ASTM F1487

The lay-out for this custom playscape, design number MW010524-1, has been configured to meet the requirements of the ASTM F1487 standard. In addition, each of the above components listed as "Certified" have been tested and are IPEMA certified. Components listed as "Not Applicable" do not fall within the scope of the ASTM F1487 standard and have not been tested. IPEMA certification can be verified on the IPEMA website, www.ipema.org. In the interest of playground safety, IPEMA provides a Third Party Certification Service which validates compliance.

2010 ADA Standards for Accessible Design

The lay-out was also designed to meet the 2010 Standards published 15-Sep-2010, by the Department of Justice when installed over a properly maintained surfacing material that is in compliance with ASTM F1951 "Accessibility of Surface Systems Under and Around Playground Equipment" as well as ASTM F1292, "Impact Attenuation of Surfacing Materials Within the Use Zone of Playground Equipment", appropriate for the fall height of the structure.

Installation Times

Installation times are based on one experienced installer. A crew of three experienced individuals can perform the installation within the given time, each member working 1/3 of the given hours. [Eg. Installation Time = 30 hours. For a crew of three, each member will work 10 hours on the installation for a total of 30 hours on the project.]

Carbon Footprint

The CO2e (carbon footprint given in Kilograms and Metric Tons) listed above is a measure of the environmental impact this play structure represents from harvesting raw materials to the time it leaves our shipping dock. Playworld Systems nurtures a total corporate culture that is focused on eliminating carbon producing processes and products, reducing our use of precious raw materials, reusing materials whenever possible and recycling materials at every opportunity. Playworld Systems elected to adopt the Publicly Available Specification; PAS 2050 as published by the British Standards Institute and sponsored by Defra and the Carbon Trust. The PAS 2050 has gained international acceptance as a specification that measures the greenhouse gas emissions in services and goods throughout their entire life cycle.

Pre-Consumer Recycle Content

A measurement, in pounds, that qualifies the amount of material that was captured as waste and diverted from landfill during an initial manufacturing process and is being redirected to a separate manufacturing process to become a different product. E.g. 100% of our Aluminum Tubing is made from captured waste material during the manufacturing process of extruded Aluminum products such as rods, flat bars and H-channels.

Post-Consumer Recycle Content

A measurement, in pounds, that qualifies the amount of material that was once another product that has completed its lifecycle and has been diverted from a landfill as a solid waste through recycling and is now being used in a Playworld Systems' product. E.g. **20% to 40% of the steel in our steel tubing and sheet steel have been diverted from landfills. Automobiles are scrapped and recyclable steel is purchased by the steel mill that produces our raw product.

** The amount of Post-Consumer recycled steel fluctuates daily based on the availability of the recycled steel.

ASTM F1487

The lay-out for this custom playscape, design number MW010524-2, has been configured to meet the requirements of the ASTM F1487 standard. In addition, each of the above components listed as "Certified" have been tested and are IPEMA certified. Components listed as "Not Applicable" do not fall within the scope of the ASTM F1487 standard and have not been tested. IPEMA certification can be verified on the IPEMA website, www.ipema.org. In the interest of playground safety, IPEMA provides a Third Party Certification Service which validates compliance.

2010 ADA Standards for Accessible Design

The lay-out was also designed to meet the 2010 Standards published 15-Sep-2010, by the Department of Justice when installed over a properly maintained surfacing material that is in compliance with ASTM F1951 "Accessibility of Surface Systems Under and Around Playground Equipment" as well as ASTM F1292, "Impact Attenuation of Surfacing Materials Within the Use Zone of Playground Equipment", appropriate for the fall height of the structure.

Installation Times

Installation times are based on one experienced installer. A crew of three experienced individuals can perform the installation within the given time, each member working 1/3 of the given hours. [Eg. Installation Time = 30 hours. For a crew of three, each member will work 10 hours on the installation for a total of 30 hours on the project.]

Carbon Footprint

The CO2e (carbon footprint given in Kilograms and Metric Tons) listed above is a measure of the environmental impact this play structure represents from harvesting raw materials to the time it leaves our shipping dock. Playworld Systems nurtures a total corporate culture that is focused on eliminating carbon producing processes and products, reducing our use of precious raw materials, reusing materials whenever possible and recycling materials at every opportunity. Playworld Systems elected to adopt the Publicly Available Specification; PAS 2050 as published by the British Standards Institute and sponsored by Defra and the Carbon Trust. The PAS 2050 has gained international acceptance as a specification that measures the greenhouse gas emissions in services and goods throughout their entire life cycle.

Pre-Consumer Recycle Content

A measurement, in pounds, that qualifies the amount of material that was captured as waste and diverted from landfill during an initial manufacturing process and is being redirected to a separate manufacturing process to become a different product. E.g. 100% of our Aluminum Tubing is made from captured waste material during the manufacturing process of extruded Aluminum products such as rods, flat bars and H-channels.

Post-Consumer Recycle Content

A measurement, in pounds, that qualifies the amount of material that was once another product that has completed its lifecycle and has been diverted from a landfill as a solid waste through recycling and is now being used in a Playworld Systems' product. E.g. **20% to 40% of the steel in our steel tubing and sheet steel have been diverted from landfills. Automobiles are scrapped and recyclable steel is purchased by the steel mill that produces our raw product.

** The amount of Post-Consumer recycled steel fluctuates daily based on the availability of the recycled steel.

NO FAULT SAFETY SURFACE
PRODUCT WARRANTY - Five (5) Yr. FULL

NO FAULT LLC
3112 Valley Creek Drive, Ste. C
Baton Rouge, LA 70808
225-215-7760 www.nofault.com

Project Name: SAMPLE WARRANTY
Address:

NF Job No.:
Customer:
Date of Completion:

NO FAULT LLC ("NF") warrants to the original purchaser (established as "Customer" above) that the No Fault Safety Surface ("NFSS"), installed under the above referenced Project, will conform to the NFSS specifications and remain free from defects in materials and workmanship for a period of five (5) years, per the terms and conditions provided herein.

This limited warranty shall provide for one hundred percent (100%) of the cost to repair or replace of any defective materials or workmanship in the surface area(s) that fail during the warranty period. This includes a failure of the surface to maintain impact attenuation values at or below 1000 HIC and/or 200 GMAX, when tested in accordance with the ASTM F1292 version effective at the time of installation. This warranty shall commence on the date of substantial completion (as established above) and shall expire exactly three years later. This limited warranty is expressly made in lieu of any other warranties and is exclusive to the original Customer.

All warranty claims shall be made in writing to NF within thirty (30) days of the Customer's knowledge thereof. The written notification from the Customer shall include the following: the date of the first notice of the failure, details of the failure, photos of the failed area and a request for a warranty claim meeting with NF at the installation site (if applicable). NF shall determine the validity of all claims after sufficient evidence has been gathered. NF shall then replace, repair, or make a refund for any claims validated by it. Any refund, credit or allowance provided to the Customer on a warranty claim is exercisable only if said allowance is used to accommodate replacement with NF's then current surfacing system. NF's liability for warranty claims shall in no event exceed the cost of repair or replacement of such area(s) that have failed. Customer agrees that in no event shall NF have any liability to Customer for loss of use or loss of profits or any form of consequential damages.

Any dispute as to whether and to what extent there is a NFSS product failure and subsequent valid warranty claim within the meaning of this warranty shall be initially dealt with by joint investigation and discussion between NF and Customer in order to achieve a mutually agreeable solution. If a solution cannot be reached within thirty (30) days, then either the Customer or NF may submit the matter to an accredited arbitrator who is a member of the American Arbitration Association and who shall make a determination in accordance with the rules and regulation of the American Arbitration Association. The decision of the Arbitrator shall be binding on both parties.

This warranty does not include normal wear and tear, discoloration or fading as a result of ultraviolet rays, shrinkage (which is an inherent characteristic of elastic rubber), any damages to the surface during the curing period, or improper sub-base design or construction, including but not limited to surface cracking along expansion joints or separating from an adjacent border, curb, walkway, or existing surface. If the underlying sub-base materials fail for any reason whatsoever (including hydrostatic pressure, cracking, shifting, heaving), then NF's warranty shall be rendered invalid.

NF is under no obligation or responsibility to repair and/or replace the NFSS product if damaged by lawn and landscaping equipment; vehicular traffic; vandalism (including burns, cuts, gouges, etc.); product misuse, abuse or alteration; improper drainage; improper or lack of maintenance; any foreign residue that may be deposited on the surface; any foreign matter from surrounding areas (i.e. any substance other than those indicated on NF's MSDS sheets) that may be siphoned through, migrated in, lodged in and/or harden the surface; sharp objects (high heels, spikes, etc.); use of unapproved cleaning materials; or acts of God.

Specifically regarding Underwater, Water Play, and Pool-deck applications, foreign or excessive chemicals in the water can cause potential damage to the NFSS product resulting in fading, chalking, bleeding, and/or degradation. Pool chemicals and water treatments such as "Ozone" and chlorine levels with a ppm of greater than 3 will harm and degrade the NFSS product. NF will not warrant the NFSS product when foreign or excessive chemicals are used in or around the surface installation. NF will not warrant against mold or mildew caused by improper drainage and/or improper sloping around the pool area, sauna area, steam area or shower area. Recommended minimum slope for positive drainage is 2% for areas over 2000 SF.

Customer acknowledges that the limited warranty will be voided if the Customer fails to follow the NFSS Maintenance Guidelines (attached hereto); keep maintenance and impact attenuation testing records; or fails to make payment in a timely manner as per the terms and conditions of the agreed contract. Customer also acknowledges and agrees that it will not, under any circumstance, make alterations to the NFSS without the written authorization of NF. Any unauthorized alteration by the Customer could result in the termination of any existing warranty for the NFSS and shall also give rise to the duty of the Customer to hold harmless, defend and indemnify NF from any claim, suit or cause of action, personal injury, death, or property damage arising out of or related to said alteration.

WARNING: Surface areas can become extremely hot due to exposure of direct sunlight. Shoes and/or socks must be worn at all times. Customer is responsible for proper supervision of children when in contact with the surface. In addition, warning signs are recommended to be posted in all areas to prevent small children from touching or crawling on to surface areas that may be hot due to extended sun exposure in excessive temperatures. During winter and/or seasons when temperatures fall below 32°F, the impact attenuation performance of the NFSS system can be compromised. In this case, it is recommended to discontinue use until surface is no longer frozen. No Fault Sport Group assumes no liability to such exposure of surfacing temperature as this should be monitored prior to use of surfacing. No Fault Sport Group also assumes no liability to the expansion and contraction of the surfacing during freeze/thaw events.

NO REPRESENTATIVE OF THE SELLER HAS AUTHORITY TO MAKE ANY REPRESENTATION OR PROMISES EXCEPT AS STATED HEREIN. THERE ARE NO WARRANTIES EITHER EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE THAT EXTEND BEYOND THE WARRANTIES CONTAINED IN THIS DOCUMENT. NF SHALL NOT BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL OR OTHER DAMAGES TO THE STRUCTURE OR ITS CONTENTS ARISING UNDER ANY THEORY OF LAW WHATSOEVER.
