

Recycling in Minnesota reduces greenhouse gas emissions.

Making products from Minnesota's recycled material saves energy and reduces pollution by an amount equivalent to taking over a million cars off the road every year.

Recycling means manufacturing jobs in Minnesota.

Recycling creates jobs in manufacturing, transportation, and other industries. For every ton of waste recycled, 12 new jobs are created.

Help your school recycle

484,000 lbs. of waste is generated in Minnesota schools each day.

28% of school waste can be recycled.

Add a composting program to your recycling program, and more than 75% of school waste could be diverted from the trash.

Check out our school recycling toolkit at
