Reconstruct 3/4 Intersection
City of Ramsey
Anoka County

8/13/2010

T.H. 10 at Feldspar St.

Reconstruct the in-place 3/4 intersection to provide better assignment of access and decrease the median openings. Original construction of the median to eliminate certain movements did not prohibit the desired restriction of movements. Reconstructing the current geometry will better define the movements allowed and eliminate confusion of the drivers. New signing and striping will also be added for differentiating movements.
