

To Whom It May Concern,

I am writing on behalf of my patient, Riley Stevens, who has a diagnosis of Autism, global developmental delays and sensory processing disorder. He is also nonverbal and known to be at high risk of elopement. It is critical he receive adequate rest/sleep. Early morning noises or disturbance can affect behaviors, emotional regulation and daily functioning. Sleep disturbance in children with autism has a much greater impact than a typically developing child. Please allow for accommodations related to his disability. Thank you and please contact me with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Clarisa Smith MD', with the letters 'MD' written in a smaller font to the right of the signature.
