

# SPRING EQUINOX STARWATCH PARTY

On Tuesday, March 19, the Spring Equinox marks a balance of day and night in the Northern Hemisphere. Our days will gradually lengthen as we approach the Summer Solstice on June 20. Celebrate this increase in daylight with us through a captivating exploration of the night sky on Saturday, March 23. Delve into the stories behind the constellations and marvel at celestial wonders through two of Minnesota's largest mobile telescopes, offering close-up views of faraway objects.

Mike Lynch, a retired meteorologist with WCCO Radio and a veteran of over 50 years in astronomy, will guide us through a tour of visible celestial subjects such as the moon, planets, star clusters, galaxies and more. He'll also showcase a telescope-astrophotography system for glimpsing distant galaxies. Mike, an author and columnist, brings unparalleled expertise to this stargazing adventure.

Feel free to bring lawn chairs and blankets for comfort. The event is primarily outdoors, so dress warmly. Indoor facilities are available for restroom access and warming up.

**Registration is required.**

**Saturday, March 23  
7:45-9:45 p.m.**

**Elmcrest Park  
16303 Quicksilver St NW**

**Cost: \$12.50 per person**

**Max Enrollment: 30**
