected population increase. As it relates to the General Plan, the development proposed by the proposed Project is within the projections analyzed in 2013 FEIR and would not create new impacts, more significant impacts, or a substantial change from the 2013 FEIR.

In the 2017 BAAQMD CEQA Air Quality Guidelines, the BAAQMD established thresholds of significance for construction and operation for emission levels that, if exceeded, may be considered potentially significant impacts. Project-specific analysis of air pollutant emissions, (**Appendix A**), quantifies emission from short-term construction-related activities (e.g., demolition, grading, building, paving, construction equipment, worker trips etc.) and long-term operations (e.g., resident and visitor vehicle use and area sources from consumer products, and landscaping maintenance equipment). Air quality emissions generated by the Project would not exceed BAAQMD significance thresholds during construction or operation, as shown in Tables 1 and 2 below.

Table 1. Construction Emissions

Pollutant	BAAQMD Threshold (pounds/day)	38600 Cedar Boulevard Residential Development Project Daily Average (pounds/day)
ROG (reactive organic gases)	54	3.2
NOX (nitrogen oxides)	54	10.1
PM10 (particulate matter-10 microns)	82 (exhaust)	0.6
PM2.5 (particulate matter-2.5 microns)	54 (exhaust)	0.6
PM10/PM2.5 (fugitive dust)	BMPs*	Required to comply with BMPs

Source: Air Quality and Greenhouse Gas Analysis for the proposed Cedar Townhomes Project at 38600 Cedar Boulevard, Newark, California, October 2022, prepared by LSA.
* Best Management Practices.

Table 2. Operational Emissions

	Annual Average (tons/year)	
Pollutant	**BAAQMD Threshold**	**38600 Cedar Boulevard Residential Development Project**
ROG (reactive organic gases)	10	0.6
NOX (nitrogen oxides)	10	0.3
PM10 (particulate matter-10 microns)	15	0.5
PM2.5 (particulate matter-2.5 microns)	10	0.1

Source: Air Quality and Greenhouse Gas Analysis for the proposed Cedar Townhomes Project at 38600 Cedar Boulevard, Newark, California, October 2022, prepared by LSA.

BAAQMD does not have a quantitative threshold of significance for fugitive dust. However, the 2017 BAAQMD CEQA Guidelines provide recommendations for best management practices to reduce emissions, including fugitive dust. Action HW-1.G identified in the 2013 FEIR as set forth in the General Plan requires the use of BAAQMD-recommended basic construction control measures to limit emissions of construction-related criteria pollutants, including fugitive dust. Best management practices from the latest BAAQMD CEQA Air Quality Guidelines are required to be implemented by the Project as imposed by condition of approval (COA) AQ-1, consistent with Action HW-1.G. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.3(b) (Increase Criteria Pollutants) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that cumulative impacts related to criteria air pollutant increases would be the same as the Plan-specific impacts. The Project is consistent with the projected buildout of the General Plan. At the Project-level, analysis of criteria pollutant emissions from development of the Project, as described above in 4.3(a), indicate that the Project would have emissions that are below the BAAQMD thresholds of significance as shown in Table 1 and 2 above. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.3.(c) (Sensitive Receptors) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined impacts to sensitive receptors would be less than significant with the implementation of General Plan Policies LU-2.4 and Actions LU-2.C and Action HW-1.F. Action HW-1.F. In accordance with Policy LU-2.4, related to buffering from transportation facilities applicable to the Project, the Project proposes a landscaped buffer that is a minimum of 20.4 foot deep between the development and I-880. In accordance with Action HW-1.F, a health risk assessment (HRA) was conducted as part of the Air Quality and Greenhouse Gas Analysis prepared for the Project to assess impacts to sensitive receptors that are defined as residential uses, schools, daycare centers, nursing homes, and medical centers. Single-family residences are located approximately 120 feet southwest of the Project site boundary across Cedar Boulevard and multi-family residential uses are located approximately 340 feet southeast of the Project site along Cedar Court. Additionally, single-family residences are located approximately 270 feet northeast of the Project site across I-880. A school (Kings Kids Preschool) is located approximately 700 feet to the northwest of the Project site.

The Project proposes a residential use that is not associated with sources of emissions during operations that would significantly affect sensitive receptors. Construction activities would result in short-term emissions that could potentially impact nearby sensitive receptors. During construction, onsite activities will result in airborne particles from site disturbance and construction equipment emissions (i.e., diesel particulate matter exhaust emissions from vehicles and heavy equipment operations).

The HRA evaluated construction period health risks to offsite receptors and found that the risk associated with project construction at the maximally exposed individual (MEI), which is the nearest sensitive receptor would be 27.63 in one million. This risk exceeds the BAAQMD cancer risk threshold of 10 in one million. Therefore, the HRA recommends construction equipment controls to reduce the risk below the BAAQMD threshold and consequently to a less than significant level. COA AQ-2 is included below, pursuant to Action HW-1.F, to ensure implementation of the recommendation set forth in the HRA.

The HRA also evaluated potential health risks to the Project's residential occupants and found that the MEI inhalation cancer risk associated with I-880 adjacent to the Project site would be 53.95 in one million, which would exceed the BAAQMD threshold of 10 in one million. Condition of approval (COA) AQ-3 incorporates the recommendations identified in the HRA to reduce this potential exposure risk to fall below the BAAQMD threshold, pursuant to Action HW-1.F. With implementation of COA AQ-2 and COA AQ-3, sensitive receptors would not be exposed to substantial pollution concentrations. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.3(d) (Odors) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that impacts due to odors would be less than significant with implementation of General Plan Action HW-1.H, which requires

an evaluation of the potential for proposed projects to emit nuisance odors beyond the property line and that property owners submit odor management plans consistent with BAAQMD regulations.

As a residential development, the Project does not involve operations that may generate substantial odors, such as manufacturing, refineries, landfills, or treatment uses. The 2017 BAAQMD CEQA Guidelines contain procedures for evaluating odors for projects subject to CEQA. While BAAQMD has not established CEQA significance thresholds for odors generated as a result of project construction, the Guidelines specify an operational threshold of five confirmed complaints per year averaged over three years. Further, the City of Newark provides information on the mechanism for filing a complaint.

During construction, odors may be emitted from construction equipment and vehicles, but are temporary in nature and would be minimized through best management practices. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The proposed Project is within the scope of development projected under the General Plan, and there would be no additional impacts to air quality beyond those analyzed in the 2013 FEIR. The following environmental conditions of approval would apply to the Project in accordance with Actions HW-1.G and HW-1.F included in the General Plan.

COA AQ-1: Consistent with the Bay Area Air Quality Management District (BAAQMD) Basic Construction Mitigation Measures, the following controls are required to be included as specifications for the proposed project and implemented at the construction site to control for fugitive dust and exhaust as follows:

1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

2. All haul trucks transporting soil, sand, or other loose material off site shall be covered.

3. All visible mud or dirt tracked-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour.

5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible.

6. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

7. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California Airborne Toxics Control Measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

8. All construction equipment shall be maintained and properly tuned in accordance with manufacturers' specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.

9. A publicly-visible sign shall be posted with the telephone number and person to contact at the City of Newark regarding dust complaints. This person shall respond and take

corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

COA AQ-2: During construction of the proposed project, the project contractor shall ensure all off-road diesel-powered construction equipment of 50 horsepower or more used for the project construction at a minimum meets the California Air Resources Board Tier 3 emissions standards with level 3 diesel particulate filters or equivalent.

COA AQ-3: The following measures shall be required to reduce toxic air contaminants (TACs) and particulate matter indoors to a level sufficient to achieve compliance with BAAQMD health risk thresholds:

1. The project applicant shall provide an HVAC system with a control efficiency sufficient to result in a reduction of a minimum 85 percent of particulates of 10 microns or less, such as Minimum Efficiency Reporting Value (MERV)-9 filters or greater, for indoor air filtration systems. The ventilation system shall be certified to achieve the stated performance effectiveness from indoor areas.

2. The project applicant shall locate all air intakes as far away from Interstate 880 (I-880) as feasible.

3. The project applicant shall disclose to potential occupants of the project that the proximity of the project site to the freeway could result in increased long-term health risks. The disclosure shall indicate the specifications for the installed air filtration system.

4.4. BIOLOGICAL RESOURCES

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☒
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	☐	☐	☐	☒
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☒
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☐	☒

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☒
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013.

General Plan EIR Findings

Biological resources are protected by federal and state statute including the Federal Endangered Species Act (FESA), the California Endangered Species Act (CESA), the Clean Water Act (CWA), and the Migratory Bird Treaty Act (MBTA) which affords protection to migratory bird species including birds of prey. These regulations provide legal protection for identified plant and animal species of concern and their habitat.

The 2013 FEIR evaluated potential impacts to biological resources in Chapter 4.3 and determined the following:

- Impact BIO-1: Implementation of the proposed project (General Plan) would not have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service, This impact is considered less than significant subject to the implementation of General Plan Policies CS-1.1 to 1.3, CS-2.1 to CS-2.7, and Actions CS-1.A and CS-2.C.

- Impact BIO-2: Implementation of the proposed project (General Plan) would not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service in the Plan Area. This impact is considered less than significant, subject to the implementation of mitigation measures MM BIO-2.1 to 2.5 from the Area 3 and 4 Specific Plan EIR, as applicable, and implementation of General Plan Goal CS-2, Policies CS-1.1, CS-1, CS-4, CS-3.4 to CS-3.6, and Actions CS1.A, CS2.B, CS2.C, CS3.H, CS T-2B.

- Impact BIO-3: Implementation of the proposed project (General Plan) would not have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means, This impact will be less than significant. subject to the implementation of General Plan Goal CS-1, Policies CS-2.3 to CS-2.5, CS-2.8, and Actions CS2.B, CS2.C, CS.E, CS T-2.B.

- Impact BIO-4: Implementation of the proposed project (General Plan) would not interfere substantially with the movement of any native resident or migratory fish or wildlife species, or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites. This impact is considered less than significant subject to the implementation of General Plan Policies CS-1.2, CS-1.3, CS-2.1, CS-2.3, CS-2.5, and Actions CS1.A, Actions CS2.B, Actions CS2.E.

- Impact BIO-5: Implementation of the proposed project (General Plan Update) would not conflict with the City of Newark tree preservation ordinance, subject to the implementation of General Plan Goal CS-4, Policies CS-4.1 and CS-4.3, and Actions CS4.A, CS4.D. This is considered a less than significant impact.

- Impact BIO-6: Implementation of the proposed project (General Plan) would result in less than significant impact to the Basin Plan and Habitat Goals, local and regional habitat conservation planning

initiatives relevant to Newark. This impact is considered less than significant, subject to implementation of General Plan Policies CS-2.4, CS-2.5, CS-2.8, and Actions CS-2.B, CS2-C, CS-2.E.

- Impact BIO-7: Implementation of the proposed project (General Plan) would result in less-than significant cumulative impacts related to biological resources. This impact is considered less than significant with adherence to applicable federal, State, and local regulations and implementation of mitigation measures identified in the previous Area 3 and 4 Specific Plan and the Dumbarton TOD Specific Plan EIRs previously certified by the City of Newark

As shown on Figure 4.3-1, 4.3-2, and 4.3-3 of the 2013 FEIR, the Project site and vicinity do not contain special-status animal and plant species, sensitive natural communities and habitat and/or wetlands.

Project Consistency with the 2013 FEIR

4.4(a-f) (Special-Status Species and Sensitive Communities, Adverse Effects to Jurisdictional Waters, Adverse Effect on Wildlife Movement, Conflict with Local Ordinances, Conflicts with Habitat Conservation Plans) No Change Relative to the 2013 FEIR: The Project site and vicinity are highly developed with existing buildings and paving. As shown in Figure 4.3-1 to Figure 4.3.3 in the FEIR, this area does not contain special-status animal and plant species, sensitive natural communities and habitat and/or wetlands. As such, the Project would have no impacts to biological resources and would, therefore, not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The Project would not result in any new or more severe impacts to biological resources relative to what was identified the 2013 FEIR. The Project would result in the removal of existing coniferous trees along the Project site's frontage on the Cedar Boulevard side and existing landscape median island on Cedar Boulevard. The following environmental conditions reflect best practices:

COA BIO-1: To avoid and minimize potential impacts to nesting birds including passerines and raptors, the following measures shall be implemented:

1. Grading or removal of potentially occupied habitat should be conducted outside the nesting season, which occurs between approximately February 1 to August 31.

2. If grading between August 31 and February 1 is infeasible and groundbreaking must occur within the nesting season, a pre-construction nesting bird survey (migratory species, passerines, and raptors) of the potentially occupied habitat (trees, shrubs, grassland) shall be performed by a qualified biologist within 7 days of groundbreaking. If no nesting birds are observed no further action is required and grading shall occur within one week of the survey to prevent "take" of individual birds that could begin nesting after the survey.

3. If active bird nests (either passerine and/or raptor) are observed during the pre-construction survey, a disturbance-free buffer zone shall be established around the occupied habitat until the young have fledged, as determined by a qualified biologist.

4. The radius of the required buffer zone can vary depending on the species, (i.e., 75-100 feet for passerines and 200-500 feet for raptors), with the dimensions of any required buffer zones to be determined by a qualified biologist in consultation with CDFW.

5. To delineate the buffer zone around the occupied habitat, construction fencing shall be placed at the specified radius from the nest within which no machinery or workers shall intrude.

6. Biological monitoring of active nests shall be conducted by a qualified biologist to ensure that nests are not disturbed and that buffers are appropriate, adjusted by a qualified biologist as needed to avoid disturbance.

7. No construction or earth-moving activity shall occur within any established nest protection buffer prior to September 1 unless it is determined by a qualified ornithologist/biologist that the young have fledged (that is, left the nest) and have attained sufficient flight skills to avoid project construction zones, or that the nesting cycle is otherwise completed.

COA BIO-2: Prior to any tree removal or alteration, the applicant shall obtain a tree removal permit from the City of Newark Public Works Department and implement tree planting requirements in accordance with development review.

4.5. CULTURAL RESOURCES

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?	☐	☐	☐	☒
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?	☐	☐	☒	☐
c) Disturb any human remains, including those interred outside of formal cemeteries?	☐	☐	☒	☐

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Historic Resource Evaluation, prepared by Diana J. Painter, Painter Preservation, November 21, 2022.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to cultural resources in Chapter 4.4 and determined the following:

- Impact CULT-1: Implementation of the proposed project (General Plan) would not cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5. This impact is considered less than significant subject to implementation of Mitigation Measure 4.4-2 from the 2010 Newark Housing Element EIR that pertains to the Old Town portion of Newark, Mitigation Measure 4.4-1b from the Dumbarton Transit-Oriented Development (TOD) Specific Plan EIR that pertains to the Dumbarton TOD Focus Area (now known as Bayside Newark) and General Plan Goal LU-5, Policies LU-5.1 to LU-5.4, and Actions LU5.A to LU5.E. for the Plan area overall.

- Impact CULT-2: Construction activities associated with the implementation of the proposed project (General Plan) could cause a significant impact to archaeological resources in the Southwest Newark Residential and Recreational Focus Area by potentially damaging or disturbing as yet undiscovered archaeological deposits through the placement of fill and soil compression. Regulatory compliance and the implementation of General Plan Policy LU-5.5 would reduce but not eliminate the potential for damage or disturbance and no additional feasible mitigation exists to further reduce this impact in the Newark Residential and Recreational Focus Area. Therefore, impacts to archaeological resources in the Southwest Newark Residential and Recreational Focus Area would be significant and unavoidable. A statement of overriding consideration was adopted with certification of the 2013 FEIR.

  In the rest of the Plan area this impact would be rendered less than significant with implementation of Mitigation Measure 4.4-1 from the 2010 Housing Element EIR, and Mitigation Measure CUL-2.1 to CULT-2.4 from the Area 3 and 4 Specific Plan EIR, as applicable, and the implementation of General Plan Policy LU-5.5.

- Impact CULT-3 is discussed under Geology and Soils.

- Impact CULT-4: Construction activities associated with the implementation of the proposed project (General Plan) could cause a significant impact to Native American human remains in the Southwest Newark Residential and Recreational Focus Area by potentially damaging or disturbing as yet undiscovered Native American human remains through the placement of fill and soil compression. Compliance with the provisions of SB18, California Health and Safety Code Section 7052 and 7050.5, and California Public Resources Code Section 5097 and 15064.5 together with the implementation of Mitigation Measure 4.4-1 from the 2010 Housing Element EIR, and Mitigation Measures CUL-2.1 through CUL-2.4 from the Area 3 and 4 Specific Plan EIR would reduce this impact. However, damage or disturbance of human remains through the placement of fill and soil compression could still result in a significant impact during construction activities associated with buildout of the General Plan and no additional feasible mitigation exists to further reduce this impact Therefore, impacts to human remains, including those interred outside of formal cemeteries in the Southwest Newark Residential and Recreational Focus Area would be significant and unavoidable. A statement of overriding consideration was adopted with certification of the 2013 FEIR.

  The potential for encountering as yet undiscovered archeological resources is low in the rest of the Plan Area.

- Impact CULT-5: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable projects, would result in less than significant cumulative impacts with respect to cultural resources subject to compliance with federal and State laws protecting cultural resources.

Implementation of the General Plan would result in significant and unavoidable impacts to archaeological resources and human remains in the Southwest Newark Residential and Recreational Focus Area. In other locations in the Plan area, mitigation measures, General Plan Policy LU-5.5 and Actions as identified above would render impacts to cultural resources less than significant. A statement of overriding consideration was adopted with the certification of the 2013 FEIR because not all impacts in the Southwest Newark Residential and Recreational Focus Area may be reduced to less than significant levels.

Project Consistency with the 2013 FEIR

4.5(a) (Historic Resources) No Change Relative to the 2013 FEIR: A historic resource evaluation (HRE) (**Appendix B**) was undertaken in accordance with Action LU-5.A of the 2013 FEIR to establish the historic significance of the buildings at 38600 Cedar Boulevard and ensure that subsequent development projects result in less than significant impacts to historical resources.

The Project site is currently developed with three buildings: A warehouse building, constructed in 1979, located on the northwest side of the Project site, and an L-shaped garage building occupied by a garage and offices and a ranch style office building, both constructed in 1962, located in the southeastern portion of the Project site. The latter two buildings, being over 50 years in age, are subject to a historic resource evaluation. If found to be historic resources under the National Register Criteria for Evaluation, the California Eligibility Criteria, or the City of Newark criteria for designation, the demolition of the two buildings could be found to have an impact under CEQA.

As detailed in the Project's HRE, although the two subject buildings are over 50 years of age, they are not historically significant under any of the aforementioned criteria. They are not found to be a part of important events or patterns of local, state or national history. They are also not significant for an association with people important to local, state or national history. They are neither architecturally significant nor important for their information value. Based on the determination that neither of the two structures evaluated are eligible for listing, the proposed demolition of existing buildings and structures onsite will not result in impacts to an identified or eligible historic district or to an individual historical resource. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.5(b) (Archaeological Resources) No Substantial Change Relative to the 2013 FEIR: As applicable to the Project site, the 2013 FEIR concluded that compliance with Mitigation Measure 4.4-1 from the 2010 Housing Element EIR and General Plan Policy LU-5.5 would ensure that subsequent development projects result in less than significant impacts to archaeological resources.

Mitigation Measure 4.4-1 from the 2010 Housing Element EIR requires that in the event an archeological Native American artifact is identified during residential development, work will cease in the immediate vicinity of the artifact until a resource protection plan conforming to CEQA Guidelines is prepared by a qualified paleontologist and/ or archeologist and approved by the City of Newark. General Plan Policy LU-5.5 requires coordination with local tribal representatives and the Native American Heritage Commission to ensure the protection of Newark's Native American resources and to follow appropriate mitigation, preservation, and recovery procedures in the event that important resources are identified during development.

In accordance with Mitigation Measure 4.4-1 from the 2010 Housing Element EIR, COA CUL-1 is specified below. With implementation of COA CUL-1, the Project will result in less than significant impacts from a substantial adverse change in the significance of an archaeological resource if encountered during construction. Additionally, the City implemented General Plan Policy LU-5.5 by conducting notification on February 8, 2023, to local tribes within the statutory timeframe provided by Public Resources Code §21080.3.1. One response from the Confederated Villages of Lisjan Nation was received on February 9, 2023, with a request for additional information regarding the Project site that was provided to the Tribal representative on February 10, 2023. The City of Newark did not receive any further communication from the above referenced tribe and has not received responses requesting consultation from any other tribes contacted. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR with respect to archaeological resources.

4.5(c) (Discovery of Human Remains) No Substantial Change Relative to the 2013 FEIR: In the event that during ground disturbing activities, human remains are discovered, the Project shall comply with Mitigation Measure 4.4-1 from the 2010 Housing Element EIR as imposed by COA CUL-1, which requires the immediate cessation of ground disturbing activities near or in any area potentially overlying adjacent human remains and contacting the City and County Coroner upon the discovery of any human remains and provisions of state law carried out, which include immediately contacting the Native American Heritage Commission, if it is determined by the City, and County Coroner that the discovered remains are of Native American descent. Compliance with COA CUL-2 as well as California Health and Safety Code Section 7050.5 and performance of actions therein will ensure that in the event of accidental discovery of historically significant remains the Project will result in less than significant impacts. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Condition of Approval

The Project would not result in any new or more severe impacts to archaeological resources relative to what was identified the 2010 FEIR. Implementation of COA CUL-1 below, specified in accordance with Mitigation Measure 4.4-1 from the 2010 Housing Element EIR will ensure that the Project does not result in impacts to buried archaeological resources onsite, if present.

COA CUL-1: During project construction, if historic, archaeological or Native American materials or artifacts are identified, work within 50 foot radius of such find shall cease and the City shall retain the services of a qualified archeologist and/or paleontologist to assess the significance of the find. If such a find is determined to be significant by the archeologist and/or paleontologist, a resource protection plan conforming to CEQA §15064.5 shall be prepared by the archeologist and/or paleontologist and approved by the Community Development Director. The plan may include, but would not be limited to, removal of resources and similar actions. Project work may be resumed in compliance with such a plan. If human remains are encountered, all ground disturbing activities near or in any area potentially overlying adjacent human remains shall cease, the County Coroner shall be contacted immediately, and the provisions of State law carried out.

4.6. ENERGY

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	☐	☐	☐	☒
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013.

General Plan EIR Findings

The 2013 FEIR addresses energy in Chapter 4.2, Air Quality and Chapter 4.6, Greenhouse Gas Emissions, with reference to the control measures from the 2010 Bay Area Clean Air Plan related to energy use, water use and waste generation, and identifies various General Plan policies and actions that would support these measures. These policies and actions, include but are not limited to, green building (Policies CS-6.2, CS-6.3, and CS-6.4, and Actions CS-6.B, CS-6.C and CS-6.D), building codes (Action CS-6.A), and energy efficiency and use (Policies CS-7.1, CS-7.2, CS-7.3, CS-7.4, CS-7.5, and Action CS-7.A, CS-7.B, Action CS-7.C, CS-7.D, and CS-7.F) and implementation of the City's Climate Action Plan programs (Action CS-7.E).

Project Consistency with the 2013 FEIR

4.6(a-b) (Energy Consumption) No Change Relative to the 2013 FEIR: The Project consists of the construction and operation of a multi-family residential development that would be subject to the applicable General Plan policies regarding green building and energy use and current building code standards requiring energy efficiency in new multi-family construction. The Project would be subject to the latest energy efficiency standards as well as other green building standards pursuant to Title 24, with conformance ensured through the City's building permit review process.

As proposed, the Project would include high-efficiency appliances, high-performance windows, Cool Roofs, low flow fixtures, and solar ready homes. Additionally, the Project would be all electric and preclude the use of natural gas infrastructure. The Project also proposes drought tolerant landscaping thereby contributing to a reduction in energy expended to treat and convey water. Construction of the Project would be subject to the BAAQMD best management practices that require minimizing idling time and maintaining construction equipment to manufacturer's specifications that would reduce inefficient consumption of fuels. As a multi-family residential development subject to the latest building code and construction standards, energy consumption of the Project would neither be wasteful or inefficient nor would it obstruct a state or local plan for renewable energy or energy efficiency. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion

The Project would not result in any new or more severe impacts to energy relative to what was identified in the 2013 FEIR. The Project would be required to comply with the latest energy efficiency standards as a new construction. Additionally, it is subject to uniformly applied development standards including review of construction plans by building officials to verify compliance with the most recent building codes. No environmental conditions of approval related to energy are required.

4.7. GEOLOGY AND SOILS

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:	☐	☐	☒	☐
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☒	☐
ii) Strong seismic ground shaking?	☐	☐	☒	☐
iii) Seismic-related ground failure, including liquefaction?	☐	☐	☒	☐
iv) Landslides?	☐	☐	☒	☐

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Geotechnical Exploration, prepared by ENGEO, January 31, 2023; Geotechnical Peer Review, prepared by Cotton, Shires and Associates, Inc., April 10, 2023; Responses to Geotechnical Review Comments, prepared by ENGEO, June 5, 2023, and Supplemental Geotechnical Peer Review, prepared by Cotton, Shires and Associates, Inc, June 14, 2023.

General Plan EIR Findings

The 2013 FEIR evaluated the potential impacts related to geology and soils in Chapter 4.5 and determined the following.

- Impact GEO-1: Implementation of the proposed project (General Plan), would not expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving

surface rupture along a known active fault; strong seismic ground shaking; seismic-related ground failure, including liquefaction; and landslides. The impact is considered less than significant, subject to, compliance with the City of Newark Municipal Code. Such compliance would ensure that construction, grading, and related activities meet California Building Code standards, implement erosion control methods, and provide, where required, a professionally prepared soils engineering report, engineering geology report, a liquefaction study, and a geotechnical report in identifying seismic hazards for any projects located in a seismic hazard zone. Additionally, implementation of General Plan Goal EH-2, Policies EH-1.1, EH-1.2, EH2.1 to EH-2.4, and Actions EH-1.A, EH-1.B, and EH-2.A to EH-2.F would further address impacts related to ground shaking and liquefaction.

- Impact GEO-2: Implementation of the proposed project (General Plan) would not result in substantial soil erosion or the loss of topsoil. This impact is considered less than significant subject to implementation of the General Plan Goal CS-1, Policy CS-1.4, and Action CS-1.B and Mitigation Measure 4.5-1 from the Housing Element EIR and Mitigation Measure 4.5-1 from the Dumbarton TOD EIR that pertain to development of complexes containing four or more dwellings on a housing site, or for major remodel projects on such complexes, and development in the Dumbarton TOD area, respectively.

- Impact GEO-3: Implementation of the proposed project (General Plan) would not result in a significant impact related to development on unstable geologic units and soils or result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse. This impact is considered less than significant with the implementation of the City of Newark Code as described above and General Plan Goal EH-1, Policies EH-1.1 and EH-1.2, and Actions EH-1.A, EH-2.A and EH-2.B.

- Impact GEO-4: Implementation of the proposed (General Plan) would not create substantial risks to life or property as a result of its location on expansive soil, as defined in Table 18-1-b of the Uniform Building Code (1994). This impact is considered less than significant, subject to the implementation of General Plan Goal EH-1, Policies EH-1.1, EH-1.2, and EH-2.4, and Actions EH-1.A, EH-2.A and EH-2.B, Mitigation Measure 4.5-1 from the Housing Element EIR, and Mitigation Measure 4.5-1 from the Dumbarton TOD EIR that pertain to development of complexes containing four or more dwellings on a housing site, or for major remodel projects on such complexes, and development in the Dumbarton TOD area, respectively. Additionally, implementation of the City of Newark Code, as described above, would further reduce this impact to a less than significant level.

- Impact GEO-5: Implementation of the proposed project (General Plan) would not result in impacts associated with the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater. As sewers are available for disposal of wastewater there will be no impact.

- Impact GEO-6: Implementation of the proposed project (General Plan) in combination with existing, planned, proposed, and reasonably foreseeable development, would not contribute to cumulative geologic, seismic, and soil impacts, as the impacts are often site-specific and not additive in character. Therefore, there would be no cumulatively considerable impacts related to Geology and Soils as a result of the proposed project (General Plan). Additionally, there would be further protection with compliance with the City of Newark Code, and implementation of Mitigation Measure 4.5-1 from the Housing Element EIR and Mitigation Measure 4.5-1 from the Dumbarton TOD EIR , as described above as well as the following General Plan goals, policies, and actions: Goals EH-1, EH-2, CS-1, Policies EH-1.1, EH-1.2, EH-2.1 to EH-2.4, and Actions EH-1.A, EH-1.B, EH-2.A, EH-2.B, EH-2.C, EH-2.D, EH-2.E, EH-2.F, and CS-1.B.

- Impact CULT-3: Implementation of the proposed project (General Plan) would not directly or indirectly destroy a unique paleontological resource or site, or unique geologic feature. This impact would be less than significant because the potential for fossil remains of significance are unlikely in the Plan Area due to the relatively recent age of Holocene Bay mud underlying the city. Additionally, since no previous fossil finds have been made in the vicinity, and there are no known paleontological resources

in Newark according to the University Of California Museum Of Paleontology Specimen Search database, paleontological potential of this area is considered low

Project Consistency with the 2013 FEIR

4.7(a) (Seismic Hazards) No Substantial Change Relative to the 2013 FEIR:

A Geotechnical Study (**Appendix C-1**) was performed in accordance with Action EH-2.A of the General Plan and peer reviewed to assess its adequacy. As indicated in Appendix C-1, the Project site is not located within a currently designated Alquist-Priolo Earthquake Fault Zone and no known surface expression of active faults is believed to exist within the site. Due to the site's location in the seismically active Bay Area region, as identified and considered in the 2013 FEIR, the site and the city as a whole would experience ground shaking. The Project is subject to construction standards established for seismic safety within the most recent California Building Code, which would minimize potential impacts resulting from ground shaking.

According to the Project's Geotechnical Study (**Appendix C-1**), the Project is located within a liquefaction hazard zone as mapped by the California Geological Survey, but not in an earthquake-induced landslide hazard zone. The Project's geotechnical exploration encountered up to 8 feet of potentially undocumented fill overlying alluvial clays, silts, sands, and gravels on the previously developed Project site with groundwater depths of 5.1 feet to 16.0 feet below ground surface (bgs) in borings and CPT probes with Historic groundwater depths mapped at about 10 feet bgs. The geotechnical exploration concluded the primary geotechnical hazards potentially impacting the proposed development include, the existing fill, high groundwater, slope stability along the northwestern property line, liquefaction and resulting surficial settlement and identified likely potential for liquefaction resulting in relatively moderate post seismic shaking settlement at the ground surface.

The Supplemental Geotechnical Peer Review (**Appendix C-4**) determined that the Project's Geotechnical Study and the Project's Geotechnical Consultant's response (**Appendix C-3**) to Geotechnical Study Peer Review (**Appendix C-2**) provide various conceptual mitigation alternatives that are typically recommended to mitigate surficial manifestation of liquefaction, lateral spreading, and liquefaction induced slope instability, but determined that the Project's Geotechnical Study should provide specific recommendations to mitigate the following: the potential for surficial manifestation of liquefaction (sand boils, ejecta, loss of bearing, etc.) where they might occur (eastern and southern sides of the site), the potential for lateral spreading, and the potential liquefaction induced slope instability. The City's Public Works Department has imposed a condition of approval on the Project to require specific recommendations to mitigate the aforementioned hazards, prior to or concurrent with the final map submittal that is reproduced below as COA GEO-1. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.7(b) (Erosion) No Substantial Change Relative to the 2013 FEIR:

The Project site is previously disturbed from past uses and would be redeveloped with new grading, paving, and landscaping. The Project creates more than 10,000 square feet of impervious surfaces and therefore, would be subject to implementation of stormwater management facilities to treat site runoff per Alameda County C.3 requirements. Best management practices for soil erosion and sediment control would be required during construction. Implementation of these requirements would serve to minimize impacts of pollutants and sediment in runoff to stormwater systems. Ground disturbing activities on the Project site will be required to be carried out in accordance with the City of Newark "Grading and Excavation" regulations (NMC Chapter 15.50), administered by the City's Public Works Department. The project's grading and drainage plans shall be required to demonstrate compliance with NMC Chapter 15.50. Compliance with this chapter will ensure that the soil erosion or loss of topsoil impacts as a result of the project would be less than significant. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.7(c) (Geologic Stability) No Substantial Change Relative to the 2013 FEIR:

As discussed in Sections 4.7(a) above, COA GEO-1 will ensure that the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.7(d) (Expansive Soils) No Substantial Change Relative to the 2013 FEIR:

The Project's geotechnical exploration (**Appendix C-1**) observed expansive clay near the surface of the site that exhibits moderate to high shrink/swell potential with variations in moisture content. These changes in soil volume with changes in moisture content can cause heaving and cracking of slabs-on-grade, pavements, and structures founded on shallow foundations. **Appendix C-1** provides conceptual mitigation alternatives that are typically recommended to mitigate potential impacts. Therefore, COA GEO-2 below specifies that the Project's Geotechnical Consultant/applicant shall provide specific recommendations to mitigate the impacts of expansive soils on the Project site.

4.8(e) (Septic Tanks) No Change Relative to the 2013 FEIR: The Project would not include the use of septic tanks. Instead 8" sanitary sewer lines would collect waste from the residences and connect to the existing 27" sewer line that runs in a general north south direction in an easement within the driveway proposed as part of the Project. Therefore, the project would not result in any changes relative to the 2013 FEIR regarding use of septic tanks.

4.9.(f) (Paleontological Resources) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that impacts on unique geologic or paleontological resources would be less than significant. Given that the Project site is previously developed and disturbed in combination with the lack of paleontological resource discoveries in the city and the age of recent subsurface soils, it is unlikely that the project construction activities would directly or indirectly destroy a unique paleontological resource or site or unique geologic feature. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The proposed Project is within the scope of development projected under the General Plan and would not result in any new or more severe impacts to geology and soils relative to what was identified the 2013 FEIR with implementation of the following environmental conditions of approval.

COA GEO-1 Prior to or concurrently with the first submittal of the final map and improvement plans, the applicant shall provide specific recommendations to mitigate identified seismic hazards discussed in the City's Geotechnical Consultant's letter dated June 14, 2023. The applicant's Geotechnical Consultant shall submit a letter-report addressing the items identified in the June 14, 2023, letter to the City for review by the City's Geotechnical Consultant. The applicant shall pay for all costs associated with the geotechnical peer review per the City's Master Fee Schedule.

COA GEO-2 Prior to or concurrently with the first submittal of the final map and improvement plans, the applicant shall provide specific recommendations to mitigate impacts of expansive soils on the site. The applicant's Geotechnical Consultant shall submit a letter-report addressing expansive soils on the site, to the City for review by the City's Geotechnical Consultant. The applicant shall pay for all costs associated with the geotechnical peer review per the City's Master Fee Schedule.

4.8. GREENHOUSE GAS EMISSIONS

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	☐	☐	☐	☒
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☐	☐	☒	☐

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Air Quality and Greenhouse Gas Analysis, prepared by LSA, November 7, 2022.

General Plan EIR Findings

The 2013 FEIR evaluated the potential impacts related to greenhouse gas emissions in Chapter 4.6 and determined the following:

- Impact GHG-1: Implementation of the proposed project (General Plan) would result in greenhouse gas emissions (GHG) in excess of the long-term 2050 GHG reduction target interpolated from Executive Order S-03-05 (2025) with significant GHG emissions within the City of Newark. These emissions would exceed 4.0 $MTCO_{2e}$ per service population for the City for long term growth anticipated to the year 2035. These GHG emissions could not be avoided without major advancement in technological state of the art that existed in 2013 despite Uniformly Applicable Development Standards for new developments. Therefore, the impact with respect to generation of GHG emissions would be significant and unavoidable. A statement of overriding consideration was adopted with certification of the 2013 FEIR.

- Impact GHG-2: The proposed project (General Plan) would not conflict with an applicable plan, policy, or regulation for the purpose of reducing the emissions of GHGs, namely, California Air Resources Board (CARB) scoping plan, Metropolitan Transportation Commission's (MTC's) Plan Bay Area and the Newark Climate Action Plan. This impact is considered less than significant.

Project Consistency with the 2013 FEIR

4.8(a) (Greenhouse Gas Generation) No Change Relative to the 2013 FEIR: The 2013 FEIR determined that GHG generation for buildout of the General Plan would be significant and unavoidable without advancement in technology. As indicated in the Air Quality and Greenhouse Gas Analysis (**Appendix A**) prepared for the Project, based on April 2022 BAAQMD Justification Report: "*CEQA Thresholds for Evaluating the Significance of Climate Impacts From Land Use Projects and Plans",* a project would have a less than significant impact related to GHG emissions if it would include the project design elements related to natural gas, energy, Vehicle Miles Traveled (VMT), and electric vehicles or if it would be consistent with a local GHG reduction strategy that meets the criteria under State CEQA Guidelines Section 15183.5(b). The City's CAP does not meet these requirements. However, the Project includes design elements that would render its GHG emission impacts less than significant.

As described in the Project's Air Quality and GHG Analysis (**Appendix A**), the Project would be all electric and would not depend on natural gas, electricity demand associated with the proposed project would be less than 0.1 percent of Alameda County's total electricity demand, it would include solar and be constructed to Title 24 standards and would, therefore, not result in wasteful, inefficient, or unnecessary energy usage. The Project would have a less than significant VMT impact and would be required to include EV charging stations as specified in COA GHG-1.

4.8(b) (Conflict with Plans) No Change Relative to the 2013 FEIR: The 2013 FEIR determined that the General Plan would not conflict with California Air Resources Board (CARB) scoping plan, Metropolitan Transportation Commission's (MTC's) Plan Bay Area or the Newark Climate Action Plan. These plans include measures and strategies for greenhouse gas emissions reduction to meet state targets. As described in the Project's Air Quality and GHG Analysis (**Appendix A**), the Project would comply with existing state regulations

including the CARB scoping plan adopted to achieve the overall GHG emissions reduction goals. The Project proposes development that is consistent with the development envisioned in the General Plan and is consistent with the General Plan policies, such as those related to green building and energy use, that promote a reduction in greenhouse gas emission through the application of energy efficiency standards and green building requirements under the California Building Code. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The proposed Project is within the scope of development projected under the General Plan and analyzed in the 2013 FEIR. Impacts from greenhouse gas emissions were determined to be significant and unavoidable in the 2013 FEIR and a statement of overriding considerations was adopted. The Project would include design elements that, in combination with the COA GHG-1 below, would reduce GHG emissions impacts to a less than significant impact.

COA GHG-1 The project shall include and show on the plans a minimum of 10 percent of the parking spaces as electric vehicle (EV) charging stations consistent with current or the most recent California Green Buildings Standards Code (CALGreen) Tier 2 standards.

4.9. HAZARDS AND HAZARDOUS MATERIALS

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☒	☐
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☒	☐
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☒	☐
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☒	☐
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	☐	☐	☐	☒
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒

g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Phase I Environmental Site Assessment Report, prepared by ENGEO Inc., May 13, 2022; Phase II Environmental Site Assessment Report, prepared by ENGEO Inc., October 21, 2022, and State Responsibility Fire Hazard Severity Zone Maps, Office of the State Fire Marshall, accessed June 2023

General Plan EIR Findings

The 2013 FEIR evaluated potential Hazards and Human Materials impacts in Chapter 4.7 and determined the following:

- Impact HAZ-1: The implementation of the proposed project (General Plan) would not create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. This impact is considered less than significant, subject to compliance with applicable federal, state, and local regulations. Further, implementation of the following General Plan goals, policies and actions would further minimize the risks from routine transport, use, or disposal of hazardous materials: Goal EH-4, Policies EH-4.1, EH-4.4 to EH-4.7, Actions EH-4.A, EH-4.C, EH-4.E, EH-4.G, and EH-4.I.

- Impact HAZ-2: Implementation of the proposed project (General Plan) would not create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment. This impact is considered less than significant, subject to compliance with applicable federal, State, and local regulations and conditions of approval, including Mitigation Measures HAZ-1.1 through HAZ-5.1 (Newark Areas 3 and 4 Specific Plan), 4.6-1 and 4.6-2a (2010 Housing Element), and 4.7-1a through 4.7-1e (Dumbarton TOD Specific Plan). Implementation of the following General Plan goals, policies and actions would further minimize the risks to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment: Goal EH-4, Policies EH-4.1, EH-4.4, and Actions EH-4.A, EH-4.C, EH-4.E, EH-4H, EH-4.J and EH-4.K.

- Impact HAZ-3: Implementation of the proposed project (General Plan) would not result in significant impacts associated with hazardous emissions or handling of hazardous or acutely hazardous materials, substances, or waste within ¼-mile of an existing or proposed school. This impact is considered less than significant, subject to implementation of applicable regulations and conditions of approval. Mitigation Measures HAZ-2.1 (Newark Areas 3 and 4 Specific Plan), 4.6-1 and 4.6-2a (2010 Housing Element), and 4.7-1a through 4.7-1e (Dumbarton TOD Specific Plan) would apply to land uses that could have the potential to result in an increased risk of release of hazardous materials. Further, implementation of General Plan goals, policies, and actions listed under Impacts HAZ-1, HAZ-2, and HAZ-4, would ensure that hazardous emissions or handling of hazardous materials, substances, or waste within ¼-mile of an existing school is minimized to the maximum extent practicable. This impact is considered less than significant.

- Impact HAZ-4: Implementation of the proposed project (General Plan) would not create a significant hazard to the public or the environment as a result of development on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. This impact is considered less than significant, subject to compliance with applicable regulation and conditions of approval, including Mitigation Measures 4.6-1 and 4.6-2a (2010 Housing Element Update), HAZ-1.1 though HAZ-5.1 (Newark Areas 3 and 4 Specific Plan), and 4.7-1a though 4.7-1e (Dumbarton TOD Specific Plan), together with implementation of General Plan goals, policies, and actions under Impacts HAZ-1 and HAZ-2, and as follows: Goal HW-5, Policies HW-5.1 to HW-5.3, and Action HW-5.A. This impact is considered less than significant.

- Impact HAZ-5: Implementation of the proposed project (General Plan) would not result in a safety hazard for people residing or working in the Plan Area due to development within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport because there are no public use airports public use airports within the Plan area with the nearest airport greater than two miles away from the City of Newark. Therefore, there would be no impact to the safety for people residing in or working in the area because of proximity to airports.

- Impact HAZ-6: Implementation of the proposed project (General Plan) would not result in a safety hazard for people residing or working in the Plan Area due to development in the vicinity of a private airstrip because there are no private airstrips within or in the near vicinity of the Plan Area and there would be no impact as a result.

- Impact HAZ-7: Implementation of the proposed project (General Plan) would not impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan. This impact is considered less than significant, subject to compliance with the Cal EMA (Strategic Plan 2010-2015), the City of Newark Emergency Operations Plan and the City of Newark Chemical Emergency Preparedness Plan along with the following goals, policies and actions of the General Plan: Goal EH-5, Policies EH-5.1 to EH-5.8, and Actions EH-5.A to EH-5.H.

- Impact HAZ-8: Implementation of the proposed project (General Plan) would not expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands because the Plan Area is surrounded on all sides by land within the limits of the City of Fremont and is not designated as having high, very high, or extreme wildland fire threat to people, as determined by CAL FIRE's Wildlife Urban Interface Fire Threat data. Future development in the Plan Area would be constructed pursuant to the California Building Code, California Fire Code, and the City of Newark Municipal Code and the General Plan Goal EH-1, and Policies EH-1.1 and EH-1.2 would further ensure minimization of risks from wildland fires. This impact is considered less than significant.

- Impact HAZ-9: Implementation of the proposed project (General Plan) in combination with past, present, and reasonably foreseeable projects, would not contribute to cumulative increase in risk to hazards or hazardous materials. This impact is considered less than significant, subject to compliance with the applicable federal, state and local regulations, conditions of approval and General Plan goals, policies and actions identified above under Impacts HAZ-1 to HAZ-8. T

Project Consistency with the 2013 FEIR

4.9(a) (Routine Transport) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that compliance with applicable federal, state, and local regulations would reduce the risk to the public or the environment because of the routine transport, use, or disposal of hazardous materials to a less than significant level.

As described in Chapter 2 of this document, the Project is proposed on a site that contains hazardous materials and hazardous materials contamination that would require disposal and remediation before it can be developed for residential purposes. Also, potentially hazardous building materials (e.g. asbestos containing materials, lead-based paint, etc.) could be encountered during demolition of existing structures. Additionally, subsequent Project construction activities would result in the temporary presence of potentially hazardous materials including, but not limited to, fuels, lubricants, paints, solvents, insulation, electrical wiring, and other construction related materials onsite. However, transportation, use, handling, storage, and disposal of the hazardous materials present or that could potentially be present on the site would be required to comply with all applicable federal, state, and local safety regulations. Subsequent residential use of the Project site would not involve ongoing use or generation of hazardous materials on the site. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(b) (Upset and Accident Involving Release) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that compliance with applicable federal, state, and local regulations, applicable General Plan goals and policies, and applicable mitigation measures from previous plans as described would reduce the hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment to a less than significant level.

As it relates to the Project, General Plan Action EH-4.J and Mitigation Measures 4.6-1 and 4.6-2a (2010 Housing Element) are applicable. In accordance with Action EH-4.J and Mitigation Measure 4.6-2a of the 2010 Housing Element, a Phase I Environmental Site Assessment (ESA) (**Appendix D-1**) was prepared for the Project site because of the proposed change in use from the existing industrial use to a more sensitive residential use. The Phase I ESA, prepared in general conformance with the scope and limitations of American Society for Testing and Materials (ASTM) E1527-21 and the standards and practices of the All-Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312), identifies Recognized Environmental Conditions (RECs) on the Project site that are described in **Appendix D.** Further site assessment activities have been ongoing under the regulatory oversight by the Alameda County Water District. During the course of these activities a Phase II ESA (**Appendix D-2)** was prepared for the Project site. The Phase II ESA identifies and delineates a tetrachloroethylene (PCE) vapor plume that extends north from the area of the former waste oil tank location. COA HAZ-1 and HAZ-2 below are imposed consistent with the above referenced mitigation measures.

4.9(c) (Emit or Handle Hazardous Material within ¼ Mile of School Sites) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that the implementation of the General Plan would result in a less than significant impact as it relates to the release and exposure of hazardous material onto schools sites with ¼ mile of the Project site subject to implementation of the Mitigation Measures identified under Impact HAZ-3 above and implementation of General Plan goals, policies, and actions listed under Impacts HAZ-1, HAZ-2, and HAZ-4.

Kings Kids Preschool on Cedar Boulevard is located within ¼ mile of the Project site. Applicable Mitigation Measures 4.6-1 and 4.6-2a (2010 Housing Element) are incorporated as COA HAZ-1 and COA HAZ-2 below. Additionally, General Plan goals, policies and actions as they relate to routine transport, use, or disposal of hazardous materials, reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment, and development on the Project site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5, would ensure that the impacts to Kings Kid School are less than significant. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(d) (Existing Hazardous Materials Sites) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that implementation of the General Plan would result in less than significant impacts due to development on a hazardous materials sites compiled pursuant to Government Code Section 65962.5 subject mitigation measures and General Plan goals, policies and actions as specified above under Impacts HAZ-1, HAZ-2 and HAZ-4, and applicable regulations of the responsible state and local agencies. As applicable to the Project, Mitigation Measure 4.6-1 and 4.6-2a (2010 Housing Element Update), are included below as COAs HAZ-1 and HAZ-2. The Project site, although a hazardous materials site itself, would be required to be remediated per SFRWQCB and ACWD regulations and under their supervision prior to its development for residential use, per General Plan Policy HW-5.3. COA HAZ-2 would ensure that the City of Newark coordinates such activity with the responsible agencies. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(e) (Public Airport Land Use Plans, Public, Public Use Airport) No Change Relative to the 2013 FEIR: The 2013 FEIR concluded that no impacts related to airports or airstrips would occur as no airports are located within or proximate to the Plan area. The subject Project site is not located within the boundaries of an airport land use plan, public or public use airport nor is it located in direct proximity to a private airstrip. The nearest airport, Hayward Executive Airport, is located approximately 11 miles to the north of the Project site. Other area airports include, Palo Alto Airport, which is located approximately 16 miles southwest of the project site and Norman Y. Mineta San Jose International Airport, which is located further away at approximately 15 miles to the south of the Project site. Accordingly, no impacts associated with airport-related hazards will result from the Project. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(f) (Impair Emergency Response Plan) No Change Relative to the 2013 FEIR: The 2013 FEIR concluded that the General Plan would not impair implementation of or physically interfere with the City's emergency response plan or emergency Evacuation plan and impacts would be less than significant subject to compliance with applicable regulations, conditions of approval and the applicable General Plan goal, policies and actions identified above under Impact HAZ-7.

The City of Newark has adopted two emergency response plans. The "Emergency Operations Plan" is the City's primary plan which provides operational procedures for responding to a variety of emergency conditions, including earthquakes, flooding, tsunamis, hazardous material incidents, and civil defense conditions. The guidelines included in this plan address the needs of the entire community and identify key responsible agencies and personnel. The "Chemical Emergency Preparedness Supporting Plan" is the City's second response plan, which establishes standard operating procedures for responding to a chemical spill or hazardous materials incidents within the City.

As a medium density residential development on a housing opportunity site consistent with the General Plan and applicable policies, the proposed Project improvements are not expected to impair the implementation of, or physically interfere with the aforementioned plans. The Project is not altering the existing road network and includes adequate onsite access to accommodate emergency vehicles, including adequate driveway/drive aisle width and turning radii that have been reviewed and approved by the Alameda County Fire Department Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(g) (Wildland Fire Hazards) No Change Relative to the 2013 FEIR: The 2013 FEIR concluded that the General Plan would not result in impacts related to wildland fire hazard because of the highly urbanized nature of the Plan area and vicinity. Further, the General Plan goal and policies as identified under Impact HAZ-8 that pertain to compliance with development and code requirements and location of projects would ensure that the impacts are less than significant.

The Project area is largely surrounded by urban development and roadways and is not adjacent to a wildland urban interface fire hazard area. The Project site is not in an area categorized as any of the Fire Hazard Severity Zones by CAL FIRE and is surround by land also not included in any Fire Hazard Severity Zones. The Project development would also be subject to the California Building Code, California Fire Code, and the City of Newark Municipal Code and the Project site is proximate to an existing fire station at approximately one mile away from the fire station. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The Project would not result in any new or more severe impacts to human health caused by hazards or hazardous materials relative to what was identified the 2013 FEIR subject to implementation of applicable regulations, conditions of approval, and General Plan policies and actions. The Project is generally consistent with the Genera Plan by introducing medium density residential development on a site designated for such use. The following environmental conditions of approval are imposed in compliance with the General Plan goals, policies and actions regarding hazardous materials and waste:

COA HAZ-1: Prior to issuance of any demolition permit, the applicant/project developer shall have a qualified environmental professional complete testing on structures to be removed for the presence of actionable quantities of asbestos materials, lead based paint and other contaminants. These materials shall be remediated by a licensed contractor and disposed of in an appropriately licensed landfill. Necessary permits shall be obtained from the Alameda County Fire Department, Newark Building Inspection Division, the Bay Area Air Quality Management District and other agencies, as applicable. All work shall be performed in accordance with state and federal Occupational Safety and Health Administration (OSHA) standards. Worker safety plans shall be included for all demolition or deconstruction plans.

COA HAZ-2: The Project applicant shall implement the following actions:

1. Copies of the Phase I ESA shall be filed with the Alameda County Water District, Newark Community Development Department, the Newark Public Works Department and the Hazardous Materials Bureau of the Alameda County Fire Department.

2. Prior to the issuance of the grading permit, the applicant shall prepare a Soil and Water Management Plans (SWMPs) for the Project site as the Phase I ESA identifies actionable levels of soil and/or water contamination on the site. The SWMPs shall be prepared by a state-certified environmental professional and shall include, at minimum, a description of soils to be graded or disturbed as part of the project, detailed soil and water sampling to identify the extent of the contaminants, a description of site remediation activities and procedures for removing the contaminants, and location(s) for disposal of contaminated material. The applicant shall obtain necessary permits for implementation of the site remediation and shall also provide evidence to the City of Newark, prior to the issuance of the grading permit, demonstrating that the RECs have been resolved to the satisfaction of the applicable regulatory agencies for future residential land use. Permits and closure letters shall be obtained from appropriate agencies if site remediation is found.

3. Prepare a plan/s to deal with de-watering of the site and safe disposal of contaminated groundwater in the event of groundwater contamination on the site or vicinity. These plans shall be prepared by qualified environmental hazard consultants and approved by the Newark Community Development Director, or their designee, prior to grading permit issuance, and required permits shall be obtained from appropriate agencies for all site investigation and remediation.

4.10. HYDROLOGY AND WATER QUALITY

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?	☐	☐	☒	☐
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	☐	☐	☐	☒
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:	☐	☐	☒	☐
i) result in substantial erosion or siltation on- or off-site;	☐	☐	☒	☐
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;	☐	☐	☒	☐
iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	☐	☐	☒	☐

iv) impede or redirect flood flows?	☐	☐	☒	☐
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	☐	☐	☒	☐
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	☐	☐	☒	☐

General Plan EIR Findings

The 2013 FEIR evaluated the potential impacts related to hydrology and water quality in Chapter 4.8 and determined the following.

- Impact HYD-1: Implementation of the proposed project (General Plan), would not violate any water quality standards or waste discharge requirements subject to compliance with the C.3 provisions set by the SFRWQCB, preparation of a Stormwater Management Plan (SWMP), implementation of stormwater management measures, preparation of an Operations and Maintenance (O&M) Plan[5] for post-construction water quality. and implementation of the General Plan goals and policies as follows: Policies CS-3.1, CS-3.4, CS-3.5, CS-3.8, and Actions CS-1.B, CS-3.G and CS-3.H. This impact is considered less than significant.

- Impact HYD-2: Implementation of the proposed project (General Plan) would not substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level subject to required compliance with ACWD's Well Ordinance (Ordinance No. 2010-01), coordination with the ACWD and SFRWQCB on a former Leaking Underground Fuel Tank (LUFT) site or Site Cleanup Program (SCP) site, C.3 provisions of the Alameda County Clean Water Program, the implementation of water use efficiency measures, and the following General Plan goals and policies: Policies CS-3.1, CS-3.3, CS-6.5 and Actions CS-3.A and CS-3.C.

- Impact HYD-3: Implementation of the proposed project (General Plan) would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion, siltation, or flooding on- or off-site subject to post construction storm water management measure pursuant to C.3 provisions of the Alameda County Clean Water Program and implementation of the following General Plan policies and actions: Policies CS-5.4 to CS-5.8, and Actions CS-5.D and CS-5.E. This impact is considered to be less than significant.

- Impact HYD-4: Implementation of the proposed project (General Plan) would not create or contribute runoff water, which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff with the implementation of C.3 provisions for new development, development impact fees that would require developers to pay a fair share of improvements to the storm drain system necessary to accommodate increased flows from the development, and the implementation of General Plan goals and policies as follows: Policies CS-5.5 to CS-5.8, and Actions EH-3.D, EH-3.E and CS-5.E. This impact is considered to be less than significant.

[5] Also referred to as a Stormwater Treatment Measures Maintenance Agreement.

- Impact HYD-5: Implementation of the proposed project (General Plan) would not otherwise substantially degrade water quality with implementation of the applicable regulations, namely, C.3 provisions of the Alameda County Clean Water Program and the City of Newark Municipal Code (NMC), Chapter 8.36 Stormwater Management and Discharge Control. This impact is considered to be less than significant.

- Impact HYD-6: Implementation of the proposed project (General Plan) would not result in a significant impact with respect to the placement of housing or structures, which would impede or redirect flood flows within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map subject to applicable regulations, namely the FEMA Regulations in floodplains – LOMR-Fill Determination Requirements and NMC Chapter 15.40 Construction in Flood Hazard Areas as well as implementation of General Plan policies and actions as follows: Policies EH-3.3 to EH-3.5, EH-3.7 and EH-3.8, and Actions EH-3.A, EH-3.B, EH-3.C and EH-3.E. This impact is considered less than significant.

- Impact HYD-7: Implementation of the proposed project (General Plan) would not expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam subject to compliance with applicable regulations, namely, the FEMA – Levee Certification, California Division of Safety of Dams Regulations – California Water Code – Supervision of Dams and Reservoirs, and Association of Bay Area Government's (ABAG) Multi-Jurisdictional Local Hazard Mitigation Plan together with the implementation of General Plan Goals EH-3, EH-5, Policy EH-3.6, and Actions EH-5.G and EH-5.H. This impact is considered to be less than significant.

- Impact HYD-8: Implementation of the proposed project (General Plan) would not result in significant adverse effects related to inundation by seiche, tsunami, or mudflow the City of Newark is not considered to be subject to significant risk from tsunamis, seiches, or mudflows. Implementation of the following General Plan policies and actions would further reduce the risks: Goal EH-5, Policies EH-3.9, CS-5.8, EH-5.2 to EH-5.5 and Actions EH-5.A, EH-5.B, EH-5.C, EH-5.D, EH-5.E, EH-5.F, EH-5.G. This impact is considered to be less than significant.

- Impact HYD-9: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable development, would not result in a significant cumulative impact with respect to hydrology and water quality subject to compliance with applicable regulations, namely, the NPDES General Construction Permit, Alameda County Clean Water Program, NMC Chapter 8.36 Stormwater Management and Discharge Control and Chapter 15.40 Construction in Flood Hazard Zones together with General Plan Policies CSF-5.4, CSF-5.7 and Action CSF-5.E. The cumulative impact with respect to hydrology and water quality is considered to be less than significant.

Stormwater Regulations

The State Water Resources Control Board is responsible for implementing the Clean Water Act and has issued a statewide General Permit for construction, which acts to minimize pollutant runoff to surface waters and groundwater. The SFBRWQC board is the regional entity facilitating regional implementation and has issued a NPDES permit to Contra Costa County and its 19 cities. The NPDES permit applies to development projects and establishes runoff requirements. The City's coverage under the NPDES requires compliance with the Alameda Costa Clean Water Program Stormwater C.3 Guidebook to protect water quality, which includes implementing best management practices (BMP) to control runoff pollutants and guidance on Low Impact Development (LID) to manage stormwater on site. Further, these requirements for stormwater control under the NPDES permit are integrated into the City of Newark Municipal Code. The City of Newark Public Works Department has jurisdiction over stormwater management in the City and is a co-permittee of the Alameda County Clean Water Program.

Project Consistency with the 2013 FEIR

4.9(a) (Discharge) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that the implementation of the General Plan would have a less than significant impact subject to the measures identified under Impact HYD-1 above. Accordingly, the Project is required to comply with the applicable requirements for stormwater control and apply best management practices to the management of stormwater on the Project site, including the stormwater regulations described above. The applicant submitted a "Preliminary Stormwater Control Plan", prepared by Carlson, Barbee & Gibson, Inc. (CBG), June 2, 2023, that has been reviewed and approved in concept by the City's Public Works Department. For final approval, the Public Works Department has required that, prior to grading permit issuance, the applicant shall provide the necessary plans, details, and calculations that demonstrate that the plan complies with the applicable Municipal Regional Stormwater NPDES Permit (MRP), as stated in COA HYD-1 below. Additionally, COA HYD-2 requires preparation of an Operations and Maintenance (O&M) Plan/Stormwater Treatment Measures Maintenance Agreement for post-construction water quality. With these measures the Project will be in conformance with the General Plan policies and actions applicable to the Project. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(b) (Groundwater) No Change Relative to the 2013 FEIR: Based on the analysis in the 2013 FEIR, the Project would not substantially deplete groundwater supplies with implementation of applicable regulations such as the Alameda County Water District's Well Ordinance and C.3 provisions of the Alameda County Clean Water Program The Project would be required to comply with these requirements. The Project does not involve the extraction and use of groundwater for its operation on the site. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(c)(i-iv) (Drainage Pattern) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that the implementation of the General Plan would not substantially alter the drainage patterns and erosion and siltation impacts would be less than significant, subject to implementation of applicable C.3 provisions of the Alameda County Clean Water Program and General Plan policies as identified above under Impact HYD-3. The 2013 FEIR also determined that developments constructed under the purview of the General Plan would be subject to development impact fees that would require developers to pay a fair share of improvements to the storm drain system necessary to accommodate increased flows from the development. Additionally, the City of Newark has adopted standards of construction in flood hazard zones and projects in flood zones are reviewed by the Newark Public Works Department - Engineering Division in coordination with Alameda County Flood Control District (ACFCD) with detailed review of improvements plans to ensure that flood flows are addressed.

The Project would be subject to and required to comply with all applicable regulations including C.3 provisions of the Alameda County Clean Water Program and the City's Municipal Code that would reduce Project-specific impacts to a less than significant level. With respect to the capacity of the City's stormwater system, Newark is served by an existing storm drain system. As per the City Engineering Division, the Project would not result in inadequate capacity for stormwater discharges from the Project. Further, the City has established development impact fees for new developments such as multifamily residential projects to contribute to any needed new or expanded infrastructure. Payment of development impact fees is payable during the building permit process and final drainage plans are reviewed during the improvements plans review process. Development impacts fees are used to maintain and expand the City storm drain system as warranted. The Project is consistent with the development potential analyzed in the 2013 FEIR, including storm drain infrastructure onsite with connections to the existing drain system, and is subject to impact fees.

The Project site is partially in the AE flood zone (1 percent annual chance flood hazard) on the northwestern side of the Project site as presented in the National Flood Hazard Layer FIRMette maps accessed from the Federal Emergency Management Agency (FEMA) in June 2023. This area is adjacent to the ACFCD flood control channel. The City of Newark has adopted standards for construction in flood hazard zones whereby projects within the 100- year flood zone (1 percent annual chance flood hazard) would require the placement of fill to elevate structures above the 100-year floodplain elevation. In order for a project to be considered outside of the floodplain and no longer subject to special flood hazard requirements, the project applicant would have to submit an application to FEMA for a Letter of Map Revision – Fill (LOMR-F) after the fill has been placed. Upon revision of the Flood Insurance Rate Map (FIRM) to show that the project is now outside of the

SFHA, the City would no longer be required to apply the minimum NFIP floodplain management standards to structures built on the land and the mandatory flood insurance requirements would no longer apply. NMC Chapter 15.40 governs construction in Special Flood Hazard Areas (SFHA) and includes standards for development to minimize flood hazard risks. The Department of Public Works has placed conditions of approval on the Project to address the flood hazard on the Project site that are reproduced below as COA HYD-3 through COA HYD-5. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(d) (Flood Hazard, Tsunami, or Seiche Zones) No Substantial Change Relative to the 2013 FEIR: The Project site is partially located in the flood zone AE (1 percent annual chance flood hazard) as described above. However, the risk of the release of pollutants due to project inundation would be less than significant with implementation of COA HYD-2. The Project site is not located on the shoreline and is not subject to associated risk of flooding in these areas. The Project site is not located in an area identified as a shoreline area vulnerable to sea level rise as per the National Oceanic and Atmospheric Administration (NOAA) Office of Coastal Management data on sea level rise (Sea Level Rise Viewer), accessed June 2023. Tsunamis and seiches are not identified as significant flood hazards that may affect the Project as the Project site is located more than 5 miles from the shoreline. The site is not located in a tsunami hazard area, as shown in the California Department of Conservation Tsunami Hazard Area Map, accessed June 2023. As a result, there would be no substantial risk of flood hazards, tsunamis, or seiches causing release of pollutants due to Project inundation. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.9(e) (Water Quality Control and Sustainable Groundwater) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that new development would be required to adhere to applicable regulations, namely the Alameda County Clean Water Program – C.3 Provisions and NMC, Chapter 8.36 Stormwater Management and Discharge.

The Project would be required to include source control, site design, and LID measures in compliance with the C.3 measures and comply with applicable requirements of the NMC. It would thus not conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The proposed Project is within the scope of development projected under the General Plan and there would be no additional impacts to hydrology beyond those analyzed in the 2013 FEIR. The following environmental conditions of approval would apply to the Project.

COA HYD-1: Preliminary Stormwater Treatment Plan is approved in concept only. Final approval is subject to the applicant providing, prior to the issuance of the grading permit, the necessary plans, details, and calculations that demonstrate the plan complies with the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2022-0018, revised July 1, 2022, issued to the City of Newark by the Regional Water Quality Control Board, San Francisco Bay Region.

COA HYD-2: Prior to issuance of a building permit, the applicant shall prepare a Stormwater Treatment Measures Maintenance Agreement for post-construction water quality. The Agreement shall be reviewed and accepted by the City Engineer prior to Project Construction on the site.

COA HYD-3: The Project's development, including streets and surface improvements, shall be placed above the 100-year flood elevation as confirmed by the City Engineer.

COA HYD-4: Prior to final map approval, the applicant shall apply and receive approval for a conditional letter of map revision based on fill (CLOMR- F) from the Federal Emergency Management Agency (FEMA). The CLOMR-F shall be based upon the project grading plan and shall conclude that the structures for human occupancy will be removed from the special flood

hazard area (SFHA). Prior to occupancy of any buildings within the SFHA, the developer shall apply and receive approval of a letter of map revision based on fill (LOMR-F) from FEMA. On July 1, 2023, FEMA temporarily suspended the processing of CLOMR-Fs and LOMR-Fs. If, prior to final map approval, the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the CLOMR-F application to FEMA shall be deferred and applied for as soon as the temporary suspension is lifted. If, prior to occupancy, the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the applicant shall provide complete Elevation Certificates demonstrating that the property for occupancy is outside the Special Flood Hazard Area. Prior to tract acceptance, if the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the applicant shall submit the LOMR-F application package to the City or enter into a deferred agreement with the City for preparing and processing the LOMR-F application package once FEMA lifts the suspension. In either options, the cost of the preparation and fees associated with the FEMA LOMR-F application shall be paid for by the applicant.

COA HYD-5: The applicant shall submit detailed grading and drainage plans for review and approval by the City Engineer and the Alameda County Flood Control and Water Conservation District. These plans must be based upon a City benchmark and need to include pad and finish floor elevations of each proposed structure, proposed on-site property grades, proposed elevations at property line, and sufficient elevations on all adjacent properties to show existing drainage patterns. All on-site pavement shall drain at a minimum of one percent. The applicant shall ensure that all upstream drainage is not blocked and that no ponding is created by this development. Any construction necessary to ensure this shall be the applicant's responsibility.

Hydrology and hydraulic calculations shall be submitted for review and approval by the City Engineer and the Alameda County Flood Control District prior to approval of the final map. The calculations shall show that the City and County freeboard requirements will be satisfied.

4.11. LAND USE AND PLANNING

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Physically divide an established community?	☐	☐	☐	☒
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to Land Use in Chapter 4.9 and determined the following:

- Impact LU-1: Implementation of the proposed project (General Plan) would not physically divide an established community subject to compliance with the applicable provisions of the NMC, namely, Title 16, Subdivision Ordinance and Title 17, Zoning Code, together with implementation of General Plan policies and actions intended to foster greater connectivity in the Plan Area and to prevent new development from dividing existing communities, as follows: Policies LU-2.6, LU-4.2, LU-2.5, T-1.4, T-2.3, T-2.5, T-2.12, T-2.10, T-2.2, T-2.9, and Actions T-2.B, T-2.G and T-2.H. This impact is considered less than significant.

- Impact LU-2: Implementation of the proposed project (General Plan) would not conflict with an applicable land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect. This impact is considered less than significant, subject to implementation of General Plan Actions LU-6.A, LU-7.B and LU-7.E that are applicable to the Dumbarton TOD Specific Plan Implementation and Southwest Newark Residential and Recreational Focus Area.

  the Project site as it is not part of either the Dumbarton TOD Specific Plan Area or the Southwest Newark Residential and Recreational Focus Area, therefore the above stated does not apply to the Project and there would be no related impact as a result of the Project.

- Impact LU-3: Implementation of the proposed project (General Plan) would not result in significant conflicts with the Bay Plan and the Don Edwards San Francisco Bay National Wildlife Refuge Comprehensive Conservation Plan (CCP). Numerous General Plan policies and actions are consistent with the objectives of the Bay Plan, including Policies CS-1.1 to CS-3.1, CS-2.1 and CS-3.1, and Actions CS-2.A, CS-3.G, and CS-3.H. Implementation of General Plan policies and actions as follows would minimize disturbances and support the goals of the CCP: Policies CS-1.1 to 1.3, CS-1.5, CS-2.1 to CS-2.3, CS-2.7, CS-3.4, CS-3.5, and Actions LU-7.A, CS-1.A, CS-1.C, CS-2.A, CS-2.D, CS-2.E, CS-3.H, POS-1.A and POS-1.B.

- Impact LU-4: When considered in combination with past, present, and reasonably foreseeable development in the surrounding area, implementation of the proposed project would not result in significant cumulative impacts with respect to land use and planning. The proposed project would have a less than cumulatively considerable contribution to this impact.

Project Consistency with the 2013 FEIR

4.1(a) (Physically Divide Community) No Change Relative to the 2013 FEIR: The Project is consistent with the General Plan land use designation of Medium Density Residential and RM zoning applicable to the site, which is contained between I-880 and Cedar Boulevard. Development on this site would not disrupt the established physical layout of the existing community with new roads, above ground infrastructure or easements running through offsite through the existing development in the vicinity. The Project would conform to the provisions of the NMC including development standards such as setbacks and height. The Project would be consistent with applicable General Plan Policy LU-2.6 regarding scale transition in that there would not be an abrupt transition in height between the development proposed by the Project and existing and approved development in the vicinity. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.1(b) (Conflict with Land Use) No Substantial Change Relative to the 2013 FEIR: The Project site is not within the Dumbarton TOD or Southwest Newark Residential and Recreational Focus Area and the use and density of development proposed by the Project is consistent with the Medium Density Residential land use designation for the site. The Project would comply with the applicable provisions of the City's Zoning Code. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion

The Project would not result in any new or more severe impacts to energy relative to what was identified in the 2013 FEIR. The Project consists of development consistent with the land use and zoning code as provided. No environmental conditions of approval related to land use are required.

4.12. MINERAL RESOURCES

Would the project:	New Significant Impact Not	More Severe Impact	No Substantial Change	No Change Relative to the 2013 FEIR

	Identified in 2013 FEIR	Relative to 2013 FEIR	Relative to 2013 FEIR	
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013

General Plan EIR Findings

The 2013 FEIR describes that there are no mineral recovery sites in Newark and while the State Board of Mining and Geology has identified mineral resource zones (MRZ) underlying almost all of the Plan Area, given the extent of urban development in Newark and the proximity of sensitive environmental resources in the Don Edwards San Francisco Bay National Wildlife Refuge, future mineral extraction is unlikely, and an area that was previously designated as containing extractable aggregate deposits is no longer considered to be underlain by aggregate resources per Update of Mineral Land Classification: Aggregate Materials in the South San Francisco Bay Production-Consumption Region (1996). As such, impacts related to the loss of mineral resource availability from the implementation of the project (General Plan) would be less than significant.

Project Consistency with the 2013 FEIR

4.12(a-b) (Mineral Resources) No Change Relative to the 2013 FEIR: The City does not contain known significant mineral resources of value. As such, the Project would result in no impact to mineral resources. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion

The Project would not result in any new or more severe impacts to mineral resources relative to what was identified in the 2013 FEIR.

4.13. NOISE

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐
b) Generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☒	☐
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose	☐	☐	☐	☒

people residing or working in the project area to excessive noise levels?

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013, Environmental Noise Assessment, prepared by Salter, November 11, 2022, and Environmental Review of Construction Noise and Vibration, prepared by Salter, May 2, 2023.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to Noise in Chapter 4.10 and determined the following:

- Impact NOI-1: Implementation of the proposed project (General Plan) would not expose people to or generate noise levels in excess of standards established in the General Plan or the NMC and/or the applicable standards of other agencies. This impact is considered less than significant, subject to compliance with the California Building Code and Newark Land Use Noise Compatibility Guidelines and the implementation of General Plan Policy EH-7.4, Action EH-7.A as it pertains to interior noise, and Actions EH-6.A and EH-7.A as it pertains to exterior noise.

- Impact NOI-2: Implementation of the proposed project (General Plan) would not expose people to or generate excessive groundborne vibration or groundborne noise levels. This impact is considered less than significant, subject to compliance with the California Building Code and Newark Land Use Noise Compatibility Guidelines and the implementation of General Plan policies and actions for non-residential uses as follows: Policies LU-2.5, LU-3.5, EH-6.4, EH-7.3, EH-7.6, and Actions EH-6.6, EH-6.7, EH-7.B, EH-7.C, EH-7.D, EH7.E, EH7.F, EH-6.B, and LU-2.A..

- Impact NOI-3: Implementation of the proposed project (General Plan) would result in a substantial permanent increase in ambient noise levels in the Plan Area above levels existing without the project with increases in vehicular traffic because of the project implementation in conjunction with regional growth. The permanent increases to ambient noise levels would exceed applicable standards along ten major roadway segments in the Plan Area. Implementation of the applicable goals, policies and actions of the General Plan would reduce or prevent significant increases in ambient noise at sensitive land uses under implementation of the project. However, the mitigation measures described in these policies would not be universally feasible and/or appropriate. No additional measures are available to reduce this impact to a less than significant level and related impacts would be significant and unavoidable. A statement of overriding consideration was adopted with the certification of the 2013 FEIR.

- Impact NOI 4: Implementation of the proposed project (General Plan) would not result in substantial temporary or periodic increases in ambient noise levels in the Plan Area above existing levels subject to compliance with the California Building Code and Newark Land Use Noise Compatibility Guidelines, and the implementation of General Plan Policies EH-6.6, EH-6.7, and Action EH-7.B. This impact is considered less than significant.

- Impact NOI-5: Implementation of the proposed project (General Plan) would not result in exposure of people residing or working in the vicinity of the Plan area to excessive aircraft noise levels, for a project located within an airport land use plan, or where such a plan has not been adopted, within 2 miles of a public airport or public use airport because there are no areas in Newark which fall within an airport land use plan or 55 (decibels) dBA contour for any of the airports located in proximity to the city and all public and public use airports in the vicinity are located a distance of 5 miles or greater. This impact is considered to be less than significant.

- Impact NOI-6: Implementation of the proposed project (General Plan) would not result in exposure of people residing or working in the project area to excessive noise levels, for a project within the vicinity of a private airstrip because there are no private airstrips within Newark and heliports operated by First Interstate Bank and Washington Hospital in Fremont are located at a distance of 1.7 and 2.2 miles,

respectively, from the City of Newark border and used sporadically. Therefore, noise impact related to private airstrips would be less than significant.

Project Consistency with the 2013 FEIR

4.13(a) (Increase in Ambient Noise) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that implementation of the General Plan would have a less than significant impact related to temporary or permanent increases in ambient noise levels subject to compliance with the California Building Code and Newark Land Use Noise Compatibility Guidelines with implementation of General Plan policies and actions as identified above under Impact NOI-1.

The Project would entail the demolition of the existing buildings, grading/site preparation work and the construction of 76 alley-loaded three-story residences (townhomes) and associated improvements on a site located adjacent to I-880. As indicated in the "Environmental Review of Construction Noise and Vibration", prepared by Salter, May 2, 2023 (**Appendix E-1**), construction noise would vary depending on the type of equipment being used, the process, and the location. COA In accordance with Action EH-6.6 and Action EH-6.7 in the General Plan, COA NOI-1 will be implemented to regulate hours of construction and to address construction noise sources. Implementation of these conditions of approval would render impacts from increases in temporary ambient noise less than significant.

Project generated noise at operations will consist of noise from traffic generated by the Project and mechanical equipment generally associated with the ventilation for the proposed buildings. The Project is anticipated to generate 562 net daily trips in an environment dominated by existing traffic noise from I-880 and the Project traffic noise would not add substantially to the existing ambient noise levels. COA NOI-2 below sets limits on noise from mechanical equipment in accordance with NMC Section 17.24.100(A)(2).

Although the effect of ambient noise on the Project is not considered an environmental impact under CEQA, General Plan Action EH-7.A requires the preparation of an acoustical study for new developments in areas where the noise levels exceed the 'normally acceptable' levels for the proposed land use, as set forth in the General Plan. Action EH-7.A also recommends that the analysis include mitigation measures to limit the noise exposure in interior living spaces to 45 dB Ldn (Day Night Average Sound Level), consistent with California Title 24. In accordance with Action EH-7.A, an acoustical study "Environmental Noise Assessment", November 11, 2022, was prepared by Salter (**Appendix E-2**). As indicated in this study, the Project is located in an area where the noise levels exceed the normally acceptable levels of 65 dB or less set forth for multi-family residential use. COA NOI-3 and COA NOI-4 shall be imposed on the Project based on this study to reduce the effects of ambient environmental noise on the project as required by the General Plan, more specifically, Action EH-7.A. and Policy EH-7.4. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.13(b) (Groundborne Vibration) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that impacts from groundborne vibrations would be less than significant subject to compliance with the California Building Code and Newark Land Use Noise Compatibility Guidelines with implementation of General Plan policies and actions as identified above under Impact NOI-2.

As a residential development, the Project would not result in long-term and excessive groundborne vibration and groundborne noise after construction. During construction, the Project may generate temporary and intermittent groundborne vibrations and noise through the operation of construction equipment, material hauling, and earthwork. The study "Environmental Review of Construction Noise and Vibration", prepared by Salter, May 2, 2023 (**Appendix E-1**) addressed construction groundborne vibrations. This study compared the groundborne vibration levels from vibration intensive equipment such as jackhammers and vibratory rollers that could potentially have a noticeable effect to the Federal Transit Administrations (FTA) vibration annoyance criteria in accordance with General Plan Action EH-7.E. Action EH-7.E requires implementation of additional measures such as the use of less-vibration intensive equipment or construction techniques if construction-related vibration is determined to be perceptible (i.e., in excess of FTA vibration annoyance criterion) at vibration-sensitive uses. Accordingly, COA NOI-5 sets forth distances required for operation of different types of equipment from the motel building toward the south of the Project site to offset vibration levels in excess of

the annoyance criteria. Groundborne vibrations as a result of the Project's construction would not exceed the 78 VdB annoyance criteria at nearby residences that are located approximately 100 feet from the Project site. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.13(c) (Airfield Noise) No Change Relative to the 2013 FEIR: The 2013 FEIR determined that noise impacts due to the proximity of the Project site to an airfield would be less than significant. The City is not located within the vicinity of a private airstrip or an airport land use plan, nor is it within two miles of a public airport or public use airport. As indicated in Chapter 4.9 of this document, the nearest airport, Hayward Executive Airport, is located approximately 11 miles to the north of the Project site. Other area airports include, Palo Alto Airport, which is located approximately 16 miles southwest of the project site and Norman Y. Mineta San Jose International Airport, which is located further away at approximately 15 miles to the south of the Project site. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The Project would not result in any new or more severe impacts to noise relative to what was identified in the 2013 FEIR with the implementation of the following conditions of approval:

COA NOI-1: The following noise reduction measures will be implemented to minimize the impact of construction noise onto offsite receivers:

1. Construction activity shall be limited to the hours of 7 AM to 7 PM Monday through Friday and 10 AM to 6 PM on Sundays and holidays. Noise from construction activity occurring outside these hours will be limited to the levels outlined in the Newark Municipal Code Section 17.24.100.A.3.

2. The contractor shall require properly maintained mufflers on construction vehicles.

3. To the extent feasible, stationary construction equipment and staging areas shall be located as far as possible from adjacent residences and the motel.

4. The contractor shall implement temporary noise barriers between noisy activities and adjacent residences and the motel.

5. To the extent feasible, construction should proceed from Cedar Boulevard towards Intestate 880, and from south to north, so that constructed buildings will help shield residences from equipment and construction activities.

6. The contractor will designate a "noise disturbance coordinator" who would be responsible for responding to any local complaints about construction noise.

7. Signs will be posted at the construction site to notify the neighborhood of permitted days and hours of activities, and to provide a day-time telephone number for the noise disturbance coordinator.

COA NOI-2: Mechanical equipment noise as a result of the Project shall be limited to no more than 70 dBA between the hours of 7 a.m. and 9 p.m., and 60 dBA between the hours of 9 p.m. and 7 a.m in accordance with NMC Section 17.24.100.A.2).

COA NOI-3: Exterior building assemblies shall be sound-rated to reduce environmental noise to the DNL 45 dB criterion indoors. Sound insulation ratings should be for the complete assembly, including glass and frame, and should be based on laboratory test reports of similar sized samples from a National Voluntary Laboratory Accreditation Program (NVLAP) accredited lab. Since windows will need to be closed to meet the interior noise criteria, the mechanical design

should meet ventilation requirements with windows in the closed position. The building assemblies shall be reviewed and accepted to meet the aforementioned criteria during the building permit process.

COA NOI-4: The height of the 18-foot tall retaining wall to the rear of the Project site adjacent to I-880 that would serve as a noise barrier shall be measured with respect to the freeway elevation, or yard elevation, whichever is higher. The barrier shall extend the length of the site and wrap the ends, returning towards Cedar Boulevard and shall be solid from bottom to top with no cracks or gaps and have a minimum surface density of approximately three pounds per square foot to reduce traffic noise levels in Project related outdoor spaces to DNL 65 dB or below. The barrier shall step down along the side property lines from a height of 18 feet to 8 feet, as shown in Figure 2 of the Environmental Noise Assessment, prepared by Salter, November 11, 2022.

COA NOI-5: Limit the use of the following construction equipment to the following distances from the motel building located toward the south of the Project site.

1. Large bulldozers and loaded trucks to a minimum of 50 feet.
2. Jackhammering to a minimum of 30 feet.
3. vibratory rollers to a minimum of 85 feet.

4.14.POPULATION AND HOUSING

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☐	☒
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013, and City of Newark, 5th Cycle 2015-2023 Housing Element Update for the 2015-2023 Period.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to Population and Housing in Chapter 4.11 and determined the following:

- Impact POP-1: Implementation of the proposed project (General Plan) would not induce substantial unplanned population growth in the Plan Area either directly or indirectly, subject to the implementation of Mitigation Measure 4.9-1 from the Newark Housing Element EIR and General Plan Policies LU-1.2 and LU-1.4. This impact is considered less than significant.

- Impact POP-2: Implementation of the proposed project (General Plan) would not displace substantial numbers of existing housing units, necessitating the construction of replacement housing elsewhere, subject to implementation of the General Plan Policies LU-1.2, LU-1.8 and LU-1.10. This impact is considered less than significant.

- Impact POP-3: Implementation of the proposed project (General Plan) would not displace substantial numbers of people, necessitating the construction of replacement housing elsewhere, subject to implementation of General Plan Policy LU-1.8 and the development of new housing units as per the General Plan. This impact is considered to be less than significant.

- Impact POP-4: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable projects, would not result in significant cumulative impacts with respect to population and housing as buildout of the project would be consistent with regional planning initiatives, and occur incrementally over a period of 20 years and would not represent substantial, unplanned growth even though and the project could result in more growth than currently envisioned in regional projections. This is less than cumulatively considerable.

Project Consistency with the 2013 FEIR

4.14(a) (Induced Substantial Growth). No Change Relative to the 2013 FEIR: The Project is consistent with the planned development potential analyzed in the 2013 FEIR and the Project site is largely served by existing infrastructure within an established urban environment. The project site is a part of the Cedar Boulevard Industrial to Residential Conversion area identified as Site "G" in the City of Newark Housing Element Update 2015. The Project proposes 76 residential units, which will result in 252 additional persons at a household size of 3.32 persons[6] in Newark that is well within the population of 60,510 persons anticipated in the General Plan at buildout, analyzed in the 2013 FEIR. Since the adoption of the General Plan, the city has not experienced

[6] https://www.census.gov/quickfacts/newarkcitycalifornia, last accessed June 2023

substantial population growth, but has decreased by 0.4 percent from April 1, 2020, to July 1, 2022, as per the United States Census data. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

4.14(b) (Displacement). No Change Relative to the 2013 FEIR: The 2013 FEIR determined that impacts from displacement would be less than significant with the implementation of policies identified under Impact POP-2, and Impact POP-3. Consistent with these policies, the General Plan has designated areas for the development of housing in the city, with the intent to increase the amount and variety of housing opportunities. The Project involves the development of new housing units without demolishing existing housing units or causing displacement. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion

The Project would not result in any new or more severe impacts to population and housing relative to what was identified in the 2013 FEIR. The Project consists of development consistent with the projected growth under the General Plan and no environmental conditions of approval related to population and housing are required.

4.15.PUBLIC SERVICES

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:	☐	☐	☒	☐
Fire Protection?	☐	☐	☒	☐
Police Protection?	☐	☐	☒	☐
Schools?	☐	☐	☒	☐
Parks?	☐	☐	☒	☐
Other public facilities?	☐	☐	☒	☐

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to Public Services in Chapter 4.12 and determined the following:

Fire Protection

- Impact PS-1: Implementation of the proposed project (General Plan) would not result in the provision of or need for new or physically altered fire protection facilities, the construction or operation of which

could cause significant environmental impacts because, per the Alameda County Fire Department (ACFD), the increase in population at project buildout would not require the construction or expansion of facilities. Further compliance with the provisions of the California Building Code and California Fire Code and implementation of the following General Plan goals, policies and actions would reduce the risks associated with fire hazards and minimize calls for fire and emergency medical response services in Newark: Goals CS-2 and CSF-4; Policies CSF-4.2, CSF-4.4 to CSF-4.7, and Actions CSF-4.F, CSF-4.G and CSF-4.H. This impact is considered to be less than significant.

- Impact PS-2: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable development, would not result in significant cumulative impacts with respect to fire protection service subject to the California Building Code, California Fire Code, and development review of future projects under the General Plan and ACFD Strategic Business Plan. This is a less than cumulatively considerable impact.

Law Enforcement Services

- Impact PS-3: Implementation of the proposed project (General Plan) would not result in a significant impact related to the construction or expansion of police facilities with continued collection of Capital Facilities Fees from development under the proposed project and implementation of General Plan Goal CSF-4, Policy CSF-4.1, and Actions CSF-4 and CSF-4.D.

- Impact PS-4: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable growth, would not result in significant cumulative impacts with respect to law enforcement services subject to Capital Facilities Fees from development under the Plan and development review of future projects under the General Plan and because the changes and growth anticipated under the proposed Plan would not have any cumulative impact beyond the service boundary of the Newark Police Department service area. This is less than cumulatively considerable impact.

Public Schools

- Impact PS-5: Implementation of the proposed project (General Plan) would not result in the provision of or need for new or physically altered school facilities, the construction or operation of which could cause significant environmental impacts subject to school impact fees and pursuant to the provisions of California Government Code Section 65996(3)(h) whereby payment of these fees is deemed to be full and complete mitigation of these impacts. This is a less than significant impact. Further, General Plan Policies CSF-2.1 and CSF-2.2, and Actions CSF-2.A and CSF-2.B provide the framework for the accommodation of increased enrollment as it occurs incrementally over the horizon of the proposed project.

- Impact PS-6: Implementation of the proposed project (General Plan) in combination with past, present, and reasonably foreseeable growth in the Newark Union School District Service area would result in less than significant cumulative impacts with respect to schools subject to the payment of school impact fees by future development under the Plan and implementation of the policies and actions identified above. This is a less than cumulatively considerable impact.

Parks

- Impact PS-7: Implementation of the proposed project (General Plan) would not result in substantial adverse physical impacts associated with the provision of new or physically altered parks and recreational facilities in order to maintain the City's adopted ratio of parkland per thousand residents with the implementation of the General Plan Actions POS-3.A, POS-3.D and POS-3.H and subject to project-level CEQA review at the time future park facilities are proposed for construction in order to identify and mitigate associated impacts, as needed. This impact is considered to be a less than significant impact.

- Impact PS-8 is discussed under the "Recreation Section".

- Impact PS-9 is discussed under the “Recreation Section”.

- Impact PS-10 is discussed under the “Recreation Section”.

Other Facilities

- Impact PS-11: Implementation of the proposed project (General Plan) would not result in the need for new or physically altered library facilities with the implementation of the Goal CSF-1, Policy CSF-1.6, and Actions CSF-1.E and CSF-1.F. This impact is considered to be a less than significant impact.

- Impact PS-12: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable development, would result in less than significant cumulative impacts with respect to libraries because the proposed project is not anticipated to contribute to a substantial adverse impact on the library system’s ability to serve its constituents and future library expansion or improvements when and if identified would undergo project specific CEQA review. This is less than cumulatively considerable impact.

Project Consistency with the 2013 FEIR

4.15(a) (Public Services) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined impacts to public services to be less than significant with implementation of the policies set forth in the General Plan, as identified above. The 2013 FEIR concluded that the increase in population at buildout of the General Plan would not require the construction or expansion of fire protection facilities, required development fees would offset the increase in the use of police, schools, parks and other services, and engagement of respective departments in the review of future development projects would ensure that projects are designed and developed to minimize impacts.

The Project is consistent with the development potential analyzed in the 2013 FEIR and the Project plans were reviewed and accepted by the Fire and Police Departments. The Project is a multifamily residential development that could potentially create direct impacts on educational services provided by schools through the addition of new students. The 2013 FEIR determined that much of the additional demand as a result of the buildout of the General Plan was accounted for in the Newark Union School District (NUSD) projections. Additionally, the Project would be subject to school impact fees where payment of these fees is deemed to be full and complete mitigation of school impacts pursuant to the provisions of California Government Code Section 65996(3)(h). Additionally, the increase in demand for parks associated with population growth and development was considered in the 2013 FEIR. The Project is consistent with the projected buildout analyzed in the 2013 FEIR, which determined impacts to existing parks would be less than significant. Additionally, as described in Chapter 4.16 of this document, the Project would include common and private open space areas, for use by the residents, that conform to the respective open space standards applicable to the RM zoning district per NMC Section 17.07.030. Additionally, the Project is subject to development impact fees to fund maintenance, acquisition, and development of City of Newark public park and recreational facilities. Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion

The Project would not result in any new or more severe impacts to public services relative to what was identified in the 2013 FEIR. The Project consists of development anticipated in and consistent with the General Plan and the required development impact fees would offset potential incremental increase in the use of services. No environmental conditions of approval related to public services are required.

4.16.RECREATION

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☐	☒
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	☐	☐	☒	☐

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to recreational parks and facilities in Chapter 4.12, Public Services and Recreation, and determined the following:

- Impact PS-7: The proposed Plan would not result in substantial adverse physical impacts associated with the provision of new or physically altered parks and recreational facilities in order to maintain the City's adopted ratio of parkland per thousand residents subject to implementation of POS-3.A, POS-3.D, and POD-3.H.

- Impact PS-8: Implementation of the proposed project (General Plan) would not increase the use of existing neighborhood and regional parks or other recreational facilities, such that substantial physical deterioration of the facility would occur, or be accelerated with the implementation of General Plan Goal POS-3, and Policies POS-3.1, POS-3.2 and POS-3.8. This impact is considered to be a less than significant impact.

- Impact PS-9: Implementation of the proposed project (General Plan) would not include or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment as described under Impact PS-7 above. This impact is considered to be a less than significant impact.

- Impact PS-10: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable growth, would not result in significant cumulative impacts with respect to parks and recreational facilities with the implementation of the following General Plan goal, policies and actions: Goal PR-5, Policies PR-1.5, PR-4.4, PR-5.1 to PR-5.8, and Actions PR-5.A, PR-5.B, PR-5.C and PR-5.D. This is less than cumulatively considerable impact.

Project Consistency with the 2013 FEIR

4.16(a) (Deterioration of Parks) No Change Relative to the 2013 FEIR: The 2013 FEIR concluded that the General Plan would not result in a significant impact to existing recreational facilities because of increased use. The Project does not directly propose the construction of any parks or recreational facilities; however, it will implement numerous goals, policies, and actions that seek to promote and encourage the development of parks in the Plan Area. Specific actions for increasing provision of parks are identified above in Impact PS-7 discussion. Further, General Plan goals and policies identified under Impact PS-8 and PS-9 would be implemented to keep up with the anticipated population increase at buildout, modernization, and maintenance of existing recreations facilities.

The Project is generally consistent with the General Plan as a medium density residential development on a site designated for such use in the General Plan and is not expected to result in substantially more significant impacts to parks or recreational facilities as compared to the impacts analyzed in the 2013 FEIR. Additionally, the Project would include common and private open space areas that conform to the respective open space standards applicable in the RM zoning district per NMC Section 17.07.030. The Project would also be subject to parks impact fees, which are used to fund maintenance, acquisition, and development of Newark parks and recreational facilities.

4.16(b) (Additional Recreational Facilities) No Substantial Change Relative to the 2013 FEIR The General Plan does not directly propose the construction of any parks or recreational facilities; however, it includes goals, policies, and actions that seek to promote and encourage the development of parks in the Plan Area. The facilities that were identified as a result of these goals, policies and actions were analyzed in previous EIRs for the Dumbarton TOD and Southwest Newark Residential and Recreational Focus Area at a programmatic level and would be analyzed at the project level at the time of the development of the specific park projects. The Project is located away from these areas and does not require additional facilities beyond what has been planned. The Project's contribution to development impact fees would be sufficient to fund parkland acquisition as well as maintenance and development of Newark parks and recreational facilities. Therefore, environmental impacts related to construction, or expansion of recreational facilities are not expected to be substantially new or more severe relative to the 2013 FEIR as a result of the proposed Project.

Conclusion

The Project would not result in any substantially new or more severe impacts to recreation relative to what was identified in the 2013 FEIR. The Project consists of residential development anticipated by the General Plan overall and will be subject to payment of park fees and no environmental conditions of approval related to recreation are required.

4.17.TRANSPORTATION

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	☐	☐	☒	☐
b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	☐	☐	☒	☐
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☒	☐
d) Result in inadequate emergency access?	☐	☐	☒	☐

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Traffic Impact Study Report, prepared by TJKM, revised April 21, 2023; Cedar Townhomes VMT Analysis Memo, prepared by TJKM, October 14, 2022; Cedar/Smith Signal Warrant and Fair Share Assessment, prepared by TJKM, May 2023, and Cedar Boulevard Landscape Plans, Sheet L-1, Illustrative Site Plan, and Sheet L-2, Pedestrian Circulation Plan.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to Traffic and Circulation in Chapter 4.13 and determined the following:

- Impact TRANS-1: Implementation of the proposed project (General Plan) would cause intersection operation to degrade to an unacceptable LOS F at the a) Ardenwood Boulevard and SR 84 westbound ramps intersection during the AM peak hour in 2035, b) the Newark Boulevard and SR 84 eastbound ramps intersection during the PM peak hour in 2035, and c) the Cherry Street/Boyce Road and Stevenson Boulevard intersection during the PM peak hour at buildout. This is considered a significant impact and remains significant and unavoidable with mitigation. A statement of overriding consideration was adopted with the certification of the 2013 FEIR.

  None of the above referenced intersections would be impacted by the Project traffic and were not required to be studied as part of the Project.

- Impact TRANS-2: Implementation of the proposed project (General Plan) would not conflict with the 2011 Alameda County Transportation Commission (CTC) Congestion Management Program (CMP) and would not add traffic representing more than 1 percent of the roadway capacity to any of the Metropolitan Transportation System (MTS) roadway segments in the Plan Area or its vicinity. Additionally, congestion levels would be reduced by the following General Plan goals, policies and actions: Goals T-3, T-4, Policies T-3.1, T-3.3, T-3.4, T-4.1 to T-4.9, T-6.1, T-6.2 and T-6.4, and Actions T-3.A to T-3.C, T-4, T-4.A to T-4.E. This impact is considered a less than significant impact.

- Impact TRANS-3: Implementation of the proposed project (General Plan U) would not result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks because as described in Chapter 4.9 and 4.13 of this document there are no airports in the vicinity of the Project site except helipads located 1.7 miles away where landings are infrequent. This impact is considered a less than significant impact.

- Impact TRANS-4: Implementation of the proposed project (General Plan) would not substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment) subject to the design and safety standards in Newark Municipal Code, the State Building Code, and the State-referenced provisions of the International Fire Code and the implementation of the General Plan goals, policies and actions, including Policies T-1.6, T-2.7, T-2.8, T-5.11, and Action T-1.B This impact is considered a less than significant impact.

- Impact TRANS-5: Implementation of the proposed project (General Plan) would not result in inadequate emergency access subject to the subject to the design and emergency standards specified in the Newark Municipal Code, the State Building Code, and the State-referenced provisions of the International Fire Code and the implementation of General Plan policies and actions intended to ensure adequate emergency access and efficient circulation, including Policies T-5.1 and T-5.9, and Action T-1.B. This impact is considered a less than significant impact.

- Impact TRANS 6: Implementation of the proposed project (General Plan) would not conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities because of the following:
  - City of Newark has adopted a Complete Streets Policy that is consistent with California AB 1358, and requires that transportation improvements in Newark be planned, funded, designed, constructed, operated, and maintained to provide safe mobility for all users appropriate to the function and context of the facility. The Complete Streets Policy is supported by General Plan Goal T-1, Policies T-1.1, T-1.3, T-1.6, and Actions T-1.B to T-I.D.
  - The General Plan is consistent with the Newark Transportation System Management Ordinance, adopted to manage employment-related travel demand supported by Policy T-4.6.
  - The City's ongoing efforts at preparation of a Pedestrian and Bicycle Master Plan for a system of bikeways and support facilities within Newark that will also establish design standards for bicycle facilities, as well as education and safety programs. The General Plan goals, policies

and actions that support the development of the City's Pedestrian and Bicycle Master Plan are as follows: Goal T-2, Policies T-2.1 to T-2.13, and Actions T-2.A to T-2.F, T-2.H to T-2.J.

This impact is considered a less than significant impact.

- Impact TRANS 7: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable projects, would not result in additional cumulatively considerable impacts because cumulative impacts would be the same as impacts specific to the proposed project that would be addressed locally through specific road improvements, as well as through implementation of the goals, policies, and actions of the General Plan that seek to reduce existing vehicle trips, minimize the addition of new vehicle trips, and lower per capita VMT. This is a less than cumulatively considerable impact.

Level of Service to Vehicle Miles Traveled

Level of service (LOS) has historically been used as a standard measure of traffic service within the City of Newark. Pursuant to SB 743, as of July 1, 2020, lead agencies are required to evaluate transportation impacts of a project using a Vehicle Miles Traveled (VMT) metric, which focuses on balancing the needs of congestion management with statewide goals related to infill development, promotion of public health through increased active mobility facilitated by closer proximity to alternative travel modes and reduction of greenhouse gas emissions.

In December 2018, the California Governor's Office of Planning and Research (OPR) published the Technical Advisory on Evaluating Transportation Impacts in CEQA, which provides recommendations for evaluating a project's transportation impact using a VMT metric, thresholds of significance, and mitigation measures. Pursuant to Government Code Section 15064.3(b), lead agencies have discretion to select the most appropriate methodology for evaluating a project's VMT impacts. To date, June 2023, the City of Newark has not adopted VMT thresholds or guidelines. In the absence of locally adopted thresholds at the time of review of the proposed Project, the City of Newark relies upon recommendations set forth in the Governor's Office of Planning and Research (OPR)'s Technical Advisory. The Technical Advisory provides qualitative thresholds for which projects are considered to have characteristics that will not result in significant VMT impacts and are therefore not required to conduct transportation analysis for VMT.

Vehicle Miles Traveled (VMT) Screening Analysis

SB 743 established a change in the metric to be applied for determining traffic impacts associated with development projects. The OPR Technical Advisory (December 2018) provides guidance to analysts and local jurisdictions for implementing VMT as a metric for determining the transportation impact for land use projects The OPR guidelines state that for analysis purposes, "VMT" refers to automobile VMT, specifically passenger vehicles and light trucks. Heavy truck traffic is typically excluded. The OPR methodology and implementation guidelines were adopted by the Alameda County Transportation Commission in July 2020.

Project Consistency with the 2013 FEIR

4.17(a) (Conflicts with Plans, Policies, Ordinances) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that the implementation of the General Plan would not conflict with the 2011 Alameda CTC (ACTC) Congestion Management Program (CMP). The CMP is a technical document that describes strategies and procedures to: (1) measure the performance of the county's multimodal transportation system, (2) address roadway congestion and improve the performance of a multimodal system, and (3) connect transportation and land use planning. Pursuant to state legislation, the ACTC is required to update the CMP every two years and the ACTC CMP has been updated subsequent to the adoption of the General Plan in 2013 and certification of the 2013 FEIR. However, the technical elements of a CMP remain the same. The CMP recommends a detailed transportation impact analysis (TIA) for projects generating 100 vehicle-trips or more during the weekday PM peak hour.

The Project TIA, prepared by TJKM, revised April 21, 2023 (**Appendix F-1**) estimated that the Project would generate 562 net daily trips of which 31 (six inbound, 25 outbound) trips would be generated during the a.m. peak hour and 33 (24 inbound, nine outbound) trips would be generated during the p.m. peak hour. Since the project is expected to generate fewer than 100 net PM peak hour trips, a CMP roadway segment analysis was not required. The TIA evaluates the impacts on the transportation infrastructure due to the addition of traffic from the Project at five study intersections during the weekday morning (a.m.) and weekday afternoon (p.m.) peak hours under six study scenarios: No Project and Plus Project scenarios for Existing, Background, and Cumulative Conditions using the Level of Service analysis methodology. While the LOS standards are no longer used for identifying impacts under CEQA, the LOS analysis is still used for determining consistency with adopted agency plans and standards.

Based on the City of Newark standards, a project would result in an adverse impact on traffic conditions at a signalized intersection if for either peak hour:

1. The level of service at the intersection degrades from an acceptable LOS D or better under no project conditions to an unacceptable LOS E or F under project conditions.

2. The level of service at the intersection is an unacceptable LOS under no-project conditions and the addition of project trips causes the average delay at the intersection to increase by four (4) or more seconds.

An adverse impact by the City of Newark standards is said to be satisfactorily mitigated when measures are implemented that would restore intersection level of service to no project conditions or better. Based on the analysis of the study intersection, the TIA recommended the following with respect to the intersection of Cedar Boulevard/Moores Avenue:

1. Installation of crosswalks (including pedestrian signal heads and push buttons) along the newly proposed north leg (the site entrance) and along the west leg of the intersection.

2. Installation of a tactile surface for the existing curb ramp at the northeast corner of the intersection.

These recommendations are proposed as part of the improvements associated with the Project. Additionally, the Project would be consistent with the General Plan Policies T-4.1 and T-4.2 applicable to the Project in that it consists of higher density development serviced by transit with Alameda-Contra Costa Transit (AC Transit) bus stops located in close proximity to the site and accessed via a continuous path of sidewalks and adequate bicycle facilities. AC Transit routes 200, 232, 620, 626 and 628 serve these bus stops and in turn provide regional access with connection to Union City and Fremont BART stations through various residential neighborhoods in north Newark. The Fremont Bart Station is itself located 3.5 miles from the Project site.

Additionally, the California Manual on Uniform Traffic Control Devices (MUTDC) specifies signal warrants to provide guidance on when a traffic signal should be considered at an unsignalized intersection. Only one warrant needs to be satisfied to support the installation of a traffic control signal and additional warrants met would further support the appropriateness of installation. These signal warrants are as follows:

- Warrant 1 – Eight-Hour Vehicular Volume
- Warrant 2 – Four-Hour Vehicular Volume
- Warrant 3 – Peak-Hour Vehicular Volume
- Warrant 4 – Pedestrian Volume
- Warrant 5 – School Crossing Volume
- Warrant 7 – Crash Experience

These warrants were evaluated by TJKM in the "Cedar/Smith Signal Warrant and Fair Share Assessment" (**Appendix F-2**) to ascertain whether the Cedar Boulevard/Smith Avenue intersection would require signalization. According to the analysis, signalization at this intersection should be considered because the peak-hour warrant is met. As a result, the City's Department of Public Works has placed a condition of approval on the project for compliance with the MUTDC provisions that is reproduced below as COA TRAN-1

The City has also adopted a "Pedestrian and Bicycle Master Plan", which was adopted on February 23, 2017, and comprehensively addresses the City's biking and walking environment in the years to come. The Project would be served by existing bicycle facilities that include Class II bike lanes on Cedar Boulevard between Balentine Drive and Central Avenue and Class III bike lanes on Cedar Boulevard between Balentine Drive and Stevenson Boulevard. Other bike lanes in the Project vicinity include Class III bike lanes on Smith Avenue between Cedar Boulevard and Cherry Street, and Class II bike lanes along Mowry and Central Avenues and Cherry Street that connect the Project site to the larger area in Newark. As indicated in **Appendix F-1**, the Project would not conflict with or disrupt existing bicycle or pedestrian circulation nor would it be inconsistent with the City's Pedestrian and Bicycle Master Plan. The Project would also not disrupt transit facilities because the additional trips generated by the Project would be served by existing transit services operating in the area and there would be adequate sidewalks and bicycle facilities to access the transit stop from the Project site.

Therefore, the Project will not introduce new or more severe impacts due to a conflict with policies related to vehicular level of service, pedestrian, bicycle and transit services, beyond those identified in the 2013 FEIR.

4.17(b) (Conflict with 15064.3(b) VMT) No Substantial Change Relative to the 2013 FEIR: Following adoption of the General Plan and certification of the 2013 FEIR, SB 743 went into effect. In the absence of locally adopted VMT thresholds, the City of Newark is relying upon the ACTC guidelines for VMT analysis drawn from the Technical Advisory for evaluating VMT issued by the OPR. A VMT Screening Analysis was completed for the Project (**Appendix F-1**) based on the ACTC guidelines. As indicated in **Appendix F-3**, the ACTC guidelines include a screening process that describes five scenarios in which a project would be exempted from a VMT analysis requirement: 1) projects exempt from CEQA analysis, 2) small projects, 3) local serving projects, 4) projects in transit priority areas, and 5) projects in low VMT areas. ACTC defines a low VMT area as a city or unincorporated portion within one of the ACTC subregions where home-based VMT per resident is at least 15 percent below the countywide VMT or where the commute VMT per employee is at least 15 percent below the regional average. Therefore, under ACTC guidelines, a residential project would have a significant impact on VMT if it would generate residential VMT per capita that is higher than 85 percent of the South Alameda County average. The ACTC model includes traffic analysis zones (TAZ) covering geographic areas throughout Alameda County.

Based on the analysis included in **Appendix F-3**, Traffic Analysis Zone (TAZ) No. 934 in which the Project would be located has a baseline average residential VMT of 23.24 miles per capita while the Project VMT would be 18.43 miles per capita, which is less than the screening threshold of 19.21 miles per capita. Therefore, the proposed Project would be expected to result in a less-than-significant VMT impact.

4.17(c) (Geometric Design Feature Hazard) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR determined that there would be a less than significant impact as it relates to hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment), subject to design and construction of the transportation and circulation improvements consistent with local, regional, and federal standards and implementation of General Plan policies identified under Impact TRANS-4 above.

Access to the Project would be provided in generally the same location as currently existing via a two-way driveway at the north leg of the Cedar Boulevard and Moores Avenue intersection. As shown on the Site Plan (**Appendix G**), the internal vehicular circulation network on the Project site would consist of a 24 foot wide street in a general east to west direction that would serve as the spine for 24 foot wide streets in a general north-south direction that would provide access to the residences. The former roadway would turn toward Cedar Boulevard at the southeastern property boundary to provide emergency access at the southwestern corner of the site from Cedar Boulevard. Internal pedestrian pathways would be provided along the rear property boundary, along the driveway and between the rows of buildings that would connect to the sidewalk

along Cedar Boulevard to the front of the Project site. The Project also proposes off-site transportation related improvements that are described in Chapter 2.3 of this document and are reiterated below:

- Widening of Cedar Boulevard on its northeast side along the Project site frontage to accommodate a 12-foot travel lane, an 11-foot travel lane, a 2-foot bike buffer, and a 5-foot bike lane with a four-to six-foot wide parkway strip behind the curb and 6-foot wide separated meandering sidewalk included in the street section.

- Extension of the existing Cedar Boulevard landscape median island toward the north to create a dedicated left turn pocket at the Cedar Boulevard-Moores Avenue intersection.

- Relocation behind the new curb line of existing utilities including streetlights, fire hydrants, water meters, joint trench boxes as well as the existing storm drainage inlet located at the proposed Project's entrance.

- Relocation behind the new curb line of existing traffic signal heads and pole in the southeast quadrant of the Cedar Boulevard-Moores Avenue intersection.

- New directional curb ramps at the Project entrance and new crosswalks on the eastern and northern legs of the Cedar Boulevard-Moores Avenue intersection.

- Restriping of crosswalk on the southern leg of the intersection to match the new directional curb ramp locations and pedestrian push button location and in the northeastern half of Cedar Boulevard to match the proposed lane widths.

- Installation of a new Cedar Boulevard landscape median north of Moores Avenue intersection to create a dedicated left turn pocket into the project entrance. The landscape median will connect to the new landscape median that will be constructed with the adjacent project.

- A traffic signal and crosswalk improvements at the Cedar Boulevard and Smith Avenue intersection, in accordance with condition of approval (COA) TRAN-1. Traffic signal plans shall be prepared, reviewed, and approved as part of the Project's improvement plans. The adjacent residential development to the west of the Project site is similarly conditioned to provide the traffic signal improvements at Cedar Boulevard and Smith Avenue. If, at the time of final map approval, the applicant of the adjacent residential development has already provided guarantee(s) or other appropriate improvement security for the traffic signal, the Project will not be required to install the traffic signal.

Proposed improvements associated with the Project would not present geometric design feature hazards associated with the existing and proposed improvements and all of the above improvements have been reviewed by the City's Public Works Department and accepted for compliance with the applicable regulations. Additionally, these improvements are consistent with the applicable General Plan policies in that they avoid vehicular and bicycle/pedestrian conflicts to allow for safe bicycle/pedestrian circulation, and are compliant with the City's street standards. Therefore, the Project will not result in new or more severe impacts beyond those analyzed in the 2013 FEIR by way of introducing a hazardous design feature.

4.17(d) (Emergency Access) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that impacts related to emergency access would be less than significant subject to design and construction of the transportation and circulation improvements consistent with local, regional, and federal standards and implementation of General Plan policies identified under Impact TRANS-5 above. The Project's circulation plan has been reviewed and meets all requirements of the Alameda County Fire Department and City Public Works Department. The Project's internal circulation was determined to be adequate, including sufficient street widths and drive aisles to allow for fire truck access to the proposed Project. During construction activities, temporary lane closures on Cedar Boulevard and nearby roads may occur during frontage improvements and utility work that will be coordinated with the Alameda County Fire Department, City Police Department, and emergency responders to ensure that through access is maintained and adequate response times are achievable. Given these factors, the Project's emergency access is in accordance with the applicable General Plan policies and actions. Therefore, emergency vehicle access would be adequate under the proposed Project and there would

be no new or more severe impacts related to emergency access as a result of Project implementation relative to the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The Project would not result in any new or more severe impacts to traffic and circulation including transportation relative to what was identified the 2013 FEIR. With the conditions of approval specified below, the Project would be generally consistent with the General Plan:

COA TRAN-1: The applicant shall dedicate right-of-way and install complete street improvements for Cedar Boulevard as shown on the Vesting Tentative Map exhibits and as described below:

Cedar Boulevard

The applicant shall install a traffic signal at the intersection of Cedar Boulevard and Smith Avenue. Traffic Signal plans shall be prepared, reviewed, and approved as part of the improvement plans. The applicant shall submit complete traffic signal plans, inclusive of a pole schedule with the first submittal of the improvement plan set. The applicant shall identify long lead items. City will endeavor to prioritize the review and approval of the long lead items. Within 45 days of City approval of the long lead items, the applicant shall order or otherwise contract for the delivery and installation of the items and submit to the City a written confirmation of contract or order invoice. The applicant shall in good faith effort have the traffic signal operational prior to issuance of the first Certificate of Occupancy for any residential unit. For the purposes of clarity, this condition is not intended to restrict the proposed model homes.

The adjacent residential development to the west of this project is similarly conditioned to provide the traffic signal improvements at Cedar Boulevard and Smith Avenue. If, at the time of final map approval, the other developer has already provided guarantee(s) or other appropriate improvement security for the traffic signal, the project will not be required to install the traffic signal, the project will not be eligible for any traffic impact fee (TIF) reimbursement and the normal traffic impact fees will need to be paid during Building Permit issuance.

If the traffic signal is not operational prior to issuance of the first Certificate of Occupancy for any residential unit due to manufacturing or delivery delays of the long lead items for either developer, the applicant and the City Engineer shall discuss an alternative option to implement until the traffic signal is operation. The alternative option is subject to approval by the City Engineer. All costs to fund the alternative option shall be funded by the applicant.

4.18. TRIBAL CULTURAL RESOURCES

Would the project:	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is: a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of	☐	☐	☐	☒

historical resources as defined in Public Resources Code section 5020.1(k), or				
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Historic Resource Evaluation, prepared by Diana J. Painter, Painter Preservation, November 21, 2022, and AB 52 Notification issued by the City of Newark February 8, 2023.

According to Public Resources Code (PRC) Section 21074, tribal cultural resources are defined as follows:

1. Sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are either of the following:
    a. Included or determined to be eligible for inclusion in the California Register of Historical Resources (CRHR); or
    b. Included in a local register of historical resources as defined in PRC Section 5020.1(k).

2. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in PRC Section 5024.1(c). In applying the criteria set forth in PRC Section 5024.1(c), the lead agency shall consider the significance of the resource to a California Native American tribe.

3. A cultural landscape that meets the criteria of PRC Section 21074(a) to the extent that the landscape is geographically defined in terms of the size and scope of the landscape.

4. A historical resource described in PRC Section 21084.1, a unique archaeological resource as defined in PRC Section 21083.2(g), or a "non-unique archaeological resource" as defined in PRC Section 21083.2(h), if it conforms with the criteria of PRC Section 21074(a).

In accordance with PRC Section 21080.3.1(d), the City of Newark provided written formal notification on February 8, 2023, via mail and email to the tribes identified by the Native American Heritage Commission (NAHC). The notice included a brief description of the proposed Project and its location, the City of Newark's contact information, and a notification that the tribes have 30 days to request consultation. The tribes that were notified are listed below:

- Amah MutsunTribal Band of Mission San Juan Bautista
- Costanoan Rumsen Carmel Tribe
- Indian Canyon Mutsun Band of Costanoan
- Muwekma Ohlone Indian Tribe of the SF Bay Area
- North Valley Yokuts Tribe
- The Ohlone Indian Tribe
- Wuksache Indian Tribe/Eshom Valley Band

- The Confederated Villages of Lisjan
- Tamien Nation

One response from the Confederated Villages of Lisjan Nation was received on February 9, 2023, with a request for additional information regarding the Project site that was provided to the Tribal representative on February 10, 2023. To date, June 2023, the City of Newark has not received any further communication from the above referenced tribe and has not received responses requesting consultation from any other tribes contacted.

General Plan EIR Findings

As discussed above in Section 4.5, the 2013 FEIR concluded that the implementation of the General Plan would result in significant and unavoidable impacts related to cultural resources, which may include tribal cultural resources, in the Southwest Newark Residential and Recreational Focus Area. The Project is not included in the Southwest Newark Residential and Recreational Focus Area. In other locations in the Plan Area, General Plan Policy LU-5.5 would render these impacts to tribal resources less than significant.

Project Consistency with the 2013 FEIR

4.18(a) (Listed or Eligible for Listing) No Change Relative to the 2013 FEIR: The 2013 FEIR identifies the Dumbarton TOD Focus Area and the Southwest Newark Residential and Recreational Focus Area as sensitive for potential archaeological resources. The Project site is not located within any of these areas, has been previously graded, and is almost entirely paved. Further, the Project site is developed with industrial/commercial buildings that are not historic resources as determined and described in **Appendix B**. It is not identified in the NAHC Sacred Lands File (SLF), based on a record search of the SLF. Additionally, no tribes notified based on the list provided by the NAHC responded with information regarding potential tribal resources on the Project site and vicinity. Therefore, the Project would not result in new or more severe impacts relative to the 2013 FEIR as it relates to a cultural resource of value to a tribe that is listed or eligible for listing in the CRHR, or in a local register of historical resources as defined in PRC Section 5020.1(k).

4.18(b) (Significant Resources) No Change Relative to the 2013 FEIR: As described above and consistent with General Plan Goal LU-5.5, the City of Newark provided notification of the Project to tribes and tribal organizations on February 8, 2023, consistent with AB 52. One response from the Confederated Villages of Lisjan Nation received on February 9, 2023, requested additional information regarding the Project site that was provided to the Tribal representative on February 10, 2023. To date, June 2023, the City of Newark has not received any further communication from the above referenced tribe and has not received responses requesting consultation from any other tribes contacted. As such, no requests to enter into consultation were received on the Project. Further, COA CUL-1 imposed on the project and set forth in Chapter 4.5 provides protection for the protection of buried cultural resources, including tribal cultural resources, in the event of discovery. Therefore, the proposed Project would not result in new or more severe impacts relative to the 2013 FEIR.

Conclusion and Environmental Condition of Approval

The Project would not result in any new or more severe impacts to archaeological resource, including tribal cultural resources, relative to what was identified in the 2013 FEIR. The Project has complied with Mitigation Measure 4.4-1 from the 2010 Housing Element EIR as identified in the 2013 EIR with COA CUl-1 as described in Chapter 4.5 of this document and imposed on the Project to ensure that the Project does not result in impacts to buried archaeological resources on site, if present.

4.19.UTILITIES AND SERVICE SYSTEMS

Would the project:	New Significant	More Severe	No Substantial	No Change Relative to

	Impact Not Identified in 2013 FEIR	Impact Relative to 2013 FEIR	Change Relative to 2013 FEIR	the 2013 FEIR
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	☐	☐	☒	☐
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	☐	☐	☒	☐
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☒	☐
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	☐	☐	☒	☐
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	☐	☐	☒	☐

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013; Tract 8665 Vesting Tentative Map for Condominium Purposes, Sheets 6.0 Utility Plan, dated June 2, 2023.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts to Utilities and Service Systems in Chapter 4.14 and determined the following:

Water Supplies/Infrastructure

- Impact UTIL-1: Implementation of the proposed project (General Plan) would increase water demand, however, sufficient water supplies are available to serve the project from existing entitlements and resources. Further, the following General Plan goal, policies and actions would ensure that new development under the proposed project contribute to reducing water demands in the service area: Goal CS-3, Policies CS-3.2, CS-3.3, CS-3.9, CSF-5.1, CSF-5.3, CSF-5.6 to CSF-5.8, and Actions CS-3.B, CSF-5.A, CSF-5.B. This impact will be considered to be a less than significant impact.

- Impact UTIL-2: Implementation of the proposed project (General Plan) would not require or result in the construction of new water facilities or expansion of existing facilities, the construction of which would cause significant environmental effects because sufficient water supplies are available to serve the project from existing entitlements and resources as described in Impact UTIL-1. Further, General Plan Policies CSF-5.7 and CSF-5.8 and Action CSF-5.B would ensure that impacts to water facilities would be adequately addressed. This impact is considered to be a less than significant impact.

- Impact UTIL-3: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable development, would result in less than significant cumulative impacts with respect to water supply because cumulative water demands would neither exceed

planned levels of supply nor require building new water treatment facilities or expanding existing facilities beyond what is currently planned in the ACWD's Capital Improvements Plan (CIP). Additionally, future development would be required to pay development fees, which would offset the costs of system maintenance and capital upgrades to support the new development in the ACWD service area.

Wastewater

- Impact UTIL-4: Implementation of the proposed project (General Plan) would not exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board (SFRWQCB). This impact is considered a less than significant impact.

- Impact UTIL-5: Implementation of the proposed project (General Plan), would not require or result in the construction of new wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects subject to applicable regulations of the Union Sanitary District (USD) and City of Newark, including their development review process and fees, as well as the implementation of General Plan policies and actions, including Policies CSF-5.2, CSF-5.3, CSF-5.7, CSF-5.8, and Action CSF-5.C. This impact is considered to be a less than significant impact.

- Impact UTIL-6: Implementation of the proposed project (General Plan), would not result in a determination by the wastewater treatment provider which serves or may serve the project that it does not have adequate capacity to serve the project's projected demand in addition to the provider's existing commitments. This is because future demands from the implementation of the General Plan would not exceed the capacity of Newark's wastewater treatment plant, the Alvarado Wastewater Treatment Plant (AWWTP), and the implementation of policies and actions identified under Impact UTIL-5 would address potential impacts to USD collection system. Additionally, future projects pursuant to the General Plan would be subject to the City of Newark and USD Development Review Process, USD Capacity Fees, and NMC Chapter 3.24 Development Impact Fees. This impact is considered a less than significant impact.

- Impact UTIL-7: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable development, would not result in significant cumulative impacts with respect to wastewater because the increase in volume of wastewater as a result of the project would not be cumulatively considerable, cumulative demand would not substantially impact the existing or planned capacity of the wastewater treatment system, and the construction of new wastewater treatment facilities would not be necessary. Further, implementation of the following General Plan policies would ensure provision of adequate wastewater facilities: Policies CSF-5.2, CSF-5.7 and CSF-5.8. This is less than cumulatively considerable impact.

Stormwater

- Impact UTIL-8: Implementation of the proposed project (General Plan) would not require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects subject to compliance with the C.3 provisions of the Alameda County Clean Water Program. Further, the following General Plan policies and actions would reduce demand on the storm drainage system: Policies CSF-5.4 to CSF-5.8, CS-6.4, CS-6.5, and Actions CSF-5.D, CSF-5.E, CS-3.G and CS-3.H.

- Impact UTIL-9: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable development, would not result in significant cumulative impacts with respect to stormwater facilities because implementation of the regulations and policies identified above would not substantially increase either the volume or the velocity of stormwater flowing into the storm sewer system that would be upgraded and expanded as necessary to support development in Newark. This is a less than cumulatively considerable impact.

Solid Waste

- Impact UTIL-10: Implementation of the proposed project (General Plan) would be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs. Further, the General Plan contains goals and policies intended to reduce waste generation and the demand for landfill capacity. This impact is considered to be a less than significant impact.

- Impact UTIL-11: The proposed project (General Plan) would comply with federal, State, and local statues and regulations related to solid waste with implementation of General Plan Actions CS-8.A, CS-8.C, CS-8.D, and CS-8.F. This impact is considered to be a less than significant impact.

- Impact UTIL-12: Implementation of the proposed project (General Plan), in combination with past, present, and reasonably foreseeable development, would not result in significant cumulative impacts with respect to solid waste because increase in solid waste generation would be minimal due to waste source reduction and diversion programs that include recycling, composting, mandatory construction and demolition (C&D) debris recycling, and mandatory commercial recycling.

Project Consistency with the 2013 FEIR

4.19(a) (Relocation/Expansion of Utilities) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that the implementation of the General Plan would not significantly increase demands for utilities and services systems including water, wastewater, storm drain, and solid waste and impacts related to relocation/expansion of utilities would be less than significant. The subject Project is generally consistent with the General Plan and will not necessitate the expansion or relocation of existing utilities. The proposed Project would introduce 76 residential units (townhomes) that would generate demand for utilities and services. The site is served by existing utilities, including water, wastewater, and storm drain infrastructure which will service the proposed development on the Project site. The proposed development would include installation of water, sanitary sewer and storm drain lines that will connect to the existing infrastructure, respectively. However, the demand for utilities and service systems generated by the Project is anticipated by the 2013 FEIR and does not require the relocation or substantial expansion of infrastructure. The Project's stormwater management system has been designed and would be implemented in accordance with the C.3 provisions of the Alameda County Clean Water Program. Therefore, the Project's impacts related to the relocation, construction, or expansion of utilities will not result in new or more severe impacts relative to the 2013 FEIR.

4.19(b) (Sufficient Water Supplies) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that the implementation of the General Plan would result in less than significant impact to water supplies because sufficient water supplies during normal, dry, and multiple dry years, are available to serve development pursuant to the General Plan from existing entitlements and resources Additionally, applicable General Plan goals, policies and actions as identified under Impact UTIL-1 would serve to reduce water demand generation by development pursuant to the General Plan.

The Project proposes residential development within the residential capacity analyzed in the 2013 FEIR. The Project would include sustainability features including low flow fixtures and drought tolerant landscaping that would serve to reduce the Project's water demand. Additionally, a "Will Serve" letter will be required from the water purveyor, the Alameda County Water District. Therefore, impacts related to water supplies would not result in new or more severe impacts relative to those identified in the 2013 FEIR.

4.19(c) (Wastewater Capacity) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that implementation of the General Plan would result in less than significant impact related to waste water treatment capacity. The Project is generally consistent with the General Plan and the increase in wastewater generated by the Project is within the flow capacity analyzed as part of the 2013 FEIR. Furthermore, the Project is subject to USD fees and City of Newark Development Impact Fees, that would be used to fund maintenance and expansion of wastewater conveyance systems and treatment facilities, as required. As such, the proposed Project will not cause or exceed wastewater treatment requirements set forth by the SFRWQCB, nor will the Project necessitate the expansion or construction of wastewater conveyance

or treatment facilities. Therefore, impacts to wastewater capacity would not result in new or more severe impacts relative to those identified in the 2013 FEIR.

4.19(d,e) (Solid Waste Generation/Compliance with Solid Waste Management) No Substantial Change Relative to the 2013 FEIR: The 2013 FEIR concluded that implementation of the General Plan would have a less than significant impact related to solid waste because future developments under the Plan would be served by a landfill with sufficient permitted capacity to accommodate their solid waste disposal needs. Further, implementation of the applicable General Plan goals and policies would reduce waste generation and the demand for landfill capacity.

The Project would contribute to the generation of solid waste within the General Plan area, but the Project applicant would be required to adhere to all regulations governing the disposal of solid waste, solid waste management and reduction goals. A "Will Serve" letter for the Project has been provided by the Republic Services that provides solid waste collection services for recycling and waste disposal. Therefore, solid waste related impacts from the Project construction and operation would not result in new or more severe impacts relative to those identified in the 2013 FEIR.

Conclusion and Environmental Conditions of Approval

The Project would not result in any new or more severe impacts to utilities and service systems relative to what was identified in the 2013 FEIR with the implementation of the following condition of approval:

COA UTIL-1: Prior to the issuance of a building permit, the applicant shall pay the applicable impact fees, including, but not limited to, the Housing Impact Fee and Transportation Impact Fee, in the amount in effect at the time. If the applicant is eligible for a Transportation Impact Fee credit as determined by the City Engineer, the Transportation Impact Fee will be adjusted accordingly as determined by the City Engineer.

4.20.WILDFIRE

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:	**New Significant Impact Not Identified in 2013 FEIR**	**More Severe Impact Relative to 2013 FEIR**	**No Substantial Change Relative to 2013 FEIR**	**No Change Relative to the 2013 FEIR**
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	☐	☐	☐	☒
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	☐	☐	☐	☒
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013, and State Responsibility Fire Hazard Severity Zone Maps, Office of the State Fire Marshall.

General Plan EIR Findings

The 2013 FEIR evaluated potential impacts related to Wildfires in Chapter 4.9, Hazards and Hazardous Materials and determined the following:

- Impact HAZ-8: As also discussed under Chapter 4.9 of this document, implementation of the proposed project (General Plan) would not expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands because the Plan Area is surrounded on all sides by land within the limits of the City of Fremont and is not designated as having high, very high, or extreme wildland fire threat to people, as determined by CAL FIRE's Wildlife Urban Interface Fire Threat data. Future development in the Plan Area would be constructed pursuant to the California Building Code, California Fire Code, and the City of Newark Municipal Code and the General Plan Goal EH-1 and Policies EH-1.1 and EH-1.2 would further ensure minimization of risks from wildland fires. This impact is considered to be less than significant.

Project Consistency with the 2013 FEIR

4.20(a-d) (Impair Emergency Plans, Exacerbate Wildfire Risk Exacerbation, Infrastructure Contributing to Wildfire Risk, Exposure to Wildfire-Related Risks – if located in or near state responsibility areas or lands classified as very high fire hazard severity zones) No Change Relative to the 2013 FEIR: As indicated in Chapter 4.9 of this document, the Project site and lands surrounding and in the vicinity of the Project site are not in an area categorized by CAL FIRE as any of the Fire Hazard Severity Zones, including very High Fire Hazard Severity Zones (VFHSZ). Therefore, the Project will not result in a new significant impact or substantially increase the severity of a previously identified significant impact relative to the 2013 FEIR.

Conclusion

The Project and surrounding land are not located in or near state responsibility areas or lands classified as very high fire hazard severity zones. Therefore, the Project would not result in any new or more severe impacts due to wildfire risk relative to what was identified the 2013 FEIR.

4.21. MANDATORY FINDINGS OF SIGNIFICANCE

	New Significant Impact Not Identified in 2013 FEIR	More Severe Impact Relative to 2013 FEIR	No Substantial Change Relative to 2013 FEIR	No Change Relative to the 2013 FEIR
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☐	☐	☒
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other	☐	☐	☐	☒

current projects, and the effects of probable future projects)?				
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☐	☒

Sources: City of Newark General Plan, 2013 and General Plan Tune Up Draft EIR and Final EIR, 2013

General Plan EIR Findings

As presented above in Sections 4.1 through 4.20, the 2013 FEIR included an evaluation of cumulative impacts associated with implementation of the General Plan.

Project Consistency with the 2013 FEIR

4.21(a) (Degrade the Environment) No Change Relative to the 2013 FEIR: The Project is located within the General Plan area boundary and potential impacts associated with its development have been anticipated by the City's General Plan and analyzed in the 2013 FEIR. The Project is consistent with the General Plan Land Use designation, applicable goals, policies, and programs and is required to comply with applicable state, local and federal regulations.

As described in this document, the Project has the potential to result in environmental impacts primarily associated with temporary construction activities. Environmental conditions of approval as identified would avoid, reduce, or offset impacts consistent with the 2013 FEIR. With the implementation of conditions of approval set forth in this document with respect to Air Quality, Biological Resources and Cultural Resources, as well as adherence to the City's uniformly applied development standards, the Project's potential to degrade the quality of the environment would be substantially the same as that analyzed in the 2013 FEIR. Therefore, the Project will not degrade the quality of the environment, reduce habitat, or affect cultural resources beyond what has already been disclosed and analyzed in the certified 2013 FEIR.

4.21(b) (Cumulatively Affect the Environment) No Change Relative to the 2013 FEIR: The CEQA Guidelines define cumulative impacts as "two or more individual effects which, when considered together, are considerable or which compound or increase other environmental impacts. The individual effects may be changes resulting from a single project or an increase in environmental impacts. The cumulative impact from several projects is the change in the environment which results from the incremental impact of the proposed project when added to other closely related past, present, and reasonably foreseeable probable future projects. Cumulative impacts can result from individually minor but collectively significant projects taking place over a period of time" (Guidelines, Section 15355(a)(b)).

The analysis of cumulative impacts for each environmental factor can employ one of two methods to establish the effects of other past, current, and probable future projects. A lead agency may select a list of projects, including those outside the control of the agency, or alternatively, a summary of projections. These projections may be from an adopted general plan or related planning document or from a prior environmental document that has been adopted or certified; these documents may describe or evaluate the regional or area-wide conditions contributing to the cumulative impact.

Cumulative impacts of the implementation of the General Plan were evaluated in the 2013 FEIR and found to be less than significant as discussed in Chapter 4.1 to 4.20 of this document. Development of the Project is consistent with the General Plan and the Project is subject to environmental conditions of approval as well as uniformly applied development standards. Implementation of identified conditions of approval and uniformly applied development standards would ensure that development of the proposed Project would not result in cumulatively considerable environmental impacts beyond those analyzed in the 2013 FEIR.

4.21(c) (Substantial Adverse Effect on Humans) No Substantial Change Relative to the 2013 FEIR: The Project would not result in any new or more substantial adverse effects on humans relative to the 2013 FEIR findings for the General Plan because the Project is located in the Plan area and consistent with the General

Plan. With implementation of the identified environmental conditions of approval, the Project will not result in new or more severe impacts beyond those identified in the 2013 FEIR that would directly or indirectly cause substantial adverse effect on human beings.

Conclusion

The Project would not result in any new or more severe impacts relative to what was identified the 2013 FEIR subject to identified environmental conditions of approval and standard regulatory requirements. No environmental conditions of approval related to mandatory findings of significance are required.

6. ENVIRONMENTAL CONDITIONS OF APPROVAL

The following conditions of approval have been identified through this analysis and ensure implementation of applicable mitigation measures and policies set forth in the General Plan and its EIR. The 38600 Cedar Boulevard Residential Development Project applicant shall implement all conditions of approval as part of the Project.

AES-1: All exterior lighting shall comply with all applicable regulations in NMC §17.17.060 (Lighting and Illumination) and NMC Chapter 17.23 (Parking and Loading). All exterior lighting shall be directed on-site so as not to create glare off-site, as required by the Community Development Director.

AQ-1: Consistent with the Bay Area Air Quality Management District (BAAQMD) Basic Construction Mitigation Measures, the following controls are required to be included as specifications for the proposed project and implemented at the construction site to control for fugitive dust and exhaust as follows:

1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
2. All haul trucks transporting soil, sand, or other loose material off site shall be covered.
3. All visible mud or dirt tracked-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour.
5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible.
6. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
7. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California Airborne Toxics Control Measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
8. All construction equipment shall be maintained and properly tuned in accordance with manufacturers' specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
9. A publicly-visible sign shall be posted with the telephone number and person to contact at the City of Newark regarding dust complaints. This person shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

AQ-2: During construction of the proposed project, the project contractor shall ensure all off-road diesel-powered construction equipment of 50 horsepower or more used for the project construction at a minimum meets the California Air Resources Board Tier 3 emissions standards with level 3 diesel particulate filters or equivalent.

AQ-3: The following measures shall be required to reduce toxic air contaminants (TACs) and particulate matter indoors to a level sufficient to achieve compliance with BAAQMD health risk thresholds:

1. The project applicant shall provide an HVAC system with a control efficiency sufficient to result in a reduction of a minimum 85 percent of particulates of 10 microns or less, such as Minimum Efficiency Reporting Value (MERV)-9 filters or greater, for indoor air filtration systems. The ventilation system shall be certified to achieve the stated performance effectiveness from indoor areas.
2. The project applicant shall locate all air intakes as far away from Interstate 880 (I-880) as feasible.

3. The project applicant shall disclose to potential occupants of the project that the proximity of the project site to the freeway could result in increased long-term health risks. The disclosure shall indicate the specifications for the installed air filtration system.

BIO-1: To avoid and minimize potential impacts to nesting birds including passerines and raptors, the following measures shall be implemented:

1. Grading or removal of potentially occupied habitat should be conducted outside the nesting season, which occurs between approximately February 1 to August 31.
2. If grading between August 31 and February 1 is infeasible and groundbreaking must occur within the nesting season, a pre-construction nesting bird survey (migratory species, passerines, and raptors) of the potentially occupied habitat (trees, shrubs, grassland) shall be performed by a qualified biologist within 7 days of groundbreaking. If no nesting birds are observed no further action is required and grading shall occur within one week of the survey to prevent "take" of individual birds that could begin nesting after the survey.
3. If active bird nests (either passerine and/or raptor) are observed during the pre-construction survey, a disturbance-free buffer zone shall be established around the occupied habitat until the young have fledged, as determined by a qualified biologist.
4. The radius of the required buffer zone can vary depending on the species, (i.e., 75-100 feet for passerines and 200-500 feet for raptors), with the dimensions of any required buffer zones to be determined by a qualified biologist in consultation with CDFW.
5. To delineate the buffer zone around the occupied habitat, construction fencing shall be placed at the specified radius from the nest within which no machinery or workers shall intrude.
6. Biological monitoring of active nests shall be conducted by a qualified biologist to ensure that nests are not disturbed and that buffers are appropriate, adjusted by a qualified biologist as needed to avoid disturbance.
7. No construction or earth-moving activity shall occur within any established nest protection buffer prior to September 1 unless it is determined by a qualified ornithologist/biologist that the young have fledged (that is, left the nest) and have attained sufficient flight skills to avoid project construction zones, or that the nesting cycle is otherwise completed.

BIO-2: Prior to any tree removal or alteration, the applicant shall obtain a tree removal permit from the City of Newark Public Works Department and implement tree planting requirements in accordance with development review.

CUL-1: During project construction, if historic, archaeological or Native American materials or artifacts are identified, work within 50 foot radius of such find shall cease and the City shall retain the services of a qualified archeologist and/or paleontologist to assess the significance of the find. If such a find is determined to be significant by the archeologist and/or paleontologist, a resource protection plan conforming to CEQA §15064.5 shall be prepared by the archeologist and/or paleontologist and approved by the Community Development Director. The plan may include, but would not be limited to, removal of resources and similar actions. Project work may be resumed in compliance with such a plan. If human remains are encountered, all ground disturbing activities near or in any area potentially overlying adjacent human remains shall cease, the County Coroner shall be contacted immediately, and the provisions of State law carried out.

GEO-1 Prior to or concurrently with the first submittal of the final map and improvement plans, the applicant shall provide specific recommendations to mitigate identified seismic hazards discussed in the City's Geotechnical Consultant's letter dated June 14, 2023. The applicant's Geotechnical Consultant shall submit a letter-report addressing the items identified in the June 14, 2023, letter to the City for review by the City's Geotechnical Consultant. The applicant shall pay for all costs associated with the geotechnical peer review per the City's Master Fee Schedule.

GEO-2 Prior to or concurrently with the first submittal of the final map and improvement plans, the applicant shall provide specific recommendations to mitigate impacts of expansive soils on the site. The applicant's Geotechnical Consultant shall submit a letter-report addressing expansive soils on the site, to the City for review by the City's Geotechnical Consultant. The applicant shall pay for all costs associated with the geotechnical peer review per the City's Master Fee Schedule.

GHG-1: The project shall include and show on the plans a minimum of 10 percent of the parking spaces as electric vehicle (EV) charging stations consistent with current California Green Buildings Standards Code (CALGreen) Tier 2 standards.

HAZ-1: Prior to issuance of any demolition permit, the applicant/project developer shall have a qualified environmental professional complete testing on structures to be removed for the presence of actionable quantities of asbestos materials, lead based paint and other contaminants. These materials shall be remediated by a licensed contractor and disposed of in an appropriately licensed landfill. Necessary permits shall be obtained from the Alameda County Fire Department, Newark Building Inspection Division, the Bay Area Air Quality Management District and other agencies, as applicable. All work shall be performed in accordance with state and federal OSHA standards. Worker safety plans shall be included for all demolition or deconstruction plans.

HAZ-2: The Project applicant shall implement the following actions:

1. Copies of the Phase I ESA shall be filed with the Alameda County Water District, Newark Community Development Department, the Newark Public Works Department and the Hazardous Materials Bureau of the Alameda County Fire Department.
2. Prior to the issuance of the grading permit, the applicant shall prepare a Soil and Water Management Plans (SWMPs) for the Project site as the Phase I ESA identifies actionable levels of soil and/or water contamination on the site. The SWMPs shall be prepared by a state-certified environmental professional and shall include, at minimum, a description of soils to be graded or disturbed as part of the project, detailed soil and water sampling to identify the extent of the contaminants, describe site remediation activities and procedures for removing the contaminants, and location(s) for disposal of contaminated material. The applicant shall obtain necessary permits for implementation of the site remediation and shall also provide evidence to the City of Newark, prior to the issuance of the grading permit, demonstrating that the RECs have been resolved to the satisfaction of the applicable regulatory agencies for future residential land use. Permits and closure letters shall be obtained from appropriate agencies if site remediation is found.
3. Prepare a plan/s to deal with de-watering of the site and safe disposal of contaminated groundwater in the event of groundwater contamination on the site or vicinity. These plans shall be prepared by qualified environmental hazard consultants and approved by the Newark Community Development Director, or their designee, prior to grading permit issuance, and required permits shall be obtained from appropriate agencies for all site investigation and remediation.

HYD-1: Preliminary Stormwater Treatment Plan is approved in concept only. Final approval is subject to the applicant providing, prior to the issuance of the grading permit, the necessary plans, details, and calculations that demonstrate the plan complies with the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2022-0018, revised July 1, 2022, issued to the City of Newark by the Regional Water Quality Control Board, San Francisco Bay Region.

HYD-2: Prior to issuance of a building permit, the applicant shall prepare a Stormwater Treatment Measures Maintenance Agreement for post-construction water quality. The Agreement shall be reviewed and accepted by the City Engineer prior to Project Construction on the site.

HYD-3: The Project's development, including streets and surface improvements, shall be placed above the 100-year flood elevation as confirmed by the City Engineer.

HYD-4: Prior to final map approval, the applicant shall apply and receive approval for a conditional letter of map revision based on fill (CLOMR- F) from the Federal Emergency Management Agency (FEMA). The CLOMR-F shall be based upon the project grading plan and shall conclude that the structures for human occupancy will be removed from the special flood hazard area (SFHA). Prior to occupancy of any buildings within the SFHA, the developer shall apply and receive approval of a letter of map revision based on fill (LOMR-F) from FEMA. On July 1, 2023, FEMA temporarily suspended the processing of CLOMR-Fs and LOMR-Fs. If, prior to final map approval, the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the CLOMR-F application to FEMA shall be deferred and applied for as soon as the temporary suspension is lifted. If, prior to occupancy, the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the applicant shall provide complete Elevation Certificates demonstrating that the property for occupancy is outside the Special Flood Hazard Area. Prior to tract acceptance, if the temporary suspension of CLOMR-Fs and LOMR-Fs is still in effect, the applicant shall submit the LOMR-F application package to the City or enter into a deferred agreement with the City for preparing and processing the LOMR-F application package once FEMA lifts the suspension. In either options, the cost of the preparation and fees associated with the FEMA LOMR-F application shall be paid for by the applicant.

HYD-5: The applicant shall submit detailed grading and drainage plans for review and approval by the City Engineer and the Alameda County Flood Control and Water Conservation District. These plans must be based upon a City benchmark and need to include pad and finish floor elevations of each proposed structure, proposed on-site property grades, proposed elevations at property line, and sufficient elevations on all adjacent properties to show existing drainage patterns. All on-site pavement shall drain at a minimum of one percent. The applicant shall ensure that all upstream drainage is not blocked and that no ponding is created by this development. Any construction necessary to ensure this shall be the applicant's responsibility.

Hydrology and hydraulic calculations shall be submitted for review and approval by the City Engineer and the Alameda County Flood Control District prior to approval of the final map. The calculations shall show that the City and County freeboard requirements will be satisfied.

NOI-1: The following noise reduction measures will be implemented to minimize the impact of construction noise onto offsite receivers:

1. Construction activity shall be limited to the hours of 7 AM to 7 PM Monday through Friday and 10 AM to 6 PM on Sundays and holidays. Noise from construction activity occurring outside these hours will be limited to the levels outlined in the Newark Municipal Code Section 17.24.10.A.3.
2. The contractor shall require properly maintained mufflers on construction vehicles.
3. To the extent feasible, stationary construction equipment and staging areas shall be located as far as possible from adjacent residences and the motel.
4. The contractor shall implement temporary noise barriers between noisy activities and adjacent residences and the motel.
5. To the extent feasible, construction should proceed from Cedar Boulevard towards Intestate 880, and from south to north, so that constructed buildings will help shield residences from equipment and construction activities.
6. The contractor will designate a “noise disturbance coordinator” who would be responsible for responding to any local complaints about construction noise.
7. Signs will be posted at the construction site to notify the neighborhood of permitted days and hours of activities, and to provide a day-time telephone number for the noise disturbance coordinator.

NOI-2: Mechanical equipment noise as a result of the Project shall be limited to no more than 70 dBA between the hours of 7 a.m. and 9 p.m., and 60 dBA between the hours of 9 p.m. and 7 a.m in accordance with NMC Section 17.24.100.A.2.

NOI-3: Exterior building assemblies shall be sound-rated to reduce environmental noise to the DNL 45 dB criterion indoors. Sound insulation ratings should be for the complete assembly, including glass and frame, and should be based on laboratory test reports of similar sized samples from a National Voluntary Laboratory Accreditation Program (NVLAP) accredited lab. Since windows will need to be closed to meet the interior noise criteria, the mechanical design should meet ventilation requirements with windows in the closed position. The building assemblies shall be reviewed and accepted to meet the aforementioned criteria during the building permit process.

NOI-4: The height of the 18-foot tall retaining wall to the rear of the Project site adjacent to I-880 that would serve as a noise barrier shall be measured with respect to the freeway elevation, or yard elevation, whichever is higher. The barrier shall extend the length of the site and wrap the ends, returning towards Cedar Boulevard and shall be solid from bottom to top with no cracks or gaps and have a minimum surface density of approximately three pounds per square foot to reduce traffic noise levels in Project related outdoor spaces to DNL 65 dB or below. The barrier shall step down along the side property lines from a height of 18 feet to 8 feet, as shown in Figure 2 of the Environmental Noise Assessment, prepared by Salter, November 11, 2022.

NOI-5: Limit the use of the following construction equipment to the following distances from the motel building located toward the south of the Project site.

1. Large bulldozers and loaded trucks to a minimum of 50 feet.
2. Jackhammering to a minimum of 30 feet.
3. vibratory rollers to a minimum of 85 feet.

TRAN-1: The applicant shall dedicate right-of-way and install complete street improvements for Cedar Boulevard as shown on the Vesting Tentative Map exhibits and as described below:

Cedar Boulevard

The applicant shall install a traffic signal at the intersection of Cedar Boulevard and Smith Avenue. Traffic Signal plans shall be prepared, reviewed, and approved as part of the improvement plans. The applicant shall submit complete traffic signal plans, inclusive of a pole schedule with the first submittal of the improvement plan set. The applicant shall identify long lead items. City will endeavor to prioritize the review and approval of the long lead items. Within 45 days of City approval of the long lead items, the applicant shall order or otherwise contract for the delivery and installation of the items and submit to the City a written confirmation of contract or order invoice. The applicant shall in good faith effort have the traffic signal operational prior to issuance of the first Certificate of Occupancy for any residential unit. For the purposes of clarity, this condition is not intended to restrict the proposed model homes.

The adjacent residential development to the west of this project is similarly conditioned to provide the traffic signal improvements at Cedar Boulevard and Smith Avenue. If, at the time of final map approval, the other developer has already provided guarantee(s) or other appropriate improvement security for the traffic signal, the project will not be required to install the traffic signal, the project will not be eligible for any traffic impact fee (TIF) reimbursement and the normal traffic impact fees will need to be paid during Building Permit issuance.

If the traffic signal is not operational prior to issuance of the first Certificate of Occupancy for any residential unit due to manufacturing or delivery delays of the long lead items for either developer, the applicant and the City Engineer shall discuss an alternative option to implement until the traffic signal is operation. The alternative option is subject to approval by the City Engineer. All costs to fund the alternative option shall be funded by the applicant.

UTIL-1: Prior to the issuance of a building permit, the applicant shall pay the applicable impact fees, including, but not limited to, the Housing Impact Fee and Transportation Impact Fee, in the amount in effect at the time. If the applicant is eligible for a Transportation Impact Fee credit as determined by the City Engineer, the Transportation Impact Fee will be adjusted accordingly as determined by the City Engineer.

MEMORANDUM

DATE: November 7, 2022

TO: Caden Proctor, Waymark Development LLC

FROM: Amy Fischer, Executive Vice President
Cara Carlucci, Associate

SUBJECT: Air Quality and Greenhouse Gas Analysis for the proposed Cedar Townhomes Project at 38600 Cedar Boulevard, Newark, California

INTRODUCTION

This Air Quality and Greenhouse Gas Emissions Analysis for the proposed Cedar Townhomes Project at 38600 Cedar Boulevard (project) in the Newark, California, has been prepared using methods and assumptions recommended by the Bay Area Air Quality Management District (BAAQMD).[1,2] This analysis includes a description of the proposed project, the existing regulatory framework, an assessment of project construction and operation-period air quality and greenhouse gas (GHG) emissions, an assessment of potential health risks, and an evaluation of the project's compliance with adopted plans related to the reduction of clean air and GHG emissions.

PROJECT DESCRIPTION

The 3.72-acre project site is located at 38600 Cedar Boulevard in the City of Newark (City), Alameda County (County), California. The project site is bound to the north by Interstate 880 (I-880), to the east by a motel, to the south by Cedar Boulevard, and to the west by commercial and industrial uses. The project site is currently developed with three existing commercial industrial buildings, totaling 34,219 square feet, and a surface parking lot.

The proposed project would include the demolition of the existing buildings and parking lot and would redevelop the project site with 76 townhome units with two garage spaces per unit for a total of 152 spaces and 38 surface parking spaces. The proposed project would also include 14,101 square feet of common open space and 7,000 square feet of private open space. In addition, the proposed project would have the following sustainability features: low flow fixtures, drought tolerant landscaping, solar, and non-potable common area irrigation water. In addition, the proposed

1 Bay Area Air Quality Management District (BAAQMD). 2017. *California Environmental Quality Act, Air Quality Guidelines*. May.

2 BAAQMD. 2022. *Justification Report: CEQA Thresholds for Evaluating the Significance of Climate Impacts From Land Use Projects and Plans*. April.

project's energy supply would be all-electric and would not include natural gas infrastructure or usage. The proposed project is expected to generate approximately 547 average daily trips.

Construction of the proposed project would begin in the fourth quarter of 2023 and would end in 2024. Construction would include demolition, grading, site preparation, building, paving, and architectural coating (painting) activities. This analysis assumes that the project site would be balanced with no import or export activities and use of Tier 3 construction equipment.

EXISTING SENSITIVE RECEPTORS IN THE PROJECT AREA

For the purposes of this analysis, sensitive receptors are areas of population that have an increased sensitivity to air pollution or environmental contaminants. Sensitive receptor locations include residences, schools, day care centers, hospitals, parks, and similar uses which are sensitive to air quality. Impacts on sensitive receptors are of particular concern because they are the population most vulnerable to the effects of air pollution. The closest receptors to the project site include single-family residences located approximately 120 feet south of the project site boundary across Cedar Boulevard. In addition, single-family residences are located approximately 270 feet north of the project site across I-880 and multi-family residential uses are located approximately 340 feet southeast of the project site along Cedar Court.

ENVIRONMENTAL SETTING

Air Quality Background

Air quality is primarily a function of both local climate, local sources of air pollution and regional pollution transport. The amount of a given pollutant in the atmosphere is determined by the amount of the pollutant released and the atmosphere's ability to transport and dilute the pollutant. The major determinants of transport and dilution are wind, atmospheric stability, terrain, and for photochemical pollutants, sunshine.

A region's topographic features have a direct correlation with air pollution flow and, therefore, are used to determine the boundary of air basins. Newark is located within the San Francisco Bay Area Air Basin (Air Basin), a large shallow air basin ringed by hills that taper into a number of sheltered valleys around the perimeter. Two primary atmospheric outlets exist. One is through the strait known as the Golden Gate, a direct outlet to the Pacific Ocean. The second extends to the northeast, along the west delta region of the Sacramento and San Joaquin Rivers.

The City of Newark is within the jurisdiction of the BAAQMD, which regulates air quality in the Bay Area. Air quality conditions in the Bay Area have improved significantly since the BAAQMD was created in 1955. Ambient concentrations of air pollutants and the number of days during which the region exceeds air quality standards have fallen dramatically. Neither State nor national ambient air quality standards of the following chemicals have been violated in recent decades: nitrogen dioxide, sulfur dioxide, sulfates, lead, hydrogen sulfide, and vinyl chloride. Those exceedances of air quality standards that do occur primarily happen during meteorological conditions conducive to high pollution levels, such as cold, windless nights or hot, sunny summer afternoons.

Both State and federal governments have established health-based Ambient Air Quality Standards for six criteria air pollutants: carbon monoxide (CO), ozone (O_3), nitrogen dioxide (NO_2), sulfur

dioxide (SO_2), lead (Pb), and suspended particulate matter. In addition, the State has set standards for sulfates, hydrogen sulfide, vinyl chloride and visibility-reducing particles. These standards are designed to protect the health and welfare of the populace with a reasonable margin of safety. Two criteria pollutants, O_3 and NO_2, are considered regional pollutants because they (or their precursors) affect air quality on a regional scale. Pollutants such as CO, SO_2, and Pb are considered local pollutants that tend to accumulate in the air locally. The BAAQMD is under State nonattainment status for ozone and particulate matter standards. The BAAQMD is classified as nonattainment for the federal ozone 8-hour standard and nonattainment for the federal $PM_{2.5}$ 24-hour standard. As such, the primary pollutants of concern in the project area are O_3, CO, and $PM_{2.5}$.

Because of the conservative nature of the significance thresholds, and the basin-wide context of individual development project emissions, there is no direct correlation between a single project and localized air quality-related health effects. One individual project that generates emissions exceeding a threshold does not necessarily result in adverse health effects for residents in the project vicinity. This condition is especially true when the criteria pollutants exceeding thresholds are those with regional effects, such as ozone precursors like nitrogen oxides (NO_x) and reactive organic gases (ROG).

Further, by its very nature, air pollution is largely a cumulative impact. No single project is sufficient in size to by itself result in nonattainment of ambient air quality standards. Instead, a project's individual emissions contribute to existing cumulatively significant adverse air quality impacts. If a project's contribution to the cumulative impact is considerable, then the project's impact on air quality would be considered significant. In developing thresholds of significance for air pollutants, the air districts have considered the emission levels for which a project's individual emissions would be cumulatively considerable. If a project exceeds the identified significance thresholds, its emissions would be cumulatively considerable, resulting in significant adverse air quality impacts to the region's existing air quality conditions.

Occupants of facilities such as schools, daycare centers, parks and playgrounds, hospitals, and nursing and convalescent homes are considered to be more sensitive than the general public to air pollutants because these population groups have increased susceptibility to respiratory disease. Persons engaged in strenuous work or exercise also have increased sensitivity to poor air quality. Residential areas are considered more sensitive to air quality conditions, compared to commercial and industrial areas, because people generally spend longer periods of time at their residences, with greater associated exposure to ambient air quality conditions. Recreational uses are also considered sensitive compared to commercial and industrial uses due to greater exposure to ambient air quality conditions associated with exercise. These populations are referred to as sensitive receptors.

Greenhouse Gas and Global Climate Change Background

Greenhouse gases (GHGs) are present in the atmosphere naturally, are released by natural sources, or are formed from secondary reactions taking place in the atmosphere. The gases that are widely seen as the principal contributors to human-induced global climate change are:

- Carbon dioxide (CO_2);
- Methane (CH_4);
- Nitrous oxide (N_2O);

- Hydrofluorocarbons (HFCs);
- Perfluorocarbons (PFCs); and
- Sulfur Hexafluoride (SF_6).

Over the last 200 years, humans have caused substantial quantities of GHGs to be released into the atmosphere. These extra emissions are increasing GHG concentrations in the atmosphere and enhancing the natural greenhouse effect, which is believed to be causing global warming. While manmade GHGs include naturally occurring GHGs such as CO_2, CH_4, and N_2O, some gases, like HFCs, PFCs, and SF_6 are completely new to the atmosphere.

Certain gases, such as water vapor, are short-lived in the atmosphere. Others remain in the atmosphere for significant periods of time, contributing to climate change in the long term. Water vapor is excluded from the list of GHGs above because it is short-lived in the atmosphere and its atmospheric concentrations are largely determined by natural processes, such as oceanic evaporation.

These gases vary considerably in terms of Global Warming Potential (GWP), which is a concept developed to compare the ability of each GHG to trap heat in the atmosphere relative to another gas. The GWP is based on several factors, including the relative effectiveness of a gas to absorb infrared radiation and length of time that the gas remains in the atmosphere ("atmospheric lifetime"). The GWP of each gas is measured relative to CO_2, the most abundant GHG; the definition of GWP for a particular GHG is the ratio of heat trapped by one unit mass of the GHG to the ratio of heat trapped by one unit mass of CO_2 over a specified time period. GHG emissions are typically measured in terms of pounds or tons of "CO_2 equivalents" (CO_2e).

REGULATORY FRAMEWORK

This section provides regulatory background information for air quality and GHGs.

Air Quality

Federal Regulations

The 1970 Federal Clean Air Act (CAA) authorized the establishment of national health-based air quality standards and set deadlines for their attainment. The CAA Amendments of 1990 changed deadlines for attaining national standards as well as the remedial actions required for areas of the nation that exceed the standards. Under the CAA, State and local agencies in areas that exceed the national standards are required to develop State Implementation Plans to demonstrate how they will achieve the national standards by specified dates.

State Regulations

In 1988, the California Clean Air Act (CCAA) required that all air districts in the State endeavor to achieve and maintain California Ambient Air Quality Standards (CAAQS) for CO, O_3, sulfur dioxide (SO_2), and nitrogen dioxide ($NO_{2)}$ by the earliest practical date. The CCAA provides districts with authority to regulate indirect sources and mandates that air quality districts focus particular attention on reducing emissions from transportation and area-wide emission sources. Each nonattainment district is required to adopt a plan to achieve a 5 percent annual reduction, averaged

over consecutive 3-year periods, in district-wide emissions of each nonattainment pollutant or its precursors. A Clean Air Plan shows how a district would reduce emissions to achieve air quality standards. Generally, the State standards for these pollutants are more stringent than the national standards.

The CARB is the State's "clean air agency." The CARB's goals are to attain and maintain healthy air quality, protect the public from exposure to toxic air contaminants, and oversee compliance with air pollution rules and regulations.

Regional Regulations

The BAAQMD seeks to attain and maintain air quality conditions in the San Francisco Bay Area Air Basin through a comprehensive program of planning, regulation, enforcement, technical innovation, and education. The clean air strategy includes the preparation of plans for the attainment of ambient air quality standards, adoption and enforcement of rules and regulations, and issuance of permits for stationary sources. The BAAQMD also inspects stationary sources and responds to citizen complaints, monitors ambient air quality and meteorological conditions, and implements programs and regulations required by law.

Clean Air Plan. The Clean Air Plan guides the region's air quality planning efforts to attain the CAAQS.[1] The BAAQMD 2017 Clean Air Plan, which was adopted on April 19, 2017, by the BAAQMD Board of Directors, is the current Clean Air Plan which contains district-wide control measures to reduce ozone precursor emissions (e.g., ROG and NO_x), particulate matter and greenhouse gas (GHG) emissions.

The Bay Area 2017 Clean Air Plan:

- Describes the BAAQMD plan towards attaining all State and federal air quality standards and eliminating health risk disparities from exposure to air pollution among Bay Area communities;
- Defines a vision for transitioning the region to a post-carbon economy needed to achieve ambitious GHG reduction targets for 2030 and 2050;
- Provides a regional climate protection strategy that will put the Bay Area on a pathway to achieve GHG reduction targets; and
- Includes a wide range of control measures designed to decrease emissions of air pollutants that are most harmful to Bay Area residents, such as particulate matter, ozone, and toxic air contaminants; to reduce emissions of methane and other "Super-GHGs" that are potent climate pollutants in the near term; and to decrease emissions of carbon dioxide by reducing fossil fuel combustion.

[1] Bay Area Air Quality Management District (BAAQMD). 2017. *Final 2017 Clean Air Plan*. April 19, 2017. Website: www.baaqmd.gov/~/media/files/planning-and-research/plans/2017-clean-air-plan/attachment-a_-proposed-final-cap-vol-1-pdf.pdf?la=en (accessed October 2022).

BAAQMD CEQA Air Quality Guidelines. The BAAQMD CEQA Air Quality Guidelines were prepared to assist in the evaluation of air quality impacts of projects and plans proposed within the Bay Area. The guidelines provide recommended procedures for evaluating potential air impacts during the environmental review process, consistent with CEQA requirements, and include recommended thresholds of significance, mitigation measures, and background air quality information. They also include recommended assessment methodologies for air toxics, odors, and GHG emissions.

In May 2017, the BAAQMD published an updated version of the CEQA Guidelines. The BAAQMD CEQA Guidelines include thresholds to evaluate project impacts in order to protectively evaluate the potential effects of the project on air quality. These protective thresholds are appropriate in the context of the size, scale, and location of the proposed project.

Local Regulations

The Health and Wellness Element of the *City of Newark General Plan*[1] includes air quality policies and implementation measures that focus on air quality that meets state and federal standards and provides improved respiratory health for Newark residents. The following goals and policies are applicable to the proposed project:

- **Policy HW1.2. Land Use, Transportation, and Air Quality**. Make land use and transportation decisions that reduce tailpipe emissions, including promotion of walking and bicycling, improvements to public transportation, and a jobs-housing balance that reduces vehicle commute miles, higher density development and mixed commercial and residential uses should be permitted near the proposed Dumbarton Rail Station, and in other areas where high frequency transit service is proposed.

- **Policy HW1.3. Reducing Exposure to Air Pollution in New Development.** Use site planning and architectural design to reduce potential exposure of sensitive uses to major air pollution sources including freeways and industrial activities.

- **Policy HW1.4. Evaluation of Air Quality Impacts**. Evaluate air quality impacts during the local development review process. Development should be located and regulated to minimize significant air quality related health risks.

- **Policy HW1.5. Cleaner Fuels.** Encourage the use of cleaner burning fuels and low emission vehicles.

Greenhouse Gas Emissions

This section describes regulations related to global climate change at the federal, State, and local level.

[1] Newark, City of. 2013. *City of Newark General Plan, Health and Wellness Element*. December. Website: https://www.newark.org/home/showpublisheddocument/76/636502245500200000 (accessed October 2022).

Federal Regulations

The United States has historically had a voluntary approach to reducing GHG emissions. However, on April 2, 2007, the United States Supreme Court ruled that the EPA has the authority to regulate CO_2 emissions under the CAA.

While there currently are no adopted federal regulations for the control or reduction of GHG emissions, the EPA commenced several actions in 2009 to implement a regulatory approach to global climate change, including the 2009 EPA final rule for mandatory reporting of GHGs from large GHG emission sources in the United States. Additionally, the EPA Administrator signed an endangerment finding action in 2009 under the CAA, finding that seven GHGs (CO_2, CH_4, N_2O, HFCs, NF_3, PFCs, and SF_6) constitute a threat to public health and welfare, and that the combined emissions from motor vehicles cause and contribute to global climate change, leading to national GHG emission standards.

State Regulations

The CARB is the lead agency for implementing climate change regulations in the State. Since its formation, the CARB has worked with the public, the business sector, and local governments to find solutions to California's air pollution problems. Key efforts by the State are described below.

Assembly Bill 32 (2006), California Global Warming Solutions Act. California's major initiative for reducing GHG emissions is Assembly Bill (AB) 32, passed by the State legislature on August 31, 2006. This effort set a GHG emission reduction target to reduce GHG emissions to 1990 levels by 2020. The CARB has established the level of GHG emissions in 1990 at 427 million metric tons (MMT) CO_2e. The emissions target of 427 MMT requires the reduction of 169 MMT from the State's projected business-as-usual 2020 emissions of 596 MMT. AB 32 requires the CARB to prepare a Scoping Plan that outlines the main State strategies for meeting the 2020 deadline and to reduce GHGs that contribute to global climate change. The CARB approved the Scoping Plan on December 11, 2008. It contains the main strategies California will implement to achieve the reduction of approximately 169 MMT of CO_2e, or approximately 30 percent, from the State's projected 2020 emission level of 596 MMT of CO_2e under a business-as-usual scenario (this is a reduction of 42 MMT CO_2e, or almost 10 percent from 2002–2004 average emissions). The Scoping Plan also includes CARB-recommended GHG reductions for each emissions sector of the State's GHG inventory. The Scoping Plan calls for the largest reductions in GHG emissions to be achieved by implementing the following measures and standards:

- Improved emissions standards for light-duty vehicles (estimated reduction of 31.7 MMT CO_2e);
- The Low-Carbon Fuel Standard (15.0 MMT CO_2e);
- Energy efficiency measures in buildings and appliances and the widespread development of combined heat and power systems (26.3 MMT CO_2e); and
- A renewable portfolio standard for electricity production (21.3 MMT CO_2e).

The Scoping Plan identifies 18 emission reduction measures that address cap-and-trade programs, vehicle gas standards, energy efficiency, low carbon fuel standards, renewable energy, regional transportation-related GHG targets, vehicle efficiency measures, goods movement, solar roof programs, industrial emissions, high-speed rail, green building strategies, recycling, sustainable forests, water, and air. The measures would result in a total reduction of 174 MMT CO_2e by 2020.

On August 24, 2011, the CARB unanimously approved both the new supplemental assessment and reapproved its Scoping Plan, which provides the overall roadmap and rule measures to carry out AB 32. The CARB also approved a more robust CEQA equivalent document supporting the supplemental analysis of the cap-and-trade program. The cap-and-trade took effect on January 1, 2012, with an enforceable compliance obligation that began January 1, 2013.

The CARB approved the First Update to the Climate Change Scoping Plan on May 22, 2014. The First Update identifies opportunities to leverage existing and new funds to further drive GHG emission reductions through strategic planning and targeted low carbon investments. The First Update defines CARB climate change priorities until 2020 and sets the groundwork to reach long-term goals set forth in Executive Orders (EOs) S-3-05 and B-16-2012. The Update highlights California's progress toward meeting the "near-term" 2020 GHG emission reduction goals as defined in the initial Scoping Plan. It also evaluates how to align the State's "longer-term" GHG reduction strategies with other State policy priorities for water, waste, natural resources, clean energy, transportation, and land use. The CARB released a second update to the Scoping Plan, the 2017 Scoping Plan,[1] to reflect the 2030 target set by EO B-30-15 and codified by Senate Bill (SB) 32.

CARB is currently working on an update to the 2017 Scoping Plan, which will be released this year. The 2022 Scoping Plan Update will assess progress towards achieving the SB 32 2030 target and lay out a path to achieve carbon neutrality no later than 2045.

Senate Bill 375 (2008). Signed into law on October 1, 2008, SB 375 supplements GHG reductions from new vehicle technology and fuel standards with reductions from more efficient land use patterns and improved transportation. Under the law, the CARB approved GHG reduction targets in February 2011 for California's 18 federally designated regional planning bodies, known as Metropolitan Planning Organizations (MPOs). The CARB may update the targets every four years and must update them every eight years. MPOs, in turn, must demonstrate how their plans, policies and transportation investments meet the targets set by the CARB through Sustainable Community Strategies (SCS). The SCSs are included with the Regional Transportation Plan, a report required by State law. However, if an MPO finds that its SCS will not meet the GHG reduction target, it may prepare an Alternative Planning Strategy (APS). The APS identifies the impediments to achieving the targets.

Executive Order B-30-15 (2015). Governor Jerry Brown signed EO B-30-15 on April 29, 2015, which added the immediate target of:

---

[1] California Air Resources Board CARB). 2017. *California's 2017 Climate Change Scoping Plan*. November. Website: ww2.arb.ca.gov/sites/default/files/classic/cc/scopingplan/scoping_plan_2017.pdf (accessed July 2022).

- GHG emissions should be reduced to 40 percent below 1990 levels by 2030.

All State agencies with jurisdiction over sources of GHG emissions were directed to implement measures to achieve reductions of GHG emissions to meet the 2030 and 2050 targets. The CARB was directed to update the AB 32 Scoping Plan to reflect the 2030 target, and, therefore, is moving forward with the update process. The mid-term target is critical to help frame the suite of policy measures, regulations, planning efforts, and investments in clean technologies and infrastructure needed to continue reducing emissions.

Senate Bill 350 (2015) Clean Energy and Pollution Reduction Act. SB 350, signed by Governor Jerry Brown on October 7, 2015, updates and enhances AB 32 by introducing the following set of objectives in clean energy, clean air, and pollution reduction for 2030:

- Raise California's renewable portfolio standard from 33 percent to 50 percent; and
- Increase energy efficiency in buildings by 50 percent by the year 2030.

The 50 percent renewable energy standard will be implemented by the California Public Utilities Commission (CPUC) for the private utilities and by the California Energy Commission (CEC) for municipal utilities. Each utility must submit a procurement plan showing it will purchase clean energy to displace other nonrenewable resources. The 50 percent increase in energy efficiency in buildings must be achieved through the use of existing energy efficiency retrofit funding and regulatory tools already available to State energy agencies under existing law. The addition made by this legislation requires State energy agencies to plan for and implement those programs in a manner that achieves the energy efficiency target.

Senate Bill 32, California Global Warming Solutions Act of 2016, and Assembly Bill 197. In summer 2016, the Legislature passed and the Governor signed SB 32 and AB 197. SB 32 affirms the importance of addressing climate change by codifying into statute the GHG emissions reductions target of at least 40 percent below 1990 levels by 2030 contained in Governor Brown's April 2015 EO B-30-15. SB 32 builds on AB 32 and keeps us on the path toward achieving the State's 2050 objective of reducing emissions to 80 percent below 1990 levels, consistent with an Intergovernmental Panel on Climate Change analysis of the emission trajectory that would stabilize atmospheric GHG concentrations at 450 parts per million CO_2e and reduce the likelihood of catastrophic impacts from climate change.

The companion bill to SB 32, AB 197, provides additional direction to the CARB related to the adoption of strategies to reduce GHG emissions. Additional direction in AB 197 meant to provide easier public access to air pollutant emissions data that are collected by the CARB was posted in December 2016.

Senate Bill 100. On September 10, 2018, Governor Brown signed SB 100, which raises California's renewable portfolio standard requirements to 60 percent by 2030, with interim targets, and 100 percent by 2045. The bill also establishes a State policy that eligible renewable energy resources and zero-carbon resources supply 100 percent of all retail sales of electricity to California end-use customers and 100 percent of electricity procured to serve all State agencies by December 31, 2045.

Under the bill, the State cannot increase carbon emissions elsewhere in the Western grid or allow resource shuffling to achieve the 100 percent carbon-free electricity target.

Executive Order B-55-18. EO B-55-18, signed September 10, 2018, sets a goal "to achieve carbon neutrality as soon as possible, and no later than 2045, and achieve and maintain net negative emissions thereafter." EO B-55-18 directs the CARB to work with relevant State agencies to ensure future Scoping Plans identify and recommend measures to achieve the carbon neutrality goal. The goal of carbon neutrality by 2045 is in addition to other statewide goals, meaning not only should emissions be reduced to 80 percent below 1990 levels by 2050, but that, by no later than 2045, the remaining emissions be offset by equivalent net removals of CO_2e from the atmosphere, including through sequestration in forests, soils, and other natural landscapes.

Regional Regulations

The BAAQMD is the regional government agency that regulates sources of air pollution within the nine Bay Area counties.

BAAQMD's Justification Report: CEQA Thresholds for Evaluating the Significance of Climate Impacts from Land Use Projects and Plans. In April 2022, the BAAQMD adopted the Justification Report: CEQA Thresholds for Evaluating the Significance of Climate Impacts from Land Use Projects and Plans[1] document which incorporates updated GHG significance thresholds. The BAAQMD recommends these thresholds of significance for use in determining whether a proposed project will have a significant impact related to climate change. These thresholds evaluate a project based on its effect on California's efforts to meet the State's long-term climate goals. Applying this approach, the BAAQMD identifies and provides supporting documentation, outlining the requirements for new land use development projects necessary to achieve California's long-term climate goal of carbon neutrality by 2045. Based on their analysis, the BAAQMD found that new land use development projects need to incorporate design elements to do its "fair share" to implement the goal of carbon neutrality by 2045. If a project is designed and built to incorporate the identified design elements, then it will contribute its portion of what is necessary to achieve California's long-term climate goals—its "fair share"—and an agency reviewing the project under CEQA can conclude that the project will not make a cumulatively considerable contribution to global climate change. The document concludes that if a project does not incorporate these design elements, then it should be found to make a significant climate impact because it will hinder California's efforts to address climate change.

Local Regulations

The City of Newark has prepared a Climate Action Plan (CAP).[2] The CAP is a comprehensive planning document outlining the City's proposed approach to reduce Newark's impact on the climate by reducing GHG emissions. The vision of the CAP is to lower GHG emissions, reduce energy costs, protect air quality and improve the economy and the environment. The CAP includes a roadmap for implementing new polices, programs, incentives, requirements, projects, and initiatives in the

2 Newark, City of. 2010. City of Newark Climate Action Plan. January. Website: https://www.newark.org/home/showpublisheddocument/328/636502463456000000 (accessed October 2022).

immediate future, as well as longer-term actions that will need to be studied further while monitoring how the climate continues to change and evaluating the effectiveness of actions taken. The CAP includes action items to be implemented by the City, individual residential households, and businesses.

METHODOLOGY

Construction Emissions

Construction activities can generate a substantial amount of air pollution. Construction activities are considered temporary; however, short-term impacts can contribute to exceedances of air quality standards. Construction activities include demolition, site preparation, earthmoving, and general construction. The emissions generated from these common construction activities include fugitive dust from soil disturbance, fuel combustion from mobile heavy-duty diesel- and gasoline-powered equipment, portable auxiliary equipment, and worker commute trips. The California Emissions Estimator Model (CalEEMod) Version 2020.4.0 computer program was used to calculate emissions from on-site construction equipment and emissions from worker and vehicle trips to the site. Construction of the proposed project would begin in the fourth quarter of 2023 and would end in 2024. Construction would include demolition, grading, site preparation, building, paving, and architectural coating (painting) activities. The proposed project would demolish the existing uses, which was included in CalEEMod. This analysis assumes that the project site would be balanced with no import or export activities and use of Tier 3 construction equipment, which was also included in CalEEMod. Other detailed construction information is currently unavailable; therefore, this analysis uses CalEEMod default assumptions.

Construction Health Risk Assessment

A construction health risk assessment (HRA), which evaluates construction-period health risk to off-site receptors, was performed for the proposed project, and the analysis is presented below. To estimate the potential cancer risk associated with construction of the proposed project from equipment exhaust (including diesel particulate matter), a dispersion model was used to translate an emission rate from the source location to a concentration at the receptor location of interest (i.e., a nearby residence and worksites). Dispersion modeling varies from a simpler, more conservative screening-level analysis to a more complex and refined detailed analysis. This refined assessment was conducted using the CARB exposure methodology with the air dispersion modeling performed using the EPA dispersion model AERMOD. The model provides a detailed estimate of exhaust concentrations based on site and source geometry, source emissions strength, distance from the source to the receptor, and meteorological data.

Operational Emissions

This air quality analysis includes estimating emissions associated with long-term operation of the project. Indirect emissions of criteria pollutants with regional impacts would be emitted by project-generated vehicle trips. In addition, localized air quality impacts (i.e., higher carbon monoxide concentrations or “hot-spots”) near intersections or roadway segments in the project vicinity would also potentially occur due to project-generated vehicle trips.

Consistent with BAAQMD's guidance for estimating emissions, the CalEEMod computer program was used to calculate the long-term operational emissions associated with the project. The analysis was conducted using land use codes *Condo/Townhouse, Parking Lot, and City Park.* The proposed project is expected to generate approximately 547 average daily trips, which was included in CalEEMod. In addition, the proposed project would be all-electric and would not include natural gas and would have the following sustainability features: low flow fixtures, drought tolerant landscaping, solar, and non-potable common area irrigation water. Where project-specific data were not available, default assumptions (e.g., energy usage, water usage, and solid waste generation) from CalEEMod were used to estimate project emissions. CalEEMod output sheets are included in Attachment A.

Operational Health Risk Assessment

To determine health risks associated with the proposed project to on-site receptors, an HRA was conducted for the proposed project based on three current guidance documents: (1) the California USEPA Air Toxics Hot Spots Program Risk Assessment Guidelines;[1] (2) The California Air Pollution Control Officers Association's (CAPCOA) *Health Risk Assessment for Proposed Land Use Projects*;[2] and (3) the BAAQMD Recommended Methods for Screening and Modeling Local Risks and Hazards.[3] The BAAQMD document was released in May 2012 with the purpose of assisting lead agencies in conducting a risk and hazard analysis as part of the environmental review process for proposed land use projects, and it provides Bay Area-specific guidance on how to screen projects and provides specific inputs for HRA modeling. The analysis consists of several steps: determine the PM_{10} emission factor, determine source emission rates, and determine concentrations at the project site; translate the PM_{10} concentrations into health risk values; and compare the health risk values to the BAAQMD's thresholds to determine significance.

The project site is located near several sources of mobile toxic air contaminants (TACs) associated with vehicles on I-880, which was evaluated in the operational HRA. Annual traffic data obtained from the California Department of Transportation (Caltrans) were used as an input to the model for the evaluation of I-880.[4] According to Caltrans, the total annual average daily traffic (AADT) along I-880 near the project site is 190,000, of which 5.4 percent is trucks.

The BAAQMD requires that age sensitivity be included when assessing exposure to sensitive receptors. For long-term exposure, OEHHA recommends that an age sensitivity factor (ASF) of 1.7 be applied when estimating long-term exposure or 70-year-lifetime cancer risk. The exposure

2 California Air Pollution Control Officers Association (CAPCOA). 2009. *Health Risk Assessment for Proposed Land Use Projects.* July.

3 Bay Area Air Quality Management District (BAAQMD). 2016. *Air Toxics NSR Program Health Risk Assessment (HRA) Guidelines.* January. Website: www.baaqmd.gov/~/media/files/planning-and-research/rules-and-regs/workshops/2016/reg-2-5/hra-guidelines_clean_jan_2016-pdf.pdf?la=en (accessed May 2021).

4 California Department of Transportation (Caltrans). 2020. Traffic Volumes on California State Highways. Website: https://dot.ca.gov/programs/traffic-operations/census (accessed October 2022).

assumptions are very conservative in that they assume an individual would reside at this location from birth through 70 years of age.

Emission factors for vehicle emissions were determined using the CARB's EMFAC2021. EMFAC2021 includes assumptions of technological and regulatory changes that will reduce emission rates over time. The model only allows for a single emission rate for the entire 70-year health risk evaluation period. Therefore, a worst-case set of emission factors from the year 2023 was used to represent the long-term 70-year evaluation period.

The emission rates by total AADT and the average speed, along with the classification of the total AADT into 13 vehicle-type categories, and the corresponding total emissions for that volume of vehicles at the average speed (5-70 miles per hour), are provided in Appendix B. For the purpose of this assessment, it is assumed that the traffic volumes are constant throughout the year. The PM_{10} emission rates used in the analysis were determined based on the vehicle distribution by type according to the Caltrans traffic data for I-880. For purposes of this analysis, diesel vehicle exhaust was modeled as a 10-lane highway with 85 volume sources for each lane located along I-880.

LSA also evaluated the project vicinity for potential sources of stationary emissions. To assess the potential risk from stationary sources, LSA used the latest BAAQMD Stationary Source Screening Analysis Tool which uses Google Earth to plot the location coordinates of stationary emission sources such as gas stations, diesel emergency generators, and incinerators. Health risk data is provided for each facility. Google Earth's measurement tool is used to determine the distance from the emission source to the location of the sensitive receptor.

Greenhouse Gas Emissions

GHG emissions associated with the project would occur over the short-term from construction activities, consisting primarily of emissions from equipment exhaust. There would also be long-term GHG emissions associated with project-related area sources, energy consumption, water conveyance and treatment, and waste generation.

THRESHOLDS OF SIGNIFICANCE

The *State CEQA Guidelines* indicate that a project would normally have a significant adverse air quality impact if project-generated pollutant emissions would:

- Conflict with or obstruct implementation of the applicable air quality plan;
- Result in a cumulatively considerable net increase of any criteria pollutant for which the project is nonattainment under an applicable federal or state ambient air quality standard;
- Expose sensitive receptors to substantial pollutant concentrations; or
- Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

According to the BAAQMD CEQA Guidelines, to meet air quality standards for criteria air pollutant and air precursor impacts, the proposed project must not:

- Contribute to CO concentrations exceeding the State ambient air quality standards;
- Generate average daily construction emissions of ROG, NO_x or $PM_{2.5}$ (exhaust) greater than 54 pounds per day or PM_{10} [particulate matter 10 microns or less in diameter] exhaust emissions greater than 82 pounds per day;
- Generate operational emissions of ROG, NO_x or $PM_{2.5}$ of greater than 10 tons per year or 54 pounds per day or PM_{10} emissions greater than 15 tons per year or 82 pounds per day; or
- Exceed a cancer risk level of more than 10 in one million, a non-cancer risk (i.e., chronic or acute) hazard index greater than 1.0, or result in incremental increase of greater than 0.3 micrograms per cubic meter annual average $PM_{2.5}$.

The *State CEQA Guidelines* indicate that a project would normally have a significant adverse GHG emission impact if the project would:

- Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment; or
- Conflict with an applicable plan, policy or regulation adopted for the purpose of reduction the emissions of greenhouse gases.

According to the April 2022 BAAQMD *Justification Report: CEQA Thresholds for Evaluating the Significance of Climate Impacts From Land Use Projects and Plans*, a project would have a less than significant impact related to GHG emissions if it would:

a. Include, at a minimum, the following project design elements:

    1. Buildings

        a. The project will not include natural gas appliances or natural gas plumbing (in both residential and nonresidential development).

        b. The project will not result in any wasteful, inefficient, or unnecessary electrical usage as determined by the analysis required under CEQA Section 21100(b)(3) and Section 15126.2(b) of the State CEQA Guidelines.

    2. Transportation

        a. Achieve a reduction in project-generated vehicle miles traveled (VMT) below the regional average consistent with the current version of the California Climate Change Scoping Plan (currently 15 percent) or meet a locally adopted Senate Bill 743 VMT target, reflecting the recommendations provided in the Governor's Office of Planning and Research's Technical Advisory on Evaluating Transportation Impacts in CEQA:

1. Residential projects: 15 percent below the existing VMT per capita
2. Office projects: 15 percent below the existing VMT per employee
3. Retail projects: no net increase in existing VMT

b. Achieve compliance with off-street electric vehicle requirements in the most recently adopted version of CALGreen Tier 2.

b. Or be consistent with a local GHG reduction strategy that meets the criteria under State CEQA Guidelines Section 15183.5(b).

PROJECT IMPACTS

The sections below describe the proposed project's consistency with applicable air quality plans, estimated project emissions, and the significance of impacts for both air quality and GHG emissions with respect to BAAQMD thresholds.

Air Quality

Consistency with Applicable Air Quality Plans

The applicable air quality plan is the BAAQMD 2017 Clean Air Plan, which defines control strategies to reduce emissions and ambient concentrations of air pollutants; safeguard public health by reducing exposure to air pollutants that pose the greatest heath risk, with an emphasis on protecting the communities most heavily affected by air pollution; and reduce GHG emissions to protect the climate. Consistency with the Clean Air Plan can be determined if the project: (1) supports the goals of the Clean Air Plan, (2) includes applicable control measures from the Clean Air Plan, and (3) would not disrupt or hinder implementation of any control measures from the Clean Air Plan.

Clean Air Plan Goals. The primary goals of the Bay Area Clean Air Plan are to attain air quality standards, reduce population exposure and protect public health in the Bay Area, and reduce GHG emissions and protect the climate.

The BAAQMD has established significance thresholds for project construction and operational impacts at a level at which the cumulative impact of exceeding these thresholds would have an adverse impact on the region's attainment of air quality standards. The health and hazards thresholds were established to help protect public health. As discussed below, construction and operation of the proposed project would not result in the generation of criteria air pollutants that would exceed BAAQMD thresholds of significance. Therefore, the proposed project would not conflict with the Clean Air Plan goals.

Clean Air Plan Control Measures. The control strategies of the Clean Air Plan include measures in the following categories: Stationary Source Measures, Transportation Measures, Energy Measures, Building Measures, Agriculture Measures, Natural and Working Lands Measures, Waste Management Measures, Water Measures, and Super-GHG Pollutants Measures. The proposed project's compliance with each of these control measures is discussed below.

Stationary Source Control Measures. The Stationary Source Control Measures, which are designed to reduce emissions from stationary sources such as metal melting facilities, cement kilns, refineries, and glass furnaces, are incorporated into rules adopted by the BAAQMD and then enforced by the BAAQMD Permit and Inspection programs. Since the proposed project would not include any of these stationary sources, the Stationary Source Control Measures of the Clean Air Plan are not applicable to the proposed project.

Transportation Control Measures. The BAAQMD identifies Transportation Control Measures as part of the Clean Air Plan to decrease emissions of criteria pollutants, TACs, and GHGs by reducing demand for motor vehicle travel, promoting efficient vehicles and transit service, decarbonizing transportation fuels, and electrifying motor vehicles and equipment. The proposed project would result in the redevelopment of the site with residential uses on an infill site that would locate residents near existing residential, commercial, and retail uses, reducing the demand for travel by single-occupancy vehicles. Therefore, the proposed project would not conflict with the identified Transportation and Mobile Source Control Measures of the Clean Air Plan.

Energy Control Measures. The Clean Air Plan also includes Energy Control Measures, which are designed to reduce emissions of criteria air pollutants, TACs, and GHGs by decreasing the amount of electricity consumed in the Bay Area and decreasing the carbon intensity of the electricity used by switching to less GHG-intensive fuel sources for electricity generation. Since these measures apply to electrical utility providers and local government agencies (and not individual projects), the energy control measures of the Clean Air Plan are not applicable to the proposed project.

Building Control Measures. The BAAQMD has authority to regulate emissions from certain sources in buildings such as boilers and water heaters but has limited authority to regulate buildings themselves. Therefore, the strategies in the control measures for this sector focus on working with local governments that do have authority over local building codes, to facilitate adoption of best GHG control practices and policies. The proposed project would be required to comply with the latest Title 24 standards of the California Code of Regulations, regarding energy conservation and green building standards. In addition, the proposed project would be all-electric and would not include natural gas and would include solar. Therefore, the proposed project would not conflict with any of the Building Control Measures.

Agriculture Control Measures. The Agriculture Control Measures are designed to primarily reduce emissions of methane. Since the project does not include any agricultural activities, the Agriculture Control Measures of the Clean Air Plan are not applicable to the proposed project.

Natural and Working Lands Control Measures. The Natural and Working Lands Control Measures focus on increasing carbon sequestration on rangelands and wetlands and encouraging local governments to adopt ordinances that promote urban tree plantings. Since the proposed project does not include the disturbance of any rangelands or wetlands, the Natural and Working Lands Control Measures of the Clean Air Plan are not applicable to the proposed project.

Waste Management Control Measures. The Waste Management Control Measures focus on reducing or capturing methane emissions from landfills and composting facilities, diverting organic materials away from landfills, and increasing waste diversion rates through efforts to reduce, reuse, and recycle. The proposed project would comply with local requirements for waste management (e.g., recycling and composting services). Therefore, the proposed project would be consistent with the Waste Management Control Measures of the Clean Air Plan.

Water Control Measures. The Water Control Measures focus on reducing emissions of criteria pollutants, TACs, and GHGs by encouraging water conservation, limiting GHG emissions from publicly owned treatment works (POTW), and promoting the use of biogas recovery systems. Since these measures apply to POTWs and local government agencies (and not individual projects), the Water Control Measures are not applicable to the proposed project.

Super GHG Control Measures. The Super-GHG Control Measures are designed to facilitate the adoption of best GHG control practices and policies through the BAAQMD and local government agencies. Since these measures do not apply to individual projects, the Super-GHG Control Measures are not applicable to the proposed project.

Clean Air Plan Implementation. As discussed above, the proposed project would generally implement the applicable measures outlined in the Clean Air Plan, including Transportation Control Measures. Therefore, the project would not disrupt or hinder implementation of a control measure from the Clean Air Plan.

Criteria Pollutant Analysis

The BAAQMD is currently designated as a nonattainment area for State and national O_3 standards and national particulate matter ambient air quality standards. The BAAQMD's nonattainment status is attributed to the region's development history. Past, present, and future development projects contribute to the region's adverse air quality impacts on a cumulative basis. By its very nature, air pollution is largely a cumulative impact. No single project is sufficient in size to, by itself, result in nonattainment of ambient air quality standards. Instead, a project's individual emissions contribute to existing cumulatively significant adverse air quality impacts. If a project's contribution to the cumulative impact is considerable, then the project's impact on air quality would be considered significant.

In developing thresholds of significance for air pollutants, the BAAQMD considered the emission levels for which a project's individual emissions would be cumulatively considerable. If a project exceeds the identified significance thresholds, its emissions would be cumulatively considerable, resulting in significant adverse air quality impacts to the region's existing air quality conditions. Therefore, additional analysis to assess cumulative impacts is unnecessary. The following analysis assesses the potential project-level construction- and operation-related air quality impacts.

Short-Term Construction Emissions. During construction, short-term degradation of air quality may occur due to the release of particulate emissions generated by demolition, grading, building, paving, and other activities. Emissions from construction equipment are also anticipated and would include CO, NO_x, ROG, directly emitted particulate matter ($PM_{2.5}$ and PM_{10}), and TACs such as diesel exhaust particulate matter.

Project construction activities would include demolition, site preparation, grading, building, paving, and architectural coating (painting). Construction-related effects on air quality from the proposed project would be greatest during the site preparation phase due to the disturbance of soils. If not properly controlled, these activities would temporarily generate particulate emissions. Sources of fugitive dust would include disturbed soils at the construction site. Unless properly controlled, vehicles leaving the site would deposit dirt and mud on local streets, which could be an additional source of airborne dust after it dries. PM_{10} emissions would vary from day to day, depending on the nature and magnitude of construction activity and local weather conditions. PM_{10} emissions would depend on soil moisture, silt content of soil, wind speed, and the amount of operating equipment. Larger dust particles would settle near the source, while fine particles would be dispersed over greater distances from the construction site.

Water or other soil stabilizers can be used to control dust, resulting in emission reductions of 50 percent or more. The BAAQMD has established standard measures for reducing fugitive dust emissions (PM_{10}). With the implementation of these Basic Construction Mitigation Measures, fugitive dust emissions from construction activities would not result in adverse air quality impacts.

In addition to dust-related PM_{10} emissions, heavy trucks and construction equipment powered by gasoline and diesel engines would generate CO, SO_2, NO_x, ROG, and some soot particulate ($PM_{2.5}$ and PM_{10}) in exhaust emissions. If construction activities were to increase traffic congestion in the area, CO and other emissions from traffic would increase slightly while those vehicles idle in traffic. These emissions would be temporary in nature and limited to the immediate area surrounding the construction site.

As discussed above, CalEEMod was used to calculate emissions from on-site construction equipment and emissions from worker and vehicle trips to the site. Construction-related emissions are presented in Table A, below.

Table A: Project Construction Emissions (in Pounds Per Day)

Project Construction	ROG	NO_X	Exhaust PM_{10}	Fugitive Dust PM_{10}	Exhaust $PM_{2.5}$	Fugitive Dust $PM_{2.5}$
Average Daily Emissions	3.2	10.1	0.6	0.6	0.6	0.2
BAAQMD Thresholds	54.0	54.0	82.0	BMP	54.0	BMP
Exceeds Threshold?	**No**	**No**	**No**	**No**	**No**	**No**

Source: Compiled by LSA (October 2022).
BAAQMD = Bay Area Air Quality Management District
BMP = best management practices
NO_X = nitrogen oxides
$PM_{2.5}$ = particulate matter 2.5 microns or less in diameter
PM_{10} = particulate matter 10 microns or less in diameter
ROG = reactive organic gases

As shown in Table A, construction emissions associated with the project would not exceed the BAAQMD's thresholds for ROG, NO_x, CO, exhaust PM_{10}, and exhaust $PM_{2.5}$ emissions. In addition to the construction period thresholds of significance, the BAAQMD requires the implementation of Basic Construction Mitigation Measures to reduce construction fugitive dust impacts to a less than significant level. Implementation of Mitigation Measure AIR-1 would ensure that the proposed

project incorporates the Basic Construction Mitigation Measures and ensures that short-term construction period air quality impacts would be less than significant.

Mitigation Measure AIR-1 Consistent with the Bay Area Air Quality Management District (BAAQMD) Basic Construction Mitigation Measures, the following controls are required to be included as specifications for the proposed project and implemented at the construction site:

- All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
- All haul trucks transporting soil, sand, or other loose material off site shall be covered.
- All visible mud or dirt tracked-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
- All vehicle speeds on unpaved roads shall be limited to 15 miles per hour.
- All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible.
- Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California Airborne Toxics Control Measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
- All construction equipment shall be maintained and properly tuned in accordance with manufacturers' specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
- A publicly-visible sign shall be posted with the telephone number and person to contact at the City of Newark regarding dust complaints. This person shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

As shown in Table A, construction emissions associated with the project would not exceed the significance criteria for ROG, NO_x, PM_{10}, or $PM_{2.5}$ emissions. Therefore, with implementation of Mitigation Measure AIR-1, construction of the proposed project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in nonattainment under an applicable federal or State ambient air quality standards (AAQS).

Long-Term Operational Emissions. Long-term air pollutant emission impacts are those associated with mobile sources (e.g., vehicle trips), energy sources (e.g., natural gas), and area sources (e.g., architectural coatings and the use of landscape maintenance equipment) related to the proposed project.

PM_{10} emissions result from running exhaust, tire and brake wear, and the entrainment of dust into the atmosphere from vehicles traveling on paved roadways. Entrainment of PM_{10} occurs when vehicle tires pulverize small rocks and pavement, and the vehicle wakes generate airborne dust. The contribution of tire and brake wear is small compared to the other PM emission processes. Gasoline-powered engines have small rates of particulate matter emissions compared with diesel-powered vehicles.

Energy source emissions result from activities in buildings for which natural gas is used. The quantity of emissions is the product of usage intensity (i.e., the amount of natural gas). As discussed above, the proposed project would be all-electric and would not include natural gas. Therefore, the proposed project would not generate energy source emissions.

Area source emissions associated with the project would include emissions from the use of landscaping equipment.

Emission estimates for operation of the project were calculated using CalEEMod. The primary emissions associated with the project are regional in nature, meaning that air pollutants are rapidly dispersed on release or, in the case of vehicle emissions associated with the project, emissions are released in other areas of the Air Basin. The daily and annual emissions associated with project operational trip generation, energy, and area sources are identified in Table B for ROG, NO_x, PM_{10}, and $PM_{2.5}$.

The results shown in Table B indicate the project would not exceed the significance criteria for daily or annual ROG, NO_x, PM_{10}, and $PM_{2.5}$ emissions; therefore, operation of the proposed project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in nonattainment under an applicable federal or State AAQS.

Table B: Project Operational Emissions

	ROG	NO_x	PM_{10}	$PM_{2.5}$
Pounds per Day				
Area Source Emissions	2.1	0.1	<0.1	<0.1
Energy Source Emissions	0.0	0.0	0.0	0.0
Mobile Source Emissions	1.4	1.6	2.7	0.7
Total Emissions	**3.5**	**1.7**	**2.7**	**0.7**
BAAQMD Thresholds	54.0	54.0	82.0	54.0
Exceeds Threshold?	**No**	**No**	**No**	**No**
Tons per Year				
Area Source Emissions	0.4	<0.1	<0.1	<0.1
Energy Source Emissions	0.0	0.0	0.0	0.0
Mobile Source Emissions	0.2	0.3	0.5	0.1
Total Emissions	**0.6**	**0.3**	**0.5**	**0.1**
BAAQMD Thresholds	10.0	10.0	15.0	10.0
Exceeds Threshold?	**No**	**No**	**No**	**No**

Source: Compiled by LSA (October 2022).
BAAQMD = Bay Area Air Quality Management District
NO_X = nitrogen oxides
$PM_{2.5}$ = particulate matter 2.5 microns or less in diameter
PM_{10} = particulate matter 10 microns or less in diameter
ROG = reactive organic gases

Localized CO Impacts. Emissions and ambient concentrations of CO have decreased dramatically in the Bay Area with the introduction of the catalytic converter in 1975. No exceedances of the State or federal CO standards have been recorded at Bay Area monitoring stations since 1991. The BAAQMD's 2017 CEQA Guidelines include recommended methodologies for quantifying concentrations of localized CO levels for proposed transportation projects. A screening level analysis using guidance from the BAAQMD CEQA Guidelines was performed to determine the impacts of the project. The screening methodology provides a conservative indication of whether the implementation of a proposed project would result in significant CO emissions. According to the BAAQMD's CEQA Guidelines, a proposed project would result in a less than significant impact to localized CO concentrations if the following screening criteria are met:

- The project is consistent with an applicable congestion management program established by the county congestion management agency for designated roads or highways, and the regional transportation plan and local congestion management agency plans.

- Project traffic would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour.

- The project would not increase traffic volumes at affected intersections to more than 24,000 vehicles per hour where vertical and/or horizontal mixing is substantially limited (e.g., tunnel, parking garage, bridge underpass, natural or urban street canyon, or below-grade roadway).

Implementation of the proposed project would not conflict with the Alameda County Transportation Commission. The proposed project would generate approximately 31 net new AM peak hour trips and 33 net new PM peak hour trips; therefore, the project's contribution to peak-hour traffic

volumes at intersections in the vicinity of the project site would be well below 44,000 vehicles per hour. Therefore, the proposed project would not result in localized CO concentrations that exceed State or federal standards.

Health Risk on Nearby Sensitive Receptors

Sensitive receptors are defined as residential uses, schools, daycare centers, nursing homes, and medical centers. Individuals particularly vulnerable to diesel particulate matter are children, whose lung tissue is still developing, and the elderly, who may have serious health problems that can be aggravated by exposure to diesel particulate matter. Exposure from diesel exhaust associated with construction activity contributes to both cancer and chronic non-cancer health risks.

The closest receptors to the project site include single-family residences located approximately 120 feet south of the project site boundary across Cedar Boulevard. In addition, single-family residences are located approximately 270 feet north of the project site across I-880 and multi-family residential uses are located approximately 340 feet southeast of the project site along Cedar Court. The following sections describe the potential impacts on sensitive receptors from construction and operation of the proposed project.

Construction Health Risk to Nearby Sensitive Receptors. A construction HRA, which evaluates construction-period health risk to off-site receptors, was performed for the proposed project, and the analysis is presented below. Table C, below, identifies the results of the analysis assuming the use of Tier 3 construction equipment, as proposed by the project, at the maximally exposed individual (MEI), which is the nearest sensitive receptor. Model snapshots of the sources and results are shown in Attachment B.

Table C: Unmitigated Inhalation Health Risks from Project Construction to Off-Site Receptors

	Carcinogenic Inhalation Health Risk in One Million	Chronic Inhalation Hazard Index	Acute Inhalation Hazard Index	Annual $PM_{2.5}$ Concentration ($\mu g/m^3$)
Maximally Exposed Individual	27.63	0.021	0.000	0.195
Threshold	**10.0**	**1.0**	**1.0**	**0.3**
Exceeds Threshold?	**Yes**	**No**	**No**	**No**

Source: Compiled by LSA (October 2022).
$\mu g/m^3$ = micrograms per cubic meter
$PM_{2.5}$ = particulate matter less than 2.5 microns in size

As shown in Table C, the risk associated with project construction at the MEI would be 27.63 in one million, which would exceed the BAAQMD cancer risk threshold of 10 in one million. The total chronic hazard index would be 0.021, which is below the threshold of 1.0. In addition, the total acute hazard index would be nominal (0.0), which would also not exceed the threshold of 1.0. The results of the analysis indicate that the total $PM_{2.5}$ concentration would be 0.195 micrograms per cubic meter ($\mu g/m^3$), which would also not exceed the BAAQMD significance threshold of 0.3 $\mu g/m^3$. Therefore, since cancer risk would exceed the BAAQMD's threshold, implementation of Mitigation

Measure AIR-2 would be required to reduce substantial pollutant concentrations during project construction.

Mitigation Measure AIR-2 During construction of the proposed project, the project contractor shall ensure all off-road diesel-powered construction equipment of 50 horsepower or more used for the project construction at a minimum meets the California Air Resources Board Tier 3 emissions standards with level 3 diesel particulate filters or equivalent.

Table D identifies the results of the analysis with implementation of Mitigation Measure AIR-2.

Table D: Mitigated Inhalation Health Risks from Project Construction to Off-Site Receptors

	Carcinogenic Inhalation Health Risk in One Million	Chronic Inhalation Hazard Index	Acute Inhalation Hazard Index	Annual $PM_{2.5}$ Concentration ($\mu g/m^3$)
Maximally Exposed Individual	4.29	0.005	0.000	0.016
Threshold	**10.0**	**1.0**	**1.0**	**0.3**
Exceeds Threshold?	**No**	**No**	**No**	**No**

Source: Compiled by LSA (October 2022).
$\mu g/m^3$ = micrograms per cubic meter
$PM_{2.5}$ = particulate matter less than 2.5 microns in size

As shown in Table D, the mitigated cancer risk at the MEI would be 4.29 in one million, which would not exceed the BAAQMD cancer risk of 10 in one million. Therefore, with implementation of Mitigation Measure AIR-2, construction of the proposed project would not exceed BAAQMD thresholds and would not expose nearby sensitive receptors to substantial pollutant concentrations.

Operational Health Risk to Future Residents. As described previously in the Methodology discussion, an operational HRA was performed to evaluate the potential health risks associated with the proposed project to on-site receptors. The operational HRA is presented below.

Mobile Sources. High volume roadways in the project vicinity could expose future residents on the project site to TACs. The project site is located adjacent to I-880. The operational HRA was conducted using several steps, as follows: (1) determine the PM_{10} emission factor; (2) determine source emission rates; (3) determine concentrations at the project site; (4) translate the PM_{10} concentrations into health risk values; and (5) compare the health risk values to BAAQMD thresholds to determine significance. The results of the HRA from I-880 traffic emission sources are shown in Table E.

Table E: Unmitigated Maximum Long-Term Health Risk Impacts from Mobile Sources to the Project Site

Source	Carcinogenic Inhalation Health Risk in One Million	Chronic Inhalation Hazard Index	Acute Inhalation Hazard Index	Annual $PM_{2.5}$ Concentration ($\mu g/m^3$)
Traffic on I-880	53.95	0.312	0.019	0.052
Threshold	**10.0**	**1.0**	**1.0**	**0.30**
Exceed?	**Yes**	**No**	**No**	**No**

Source: LSA (October 2022).
$\mu g/m^3$ = micrograms per cubic meter
I-880 = Interstate 880
$PM_{2.5}$ = particulate matter less than 2.5 microns in size

Results of the analysis indicate that the MEI inhalation cancer risk associated with I-880 would be 53.95 in one million, which would exceed the BAAQMD threshold of 10 in one million. The maximum chronic hazard index would be 0.312, which would be below the BAAQMD significance threshold of 1.0. The maximum acute hazard index would be 0.019, which would be below the BAAQMD significance threshold of 1.0. In addition, the total $PM_{2.5}$ concentration would be 0.052 $\mu g/m^3$, which would also not exceed the BAAQMD significance threshold of 0.30 $\mu g/m^3$. As indicated above, the cancer risk of 53.95 in one million would exceed BAAQMD thresholds. Therefore, implementation of Mitigation Measure AIR-3 would be required to reduce substantial pollutant concentrations during project operation.

Mitigation Measure AIR-3

The following measures shall be required to reduce toxic air contaminants (TACs) and particulate matter indoors to a level sufficient to achieve compliance with BAAQMD health risk thresholds:

- The project applicant shall provide an HVAC system with a control efficiency sufficient to result in a reduction of a minimum 85 percent of particulates of 10 microns or less, such as Minimum Efficiency Reporting Value (MERV)-9 filters or greater, for indoor air filtration systems. The ventilation system shall be certified to achieve the stated performance effectiveness from indoor areas.

- The project applicant shall locate all air intakes as far away from Interstate 880 (I-880) as feasible.

- The project applicant shall disclose to potential occupants of the project that the proximity of the project site to the freeway could result in increased long-term health risks. The disclosure shall indicate the specifications for the installed air filtration system.

Table F identifies the results of the analysis with implementation of Mitigation Measure AIR-3.

Table F: Mitigated Maximum Long-Term Health Risk Impacts from Mobile Sources to the Project Site

Source	Carcinogenic Inhalation Health Risk in One Million	Chronic Inhalation Hazard Index	Acute Inhalation Hazard Index	Annual $PM_{2.5}$ Concentration ($\mu g/m^3$)
I-880	8.09	0.312	0.019	0.052
Threshold	**10.0**	**1.0**	**1.0**	**0.30**
Exceed?	**No**	**No**	**No**	**No**

Source: LSA (October 2022).
$\mu g/m^3$ = micrograms per cubic meter
I-880 = Interstate 880
$PM_{2.5}$ = particulate matter less than 2.5 microns in size

As shown in Table F, with implementation of Mitigation Measure AIR-3, the cancer risk would be 8.09 in one million for the MEI, which is below the BAAQMD cancer risk threshold of 10 in one million. Therefore, with implementation of Mitigation Measure AIR-3, traffic on I-880 would not expose future residents of the project site to health risk levels that would exceed the criteria established by the BAAQMD.

Stationary Sources. Implementation of the proposed project would allow new residential uses that would include sensitive receptors. LSA conducted a search of all stationary sources permitted by the BAAQMD within 1,000 feet of the project site. Using the BAAQMD Stationary Source Screening Analysis Tool, three stationary sources were identified within the project site vicinity. The results of the stationary source analysis are presented in Table G.

Table G: Stationary Sources within 1,000 Feet of the Project Site

Facility ID	Stationary Source (Type)	Distance (feet)	Adjusted Risk (in one million)	$PM_{2.5}$ Conc. ($\mu g/m^3$)	Hazard
23778	Golden State Auto Collision	60	ND	0.000	<0.001
8750	Bay Area Body Shop, 38472 Cedar Boulevard, Newark CA, 94560	390	0.001	0.001	0.006
17031	California Camper Repair, 38456	480	ND	0.000	<0.001
Maximum Health Risk			**0.001**	**0.001**	**0.006**
Total Health Risk			**0.001**	**0.001**	**0.006**
Single Source Threshold			**10 in one million**	**0.3**	**1.0**
Exceed?			No	No	No
BAAQMD Cumulative Threshold			**100 in one million**	**0.80**	**10.0**
Exceed?			No	No	No

Source: LSA (October 2022).
$\mu g/m^3$ = micrograms per cubic meter
BAAQMD = Bay Area Air Quality Management District
ND = no data
$PM_{2.5}$ = particulate matter less than 2.5 microns in size

As shown in Table G, the highest risk would be 0.001 in one million, which would not exceed the BAAQMD cancer risk threshold of 10 in one million. The highest hazard index would be 0.006, which is below the threshold of 1.0. The results of the analysis also indicate that the highest $PM_{2.5}$ concentration would be 0.001, which would not exceed the BAAQMD significance threshold of 0.3 µg/m^3. The BAAQMD cumulative threshold of cancer risk greater than 100.0 in one million, an increased non-cancer risk of greater than 10.0 on the hazard index (chronic), or an ambient $PM_{2.5}$ increase greater than 0.8 µg/m^3 on an annual average basis would not be exceeded. Therefore, implementation of the project would not expose sensitive receptors to substantial pollutant concentrations associated with nearby stationary sources.

Cumulative TAC Analysis. The cumulative analysis sums all sources of emissions in the vicinity of the project site including stationary source and mobile sources. The cumulative cancer risk, hazard index, acute index and $PM_{2.5}$ concentrations are shown in Table H. Results of the cumulative analysis indicate the proposed project would not exceed BAAQMD cumulative thresholds and would not expose future residents of the project site to significant cumulative health risks.

Table H: Mitigated Cumulative Risk from All Sources

	Carcinogenic Inhalation Health Risk in One Million	Chronic Inhalation Hazard Index	Acute Inhalation Hazard Index	Annual $PM_{2.5}$ Concentration (µg/m^3)
Traffic on I-880	8.09	0.312	0.019	0.052
Stationary Sources	0.001	0.006	0.000	0.001
Mitigated Total	**8.091**	**0.318**	**0.019**	**0.053**
Threshold	**100.0**	**10.0**	**10.0**	**0.80**
Exceed?	**No**	**No**	**No**	**No**

Source: LSA (June 2021).
µg/m^3 = micrograms per cubic meter
I-880 = Interstate 880
$PM_{2.5}$ = particulate matter less than 2.5 microns in size

As discussed above, with implementation of Mitigation Measure AIR-3, exposure to roadway emissions, diesel particulate matter, and stationary source emissions at the proposed residential units on the project site would not result in a maximum exposure of future residents to a risk level that would exceed the criterion of significance for cancer health risk at the individual or cumulative level. As such, the project would not expose future residents to substantial pollutant concentrations that would cause harmful effects. Therefore, with implementation of Mitigation Measure AIR-3, future residents of the project site would not be exposed to a substantial increase in health risk impacts from stationary sources of toxic air contaminants in the project vicinity.

Objectionable Odors

During construction, the various diesel-powered vehicles and equipment in use on site would create localized odors. These odors would be temporary and are not likely to be noticeable for extended periods of time beyond the project site. Additionally, the proposed uses that would be developed

within the project site are not expected to produce any offensive odors that would result in frequent odor complaints.

Greenhouse Gas Emissions

Generate Greenhouse Gas Emissions

As discussed above, a project would have a less than significant impact related to GHG emissions if it would include the project design elements related to natural gas, energy, VMT, and electric vehicles or if it would be consistent with a local GHG reduction strategy that meets the criteria under *State CEQA Guidelines* Section 15183.5(b). The City's CAP does not meet these requirements. Therefore, this section evaluates the proposed project's consistency with the BAAQMD's project design elements.

Natural Gas Usage. According to the BAAQMD, a less than significant GHG impact would occur if the project does not include natural gas appliances or natural gas plumbing. As discussed in the Project Description, the proposed project would be all-electric and would not include natural gas. Since the proposed project would not include natural gas, the proposed project would be consistent with this design element.

Energy Usage. The project must not result in any wasteful, inefficient, or unnecessary energy usage as determined by the analysis required under Section 21100(b)(3) and Section 15126.2(b) of the *State CEQA Guidelines*. Energy use consumed by the proposed project would be associated with electricity consumption associated with the project. Energy consumption was estimated for the project using default energy intensities by land use type in the CalEEMod output, which is included in Attachment A.

Based on CalEEMod, the estimated potential increased electricity demand associated with the proposed project is 373,089 kilowatt-hours (kWh) per year. Total electricity consumption in Alameda County consumed 10,247 GWh or 10,247,410,444 kWh.[1] Therefore, electricity demand associated with the proposed project would be less than 0.1 percent of Alameda County's total electricity demand. Therefore, operation of the proposed project would increase the annual electricity consumption in Alameda County by less than 0.01 percent.

The proposed project would include solar and would be constructed to current Title 24 standards, which would require energy-saving building features. As such, based on this analysis, as required under CEQA Section 21100(b)(3) and Section 15126.2(b) of the *State CEQA Guidelines*, the proposed project would not result in the wasteful, inefficient, or unnecessary consumption of fuel or energy and would incorporate renewable energy and energy efficiency measures into the building design, equipment use, and transportation. As such, the proposed project would be consistent with this design element.

[1] California Energy Commission (CEC). 2021. Energy Consumption Data Management Service. Electricity Consumption by County. Website: www.ecdms.energy.ca.gov/elecbycounty.aspx (accessed October 2022).

Vehicle Miles Traveled. To meet the BAAQMD's VMT threshold, the project must achieve a reduction in project-generated VMT below the regional average consistent with the current version of the California Climate Change Scoping Plan or meet a locally adopted SB 743 VMT target, reflecting the recommendations provided in the Governor's Office of Planning and Research's (OPR) 2018 *Technical Advisory on Evaluating Transportation Impacts in CEQA*. Based on the project's Vehicle Miles Traveled Analysis[1], the project would have a less than significant VMT impact if the project's VMT would be 15 percent below the City's average residential VMT. The existing base year per capita VMT in the project area is 23.24. With the proposed project, the average daily VMT per resident results in a VMT per capita of 18.43, a decrease of 4.81. Since 18.43 is lower than the 85 percent threshold of 19.21, the proposed project would have a less than significant VMT impact. As such, the proposed project would be consistent with this design element.

Electric Vehicle Requirements. This criterion requires that the project achieve compliance with off-street electric vehicle requirements in the most recently adopted version of the California Green Buildings Standards Code (CALGreen) Tier 2 measures. It is not yet known whether the proposed project would include electric vehicle charging; therefore, implementation of Mitigation Measure GHG-1 would be required to ensure the proposed project would provide electric vehicle charging. With implementation of Mitigation Measure GHG-1, the proposed project would be consistent with this design element.

Mitigation Measure GHG-1 The project applicant shall provide a minimum of 10 percent of the parking spaces as electric vehicle (EV) charging stations as part of the final project design, to be consistent with current California Green Buildings Standards Code (CALGreen) Tier 2 standards. The final design including these revisions shall be incorporated.

With implementation of Mitigation Measure GHG-1, the proposed project would be consistent with the BAAQMD's project design elements related to natural gas, energy, VMT and electric vehicles. Therefore, the proposed project would be consistent with the BAAQMD's GHG emission thresholds. As such, the proposed project would not result in the generation of GHG emissions would have a significant impact on the environment.

Consistency with Greenhouse Gas Reduction Plans

As discussed above, the City of Newark has prepared a CAP which outlines the City's proposed approach to reduce GHG emissions. The CAP includes a roadmap for implementing new polices, programs, incentives, requirements, projects, and initiatives in the immediate future, as well as longer-term actions that will need to be studied further while monitoring how the climate continues to change and evaluating the effectiveness of actions taken. The CAP includes action items to be implemented by the City, individual residential households, and businesses. Since the CAP action items are applicable to residential households, such as preparing personal climate action plans, they would not be applicable to the proposed project.

[1] TJKM, 2022. *Cedar Townhomes VMT Analysis Memo.* October 14.

Therefore, the proposed project was analyzed for consistency with the goals of the 2017 Scoping Plan, EO B-30-15, SB 32, and AB 197.

EO B-30-15 added the immediate target of reducing GHG emissions to 40 percent below 1990 levels by 2030. CARB released the 2017 Scoping Plan,[1] to reflect the 2030 target set by EO B-30-15 and codified by SB 32. SB 32 affirms the importance of addressing climate change by codifying into statute the GHG emissions reductions target of at least 40 percent below 1990 levels by 2030 contained in EO B-30-15. SB 32 builds on AB 32 and keeps us on the path toward achieving the State's 2050 objective of reducing emissions to 80 percent below 1990 levels. The companion bill to SB 32, AB 197, provides additional direction to the CARB related to the adoption of strategies to reduce GHG emissions. Additional direction in AB 197 intended to provide easier public access to air emissions data that are collected by CARB was posted in December 2016.

The Draft 2022 Scoping Plan Update[2] assesses progress toward the statutory 2030 target, while laying out a path to achieving carbon neutrality no later than 2045. The 2022 Scoping Plan Update focuses on outcomes needed to achieve carbon neutrality by assessing paths for clean technology, energy deployment, natural and working lands, and others, and is designed to meet the State's long-term climate objectives and support a range of economic, environmental, energy security, environmental justice, and public health priorities.

As identified above, the 2017 Scoping Plan contains GHG reduction measures that work towards reducing GHG emissions, consistent with the targets set by EO B-30-15 and codified by SB 32 and AB 197. The measures applicable to the proposed project include energy efficiency measures, water conservation and efficiency measures, and transportation and motor vehicle measures, as discussed below.

Energy efficient measures are intended to maximize energy efficiency building and appliance standards, pursue additional efficiency efforts, including new technologies and new policy and implementation mechanisms, and pursue comparable investment in energy efficiency from all retail providers of electricity in California. In addition, these measures are designed to expand the use of green building practices to reduce the carbon footprint of California's new and existing inventory of buildings. The proposed project would be required to comply with the latest Title 24 standards of the California Code of Regulations, regarding energy conservation and green building standards. In addition, the proposed project would be all-electric and would not include natural gas and would include solar. Therefore, the proposed project would comply with applicable energy measures.

Water conservation and efficiency measures are intended to continue efficiency programs and use cleaner energy sources to move and treat water. Increasing the efficiency of water transport and reducing water use would reduce GHG emissions. As noted above, the project would be required to comply with the latest Title 24 standards of the California Code of Regulations, which include a variety of different measures, including reduction of wastewater and water use. In addition, the proposed project would include low flow fixtures, drought tolerant landscaping, and non-potable

1 CARB. 2017. *California's 2017 Climate Change Scoping Plan*. November.

2 CARB. 2021. op. cit.

common area irrigation water. Therefore, the proposed project would not conflict with any of the water conservation and efficiency measures.

The goal of transportation and motor vehicle measures is to develop regional GHG emissions reduction targets for passenger vehicles. Specific regional emission targets for transportation emissions would not directly apply to the proposed project. The second phase of Pavley standards will reduce GHG emissions from new cars by 34 percent from 2016 levels by 2025, resulting in a 3 percent decrease in average vehicle emissions for all vehicles by 2020. Vehicles traveling to the project site would comply with the Pavley II (LEV III) Advanced Clean Cars Program. Therefore, the proposed project would not conflict with the identified transportation and motor vehicle measures.

Therefore, the proposed project would comply with existing State regulations adopted to achieve the overall GHG emissions reduction goals identified in the 2017 Scoping Plan, EO B-30-15, SB 32, and AB 197 and would be consistent with applicable plans and programs designed to reduce GHG emissions. Therefore, the proposed project would not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of GHGs.

CONCLUSION

Based on the analysis presented above, with implementation of Mitigation Measure AIR-1, construction of the proposed project would not result in the generation of criteria air pollutants that would exceed BAAQMD thresholds of significance. Operational emissions associated with the proposed project would also not exceed BAAQMD established significance thresholds. With implementation of Mitigation Measures AIR-2 and AIR-3, the proposed project is not expected to expose sensitive receptors to substantial pollutant concentrations. The proposed project would also not result in objectionable odors affecting a substantial number of people. In addition, with implementation of Mitigation Measure GHG-1, the project would not result in the emission of substantial GHG emissions. Additionally, the project would not conflict with the State's GHG emissions reductions objectives embodied in EO B-30-15, SB 32, and AB 197. Therefore, the proposed project's incremental contribution to cumulative GHG emissions would not be cumulatively considerable.

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - total project site of 3.72 acres. Project would include 152 garage parking spaces and 38 surface parking spaces.

Construction Phase - Project construction would begin the fourth quarter of 2023 and would end in 2024. This analysis assumes default construction durations.

Off-road Equipment - Default

Demolition - The proposed project would demolish the existing onsite buildings totaling 34,219 sf.

Grading - Assuming a balanced site.

Vehicle Trips - The trip rate is based on the trip generation analysis prepared for the proposed project.

Energy Use - The proposed project would not include natural gas.

Construction Off-road Equipment Mitigation - Assuming compliance with BAAQMD Basic Construction Mitigation Measures and the use of Tier 3 construction equipment.

Cedar Townhomes - Alameda County, Annual

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Not Applied

Water Mitigation - The proposed project would install low-flow fixtures, drought-tolerant landscaping, and water-efficient irrigation.

Woodstoves - Assuming no woodstoves or fireplaces as the project would be all-electric.

Area Mitigation - Assuming no woodstoves or fireplaces as the project would be all-electric.

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	63
Climate Zone	5			**Operational Year**	2024
Utility Company	Pacific Gas and Electric Company				
CO2 Intensity (lb/MWhr)	203.98	**CH4 Intensity (lb/MWhr)**	0.033	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - total project site of 3.72 acres. Project would include 152 garage parking spaces and 38 surface parking spaces.

Construction Phase - Project construction would begin the fourth quarter of 2023 and would end in 2024. This analysis assumes default construction durations.

Off-road Equipment - Default

Demolition - The proposed project would demolish the existing onsite buildings totaling 34,219 sf.

Grading - Assuming a balanced site.

Vehicle Trips - The trip rate is based on the trip generation analysis prepared for the proposed project.

Energy Use - The proposed project would not include natural gas.

Construction Off-road Equipment Mitigation - Assuming compliance with BAAQMD Basic Construction Mitigation Measures and the use of Tier 3 construction equipment.

Cedar Townhomes - Alameda County, Summer

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Not Applied

Water Mitigation - The proposed project would install low-flow fixtures, drought-tolerant landscaping, and water-efficient irrigation.

Woodstoves - Assuming no woodstoves or fireplaces as the project would be all-electric.

Area Mitigation - Assuming no woodstoves or fireplaces as the project would be all-electric.

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - total project site of 3.72 acres. Project would include 152 garage parking spaces and 38 surface parking spaces.

Construction Phase - Project construction would begin the fourth quarter of 2023 and would end in 2024. This analysis assumes default construction durations.

Off-road Equipment - Default

Demolition - The proposed project would demolish the existing onsite buildings totaling 34,219 sf.

Grading - Assuming a balanced site.

Vehicle Trips - The trip rate is based on the trip generation analysis prepared for the proposed project.

Energy Use - The proposed project would not include natural gas.

Construction Off-road Equipment Mitigation - Assuming compliance with BAAQMD Basic Construction Mitigation Measures and the use of Tier 3 construction equipment.

Cedar Townhomes - Alameda County, Winter

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Not Applied

Water Mitigation - The proposed project would install low-flow fixtures, drought-tolerant landscaping, and water-efficient irrigation.

Woodstoves - Assuming no woodstoves or fireplaces as the project would be all-electric.

Area Mitigation - Assuming no woodstoves or fireplaces as the project would be all-electric.

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	38.00	Space	0.34	15,200.00	0
City Park	0.48	Acre	0.48	20,908.80	0
Condo/Townhouse	76.00	Dwelling Unit	2.90	76,000.00	217

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	63
Climate Zone	5			**Operational Year**	2024
Utility Company	Pacific Gas and Electric Company				
CO2 Intensity (lb/MWhr)	203.98	**CH4 Intensity (lb/MWhr)**	0.033	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - total project site of 3.72 acres. Project would include 152 garage parking spaces and 38 surface parking spaces.

Construction Phase - Project construction would begin the fourth quarter of 2023 and would end in 2024. This analysis assumes default construction durations.

Off-road Equipment - Default

Demolition - The proposed project would demolish the existing onsite buildings totaling 34,219 sf.

Grading - Assuming a balanced site.

Vehicle Trips - The trip rate is based on the trip generation analysis prepared for the proposed project.

Energy Use - The proposed project would not include natural gas.

Construction Off-road Equipment Mitigation - Assuming compliance with BAAQMD Basic Construction Mitigation Measures and the use of Tier 3 construction equipment and level 3 diesel particulate filters.

Cedar Townhomes - Mitigated - Alameda County, Annual

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Not Applied

Water Mitigation - The proposed project would install low-flow fixtures, drought-tolerant landscaping, and water-efficient irrigation.

Woodstoves - Assuming no woodstoves or fireplaces as the project would be all-electric.

Area Mitigation - Assuming no woodstoves or fireplaces as the project would be all-electric.

Re Historic Resource Evaluation for 38600 Cedar Blvd., Newark, CA

Dear Caden,

This letter and the attached Department of Parks and Recreation (DPR) 523 forms comprise an Historic Resource Evaluation (HRE) for the property at 38600 Cedar Blvd., Newark, Alameda County, California. The property is composed of two parcels currently occupied by Pape Machinery. The subject parcel includes two buildings, both constructed in 1962. The neighboring property to the northwest is occupied by one building that was constructed in 1979. As a result, it is not evaluated here as it is not yet 50 years of age, the threshold by which a property may typically be considered a historic resource if it is significant and also retains integrity.

Purpose
This HRE was undertaken to establish the historic significance of the buildings at 38600 Cedar Blvd. in Newark. If found to be historic resources under the National Register Criteria for Evaluation, the California Eligibility Criteria, or the City of Newark criteria for designation, the demolition of the two buildings could be found to have an impact under CEQA. To be eligible for listing in these registers, the buildings would have to be over 50 years of age, be historically significant, and have to retain integrity.

Findings
This HRE finds that, although the subject buildings are over 50 years of age, they are not historically significant under any of the criteria documented in this HRE. They are not found to be part of important events or patterns of local, state or national history. Nor are they significant for an association with people important to local, state or national history. They are not architecturally significant. Nor are they important for their information value (see attached DPR forms for additional information).

Research and field methods
The subject buildings were recorded and documented in photos and field notes on November 3, 2022. The following resources were utilized in documenting the history and architecture of the buildings. Two people were interviewed, the utilities manager on site and the district manager of Pape Machinery. Resources from government offices included building permits from the City of Newark and Assessor Records from the Alameda County Assessor. Information about the City of Newark was obtained from the city's website and standard history texts, including "Newark" by Frank Addiego and "A Brief History of Washington Township" by Phil Holmes, published by the Washington County Museum of Local History on their website. Other online sources include newspaper articles. Architectural background was provided by standard architectural texts (see References) and previous HREs by Diana Painter. Additional information was provided by historic maps and aerial photographs.

Evaluator qualifications
Diana Painter, who undertook preparation of this report, is a qualified architectural historian whose credentials meet the Secretary of the Interior's Professional Qualification Standards in the area of Architectural History (36 CFR Part 61). Ms. Painter holds a PhD in Architecture and has a Master's

Degree in Urban Design/Urban Planning. She has 40 years of professional experience in historic preservation and urban design. She is the owner of Painter Preservation, a full-service historic preservation consulting firm established in Petaluma in 2002. She is listed as an architectural historian on the roster of consultants on file with the California Historical Resource Information System at the University of California, Riverside.

Please do not hesitate to contact me if you have any comments or questions.

Sincerely,

Diana Painter

Location and setting

Pape Machinery, at 38600 Cedar Blvd. is a located on a 40,000 square foot parcel located between the Nimitz Freeway (I-880), which trends northwest to southeast here, and Cedar Blvd., which parallels the freeway to the southwest. It is about one-third of a mile northwest of the intersection of the freeway and Mowry Avenue, which crosses the freeway with an overpass. This is also the location of an interchange, allowing for exiting and accessing the freeway. The closest cross street to the parcel is Moores Avenue, which abuts Cedar Blvd. about where the driveway into the site is located on the southwest side. The lot is occupied by two buildings. **Continued on sheet 2**

***P3a. Description: Continued from sheet 1**

Architectural description – 38600 Cedar Blvd.

The land that Pape Machinery is located on today consists of two parcels. The northwest parcel is .918 acres in size and is occupied by a warehouse. The warehouse was constructed in 1979 and will not be evaluated here, as it is not 50 years of age, which is the typical threshold for a building to be considered a historic resource. The second and subject parcel is 2.63 acres in size and is occupied by two buildings, a garage that is 23,704 square feet in size and a Ranch style office that is 1,984 square feet in size. Both were constructed in 1962. The building with the residential appearance was constructed as an office for the adjacent shop and warehouse.

The area in which the buildings are located exhibits a wide variety of land uses. Many of the parcels paralleling the freeway on the southwest side are occupied with industrial uses, often in similar metal buildings. These are slowly giving way to housing developments. For example, a large parcel to the southeast of the subject parcel was redeveloped from industrial buildings to apartment dwellings some time between 2016 and 2018. Nearby, single-family neighborhoods were developed in the 1960s. Newer, more intensive residential development is recent. A large shopping mall called Newpark, with structured and surface parking, is located in the south-southeast quadrant of the intersection of the freeway and Mowry Avenue. Other commercial development and a high school is located south of the ring road encircling the mall. Additional commercial development is located in the north-northwest and north-northeast quadrants of the intersection of the interchange. Numerous motels are located in the area as well. The subject lot is zoned for medium density residential uses.

Architecture - garage

Overview. The garage is occupied by several uses, including offices and the garage portion of the building, which is dominated by craneways, which are the beams on which a crane trolley travels. The L-shaped building is one story in height, with mezzanines in the central portion of Wing C that are occupied by offices or former offices and a library with repair manuals. The main entrance to the building faces west (northwest), toward the lot line between this parcel and the neighboring parcel to the northwest, which is occupied by the 1979 warehouse. The building itself has at least three component parts. A portion with a shallow gable is located on the west side of the building, with its ridgeline oriented largely north-south (Wing A). This portion of the building has the lowest roof and contains the main entrance. A high corrugated metal wall with a metal coping which encloses HVAC equipment is located on the east side of the roof. Two parallel components of the building on the east side have gable ridgelines oriented west to east. The southerly gabled building (Wing C) has a moderately sloped gable roof. The northerly building (Wing B) has a low pitched gable but is a taller building. According to the utilities manager Manny Quintalla, this is necessary due to the larger equipment that the business services here. A shallow enclosure with a shed roof on the south side of the building is used for hazardous materials storage. Steel I-beams in multiple bays frame the building. The beams supporting the roofs are symmetrical, while the vertical beams are tapered, with the smaller dimension located closest to the ground. The building is clad in corrugated metal and the foundation is slab concrete. The roof is clad in metal as well, with corrugated fiberglass panels for additional light. It is a utilitarian building.

Figure 1: Key map

Wing A – west facade: This wing of the building faces the interior of the lot and contains the main building entrance to the offices. These offices came into use when the Horton building, as the Ranch house building is known, was no longer used for offices after Pape Machinery located here. The main entry is composed of a double entry door with full height glass topped by a transom window. To its left is a tall, paired fixed light over a bulkhead that is a solid brown panel. Above the door and these two windows are three solid panels that extend to the narrow building eaves, the one over the door having "Pape Machinery" spelled out. Frames are anodized aluminum. A low concrete pad fronts this ensemble. To the right of the doorway is a one-over-one-light window, the upper light being fixed and the lower one being a hopper window. The bulkhead and transom here are solid panels of the same proportions as seen on the entry ensemble. There are two additional windows of the same design to the left. To the left of these windows are three similarly proportioned windows that do not display the same black anodized aluminum frames as the central windows and instead match the color of the corrugated metal siding of the building. On the right side of this façade is a metal pedestrian door with a small light in the upper

portion and a large solid panel that appears to have been an overhead door at one time. Above the eaves on this façade the corrugated metal enclosure that screens the HVAC units is visible.

North façade: The north façade of this wing displays a wall of glazing that is composed of a bank of tall windows over solid bulkheads. Above the windows are solid panels, under deep open eaves. This façade is fronted by foundation plantings and a narrow sidewalk. It faces out onto a yard that is used for parking equipment. Beyond that is the freeway, separated from the yard by tall shrubs.

East façade: The east façade of the wing faces a work area that is defined by the L-formation of Wings A and B. There is one window on this façade of the same design as those seen on the west façade of Wing A. There are otherwise three metal pedestrian doors on this façade under narrow eaves. There are no other openings on this façade.

Wing B - north façade: The north façade of Wing B forms the other side of the work yard that is defined in part by Wing A. Wing B is the tallest wing on the site and has no eave overhang. It is composed of seven very large overhead metal doors with narrow ribs. Above the doors are three signs displaying the equipment brands that the company services, plus one said that says “We Service All Makes.” A small, six-light window is located on the far north end of this façade.

East façade: There are no openings on the east façade of this building. The bottom portion is clad in corrugated metal siding with wide proportions, while the cladding above the eave line has narrow corrugations. There is no eave overhang.

Wing C – south façade: The south façade of Wing C has four large overhead doors on the southeast end similar in design as those seen on Wing B. They extend to under the narrow eave line because this wing is shorter than Wing B. Toward the west end is a doorway to a projecting addition with a shed roof that is used to store hazardous materials. There are four entry doors on this addition. To its left is a two-light sliding window with an aluminum frame. Also visible on this façade is the south end façade of Wing A. This displays one overhead garage door near the southwest corner.

East façade*:* The east façade of Wing C has no openings. Like the east façade of Wing B, which it is adjacent to, it has wide corrugated metal cladding on the lower portion and narrower cladding on the upper portion, extending to narrow eaves.

Changes over time: All three wings of the 1962 building were in place in 1965; it is not known whether construction was phased (UCSB Library Geospatial Collection). The HVAC roof screen on Wing A was added in 2005.

Interiors: The interior of Wing A is made up of enclosed offices and cubicles. Rooms are used for offices and conference rooms. There is a receptionist counter at the entry and a parts counter on the south side of this wing. A hall with a door to the service area is located on the back, east wall in the southeast corner and a hall with a door to the training center is located on the east wall in the northeast corner. Also present in this area are restrooms and coffee stations. This wing is finished in sheet rock with interior cubical partitions, a dropped ceiling, fluorescent lighting, and linoleum floors.

Two major craneways are located within Wings B and C, both oriented east-west, or down the length of the buildings. The cranes are attached to longitudinal beams that are in turn mounted on the steel ceiling rafters. Numerous types of pneumatic equipment are operated in each bay. The bays between the two buildings are largely open, allowing passage from one side to the other. Toward the west end of Wing C are offices and restrooms. At the mezzanine level, up a flight of 14 steps, is a library that is open to the floor and a former enclosed office. Finishes here are primarily the corrugated metal of the building

exteriors and wood-framing and plywood in the portion with offices. The fluorescent lighting is augmented by corrugated fiberglass panels on the ceiling. Floors are concrete. Changes to the garage interior are unknown.

Architecture – Ranch house

Ranch house (former office): The Ranch house is so-called because of the style of the building. It also referred to as the Horton building, after its former owner. The one-story building has a rectangular footprint and is composed of very shallow-pitched cross hip and gable roofs with gables facing west and north, towards the freeway. The fascia on the roofs is wide, covering boxed eaves. The west-facing façade contains the main entry to the building; it is oriented toward the interior of the lot and the main driveway into the parcel. The wood-frame building is finished in stucco with stone cladding at the entry and horizontal wood under the gable ends, with a composition shingle roof (formerly with a rock finish) and a concrete slab foundation. Like the garage building, it was constructed in 1962,

Front (west) façade: The front façade displays a shallow projection that contains the main entry and is clad in stone from the building base to the eaves. The eaves are formed by a shallow pent roof under a slightly pitched gable roof. The entry door is in a recessed alcove on the west face. It features an original starburst detail on the door knob. To its left, within the projection, is a four-light window with aluminum frames. At the base of this portion of the building vents are built into the stone cladding. To the left are two, three-part fixed and casement windows with aluminum frames. A low, stone planter fronts this portion of the building.

South façade: The south façade displays four, two-part sliding windows in aluminum frames.
Rear (east) façade: The rear façade displays one, three-part fixed and casement window and two two-part sliding windows, all with aluminum frames. There are two flush doors on this façade.

North façade: The north façade has two, two-part sliding windows with aluminum frames under a gable end.

Interiors: Access was not available to this building, so interior features are unknown.

Site features

The main driveway into the site is located to the west of the Ranch house. The driveway is not differentiated from the rest of the site (including the parcel to the west), which is finished in asphalt and concrete. The large open spaces on the parcel(s) are used for equipment parking, employee parking, and outdoor work space.

Features on the site include two tall signs, one on the freeway, which is composed of a large pylon with the word “Pape” on it, and a pole sign, on the Cedar Blvd. side that spells out “Pape Machinery.” An additional sign on the garage also spells out “Pape Machinery.” Freestanding directional signage is located at the west-southwest corner of the Ranch building.

Additional features include a freestanding concrete ramp on the south side of the yard. Fencing includes a concrete masonry unit wall on the east side of the parcel and chain link fencing with barbed wire on the Cedar Blvd. side of the site and the west side of these two parcels. The site is separated from the freeway with a guard rail and landscaping. There are also storage tanks on the site.

HISTORIC CONTEXT
Continued from sheet 2

Introduction

Newark is surrounded on three sides by the city of Fremont; the fourth, or south side, is close to abutting San Francisco Bay within the Don Edwards San Francisco Bay National Wildlife Refuge, which is managed by the U.S. Fish & Wildlife Service. The city is bounded on the north-northeast side by Interstate 880 and on the northwest side by Route 84, which continues as the Dumbarton Bridge to Menlo Park in San Mateo County. The southeast side is bounded by Stevenson Blvd. on the northeast side. The city, which was incorporated in 1955, occupies over 13.9 square miles (*Google Maps*).

Newark is within Alameda County, whose county seat is Oakland. It is part of a large swath of suburban development that stretches from Richmond along the east side of San Francisco Bay to as far south as Milpitas. It is within what is called the Tri-Cities area, which includes Union City, Fremont and Newark. Between the bay and the Nimitz Freeway or I-880, much of the development around the bay preserves is composed of commercial and light industrial uses, although the stretch between Cedar Blvd. and I-880 is in the process of being redeveloped for mid-rise housing.

The City of Newark

The following establishes a brief history of the area in which the city of Newark is located today.

The 14th mission in California's mission system, Mission San Jose, was established under Spanish rule in 1797 by Padre Presidente Fermin Francisco de Lasuen. Under the mission system, the Ohlone people of this area were converted to Catholicism and became farmers, herders, laborers, and craftsmen, making Mission San Jose a prosperous center boasting a population high of 1,877 people in 1831 (Kyle 2004:7). After Mexico gained its independence from Spain in 1822, California came under the control of the Mexican government. Historically the area in which Newark is located today was within the three-square-league Rancho Potrero de los Cerritos, a grant made in 1844. Ex-Mission San Jose, a tract of 28.33 acres that was just five miles from what became Newark, was patented in 1858 (Shumway, 2007:14). The missions in California were secularized between 1834 and 1836.

The Rancho era is associated with Mexican rule, when the larger region was used primarily for raising cattle for tallow and hides. The termination of the Mexican-American war in 1848 brought California under American control. It was followed in 1949 by the Gold Rush in California; California became a state in 1850. Settlement by Euro-American settlers in Alameda County and Washington County began in earnest at that time and the area was converted from ranching to farming grain and vegetables. Taking advantage of its location on the water, warehouses, landings and wharfs were built to store and ship farm goods to the rapidly growing San Francisco. Ex-Mission San Jose itself become a commercial center, with occupation of the mission and the buildings around it.

The neighboring counties of Santa Clara County and Contra Cost County formed in 1850 but Alameda County, which was carved out of the other two, was established in 1853 (*County of Alameda, CA,* acgov.org). Newark was part of Washington Township, which was also established in 1853 and was made up of eight small towns located in the southern portion of Alameda County: Alvarado (now Union City), Newark, Niles, Centerville, Irvington, Mission San Jose, and Warm Springs (now Fremont). In 1878 the land upon which Newark and other portions of Washington Township were located was purchased by the Pacific Land Investment Company, which named the area Newark (Addiego, 2015:10).

Newark was originally known for its industry. The marshland on which Newark was founded attracted salt companies, which established their factories near the town's salt resources. Smaller companies eventually consolidated and formed the Arden Salt Company, which later became Leslie Salt Company and is Cargill Salt today. Another company that boosted Newark's industrial presence was the Graham

Figure 6: Alameda County and Washington Township in 1878

Manufacturing Company, a metalworks. Newark was also known for a foundry that later manufactured Wedgewood stoves (Holmes, "A Brief History of Washington Township").

Newark was well served by railroads. The South Pacific Coast Railroad, incorporated in 1876 with headquarters in Newark, would eventually extend from Santa Cruz to the town of Alameda, with a ferry connection via the *Newark* to San Francisco. The railroad had a station, roundhouse and railroad shop near the center of Newark in the area between Thornton Avenue, Sycamore Street, and Carter Avenue (City of Newark , http://newark.org/visitors/about-newark-history). The Carter Railroad also served Newark, where they had a manufacturing facility.

The Dumbarton Bridge attracted new settlers to Newark and Fremont from San Mateo County. The Dumbarton Bridge was the first vehicular bridge to cross San Francisco Bay. It was originally constructed in 1927; a new bridge replaced it in 1982. Previously the Dumbarton Rail Bridge was constructed just south of today's vehicular bridge in 1910. It has not been in use since 1981 (Addiego, 2015:9.)

A 1939 aerial photograph shows that for the most part Newark still retained extensive farmlands and orchards at that time, in addition to its industrial uses. Grain farmlands had shifted to orchards and diverse agriculture, including tomatoes, in the early 20th century. The canning industry grew as well, which

had been facilitated by the coming of the railroads to Washington Township in 1869. Poultry farms and the dairy industry also became a presence.

The vineyards were wiped out by disease about 1900, followed by the Prohibition. There was a further impact to agriculture when the water table dropped and it became necessary to irrigate crops (Holmes, “A

Figure 7: Portion of Newark in 1939, showing subject site in red

Source: UCSB Library Geospatial Collection

Brief History of Washington County"). Nonetheless, the Great Depression brought new residents to the area to work in the factories, and residential areas were developed on orchard lands (TreanorHL, 2022:8).

Author Phil Holmes describes the impact that World War II had on Newark and the surrounding area:

> *Pearl Harbor changed everything for everybody. Many young men and women scattered around the world to fight the war. People of all ages worked in defense industries or on the farms. Life in Washington Township was filled with blackouts, Red Cross and defense programs, bond and scrap drives, price ceilings, restrictions, shortages, rationing, air raid signals, enlistments, draft calls, separations, and sad telegrams . . . All development that was not part of the war effort was postponed (Holmes, "A Brief History of Washington County").*

The Japanese of Newark and the surrounding areas were evacuated during World War II and held in internment camps, as Washington Township was within the 100-mile evacuation zone in which it was felt that both Japanese and Japanese-Americans were a threat to national security. This affected approximately 550 people in Washington County, many of whom worked in the saltworks or were farmers, in 1942, when Executive Order 9066 was issued by President Theodore Roosevelt (Helfman, 1994).

In the post-World War II era Washington Township grew to a population of about 25,000 people, governed by Alameda County. Construction began on the Nimitz Freeway in 1947, which replaced SR 17 through the East Bay. It was completed in 1857, extending almost the entire length of the east shore of San Francisco Bay. This kicked off a period of urbanization, replacing the prominence of agriculture in Washington County. An often-repeated story is about Newark's drive to become an independent city, rather than part of what became Fremont, which incorporated Niles, Ex-Mission San Jose, Centerville, Irvington, and Warm Springs into the new city in 1956. Incorporation of Newark occurred in 1955, when it was still a very small town. Among the issues that concerned the community was that it did not want to be relegated to being a center for industry and affordable housing and, because it was on low-lying land, flood control (Addiego, 2015:26).

A 1965 aerial photograph shows the city still under development on the southwest side of the I-880, while its neighbor Fremont on the northeast side of the Nimitz Freeway was densely developed with single family residential development at this time (UCSB Library Geospatial Collection). The population of Washington Township as a whole grew from about 20,000 in 1950 to 100,000 in 1970 (Washington Township Museum of Local History). The Newark City Hall was built in 1966 and the city continued to attract residential growth in the 1960s and 1970s. Technology companies are also part of the city's employment base today, including Sun Microsystems (now known as the Pacific Research Center) and Logitech (Addiego, 2015:8). Today the population of Newark is 47,529 people.

THE BUSINESSES

International Harvester

The site at 38600 Cedar Blvd. was an International Harvester dealer since 1963 that dealt in construction equipment sales and service, parts support, and rentals. Ads from the early 1970s show that they also handled International Harvester Scouts and Travelalls (like Sports Utility Vehicles), pickups, and dump trucks. John R. Horton managed the business in its early years. He bought the company, which was called the International Construction Equipment Sales and Service branch, in 1975 and renamed it Horton Equipment, Inc. ("IH Branch Sold To Ex-Manager," June 25, 1975:46). At the time he purchased the business, it had about 35 employees.

Figure 9: Advertisement for International Harvester at the site from 1973

Source: The Argus Sun, November 4, 1973

Horton Equipment and Empire Tractor

Horton opened a second facility in Reno, Nevada in 1980, prompted by the growth in construction and mining there. In 1981 Horton changed the name of the business to Empire Tractor and Equipment Company. A fictitious business statement showed that he had three additional partners at that time, one in Castro Valley and two in Louisiana, under a general partnership. Empire Tractor was sold by Horton to Pape Machinery in 1983-84. At the time his business handled Michigan and Hough loaders, neither of which are manufactured today, according to the utilities manager Manny Quintalla at Pape Machinery (personal communication, November 3, 2022).

Pape Machinery Construction & Forestry

Pape Machinery moved to 38600 Cedar Blvd. in 1983-84 from their previous site on Meekland Avenue in Hayward. The Pape Group, whose formal name is Pape Machinery Construction & Forestry, was formed in 1938 by E.C. Pape in the Willamette Valley when he bought Slate Tractor, an Allis-Chalmers dealer. When E.C. Pape died in 1945, his wife Hazel took over the business until his two sons Dean and Ed returned from service in World War II and took over the company. In 1952 they had stores in Roseburg and Coos Bay and renamed the company Pape Bros Inc. In 1956 they bought a Caterpillar dealership. In the 1960s and 1970s the company continued to expand, buying additional businesses and specializing in service to the timber and agricultural industries.

In 1981 Randy Pape, representing the third generation of the family, took over as president of the business. In 1986 they bought Flightcraft and became a Beechcraft airplane dealer. In 1990 they renamed the company The Pape Group and acquired Hyster Forklift. In the 1990s they would expand to include divisions in northern California, as well as Washington and Oregon. In the 2000s they became Pape Machinery. They also acquired their first Kenworth dealership. The company has continued to expand, acquiring companies and capabilities and today have six divisions. The company has branches throughout the west, including Alaska and Hawaii, in more than 140 locations and is managed by the fourth generation of the family. The various companies under the umbrella of the Pape Group specialize in construction, logging, material handling, landscaping, trenching, farm equipment, semi-trucks and warehouses. While they sell and service a number of equipment lines, they specialize in John Deere (https://www.papemachinery.com/).

ARCHITECTURAL CONTEXT

Corrugated metal buildings

Corrugated metal buildings have a long history in California. Prefabricated buildings, including metal-clad buildings, were shipped to California as early as the early nineteenth century (adapted from Painter, 2004). The Gold Rush created a huge demand for prefabricated buildings. Corrugated iron structures were prefabricated in Europe – including England, Belgium and France - and Asia and shipped to San Francisco to serve a variety of purposes in the booming community. In San Francisco, even the 1849 Trinity Episcopal Church and the 1852 Methodist-Episcopal Church were clad in corrugated iron (Kirker, 1986:Plate 16).

E. T. Bellhouse of Manchester and John Walker of London represented two of the English companies that supplied corrugated iron buildings to San Francisco. In 1849 it was estimated that there were forty imported sheet-metal buildings in the San Francisco Bay Area from England and seventy-five from Canton (Kirker, 1986:38). Initially, it was thought that the iron-clad buildings would be fireproof. This was proven a false assumption, as noted below:

> *. . . . British speculators who created them thought that such shelters were the perfect solution for an incendiary Gold-Rush town. They were wrong. During the fire of May 1850, the owner of one of the buildings took refuge with some friends in his iron warehouse. The poor, doomed souls discovered that the increasing heat had stuck the iron doors together, and the 'fire-proof' building melted like chocolate around them (Alexander, 2002:30).*

Once local sawmills and planing mills were developed in the Bay Area the need to import prefabricated buildings was reduced. By the end of the 1860s, it was estimated that 90 percent of the buildings in San Francisco and almost all buildings in rural areas were wood-frame construction, much of it redwood (Kirker, 1986:59). One of the earliest planing mills in the Bay Area was constructed in Corte Madera in 1851, although California's first steam-powered sawmill was constructed by John Cooper near the Russian River in 1834, and John Reed's water-powered sawmill was established in Mill Valley in 1836 (Alexander, 2002:30).

In general, both corrugated iron and steel became increasingly popular for agricultural, light industrial and warehouse buildings in the twentieth century (Kidder, 1921). The *Architects & Builders Handbook* of 1921 noted that iron and galvanized steel were both used extensively in building. Builders and suppliers, plan books, and organizations such as the United States Department of Agriculture and University of California Experimental Station promoted the use of corrugated metal. Through the 1930s and 1940s however, both wood (usually board-and-batten) and metal cladding continued to be used.

Corrugated metal rather than wood became the favored material for industrial buildings because the buildings were expedient, flexible and practical. There was no illusion that they were fireproof by this time. In World War II great advances were made in the fabrication and use of manufactured buildings and corrugated metal buildings in particular. The most widely-known corrugated metal building developed during World War II was the Quonset hut. It is estimated that 170,000 of these structures were constructed for the war effort by 1946, and many of them returned to the United States afterward, to be re-used for a variety of purposes (Upton, 1998:155). By the 1960s and 1970s, corrugated metal was used exclusively for agricultural, light industrial and warehouse buildings, although the design characteristics of the sheathing have changed over time. This is consistent with the garage and warehouse at 38600 Cedar Blvd., as well as other light industrial buildings in the area (Painter, 2004:1).

The Ranch House

The Ranch house that is on the grounds of the property at 38600 Cedar Blvd. is so-called because it is in the Ranch house style, although it housed an office for Horton Equipment (later Empire Tractor) when it was actively used. Architectural historian Alan Hess defines the character-defining features of the Ranch house in general as follows. It is a one-story house with a low-pitched, gabled or hipped roof, with wide eaves (this building has both hipped and gabled roofs); of general asymmetry with a horizontal emphasis; an open-interior plan blending functional spaces; strong connections to the outside; with informal or rustic materials or details (Hess, 2006:17).

A Ranch house may also have a long shallow at-grade entry porch, redolent of the *corredor* of the traditional Ranch home which inspired it (Hess, 2007:17). In place of this design feature, the building at 38600 Cedar Blvd. has incorporated a long, low planter on the front façade that carries the horizontal line of the building and connection to the outdoors. The deep eaves of the building with the pronounced fascia and horizontal orientation of the windows also reinforces the horizontal lines of the building.

Ranch houses are regarded as emerging from a design aesthetic pioneered in California and the west, inspired by traditional vernacular structures and the design influences of the Bay Area Regional Style architects. Ranch houses became the house style of choice in the post-World War II building boom, and proliferated throughout the United States. Their ubiquity was in part due to the standardized and streamlined building methods that were developed at the same time that the house style was popularized. These methods were developed in the course of providing defense housing and mobilizing for the war, and refined after the war as merchant builders built entire neighborhoods and communities to meet the pent-up housing demand after the war (Painter, 2007:Section 7, Page 8).

Ranch houses can be Contemporary Ranch houses, Rustic Ranch houses, or Character Ranch houses that adopt stylistic characteristics of other styles, such as Spanish Colonial Revival. This building is most closely characterized as a Rustic Ranch due to its use of fieldstone cladding in neutral tones in a mosaic pattern. While the Ranch house at 38600 Cedar Blvd. is not a residence, it may have been built here to blend in with the mid-century residential neighborhoods that were developing around it. This is repeated in the office building at 38370 Cedar Blvd. within the industrial complex to the northwest of this site (TreanorHL, 2002).

REGULATORY CONTEXT AND EVALUATION

The National Register of Historic Places and California Register of Historical Resources

The following is an evaluation of the historic significance of the garage and former office at 38600 Cedar Blvd., with respect to the National Register of Historic Places Criteria for Evaluation for listing in the National Register and the California Register of Historical Resources Eligibility Criteria for listing on the California Register. A resource must meet one or more of the following criteria to be considered a historic resource for purposes of CEQA. It must also be over 50 years of age and retain integrity. Built in 1962, both resources at 38600 Cedar Blvd. are over 50 years of age.

Criteria A & 1:

A: Properties that are associated with events that have made a significant contribution to the broad patterns of our history;

1: It is associated with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the United States;

The garage and former office at 38600 Cedar Blvd. have been associated with Newark's industrial history since their construction in 1962. Throughout the history of the buildings they have serviced, sold, rented, and handled parts for heavy construction equipment. The names of the companies that have operated out of the buildings include International Harvester, Horton Equipment, later re-named Empire Tractor, and Pape Machinery at present, that handles John Deere equipment, among others. While significant companies, research did not reveal that any were strongly associated with Newark's history or were foundational industries in Newark. With the exception of Horton Equipment, they are national chains with many dealers at the state and national level. The buildings are not significant for their association with patterns of national, state or local history in Newark. The buildings are not significant under Criteria A/1.

Criteria B & 2:

B. Properties that are associated with the lives of persons significant in our past;

2. It is associated with the lives of persons important to local, California, or national history;

Research revealed only one individual directly associated with the buildings at 38600 Cedar Blvd., which was John R. Horton. While clearly a successful businessman, research did not confirm that he was important to local, California or national history. The buildings are not significant under Criteria B/2.

Criteria C & 3:

C. Properties that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.

3. It embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of a master, or possesses high artistic values;

The two buildings at 38600 Cedar Blvd. are both very typical buildings and do not represent the distinctive characteristics of a type, period or method of construction. The garage is a steel-frame building with corrugated steel cladding, which is a very common building type for light industrial uses. The office building, which is in the Ranch house style, is also a very common style and is seen throughout the county, state and city. While less commonly used for an office (although there is another Ranch building used as an office to the northwest) a Ranch house style building must be outstanding in design and integrity to meet this criteria. The buildings also do not represent the work of a master or have high artistic value. The buildings are not significant under Criteria C/3.

Criteria D & 4:

D. Properties that have yielded, or may be likely to yield, information important in prehistory or history.

4. It has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California, or the nation.

This criteria typically applies to archaeological sites or sites important for their information potential. This criteria is not applicable to this property.

City of Newark Municipal Code

The City of Newark Municipal Code has a number of guidelines for evaluating and designating historical resources in Chapter 17.20 - Historical Resources of their municipal code

Historical resources shall meet one or more of the following criteria:

A. Historical and cultural considerations:

1. One associated with the life or activities of a person significant in the development of institutions, activities or industries of Newark or Washington Township;

The property is not associated with any person significant in the development of institutions, activities or industries of Newark or Washington Township.

2. One associated with a major group or organization in the history of Newark or Washington Township;

The property is not associated with any major groups or organizations in the history of Newark or Washington Township.

3. One associated with a significant historic event of Newark or Washington Township;

The property is not associated with a significant historic event in Newark or Washington Township.

4. One associated with a major recurring event in the history of Newark or Washington Township such as an annual celebration;

The property is not associated with any major recurring events in the history of Newark or Washington Township.

5. One associated with a past or continuing institution which has contributed substantially to the life of the city;

The property is not associated with any past or continuing institutions that have contributed substantially to the life of the city.

B. Architectural and aesthetic considerations:

1. One of the few of its decade remaining in the city (one of six) and is unique or one of a few remaining examples in the city of a particular architectural style or period;

Constructed in 1962, the utilitarian garage and Ranch house style building are commonly found in Newark and Washington Township. They are not unique.

2. The work of a regionally or nationally famous architect;

Not applicable. No architect was identified for the building.

3. An architectural curiosity or picturesque work of particular artistic merit;

The buildings are very ordinary buildings. They do not represent an architectural curiosity or a picturesque work. Of particular artistic merit.

4. Contains original materials and/or workmanship of merit. Has architectural, structural, or artistic merit. An important or scarce example associated with the architectural and aesthetic character of Newark or of an architecturally and aesthetically distinct or unique neighborhood;

The buildings are not constructed of unique materials or workmanship of merit. They are not important or scarce examples of the architectural or aesthetic character of Newark or in this neighborhood.

In summary, the buildings do not meet any of the provisions provided by the City of Newark to identify and designate local historic resources.

GEOTECHNICAL EXPLORATION

Dear Mr. Proctor:

We prepared this geotechnical report for Waymark Development as outlined in our agreement dated August 12, 2022. We characterized the subsurface conditions at the site to provide the enclosed geotechnical recommendations for design.

From a geotechnical engineering viewpoint, in our opinion, the site is suitable for the proposed residential development, provided the geotechnical recommendations in this report are properly incorporated into the design plans and specifications. The primary geotechnical concerns that could affect development on the site are slope stability, existing fill, groundwater, expansive soil, and liquefaction potential of the site soil.

If you have any questions or comments regarding this report, please call and we will be glad to discuss them with you.

Sincerely,

ENGEO Incorporated

Jerry Chen

1.0 INTRODUCTION

1.1 PURPOSE AND SCOPE

We prepared this geotechnical exploration report for the multi-family residential development at 38600 Cedar Boulevard in Newark, California. We prepared this report as outlined in our proposal revised July 27, 2022. Waymark Development authorized us to conduct the following scope of services.

- Review of existing published documents
- Subsurface field exploration
- Data analysis and conclusions
- Report preparation

This report was prepared for the exclusive use of Waymark Development and their consultants for design of this project. In the event that any changes are made in the character, design or layout of the development, we must be contacted to review the conclusions and recommendations contained in this report to evaluate whether modifications are recommended. This document may not be reproduced in whole or in part by any means whatsoever, nor may it be quoted or excerpted without our express written consent.

1.2 PROJECT LOCATION

The subject site is located in Newark, California and is bounded by the Interstate 880 (Nimitz Freeway) to the northeast, Cedar Boulevard to the southeast, and commercial/industrial developments to the northwest and southeast as shown on Figure 1, the Vicinity Map. The 3.5-acre site consists of two parcels with Assessor's Parcel Numbers (APNs) 92A-2585-12-1 and 92A-2585-31, and is currently occupied by a construction and forestry equipment rental company. Current improvements include three separate single-story structures and pavements that are being used for machinery storage. Figure 2 shows site boundaries, proposed building and pavement areas, and our exploratory locations. An Alameda County drainage channel is located along the western property line of the project site.

1.3 PROJECT DESCRIPTION

Based on the preliminary site plan provided by William Hezmalhalch Architects, Inc. (WHA) dated October 25, 2022, we understand that the new development of the project will consist of the following.

1. Fourteen (14) wood-frame townhome structures with up to three stories in height and contain 76 residential units.
2. Paved streets, parking, and drive lanes.
3. Underground utilities and other infrastructure improvements.
4. Concrete flatwork.

Our report will provide recommendations relating to the above-stated items.

2.0 FINDINGS

2.1 SITE HISTORY

Based on the 1939 aerial photograph, the subject site was originally an agricultural land. Review of historical records indicate that the project site was used for dry farming until the early 1960s. The two existing structures, a warehouse and an office, at the eastern portion of the site were observed in the 1965 aerial photograph. The warehouse near the northwestern property line was shown in the 1979 photograph.

In addition, as shown on a historical topography map (Figure 4) dated 1947 (USGS), a creek, approximately 6 feet deep, was located within the western portion of the project site and ran in a northeast to southwest direction. According to a topography map dated 1959 (USGS), the creek was no longer shown but a creek channel was depicted along the western property line of the site.

2.2 GEOLOGY AND SEISMICITY

2.2.1 Geology

As depicted in Figure 5, regional geologic mapping by Graymer et al. (2006) characterizes the site as underlain by undivided, Pleistocene-age alluvial deposits (Qpa). These deposits are characterized by sand, silt, and gravel deposited in fan, valley fill, terrace or basin environments.

Based on the historical topography maps and aerial photographs, the drainage creek once located along the western portion of the site as shown on Figure 3 was backfilled to create a relatively level area. The fill material within the former drainage course is estimated to be approximately 6 feet thick. The approximately extents and thicknesses of the fill material (Qaf) are estimated based on our field exploration and are shown on Figure 3.

2.2.2 Seismicity

The San Francisco Bay area contains numerous active earthquake faults. Nearby active faults include the (mention the distances to the two closest active faults as a minimum and distances to other major active faults if desired according to the table below). An active fault is defined by the California Geologic Survey as one that has had surface displacement within Holocene time (about the last 11,000 years) (Bryant and Hart, 2007).

The site is not located within a currently designated Alquist-Priolo Earthquake Fault Zone and no known surface expression of active faults is believed to exist within the site. Fault rupture through the site; therefore, is not anticipated.

Numerous small earthquakes occur every year in the San Francisco Bay Region, and larger earthquakes have been recorded and can be expected to occur in the future. Figure 6 shows the approximate locations of these faults and significant historic earthquakes recorded within the San Francisco Bay Region. The Uniform California Earthquake Rupture Forecast (UCERF3) (Field et al., 2015) estimates the 30-year probability for a magnitude 6.7 or greater earthquake in the San Francisco region at approximately 72 percent, considering the known active seismic sources in the region.

To determine nearby active faults that are capable of generating strong seismic ground shaking at the site, we utilized the USGS Unified Hazard Tool* and deaggregated the hazard at a spectral period of 0.3 second for a 2475-year return period, with the resulting faults listed below in Table 2.2.2-1.

TABLE 2.2.2-1: Active Faults Capable of Producing Significant Ground Shaking at the Site (Latitude: 37.5321 **Longitude:** -122.0081**)**

SOURCE	R_{RUP}		MOMENT MAGNITUDE M_W

*USGS Unified Hazard Tool - Edition: Dynamic Conterminous U.S. 2014 (update) (v4.2.0)

2.3 PREVIOUS FIELD EXPLORATION

In 2020, we conducted a preliminary geotechnical exploration by advancing five cone penetration test (CPT) soundings, 1-CPT1 through 1-CPT5 (ENGEO, 2020). The exploration concluded primary concerns at the site included seismically induced settlement and slope stability.

2.4 FIELD EXPLORATION

Our field exploration included drilling three borings (Borings 2-B1 through 2-B3), excavating six test pits (Test Pits 2-TP1 through 2-TP6), and advancing seven cone penetration test (CPT) soundings (3-CPT1 through 3-CPT7) at various locations throughout the site. We performed our field exploration on between August 22 and October 18, 2022.

The location and elevations of our explorations are approximate and were estimated by pacing from features shown on handheld global positioning system (GPS) devices; they should be considered accurate only to the degree implied by the method used.

2.4.1 Borings

We observed the drilling of three borings on August 22 and August 23, 2022, at the locations shown on the Site Plan, Figure 2. An ENGEO representative observed the drilling and logged the subsurface conditions at each location. We retained a truck-mounted drill rig and crew to advance the borings using 4-inch-diameter solid-flight augers and using mud rotary method in depth. The borings were advanced to depths ranging from 26½ to 115 feet below existing grade. We permitted and backfilled the borings in accordance with the requirements of Alameda County Water District

We obtained bulk soil samples from drill cuttings and retrieved both disturbed and relatively undisturbed soil samples at various intervals in the borings using a 3-inch outside diameter (O.D.) split-spoon sampler and a 2½-inch O.D. split-spoon sampler.

The standard penetration resistance blow counts were obtained by dropping a 140-pound hammer through a 30-inch free fall. The split-spoon sampler was driven 18 inches and the number of blows was recorded for each 6 inches of penetration. In addition, 2.5-inch inside diameter (I.D.) samples were obtained using a Modified California Sampler driven into the soil with the 140-pound hammer previously described. Unless otherwise indicated, the blows per foot recorded on the boring log represent the accumulated number of blows to drive the last 1 foot of penetration; the blow counts have not been converted using any correction factors. When sampler driving was difficult, penetration was recorded only as inches penetrated for 50 hammer blows.

The logs depict subsurface conditions at the exploration locations during the exploration; however, subsurface conditions may vary with time. The exploration logs are included in Appendix A.

2.4.2 Test Pits

We observed excavation of six test pits on September 8, 2022, at the locations shown on the Site Plan, Figure 2. An ENGEO representative observed the test pit excavation and logged the subsurface conditions at each location. We retained a rubber-tire backhoe to excavate the test pits using a 2-foot-wide bucket and logged the type, location, and uniformity of the underlying soil/rock. The maximum depth penetrated by the test pits was 11½ feet below existing grades.

We obtained bulk soil samples from the test pits using hand sampling techniques. The test pit logs present descriptions and graphically depict the subsurface conditions encountered.

All test pits were backfilled with minimum compaction effort at the completion of the field exploration. As a result, the test pit backfill should be removed and recompacted during site grading.

The logs depict subsurface conditions at the exploration locations during the exploration; however, subsurface conditions may vary with time. The exploration logs are included in Appendix A.

2.4.3 Cone Penetration Tests

We retained a CPT rig to perform seven soundings on October 18, 2022, to a maximum depth of about 50 feet at the locations as shown on the Site Plan, Figure 2. The CPT has a 20-ton compression-type cone with a 15-square-centimeter (cm^2) base area, an apex angle of 60 degrees, and a friction sleeve with a surface area of 225 cm^2. The cone, connected with a series of rods, is pushed into the ground at a constant rate. Cone readings are taken at approximately 5-cm intervals with a penetration rate of 2 cm per second in accordance with ASTM D-5778. Measurements include the tip resistance to penetration of the cone (Qc), the resistance of the surface sleeve (Fs), and pore pressure (U) (Robertson and Campanella, 1988). CPT logs are presented in Appendix A.

2.5 SURFACE CONDITIONS

The site is relatively flat to slightly sloping ranging from Elevation 31 feet in the southwestern portion of the site to Elevation 34 feet in the northeastern portion of the site (WGS84). As stated previously, the site is currently occupied by three single-story structures and paved areas, which are used for parking and storage of machinery. A 10-foot-high open channel within the Alameda County Flood Control District easement is located along the northwestern portion of the site.

2.6 SUBSURFACE CONDITIONS

In our explorations, we encountered fill material consisting of lean clay to sandy lean clay within the upper 2 to 8 feet below grade. In general, the native soil below the existing fill consists of interbedded layers of medium stiff lean clay and sandy silt, and sand to clayey sand down to a depth of approximately 50 feet below ground surface (bgs). These layers vary across the site and range from approximately 5 to 15 feet thick, with the sand layers generally being thickest at the eastern and western ends of the site and become thinner or diminished at the middle of the site. We encountered very dense sand and gravel at between approximately 50 to 105 feet bgs. The granular deposit was underlain by lean clay with sand down to maximum exploration depth of 115 feet bgs.

The southeastern corner of the site is generally underlain by a thick, loose to medium dense sand layer from below the existing fill to a maximum depth of approximately 35 feet bgs. The approximate lateral extent of this thick sand layer is shown on Figure 2.

Based on the laboratory test results, the near-surface soil has a plasticity index (PI) of 18 and 20, which is an indication that the site soil has a moderate to high expansion potential.

2.7 GROUNDWATER CONDITIONS

Static groundwater is found in our previous and current subsurface explorations. We summarize our findings in the table below.

TABLE 2.7-1: Groundwater Level

EXPLORATION LOCATION (date of exploration)	APPROX. DEPTH TO GROUNDWATER (feet)
1-CPT1 (8/4/2020)	5.2
1-CPT2 (8/4/2020)	12.0
1-SCPT3 (8/4/2020)	11.2
1-CPT4 (8/4/2020)	13.0
1-CPT5 (8/4/2020)	13.3
2-B1 (8/23/2022)	16.0
3-CPT1 (10/18/2022)	12.6
3-CPT2 (10/18/2022)	11.5
3-CPT3 (10/18/2022)	15.1
3-CPT5 (10/18/2022)	14.9
3-CPT6 (10/18/2022)	14.4
3-CPT7 (10/18/2022)	13.8

As required, these exploratory probes were backfilled with approved material from Alameda County Water District on the day of drilling. Some of the field exploration points may not have been left open a sufficient amount of time to allow water levels to stabilize. The groundwater reported for cone penetration test probes is estimated using pore pressure dissipation tests.

Fluctuations in the level of groundwater may occur due to variations in rainfall, irrigation practice, and other factors not evident at the time measurements were made.

2.8 LABORATORY TESTING

We performed laboratory tests on selected soil samples to evaluate their engineering properties. For this project, we performed moisture content, dry density, unconfined compression, plasticity index, and hydrometer. Moisture contents and dry densities are recorded on the boring logs in Appendix A; other laboratory data are included in Appendix B.

In addition, corrosivity testing and analysis of near-surface soil samples collected during boring drilling was performed by CERCO Analytical. The results are presented in Appendix B.

3.0 CONCLUSIONS

From a geotechnical engineering viewpoint, in our opinion, the site is suitable for the proposed development, provided the geotechnical recommendations in this report are properly incorporated into the design plans and specifications.

The primary geotechnical concerns that could affect development on the site are existing fill, groundwater, slope stability, and seismically induced settlement. We summarize our conclusions below.

3.1 EXISTING FILL

Based on the data from our borings and test pits, the site is underlain by fill. Since the placement of the existing fill is unknown, the fill will be considered as non-engineered. As described previously, the fill depth encountered ranged from 2 feet to 8 feet. The approximate depth of this non-engineered fill is shown in Figure 3.

In addition, as discussed in our Phase II Environmental Site Assessment (ENGEO, 2022), several former underground storage tanks (USTs) were located at the eastern side of the site. The locations of these USTs are approximately shown on Figure 3. These former USTs were removed, and the excavations were backfilled with soil. We provide grading recommendations for the backfill of these former USTs in Section 5.1.

Non-engineered fill can undergo excessive settlement, especially under new fill or building loads. Without proper documentation of existing fill placed on the site, we recommend complete removal and recompaction of the existing fill. We present fill removal recommendations in Section 5.2.

3.2 EXPANSIVE SOIL

We observed potentially expansive clay near the surface of the site. Our laboratory testing indicates that this soil exhibits moderate to high shrink/swell potential with variations in moisture content.

Expansive soil changes in volume with changes in moisture. They can shrink or swell and cause heaving and cracking of slabs-on-grade, pavements, and structures founded on shallow foundations. Building damage due to volume changes associated with expansive soil can be reduced by: (1) using a rigid mat foundation that is designed to resist the settlement and heave of expansive soil, (2) deepening the foundations to below the zone of moisture fluctuation, i.e. by using deep footings or drilled piers, and/or (3) using footings at normal shallow depths but bottomed on a layer of select fill having a low expansion potential.

Post-tensioned mat foundations are the preferred foundation system for the residential structures. Design criteria for this foundation type are presented in Section 6.1.

Successful performance of structures on expansive soil requires special attention during construction. It is imperative that exposed soil be kept moist prior to placement of concrete for foundation construction. It can be difficult to remoisturize clayey soil without excavation, moisture conditioning, and recompaction.

3.3 SEISMIC HAZARDS

Potential seismic hazards resulting from a nearby moderate to major earthquake can generally be classified as primary and secondary. The primary effect is ground rupture, also called surface faulting. The common secondary seismic hazards include ground shaking and ground lurching. The following sections present a discussion of these hazards as they apply to the site. Based on topographic and lithologic data, the risk of regional subsidence or uplift, landslides, tsunamis or seiches is considered low to negligible at the site. Seismic hazards include ground rupture, ground shaking, liquefaction, and lateral spreading are discussed in the following sections.

3.3.1 Ground Rupture

Since there are no known active faults crossing the property and the site is not located within an Earthquake Fault Special Study Zone, it is our opinion that ground rupture is unlikely at the subject property.

3.3.2 Ground Shaking

An earthquake of moderate to high magnitude generated within the San Francisco Bay region could cause considerable ground shaking at the site, similar to that which has occurred in the past. To mitigate the shaking effects, structures should be designed using sound engineering judgment and the 2022 California Building Code (CBC) requirements, as a minimum. Seismic design provisions of current building codes generally prescribe minimum lateral forces, applied statically to the structure, combined with the gravity forces of dead and live loads. The code prescribed lateral forces are generally considered to be substantially smaller than the comparable forces that would be associated with a major earthquake. Therefore, structures should be able to: (1) resist minor earthquakes without damage, (2) resist moderate earthquakes without structural damage but with some nonstructural damage, and (3) resist major earthquakes without collapse but with some structural as well as nonstructural damage. Conformance to the current building code recommendations does not constitute any kind of guarantee that significant structural damage would not occur in the event of a maximum magnitude earthquake; however, it is reasonable to expect that a well-designed and well-constructed structure will not collapse or cause loss of life in a major earthquake (SEAOC, 1996).

3.3.3 Liquefaction

The site is located within a State of California Seismic Hazard Zone (CGS, 2006) for areas that may be susceptible to liquefaction (Figure 7). Soil liquefaction results from loss of strength during cyclic loading, such as imposed by earthquakes. Soil most susceptible to liquefaction is clean, loose, saturated, uniformly graded, fine-grained sand. Empirical evidence indicates that loose to medium-dense gravel, silty sand, low-plasticity silt, and some low-plasticity clay are also potentially liquefiable. When seismic ground shaking occurs, the soil is subjected to cyclic shear stresses that can cause excess hydrostatic pressures to develop. If excess hydrostatic pressures exceed the effective confining stress from the overlying soil, it is said to have liquefied, and if the sand consolidates or vents to the surface during and following liquefaction, ground settlement and surface deformation may occur. In addition to liquefaction of sandy materials, clayey soil can also undergo “cyclic softening” or strength loss as a result of cyclic loading. Since the site is composed of many thick clay layers, we considered this effect in our analyses.

We performed an evaluation of liquefaction potential for the project site based on our CPT data using the computer software CLiq (Version 3.4.1.4) developed by GeoLogismiki. The software incorporates the procedure introduced by the 1996 National Center for Earthquake Engineering Research (NCEER) workshop and the 1998 NCEER/National Science Foundation (NSF) workshop. The workshops are summarized by Youd et al. (2001) and updated by Robertson (2009). This software also incorporates the method introduced by Idriss and Boulanger (2008) and updated by Boulanger and Idriss (2014).

As discussed earlier, groundwater found at the site ranges from 5.2 to 16 feet bgs. We used an assumed groundwater depth of 5 feet in our analysis. We estimated the Cyclic Stress Ratio (CSR) for a peak ground acceleration (PGA_M) value of 0.85g with an earthquake magnitude of 7.01 based on our deaggregation of the hazard at a spectral period of the peak ground acceleration for a 2475-year return period (Table 3.6-1). To consider the reduction in induced shear stresses and number of shear stress cycles transmitted to deeper soil layers as a result of the initial liquefaction of surficial layers, we also implemented a depth weighting factor in accordance with Cetin (2009), which applies weighting of volumetric strain with depth and is appropriate to utilize when calculating surface settlements in accordance with the methodology presented by Zhang et al. (2002). As a result, the contribution of settlement of deeper soil layers to ground surface settlement is reduced.

To assess liquefaction-induced settlement, we considered the methodology presented by Zhang et al. (2002). We performed our liquefaction assessment based on the methodology by Boulanger and Idriss (2014). Our analysis results indicate that the layers of sand and silty/clayey sand from 5 to 35 feet bgs are susceptible to liquefaction. In general, based on analysis results, we estimated a total liquefaction-induced settlement of up to approximately 2½ inches, with a differential settlement of 1¼ inches over a span of 50 feet for the majority areas of the site. As described in Section 2.6, the thickness of sand layers was notably thicker towards the southeastern portion of the site. We estimated a total liquefaction-induced settlement of up to approximately 5 inches, with a differential settlement of up to 2½ inches over 50 feet for the southeastern corner of the site. The approximate delineation of the area with higher liquefaction-induced settlement is shown in Figure 2. The results of our analyses are included in Appendix C.

Our exploration data and analysis results indicate that there is a layer of non-liquefiable material at least 5 to 10 feet thick above the sandy materials that are considered to have a liquefaction potential. Towards the center and western side of the site, the thickness of the liquefiable material ranges from approximately 3 to 5 feet thick. Therefore, the risk of sand boils is considered low. On the eastern side of the property, the layer of liquefiable sand is thicker, ranging from 5 to 7 feet thick. Therefore, some surface manifestation, such as sand boil, is possible at these locations.

3.3.4 Lateral Spreading

Lateral spreading involves lateral ground movements caused by seismic shaking. These lateral ground movements are often associated with a weakening or failure of an embankment or soil mass overlying a layer of liquefied sand or weak soil. As discussed in Section 2.6, the sand layers vary across the site and range from approximately 5 feet to 15 feet thick, with the sand layers generally being thickest at the east and west of the site and become thinner or diminished at the middle of the site. As a result, some of the sand layers are isolated and not continuous. We conducted slope stability analyses of the open channel northwest of the property for lateral spreading risk, which are discussed in the later section.

3.3.5 Ground Lurching

Ground lurching is a result of the rolling motion imparted to the ground surface during energy released by an earthquake. Such rolling motion can cause ground cracks to form in weaker soil. The potential for the formation of these cracks is considered greater at contacts between deep alluvium and bedrock. Such an occurrence is possible at the site as in other locations in the Bay Area region, but based on the site location, it is our opinion that the offset is expected to be minor. We provide recommendations for foundation and pavement design in this report that are intended to reduce the potential for adverse impacts from lurch cracking.

3.3.6 Flooding

According to the flood map by FEMA (2009), the area along the channel is mapped within a special flood hazard area (Zone AE) with a flood elevation of 31 feet, and the remainder of the project site is mapped within an area of minimal flood hazard (Zone X). The civil engineer should review pertinent information relating to possible flood levels for the subject site based on final pad elevations and provide appropriate design measures for development of the project, if recommended.

3.4 COMPRESSIBLE SOIL

Based on the existing grades near to the street elevation, additional fill will not be anticipated during site grading. In our exploration, we generally encountered stiff to very stiff clay that is considered unlikely to undergo consolidation settlement due to the types of loads imposed from the proposed townhome structures. We encountered one approximately 3-foot-thick layer of soft, elastic silt at approximately 35 feet bgs. However, this layer is located relatively deep and appears to be discontinuous in our exploration. The effect of the building load to this soft silt layer is minimal. Therefore, the risk of post-construction consolidation settlement is considered low. Once we receive the final site grading concept and building load, we can re-evaluate the consolidation settlement.

3.5 SLOPE STABILITY ANALYSES

We conducted slope stability analyses for static and pseudo-static conditions using the computer program Slide2 (Build 9.020). Slide2 is a limit equilibrium program that allows the user various search routines to locate the minimum factor of safety and critical slip surface. For our analyses, we used the Spencer's Method.

Prior to performing slope stability analyses, we developed a subsurface profile and assigned soil strengths based on our data from explorations and laboratory tests. The shear strengths used in the slope stability analyses are based on the test data and empirical correlations of blow counts, plasticity index (PI), and soil type. For pseudo-static conditions, the sand layers as described in Section 2.6 are considered liquefiable. Two layers of sand with liquefaction potential are included in the slope stability model. We considered one 4-foot layer of liquefiable material below the fill and another 8-foot layer of liquefiable sand at 19 feet below ground surface. For the seismic slope stability analysis, we estimated the residual strength of the liquefied soil based on the correlation of blow counts to residual strength from "SPT-based analysis of cyclic pore pressure generation and undrained residual strength" (Seed and Harder, 1990). The lower bound estimate of the residual strength of the liquefied soil was used. Based on the current site plan provided (WHA, 2022), the townhomes will be located 5½ feet away from the top of slope. We assumed an average load of 450 psf for these townhomes.

In performing our slope stability analyses for seismic condition, we used an acceleration of two-thirds of the Geometric Mean Maximum Considered Earthquake peak ground acceleration (PGA_M) of 0.85g, corresponding to the estimated 2022 CBC seismic design parameters. In addition, we performed a "pseudo-static" screening analysis, as recommended in "Guidelines for Evaluating and Mitigating Seismic Hazards in California" (SP117A) by California Geological Survey (CGS). For this screening analysis, we selected a seismic coefficient of 0.22g for an assumed displacement threshold of about 15 centimeters (approximately 6 inches). It is important to note that developers of this simplified approach to estimating displacement consider the results of these analyses to be indices of expected seismic performance and not predictions of actual slope displacement amount or location of displacement.

We performed slope stability analyses for static and pseudo-static conditions. For static conditions, we considered slopes with a factor of safety of greater than 1.5 to be considered stable. Slopes that have a factor of safety greater than 1.0 using a seismic coefficient derived from the screening analysis procedure of Stewart and others (2003) can be considered stable.

To arrive with the adequate factors of safety under static and seismic conditions, two layers of geogrids of 15 feet long, Tensar UX1400MSE, placed at depths of 2 feet and 3 feet bgs are required. We modeled the geogrid with the strength data acquired from the manufacturer's website. Further discussion of geogrid reinforcement is included in Section 5.3. Provided that geogrid reinforced subgrade is installed below the buildings along the western property line, the proposed building setback distance from the western channel is considered adequate.

Based on the results of our analysis, the creek bank should remain stable under seismic condition. However, it should be noted that for areas not mitigated with geogrid reinforcement, long-term creep/sloughing of the creek bank is possible and should be expected. Graphical results of our slope stability analysis are presented in Appendix D.

3.6 SOIL CORROSION POTENTIAL

As part of this study, we obtained representative near-surface soil samples during drilling and submitted to a qualified analytical lab for determination of pH, resistivity, sulfate, and chloride. The results are included in Appendix B and summarized in the table below.

TABLE 3.6-1: Corrosivity Test Results

SAMPLE LOCATION	DEPTH	PH	RESISTIVITY (OHMS-CM)	CHLORIDE (MG/KG)	SULFATE (MG/KG)
2-B1	2.5’	7.00	4,200	N.D.	N.D.
2-B3	2.5’	9.15	1,400	85	N.D.

* ASTM D4327

The 2022 CBC references the 2019 American Concrete Institute Manual, ACI 318-19, Section 19.3.1 for concrete durability requirements. ACI Table 19.3.1.1 provides the following exposure categories and classes, and Table 19.3.2.1 provides requirements for concrete in contact with soil based upon the exposure class.

TABLE 3.6-2: ACI Table 19.3.1.1: Sulfate Exposure Category and Classes

CATEGORY	CLASS	CONDITION	
		WATER- SOLUBLE SULFATE IN SOIL % BY WEIGHT*	DISSOLVED SULFATE IN WATER MG/KG (PPM)**
S Sulfate	S0	$SO_4 < 0.10$	$SO_4 < 150$
	S1	$0.10 \leq SO_4 < 0.20$	$150 \leq SO_4 \leq 1,500$ seawater
	S2	$0.20 \leq SO_4 \leq 2.00$	$1,500 \leq SO_4 \leq 10,000$
	S3	$SO_4 > 2.00$	$SO_4 > 10,000$

* Percent sulfate by mass in soil determined by ASTM C1580
**Concentration of dissolved sulfates in water in ppm determined by ASTM D516 or ASTM D4130

Based on the test results, the site soil can be classified as S0. Considering sulfate exposure of S0, there is no requirement for cement type or water-cement ratio; however, a minimum concrete compressive strength of 2,500 psi is specified by the building code. For this sulfate range, we recommend Type II cement and a concrete mix design for building foundations that incorporates a maximum water-cement ratio of 0.50. However, it should be noted that the structural engineering design requirements for concrete may result in more stringent concrete specifications.

Brief corrosivity evaluation of the near-surface soil is presented by CERCO in Appendix B. If desired to investigate this further, we recommend a corrosion consultant be retained to evaluate if specific corrosion recommendations are advised for the project.

3.7 2022 CALIFORNIA BUILDING CODE (CBC) SEISMIC DESIGN PARAMETERS

The 2020 CBC utilizes seismic design criteria established in the ASCE/SEI Standard "Minimum Design Loads and Associated Criteria for Buildings and Other Structures," (ASCE 7-16). Based on the subsurface conditions encountered and shear wave measurements, we characterized the site as Site Class D.

ASCE 7-16 requires a site-specific ground-motion hazard analysis for Site Class D sites with a mapped S_1 value greater than or equal to 0.2. However, Section 11.4.8 of ASCE 7-16 and Supplement No. 3 provide an exception to this requirement. A site-specific ground-motion hazard analysis is not required where the value of the parameter S_{M1} determined by Equation 11.4-2 and shown in Table 1 is increased by 50 percent for developing the mapped Risk-Targeted Maximum Considered Earthquake (MCE_R) spectral response, calculating S_{D1}, and evaluating C_s in accordance with Chapter 12 of ASCE 7-16.

In Table 3.7-1 below, we provide the CBC seismic parameters based on the United States Geological Survey's (USGS') Seismic Design Maps for your use. When using this table, considerations should be given to exceptions in Section 11.4.8 of ASCE 7-16, as described in this report.

TABLE 3.7-1: 2022 CBC Seismic Design Parameters, Latitude: **37.532129** Longitude: **-122.008132**

PARAMETER	VALUE
Site Class	D
Mapped MCE_R Spectral Response Acceleration at Short Periods, S_S (g)	1.83
Mapped MCE_R Spectral Response Acceleration at 1-second Period, S_1 (g)	0.70
Site Coefficient, F_a	1.00
Site Coefficient, F_v	1.70*
MCE_R Spectral Response Acceleration at Short Periods, S_{MS} (g)	1.82
MCE_R Spectral Response Acceleration at 1-second Period, S_{M1} (g)	1.19*
Design Spectral Response Acceleration at Short Periods, S_{DS} (g)	1.22
Design Spectral Response Acceleration at 1-second Period, S_{D1} (g)	0.79*
Mapped MCE Geometric Mean (MCE_G) Peak Ground Acceleration, PGA (g)	0.77
Site Coefficient, F_{PGA}	1.1
MCE_G Peak Ground Acceleration adjusted for Site Class effects, PGA_M (g)	0.85
Long period transition-period, T_L (sec)	12

*The parameters above should only be used for calculation of T_s, determination of Seismic Design Category, and, when taking the exceptions under Items 1 and 2 of ASCE 7-16 Section 11.4.8. (Supplement Number 3 https://ascelibrary.org/doi/epdf/10.1061/9780784414248.sup3).

We recommend that we collaborate with the structural engineer of record to further evaluate the effects of taking the exception on the structural design and identify the need for performing a site-specific ground-motion hazard analysis. We can prepare a proposal for a site-specific ground-motion hazard analysis, if requested.

4.0 CONSTRUCTION MONITORING

Our experience and that of our profession clearly indicate that the risk of costly design, construction, and maintenance problems can be significantly lowered by retaining the design geotechnical engineering firm to:

1. Review the final grading and foundation plans, and specifications prior to construction to evaluate whether our recommendations have been implemented, and to provide additional or modified recommendations, as needed. This also allows us to check if any changes have occurred in the nature, design or location of the proposed improvements and provides the opportunity to prepare a written response with updated recommendations.
2. Perform construction monitoring to check the validity of the assumptions we made to prepare this report. Earthwork operations should be performed under the observation of our representative to check that the site is properly prepared, the selected fill materials are satisfactory, and that placement and compaction of the fill has been performed in accordance with our recommendations and the project specifications. Sufficient notification to us prior to earthwork is important.

If we are not retained to perform the services described above, then we are not responsible for any party's interpretation of our report (and subsequent addenda, letters, and verbal discussions).

5.0 EARTHWORK RECOMMENDATIONS

As used in this report, relative compaction refers to the in-place dry unit weight of soil expressed as a percentage of the maximum dry unit weight of the same soil, as determined by the ASTM D1557 laboratory compaction test procedure, latest edition. Compacted soil is not acceptable if it is unstable; it should exhibit only minimal flexing or pumping, as observed by an ENGEO representative. The term "moisture condition" refers to adjusting the moisture content of the soil by either drying if too wet or adding water if too dry.

We define "structural areas" as any area sensitive to settlement of compacted soil. These areas include, but are not limited to building pads, sidewalks, pavement areas, and retaining walls.

5.1 GENERAL SITE CLEARING

Areas to be developed should be cleared of surface and subsurface deleterious materials, including existing building foundations, slabs, buried utility and irrigation lines, pavements, debris, and designated trees, shrubs, and associated roots. According to the existing conditions as shown on the Tentative Map by cbg and dated November 2, 2022, underground utilities exist between Parcel 1 and Parcel 2 of the site. If any of these utilities will be abandoned from the site, the utility pipe and its backfill should be removed entirely and the ends of the pipeline should be properly capped. Test pit backfill below finished grades should be removed and recompacted as engineered fill.

As discussed in our Phase II Environmental Assessment report (ENGEO, 2022), several monitoring wells, and former USTs existed on the eastern portion of the site. We understand that the monitoring wells will be properly demolished and removed prior to grading activities on site. The former USTs were removed, and the excavations were backfilled with soil. The backfill for the former USTs will need to be removed and recompacted as engineered fill. The approximate locations of these former USTs are shown in Figure 3.

Following clearing, the site should be stripped to remove surface organic materials. Strip organics from the ground surface to a depth of at least 2 to 3 inches below the surface. Tree roots should be removed down to a depth of at least 3 feet below existing grade. Remove stripping's from the site or, if considered suitable by the landscape architect and owner, use them in landscape fill. Any surficial soil that will be retained for future use in landscape areas should be stockpiled in areas where it will not interfere with grading operations.

Within the development areas, excavations resulting from demolition, stripping, and tree root removal, which extend below final grades, should be cleaned to firm undisturbed soil as determined by our field representative. No loose or uncontrolled backfilling of depressions resulting from demolition and stripping is permitted. The surface should then be scarified, moisture conditioned, and backfilled with compacted engineered fill. The requirements for backfill materials and placement operations are the same as for engineered fill.

5.2 EXISTING NON-ENGINEERED FILL REMOVAL

Existing fill should be removed to competent native soil, as evaluated by ENGEO. Figure 3 displays the approximate extent and thickness of existing fill at the site and the location of former USTs. For areas of UST backfill removal that are within the proposed structure footprint, the building pad may contain a differential fill thickness. If a differential fill thickness is more than 10 feet within the building footprint, local subexcavation and replacement by engineered fill will be necessary to maintain a differential fill thickness of 10 feet.

5.3 FOUNDATION SUBGRADE REINFORCEMENT

As discussed previously, we recommended the subgrade of the townhome structures be overexcavated and replaced with geogrid-reinforced backfill along the western limit of the buildings.

We recommend two layers of geogrid, Tensar UX1400MSE or approved equivalent, be placed underneath the western side of the structures; the geogrid should be placed 2 feet and 3 feet bgs, respectively. The geogrid should be at least 15 feet long and extend 2 feet laterally beyond the western edge of the proposed structure footprints.

5.4 OVER-OPTIMUM SOIL MOISTURE CONDITIONS

The contractor should anticipate encountering excessively over-optimum (wet) soil moisture conditions during winter or spring grading, or during or following periods of rain. Wet soil can make proper compaction difficult or impossible. Wet soil conditions can be mitigated by:

1. Frequent spreading and mixing during warm dry weather,
2. Mixing with drier materials,
3. Mixing with a lime, lime-flyash, or cement product, or
4. Stabilizing with aggregate or geotextile stabilization fabric, or both.

Options 3 and 4 should be evaluated by ENGEO prior to implementation.

5.5 ACCEPTABLE FILL

On-site soil material is suitable as fill material provided it is processed to remove concentrations of organic material (soil which contains more than 3 percent organic content by weight), debris, and particles greater than 8 inches in maximum dimension.

Imported fill materials should meet the above requirements and have a plasticity index less than 12, and at least 20 percent passing the No. 200 sieve. Allow ENGEO to sample and test proposed imported fill materials at least 5 days prior to delivery to the site.

5.6 REUSE OF ON-SITE RECYCLED MATERIALS
